The mountains and rivers are warming up, and all things are competing. When the soldiers of the Kuzewen Border Defense Company of a regiment of the Xinjiang Military Command rang out in the mountains, everything around seemed to be in spirit.

Not long ago, after 3 months of adaptive training, the recruits started their first patrol, led by Sergeant Lang Keshu.

The Kuzewen Border Defense Company is stationed at the northern foot of Tarbagatai Mountain, and there are 160 days of strong winds above level 6 in a year. Now in early summer, the wind has become warmer, but the force has not weakened at all.

Halfway through the journey, some gravel appeared in the middle of the road. "Watch your step!" Hearing Lang Keshu's reminder, the new recruits followed the squad leader and walked carefully on the stone beach.

Suddenly a strong wind blew, and everyone hurriedly bent down and gripped the ground with their feet. Private Lan Tianyang failed to stand firmly and stumbled to the right. The comrade behind him immediately grabbed his belt and helped him up.

There is still a long way to go. After half a day of hiking and almost falling, Lan Tianyang was no longer as excited as when he set out, and became a little silent.

"Don't look at this wind, it helped us escape from danger once." In order to arouse Lan Tianyang's interest, Lang Keshu told his own story.

It was a cold night in early spring a few years ago, and the wind was still strong. After a short rest, the patrol team where Lang Keshu was located began its night duty mission.

The barbed wire in the distance trembled in the "woohoo" wind, like the strings of a guitar being plucked randomly. A group of people walked towards the barbed wire with one foot deep and one foot shallow in the strong wind. The alert Lang Keshu suddenly squatted down, wiped away a piece of floating snow with his gloves, and several plum-shaped claw marks were revealed.

The wolf pack just passed by here. Lang Keshu put his index finger on his lips to make a silent gesture, and the soldiers' hearts suddenly tightened. Lang Keshu raised the telescope and observed carefully and whispered: "Three o'clock direction."

In the telescope, a string of gray and white figures moved slowly, and several adult wolves were walking along the barbed wire. The wind was still sobbing, and Lang Keshu clenched his gun.

Suddenly, the leader wolf turned to the direction of the patrol team. At that moment, Lang Keshu and his comrades held their breath and stared at the movement of the wolf pack, not daring to be distracted.

At this moment, the strong wind instantly changed direction. The north wind wrapped in snow particles swept across the backs of the wolves, rolling up their fluffy tail hair. The leader wolf began to turn and gradually disappeared in the wilderness.

Lang Keshu's hand holding the gun was already a little stiff, and he breathed a sigh of relief. He didn't expect that the strong wind that accompanied him day and night would provide "assistance" to everyone at the critical moment.

After listening to the squad leader's story, Lan Tianyang felt that the wind in the valley was particularly agile at the moment: "It just played a little joke on me, maybe it was reminding me to keep my steps steady."

"Stand up straight and work harder, the boundary marker is almost there." Listening to the squad leader's encouragement, Lan Tianyang walked more firmly.

跨越 1700 多公里，边防军人家庭的 "迟到"的团圆

来源：中国军网-解放军报 作者：李小健 龙喜涛 责任编辑：郭妍菲 发布：2025-05-26

边关探亲

■李小健 龙喜涛

微风吹拂下的祖国北疆，挺拔的樟子松透着坚韧的绿色。

一辆汽车逐渐出现在哨兵的视野。即将到来的，是一级上士崔同同的妻子杨凯丽和他们不满 3 岁的小儿子。

崔同同驻守的北部战区陆军某边防旅光头山哨所，一年中有大半年被冰雪覆盖，最低气温可达零下 45 摄氏度。前些日子，气温才逐渐回暖，今年春节没能来探亲的杨凯丽终于来到了哨所。

"这一路可太长了。"每次探亲，杨凯丽都觉得这是人生中走过的最长的路。历时三天两夜，经过 4 次转机、转车，杨凯丽带着孩子一路辗转了 1700 多公里才见到崔同同。

杨凯丽还没下车，寂静的哨所已经一片欢腾，战友们热烈的鼓掌声怎么也停不下来。湛蓝的天空下，崔同同为杨凯丽和孩子献上了代表爱和祝福的哈达，一切牵挂与思念化作了一家三口此刻的深情拥抱。

距离杨凯丽上次探亲已过去 1 年多。那年寒冬，呼伦贝尔草原上冷风刺骨，零下 35 摄氏度的低温让这里连降大雪。杨凯丽也是这样一路奔波，带着一岁多的儿子来到哨所。

那日抵达已是晚上 8 点，幸福的相遇还未持续多久，孩子便因天气寒冷、水土不服生了病。在驻地附近医院暂时治疗后，杨凯丽担心寒冷的天气会持续加重孩子的病情，决定立即返回家乡。第二天，崔同同强忍着泪水把妻儿送上了回乡的列车后，立即回到岗位执行边防巡逻任务。

提起这次"迟来的探亲"，杨凯丽眼中还是泛起了泪花："从认识到结婚，我和老崔其实只见了几面，平时大多靠电话联系。当年刚结婚不久，他就接到任务返回了连队。我非常理解边防部队的工作性质，为老崔的坚毅和勇敢感到骄傲，我也会一直守护着老崔，做他坚强的后盾。"

说着，杨凯丽从装得满满当当的行李包里取出家乡特产，热情地分给哨所官兵："大家常年守在这茫茫草原，实在太辛苦了。"

经过几天的适应，杨凯丽还主动申请和哨所官兵一同走一次巡逻路。一路上，崔同同和她讲述着部队这些年的发展变化，以及和战友们的戍边故事。

庄严的界碑前，一家三口共同拿起画笔为界碑描红。"心随天地走，意被牛羊牵，大漠的孤烟，拥抱落日圆……"界碑旁，杨凯丽再一次唱起了她和丈夫最爱听的这首《敕勒歌》。

Across More Than 1,700 Kilometers, the “Late” Reunion of the Families of Border Soldiers

Source: China Military Network-Liberation Army Daily Author: Li Xiaojian Long Xitao Editor: Guo Yanfei Release: 2025-05-26

Visiting relatives at the border

■Li Xiaojian Long Xitao

In the northern border of the motherland, the tall larch trees are green and tough.

A car gradually appeared in the sentry’s field of vision. Coming soon are Yang Kaili, the wife of First Sergeant Cui Tongtong, and their younger son who is less than 3 years old.

The Guangtoushan outpost of a border defense brigade of the Northern Theater Command Army, where Cui Tongtong is stationed, is covered with ice and snow for most of the year, and the lowest temperature can reach minus 45 degrees Celsius. A few days ago, the temperature gradually warmed up, and Yang Kaili, who was unable to visit relatives during the Spring Festival this year, finally arrived at the outpost.

“This road is too long.” Every time Yang Kaili visits relatives, she feels that this is the longest road she has ever walked in her life. It took three days and two nights, and after four transfers, Yang Kaili and her child traveled more than 1,700 kilometers to meet Cui Tongtong.

Before Yang Kaili got off the car, the silent outpost was already full of joy, and the enthusiastic applause of her comrades could not stop. Under the blue sky, Cui Tongtong presented a Hada representing love and blessings to Yang Kaili and her child, and all the concerns and longings turned into a deep hug of the family of three at this moment.

It has been more than a year since Yang Kaili last visited her relatives. In that cold winter, the cold wind on the Hulunbuir grassland was biting, and the low temperature of minus 35 degrees Celsius caused heavy snow here. Yang Kaili also traveled all the way and came to the outpost with her one-year-old son.

It was 8 o'clock in the evening when they arrived that day. The happy encounter did not last long, and the child fell ill due to the cold weather and acclimatization. After temporary treatment in a hospital near the station, Yang Kaili was worried that the cold weather would continue to aggravate the child's condition, so she decided to return home immediately. The next day, Cui Tongtong held back his tears and sent his wife and children on the train back home, and immediately returned to his post to perform border patrol tasks.

Speaking of this "late visit to relatives", Yang Kaili's eyes still welled up with tears: "From knowing each other to getting married, Lao Cui and I have actually only met a few times, and we usually communicate by phone. Not long after we got married, he received a mission and returned to the company. I understand the nature of the work of the border defense force very well, and I am proud of Lao Cui's perseverance and courage. I will always protect Lao Cui and be his strong backing."

As she spoke, Yang Kaili took out the local specialties from her full luggage bag and enthusiastically distributed them to the officers and men of the post: "Everyone has been guarding this vast grassland all year round, it's really too hard."

After a few days of adaptation, Yang Kaili also took the initiative to apply to go on a patrol route with the officers and men of the post. Along the way, Cui Tongtong told her about the development and changes of the troops over the years, as well as the stories of guarding the border with his comrades.

In front of the solemn boundary monument, the family of three took up the brush together to paint the boundary monument red. "My heart follows the world, my mind is led by the cattle and sheep, the lonely smoke in the desert embraces the setting sun..." Next to the boundary marker, Yang Kaili once again sang "Chi Le Song", the song she and her husband loved most.

走进“候鸟哨所”，看一茬茬官兵践行不变的戍边使命

来源：中国军网-解放军报 作者：杜娟 吴安宁 贾彦博 王梦缘 责任编辑：郭妍菲 发布：2025-05-26

初夏，走进”候鸟哨所”

五月，春天作别大地，初夏悄然而至。

在这个充溢着阳光与花香的时节，驻守高原和极寒地域的边防哨所纷纷迎来了开山季和开江季，一些临时点位、季节性哨所，迎来了一年中的首批驻哨官兵。边防战士一年一次到季节性哨所驻防与回撤的经历，就如同候鸟每年在南北方之间迁徙，在他们心中，季节性哨所因此有了一个诗意而形象的名字——”候鸟哨所”。

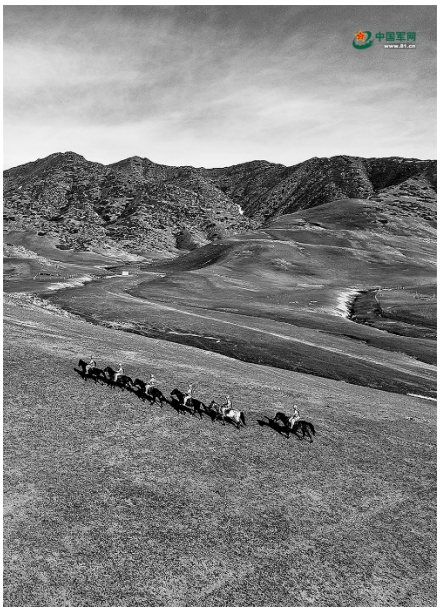
这个初夏，一批批边防官兵陆续踏上前往”候鸟哨所”驻防的路。在这条路上，他们见证了时光的变迁、季节的更替，也用奉献与担当践行着始终不变的戍边使命。

遥远东极，第一次上哨的新兵，在温暖的朝阳中感知青春的光芒与力量；苍茫戈壁，老兵再一次进驻哨所，升起国旗的那一刻，他们仿佛沙漠深处一簇不灭的火炬；雪域高原，官兵们越高山、蹚冰河、巡界碑，用双脚丈量祖国的山川大地。

哨位即是战位。在绿意盎然的初夏，让我们走进这些”候鸟哨所”，感受他们是如何以更加饱满的热忱和更加坚定的信念，为祖国和人民守好每一寸边防线，走实每一步巡逻路。

初夏，中蒙边境的阿尔泰山深处，水草丰美，山林如画。

每年 5 月份，北疆大地冰雪消融之时，新疆军区某团可可托海边防连官兵都会进驻哈亚尔哨所。穿过宁静的山谷，行于古老的牧道，他们像候鸟一般抵达这个哨点。



到了九、十月份，大家会在大雪封山之前撤离深山密林，等待来年再次驻防。

“候鸟哨所”的巡逻道路大多为崎岖山路，乘马巡逻依然是最主要的巡逻方式，这是出发前哨所官兵整理马鞍。

尽管身处季节性哨所，官兵每天清晨都会举行庄严的升国旗仪式。

随着初夏的到来，祖国最东端的黑瞎子岛上，杨柳和灌木的青色渐渐浓郁。

记者来到北部战区陆军某边防旅东极哨所，气温已回升到 10 摄氏度左右。风吹到身上，感到快意的同时还稍有一丝清冷。列兵阮承凯告诉记者，前不久，乌苏里江和黑龙江先后迎来了开江季，岛上的一处季节性哨点，也迎来了首批驻哨的战友。

站在这个哨点的观察哨位上，望着徐徐流淌的江水，阮承凯说，大家格外期待这短暂的初夏。说话间他的笑容分外灿烂，仿佛这温暖是经历了颇多曲折，摆脱了冰雪的束缚，才得以来到官兵面前。

江面上升起的一轮朝阳融化了战士心中的冰雪。去年底，阮承凯乘坐火车一路北上：”从南到北，火车开了 3 天，窗外的景色从满目葱茏变成冰天雪地，我好像从夏天渐渐走进了冬天。”

“当兵之前，从没到过这么远的地方。”最初，岛上陌生的环境让下连后的阮承凯内心有些不安。这位来自福建的小伙从未见过冰封的江面，更没有体验过冷到足以让睫毛结霜的天气。

与 2008 年建哨之初相比，东极哨所如今的生活环境改善了不少，用水、取暖、防洪等条件都有新变化，但驻哨官兵依然要面临相对恶劣的自然环境。

官兵所在的黑瞎子岛位于黑龙江与乌苏里江交汇处。冬天，开阔的江面让冷风得以长驱直入，丰富的水汽更带来厚厚的降雪。大家要一层层套上衬衣、绒衣、棉衣和巡逻服，来抵御零下二三十摄氏度的严寒。

“刚来的那段时间，岛上不刮大风的日子，伸出十指就能数得清。在室外待上几分钟时间，嘴唇就没了知觉，鼻腔像被冻住了似的。”阮承凯描述着他对寒冷的切身体会。

随着初夏悄然来临，前些日子，阮承凯跟随战友抵达某临时哨点驻防。在这里，他迎来了下连后的第一次执勤站哨。

“日出东方太壮观了！”清晨，当第一缕阳光穿透云层，金色浸润了眼前的一切，阮承凯感到生命在和山河一起闪光。沐浴着初夏的微风，阮承凯的内心仿佛被那一刻的温暖融化，他突然觉得自己是幸运的：”不是谁的青春都有机会守卫祖国东极。”

“虽然以后还会有更多的战友来到这里，但’600 号东极卫士’永远是我，连队不会忘记，我也不会忘记！”说出这番话时，阮承凯眼里满是自豪，”600”将是他一生铭记的数字。

阮承凯庆幸自己在 20 多岁的年纪，便理解了坚守的意义：”当个人和祖国如此紧密地相连，我感觉每天都活得很充实。”

从繁华都市到遥远小岛，阮承凯的脚步不再有徘徊，而是在人生路上踏出了自己节奏。与校园生活不同，军营的生活简单而有规律，阮承凯不断打磨着自己。变化一点点发生，从下连时 3 公里跑仅是及格到体能成绩突飞猛进，阮承凯的眼神渐渐有了神采。

“我第一次站上哨位时，也是在如今这样的天气里。”上等兵施冉旭说。去年 3 月，一直想到艰苦边远地区服役的施冉旭如愿来到了边防部队。

几个月后，施冉旭跟随班长前往某哨点驻防。一次下哨后，他和班长交流起自己的想法。身为国家二级运动员的他为自己定下目标——代表连队参加上级比武：”虽然我曾经学习体育专业，但是连队里厉害的战友太多了，必须下苦功夫才能获得比武资格。”

“这块石头是我那年在这个哨点捡到的，送给你。”班长将一块彩石放到了他的手心，鼓励他坚持下去。那天微风中带着的温暖和力量，施冉旭一直到今天都没有忘记。

随着天气逐渐转暖，临时哨点的训练更多在室外开展。即便各项课目考核成绩优秀，施冉旭依然积极参加每晚的体能加练。”我把班长给我的石头带在身边，期待着下次比武能取得好成绩，这块石头见证了班长的拼搏经历，也将成为我的’幸运石’。”他说。

采访结束，记者离开东极哨所时已是深夜。车行渐远，这座小小的哨所也渐渐要隐没在夜色中，化作小小的光点，与满天星斗一同缀在夜幕之中。就像连歌里唱的那样：”每当星星月亮悄悄地隐没，那是我第一个把太阳迎进祖国……”再过几个小时，哨所官兵将又一次迎来初夏的朝阳。

苍茫戈壁，那簇圣火仍在燃烧

■贾彦博 解放军报特约通讯员 王梦缘

初夏来临，巴丹吉林沙漠的风刮得更猛烈了。

荒漠深处，驻守着新疆军区某团某哨所。该哨所为季节性哨所，每年天气转暖的时节，一部分官兵将在这里驻哨。前段时间，一级上士邵佐又一次随新一批上哨官兵进驻该哨所。

哨所位于寸草不生的戈壁，没有水源。邵佐来到哨所的第一件事，就是驾驶水车前往距离哨所十几公里的取水点，这也是作为驾驶员的邵佐之后每周都要做的一件事。

戈壁上布满砾石，从远处看去，黑乎乎一片，战士们称之为”黑戈壁”。这里的道路异常颠簸，是名副其实的”搓板路”，邵佐经常行驶的线路十分危险：”我们都是顺着之前留下的车辙印走。”

在戈壁上驾驶吨位较大的运水车并不容易，年轻的驾驶员往往需要经验丰富的老班长陪同，已经当了 12 年驾驶员的邵佐谈起第一次行经这个路段，依然记忆深刻。

那次驾车去取水，邵佐有些晕车。运水车在”搓板路”上剧烈晃动着，双手把住方向盘都成了难事。随之而来的，是心脏的狂跳以及大脑的胀痛。还没走出去一半车程，车辆便换了跟随的老班长驾驶。

如今的邵佐早已对这条路线十分熟悉，他说：”车辆陷入砂石或是积雪中无法动弹的情况时有发生，但遇到危险不要慌张，稳住心态是最关键的。”这些年，邵佐总结出不少驾车窍门，他总会随车携带各式各样的修理工具，遇到突发意外情况总能化险为夷。

正如邵佐所说，良好的心理素质是驾驶员必须练就的能力——这条路上还有十几个”黑风口”等待着他们，在一些崎岖地带的”黑风口”，天空还会下起”沙石雨”。因而每过一个”黑风口”，就像是闯过一道关卡。

中午时分，邵佐驾驶运水车回到了哨所。官兵们出门迎接，一起将运水车里的水装进哨所的大水箱。

从哨所出发到达某界碑，官兵徒步需要近 4 个小时。每次前出巡逻，邵佐都会提醒大家跟紧队伍。一些初次参加巡逻任务的新兵兴奋不已，有时顾不上老班长的叮嘱，手脚并用地向上攀爬，结果不留神一脚踩空，整个人摔在山坡上。戈壁上的砾石格外锋利，每次出发前，邵佐都会提醒战友们戴好手套。

驻守”候鸟哨所”，单调的生活是官兵们需要应对的另一个”敌人”。官兵们每天喝的井水带着咸涩的味道，训练场设在不远处的山坡上，器材只有几个单双杠。

这一次上哨任务下达时，上等兵谭观成主动申请参加。他向指导员保证，一定能耐得住孤单和寂寞。

谭观成喜欢画画，闲暇时间不时拿着画板捕捉精彩的瞬间。戈壁上留下的车辙，被石头划破的手掌，随风漫卷的沙尘……支撑谭观成拿起画笔的信念只有一个：将来不管走到哪里，都要记住驻守哨所的日子。

每年新兵下连，连队会组织大家观看电影《天边有一簇圣火》。该边防连的官兵是电影人物的原型之一，影片讲述了一群驻扎在祖国大漠深处的官兵坚守边防的故事。

这部电影，谭观成看了两遍，入伍多年的邵佐则已记不清看过多少遍。无论是新兵还是老兵，大家观看时总是那样专注，影片中边防官兵对祖国的热爱和奉献让大家感同身受。

每天清晨，哨所官兵都会举行升旗仪式。大家觉得，那鲜艳的五星红旗就像是一簇燃烧在天边的火炬，照亮了沙漠哨所的每一个角落，也照亮了每一名官兵的心灵。

Enter the “Migratory Bird Post” and See the Soldiers Fulfilling Their Mission of Guarding the Border

Source: China Military Network-People's Liberation Army Daily Author: Du Juan, Wu Anning, Jia Yanbo, Wang Mengyuan Editor: Guo Yanfei Release: 2025-05-26

In early summer, enter the "Migratory Bird Post"

In May, spring bids farewell to the earth, and early summer arrives quietly.

In this season filled with sunshine and fragrance of flowers, the border posts stationed in the plateau and extremely cold regions have ushered in the mountain and river seasons. Some temporary points and seasonal posts have ushered in the first batch of soldiers stationed in the year. The experience of border guards stationing and withdrawing from seasonal posts once a year is like migratory birds migrating between the north and the south every year. In their hearts, seasonal posts have a poetic and vivid name-"Migratory Bird Post".

This early summer, batches of border guards have set out on the road to the "Migratory Bird Post" for garrison. On this road, they have witnessed the passage of time and the change of seasons, and have also fulfilled their unchanging mission of guarding the border with dedication and responsibility.

In the far east, the new recruits who were on sentry duty for the first time felt the light and strength of youth in the warm morning sun; in the vast Gobi Desert, the veterans once again entered the sentry post. At the moment when the national flag was raised, they seemed like an eternal torch in the depths of the desert; on the snowy plateau, the officers and men crossed the mountains, waded through the glaciers, and patrolled the boundary monuments, measuring the mountains and rivers of the motherland with their feet.

The sentry post is the battle post. In the green early summer, let us walk into these "migratory bird sentry posts" and feel how they guard every inch of the border line for the motherland and the people with more enthusiasm and firmer beliefs, and take every step of the patrol road.

In early summer, in the depths of the Altai Mountains on the Sino-Mongolian border, the water and grass are lush and the mountains and forests are picturesque.

In May every year, when the ice and snow in northern Xinjiang melt, the officers and men of the Koktogay Sea Defense Company of a regiment of the Xinjiang Military Region will enter the Hayar sentry post. Passing through the quiet valley and walking on the ancient pastoral road, they arrived at this outpost like migratory birds.

In September and October, everyone will evacuate the deep mountains and dense forests before the heavy snow closes the mountains, waiting to be stationed again next year.

The patrol roads of the "migratory bird outpost" are mostly rugged mountain roads, and patrolling on horseback is still the main patrol method. This is the officers and men of the outpost tidying up the saddle before departure.

Although they are in a seasonal outpost, the officers and men will hold a solemn flag-raising ceremony every morning.

The officers and men of the Hayar outpost patrol on horseback.

Standing guard in the first ray of sunshine in the distant East Pole

■ PLA Daily reporter Du Juan Wu Anning

The officers and men of the East Pole outpost are patrolling. Photo by Li Baocheng

With the arrival of early summer, the green color of willows and shrubs on the Heixiazi Island, the easternmost part of the motherland, gradually becomes richer.

The reporter came to the East Pole outpost of a border defense brigade of the Northern Theater Command Army, and the temperature has risen to around 10 degrees Celsius. The wind blew on my body, and I felt pleasant and a little bit cool. Private Nguyen Chengkai told reporters that not long ago, the Ussuri River and the Heilongjiang River successively ushered in the river season, and a seasonal sentry post on the island also welcomed the first batch of comrades stationed on the sentry post.

Standing on the observation post of this sentry post, looking at the slowly flowing river, Nguyen Chengkai said that everyone is particularly looking forward to this short early summer. While talking, his smile was particularly bright, as if this warmth had gone through many twists and turns, and got rid of the shackles of ice and snow before it came to the officers and men.

The rising sun on the river melted the ice and snow in the hearts of the soldiers. At the end of last year, Nguyen Chengkai took a train all the way north: “From south to north, the train drove for 3 days. The scenery outside the window changed from lush greenery to ice and snow. I seemed to have gradually walked into winter from summer.”

“Before joining the army, I had never been to such a far place.” At first, the unfamiliar environment on the island made Nguyen Chengkai feel a little uneasy after joining the company. This young man from Fujian has never seen a frozen river, let alone weather cold enough to frost his eyelashes.

Compared with the beginning of the post in 2008, the living environment of the Dongji Post has improved a lot. There are new changes in water, heating, flood control and other conditions, but the soldiers stationed at the post still have to face a relatively harsh natural environment.

The Heixiazi Island where the soldiers are located is located at the confluence of the Heilongjiang River and the Wusuli River. In winter, the open river surface allows cold winds to penetrate directly, and the abundant water vapor brings thick snowfall. Everyone has to put on layers of shirts, fleece clothes, cotton clothes and patrol uniforms to resist the severe cold of minus 20 to 30 degrees Celsius.

“When I first came here, I could count the days without strong winds on the island with my ten fingers. After staying outdoors for a few minutes, my lips lost sensation and my nasal cavity seemed to be frozen.” Ruan Chengkai described his personal experience of the cold.

As early summer quietly came, a few days ago, Nguyen Chengkai followed his comrades to a temporary sentry post for garrison. Here, he welcomed his first duty after joining the company.

“The sunrise in the east is so spectacular!” In the early morning, when the first ray of sunlight penetrated the clouds and the golden color soaked everything in front of him, Nguyen Chengkai felt that life was shining with the mountains and rivers. Bathed in the breeze of early summer, Nguyen Chengkai’s heart seemed to be melted by the warmth of that moment, and he suddenly felt that he was lucky: “Not everyone’s youth has the opportunity to guard the easternmost part of the motherland.”

“Although there will be more comrades coming here in the future, I will always be the ‘600th Eastern Guardian’. The company will not forget it, and I will not forget it!” When saying this, Nguyen Chengkai’s eyes were full of pride, and “600” will be a number he will remember for the rest of his life.

Nguyen Chengkai is glad that he understood the meaning of perseverance at the age of more than 20: “When an individual is so closely connected with the motherland, I feel that every day is very fulfilling.”

From the bustling city to the remote island, Nguyen Chengkai’s footsteps no longer hesitate, but step out his own rhythm on the road of life. Unlike campus life, life in the military barracks is simple and regular, and Ruan Chengkai keeps polishing himself. Changes happened little by little, from just passing the 3-kilometer run when he joined the company to his physical fitness scores improving by leaps and bounds, and Ruan Chengkai’s eyes gradually became bright.

“The first time I stood on the sentry post was also in weather like today.” Corporal Shi Ranxu said. In March last year, Shi Ranxu, who had always wanted to serve in a difficult and remote area, came to the border defense force as he wished.

A few months later, Shi Ranxu followed the squad leader to a sentry post. After leaving the sentry post once, he exchanged his ideas with the squad leader. As a national second-level athlete, he set a goal for himself-to represent the company in the superior competition: “Although I once studied sports, there are too many powerful comrades in the company, and I must work hard to qualify for the competition.”

“I picked up this stone at this sentry post that year, and I give it to you.” The squad leader put a piece of colored stone in his palm and encouraged him to persevere. Shi Ranxu has never forgotten the warmth and strength brought by the breeze that day to this day.

As the weather gradually warms up, the training of temporary outposts is carried out more outdoors. Even though he has excellent scores in various subjects, Shi Ranxu still actively participates in the

physical training every night. “I brought the stone given to me by the squad leader with me, looking forward to getting good results in the next competition. This stone witnessed the squad leader’s struggle and will also become my “lucky stone.” “He said.

At the end of the interview, it was late at night when the reporter left the Dongji outpost. As the car drove farther away, this small outpost gradually disappeared in the night, turning into a small point of light, and embellished in the night with the stars. Just like the song in the company song: “Whenever the stars and the moon quietly disappear, that is the first time I welcome the sun into the motherland...” In a few hours, the officers and men of the outpost will once again welcome the sunrise in early summer.

In the vast Gobi Desert, the sacred fire is still burning

■ Jia Yanbo, special correspondent of the People’s Liberation Army Daily, Wang Mengyuan

With the arrival of early summer, the wind in the Badain Jaran Desert is blowing more violently.

Deep in the desert, there is a post of a regiment of the Xinjiang Military Region. The post is a seasonal post. When the weather turns warmer every year, some officers and men will be stationed here. Some time ago, First Sergeant Shao Zuo once again entered the post with a new batch of officers and men.

The post is located in the Gobi Desert, where there is no grass and no water source. The first thing Shao Zuo did when he arrived at the post was to drive a water truck to a water point more than ten kilometers away from the post. This is also something Shao Zuo, as a driver, has to do every week.

The Gobi Desert is covered with gravel. From a distance, it looks black. The soldiers call it the “Black Gobi Desert”. The road here is extremely bumpy and is a veritable “washboard road”. The route Shao Zuo often drives is very dangerous: “We all follow the ruts left before.”

It is not easy to drive a large-tonnage water truck in the Gobi Desert. Young drivers often need to be accompanied by experienced old squad leaders. Shao Zuo, who has been a driver for 12 years, still has a deep memory of his first time passing this section.

When driving to fetch water, Shao Zuo felt carsick. The water truck was shaking violently on the “washboard road”, and it was difficult to hold the steering wheel with both hands. Then came the pounding of the heart and the swelling pain of the brain. Before they had gone halfway, the vehicle was replaced by the old squad leader who followed them.

Shao Zuo is now very familiar with this route. He said: “It happens from time to time that the vehicle is stuck in gravel or snow and cannot move, but don’t panic when you encounter danger. Keeping a stable mentality is the most important thing.” Over the years, Shao Zuo has summed up a lot of driving tips. He always carries a variety of repair tools with him, and he can always turn danger into safety when encountering unexpected situations.

As Shao Zuo said, good psychological quality is a skill that drivers must develop - there are more than a dozen “black wind mouths” waiting for them on this road. In some “black wind mouths” in rugged areas, “sand and stone rain” will fall from the sky. Therefore, every “black wind mouth” is like passing a checkpoint.

At noon, Shao Zuo drove the water truck back to the outpost. The officers and men went out to greet them and together they loaded the water from the water truck into the large water tank of the outpost.

It takes nearly 4 hours for the officers and men to walk from the outpost to a certain boundary marker. Every time they go out on patrol, Shao Zuo reminds everyone to keep up with the team. Some new recruits who are participating in patrol missions for the first time are very excited. Sometimes they ignore the instructions of the old squad leader and climb up with their hands and feet. As a result, they accidentally step on the air and fall on the hillside. The gravel on the Gobi Desert is particularly sharp. Before each departure, Shao Zuo reminds his comrades to wear gloves.

When the officers and men are stationed at the “migratory bird outpost”, the monotonous life is another “enemy” that they need to deal with. The well water that the officers and men drink every day has a salty taste. The training ground is located on a hillside not far away, and the equipment is only a few single and double bars.

When the sentry mission was issued this time, Corporal Tan Guancheng took the initiative to apply for participation. He assured the instructor that he would be able to endure loneliness and solitude.

Tan Guancheng likes to paint, and in his spare time he often takes a drawing board to capture wonderful moments. The ruts left on the Gobi Desert, the palms scratched by stones, the dust blowing in the wind... There is only one belief that supports Tan Guancheng to pick up the brush: no matter where he goes in the future, he must remember the days of guarding the outpost.

Every year when new recruits go to the company, the company will organize everyone to watch the movie “There is a Cluster of Holy Fire on the Horizon”. The officers and men of the border defense company are one of the prototypes of the characters in the movie. The film tells the story of a group of officers and men stationed in the depths of the desert of the motherland who stick to the border.

Tan Guancheng watched this movie twice, and Shao Zuo, who has been in the army for many years, can’t remember how many times he has watched it. Whether it is a new recruit or a veteran, everyone is always so focused when watching. The love and dedication of the border guards to the motherland in the film make everyone feel the same.

Every morning, the officers and men at the outpost will hold a flag-raising ceremony. Everyone feels that the bright five-star red flag is like a cluster of torches burning in the sky, illuminating every corner of the desert outpost and the hearts of every officer and soldier.

陆军某旅坚持学用结合改作风，用精准服务为基层办实事解难题

来源：解放军报 作者：刘鎔宇 童祖静 责任编辑：郭妍菲 2025-05-28

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

学用结合改作风　倾心解难暖兵心

■刘鎔宇　解放军报特约记者　童祖静

赣北某训练场，二级军士长向平拨打”服务基层专项热线”反映装备故障问题，机关当天回复，问题很快解决；滨海某驻训点，驻训官兵通过视频会议系统，向机关相关业务部门反映装备保障、训练场地等方面问题，机关干部承诺 3 天内解决……连日来，陆军某旅党委和机关倾心服务基层，务实作风赢得官兵点赞。

“这是我们加强作风建设提升服务基层质效，确保深入贯彻中央八项规定精神学习教育落地见效的一个缩影。”该旅领导告诉记者，服务基层就是服务战斗力，关心官兵就是关心打赢事业，只有持续改进作风，实实在在为基层做好服务，才能实现机关和基层”双向奔赴”。为此，他们把学和做结合起来、把查和改贯通起来，将学习教育作为密切联系官兵的实际行动，引导各级领导和机关干部在服务基层中改进工作作风，积极为基层办实事解难题。

实践中，他们要求领导和机关干部严格对标对表中央八项规定精神、军委十项规定及其实施细则精神，认真查找影响服务基层质效的问题；广泛收集官兵对党委机关作风建设的意见建议，梳理形成需要检视整改的《党委机关服务基层作风建设负面行为清单》，进一步明确为基层服务的职责和要求；按照”基层有所盼、机关立即办”要求，形成”热线直通、云端联动、官兵评议”工作机制，为基层提供精准服务，确保好事办好、实事办实、难事办妥。

“官兵通过热线反映问题后，牵头科室进行梳理汇总，区分不同情况对接相关科室予以解决。机关干部全程跟踪办理，确保事事有回音、件件能落实。”该旅领导告诉记者，官兵通过”服务基层专项热线”反映问题，他们的声音直达机关相关业务部门，大大提高了解决问题的效率。这一做法让基层与机关之间架起一座”连心桥”。

针对部队点多面广的实际，他们还探索建立”多方联动、云端快办”机制，定期召开”云端恳谈会”，着力解决以往服务基层过程中出现的”诉求反馈链条长、跨域协调效率低、特情处置办法少”等问题。此外，他们还注重跟进服务、持续问效，以官兵满意度为评价标准，确保服务基层质效不断提升。

学用结合改作风，倾心解难暖兵心。随着学习教育深入开展，该旅一批基层急难愁盼问题得到解决，官兵练兵备战热情更加高涨。

A Certain Army Brigade Insists on Combining Learning with Practice to Improve Work Style, and Uses Precise Services to Solve Practical Problems for the Grassroots

Source: PLA Daily Author: Liu Rongyu Tong Zujing Editor: Guo Yanfei 2025-05-28

A certain army brigade solidly conducts the study and education of the spirit of the eight central regulations-

Combining learning with practice to improve work style, and devoting oneself to solving problems and warming the hearts of soldiers

■Liu Rongyu PLA Daily Special Correspondent Tong Zujing

At a training ground in northern Jiangxi, Second Sergeant Xiang Ping called the "Service Grassroots Special Hotline" to report equipment failure problems. The department responded on the same day and the problem was quickly solved; at a training point in Binhai, the stationed officers and men reported equipment support, training venues and other issues to the relevant business departments of the department through the video conference system. The department cadres promised to solve them within 3 days... In recent days, the Party Committee and the department of a certain army brigade have devoted themselves to serving the grassroots, and their pragmatic style has won praise from officers and men.

"This is a microcosm of our efforts to strengthen work style construction, improve the quality and efficiency of serving the grassroots, and ensure that the study and education of the spirit of the eight central regulations are implemented and effective." The brigade leader told reporters that serving the grassroots is serving combat effectiveness, and caring about officers and men is caring about winning the cause. Only by continuously improving work style and providing good services to the grassroots can we achieve "two-way rush" between the organs and the grassroots. To this end, they combine learning and doing, and integrate investigation and rectification, and use study and education as a practical action to closely connect with officers and men, guide leaders at all levels and cadres of organs to improve their work style in serving the grassroots, and actively solve problems for the grassroots.

In practice, they require leaders and cadres to strictly follow the spirit of the Central Committee's eight regulations, the CMC's ten regulations and their implementation rules, and carefully find problems that affect the quality and efficiency of serving the grassroots; widely collect opinions and suggestions from officers and men on the style of work of the Party Committee, sort out and form a "List of Negative Behaviors of Party Committees in Serving the Grassroots Style of Work" that needs to be reviewed and rectified, and further clarify the responsibilities and requirements of serving the grassroots; in accordance with the requirements of "the grassroots have expectations,

and the organs will do it immediately", form a "hotline direct access, cloud linkage, and officers and men' evaluation" work mechanism to provide precise services to the grassroots, and ensure that good things are done well, practical things are done, and difficult things are done properly.

"After the officers and men report the problems through the hotline, the leading department will sort them out and summarize them, distinguish different situations and connect with relevant departments to solve them. The cadres of the organs will follow up the whole process to ensure that everything has a response and can be implemented." The leader of the brigade told reporters that the officers and men reported the problems through the "special hotline for serving the grassroots", and their voices went directly to the relevant business departments of the organs, which greatly improved the efficiency of problem solving. This practice has built a "bridge of communication" between the grassroots and the organs.

In view of the reality that the troops are numerous and widespread, they also explored the establishment of a "multi-party linkage, cloud-based quick handling" mechanism, and held "cloud-based talks" regularly to focus on solving problems such as "long feedback chain of demands, low efficiency of cross-domain coordination, and few special situation handling methods" that appeared in the past service process at the grassroots level. In addition, they also pay attention to follow-up services and continuous performance evaluation, using the satisfaction of officers and men as the evaluation standard to ensure that the quality and efficiency of grassroots services are continuously improved.

Combining learning with practice to improve work style, and devoting themselves to solving problems to warm the hearts of soldiers. With the in-depth development of learning and education, a number of urgent and difficult problems at the grassroots level of the brigade have been solved, and the enthusiasm of officers and men for training and preparation for war has increased.

从排名靠后到名列前茅 这个连的体能提升靠的是……

来源：解放军报 作者：马鑫元 梅俊奇 责任编辑：杜圣智 2025-05-29

思想不领先，训练难过关

■马鑫元 梅俊奇

"终于摘掉了体能落后的帽子！"前不久，新疆军区某团开展军体运动会，修理连集体武装5公里成绩位居全团前列，得到上级表扬。

从排名靠后到名列前茅，这让该连赵指导员十分欣慰。

去年底，赵指导员从主战连队调任该连担任指导员。上任后，赵指导员一心想尽快提高连队体能成绩，就借鉴此前连队的一些好经验，精心制订了体能训练计划。

可第一次组织 10 公里长跑训练，到场参训人员大都是年轻同志，有的老兵以”身体不适”“出公差”为由请了假。赵指导员没有多说什么，带着大家跑完了全程。

之后不久，他又组织了一次建制班集体武装 5 公里比武活动，并要求所有班长骨干都参加，带头冲锋。组织热身时，某班几名老兵开始小声嘀咕：”修理连只要搞好专业就行了，体能再好也没什么用”……

果然，比武中，个别老兵”出工不出力”，并没有发挥出应有的训练水平。

活动结束后，赵指导员找几名班长骨干了解情况，有人如实反映了想法。这让赵指导员意识到，问题根源不在能力上，而在态度上。

党支部研究后，决定组织官兵开展一次讨论。”我们是修理工，专业技术上练精就行，体能成绩不必苛求”“咱们连军士多，大家平均年龄大，体能不如年轻人很正常”……讨论中，有些老兵直言不讳。

“思想不领先，训练难过关。”面对这些同志思想上的偏差，赵指导员为大家播放了电视剧《亮剑》中的几个片段：某骑兵连官兵因战场环境受限，下马跑步发起进攻，团部炊事员、马夫也奋勇冲锋……看着这一幕幕，有同志低下了头。

“不论我们从事什么专业，首先是一名军人！军人就要有见红旗就扛，见第一就争的拼搏意识和战斗血性！”见大家有所触动，赵指导员让大家多问问自己——体能训练时，真的付出百分之百的努力了吗？体能不过关，战时能完成任务吗……

随着讨论深入，大家思想更加清晰和统一，几名老兵主动进行了检讨反思。大家一致表示，要积极参加体能训练，做一名合格的战斗员。从此，训练场上该连官兵你追我赶、奋勇争先，老兵常会冲在前面为新兵作榜样、鼓干劲：”最难受的时候，往往就是超越极限、实现突破的时候！”

比武竞赛如期来临，该连官兵团结一致、奋勇拼搏，成绩进步明显。

From the Bottom to the Top, this Company’s Physical Fitness Improvement

Source: PLA Daily Author: Ma Xinyuan Mei Junqi Editor: Du Shengzhi 2025-05-29

If you are not ahead in thought, you will have a hard time passing the training

■Ma Xinyuan Mei Junqi

“Finally, I have taken off the hat of lagging behind in physical fitness!” Not long ago, a regiment of the Xinjiang Military Command [district] held a military physical meeting, and the repair company’s collective armed 5-kilometer performance ranked among the top of the regiment and was praised by the superiors.

From the bottom to the top, this made the company's instructor Zhao very pleased.

At the end of last year, Instructor Zhao was transferred from the main combat company to the company as an instructor. After taking office, Instructor Zhao wanted to improve the company's physical fitness as soon as possible, so he drew on some good experiences of the previous company and carefully formulated a physical training plan.

But for the first time to organize a 10-kilometer long-distance running training, most of the participants were young comrades, and some veterans asked for leave on the grounds of "physical discomfort" and "business trips". Instructor Zhao did not say much and led everyone to finish the whole run.

Shortly afterwards, he organized another 5-kilometer armed competition for the established classes and required all the squad leaders to participate and take the lead in the charge. When organizing the warm-up, several veterans in a class began to whisper: "The repair company only needs to do a good job in the profession, and it is useless to have good physical fitness"...

Sure enough, in the competition, some veterans "worked but did not work hard" and did not play the expected training level.

After the activity, Instructor Zhao found several squad leaders to understand the situation, and some of them reflected their ideas truthfully. This made Instructor Zhao realize that the root of the problem was not in ability, but in attitude.

After research, the Party Branch decided to organize officers and men to carry out a discussion. "We are repairmen, we just need to practice professional skills, and we don't need to be demanding in physical fitness." "There are many sergeants in our company, and everyone is older on average. It is normal that physical fitness is not as good as that of young people"...During the discussion, some veterans spoke frankly.

"If you are not ahead of the times, you will have a hard time passing the training." In the face of these comrades' ideological deviations, Instructor Zhao played several clips from the TV series "Drawing Sword" for everyone: soldiers of a cavalry company dismounted and ran to attack due to the battlefield environment, and the cooks and grooms of the regiment also bravely charged forward... Seeing these scenes, some comrades lowered their heads.

"No matter what profession we are in, we are soldiers first! Soldiers must have the fighting spirit and fighting spirit to take up the red flag and fight for the first place!" Seeing that everyone was touched, Instructor Zhao asked everyone to ask themselves more - did you really put in 100% effort during physical training? If the physical fitness is not up to standard, can you complete the task in wartime...

As the discussion deepened, everyone's thoughts became clearer and more unified, and several veterans took the initiative to review and reflect. Everyone unanimously expressed that they should actively participate in physical training and be a qualified fighter. From then on, the officers and

men of the company chased each other and fought bravely on the training ground. The veterans often rushed to the front to set an example and encourage the new recruits: “The most difficult time is often the time to surpass the limit and achieve a breakthrough!” The competition came as scheduled. The officers and men of the company united and fought bravely, and their performance improved significantly.

这个连的姓名墙上每个名字背后 都有一段奋斗故事

来源：解放军报 作者：刘小云 责任编辑：杜圣智 2025-05-29

第 82 集团军某旅支援保障连用姓名墙激励官兵建功军营——

“墙上的名字和奖章一样闪亮”

■解放军报特约通讯员 刘小云

初夏午后，第 82 集团军某旅支援保障连官兵在一面姓名墙前驻足观看。

这面姓名墙是连队大学生士兵段志光设计的。墙上分二等功、三等功、嘉奖和”四有”优秀士兵等荣誉区块，分别对应公布立功受奖官兵名字。段志光感言，每个名字背后，都有一段奋斗故事。

段志光下连后被分到了指挥通信班。他的同年兵，有的去了侦察排，有的分到工兵排，参加各类比武集训较多，经常在一线冲锋。与战友相比，他的专业在一线”露脸”的机会相对较少，心里有些落差。

每次路过连队走廊，段志光都忍不住驻足观看。时间一长，墙上那些标兵事迹他几乎都能背下来。年轻的士兵渴望赢得荣誉，这样的心思，其实很多人都有。

“我也要参加比武，争取让名字登上荣誉墙。”一天深夜，段志光向侦察排下士李贵洋吐露心声。

“建功并非只有赛场，发挥特长为连队做贡献也是成绩……”李贵洋的一番话，让段志光找到了努力方向。

那段时间，旅里开展营区综合整治，要求各连布置完善文化氛围。眼见战友大多在外集训或执行任务，段志光便向孙指导员请缨：”我大学的专业就是广告设计，这项任务我能行。”孙指导员当即鼓励他：”放开手脚干，不要有顾虑。”

那阵子，段志光照常随连队训练，每个口令、每处操作规程反复背记。训练间隙，他就掏出随身携带的小本子，把设计思路画成草图，业余时间就拿着卷尺在走廊里反复测量。在他加班加点精心筹划下，该连文化氛围布置不仅速度快、标准高，经费也省下不少。

工作中，段志光又有了一个大胆的想法：除标兵墙外，在图书室里另行设计一面姓名墙。”标兵墙每年更新一次，代表了过去一年的荣誉，而官兵当下取得的荣誉，也需要及时被看见、被鼓励，只要官兵取得成绩，或为集体作出贡献，名字都可以及时上墙。”他的想法让大家很认同。

姓名墙建起后，曾在连队立过功、受到奖的官兵名字都出现在上面，许多官兵喜欢聚到姓名墙前，找学习榜样，定成长目标。去年底，段志光也因工作表现突出，获评”四有”优秀士兵，实现了当初的愿望。

“这面墙也是鲜活生动的教育素材，官兵能从中看到自身差距，鼓足奋斗劲头。”孙指导员坦言，二等功一栏至今是空白，三等功下面的名字也不多，有的战士兵龄不短，上墙次数却很少，每次看到这面墙都会反思。

一旁的留言册扉页上，是排长刘志强的寄语：”真正的成长，是不断超越自我。”

前不久，刘志强备战上级组织的侦察兵比武。那段时间，他像上紧了发条，忙个不停。为了带领小组取得好名次，他把各项课目细化到具体人、具体岗位，明确时间节点，带领大家每天铆在训练场加班苦练。

“我们在努力，对手也没懈怠。只有不断提高备战水平，才会多几分胜算。”为了多掌握几项本领，刘志强带领小组成员主动攻关研练前沿的无人装备使用技能。功夫不负有心人，比武中，他们组夺得综合课目第一名。刘志强因表现突出，荣立个人三等功。

当刘志强的名字出现在三等功一栏时，他给自己定下了新的目标：争取再立新功。

“墙上有名的，思索着如何百尺竿头更进一步；墙上无名的，正视差距不足，想办法迎头赶上！”在该连采访，笔者听到不少官兵这样吐露心声。

墙上名字出现次数最多的，要数保障排一级上士、修理工彭海铭。他在维修专业一干就是 10 多年，新装备列装，他带头研究攻关；哪台车出故障，他迅速赶到现场。近段时间，他常带着几名年轻战友巡修装备，倾囊传授检修技术。”我就想把技术传下去，为连队培养更多骨干，让大家都’墙上有名’。”彭海铭坦言。

如今，工兵排列兵郑浩来到姓名墙前看一看，提醒自己对照先进找差距，及时努力赶上。班长张军军也把每周班务会的地点搬到图书室里，讲评部署完工作之后，就讲起上墙名字背后的故事，鼓励班里战士精武强能……

前段时间，中士高宏博退伍。他凭借这些年的拼搏努力，收获了两枚”四有”优秀士兵奖章，名字也两次登上连队姓名墙。离队时，他站在姓名墙前留影，并在留言册上写下：”墙上的名字和奖章一样闪亮。”

Google Translation

Behind Every Name on the Company's Name Wall Is a Struggle Story

Source: PLA Daily Author: Liu Xiaoyun Editor: Du Shengzhi 2025-05-29

The support company of a brigade of the 82nd Group Army uses a name wall to encourage officers and men to make contributions to the barracks-

"The names on the wall are as bright as medals"

■Liu Xiaoyun, special correspondent of the PLA Daily

In the early summer afternoon, officers and men of the support company of a brigade of the 82nd Group Army stopped in front of a name wall to watch.

This name wall was designed by Duan Zhiguang, a college student soldier in the company. The wall is divided into honorary blocks such as second-class merit, third-class merit, commendation and "four-have" outstanding soldiers, which correspond to the names of officers and men who have made meritorious contributions and received awards. Duan Zhiguang said that behind every name, there is a struggle story.

After Duan Zhiguang joined the company, he was assigned to the command and communication class. Some of his peers went to the reconnaissance platoon, and some were assigned to the engineering platoon. They participated in various competitions and training sessions and often charged on the front line. Compared with his comrades, his profession had relatively few opportunities to "show up" on the front line, and he felt a little disappointed.

Every time he passed by the corridor of the company, Duan Zhiguang couldn't help but stop and watch. After a long time, he could almost recite the deeds of the model soldiers on the wall. Young soldiers are eager to win honors, and many people actually have such thoughts.

"I also want to participate in the competition and strive to get my name on the honor wall." Late one night, Duan Zhiguang confided his thoughts to Li Guiyang, a corporal in the reconnaissance platoon.

"Making contributions is not only in the arena, but also making contributions to the company with your expertise..." Li Guiyang's words helped Duan Zhiguang find the direction of his efforts.

During that time, the brigade carried out comprehensive rectification of the barracks and required each company to arrange a perfect cultural atmosphere. Seeing that most of his comrades were training or performing tasks outside, Duan Zhiguang volunteered to Instructor Sun: "My major in college is advertising design, I can do this task." Instructor Sun immediately encouraged him: "Let go and do it, don't worry." During that period, Duan Zhiguang trained with the company as usual, and memorized every command and every operating procedure repeatedly. During the training breaks, he took out the small notebook he carried with him, sketched the design ideas, and took a

tape measure to measure repeatedly in the corridor in his spare time. With his overtime and careful planning, the company's cultural atmosphere was not only arranged quickly and with high standards, but also saved a lot of money. During work, Duan Zhiguang had another bold idea: in addition to the model wall, design another name wall in the library. "The model wall is updated once a year, representing the honor of the past year, and the honors that officers and men have achieved at the moment also need to be seen and encouraged in time. As long as officers and men have achieved results or made contributions to the collective, their names can be put on the wall in time." His idea was recognized by everyone. After the name wall was built, the names of officers and men who had made meritorious service and received awards in the company appeared on it. Many officers and men like to gather in front of the name wall to find role models to learn from and set growth goals. At the end of last year, Duan Zhiguang was also awarded the "Four Haves" excellent soldier for his outstanding work performance, realizing his original wish.

"This wall is also a vivid educational material. Officers and men can see their own gaps from it and muster up the fighting spirit." Instructor Sun admitted that the second-class merit column has been blank so far, and there are not many names under the third-class merit column. Some soldiers have a long service life but have rarely been on the wall. Every time I see this wall, I will reflect on it.

On the title page of the guestbook next to it is the message of platoon leader Liu Zhiqiang: "Real growth is to constantly surpass yourself."

Not long ago, Liu Zhiqiang prepared for the scout competition organized by his superiors. During that time, he was like a clockwork, busy all the time. In order to lead the team to achieve a good ranking, he refined each subject to specific people and specific positions, clarified the time nodes, and led everyone to work overtime in the training ground every day.

"We are working hard, and our opponents are not slacking off. Only by constantly improving the level of preparation can we have a better chance of winning." In order to master more skills, Liu Zhiqiang led the team members to actively research and practice the use of cutting-edge unmanned equipment. Hard work pays off. In the competition, their group won the first place in the comprehensive subject. Liu Zhiqiang was awarded the third-class individual merit for his outstanding performance.

When Liu Zhiqiang's name appeared in the third-class merit column, he set a new goal for himself: strive to make new merits.

"Those who are famous on the wall are thinking about how to go further; those who are not famous on the wall face up to the gap and find ways to catch up!" During the interview in the company, the author heard many officers and men express their feelings like this.

The one whose name appeared most often on the wall was Peng Haiming, a sergeant and repairman in the support platoon. He has been working in the maintenance profession for more than 10 years. When new equipment was installed, he took the lead in researching and tackling; when any car

broke down, he rushed to the scene quickly. Recently, he often takes several young comrades to inspect and repair equipment, and teaches them maintenance techniques. “I just want to pass on the technology, train more backbones for the company, and let everyone be ‘famous on the wall’.” Peng Haiming said frankly.

Now, Zheng Hao, a platoon soldier in the engineering corps, comes to the name wall to take a look, reminding himself to find gaps by comparing with the advanced ones, and try to catch up in time. Squad leader Zhang Junjun also moved the location of the weekly class meeting to the library. After reviewing and deploying the work, he tells the stories behind the names on the wall and encourages the soldiers in the class to be good at martial arts and strong...

Some time ago, Sergeant Gao Hongbo retired. With his hard work over the years, he has won two “Four Haves” Excellent Soldier Medals, and his name has been on the company’s name wall twice. When he left the team, he stood in front of the name wall for a photo and wrote in the guestbook: “The names on the wall are as bright as the medals.”

茂密丛林中，这个侦察分队战斗到黎明

来源：解放军报 作者：陈游峰 顾侃奕 责任编辑：杜圣智 2025-05-30

战斗到黎明

■陈游峰 顾侃奕

深夜，淅淅沥沥的小雨透过郁郁葱葱的密林，滴落在陆军某部侦察分队官兵的肩头。

他们正头戴夜视仪、身着迷彩伪装衣在林间穿梭。他们的衣服与树叶摩擦发出轻微的窸窣声，急促的脚步激起阵阵水花。这次训练，他们的任务是渗透”敌”后，引导火力打击”敌”指挥所。

行至一处低洼地，二级上士、指挥员胡中奎慢下脚步，警惕地注视着周围。

“警戒！”随着一声令下，队员们四散开来，或匍匐，或半跪，依托地形与夜色融为一体。

见警戒到位，胡中奎倚靠在一棵树旁，从口袋中掏出战术地图，借着手电筒的光亮思索起来。雨后道路泥泞，侦察分队的行动变得有些迟缓，如果按照预定路线和当前速度，可能无法在规定时间内抵达目标地域。

林间地势相对平坦，有一条 20 多米宽的河流横亘在官兵面前。在预定路线中，他们将徒步绕过河流，沿着山路从另一侧进入目标地域。

雨后山林，雾气渐起，温度也随之下降。呼吸着清冷的空气，胡中奎将队员们召集起来：”我们现在的进度比计划要慢，我决定临时修改路线，蹚过河流，节省时间。”队员们纷纷

表示赞同。胡中奎用铅笔重新绘出路线，战术地图上，醒目的红色箭头横跨河流，直抵目标。

湍急的河流旁，突击手、下士纪明聪已固定好随身武器装备，腰间缠绕着牵引绳，绳子的另一侧被固定在不远处的树干上。他深吸一口气，涉水过河。河水漫过双腿，一阵刺骨的寒意蔓延到全身。纪明聪感到身体的热量在迅速流失，于是他转换姿态，奋力向对岸游去。

浑身湿透的纪明聪一上岸，便立即将绳索牢牢固定。对岸负责警戒的官兵则使出浑身力气，将牵引绳拉直。

官兵顺着绳索挨个渡河，直到最后一名队员着岸落地，侦察分队又整装出发。

一只小鸟被队员的脚步惊起，鸟鸣声在林间回荡。通信员、列兵崔成龙努力调整着呼吸，这是他第一次参加跨昼夜训练，因此有些体力不支。胡中奎安排他走在队伍的右前侧，防止掉队。

抬腕看了看时间，胡中奎发觉已是凌晨，比预定计划要快上半小时左右，路途已经过半。

就在这时，特情陡然而至。对讲机里传来指令：”前方林地有’毒瘴’，迅速处置。”侦察分队官兵停下脚步，穿戴好防毒面具，检查完气密性后，开始在林间快速穿插。

崔成龙紧紧跟着胡中奎的脚步。突然，他踩到遍布青苔的石头，脚下一滑，摔倒在地。

胡中奎听到声响，立刻折返回来。崔成龙踉跄起身，拍拍身上的泥土，握紧武器回到队伍之中：”班长，我没事。”胡中奎将他身上的电台卸下，背到自己身上：”有不舒服的地方，要第一时间对我说。”

侦察分队继续向目标地域前进，特情接踵而至。官兵攀崖壁、过险隘。天色渐明，大家的体能消耗已接近极限，迷彩伪装衣早已被汗水浸透。

经历一夜艰难前行，官兵终于在清晨时分抵达目标地域。他们根据现地情况进行伪装潜伏，静候最佳行动时机。

晨曦微露，大地还在沉睡。丛林角落里，侦察分队官兵蓄势待发。

无人机升空，刚刚飞出不远，便遭到强电磁干扰。无人机手敏锐察觉到，目标地域可能有信号干扰设备正在作业，于是紧急迫降，向胡中奎汇报情况。

胡中奎立刻召集队员，重新进行作战部署。

“A 点有两名’敌人’经过，正在向 B 点靠近。”对讲机内，崔成龙传来信息。

“我吸引火力，你们一路从后翼包抄，另一路在正侧翼掩护。”胡中奎压低声音，沉着指挥，各队员立刻行动，在昏暗密林中对”敌”形成包围之势。

“行动！”胡中奎率先从林中跳出，吸引”敌人”注意力，随后官兵迅速出击，很快将两名”敌人”控制住。

经过一番调查，侦察分队得到重要情报，”敌”指挥所就在附近。看着所剩不多的时间，胡中奎决定再度更改路线，从崖壁攀登，向”敌”防御薄弱处挺进。随着官兵靠近”敌”指挥所，一道高差 10 余米的陡崖出现在眼前。

队员王振银主动请缨设置绳索。崖壁上，他左手紧紧抠住岩缝，右脚顶住凸起的树桩，碎石不断从作战靴底落下。他动作灵活地翻上陡崖顶部，勘测起周围环境。确定没有”敌情”后，王振银顺利设置绳索，并向下发出信号，其他队员则借助绳索快速登上陡崖。

经过一番跋涉，官兵终于渗透至”敌”指挥所附近。他们迅速占领高处土丘架设火力，随时准备进行火力掩护。

胡中奎的瞄准镜内，崔成龙和王振银组成的侦察组正利用多种设备开展立体侦察。

很快，他们便将”敌”指挥所、警戒哨等目标数据传回指挥所。后方火力分队精准定位，呼啸的炮声撕开夜幕，炮火瞬间覆盖了目标地域。

天色渐明，对讲机内传来”在规定时间内成功歼灭’敌’指挥所，迅速撤离”的指令。

侦察分队的队员们再度起身，消失在茂密丛林中。

In the Dense Jungle, This Reconnaissance Team Fought Until Dawn

Source: PLA Daily Author: Chen Youfeng Gu Kanyi Editor: Du Shengzhi 2025-05-30

Fighting until dawn

■Chen Youfeng Gu Kanyi

Late at night, the drizzle dripped through the lush forest and fell on the shoulders of the officers and men of a certain army reconnaissance team.

They were wearing night vision goggles and camouflage clothes and walking through the woods. Their clothes rubbed against the leaves and made a slight rustling sound, and their hurried footsteps stirred up bursts of water. In this training, their task was to infiltrate the “enemy” and guide firepower to attack the “enemy” command post.

Walking to a low-lying area, the second sergeant and commander Hu Zhongkui slowed down and looked around vigilantly.

“Be alert!” With an order, the team members scattered, crawling or half-kneeling, relying on the terrain to blend into the night.

Seeing that the alert was in place, Hu Zhongkui leaned against a tree, took out a tactical map from his pocket, and thought with the help of a flashlight. The road was muddy after the rain, and the reconnaissance team's actions became a little slow. If they followed the planned route and current speed, they might not be able to reach the target area within the specified time.

The terrain in the forest was relatively flat, and there was a river more than 20 meters wide in front of the officers and men. In the planned route, they will walk around the river and enter the target area from the other side along the mountain road.

After the rain, the forest was foggy and the temperature dropped. Breathing the cool air, Hu Zhongkui called the team members together: "Our progress is slower than planned now. I decided to temporarily modify the route and wade across the river to save time." The team members agreed. Hu Zhongkui re-drew the route with a pencil. On the tactical map, a striking red arrow crossed the river and went straight to the target.

Beside the turbulent river, the assaulter, corporal Ji Mingcong, had already fixed his weapons and equipment, with a traction rope wrapped around his waist, and the other side of the rope was fixed to a tree trunk not far away. He took a deep breath and waded across the river. The river water flooded over his legs, and a piercing chill spread throughout his body. Ji Mingcong felt that his body heat was rapidly losing, so he changed his posture and swam hard to the other side.

As soon as Ji Mingcong, who was soaked all over, got ashore, he immediately fixed the rope firmly. The officers and men in charge of vigilance on the other side used all their strength to straighten the traction rope.

The officers and men crossed the river one by one along the rope until the last team member landed on the shore, and the reconnaissance team set off again.

A bird was startled by the footsteps of the team members, and the bird's cry echoed in the forest. The communicator, private Cui Chenglong, tried to adjust his breathing. This was his first time to participate in cross-day and night training, so he was a little exhausted. Hu Zhongkui arranged him to walk on the right front side of the team to prevent him from falling behind.

Looking at the time on his wrist, Hu Zhongkui found that it was already early morning, about half an hour earlier than planned, and halfway through the journey.

At this moment, special information suddenly came. An order came from the walkie-talkie: "There is a 'poisonous miasma' in the forest ahead, deal with it quickly." The officers and men of the reconnaissance team stopped, put on their gas masks, checked the air tightness, and began to move quickly through the forest.

Cui Chenglong followed Hu Zhongkui's footsteps closely. Suddenly, he stepped on a stone covered with moss, slipped and fell to the ground.

Hu Zhongkui heard the sound and immediately turned back. Cui Chenglong staggered to his feet, patted the dirt on his body, held his weapon tightly and returned to the team: “Squad leader, I’m fine.” Hu Zhongkui took off the radio on his body and carried it on his back: “If you feel uncomfortable, tell me as soon as possible.”

The reconnaissance team continued to advance towards the target area, and special information came one after another. The officers and men climbed the cliffs and passed the dangerous pass. As the sky gradually brightened, everyone’s physical energy consumption was close to the limit, and the camouflage clothes were already soaked with sweat.

After a night of hard work, the officers and men finally arrived at the target area in the early morning. They camouflaged and lurked according to the current situation, waiting for the best time to act.

The dawn was slightly exposed, and the earth was still asleep. In the corner of the jungle, the officers and men of the reconnaissance team were ready to go.

The drone took off and was subjected to strong electromagnetic interference just after it flew a short distance. The drone operator keenly noticed that there might be signal jammers operating in the target area, so he made an emergency landing and reported the situation to Hu Zhongkui.

Hu Zhongkui immediately summoned the team members and redeployed the combat.

“Two ‘enemies’ passed by point A and are approaching point B.” Cui Chenglong sent a message on the walkie-talkie.

“I will attract firepower, you will encircle from the rear wing, and the other will cover the front flank.” Hu Zhongkui lowered his voice and commanded calmly. The team members immediately took action and surrounded the “enemy” in the dark forest.

“Action!” Hu Zhongkui jumped out of the forest first to attract the attention of the “enemy”, and then the officers and men quickly attacked and quickly controlled the two “enemies”.

After some investigation, the reconnaissance team obtained important intelligence that the “enemy” command post was nearby. Seeing that there was not much time left, Hu Zhongkui decided to change the route again, climb from the cliff, and advance to the weak defense of the “enemy”. As the officers and men approached the “enemy” command post, a steep cliff with a height difference of more than 10 meters appeared in front of them.

Team member Wang Zhenyin took the initiative to set up ropes. On the cliff, he held the rock crack tightly with his left hand and supported the protruding tree stump with his right foot, and gravel kept falling from the bottom of his combat boots. He flexibly climbed to the top of the steep cliff and surveyed the surrounding environment. After confirming that there was no “enemy situation”, Wang Zhenyin successfully set up the rope and sent a signal downward, and other team members quickly climbed the steep cliff with the help of ropes.

After a long journey, the officers and men finally infiltrated the vicinity of the “enemy” command post. They quickly occupied the high mounds to set up firepower and were ready to provide fire cover at any time.

In Hu Zhongkui’s scope, the reconnaissance team composed of Cui Chenglong and Wang Zhenyin was using a variety of equipment to conduct three-dimensional reconnaissance.

Soon, they sent back the target data of the “enemy” command post, guard post, etc. to the command post. The rear firepower team accurately positioned, the whistling sound of artillery tore through the night, and the artillery fire instantly covered the target area.

As the sky gradually brightened, the intercom came with the order of “successfully annihilate the ‘enemy’ command post within the specified time and evacuate quickly.”

The members of the reconnaissance team stood up again and disappeared into the dense jungle.

陆军某旅导弹技师吴云飞：从普通士兵成长为“兵专家”

来源：解放军报 作者：陶然 李少卿 责任编辑：杜圣智 2025-05-30

陆军某旅导弹技师吴云飞——

“我们要走在时间前面”

■陶然 李少卿

初夏时节，陆军某旅野外训练场，一场实弹射击训练即将拉开战幕，二级军士长吴云飞带着几名导弹射手使用快速检测装置对发射平台进行最后的测试。

这台装置是吴云飞最新研发的成果，不仅能在短时间内完成全流程检测，还能快速发现故障隐患，为导弹发射提供精准的决策判断依据。

“导弹技师岗位虽小、责任重大，要确保每次导弹发射都能精准命中目标，我们必须将工作做到极致。”入伍 23 年来，吴云飞先后历经 3 代防空装备的更新换代，为了让自己跟上装备升级的速度，他逼着自己不断学习、不断积累、不断探索，逐渐从一名普通士兵成长为防空导弹领域的”兵专家”。

吴云飞的创新研发之路，始于一次实弹射击任务。当时，一台导弹发射车突发故障。依靠当时的检测设备，他们无法在短时间内对发射平台进行全面检查。尤其发动机和电路布设，受环境等因素影响大，如果用常规的检测方法，将会导致发射延误，影响整个任务。于是，研发出一套快速检测装置的想法，在吴云飞心里生根发芽。

深夜，吴云飞在笔记本上画下一张张思维导图。3 台待检发动机的轰鸣声此起彼伏，吴云飞将 12 个微型传感器贴在不同材质的管路上。示波器屏幕突然爆出异常波形，这个发现让他灵感迸发。在他的努力下，一套快速检测装置被成功研发出来。

很快，考验来临。一次任务中，一台设备突然”熄火”，但各项仪表盘指数均正常。正当连长发愁时，吴云飞掏出了他新研发的快速检测装置。这套装置很快就定位到被沙粒侵入的电路板插槽。倘若在过去，检测该故障需要拆卸几十个部件。

吴云飞研发创新的成果远不止这一项。在防空导弹技术维护室里，他带领战友集智攻关，5 项革新成果获得国家专利。

成功路上没有捷径，不过是比别人走了更多的路。吴云飞随身常带着一个笔记本，笔记本扉页写着这样一行字：”故障即战情，时间就是战斗力。”20 多年来，他的笔记本换了一本又一本，密密麻麻记录了 400 多个故障案例、500 多条维修心得，还有手绘的 40 多张电路图，被身边战友称之为”维修宝典”。

如今，吴云飞依旧每天忙碌在导弹平台保障一线。面对新域新质作战力量建设的迫切需要，他说：”我们要走在时间前面，只有平时先行一步，才能赢得战场先机。”

Wu Yunfei, a Missile Technician of a Certain Army Brigade: Growing from an Ordinary Soldier to a “Soldier Expert”

Source: PLA Daily Author: Tao Ran Li Shaoqing Editor: Du Shengzhi 2025-05-30

Wu Yunfei, a missile technician of a certain army brigade——

“We must stay ahead of time”

■Tao Ran Li Shaoqing

In early summer, at a field training ground of a certain army brigade, a live-fire shooting training is about to begin. Second-class Sergeant Wu Yunfei and several missile shooters use a rapid detection device to conduct the final test of the launch platform.

This device is the latest research and development of Wu Yunfei. It can not only complete the whole process detection in a short time, but also quickly discover hidden faults, providing accurate decision-making and judgment basis for missile launch.

“Although the position of a missile technician is small, the responsibility is heavy. To ensure that every missile launch can accurately hit the target, we must do our best in our work.” In the 23 years since he joined the army, Wu Yunfei has experienced the replacement of three generations of air defense equipment. In order to keep up with the speed of equipment upgrades, he forced himself

to keep learning, accumulating, and exploring, and gradually grew from an ordinary soldier to a "soldier expert" in the field of air defense missiles.

Wu Yunfei's innovative research and development journey began with a live-fire shooting mission. At that time, a missile launcher suddenly broke down. Relying on the detection equipment at the time, they could not conduct a comprehensive inspection of the launch platform in a short time. In particular, the engine and circuit layout are greatly affected by environmental factors. If conventional detection methods are used, it will cause launch delays and affect the entire mission. Therefore, the idea of developing a set of rapid detection devices took root in Wu Yunfei's heart.

Late at night, Wu Yunfei drew a mind map on his notebook. The roar of the three engines to be inspected came one after another, and Wu Yunfei attached 12 micro sensors to pipes of different materials. An abnormal waveform suddenly appeared on the oscilloscope screen, and this discovery gave him inspiration. With his efforts, a set of rapid detection devices was successfully developed.

Soon, the test came. During a mission, a device suddenly "shut down", but all the instrument panel indicators were normal. Just when the company commander was worried, Wu Yunfei took out his newly developed rapid detection device. This device quickly located the circuit board slot invaded by sand. If it were in the past, dozens of components would need to be disassembled to detect the fault.

Wu Yunfei's research and development and innovation achievements are far more than this one. In the air defense missile technology maintenance room, he led his comrades to work together to solve problems, and 5 innovative achievements were awarded national patents.

There is no shortcut to success, but it is just taking more roads than others. Wu Yunfei always carries a notebook with him, with a line of words written on the cover of the notebook: "Failure is the battle situation, time is combat effectiveness." Over the past 20 years, he has changed notebooks one after another, densely recording more than 400 failure cases, more than 500 maintenance experiences, and more than 40 hand-drawn circuit diagrams, which are called "maintenance handbooks" by his comrades.

Today, Wu Yunfei is still busy on the front line of missile platform support every day. Faced with the urgent need to build new domains and new qualities of combat forces, he said: "We must stay ahead of time. Only by taking a step ahead in peacetime can we gain the upper hand on the battlefield."

第 82 集团军某旅探索运用 "拓扑图"助推训练转型升级

来源：解放军报 作者：刘敏 刘凡 责任编辑：杜圣智 2025-05-30 09:57:15

第 82 集团军某旅探索运用"拓扑图"助推训练转型升级——

精武强能，人人拥有”小目标”

■解放军报记者　刘敏　特约通讯员　刘凡

编者按 习主席强调，突出打牢基础，严格按纲施训，严格考核考评，严格督导问责，完善保障条件，抓好群众性练兵比武，把每一个单兵、每一型装备、每一类作战要素训到位，夯实打胜仗能力基础。第 82 集团军某旅创新组训模式，探索运用”军事训练目标拓扑图”，将各级作战任务”大目标”分解成个人训练”小目标”，抓紧抓实计划、实施、考评等关键环节，形成从目标分解到成果聚合的闭合链路，推动军事训练转型升级，有效提升了部队训练水平。

工程机械破障突进，快速构筑掩体；重型装备灵活腾挪，建起阻隔障碍……近日，第 82 集团军某旅组织一场多岗位专业技能阶段性考核。记者翻看该旅某连一个课目的考核成绩单发现，官兵成绩优良率超过八成，不少官兵的考核成绩与此前相比进步明显。

“官兵个人训练成绩的进步，带动连队训练水平整体提升，这是我们探索运用’军事训练目标拓扑图’助推训练转型升级带来的新变化。”该旅领导介绍，他们借鉴拓扑结构研究成果，绘制树状”军事训练目标拓扑图”，将作战任务按”旅—营—连”逐级分解细化，各级据此设定符合自身实际的”目标集”，官兵再以连队”目标集”为参照，结合自身情况制作包含训练课目、进步幅度和努力目标等内容的个人训练目标卡。

记者翻开该旅某营”军事训练目标拓扑图”，各级战场分工、下辖连队作战任务等内容一目了然。”认真研究全营作战任务后，营连可结合作战分工设定自身’目标集’，各连区分指挥、行动、保障等作战编组将’目标集’进一步细化，根据军事训练大纲要求明确训练标准，帮助官兵制订个人成长目标。”该营干部耿俊卿说，”军事训练目标拓扑图”的树状结构，让营战场分工、连作战编组和官兵个人训练目标之间的关系脉络更加清晰呈现，有助于针对性地进行组训施教。营连帮助每名官兵实现个人训练的”小目标”，这些”小目标”不断聚合，就能逐渐提升全营整体作战能力。

此前，一项操作技能因为作业流程繁琐、精度要求较高，一直是该旅开展训练的难点。然而，这项技能被纳入个人训练目标后，不少官兵主动优化作业方法、总结经验技巧，极大地提升了训练质效。在最近的一次训练中，组训干部孙超然发现中士赵晟钦不厌其烦地练习这项技能。赵晟钦说：”这项技能在后续其他课目中也要用到，现在不练扎实，后面的训练进度就会受影响。”

耿俊卿告诉记者，”军事训练目标拓扑图”犹如每名官兵的”专属课表”，让大家充分认识到不同训练课目和内容之间的逻辑关系，有效激发了官兵提升专业能力的主动性、积极性。不仅如此，他们还定期复盘，根据官兵训练成绩的变化，验证组训计划和施训方法是否科学合理，在此基础上不断调整优化”军事训练目标拓扑图”和官兵个人训练的”小目标”。

“每个训练课目、每名官兵都是战斗力生成链路上的节点。每个节点都过硬，战斗力生成链路的畅通就有了保障。”该旅领导介绍，”军事训练目标拓扑图”推广运用后，全旅训练转型升级不断换挡提速，各营连、各作战单元在作战方式上，正在加速从”协同配合”走向”战法融合”。目前，他们正在探索建立更加科学的训练目标成果检验机制，为进一步优化编组、精准施训提供有力支撑。

A Brigade of the 82nd Group Army Explored the Use of “Topological Maps” to Promote Training Transformation and Upgrading

Source: PLA Daily Author: Liu Min Liu Fan Editor: Du Shengzhi 2025-05-30

A brigade of the 82nd Group Army explored the use of “topological maps” to promote training transformation and upgrading——

Strengthen martial arts and abilities, and everyone has “small goals”

■PLA Daily reporter Liu Min Special correspondent Liu Fan

Editor’s note President Xi Jinping emphasized that we should lay a solid foundation, strictly implement training according to the guidelines, strictly conduct assessments and evaluations, strictly supervise and hold accountable, improve support conditions, and do a good job in mass training and competitions, so as to train every single soldier, every type of equipment, and every type of combat element in place, and lay a solid foundation for the ability to win battles. A brigade of the 82nd Group Army innovated the training model, explored the use of “military training target topological maps”, decomposed the “big goals” of combat tasks at all levels into “small goals” for individual training, and grasped the key links such as planning, implementation, and assessment, forming a closed link from goal decomposition to results aggregation, promoting the transformation and upgrading of military training, and effectively improving the training level of the troops.

Engineering machinery breaks through obstacles and quickly builds shelters; heavy equipment moves flexibly and builds barriers... Recently, a brigade of the 82nd Group Army organized a multi-position professional skills stage assessment. The reporter looked through the assessment report card of a course of a company of the brigade and found that the officers and men had an excellent rate of more than 80%, and the assessment scores of many officers and men were significantly improved compared with the previous ones.

“The improvement of the individual training results of officers and men has led to the overall improvement of the company’s training level. This is a new change brought about by our exploration of the use of the “military training target topology map” to promote the transformation and upgrading of training.” The leaders of the brigade introduced that they drew on the research results of topological structures and drew a tree-like “military training target topology map”,

breaking down and refining the combat tasks step by step according to "brigade-battalion-company". All levels set a "target set" that suits their own reality. The officers and men then use the company's "target set" as a reference and combine their own situation to make personal training target cards containing training courses, progress and efforts.

The reporter opened the "military training target topology map" of a battalion of the brigade, and the division of labor at all levels and the combat tasks of the subordinate companies were clear at a glance. "After carefully studying the combat mission of the entire battalion, the battalion company can set its own 'target set' in combination with the combat division of labor. Each company can further refine the 'target set' by distinguishing between command, action, and support combat groups, clarifying the training standards according to the requirements of the military training outline, and helping officers and men to set personal growth goals." Geng Junqing, a cadre of the battalion, said that the tree structure of the "military training target topology map" makes the relationship between the battalion battlefield division of labor, the company combat group and the individual training goals of officers and men more clearly presented, which is conducive to targeted training and teaching. The battalion company helps each officer and soldier achieve the "small goals" of personal training. These "small goals" are constantly aggregated, which can gradually improve the overall combat capability of the entire battalion.

Previously, an operating skill has always been a difficulty for the brigade to carry out training because of its cumbersome operation process and high precision requirements. However, after this skill was included in the personal training goal, many officers and men took the initiative to optimize the operation methods and summarize experience and skills, which greatly improved the quality and effectiveness of training. In a recent training, training cadre Sun Chaoran found that Sergeant Zhao Shengqin practiced this skill tirelessly. Zhao Shengqin said: "This skill will also be used in other subsequent courses. If you don't practice it now, the progress of subsequent training will be affected." Geng Junqing told reporters that the "Military Training Target Topology Map" is like an "exclusive schedule" for each officer and soldier, allowing everyone to fully understand the logical relationship between different training courses and contents, and effectively stimulate the initiative and enthusiasm of officers and men to improve their professional capabilities. Not only that, they also regularly review and verify whether the training plan and training methods are scientific and reasonable based on the changes in the training results of officers and men. On this basis, they continuously adjust and optimize the "Military Training Target Topology Map" and the "small goals" of individual training of officers and men. "Every training course and every officer and soldier is a node on the combat effectiveness generation link. If every node is strong, the smooth flow of the combat effectiveness generation link will be guaranteed." The brigade leader introduced that after the promotion and application of the "Military Training Target Topology Map", the training transformation and upgrading of the entire brigade has been continuously shifting gears and accelerating. In terms of combat methods, each battalion, company, and combat unit is accelerating from "coordination and cooperation" to "integration of tactics and methods."

At present, they are exploring the establishment of a more scientific training goal and results testing mechanism to provide strong support for further optimizing organization and precise training.

从“凑数上报”到“如实上报”，这个单位转变作风真解难题

来源：解放军报 作者：王梦圆 肖祖滨 责任编辑：郭妍菲 2025-05-30 07:11:59

陆军某旅端正机关工作态度和作风——

有问题如实上报 帮解难及时有力

■王梦圆 肖祖滨

“后厨油烟机损坏需要修理”“洗漱间下水道反复堵塞”……前段时间，陆军某旅领导带领机关工作组下基层现场办公。带队领导在听汇报时，越听越觉得不对劲：多个营连接连反映的问题，基本都可以依托基层自行解决。

“是真没别的问题还是另有隐情？”带着疑问，工作组进一步深入了解，很快发现了端倪：营区家属院没有电动车充电桩和停车棚，给家属造成了不便。此前，带队的这名旅领导在蹲点时就注意到这个问题，并要求基层及时上报。如今机关工作组来到官兵身边排忧解难，却不见有人反映该问题。

原来，真实情况是机关部分科室担心有些已上报的老问题没有解决，一些新问题又出现会太过”扎眼”，怕领导责问，因此私下和基层协商，要求基层不要重复上报。而此次现场办公开始前机关又曾下发通知，要求上报问题。左右为难之下，基层只能上报一些自己力所能及的事情。

某营文书张凯就有这样的经历：”模拟弹的问题不是已经回复了吗？工厂正在加急生产，下个月就能做出来”“我们已经申领新一批防毒面具，很快就能发下来，这件事就别提了”……一次上报需求后，他接连接到机关的电话，要求他修改或者撤回此前上报的问题。

一天下来，张凯把上报的清单改了又改，问题也越删越少。没承想，他又接到组织科的电话：”首长机关下基层办公是来帮助营连解决问题的，怎么发过来的统计表上问题这么少？”无奈之下，他只能将晾衣场玻璃损坏、墙皮脱落等问题”凑数”上报。

首长办公会上，该旅领导对这一现象提出严肃批评，要求机关立即进行整改：重新收集梳理基层矛盾困难清单，严禁对基层需求私下”设卡”；针对基层提报的问题，逐个明确责任人、责任部门和解决时限；每周大交班会讲评推进情况，规定时限内未完成工作的科室须作出情况说明；问题解决后，基层填写《机关服务基层评价表》，评价结果直接和年底机关科室评先评优挂钩。

“履带车场电压不稳，存在安全隐患”……最近，张凯重新开列问题清单，如实上报各连矛盾困难。据介绍，截至目前，机关各业务科已收集 6 类 69 个基层无力解决或需要机关统筹协调的难题，并逐一制订了解决举措。

From “Making up the Numbers to Report” to “Reporting Truthfully”, This Unit’s Change of Style Really Solves Problems

Source: PLA Daily Author: Wang Mengyuan Xiao Zubin Editor: Guo Yanfei 2025-05-30

A certain army brigade corrects the work attitude and style of the agency——

Report problems truthfully and help solve problems in a timely and effective manner

■Wang Mengyuan Xiao Zubin

“The kitchen range hood is damaged and needs to be repaired” “The sewer in the washroom is repeatedly blocked”... Some time ago, the leader of a certain army brigade led the headquarters’ working group to the grassroots to work on site. When the leader listened to the report, the more he listened, the more he felt something was wrong: the problems reflected by multiple battalions and companies could basically be solved by themselves relying on the grassroots.

“Is there really no other problem or is there something else hidden?” With doubts, the working group further investigated and soon found clues: there were no electric vehicle charging piles and parking sheds in the family compound of the barracks, which caused inconvenience to the family members. Previously, the brigade leader who led the team noticed this problem when he was squatting and asked the grassroots to report it in time. Now the working group has come to the officers and men to solve problems, but no one has reported the problem.

It turns out that the real situation is that some departments of the headquarters are worried that some old problems that have been reported have not been solved, and some new problems will appear too “eye-catching”, and they are afraid of being questioned by the leaders. Therefore, they negotiated with the grassroots privately and asked the grassroots not to report repeatedly. Before the start of this on-site office, the headquarters issued a notice requiring the reporting of problems. Under the dilemma, the grassroots can only report some things that they can do.

Zhang Kai, a clerk in a certain battalion, had such an experience: “Hasn’t the problem of simulated bullets been answered? The factory is speeding up production and it will be made next month.” “We have applied for a new batch of gas masks, which will be issued soon, so don’t mention this matter.”... After reporting the needs once, he received calls from the agency, asking him to modify or withdraw the previously reported problems.

At the end of the day, Zhang Kai revised the reported list again and again, and the problems were deleted less and less. Unexpectedly, he received another call from the Organization Department: “The head office went to the grassroots to help the battalion and company solve problems. Why

are there so few problems on the statistical table sent over?" In desperation, he could only "make up the numbers" and report problems such as damaged glass and peeling wall in the clothes drying yard.

At the head office meeting, the brigade leaders made serious criticisms of this phenomenon and required the agency to make immediate rectifications: re-collect and sort out the list of grassroots contradictions and difficulties, and strictly prohibit private "setting up barriers" for grassroots needs; for the problems reported by the grassroots, clarify the responsible persons, responsible departments and solution time limits one by one; review the progress of the weekly handover meeting, and the departments that have not completed the work within the specified time limit must make a situation explanation; after the problem is solved, the grassroots will fill in the "Evaluation Form for the Service of the Agencies to the Grassroots", and the evaluation results will be directly linked to the evaluation of the agency departments at the end of the year.

"The voltage in the tracked vehicle yard is unstable, and there are safety hazards"... Recently, Zhang Kai re-listed the problems and reported the contradictions and difficulties of each company truthfully. It is reported that, as of now, the various business departments of the agency have collected 69 problems in six categories that grassroots units are unable to solve or require overall coordination by the agency, and have formulated solutions for each of them.

第 74 集团军某旅为越级晋升军衔士兵队伍强能力增实力

来源：解放军报 作者：汪文棋 刘 杰 责任编辑：郭妍菲 2025-05-30

第 74 集团军某旅加强越级晋升军衔士兵队伍培养——

衔级跨越 素质升级

■汪文棋 刘 杰

"钟炎平、马涵、周瑞等同志在近期组织的营战术考核中表现突出，展现了过硬素质……"前不久，第 74 集团军某旅炮兵营组织军事训练讲评会，几名新晋中士受到了重点表扬。这几名中士都是大学生士兵，凭借学历优势按规定通过考核越级晋升军衔后，经过组织帮带培养，如今已在演训一线挑起大梁。

"这得益于旅里的人才培养机制。"该旅人力资源科郭干事介绍，根据相关规定，首次授予军士军衔前，符合条件的大学生义务兵，在普通高等学校就读的年数可以折算为服役年限，表现优异者可越级晋升军衔。对此，榴炮一连连长坦言："越级晋升军衔的士兵学历高，但少了基层历练，带兵管装、特情处置等方面存在短板，导致部分人员出现衔级与能力不匹配的问题。"

越级晋升中士的大学生士兵周瑞就面临过这种情况。某次跨区机动训练中，他带领的车组突遇通信系统故障。面对”敌”电磁干扰，他手忙脚乱重启设备却无济于事，最终因指令传达延误导致战术协同脱节。”以为自己已经熟悉掌握原理，真遇到突发状况还是’掉链子’。”复盘会上，他满心愧疚。

与周瑞相似，中士喻永强带队参加夜间侦察任务时，因不熟悉地形判读规则，误将一处民房标注为疑似”敌指挥所”；中士徐凯航组织班组实弹射击时，因没有掌握卡弹紧急处置方法，耽误了训练进程……

“学历是优势，但战场上，实战本领才是’硬杠杠’。衔级跨越缩短了成长周期，但标准要求不能因此打折扣！”针对此类情况，该旅以”补短板、强本领”为目标，打出一套”组合拳”：一方面常态安排越级晋升军衔士兵担任代理班长、值班员等职务，帮助他们熟悉各项工作；另一方面，在各类训练中为越级晋升军衔士兵设置指挥岗位，要求他们独立完成战术决策、特情处置等任务，倒逼他们在实战任务中提升能力本领。此外，该旅还遴选50余名技术尖子成立”导师团”，与越级晋升军衔士兵结对帮带，针对地形判读、夜间指示目标等短板弱项进行攻关研练。

“定位设备受干扰时，必须结合地貌特征手动校准……”训练场上，二级军士长石永亮正带着越级晋升中士迟焕雄复盘查找夜间侦察失误原因。跟训期间，迟焕雄随”导师”完成 10余次复杂作业，手绘的地形略图被评为”优秀案例”。

“给岗位就是给责任，压担子才能长本事。”该旅作训科参谋介绍，去年以来，该旅越级晋升军衔士兵群体牵头攻克多个重难点课目，探索的数项训法被上级推广。目前，该旅正探索建立晋升前特训机制，组织拟越级晋升军衔士兵进行综合训练考核，为其成长成才创造更加有利的条件。

A Certain Brigade of the 74th Group Army Strengthens the Ability and Strength of the Soldiers Who Have Been Promoted to Military Ranks by Leaps and Bounds

Source: PLA Daily Author: Wang Wenqi Liu Jie Editor: Guo Yanfei 2025-05-30

A certain brigade of the 74th Group Army strengthens the training of soldiers who have been promoted to military ranks by leaps and bounds——

Rank leaps and quality upgrades

■ Wang Wenqi Liu Jie

“Comrades Zhong Yanping, Ma Han, Zhou Rui and others have performed outstandingly in the recent battalion tactical assessment and demonstrated excellent qualities...” Not long ago, the artillery battalion of a brigade of the 74th Group Army organized a military training review

meeting, and several newly promoted sergeants were praised. These sergeants are all college students. After they passed the assessment and were promoted to military ranks by leaps and bounds according to regulations with their academic qualifications, they have been trained by the organization and are now taking on the main responsibility in the front line of training and exercise.

“This is thanks to the talent training mechanism in the brigade.” Guo, an officer from the Human Resources Department of the brigade, introduced that according to relevant regulations, before the first granting of the rank of sergeant, the number of years that eligible college student conscripts have studied in ordinary colleges and universities can be converted into years of service, and those with outstanding performance can be promoted to higher ranks. In this regard, the commander of the first howitzer company said frankly: “The soldiers who are promoted to higher ranks have high academic qualifications, but lack grassroots experience, and have shortcomings in leading troops, managing equipment, and handling special situations, which leads to the mismatch between rank and ability for some personnel.” Zhou Rui, a college student soldier who was promoted to sergeant, faced this situation. During a cross-regional mobile training, the crew he led suddenly encountered a communication system failure. Faced with “enemy” electromagnetic interference, he was in a hurry to restart the equipment but to no avail, and eventually the delay in the transmission of instructions led to a disconnection in tactical coordination. “I thought I was familiar with the principles, but I still “dropped the chain” when I encountered an emergency.” At the review meeting, he was full of guilt. Similar to Zhou Rui, when Sergeant Yu Yongqiang led the team to participate in the night reconnaissance mission, he was not familiar with the rules of terrain interpretation and mistakenly marked a civilian house as a suspected “enemy command post”; when Sergeant Xu Kaihang organized the team to shoot live ammunition, he did not master the emergency treatment method of the jammed bullet, which delayed the training process... “Education is an advantage, but on the battlefield, actual combat skills are the ‘hard bar’. The leap of rank shortens the growth cycle, but the standard requirements cannot be discounted!” In response to such situations, the brigade aims to “make up for shortcomings and strengthen skills” and has launched a set of “combination punches”: on the one hand, soldiers who have been promoted to higher ranks are arranged to serve as acting squad leaders, duty officers and other positions to help them familiarize themselves with various tasks; on the other hand, command positions are set up for soldiers who have been promoted to higher ranks in various trainings, requiring them to independently complete tactical decision-making, special situation handling and other tasks, forcing them to improve their abilities in actual combat tasks. In addition, the brigade has selected more than 50 technical elites to form a “mentor group” to pair up with soldiers who have been promoted to higher ranks to help them, and conduct research and training on weaknesses such as terrain interpretation and night target indication.

“When the positioning equipment is interfered with, it must be manually calibrated in combination with the terrain features...” On the training ground, Second Sergeant Shi Yongliang is reviewing the cause of night reconnaissance errors with Sergeant Chi Huanxiong who has been promoted to

higher ranks. During the training, Chi Huanxiong completed more than 10 complex operations with the “mentor”, and the hand-drawn terrain sketch was rated as an “excellent case”.

“Giving a position is giving responsibility, and only by putting pressure on the burden can you grow your skills.” The brigade’s training staff introduced that since last year, the group of soldiers who have been promoted to higher ranks in the brigade have taken the lead in overcoming many difficult and key subjects, and several training methods explored have been promoted by superiors. At present, the brigade is exploring the establishment of a special training mechanism before promotion, organizing soldiers who are expected to be promoted to higher ranks to conduct comprehensive training and assessment, and creating more favorable conditions for their growth and development.

官兵自主创新劲头足，“创新圆梦基金”激活基层创新 “一池春水”

来源：解放军报 作者：李润科 王若龙 宋子洵 责任编辑：郭妍菲 2025-05-30

第八十一集团军某旅依规支持官兵开展技术革新——

基层官兵有了”创新圆梦基金”

■李润科 王若龙 解放军报记者 宋子洵

最近一段时间，第 81 集团军某旅喜讯频传：多项由基层官兵探索出来的革新成果在训练场推广应用，有力推动了战斗力建设提质增效。

“这要归功于旅里设立的’创新圆梦基金’，我们得以放开手脚，大胆尝试！”二级上士朱琰是该旅有名的”创新达人”，去年以来，他牵头的工作室，自主完成了军事建模、3D 打印、数据编程等工作。

该旅官兵使用自己革新的仪器检测装备。詹奕坤 摄

在此过程中，朱琰承受了不小的压力。这些压力不仅源于种种技术难题，还来自资金需求：刚开始时，朱琰想研制一套装备智能操控系统，用以提高装备抗干扰性，但苦无经费支持，这个想法一度搁浅。直到一次调研，旅领导才了解到实情。

无独有偶。几位夜训器材研究小组成员，想出不少”金点子”，但因没有经费，这些设计构想仅停留在图纸上；一位新毕业的干部，有了围绕提升作战筹划能力设计一款电子沙盘的创意，可因缺少资金支持，也无法落地……该旅领导告诉记者，在那次调研中，他们发现基层官兵身在一线，经常能够提出让人眼前一亮的创新想法，但往往因为经费短缺，最终不了了之。

“官兵为了提升战斗力不怕困难搞创新、求突破，各级党委也要主动靠前做好保障工作。”经过研究，并报上级同意，该旅党委依照有关规定，设立”创新圆梦基金”，按照”基层申报、机关审核、党委把关、专款专用”原则，对官兵提出的创新项目给予大力支持。

“你申请报销的支出已完成审核，请注意查收。”前段时间，随着”创新圆梦基金”顺利到账，朱琰由衷为旅里的务实举措点赞。

“创新圆梦基金”的设立，激活了基层创新的”一池春水”，该旅官兵思战研战热情越发高涨，群众性创新氛围愈加浓厚。某连二级上士张彪成功研制自动感应爆破组件，成果在全旅得到推广运用；某营成立工作室，鼓励技术骨干和专业能手发挥自身优势革新器材，带动战斗力提升……

然而，或许是好事多磨，一名旅领导在基层检查时发现，有的项目已经审核通过，却迟迟不见官兵报销经费。他当即找到当事人和营连主官了解情况。

“啥成果都没研究出来，咋能报销费用呢？”原来，这几名官兵因为项目失败了，所以不好意思申请报销。不仅如此，这名旅领导还了解到，部分官兵由于担心难出成果，即便有创新的想法也变得畏手畏脚。

“要让官兵想创新、谋创新、敢创新，必须解除他们的后顾之忧。”根据官兵反映的问题，该旅机关进一步明确：加大政策支持力度，安排机关业务科室对官兵申报的项目进行可行性论证。论证通过后，派出专业人员给予技术支持和条件保障，助力创新想法”落地开花”。在此基础上，他们积极探索构建容错纠错、激励担当机制，严格落实”三个区分开来”，对规定允许的创新失败所涉及的经费经过审核同样可以报销，同时加大纠错力度，对创新过程中出现的失误进行复盘整改，避免重蹈覆辙。

此前，二级上士苏晓光跟随单位赴南方某地执行驻训任务，其间发现某型装甲装备的水冷式加温装置在高温高湿环境下易出故障，便产生了革新器材的念头。旅里出台一系列新举措后，他把想法化作实际行动，成功研制出便携式空气储能外部启动装置，有效解决了这一问题。

既给予有力保障，又提供技术支持，受此激励，官兵们创新创造更加积极主动，一项项革新成果接连涌现。如今，该旅每个连队都有自己的”创新工作室”，将官兵的聪明才智，汇聚到练兵备战工作中。

短 评

为官兵智慧添柴助燃

■陆宏伟

创新的活力在基层，创新的源头在官兵。基层官兵处在练兵备战第一线、军事斗争准备最前沿，是军事新技术应用的主要实践者，是群众性创新活动的主力军。因此，哪里需要创新、创新成效如何，基层官兵的感知最真切。他们创新的智慧一旦被激活，就会释放出巨大的能量。

近年来，”90 后”“00 后”官兵逐渐成为基层连队的主体力量，他们思维活跃、乐于探索创新，各级应当予以支持和鼓励。要知道，走上创新赛道并非易事，既要勤于思考、广泛涉猎各方面知识，又要敢于尝试、不惧失败。各级要及时跟进，做好保障、提供支持、创造条件，进一步开掘创新的源头活水，不让官兵的好想法落空、积极性消退。

为官兵智慧添柴助燃，要建立完善相关扶持制度机制，拿出实实在在的行动。除了依法依规给予资金等支持，还应主动提供技术和条件保障，大力营造尊重知识、重视人才、鼓励创造的浓厚氛围。只有这样，才能调动基层官兵的积极性和主动性，充分激发他们的创新活力，为部队战斗力提升不断注入新动能。

Soldiers Are Full of Enthusiasm for Independent Innovation, and the “Innovation Dream Fund” Activates Grassroots Innovation.

Source: PLA Daily Author: Li Runke, Wang Ruolong, Song Zixun Editor: Guo Yanfei 2025-05-30

A brigade of the 81st Group Army supports soldiers in carrying out technological innovation in accordance with regulations---Grassroots soldiers have the “Innovation Dream Fund”

■ Li Runke, Wang Ruolong, PLA Daily reporter Song Zixun

Recently, a brigade of the 81st Group Army has received good news: a number of innovative achievements explored by grassroots soldiers have been promoted and applied in the training ground, which has effectively promoted the improvement of combat effectiveness.

“This is thanks to the ‘Innovation Dream Fund’ established in the brigade. We can let go and try boldly!” Second Sergeant Zhu Yan is a well-known “innovation expert” in the brigade. Since last year, the studio he led has independently completed military modeling, 3D printing, data programming and other work.

The officers and men of the brigade use their own innovative instruments to detect equipment. Photo by Zhan Yikun

During this process, Zhu Yan was under considerable pressure. These pressures came not only from various technical difficulties, but also from funding needs: At the beginning, Zhu Yan wanted to develop an intelligent control system for equipment to improve the anti-interference ability of equipment, but there was no financial support, and this idea was once stranded. It was not until a survey that the brigade leaders learned the truth.

It is not unique. Several members of the night training equipment research team came up with many “golden ideas”, but due to lack of funds, these design concepts only remained on the drawings; a newly graduated cadre had the idea of designing an electronic sand table around improving combat planning capabilities, but due to lack of financial support, it could not be implemented... The brigade leaders told reporters that during that survey, they found that grassroots officers and men were on the front line and often came up with innovative ideas that made people shine, but often because of lack of funds, they ended up in vain.

“In order to improve combat effectiveness, soldiers are not afraid of difficulties to innovate and seek breakthroughs. Party committees at all levels should also take the initiative to do a good job of support.” After research and approval from superiors, the brigade party committee established the “Innovation Dream Fund” in accordance with relevant regulations. In accordance with the principle of “grassroots application, agency review, party committee review, and special funds for special purposes”, it gave strong support to the innovative projects proposed by soldiers.

“The expenses you applied for reimbursement have been reviewed, please check them.” Some time ago, with the smooth arrival of the “Innovation Dream Fund”, Zhu Yan sincerely praised the pragmatic measures of the brigade.

The establishment of the “Innovation Dream Fund” has activated the “spring water” of grassroots innovation. The enthusiasm of the brigade’s officers and men to think about war and research war has become increasingly high, and the atmosphere of mass innovation has become more intense. Zhang Biao, a second-class sergeant in a certain company, successfully developed an automatic induction blasting component, and the results were promoted and applied throughout the brigade; a certain battalion set up a studio to encourage technical backbones and professional experts to give full play to their own advantages to innovate equipment and drive combat effectiveness improvement... However, perhaps good things come hard, a brigade leader found during a grassroots inspection that some projects had been reviewed and approved, but the officers and men had not yet reimbursed the expenses. He immediately found the person in charge and the battalion and company commander to understand the situation. “How can the expenses be reimbursed if no results have been studied?” It turned out that these officers and men were embarrassed to apply for reimbursement because the project failed. Not only that, but the brigade leader also learned that some officers and men became hesitant even if they had innovative ideas because they were worried about the difficulty of producing results. “To make officers and men want to innovate, seek innovation, and dare to innovate, their worries must be relieved.” According to the problems reflected by the officers and men, the brigade headquarters further clarified: increase policy

support and arrange the business departments of the headquarters to conduct feasibility demonstrations on the projects reported by officers and men. After the demonstration is passed, professional personnel will be sent to provide technical support and conditions to help innovative ideas “take root and blossom.” On this basis, they actively explored the construction of a fault-tolerant and error-correcting mechanism and an incentive mechanism, strictly implemented the “three distinctions”, and the expenses involved in the innovation failures allowed by the regulations could also be reimbursed after review. At the same time, they increased the correction efforts, reviewed and rectified the mistakes made in the innovation process, and avoided repeating the same mistakes.

Previously, Sergeant Su Xiaoguang followed the unit to a place in the south to perform a training mission. During the period, he found that the water-cooled heating device of a certain type of armored equipment was prone to failure in a high temperature and high humidity environment, so he had the idea of innovating the equipment. After the brigade introduced a series of new measures, he turned his ideas into practical actions and successfully developed a portable air energy storage external starting device, which effectively solved this problem.

Not only did they provide strong guarantees, but they also provided technical support. Inspired by this, the officers and men were more proactive in innovation and creation, and one after another innovative achievements emerged. Today, each company of the brigade has its own “Innovation Studio”, which brings together the wisdom of officers and men in training and preparation.

Short Comment

Adding fuel to the wisdom of officers and men

■ Lu Hongwei

The vitality of innovation is at the grassroots level, and the source of innovation is in the officers and men. Grassroots officers and men are at the forefront of training and preparation for war, and at the forefront of military struggle preparation. They are the main practitioners of the application of new military technologies and the main force of mass innovation activities. Therefore, grassroots officers and men have the most real perception of where innovation is needed and how effective the innovation is. Once their innovative wisdom is activated, it will release huge energy.

In recent years, officers and men born in the 1990s and 2000s have gradually become the main force of grassroots companies. They have active thinking and are willing to explore innovation. All levels should support and encourage them. It is important to know that it is not easy to embark on the innovation track. It is necessary to be diligent in thinking and widely involved in all aspects of knowledge, and to dare to try and not be afraid of failure. All levels should follow up in a timely manner, provide guarantees, support, and create conditions to further tap the source of innovation, so that the good ideas of officers and men will not fall through and their enthusiasm will not fade.

To add fuel to the wisdom of officers and men, it is necessary to establish and improve relevant support systems and mechanisms and take concrete actions. In addition to providing financial support and other support in accordance with laws and regulations, we should also take the initiative to provide technical and conditional guarantees, and vigorously create a strong atmosphere of respecting knowledge, valuing talents, and encouraging creation. Only in this way can we mobilize the enthusiasm and initiative of grassroots officers and men, fully stimulate their innovative vitality, and continuously inject new impetus into the enhancement of the troops' combat effectiveness.

西藏军区某部深入学习贯彻中央军委政治工作会议精神

来源：中国军网-解放军报 作者：乔可 郭丰宽 责任编辑：杜圣智 2025-05-31

西藏军区某部深入学习贯彻中央军委政治工作会议精神——

紧盯任务强作风 扎根高原砺硬功

■乔可 解放军报记者 郭丰宽

“小股’敌特’袭扰”“油罐车受到攻击”……近日，西藏军区某部一场车辆防卫训练在海拔4000 多米的高原展开。面对连贯特情，官兵沉着应对，灵活采取走打结合、攻防一体的战术，圆满完成训练任务。复盘小结中，该部某连陈连长说：”作为汽车兵，我们既是驾驶员也是战斗员。遂行好运输任务，既要有精湛的驾驶技术，还要具备良好的战斗素养。”

“习主席在中央军委政治工作会议上将新时代政治建军方略凝练概括为’十个明确’，其中之一是明确作风优良才能塑造英雄部队。”该部领导介绍，他们常年征战雪域高原，执行各类运输任务。中央军委政治工作会议召开后，党委一班人认真学习领会习主席重要讲话精神，坚持严正学风做榜样，带领官兵学习原文汲养分，联系实际悟感想，坚持将理论学习与部队任务实际相结合，引导官兵校正思想偏差、强化使命担当，以昂扬的战斗精神和顽强的战斗作风扎根岗位建功立业。

为提高机关服务基层水平，切实纠正党委机关松、散、虚、软等不良作风，该部组织党委机关自查自纠，围绕工作作风梳理出服务基层不贴实际、解难帮困推进缓慢等问题；组织机关干部深入基层听取一线官兵意见建议，切实解决兵站用水难、油库文体设施不足等实际问题，对于暂时未能解决的梳理形成问题清单，逐一挂账销账。

“‘艰险多吓不倒’是’三不倒’川藏线精神的内涵之一，是我们每名汽车兵应有的品质”“我们必须传承先辈优良作风，用开山劈路的精神去面对每一个挑战”……前不久，该部某分队执行高原运输任务时，下连不久的新兵面对险峻道路出现思想波动。车队到站后，”固边稳藏标兵”赵家田向大家分享十英雄深入帕龙天险排石探路的故事。官兵围绕”继承红色血

脉、弘扬优良作风”这一主题展开讨论，在分享交流中进一步坚定勇于攻坚克难的信心决心。

紧盯任务强作风，扎根高原砺硬功。前不久，该部官兵参加上级组织的紧急拉动训练，干部骨干发挥模范带头作用，官兵团结一致克服困难，迅速机动至指定地点，在实训实保中有效提升部队运输保障能力。

A Certain Unit of the Tibet Military Command [District] Thoroughly Studied and Implemented the Spirit of the Central Military Commission’s Political Work Conference

Source: China Military Network-People’s Liberation Army Daily Author: Qiao Ke Guo Fengkuan Editor: Du Shengzhi 2025-05-31

A certain unit of the Tibet Military Command [District] thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference——

Focusing on tasks and strengthening work style, taking root in the plateau and sharpening hard skills

■Qiao Ke People’s Liberation Army Daily reporter Guo Fengkuan

“A small group of ‘enemy agents’ harassed” “The tanker was attacked”... Recently, a vehicle defense training of a certain unit of the Tibet Military Command [District] was conducted on a plateau at an altitude of more than 4,000 meters. Faced with continuous special situations, officers and men responded calmly, flexibly adopted a combination of walking and fighting, and integrated offense and defense tactics to successfully complete the training tasks. In the summary of the replay, Captain Chen of a company of the unit said: “As motor soldiers, we are both drivers and combatants. To conduct transportation tasks well, we must have superb driving skills and good combat qualities.”

“President Xi summarized the strategy of building the army in the new era into ‘ten clarifications’ at the Central Military Commission’s Political Work Conference. One of them is that only with a good style of work can a heroic unit be formed.” The leaders of the unit introduced that they have been fighting in the snowy plateau all year round and performing various transportation tasks. After the Central Military Commission’s Political Work Conference was held, the Party Committee carefully studied and understood the spirit of Chairman Xi’s important speech, adhered to the strict style of study and set an example, led the officers and men to learn the original text to absorb nutrients, connected with the actual feelings, insisted on combining theoretical learning with the actual tasks of the troops, guided the officers and men to correct ideological deviations, strengthen their mission responsibilities, and take root in their posts with high-spirited fighting spirit and tenacious fighting style to make contributions.

In order to improve the level of service to the grassroots and effectively correct the bad work styles of the Party Committee, such as loose, scattered, empty and soft, the department organized the Party Committee to conduct self-examination and self-correction, sorted out the problems of service to the grassroots not being practical, and slow progress in solving problems and helping the poor around the work style; organized the cadres of the department to go deep into the grassroots to listen to the opinions and suggestions of the front-line officers and men, and effectively solve the practical problems such as the water shortage in the military station and the lack of cultural and sports facilities in the oil depot. For those that have not been solved temporarily, a list of problems is sorted out and the accounts are closed one by one.

"'Don't be scared by the difficulties' is one of the connotations of the 'three no-falls' Sichuan-Tibet line spirit, and it is the quality that every motor soldier should have." "We must inherit the fine style of our predecessors and face every challenge with the spirit of opening up mountains and cutting roads"... Not long ago, when a detachment of the department was performing a plateau transportation task, the new recruits who had just joined the company had ideological fluctuations when facing the steep roads. After the convoy arrived at the station, Zhao Jiatian, the "model soldier for consolidating the border and stabilizing Tibet", shared with everyone the story of ten heroes going deep into the natural dangers of Parong to clear stones and explore the way. The officers and men discussed the theme of "inheriting the red bloodline and promoting fine work styles", and further strengthened their confidence and determination to overcome difficulties in sharing and communication.

Focus on tasks, strengthen work style, and take root in the plateau to hone hard skills. Not long ago, officers and men of the unit participated in the emergency mobilization training organized by the superiors. The cadres and backbones played an exemplary role, and the officers and men united to overcome difficulties and quickly maneuvered to the designated location, effectively improving the transportation support capabilities of the troops in actual training and protection.

第 81 集团军某旅深入学习贯彻中央军委政治工作会议精神

来源：解放军报 作者：尹贻浩 宋子洵 责任编辑：尚晓敏 2025-06-01

第 81 集团军某旅深入学习贯彻中央军委政治工作会议精神——

开门集兵智 真情解兵难

■尹贻浩 解放军报记者 宋子洵

步战车疾驰突进，无人机盘旋侦察，炮兵分队火力覆盖……近日，第 81 集团军某旅一场实战化对抗训练结束后，某连王连长结合训练中的经验教训，登录该旅强军网 “我为组织献一计”专栏，提交了关于优化作战编组构成的建议.

“习主席在中央军委政治工作会议上发表重要讲话，体系部署了新征程上推进政治建军要抓好的 6 个方面重点工作，其中之一就是’提振干事创业精神状态’. 这为我们党委机关改进作风、服务基层指明了方向. “该旅领导介绍，基层的声音，就是党委工作的着力点. 为解决基层建言落地难、机关解难见效慢等问题，他们依托强军网开设 “我为组织献一计”“我向组织吐心声”等专栏，构建”兵情上传—分类督办—党委统筹—及时反馈”闭合链路. 官兵既可随时反映训练矛盾、生活难题，也能分享创新革新经验，让兵智直达党委决策链.

有官兵反映 “因军人证件过期，无法领取结婚证”的问题，人力资源科立即核实信息，为相关人员换发证件；针对 “训练场地使用时间冲突，影响训练效率”的问题，作训科科学统筹各单位训练内容和场地使用时间……记者登录 “我为组织献一计”专栏看到，官兵近期提交的 “训练场器材老化”“装备维修流程繁琐”等问题后面，均标注了责任科室和整改时限. “去提问题建议，有时迟迟得不到回复，如今一周内必有回音！”二级上士刘泽指着机关的答复清单说.

为打通服务基层 “最后一公里”，该旅还引导机关积极转变服务方式，从 “坐等敲门”到 “主动上门”，深入各点位听取官兵意见、现场办公解难. 一次，官兵反映 “有的单兵装具出现破损”，旅保障部迅速组织力量进班排，快速完成装具修理. 针对基层提出的 “错峰使用淋浴间”“训练器材流动共享”等建议，旅党委机关立即研究解决办法，很快落地见效. 据悉，前期官兵提出的意见建议，超七成已落实到位，及时解决 20 余个矛盾问题.

某连通信技师李龙研发的某系统，经论证完善后在全旅推广，解决了某型手持终端在车内的使用问题；修理排班长高德金研制的坦克维修工具套装，有效缩短野战条件下坦克故障维修时间……随着学习贯彻中央军委政治工作会议精神持续深入，该旅官兵精武强能热情持续高涨，大家在攻坚克难中奋勇争先、锤炼本领，高标准完成多项任务.

A Brigade of the 81st Group Army Thoroughly Studied and Implemented the Spirit of the Central Military Commission’s Political Work Conference

Source: PLA Daily Author: Yin Yihao Song Zixun Editor: Shang Xiaomin 2025-06-01

A brigade of the 81st Group Army thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference——

Open the door to gather soldiers’ wisdom and solve soldiers’ difficulties with sincerity

■ Yin Yihao PLA Daily reporter Song Zixun

Infantry fighting vehicles rushed forward, drones hovered for reconnaissance, and artillery units covered firepower... Recently, after a combat confrontation training of a brigade of the 81st Group Army, Captain Wang of a certain company combined the experience and lessons learned in the training and logged into the "I contribute a plan for the organization" column of the brigade's Strong Army Network and submitted suggestions on optimizing the composition of combat formations.

"President Xi delivered an important speech at the Central Military Commission's Political Work Conference, systematically deploying six key tasks to be done in the new journey to promote political building of the army, one of which is to 'boost the spirit of doing things and entrepreneurship'. This points out the direction for our Party Committee organs to improve their work style and serve the grassroots." The brigade leader introduced that the voice of the grassroots is the focus of the Party Committee's work. In order to solve the problems of the difficulty of grassroots suggestions being implemented and the slow effectiveness of the organs in solving problems, they rely on the Strong Army Network to open columns such as "I offer a plan for the organization" and "I tell the organization my heart", and build a closed link of "upload soldiers' information - classified supervision - Party Committee coordination - timely feedback". Officers and men can reflect training contradictions and life problems at any time, and can also share innovation and innovation experience, so that soldiers' wisdom can directly reach the Party Committee's decision-making chain.

Some soldiers reported that they could not get their marriage certificates because their military IDs had expired. The Political Work Department's Human Resources Office immediately verified the information and reissued the certificates for the relevant personnel. In response to the problem of "conflicts in the use of training grounds, affecting training efficiency", the Staff Department's Operations and Training Office scientifically coordinated the training content and use of the grounds of various units... The reporter logged into the "I Offer a Plan for the Organization" column and saw that the responsible departments and rectification deadlines were marked behind the problems recently submitted by soldiers, such as "aging equipment at the training ground" and "complicated equipment maintenance procedures". "In the past, when I raised questions and suggestions, sometimes I didn't get a reply for a long time, but now I will get a reply within a week!" Second Sergeant Liu Ze said, pointing to the reply list of the headquarters' departments.

In order to open up the "last mile" of serving the grassroots, the brigade also guided the headquarters' departments to actively change its service methods, from "waiting to knock on the door" to "actively visiting the door", and went deep into various points to listen to the opinions of soldiers and solve problems on the spot. Once, soldiers reported that "some individual equipment was damaged", and the brigade Support Department quickly organized forces to enter the squad and quickly complete the equipment repair. In response to suggestions from the grassroots such as "using shower rooms at different times" and "mobile sharing of training equipment", the brigade Party Committee immediately studied solutions and soon implemented them. It is reported that

more than 70% of the opinions and suggestions put forward by officers and men in the early stage have been implemented, and more than 20 contradictions have been solved in a timely manner.

A system developed by Li Long, a communications technician of a certain company, was promoted throughout the brigade after being demonstrated and improved, solving the problem of using a certain type of handheld terminal in the vehicle; the tank maintenance tool set developed by Gao Dejin, the squad leader of the repair platoon, effectively shortened the maintenance time of tank failures under field conditions... As the study and implementation of the spirit of the Central Military Commission's Political Work Conference continued to deepen, the enthusiasm of the officers and men of the brigade continued to rise, and everyone bravely took the lead in overcoming difficulties, tempered their skills, and completed multiple tasks with high standards.

西藏军区某旅组织运输分队开展跨昼夜连贯考核——

兵车驰骋 真打实抗

■解放军报特约通讯员 李松原

兵车驰骋，硝烟弥漫. 初夏时节，西藏军区某旅组织的一场运输分队跨昼夜连贯考核，在陌生地域紧张进行.

“夜晚是人体生理疲劳期，驾驶员在夜间驾驶过程中容易出现精力不集中、反应变慢等问题. “该旅领导介绍，针对跨昼夜遂行任务的特点，他们从严从难设置特情，在真打实抗中提升部队作战能力.

训练伊始，侦察车率先出发.“监测到运输路线上有异常无线电信号，疑似’敌方’车辆！”面对突发特情，指挥员果断下达指令：”持续监控，精准定位，实时共享信息！”随后，官兵密切配合、迅速锁定目标……

突然，上级通报”“敌’卫星过顶”. “停车，立即展开伪装！”指挥员迅速下达隐蔽命令. 官兵闻令而动，很快完成车辆伪装作业，成功规避”敌”卫星侦察.

情况解除后，官兵迅速拆除伪装网，在夜色中继续向预定阵地行进. 根据侦察车实时回传的情报，指挥员快速作出判断、及时下达指令，运输分队兵分两路、交替掩护，各作战单元紧密配合，随时准备应对突发情况.

“前方道路阻断”“车辆’受损’”……一波未平，一波又起. 面对导调组连续下达的新特情，官兵冷静应对、见招拆招.

训练结束，天边渐渐泛白. 顾不上休整，官兵立即展开复盘，认真剖析训练中暴露的多个问题，制订改进措施.

A Brigade of the Tibet Military Command [District] Organized a Transport Detachment [fendui] to Conduct a Continuous Assessment Across Day and Night

Source: China Military Network-People's Liberation Army Daily Author: Li Songyuan Editor: Sun Zhiying Release: 2025-06-03

View and share on mobile phone

A brigade of the Tibet Military Command [district] organized a transport detachment to conduct a continuous assessment across day and night——

Military vehicles galloping, real fighting

■ Liberation Army Daily special correspondent Li Songyuan

Military vehicles galloping, gunpowder filled the air. In early summer, a transport detachment cross-day and night continuous assessment organized by a brigade of the Tibet Military Region was conducted intensively in an unfamiliar area.

"Night is a period of physiological fatigue for the human body. Drivers are prone to problems such as lack of concentration and slow reaction during night driving." The brigade leader introduced that in view of the characteristics of conducting tasks across day and night, they set up special situations strictly and difficultly to improve the combat capabilities of the troops in real fighting.

At the beginning of the training, the reconnaissance vehicle set off first. "An abnormal radio signal was detected on the transport route, suspected to be an 'enemy' vehicle!" Faced with the sudden special situation, the commander decisively issued an order: "Continuous monitoring, precise positioning, and real-time information sharing!" Then, the officers and men worked closely and quickly locked the target...

Suddenly, the superior reported that "the 'enemy' satellite passed overhead." "Stop the car and start camouflage immediately!" The commander quickly issued a concealment order. The officers and men acted upon hearing the order and quickly completed the vehicle camouflage operation, successfully avoiding the "enemy" satellite reconnaissance.

After the situation was resolved, the officers and men quickly dismantled the camouflage net and continued to move towards the designated position in the night. According to the intelligence sent back by the reconnaissance vehicle in real time, the commander made a quick judgment and issued orders in time. The transport team was divided into two routes and alternately covered. The combat units worked closely and were ready to respond to emergencies at any time.

“The road ahead is blocked” and “the vehicle is ‘damaged’“... one wave has not yet subsided, and another wave has risen. Faced with the new special situations issued continuously by the guidance and dispatching group, the officers and men responded calmly and responded to them.

At the end of the training, the sky gradually turned white. Without taking time to rest, the officers and men immediately began to review the training, carefully analyzed the multiple problems exposed in the training, and formulated improvement measures.

动静结合！陆军某团实战化考核检验装备保养质效

来源：中国军网-解放军报 作者：李 江 责任编辑：孙悦

2025-06-04

陆军某团采用”动静结合”方式检验装备性能——

保养怎么样 拉出来遛遛

■解放军报特约记者 李 江

初夏的一天，随着指挥员一声令下，陆军某团某连官兵迅速发动重型机械化桥车，一场拉动考核随即上演.

行驶到指定地域后，该连官兵接到新指令，立即展开架桥作业. 与此同时，机关考核验收组成员分散至不同位置，观察检验装备车辆部件、车载系统等运转情况.

这时，车载诊断系统突然发出警报，显示出现了故障. 考核验收组当即叫停该连官兵作业，锁定故障点后切断装备动力，竖起警示标志，随后记录车辆数据、上报故障代码……

“上午刚结束装备换季保养，下午就组织拉动考核，还是头一回.”该连姜连长说.

今年驻训开始后，该团机关在调研中发现，基层官兵反映比较集中的问题，是装备动用频繁导致故障明显增多. 加之此次驻训地自然环境相对恶劣，各营连点位分散，导致日常集中维护保养装备难度增加，还出现了”检查时没问题、动起来出状况”等现象.

在这次换季保养开始前，该团机关专门邀请厂家技术人员，同装备保障部门一起，开了一次武器装备保养研讨会. 大家认为，此前采用的”静态”检验方法已经不能满足遂行各种任务需要. 所谓”静态”检验，是指装备车辆在完成维护保养后，停在车库接受性能检测. 最终，经过讨论研究，他们决定采用”动静结合”方式检验此次换季保养成效，即在原有基础上，增加动态检验环节.

具体操作时，该团机关通过不打招呼、不设预案的拉动考核，对完成维护保养的装备进行综合检验. 他们根据不同专业特点，从难从严设置考核内容，逼近装备性能极限，让问题

充分暴露. 同时，从各营连抽调装备管理能手、专业骨干，同修理连官兵一道，组成了考核验收组.

视线回到这次拉动考核现场. “我们连共有 3 辆装备车辆出现故障. 深查原因，归根到底还是维护保养不够细致. “姜连长说，他现在深刻理解了团机关的用意，”装备性能关系战场胜负，在动态中检验保养质效，可能是最直接的方式. “

不只是这个连队，在这次拉动考核中，其他一些连队也不同程度出现了类似问题. “正好给官兵们提个醒，有些细节在装备保养时容易忽略，以后要细之又细.”该团领导说.

据了解，该团计划今后在车炮场日、战备日以及换季保养中，继续采取”动静结合”的检验方式. 他们还会在这次考核的基础上，对一些具体做法进行完善.

Combining Static and Dynamic! A Certain Army Regiment Conducts a Practical Assessment to Test the Quality and Efficiency of Equipment Maintenance

Source: China Military Network-People’s Liberation Army Daily Author: Li Jiang Editor: Sun Yue

2025-06-04

A certain army regiment adopts a “combination of static and dynamic” method to test the performance of equipment——

How is the maintenance? Pull it out for a walk

■People’s Liberation Army Daily Special Correspondent Li Jiang

One day in early summer, with the commander’s order, the officers and men of a certain company of a certain army regiment quickly started the heavy mechanized bridge vehicle, and a pulling assessment was immediately staged.

After driving to the designated area, the officers and men of the company received a new order and immediately started the bridge construction operation. At the same time, the members of the headquarters departments assessment and acceptance team dispersed to different locations to observe and inspect the operation of equipment vehicle components, vehicle systems, etc.

At this time, the on-board diagnostic system suddenly sounded an alarm, indicating that a fault had occurred. The assessment and acceptance team immediately stopped the work of the company’s officers and men, locked the fault point, cut off the power of the equipment, erected a warning sign, and then recorded the vehicle data and reported the fault code...

“It’s the first time that we organized a pull-up assessment in the afternoon after the equipment seasonal maintenance was just completed in the morning.” said the company commander Jiang.

After the start of this year's training, the regiment headquarters found in the survey that the most concentrated problem reflected by the grassroots officers and men was that the frequent use of equipment led to a significant increase in faults. In addition, the natural environment of the training site is relatively harsh, and the locations of the battalions and companies are scattered, which makes it more difficult to maintain the equipment in a centralized manner on a daily basis. There are also phenomena such as "no problem during inspection, but problems when moving".

Before the start of this seasonal maintenance, the regiment headquarters specially invited the manufacturer's technical personnel to hold a weapons and equipment maintenance seminar together with the equipment support department. Everyone believes that the "static" inspection method used before can no longer meet the needs of conducting various tasks. The so-called "static" inspection refers to the performance inspection of equipment vehicles parked in the garage after completing maintenance. Finally, after discussion and research, they decided to use a "dynamic and static combination" method to test the effectiveness of this seasonal maintenance, that is, to add a dynamic inspection link on the original basis.

In the specific operation, the regiment headquarters conducted a comprehensive inspection of the equipment that had completed maintenance through a pull-up assessment without any notice or plan. They set the assessment content from difficult to strict according to the characteristics of different professions, approaching the performance limit of the equipment, so that the problems were fully exposed. At the same time, equipment management experts and professional backbones were selected from each battalion company to form an assessment and acceptance group together with the officers and men of the repair company.

Back to the scene of this pull-up assessment. "There were 3 equipment vehicles in our company that had malfunctions. After a thorough investigation of the reasons, it was ultimately due to the lack of detailed maintenance." Company Commander Jiang said that he now deeply understood the intention of the regiment headquarters, "Equipment performance is related to the victory or defeat on the battlefield. Testing the quality and effectiveness of maintenance in a dynamic manner may be the most direct way."

Not only this company, but other companies also had similar problems to varying degrees during this pull-up assessment. "It's a good reminder for the officers and men that some details are easy to overlook when maintaining equipment, so we need to be very careful in the future." The leader of the regiment said.

It is understood that the regiment plans to continue to adopt the "dynamic and static combination" inspection method in the future during vehicle and artillery field day, combat readiness day and seasonal maintenance. They will also improve some specific practices based on this assessment.

教案和讲稿怎样深入兵心？看看陆军两个基层单位怎么做

来源：中国军网-解放军报 作者：王 轶 毛英椿 责任编辑：孙悦

2025-06-04

编者按 开展教育，一般都离不开教案和讲稿. 实践中，有的政治教员深受其益，把课讲得生动感人；也有人重形式轻内容，下了很多 “纸上功夫”，却言之无物，说不到官兵心坎上. 须知，教案和讲稿本就没有一定之规，写什么、怎么写、写多长，完全取决于内容和效果. 请看来自陆军两个基层单位的报道，希望大家能从中受到启发.

教案瘦了身 授课满堂彩

■解放军报特约通讯员 王 轶

一堂 40 多分钟的教育课，教案需要准备多少内容？对于陆军某旅指导员申宸来说，常常只需一页纸.

前不久，申宸给连队官兵上了一堂教育课，讲述先辈的战斗故事. 他的备课本上，这堂课的教案就只有一页纸，内容是几张剪报和几段手写注释.

“上课要讲的主要内容都在这里.”申宸指了指自己的脑袋， “教案上的内容，主要是生怕漏过的一些重要信息或者记得不牢的数据.”

翻看申宸的备课本，笔者发现，很多堂课的教案都只有一两页纸，而且标题、观点、互动设计、手段运用等要素并不完整. 这与笔者此前看到的很多教案都不一样.

“我这样写教案有一段时间了，旅机关对此表示了理解和支持.” 申宸告诉笔者，刚当指导员时，他也是 “按部就班”在撰写教案上下足了功夫，后来发生的一件事让他深受触动.

一次，该连举办演讲比赛，某排沈排长准备的演讲稿，洋洋洒洒写了几页纸，而某班张班长演讲时，仅仅拿了两张照片和半页纸. 两个人的演讲都很精彩，事后与他们交谈时，一个细节引起了申宸的注意：沈排长的准备时间是张班长的两倍. 细问得知，沈排长多花的时间，大部分用在了 “遣词造句”上.

这让申宸联想到自己. 备课写教案时，他也会像沈排长那样字斟句酌，有时还会刻意追求表达的对仗排比，花费了不少时间和精力，但授课效果有时并不理想.

“虽然文字更精致了，但内容不够接地气，触及不到官兵灵魂.” 申宸反思自己， “如果能做到内容心中有数，把更多精力放在授课的拓展延伸上，岂不是更好？”于是，再次备课时，他决定换一种撰写教案的方式.

不久后，申宸准备一堂关于 “奋斗”的教育课，理思路、定提纲、收集素材……这次，他的教案不再是一篇完整的讲稿，而是授课提纲、不熟悉的内容和数据，他把更多的时间用在了深入思考和临场拓展上.

教案瘦了身，授课满堂彩. 课后，一位排长专门找申宸借备课本，想好好学习学习. 然而看着仅有一页纸的教案，这位排长有点摸不着头脑： “指导员，这好像只有你自己能看懂. 要是机关来检查，会不会通报批评你备课不认真？”

“形式是为内容服务的，教育成效最重要.” 申宸回应道. 他能理解战友的担心，但还是想作出一些改变.

后来，该旅一名领导到基层蹲点，发现申宸的 “一页纸教案”后，果然提出了质疑. 然而，听了申宸的解释，并了解战士们的听课反馈，再与其他指导员交流后，他又对申宸的做法表示支持.

“把想讲的都写出来不一定就是高标准，字多也不代表备课认真.” 该旅领导说，看起来 “好看厚实”的教案，可能打动不了官兵，教案应该回归本真——辅助政治教员授课，而不是被当成需要花大力气准备的 “迎检材料”.

“授课教案也可以是 ‘一页纸’. 这样有利于防止照本宣科，有助于进行现场互动.”在这之后，该旅明确，基层政治干部备课时可以采用手写、打印、剪贴等不同方式，教案字数可多可少、内容可详可略，只要认真准备、能达到教育效果就行，不再作过多过细要求.

与此同时，旅机关改变了教育检查方式，不再以备课本作为主要依据，更多采取推门听课、与基层官兵交流等方式，检查基层单位教育开展情况和效果.

申宸的 “一页纸教案”也影响了其他指导员的备课思路. 前段时间，机关干事到某连听课，亲眼目睹一堂关于网络安全的教育课，该连指导员陈佩琪讲得有声有色，现场气氛十分活跃. 而陈佩琪的备课本上，只有几张图片漫画、一个树状图、一个视频网址，和一些提示. “把主要精力用在该用的地方，教育效果事半功倍.”陈佩琪说.

讲稿去雕饰　兵语最动人

■毛英椿

近日，陆军某旅某营排长梁政走上演讲台，以兵言兵语分享自己履新以来的经历感悟，收获了阵阵掌声.

“这次讲稿写的都是我自己想说的内容.” 走下讲台，梁政难掩兴奋. 他说，与以往不同，营连领导只提出改进建议，给他留足了个人发挥空间.

梁政之所以有如此感慨，源自此前一次参加旅强军故事会的经历.

当时，旅里要求各营分别推荐一名官兵代表参加. 经过营党委一班人研究，这个机会落在了梁政头上. 理由有二：一是梁政形象好、气质佳、口才出众；二是营里想借此机会，锻炼这名任职时间还不长的新排长.

受领任务后，梁政全力准备，工作训练之余都在写稿改稿、模拟试讲. 然而活动当天，他的表现并没有达到预期.

事后，该营郑教导员发现，原本活力四射的梁政变得有些消沉，工作训练劲头明显不足. 于是，他主动靠上去询问原因.

“教导员，我的讲稿经过营连领导修改后，与我想要表达的意思相去甚远. 而且，有些话一听就不像我说的，还非常拗口.”思来想去，梁政决定说出实情，“关键是，台下的战友对改后的内容并不感冒，难以产生情感共鸣.”

梁政的回答有些出乎郑教导员的意料：帮助修改讲稿，可以说约定俗成，为什么梁政会有这样的感受？

无独有偶，营部战士小张对此也颇有微词. 一次，上级组织一堂好课评比，他报名参加，以”配角也能大放光彩”为主题，精心准备了一堂课. 结果，营干部在多次审核中，反复提出不同修改意见. 直至授课前一天晚上，他还在加班加点调整文字.

由于大量精力花费在修改讲稿上，小张对所讲内容不够熟悉，临场发挥也欠佳，最终成绩平平. 小张说：”其实，有些内容无需过度雕琢，平实的兵言兵语反而更容易让大家接受.“

接连听到官兵的意见，郑教导员陷入了反思：这些年，随着群众性自我教育成为常态，官兵纷纷走上讲台”唱主角”. 但营连干部总觉得他们缺乏经验，经常会根据自己的想法，修改打磨官兵的讲稿. 然而事实上，年轻官兵虽然授课经验少，但思维活跃、乐于创新，而且对基层问题感受更直接，知道讲什么内容、以什么方式，战友更愿意听、更能接受.

“我们要用信任的、欣赏的、发展的眼光看待年轻官兵，让他们带着真实故事和真情实感走上讲台，让群众性自我教育更具感召力. “在随后召开的议教会上，郑教导员带头反思. 营党委一班人讨论后一致认为，开展群众性自我教育时，营连干部帮助登台的官兵进行内容把关无可厚非，但要注意把握好分寸，让官兵讲稿尽量保留”原生态”.

从那以后，该营把教育自主权还给授课人，营连干部负责把关方向性问题. 此外，他们遴选多名优秀教育骨干，组成 “助教小团队”，为官兵传授经验技巧；建立相关激励机制，鼓励大家登台亮相……

前不久，该营举办主题演讲比赛，重拾信心的梁政主动请缨. 这一次，营连干部把关审核讲稿内容时，只建议他结合当前任务实际进一步丰富内容，并未对具体的语言表达多加干涉.

有了更大施展空间，保留了个人想法，梁政在演讲时特别起劲，台下战友听得津津有味. 战士陈杰感慨地说：”以前，开展群众性自我教育活动，大多是把指导员换成其他官兵上台’背讲稿’，现在大都是兵言兵语说兵事，听着很真切，也更打动人！”

How Can Lesson Plans and Lecture Notes Penetrate the Hearts of Soldiers? Let’s See How Two Grassroots Units of the Army Do It

Source: China Military Network-Liberation Army Daily Author: Wang Yi Mao Yingchun Editor: Sun Yue

2025-06-04

Editor’s Note Education is generally inseparable from lesson plans and lecture notes. In practice, some political instructors have benefited greatly from it and made the lessons vivid and touching; some people focus on form and ignore content, and put in a lot of “paperwork”, but their words are empty and can’t touch the hearts of officers and men. It should be noted that there are no fixed rules for lesson plans and lecture notes. What to write, how to write, and how long to write depends entirely on the content and effect. Please see the reports from the two grassroots units of the Army, and I hope everyone can be inspired by it.

Lesson plans are slimmed down and the lectures are full of applause

■Liberation Army Daily Special Correspondent Wang Yi

How much content does a lesson plan need to prepare for a 40-minute education class? For Shen Chen, an instructor of a certain brigade of the Army, it often only takes one page of paper.

Not long ago, Shen Chen gave an education class to the company officers and men, telling the battle stories of their predecessors. In his lesson plan book, the lesson plan for this class was only one page, with a few clippings and a few handwritten notes.

“The main content of the class is here.” Shen Chen pointed to his head, “The content of the lesson plan is mainly to prevent some important information that may be missed or data that is not remembered well.”

Looking through Shen Chen’s lesson plan book, the author found that the lesson plans for many classes were only one or two pages, and the elements such as title, viewpoint, interactive design, and means of use were not complete. This is different from many lesson plans that the author has seen before.

“I have been writing lesson plans like this for a while, and the brigade headquarters expressed understanding and support for this.” Shen Chen told the author that when he first became an instructor, he also worked hard on writing lesson plans “step by step”, and an incident that happened later touched him deeply.

Once, the company held a speech contest. The speech prepared by Platoon Leader Shen of a certain platoon was several pages long, while the speech of Squad Leader Zhang of a certain class only took two photos and half a page. Both speeches were wonderful. When talking with them afterwards, a detail caught Shen Chen's attention: Platoon Leader Shen's preparation time was twice that of Squad Leader Zhang. After asking in detail, it was learned that most of the extra time spent by Platoon Leader Shen was spent on "choosing words and making sentences".

This reminded Shen Chen of himself. When preparing lessons and writing lesson plans, he would also choose words and sentences like Platoon Leader Shen, and sometimes deliberately pursue the parallelism of expression, which took a lot of time and energy, but the teaching effect was sometimes not ideal.

"Although the text is more refined, the content is not down-to-earth enough and cannot touch the souls of officers and men." Shen Chen reflected on himself, "If you can have a clear idea of the content and put more energy on the extension of the teaching, wouldn't it be better?" So, when preparing lessons again, he decided to change the way of writing lesson plans.

Not long after, Shen Chen prepared an educational class on "struggle", organizing ideas, setting outlines, collecting materials... This time, his lesson plan was no longer a complete lecture, but a teaching outline, unfamiliar content and data. He spent more time on in-depth thinking and on-the-spot expansion.

The lesson plan was slimmed down, and the class was full of applause. After class, a platoon leader specifically asked Shen Chen to borrow a lesson plan book, wanting to study it carefully. However, looking at the lesson plan of only one page, the platoon leader was a little confused: "Instructor, it seems that only you can understand this. If the agency comes to inspect, will you report and criticize you for not preparing lessons seriously?"

"The form serves the content, and the educational effect is the most important." Shen Chen responded. He can understand the concerns of his comrades, but he still wants to make some changes.

Later, a leader of the brigade went to the grassroots and found Shen Chen's "one-page lesson plan" and raised questions. However, after listening to Shen Chen's explanation and understanding the feedback from the soldiers, and communicating with other instructors, he expressed support for Shen Chen's approach.

"Writing down everything you want to say is not necessarily a high standard, and having many words does not mean that you prepare lessons carefully." The leader of the brigade said that a lesson plan that looks "good-looking and thick" may not impress officers and men. The lesson plan should return to its original purpose - to assist political instructors in teaching, rather than being regarded as "inspection materials" that require great effort to prepare.

“Lesson plans can also be ‘one page’. This helps prevent rote memorization and facilitates on-site interaction.” After this, the brigade made it clear that grassroots political cadres can prepare lessons in different ways, such as handwriting, printing, and clipping. The number of words in the lesson plan can be more or less, and the content can be detailed or brief. As long as the preparation is serious and the educational effect can be achieved, no more excessive and detailed requirements will be made.

At the same time, the brigade headquarters changed the way of education inspection, no longer using the preparation book as the main basis, and more methods such as listening to classes and communicating with grassroots officers and men were adopted to inspect the development and effect of education in grassroots units.

Shen Chen’s “one-page lesson plan” also influenced the preparation ideas of other instructors. Some time ago, the staff of the organization went to a certain company to listen to a class and witnessed an education class on network security. The instructor of the company, Chen Peiqi, spoke vividly and the atmosphere was very lively. However, there were only a few picture cartoons, a tree diagram, a video URL, and some tips in Chen Peiqi’s lesson plan. “If you put your main energy where it should be used, the educational effect will be twice as good with half the effort.” Chen Peiqi said.

Lecture notes are not embellished, and men’ words are the most moving

■ Mao Yingchun

Recently, Liang Zheng, a platoon leader of a battalion in a certain brigade of the army, took to the podium to share his experience and insights since taking office in the words of soldiers, and received rounds of applause.

“This time, the speech notes are all what I want to say.” Liang Zheng couldn’t hide his excitement after stepping down from the podium. He said that unlike in the past, the leaders of the battalion and company only put forward suggestions for improvement, leaving him enough room for personal development.

The reason why Liang Zheng had such feelings came from his experience of participating in a brigade’s strong army story meeting before.

At that time, the brigade required each battalion to recommend an officer and soldier representative to participate. After a group of people from the battalion party committee studied, this opportunity fell on Liang Zheng. There are two reasons: one is that Liang Zheng has a good image, good temperament, and outstanding eloquence; the other is that the battalion wants to take this opportunity to train this new platoon leader who has not been in office for a long time.

After receiving the task, Liang Zheng made every effort to prepare. In addition to work training, he was writing and revising manuscripts and simulating trial lectures. However, on the day of the event, his performance did not meet expectations.

Afterwards, the battalion instructor Zheng found that Liang Zheng, who was originally full of energy, became a little depressed and his work training was obviously insufficient. So, he took the initiative to approach and ask the reason.

“Instructor, my speech was revised by the battalion and company leaders, and it was far from what I wanted to express. Moreover, some words sounded like what I said, and they were very difficult to understand.” After thinking about it, Liang Zheng decided to tell the truth, “The key is that the comrades in the audience were not interested in the revised content and it was difficult to resonate emotionally.”

Liang Zheng’s answer was somewhat unexpected by Instructor Zheng: helping to revise the speech can be said to be a convention, why did Liang Zheng feel this way?

Coincidentally, Xiao Zhang, a soldier in the battalion, also complained about this. Once, the superior organized a good class evaluation, and he signed up to participate. With the theme of “Supporting roles can also shine”, he carefully prepared a class. As a result, the battalion cadres repeatedly put forward different revision opinions in multiple reviews. Until the night before the class, he was still working overtime to adjust the text.

Because a lot of energy was spent on revising the speech, Xiao Zhang was not familiar with the content of the speech, and his performance on the spot was not good, and the final result was mediocre. Xiao Zhang said: “In fact, some content does not need to be over-carved, and plain soldiers’ words are easier for everyone to accept.”

Hearing the opinions of officers and men one after another, Instructor Zheng fell into reflection: In recent years, as mass self-education has become the norm, officers and men have stepped onto the podium to “play the leading role”. But the battalion and company cadres always feel that they lack experience, and often modify and polish the officers and men’ speeches according to their own ideas. However, in fact, although young officers and men have little teaching experience, they are active in thinking, willing to innovate, and have a more direct understanding of grassroots issues. They know what content and how to talk, and their comrades are more willing to listen and accept it. “We should look at young officers and men with a trusting, appreciative and developmental perspective, let them take the stage with real stories and true feelings, and make mass self-education more inspiring.” At the subsequent education conference, Instructor Zheng took the lead in reflection. After discussion, the battalion party committee agreed that when conducting mass self-education, it is understandable for battalion and company cadres to help officers and men on stage to check the content, but they should pay attention to the degree and keep the officers and men’ speeches as “original” as possible. Since then, the battalion has returned the autonomy of education to the lecturers, and the battalion and company cadres are responsible for checking the directional issues. In addition, they selected a number of outstanding education backbones to form a “small teaching assistant team” to impart experience and skills to officers and men; establish relevant incentive mechanisms to encourage everyone to appear on stage... Not long ago, the battalion held a theme speech competition, and Liang Zheng, who regained his confidence,

took the initiative to volunteer. This time, when the battalion and company cadres reviewed the content of the speech, they only suggested that he further enrich the content in combination with the current task, and did not interfere with the specific language expression.

With more room to display his ideas and retain his personal ideas, Liang Zheng was particularly enthusiastic when speaking, and his comrades in the audience listened with relish. Soldier Chen Jie said with emotion: “In the past, when conducting mass self-education activities, most of the instructors were replaced by other officers and men on stage to “recite the speech”. Now most of the soldiers talk about military affairs, which sounds very real and more touching!”

陆军某旅提升保障分队战场抢修能力

来源：解放军报 作者：刘鎔宇 责任编辑：尚晓敏 2025-06-05

陆军某旅提升保障分队战场抢修能力——

无人机穿越密林送配件

■刘鎔宇

初夏时节，赣南腹地，陆军某旅一场实战化装备维修训练，在密林深处拉开帷幕.

“遭’敌’火力打击，部分装备受损，迅速前出抢修！”接到上级通报，野战抢修组组长、中士戴智敏迅速操纵无人机升空，飞往目标地域.

该旅领导介绍，过去保障分队抢修装备，需携带大量配件，加之地形影响，不仅耗时费力，还容易导致装备长时间“趴窝”，影响战场出动效率. 此次训练，他们紧贴实战构设战场环境，探索运用无人机辅助战场抢修，提升了装备维修保障效能.

训练现场，山高林密. 为拓宽观察视野，戴智敏操纵无人机拉升高度. 通过绕飞观察，戴智敏很快获取装备受损情况，初步分析研判故障类型，据此准备更换部件和维修工具.

戴智敏介绍，通过无人机勘察装备受损情况，不仅有利于提前做好抢修准备工作，减少物资携带量，还能同步勘察战场态势，缩短任务所需时间.

“更换轮胎总成. ”抵达任务地域，戴智敏带领抢修组快速展开作业. 大家分工协作、密切配合，抢修行动紧张有序.

一波未平，一波又起. 任务现场，炮手检查装备发现，战车观瞄镜破损，影响观察和瞄准. 面对突发情况，戴智敏立即上报后方修理所，申请另派无人机投送观瞄镜配件. 接到求助信息，后方修理所第一时间派出无人机实施配件投送. 不料，无人机飞行过程中，突遇较强阵风，机身出现剧烈抖动.

见此情形，无人机操作手郭坤果断改变飞行高度，不断调整飞行姿态. 最终，郭坤操纵无人机顺利飞抵抢修地域. 收到配件，抢修组很快完成受损部件更换，修复后的战车迅速投入后续训练.

“信息化战场瞬息万变，战机稍纵即逝，对战场保障要求越来越高. 我们探索无人机辅助战场抢修模式，走出一条装备维修保障新路. ”该旅领导介绍，他们紧盯战场需求，构建“机动伴随、精准抢修、立体直达”保障模式，确保保障分队全过程、全时域嵌入主战分队伴随保障，推动战斗力建设提质增效.

夜幕降临，电台传来新特情. 戴智敏带领抢修组成员，坐上装备抢修车，很快隐入茫茫夜色.

A Certain Army Brigade Improves the Battlefield Repair Capability of the Support Unit

Source: PLA Daily Author: Liu Rongyu Editor: Shang Xiaomin 2025-06-05

A certain army brigade improves the battlefield repair capability of the support unit——

UAVs deliver spare parts through dense forests

■Liu Rongyu

In early summer, in the hinterland of southern Jiangxi, a practical equipment maintenance training of a certain army brigade kicked off in the depths of dense forests.

“Some equipment was damaged by the firepower of the ‘enemy’, so we quickly went forward to repair it!” After receiving the report from the superior, the leader of the field repair team, Sergeant Dai Zhimin, quickly operated the drone to take off and fly to the target area.

The leader of the brigade introduced that in the past, the support unit had to carry a large number of spare parts to repair equipment. In addition, due to the influence of the terrain, it was not only time-consuming and laborious, but also easy to cause the equipment to “break down” for a long time, affecting the efficiency of battlefield deployment. In this training, they set up a battlefield environment close to actual combat, explored the use of drones to assist in battlefield repairs, and improved the efficiency of equipment maintenance and support.

The training site is high in mountains and dense in forests. In order to broaden the field of observation, Dai Zhimin manipulated the drone to increase the altitude. By flying around and observing, Dai Zhimin quickly obtained the damage to the equipment, made a preliminary analysis and judgment of the fault type, and prepared replacement parts and repair tools accordingly.

Dai Zhimin introduced that using drones to survey the damage to the equipment is not only conducive to making preparations for emergency repairs in advance and reducing the amount of

materials carried, but also to simultaneously survey the battlefield situation and shorten the time required for the mission.

“Replace the tire assembly.” After arriving at the mission area, Dai Zhimin led the emergency repair team to quickly conduct the operation. Everyone divided the work and cooperated closely, and the emergency repair operation was tense and orderly.

One wave has not settled, and another wave has risen. At the mission site, the gunner checked the equipment and found that the tank sight was damaged, affecting observation and aiming. Faced with the emergency, Dai Zhimin immediately reported to the rear repair station and applied for another drone to deliver the sight accessories. After receiving the request for help, the rear repair station immediately dispatched a drone to deliver the accessories. Unexpectedly, during the flight of the drone, it encountered a strong gust of wind and the fuselage shook violently.

Seeing this, the drone operator Guo Kun decisively changed the flight altitude and constantly adjusted the flight attitude. In the end, Guo Kun successfully flew the drone to the repair area. After receiving the spare parts, the repair team quickly replaced the damaged parts, and the repaired tanks were quickly put into follow-up training.

“The information battlefield is changing rapidly, and the combat aircraft are fleeting, which requires higher and higher battlefield support. We explore the drone-assisted battlefield repair mode and take a new path for equipment maintenance and support.” The brigade leader introduced that they keep a close eye on the battlefield needs and build a “mobile accompaniment, precise repair, and three-dimensional direct access” support mode to ensure that the support team is embedded in the main combat team’s accompanying support throughout the process and time domain, and promote the quality and efficiency of combat effectiveness construction.

As night fell, the radio station reported a new special situation. Dai Zhimin led the members of the repair team, got on the equipment repair vehicle, and soon disappeared into the vast night.

陆军航空兵某旅：多机型换岗锻造复合型飞行员

来源：解放军报 作者：张 衡 石芝鹏 危乔巧 责任编辑：孙悦 2025-06-05

陆军航空兵某旅创新训练模式——

多机型换岗锻造复合型飞行员

■张 衡 解放军报特约通讯员 石芝鹏 记者 危乔巧

“下降高度，注意隐蔽！”初夏，陆军航空兵某旅一场海上低空突防训练在某海域展开. 机群中，曾担任运输直升机机长的赵清华，驾驶武装直升机向目标抵近.

飞行途中，赵清华和僚机遭遇“敌机”跟踪，他们交替掩护，连贯完成多个战术动作，迅速摆脱对手. 一波未平，一波又起. “发现’敌’防空雷达！”面对接踵而至的特情，机组成员采取超低空隐蔽突防等方式，成功规避“敌”雷达探测，最终顺利完成攻击任务.

“我以前只会飞运输直升机，现在又熟练掌握了武装直升机的驾驶要领. 这样一来，无论与哪种直升机配合执行任务，我都能更好地理解战友、站在战友的角度思考问题，从而使我们的配合更加默契. ”训练结束，赵清华走下战机说.

“适应未来战争趋势、推动训练转型升级，需要我们培养更多全能型、复合型飞行员. ”在该旅战术研究室，作训科张科长指着墙上的“飞行员能力矩阵图”，向记者讲起一段往事.

那年，该旅组织机降训练，由于武装直升机与运输直升机之间协同不顺畅，导致任务失利. 复盘总结后，他们决定全方位提高飞行员能力素质，探索“一专多能、一人多机”训练模式，要求飞行员“精通一种机型、能飞多种机型、胜任多个战位”.

为提高交叉换岗训练质效，该旅建立“一对一”带教机制，遴选优秀教员帮助运输直升机飞行员掌握武装直升机的战法训法，向武装直升机飞行员传授兵力投送流程等专业知识，进一步强化不同机型协同水平，提升遂行任务能力.

一次海上搜救训练，原武装直升机机长陈强临机受命，驾驶某新型运输直升机，与担负支援掩护任务的武装直升机密切配合，隐蔽突破“敌”防线，快速完成“落水伤员”搜救任务. “通过交叉换岗训练，我学到了很多新技能、新本领，这让我选择战术时更加灵活从容. ”陈强说.

夜幕降临，一场机降突击训练拉开帷幕. 记者了解到，塔台上的指挥员与各机型飞行员都是“一专多能”，既能坐镇塔台指挥，也能驾机升空作战；既能驾驶武装直升机进行火力突击，也能驾驶运输直升机实施兵力投送. 由于熟悉彼此战法，他们配合默契、协同顺畅.

指挥塔台内，作训科王参谋向记者展示了一组数据：截至目前，全旅近 90%武装直升机飞行员具备多弹种打击能力，数十人取得飞行指挥员资质，超过三分之一的飞行员可驾驶 3 种以上机型.

A Certain Army Aviation Brigade: Multiple Aircraft Types Are Used to Forge Composite Pilots

Source: PLA Daily Author: Zhang Heng Shi Zhipeng Wei Qiaoqiao Editor: Sun Yue 2025-06-05

A certain brigade of the Army Aviation Corps innovates training mode——

Multiple aircraft types are used to forge composite pilots

■ Zhang Heng, special correspondent of the PLA Daily Shi Zhipeng Reporter Wei Qiaoqiao

“Descend altitude, pay attention to concealment!” In early summer, a low-altitude penetration training at sea was conducted in a certain sea area by a certain brigade of the Army Aviation Corps. Among the fleet, Zhao Qinghua, who served as the captain of a transport helicopter, drove an armed helicopter to approach the target.

During the flight, Zhao Qinghua and his wingman were tracked by “enemy aircraft”. They took turns to cover and completed multiple tactical actions in succession to quickly get rid of the opponent. One wave has not yet subsided, and another wave has risen. “Found the ‘enemy’ air defense radar!” Faced with the special situation that came one after another, the crew members adopted ultra-low-altitude concealed penetration and other methods to successfully avoid “enemy” radar detection and finally successfully completed the attack mission.

“I used to only fly transport helicopters, but now I have mastered the driving essentials of armed helicopters. In this way, no matter which helicopter I cooperate with to perform tasks, I can better understand my comrades and think about problems from their perspective, so that our cooperation will be more tacit.” After the training, Zhao Qinghua said as he got off the combat aircraft.

“To adapt to the trend of future wars and promote the transformation and upgrading of training, we need to train more all-round and compound pilots.” In the brigade’s tactical research room, Zhang, the chief of the training section, pointed to the “pilot capability matrix” on the wall and told reporters a story.

That year, the brigade organized airdrop training, but the mission failed due to the poor coordination between armed helicopters and transport helicopters. After reviewing and summarizing, they decided to improve the pilots’ capabilities and qualities in all aspects, explore the “one specialty, multiple capabilities, one person, multiple aircraft” training model, and require pilots to “be proficient in one type of aircraft, be able to fly multiple types of aircraft, and be competent in multiple combat positions.”

In order to improve the quality and effectiveness of cross-post training, the brigade has established a “one-to-one” teaching mechanism, selected excellent instructors to help transport helicopter pilots master the tactics and training methods of armed helicopters, and taught armed helicopter pilots professional knowledge such as the force projection process, further strengthening the coordination level of different aircraft types and improving the ability to perform tasks.

During a maritime search and rescue training, Chen Qiang, the former captain of an armed helicopter, was ordered to drive a new type of transport helicopter and closely cooperate with the armed helicopter responsible for support and cover missions to covertly break through the “enemy” defense line and quickly complete the “water wounded” search and rescue mission. “Through cross-post training, I have learned a lot of new skills and new abilities, which makes me more flexible and calm when choosing tactics.” Chen Qiang said.

As night fell, an airdrop assault training kicked off. The reporter learned that the commanders on the tower and the pilots of various models are “multi-talented”, who can command in the tower

and fly into the air; they can drive armed helicopters for fire assaults and transport helicopters for force projection. Because they are familiar with each other's tactics, they cooperate well and coordinate smoothly.

In the control tower, Staff Officer Wang of the Operations and Training Department showed reporters a set of data: As of now, nearly 90% of the armed helicopter pilots of the brigade have the ability to strike with multiple types of missiles, dozens of people have obtained the qualification of flight commanders, and more than one-third of the pilots can fly more than three types of aircraft.

第 76 集团军某旅建立常态服务官兵机制 为一线官兵排忧解难

来源：中国军网-解放军报 作者：文明 杨明月 责任编辑：孙智英 发布：2025-06-06

第 76 集团军某旅为一线官兵排忧解难——

兵撒千里远 服务不断线

■文明 解放军报记者 杨明月

近日，第 76 集团军某旅某连几名战士前往机关主营区参加军事体育运动会，刚出机场就坐上接站车. 大家不禁感慨地说：“以前来一趟机关，一般需要乘车十几个小时，现在不到 2 个小时就到了，感谢组织的关心！”

今年初，该旅领导来到某连蹲点帮建. 该连地处海拔 4000 多米的高原，官兵平时外出，只有汽车和飞机两种交通工具可以选择. 当时，二级上士陈文君接到出差任务，需前往旅机关，这让他犯了难. 如果乘坐长途汽车，至少十几个小时才能抵达，但雪天路滑，存在安全隐患. 如果乘坐飞机，则须按照有关规定，上报旅领导审批，流程复杂且耗时较长.

眼看出发时间越来越近，陈文君利用座谈时机说出了自己面临的困扰，引发大家共鸣. “基层有所呼，机关有所应.” 这名旅领导当即联系旅机关科室，要求他们抓紧为陈文君办理乘坐飞机的审批手续，并研究简化相关审批流程.

记者了解到，该旅部署分散、点多线长. 如何为官兵提供及时周到的服务，一直是该旅党委着力推进的课题. 在蹲点帮建中，旅领导分片包干，深入一线，全面了解基层需求，梳理出军事训练、政治工作、服务保障 3 大类 30 余个具体问题，并制订为基层办实事计划，明确了责任科室和完成时限.

在此基础上，他们建立常态服务官兵机制，规定每周五上午，在主营区开展 “士兵接待日” 活动，为主营区外官兵设立 “接待日专线”，广泛收集官兵需求；每季度指派一名部门领导，带领服务小组到各分散点位现场办公，为大家排忧解难；在强军网开设 “连心桥”专栏，及时听取意见建议，确保兵撒千里远，服务不断线.

该旅领导介绍，截至目前，在蹲点帮建中拉单列项的 30 余个问题，已基本得到解决. 下一步，党委机关将探索开展”一站式”服务，切实解决好官兵的 “急难愁盼”，让大家能够把更多心思和精力投入到练兵备战工作中.

A Brigade of the 76th Group Army Has Established a Regular Service Mechanism for Officers and Men to Solve Problems for Frontline Officers and Men

Source: China Military Network-People’s Liberation Army Daily Author: Wen Ming Yang Mingyue Editor: Sun Zhiying Release: 2025-06-06

A brigade of the 76th Group Army solves problems for frontline officers and men——

Soldiers are scattered thousands of miles away, and services are uninterrupted

■ Wenming People’s Liberation Army Daily reporter Yang Mingyue

Recently, several soldiers from a company of a brigade of the 76th Group Army went to the brigade headquarters to participate in the military sports meeting. They got on the pick-up car just after leaving the airport. Everyone couldn’t help but say with emotion: “It usually takes more than ten hours to come to the headquarters in the past, but now it takes less than 2 hours. Thank you for the organization’s concern!”

At the beginning of this year, the leaders of the brigade came to a company to help build it. The company is located on a plateau with an altitude of more than 4,000 meters. When officers and men go out, they can only choose between cars and airplanes. At that time, Second Sergeant Chen Wenjun received a business trip mission and needed to go to the brigade headquarters, which made him feel embarrassed. If you take a long-distance bus, it will take at least ten hours to arrive, but the roads are slippery in snowy weather and there are safety hazards. If you take a plane, you must report to the brigade leaders for approval in accordance with relevant regulations. The process is complicated and time-consuming.

Seeing that the departure time is getting closer, Chen Wenjun took the opportunity of the discussion to speak out the troubles he faced, which resonated with everyone. “The grassroots have something to say, and the organs have something to respond.” The brigade leader immediately contacted the brigade’s department and asked them to handle the approval procedures for Chen Wenjun to take the plane as soon as possible, and study to simplify the relevant approval process.

The reporter learned that the brigade is deployed in a scattered manner, with many points and long lines. How to provide timely and thoughtful services to officers and men has always been a topic that the brigade party committee has been working hard to promote. In the squatting and helping construction, the brigade leaders divided the work into pieces, went deep into the front line, fully understood the needs of the grassroots, sorted out more than 30 specific problems in three categories: military training, political work, and service guarantee, and formulated a plan to do

practical things for the grassroots, clarifying the responsible departments and completion time limits.

On this basis, they established a regular service mechanism for officers and men, stipulating that every Friday morning, a “Soldier Reception Day” activity will be held in the main camp, and a “Reception Day Hotline” will be set up for officers and men outside the main camp to collect the needs of officers and men extensively; a department leader will be assigned every quarter to lead the service team to work on-site at various scattered points to solve problems for everyone; a “Heart-to-Heart Bridge” column will be opened on the Strong Army Network to listen to opinions and suggestions in a timely manner to ensure that the soldiers are deployed thousands of miles away and the service is uninterrupted.

The brigade leader introduced that as of now, more than 30 problems that were listed in the field assistance have been basically solved. In the next step, the Party Committee will explore and conduct “one-stop” services to effectively solve the “urgent needs” of officers and men, so that everyone can devote more thoughts and energy to training and preparation for war.

结对帮带 第 74 集团军某旅提升基层政治教员施教能力

来源：中国军网-解放军报 作者：王涵 杨梓睿 责任编辑：孙智英 发布：2025-06-06

第 74 集团军某旅提升基层政治教员施教能力——

结对帮带，打造精品好课

■王涵 杨梓睿

“刷单返利不可信，网络交友要留心……”近日，第 74 集团军某旅教育准备会上，某营政治教员应振康围绕安全用网进行备课示教，活泼生动的语言风格和贴近官兵生活的新鲜事例，深深吸引着大家，课堂气氛十分热烈.

“基层政治教员是做好经常性思想工作的主体，必须具有出色的施教能力.”该旅领导介绍，青年官兵思想活、见识广，准备一堂能够吸引、打动他们的好课并非易事. 为此，今年以来，该旅持续开展帮带式任教活动，采用 “一带一”方式，由各营政治教导员、副政治教导员各帮带一名政治教员，从备课、审课、讲课、评课各环节进行辅导. 这样，既能提升政治教员队伍的施教能力，又可以通过不断修改完善教案，打造一堂堂精品课.

“第一次登台授课，我就被指出了 10 余个问题，真是有些下不来台.”某营干部郑来栋至今对当初的场景记忆犹新, “虽然现场不打分、不排名，但作为评委的政治机关领导和优秀政治教员点评起来直指要害、毫不遮掩.”正是这段尴尬的经历，让郑来栋 “知耻后勇”，奋起直追.

反复修改打磨的过程虽然辛苦，但收获颇丰. 经过一段时间的努力，郑来栋逐渐脱颖而出，他和其他战友准备的《信仰为旗，强军有我》《重寻黄草岭，再砺新尖刀》等专题授课受到高度评价，并作为精品课分享到各个营连. 官兵们说，通过帮带式任教，基层政治教员的授课水平明显提升，显著增强了教育课堂的吸引力和感染力.

Pairing Up to Help, a Brigade of the 74th Group Army Improves the Teaching Ability of Grassroots Political Instructors

Source: China Military Network-Liberation Army Daily Author: Wang Han Yang Zirui Editor: Sun Zhiying Release: 2025-06-06

A brigade of the 74th Group Army improves the teaching ability of grassroots political instructors——

Pairing up to help, create quality courses

■Wang Han Yang Zirui

“Rebates for fake orders are not credible, and be careful when making friends online...” Recently, at the education preparation meeting of a brigade of the 74th Group Army, a battalion political instructor Ying Zhenkang prepared lessons around the safe use of the Internet. The lively and vivid language style and fresh examples close to the lives of officers and men deeply attracted everyone, and the classroom atmosphere was very warm.

“Grassroots political instructors are the main body of regular ideological work and must have excellent teaching ability.” The brigade leader introduced that young officers and men have active thoughts and broad knowledge, and it is not easy to prepare a good lesson that can attract and impress them. To this end, this year, the brigade has continued to conduct mentoring teaching activities, using the “one-to-one” method, with each battalion political instructor and deputy political instructor helping a political instructor to provide guidance in all aspects of lesson preparation, lesson review, lectures, and lesson evaluation. In this way, it can not only improve the teaching ability of the political instructor team, but also create a high-quality class by constantly revising and improving the lesson plan.

“The first time I gave a lecture on stage, I was pointed out more than 10 problems, which was really embarrassing.” Zheng Laidong, a cadre of a battalion, still remembers the scene vividly. “Although there was no scoring or ranking on the spot, the political leaders and outstanding political instructors who were judges commented directly on the key points without any concealment.” It was this embarrassing experience that made Zheng Laidong “know the shame and then be brave” and catch up.

Although the process of repeated revisions and polishing was hard, it was fruitful. After a period of hard work, Zheng Laidong gradually stood out. The special lectures he and his comrades

prepared, such as “Faith as the Flag, Strengthening the Army with Me” and “Revisiting Huangcaoling and Sharpen New Knives”, were highly praised and shared as quality courses in various battalions and companies. Soldiers said that through the mentoring style of teaching, the teaching level of grassroots political instructors has been significantly improved, which has significantly enhanced the attractiveness and appeal of educational classes.

第 82 集团军某旅推行专业课目集约化组训

来源：中国军网-解放军报 作者：杜熙谋 姚欣彤 责任编辑：孙智英 发布：2025-06-06

第 82 集团军某旅推行专业课目集约化组训

科学编组 精准补差

解放军报讯 杜熙谋、特约记者姚欣彤报道：5 月下旬，第 82 集团军某旅开展 “专业技术能手”评定考核，得益于该旅推行的专业课目集约化组训，官兵通过 “自主申报、科学编组、精准补差” 提升了训练质效，多人顺利通过 “一级专业技术能手”评定考核.

该旅领导说，以往，他们通常按单位建制组织实施专业课目训练，不同能力基础的官兵一起训，很可能出现基础好的官兵重复低水平训练，而基础弱的官兵跟不上进度，最终影响训练质效. 为此，他们打破建制壁垒，采取集约化组训模式开展专业课目训练和考核. 具体实施过程中，他们根据官兵自主申报情况，区分不同能力素质和训练课目特点，对参训官兵进行科学编组施训，随后根据各组实际情况开展精准补差训练，推动部队训练水平迈上新台阶.

“最近组织的’专业技术能手’评定考核，正是我们推进集约化组训的一次具体实践.” 旅领导告诉记者，组织 “专业技术能手”评定考核前，他们首先根据官兵之前自主申报的评定目标对参考人员精准编组，并结合考核课目为不同训练分组官兵量身订制训练计划，这种组训模式大大提升了官兵参加 “专业技术能手”考核的通过率.

“全车注意，防毒！驾驶员开启三防装置.” “一级专业技术能手”评定考场上，车长刘斌迅速发现特情，沉着冷静下达指令……走下训练场，他告诉记者，集约化组训模式推行后，大家可以把更多时间用在重难点课目的专攻精练上，缩短了能力素质生成周期.

“按照官兵实际情况科学分组、精准施训，才能最大程度地提升训练质效.”该旅领导说，下一步，他们将不断完善集约化组训流程和方法，不断提升部队训练质效.

A Brigade of the 82nd Group Army Implements Intensive Training of Professional Subjects

Source: China Military Network-People's Liberation Army Daily Author: Du Ximou Yao Xintong Editor: Sun Zhiying Release: 2025-06-06

A brigade of the 82nd Group Army implements intensive training of professional subjects

Scientific organization and precise compensation

People's Liberation Army Daily News Du Ximou and special correspondent Yao Xintong reported: In late May, a brigade of the 82nd Group Army conducted the assessment and evaluation of "professional and technical experts". Thanks to the intensive training of professional subjects implemented by the brigade, officers and men improved the quality and effectiveness of training through "self-declaration, scientific organization, and precise compensation", and many people successfully passed the assessment and evaluation of "first-level professional and technical experts".

The leaders of the brigade said that in the past, they usually organized and implemented professional subject training according to the unit structure, and officers and men with different ability bases were trained together. It is very likely that officers and men with good foundations will repeat low-level training, while officers and men with weak foundations cannot keep up with the progress, which ultimately affects the quality and effectiveness of training. To this end, they broke down the barriers of the establishment and adopted an intensive training model to conduct professional subject training and assessment. In the specific implementation process, they distinguished different abilities and qualities and characteristics of training subjects according to the self-declaration of officers and men, and scientifically organized and trained the participating officers and men. Then, they conducted precise training to make up for the gaps according to the actual situation of each group, pushing the training level of the troops to a new level.

"The recent evaluation and assessment of "professional and technical experts" is a specific practice of our promotion of intensive training." The brigade leader told reporters that before organizing the evaluation and assessment of "professional and technical experts", they first accurately organized the reference personnel according to the evaluation goals that the officers and men had previously self-declared, and combined with the assessment subjects, tailored training plans for officers and men in different training groups. This training model greatly improved the pass rate of officers and men participating in the "professional and technical experts" assessment.

"Attention, everyone, anti-virus! The driver turns on the three-defense device." In the "First-level Professional and Technical Expert" assessment test site, the driver Liu Bin quickly discovered the special situation and calmly issued instructions... After leaving the training ground, he told reporters that after the implementation of the intensive training model, everyone can spend more time on the specialization and refinement of difficult and key subjects, shortening the cycle of ability and quality generation. "Only by scientifically grouping and accurately training according to the actual situation of officers and men can the quality and effectiveness of training be improved to the greatest extent." The brigade leader said that in the next step, they will continue to improve

the intensive training process and methods, and continuously improve the quality and effectiveness of troop training.

从家乡中学走出的“三栖尖兵”，回到母校与师生共话家国情怀

来源：中国军网-中国国防报 作者：文金明 孙洁 阳琼 责任编辑：郭妍菲 发布：2025-06-06

“强军精武标兵”、陆军某部军官黄鑫走进母校与师生分享从军经历，共话家国情怀——

“祖国安宁，需要我们共同守护”

■文金明 孙 洁 阳 琼

“军营是绽放青春、成就人生的沃土. 在这里，我想邀请更多学弟学妹将来加入部队，在军营书写青春华章. ”前不久，湖南省隆回县第一中学报告厅内，一身戎装的陆军某部军官黄鑫成为现场最亮的“星”.

初夏时节，隆回县第一中学校园里气氛热烈. 该县军地相关部门联合学校共同开展立功喜报进校园暨国防教育主题活动，为荣立三等功的隆回籍现役军官黄鑫举行送立功喜报仪式，并邀请黄鑫与师生分享从军经历，共话家国情怀.

黄鑫向学校师生敬礼. 阳琼 摄

从隆回县第一中学毕业的黄鑫，如今已是陆军某部少校军官. 他精通 10 余项特战技能，被誉为“三栖尖兵”，先后获评全军“优秀共产党员”、陆军“强军精武标兵”，荣立一等功 2 次、三等功 4 次.

上午 10 时，在师生的注视下，军地领导为黄鑫及其亲属披上绶带，学生代表献上鲜花表达敬意. 身着笔挺军装的黄鑫，庄严地向母校师生敬了一个标准的军礼，随后大步走上讲台.

“看着你们，就像看到了 22 年前的自己. ”黄鑫的开场白，一下拉近了与同学们的距离. 他讲起高中毕业初入军营时，自己也曾抱怨训练苦累，但班长的一句“战场不讲人情，唯实

力论英雄”让他幡然醒悟. 此后，无论寒冬酷暑，他每日苦练技能，很快脱颖而出，成为训练尖子.

出枪、上膛、击发……电子显示屏上，黄鑫向学弟学妹们展示了自己的射击视频，并分享训练心得：“战场上没有重来的机会，要想发挥稳定，只能靠平时千万次刻苦训练形成的肌肉记忆. ”

“这枚‘勇士勋章’是 2016 年我带队去巴西参加第二届国际丛林巡逻比赛获得的. 在这场比赛中，我军代表队在 17 支参赛队伍中排名第一. ”当黄鑫讲到自己在密林中与队友默契配合突破重重障碍、带着骨裂伤完成 12 米机降跳水时，在座师生不自觉地屏住了呼吸. “那一刻，我捍卫的不仅是个人梦想，更是国家荣誉. 在军人使命面前，个人的伤痛微不足道. ”黄鑫的话音刚落，台下响起雷鸣般的掌声.

从巴西归来仅 20 天，黄鑫再次踏上征程，带队前往俄罗斯参加“侦察尖兵”国际军事比赛. 面对地形不熟、语言不通等难题，他与队友凭借坚定信念，在沼泽地艰难跋涉，最终以优异成绩让外军官兵刮目相看，荣获“巩固战斗友谊勋章”. 看着两枚熠熠生辉的勋章，同学们眼中满是崇敬和向往.

随后，黄鑫结合当前国际形势，分析了国防建设的重要性. “我们不是生活在和平的年代，只是生活在和平的国家. 祖国的安宁，需要我们共同守护！”铿锵话语引发学子共鸣.

“黄鑫学长，部队训练那么苦，您是怎么坚持下来的”“当您在热带丛林比赛中面临危险时，心里在想什么”……互动环节，同学们争先恐后地提问.

谈到坚持，黄鑫的表情变得坚定：“部队训练确实艰苦，但真正的战场没有彩排. 当初为练狙击技术，我们在 40℃高温下一趴就是大半天. 日复一日、精益求精的刻苦训练塑造了军人坚韧不拔的使命感和责任感，正是这份责任激励着我不断拼搏、为国而战. ”

“过去觉得英雄遥不可及，今天才知道，榜样其实就在身边. ”学生阳明苏感触颇深.

临别之际，同学们簇拥黄鑫请他签名. 让大家有点意外的是，黄鑫写下的不是自己的名字，而是“中国特种兵”5 个大字. 窗外阳光明媚，香樟树沙沙作响. 报告厅内，崇军尚武的种子正在青少年心中悄悄发芽.

The “Three-Dimensional Pioneer” Who Came Out of His Hometown Middle School Returned to His Alma Mater to Talk About His Feelings for His Country With Teachers and Students

Source: China Military Network-China National Defense News Author: Wen Jinming Sun Jie Yang Qiong Editor: Guo Yanfei Release: 2025-06-06

Huang Xin, a “model of strengthening the army and refining martial arts” and an officer of a certain army unit, went to his alma mater to share his military experience with teachers and students and talk about his feelings for his country-”The peace of the motherland needs our joint protection”

■ Wen Jinming Sun Jie Yang Qiong

“The military camp is a fertile ground for blooming youth and achieving life. Here, I would like to invite more younger students to join the army in the future and write a chapter of youth in the military camp.” Not long ago, in the lecture hall of Longhui County No. 1 Middle School in Hunan Province, Huang Xin, an officer of a certain army unit in military uniform, became the brightest “star” on the scene.

In early summer, the atmosphere on the campus of Longhui County No. 1 Middle School was warm. The county’s military and local related departments jointly conducted the theme activities of “Bringing Meritorious Service to Campus” and national defense education with the school. A ceremony was held to send meritorious service news to Huang Xin, an active-duty officer from Longhui who won the third-class merit. Huang Xin was invited to share his military experience with teachers and students and talk about his feelings for his country.

Huang Xin saluted the teachers and students of the school. Photo by Yang Qiong

Huang Xin, who graduated from Longhui County No. 1 Middle School, is now a major officer in a certain army unit. He is proficient in more than 10 special warfare skills and is known as the “three-amphibious pioneer”. He has been named the “Excellent Communist Party Member” of the whole army and the “Model of Strengthening the Army and Improving Military Skills” of the Army. He has won the first-class merit twice and the third-class merit four times.

At 10 o’clock in the morning, under the gaze of teachers and students, military and local leaders put ribbons on Huang Xin and his relatives, and student representatives presented flowers to express their respect. Huang Xin, dressed in a neat military uniform, solemnly saluted the teachers and students of his alma mater with a standard military salute, and then strode onto the podium.

“Looking at you is like seeing myself 22 years ago.” Huang Xin’s opening remarks brought him closer to his classmates. He talked about how he complained about the hard training when he first entered the military camp after graduating from high school, but the squad leader’s words “There is no human touch on the battlefield, only strength determines heroes” made him wake up. Since then, regardless of the cold winter or hot summer, he has practiced his skills every day, and soon stood out and became a top trainee.

Drawing a gun, loading a gun, firing... On the electronic display screen, Huang Xin showed his shooting video to his juniors and shared his training experience: “There is no chance to start over on the battlefield. If you want to perform stably, you can only rely on the muscle memory formed by thousands of hard training in normal times.”

“This ‘Warrior Medal’ was won when I led a team to Brazil to participate in the Second International Jungle Patrol Competition in 2016. In this competition, our military team ranked first among the 17 participating teams.” When Huang Xin talked about how he and his teammates cooperated tacitly in the dense forest to break through many obstacles and completed a 12-meter helicopter dive with a bone fracture, the teachers and students present held their breath unconsciously. “At that moment, I defended not only my personal dream, but also the honor of the country. In the face of the military mission, personal pain is insignificant.” As soon as Huang Xin finished speaking, thunderous applause broke out from the audience.

Only 20 days after returning from Brazil, Huang Xin set out on a journey again and led his team to Russia to participate in the “Scouting Vanguard” International Military Competition. Faced with difficulties such as unfamiliar terrain and language barriers, he and his teammates relied on their firm beliefs to trek through the swamps, and finally impressed foreign military officers and soldiers with their excellent results and won the “Consolidating Combat Friendship Medal”. Looking at the two shining medals, the students’ eyes were full of admiration and yearning.

Afterwards, Huang Xin analyzed the importance of national defense construction in light of the current international situation. “We are not living in a peaceful era, but in a peaceful country. The peace of the motherland needs our joint protection!” The sonorous words resonated with the students.

“Senior Huang Xin, the military training is so hard, how did you stick to it?” “What were you thinking when you were facing danger in the tropical jungle competition?”... In the interactive session, the students rushed to ask questions.

When talking about persistence, Huang Xin’s expression became firm: “The training in the army is indeed hard, but there is no rehearsal on the real battlefield. In order to practice sniping techniques, we lay down in a high temperature of 40℃ for most of the day. The hard training day after day and striving for excellence have shaped the soldiers’ indomitable sense of mission and responsibility. It is this responsibility that inspires me to keep fighting and fighting for the country.” “In the past, I felt that heroes were out of reach, but today I know that role models are actually around me.” Student Yang Mingsu was deeply touched. Before leaving, the classmates surrounded Huang Xin and asked him to sign. What surprised everyone was that Huang Xin did not write his own name, but the five big characters “Chinese Special Forces”. The sun was shining outside the window, and the camphor trees were rustling. In the lecture hall, the seeds of respecting the army and advocating martial arts are quietly sprouting in the hearts of young people.

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：孙 晨 王雲峤 责任编辑：尚晓敏 2025-06-07

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

好作风就是战斗力

■孙 晨 王雲峤

近日，陆军某旅党委常委兵分多路，深入该旅多个不同点位开展调研，发现并督促整改一批会风文风不实、办事效率不高等问题，切实让官兵感受到转作风给部队战斗力带来的新变化.

“改进作风必须向战发力，将背离实战要求的不良作风赶出训练场，进一步激发大家练兵备战动力.”该旅领导介绍，深入贯彻中央八项规定精神学习教育开展以来，他们利用党委理论学习中心组学习、党课辅导等时机，组织党员干部认真学习中央八项规定精神、军委十项规定及其实施细则精神. 同时，他们坚持边学边查边改，紧密结合部队的使命任务，把检视整改作为检验学习教育成效的重要标尺，在不断改进作风中强化党委机关服务基层的责任意识，倾力解决官兵后顾之忧；持续纠治练兵备战中的形式主义，为基层减负，真正让官兵把时间精力投入到主责主业中去.

翻看该旅《深入贯彻中央八项规定精神学习教育实施计划》，笔者发现一系列纠治作风积弊的务实举措. 比如，进一步规范机关发文，坚决杜绝 “假、大、空”；将近年来违反中央八项规定精神典型案例汇编成册，下发党员干部认真学习、对照检查；采取问卷调查、首长信箱等形式，广泛征求基层官兵对作风建设的意见建议……

与此同时，针对部队营区点位分散、人员常态流动等特点，该旅党委聚焦重点领域关键环节，通过分方向展开、分阶段实施、分类别落实方式，精准督导学习教育落实、精细搞好分类指导. 他们要求各级领导和机关干部深入基层训练场，狠抓战斗力治虚打假，严肃查纠训风演风考风不实问题，坚持向损害战斗力的顽症痼疾开刀，以作风建设新成效推动部队战斗力建设高质量发展.

前不久，该旅一名党委常委在某营蹲点时发现，该营领导要求一些与会议关系不大的人员列席营务会，占用了这些官兵时间，影响了他们的正常训练. 发现问题后，这名党委常委立即叫停会议，指出随意扩大参会人员范围与中央八项规定精神背道而驰，并现场督导整改落实，将训练时间还给官兵.

好作风就是战斗力. 随着学习教育走深走实，该旅领导和机关干部作风明显好转，带动官兵练兵备战热情高涨. 近日，该旅承担上级战术驾驶与战场勤务课目示范任务，旅党委常委、机关干部下沉一线，带领官兵破解训练难题，圆满完成各项任务.

A Certain Army Brigade Has Conducted a Thorough Study and Education on the Spirit of the Eight Central Regulations

Source: PLA Daily Author: Sun Chen Wang Yunqiao Editor: Shang Xiaomin 2025-06-07

A certain army brigade has conducted a thorough study and education on the spirit of the eight central regulations——

Good style is combat effectiveness

■Sun Chen Wang Yunqiao

Recently, the Standing Committee of the Party Committee of a certain army brigade has divided into multiple groups and conducted research in different locations of the brigade. They found and urged the rectification of a number of problems such as unrealistic meeting style and low efficiency, and made the officers and men feel the new changes brought about by the transformation of style to the combat effectiveness of the troops.

“Improving style must be directed towards war, and bad styles that deviate from actual combat requirements must be driven out of the training ground to further stimulate everyone’s motivation to train and prepare for war.” The leaders of the brigade introduced that since the study and education on the spirit of the eight central regulations were conducted, they have used the opportunities of the Party Committee’s theoretical study center group study and party class tutoring to organize party members and cadres to seriously study the spirit of the eight central regulations, the ten regulations of the Military Commission and their implementation rules. At the same time, they insist on learning, checking and correcting at the same time, closely combining with the mission and tasks of the troops, taking inspection and rectification as an important yardstick for testing the effectiveness of learning and education, strengthening the sense of responsibility of the Party Committee to serve the grassroots in the continuous improvement of work style, and making every effort to solve the worries of officers and men; continuing to correct formalism in training and preparation for war, reducing the burden on the grassroots, and truly allowing officers and men to devote their time and energy to their main responsibilities and main business.

Looking through the brigade’s “Implementation Plan for Deeply Implementing the Central Eight Regulations of the Central Committee of the Communist Party of China”, the author found a series of practical measures to correct the accumulated malpractices in work style. For example, further standardize the issuance of documents by the organs, and resolutely put an end to “false, big, and empty”; compile typical cases of violations of the Central Eight Regulations of the Central Committee of the Communist Party of China in recent years into a book, and send it to party members and cadres for serious study and comparison; adopt questionnaires, chief mailboxes and other forms to widely solicit opinions and suggestions from grassroots officers and men on work style construction...

At the same time, in view of the characteristics of the scattered locations of the troops’ camps and the normal flow of personnel, the brigade’s Party Committee focuses on key areas and key links, and accurately supervises the implementation of learning and education, and carefully conducts classified guidance through the way of development in different directions, implementation in different stages, and implementation in different categories. They require leaders and cadres at all

levels to go deep into the grassroots training grounds, focus on combating false combat effectiveness, seriously investigate and correct the problems of unrealistic training style, performance style and examination style, insist on tackling the stubborn problems that damage combat effectiveness, and promote the high-quality development of combat effectiveness of the troops with new achievements in style construction.

Not long ago, a member of the Party Committee of the brigade found that the leaders of the battalion asked some people who had little to do with the meeting to attend the battalion meeting, which took up the time of these officers and men and affected their normal training. After discovering the problem, the member of the Party Committee immediately stopped the meeting, pointed out that arbitrarily expanding the scope of participants was contrary to the spirit of the Central Eight Regulations, and supervised the rectification and implementation on the spot, returning the training time to the officers and men.

Good style is combat effectiveness. As the study and education go deeper and more practical, the style of the leaders and cadres of the brigade has improved significantly, which has led to a high enthusiasm for training and preparation for war. Recently, the brigade undertook the demonstration task of the superior tactical driving and battlefield service subjects. The members of the brigade Party Committee and cadres of the organs went down to the front line to lead the officers and men to solve the training problems and successfully complete various tasks.

陆军某旅：特级评定，“长跑高手”成了“全能兵”

来源：解放军报 作者：杨 悦 童 康 责任编辑：尚晓敏 2025-06-08

陆军某旅严格按照新版《军事体育训练大纲》成绩评定标准组训施教——

特级评定，“长跑高手”成了“全能兵”

■解放军报记者 杨 悦 特约通讯员 童 康

该旅官兵进行武装奔袭训练. 季　鹏摄

施训看点

●基础体能由成绩不设上限调整为 100 分封顶，解决一些官兵盲目追求单课目高分造成体能不均衡、考风不实、引发伤病等问题

●明确部分人员军体成绩由基础体能、战斗体能、实用技能成绩构成，突出战斗体能和实用技能的权重，引导官兵将更多精力投入专项体能训练

一场军事体育训练模拟考核，让陆军某旅军士、“长跑高手”谢海兵有些始料未及：以往，自己凭借 3000 米跑和俯卧撑两项优势课目，便可通过特 2 级评定. 但这次，他拼尽全力，才刚达到特 3 级标准.

这一改变，源于新版《军事体育训练大纲》对军事体育训练考评标准的调整. 新大纲将基础体能评分标准由现行百分制、不设上限调整为 100 分封顶，并在特级评定中增加了战斗体能、实用技能两项内容. 少了优势体能课目的高分，谢海兵的成绩评定下降了一档.

“尽管比去年的评级低了一等，可我感觉自己的综合素质反而提高了！”谢海兵告诉记者，按照新大纲要求，基础体能设定了最高阈值，战斗体能和实用技能的加入增加了考核难度. 这一系列变化，让原本擅长单杠和长跑的体能尖子迎来新挑战.

谢海兵记得，新大纲施行后的第一次模拟考核，他在定向越野课目中就遭遇“滑铁卢”. 野外陌生地域，谢海兵拿着军用地图自主规划路线寻找定位点，却连续找错好几个点位，越找心里越没底. 一路奔袭下来，他跑了不少冤枉路，最终被判定为不及格.

“以前特级评定侧重考察体能素质，现在更注重检验战斗素养，这让我认清了自己的短板弱项，重新找到了战斗员的感觉. ”谢海兵说.

新大纲实施后，像谢海兵一样在新增课目考核中失利的官兵还有不少. 为此，该旅党委专门选派人员深入研究新大纲规定，将梳理出的知识点汇编后下发基层，并安排教学骨干赴各营区对重难点课目进行实操演示.

为了尽快适应新大纲要求，谢海兵针对自己的弱项课目加强训练. 这段时间，他埋头苦学地图知识、钻研标图业务，同时虚心向专业教练员请教疑难问题，技能水平得到大幅提升.

专攻精练最终有了回报. 在近期组织的模拟考核中，谢海兵沉着应对、咬牙冲锋. 除基础体能课目取得 400 分满分、战斗体能课目达到优秀外，他在曾经失利的实用技能课目中也拿到了好成绩.

“只有把战斗技能练全面、把综合素质练过硬，才能成为一名合格战斗员，上了战场才更有底气. ”奋起直追的这段经历，让谢海兵深刻意识到，军事体育训练不仅是为了提升体能素质，更是为了制胜未来战场.

参训笔记

练体能，别光盯着“极限”

■陆军某旅作训科干部　葛　英

3000 米能跑多快？单杠能拉多少？这些数据，曾是基层一些单位衡量战斗力的重要指标.

按照过去的军事体育特级评定标准，速度越快、完成动作越多，就代表了越高的分数与等级. 因此，官兵总会想方设法把强项练得更强，以获得更高分数. 新版《军事体育训练大纲》不仅规定了特级评定考核中基础体能分数不再无限累加，还将战斗体能与实用技能纳入考核范畴.

新的标准，带来新的导向. 我们不得不重新思考：一名合格的战斗员，应该具备什么素质？体能追求“极限”，真的能带来战场上的所向披靡吗？

新形势下，作战任务多样、战场空间多维带来能力需求多元，军事体育训练只有更具实战性、实用性，才能引导官兵锤炼全面过硬的综合素质.

为进一步帮助官兵练强战斗体能和实用技能，我们努力优化训练资源统筹和训练组织方式，集中专业力量深入营连帮带，助力官兵提升遂行作战任务的特需体能和战斗素养，夯实部队建设和战斗力基础.

如今，我在基层营连看到许多新变化：一门心思练习基础体能的官兵少了，爬绳场、障碍场等锻炼战斗技能的场地日渐火热；官兵一改追求体能“极限”的旧观念，把“打赢”追求内化于心、外化于行.

观训小议

从“木桶理论”说开去

■杨　悦

“木桶理论”告诉我们，一个木桶能装多少水，不是取决于最长的木板，而是取决于最短的木板.

训练场上，“单杠能手”“长跑高手”不断刷新“长板”数据，并不能真正提升战斗力“蓄水量”——引体向上做得再多，不等于攀爬绳索速度够快；3000 米跑用时再短，不等于识图用图够精准.

真实战场上，任何一块技能短板都可能成为导致作战任务失败的“阿喀琉斯之踵”. 因此，成为一名合格的战斗员，最需要的不是单杠或跑道上的亮眼纪录，而是扎实过硬的综合战斗素质.

以考促训，以考促战. 按照新版《军事体育训练大纲》特级评定考核的新标准，基础体能分数不再无限累加，意味着不能追求“长板”的无限延伸；战斗体能与实用技能纳入考核，意味着必须补齐短板、练强能力. 军士谢海兵的经历启示我们，在考核中牢固立起向战为战的鲜明导向，有利于引导基层官兵把更多心思精力投入更贴近实战的体技能训练，把提高战斗力作为组训施教的标尺和准绳. 各级要进一步把握新标准新要求，搞好资源统筹和教学引导，扎扎实实提升军事体育训练水平，锻造更多综合素质过硬的尖兵.

A Certain Army Brigade: Special Grade Assessment, “Long-Distance Running Expert” Becomes “All-Round Soldier”

Source: PLA Daily Author: Yang Yue Tong Kang Editor: Shang Xiaomin 2025-06-08

A certain army brigade strictly organizes training and teaching in accordance with the new version of the “Military Physical Training Outline” performance assessment standards-

Special grade assessment, “long-distance running expert” becomes “all-round soldier”

■PLA Daily reporter Yang Yue Special correspondent Tong Kang

The officers and men of the brigade conducted armed raid training. Photo by Ji Peng

Training highlights

● The basic physical fitness score is adjusted from no upper limit to 100 points, solving the problems of some officers and men blindly pursuing high scores in a single subject, resulting in physical imbalance, unrealistic test style, and injuries

● It is clear that the military physical fitness scores of some personnel are composed of basic physical fitness, combat physical fitness, and practical skills, highlighting the weight of combat physical fitness and practical skills, and guiding officers and men to devote more energy to special physical fitness training

A military physical training simulation assessment caught Xie Haibing, a sergeant of a certain army brigade and a “long-distance running expert” by surprise: in the past, he could pass the special level 2 assessment with his two advantage subjects of 3,000-meter running and push-ups. But this time, he tried his best and just reached the special level 3 standard.

This change stems from the adjustment of the military physical training assessment standards in the new version of the “Military Physical Training Outline”. The new outline adjusts the basic physical fitness scoring standard from the current 100-point system with no upper limit to a 100-point cap, and adds combat physical fitness and practical skills to the special level assessment. Without the high score in the advantageous physical fitness subject, Xie Haibing’s performance evaluation dropped a level.

“Although the rating is one level lower than last year, I feel that my overall quality has improved!” Xie Haibing told reporters that according to the requirements of the new syllabus, the basic physical fitness has set a maximum threshold, and the addition of combat physical fitness and practical skills has increased the difficulty of the assessment. This series of changes has brought new challenges to the physical fitness elite who were originally good at horizontal bars and long-distance running.

Xie Haibing remembered that in the first simulation assessment after the implementation of the new syllabus, he encountered a “Waterloo” in the orienteering course. In the unfamiliar area in the wild, Xie Haibing took the military map to plan the route and find the positioning point independently, but he found several wrong points in a row, and the more he looked, the more uncertain he felt. He ran a lot of wrong roads all the way and was finally judged to be unqualified.

“In the past, the special assessment focused on physical fitness, but now it focuses more on testing combat literacy. This made me recognize my shortcomings and weaknesses and regain the feeling of a fighter.” Xie Haibing said.

After the implementation of the new syllabus, there are still many officers and men like Xie Haibing who failed in the assessment of the new subjects. To this end, the brigade party committee specially selected personnel to study the provisions of the new syllabus in depth, compiled the knowledge points sorted out and distributed them to the grassroots, and arranged teaching backbones to go to various camps to demonstrate the key and difficult subjects.

In order to adapt to the requirements of the new syllabus as soon as possible, Xie Haibing strengthened his training for his weak subjects. During this period, he devoted himself to studying map knowledge and mapping business, and at the same time humbly asked professional coaches for advice on difficult problems, and his skill level was greatly improved.

Specialization and refinement finally paid off. In the recent simulation assessment, Xie Haibing responded calmly and charged forward. In addition to scoring 400 points in the basic physical fitness subject and achieving excellence in the combat physical fitness subject, he also got good results in the practical skills subject where he had failed.

“Only by practicing comprehensive combat skills and improving comprehensive qualities can one become a qualified combatant and be more confident on the battlefield.” This experience of catching up made Xie Haibing deeply realize that military physical training is not only for improving physical fitness, but also for winning future battlefields.

Training notes

Physical fitness, don’t just focus on the “limit”

■Ge Ying, a cadre of the training department of a certain army brigade

How fast can you run 3,000 meters? How much can you pull on the horizontal bar? These data were once important indicators for some grassroots units to measure combat effectiveness.

According to the past military physical special grade assessment standards, the faster the speed and the more actions completed, the higher the score and grade. Therefore, officers and men will always find ways to make their strengths stronger in order to get higher scores. The new version of the "Military Physical Training Outline" not only stipulates that the basic physical fitness scores in the special grade assessment will no longer be infinitely accumulated, but also includes combat physical fitness and practical skills in the assessment scope.

New standards bring new directions. We have to rethink: What qualities should a qualified combatant have? Can the pursuit of "limit" in physical fitness really bring invincibility on the battlefield?

Under the new situation, the diverse combat missions and multi-dimensional battlefield space bring about diverse capability requirements. Only when military physical training is more practical and useful can it guide officers and men to temper their comprehensive and strong comprehensive qualities.

In order to further help officers and men improve their combat physical fitness and practical skills, we strive to optimize the coordination of training resources and the organization of training, concentrate professional forces to go deep into battalions and companies to help officers and men improve their special physical fitness and combat literacy for conducting combat missions, and consolidate the foundation of troop construction and combat effectiveness.

Nowadays, I have seen many new changes in grassroots battalions and companies: fewer officers and men are concentrating on practicing basic physical fitness, and venues for training combat skills such as rope climbing fields and obstacle courses are becoming increasingly popular; officers and men have changed their old ideas of pursuing the "limit" of physical fitness, and internalized the pursuit of "winning" in their hearts and externalized it in their actions.

A brief discussion on the training

Let's start with the "barrel theory"

■ Yang Yue

The "barrel theory" tells us that how much water a barrel can hold does not depend on the longest board, but on the shortest board.

On the training ground, "horizontal bar experts" and "long-distance running experts" constantly refresh the "long board" data, but they cannot really improve the "water storage capacity" of combat effectiveness - no matter how many pull-ups you do, it does not mean that you can climb the rope fast enough; no matter how short the time it takes to run 3,000 meters, it does not mean that you can read and use the map accurately enough.

On the real battlefield, any skill shortcoming may become the “Achilles’ heel” that leads to the failure of the combat mission. Therefore, to become a qualified combatant, what is most needed is not the brilliant record on the horizontal bar or the runway, but solid and strong comprehensive combat quality.

Use examinations to promote training and use examinations to promote combat. According to the new standards for the special-level assessment of the new version of the “Military Physical Training Outline”, basic physical fitness scores are no longer infinitely accumulated, which means that we cannot pursue the unlimited extension of “long boards”; combat physical fitness and practical skills are included in the assessment, which means that we must make up for shortcomings and strengthen our abilities. The experience of Sergeant Xie Haibing tells us that firmly establishing a clear orientation of “fighting for war” in the assessment is conducive to guiding grassroots officers and men to devote more thoughts and energy to physical skill training that is closer to actual combat, and to use improving combat effectiveness as a yardstick and criterion for training and teaching. All levels should further grasp the new standards and new requirements, do a good job in resource coordination and teaching guidance, and solidly improve the level of military physical training to forge more pioneers with strong comprehensive qualities.

陆军某旅发展和培养义务兵党员工作的几段经历

来源：中国军网-解放军报 作者：王梦圆 毛英椿 责任编辑：尚晓敏 发布：2025-06-09

为党员队伍注入新鲜血液

——陆军某旅发展和培养义务兵党员工作的几段经历

■王梦圆 毛英椿

编者按 义务兵是军队人员重要组成部分，重视发展义务兵党员，有利于使党员队伍结构更加优化、群体作用发挥更加明显. 着眼征兵政策、新训形势等方面新情况，各部队应不等不靠、主动作为，依规高质量落实好发展义务兵党员各项工作. 陆军某旅针对义务兵培养考察时间短、能力素质有待提升等特点，从兵之初开始预先着手、早做准备，着力解决发展义务兵党员的难点重点问题，及时把优秀的义务兵吸收进党组织，不断注入新鲜血液、优化队伍结构，让党员队伍充满生机活力. 他们的探索实践有一定借鉴意义.

陆军某旅列兵党员（右三）为战友示范战术动作. 赖 坤摄

见闻① 全程了解入党申请人情况

考察关口前移 打通培养链路

“小吕政治觉悟高，训练积极，在‘优秀新兵’测评中排名靠前……”不久前，陆军某旅新兵训练结束，某连新训骨干单攀回到连队后，除了带回新兵的兵情卡、成长日记、档案等，还向党支部详细汇报了入党申请人、新兵吕海波的现实表现、群众反映、道德品行等情况，作为下步连队在义务兵中吸收入党积极分子的重要依据.

单攀告诉笔者，旅队将发展党员关口前移，在新训期间就对义务兵进行考察的做法，源于此前的一段经历.

某连义务兵小孙下连后表现突出，几次参加上级集训比武均取得优异成绩，还多次随连队党员突击队完成急难险重任务，可由于他成为入党积极分子时间未满一年，没能在义务兵期间入党.

调研发现，这种现象并非个例. “现行承训模式下，新兵需先在新兵连集中训练，下连后还要度过‘第二适应期’，结束后距离满服役期往往仅剩一年半时间，由基地承训专业的新兵下连时间则更晚. ”该旅领导告诉笔者，如果要发展义务兵党员，就要在新兵下连后半年内确定为入党积极分子. 对连队党支部来说，由于考察时间相对较短，往往不会轻易发展. 这样一来，在一定程度上无法充分调动义务兵群体的工作积极性.

着眼此类现象，旅党委组织基层优秀党务工作者建言献策，在调研论证后形成初步方案. 他们要求基层党组织主动适应士兵“两征两退”政策新特点、新兵承训模式新变化，将考察入党积极分子的关口前移至新训期间，遴选党龄较长或担任党内职务的党员骨干担任新兵班长，引导新兵端正入伍、入党动机，进一步掌握清楚全面情况，给出评价意见.

“新训班长李加兴是连队党小组组长、理论骨干，在培养发展义务兵党员工作中发挥了重要的指导帮带作用. ”上等兵查良川说，在新训期间，李班长就积极向大家介绍党的路线、方针、政策，传播党的创新理论，在他言传身教下，自己在新兵连就递交了入党申请书.

前段时间，查良川所在连队党支部要研究确定入党积极分子，会前，各支委同包括李班长在内的几名带兵骨干深入交流. 会上，结合查良川下连后的工作表现，连队党支部研究决定，将查良川确定为入党积极分子.

考察关口前移，培养发展工作更加主动. 成为入党积极分子后，查良川时刻以一名党员的标准要求自己，工作干在前，任务冲在前. 在最近结束的旅新乘员集训中，他凭借优异表现夺得结业考核第一名，为身边战友作出了表率.

见闻② 严格党员标准不搞区别对待

搭建成长舞台 及时跟踪帮带

初夏时节，该旅一场战术考核进行到关键时刻. 前沿阵地上，担负主攻任务的某连进攻受阻时，上等兵叶展宏带头从侧翼冲锋，直击“敌”暗堡目标，扭转了战场态势.

考核结束，面对战友赞许，叶展宏没有自满情绪：“我是一名预备党员，急难任务面前应该挺身而出.”

“只要经过严格培养考察且条件成熟，义务兵党员也能发挥应有作用.”对此，该连党支部王书记感慨颇深.

此前，党支部研究发展党员工作时，大家曾对要不要在义务兵中确定党员发展对象有过深入讨论：有人感到，义务兵服役时间较短，相较于军士能力素质稍有欠缺，且是否长期在部队发展存在不确定性；也有人反映，个别义务兵党员在晋升军士后，容易出现思想“抛锚”隐患，前几年就有一名军士因违反纪律被延长了预备期……

“表面看是没有合适的义务兵发展对象，根源是个别单位没能做好对义务兵入党积极分子的教育培养.”讨论中，列席会议的营党委书记告诉大家，发展义务兵党员要提前筹划、加强培养，只要符合党员标准，义务兵也能很好发挥先进作用.

对照反思后，支部一班人统一了思想：发展党员不应区别对待，要严格依据党员标准，坚持“成熟一个，发展一个”.

在上级指导帮助下，该连党支部根据发展党员相关规定，明确了发展义务兵党员的相关流程和细则：义务兵被确定为入党积极分子后，第一时间确立培养联系人精准帮带；建立跟踪考评卡，由培养联系人记录培养对象的现实表现情况；定期组织集中强化培训，邀请优秀党员骨干、党务工作者进行辅导授课，等等.

“这名同志专业训练成绩突出、群众基础好、模范作用较强……”前不久，该连上等兵马伟在党员大会上以高票通过，被党支部接收为预备党员. 马伟十分感激地说，党组织精心培养帮带，为他搭建了成长进步的舞台，帮他明晰了前进方向.

马伟的成长并非一帆风顺. 成为入党积极分子后，他有一次外出参加专业集训，虽努力学习，但几次考核成绩均不理想，一度失去了信心. 了解情况后，他的培养联系人、一级上士李海珲经常通过视频连线等方式为他答疑解惑、加油鼓劲. 党支部还安排相关专业骨干帮马伟查找分析问题，制订补短计划. 经过培养帮带，马伟重拾信心，成绩稳步提升，被集训队评为“优秀学员”，当年底还被评为“四有”优秀士兵.

该旅领导告诉笔者，近两年，他们严把党员入口关，发展的一批义务兵党员发挥了很好的带动示范作用，在工作生活、日常训练、大项任务中处处站排头、冲在前，树起了鲜明的导向，带动更多义务兵战友在战位上建功立业.

见闻③ 研究新兵预备党员转正事宜

做好接续培养 避免出现盲区

宣读转正申请书、入党介绍人反馈意见、支部党员大会认真讨论……前不久，正在营队集中度过“第二适应期”的某连预备党员、新兵邓以羊回到所在连队，经过党员大会评议通过，成为一名正式党员.

“确保新兵预备党员入伍后能按期转正，有利于新兵尽快稳定心神、投入工作，更好发挥模范表率作用. ”该旅领导告诉笔者，随着大学生士兵比例提高，以党员身份入伍的新兵也在增多. 入伍前已转正的，只需转移组织关系即可. 对于以预备党员身份入伍，转正在新训期间或下连不久的，需要党支部及时开会研究. 以往，个别党支部由于对新兵预备党员情况不够熟悉，出现久拖不议或议而不决等情况.

认真调研后，旅党委针对义务兵预备党员转正流程作出进一步规范：如果是集团军组建临时新兵团自训，因临时党委不能发展新党员，基层党组织可通过派出的新训骨干了解义务兵预备党员的思想底数和现实表现，下连后向党支部汇报，以便党支部研究转正事宜；如果是基地承训，待新兵下连后由党支部第一时间和原党组织建立联系，全面了解义务兵预备党员表现情况，待掌握底数后，视情召开会议研究.

“小邓大学期间担任学习委员，品学兼优，能积极配合老师开展工作，组织集体活动常能看到他”“该同志新训期间表现突出，能够积极利用所长帮带有短板弱项的同志，结业时课目成绩均达到优良以上”……

邓以羊不知道的是，连队党支部了解他的情况后，第一时间通过机关发函，与他入伍前所在大学党组织取得联系，详细了解其预备期内的培养教育和考察情况. 在接收到大学党组织转来的有关材料和情况介绍后，党支部进行了严格审查. 邓以羊大学期间的两位入党介绍人，也在党员大会召开前寄来了书面意见. 连队再结合新训期间邓以羊身边战友的反馈，研究决定其如期转正.

与邓以羊情况不同，某连义务兵小戴的原党支部已同意其按期转正，但因入伍导致转正流程没能完成. 考虑到其新兵期间由外单位承训，连队党支部对他的情况还不是很清楚，就依据相关规定决定推迟两个月，利用这段时间对其进行系统深入的培养考察. 待完全掌握小戴现实表现和思想状况后，再研究转正事宜.

如今，该旅一批经过精心培养、细致考察的义务兵党员活跃在任务一线，增添了党员队伍的动力活力. 在近期展开的野外驻训中，几名义务兵党员主动请缨加入党员突击队，带动新兵群体积极参与到野外宿营部署等工作中，高质量完成上级赋予的各项任务.

Several Experiences of Developing and Cultivating Conscripted Soldiers in a Certain Army Brigade

Source: China Military Network-Liberation Army Daily Author: Wang Mengyuan Mao Yingchun Editor: Shang Xiaomin Release: 2025-06-09

Injecting fresh blood into the Party member team

——Several experiences of developing and cultivating conscripted soldiers in a certain army brigade

■Wang Mengyuan Mao Yingchun

Editor's note Conscripted soldiers are an important part of the military personnel. Attaching importance to the development of conscripted soldiers is conducive to optimizing the structure of the Party member team and making the role of the group more obvious. Focusing on new situations in conscription policies and new training situations, all troops should take the initiative to implement various tasks of developing conscripted soldiers in accordance with regulations and with high quality. In view of the characteristics of the short time for the training and inspection of conscripts and the need to improve their ability and quality, a certain army brigade has started to make preparations in advance from the beginning of the soldiers, focusing on solving the difficult and key problems of developing conscripted soldiers, and timely absorbing outstanding conscripts into the Party organization, constantly injecting fresh blood, optimizing the team structure, and making the Party member team full of vitality. Their exploration and practice have certain reference significance.

Observations① Understand the applicants for Party membership throughout the process

Moving the inspection checkpoint forward to open up the training link

“Xiao Lu has a high political awareness, is active in training, and ranks high in the evaluation of “excellent recruits”...” Not long ago, after the training of recruits of a certain army brigade ended,

Shan Pan, a backbone of the new training of a certain company, returned to the company. In addition to bringing back the recruits' soldier information cards, growth diaries, and files, he also reported in detail to the Party branch on the actual performance, public feedback, and moral character of the applicant and recruit Lu Haibo, as an important basis for the company to absorb active Party members from the conscripts in the next step.

Shan Pan told the author that the brigade moved the checkpoint for developing Party members forward and inspected the conscripts during the new training, which originated from a previous experience.

Xiao Sun, a conscript in a certain company, performed outstandingly after joining the company. He participated in several training competitions with superiors and achieved excellent results. He also completed urgent, difficult and dangerous tasks with the company's Party member assault team many times. However, because he had been an active member of the Party for less than a year, he was unable to join the Party during his conscription.

The survey found that this phenomenon is not an isolated case. “Under the current training model, recruits must first be trained in the recruit company, and then go through the “second adaptation period” after joining the company. After the end, there is often only one and a half years left before the full service period. The time for recruits trained by the base to join the company is even later.” The leader of the brigade told the author that if conscripts are to be recruited as Party members, they must be identified as active members of the Party within half a year after they join the company. For the company Party branch, due to the relatively short inspection time, it is often not easy to develop. In this way, to a certain extent, it is impossible to fully mobilize the work enthusiasm of the conscript group.

Focusing on this phenomenon, the brigade Party committee organized excellent grassroots Party workers to make suggestions and formed a preliminary plan after investigation and demonstration. They asked the grassroots Party organizations to actively adapt to the new characteristics of the “two conscriptions and two demobilizations” policy for soldiers and the new changes in the training model for recruits, move the threshold for examining active members to join the Party to the period of new training, select Party members with a long Party age or holding Party positions as squad leaders for new recruits, guide new recruits to correct their motivations for joining the army and the Party, further understand the overall situation, and give evaluation opinions.

“The new training squad leader Li Jiaxing is the leader of the company's Party group and a theoretical backbone. He has played an important guiding and helping role in cultivating and developing conscript Party members.” Corporal Cha Liangchuan said that during the new training, squad leader Li actively introduced the Party's line, principles, and policies to everyone and spread the Party's innovative theories. Under his precepts and deeds, he submitted an application for joining the Party in the new recruit company.

Some time ago, the Party branch of Cha Liangchuan's company was going to study and determine active members to join the Party. Before the meeting, the branch committee members had in-depth exchanges with several leading cadres including squad leader Li. At the meeting, based on Zha Liangchuan's work performance after joining the company, the company Party branch decided to identify Zha Liangchuan as an active member of the Party.

The inspection checkpoint was moved forward, and the training and development work was more proactive. After becoming an active member of the Party, Zha Liangchuan always held himself to the standards of a Party member, working first and rushing to the front. In the recently concluded brigade new crew training, he won the first place in the graduation assessment with his outstanding performance, setting an example for his comrades around him.

Observation ② Strict Party member standards do not discriminate

Build a growth stage and follow up in time

In early summer, a tactical assessment of the brigade reached a critical moment. On the front line, when a company responsible for the main attack was blocked, Corporal Ye Zhanhong took the lead in charging from the flank and directly hit the “enemy” bunker target, reversing the battlefield situation.

After the assessment, facing the praise of his comrades, Ye Zhanhong was not complacent: “I am a probationary Party member, and I should stand up in the face of urgent tasks.” “As long as they have been strictly trained and examined and the conditions are ripe, conscripts can also play their due role.” In this regard, Secretary Wang of the company's Party branch was deeply moved.

Previously, when the Party branch studied the work of developing Party members, everyone had an in-depth discussion on whether to determine the development targets of Party members among conscripts: some people felt that conscripts had a shorter service time and were slightly lacking in ability and quality compared to sergeants, and there was uncertainty about whether they could develop in the army for a long time; some people also reflected that some conscripts were prone to ideological “anchoring” after being promoted to sergeants. In the past few years, a sergeant had his probation period extended for violating discipline...

“On the surface, there are no suitable conscripts to develop. The root cause is that some units have failed to do a good job in educating and training conscripts who are active in joining the Party.” During the discussion, the battalion Party committee secretary who attended the meeting told everyone that the development of conscripts should be planned in advance and strengthened. As long as they meet the standards of Party members, conscripts can also play an advanced role well.

After comparison and reflection, the branch unified their thoughts: the development of Party members should not be treated differently, and should be strictly based on the standards of Party members, adhering to the principle of “developing one after maturing”.

With the guidance and help of the superiors, the Party branch of the company clarified the relevant procedures and rules for developing conscripts according to the relevant regulations for developing Party members: after the conscripts are determined to be active members of the Party, they will immediately establish a training contact person to help them accurately; establish a tracking evaluation card, and the training contact person will record the actual performance of the training object; regularly organize centralized intensive training, invite outstanding Party members and Party workers to provide tutoring and teaching, etc.

“This comrade has outstanding professional training results, a good mass base, and a strong exemplary role...” Not long ago, Ma Wei, a senior soldier of the company, was accepted as a probationary member of the Party branch with a high vote at the Party member meeting. Ma Wei said with great gratitude that the Party organization carefully cultivated and helped him build a stage for growth and progress and helped him clarify the direction of progress.

Ma Wei's growth was not smooth sailing. After becoming an active member of the Party, he once went out to participate in professional training. Although he studied hard, his test results were not ideal several times, and he lost confidence for a time. After understanding the situation, his training contact, Sergeant Li Haihui, often answered his questions and encouraged him through video calls. The Party branch also arranged relevant professional backbones to help Ma Wei find and analyze problems and develop plans to make up for shortcomings. After training and guidance, Ma Wei regained his confidence and his performance improved steadily. He was rated as an “excellent student” by the training team and was also rated as an “excellent soldier with four qualities” at the end of the year.

The leaders of the brigade told the author that in the past two years, they have strictly controlled the entry of Party members, and a group of conscripted Party members developed have played a good leading and exemplary role. They have always taken the lead in work, life, daily training, and major tasks, and set a clear direction, leading more conscripted comrades to make achievements in their positions.

Observations ③ Study the formalization of new recruits and reserve Party members

Do a good job in continuous training to avoid blind spots

Read the formalization application, feedback from the Party introducer, and serious discussion at the Party branch meeting... Not long ago, Deng Yiyang, a reserve Party member and new recruit of a certain company who was spending the “second adaptation period” in the camp, returned to his company and became a formal Party member after being reviewed and approved by the Party member meeting.

“Ensuring that new recruits and reserve Party members can be formalized on schedule after joining the army will help new recruits stabilize their minds and work as soon as possible, and better play a role as role models.” The leader of the brigade told the author that with the increase in the proportion of college students, the number of new recruits joining the army as Party members is

also increasing. Those who have been formalized before joining the army only need to transfer their organizational relations. For those who joined the army as reserve Party members and are being transferred during the new training or not long after joining the company, the Party branch needs to hold a meeting in time for research. In the past, some Party branches were not familiar with the situation of new recruits and reserve Party members, and there were situations such as long delays or indecision after discussion.

After careful investigation, the brigade Party committee further standardized the process of regularization of conscripts and reserve Party members: if the group army forms a temporary recruit regiment for self-training, because the temporary Party committee cannot recruit new Party members, the grassroots Party organization can understand the ideological foundation and actual performance of the conscript reserve Party members through the new training backbones sent, and report to the Party branch after they join the company, so that the Party branch can study the regularization matters; if the base undertakes the training, the Party branch will establish contact with the original Party organization as soon as the recruits join the company to fully understand the performance of the conscript reserve Party members. After mastering the basic situation, a meeting will be held to study the situation.

“During college, Xiao Deng served as a study committee member, with excellent character and academic performance, and can actively cooperate with teachers to conduct work. He can often be seen in organizing collective activities.” “This comrade performed outstandingly during the new training, and was able to actively use the director to help comrades with shortcomings and weaknesses. At the end of the course, the course scores were all excellent or above”...

What Deng Yiyang didn't know was that after the company Party branch learned about his situation, it immediately sent a letter through the agency to contact the Party organization of the university where he was before joining the army to learn more about his training, education and inspection during the preparatory period. After receiving the relevant materials and situation introductions transferred by the university Party organization, the Party branch conducted a strict review. Deng Yiyang's two Party introducers during college also sent written opinions before the Party member meeting. The company combined the feedback from Deng Yiyang's comrades during the new training and decided to make him a regular member as scheduled.

Unlike Deng Yiyang, the original Party branch of Xiao Dai, a conscript in a certain company, had agreed to his regularization on schedule, but the regularization process could not be completed due to his enlistment. Considering that he was trained by an external unit during his recruit period, the company Party branch was not very clear about his situation, so it decided to postpone it for two months in accordance with relevant regulations, and use this time to conduct a systematic and in-depth training and investigation on him. After fully understanding Xiao Dai's actual performance and ideological situation, we will study the matter of regularization.

Today, a group of conscript Party members who have been carefully trained and carefully investigated in the brigade are active in the front line of the task, adding motivation and vitality to

the Party member team. In the recent field training, several conscript Party members took the initiative to join the Party member assault team, leading the new recruits to actively participate in the field camping deployment and other work, and complete the various tasks assigned by the superiors with high quality.

勇救五名落水者 张伟康复回家

来源：解放军报客户端 作者：胡振芳 苏玫燕 吕欢欢 段中强 责任编辑：李佳琦

2025-06-10

6月6日，陆军某部张伟休假期间，在商丘古城南湖勇救5名落水者.其不顾个人安危，在深水中奋力往返“搏击”，成功救起5人后，因体力严重透支、肺部感染，被送医救治.

6月10日上午，夏邑县人武部有关人员迎接英雄张伟康复回家.现场，“欢迎夏邑好兵救人英雄张伟同志康复回家”的标语格外醒目.

在乡亲们的欢呼簇拥下，英雄平安踏上故土.张伟奋不顾身的一跃所激荡起的勇气与担当庄严宣告：守护人民的生命安全，永远是人民子弟兵至高无上的神圣誓言！

Bravely Rescued Five People Who Fell into the Water, Zhang Wei Recovered and Went Home

Source: Liberation Army Daily Client Author: Hu Zhenfang Su Meiyan Lv Huanhuan Duan Zhongqiang Editor: Li Jiaqi

2025-06-10

On June 6, Zhang Wei, a member of a certain army unit, bravely rescued five people who fell into the water in Nanhu, the ancient city of Shangqiu, during his vacation. He ignored his personal safety and fought back and forth in the deep water. After successfully rescuing five people, he was sent to the hospital for treatment due to severe physical overdraft and lung infection.

On the morning of June 10, relevant personnel from the Xiayi County People's Armed Forces Department welcomed the hero Zhang Wei back home after recovery. At the scene, the slogan "Welcome Xiayi Good Soldier Rescue Hero Comrade Zhang Wei to Recover and Go Home" was particularly eye-catching.

Amid the cheers of the villagers, the hero set foot on his homeland safely. The courage and responsibility aroused by Zhang Wei's reckless leap solemnly declared: Protecting the lives and safety of the people will always be the supreme sacred oath of the people's soldiers!

军营观察丨高原通信兵致信前辈 寻找"丢失"的 16 年连史

来源：中国军网-解放军报 作者：邵华枫 蒲杰鸿 杨胜燕 责任编辑：孙智英 发布：2025-06-10

新闻样本

寻找"丢失"的 16 年连史

■蒲杰鸿 英彭博

4 月上旬，红山河机务站耿指导员上任. 工作交接时，老指导员交给他一项沉甸甸的任务——继续补充修缮连史.

这项任务始于 4 年前. 2021 年，时任指导员张艳锋带领官兵修建连队荣誉墙时发现，机务站组建于 1983 年，可是当时留存的连史图文资料只能追溯到 1999 年.

机务站组建之初的那 16 年连史，该去哪里寻找？

红山河机务站，地处喀喇昆仑腹地. 高原上有句话叫"天不怕，地不怕，就怕甜水海到多玛". 红山河机务站，就常年驻守在这一段.

地图上，本无"红山河"这个地名. 当年，部队建设机务站时，将这里定名为"红山河". 因此，"红山河"并非地名，特指红山河机务站.

红山河机务站组建后，结束了西藏和新疆不通军线电话的历史. 雪山之巅，一代代通信兵战天斗地、艰难创业，担负着数百公里边防通信线路管护任务，成为祖国西北边陲的"千里眼""顺风耳".

莽莽喀喇昆仑，高山阻隔，风雪封冻，红山河机务站历经多次改革整编、营房搬迁. 直到1994年，机务站才用上了太阳能电池，结束了官兵手摇油机发电的历史.

在恶劣的自然环境条件下，机务站没有留下什么文献资料，的确是一件憾事.

那晚，张艳锋想起那段空白的连史，心里暗下决心：“一定要把雪山上的那16年连史，重新找回来！”

从那时起，张艳锋发起了一项“连史寻找计划”. 此后，机务站指导员换了几任，但这项工作从未中断——

寻找连史的过程并不容易. 张艳锋利用休假下山的机会，翻遍了上级单位留存的史料；继任指导员李金东休假期间更是奔波辗转千余公里，现地寻访老兵们.

老兵李大鹏拿出了珍藏的日记本，泛黄的页面上工工整整记录着：我军海拔最高的载波机务站在世界屋脊落成.

老军医李利亚寄来一沓照片，并在背面工整地注记出拍摄时间、背景事件.

老指导员刘书礼专门打来电话，一一讲述同批战友的情况和守防感悟……

前不久，一次偶然的机会，耿指导员与一位军旅作家取得了联系. 这位作家20世纪80年代、90年代多次到红山河机务站采访，并与许多受访官兵保持着联系.

通过作家牵线，耿指导员成功补齐了机务站历任主官名录和相关连史.

熄灯号响过后，耿指导员常伏案整理连史文献，将老兵们提供的图文资料，按时间轴填入那条“断流”的历史长河——

那年，红山河机务站第三任指导员周世辉换防下山途中，遭遇山体滑坡，险些把命交给雪山；除夕夜，老兵们排着队手摇油机发电，累得气喘吁吁；冬季大雪封山，蔬菜送不上来，大家把扔掉的菜叶子收集起来，做成包子馅……

一个个隐于雪山的名字，一个个平凡普通的故事，像高原冰川融化的雪水，顺着时间的河床重新流入“红山河”.

日前，耿指导员为下连不久的新兵们播放了一个视频短片. 当前辈们鏖战风雪、穿行极地的燃情岁月再现于屏幕上，台下那一双双青春的眼眸湿润又坚定.

那一刻，这群坚守在红山河机务站的通信兵们，找到了追寻的意义：记住来时的初心，记住曾经的荣光，走得再远都不会迷失方向，走到哪里都充满力量.

特稿

“雪山家书”：高原通信兵致信前辈

■邵华枫 蒲杰鸿 杨胜燕

红山河机务站官兵重温入党誓词. 李荣荣 摄

入夏，喀喇昆仑冰雪渐渐消融，高原绿意，姗姗来迟.

一个温暖的午后，红山河机务站李连长在连队荣誉墙前驻足凝视，脑中突然冒出一个念头：“给老兵们写封信. ”

在信息网络技术高速发展的今天，红山河已经接通了 5G 网络. 但思来想去，李连长还是决定用这样郑重的方式，向老兵表达心中的敬意.

晚点名，李连长将这一想法提出，官兵一致赞同. 熄灯号响，大家小心翼翼地取出官兵名录，一一抄录收信地址. 那晚，机务站学习室的灯光，一直亮到深夜.

不久后，中士延陵荣祥下山休假，担负寄信的任务.

一封封来自雪山的“家书”，跨过雪山高原，穿越崇山峻岭，将信两头的人紧紧连在一起.

一块高原石见证无悔青春——

你们用青春和热血换来的荣誉，在我们这一代一定不会丢

寄信时，延陵荣祥特意给信件备注上“加急”.

延陵荣祥从小的梦想，是成为一名建功沙场的特种兵. 可是，他怎么也没想到，自己会走上喀喇昆仑，天天守着通信线路. 面对理想与现实的落差，他的锐气和耐心渐渐消磨.

那年八一建军节，老兵田春生辗转数千公里，重回红山河机务站. 还是列兵的延陵荣祥搀着他，顺着一条小路走向营区旁的那片湖水.

盛夏，湛蓝的天空下，湖面泛着粼粼波光，岸边的藏羚羊悠然漫步，绝美的风景仿佛一幅油画. 然而，在老兵田春生的眼中，这风景有着不一样的意义.

“当年，我们一块一块把冰凿下来、背回去，化成日常用水……”田春生指着湖水说.

那时，机务站还没有水井. 每年 9 月，官兵就到旁边的湖里拉冰化水. 凌晨，是风最小的时候. 田春生和战友们穿上皮大衣，扛起铁锤、钢钎、背包绳，将巨大的冰块一锤一锤地分成小块. 每一锤砸下，都震得人虎口发麻，隐隐作痛.

在田春生的回忆中，最考验人的是背冰. 重达上百斤的冰块需要两个人合力背起，再咬着牙一步一步往回挪. 实在坚持不住，大家就背靠背原地站着休息一下.

把冰背回机务站，大家身上的皮大衣已经被冻成了冰铠甲. 把大衣放在火炉上烤干后，他们穿好再去背冰，如此循环往复.

听着那些陌生但并不遥远的往事，延陵荣祥的眼睛红红的，闪过一丝羞愧.

回到营区，机务站专门为老兵组织了归队仪式. 官兵在营门两侧台阶上列队欢迎.

台阶有些高，但年迈的田春生推开了延陵荣祥的手，坚持要自己上去. 老兵吃力地往上走，一步一步回到阔别几十年的老连队.

到达国旗台下，田春生向着门口“红山河”3 个字，敬了一个军礼. 此刻，硬冷的山风吹过，他那白了一多半的头发紧紧贴在头上，敬军礼的手臂定格成最标准的姿势，久久不舍得放下.

这一幕，深深震撼了延陵荣祥. 此刻，老兵那瘦小的身躯，在他眼中是那样高大.

田春生告诉延陵荣祥，这个军礼除了代表他自己，还代表老兵孙合合.

当年，孙合合曾在红山河连续守防 13 年，从来没有出现过高原反应. 他业务拔尖，吃苦耐劳，被战友称为“为昆仑山而生的兵”.

可是，二等功臣孙合合退役离开高原后，健康状况转差，50 岁刚过，心脏就装上了起搏器.

半个月前，田春生和孙合合约定，一起再上高原，再去看看老部队. 谁知，汽车刚翻过海拔 3150 米的阿卡孜达坂，孙合合的心脏就隐隐作痛. 翻越麻扎达坂时，孙合合脸色发白、嘴唇变紫、难以支撑. 无奈之下，他只能原路返回.

两人分别时，孙合合哭着对田春生说：“我多想在山上继续守下去！”

一代代高原通信兵，在当时极其恶劣的自然环境下，用青春和生命守护着边关通信线路. 想到这些，延陵荣祥的泪水夺眶而出.

回程前，田春生将一块高原石送给延陵荣祥：“它陪我在红山河度过了 12 年. 现在，我把它留给你，和你们一起继续守卫祖国的边关. ”

在老兵身上，延陵荣祥感受到了生命中最重要的东西. 如今，延陵荣祥已经成为一名中士. 担任军械员的同时，他还是兼职的水电工、司号员，是“机务站最离不开的人”.

沿着老兵的足迹，延陵荣祥一步步完成了自我重塑. 那晚，他在信纸上向老兵报告：“你们用青春和热血换来的荣誉，在我们这一代一定不会丢. ”

一个笔记本辉映生死抉择——

英雄不曾远去，只是化作路标，指引后人前行的方向

一级上士张金海写的信，并没有寄出去.

那天，张金海来到海拔 5347 米的界山达坂巡线. 雪山绵延，“昆仑第一杆”在风中岿然屹立. 杆下，有一座石头垒砌成的小小坟茔.

这里，是前辈娄志成牺牲的地方——那年，在此抢修线路的娄志成被突如其来的暴风雪吞没. 几天后，狂风拂去积雪，他的身体被冻成一座雪雕，21 岁的鲜活生命，永远定格在喀喇昆仑.

风声呜咽，张金海将信轻轻放在坟茔上，用一块石头压住. “我们从来没有忘记您，也不敢忘记……”他轻声说.

在这片雄鹰飞不过的“生命禁区”，英雄的先辈们用生命在雪野上碾出一条条印痕，转瞬又被风雪吹散.

几十年过去，谁还记得这名生命埋入雪山冻土的年轻战士？

除了娄志成的家人，还有机务站的巡线兵. 这些年，官兵每次巡线至此，或是有老兵回营，都会到这里缅怀他.

英雄不曾远去，只是化作路标，指引后人前行的方向. 张金海说：“每次来到这里，总能感受到守卫祖国边关‘大动脉’的使命和责任. ”

那年除夕夜，一场大雪突然袭来，张金海看着窗外瞬间被雪染白，心不自觉地揪了起来. 那晚，他迟迟不敢入睡. 果然，凌晨 1 点，机房传来告警：“昆仑第一杆”附近线路阻断.

张金海带队迅速前出. 深夜，雪花层层堆叠，没过了车轮胎. 抢修车喘着粗气，在雪地上艰难前进，后来干脆走不动，把他们撂在了半路上.

风雪夜行，意味着未知的风险. 抉择面前，张金海一咬牙，选择和战友继续徒步前进.

跳下车，大雪没过膝盖，猛烈的狂风差点将人掀倒. 顺着车灯往前看，能见度不足 5 米；抢修箱像巨石一般压在肩上，他们每走一步都留下深深的脚印.

一步一喘气，五步一停顿，沿着当年老兵走过的足迹，张金海带着战友在雪地里走了 3 个小时.

抵达故障点时，熔接机已经被冻成“冰疙瘩”，无法正常开机. 张金海解开自己的大衣，将熔接机焐热，开始作业；战友则用大衣围成一圈，为他挡住风雪. 接完断点，他们又起身继续寻找下一处故障……

“先辈如果还在，一定会做同样的选择. ”常年行走在雪山之上，张金海深知这片土地的危险与残酷. 每次面对生死抉择、艰难考验时，牺牲的前辈总在不经意间给他源源不断的力量.

张金海的工具箱里有一个泛黄的笔记本，里面标满了密密麻麻的记号：光缆是什么走向，什么地方容易发生阻断，地下接线头的位置在哪里……这条巡线路上的每根“毛细血管”都标记得清清楚楚.

这个笔记本，是娄志成烈士当年的遗物，由一代代老兵接力传到张金海手上保管.

如今，张金海已经在巡线路上走了 15 年. 这些年，他陆陆续续将机务站新立的线杆、新铺的线路补进笔记本中.

现在，张金海的身后有了许多更年轻的身影. 每到一处，他就打开笔记本，把需要注意的地方一一告诉新兵们.

那天，机务站组织拜师仪式，张金海将这个泛黄的笔记本交给列兵杜晓瑞. “红山河”的精神血脉，以这种特殊的方式一代代传承赓续.

雪后放晴，机务站组织例行巡线. 来到海拔 5380 米的红土达坂，杜晓瑞攀上线杆. 山风乍起，高悬空中的那个身影荡起了“秋千”. 只见他用结实的双臂紧紧拽住钢绞线，艰难向前滑行，将掉落的光缆重新挂好.

任务完成，杜晓瑞和战友们站在达坂上的标牌处合影. 那一刻，新一代通信兵挺拔的身影如山峦般屹立.

一张风景照定格时代之变——

每一种奋斗都弥足珍贵，每一份付出都值得铭记

5 月，是高原风景最好的时候. 那天，机务站组织了一场爬山比赛. 李连长气喘吁吁地爬上后山，从山顶俯瞰. 阳光下的红山河机务站与远处的雪山交相辉映、美不胜收.

李连长拿出相机将这一幕记录下来，将照片附在信中，向机务站第 4 任指导员刘书礼报告：“您看，现在的红山河多美……”

当已过花甲之年的刘书礼郑重拆开李连长的来信，尘封已久的记忆阀门顿时打开. 当年带领官兵建设机务站的场景，在老兵眼前一一浮现.

20 世纪 90 年代初，红山河机务站的生活工作条件仍很艰苦，宿舍要用炉子取暖. 为了防止官兵煤气中毒，刘书礼每天晚上都要逐个房间检查炉子是否封好，才会安心睡觉.

当时，机务站仅有一台旧油机支撑通信设备运转. 有一次，油机突然冒起一股黑烟，熄火了.

电源，是通信枢纽的“能源心脏”. 为了保证通信及时恢复，刘书礼带着官兵自己维修，最后从一台已经报废的机器上拆下部分零件，修好了油机.

看到红山河机务站如今有了现代化的机房，还有了国旗台、制氧站、恒温菜窖……刘书礼的眼眶湿润了.

这里如今的模样，曾是红山河机务站一代代官兵的梦想. 如今，这个梦想在官兵接力奋斗中一步步实现.

不久前，红山河机务站所在营的助理员张亮，给李连长打来电话，询问某装备运行情况是否正常.

作为红山河机务站的上一任连长，张亮对红山河尤为关注. 那年，他刚到红山河机务站任连长不久，就赶上某项演训保障任务. 检查机房时，他发现，某设备部件线路老化，不由得心头一紧.

按照以往经验，这类故障通常要更换备件. 然而，那段时间正赶上设备周转，没有备件可用.

山高路远，重新买备件，时间根本来不及. 怎么办？这个难题像巨石一般，压得张亮有些喘不过气.

“当年，前辈们在那么简陋的条件下，都能立足自身维修装备、保障信息畅通. 现在，我们还有什么不能克服的困难？”张亮下定决心，闯出一条路来. 他带领几名骨干铆在机房里，对着说明书研究如何更换配件. 后来，他们翻遍了库房，从一台废旧设备上找到一个替代配件.

连续奋战两天两夜之后，设备恢复正常. 走出机房，张亮抬起头，机务站墙上“缺氧不缺信仰，山高斗志更高”12 个红色大字鲜艳而明亮.

“艰苦是客观的条件，但积极的态度、顽强的意志，才是战胜一切困难挑战的根本因素. ”那一刻，张亮真正懂得了这 12 个红色大字背后蕴藏的精神力量.

在与恶劣自然环境的长期“交锋”中，红山河机务站的官兵将汗水和希望，源源不断地注入这片高原土地——

建设蔬菜大棚时，他们利用巡线的机会，从数百公里外运回肥沃的土壤，再托休假归队的战友带回蔬菜种子，像呵护孩子一般精心照料幼苗. 一次，大风“撕”破了大棚. 情急之下，他们用被子堵住风口，在寒风里坚持了 1 个多小时.

光伏电站施工期间，官兵每天咬牙背起上百斤重的太阳能电池板，弓着腰一步一步爬向营房的后山坡. 快要登顶时，身材瘦小的下士毕志刚突然眼前一黑，一头栽了下去，幸而被战友们及时救起……

前不久，红山河机务站被上级评为“运维尖兵”，耿指导员代表机务站将荣誉牌匾迎回. 在全连官兵见证下，一场“荣誉上墙”活动在红山河机务站郑重举行.

“每一种奋斗都弥足珍贵，每一份付出都值得铭记. ”耿指导员说，“时代变了、营区新了、使命担子也更重了. 过去的故事，是一茬茬官兵奋力书写的；美好的未来，将在我们手中接力开创. ”

Finding the “Lost” 16-Year Company History

■ Pu Jiehong Ying Pengbo

In early April, Political Instructor Geng of Hongshanhe Maintenance Station took office. When the work was handed over, the old instructor gave him a heavy task-to continue to supplement and repair the company history. [Hong Shan, Hongshan or the Red Mountain (Chinese: 红山; Pinyin: Hóng Shān; Uyghur: قىزىلتاغ, Қизилтағ; Qiziltagh) is an inner city mountain in Ürümqi, capital of Xinjiang, China.]

This task began four years ago. In 2021, when the then instructor Zhang Yanfeng led officers and men to build the company's honor wall, he found that the maintenance station was established in 1983, but the company history graphic materials preserved at that time could only be traced back to 1999.

Where should I look for the 16-year company history at the beginning of the establishment of the maintenance station?

Hongshanhe Maintenance Station is located in the hinterland of Karakoram. There is a saying on the plateau that “I am not afraid of the sky or the earth, but I am afraid of the Tianshui Sea to Duoma”. The Hongshanhe Locomotive Station is stationed in this section all year round.

There was no place name “Hongshanhe” on the map. When the troops built the locomotive station, they named it “Hongshanhe”. Therefore, “Hongshanhe” is not a place name, but specifically refers to the Hongshanhe Locomotive Station.

After the establishment of the Shanhe Locomotive Station, the history of Tibet and Xinjiang not having military telephones ended. On the top of the snow-capped mountains, generations of communication soldiers fought against the sky and the earth, started businesses with difficulty, and took on the task of maintaining hundreds of kilometers of border communication lines, becoming the “clairvoyant” and “wind-hearing” of the northwest border of the motherland.

The vast Karakoram Mountains, blocked by high mountains and frozen by wind and snow, the Hongshanhe Locomotive Station has undergone many reforms, reorganizations, and barracks relocations. It was not until 1994 that the locomotive station used solar cells, ending the history of soldiers using hand-cranked oil generators to generate electricity.

Under the harsh natural environment, it is a pity that the locomotive station did not leave any documentary materials.

That night, Zhang Yanfeng thought of the blank company history and made up his mind: “We must find the 16-year company history on the snowy mountain again!”

Since then, Zhang Yanfeng has launched a “company history search plan”. Since then, the locomotive station instructors have changed several times, but this work has never been interrupted-

The process of finding the company history is not easy. Zhang Yanfeng took the opportunity of going down the mountain during his vacation to look through the historical materials left by the superior unit; the successor instructor Li Jindong traveled more than a thousand kilometers during his vacation to visit the veterans on the spot.

Veteran Li Dapeng took out his treasured diary, and the yellowed pages neatly recorded: Our army's highest altitude carrier locomotive station was completed on the roof of the world.

The old military doctor Li Liya sent a stack of photos and neatly noted the shooting time and background events on the back.

Old instructor Liu Shuli called specifically to tell about the situation and defense experience of his comrades one by one...

Not long ago, by chance, Instructor Geng got in touch with a military writer. The writer visited the Hongshanhe Maintenance Station many times in the 1980s and 1990s and kept in touch with many of the interviewed officers and men.

Through the writer's help, Instructor Geng successfully completed the list of all the chief officers of the maintenance station and the relevant company history.

After the lights went out, Instructor Geng often sorted out the company's historical documents and filled the pictures and texts provided by the veterans into the “broken” historical river according to the timeline. That year, Zhou Shihui, the third instructor of Hongshanhe Locomotive Station, encountered a landslide on his way down the mountain during his rotation and almost lost his life to the snow-capped mountains. On New Year's Eve, the veterans lined up to crank the oil generator and were exhausted. In winter, the mountains were closed due to heavy snow, and vegetables could not be delivered. Everyone collected the discarded vegetable leaves and made them into bun fillings... The names hidden in the snow-capped mountains and the ordinary stories, like the snow water melted from the plateau glaciers, flowed back into the “Hongshan River” along the riverbed of time. Recently, Instructor Geng played a short video for the new recruits who had just joined the company. When the passionate years of the predecessors fighting the wind and snow and traveling through the polar regions reappeared on the screen, the young eyes in the audience were moist and firm. At that moment, the group of communication soldiers who stayed at the Hongshanhe Maintenance Station found the meaning of their pursuit: remember the original intention when they came, remember the glory they once had, and they will not lose their way no matter how far they go, and they will be full of strength wherever they go.

Special Report

“Letter from the Snow Mountain”: Plateau Communication Soldiers Write to Their Seniors

■Shao Huafeng, Pu Jiehong, Yang Shengyan

The officers and men of the Hongshanhe Maintenance Station reviewed their oath of joining the party. Photo by Li Rongrong

In the summer, the ice and snow of the Karakoram Mountains gradually melted, and the green of the plateau came late.

On a warm afternoon, Li Lianchang of the Hongshanhe Maintenance Station stopped and stared at the honor wall of the company, and suddenly an idea popped up in his mind: “Write a letter to the veterans.”

In today's rapid development of information network technology, Hongshanhe has been connected to the 5G network. But after thinking about it, Li Lianchang decided to express his respect to the veterans in this solemn way.

At the evening roll call, Li Lianchang put forward this idea, and the officers and men unanimously agreed. When the lights went out, everyone carefully took out the list of officers and men and copied down the addresses one by one. That night, the lights in the study room of the locomotive station were on until late at night.

Soon after, Sergeant Yanling Rongxiang went down the mountain for vacation and took on the task of mailing letters.

One letter after another from the snow-capped mountains crossed the snow-capped plateau and the mountains, connecting the people at both ends of the letter.

A piece of plateau stone witnessed the regretless youth-

The honor you exchanged for your youth and blood will never be lost in our generation

When mailing the letter, Yanling Rongxiang specially marked the letter with “urgent”.

Yanling Rongxiang's dream since childhood was to become a special soldier who made achievements on the battlefield. However, he never thought that he would go to Karakoram and guard the communication line every day. Faced with the gap between ideals and reality, his sharpness and patience gradually wore away.

On the Army Day of August 1 that year, veteran Tian Chunsheng traveled thousands of kilometers and returned to the Hongshanhe Locomotive Station. Yanling Rongxiang, who was still a private soldier, supported him and walked along a path to the lake next to the camp.

In midsummer, under the blue sky, the lake was shimmering, and the Tibetan antelopes on the shore were strolling leisurely. The beautiful scenery was like an oil painting. However, in the eyes of veteran Tian Chunsheng, this scenery has a different meaning.

“Back then, we chiseled the ice piece by piece, carried it back, and melted it into daily water...” Tian Chunsheng said, pointing to the lake.

At that time, there was no well in the maintenance station. Every September, officers and men went to the lake next to them to pull ice and melt it into water. In the early morning, it was the time when the wind was the smallest. Tian Chunsheng and his comrades put on leather coats, carried hammers, steel chisels, and backpack ropes, and hammered the huge ice into small pieces one by one. Every hammer hit, it made people's palms numb and dull.

In Tian Chunsheng's memory, the most challenging thing was to carry ice. It takes two people to carry the ice weighing hundreds of pounds, and then grit their teeth and move back step by step. If they can't hold on any longer, they stand back to back and take a rest.

When they carry the ice back to the maintenance station, their leather coats have been frozen into ice armor. After drying the coats on the stove, they put them on and carry the ice again, and so on.

Listening to those unfamiliar but not distant past events, Yanling Rongxiang's eyes were red, and a trace of shame flashed across his face.

Back in the camp, the maintenance station organized a return ceremony for the veterans. Officers and men lined up on the steps on both sides of the camp gate to welcome them.

The steps were a bit high, but the elderly Tian Chunsheng pushed Yanling Rongxiang's hand away and insisted on going up by himself. The veteran walked up with difficulty, step by step back to the old company he had been away from for decades.

Arriving at the flag stand, Tian Chunsheng saluted the three words “Hongshanhe” at the door. At this moment, the cold mountain wind blew, and his hair, which was more than half white, was tightly attached to his head. His arm was fixed in the most standard posture for saluting, and he was reluctant to let it go for a long time.

This scene deeply shocked Yanling Rongxiang. At this moment, the thin body of the veteran seemed so tall in his eyes.

Tian Chunsheng told Yanling Rongxiang that this salute not only represented himself, but also represented the veteran Sun Hehe.

In those days, Sun Hehe had been defending Hongshan River for 13 consecutive years and never had altitude sickness. He was outstanding in business, hardworking, and was called “a soldier born for Kunlun Mountain” by his comrades.

However, after Sun Hehe, a second-class hero, retired and left the plateau, his health deteriorated. Just after he turned 50, he had a pacemaker installed in his heart.

Half a month ago, Tian Chunsheng and Sun Hehe agreed to go to the plateau together and visit the old unit again. Unexpectedly, as soon as the car passed the Akazi Pass at an altitude of 3,150 meters, Sun Hehe's heart ached. When crossing Mazada Pass, Sun Hehe's face turned pale, his lips turned purple, and he could hardly support himself. In desperation, he could only return the same way.

When the two parted, Sun Hehe cried and said to Tian Chunsheng: “I want to continue guarding on the mountain!”

Generations of plateau communication soldiers used their youth and lives to guard the border communication lines in the extremely harsh natural environment at that time. Thinking of this, Yanling Rongxiang burst into tears.

Before returning, Tian Chunsheng gave a plateau stone to Yanling Rongxiang: “It accompanied me in Hongshan River for 12 years. Now, I leave it to you, and continue to guard the border of the motherland with you.”

In the veteran, Yanling Rongxiang felt the most important thing in life. Today, Yanling Rongxiang has become a sergeant. While serving as an ordnance officer, he is also a part-time plumber and operator, and is “the most indispensable person in the locomotive station.”

Following the footsteps of the veteran, Yanling Rongxiang completed his self-reinvention step by step. That night, he reported to the veterans on a piece of letter paper: “The honor you have earned with your youth and blood will never be lost in our generation.”

A notebook reflects the choice of life and death-

Heroes have never gone away, but have become road signs to guide the direction of future generations

The letter written by First Sergeant Zhang Jinhai was not sent out.

That day, Zhang Jinhai came to Jieshan Daban, 5,347 meters above sea level, to patrol the line. The snow-capped mountains stretched out, and the “First Pole of Kunlun” stood tall in the wind. Under the pole, there was a small tomb made of stones.

This is where the predecessor Lou Zhicheng died-that year, Lou Zhicheng, who was repairing the line here, was swallowed up by a sudden blizzard. A few days later, the strong wind blew away the snow, and his body was frozen into a snow sculpture. The 21-year-old fresh life was forever frozen in the Karakoram Mountains.

The wind was sobbing, and Zhang Jinhai gently placed the letter on the tomb and pressed it with a stone. “We have never forgotten you, and we dare not forget...” he said softly.

In this “life restricted zone” where eagles cannot fly, the heroic ancestors used their lives to crush traces on the snowy field, which were blown away by the wind and snow in an instant.

Decades later, who still remembers this young soldier whose life was buried in the frozen soil of the snowy mountains?

In addition to Lou Zhicheng's family, there are also patrol soldiers from the maintenance station. Over the years, every time the officers and men patrol the line here, or when veterans return to the camp, they will come here to commemorate him.

The hero has never gone far away, but has become a signpost to guide the direction of future generations. Zhang Jinhai said: “Every time I come here, I can always feel the mission and responsibility of guarding the 'main artery' of the motherland's border.”

On New Year's Eve that year, a heavy snow suddenly hit. Zhang Jinhai looked at the window and was instantly dyed white by the snow, and his heart unconsciously tightened. That night, he dared not fall asleep for a long time. Sure enough, at 1 a.m., an alarm came from the machine room: the line near the “Kunlun First Pole” was blocked.

Zhang Jinhai led the team to move forward quickly. Late at night, the snowflakes piled up layer by layer and covered the tires. The repair vehicle was panting and moving forward with difficulty on the snow. Later, it simply couldn't move and left them halfway.

Traveling at night in the wind and snow means unknown risks. Faced with the choice, Zhang Jinhai gritted his teeth and chose to continue walking with his comrades.

Jumping out of the car, the snow was over his knees and the fierce wind almost knocked him down. Looking forward along the headlights, the visibility was less than 5 meters; the repair box was like a boulder pressing on their shoulders, and they left deep footprints with every step.

Panting for every step, pausing every five steps, Zhang Jinhai led his comrades in the snow for 3 hours, following the footsteps of the veterans.

When they arrived at the fault point, the welding machine had been frozen into an “ice lump” and could not be started normally. Zhang Jinhai unbuttoned his coat, warmed up the welding machine, and started working; his comrades used their coats to surround him to block the wind and snow. After connecting the breakpoints, they stood up and continued to look for the next fault...

“If the ancestors were still here, they would definitely make the same choice.” Zhang Jinhai has been walking on the snow-capped mountains for many years, and he knows the danger and cruelty of this land. Every time he faces a life-and-death decision or a difficult test, the sacrificed ancestors always inadvertently give him endless strength.

There is a yellowed notebook in Zhang Jinhai's toolbox, which is filled with dense marks: the direction of the optical cable, where it is easy to be blocked, where the underground wiring head is located... Every “capillary” on this patrol line is clearly marked.

This notebook is a relic of the martyr Lou Zhicheng, and it has been passed down from generation to generation by veterans to Zhang Jinhai for safekeeping.

Today, Zhang Jinhai has been patrolling the line for 15 years. Over the years, he has gradually added the newly erected poles and newly laid lines of the locomotive station into his notebook.

Now, there are many younger figures behind Zhang Jinhai. Every time he arrives at a place, he opens his notebook and tells the new recruits what needs to be paid attention to.

That day, the locomotive station organized a ceremony to pay respect to the master, and Zhang Jinhai handed the yellowed notebook to Private Du Xiaorui. The spiritual blood of “Hongshanhe” is passed down from generation to generation in this special way.

After the snow, the sky cleared up, and the locomotive station organized a routine line inspection. Du Xiaorui climbed the pole at the Hongtu Pass at an altitude of 5,380 meters. The mountain wind suddenly blew, and the figure hanging high in the air swung on a “swing”. He was seen holding the steel strand tightly with his strong arms, sliding forward with difficulty, and rehanging the fallen optical cable.

After the mission was completed, Du Xiaorui and his comrades took a group photo at the sign on the pass. At that moment, the tall figures of the new generation of communication soldiers stood like mountains.

A landscape photo freezes the changes of the times---Every struggle is precious, and every contribution is worth remembering

May is the best time for plateau scenery. That day, the locomotive station organized a mountain climbing competition. Captain Li climbed up the back mountain breathlessly and looked down from the top of the mountain. The Hongshanhe locomotive station under the sun and the snow-capped mountains in the distance complement each other and are extremely beautiful.

Lieutenant Li took out his camera to record this scene, attached the photo to the letter, and reported to Liu Shuli, the fourth instructor of the locomotive station: “Look, how beautiful Hongshanhe is now...”

When Liu Shuli, who was over 60 years old, solemnly opened Li's letter, the valve of the long-forgotten memory suddenly opened. The scenes of leading officers and men to build the locomotive station in those days emerged one by one in front of the old soldier.

In the early 1990s, the living and working conditions of the Hongshanhe locomotive station were still very difficult, and the dormitory had to be heated by a stove. In order to prevent officers and men from gas poisoning, Liu Shuli had to check whether the stove was sealed in each room every night before he could sleep peacefully.

At that time, the locomotive station had only one old oil engine to support the operation of communication equipment. Once, the oil engine suddenly emitted a puff of black smoke and went out.

The power supply is the “energy heart” of the communication hub. In order to ensure that the communication was restored in time, Liu Shuli led the officers and men to repair it themselves, and finally removed some parts from a scrapped machine and repaired the oil engine.

Seeing that the Hongshanhe Locomotive Station now has a modern machine room, a flag stand, an oxygen production station, and a constant temperature vegetable cellar... Liu Shuli's eyes were moist.

The current appearance of this place was once the dream of generations of officers and men at the Hongshanhe Locomotive Station. Now, this dream is being realized step by step in the relay struggle of officers and men.

Not long ago, Zhang Liang, an assistant of the battalion where the Hongshanhe Locomotive Station is located, called Captain Li to ask whether a certain equipment was operating normally.

As the previous company commander of the Hongshanhe Locomotive Station, Zhang Liang paid special attention to Hongshanhe. That year, he had just arrived at the Hongshanhe Locomotive Station as a company commander.

陆军某旅落实新条令表彰奖励相关规定:有功即奖 奖在当时

来源：解放军报 作者：刘思宇 池俊成 责任编辑：尚晓敏 2025-06-12

陆军某旅严格落实新条令表彰奖励相关规定——

有功即奖 奖在当时

■刘思宇 解放军报特约记者 池俊成

荣誉是军人的第二生命, 我军历来有以功勋荣誉激发官兵战斗精神的优良传统，崇尚荣誉、珍视荣誉、追求荣誉早已融入广大官兵的血脉, 新修订的《中国人民解放军纪律条令》充分发挥荣誉激励作用，坚持奖当其人、奖当其绩、奖当其时，大力营造崇尚荣誉、创先争优浓厚氛围，感召激励官兵战位立功、岗位建功，为实现中国梦强军梦作出更大贡献,

关于功勋荣誉表彰的实施，新修订的《中国人民解放军纪律条令》第六十九条新增规定：“平时奖励通常结合半年或者年终工作总结实施，也可以根据工作任务完成情况及时实施, ”

该旅立功官兵分享喜悦, 刘志勇摄

镜 头

“经旅党委研究决定，给予以下 9 名同志记个人三等功, ”初夏时节，记者走进陆军某旅采访，正赶上该旅举行一场表彰大会, 热烈的掌声中，受到表彰的官兵身披绶带、胸戴红花，昂首挺胸登上领奖台,

该旅某营中士彭文前不久在上级组织的比武竞赛中表现突出，荣立战备训练三等功, 登上领奖台那一刻，他难掩内心激动, 彭文告诉记者，这么快就受到表彰，让他和其他获奖官兵都有些出乎意料,

去年，彭文代表连队参加上级组织的比武竞赛，凭借过硬实力一举夺冠，连队干部表示年底为他申请表彰奖励, 此后，因连队接连承担多项重大任务，加之干部骨干岗位调整，年底评功评奖时，此事无人提起，后来便不了了之,

彭文的经历，在官兵中并不鲜见, 该旅领导告诉记者，以往，表彰奖励主要集中在年底展开，一些在平时大项任务中取得突出成绩的官兵，往往要等到年底才有机会登上领奖台，有的甚至因为时过境迁而与表彰奖励擦肩而过,

新修订的《中国人民解放军纪律条令》新增规定，对表彰奖励的时机进行了明确：“平时奖励通常结合半年或者年终工作总结实施，也可以根据工作任务完成情况及时实施,”这意味着，无论是平时、战时，还是在非战争军事行动中，官兵取得突出成绩时，单位可等半年或年终工作总结时开展表彰奖励，也可在任务过程中结合实际情况灵活实施，有效解决表彰奖励“慢半拍”导致激励作用弱化的问题, 借着新条令施行的东风，彭文也打消了“平时不争、年底突击”的消极想法，在日常比武考核中奋勇拼搏，最终如愿登上领奖台,

“表彰奖励‘跟得紧’，不仅有利于增强官兵荣誉感、获得感，还能有效激发创先争优、精武强能的热情动力,”该旅政治工作部领导介绍，他们以学习贯彻新修订的共同条令为契机，打破在年终工作总结、士兵补选退等时机开展表彰奖励的惯例，实行“有功即奖、奖在当时”，探索建立“全程动态考评、即时表彰激励”机制，鼓励基层单位定期结合行政例会、按纲抓建形势分析会，按程序研究表彰奖励事项，将官兵在日常战备训练、比武考核、重大任务中的表现等作为评功评奖的重要依据，确保表彰奖励与练兵备战同频共振,

在此基础上，他们还利用强军网、营区灯箱、宣传橱窗等平台，大力宣扬官兵先进事迹，广泛组织“强军先锋”“精武标兵”等群众性评选活动，营造“争在平时、奖在当时”浓厚氛围,

采访中，记者在该旅某营宣传橱窗前看到，中士李杨上个月在营里组织的武装五公里越野考核中摘得桂冠，受到嘉奖, 在本月举办的旅军体运动会上，他打破 3000 米跑项目纪录，再次受到嘉奖, 与他一样同一季度两次受到嘉奖的，还有 4 名官兵, 谈及荣誉的取得，他们纷纷表示：有功即奖，奖在当时，创先争优的劲头更足了,

在功勋荣誉的激励下，该旅营区处处可见比学赶超的火热场景：训练场上，攻关小组针对重难点课目展开专攻精练；学习室内，官兵自发学习专业理论……随着表彰奖励机制日益完善，“争在平时、创在平时”在该旅蔚然成风,

点 睛

激发每名官兵的荣誉心

■何红姣

崇尚荣誉就是崇尚胜利, 一位军事家曾说：“荣誉心是人的最高尚的情感之一，是战争中使军队获得灵魂的生命力,”

荣誉是军人的第二生命，体现的是忠诚的印记、奉献的褒奖、价值的导向, 沙场百战行功赏，三军浴血慨而慷, 事实证明，军人的血管里流淌着崇尚荣誉的血液，就会为忠于职责而顽强战斗；官兵心田里播下追求荣誉的种子，就会为履行使命而奋斗奉献,

新时代新征程上，如何激发每名官兵的荣誉心？靠教育引导，也靠精神激励；靠使命指引，也靠条令规范,

“坚持党的领导，严格政治标准”“坚持服务中心，聚焦备战打仗”“坚持按绩施奖，树立正确导向”……新修订的《中国人民解放军纪律条令》，在严肃“十大纪律”的同时，专设“功勋荣誉表彰”一章, 这一规定，遵循军队功勋荣誉表彰制度总体设计，区分战时、平时和执行重大非战争军事行动任务，进一步明确项目设置、标准条件、审批权限、组织实施、附加待遇等，坚持高功重奖、战功厚待，其鲜明指向就是突出军功价值、彰显尊崇礼遇，让军人荣誉在新时代熠熠生辉,

激发荣誉心，奋进强军路, 我们应认真学习新条令关于荣誉表彰的各项规定，融入战备教育、演习演练、野外驻训、重大任务、总结考评等搞好宣讲阐释和思想发动，引导激励广大官兵全心备战、精心谋战、专心练战，汇聚起推进强军事业的磅礴力量,

绘图：唐建平

亲 历

这枚三等功奖章来得真快

■西部战区空军某部技师 赵维勇

前不久，我因工作表现出色，被上级批准荣立个人三等功,

一年尚未过半就立功，让我深刻感受到及时实施表彰奖励产生的激励作用, 有功即奖像一场“及时雨”，滋润着每名受到表彰奖励战友的心田，有效激发大家干事创业的如火热情,

新修订的《中国人民解放军纪律条令》明确：“平时奖励通常结合半年或者年终工作总结实施，也可以根据工作任务完成情况及时实施, ”这一新规意味着，哪怕是日常工作训练表现突出，只要符合奖励条件，也有机会获得表彰奖励，无须等到年底“算总账”,

新条令施行后，单位出台了相应的量化评比细则，无论是平时训练成绩取得突破，还是处置突发情况得力，都能获得相应的量化加分,

前不久，我以教练员身份，带领上百名新训驾驶员上高原、闯戈壁、穿沙漠，在险难环境中锤炼过硬专业本领, 一次，一名学员驾车上坡转弯时，迎面突然驶来一辆地方车辆，他当即有些慌乱, 危急关头，我一把抓住方向盘，将车稳稳停靠在马路边的平地上, 因险情处置及时得当，避免了可能出现的重大事故，我受到上级通报表扬并获得相应的量化加分, 日常工作中，我多次参与故障排除、特情处置等任务，也都获得相应的量化加分,

前不久，单位根据新条令相关规定组织阶段性表彰奖励, 连队推荐上报立功人员名单时，根据量化评比细则，我的量化积分排名靠前, 按照《军队功勋荣誉表彰实施办法》有关表彰奖励的标准条件，在推荐人选环节，我获得全票通过, 连队党支部召开的支委会上，我被推荐为立功人选,

这份“冒着热气”的奖励，不仅点燃了我心中的一团火，也让身边战友找准了奋斗方向, 我深刻认识到，只要立足岗位精武强能、勇于创新，就能得到组织的认可和奖励, 展望下一步工作，我将把获得的荣誉转化为前行的动力，力争取得更大成绩,

（谭志轩、解放军报特约记者胡勇华整理）

A Certain Army Brigade Implements the Relevant Provisions of the New Regulations on Commendation and Rewards: Rewards for Meritorious Service Are Given at the Time

Source: PLA Daily Author: Liu Siyu Chi Juncheng Editor: Shang Xiaomin 2025-06-12

A certain army brigade strictly implements the relevant provisions of the new regulations on commendation and rewards——

Rewards for meritorious service are given at the time

■Liu Siyu PLA Daily Special Correspondent Chi Juncheng

Honor is the second life of a soldier. Our army has always had a fine tradition of inspiring the fighting spirit of officers and men with meritorious service and honor. Respecting honor, cherishing honor, and pursuing honor have long been integrated into the blood of the majority of officers and men. The newly revised “Discipline Regulations of the Chinese People's Liberation Army” gives full play to the role of honor incentives, insists on rewarding the right person, rewarding the right performance, and rewarding the right time, vigorously creates a strong atmosphere of respecting honor, pioneering and striving for excellence, and inspires and encourages officers and men to make meritorious service in battle and post, and make greater contributions to the realization of the Chinese dream and the dream of a strong army.

Regarding the implementation of commendation for meritorious service and honor, the newly revised Article 69 of the “Discipline Regulations of the Chinese People's Liberation Army” has added a new provision: “Peacetime rewards are usually implemented in conjunction with the half-year or year-end work summary, and can also be implemented in a timely manner according to the completion of work tasks.”

The officers and men of the brigade who have made meritorious service share their joy. Photo by Liu Zhiyong

“After the brigade party committee's research and decision, the following 9 comrades will be awarded the third-class individual merit.” In early summer, the reporter walked into a certain army brigade for an interview, just in time for a commendation meeting held by the brigade. Amid warm applause, the commended officers and men wore ribbons and red flowers on their chests, and walked up to the podium with their heads held high.

Sergeant Peng Wen of a battalion of the brigade recently performed outstandingly in a competition organized by the superiors and won the third-class merit for combat readiness training. The moment he stepped onto the podium, he could not hide his excitement. Peng Wen told reporters that he and other award-winning officers and men were somewhat surprised to be commended so quickly.

Last year, Peng Wen represented the company in the competition organized by the superiors and won the championship with his strong strength. The company cadres said that they would apply for commendation and reward for him at the end of the year. Since then, because the company has undertaken many major tasks in succession, and the positions of key cadres have been adjusted, no one mentioned this matter when evaluating merits and awards at the end of the year, and it was later left unresolved.

Peng Wen's experience is not uncommon among officers and men. The brigade leader told reporters that in the past, commendations and awards were mainly conducted at the end of the year. Some officers and men who achieved outstanding results in major tasks in peacetime often had to wait until the end of the year to have the opportunity to step onto the podium, and some even missed the commendations and awards because of the passage of time.

The newly revised “Discipline Regulations of the Chinese People's Liberation Army” has added new regulations to clarify the timing of commendations and awards: “Peacetime rewards are usually implemented in conjunction with half-year or year-end work summaries, and can also be implemented in a timely manner according to the completion of work tasks.” This means that whether in peacetime, wartime, or non-war military operations, when officers and men have achieved outstanding results, the unit can wait for half a year or year-end work summaries to conduct commendations and awards, or it can be flexibly implemented in the process of the task in combination with actual conditions, effectively solving the problem of weakened incentives caused by “slow half a beat” in commendations and awards. With the help of the new regulations, Peng Wen also dispelled the negative idea of ”not competing in peacetime and sprinting at the end of the year”, fought bravely in daily competitions and assessments, and finally stepped onto the podium as he wished.

“Following closely the commendation and reward will not only help enhance the officers and men' sense of honor and gain, but also effectively stimulate the enthusiasm and motivation to be the first to strive for excellence and strengthen their military skills.” The leader of the political work department of the brigade introduced that they took the opportunity of learning and implementing the newly revised common regulations to break the convention of commending and rewarding at

the annual work summary, soldiers' replacement and retirement, etc., and implemented “rewards for merit and rewards at the time”, explored the establishment of a “full-process dynamic assessment, immediate commendation and incentive” mechanism, encouraged grassroots units to regularly combine administrative regular meetings and situation analysis meetings according to the outline, and study commendation and reward matters according to procedures, and take the officers and men' performance in daily combat readiness training, competitions and assessments, and major tasks as important bases for commendation and reward, to ensure that commendation and reward resonate with training and preparation.

On this basis, they also use the strong army network, camp light boxes, publicity windows and other platforms to vigorously publicize the advanced deeds of officers and men, widely organize mass selection activities such as “strong army pioneer” and “excellent martial arts model”, and create a strong atmosphere of “competition in peacetime and reward at the time”.

During the interview, the reporter saw in front of the publicity window of a battalion of the brigade that Sergeant Li Yang won the championship in the armed five-kilometer cross-country assessment organized by the battalion last month and was commended. At the brigade military sports meeting held this month, he broke the record of the 3,000-meter run and was commended again. Like him, there are 4 officers and men who were commended twice in the same quarter. Talking about the honors, they all said: meritorious service is rewarded, and the reward is at the time, which makes them more motivated to be the first and the best.

Inspired by the honors and achievements, the brigade's camp is full of hot scenes of learning and catching up: on the training ground, the research team focuses on the key and difficult subjects; in the study room, officers and men spontaneously learn professional theories... With the improvement of the commendation and reward mechanism, “striving in peacetime and creating in peacetime” has become a trend in the brigade.

Highlights

Inspire the honor of every officer and soldier

■ He Hongjiao

Admiring honor is admiring victory. A military strategist once said: “Honor is one of the noblest emotions of human beings, and it is the vitality that gives the army its soul in war.”

Honor is the second life of a soldier, reflecting the mark of loyalty, the praise of dedication, and the orientation of value. The three armies are generous and generous in the blood of the battlefield. Facts have proved that the blood of advocating honor flows in the veins of soldiers, and they will fight tenaciously for loyalty to their duties; the seeds of pursuing honor are sown in the hearts of officers and men, and they will fight and contribute to fulfilling their missions.

In the new era and new journey, how to inspire the honor of every officer and soldier? Rely on education and guidance, and also on spiritual motivation; rely on mission guidance, and also rely on regulations and norms.

“Adhere to the leadership of the Party, strictly follow political standards”, “Adhere to the service center, focus on preparing for war”, “Adhere to rewards based on performance, and establish the correct orientation”... The newly revised “Discipline Regulations of the Chinese People's Liberation Army” has set up a chapter on “Meritorious Honors and Commendations” while strictly enforcing the “Ten Disciplines”. This regulation follows the overall design of the military meritorious honors and commendations system, distinguishes between wartime, peacetime and the execution of major non-war military operations, further clarifies project settings, standard conditions, approval authority, organization and implementation, additional treatment, etc., adheres to high merits and heavy rewards, and generous treatment for combat merits. Its clear direction is to highlight the value of military merits, demonstrate respect and courtesy, and let the honor of soldiers shine in the new era.

Inspire the heart of honor and forge ahead on the road to strengthening the army. We should carefully study the various provisions of the new regulations on honorary commendations, integrate them into combat readiness education, exercises, field training, major tasks, summary and evaluation, and do a good job in propaganda, interpretation and ideological mobilization, guide and encourage the officers and men to prepare for war wholeheartedly, plan war carefully, and concentrate on training war, and gather a great force to promote the cause of strengthening the army.

Personal experience

This third-class merit medal came really fast

■ Zhao Weiyong, a technician of a certain unit of the Western Theater Air Force

Not long ago, I was approved by my superiors to be awarded the third-class individual merit for my outstanding work performance.

I have made meritorious service before half of the year has passed, which makes me deeply feel the incentive effect of timely implementation of commendation and reward. The reward for meritorious service is like a “timely rain”, nourishing the hearts of every comrade who has been commended and rewarded, and effectively stimulating everyone's fiery passion for doing things and starting businesses.

The newly revised “Discipline Regulations of the Chinese People's Liberation Army” clearly states: “Peacetime rewards are usually implemented in conjunction with the half-year or year-end work summary, and can also be implemented in a timely manner according to the completion of work tasks.” This new regulation means that even if the daily work training performance is outstanding,

as long as the reward conditions are met, there is a chance to receive commendation and rewards, without having to wait until the end of the year to "settle the accounts."

After the implementation of the new regulations, the unit issued corresponding quantitative evaluation rules. Whether it is a breakthrough in peacetime training results or effective handling of emergencies, corresponding quantitative bonus points can be obtained.

Not long ago, as a coach, I led hundreds of new drivers to the plateau, the Gobi Desert, and the desert to hone their professional skills in dangerous environments. Once, when a trainee was driving uphill and turning, a local vehicle suddenly drove towards him, and he was a little panicked. At the critical moment, I grabbed the steering wheel and parked the car steadily on the flat ground beside the road. Because of the timely and proper handling of the dangerous situation, I avoided possible major accidents. I was praised by my superiors and received corresponding quantitative bonus points. In my daily work, I have participated in troubleshooting, special situation handling and other tasks many times, and I have also received corresponding quantitative bonus points.

Not long ago, the unit organized phased commendations and rewards according to the relevant provisions of the new regulations. When the company recommended and reported the list of meritorious personnel, according to the quantitative evaluation rules, my quantitative points ranked high. According to the standard conditions for commendation and rewards in the "Implementation Measures for Military Merit and Honor Commendation", I was unanimously approved in the recommendation of candidates. At the branch committee meeting held by the company's party branch, I was recommended as a meritorious candidate.

This "steaming" award not only ignited a fire in my heart, but also allowed my comrades around me to find the right direction for struggle. I deeply realized that as long as I am based on my post, I will be recognized and rewarded by the organization. Looking forward to the next step of work, I will transform the honors I have received into a driving force for moving forward and strive to achieve greater results.

(Compiled by Tan Zhixuan and Hu Yonghua, a special correspondent of the People's Liberation Army Daily)

陆军某旅帮建基层："云端恳谈会"聚焦"三张清单"

来源：解放军报 作者：刘鎔宇 童祖静 责任编辑：孙智英 2025-06-13

陆军某旅帮建基层重视找准帮困解难方向——

"云端恳谈会"聚焦"三张清单"

■刘鎔宇 解放军报特约记者 童祖静

“针对部分新装备技术人才紧缺问题，我们积极探索订单式人才培养新路……”日前，陆军某旅依托视频会议系统组织一场“云端恳谈会”，一些官兵关心关注的问题在集思广益中拿出了解决方案. 这是该旅以“云端恳谈会”为抓手，提升帮建基层质效的一个缩影.

“我们狠抓问题清单、解难清单、责任清单’三张清单’落实工作，切实解决官兵的急难愁盼和制约基层建设的瓶颈问题. ”该旅领导介绍，他们结合前期机关蹲连住班、一线调研和各单位上报情况，梳理形成问题清单，为解难帮困找准方向. 翻看这份问题清单，记者发现，内容不仅涵盖战备训练、装备保障、日常管理等工作，还涉及官兵权益保障等事关切身利益的“细枝末节”，为机关下一步开展工作明晰了目标.

该旅根据前期梳理出的问题清单，区分个性问题、共性问题和难点问题，分层分类制订解难清单，确保对症施策、精准解难. 他们坚持“个性问题具体解决、共性问题集中会诊、难点问题聚力攻关”原则，针对个性问题，由机关给出指导建议，营连立足自身出台措施办法；针对共性问题，由机关统筹协调相关部门，制订具体计划，逐个单位帮带解决；针对难点问题，由机关牵头协调上级联动办公，采取定期研商、集中攻关等方式，确保得到有效解决.

记者在恳谈会现场看到，多名机关科室负责人轮流登台，围绕问题清单中的具体问题，为官兵代表答疑解惑. 针对气象水文、测绘导航等专业教材教范和骨干人才少、组训难等问题，旅作训科负责人现场答复，将协调集团军统筹资源，采取“自训、统训、代训、融训”的方式，对相关专业人员进行系统培训，编订并下发教材教范；协调生产厂家技术人员和院校专家，来队开展技术指导，多措并举抓好专业人才培养.

“只有让问题见底清零，才能进一步提振官兵干事创业精神状态. ”该旅领导介绍，他们按照机关科室权责，区分旅、营、连分级制订责任清单，将整改任务分解落实到人，明确解决措施和完成时限，形成“查摆—整改—提升”闭合回路，健全上下衔接、横向协调、便于落实的责任体系，以钉钉子精神抓好整改举措落地落实.

“一些受损的装备器材，立足自身维修困难，能否报上级后集中维修或申领换新？”记者走进该旅装备维修科看到，责任清单张贴在办公室醒目位置. 针对官兵提出的装备器材维修、更换等问题，科室人员第一时间与各营连沟通，梳理出基层立足自身难以解决的问题，及时协调厂家进行返厂维修，并在责任清单上清晰标注各流程环节的责任人、联系电话和完成时限. 同时，他们将部分使用频繁、损耗较大的装备器材列入年度申领计划，指定具体负责人，按规定及时上报申领.

办实事暖兵心，解难题添动力. “‘三张清单’成为机关为基层解难帮困的’金钥匙’，截至目前，清单上大部分问题得到妥善解决，未及时解决的问题也标注了解决进度和完成时限. ”该旅领导介绍，他们将在跟踪问效中持续优化解难方案，进一步提升服务基层质效，激发官兵干事创业热情动力.

A Certain Army Brigade Helps Build the Grassroots: “Cloud Talks” Focus on “Three Lists”

Source: PLA Daily Author: Liu Rongyu Tong Zujing Editor: Sun Zhiying 2025-06-13

A certain army brigade helps build the grassroots and pays attention to finding the right direction to help solve problems——

“Cloud Talks” focus on “three lists”

■Liu Rongyu PLA Daily special reporter Tong Zujing

“In response to the shortage of technical talents for some new equipment, we actively explore new ways of order-based talent training...” Recently, a certain army brigade organized a “cloud talk” based on the video conferencing system, and some officers and men came up with solutions to their concerns through brainstorming. This is a microcosm of the brigade using the “cloud talk” as a starting point to improve the quality and efficiency of helping build the grassroots.

“We are working hard to implement the ‘three lists’ of problem list, problem solving list and responsibility list, and effectively solve the urgent problems of officers and men and the bottleneck problems that restrict grassroots construction.” The brigade leader introduced that they combined the previous work of the headquarters squatting in the company, front-line research and the reports of various units to sort out the problem list and find the right direction for solving problems. Looking through this list of problems, the reporter found that the content not only covers combat readiness training, equipment support, daily management and other work, but also involves the “details” of the interests of officers and men, such as the protection of their rights and interests, which clarifies the goals for the agency to conduct its work in the next step.

Based on the problem list sorted out in the early stage, the brigade distinguishes individual problems, common problems and difficult problems, and formulates a problem-solving list in layers and categories to ensure that the right measures are taken and the problems are solved accurately. They adhere to the principle of “specific solutions to individual problems, centralized consultation on common problems, and focused efforts to tackle difficult problems”. For individual problems, the organs give guidance and suggestions, and the battalions and companies introduce measures based on their own; for common problems, the organs coordinate relevant departments, formulate specific plans, and help solve them one by one; for difficult problems, the organs take the lead in coordinating the joint office of the superiors, and take regular discussions and centralized research to ensure that they are effectively solved.

At the forum, the reporter saw that many heads of organs and departments took turns to go on stage to answer questions and solve doubts for officers and men around specific issues in the problem list. In response to the problems of insufficient textbooks and key personnel in meteorology, hydrology, surveying and navigation, and difficulty in organizing training, the head of the brigade’s training department replied on the spot that they would coordinate the group army to coordinate

resources, adopt the method of "self-training, unified training, department training, and integrated training", conduct systematic training for relevant professionals, compile and issue textbooks and teaching standards; coordinate technical personnel from manufacturers and experts from colleges and universities to come to the team to conduct technical guidance, and take multiple measures to cultivate professional talents.

"Only by getting to the bottom of the problems and clearing them up can we further boost the soldiers' entrepreneurial spirit." The brigade leaders introduced that they, in accordance with the responsibilities of the organs and departments, distinguished the brigades, battalions, and companies to formulate responsibility lists, decomposed the rectification tasks to people, clarified the solution measures and completion time limits, formed a closed loop of "investigation-rectification-improvement", improved the responsibility system of upper and lower connection, horizontal coordination, and easy implementation, and implemented the rectification measures with the spirit of nailing nails.

"Some damaged equipment and equipment are difficult to repair on their own. Can they be reported to the superiors for centralized repair or replacement?" The reporter walked into the equipment maintenance department of the brigade and saw that the responsibility list was posted in a conspicuous position in the office. In response to the problems raised by the officers and men, such as equipment maintenance and replacement, the department staff communicated with the battalions and companies at the first time, sorted out the problems that were difficult to solve at the grassroots level, and promptly coordinated the manufacturers to return to the factory for repair, and clearly marked the responsible persons, contact numbers and completion time limits of each process link on the responsibility list. At the same time, they included some equipment and equipment that were frequently used and had large losses in the annual application plan, designated specific persons in charge, and reported and applied for them in a timely manner according to regulations.

Doing practical things warms the hearts of soldiers and solving problems adds motivation. "The 'three lists' have become the 'golden key' for the agency to help the grassroots solve problems. So far, most of the problems on the list have been properly resolved, and the problems that have not been solved in time have also been marked with the progress of resolution and completion deadline." The brigade leader introduced that they will continue to optimize problem-solving solutions in the follow-up and performance evaluation, further improve the quality and efficiency of service to the grassroots, and stimulate the enthusiasm and motivation of officers and men to work and start businesses.

陆军基层部队提升合成训练质效见闻|步兵班班长指挥合成战斗

来源：解放军报 作者：曾庆旺 崔益铜 宋子洵 责任编辑：尚晓敏 2025-06-13

步兵班班长指挥合成战斗

——陆军基层部队提升合成训练质效见闻①

■曾庆旺 崔益铜 解放军报记者 宋子洵

编者按 去年 10 月，全军合成训练现场会召开，强调要探索合成训练新模式，蹚出部队作战能力生成新路径. 部队官兵闻令而动，在练兵一线逐步推行单元集成训、战术协同训、对抗检验训的合成训练基本模式，为走开以合成支撑联合的新时代体系练兵之路探索有效方法、积累实践经验、打下坚实基础. 请看记者发回的报道.

徐雪江（右二）指挥班组展开进攻行动. 曾阳程摄

“各小组注意，按预定计划行动，在规定时间内攻占高地. ”日前，在陆军某旅训练场上，一级上士徐雪江带领突击分队驾驶无人破障车前出开辟通路、操作无人机引导火力对“敌”目标实施定点摧毁、利用烟雾隐蔽迅速占领高地.

他们一气呵成的行动，让记者眼前一亮. 记者发现，这支突击分队的组成大有门道：9 名成员来自 4 个不同连队，分为无人装备、火力、支援 3 个小组，配备了狙击枪、步枪、无人机、迫击炮等武器. 更令人惊讶的是，这支配合默契的突击分队是几天前临时抽组的.

“这是我们探索开展’单元集成训’的阶段性成果. ”该旅领导介绍，全军合成训练现场会召开后，各级加速推进新时代合成训练体系构建，相继出台了一系列协作机制、组训规范. 旅党委乘势而上，决定从最小作战单元开始，抓好合成班组训练.

回想这段经历，徐雪江感慨颇深：作为一名步兵班班长，学会组织指挥合成战斗，他付出了艰苦的努力，也收获了不少“痛的领悟”.

徐雪江所在营是“一等功营”，承担全旅合成班组训练试点任务，旅领导点名让他担任合成班班长.

入伍多年，历经多次重大任务磨炼，徐雪江积累了丰富的组训经验和带兵心得，自认为可以胜任. 然而，当看到全营岗位编配表时，他顿时感到底气不足.

徐雪江发现，合成班组的人员编成，虽以装甲步兵为基础，但要根据不同的模拟作战任务临时抽组. 这意味着，整个合成班组，只有班长一人是固定不变的.

该营营长告诉记者，为了打造“按需组合、即插即用”的小型战斗模块，营党委研究决定在“临时抽组”上做文章，这就要求徐雪江必须掌握所有装备、熟悉所有岗位.

此后月余，徐雪江白天奔走在各个连队，向各专业行家里手请教；晚上加班加点，梳理总结组训经验，努力把全营人员、装备等情况了然于胸.

这还远远不够. 一次对抗训练，徐雪江接到任务，侦察目标据点周边“敌情”，为主攻分队提供掩护和情报支撑. 他按照以往经验组织火力偷袭，没承想反而暴露位置，使主攻分队陷入险境.

训练结束，徐雪江痛定思痛，分析失误原因. “对各要素使用规则掌握不清楚、抽组力量不科学、武器装备与任务需求不匹配……出现这些问题的根源，还是战术思维仍然停留在班组层面，没有从战场全局思考问题. ”徐雪江说，这就导致班组在本应隐蔽观察的时候贸然开火，“好心办了错事”.

随后一段时间，徐雪江继续苦练内功：钻研中外经典战例，向专家请教战术战法，与各连指挥员讨论人员编组……经过不懈努力，合成班组训练逐步走上正轨，形成了数十个典型场景的作战要素编配方案.

研究、实践、调整、再实践……经过一遍遍检验，徐雪江对合成班组指挥控制愈发熟练，各要素协同配合更加默契，整个班组的战斗力已非普通战斗班组可比.

不久后，该旅配属空军、联勤保障力量参加对抗训练. 训练中，主攻部队遭遇“敌”强火力压制，由于地形受限，红方无法投入大规模的装甲兵力. 情况紧急，上级命令徐雪江迅速指挥合成班组迂回突入，打击蓝方指挥机构.

一个合成班组，以往只是在旅营编成内行动，现在却成为整个红方部队的“刀尖”. 面对突如其来的“任务升级”，徐雪江大脑飞速运转，深入分析敌情和战场环境.

经过周密筹划，他以猛士突击车为载具，抽组囊括狙击、侦察、无人装备在内的多个作战模块，申请旅属新质作战力量远程支援，从装甲装备无法通过的地带隐蔽突破防线，迂回到蓝方防御纵深. 随后，侦察组利用先进仪器确定了蓝方前沿指挥所位置，无人装备组操作多架穿越机实施突袭，成功扭转战局.

对于这样的结果，该旅领导在欣喜之余并不满足：“现代战场瞬息万变，合成训练任重道远. 只有通过一次次贴近实战的淬炼，不断提升指挥员指挥控制能力和各作战要素协同配合水平，才能拥有更大胜算. ”记者了解到，下一步，该旅将在上级机关指导下，进一步探索跨军兵种编组训练、作战单元跨域协同，打造更灵活适用的战斗模块.

徐雪江对未来充满信心，他告诉记者，此次训练结束后，合成班组立即展开某新型作战样式的研究探索：“以后肯定还会遇到更多挑战，我有信心带领战友把各项任务完成好. ”

短 评

从最小作战单元抓起

■卢 岗

“单元集成训”是合成训练的基本模式之一. 如果说开展“单元集成训”的目的是聚合力量要素，实现“攥指成拳”，那么各单元无疑就是一根根手指. 手指有力，拳头才能过硬. 因此，像陆军某旅这样从班组这一最小作战单元抓起，不失为提升合成训练质效的有效方法.

遂行不同作战任务，需要不同的“拳头”. 合成班组的优势在于，打破原有建制，区分典型场景，进行灵活编组，有针对性地开展专攻精练，打造出“即插即用”的作战模块. 这就要求，一人一车一岗都要牢固树立合成思维、自带体系接口，能够根据作战需要，进行“排列组合”.

当然，单元集成重在“集成”，一个作战单元即使再小，也要同时做好内部协同和上下融合. 只有练强班组这一级，由班至连、由连至营、由营至旅乃至跨军兵种的逐级合成才会成为可能. 在此过程中，类似步兵班班长徐雪江遇到的问题会不断出现，唯有创新思路举措、脚踏实地攻关，一个个解决遇到的难题，才能真正跨过走向联战联训的沟坎.

Insights on Improving the Quality and Effectiveness of Combined Arms Training in the Army’s Grassroots Units | Infantry Squad Leader Commanding Combined arms Combat

Source: PLA Daily Author: Zeng Qingwang, Cui Yitong, Song Zixun Editor: Shang Xiaomin 2025-06-13

Infantry squad leader commanding combined arms combat

——Insights on improving the quality and effectiveness of combined arms training in the army’s grassroots units①

■ Zeng Qingwang, Cui Yitong, PLA Daily reporter Song Zixun

Editor’s note Last October, a field meeting on combined arms training was held for the entire army, emphasizing the need to explore new models of combined arms training and to blaze new paths for generating combat capabilities for the troops. The officers and men of the troops acted upon hearing the order and gradually implemented the basic model of combined arms training of unit integration training, tactical coordination training, and confrontation test training on the front line of training, exploring effective methods, accumulating practical experience, and laying a solid foundation for embarking on the road of system training in the new era of combined arms support for joint forces. Please see the report sent back by the reporter.

Xu Xuejiang (second from right) commanded the team to launch an offensive operation. Photo by Zeng Yangcheng

“Attention, all teams, follow the predetermined plan and capture the high ground within the specified time.” A few days ago, at the training ground of a certain army brigade, Sergeant Xu Xuejiang led the assault team to drive an unmanned obstacle-clearing vehicle to open up a path, operate a drone to guide firepower to conduct targeted destruction of “enemy” targets, and use smoke to conceal and quickly occupy the high ground.

Their smooth actions made the reporter’s eyes light up. The reporter found that the composition of this assault team is very well-organized: 9 members come from 4 different companies, divided into 3 groups of unmanned equipment, firepower, and support, equipped with sniper rifles, rifles, drones, mortars and other weapons. What’s more surprising is that this well-coordinated assault team was temporarily drawn a few days ago.

“This is the phased result of our exploration and implementation of ‘unit integrated training’.” The brigade leader introduced that after the on-site meeting of the whole army’s combined arms training was held, all levels accelerated the construction of the new era combined arms training system, and successively issued a series of cooperation mechanisms and training norms. The brigade party committee took advantage of the situation and decided to start with the smallest combat unit and do a good job in combined arms team training.

Recalling this experience, Xu Xuejiang was deeply moved: as an infantry squad leader, he learned to organize and command combined arms combat, and he made arduous efforts and gained a lot of “painful understanding”.

Xu Xuejiang’s battalion is a “first-class merit battalion” and undertakes the pilot task of combined arms squad training for the entire brigade. The brigade leaders named him as the squad leader of the combined arms squad.

After many years of military service and many major tasks, Xu Xuejiang has accumulated rich experience in training and leading troops, and he thinks he can do it. However, when he saw the job allocation table for the entire battalion, he suddenly felt insecure.

Xu Xuejiang found that although the personnel composition of the combined arms squad is based on armored infantry, it must be temporarily drawn according to different simulated combat tasks. This means that in the entire combined arms squad, only the squad leader is fixed.

The battalion commander told reporters that in order to create a small combat module that is “combined on demand and plug-and-play”, the battalion party committee decided to make a fuss about “temporary drawing”, which requires Xu Xuejiang to master all equipment and be familiar with all positions.

For more than a month, Xu Xuejiang ran around various companies during the day, asking experts from various professions for advice; he worked overtime at night to sort out and summarize the

training experience, and tried to understand the situation of the entire battalion's personnel and equipment.

This is far from enough. During a confrontation training, Xu Xuejiang received a task to scout the "enemy situation" around the target stronghold and provide cover and intelligence support for the main attack team. He organized a fire attack based on previous experience, but he did not expect to expose his position and put the main attack team in danger.

After the training, Xu Xuejiang learned from his mistakes and analyzed the reasons for the mistakes. "The rules for the use of various elements are not clear, the force is not scientific, and the weapons and equipment do not match the mission requirements... The root cause of these problems is that the tactical thinking still remains at the team level, and the problem is not considered from the overall battlefield." Xu Xuejiang said that this led to the team rashly opening fire when they should have been observing in secret, "good intentions did the wrong thing."

For a period of time afterwards, Xu Xuejiang continued to work hard on his internal skills: studying classic Chinese and foreign battle examples, asking experts for advice on tactics and strategies, and discussing personnel organization with commanders of various companies... After unremitting efforts, the training of combined arms squads gradually got on the right track, and a combat element allocation plan for dozens of typical scenarios was formed.

Research, practice, adjustment, and practice again... After repeated tests, Xu Xuejiang became more and more proficient in the command and control of combined arms squads, and the coordination of various elements became more tacit, and the combat effectiveness of the entire squad was no longer comparable to that of ordinary combat squads.

Soon after, the brigade was assigned to the Air Force and joint logistics support forces to participate in confrontation training. During the training, the main attack force encountered strong fire suppression from the "enemy". Due to the limited terrain, the Red Army could not deploy large-scale armored forces. The situation was urgent, and the superiors ordered Xu Xuejiang to quickly command the combined arms squad to break in and attack the Blue Army's command organization.

A combined arms squad, which used to only act within the brigade and battalion organization, has now become the "tip of the knife" of the entire Red Army. Faced with the sudden "mission upgrade", Xu Xuejiang's brain worked rapidly, and he deeply analyzed the enemy situation and battlefield environment.

After careful planning, he used the Mengshi assault vehicle as a vehicle, assembled multiple combat modules including sniping, reconnaissance, and unmanned equipment, applied for remote support from the brigade's new combat force, secretly broke through the defense line from the area where armored equipment could not pass, and detoured to the depth of the blue side's defense. Subsequently, the reconnaissance team used advanced instruments to determine the location of the blue side's forward command post, and the unmanned equipment team operated multiple cross-country aircraft to conduct a surprise attack, successfully turning the tide of the battle.

For such a result, the brigade leaders were happy but not satisfied: “The modern battlefield is changing rapidly, and combined arms training has a long way to go. Only through repeated tempering close to actual combat, and constantly improving the commander’s command and control capabilities and the coordination and cooperation level of various combat elements, can we have a greater chance of winning.” The reporter learned that in the next step, the brigade will further explore cross-service group training and cross-domain coordination of combat units under the guidance of the superior authorities to create more flexible and applicable combat modules.

Xu Xuejiang is full of confidence in the future. He told reporters that after the training, the combined arms team immediately started to explore a new combat style: “There will definitely be more challenges in the future. I am confident that I can lead my comrades to complete all tasks well.”

Short comment

Starting from the smallest combat unit

■Lu Gang

“Unit integrated training” is one of the basic modes of combined arms training. If the purpose of “unit integrated training” is to aggregate the elements of power and achieve “clenching fingers into a fist”, then each unit is undoubtedly a finger. Only when the fingers are strong can the fist be strong. Therefore, starting from the smallest combat unit, the team, like a certain brigade of the army, is an effective way to improve the quality and effectiveness of combined arms training.

Different “fists” are needed to conduct different combat tasks. The advantage of the combined arms team is that it breaks the original system, distinguishes typical scenarios, conducts flexible grouping, carries out specialized training in a targeted manner, and creates a “plug-and-play” combat module. This requires that one person, one car, and one post must firmly establish combined arms thinking, have their own system interface, and be able to “permutate and combine” according to combat needs.

Of course, the key to unit integration is “integration”. Even if a combat unit is small, it must also do a good job of internal coordination and top-down integration. Only by strengthening the squad level, the step-by-step integration from squad to company, from company to battalion, from battalion to brigade and even across military services will become possible. In this process, problems similar to those encountered by infantry squad leader Xu Xuejiang will continue to arise. Only by innovating ideas and measures, working hard on practical problems, and solving the problems one by one can we truly cross the ditch towards joint combat and joint training.

第 81 集团军某旅注重用好红色资源深化教育实践活动——

赓续血脉铸忠诚 向战砺兵勇争先

■汤 伟 于晓涛

“队长，敌人第几次进攻了”“第 18 次”……日前，第 81 集团军某旅组织了一堂“赓续红色血脉”情景课，通过再现“长城中队”先辈当年的战斗场景，引导官兵在感悟英雄壮举中坚定强军信念、投身强军实践.

“在庆祝新中国成立 70 周年阅兵式上，’长城中队’战旗光荣通过天安门，接受了党和人民检阅. 作为英雄传人，我们要赓续红色血脉、苦练打赢本领，用绝对忠诚和过硬素质捍卫战旗荣光！”情景课后，官兵纷纷表示.

“旅队前身部队在党的领导下转战南北，立下赫赫战功，涌现出’长城中队’等英模群体.”该旅领导介绍，在聚焦“铸牢政治忠诚、打好攻坚之战”深化教育实践活动中，他们注重发挥红色资源的育人功能，引导官兵在聆听英雄故事、感悟先辈精神中永葆忠诚本色、矢志奋斗强军.

为把这些红色资源利用好，该旅通过打造“赓续红色血脉”情景课、组织“战旗故事”巡回宣讲、开展“重走英雄路、祭奠英烈魂”活动、举办“做英雄传人”群众性练兵比武等方式，激励官兵传承先辈精神、强化使命担当.

“1948 年攻打锦州时，董来扶驾驶坦克冲向敌阵. 战斗中，坦克多次’负伤’，董来扶和战友们边打边修，最终将敌军火力点一一打掉. 战后，第四野战军将这辆坦克命名为’功臣号’……”在“功臣号”广场，某连指导员结合这辆功勋战车模型，给官兵动情讲述先辈当年的英雄事迹，大家听后深受触动.

“我们要发扬先辈面对困难不退缩、面对强敌勇冲锋的精神，练精手中装备，练强战斗本领，为功勋战车续写荣光.”讨论交流中，00 后战士熊俊伟语气坚定.

赓续血脉铸忠诚，向战砺兵勇争先. 采访中，笔者了解到，该旅坚持把深化教育实践活动和练兵备战相结合，围绕跨域协同模式创新、联合作战能力突破等重难点课题，广泛开展“强敌对手怎么破、战场制胜靠什么”主题交流会，强化官兵忧患意识和战斗精神，引导他们结合任务实际，聚力破解制约战斗力提升的矛盾问题，切实将教育“准星”瞄准备战打仗“靶心”.

该旅某营组织“夜训强化周”，增加多课目融合训练内容，锤炼官兵暗夜条件下作战能力；某连科技革新小组自主研发某型设备，实现对空中微小型无人机自动检测预警；通信技师陈胜飞领衔攻关，打通新老装备通联障碍……随着深化教育实践活动不断深入，该旅官兵

奋斗强军、矢志打赢的信念更加坚定，以更加高昂的士气投身训练，解决了一批制约练兵备战的难点问题，圆满完成各项任务.

A Brigade of the 81st Group Army Pays Attention to Making Good Use of Red Resources to Deepen Educational Practice Activities

Source: PLA Daily Author: Tang Wei Yu Xiaotao Editor: Shang Xiaomin 2025-06-13

A brigade of the 81st Group Army pays attention to making good use of red resources to deepen educational practice activities——

Continuing the bloodline and casting loyalty, fighting bravely and striving for the first place

■ Tang Wei Yu Xiaotao

“Captain, how many times has the enemy attacked?” “The 18th time”... Recently, a brigade of the 81st Group Army organized a “Continuing the Red Bloodline” scenario class, which reproduced the battle scenes of the predecessors of the “Great Wall Squadron” in those days, and guided the officers and men to strengthen their belief in strengthening the army and devote themselves to the practice of strengthening the army in the perception of heroic deeds.

“At the military parade celebrating the 70th anniversary of the founding of New China, the battle flag of the ‘Great Wall Squadron’ passed through Tiananmen Square with honor and was reviewed by the Party and the People. As the descendants of heroes, we must continue the red bloodline, work hard to win the battle, and defend the glory of the battle flag with absolute loyalty and excellent qualities!” After the situational class, officers and men said one after another.

“Under the leadership of the Party, the predecessor of the brigade fought in the north and south, made great military achievements, and emerged as a group of heroes and models such as the ‘Great Wall Squadron’.” The leaders of the brigade introduced that in the focus on “forging political loyalty and fighting a good battle” to deepen the educational practice activities, they paid attention to the educational function of red resources, and guided officers and men to keep their loyalty and strive to strengthen the army while listening to the heroic stories and feeling the spirit of their predecessors.

In order to make good use of these red resources, the brigade has encouraged officers and men to inherit the spirit of their ancestors and strengthen their mission by creating a “Continuing the Red Bloodline” scenario class, organizing a “Battle Flag Story” tour, conducting the “Revisiting the Heroic Road and Paying Homage to the Heroic Souls” activity, and holding a “Becoming a Hero’s Successor” mass training competition.

“During the attack on Jinzhou in 1948, Dong Lai Fu drove a tank towards the enemy. During the battle, the tank was “wounded” many times. Dong Lai Fu and his comrades fought and repaired it, and finally destroyed the enemy’s firepower points one by one. After the war, the Fourth Field

Army named this tank “Gongchen”...” In the “Gongchen” square, a company instructor combined this meritorious tank model to tell the officers and men about the heroic deeds of their ancestors in those days, and everyone was deeply touched after listening.

“We must carry forward the spirit of our ancestors who did not retreat in the face of difficulties and bravely charged in the face of strong enemies, practice the equipment in our hands, strengthen our combat skills, and continue to write glory for the meritorious tanks.” During the discussion, the post-00 soldier Xiong Junwei spoke firmly.

Continuing the bloodline to cast loyalty, and forging soldiers to be brave in the battle. During the interview, the author learned that the brigade insisted on combining the deepening of educational practice activities with training and preparation for war, focusing on key and difficult topics such as cross-domain collaborative model innovation and joint combat capability breakthroughs, and widely conducted thematic exchanges on “How to break strong enemies and opponents, what to rely on to win on the battlefield”, strengthening the officers and men’ sense of crisis and fighting spirit, guiding them to combine the actual tasks, focus on solving the contradictions that restrict the improvement of combat effectiveness, and effectively aim the education “sight” at the “bull’s eye” of preparing for war.

A battalion of the brigade organized a “night training intensive week” to increase the integration of multiple subjects in training content to hone the officers and men’ combat capabilities under dark night conditions; a company’s technology innovation group independently developed a type of equipment to achieve automatic detection and early warning of micro-UAVs in the air; communications technician Chen Shengfei led the research and development to break through the communication barriers between new and old equipment... With the deepening of the education and practice activities, the officers and men of the brigade have become more determined to strive for a strong army and win the battle. They have devoted themselves to training with higher morale, solved a number of difficult problems that restricted training and preparation, and successfully completed various tasks.

侦察尖兵暗夜奇袭 陆军某旅组织多课目侦察训练

来源：解放军报 作者：毛英椿 李健 责任编辑：孙智英 2025-06-14

陆军某旅组织多课目侦察训练——

侦察尖兵暗夜奇袭

■毛英椿 解放军报特约通讯员 李健

“出发！”日前，陆军某旅组织一场跨昼夜多课目侦察训练. 接到指令，侦察分队快速机动，奔赴任务地域.

行进途中，一条河流挡住了去路. 分队指挥员田岸立即命令队员操纵无人机实施空中侦察. 根据无人机回传信息，分队官兵架设绳索，采取牵引横越的方式顺利抵达对岸，悄然潜入密林.

该旅领导介绍，此次训练，他们设置隐蔽行军、牵引横越、战斗射击、目标侦察等课目，通过多课目连贯作业锤炼侦察分队连续作战能力.

头天夜里刚下过雨，崎岖泥泞的山路湿滑难行. 没走多远，特情突至：“前方出现不明气体！”田岸果断下达处置命令，分队官兵快速穿戴防护装具，以战斗队形有序通过“染毒”地带. 还没来得及喘口气，不远处发现“敌”观察哨. 官兵借助地形地貌掩护，采取小群多路战术，迂回渗透至“敌”后方，成功端掉“敌”观察哨.

“敌”机侦察、道路“被毁”……一路前行，一路特情，分队官兵密切配合、见招拆招.

“侦察分队多课目训练，不仅是对单兵素质的锤炼，更是对团队协作能力的检验. ”该旅侦察科沈参谋介绍，此次训练，他们注重培塑官兵的团队精神和协作意识，提升侦察分队整体作战能力.

夜幕降临，侦察分队前方出现小股“敌人”. “绕道而行会延误不少时间，使用武器则有可能暴露行踪. ”经过综合研判，田岸决定实施捕俘行动. 随着一声令下，数名队员借助夜色隐蔽接“敌”，成功将其抓捕.

继续前行，分队官兵终于抵达任务地域，侦察队员利用多型设备展开全方位侦察，很快将目标数据回传至指挥所. 随着指令下达，“敌”阵地顷刻间被炮火覆盖. 硝烟散去，队员们迅速前出，歼灭“敌”残余力量.

“此次训练多个课目连贯实施、多种特情临机导调，不仅锤炼了队员们连续作战能力和顽强战斗作风，也为下一步改进训练找准了方向. ”谈及战斗体会，田岸深有感触地说.

A Certain Army Brigade Organizes Multi-Subject Reconnaissance Training Raid in the Dark Night

Source: PLA Daily Author: Mao Yingchun Li Jian Editor: Sun Zhiying 2025-06-14

A certain army brigade organizes multi-subject reconnaissance training——

Scouting pioneers raid in the dark night

■ Mao Yingchun PLA Daily special correspondent Li Jian

“Let’s go!” A few days ago, a certain army brigade organized a multi-subject reconnaissance training across the day and night. After receiving the order, the reconnaissance team quickly moved to the mission area.

On the way, a river blocked the way. The team commander Tian An immediately ordered the team members to operate the drone for aerial reconnaissance. According to the information sent back by the drone, the team officers and men set up ropes and took the traction crossing method to successfully reach the other side and quietly sneak into the dense forest.

The brigade leaders introduced that in this training, they set up subjects such as concealed marching, traction crossing, combat shooting, and target reconnaissance, and tempered the continuous combat capability of the reconnaissance team through multi-subject continuous operations.

It had just rained the night before, and the rugged and muddy mountain road was slippery and difficult to walk. Not long after walking, a special situation suddenly came: “Unknown gas appeared ahead!” Tian An decisively issued a disposal order, and the officers and men of the detachment quickly put on protective equipment and passed through the “contaminated” area in an orderly manner in a combat formation. Before they had time to catch their breath, they found an “enemy” observation post not far away. With the help of the terrain and topography, the officers and men adopted a small group multi-route tactic to infiltrate the “enemy” rear in a roundabout way and successfully eliminated the “enemy” observation post.

“Enemy” aircraft reconnaissance, road “destroyed”... All the way forward, special situations all the way, the officers and men of the detachment cooperated closely and responded to each move.

“The multi-subject training of the reconnaissance detachment is not only a tempering of the quality of individual soldiers, but also a test of the team's cooperation ability.” Shen, a staff officer of the brigade's reconnaissance department, introduced that in this training, they focused on cultivating the team spirit and cooperation awareness of officers and men, and improving the overall combat capability of the reconnaissance detachment.

As night fell, a small group of “enemies” appeared in front of the reconnaissance detachment. “Taking a detour will delay a lot of time, and using weapons may expose the whereabouts. “After comprehensive analysis, Tian An decided to implement a prisoner capture operation. With an order, several team members took advantage of the night to approach the “enemy” and successfully captured him.

Continuing forward, the detachment finally arrived at the mission area. The reconnaissance team used various equipment to conduct all-round reconnaissance and quickly sent the target data back to the command post. As the order was issued, the “enemy” position was instantly covered by artillery fire. After the smoke cleared, the team members quickly moved forward to annihilate the remaining “enemy” forces.

“This training has implemented multiple subjects in a coherent manner and conducted a variety of special situations on the spot. It not only tempered the team members' continuous combat capabilities and tenacious combat style, but also found the right direction for the next step of improving training.” Speaking of combat experience, Tian An said with deep emotion.

大家讲、众人评 第 76 集团军某旅鼓励官兵走上教育讲台

来源：解放军报 作者：马頔 责任编辑：孙智英 2025-06-14

第 76 集团军某旅鼓励官兵走上教育讲台——

故事大家讲 效果众人评

■马頔

“面对敌人的绞刑架，李大钊面不改色、慷慨陈词：我们深信，共产主义在世界、在中国，必然要得到光荣的胜利！”

日前，第 76 集团军某旅聚焦“铸牢政治忠诚、打好攻坚之战”深化教育实践活动，组织一堂教育课，大学生士兵、中士黄士刚动情讲述革命先驱李大钊坚守信仰、敢于牺牲的感人故事，令台下官兵深受触动.

一次实战化演训任务中，黄士刚负责收放天线，要在高寒缺氧的任务地域负重往返. 执行任务过程中，他感到胸口像压了一块大石头，腿也像灌了铅一样迈不开步，但他咬牙坚持、奋力冲锋，最终圆满完成任务. “我们面临的这一点困难，与革命先辈的牺牲奉献相比，算不了什么. ”面对台下官兵，黄士刚坚定地说.

“这堂教育课，授课人均为基层战士. ”该旅领导介绍，此前，某连围绕“防间保密”主题组织教育微课，鼓励官兵自行设计教案，自主备课、授课、评课，鲜活的内容、朴实的语言受到官兵普遍欢迎.

该连探索的这一做法，引起该旅领导重视. 经过深入研究，他们决定建立“大家讲、众人评”教育授课机制，鼓励官兵积极参与教育、主动接受教育，并明确教育目标、选题方向、组织形式和考核标准，确保群众性教育取得扎扎实实的成效.

实践中，他们结合年度主题教育、部队任务实际、官兵思想动态，每季度下发“选题清单”供官兵参考，并鼓励大家通过制作短视频、多媒体课件等方式，增强教育授课的生动性、实效性. 他们还依托强军网开展“教案大家评”等活动，不断提升教育参与度和吸引力.

“肖思远烈士牺牲时，与我们年龄相仿. 我也要像他那样，担起属于我们的职责使命. ”大学生士兵赵硕根据机关下发的“选题清单”，选择了“戍边英雄”这一主题. 授课中，她结合此前的驻训经历，与战友们分享自己的感悟体会.

高原驻训，昼夜温差大，气候环境恶劣，但赵硕始终高标准严格要求自己：一个课目大纲规定用时 5 分钟以内为满分，她将成绩提升至 3 分钟以内；练习掩体构筑，她主动申请与男兵一起练，一口气连挖 4 个掩体；3000 米跑，她第一次参加便取得第二名的好成绩，第

二次更是一举夺冠……“英雄从未远去，我们都是英雄传人！”站在讲台上，赵硕的铿锵誓言，道出了大家的共同心声.

故事大家讲，效果众人评. 该旅领导介绍，战士担任授课人，会经历“学习—消化—表达”的过程，既能让自身先受教育，又能更好地与官兵产生共鸣，增强教育的感染力和实效性.

据介绍，该旅还定期组织“示范教学集训”，邀请优秀政治教员为教育骨干传授授课技巧，让群众性教育课堂真正做到接地气、冒热气、聚人气.

Everyone Tells and Everyone Comments. A Brigade of 76th Group Army Encourages Officers and Men to Take the Education Platform

Source: PLA Daily Author: Ma Di Editor: Sun Zhiying 2025-06-14

A brigade of the 76th Group Army encourages officers and men to take the education platform——

Everyone tells the story and everyone comments on the effect

■Ma Di

“Facing the enemy's gallows, Li Dazhao remained calm and spoke generously: We firmly believe that communism will inevitably win a glorious victory in the world and in China!”

A few days ago, a brigade of the 76th Group Army focused on “forging political loyalty and fighting a tough battle” to deepen the education and practice activities and organized an education class. College student soldier and sergeant Huang Shigang emotionally told the touching story of revolutionary pioneer Li Dazhao's adherence to faith and courage to sacrifice, which deeply touched the officers and men below the stage.

In a practical training mission, Huang Shigang was responsible for retracting and releasing the antenna, and had to carry heavy loads back and forth in the high-altitude and oxygen-deficient mission area. During the mission, he felt like a big stone was pressing on his chest, and his legs were like lead and he couldn't take a step, but he gritted his teeth and persisted, charged forward, and finally completed the mission successfully. “The little difficulty we face is nothing compared to the sacrifices and dedication of our revolutionary predecessors.” Facing the officers and men below the stage, Huang Shigang said firmly.

“The lecturers of this education class are all grassroots soldiers.” The brigade leader introduced that before, a certain company organized an education micro-class around the theme of “anti-espionage and confidentiality”, encouraging officers and men to design lesson plans, prepare lessons, teach lessons, and evaluate lessons independently. The fresh content and plain language were generally welcomed by officers and men.

This practice explored by the company attracted the attention of the brigade leaders. After in-depth research, they decided to establish an education and teaching mechanism of “everyone speaks and everyone evaluates”, encourage officers and men to actively participate in education and take the initiative to accept education, and clarify the education goals, topic selection direction, organizational form and assessment standards to ensure that mass education achieves solid results.

In practice, they combine the annual theme education, the actual tasks of the troops, and the ideological dynamics of officers and men, and issue a “list of topics” for reference every quarter, and encourage everyone to make short videos, multimedia courseware and other methods to enhance the vividness and effectiveness of education and teaching. They also rely on the strong army network to conduct activities such as “teaching plan evaluation” to continuously improve the participation and attractiveness of education.

“When the martyr Xiao Siyuan died, he was about the same age as us. I want to take on our responsibilities and missions like him.” College student soldier Zhao Shuo chose the theme of “Border Guarding Heroes” based on the “list of topics” issued by the agency. During the lecture, she combined her previous training experience to share her feelings and experiences with her comrades.

Training on the plateau, with a large temperature difference between day and night and a harsh climate, Zhao Shuo always held herself to high standards and strict requirements: the outline of a course stipulated that the full score should be within 5 minutes, but she improved her score to within 3 minutes; when practicing bunker construction, she took the initiative to apply to practice with male soldiers and dug 4 bunkers in one breath; in the 3,000-meter race, she won the second place in her first participation, and won the championship in the second time... “Heroes have never gone away, we are all descendants of heroes!” Standing on the podium, Zhao Shuo's sonorous oath expressed the common voice of everyone.

Stories are told by everyone, and the effect is evaluated by everyone. The leaders of the brigade introduced that when soldiers serve as lecturers, they will go through the process of “learning-digesting-expressing”, which can not only educate themselves first, but also resonate better with officers and men, and enhance the appeal and effectiveness of education.

According to reports, the brigade also regularly organizes “demonstration teaching training” and invites outstanding political instructors to teach teaching skills to education backbones, so that mass education classrooms can truly be down-to-earth, hot, and popular.

西部战区陆军某旅工兵连：三维建模助力物资装载训练

来源：解放军报 作者：张志强 李强 责任编辑：杜圣智 2025-05-16

西部战区陆军某旅工兵连——

三维建模助力物资装载训练

■张志强 李强

“3D 建模技术可以模拟装载过程，直观展示物资摆放位置、动态变化、空间利用率，提升物资运投保障效能. ”前不久，西部战区陆军某旅工兵连组织物资装载训练，官兵根据优化后的装载方案各司其职，效率明显提升.

该连干部马金良介绍，一线保障实践中，物资装载效率直接影响战斗力. 以往他们凭借经验进行物资装载训练，在分类、查询过程中存在精细化可视化程度不足等问题.

“注意前重后轻，左右平衡……”那次接到紧急装载任务后，马金良迅速按照计划进行分工，但实际情况与预想的大不一样——装载过程严格落实要求，车辆划分也与之前一致，但物资却没办法全部装载，最终只能卸车重装.

任务结束复盘时，马金良进行了剖析反思和自我批评，组织大家根据“物资定位不准确”“空间利用不合理”等训练中暴露出的问题，针对性研究整改措施. 上等兵易径舟提出，可以建立可视化模型，输入信息参数对物资排列组合，找到空间利用最大化的方案. 经过研究论证，大家一致感到这一想法可操作性强，值得一试. 连队官兵共同努力，很快完成了数据采集，易径舟制作完成了三维模型，并投入应用.

“磨刀不误砍柴工. 进行 3D 建模看似花费了一定精力，但长远来看能够减少返工频次，节省大量时间成本和人力资源. ”建模技术对工作的助力，让大家打开思路，学习研究以技术手段、创新思路破解训练难题的热情更加高涨.

在后续一次远程机动任务中，该连官兵通过软件系统模拟完成车辆伪装、编队分组、特情处置等行动，为任务完成赋能增效，相关做法在全旅推广. 此外，他们还把 3D 建模技术运用到爆破器材背具革新、连队库房整治规划等工作中，均取得较好效果.

Engineering Company of a Brigade of the Western Theater Army: 3D Modeling Assists Material Loading Training

Source: PLA Daily Author: Zhang Zhiqiang Li Qiang Editor: Du Shengzhi 2025-05-16

Engineer Company of a Brigade of the Western Theater Army——

3D Modeling Assists Material Loading Training

■ Zhang Zhiqiang Li Qiang

“3D modeling technology can simulate the loading process, intuitively display the placement, dynamic changes, and space utilization of materials, and improve the efficiency of material transportation and support.” Not long ago, the engineering company of a brigade of the Western

Theater Army organized material loading training. The officers and men performed their duties according to the optimized loading plan, and the efficiency was significantly improved.

Ma Jinliang, a cadre of the company, introduced that in the front-line support practice, the efficiency of material loading directly affects the combat effectiveness. In the past, they relied on experience to conduct material loading training, and there were problems such as insufficient refinement and visualization in the classification and query process.

"Pay attention to the front being heavy and the back being light, and the left and right being balanced..." After receiving the emergency loading task, Ma Jinliang quickly divided the work according to the plan, but the actual situation was quite different from what he expected - the loading process strictly implemented the requirements, and the vehicle division was also consistent with the previous one, but the materials could not be fully loaded, and finally had to be unloaded and reloaded.

When reviewing the task at the end, Ma Jinliang analyzed, reflected and criticized himself, and organized everyone to study the rectification measures in a targeted manner based on the problems exposed in the training, such as "inaccurate material positioning" and "irrational space utilization". Corporal Yi Jingzhou proposed that a visual model could be established, and information parameters could be input to arrange and combine materials to find a solution that maximizes space utilization. After research and demonstration, everyone unanimously felt that this idea was highly operational and worth a try. The company's officers and men worked together to quickly complete the data collection, and Yi Jingzhou completed the three-dimensional model and put it into use.

"Sharpening the knife does not delay the chopping of wood. 3D modeling may seem to take a certain amount of effort, but in the long run it can reduce the frequency of rework and save a lot of time and human resources." The help of modeling technology in work has opened up everyone's minds, and the enthusiasm for learning and studying to solve training problems with technical means and innovative ideas has increased.

In a subsequent long-distance mobile mission, the company's officers and men completed vehicle camouflage, formation grouping, special situation handling and other actions through software system simulation, empowering and increasing the efficiency of mission completion, and related practices have been promoted throughout the brigade. In addition, they also applied 3D modeling technology to the innovation of blasting equipment backpacks and the planning of company warehouse renovation, all of which achieved good results.

兵器室引入“智慧大脑”,陆军某旅利用科技手段提升保障能力

来源：解放军报 作者：周江涵 覃星凤 责任编辑：尚晓敏 2025-06-16

陆军某旅利用科技手段提升保障能力——

营连兵器室引入“智慧大脑”

■周江涵 覃星凤

“周鹏，手枪已出库”“苏长全，自动步枪已出库”……

近日，陆军某旅组织一场应急拉动训练. 兵器室内，官兵持枪贴近扫描仪，人员姓名、枪械类型、出库时间等信息立即在智能终端上显示出来.

“科技赋能推动基层战备工作提质增效. ”该旅领导介绍，他们将智能装备管理系统引入基层营连兵器室，显著提升了装备管理精度和人装出动速度. 该系统通过为武器装备嵌入电子芯片，利用高频扫描技术实现“一装一码”精准识别，并将装备型号、保养记录、出入库信息等数据实时上传至智能管理平台，使装备管理实现动态精准监控.

“以往遇到战备拉动、应急处突等紧急情况，要么先请领枪支后补登记，存在管理漏洞；要么一边请领一边登记，容易延误时机. ”该旅领导介绍，智能装备管理系统相当于为兵器室装上了“智慧大脑”，不仅能大幅缩短请领装备所需时间，提升部队快速反应能力，还能够实时生成电子台账，确保武器装备管控更加规范有序.

笔者在该旅机关值班室看到，装备管理科助理员张聪轻点鼠标，各营连兵器室武器在库率、保养合格率、日常制度落实等情况一目了然. 张聪介绍，这套智能装备管理系统，可实现需求智能感知、资源动态调配、效能精准评估，具有“数据共享、态势可视”的特点.

该旅领导介绍，除智能装备管理系统外，他们还利用科技手段，积极推进“智能修理车间”等创新项目建设，将科技赋能延伸至训练战备领域，为加快提升部队战斗力提供坚实技术支撑.

The Weapons Room Introduces a “Smart Brain”, and a Certain Army Brigade Uses Technology to Improve Its Support Capabilities

Source: PLA Daily Author: Zhou Jianghan Qin Xingfeng Editor: Shang Xiaomin 2025-06-16

A certain army brigade uses technology to improve its support capabilities——

The battalion and company weapons room introduces a “smart brain”

■ Zhou Jianghan Qin Xingfeng

“Zhou Peng, the pistol has been released from the warehouse” “Su Changquan, the automatic rifle has been released from the warehouse”...

Recently, a certain army brigade organized an emergency pull-up training. In the weapons room, officers and men hold their guns close to the scanner, and the personnel's name, gun type, release time and other information are immediately displayed on the smart terminal.

“Technology empowerment promotes the improvement of quality and efficiency of grassroots combat readiness work.” The brigade leader introduced that they introduced the intelligent equipment management system into the grassroots battalion and company weapons room, which significantly improved the accuracy of equipment management and the speed of personnel and equipment dispatch. The system embeds electronic chips into weapons and equipment, uses high-frequency scanning technology to achieve accurate identification of “one equipment, one code", and uploads data such as equipment models, maintenance records, and in-and-out warehouse information to the intelligent management platform in real time, so that equipment management can achieve dynamic and accurate monitoring.

“In the past, when encountering emergency situations such as combat readiness mobilization and emergency response, either you apply for guns first and then register them, which has management loopholes; or you apply for guns while registering, which is easy to delay the opportunity.” The brigade leader introduced that the intelligent equipment management system is equivalent to installing a “smart brain” for the weapons room, which can not only greatly shorten the time required to apply for equipment and improve the rapid response ability of the troops, but also generate electronic ledgers in real time to ensure that weapons and equipment management are more standardized and orderly.

The author saw in the duty room of the brigade that Zhang Cong, an assistant of the equipment management department, clicked the mouse, and the weapons inventory rate, maintenance qualification rate, and daily system implementation of the weapons room of each battalion and company were clear at a glance. Zhang Cong introduced that this intelligent equipment management system can realize intelligent perception of demand, dynamic allocation of resources, and accurate evaluation of efficiency, and has the characteristics of “data sharing and situation visualization”.

The brigade leaders introduced that in addition to the intelligent equipment management system, they also used scientific and technological means to actively promote the construction of innovative projects such as “smart repair workshops”, extending the empowerment of science and technology to the fields of training and combat readiness, and providing solid technical support for accelerating the improvement of the combat effectiveness of the troops.

第 79 集团军某旅运用科技手段提升射击训练质效

来源：解放军报 作者：杨至武 刘宝瑞 王立军 责任编辑：尚晓敏 2025-06-16

第 79 集团军某旅运用科技手段提升射击训练质效——

智能靶场服务练兵备战

■杨至武　解放军报记者　刘宝瑞　特约记者　王立军

茅文宽 绘

“8环，偏右上”“9环，偏左”……

夏日上午，第79集团军某旅射击场，一场轻武器实弹射击考核正在紧张进行. 官兵每击发一次，位于身旁的靶位显控终端就会自动播报，为下一次射击校准提供参考.

考核结束，某连刘连长从射击阵位拿到全连的成绩分析表，看着走势向上的曲线图，脸上露出了满意的笑容.

记者查看该旅多个营连的轻武器实弹射击考核成绩，发现和该连一样取得显著进步的连队还有不少. “自从旅里建成了智能靶场，我们组织开展实弹射击训练更加科学高效了. ”刘连长说.

据他介绍，以往组织一次实弹射击，需要投入大量人力物力，不仅过程繁琐冗长，还需不断调整校正弹着点，子弹打了不少，训练效果却时好时坏.

为解决这一问题，该旅决定向科技练兵要战斗力，专门引进集自动控制、数据分析、模拟训练等功能于一体的智能靶场，并结合任务实际和武器装备特点进行了改造.

智能靶场到底有多智能？走进控制室这个“靶场大脑”，记者大开眼界. 据操作员介绍，每一次实弹射击前，他只需根据训练计划要求，输入靶标种类、隐显时间、移动速度等参数，就能很快完成靶场布设；射击过程中，靶位显控终端实时显示弹着点，播报射击成绩和偏差；射击结束后，系统自动生成射击态势图，帮助官兵全面掌握个人训练情况，从而有针对性地进行调整改进.

一次考核，上等兵张衡连续打了几轮，成绩均未及格. 现场指挥员见状，当即让连里的优秀射手徐洲对他进行辅导. 然而，经过现场观察，徐洲也没发现问题究竟出在哪里.

智能靶场建成后，轮到该连组织训练，负责帮带张衡的徐洲脑子里突然闪过一个念头：“有没有可能在击发时，张衡的手指动作出现了不易察觉的变形？”

徐洲立即依托靶场的模拟训练系统，分析张衡射击全过程. 经过反复测试分析，结果确实如他所料，张衡扣动扳机瞬间，总是习惯性地向右发力，导致枪身轻微抖动.

“如果没有科技助力，仅凭肉眼很难发现这个细节. ”徐洲“对症下药”，在接下来的训练中，他一边通过增加负重，强化张衡据枪的稳定性，一边运用模拟训练系统，逐步纠正张衡的痼癖动作. 经过一个多月的苦练，张衡改掉了老毛病，射击成绩有了明显起色.

和张衡一样，在该旅，越来越多官兵成了智能靶场的直接受益者. 有数据显示，该旅各建制连轻武器实弹射击考核优良率较以往提升了 20%.

“智能靶场不仅能提高单兵射击训练质效，还可以构设较为逼真的战场环境. ”该旅作训科一名参谋介绍，在此之前，大家参加射击训练更多的是追求精度，打的是固定靶，比较容易出成绩，久而久之，一些官兵养成了“靶场思维”. 而今，他们在靶场上垒土堆、挖壕沟、设障碍，灵活设置各类靶标，动态调整射击距离，嵌入多种战术背景，不断锤炼官兵应用射击本领.

于是，智能靶场出现了这样一幕：“前方发现一名‘敌人’，立即利用有利地形予以歼灭！”随着考核员一声令下，某连中士梁金龙持枪迅速卧倒，紧接着低姿匍匐寻找隐蔽物. 他趁“敌”不备，一个侧滚翻跃进一处壕沟，果断出枪瞄准……记者目睹整个过程，心中暗暗赞许. “现在的射击训练，紧张感拉满，实战味更浓. ”击毙“敌人”后，梁金龙走下靶场，一脸兴奋.

科技赋能，训练如虎添翼. 该旅作训科科长介绍，下一步，他们将进一步完善靶场配套设施建设，将更多智能化、模拟化、网络化手段融入其中，构建多种战术运用典型场景，推动轻武器射击训练更好对接未来战场.

A 79th Group Army Brigade Uses Technology to Improve the Quality and Effectiveness of Shooting Training

Source: PLA Daily Author: Yang Zhiwu Liu Baorui Wang Lijun Editor: Shang Xiaomin 2025-06-16

A brigade of the 79th Group Army uses technology to improve the quality and effectiveness of shooting training——

Smart shooting range serves training and preparation

■ Yang Zhiwu, PLA Daily reporter Liu Baorui, special correspondent Wang Lijun

Drawing by Mao Wenkuan

“8 rings, slightly to the upper right” “9 rings, slightly to the left”...

On a summer morning, at the shooting range of a brigade of the 79th Group Army, a light weapons live-fire shooting assessment was in full swing. Every time the officers and men fired, the target display and control terminal next to them would automatically broadcast, providing a reference for the next shooting calibration.

At the end of the assessment, Captain Liu of a certain company took the performance analysis table of the entire company from the shooting position, and looked at the upward curve chart with a satisfied smile on his face.

The reporter checked the results of the light weapons live-fire shooting assessment of multiple battalions and companies of the brigade, and found that there were many companies that had made significant progress like this company. “Since the brigade built the intelligent shooting range, we have organized live-fire shooting training more scientifically and efficiently.” Captain Liu said.

According to him, in the past, organizing a live-fire shooting required a lot of manpower and material resources. Not only was the process cumbersome and lengthy, but it also required constant adjustment and correction of the impact point. A lot of bullets were fired, but the training effect was sometimes good and sometimes bad.

To solve this problem, the brigade decided to demand combat effectiveness from scientific and technological training, and specially introduced an intelligent shooting range that integrates automatic control, data analysis, simulation training and other functions, and transformed it in combination with the actual tasks and the characteristics of weapons and equipment.

How smart is the intelligent shooting range? Walking into the control room, the “shooting range brain”, the reporter was amazed. According to the operator, before each live-fire shooting, he only needs to input parameters such as target type, hidden and visible time, and moving speed according to the requirements of the training plan, and the shooting range layout can be completed quickly; during the shooting process, the target position display and control terminal displays the impact point in real time, broadcasts the shooting results and deviations; after the shooting, the system automatically generates a shooting situation map to help officers and men fully grasp their personal training situation, so as to make targeted adjustments and improvements.

In an assessment, Corporal Zhang Heng fired several rounds in a row, but his scores were all unsatisfactory. Seeing this, the on-site commander immediately asked Xu Zhou, an excellent shooter in the company, to coach him. However, after on-site observation, Xu Zhou did not find out where the problem was.

After the intelligent shooting range was built, it was the company's turn to organize training. Xu Zhou, who was responsible for helping Zhang Heng, suddenly had a thought in his mind: “Is it possible that Zhang Heng's finger movements were not noticeably deformed when firing?”

Xu Zhou immediately relied on the shooting range's simulation training system to analyze Zhang Heng's entire shooting process. After repeated tests and analyses, the results were indeed as he

expected. Zhang Heng always habitually exerted force to the right when he pulled the trigger, causing the gun to shake slightly.

“Without the help of technology, it would be difficult to detect this detail with the naked eye.” Xu Zhou “prescribed the right medicine”. In the following training, he strengthened Zhang Heng's stability by increasing the weight, and gradually corrected Zhang Heng's habitual movements by using the simulation training system. After more than a month of hard training, Zhang Heng got rid of his old problems and his shooting results improved significantly.

Like Zhang Heng, more and more officers and men in the brigade have become direct beneficiaries of the smart shooting range. Data show that the pass rate of light weapons live-fire shooting assessment of each company of the brigade has increased by 20% compared with the past.

“Smart shooting range can not only improve the quality and efficiency of individual shooting training, but also create a more realistic battlefield environment.” A staff officer of the brigade's training department introduced that before this, everyone participated in shooting training more for the pursuit of accuracy, shooting fixed targets, which was easier to achieve results. Over time, some officers and men developed a “shooting range mentality”. Now, they build earth piles, dig trenches, set up obstacles on the shooting range, flexibly set various targets, dynamically adjust the shooting distance, embed a variety of tactical backgrounds, and constantly hone the officers and men' application shooting skills.

So, the smart shooting range appeared like this: “An 'enemy' was found in front, and it was immediately annihilated by using favorable terrain!” With the order of the assessor, Sergeant Liang Jinlong of a certain company quickly lay down with a gun, and then crawled in a low posture to find a cover. He took advantage of the enemy's unpreparedness, rolled sideways into a trench, and decisively aimed his gun... The reporter witnessed the whole process and secretly praised it. “Now the shooting training is full of tension and more practical.” After killing the “enemy”, Liang Jinlong walked down the shooting range with an excited look on his face.

Technology empowers training, and training is even more powerful. The head of the brigade's training department introduced that in the next step, they will further improve the construction of supporting facilities at the shooting range, integrate more intelligent, simulated, and networked means into it, build a variety of typical scenarios for tactical use, and promote light weapons shooting training to better connect with future battlefields.

探访“飞夺泸定桥红二连”：铁的纪律锻造“铁一般的队伍”

来源：解放军报 作者：张科进 付语 责任编辑：孙智英 2025-06-17

新闻样本

跟着“红二连”官兵一起夜训

■解放军报记者 张科进 付语

夏夜，第 82 集团军某旅“飞夺泸定桥红二连”官兵悄无声息地到达指定地域，潜伏下来. 很快，四周的虫鸣再次响起，仿佛从来没有人来过. 如果不是事先知晓此行的计划，记者完全不会察觉到这片区域潜伏了一队精兵.

记者的采访，便是从这次夜训任务开始的. 一连几个小时，官兵们仿佛消失在这片区域. 当记者也像官兵们那样趴在草丛中时，发现每一秒都是“煎熬”——不知名的虫子，不时爬上脸颊叮咬，夜风中的草叶摩挲着皮肤，难以名状的痒意袭上心头……

训练间隙，官兵们告诉记者，为了锤炼过硬的打仗本领，这样的潜伏训练很寻常. 几位老兵讲起了 3 年前在异国他乡的那次潜伏——

2022 年，南苏丹，联合国维和部队营地发生一次严重盗窃事件. 及时抓捕窃贼、找回被窃物资的任务，落在了执行维和任务的“飞夺泸定桥红二连”官兵肩上.

连队干部路鹏飞回忆，当时，维和部队营地的当地守卫力量薄弱，治安环境也十分紧张. 如何完成任务？连队仔细分析案情、认真进行调研、周密拟制计划，决定采取潜伏蹲守的方式“守株待兔”.

每天晚上，任务小组官兵潜伏在窃贼必经之处的草丛中. 时值盛夏，南苏丹地区天气炎热、蚊虫肆虐，虽然采取了各种防护措施，但每天都有官兵出现皮肤疾病症状.

一天又一天过去，窃贼仿佛消失了一般，不见踪影.

潜伏在茂密的草丛中纹丝不动，官兵们夜夜都要承受更甚于记者亲身体验的“煎熬”. 即便如此，大家始终坚守战位、恪尽职守，不达目的绝不罢休. 最终，以为部队已经放松警惕的窃贼，前来二度作案. 官兵当场抓获窃贼，并顺利找回被窃物资. 任务完成后，联合国驻南苏丹特派团对中国军人的过硬作风和一流执行力给予高度赞扬.

在南苏丹维和的日日夜夜，连队官兵零适应快速转换、多任务同时展开、近距离面对风险，以高度的纪律性完成警戒执勤、武装巡逻等联合国授权任务，充分展现了中国军队威武之师、文明之师、和平之师的良好形象.

“令行禁止，雷打不动，是我们连的光荣传统，也是我们战胜敌人、完成任务的底气. ”官兵们的话发自肺腑，让记者不禁想起了这个连队的先辈们——90 多年前，站在井冈山西南的荆竹山雷打石旁，听毛泽东同志宣布纪律的那群衣衫褴褛的红军战士.

记者调查

探访“第一军规”试点连队“飞夺泸定桥红二连”——

铁的纪律锻造“铁一般的队伍”

■卢家辉 解放军报记者 张科进 付语

第 82 集团军某旅“飞夺泸定桥红二连”官兵在训练中. 王佳浩 摄

走进第 82 集团军某旅“飞夺泸定桥红二连”荣誉室，记者被一张放置在显眼位置的老照片吸引. 照片上红军战士的包袱布字迹已经模糊，一旁的说明上写着“六项注意”.

“这是‘红二连’的‘传家宝’. ”该连连长告诉记者，1927 年秋，毛泽东同志站在井冈山西南的荆竹山雷打石上宣布三条纪律，后来又在桂东县沙田村颁布《三大纪律、六项注意》，立下我军的“第一军规”. 当时，受命试点的“红二连”官兵，把这些规定写在包袱布上，反复默写、背诵，作为行动指南.

自此，严守纪律便融入连队的基因和血脉，成为克敌制胜的“传家宝”. 突破湘江、强渡乌江、四渡赤水、飞夺泸定桥、奇袭腊子口、激战平型关、会战辽西、解放海南……一路走来，连队历经大小战斗 876 次，靠铁的纪律取得赫赫战功.

在强军兴军的新征途上，“红二连”官兵擎起先辈的旗帜，不忘初心、牢记使命，用铁的纪律锻造“铁一般的队伍”，圆满完成多项重大任务，连队先后被评为“基层建设标兵连”“军事训练先进单位”等，荣立集体二等功，连队党支部被评为“先进基层党组织”.

面对改革调整，一声令下便出发——

平时把铁的纪律刻进心底，关键时刻才能毫不迟疑

“新时代严守纪律的故事中，哪一个大家印象最深？”记者的这个问题，引起“红二连”官兵热烈讨论.

很快，大家便达成共识：2017 年的千里移防. 说起那段经历，不少人都能讲出几个感人故事.

“移防的命令来得突然，执行起来不容易. ”干部路鹏飞回忆，驻地变了、任务变了，好不容易形成的能力需要重新聚合，向“新战场”冲锋面临全新挑战与考验；部分装备和岗位有了调整和更新，有些干了十几年的老兵必须从零开始，艰难转型；有的官兵家属刚刚随军安置工作，还有的官兵子女好不容易进入优质学校……

疾风知劲草. 当移防的这一天到来时，“红二连”没有一名官兵向组织讲条件、提要求，全部自觉拥护改革、服从改革、投身改革，组织一声令下，打起背包就出发，坚决彻底地完成了移防任务，通过了这场特殊的大考.

没有人讨价还价，没有人叫苦抱怨，并不是官兵们没有困难. 说起妻子的付出与支持，连队干部贾昊一脸歉意. 此前，妻子是一名教师. 为了支持贾昊工作，她辞去工作随丈夫到新驻地生活，如今在一家商场里打工.

“部队有明确的纪律规定，不能说没有困难才遵守，遇到困难就打折扣，你说是不？”贾昊坦言，“第一军规”的首条就是“行动听指挥”. 作为“第一军规”试点单位的传人，更不能破坏一代代“红二连”官兵传承下来的规矩.

铁的纪律，让“红二连”官兵“受命之日则忘其家、临阵之时则忘其亲、击鼓之时则忘其身”. 在该连荣誉室里，听着“22勇士飞夺泸定桥”的战斗故事，我们仿佛回到那个战火纷飞的年代.

长征途中，“红二连”奉命抢占泸定桥，保障红军主力渡河，此时河上只剩下13根铁索. 接到这个九死一生的任务，连队 22 名突击队员心无杂念、视死如归，把铁的纪律转化成完成任务的强大执行力和战斗力，“飞夺泸定桥红二连”由此得名.

平时把铁的纪律刻进心底，关键时刻才能毫不迟疑. 新时代新征程，“红二连”官兵以“第一军规”试点连队的荣誉教育和激励官兵，系统学习条令条例和各项规章制度，在实战化训练、抢险救灾等任务和日常管理中增强官兵的遵规守纪意识，把铁的纪律挺在前面.

那年冬天，辽东大地突然下了一夜暴雪.

清早起床，看着被皑皑大雪覆盖的山村，休假在家的该连班长李圣洁有些犯愁. 休假结束要归队，今天是他赶火车的日子，大雪打乱了计划.

“儿啊，你打个电话给连队反映一下实际情况吧！”母亲劝李圣洁. 李圣洁却说，有困难先克服，没有必要因为一点困难就坏了连队的规矩！

在父母关切的目光中，李圣洁毫不犹豫地背上背包，踏上了返程的路. 大雪覆盖了山村，也隐藏了道路，李圣洁一路上穿山林、越沟坎，跌跌撞撞地走出了雪野. 当他坐上火车时，才感到身上一阵阵刺痛. 归队时脱下衣服一看，全身多处瘀青.

听“红二连”官兵讲遵规守纪的故事，记者忽然明白，为什么这支连队有底气喊响：“没有完不成的任务、没有克服不了的困难、没有战胜不了的敌人.”

一场演训见证“纪律中有无穷的战斗力”——

没有铁的纪律，就夺取不了战场的新胜利

在“红二连”采访时，官兵屡屡提及改革调整后的第一次演习.

2018 年，连队参加一场跨区演训. 战斗进入白热化，多个连队同时受命执行穿插渗透任务，夺占关键阵地.

对于各参训连队来说，这是一场无声的较量. 大家摩拳擦掌，谁都想第一个将红旗插上山顶. 等到这一阶段演训结束时，“红二连”是唯一成功穿过对手防线并顺利夺占阵地的连队.

总结复盘时，大家才发现“红二连”的不一样——

有的连队急于求成，没有科学规划路线，也没有及时做好疏散和隐蔽，被对手察觉，遭到精确打击；有的连队在战斗中越打越“冲动”，强行通过火力拦阻区，结果损失大半，后续无力再战……只有“红二连”官兵，时而分散成小组悄然渗透、独立作战，时而全连聚拢突击，收放自如.

“每一步都收放自如、严丝合缝的背后，是不容置疑的铁纪严规. ”结合一个个具体行动进行分析，介绍经验的“红二连”官兵表示，在摸清战场条件和环境基础上，必须靠令行禁止保证部队“聚散合拍、行动一致”，否则很容易“散则收不拢，聚则易暴露”.

凭着铁的纪律，“红二连”这些年一次次在重大演训中圆满完成任务，多次受到上级肯定和表彰.

得知记者在“红二连”采访，旅机关一名参谋主动找过来，要跟记者聊聊.

2021年，驻地附近突发山火，这名参谋随救灾部队前出遂行任务，目睹“红二连”第一个到达灾区、第一个进入火场救火，由衷感叹“纪律中有无穷的战斗力”.

快速反应，源于连队官兵平时认真落实战备规范不打折扣. 这名参谋下基层检查战备工作时发现，“红二连”官兵始终严格按战备规范把各项工作做得严而又严、实而又实，装备物资细化到单装、单车、单兵，任务区域的桥、隧、涵、道数据定期更新.

翻看“红二连”的战备文件，记者不禁为之惊叹. 官兵每天检查单兵行动卡、急救包、携行装具等个人战备物资；连队每周检查方案预案、行动训练、车辆装备、枪械附件等战备事项，确保一有任务便能“自动弹起”，一声令下便可迅疾出动.

几天前，连队组织了一场军情研究，分析现代战争的制胜规律. 官兵们综合开源信息，仔细研究了一场现代空战失利的教训后发现，根源之一是没有严格执行用频纪律，导致雷达信号暴露己方目标，结果被对手猎杀.

一场场实战化演训、一次次军情研究、一堂堂形势战备教育，让“红二连”官兵更加强化一个观念：没有铁的纪律，就夺取不了战场的新胜利.

从“不拿一个红薯”到“不收一筐板栗”——

无论时空如何变迁，铁的纪律都不会褪色半分

那年秋天，中原的板栗熟了.

正在豫南某山区参加演训的“红二连”官兵，集结地域在山间的一片板栗林中. 按照计划，全连官兵各就各位、分工合作，很快在林下展开各种构工作业.

入夜，秋风骤起，吹落一地板栗. 第二天早晨起床，看着满地的板栗，官兵们不禁犯了愁. 不处理，影响行动；处理，担心影响军民关系. 两位连队主官一合计，利用训练间隙组织全连官兵将掉落的板栗收集起来堆放在树下.

几天后，老乡带着筐上山采摘板栗，被眼前的一幕惊呆了. 看着正在收拾行装，准备开拔去“战斗”的官兵，他们说什么也要送一筐板栗给大家. 但官兵遵守纪律要求，坚决不收. 如今，回忆这段经历，不少官兵的脸上仍然泛起微笑.

这一筐板栗，让官兵们想起了 90 多年前的那经典一幕——

1927 年秋，罗霄山脉的红薯到了收获的季节. 一支队伍经过一片红薯地，饥肠辘辘的士兵本能地挖出红薯，狼吞虎咽吃下充饥.

这一幕，老百姓早已司空见惯. 害怕“兵匪”的村民，早早躲进山里.

目睹这一切，这支队伍的指挥员毛泽东同志陷入深思：秋收起义后的队伍，旧的习气还未清除，新的纪律还未建立，必须严明军纪. 第二天一早，队伍即将出发，他站在一块雷打石上高声宣布三条纪律——

一、行动听指挥；二、不拿群众一个红薯；三、打土豪要归公.

这就是“第一军规”的雏形，也是连队记忆里的“第一个纪律故事”.

无论时空如何变迁，铁的纪律都不会褪色半分. 从“不拿老百姓一个红薯”到“不收群众一筐板栗”，成为“红二连”传人遵守群众纪律的时代注脚.

近年来，部队演训活动十分频繁，每年都有半数时间在外奔忙. 连队结合职能任务组织群众纪律辅导授课，利用红色资源融洽军民关系，剖析反面典型搞好案例警示，引导官兵增强守纪如铁的思想自觉.

一次机动训练，上级要求夜间行驶过程中必须闭灯驾驶. 途经一个学校门口时，驾驶员薛程感觉到步战车颠簸了一下. “估计是轧到什么东西了. ”薛程下意识地想，但任务不允许他下车检查.

第二天任务结束，薛程向连队报告后返回“事发地”，发现前一晚不小心将门口的花坛轧坏了一角，便主动找到学校领导提出赔偿.

“几块砖的事，我们改天补一下就是了. ”学校领导检查受损情况后，认为损坏不严重，不打算让官兵们赔偿. 薛程认真地说：“损坏东西一定要赔，这是我们连队一直以来的规定. ”在他的坚持下，赔偿了相应的钱款.

记者了解到，这所学校依据这个故事排演舞台剧，成为学生国防教育的生动教材. 不少孩子在听故事、看节目中，潜移默化地打下了爱国拥军的思想烙印.

夕阳西下，打靶归来的“红二连”官兵列队从记者身边经过，嘹亮的歌声在林间回荡：“革命军人个个要牢记，三大纪律八项注意：第一一切行动听指挥，步调一致才能得胜利……”

锐视点

让铁的纪律成为“自觉的纪律”

■雷剑波

90 多年前，毛泽东同志立下了人民军队的“第一军规”. 作为当年的试点单位，“飞夺泸定桥红二连”官兵始终把这些纪律和规定铭记于心、践行于行，升华为“党指挥枪”的政治自觉，转化为令行禁止的行动自觉. 在一个连队的示范下，铁的纪律从此刻进人民军队的基因.

毛泽东同志曾说，这个军队之所以有力量，是因为所有参加这个军队的人，都具有自觉的纪律. 立下“第一军规”，始终把铁的纪律挺在前面，让人民军队成为区别于一切旧军队的先进力量，成为一支无坚不摧、攻无不克的雄师劲旅——

因为有“自觉的纪律”，人民子弟兵的形象立了起来. 长征途中，红军宁可嚼草根、吃皮带，也不拿群众一粒青稞；解放战争中，上海街头的解放军战士在寒风中露宿街头，也不扰民.

因为有“自觉的纪律”，人民军队创造出一个个战争史上的奇迹. 黄崖洞保卫战中，八路军战士面对日军的疯狂进攻，严格执行作战纪律，没有一人擅自撤离战位；冰天雪地的抗美援朝战场上，志愿军将士即便被冻成冰雕也纹丝不动，以铁的纪律坚决执行阻击任务.

历史和实践反复证明，纪律是人民军队的生命所系、力量所在. 我们必须更加重视和加强纪律建设，把铁的纪律烙印在心底，在听党指挥中铸牢军魂；把铁的纪律化作坚定的行动，在遵规守纪中锤炼作风.

只有让铁的纪律成为“自觉的纪律”，凝聚铁的意志、锤炼铁的作风，确保一切行动听指挥、步调一致向前进，才能锻造出听党指挥、能打胜仗、作风优良的胜利之师.

Visiting the “Red Second Company that Flying to Seize Luding Bridge”: Iron Discipline Forges an “Iron Team”

Source: PLA Daily Author: Zhang Kejin Fu Yu Editor: Sun Zhiying 2025-06-17

News Sample

Follow the “Red Second Company” officers and men for night training

■PLA Daily reporter Zhang Kejin Fu Yu

On a summer night, the officers and men of the “Red Second Company that Flying to Seize Luding Bridge” of a certain brigade of the 82nd Group Army arrived at the designated area quietly and lurked. Soon, the chirping of insects around sounded again, as if no one had ever been there. If the reporter had not known the plan of this trip in advance, he would not have noticed that a team of elite soldiers was lurking in this area.

The reporter's interview started with this night training mission. For several hours, the officers and men seemed to disappear in this area. When the reporter also lay in the grass like the officers and men, he found that every second was “torture” - unknown insects climbed up his cheeks and bit him from time to time, the grass leaves in the night wind caressed his skin, and an indescribable itch attacked his heart...

During the training break, the officers and men told reporters that in order to hone their fighting skills, such lurking training is very common. Several veterans talked about the lurking in a foreign country three years ago-

In 2022, a serious theft occurred in the UN peacekeeping force camp in South Sudan. The task of arresting the thieves and recovering the stolen materials fell on the shoulders of the officers and men of the “Red Second Company of Luding Bridge” who were performing the peacekeeping mission.

Lu Pengfei, a company cadre, recalled that at that time, the local guard force of the peacekeeping force camp was weak and the security environment was very tense. How to complete the task? The company carefully analyzed the case, conducted serious research, and made a careful plan, and decided to adopt a lurking and squatting method to “wait for the rabbit”.

Every night, the task force officers and men hid in the grass where the thieves must pass. It was midsummer, the weather in South Sudan was hot and mosquitoes were rampant. Although various protective measures were taken, officers and men showed symptoms of skin diseases every day.

Day after day, the thieves seemed to disappear without a trace.

Lurking in the dense grass without moving, the officers and men had to endure “torture” every night that was even worse than what the reporter experienced personally. Even so, everyone always stood firm in their positions, performed their duties, and never gave up until they achieved their goals. In the end, the thieves, who thought the troops had relaxed their vigilance, came to commit crimes again. The officers and men caught the thieves on the spot and successfully recovered the stolen supplies. After the mission was completed, the United Nations Mission in South Sudan highly praised the Chinese soldiers' excellent style and first-class execution.

During the days and nights of peacekeeping in South Sudan, the company's officers and men adapted to rapid conversion, conducted multiple tasks at the same time, faced risks at close range, and completed UN-authorized tasks such as guard duty and armed patrol with a high degree of discipline, fully demonstrating the good image of the Chinese military as a mighty, civilized, and peaceful army.

“It is the glorious tradition of our company to obey orders and obey them without hesitation. It is also the confidence for us to defeat the enemy and complete the task.” The words of the officers and men came from the heart, which reminded the reporter of the predecessors of this company - more than 90 years ago, standing beside the Jingzhu Mountain Thunder Stone in the southwest of Jinggang Mountain, the ragged Red Army soldiers who listened to Comrade Mao Zedong's announcement of discipline.

Reporter Investigation

Visiting the “First Military Regulation” pilot company “Flying to Luding Bridge Red Second Company” -

Iron discipline forges “iron-like teams”

■ Lu Jiahui, PLA Daily reporter Zhang Kejin Fu Yu

The officers and men of the “Flying to Luding Bridge Red Second Company” of a brigade of the 82nd Group Army are in training. Photo by Wang Jiahao

Walking into the honor room of the “Red Second Company that Flying to Luding Bridge” of a certain brigade of the 82nd Army Group, the reporter was attracted by an old photo placed in a prominent position. The handwriting on the Red Army soldier's bag cloth in the photo has been blurred, and the description next to it reads “Six Points of Attention”.

“This is the 'family heirloom' of the 'Red Second Company'.” The company commander told reporters that in the autumn of 1927, Comrade Mao Zedong stood on the Leidashi of Jingzhu Mountain in the southwest of Jinggang Mountain and announced three disciplines. Later, he promulgated the “Three Disciplines and Six Points of Attention” in Shatian Village, Guidong County, and established the “first military regulations” of our army. At that time, the officers and men of the “Red Second Company” who were ordered to pilot the project wrote these regulations on the bag cloth, repeatedly memorized and recited them as a guide for action.

Since then, strict discipline has been integrated into the company's genes and blood, becoming a “family heirloom” to defeat the enemy. Breaking through the Xiangjiang River, crossing the Wujiang River, crossing the Chishui River four times, seizing the Luding Bridge, attacking Lazikou, fighting at Pingxingguan, fighting in western Liaoning, liberating Hainan... Along the way, the company has experienced 876 battles of all sizes, and has achieved great military exploits with iron discipline.

On the new journey of strengthening the army, the officers and men of the “Red Second Company” held up the banner of their predecessors, did not forget their original aspirations, kept their missions in mind, forged an “iron-like team” with iron discipline, and successfully completed many major tasks. The company has been successively rated as “model company for grassroots construction” and “advanced unit for military training”, and won the second-class collective merit. The company's party branch was rated as “advanced grassroots party organization”.

In the face of reform and adjustment, set off at the command -

Engrave the iron discipline into your heart at ordinary times, so that you can do it without hesitation at critical moments

“Which story of strict discipline in the new era impressed everyone the most?” This question from the reporter aroused heated discussion among the officers and men of the “Red Second Company”.

Soon, everyone reached a consensus: the thousand-mile relocation in 2017. Speaking of that experience, many people can tell a few touching stories.

“The order to relocate came suddenly, and it was not easy to execute.” Cadre Lu Pengfei recalled that the station and the mission had changed, and the ability that had been hard to form needed to be reassembled. The charge to the “new battlefield” faced new challenges and tests; some equipment and positions had been adjusted and updated, and some veterans who had worked for more than ten years had to start from scratch and make a difficult transition; some officers and men' families had just been resettled with the army, and some officers and men' children had finally entered high-quality schools...

The strong wind knows the strong grass. When the day of relocation came, no officer or soldier of the “Red Second Company” made conditions or demands to the organization. All of them consciously supported the reform, obeyed the reform, and devoted themselves to the reform. At the order of the organization, they packed their backpacks and set off, resolutely and thoroughly completed the relocation task, and passed this special test.

No one bargained, no one complained, not that the officers and men had no difficulties. Speaking of his wife's efforts and support, the company cadre Jia Hao looked apologetic. Before that, his wife was a teacher. In order to support Jia Hao's work, she quit her job and moved to the new station with her husband. Now she works in a shopping mall.

“The army has clear disciplines and regulations. We cannot say that we will only abide by them when there are no difficulties, and we will make concessions when we encounter difficulties. Don't you think so?” Jia Hao said frankly that the first rule of the “First Military Regulation” is “Obey the command in action”. As the successor of the pilot unit of the “First Military Regulation”, we must not destroy the rules passed down by the officers and men of the “Red Second Company” from generation to generation.

The iron discipline makes the officers and men of the “Red Second Company” “forget their families when they receive orders, forget their relatives when they are on the battlefield, and forget themselves when they beat the drums”. In the company's honor room, listening to the battle story of “22 warriors flying to seize Luding Bridge”, we seem to have returned to that war-torn era.

During the Long March, the “Red Second Company” was ordered to seize Luding Bridge to ensure that the main force of the Red Army crossed the river. At this time, there were only 13 iron ropes left on the river. After receiving this life-threatening mission, the 22 commandos of the company had no distractions and were ready to die. They transformed the iron discipline into a strong execution and combat power to complete the task, and the “Red Second Company of Flying to Luding Bridge” was named after this.

Usually, the iron discipline is engraved in the heart, so that there will be no hesitation at the critical moment. In the new era and new journey, the officers and men of the “Red Second Company” use the honor of the “First Military Regulations” pilot company to educate and motivate officers and men, systematically study the regulations and various rules and regulations, and enhance the officers and men' awareness of abiding by the rules and disciplines in actual combat training, disaster relief and other tasks and daily management, and put the iron discipline in the forefront.

That winter, a heavy snowstorm suddenly fell overnight in Liaodong.

Getting up early in the morning, looking at the mountain village covered with heavy snow, the squad leader Li Shengjie, who was on vacation at home, was a little worried. He had to return to the team after the vacation. Today was the day he had to catch the train, and the heavy snow disrupted his plan.

“Son, call the company to reflect the actual situation!” Li Shengjie's mother advised. Li Shengjie said that if there are difficulties, they should be overcome first. There is no need to break the company's rules because of a little difficulty!

Under the concerned eyes of his parents, Li Shengjie did not hesitate to put on his backpack and set off on the way back. Heavy snow covered the mountain village and hid the road. Li Shengjie walked through the mountains and forests, crossed the ditches and ridges, and stumbled out of the snowy field. When he got on the train, he felt a burst of tingling on his body. When he took off his clothes when he returned to the team, he saw bruises all over his body.

Listening to the stories of the officers and men of the “Red Second Company” telling about abiding by the rules and disciplines, the reporter suddenly understood why this company had the confidence to shout: “There is no unfinished task, no insurmountable difficulties, and no unbeatable enemies.”

A drill witnessed “infinite combat effectiveness in discipline” -

Without iron discipline, there will be no new victory on the battlefield

During the interview with the “Red Second Company”, the officers and men repeatedly mentioned the first exercise after the reform and adjustment.

In 2018, the company participated in a cross-regional drill. The battle entered a white-hot stage, and multiple companies were ordered to conduct penetration missions at the same time to seize key positions.

For the participating companies, this was a silent contest. Everyone was eager to fight, and everyone wanted to be the first to plant the red flag on the top of the mountain. When this stage of the exercise ended, the “Red Second Company” was the only company that successfully passed through the opponent's defense line and successfully seized the position.

When summarizing the review, everyone found that the “Red Second Company” was different-

Some companies were eager to achieve success, did not scientifically plan the route, and did not evacuate and conceal in time, were discovered by the opponent, and were hit by precise strikes; some companies became more and more “impulsive” in the battle, and forced through the fire blocking area, resulting in a large loss, and were unable to fight again in the future... Only the officers and men of the “Red Second Company” sometimes dispersed into small groups to quietly infiltrate and fight independently, and sometimes the whole company gathered to attack, and they were free to control.

“Behind every step that is flexible and seamless is the unquestionable iron discipline and strict rules.” Combining the analysis of specific actions and introducing the experience, the officers and men of the “Red Second Company” said that on the basis of understanding the battlefield conditions and environment, it is necessary to rely on the prohibition of orders to ensure that the troops “gather and disperse in sync and act in unison”, otherwise it is easy to “disperse and cannot gather, gather and easily exposed”.

With iron discipline, the “Red Second Company” has successfully completed its tasks in major exercises and trainings over the years, and has been recognized and commended by superiors many times.

Upon learning that the reporter was interviewing the “Red Second Company”, a staff officer of the brigade took the initiative to find the reporter and wanted to talk to him.

In 2021, a forest fire broke out near the station. The staff officer went forward with the disaster relief team to conduct the task. He witnessed the “Red Second Company” being the first to arrive in the disaster area and the first to enter the fire scene to put out the fire, and sincerely sighed that “there is infinite combat power in discipline”.

The quick response comes from the company's officers and men' usual conscientious implementation of combat readiness norms without compromise. When the staff officer went to the grassroots to inspect the combat readiness work, he found that the officers and men of the “Red Second Company” always strictly followed the combat readiness specifications to do all the work

strictly and practically, and the equipment and materials were refined to single equipment, single vehicle, and single soldier, and the data of bridges, tunnels, culverts, and roads in the mission area were updated regularly.

Looking through the combat readiness documents of the “Red Second Company”, the reporter could not help but marvel. The officers and men checked individual combat readiness materials such as individual action cards, first aid kits, and carrying equipment every day; the company checked the combat readiness items such as plans and plans, action training, vehicle equipment, and gun accessories every week to ensure that they could “automatically pop up” as soon as there was a mission, and they could be quickly dispatched at the command.

A few days ago, the company organized a military intelligence study to analyze the winning rules of modern warfare. After the officers and men combined the open source information and carefully studied the lessons of a modern air battle failure, they found that one of the root causes was that the frequency discipline was not strictly enforced, resulting in the radar signal exposing their own targets, and they were hunted by the opponent.

A series of actual combat exercises, military research, and situation and combat readiness education have strengthened the concept of the officers and men of the “Red Second Company”: without iron discipline, new victories on the battlefield cannot be won.

From “not taking a sweet potato” to “not collecting a basket of chestnuts” -

No matter how time and space change, iron discipline will not fade a bit

That autumn, the chestnuts in the Central Plains were ripe.

The officers and men of the “Red Second Company” who were participating in exercises in a mountainous area in southern Henan gathered in a chestnut forest in the mountains. According to the plan, all the officers and men of the company took their positions and cooperated with each other, and soon conducted various construction operations under the forest.

At night, the autumn wind blew up and blew down a lot of chestnuts. When they got up the next morning, looking at the chestnuts all over the ground, the officers and men couldn't help but worry. If they didn't deal with it, it would affect their actions; if they dealt with it, they were worried about affecting the relationship between the military and the people. The two company commanders decided to use the training interval to organize all the officers and men of the company to collect the fallen chestnuts and pile them under the tree.

A few days later, the villagers took baskets up the mountain to pick chestnuts and were stunned by the scene in front of them. Looking at the officers and men who were packing up and preparing to go to “fight”, they said they would give everyone a basket of chestnuts. But the officers and men abided by the discipline and refused to accept it. Today, recalling this experience, many officers and men still smile.

This basket of chestnuts reminded the officers and men of the classic scene more than 90 years ago-

In the autumn of 1927, the sweet potatoes in the Luoxiao Mountains were harvested. A team passed a sweet potato field, and the hungry soldiers instinctively dug out the sweet potatoes and ate them up.

This scene has long been commonplace for the people. The villagers who were afraid of “soldier bandits” hid in the mountains early.

Witnessing all this, Comrade Mao Zedong, the commander of this team, fell into deep thought: the team after the Autumn Harvest Uprising had not yet eliminated the old habits and established new disciplines, and military discipline must be strictly enforced. The next morning, as the team was about to set off, he stood on a thunder stone and loudly announced three rules of discipline:

1. Follow orders in action; 2. Do not take a single sweet potato from the masses; 3. The property of the local tyrants must be returned to the public.

This is the prototype of the “first military regulation” and the “first discipline story” in the company's memory.

No matter how time and space change, the iron discipline will not fade a bit. From “not taking a single sweet potato from the people” to “not taking a basket of chestnuts from the masses”, it has become a footnote of the times for the descendants of the “Red Second Company” to abide by the mass discipline.

In recent years, the troops have conducted frequent training activities, and half of the time is spent outside every year. The company organizes mass discipline counseling and teaching in combination with functional tasks, uses red resources to harmonize military-civilian relations, analyzes negative examples and makes good case warnings, and guides officers and men to strengthen their ideological consciousness of abiding by discipline.

During a mobile training, the superior required that the lights must be turned off during night driving. When passing by the gate of a school, the driver Xue Cheng felt that the infantry fighting vehicle was bumped. “It's probably something that was run over.” Xue Cheng thought subconsciously, but the mission did not allow him to get off the car to check.

The next day, after the mission was over, Xue Cheng reported to the company and returned to the “site of the incident”. He found that he had accidentally run over a corner of the flower bed at the door the night before, so he took the initiative to find the school leaders to ask for compensation.

“It's just a few bricks, we'll fix it another day.” After checking the damage, the school leaders thought the damage was not serious and did not intend to ask the officers and men to compensate. Xue Cheng said seriously: “Damaged things must be compensated. This has always been the rule of our company.” With his insistence, the corresponding money was compensated.

The reporter learned that the school rehearsed a stage play based on this story, which became a vivid teaching material for students' national defense education. Many children have been subtly imprinted with the idea of patriotism and support for the army while listening to stories and watching programs.

As the sun sets, the officers and men of the “Red Second Company” who returned from shooting passed by the reporter in a line, and the loud singing echoed in the forest: “Every revolutionary soldier must remember the three major disciplines and eight points of attention: First, all actions must be under command, and only in unison can victory be achieved...

Let iron discipline become “conscious discipline”

■ Lei Jianbo

more than 90 years ago, Comrade Mao Zedong established the “first military regulation” of the People's Army. As the pilot unit of the year, the officers and men of the “Red Second Company of the Flying Luding Bridge” always kept these disciplines and regulations in mind and practiced them, sublimating them into the political consciousness of “the Party commanding the gun” and transforming them into the action consciousness of obeying orders. Under the demonstration of a company, iron discipline has entered the genes of the People's Army from now on.

Comrade Mao Zedong once said that the reason why this army is powerful is that all those who participate in this army have conscious discipline. Establishing the “first military regulation” and always putting iron discipline in the forefront, let the People's Army become an advanced force different from all old armies, and become an invincible and powerful army-

Because of “conscious discipline”, the image of the people's soldiers has been established. During the Long March, the Red Army would rather chew grass roots and eat belts than take a grain of barley from the masses; during the Liberation War, During the war, PLA soldiers in Shanghai slept in the cold wind on the streets without disturbing the people.

Because of “conscious discipline”, the People's Army has created miracles in the history of war. In the Battle of Huangyadong, the Eighth Route Army soldiers strictly enforced combat discipline in the face of the crazy attack of the Japanese army, and no one evacuated the battle position without authorization; on the ice and snow battlefield of the War to Resist U.S. Aggression and Aid Korea, the Volunteer Army soldiers did not move even if they were frozen into ice sculptures, and resolutely conducted the blocking mission with iron discipline.

History and practice have repeatedly proved that discipline is the life and strength of the People's Army. We must pay more attention to and strengthen discipline construction, imprint iron discipline in our hearts, and forge a strong military soul in obeying the party's command; turn iron discipline into firm actions, and temper our style in abiding by rules and disciplines.

Only by making iron discipline a “conscious discipline”, condensing iron will, tempering iron style, and ensuring that all actions are under command and move forward in unison, can we forge a victorious army that obeys the party's command, can win battles, and has a good style.

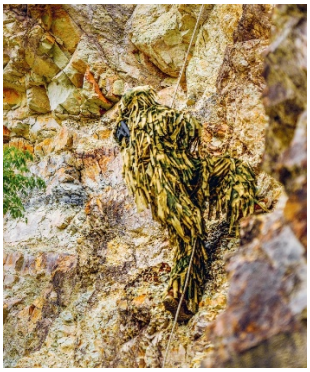
陆军某旅狙击专业考核 山岳丛林 “猎手”出击

来源：解放军报 作者：刘德文 邓宏洲 左文杰 责任编辑：李庆桐 2025-06-17



山岳丛林 “猎手”出击

——陆军某旅狙击专业考核影像

■刘德文 邓宏洲 左文杰 摄影报道

牵引横越通过河流.

攀登崖壁.

狙击小组官兵快速出击.

开展实弹射击考核.

晨光熹微，薄雾轻笼. 南国山岳丛林，随着一声令下，狙击小组官兵向着目标地域进发，陆军某旅一场狙击专业考核悄然展开.

出发不久，狙击小组遭“敌”袭扰. 指挥员命令官兵迅速与“敌”脱离接触，潜入密林深处，变更行军路线.

行进途中，一条河流出现在前方. “准备绳索，进行牵引横越！”小组成员密切配合，借助绳索依次通过河流，随后武装奔袭至目标地域.

“发现目标！”官兵未及休整，便接到射击考核命令. 他们快速修正枪械参数，调整呼吸，锁定目标. “砰！砰！”枪声响起，目标被精准击中.

“一名合格的狙击手，既要有一剑封喉的本领，还要能进行战场侦察、引导火力打击……”考核组组长介绍，此次考核连贯设置隐蔽渗透、武装奔袭、应用狙击等课目，检验狙击手在复杂条件下综合作战和精准狙杀能力.

山峦葱茏，夕阳西下. 考核结束后，狙击手们围坐在一起，梳理考核中暴露的问题短板，研究解决措施.

Sniper Professional Assessment of a Certain Army Brigade, Mountain Jungle “Hunter” Attacks

Source: PLA Daily Author: Liu Dewen, Deng Hongzhou, Zuo Wenjie Editor: Li Qingtong 2025-06-17

Mountain jungle “Hunter” attacks

——Images of sniper professional assessment of a certain army brigade

■Photo report by Liu Dewen, Deng Hongzhou, Zuo Wenjie

Towed across the river.

Climbing the cliff.

Sniper team officers and men quickly attacked.

Live-fire shooting assessment.

The morning light was dim and the mist was light. In the mountain jungle of the southern country, with an order, the officers and men of the sniper team headed towards the target area, and a sniper professional assessment of a certain army brigade was quietly launched.

Soon after the departure, the sniper team was harassed by the “enemy”. The commander ordered the officers and men to quickly break contact with the “enemy”, sneak into the depths of the dense forest, and change the marching route.

On the way, a river appeared in front. “Prepare the ropes and start the traction crossing!” The team members worked closely together, using the ropes to cross the river one by one, and then rushed to the target area armed.

“Found the target!” The officers and men received the shooting test order before they had time to rest. They quickly corrected the gun parameters, adjusted their breathing, and locked the target. “Bang! Bang!” The gunshots rang out, and the target was accurately hit.

“A qualified sniper must not only have the ability to kill with one sword, but also be able to conduct battlefield reconnaissance and guide firepower strikes...” The leader of the assessment team introduced that this assessment has set up concealed infiltration, armed raids, and applied sniping courses to test the snipers' comprehensive combat and precise sniping capabilities under complex conditions.

The mountains are lush and the sun is setting. After the assessment, the snipers sat together to sort out the problems and shortcomings exposed in the assessment and study solutions.

第 82 集团军某部：官兵自编手册激活训练“活教材”

来源：解放军报 作者：蔡广森 刘小云 责任编辑：李庆桐 2025-06-17

第 82 集团军某旅某连注重总结运用官兵智慧——

自编手册成训练“活教材”

■蔡广森 解放军报特约通讯员 刘小云

“雨天炮栓防锈三步法：抹黄油、裹纱布、勤转动！”6 月上旬，第 82 集团军某旅某连组织装备维修保养. 列兵李佳琦手拿一本“独家秘笈”——一级上士刘建雨编写的《装备维修指南》，根据里面的图片说明和保养口诀，认真拆卸擦拭每个零部件.

武器装备都有专门的训练教材和操作规范，官兵为何还要自编手册？翻开这本《装备维修指南》，笔者才发现，这本小手册是参照操作规范编写的，包含了常见故障排除方法、流程要点，通篇用的是通俗易懂的表述，既好记，又实用.

“鼓励官兵结合岗位实践自编手册，是我们破解训练难题、提升训练质效的有力举措. ”该连贾连长介绍，去年一次演练中，某型火炮出现故障，连队一名军士临时受领排障任务，却连续几个步骤出现失误. 事后复盘，连队技师何子豪认为排除故障并不难，只是操作说明中需要背记的内容太多. 后来，他根据自身经验，编写了一本简明手册. 运用这本小册子，官兵排除类似故障效率明显提升.

一石激起千层浪. “连队有很多专业，如果每个专业都有一本简单易懂的小册子，不就能更好提升专业训练效率吗？”循着这样的思路，该连鼓励官兵结合自身岗位总结提炼，形成了涵盖侦察、火力、通信、伪装等专业的 13 本手册.

这些手册形式不拘一格，凝结着官兵的创新和智慧，很多都是经过硝烟检验的技能：中士沈志强编写的《高炮操作精要》，详细记录了不同气象条件下的射击要领；无人机操作手李响编写的《无人机操作十要》，总结归纳了无人侦察技巧；干部王铮编写的《雷达搜索手册》，提供了操作性很强的技术指引……

“跳频搜索像翻书、波形切换要迅速、假目标来别慌神、手动跟踪最靠谱. ”笔者翻看一本《雷达操作指南》发现，第 37 页用红色标注的“抗电磁干扰 12 招”格外醒目. 手册编写者何子豪说，这是他总结多次演训经验得来的口诀.

“所有手册都是活页的，可以结合实践及时更新. ”贾连长介绍，他们会将平时训练最新破解的难题、新研练的招法，及时充实到各专业小册子中，让大家随时掌握.

如今，自编手册已成为连队官兵训练时自发携带的“活教材”，来自实践的鲜活经验有力促进了训练质效提升. 前不久，该连运用官兵编写的《雷达操作协同要诀》优化火力链路，不仅反应时间大幅缩短，命中率也较以往明显提升.

据了解，该连还准备邀请兄弟单位相关专业骨干参与编写自编手册，更大范围共享官兵创新创造成果. 同时，采取情景模拟教学、故障排除推演等方式，深化官兵对手册内容的理解应用，持续为战斗力提升注入强劲动能.

A Certain 82nd Group Army Unit: Officers and Men Self-Compiled Manuals Activate Training “Living Textbooks”

Source: PLA Daily Author: Cai Guangsen Liu Xiaoyun Editor: Li Qingtong 2025-06-17

A certain company of a certain brigade of the 82nd Group Army pays attention to summarizing and applying the wisdom of officers and men——

Self-compiled manuals become “living textbooks” for training

■ Cai Guangsen, special correspondent of the PLA Daily Liu Xiaoyun

“Three-step method to prevent rust on the bolt in rainy days: apply butter, wrap gauze, and turn frequently!” In early June, a certain company of a certain brigade of the 82nd Group Army organized equipment maintenance. Private Li Jiaqi held an “exclusive secret book” - the “Equipment Maintenance Guide” written by Sergeant Liu Jianyu, and carefully disassembled and wiped each component according to the picture instructions and maintenance formulas in it.

Weapons and equipment have special training materials and operating specifications, so why do officers and men still need to compile manuals? After opening this “Equipment Maintenance Guide”, the author discovered that this small manual was written with reference to the operating specifications. It contains common troubleshooting methods and process points. The whole manual uses easy-to-understand expressions, which are both easy to remember and practical.

“Encouraging officers and men to compile manuals based on job practices is a powerful measure for us to solve training problems and improve training quality and efficiency.” The company commander Jia introduced that during an exercise last year, a certain type of artillery broke down. A sergeant in the company temporarily received the task of troubleshooting, but made mistakes in several steps. After reviewing the situation, the company technician He Zihao believed that troubleshooting was not difficult, but there were too many contents to remember in the operating instructions. Later, he compiled a concise manual based on his own experience. Using this booklet, officers and men have significantly improved their efficiency in troubleshooting similar faults.

A stone stirs up a thousand waves. “The company has many specialties. If each specialty has a simple and easy-to-understand booklet, wouldn't it be able to better improve the efficiency of professional training?” Following this idea, the company encouraged officers and men to summarize and refine based on their own positions, forming 13 manuals covering reconnaissance, firepower, communication, camouflage and other specialties.

These manuals are eclectic in form, condensing the innovation and wisdom of officers and men, and many of them are skills that have been tested by gun smoke: “The Essentials of Anti-aircraft Gun Operation” written by Sergeant Shen Zhiqiang records in detail the shooting essentials under different weather conditions; “Ten Essentials of Drone Operation” written by UAV operator Li Xiang summarizes unmanned reconnaissance skills; “Radar Search Manual” written by cadre Wang Zheng provides highly operational technical guidance...

“Frequency hopping search is like turning a book, waveform switching should be fast, don't panic when a false target comes, and manual tracking is the most reliable.” The author flipped through a “Radar Operation Guide” and found that the “12 Ways to Anti-Electromagnetic Interference” marked in red on page 37 was particularly eye-catching. The manual compiler He Zihao said that this was a formula he had gained from summarizing many training experiences.

All manuals are loose-leaf and can be updated in time in combination with practice. “Captain Jia introduced that they will timely enrich the latest problems solved in daily training and the newly developed tactics into various professional booklets so that everyone can master them at any time.

Nowadays, self-compiled manuals have become “living textbooks” that the company's officers and men carry spontaneously during training. The fresh experience from practice has effectively promoted the improvement of training quality and efficiency. Not long ago, the company used the “Key Points of Radar Operation Coordination” compiled by officers and men to optimize the firepower link, which not only greatly shortened the reaction time, but also significantly improved the hit rate compared with the past.

It is understood that the company is also preparing to invite relevant professional backbones from brother units to participate in the compilation of self-compiled manuals, so as to share the innovation and creation results of officers and men on a larger scale. At the same time, scenario simulation teaching, troubleshooting deduction and other methods are adopted to deepen the officers and men' understanding and application of the contents of the manual, and continue to inject strong momentum into the improvement of combat effectiveness.

第 80 集团军某旅优化新兵“第二适应期”培养模式

来源：解放军报 作者：王宏阳 付君臣 责任编辑：林诗清 2025-06-19

第八十集团军某旅优化新兵“第二适应期”培养模式——

嵌入任务编组 加速能力生成

■王宏阳 解放军报特约记者 付君臣

“遭‘敌’火力压制，各组迅速处置！”日前，第 80 集团军某旅战术训练场上练兵正酣. 训练中，下连不久的新兵郑浩持枪跃进，与战友交替掩护向“敌”目标迂回接近，准备拔除“敌”前沿火力点. 这是该旅将新兵嵌入任务编组加钢淬火的一幕.

“新兵是部队建设的新鲜血液，提升他们的军事素质和战斗本领等不起、慢不得. ”该旅领导介绍，以往新兵下连后，主要采取“老兵带、新兵看”等组训方式，导致新兵适岗周期长、能力提升慢.

有一年，该旅参加上级组织的对抗训练，当时还是新兵的唐家毅被编入突击组. 首次直面“炮火硝烟”的他，在穿越“染毒地带”课目中，因佩戴防毒面具速度慢，被烟雾呛得呼吸困难. 见状，班长一把将他拉到掩体后说道：“如果这是战场，敌人不会给你第二次机会！”

那次训练结束后，该旅组织各单位针对新兵在训练中暴露的问题短板，开设“战场生存特训课”. 唐家毅和战友们在真难严实的环境中经受磨砺，瞄准战场急需开展精研细训. 半个月后，一场对抗训练再次打响. 导调组突然给出“遭‘敌’化学武器袭击”特情，唐家毅不仅很快完成个人防护，还协助战友及时调整突击路线，圆满完成任务.

“新兵下连后，专业训练全面展开，一些新兵对训练课目增多、强度增大感到不适. ”该旅领导告诉记者，近年来，他们探索优化新兵“第二适应期”培养模式，前移训练关口，把新兵灵活编入任务班组，帮助他们在实践淬炼中顺利度过“第二适应期”. 首次定岗后，旅队为每名新兵建立成长档案，帮助他们找准努力方向，为后续固强补弱提供参考；遴选一批军事素质过硬的班长骨干，结对帮带基础薄弱的新兵，帮助他们缩短能力生成周期.

新兵吴卓群下连后，对无人装备产生了浓厚兴趣，但由于基础薄弱，实操水平在低层次徘徊. 所在连队得知情况后，安排比武冠军、中士陈成帮带吴卓群，从基础参数调试到复杂地形侦察逐项攻关. 经过一段时间努力，吴卓群的实操能力突飞猛进. 一次对抗训练中，吴卓群操控无人装备，精准测定遭“敌”毁坏的道路面积，为工程机械抢修提供了数据支撑.

在任务中历练，在硝烟中成长. 前段时间，该旅组织群众性岗位练兵比武. 新兵曾世贤面对“通信指挥遭‘敌’压制干扰”特情，沉着冷静调整通信模式，建立抗干扰通信链路；某营机动至陌生地域开展实装战术训练，新兵皇甫保泽全程参与，与战友们一起完成多项任务.

A Brigade of the 80th Group Army Optimizes the Training Model of the “Second Adaptation Period” for Recruits

Source: PLA Daily Author: Wang Hongyang Fu Junchen Editor: Lin Shiqing 2025-06-19

A brigade of the 80th Group Army optimizes the training model of the “second adaptation period” for recruits——

Embedded in task formation to accelerate capability generation

■ Wang Hongyang, special correspondent of the PLA Daily Fu Junchen

“When suppressed by the 'enemy' firepower, each group quickly dealt with it!” A few days ago, a brigade of the 80th Group Army was training in full swing on the tactical training ground. During the training, Zheng Hao, a new recruit who had just joined the company, jumped forward with a gun, and alternately covered with his comrades to approach the “enemy” target in a roundabout way, preparing to remove the “enemy” front-line firepower point. This is a scene of the brigade embedding recruits into the task formation and quenching steel.

“New recruits are the fresh blood of the army's construction. Improving their military quality and combat skills cannot wait or be slow.” The brigade leader introduced that in the past, after the new recruits were assigned to the company, they mainly adopted the training methods such as “old soldiers lead and new recruits watch”, which led to a long period of job adaptation and slow improvement of their abilities.

One year, the brigade participated in the confrontation training organized by the superiors, and Tang Jiayi, who was still a new recruit at the time, was assigned to the assault team. He faced the

“gunfire and smoke” for the first time. In the course of crossing the “contaminated zone”, he was choked by the smoke and had difficulty breathing because of the slow speed of wearing a gas mask. Seeing this, the squad leader pulled him to the bunker and said: “If this is a battlefield, the enemy will not give you a second chance!”

After that training, the brigade organized various units to open a “battlefield survival special training course” to target the problems and shortcomings exposed by the new recruits in the training. Tang Jiayi and his comrades were tempered in a really difficult and rigorous environment, aiming at the urgent need of the battlefield to conduct intensive training. Half a month later, a confrontation training started again. The command and dispatch group suddenly gave the special situation of “being attacked by 'enemy' chemical weapons”. Tang Jiayi not only quickly completed personal protection, but also assisted his comrades to adjust the assault route in time and successfully completed the task.

“After the recruits were assigned to the company, professional training was fully launched. Some recruits felt uncomfortable with the increase in training subjects and the increase in intensity.” The leaders of the brigade told reporters that in recent years, they have explored and optimized the training mode of the “second adaptation period” for recruits, moved the training threshold forward, and flexibly incorporated recruits into task teams to help them successfully pass the “second adaptation period” in practical tempering. After the first posting, the brigade established a growth file for each recruit to help them find the right direction for their efforts and provide reference for subsequent strengthening and strengthening; a group of squad leaders with strong military qualities were selected to pair up with recruits with weak foundations to help them shorten the cycle of ability generation.

After the recruit Wu Zhuoqun was assigned to the company, he developed a strong interest in unmanned equipment, but due to his weak foundation, his practical level was at a low level. After the company learned of the situation, it arranged for the champion of the competition, Sergeant Chen Cheng, to help Wu Zhuoqun, from basic parameter debugging to complex terrain reconnaissance. After a period of hard work, Wu Zhuoqun's practical ability has improved by leaps and bounds. In a confrontation training, Wu Zhuoqun controlled unmanned equipment to accurately measure the area of the road destroyed by the “enemy”, providing data support for the repair of engineering machinery.

Experience in the mission and grow in the smoke of gunpowder. Some time ago, the brigade organized mass post training competitions. Faced with the special situation of “communication command being suppressed and interfered by the 'enemy'“, the recruit Zeng Shixian calmly adjusted the communication mode and established an anti-interference communication link; a battalion moved to an unfamiliar area to conduct actual equipment tactical training, and the recruit Huangfu Baoze participated in the whole process and completed multiple tasks with his comrades.

陆军某旅一场单装考核引发官兵反思：隐蔽伪装，为何功亏一篑

来源：解放军报 作者：余睿喆 宋世杰 钱志勇 责任编辑：林诗清 2025-06-19

陆军某旅一场单装考核引发官兵反思——

隐蔽伪装，为何功亏一篑

■余睿喆 解放军报特约通讯员 宋世杰

该旅官兵开展战备拉动训练. 万智奇 摄

前不久，陆军某旅一场单装考核在某地展开.

“‘敌’无人机侦察！”机动途中，特情突至，某连中士、班长宋康康立即带领班组对战车进行隐蔽伪装.

搭设伪装网、遮盖反光部位、保持无线电静默……大家分工协作，熟练展开作业. 前一阶段训练中，班组围绕隐蔽伪装课目专门组织集中研练，摸索形成了一套操作规范. 凭借经验，大家很快将战车隐蔽伪装完毕.

“嗡、嗡、嗡……”旋翼声由远及近，“敌”无人机渐渐逼近. 战车内，宋康康信心满满：刚刚检查了一遍，没发现任何破绽. 这次伪装无论效果还是用时，都高于考核标准.

“敌”无人机旋翼声逐渐变小，宋康康悬着的心终于放了下来. 确认“敌”无人机远离后，宋康康带领班组准备撤去伪装网继续行军.

“位置暴露，遭‘敌’炮火覆盖！”车载电台突然传来的通报，让宋康康和战友们一下子愣在原地.

“伪装效果和操作用时都符合标准，为何被判‘位置暴露’？”复盘会上，宋康康感到不解，“我们不光隐蔽伪装了战车，连车辙印都用杂草覆盖了，问题到底出在哪？”

面对质疑，导调组人员何迪将无人机拍摄的影像，投射到大屏幕上，大家看后倒吸一口凉气——

画面中一处草地，半人高的草丛里长着几棵树. 伪装网覆盖严密，将战车包裹得严严实实. 然而，每张伪装网周围都有一片杂草被踩倒，白色的植物根茎露了出来，形成白绿相间的痕迹，清晰地将战车轮廓“标记”出来.

这时宋康康才反应过来：隐蔽伪装战车过程中，班组围绕搭设伪装网展开作业，伪装完成后，他还要求大家环顾一周查缺补漏，自己最后又绕着战车检查一遍. 在大家不断踩踏中，痕迹逐渐成形.

何迪分析说，考核中，大家的精力主要集中在“人员如何配合才能速度更快”“伪装网如何搭建才能不被‘敌’无人机发现”，仅从自身角度去“欺骗”无人机的“眼睛”. 这样一来，隐蔽伪装作业时在草地上留下的痕迹反而容易让对手侦察识别.

然而，宋康康依然心存疑惑：以往考核也经常使用无人机模拟对手侦察，为什么过去没发现异常？

“战场情况复杂多变，必须站在对手的角度，以实战化思维来审视我隐蔽伪装的可靠性和可行性. ”何迪拿出近几年考核中无人机拍摄的画面，选择了几个具有代表性的案例：以往考核中，无人机大多模拟对手开展高空侦察，主要对大型目标和常见伪装特征进行识别. 近年来，无人机技术快速发展，空中侦察能力大幅提升，战场上的一草一木尽收眼底，平时不易察觉问题也暴露出来.

“隐蔽伪装，为何功亏一篑？”随后召开的议战议训会上，一位旅领导的发言直击要害，“训练‘老思路’跟不上战场‘新形势’，继续在过去的经验里‘打转转’，上了战场是要吃亏的. 隐蔽伪装对付的是敌人、欺骗的是对手，大家既要紧盯未来战场打好‘头脑中的战斗’，更要跳出固有思维多从对手角度检视差距不足. ”

该旅以此为契机，组织官兵开展群众性讨论，坚持按照实战标准查摆训练中存在的问题. 随后，他们组织机关干部分批深入基层，深挖训练中不符合实战要求的做法；并建立问题台账，能及时整改的立即整改，短期无法整改到位的制订整改措施、明确整改期限.

日前，笔者再次来到宋康康所在营，一名营领导告诉笔者，这段时间，他们围绕实战化训练存在的薄弱环节开展群众性讨论. 笔者在这名营领导的笔记本上看到，上面不仅清晰记录了“树立全维伪装理念，既要关注伪装本体，也要考虑周边环境变化”“要紧跟时代步伐，多从对手角度思考战争、研究战术、创新战法”等多个总结性观点，还详细列出了下一步改进措施.

“考核虽然结束了，但它带给官兵的思想冲击仍在继续. 针对问题，我们将细化措施、抓好整改，确保打一仗进一步. ”这名营领导说.

短　评

积极识变 主动应变

■钱志勇

兵法有云：兵无常势，水无常形. 古往今来，战场上从来没有一厢情愿之事，任何“万全”之策都是相对的.

因时、因势而变，才能赢得战场制胜先机. 战国时期，赵国常遭受游牧部落骑兵进犯，传统兵车、长矛难以招架. 赵武灵王为破困局，推行“胡服骑射”改革，令士兵改穿便于骑射的胡服，学习对手骑射之术. 改革后，赵国骑兵机动性和战斗力大增，多次击败对手. 正是因为主动顺应战场之变，赵国才收获胜利. 从这个角度看，陆军某旅官兵在隐蔽伪装过程中忽视将杂草踩倒引发的暴露风险，反映出部分官兵实战意识不强、对无人机侦察技术进步认识估计不足，仍用过去的经验应对战场新态势，必然导致考核失利.

“明者因时而变，知者随事而制”. 变是战场永恒不变的特征，面对战场之变，各级应强化主动意识，拓宽训练视野、摒弃惯性思维，努力把现代战争的基本规律和制胜机理搞清楚，把强敌对手研究透. 既要积极识变，更要主动应变，引导官兵紧盯科技之变、战争之变、对手之变，在思变应变中牢固树立战场思维，真想打仗的事情，真谋打仗的问题，真抓打仗的准备，聚焦备战打仗，深入推进实战化军事训练.

A Single Equipment Assessment of a Certain Army Brigade Caused Officers and Men to Reflect: Concealment and Camouflage, Why Did It Fail?

Source: PLA Daily Author: Yu Ruizhe Song Shijie Qian Zhiyong Editor: Lin Shiqing 2025-06-19 A single equipment assessment of a certain army brigade caused officers and men to reflect -- Concealment and camouflage, why did it fail? ■ Yu Ruizhe, special correspondent of the PLA Daily Song Shijie

The officers and men of the brigade conducted combat readiness training. Photographed by Wan Zhiqi

Not long ago, a single equipment assessment of a certain army brigade was conducted in a certain place. “'Enemy' drone reconnaissance!” During the maneuver, a special situation suddenly came, and a sergeant and squad leader of a certain company, Song Kangkang, immediately led the team to conceal and camouflage the tank. Set up camouflage nets, cover reflective parts, keep radio silent... Everyone divided the work and cooperated to conduct the operation skillfully. In the previous stage of training, the team organized concentrated training around the concealment and camouflage subjects and explored and formed a set of operating specifications. With experience, everyone quickly camouflaged the tank.

“Buzz, buzz, buzz...” The sound of the rotor came from far away, and the “enemy” drone gradually approached. In the tank, Song Kangkang was full of confidence: I just checked it and found no flaws. This camouflage is higher than the assessment standard in terms of effect and time.

The sound of the “enemy” drone's rotor gradually became smaller, and Song Kangkang's hanging heart finally settled down. After confirming that the “enemy” drone was far away, Song Kangkang led the team to prepare to remove the camouflage net and continue marching.

“The position is exposed and covered by “enemy” artillery fire!” The sudden report from the car radio made Song Kangkang and his comrades stunned.

“The camouflage effect and operation time are in line with the standards, why was it judged as 'exposed position'?” At the review meeting, Song Kangkang was puzzled, “We not only concealed and camouflaged the tank, but also covered the wheel tracks with weeds. What is the problem?”

Faced with doubts, He Di, a member of the guidance and coordination team, projected the images taken by the drone onto the big screen, and everyone took a breath of cold air after watching it-

There was a grassland in the picture, and several trees grew in the half-human-high grass. The camouflage net covered tightly, wrapping the tank tightly. However, there was a piece of weeds trampled around each camouflage net, and the white plant roots were exposed, forming white and green traces, clearly “marking” the outline of the tank.

At this time, Song Kangkang reacted: In the process of concealing and camouflaging the tank, the team conducted operations around the camouflage net. After the camouflage was completed, he also asked everyone to look around to check for deficiencies and make up for them, and he finally checked around the tank again. As everyone continued to trample, the traces gradually took shape.

He Di analyzed that during the assessment, everyone's energy was mainly focused on “how to cooperate with personnel to be faster” and “how to build a camouflage net so that it will not be discovered by the 'enemy' drone”, and only “deceive” the “eyes” of the drone from their own perspective. In this way, the traces left on the grass during the covert camouflage operation are easier for the opponent to detect and identify.

However, Song Kangkang still has doubts: In the past assessments, drones were often used to simulate opponent reconnaissance, so why didn't they find any abnormalities in the past?

“The battlefield situation is complex and changeable. We must stand from the opponent's perspective and use practical thinking to examine the reliability and feasibility of our concealment and camouflage.” He Di took out the pictures taken by drones in the assessments in recent years and selected several representative cases: In the past assessments, drones mostly simulated opponents to conduct high-altitude reconnaissance, mainly identifying large targets and common camouflage features. In recent years, drone technology has developed rapidly, and aerial reconnaissance capabilities have been greatly improved. Every blade of grass and every tree on

the battlefield can be seen, and problems that are not easy to detect at ordinary times are also exposed.

“Why did the concealment and camouflage fail?” At the subsequent discussion meeting on war and training, a brigade leader's speech hit the nail on the head, “The 'old ideas' of training cannot keep up with the 'new situation' on the battlefield. If you continue to 'go around' in the past experience, you will suffer on the battlefield. Concealment and camouflage deal with the enemy and deceive the opponent. We must not only keep a close eye on the future battlefield and fight the 'battle in our heads', but also jump out of the inherent thinking and examine the gaps and deficiencies from the perspective of the opponent.” The brigade took this as an opportunity to organize officers and men to conduct mass discussions and insist on checking and correcting problems in training according to actual combat standards. Afterwards, they organized the cadres of the organs to go deep into the grassroots in batches to dig deep into the practices in training that did not meet the requirements of actual combat; and set up a problem ledger, and immediately rectified those that could be rectified in time, and formulated rectification measures and clarified the rectification deadlines for those that could not be rectified in the short term. A few days ago, the author came to Song Kangkang's battalion again, and a battalion leader told the author that during this period, they conducted mass discussions around the weak links in actual combat training. The author saw in the notebook of the battalion leader that it not only clearly recorded “establishing the concept of full-dimensional camouflage, paying attention to the camouflage itself, but also considering the changes in the surrounding environment”, “keeping up with the pace of the times, thinking about war from the perspective of the opponent, studying tactics, and innovating tactics”, and other summary views, but also listed in detail the next improvement measures.

“Although the assessment is over, the ideological impact it has brought to the officers and men continues. In response to the problems, we will refine the measures and do a good job of rectification to ensure that we can make progress after each battle.” The battalion leader said.

Short review

Actively recognize changes and take the initiative to respond

■ Qian Zhiyong

The art of war says: There is no constant situation for soldiers, and no constant shape for water. From ancient times to the present, there has never been a wishful thinking on the battlefield, and any “perfect” strategy is relative.

Only by changing with the times and the situation can we win the first chance to win on the battlefield. During the Warring States Period, Zhao State was often invaded by nomadic cavalry, and traditional chariots and spears were difficult to resist. In order to break the dilemma, King Wuling of Zhao promoted the “Hu clothing and horse riding” reform, requiring soldiers to wear Hu clothing that was convenient for horse riding and shooting, and learn the horse riding and

shooting skills of their opponents. After the reform, the mobility and combat effectiveness of Zhao's cavalry increased greatly, and they defeated their opponents many times. It was precisely because of the active adaptation to the changes on the battlefield that Zhao won the victory. From this perspective, the officers and men of a certain brigade of the army ignored the exposure risk caused by trampling down weeds during the concealment and camouflage process, reflecting that some officers and men did not have a strong sense of actual combat, underestimated the progress of drone reconnaissance technology, and still used past experience to deal with the new battlefield situation, which inevitably led to the failure of the assessment.

“The wise change with the times, and the knowledgeable make decisions according to the situation.” Change is the eternal feature of the battlefield. In the face of changes on the battlefield, all levels should strengthen their initiative, broaden their training horizons, abandon inertial thinking, and strive to clarify the basic laws and winning mechanisms of modern warfare, and thoroughly study the strong enemies. We must not only actively recognize changes, but also proactively respond to them, guiding officers and men to keep a close eye on changes in technology, changes in warfare, and changes in opponents, firmly establish battlefield thinking in the process of thinking about and responding to changes, really want to fight, really plan for war, really prepare for war, focus on preparing for war, and deeply promote practical military training.

陆军某旅战士周越休假期间勇扑山火保林场

来源：中国军网-中国国防报 作者：韩帅 责任编辑：郭妍菲

2025-06-19

陆军某旅战士周越

勇扑山火保林场

中国国防报讯 韩帅报道：“平邑县白彦镇党委、政府代表全镇人民，向贵部战士周越表示由衷感谢……”仲夏时节，陆军某旅收到一封感谢信，该旅战士周越休假期间勇扑山火的事迹这才被人知晓.

前不久，山东省平邑县白彦镇枣梨村突发山火. 由于当地持续干旱，附近分布着数千亩省级生态林场及数十户村民房屋，火势一旦蔓延，将造成重大损失. 接到火情通报后，周越和村民立即携带灭火装备奔赴现场. 面对肆虐的火魔，他临危不惧，凭借部队所学的防灭火专业知识，迅速投入灭火行动. 据林场负责人介绍，周越不仅冲锋在灭火一线，还现场指导群众分工协作，利用铁锹、树枝等工具配合灭火. 其间，他熟练操作灭火装备，不断提醒大家注意安全距离. 经过 3 个多小时的连续奋战，明火全部扑灭，火场周边隐患彻底清除. 确认无复燃迹象且未造成人员伤亡后，周越放心离开.

周越在灭火战斗中表现突出并非偶然. 休假期间，周越将部队系统学习掌握的防灭火知识学以致用，主动和家乡生态林场防火值班队伍一道巡山排查隐患、入户宣传防火常识、协助维护灭火设备……归队后，他始终未向战友提及此事.

During His Vacation, Zhou Yue, a Soldier of a Certain Army Brigade, Bravely Put Out Mountain Fires to Protect Forest Farms

Source: China Military Network-China National Defense News Author: Han Shuai Editor: Guo Yanfei

2025-06-19

Zhou Yue, a soldier of a certain army brigade

Bravely put out mountain fires to protect forest farms

China National Defense News Han Shuai reported: “The Party Committee and Government of Baiyan Town, Pingyi County, on behalf of the people of the town, express sincere gratitude to your soldier Zhou Yue..." In midsummer, a certain army brigade received a letter of thanks, and the deeds of Zhou Yue, a soldier of the brigade, who bravely put out mountain fires during his vacation, were known.

Not long ago, a mountain fire broke out in Zaoli Village, Baiyan Town, Pingyi County, Shandong Province. Due to the continuous drought in the area, there are thousands of acres of provincial ecological forest farms and dozens of villagers' houses nearby. Once the fire spreads, it will cause heavy losses. After receiving the fire report, Zhou Yue and the villagers immediately rushed to the scene with fire-fighting equipment. Facing the raging fire demon, he was not afraid of danger, and relied on the professional knowledge of fire prevention and extinguishing learned by the troops to quickly engage in fire-fighting operations. According to the head of the forest farm, Zhou Yue not only rushed to the front line of firefighting, but also guided the masses on the spot to cooperate in the division of labor and use shovels, branches and other tools to cooperate in firefighting. During this period, he skillfully operated the firefighting equipment and constantly reminded everyone to pay attention to the safe distance. After more than 3 hours of continuous fighting, all the open flames were extinguished and the hidden dangers around the fire were completely eliminated. After confirming that there was no sign of re-ignition and no casualties, Zhou Yue left with peace of mind.

It is no coincidence that Zhou Yue performed outstandingly in the firefighting battle. During the vacation, Zhou Yue put into practice the fire prevention and extinguishing knowledge learned and mastered by the army system, and took the initiative to patrol the mountains with the fire prevention duty team of the ecological forest farm in his hometown to check for hidden dangers, go to households to publicize fire prevention knowledge, and assist in the maintenance of firefighting equipment... After returning to the team, he never mentioned this to his comrades.

强军故事砺兵心，第 83 集团军某旅引导官兵向身边典型看齐

来源：解放军报 作者：陶 然 覃肇朋 李少卿 责任编辑：尚晓敏 2025-06-21

第八十三集团军某旅引导官兵向身边典型看齐——

两次比武获佳绩 强军故事砺兵心

■陶 然 覃肇朋 李少卿

“没想到，这次强军故事会，一名列兵成了‘明星’.”

近日，第 83 集团军某旅举办一场“学习身边典型、激发强军动力”强军故事会，列兵周路通登上讲台，讲述自己在通信装备操作比武中奋力拼搏的故事，引发官兵强烈共鸣.

其实，周路通刚走上讲台时，台下不少官兵都颇感意外. 因为入伍还不到一年的他，尽管两次在大项比武中拿到奖牌，但军事训练总体成绩并不突出.

“当初推荐小周参加强军故事会时，我们也曾犹豫过，但他用过硬的专业实力证明了自己、打动了官兵.”周路通所在营营长告诉笔者.

入伍之初，周路通不太适应高强度的军事训练和快节奏的军营生活，加之体能考核成绩不佳，让一心想干出一番成绩的他深受打击，一度情绪低落.

周路通的情绪变化，很快引起连队干部骨干的注意. 他们分析发现，周路通训练成绩“两极分化”的特点比较突出：基础体能素质偏弱，但通信装备操作课目成绩遥遥领先. 连队干部骨干据此确定了帮助周路通“巩固长板、补齐短板”的帮带思路.

没过多久，旅队组织“军魂杯”群众性练兵比武活动. 在干部骨干的鼓励下，周路通报名参加了通信装备操作课目比武. 备赛期间，他反复研究比武细则，针对性推演相关流程，优化完善操作步骤；强化多组信道参数记忆训练，直到将每一组数据牢记于心；将电台键盘画在纸上随身携带，一有时间就拿出来进行模拟训练，逐步提升操作速度……

功夫不负有心人. 比武场上，周路通一路过关斩将，如愿摘得桂冠，令身边战友刮目相看.

后来，在集团军组织的一次专业比武中，周路通再次凭借过硬专业技能，取得通信装备操作课目第二名的好成绩.

比武结束后，周路通被旅队特聘为通信装备操作课目唯一一名列兵教练员，先后带出一批通信装备操作骨干.

“虽然只是一名列兵，但两次比武均荣获佳绩，周路通的成长故事，可以激励更多官兵立足战位精武强能. ”旅队计划组织强军故事会的消息传来，营党委研究决定，推荐周路通为候选人.

消息传出，引发一些官兵议论：“凭‘一招鲜’包打天下，以后谁还追求一专多能、全面过硬”“为啥不选综合素质全面过硬的老兵”……

“周路通有拼劲、有闯劲、有韧劲，尽管综合素质不够全面，但这不能成为否定其长处和优点的理由. ”该旅党委研究人员名单时，一班人深入讨论后形成共识：先进典型不可能十全十美，只要是一心为战、专心务战的优秀官兵，都是大家学习的榜样.

最终，周路通登上了旅队强军故事会讲台.

活动现场，来自该旅不同岗位、不同专业的官兵身边典型陆续登台讲述自己的强军故事：班长黄必准多年如一日深知兵、真爱兵、育精兵，战士王子豪扎根岗位勤学苦练成长为“神炮手”，连长李燕飞带领官兵参加上级整建制实战化考核勇夺桂冠……

“在众多先进典型中，周路通并不是最突出的，但他入伍不到一年就两次在大项比武中摘金夺银，对官兵触动很大. ”该旅领导介绍，周路通的奋斗经历，引发了身边战友对“如何立足岗位精武强能”的思考. 在周路通等先进典型的辐射带动下，旅队掀起“学习典型、争当典型、成为典型”热潮，官兵练兵备战热情持续高涨.

在该旅近期组织的一场实兵对抗训练中，面对“蓝军”轮番进攻，某连班长赵罗飞带领班组圆满完成任务，被评为先进个人. “当兵就要当尖兵，打仗就要打硬仗. ”赵罗飞说，身边榜样的故事让自己深受鼓舞，他将再接再厉，用实际行动带动更多战友精武强能.

尽管在强军故事会上收获了掌声，但周路通非常清醒：“与全面过硬的‘老先进’相比，我还有很多短板要补，决不能躺在功劳簿上吃老本. ”这段时间，连队充分发挥“三互”小组作用，为他量身制订了一套体能补差计划，助力他通过苦练精训实现全面进步.

The Story of Strengthening the Army Sharpens the Soldiers' Hearts. A Certain Brigade of the 83rd Group Army Guides Officers and Men to Emulate the Models Around Them

Source: PLA Daily Author: Tao Ran, Qin Zhaopeng, Li Shaoqing Editor: Shang Xiaomin 2025-06-21

A certain brigade of the 83rd Group Army guides officers and men to emulate the models around them——

Two competitions have achieved good results. The story of strengthening the army sharpens the soldiers' hearts

■Tao Ran, Qin Zhaopeng, Li Shaoqing

“I didn't expect that in this strong army story meeting, a private soldier became a 'star'.”

Recently, a certain brigade of the 83rd Group Army held a strong army story meeting of “Learning from the models around you and stimulating the motivation of strengthening the army”. Private Zhou Lutong took the stage and told the story of his hard work in the communication equipment operation competition, which aroused strong resonance among officers and men.

In fact, when Zhou Lutong first stepped onto the stage, many officers and men were quite surprised. Because he had been in the army for less than a year, although he won medals in two major competitions, his overall military training results were not outstanding.

“When we recommended Xiao Zhou to participate in the strong army storytelling session, we hesitated, but he proved himself with his solid professional strength and impressed the officers and men.” The battalion commander of Zhou Lutong's battalion told the author.

At the beginning of his enlistment, Zhou Lutong was not very adaptable to the high-intensity military training and fast-paced military camp life. In addition, his poor physical fitness test results made him, who was determined to make achievements, deeply depressed.

Zhou Lutong's emotional changes soon attracted the attention of the company's cadres and backbones. They analyzed and found that Zhou Lutong's training results were more prominent in “polarization”: his basic physical fitness was weak, but his communication equipment operation course results were far ahead. Based on this, the company's cadres and backbones determined to help Zhou Lutong “consolidate his strengths and make up for his weaknesses”.

Not long after, the brigade organized the “Military Soul Cup” mass training competition. Encouraged by the cadres and backbones, Zhou Lutong signed up to participate in the communication equipment operation course competition. During the preparation period, he repeatedly studied the competition rules, conducted targeted deductions of relevant processes, and optimized and improved the operation steps; strengthened the memory training of multiple sets of channel parameters until he remembered each set of data; drew the radio keyboard on paper and carried it with him, and took it out for simulation training whenever he had time, gradually improving the operation speed...

Hard work pays off. In the competition, Zhou Lutong won the championship as he wished, which impressed his comrades around him.

Later, in a professional competition organized by the group army, Zhou Lutong once again won the second place in the communication equipment operation course with his excellent professional skills.

After the competition, Zhou Lutong was specially hired by the brigade as the only private instructor of the communication equipment operation course, and successively brought out a group of communication equipment operation backbones.

“Although he is only a private soldier, he won good results in both competitions. Zhou Lutong's growth story can inspire more officers and men to stand on their positions and strengthen their abilities.” When the news that the brigade planned to organize a strong army story meeting came, the battalion party committee decided to recommend Zhou Lutong as a candidate.

The news triggered some officers and men to discuss: “With 'one trick to conquer the world', who will pursue one specialty and multiple skills, comprehensive and strong in the future?” “Why not select veterans with comprehensive and strong qualities?” ...

“Zhou Lutong is hardworking, enterprising and tenacious. Although his comprehensive qualities are not comprehensive, this cannot be a reason to deny his strengths and advantages.” When the brigade's party committee was researching the list of personnel, a group of people reached a consensus after in-depth discussions: advanced models cannot be perfect. As long as they are excellent officers and men who are dedicated to fighting and dedicated to fighting, they are role models for everyone to learn from.

Finally, Zhou Lutong stepped onto the podium of the brigade's strong army story meeting.

At the event, typical soldiers from different positions and professions of the brigade took the stage one after another to tell their stories of strengthening the army: squad leader Huang Bizhun has known soldiers, loved soldiers, and trained elite soldiers for many years; soldier Wang Zihao has been working hard to grow into a “magic gunner”; company commander Li Yanfei led officers and men to participate in the superior's whole-organization actual combat assessment and won the championship...

“Among many advanced models, Zhou Lutong is not the most outstanding, but he won gold and silver in major competitions twice in less than a year after joining the army, which has a great impact on officers and men.” The brigade leader introduced that Zhou Lutong's struggle experience has triggered his comrades-in-arms to think about “how to be based on the post and strengthen their ability”. Driven by the radiation of advanced models such as Zhou Lutong, the brigade has set off a wave of “learning from models, striving to be models, and becoming models”, and the enthusiasm of officers and men for training and preparation continues to rise.

In a real-life confrontation training organized by the brigade recently, facing the repeated attacks of the “blue army”, a company squad leader Zhao Luofei led the team to successfully complete the task and was rated as an advanced individual. “When you are a soldier, you must be a pioneer, and when you fight, you must fight hard battles.” Zhao Luofei said that he was deeply inspired by the stories of role models around him. He will continue to work hard and use practical actions to motivate more comrades to improve their martial arts and abilities.

Although he received applause at the strong army story conference, Zhou Lutong was very clear-headed: “Compared with the 'old advanced' who are all-round and strong, I still have many shortcomings to make up, and I must not rest on my laurels.” During this period, the company gave full play to the role of the “three mutual” group and tailored a set of physical fitness compensation plans for him to help him achieve comprehensive progress through hard training.

穿云破雾淬铁翼，陆军某旅锤炼低气象飞行硬功

来源：解放军报 作者：胡云艳 石芝鹏 责任编辑：尚晓敏 2025-06-21

陆军某旅锤炼低气象飞行硬功——

穿云破雾淬铁翼

■解放军报记者 胡云艳 特约通讯员 石芝鹏

低云笼罩，细雨绵绵. 日前，陆军某旅组织一场低气象条件下多课目飞行训练. 随着塔台指挥员一声令下，战机依次升空，飞向任务空域.

“复杂气象条件既是飞行训练的‘拦路虎’，也是砥砺飞行本领的‘磨刀石’. ”该旅领导介绍，前段时间驻地连续出现阴雨天气并伴有大风，他们利用低气象条件组织飞行训练，旨在从难从严磨砺官兵战斗本领，提升复杂条件下应急处置能力.

悬停、爬升、急转……在飞行员精准操纵下，战机灵活穿梭于云端. “前方云量多、能见度低，保持编队距离. ”指挥员根据气象信息及时提醒，各机组飞行员通过仪表判断飞行姿态，沉着操纵战机穿云破雾.

该旅领导介绍，此次训练，他们从难设置训练课目、科学配置训练力量，根据天气动态科学制订了穿越积雨云层、空中迷航等 10 余套空中特情处置预案. 同时，组织机务官兵加大对战机动力、通信等系统的检查力度，确保战机保持最佳状态.

雨雾弥漫，年轻飞行员芮闵麒操纵战机，开展仪表着陆课目训练. 接到指令，他根据仪表数据对战机相对位置作出判断，不断修正飞行姿态，操纵战机平稳着陆. “复杂气象条件下开展飞行训练，能见度低、风速变化快，要求参训飞行员操纵更精准、配合更密切、协同更精细. ”芮闵麒告诉记者.

“注意加强航线观察……”机场上空，一架架战机穿云破雨. 塔台指挥员和各战位官兵紧盯气象云图，全神贯注. 在空地严密配合下，参训飞行员圆满完成预定训练课目.

傍晚时分，训练结束. 走下战机，飞行员李安感慨道：“恶劣天气不仅没有影响训练进度，还帮助我们砺胆魄、强本领，练就打仗真功夫. ”

Breaking Through Clouds and Fog to Temper Iron Wings, a Certain Army Brigade Has Tempered The Hard Work of Low-Weather Flight

Source: PLA Daily Author: Hu Yunyan Shi Zhipeng Editor: Shang Xiaomin 2025-06-21

A certain army brigade has tempered the hard work of low-weather flight——

Breaking through clouds and fog to temper iron wings

■ PLA Daily reporter Hu Yunyan Special correspondent Shi Zhipeng

Low clouds are shrouded and drizzling. A few days ago, a certain army brigade organized a multi-subject flight training under low weather conditions. With the command of the tower commander, the combat aircraft [helicopters] took off one after another and flew to the mission airspace.

“Complex weather conditions are both a 'roadblock' for flight training and a 'grindstone' for sharpening flying skills.” The brigade leader introduced that the garrison had continuous rainy weather and strong winds some time ago. They used low weather conditions to organize flight training, aiming to sharpen the combat skills of officers and men from difficult and strict conditions and improve the ability to deal with emergencies under complex conditions.

Hovering, climbing, turning sharply... Under the precise control of the pilots, the combat aircraft flexibly shuttled through the clouds. “There are many clouds ahead and visibility is low. Keep the formation distance.” The commander reminded in time according to the meteorological information. The pilots of each crew judged the flight attitude through the instrument and calmly manipulated the combat aircraft to break through the clouds and fog.

The leaders of the brigade introduced that in this training, they set up difficult training courses and scientifically configured training forces. According to the weather dynamics, they scientifically formulated more than 10 air special situation handling plans such as crossing cumulonimbus clouds and air loss. At the same time, the maintenance officers and men were organized to increase the inspection of the power and communication systems of the combat aircrafts to ensure that the combat aircrafts are in the best condition.

In the rain and fog, the young pilot Rui Minqi manipulated the combat aircraft and conducted instrument landing training. After receiving the order, he made a judgment on the relative position of the combat aircraft based on the instrument data, constantly corrected the flight attitude, and manipulated the combat aircraft to land smoothly. “Conducting flight training under complex meteorological conditions, with low visibility and fast wind speed changes, requires the pilots to manipulate more accurately, cooperate more closely, and coordinate more finely.” Rui Minqi told reporters.

“Pay attention to strengthening route observation...” Over the airport, combat aircrafts broke through the clouds and rain. The tower commander and men at various combat positions stared at

the weather map with full concentration. With the close cooperation between the air and the ground, the pilots successfully completed the scheduled training courses.

In the evening, the training ended. After getting off the combat aircraft, pilot Li An said with emotion: “Not only did the bad weather not affect the progress of training, but it also helped us to sharpen our courage and strengthen our skills, and practice real combat skills.”

官兵参与群策群力，看陆军某旅如何汇聚官兵智慧破解训练难题

来源：解放军报 作者：孟祥威 张翔 责任编辑：郭妍菲 2025-06-25

陆军某旅充分发扬军事民主

问计于兵破解训练难题

解放军报讯 孟祥威、张翔报道：近日，陆军某旅召开军事民主会，来自侦察、通信、防空等多个专业的军士骨干、基层干部代表与机关干部围坐一起，探讨训练中遇到的重难点问题，现场形成多个可行性方案.

“只有充分发扬军事民主，汇聚官兵智慧，才能有效破解训练难题. ”该旅领导介绍，他们前期调研了解到，部分单位不够重视官兵总结的训练经验、不敢放手让官兵创新训法战法，导致组训模式单一，制约了训练水平提升.

为此，该旅坚持问计于兵，遴选各专业军士骨干和基层干部代表，与机关干部一起召开军事民主会，梳理组训施教难题，制订针对性解决措施；通过常态召开“诸葛亮会”、在强军网开设“留言板”等形式，征求官兵组训施教“金点子”；开设“战训微论坛”，鼓励训练尖子分享训练经验. 该旅还建立“建立台账—责任到人—限时办结”机制，划分责任科室、指定专人负责，对收集到的意见建议进行分类研究，确保官兵合理建议落细落实.

前不久，该旅召开的军事民主会上，一级上士王玉应针对某型装备自动展开程序繁琐、用时较长问题，提出操作流程优化方案. 经该旅机关研究论证，王玉应提出的方案的确能有效缩短该型装备展开时间. 目前，该方案已被纳入旅队装备训练手册，有效提升了某型装备训练质效.

Officers and Men Participate in Collective Wisdom, See How a Certain Army Brigade Gathers the Wisdom of Officers and Men to Solve Training Problems

Source: PLA Daily Author: Meng Xiangwei Zhang Xiang Editor: Guo Yanfei 2025-06-25

A certain army brigade fully promotes military democracy

Ask soldiers to solve training problems

PLA Daily News Meng Xiangwei and Zhang Xiang reported: Recently, a certain army brigade held a military democracy meeting. Sergeants from multiple professions such as reconnaissance, communications, and air defense, grassroots cadres and headquarters cadres sat together to discuss the key and difficult problems encountered in training, and formed multiple feasible plans on the spot.

“Only by fully promoting military democracy and gathering the wisdom of officers and men can we effectively solve training problems.” The leaders of the brigade introduced that they learned from their previous research that some units did not pay enough attention to the training experience summarized by officers and men, and did not dare to let officers and men innovate training methods and tactics, resulting in a single training model and restricting the improvement of training level.

To this end, the brigade insisted on asking the soldiers for advice, selecting backbone sergeants of various professions and representatives of grassroots cadres, and holding military democratic meetings with the cadres of the organs to sort out the difficulties in training and teaching, and formulate targeted solutions; through the regular “Zhuge Liang meeting” and the opening of a “message board” on the strong army network, the officers and men were asked for “golden ideas” for training and teaching; a “combat training micro forum” was opened to encourage top trainers to share their training experiences. The brigade also established a “establishing a ledger-responsibility to people-time-limited completion” mechanism, divided the responsible departments, designated special persons to be responsible, and classified the collected opinions

and suggestions to ensure that the reasonable suggestions of officers and men were implemented in detail.

Not long ago, at the military democratic meeting held by the brigade, First Sergeant Wang Yuying proposed an operation process optimization plan for the problem that the automatic deployment procedures of a certain type of equipment were cumbersome and time-consuming. After research and demonstration by the brigade organs, Wang Yuying's plan can indeed effectively shorten the deployment time of this type of equipment. At present, the plan has been included in the brigade equipment training manual, which has effectively improved the quality and effectiveness of a certain type of equipment training.

告别“拿来主义”抓实备课，贴近官兵的好课收获一致好评

来源：解放军报 作者：冯杨 廖晓彬 喻润东 责任编辑：郭妍菲 2025-06-25

陆军某旅抓实备课示教提升教育实效——

课外下功夫 课上出精品

■冯 杨 解放军报特约记者 廖晓彬 喻润东

“主题聚焦官兵思想实际，事例鲜活说服力强，授课形式灵活多样……”前不久，陆军某旅组织政治教员集中备课研讨，某连谢指导员精心准备的授课辅导通过评课环节终审验收，赢得试听官兵一致好评.

“只有把备课工作做到位，才能确保授课高质量. ”该旅政治工作部领导告诉记者，前期调研中，他们发现部分政治教员虽然在授课中运用了动漫、H5 等新媒体技术，课件制作精美，但因与官兵训练、工作、生活贴合得不够紧密，导致授课内容难以入脑入心，官兵对授课满意度不高.

“‘搬运’教育资源方便了授课准备，但若内容不贴合单位实际，就难以引发官兵共鸣、取得教育实效. ”该旅宣传科方科长介绍，为避免授课陷入简单的“拿来主义”，他们将教育准备过程区分为分课、备课、审课等环节，逐个环节进行探索创新，对授课准备过程中可能遇到的瓶颈难题进行集智攻关，合力打造精品好课.

实践中，该旅结合单位实际确定授课主题，基层政治教员根据自身能力特长、岗位任职经历申领课题，机关业务部门遴选确定主讲人后，召集优秀政治教员集中备课；政治教员根据选定的课题搜集资料、修改教案、完成审课，围绕课堂设计进行讲课；授课结束，听课的官兵和政治教员代表根据听课体验对授课进行评价.

采访中，记者跟随方科长来到某火力连多媒体教室，一堂“绷紧战备之弦、夯实能战之基”主题授课正在进行. 台上，主讲人马连长侃侃而谈、娓娓道来；台下，官兵不时互动交流，政治教员代表认真聆听打分.

授课结束后，马连长在笔记本上整理记录此次授课心得体会. “备课阶段，我将授课主题细分为战备物资整理、战备库室建设、战备方案推演等分主题，分别结合多个鲜活案例进行阐释. ”他告诉记者，互动交流阶段，官兵十分踊跃，针对授课内容展开了热烈讨论.

备课模式不断升级，精品好课陆续出炉. “班长负伤，副班长牺牲，爆破器材用尽，通路却没完全打通. 眼看到了预定的总攻时间，紧要关头，我毅然蹚雷开辟通路……”在该旅“能攻善守英雄连”教育课堂上，连队曾指导员视频连线“以身探雷”的战斗英雄吴石林. 吴老讲述的当年战斗场景，让全连官兵深受触动. “‘接力棒’已经交到我们手上，我们只有勇敢担起使命职责，将自己锻造成克敌制胜的‘尖刀’，才能对得起‘英雄传人’这个称呼！”授课结束后，官兵代表汪明宇的发言赢得阵阵掌声.

近段时间，该旅正在开展野外驻训，政治教员们结合任务实际灵活开展教育. 他们结合时事热点剖析教育主题，将身边人、身边事作为开展教育的“活教材”，见缝插针组织“微课堂”“士兵说”. 官兵们在潜移默化、感同身受中砥砺斗志，投身练兵备战的劲头更足了.

Say Goodbye To “Take-It-As-It-Is” and Prepare Lessons in Earnest, and the Good Lessons that Are Close to Officers and Men Have Won Unanimous Praise

Source: PLA Daily Author: Feng Yang Liao Xiaobin Yu Rundong Editor: Guo Yanfei 2025-06-25

A certain army brigade has prepared lessons and demonstrated to improve the effectiveness of education——

Work hard outside of class and produce excellent works in class

■ Feng Yang PLA Daily Special Correspondent Liao Xiaobin Yu Rundong

“The theme focuses on the actual thoughts of officers and men, the examples are vivid and persuasive, and the teaching forms are flexible and diverse...” Not long ago, a certain army brigade organized a centralized lesson preparation seminar for political instructors. The teaching guidance carefully prepared by a certain company political instructor passed the final review and acceptance of the course evaluation link, and won unanimous praise from the officers and men who listened to the trial.

“Only by doing a good job in lesson preparation can we ensure high-quality teaching.” The leader of the political work department of the brigade told reporters that in the previous investigation, they found that although some political instructors used new media technologies such as animation and H5 in their teaching, and the courseware was beautifully produced, it was not closely

connected with the officers and men' training, work, and life, which made it difficult for the teaching content to enter their minds and hearts, and the officers and men were not satisfied with the teaching.

“'Transporting' educational resources facilitates the preparation of lessons, but if the content does not fit the actual situation of the unit, it will be difficult to resonate with the officers and men and achieve educational effectiveness.” Fang, the chief of the propaganda section of the brigade, introduced that in order to avoid the simple “take-it-as-it-is” teaching, they divided the education preparation process into the links of class division, lesson preparation, and lesson review, explored and innovated each link, and worked together to solve the bottlenecks that may be encountered in the preparation process of teaching, and worked together to create high-quality courses.

In practice, the brigade determines the teaching topics based on the actual situation of the unit. Grassroots political instructors apply for topics based on their own abilities, expertise, and job experience. After the headquarters business department selects and determines the main lecturer, it convenes outstanding political instructors to prepare lessons together; political instructors collect information, modify lesson plans, and complete lesson review based on the selected topics, and give lectures around classroom design; after the lecture, the officers and men who attended the lecture and the political instructor representatives evaluate the lecture based on their listening experience.

During the interview, the reporter followed Chief Fang to a multimedia classroom in a firepower company, where a themed lecture on “Tightening the strings of combat readiness and consolidating the foundation of combat capability” was in progress. On the stage, the lecturer, Captain Ma, spoke eloquently and eloquently; off the stage, officers and men interacted from time to time, and the political instructor representatives listened carefully and scored.

After the lecture, Captain Ma organized and recorded his experience of the lecture in his notebook. “During the preparation stage, I subdivided the teaching topics into war preparation material sorting, war preparation warehouse construction, war preparation plan deduction and other sub-topics, and explained them with multiple vivid cases.” He told reporters that during the interactive communication stage, the officers and men were very enthusiastic and had a heated discussion on the teaching content.

The preparation mode is constantly upgraded, and excellent courses are released one after another. “The squad leader was injured, the deputy squad leader died, the blasting equipment was used up, but the passage was not completely opened. The scheduled time for the general attack was approaching, and at the critical moment, I resolutely waded through the mines to open up the passage...” In the brigade's “Heroic Company that Can Attack and Defend” education class, the company's instructor Zeng video-linked with the combat hero Wu Shilin who “explored mines with his own body”. The battle scenes described by Mr. Wu in the past deeply touched the officers and men of the whole company. “The 'baton' has been handed over to us. Only if we bravely take on our mission and responsibilities and forge ourselves into a 'sharp knife' to defeat the enemy can

we live up to the title of 'hero successor'!" After the lecture, the speech of the officer and soldier representative Wang Mingyu won applause.

Recently, the brigade is conducting field training, and political instructors are conducting education flexibly in combination with the actual tasks. They analyze the educational themes in combination with current hot topics, use people and things around them as "living teaching materials" for education, and organize "micro-classrooms" and "soldier talks" whenever possible. The officers and men are tempered by the subtle influence and empathy, and are more motivated to devote themselves to training and preparation for war.

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：刘华山 郝强强 责任编辑：张硕 2025-06-25

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

立查立改转作风 真抓实干见实效

■刘华山 郝强强

升级办公系统，整合跨部门文电，基层事务性工作明显减少；下放多类装备审批权限，提升分队夜间连贯作业效率……日前，陆军某旅党委常委带领机关工作组，分赴各基层单位，逐条逐项梳理影响官兵工作训练的问题，并现场督导整改，以求真务实的工作作风指导帮带基层，切实为基层减负.

"军人的主责主业是能打仗、打胜仗，必须立牢向战为战的导向，坚决把工作重心归正到备战打仗上来. "该旅一名领导介绍，深入贯彻中央八项规定精神学习教育开展以来，他们对标对表中央八项规定精神、军委十项规定及其实施细则精神，坚持学查改一体推进，要求各级领导和机关干部扑下身子、沉到一线，带头查摆机关指导帮建基层、主动服务基层中存在的作风问题，把检视整改作为检验学习教育成效的重要标尺，聚力转变工作作风、提升为基层服务质效，切实让官兵感受到转作风树新风带来的新气象新变化.

前不久，该旅党委一班人结合分管工作受领课题，带领工作组沉到一线，通过组织座谈调研、问卷调查等方式，深入查找影响练兵备战的重点问题，广泛收集官兵意见建议，坚持有什么问题就解决什么问题，什么问题突出就重点整治什么问题，确保问题见底清零. 此次调研中，机关某部门因临时要求基层单位增加两项数据统计被通报批评；针对旅周交班会存在的议题交叉重复情况，明令要求交班会要提前科学设置议题，缩短时长把交班会开出高质量.

为推进作风建设常态化、长效化，该旅党委针对调研中发现的问题进行认真研讨，制订一系列管用措施，进一步规范机关相关业务部门工作程序. 他们要求机关工作人员在组织统

计工作前，必须梳理过往数据，若已有相关统计材料，严禁向基层重复索要；推行通知发布“双审核”机制，对机关各部门拟发通知实行归口统管和实时评估，实现机关文电精准发放；依托强军网开通“云端答疑”交流平台，基层反映问题后，牵头科室第一时间梳理汇总，然后区分不同情况联系相关科室在规定时限内予以解决.

立查立改转作风，真抓实干见实效. 随着学习教育深入开展，该旅领导和机关干部为基层服务意识更强、作风更实，一批官兵急难愁盼问题得到解决，大家心无旁骛投身练兵备战，圆满完成各项任务.

A Certain Army Brigade Has Conducted a Thorough Study and Education of the Spirit of the Eight Central Regulations

Source: PLA Daily Author: Liu Huashan Hao Qiangqiang Editor: Zhang Shuo 2025-06-25

A certain army brigade has conducted a thorough study and education on the spirit of the eight central regulations——

Immediate investigation and rectification to change work style, and work hard to achieve practical results

■Liu Huashan Hao Qiangqiang

Upgrading the office system, integrating cross-departmental documents and telegrams, and significantly reducing grassroots administrative work; delegating the approval authority of multiple types of equipment to improve the efficiency of the nighttime continuous operation of the detachment...Recently, the Standing Committee of the Party Committee of a certain army brigade led the headquarters working group to various grassroots units, sorted out the problems that affect the work and training of officers and men one by one, and supervised the rectification on the spot, guiding and helping the grassroots with a pragmatic work style, and effectively reducing the burden on the grassroots.

“The main responsibility and job of soldiers is to be able to fight and win battles. We must firmly establish the orientation of fighting for war and resolutely return the focus of work to preparing for war.” A leader of the brigade introduced that since the in-depth implementation of the study and education of the spirit of the Central Eight Regulations, they have benchmarked the spirit of the Central Eight Regulations, the Ten Regulations of the Military Commission and their implementation rules, insisted on learning, investigating and rectifying in an integrated manner, and required leaders and cadres at all levels to throw themselves down and sink to the front line, take the lead in investigating and rectifying the style problems existing in the guidance and construction of the grassroots and the active service to the grassroots, and take inspection and rectification as an important yardstick for testing the effectiveness of study and education, focus on changing the work style, and improve the quality and efficiency of serving the grassroots, so

that officers and men can truly feel the new atmosphere and new changes brought about by changing the style and establishing a new style.

Not long ago, a group of people from the brigade Party Committee accepted the topic in combination with their respective work, led the working group to sink to the front line, and through organizing seminars, investigations, questionnaires and other methods, thoroughly found the key issues affecting training and preparation, widely collected opinions and suggestions from officers and men, insisted on solving any problems, focusing on rectifying any outstanding problems, and ensuring that the problems were cleared up. During this investigation, a department of the organization was criticized for temporarily requiring grassroots units to add two data statistics; in response to the overlapping and repeated topics in the weekly handover meeting of the brigade, it was clearly required that the handover meeting should set topics in advance and shorten the duration to make the handover meeting high-quality.

In order to promote the normalization and long-term effectiveness of work style construction, the brigade Party Committee conducted serious discussions on the problems found in the investigation and formulated a series of effective measures to further standardize the work procedures of relevant business departments of the organization. They require that the staff of the organization must sort out past data before organizing statistical work. If relevant statistical materials are already available, it is strictly forbidden to repeatedly ask for them from the grassroots; implement the “double review” mechanism for the release of notices, implement unified management and real-time evaluation of the notices to be issued by various departments of the organization, and realize the precise release of documents and telegrams of the organization; rely on the “cloud-based Q&A” communication platform opened by the Strong Army Network. After the grassroots reflect the problem, the leading department will sort it out and summarize it as soon as possible, and then distinguish different situations and contact relevant departments to solve it within the specified time limit.

Immediately investigate and change the work style, and work hard to achieve practical results. As the study and education progressed in depth, the brigade's leaders and cadres had a stronger sense of service to the grassroots and a more practical style of work. A number of urgent problems that officers and men were concerned about were solved. Everyone devoted themselves to training and preparation without distraction and successfully completed all tasks.

第 82 集团军某旅“一人一档”科学施训

来源：中国军网-解放军报 作者：李卓煜 曾亮凯 责任编辑：孙智英 发布：2025-06-27

第 82 集团军某旅依据官兵健康档案数据精准施训——

体脂偏低，列兵暂停跑 3000 米

■李卓煜 曾亮凯

该旅官兵展开体能训练. 焦川 摄

施训看点

●基础体能将体型（体重）要求改为体型控制课目，明确减重、增重的训练方法与要求，进一步强化军队人员合理控制体重、支撑军事生活、树立良好形象的训练意识与行为自觉

●高度关注基层官兵体能训练“以跑练跑”“以杠练杠”等问题，引入现代运动学理念，引导官兵加强力量、耐力、爆发力等身体素质的全面发展，达到科学训练、护体防伤效果

前段时间，第 82 集团军某旅新一阶段个人训练计划表下发后，列兵小许意外发现：自己的 3000 米跑训练被“取消”了！

“你的体脂率不达标，要先集中精力增脂增肌，所以暂不安排长跑等有氧训练课目. ”面对小许的疑问，军体教员解释. 原来，小许身体偏瘦、体脂率偏低，每次考核前，他都要特意“增重”并进行突击训练. 尽管如此，他的各项体能课目成绩一直在及格线徘徊. 为了提高训练效率，军体教员依照现代运动学理念，为他制订了一套科学有效的专属训练方案.

与小许不同，上等兵小王翻看个人训练计划时发现，他的 3000 米跑课目被调整为 5000 米跑. 军体教员表示，数据显示，小王的心肺水平和肌肉耐力都较弱，并且体脂率偏高. 为此，军体教员针对其身体机能特点，及时为他调整了训练内容.

“一人一档”科学施训，源于新版《军事体育训练大纲》将基础体能中“体型（体重）要求”单独设置为“体型控制课目”. 为了提高组训科学性和实效性，该旅为每名官兵建立专属健康管理档案，除体能成绩外，还详细记录体脂率、BMI 等身体数据.

军体教员分析小许健康档案里的数据发现，他不仅体脂率不达标，肌肉量也低于标准水平，这是导致体能成绩进步缓慢的主要原因. 于是，军体教员及时调整小许的个人训练计划：一方面加大无氧训练强度，通过力量训练让他快速增肌；另一方面暂停 3000 米跑等有氧训练，减少对体脂的消耗，让他能够集中精力进行专项强训.

杠铃卧推、哑铃举重、弹力带弯举……经过一段时间的强化训练，小许身体肌群明显增强、肌肉爆发力有效提高，不仅体型稳定在合格线以上，而且体能课目成绩大幅提升. 近期，3000 米跑课目重新列入他的训练计划表中.

与此同时，小王经过一段时间的长跑训练，心肺功能与肌肉耐力得到有效强化，不仅3000 米跑成绩达到良好水平，体脂率也稳定在最优区间.

“只有读懂数据的门道、掌握科学组训方法，才能帮助官兵高效率完成训练任务. ”该旅领导介绍，他们为官兵建立健康管理档案，根据指标数据验证训练效果，不仅助力官兵科学控制体型、提高训练成绩，推动军事体育训练质效全面提升，更有效激发了官兵训练热情. 在最近一次阶段性训练考核中，官兵基础体能课目整体优良率进一步提高.

参训笔记

科学组训要借助数据

■第 82 集团军某旅干部 童欢

以往，体能训练大多由连队组织，同一课目往往共用一套训练方案. 然而，官兵体能素质参差不齐，这种粗放式训练模式既影响体能尖子寻求突破的积极性，也不利于存在体能短板的官兵针对性补差，难以实现训练效益最大化.

新版《军事体育训练大纲》施行后，我们逐步建立起以数据为支撑的科学训练体系，建立“一人一档”健康管理档案，根据官兵体脂率、BMI 等身体数据，针对性制订训练方案，提升科学组训、精准施训水平.

某连下士小李的单杠成绩长期在及格线徘徊，单纯加练并没有带来预期效果. 通过分析他的身体数据，我们为他增加悬垂举腿和握力训练，并辅以动作矫正. 几个月下来，小李的单杠成绩有了明显进步. 作为单位军事体育训练负责人，我深刻地认识到，组训施训应在深入分析数据的基础上找准症结、因人施策.

从“大锅饭”到“定制餐”，从“跟着感觉走”到“靠数据说话”，科学组训必须建立在精准的数据分析基础上. 如今，我们结合智能监测设备将官兵科学编组，组织大家开展分层训练. 战友们也开始主动关注自己的训练数据变化，有的还自发组成训练互助小组，分析彼此弱项，相互交流经验. 这种从“要我练”到“我要练”的转变，正是科学组训带来的可喜成果.

观训小议

跳出“无效努力”的循环

■杨悦

一位管理学家曾说过这样一句话：“做正确的事比正确地做事更重要. ”如果方向错误，哪怕消耗再多时间与精力，也只会与目标背道而驰，这样的努力便成了无效努力.

一些部队的传统组训理念中，官兵体能成绩不佳，往往被归结为训练时长不够. 在一些带兵人看来，只要跑得够多、练得够勤、训得够狠，迟早能从量变产生质变. 但事实告诉我们，如果不找准制约成绩提升的症结，一味盲目蛮干，很可能事倍功半，甚至适得其反.

体脂率偏低，列兵暂停跑 3000 米；体脂率偏高，战士改练 5000 米，第 82 集团军某旅根据新版《军事体育训练大纲》，“一人一档”科学施训，取得了明显成效. 他们的实践证明，军事体育训练是一门科学，组训人员必须秉持科学训练理念，找准科学组训的方法，不仅要助力官兵提升训练成绩，更要帮助他们养成科学训练的习惯.

科学组训的本质，是要善于引导官兵用正确的方法做正确的事. 军事体育训练会产生大量指标数据，每项数据之间都有内在逻辑关联，客观反映人体机能和训练条件. 只有跳出“无效努力”的循环，带着数据思维找准“病灶”对症下药，才能用最少的时间精力，取得最优的训练成果，让基础体能训练从“事倍功半”变为“事半功倍”.

A Brigade of the 82nd Group Army Conducts Scientific Training with “One File for Each Person”

Source: China Military Network-People's Liberation Army Daily Author: Li Zhuoyu Zeng Liangkai Editor: Sun Zhiying Release: 2025-06-27

A brigade of the 82nd Group Army conducts precise training based on the health file data of officers and men-

Body fat is low, and privates stop running 3000 meters

■Li Zhuoyu Zeng Liangkai

The officers and men of the brigade conducted physical training. Photo by Jiao Chuan

Training highlights

● Basic physical fitness changes the body shape (weight) requirements to body shape control subjects, clarifies the training methods and requirements for weight loss and weight gain, and further strengthens the training awareness and behavioral consciousness of military personnel to reasonably control weight, support military life, and establish a good image

● Pay close attention to the problems of “running to practice running” and “training with bars” in the physical training of grassroots officers and men, introduce modern kinematics concepts, and guide officers and men to strengthen the comprehensive development of physical qualities such as strength, endurance, and explosive power, so as to achieve scientific training and body protection and injury prevention effects

Some time ago, after the new phase of the individual training schedule of a brigade of the 82nd Group Army was issued, Private Xiao Xu unexpectedly discovered that his 3,000-meter running training was “cancelled”!

“Your body fat rate is not up to standard, so you must first focus on fat and muscle gain, so long-distance running and other aerobic training subjects are not arranged for the time being.” Facing Xiao Xu's questions, the military physical education instructor explained. It turned out that Xiao Xu was thin and had a low body fat rate. Before each assessment, he had to deliberately “gain weight” and conduct intensive training. Despite this, his scores in various physical fitness subjects have been hovering around the passing line. In order to improve the efficiency of training, the military physical education instructor developed a set of scientific and effective exclusive training programs for him in accordance with the concept of modern kinematics.

Unlike Xiao Xu, when Corporal Xiao Wang looked through his personal training plan, he found that his 3,000-meter run was adjusted to a 5,000-meter run. The military physical education instructor said that the data showed that Xiao Wang's cardiopulmonary level and muscle endurance were weak, and his body fat rate was high. For this reason, the military physical education instructor adjusted the training content for him in a timely manner based on his physical function characteristics.

The scientific training of “one person, one file” originated from the new version of the “Military Physical Training Outline” setting the “body shape (weight) requirements” in basic physical fitness as a “body shape control subject” separately. In order to improve the scientificity and effectiveness of training, the brigade established an exclusive health management file for each officer and soldier. In addition to physical fitness scores, it also recorded detailed physical data such as body fat rate and BMI.

The military physical education instructor analyzed the data in Xiao Xu's health file and found that not only did his body fat percentage not meet the standard, but his muscle mass was also below the standard level, which was the main reason for the slow improvement of his physical fitness performance. Therefore, the military physical education instructor adjusted Xiao Xu's personal training plan in time: on the one hand, he increased the intensity of anaerobic training and allowed him to quickly gain muscle through strength training; on the other hand, he suspended aerobic training such as 3,000-meter running to reduce the consumption of body fat, allowing him to concentrate on special training.

Barbell bench press, dumbbell weightlifting, elastic band curls... After a period of intensive training, Xiao Xu's body muscle groups have been significantly strengthened and his muscle explosiveness has been effectively improved. Not only has his body shape been stabilized above the qualified line, but his physical fitness scores have also been greatly improved. Recently, the 3,000-meter running course has been re-included in his training schedule.

At the same time, after a period of long-distance running training, Xiao Wang's cardiopulmonary function and muscle endurance have been effectively strengthened. Not only has his 3,000-meter running score reached a good level, but his body fat percentage has also stabilized in the optimal range.

“Only by understanding the ins and outs of data and mastering scientific training methods can we help officers and men complete training tasks efficiently.” The brigade leaders introduced that they established health management files for officers and men and verified the training effects based on indicator data, which not only helped officers and men scientifically control their body shape and improve their training results, promoted the overall improvement of the quality and efficiency of military physical training, but also more effectively stimulated the training enthusiasm of officers and men. In the most recent phased training assessment, the overall excellent rate of officers and men' basic physical fitness subjects was further improved.

Training notes

Scientific training requires the help of data

■Cadre of a brigade of the 82nd Group Army Tong Huan

In the past, physical training was mostly organized by the company, and the same subject often shared a set of training plans. However, the physical fitness of officers and men was uneven. This extensive training model not only affected the enthusiasm of physical elites to seek breakthroughs, but also was not conducive to targeted compensation for officers and men with physical shortcomings, making it difficult to maximize training benefits.

After the implementation of the new version of the “Military Physical Training Outline”, we gradually established a scientific training system supported by data, established a “one-person-one-file” health management file, and formulated targeted training plans based on the officers' and men' body fat percentage, BMI and other physical data to improve the level of scientific training and precise training.

Corporal Xiao Li of a certain company's horizontal bar score has been hovering around the passing line for a long time, and simply adding training did not bring the expected results. By analyzing his physical data, we added hanging leg raises and grip training for him, supplemented by movement correction. After a few months, Xiao Li's horizontal bar score has improved significantly. As the person in charge of military physical training in the unit, I deeply realize that training should be based on in-depth analysis of data to identify the crux and implement policies based on people.

From “big pot meals” to “customized meals”, from “following your feelings” to “speaking with data”, scientific training must be based on accurate data analysis. Today, we combine intelligent monitoring equipment to scientifically organize officers and men and organize everyone to conduct stratified training. Comrades also began to pay attention to the changes in their training data. Some

even spontaneously formed training mutual aid groups to analyze each other's weaknesses and exchange experiences. This change from “I have to practice” to “I want to practice” is the gratifying result of scientific training.

A brief discussion on the training

Break out of the cycle of “ineffective efforts”

■ Yang Yue

A management scientist once said: “Doing the right thing is more important than doing things right.” If the direction is wrong, even if more time and energy are consumed, it will only go against the goal, and such efforts will become ineffective efforts.

In the traditional training concepts of some troops, the poor physical fitness of officers and men is often attributed to insufficient training time. In the eyes of some leaders, as long as they run enough, practice hard enough, and train hard enough, they will sooner or later produce qualitative changes from quantitative changes. But the facts tell us that if we don't find the crux of the problem that restricts the improvement of performance, blindly doing it blindly may be counterproductive, or even counterproductive.

If the body fat rate is too low, the private will stop running 3,000 meters; if the body fat rate is too high, the soldier will change to 5,000 meters. According to the new version of the “Military Physical Training Outline”, a certain brigade of the 82nd Army has scientifically trained “one person, one file” and achieved remarkable results. Their practice has proved that military physical training is a science. The trainers must adhere to the scientific training concept and find the right scientific training methods. They should not only help officers and men improve their training results, but also help them develop the habit of scientific training. The essence of scientific training is to be good at guiding officers and men to do the right things in the right way. Military physical training will generate a large amount of indicator data, and each data has an internal logical connection, which objectively reflects the human body function and training conditions. Only by jumping out of the cycle of “ineffective efforts” and finding the “lesion” with data thinking and prescribing the right medicine can we use the least time and energy to achieve the best training results and change basic physical training from “twice the result with half the effort” to “half the result with half the effort”.

“政”面交锋丨三尺讲台一“教”高低！

来源：中国军网 作者：王山山 吴文滔 张建洲 责任编辑：郭妍菲

2025-06-27

为加强队伍建设，提高授课能力水平，营造争做优秀政治教员浓厚氛围. 近日，第 76 集团军某旅组织开展 2025 年度“三会一好”政治教员评比竞赛.

来自基层的 6 名政治教员齐聚一堂，通过理论考核、授课评比、随机教育三个环节，进行了一场比思维、比智慧、比能力的现场对决.

一名合格的政治教员，理论功底必须扎实. 随着“开始答题”的口令，选手们迅速进入“战斗”状态，大家全神贯注、笔尖翻飞、沉着应答. 此次考核内容涵盖党的创新理论、军事政策法规和时事热点等多个方面，全面检验政治教员的理论功底和知识储备.

“你为什么要参军入伍？”某连指导员曾建伟以连队一场自主教育时的提问为切入点，结合身边典型事迹，层层剖析军人职责使命. 授课评比环节，参赛选手紧扣官兵思想实际，用鲜活事例、生动语言将“大道理”转化为接地气的兵言兵语，既有理论深度，更显情感温度. 有的授课内容巧妙融入情景剧，以视频、图片直观呈现强军故事；有的通过互动问答方式，激发官兵思考，现场氛围热烈，掌声频频.

政治教员曾建伟授课. 王山山 摄

理论骨干龚佳宇授课. 王山山 摄

随机教育环节，选手采取“盲盒抽题+即兴答辩”的形式，通过现场抽取题目，并在 5 分钟内快速解题. 面对随机问题，他们从容不迫、冷静作答，既展现了清晰的逻辑思维，更体现了对基层思想动态的精准把握. 参赛选手杜建飞结合自己在生活中化解官兵矛盾的实例，提出“倾听需求、换位思考”的解决思路，赢得评委一致认可.

互动问答. 王山山 摄

下一步，该旅将持续深化比武成果，通过“政工日”研讨、专家授课辅导、“推门听课”等方式，助力政治教员队伍能力提升，让思想政治教育真正走进兵心、激发强军斗志！

“Political” Confrontation | The Three-Foot Podium Is a “Teaching” Level!

Source: China Military Network Author: Wang Shanshan Wu Wentao Zhang Jianzhou Editor: Guo Yanfei

2025-06-27

In order to strengthen team building, improve teaching ability, and create a strong atmosphere for striving to be an excellent Political Instructor. Recently, a brigade of the 76th Group Army organized a 2025 “Three Meetings and One Good” Political Instructor evaluation competition.

Six Political Instructors from the grassroots gathered together and conducted a live duel of thinking, wisdom, and ability through three links: theoretical assessment, teaching evaluation, and random education.

A qualified Political Instructor must have a solid theoretical foundation. With the command of “start answering questions”, the contestants quickly entered the “combat” state, and everyone was fully focused, pens flying, and calmly answered. The content of this assessment covers multiple aspects such as the party's innovative theories, military policies and regulations, and current hot topics, and comprehensively tests the theoretical foundation and knowledge reserves of Political Instructors.

“Why do you want to join the army?” Zeng Jianwei, a company instructor, took the questions raised during a self-education session of the company as the starting point, combined with typical deeds around him, and analyzed the responsibilities and missions of soldiers layer by layer. In the teaching evaluation session, the contestants closely followed the actual thoughts of the officers and men, and used fresh examples and vivid language to transform the “big truth” into down-to-earth soldiers' words and words, which not only had theoretical depth, but also showed emotional warmth. Some teaching contents were cleverly integrated into situational dramas, and videos and pictures were used to directly present the story of strengthening the army; some stimulated the

thinking of officers and men through interactive question-and-answer methods, and the atmosphere on the scene was warm and applause was frequent.

Political instructor Zeng Jianwei gave a lecture. Photo by Wang Shanshan

Political instructor Zeng Jianwei gave a lecture. Photo by Wang Shanshan

Theoretical backbone Gong Jiayu gave a lecture. Photo by Wang Shanshan

Theoretical backbone Gong Jiayu gave a lecture. Photo by Wang Shanshan

In the random education session, the contestants adopted the form of “blind box drawing + impromptu defense”, drawing questions on the spot, and quickly solving them within 5 minutes. Faced with random questions, they answered calmly and calmly, showing not only clear logical thinking, but also a precise grasp of grassroots ideological dynamics. Contestant Du Jianfei combined his own examples of resolving conflicts between officers and men in life, and proposed the solution of “listening to needs and thinking from the perspective of others”, which won unanimous recognition from the judges.

Sergeant Zhao Guoming answered questions. Photo by Wang Shanshan

Interactive Q&A. Photo by Wang Shanshan

Next, the brigade will continue to deepen the results of the competition, through “Political Work Day” seminars, expert lectures and guidance, “open-door listening to classes” and other methods, to help improve the capabilities of the Political Instructor team, so that ideological and political education can truly enter the hearts of soldiers and inspire the fighting spirit of a strong army!

陆军军医大学陆军特色医学中心开展“红色军医基层行”活动

来源：解放军报 作者：万衷余 朱广平 责任编辑：尚晓敏 2025-06-28

陆军军医大学陆军特色医学中心开展“红色军医基层行”活动

官兵不出营门享受专家服务

解放军报讯 万衷余、朱广平报道：日前，陆军军医大学陆军特色医学中心“红色军医基层行”专家医疗队走进西部战区陆军某团野外驻训场，为官兵提供诊疗服务. 该中心领导介绍，他们组织“红色军医基层行”活动，目的是让基层官兵不出营门即可享受专家医疗服务.

笔者在该团野外驻训场的帐篷内看到，专家医疗队成员为前来问诊的官兵解疑释惑、开方送药. “我的腰时常酸痛. ”一名战士描述完症状，医疗专家刘鹏随即为他仔细检查身体，提出诊疗建议：“这是肌肉拉伤，以后训练要加强防护……”

“守护官兵身体健康，是军医的职责所在. 我们到基层巡诊，旨在为官兵排忧解难，让他们以更好的状态投身练兵备战. ”该中心领导介绍，近几年，他们建立完善“送诊到营”医疗服务机制，每年从骨科、消化内科、皮肤科等学科遴选专家组成医疗队，深入基层部队开展巡诊服务.

此次巡诊期间，医疗队针对部队驻训时易出现的疾病、训练伤等开展巡诊查体、健康讲座、医疗培训等服务；与陆军某医院建立合作机制，从学科建设、技术指导、人才培养、科研攻关等方面进行结对帮扶，帮助该医院提升卫勤保障能力；帮助多个基层单位建立远程诊疗系统，提升其医疗保障水平.

军医“送诊到营”，助力备战打赢. 该中心领导介绍，近年来，他们紧盯一线部队任务特点和官兵健康需求，向多支边海防部队派出 20 余批次专家医疗队，受到官兵的普遍好评.

The Army Medical University’s Army Specialty Medical Center conducts the “Red Military Doctors Go to the Grassroots” Activity

Source: PLA Daily Author: Wan Zhongyu Zhu Guangping Editor: Shang Xiaomin 2025-06-28

The Army Medical University’s Army Specialty Medical Center conducts the “Red Military Doctors Go to the Grassroots” activity

Officers and men enjoy expert services without leaving the camp

PLA Daily News Wan Zhongyu and Zhu Guangping reported: Recently, the “Red Military Doctors Go to the Grassroots” expert medical team of the Army Specialty Medical Center of the Army Medical University went to the field training ground of a certain regiment of the Western Theater Command to provide diagnosis and treatment services for officers and men. The leaders of the center introduced that they organized the “Red Military Doctors Go to the Grassroots” activity with the aim of allowing grassroots officers and men to enjoy expert medical services without leaving the camp.

The author saw in the tent of the regiment’s field training ground that members of the expert medical team answered questions and gave prescriptions and medicines to officers and men who came to consult. “My waist is always sore.” After a soldier described the symptoms, medical expert Liu Peng immediately examined him carefully and made treatment suggestions: “This is a muscle strain. You need to strengthen protection in future training...” “It is the duty of military doctors to protect the health of officers and men. We go to the grassroots to make rounds to help officers and men solve their problems and let them devote themselves to training and preparation for war in a better state.” The leaders of the center introduced that in recent years, they have established and improved the “send to the camp” medical service mechanism, and each year they select experts from orthopedics, gastroenterology, dermatology and other disciplines to form a medical team to conduct rounds of services in grassroots troops. During this round of inspection, the medical team

conducted rounds of inspections, health lectures, medical training and other services for diseases and training injuries that are prone to occur during the training of troops; established a cooperation mechanism with a certain army hospital, and conducted paired assistance in terms of discipline construction, technical guidance, talent training, scientific research and other aspects to help the hospital improve its medical support capabilities; helped multiple grassroots units establish remote diagnosis and treatment systems to improve their medical support levels. Military doctors "send to the camp" to help prepare for war and win. The center's leaders introduced that in recent years, they have kept a close eye on the mission characteristics of the front-line troops and the health needs of officers and men, and have sent more than 20 batches of expert medical teams to multiple border and coastal defense forces, which have been widely praised by officers and men.

陆军某旅创新组训方式提升专业人才培养质效

来源：解放军报 作者：郑重语 廖晓彬 喻润东 责任编辑：尚晓敏 2025-06-28

陆军某旅创新组训方式提升专业人才培养质效——

"因人施教"让新乘员加速成长

■郑重语 解放军报特约记者 廖晓彬 喻润东

炎炎夏日，陆军某旅训练场上铁甲轰鸣，一场装甲装备新乘员集训考核紧张进行.

驾驶舱内，车组新乘员陈嘉伟紧握方向盘，驾驶装甲车缓缓驶入仅比车身宽约 10 厘米的"S"形限制路. 尽管内心有些紧张，但他的动作精准流畅，没有出现差错.

随着装甲车平稳驶出限制路段，陈嘉伟的脸上露出了笑容："不久前参加车辆驾驶训练，我还常常因掌握不好转向时机而'撞杆'. 这段时间，有了'专属训练档案'的精准指导，我的驾驶技能提升很快. "

该旅领导介绍，此次集训，参训人员以从未接触过装甲装备的新兵和跨岗转训人员为主，涵盖炮手、驾驶员、车长 3 个岗位人员. 为破解以往组训施教过程中"个人能力有差异、教学方法不适配、训练质效难提升"等问题，今年他们为所有车组的新乘员建立了"专属训练档案"，采取"点穴式"补差、"闯关式"进阶等方法，帮助新乘员快速实现能力跃升.

记者翻开陈嘉伟的"专属训练档案"，里面详细记录了理论考核、实操短板、心理素质等 6 类 23 项数据. 通过这份档案，记者了解到，首次参加穿越障碍训练时，陈嘉伟被教练员评价为"空间感偏弱"，教学组随即结合这一情况为他调整训练计划，增加模拟训练时长，并安排专业骨干进行针对性帮带指导.

“‘专属训练档案’能够精准体现每个新乘员的训练情况、短板弱项，帮助教练员不断细化帮带措施、优化组训方法.”一名教练员告诉记者，他们根据能力水平将学员划分为基础、强化、尖子 3 个组别，因人而异设计个性化教学方案.

记者在该旅训练场上看到，不同组别、不同专业的官兵根据不同的教学方案展开专项训练.

基础组训练区内，驾驶专业学员驾车小心通过障碍，通信专业学员仔细检查电台参数，射击专业学员认真学习装填弹药技巧.

百米之外，强化组学员正在开展专业协同训练：驾驶专业学员驾驶装甲车驶入复杂路段；一路颠簸中，通信专业学员快速切换信号频道，确保车辆运动状态下通信稳定；射击专业学员透过观瞄镜锁定前方靶标，寻找最佳击发时机.

个性化的组训模式，让教学内容精准契合学员需求. 通信专业新乘员陈千团告诉记者：“教学组根据‘专属训练档案’提供的针对性指导，让我进步明显. 训练成绩越来越好，我对自己的信心也越来越足.”

陈千团从基础组来到强化组后，白天开展专业操作训练，晚上接受教练员一对一辅导. 经过一段时间的强化训练，陈千团在阶段性考核中拔得头筹，顺利从强化组升级到尖子组.

“‘专属训练档案’不仅是每名学员的训练记录，更是一份全面的‘体检报告’.”教练员侯升伟分析总体数据时发现，有一定比例的驾驶专业学员存在“坡道驻停后溜”问题，有些通信专业学员“抗干扰能力不足”. 针对部分学员存在的共性问题，他们集中展开专项补差，设置“闯关积分榜”激励学员全力攻克薄弱环节. 陈千团介绍说，他的训练档案里贴着 3 张“成功闯关认证”，清晰记录了他专业操作速度不断提升、失误率逐渐降低的蜕变历程.

记者在考核现场看到，陈嘉伟驾车连续通过弹坑路、涉水场等复杂地形，全程精准完成任务；通信专业的陈千团在强电磁干扰下，圆满完成通联任务. 走下考场，两人训练档案里的“阶段评估”一栏均被标注为“优”. 现场组织考核的考官告诉记者，考核成绩优秀的学员将被纳入该旅“装甲人才储备库”，作为专业骨干苗子进行跟踪培养.

该旅领导介绍，下一步，他们将针对部队需求持续优化教学模式，进一步拓展模块化教学、场景化实训等组训方式，努力推动“专属训练档案”机制覆盖更多专业.

短 评

育人须多些“精准滴灌”

■杨 悦

育人如育苗. 官兵能力基础不同、短板弱项各异，组训施教如果一味“大水漫灌”，不仅浪费教学和训练资源，也难以确保每名官兵都能汲取到自身最需要的“养分”. 提高育人质效，带兵人既要善于用“大水漫灌”应对共性问题，也要学会用“精准滴灌”破解个性难题.

陆军某旅为新乘员建立“专属训练档案”，从“育苗”之初就牢固树立“精准滴灌”意识，在全面掌握官兵个性特点、能力差异基础上，因人施教. 这一举措助力官兵加速成长，有效缩短了专业人才培养周期.

现代战争信息化、智能化特点越来越突出，对官兵能力素质的要求也越来越高. 各级应积极适应现代战争特点规律，不断更新人才培养思维理念，为制胜未来战场培养和储备大批综合素质全面、专业能力过硬的打仗型人才.

A Certain Army Brigade Innovates Training Methods to Improve the Quality and Efficiency of Professional Talent Training

Source: PLA Daily Author: Zheng Zhongyu Liao Xiaobin Yu Rundong Editor: Shang Xiaomin 2025-06-28

A certain army brigade innovates training methods to improve the quality and efficiency of professional talent training——

“Teaching according to the individual” accelerates the growth of new crew members

■ Zheng Zhongyu PLA Daily Special Correspondent Liao Xiaobin Yu Rundong

In the hot summer, the armored vehicles roared on the training ground of a certain army brigade, and a training assessment for new crew members of armored equipment was conducted intensively.

In the cockpit, the new crew member Chen Jiawei held the steering wheel tightly and drove the armored vehicle slowly into the “S”-shaped restricted road that was only about 10 cm wider than the body. Although he was a little nervous, his movements were precise and smooth, and there were no mistakes.

As the armored vehicle drove smoothly out of the restricted section, Chen Jiawei smiled: “Not long ago, I participated in vehicle driving training, and I often “hit the pole” because I didn’t master the turning timing. During this period, with the precise guidance of the “exclusive training file”, my driving skills have improved rapidly.” The brigade leaders introduced that the participants in this training camp were mainly recruits who had never been exposed to armored equipment and cross-post transfer personnel, covering three positions: gunner, driver, and commander. In order to solve the problems of “differences in personal abilities, inappropriate teaching methods, and difficulty in improving the quality and effectiveness of training” in the previous training and teaching process, this year they established “exclusive training files” for all new crew members of the vehicle crew, and adopted “point-to-point” compensation and “breakthrough” advancement

methods to help new crew members quickly achieve a leap in ability. The reporter opened Chen Jiawei's "exclusive training file", which recorded in detail 23 data in 6 categories, including theoretical assessment, practical shortcomings, and psychological quality. Through this file, the reporter learned that when Chen Jiawei participated in the obstacle crossing training for the first time, he was evaluated by the coach as "weak sense of space". The teaching team immediately adjusted the training plan for him based on this situation, increased the duration of simulation training, and arranged professional backbones to provide targeted guidance.

"The 'exclusive training file' can accurately reflect the training situation and weaknesses of each new crew member, helping coaches to continuously refine the guidance measures and optimize the training methods." A coach told reporters that they divided the trainees into three groups according to their ability levels: basic, intensive, and top, and designed personalized teaching plans for each person.

The reporter saw at the training ground of the brigade that officers and men of different groups and professions conducted special training according to different teaching plans.

In the basic group training area, driving students drove carefully through obstacles, communication students carefully checked the radio parameters, and shooting students carefully learned the skills of loading ammunition.

A hundred meters away, the students in the enhanced group are conducting professional collaborative training: driving students drive armored vehicles into complex roads; during the bumpy journey, communication students quickly switch signal channels to ensure stable communication when the vehicle is in motion; shooting students lock the target in front through the sight to find the best time to fire.

The personalized training model allows the teaching content to accurately meet the needs of students. Chen Qiantuan, a new crew member of the communication major, told reporters: "The targeted guidance provided by the teaching team based on the 'exclusive training file' has made me make significant progress. The training results are getting better and better, and I am more and more confident in myself."

After Chen Qiantuan came to the enhanced group from the basic group, he conducted professional operation training during the day and received one-on-one coaching from the coach at night. After a period of intensive training, Chen Qiantuan won the first place in the staged assessment and successfully upgraded from the enhanced group to the top group.

"The 'exclusive training file' is not only a training record for each student, but also a comprehensive 'physical examination report'." When coach Hou Shengwei analyzed the overall data, he found that a certain proportion of driving students had the problem of "slipping after stopping on the slope", and some communication students had "lack of anti-interference ability". In response to the common problems of some students, they concentrated on special remediation and set up a "pass scoreboard" to encourage students to overcome weak links. Chen Qiantuan said

that there were three “successful pass certifications” in his training file, which clearly recorded his transformation process of continuously improving professional operation speed and gradually reducing error rate.

The reporter saw at the assessment site that Chen Jiawei drove through complex terrains such as crater roads and wading fields, and completed the task accurately throughout the whole process; Chen Qiantuan, a communications major, successfully completed the communication task under strong electromagnetic interference. After leaving the examination room, the “stage evaluation” column in the training files of the two was marked as “excellent”. The examiner who organized the assessment on site told reporters that students with excellent assessment results will be included in the brigade’s “armored talent reserve pool” and tracked and cultivated as professional backbone seedlings.

The brigade leaders introduced that in the next step, they will continue to optimize the teaching model according to the needs of the troops, further expand modular teaching, scenario-based training and other training methods, and strive to promote the “exclusive training file” mechanism to cover more majors.

Short Comment

Education requires more “precision drip irrigation”

■ Yang Yue

Education is like raising seedlings. Officers and men have different ability foundations and different weaknesses. If training and teaching are blindly “flooded”, it will not only waste teaching and training resources, but also make it difficult to ensure that every officer and soldier can absorb the “nutrients” they need most. To improve the quality and efficiency of education, leaders must be good at using “flooding” to deal with common problems, and also learn to use “precision drip irrigation” to solve individual problems.

A certain army brigade established an “exclusive training file” for new crew members, firmly established the awareness of “precision drip irrigation” from the beginning of “seedling cultivation”, and taught according to people on the basis of fully understanding the individual characteristics and ability differences of officers and men. This measure helps officers and men accelerate their growth and effectively shortens the professional talent training cycle.

The characteristics of modern warfare, informationization and intelligence are becoming more and more prominent, and the requirements for the ability and quality of officers and men are also getting higher and higher. All levels should actively adapt to the characteristics and laws of modern warfare, constantly update the thinking concept of talent training, and cultivate and reserve a large number of combat talents with comprehensive qualities and strong professional capabilities to win the future battlefield.

陆军自主培养的第三批女飞行学员顺利完成毕业考核

来源：中国军网-解放军报 作者：郭延华 钱晓虎 张永进 责任编辑：孙智英 发布：2025-06-29

二〇一七年，陆军启动自主培养女飞行员计划，随着第三批女飞行学员日前毕业，陆航女飞行员群体不断壮大——

“低空玫瑰”向战盛开

■郭延华 解放军报记者 钱晓虎 特约记者 张永进

陆军自主培养的第三批女飞行学员顺利完成毕业考核. 作者提供

开车、悬停、贴地飞出……一整套动作行云流水、干净利落. 摘下头盔，女飞行学员郭万树走出驾驶舱，脸上洋溢着自信. 6 月中旬，晋南某机场，陆军自主培养的第三批女飞行学员以全优成绩完成所有毕业考核课目，拿到了加入战斗序列的通行证.

据了解，从 2017 年起，陆军从应届高中毕业生中招飞选拔、自主培养女飞行员. 在陆军航空兵学院，她们完成初放单飞、机型改装、特情处置、编队飞行等训练，掌握基础技战术能力. 毕业分配到部队后，她们继续学习驾驭新型战机，在实战化训练中提升实战水平，逐步成长为新型陆军建设的重要参与力量. 如今，随着第三批女飞行学员顺利毕业，陆航女飞行员群体不断壮大，“低空玫瑰”正在用实际行动践行初心使命——

川西高原，第 77 集团军“英雄陆航旅”女飞行员韩佳宁驾机完成跃升、俯冲等战术动作，向着三机分队战术课目发起冲锋. 来到部队后，韩佳宁凭借过硬基本功顺利完成改装，驾机辗转大漠戈壁、挺进青藏高原，成为我军首位驾驶直升机飞越“世界屋脊”的女飞行员.

南国丛林，第 75 集团军某旅女飞行员、二级机长徐枫灿熟练驾驶直-20 战机，时而绕点飞行、时而加速疾驰，在丛林树梢间划出道道弧线. 近年来，徐枫灿已驾驶多种机型在复杂条件下完成多项重大训练任务.

太行山下，陆军航空兵学院某旅女飞行教员葛玉婷忙着指导学员驾机勤训苦练. “战场只有胜负之分，没有性别之分，练强实战本领才能克敌制胜. ”这位来自湖南的“飞行教头”性格柔中带刚，是陆军首批自主培养的女飞行员，也是首批留校执教的两名女飞行教员之一. 迄今，她已安全飞行 700 多小时，成功带教多批飞行学员.

“低空玫瑰”向战盛开. “过硬本领是最好的自我证明，强健羽翼是最好的自我标定. ”采访中，多名陆航女飞行员说，强军征途上，她们将刻苦训练、向战奋飞，用青春和梦想为强军事业贡献力量.

背景链接

为培养多样化新质作战力量人才，形成更加多元的战斗体系，2017 年，陆军启动自主培养女飞行员计划，全国超 12 万名高中毕业生参加选拔，最终 10 人脱颖而出，成为陆军首批自主培养的女飞行学员. 2019 年，陆军招收第二批女飞行学员，11 名高中毕业生一路过关，成功入选.

女飞行学员进入军校后，要接受4年系统培养，训练涵盖军事理论、飞行技能等多个课目.

目前，陆军自主培养的前两批共 21 名女飞行员们已在各自战位振翅翱翔，多人立功受奖.

The Third Batch of Female Flight Trainees Trained Independently by the Army Successfully Completed the Graduation Assessment

Source: China Military Network-People’s Liberation Army Daily Author: Guo Yanhua Qian Xiaohu Zhang Yongjin Editor: Sun Zhiying Release: 2025-06-29

In 2017, the Army launched a plan to train female pilots independently. With the graduation of the third batch of female flight trainees a few days ago, the group of female pilots in the Army Aviation has continued to grow- “Low-altitude Roses” bloom towards the battle

■ Guo Yanhua People’s Liberation Army Daily reporter Qian Xiaohu special reporter Zhang Yongjin

The third batch of female flight trainees trained independently by the Army successfully completed the graduation assessment. Author provided

Driving, hovering, flying close to the ground... a whole set of actions is smooth and clean. Taking off the helmet, female flight trainee Guo Wanshu walked out of the cockpit with confidence on her face. In mid-June, at an airport in southern Shanxi, the third batch of female flight trainees trained independently by the Army completed all graduation assessment courses with excellent results and got a pass to join the combat sequence.

It is understood that since 2017, the Army has recruited and selected female pilots from high school graduates and independently trained them. At the Army Aviation Academy, they completed training such as initial solo flight, aircraft modification, special situation handling, and formation flight, and mastered basic technical and tactical capabilities. After graduation and assignment to the troops, they continued to learn to fly new combat aircraft, improve their actual combat level in actual combat training, and gradually grow into an important participant in the construction of a new army. Today, with the successful graduation of the third batch of female flight trainees, the group of female pilots in the Army Aviation continues to grow, and the "Low-altitude Rose" is practicing its original mission with practical actions-

On the western Sichuan Plateau, Han Jianing, a female pilot of the "Heroic Army Aviation Brigade" of the 77th Group Army, completed tactical actions such as leaping and diving, and launched a charge towards the tactical subjects of the three-machine squadron. After arriving at the army, Han Jianing successfully completed the modification with her solid basic skills, flew across the desert and Gobi, and advanced into the Qinghai-Tibet Plateau, becoming the first female pilot of our army to fly a helicopter over the "Roof of the World".

In the jungle of the south, Xu Fengcan, a female pilot and second-class captain of a brigade of the 75th Group Army, skillfully flies a Z-20 combat aircraft, sometimes flying around a point, sometimes accelerating and galloping, drawing arcs between the treetops of the jungle. In recent years, Xu Fengcan has completed many major training tasks under complex conditions by flying various models.

Under the Taihang Mountains, Ge Yuting, a female flight instructor of a brigade of the Army Aviation Academy, is busy instructing students to practice hard in flying. "Only victory and defeat on the battlefield, not gender, can defeat the enemy only by strengthening practical combat skills." This "flight coach" from Hunan has a soft but strong personality. She is one of the first female pilots trained independently by the Army and one of the first two female flight instructors to stay in school to teach. So far, she has flown safely for more than 700 hours and successfully taught many batches of flight students.

"Low-altitude roses" bloom towards the battle. "Excellent skills are the best self-proof, and strong wings are the best self-calibration." In the interview, many female pilots of the Army Aviation said that on the journey of strengthening the army, they will train hard, fight hard, and contribute to the cause of strengthening the army with their youth and dreams.

Background link

In order to cultivate diversified new combat force talents and form a more diverse combat system, the Army launched the self-training female pilot program in 2017. More than 120,000 high school graduates across the country participated in the selection. In the end, 10 people stood out and became the first batch of female flight cadets trained by the Army. In 2019, the Army recruited the

second batch of female flight cadets, and 11 high school graduates passed the test and were successfully selected.

After entering the military academy, female flight cadets will receive 4 years of systematic training, covering military theory, flight skills and other subjects.

At present, the first two batches of 21 female pilots trained by the Army have been flying in their respective combat positions, and many have been awarded for meritorious service.

精心培育 静待花开

■第八十二集团军某旅某连中士班长 李光辉

“同志们，下面我将讲解并示范掩体构筑课目，请大家注意几个细节……”训练场上，上等兵小刘正在组织训练教学. 看着他成熟自信的样子，我不禁暗自感叹：谁能想到这是当年最让我头疼的兵.

那时，小刘刚刚下连分配到班里. 我发现，不管训练还是生活，他似乎总是比别人“慢半拍”，做什么都不慌不忙、慢慢吞吞. 直到有一次，他因打背包太慢，让全班在建制班比武中与冠军失之交臂.

为改变小刘，我在训练中对他要求更加严格. 然而，“强化训练”持续数天，他的成绩始终不见起色.

一次掩体构筑训练，其他班的新兵都已经开始挖土，而小刘还拿着工兵锹在地上不紧不慢地画草图.

“动作快一些！”我大声催促.

然而，小刘依旧不紧不慢. “你到底是不想挖，还是压根没学会？”听着我的语气一下子严厉起来，小刘涨红了脸，站在原地不知所措.

考虑到上午还有其他安排，我命令小刘利用休息时间将掩体构筑完毕，随即带大家转入下一课目训练.

这次“风波”并未随训练结束而平息. 当天下午，副班长找到我：“班长，我觉得咱们可能误会小刘了.”说着，他带我来到掩体构筑训练场.

“这是小刘自己构筑好的. ”副班长指着眼前一个既规整又标准的单兵掩体说，“这课目你也教、我也教，小刘就是完不成，给他时间自己干，反而完成得这么好. ”

副班长的话让我陷入思考，莫非是我的带兵方法有问题？带着困惑，我将这一情况与指导员进行了沟通.

“小刘性子慢，但心思细腻，做事精益求精. 每个人的性格不同，不能先入为主、轻易给他们下结论. ”指导员对我说：“作为班长，要包容班内每名战士的个性，因人施策，帮助他们成长. ”指导员的话让我恍然大悟，对于如何帮带小刘，我有了新的想法.

回到班里后，我为白天的行为向小刘道歉，他也向我吐露心声：“班长，我懂你的用心良苦，但我接受能力弱，同样的课目，别人只需练一两遍就能掌握，我却要重复好几次，我是不是不适合在部队干啊？”

对于小刘的不自信，我深知自己有很大责任，便安慰道：“每个人都有自己的长处，你学习领悟慢了些，但自我要求高. 你上午构筑的掩体非常标准，值得表扬. 军人讲究雷厉风行，你老是这样可不行……”小刘听后若有所思.

从那天起，我开始改变带兵方法，一边要求他们跟上自己的节奏，一边根据班内战士的性格特点，引导他们在实践中发挥长处、补齐短板.

小刘没让人失望，对待工作依旧精益求精，在我的帮助下，也渐渐找到了突破口. 一段时间后，他的各项训练成绩都取得了明显进步，脸上自信的笑容更多了.

经历此事，我有了新的思考：每名战士都是不一样的，作为一线带兵人，要懂得“育人如育花”的道理，按照他们的不同花期，精心培育、浇水、施肥. 只要功夫下到了，我们需要做的，就是静待花开.

@Frontline Leaders Treat Different Soldiers with Different Strategies and Help Them Grow

Source: China Military Network-People's Liberation Army Daily Author: Li Guanghui Editor: Shang Xiaomin Release: 2025-06-30

Carefully cultivate and wait for flowers to bloom

■ Li Guanghui, sergeant squad leader of a company of a brigade of the 82nd Group Army

“Comrades, I will explain and demonstrate the bunker construction course below. Please pay attention to a few details...” On the training ground, Corporal Xiao Liu was organizing training and teaching. Looking at his mature and confident appearance, I couldn't help but sigh inwardly: Who would have thought that this was the soldier who gave me the most headache back then.

At that time, Xiao Liu had just been assigned to the class by the company. I found that no matter in training or life, he always seemed to be “half a beat slower” than others, and he did everything slowly and unhurriedly. Until one time, he was too slow to pack his backpack, causing the whole class to miss the championship in the established class competition.

In order to change Xiao Liu, I was more strict with him in training. However, after several days of “intensive training”, his performance never improved.

During a bunker construction training, the new recruits from other classes had already started digging, but Xiao Liu was still drawing sketches on the ground with a military shovel.

“Hurry up!” I urged loudly.

However, Xiao Liu was still unhurried. “Do you not want to dig, or have you not learned it at all?” Xiao Liu blushed and stood there at a loss when he heard my tone suddenly become stern.

Considering that there were other arrangements in the morning, I ordered Xiao Liu to use the break time to complete the bunker construction, and then led everyone to the next training.

This “storm” did not subside with the end of the training. That afternoon, the deputy squad leader came to me: “Squad leader, I think we may have misunderstood Xiao Liu.” Then he took me to the bunker construction training ground.

“This is what Xiao Liu built himself.” The deputy squad leader pointed to a neat and standard single-soldier bunker in front of him and said, “You and I taught this subject, but Xiao Liu just couldn't complete it. Give him time to do it himself, but he completed it so well.”

The deputy squad leader's words made me think, is there something wrong with my way of leading the troops? Confused, I communicated this situation with the political instructor.

“Xiao Liu is slow-tempered, but he is meticulous and strives for perfection in his work. Everyone has different personalities, so we cannot prejudge them and easily draw conclusions about them.” The political instructor said to me: “As a squad leader, you must tolerate the personality of each soldier in the class, and adopt policies tailored to each person to help them grow.” The political instructor's words made me suddenly realize that I had new ideas about how to help Xiao Liu.

After returning to the class, I apologized to Xiao Liu for my behavior during the day, and he also confided in me: “Squad leader, I understand your good intentions, but I have a weak ability to accept. For the same subject, others only need to practice once or twice to master it, but I have to repeat it several times. Am I not suitable for working in the army?”

For Xiao Liu's lack of confidence, I know that I have a lot of responsibility, so I comforted him: “Everyone has their own strengths. You are a little slow in learning and understanding, but you have high self-requirements. The bunker you built this morning is very standard and worthy of praise. Soldiers are swift and resolute, and you can't always be like this...” Xiao Liu thought after hearing this.

From that day on, I began to change the way I led the soldiers. I asked them to keep up with my pace, and guided them to give full play to their strengths and make up for their shortcomings in practice according to the personality characteristics of the soldiers in the class.

Xiao Liu did not disappoint us. He continued to strive for excellence in his work. With my help, he gradually found a breakthrough. After a period of time, his training results have made significant progress, and he has more confident smiles on his face.

After experiencing this, I have a new thinking: every soldier is different. As a front-line leader, we must understand the principle of "educating people like cultivating flowers" and carefully cultivate, water and fertilize them according to their different flowering periods. As long as we put in the effort, all we need to do is wait for the flowers to bloom.

第八十一集团军某旅强化干部骨干依规履职意识

来源：中国军网-解放军报 作者：张弼朝 卢运国 责任编辑：尚晓敏

2025-06-30

第八十一集团军某旅强化干部骨干依规履职意识——

纠治"一切正常"背后的"反常"

■张弼朝 卢运国

"岗桌内有杂物，经提醒已清理""未按照规定配齐标志服饰，指出后已改正"……近日，第81集团军某旅某营干部陈浩在检查营连查铺查哨情况登记时发现，"执勤情况"一栏不再是清一色的"一切正常"，而是详细记录了具体问题. 这一转变，体现了整改成效.

此前，营队有一次开展作风纪律整顿，陈浩发现个别干部骨干在查哨时只是"刷个脸"，对战士站哨时走神、遇见熟人不问口令等情况仅做了口头提醒，在岗哨情况登记时仍记录"一切正常".

查出问题为何不记录？陈浩翻看其他连队登记记录，也发现了类似情况. 在营党委会上，他如实反映了"查哨情况登记与实际不符"的问题.

"有的只是'小问题'，现场提醒后就立刻得到了纠正，记下来似乎有些小题大做""担心给上级留下不好的印象，就没过多记录"……调研时，有基层干部解释道.

“条令明确，每次查铺查哨的情况，应当进行登记. 这一现象暴露出少数干部骨干思想认识不足、工作作风不够扎实的问题，责任意识有待强化. ”营党委反思感到，“一切正常”的背后是部分干部骨干思想上的松懈、法治思维的缺失，如不及时纠治，会导致查哨流于形式、管理出现隐患.

针对此类“正常”背后的“反常”，该营党委开展专题培训，组织干部骨干认真学习条令法规要求，统一查哨流程及记录、整改标准，结合剖析案例引导他们充分认识到“查哨关乎安全，登记体现责任”的职责要求，摒弃侥幸与应付心理. 他们完善监督机制，开展不定期检查，将查哨质量与登记情况纳入周讲评，督促干部骨干依规履职.

经过教育整改，该营干部骨干工作作风面貌有了较大变化. 一次随机检查显示，查哨“走过场”、不如实登记等现象没有了，战备物资摆放不规范、执勤纪律松懈等问题也得到有效整治，营连管理水平明显提升. 在近期的战备值班拉动中，该营组织有序、反应迅速，得到上级认可.

An 81st Group Army Brigade Strengthens the Awareness of Cadres and Backbones to Perform Their Duties in Accordance with Regulations

Source: China Military Network-People's Liberation Army Daily Author: Zhang Bichao Lu Yunguo Editor: Shang Xiaomin

2025-06-30

A brigade of the 81st Group Army strengthens the awareness of cadres and backbones to perform their duties in accordance with regulations-

Correcting the “abnormality” behind “everything is normal”

■ Zhang Bichao Lu Yunguo

“There are sundries in the post table, which have been cleaned up after being reminded” “The logo and clothing were not fully equipped in accordance with regulations, and they have been corrected after being pointed out”... Recently, Chen Hao, a cadre of a battalion of a brigade of the 81st Group Army, found that when checking the registration of the battalion company's inspection of the barracks and sentries, the “duty situation” column was no longer a uniform “everything is normal”, but a detailed record of specific problems. This change reflects the effectiveness of rectification.

Previously, the battalion once conducted a rectification of work style and discipline. Chen Hao found that some cadres and backbones only “swiped their faces” when checking the sentries, and only verbally reminded the soldiers of being distracted when standing guard, not asking for passwords when meeting acquaintances, etc., and still recorded “everything is normal” when registering the sentry situation.

Why aren’t the problems recorded after they are discovered? Chen Hao looked through the registration records of other companies and found similar situations. At the battalion party committee meeting, he truthfully reflected the problem of “the registration of the inspection situation is inconsistent with the actual situation”.

“Some are just 'small problems', which were immediately corrected after the on-site reminder. It seems a bit of a fuss to write them down.” “I was worried about leaving a bad impression on my superiors, so I didn't record too much”... During the investigation, a grassroots cadre explained.

“The regulations clearly state that every inspection of the barracks and sentries should be registered. This phenomenon exposes the problem that a few cadres and backbones have insufficient ideological awareness and a solid work style, and their sense of responsibility needs to be strengthened.” The battalion party committee reflected and felt that behind the “everything is normal” is the laxity of some cadres and backbones in thinking and the lack of legal thinking. If it is not corrected in time, it will lead to the inspection of sentries becoming a formality and hidden dangers in management.

In response to the “abnormality” behind this kind of “normal”, the battalion party committee conducted special training, organized cadres and backbones to seriously study the requirements of regulations and regulations, unified the inspection process and record and rectification standards, and combined with the analysis of cases to guide them to fully realize the responsibility requirements of “inspection of sentries is related to safety, and registration reflects responsibility”, and abandon the mentality of luck and coping. They improved the supervision mechanism, conducted irregular inspections, included the quality of sentry inspections and registration status in weekly reviews, and urged cadres and backbones to perform their duties in accordance with regulations.

After education and rectification, the work style of the cadres and backbones of the battalion has changed significantly. A random inspection showed that the phenomenon of “going through the motions” and not registering truthfully in sentry inspections has disappeared, and the problems of irregular placement of combat readiness materials and lax duty discipline have also been effectively rectified, and the management level of the battalion and company has been significantly improved. In the recent combat readiness duty pull, the battalion was organized in an orderly manner and responded quickly, which was recognized by the superiors.

第七十八集团军某旅组织干部骨干赴先进单位参观见学

来源：中国军网-解放军报 作者：吴 洋 责任编辑：尚晓敏 发布：2025-06-30 07:15:24

第七十八集团军某旅组织干部骨干赴先进单位参观见学——

带着问题去 满载收获回

■吴 洋

“‘红一连’是一支诞生于秋收起义的红军连队. ‘三湾改编’时期，毛泽东同志亲自在该连建立党支部并发展了 6 名新党员，开创了我军‘支部建在连上’的先河……”前不久，第 78 集团军某旅组织一批干部骨干，赴先进单位进行参观见学，第一站是第 83 集团军某旅“红一连”. “红一连”指导员刘文涛结合连队取得的荣誉，向大家分享了基层抓建经验.

“组织人员赴先进单位参观见学，是我们近年来探索联合抓建机制，提升基层建设质效的有益尝试. ”该旅领导介绍，出发前，他专门叮嘱这批外出参观见学的干部骨干，在开阔眼界的同时，虚心向先进连队取经，真正把兄弟单位全面建设为什么好、好在哪里、应该如何学习借鉴等问题搞清楚.

带着这样的目的，这些参观见学的干部骨干向刘文涛提出一个问题：“‘红一连’数十年保持先进，有什么秘诀吗？”

“连队要进步，首抓党支部；支部攥成拳，带出过硬连. ”刘文涛介绍，这是“红一连”长期一以贯之的理念，想要建设好连队，必须建设好支部，充分发挥战斗堡垒作用.

参观见学中，干部骨干们列席了一次“辣味”十足的组织生活会，被“红一连”党支部大力弘扬“党员问题群众敢讲、支委问题党员敢点、书记问题支委敢批”的“三敢作风”深深触动. 他们纷纷表示，“红一连”的这一做法，对每个连队都适用，贵在长期坚持、较真碰硬，不断提高基层党组织“三种能力”，把支部锻造得更坚强、更过硬.

跟随指引，干部骨干们来到“红一连”宿舍，发现每个班排都有“读书角”，随便翻开一本书，都能看到官兵的圈点批注和感悟. 干部李通提出心中疑问：“如何激发官兵的学习热情？”刘文涛道出自己的见解：“关键在于营造浓厚的学习氛围，党员干部必须带头读书、带头学习，以此影响带动其他官兵. ”

随后，他把“红一连”探索运用的通俗讲解、故事启迪、案例剖析等学习“十二法”介绍给大家，并就如何更有成效地组织理论知识擂台赛、演讲比赛等特色配套活动一并作了分享.

“排排授过称，班班有战功”“传统上墙头，荣誉挂门头”“人人进连史，个个当主人”……看着随处可见的标语，干部蒋沣宇不禁感叹：“走进‘红一连’，可谓处处受熏陶、事事有启迪，我心中的不少问号被拉直了. ”

带着问题去，满载收获回. 笔者了解到，接下来，他们将继续前往其他先进单位，找差距、取真经，以别人之长补己之短，推动单位建设再上新台阶.

A 78th Group Army Brigade Organized Cadres and Backbones to Visit Advanced Units for Learning

Source: China Military Network-Liberation Army Daily Author: Wu Yang Editor: Shang Xiaomin Release: 2025-06-30 07:15:24

A brigade of the 78th Group Army organized cadres and backbones to visit advanced units for learning——

Go with questions and return with full harvest

■Wu Yang

“The 'Red Company 1' is a Red Army company born in the Autumn Harvest Uprising. During the 'Three Bays Reorganization' period, Comrade Mao Zedong personally established a party branch in the company and developed 6 new party members, creating a precedent for our army's 'branch built in the company'...” Not long ago, a brigade of the 78th Group Army organized a group of cadres and backbones to visit advanced units for learning. The first stop was the “Red Company 1” of a brigade of the 83rd Group Army. Liu Wentao, the political instructor of the “Red Company 1”, combined with the honors achieved by the company, shared with everyone the experience of grassroots construction.

“Organizing personnel to visit and learn from advanced units is a useful attempt for us to explore the joint construction mechanism and improve the quality and efficiency of grassroots construction in recent years.” The brigade leader introduced that before departure, he specifically instructed this group of cadres and backbones who went out to visit and learn that while broadening their horizons, they should humbly learn from the advanced companies and truly understand why the comprehensive construction of brother units is good, what is good about it, and how to learn from it.

With this purpose, these cadres and backbones who visited and learned asked Liu Wentao a question: “What is the secret of the “Red First Company” to remain advanced for decades?”

“If the company wants to make progress, it must first focus on the party branch; if the branch is clenched into a fist, it will lead to a strong company.” Liu Wentao introduced that this is the long-term and consistent concept of the “Red First Company”. If you want to build a good company, you must build a good branch and give full play to the role of a fighting fortress.

During the visit, the cadres and backbones attended a “spicy” organizational life meeting and were deeply touched by the “Three Dare Styles” vigorously promoted by the “Red First Company” Party Branch, which is “the masses dare to speak out about party members' problems, party members dare to point out branch committee problems, and branch committee members dare to criticize secretary problems”. They said that this practice of the “Red First Company” is applicable to every

company. The key is to persist in it for a long time, be serious and hard-working, and constantly improve the “three capabilities” of grassroots party organizations to make the branch stronger and more capable.

Following the guidance, the cadres and backbones came to the “Red First Company” dormitory and found that each class had a “reading corner”. When you open a book casually, you can see the soldiers' circles, comments and insights. Cadre Li Tong raised a question in his mind: “How to stimulate the learning enthusiasm of officers and men?” Liu Wentao expressed his own views: “The key is to create a strong learning atmosphere. Party members and cadres must take the lead in reading and learning, so as to influence and drive other officers and men. “

Then, he introduced the “12 methods” of learning explored and applied by the “Red First Company”, such as popular explanation, story inspiration, and case analysis, and shared how to organize more effective theoretical knowledge competitions, speech competitions and other special supporting activities.

“Every platoon has been awarded, and every class has military merits”, “Traditionally, the wall is hung with honors”, “Everyone enters the company history, and everyone is the master”... Looking at the slogans everywhere, cadre Jiang Fengyu couldn't help but sigh: “Walking into the ‘Red First Company’, it can be said that I was influenced everywhere and inspired in everything. Many question marks in my heart were straightened out. “

Go with questions and return with full harvest. The author learned that next, they will continue to go to other advanced units to find gaps, learn from the truth, make up for their shortcomings with the strengths of others, and promote the construction of the unit to a new level.

第 82 集团军某旅探索运用“拓扑图”助推训练转型升级

来源：解放军报 作者：刘敏 刘凡 责任编辑：杜圣智 2025-05-30

第 82 集团军某旅探索运用“拓扑图”助推训练转型升级——

精武强能，人人拥有“小目标”

■解放军报记者　刘敏　特约通讯员　刘凡

编者按 习主席强调，突出打牢基础，严格按纲施训，严格考核考评，严格督导问责，完善保障条件，抓好群众性练兵比武，把每一个单兵、每一型装备、每一类作战要素训到位，夯实打胜仗能力基础. 第 82 集团军某旅创新组训模式，探索运用“军事训练目标拓扑图”，将各级作战任务“大目标”分解成个人训练“小目标”，抓紧抓实计划、实施、考评等关键环

节，形成从目标分解到成果聚合的闭合链路，推动军事训练转型升级，有效提升了部队训练水平.

工程机械破障突进，快速构筑掩体；重型装备灵活腾挪，建起阻隔障碍……近日，第 82 集团军某旅组织一场多岗位专业技能阶段性考核. 记者翻看该旅某连一个课目的考核成绩单发现，官兵成绩优良率超过八成，不少官兵的考核成绩与此前相比进步明显.

“官兵个人训练成绩的进步，带动连队训练水平整体提升，这是我们探索运用‘军事训练目标拓扑图’助推训练转型升级带来的新变化. ”该旅领导介绍，他们借鉴拓扑结构研究成果，绘制树状“军事训练目标拓扑图”，将作战任务按“旅—营—连”逐级分解细化，各级据此设定符合自身实际的“目标集”，官兵再以连队“目标集”为参照，结合自身情况制作包含训练课目、进步幅度和努力目标等内容的个人训练目标卡.

记者翻开该旅某营“军事训练目标拓扑图”，各级战场分工、下辖连队作战任务等内容一目了然. “认真研究全营作战任务后，营连可结合作战分工设定自身‘目标集’，各连区分指挥、行动、保障等作战编组将‘目标集’进一步细化，根据军事训练大纲要求明确训练标准，帮助官兵制订个人成长目标. ”该营干部耿俊卿说，“军事训练目标拓扑图”的树状结构，让营战场分工、连作战编组和官兵个人训练目标之间的关系脉络更加清晰呈现，有助于针对性地进行组训施教. 营连帮助每名官兵实现个人训练的“小目标”，这些“小目标”不断聚合，就能逐渐提升全营整体作战能力.

此前，一项操作技能因为作业流程繁琐、精度要求较高，一直是该旅开展训练的难点. 然而，这项技能被纳入个人训练目标后，不少官兵主动优化作业方法、总结经验技巧，极大地提升了训练质效. 在最近的一次训练中，组训干部孙超然发现中士赵晟钦不厌其烦地练习这项技能. 赵晟钦说：“这项技能在后续其他课目中也要用到，现在不练扎实，后面的训练进度就会受影响. ”

耿俊卿告诉记者，“军事训练目标拓扑图”犹如每名官兵的“专属课表”，让大家充分认识到不同训练课目和内容之间的逻辑关系，有效激发了官兵提升专业能力的主动性、积极性. 不仅如此，他们还定期复盘，根据官兵训练成绩的变化，验证组训计划和施训方法是否科学合理，在此基础上不断调整优化“军事训练目标拓扑图”和官兵个人训练的“小目标”.

“每个训练课目、每名官兵都是战斗力生成链路上的节点. 每个节点都过硬，战斗力生成链路的畅通就有了保障. ”该旅领导介绍，“军事训练目标拓扑图”推广运用后，全旅训练转型升级不断换挡提速，各营连、各作战单元在作战方式上，正在加速从“协同配合”走向“战法融合”. 目前，他们正在探索建立更加科学的训练目标成果检验机制，为进一步优化编组、精准施训提供有力支撑.

An 82nd Group Army Brigade Explored the Use of “Topological Maps” to Promote Training Transformation and Upgrading

Source: PLA Daily Author: Liu Min Liu Fan Responsible editor: Du Shengzhi 2025-05-30

A brigade of the 82nd Group Army explored the use of “topological maps” to promote training transformation and upgrading——

Strengthen martial arts and abilities, and everyone has “small goals”

■PLA Daily reporter Liu Min Special correspondent Liu Fan

Editor's note President Xi Jinping emphasized that we should lay a solid foundation, strictly implement training according to the guidelines, strictly conduct assessments and evaluations, strictly supervise and hold accountable, improve support conditions, and do a good job in mass training and competitions, so as to train every single soldier, every type of equipment, and every type of combat element in place, and lay a solid foundation for the ability to win battles. A brigade of the 82nd Group Army innovated the training model, explored the use of “military training target topological maps”, decomposed the “big goals” of combat tasks at all levels into “small goals” for individual training, and grasped the key links such as planning, implementation, and evaluation, forming a closed link from goal decomposition to results aggregation, promoting the transformation and upgrading of military training, and effectively improving the training level of the troops.

Engineering machinery breaks through obstacles and quickly builds shelters; heavy equipment moves flexibly and builds barriers...Recently, a brigade of the 82nd Army organized a multi-position professional skills stage assessment. The reporter looked through the assessment report card of a course of a company of the brigade and found that the officers and men had an excellent rate of more than 80%, and the assessment scores of many officers and men were significantly improved compared with the previous ones.

“The improvement of the individual training results of officers and men has led to the overall improvement of the company's training level. This is a new change brought about by our exploration of using the “military training target topology map” to promote the transformation and upgrading of training.” The leaders of the brigade introduced that they drew on the research results of topological structures and drew a tree-like “military training target topology map”, breaking down and refining the combat tasks step by step according to “brigade-battalion-company”. Each level set a “target set” that meets its own actual situation. The officers and men then use the company's “target set” as a reference and combine their own situation to make personal training target cards containing training courses, improvement ranges and efforts.

The reporter opened the “military training target topology map” of a battalion of the brigade, and the division of labor at all levels and the combat tasks of the subordinate companies were clear at

a glance. “After carefully studying the combat mission of the entire battalion, the battalion company can set its own 'target set' in combination with the combat division of labor. Each company can further refine the 'target set' by distinguishing between command, action, and support combat groups, clarifying the training standards according to the requirements of the military training outline, and helping officers and men to set personal growth goals.” Geng Junqing, a cadre of the battalion, said that the tree structure of the “military training target topology map” makes the relationship between the battalion battlefield division of labor, the company combat group and the individual training goals of officers and men more clearly presented, which is conducive to targeted training and teaching. The battalion company helps each officer and soldier achieve the “small goals” of personal training. These “small goals” are constantly aggregated, which can gradually improve the overall combat capability of the entire battalion.

Previously, an operation skill has always been a difficulty for the brigade to conduct training because of its cumbersome operation process and high precision requirements. However, after this skill was included in the personal training goal, many officers and men took the initiative to optimize the operation methods and summarize experience and skills, which greatly improved the quality and effectiveness of training. In a recent training, training cadre Sun Chaoran found that Sergeant Zhao Shengqin practiced this skill tirelessly. Zhao Shengqin said: “This skill will also be used in other subsequent courses. If you don't practice it now, the progress of subsequent training will be affected.” Geng Junqing told reporters that the “Military Training Target Topology Map” is like an “exclusive schedule” for each officer and soldier, allowing everyone to fully understand the logical relationship between different training courses and contents, and effectively stimulate the initiative and enthusiasm of officers and men to improve their professional capabilities. Not only that, they also regularly review and verify whether the training plan and training methods are scientific and reasonable based on the changes in the training results of officers and men. On this basis, they continuously adjust and optimize the “Military Training Target Topology Map” and the “small goals” of individual training of officers and men. “Each training course and each officer and soldier is a node on the combat effectiveness generation link. If each node is strong, the smooth flow of the combat effectiveness generation link will be guaranteed. “The brigade leader introduced that after the promotion and application of the “Military Training Target Topology Map”, the transformation and upgrading of the brigade's training has been continuously shifting gears and accelerating. In terms of combat methods, each battalion, company, and combat unit is accelerating from “coordination and cooperation” to “integration of tactics”. At present, they are exploring the establishment of a more scientific training target results inspection mechanism to provide strong support for further optimizing the formation and precise training.

北部战区陆军某旅夜训考核优良率大幅提升， 多项纪录被刷新

来源：中国军网-解放军报 作者：毕笑天 责任编辑：王一亘

2025-07-01

北部战区陆军某旅着力提升夜间作战能力——

锻造克敌制胜的“夜老虎”

■解放军报记者 毕笑天

微风轻拂，夜色如墨. 北部战区陆军某旅野外训练场上，一场工程保障训练紧张进行.

“某型架桥车发动机出现故障！”接到特情通报，三级军士长王秀峰摸黑抵达事发地点. 在伸手不见五指的情况下，王秀峰趴在发动机旁，凭借经验准确摸到故障位置，完成应急修复. “暗夜条件下进行装备抢修，难度可比白天大多了. ”擦去额头上的汗水，王秀峰告诉记者，“夜战中，敌人不会给你开灯的机会. 平时训练，我们必须考虑到各种不利因素，把操作技能练到极致. ”

此前，该旅组织一场夜间训练考核，结果出人意料：整体合格率不到一半. 对此，该旅一位领导的点评一针见血：“夜训并不是简单地将训练课目从白天搬到夜间. 智能化战争时代，科技手段大幅缩小了昼夜差异，只有真正掌握夜战的制胜机理，才能牢牢掌控战场主动权，锻造出克敌制胜的‘夜老虎’. ”

为此，该旅深刻总结夜战特点规律，严格落实军事训练大纲相关要求，围绕提升夜战能力苦练精训. 一方面，他们结合自身实际制订夜间训练操作规范，根据不同阶段、不同层次训练内容设置不同课目和评定标准；另一方面，强化训练监督，健全激励机制，把夜训课目常态纳入比武竞赛活动，激发官兵训练热情和练兵动力.

采访期间，记者在该旅工兵训练场看到，爆破连张连长带领官兵一头扎进茫茫夜色，开展“暗夜破障”课目训练. 借助夜视仪，参训官兵悄悄向“敌”阵地前沿移动.

“右前方 2 点钟方向，疑似‘敌’暗堡！”行进途中，担任警戒的一名战士突然发出警告. 爆破手迅速出动，利用某新型爆破装置，开辟出一条安全通路.

擦去夜视仪上的汗珠，张连长告诉记者：“夜间光线不足，各类障碍物、火力点的隐蔽性远高于白天. 要从模糊光影中准确捕捉瞬息万变的战场信息，对官兵而言是不小的挑战. ”

该旅领导介绍，为提升官兵在微光环境下的听觉辨位等感知能力，确保熟练运用夜视仪、热成像仪等装备进行目标识别，他们积极利用技术手段，模拟多种极端环境，组织官兵开展强化训练.

以枪械分解结合、弹药装填训练为例. 为有效提升官兵肌肉记忆和装备操作熟练度，他们常态组织官兵开展蒙眼训练，直至做到不依赖光线也能娴熟操作手中装备. 中士唐存辉告诉记者："现在，我们闭着眼也知道手里的装备该怎么用. 得益于扎实的训练，暗夜不再是一片漆黑，反而为我们披上了一件隐身衣. "

置身该旅战术训练场，记者看到，参训官兵动作迅捷、忙而不乱. "这还远远不够. "负责组训的一名作训参谋说，"现代夜战已突破传统视觉盲区范畴，除了视线上的'黑暗屏障'，还要直面无形的'电磁暗战'和波诡云谲的'信息迷雾'. "

该旅领导介绍，夜战中，参训人员需要准确感知环境信息，并借助旗语、环境微光、战术手势等与战友沟通交流. 一旦协同不畅，便可能导致任务失败.

为提升官兵暗夜条件下的行动配合默契度，该旅将夜间协同训练作为一个重点进行攻关，要求官兵在训练中关闭所有无线电设备，仅通过简易设备和战术手语完成作战任务.

训练现场，感受到战友轻拍肩膀，中士李朝阳立即俯身贴地、匍匐前进. 不一会儿，战友又短促轻拍他的战术背心，李朝阳心领神会：接下来要开始快速跃进……

训练结束，李朝阳感慨地说："黑夜中洒下的一滴滴汗水，练就了我和战友之间并肩作战的高度默契. "

参加过夜间协同训练的其他官兵，与李朝阳有着同样的感受. 前不久，该旅某工兵破障分队组织开辟通路训练. 月光下，一级上士张旭洋带领 6 名队员抵近"敌"前沿雷场后，大家立即呈扇形散开.

列兵李明凯趴在草丛中，左手轻拍战友后背两下，示意"发现连环雷". 随后，两人用手指在对方战术背心上敲击事先约定的信号，传递行动信息，整个过程悄无声息，但两人的协同配合却精准流畅……

"扎实开展夜训以来，全旅官兵的夜战本领不断增强. "该旅领导告诉记者，最近组织的一次夜训考核中，多项训练纪录被刷新，整体优良率大幅提升.

The Excellent Rate of Night Training Assessment of a Certain Brigade of the Northern Theater Command Army Has Been Greatly Improved, and Many Records Have Been Broken

Source: China Military Network-People's Liberation Army Daily Author: Bi Xiaotian Editor: Wang Yigen

2025-07-01

A certain brigade of the Northern Theater Army has made great efforts to improve its night combat capability-

Forging a “night tiger” that defeats the enemy

■People’s Liberation Army Daily reporter Bi Xiaotian

The breeze is blowing, and the night is as dark as ink. On the field training ground of a certain brigade of the Northern Theater Command Army, an engineering support training is in full swing.

“The engine of a certain type of bridge-laying vehicle has failed!” After receiving a special situation report, the third-class sergeant Wang Xiufeng arrived at the scene in the dark. In the case of pitch darkness, Wang Xiufeng lay beside the engine, accurately touched the fault location with experience, and completed the emergency repair. “It is much more difficult to repair equipment in dark conditions than during the day.” Wiping the sweat from his forehead, Wang Xiufeng told reporters, “In night battles, the enemy will not give you the opportunity to turn on the lights. In normal training, we must take into account various unfavorable factors and practice operating skills to the extreme. “

Previously, the brigade organized a night training assessment, and the result was unexpected: the overall pass rate was less than half. In this regard, a leader of the brigade commented pointedly: “Night training is not simply moving training subjects from daytime to nighttime. In the era of intelligent warfare, scientific and technological means have greatly reduced the difference between day and night. Only by truly mastering the winning mechanism of night combat can we firmly control the initiative on the battlefield and forge a “night tiger” that defeats the enemy. “

To this end, the brigade deeply summarized the characteristics and laws of night combat, strictly implemented the relevant requirements of the military training syllabus, and trained hard to improve night combat capabilities. On the one hand, they formulated night training operation specifications based on their own actual situation, set different subjects and evaluation standards according to different stages and levels of training content; on the other hand, they strengthened training supervision, improved the incentive mechanism, and incorporated night training subjects into the competition activities on a regular basis to stimulate the training enthusiasm and motivation of officers and men.

During the interview, the reporter saw at the brigade’s engineering training ground that Captain Zhang of the blasting company led officers and men into the vast night to conduct the “dark night obstacle breaking” subject training. With the help of night vision goggles, the participating officers and men quietly moved to the front of the “enemy” position.

“There is a suspected 'enemy' bunker at 2 o'clock in the right front!” During the march, a soldier on guard suddenly issued a warning. The demolition expert quickly moved out and used a new type of blasting device to open up a safe passage.

Wipe off the sweat on the night vision goggles, Captain Zhang told reporters: “At night, the light is insufficient, and the concealment of various obstacles and fire points is much higher than during the day. It is a big challenge for officers and men to accurately capture the ever-changing battlefield information from the blurred light and shadow. “

c

At the brigade’s tactical training ground, reporters saw that the officers and men participating in the training were swift and busy but not chaotic. “This is far from enough.” A training staff in charge of the training said, “Modern night combat has broken through the scope of traditional visual blind spots. In addition to the 'dark barrier' in sight, we must also face the invisible 'electromagnetic dark warfare' and the treacherous 'information fog'.”

The brigade leader introduced that in night combat, trainees need to accurately perceive environmental information and communicate with their comrades with the help of flags, ambient light, tactical gestures, etc. Once coordination is not smooth, it may lead to mission failure.

In order to improve the tacit coordination of officers and men under dark night conditions, the brigade will focus on night coordination training, requiring officers and men to turn off all radio equipment during training and complete combat tasks only through simple equipment and tactical sign language.

At the training site, feeling his comrade patting his shoulder, Sergeant Li Chaoyang immediately leaned down and crawled forward. After a while, his comrade patted his tactical vest briefly, and Li Chaoyang understood: Next, we will start to leap forward quickly...

At the end of the training, Li Chaoyang said with emotion: “The drops of sweat shed in the dark night have trained me and my comrades to fight side by side with a high degree of tacit understanding.”

Other officers and men who have participated in night coordination training have the same feeling as Li Chaoyang. Not long ago, a certain engineer obstacle removal team of the brigade organized training to open up a passage. Under the moonlight, after Sergeant Zhang Xuyang led 6 team members to the “enemy” front-line minefield, everyone immediately fanned out.

Private Li Mingkai lay in the grass and patted his comrade’s back twice with his left hand, indicating that “serial mines were found.” Afterwards, the two used their fingers to tap the pre-agreed signal on each other’s tactical vests to transmit the action information. The whole process was silent, but the coordination between the two was precise and smooth...

“Since the solid implementation of night training, the night combat skills of the officers and men of the whole brigade have been continuously enhanced.” The leader of the brigade told reporters that in a recent night training assessment, many training records were broken and the overall excellent rate was greatly improved.

陆军某旅搭建装备维修经验传承平台，大幅提升装备维修水平

来源：解放军报 作者：崔恒 晋蒙 责任编辑：王一亘 2025-07-01

中部战区陆军某旅集中官兵智慧搭建专业技能传承平台——

汇聚实用经验 孵化创新成果

■崔 恒 解放军报特约记者 晋 蒙

炎炎夏日，中部战区陆军某旅装备维修中心内，引擎轰鸣声此起彼伏.

随着某型火炮动力舱舱门缓缓打开，一堂装备维修示范课开讲. 该旅“金牌技师”常一飞作为主讲人，向来自各营连的驾驶员和技术骨干传授装备维修技巧.

“注意滤芯边缘的金属压痕，这是判断变速箱磨损程度的重要依据. ”听着常一飞深入浅出的讲解，技术骨干们围成一个半圆，认真观察滤芯边缘的细微凹痕. 某连驾驶员易和祥告诉记者，像这样的实操示范课，该旅“维修能力孵化站”每周都会组织一次.

近年来，随着大量新装备陆续列装，该旅各营连组织装备换季保养时，往往会面临一些新情况、新问题. 几年下来，专业骨干们在操作实践中集智攻关，积累了很多实用管用的维修技能和经验.

为了不让这些好经验“人走失传”，该旅一位高级技师将身边战友的心得技巧记录下来，汇总成厚厚一本“技术宝典”. 受此启发，该旅机关决定搭建一个专业技能传承平台. 经过一段时间的筹备，“维修能力孵化站”正式成立.

“维修能力孵化站”成立后，该旅针对各类装备维修难题，面向官兵广泛征集“金点子”. 同时，他们邀请各专业维修经验丰富的“金牌技师”和装备生产厂家工程师，定期为基层营连技术骨干传经送宝.

此外，该旅以“维修能力孵化站”为平台，组织技术骨干持续攻关，研发出多款专用维修工具，提升了装备维修的标准化、精细化、专业化水平.

依托“维修能力孵化站”，该旅还探索构建起一套全新的人才培训模式——针对驾驶员、维修技师、装备管理人员，推出“理论授课—实装操作—特情处置”进阶培训模式；与装备厂家建立定期驻点和远程会诊机制，常态邀请厂家工程师来队开展“随装教学”；定期组织专业比武，激励技术骨干立足岗位提升装备保障能力.

在该旅近期组织的一次训练中，某连火炮驾驶员赵瑞勇发现仪表盘油压报警后，迅速检查油路温度和线路情况，很快成功排除故障. “通过专业培训，我们如今处置装备故障底气十足！”赵瑞勇说.

汇聚实用经验，孵化创新成果. 该旅领导介绍，他们依托“维修能力孵化站”梳理总结出一套装备排故经验集，不仅缩短了技术骨干培养周期，还取得一批技术创新成果，大幅提升了装备维修水平. “维修能力孵化站”让一批技术骨干快速成长，他们传承的“手艺”和“绝活”辐射基层营连，为全旅战斗力提升打下坚实基础.

A Certain Army Brigade Has Built an Equipment Maintenance Experience Inheritance Platform to Greatly Improve the Level of Equipment Maintenance

Source: PLA Daily Author: Cui Heng Jin Meng Editor: Wang Yigeng 2025-07-01

A certain army brigade in the Central Theater Command has concentrated the wisdom of officers and men to build a professional skills inheritance platform——

Gathering practical experience and incubating innovative results

■ Cui Heng, special correspondent of the PLA Daily Jin Meng

In the hot summer, the roar of engines came one after another in the equipment maintenance center of a certain army brigade in the Central Theater Command.

As the hatch of a certain type of artillery power compartment slowly opened, an equipment maintenance demonstration class began. As the main speaker, Chang Yifei, the “gold medal technician” of the brigade, taught equipment maintenance skills to drivers and technical backbones from various battalions and companies.

“Pay attention to the metal indentation on the edge of the filter element, which is an important basis for judging the degree of wear of the gearbox.” Listening to Chang Yifei’s in-depth and easy-to-understand explanation, the technical backbones formed a semicircle and carefully observed the subtle dents on the edge of the filter element. Yi Hexiang, a driver of a certain company, told reporters that the brigade’s “Maintenance Capacity Incubation Station” organizes practical demonstration classes like this once a week.

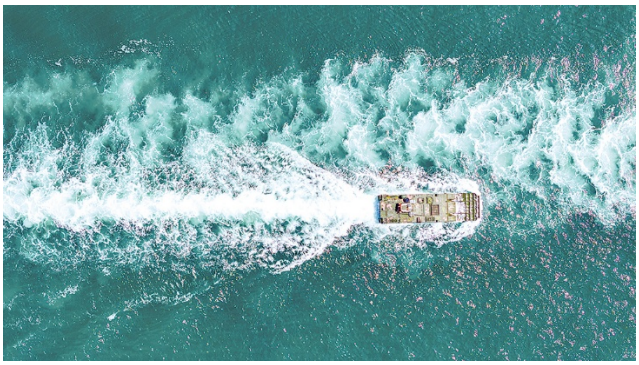
In recent years, with the gradual installation of a large number of new equipment, the brigade’s battalions and companies often face some new situations and new problems when organizing seasonal maintenance of equipment. Over the past few years, professional backbones have worked together to solve problems in operational practice and accumulated a lot of practical and useful maintenance skills and experience.

In order to prevent these good experiences from being “lost”, a senior technician of the brigade recorded the experience and skills of his comrades around him and compiled them into a thick “technical treasure book”. Inspired by this, the brigade decided to build a professional skills inheritance platform. After a period of preparation, the “Maintenance Capacity Incubation Station” was officially established.

After the establishment of the “Maintenance Capacity Incubation Station”, the brigade widely solicited “golden ideas” from officers and men for various equipment maintenance problems. At the same time, they invited “gold medal technicians” with rich professional maintenance experience and engineers from equipment manufacturers to regularly pass on knowledge and treasures to the technical backbones of grassroots battalions and companies.

In addition, the brigade uses the “Maintenance Capacity Incubation Station” as a platform to organize technical backbones to continuously tackle key problems and develop a variety of special maintenance tools, which has improved the standardization, refinement and specialization of equipment maintenance.

Relying on the “Maintenance Capacity Incubation Station”, the brigade has also explored and built a new talent training model - for drivers, maintenance technicians, and equipment management personnel, it has launched an advanced training model of “theoretical teaching-practical operation-special situation handling”; established a regular on-site and remote consultation mechanism with equipment manufacturers, and regularly invited manufacturers' engineers to the team to conduct “on-site teaching”; regularly organized professional competitions to encourage technical backbones to improve their equipment support capabilities based on their positions.



In a recent training organized by the brigade, Zhao Ruiyong, a gun driver of a certain company, found the oil pressure alarm on the dashboard, quickly checked the oil circuit temperature and line conditions, and quickly successfully eliminated the fault. “Through professional training, we are now confident in handling equipment failures!” Zhao Ruiyong said.

Gather practical experience and incubate innovative results. The brigade leaders introduced that they relied on the “Maintenance Capability Incubation Station” to sort out and summarize a set of equipment troubleshooting experience, which not only shortened the training cycle of technical backbones, but also achieved a number of technological innovation results and greatly improved the equipment maintenance level. The “Maintenance Capability Incubation Station” has enabled a group of technical backbones to grow rapidly, and their inherited “craftsmanship” and “unique skills” have radiated to the grassroots battalions and companies, laying a solid foundation for improving the combat effectiveness of the entire brigade.

第七十四集团军某旅某连传承英雄血脉：“荣誉林”种下“金牌树”

来源：中国军网-解放军报 作者：刘 卓 林章康 责任编辑：乌铭琪

2025-07-03

第七十四集团军某旅某连传承英雄血脉——

“荣誉林”种下“金牌树”

■刘 卓 林章康

单位名片

第74集团军某旅某连诞生于秋收起义。红军时期，连队参加五次反“围剿”。抗日战争时期，连队5名战士血战狼牙山，宁死不屈，壮烈跳崖。战后，晋察冀军区颁布训令，号召官兵向他们学习，该连也被誉为“狼牙山五壮士连”。该连多次出色完成上级演习演训任务，被评为基层建设先进单位、践行强军目标先进单位，先后4次被授予荣誉称号，荣立大功3次，集体一等功1次，集体二等功8次，集体三等功18次。

夏日，某训练场，热浪滚滚，硝烟弥漫. 高温考验着官兵，也考验着装备. 第 74 集团军某旅某连官兵操控无人机迅速升空，精准锁定“敌”关键火力点，将坐标信息回传火力分队. 突击小组在炮火掩护下撕开“敌”防线缺口，一举突破“敌方”阵地.

“拿荣誉、争第一的理念已经深深扎根于全连官兵心中. ”该连胡指导员说，遇到比武竞赛、演训任务，官兵闻战则喜，争先恐后报名参加.

“我连的荣誉是前辈用生命创造的，我们更要用实际行动擦亮英雄连队的‘红色名片’. ”胡指导员说.

1941 年 9 月 25 日，在狼牙山战斗中，为给主力部队和群众争取更多转移时间，晋察冀军区第一军分区一团七连六班的马宝玉、葛振林、胡福才、胡德林、宋学义 5 名战士，完成阻击任务后，把敌人引上绝路. 他们打光所有子弹，砸完身边石头，摔碎枪支纵身跳下悬崖……

狼牙山五壮士的英雄精神，一代代连队官兵不断赓续传承. 在该连，新兵下连的第一课就是参观连队荣誉室；每次晚点名时，连队都会首先呼点“五壮士”的姓名；重大纪念日，连队常常邀请革命老前辈来队讲述战斗故事；执行大项任务前，官兵都要在“狼牙山五壮士”雕像前进行宣誓……

“英雄连队的兵，就要有英雄的样子！”这是连队官兵常常挂在嘴边的一句话.

走进连队旁的“荣誉林”，一枚枚熠熠生辉的“金牌”，记录着官兵们敢打敢拼、流血流汗的热血瞬间：全军军事三项比武冠军吉勾日且、全军爱军精武标兵刘传波……连队规定，在旅以上比武中夺冠或受到旅以上表彰的官兵，就能在这里种下一棵“金牌树”，并挂上写有成绩的金色铭牌.

三级军士长吴文俊，如今已在“荣誉林”中挂上了多枚金色铭牌. 对他而言，这些铭牌是自己军旅生涯的光荣见证.

那年，得知单位将选拔优秀战士出国参加联合演训任务后，吴文俊第一时间报了名. 他说：“荣誉已经成为过去，作为英雄传人，就要不断超越. ”

集训队里精英云集. 为了在选拔考核中取得好成绩，吴文俊每一次训练都拼尽全力. 最终，他以步兵专业第一的成绩，入选中国参赛队正式队员并担任班长. 因表现优异，他被评为“优秀队员”，在“荣誉林”中挂上了第五块“金牌”.

这片“荣誉林”，也见证着一支部队的成长与转型. 传统步兵单位如何换羽腾飞、更好地向信息化智能化转型，成为“狼牙山五壮士连”官兵面前的又一道难关.

不久前，一次空地联合火力打击训练中，该连连续攻下两个高地后，进至“敌”最后一道防线. 眼看胜利在望，部队突遭“敌”装甲车猛烈火力打击.

危急时刻，连长派出侦察引导小组，起飞无人机进行侦察，并将“敌”目标信息回传，引导武装直升机完成对“敌”精准打击.

新的战争模式，催生了军事训练变革. 随着越来越多智能化无人化新装备列装，各型无人机、无人车的操作运用成为该旅比武竞赛的重要课目.

奋进强军新征程，该连官兵把目光投向未来战场：“创客工作室”成立，3D 打印机快速打印无人机零件，模拟射击系统、作战模拟系统进入训练场……连队新域新质战斗力的生成路径不断拓宽.

“狼牙山五壮士”的精神，激励着连队官兵奋勇向前. 去年，连队承担全旅多项转型试点任务. 面对新的训练课目，他们铆在训练场，晴天一身沙，雨天一身泥，克服重重困难，圆满完成上级赋予的多项任务. 2024 年，连队荣立集体二等功，在“荣誉林”中种下了属于全连官兵的一棵“金牌树”.

A Company of a Brigade of the 74th Group Army Inherits the Blood of Heroes: “Forest of Honor” Plants “Gold Medal Trees”

Source: China Military Network-Liberation Army Daily Author: Liu Zhuo Lin Zhangkang Editor: Wu Mingqi

2025-07-03

A company of a brigade of the 74th Group Army inherits the blood of heroes——

“Forest of Honor” plants “gold medal trees”

■Liu Zhuo Lin Zhangkang

In summer, at a training ground, the heat waves are rolling and the smoke is filled. The high temperature tests the officers and men, as well as the equipment. The officers and men of a company of a brigade of the 74th Group Army controlled the drone to take off quickly, accurately locked the key firepower points of the “enemy”, and sent the coordinate information back to the firepower unit. Under the cover of artillery fire, the assault team tore open the gap in the “enemy” defense line and broke through the “enemy” position in one fell swoop.

“The concept of winning honors and striving for the first place has been deeply rooted in the hearts of all the officers and men of the company.” Political Instructor Hu of the company said that when encountering competitions and training tasks, the officers and men were happy to hear about the war and rushed to sign up.

“The honor of our company was created by our predecessors with their lives, and we must use practical actions to polish the 'red business card' of the heroic company.” said Instructor Hu.

On September 25, 1941, in the battle of Langya Mountain, in order to buy more time for the main force and the masses to transfer, five soldiers, Ma Baoyu, Ge Zhenlin, Hu Fucai, Hu Delin, and Song Xueyi, from the 6th squad of the 7th company of the 1st regiment of the 1st military sub-district of the Jin-Cha-Ji Military Region, completed the blocking mission and led the enemy to a dead end. They used up all their bullets, smashed the stones around them, broke their guns, and jumped off the cliff...

The heroic spirit of the five heroes of Langya Mountain has been continuously passed down by generations of company officers and men. In this company, the first lesson for new recruits is to visit the company’s honor room; every evening roll call, the company will first call the names of the “Five Heroes”; on major commemorative days, the company often invites old revolutionary predecessors to come to the team to tell battle stories; before conducting major tasks, officers and men must swear an oath in front of the statue of the “Five Heroes of Langya Mountain”...

“Soldiers of the heroic company must look like heroes!” This is a sentence that the company’s officers and men often say.

Walking into the “Forest of Honor” next to the company, a shining “gold medal” records the passionate moments of officers and men who dared to fight and shed blood and sweat: Ji Gouriqi, the champion of the three military competitions of the whole army, and Liu Chuanbo, the model of loving the army and martial arts of the whole army... The company stipulates that officers and men who win the championship in competitions above the brigade or are commended by the brigade or above can plant a “gold medal tree” here and hang a golden nameplate with their achievements.

Third-class Sergeant Wu Wenjun has now hung many golden nameplates in the “Forest of Honor”. For him, these nameplates are the glorious witness of his military career.

That year, after learning that the unit would select outstanding soldiers to go abroad to participate in joint training missions, Wu Wenjun signed up immediately. He said: “Honor has become a thing of the past. As the successor of heroes, we must continue to surpass.”

The training team is full of elites. In order to achieve good results in the selection and assessment, Wu Wenjun tried his best in every training. In the end, he ranked first in the infantry major and was selected as a formal member of the Chinese team and served as a squad leader. Due to his outstanding performance, he was rated as an “excellent team member” and hung the fifth “gold medal” in the “Forest of Honor”.

This “Forest of Honor” also witnessed the growth and transformation of a unit. How traditional infantry units can change their feathers and take off, and better transform to informationization and intelligence, has become another difficult hurdle for the officers and men of the “Five Heroes Company of Langya Mountain”.

Not long ago, in an air-to-ground joint firepower strike training, the company captured two high grounds in succession and advanced to the last line of defense of the “enemy”. With victory in sight, the troops were suddenly hit by fierce firepower from “enemy” armored vehicles.

At the critical moment, the company commander sent out a reconnaissance and guidance team, launched a drone for reconnaissance, and sent back information about the “enemy” target to guide the armed helicopter to complete a precise strike on the “enemy”.

The new war model has given rise to changes in military training. With more and more new intelligent unmanned equipment in service, the operation and use of various types of drones and unmanned vehicles have become an important subject of the brigade’s competition.

Forging ahead on the new journey of strengthening the army, the company’s officers and men set their sights on the future battlefield: the “Maker Studio” was established, 3D printers quickly printed drone parts, and simulated shooting systems and combat simulation systems entered the training ground... The company’s new domain and new quality combat effectiveness generation path continues to expand.

The spirit of the “Five Heroes of Langya Mountain” inspired the company’s officers and men to forge ahead. Last year, the company undertook a number of transformation pilot tasks for the entire brigade. Faced with new training courses, they stayed on the training ground, covered in sand on sunny days and mud on rainy days, overcoming many difficulties and successfully completing a number of tasks assigned by their superiors. In 2024, the company was awarded the second-class collective merit and planted a “gold medal tree” belonging to all the officers and men of the company in the “Forest of Honor”.

从"野营村"到隐蔽部署，陆军某旅按战场标准调整驻训宿营区

来源：中国军网-解放军报 作者：曹磊 贺美华 责任编辑：王一亘

2025-07-03

陆军某旅紧贴实战要求设置驻训宿营区——

安营扎寨，野外不见成片帐篷

■曹 磊 解放军报记者 贺美华

架设浮桥. 王德泰摄

“到了，就是这里. ”夏日，记者前往陆军某旅野外驻训地采访，汽车行至一处戈壁荒滩，突然停下.

“宿营区在哪里？”记者举目四望，茫茫戈壁不见一兵一卒，更没有想象中的“帐幕连云”景象.

“今年驻训，宿营区依据地形特点而定，采取‘半地下’布局，利用伪装网隐蔽，不仔细观察难以发现. ”见记者一脸疑惑，该旅作训科邓参谋简要解释后，指着远方笑着说，“不信，你找找看，前面这片区域有多少顶帐篷？”

顺着邓参谋所指方向，记者定睛辨认半天，才找出几顶野营帐篷. 继续向前走，直至听见官兵训练时发出的声响，记者这才发现，四周隐藏着大大小小数十顶帐篷.

邓参谋介绍，今年驻训，部队依托地形分散驻扎，营与营之间距离数公里. 各连围绕营指挥所分散配置，最大限度与周围环境融为一体，安营扎寨更加符合实战要求. “未来战场上，按照实战要求分散部署，能有效提高战场生存能力，确保完成作战任务. ”邓参谋说，这样的宿营方式，表面看不如“野营村”有气势，但官兵普遍感到，战场气息更加浓厚.

采访中，记者看到，不仅“一条大路通营地、帐篷整齐连成片”的景象不见了，班排帐篷里也是另一番景象：没有叠得方方正正的“豆腐块”，取而代之的是背起就走的战斗背囊；没有花里胡哨的“坛坛罐罐”，只有与打仗紧密相关的战备物资；生活用品按战备要求分类存放，既便于平时取用，也便于快速打包带走.

“设施如此简单，能够满足官兵平时住用需求吗？能够应对突发情况吗？”面对记者提问，该旅一名领导说：“别看驻训条件比较简陋，但该有的作战功能一项不漏、保障要素一个不少.”

这名领导介绍说，野外驻训期间，他们采取“动静结合、空地一体、昼夜联巡、相互依托、梯次搭配”的方式建立营区防御体系，各种力量科学配置，警戒哨位与防空阵地穿插其间，可随时处置突发情况. 他们还着力完善野战炊事、野战淋浴等装备设施，确保部队动散条件下也能做到保障有力.

据了解，该旅按战场标准调整宿营区部署的同时，也将实战理念融入战位. 今年驻训以来，该旅官兵工作训练注重与实战标准对表，优化升级多种组训模式，助推训练效益提升.

From “Camping Village” to Covert Deployment, a Certain Army Brigade Adjusts Its Training Camping Area According to Battlefield Standards

Source: China Military Network-People’s Liberation Army Daily Author: Cao Lei He Meihua Editor: Wang Yigen

2025-07-03

A certain army brigade sets up a training camping area in line with actual combat requirements——

Set up camp, no tents in the wild

■Cao Lei People’s Liberation Army Daily reporter He Meihua

Build a floating bridge. Photo by Wang Detai

“We're here.” In summer, the reporter went to the field training site of a certain army brigade for an interview. The car suddenly stopped at a deserted Gobi desert.

“Where is the camping area?” The reporter looked around, but there was no soldier in the vast Gobi desert, let alone the imagined “tents connected to the clouds”.

“This year’s training camping area is based on the characteristics of the terrain, adopting a “semi-underground” layout, using camouflage nets to hide, and it is difficult to find without careful observation. “Seeing the reporter’s puzzled face, Staff Officer Deng of the brigade’s Operations and Training Office briefly explained, pointed to the distance and said with a smile, “If you don't

believe me, look for it. How many tents are there in the area ahead?" Following the direction pointed by Staff Officer Deng, the reporter looked for a long time before finding a few camping tents. He continued to walk forward until he heard the sound of officers and men training. Only then did the reporter discover that there were dozens of tents of all sizes hidden around. Staff Officer Deng introduced that this year's training, the troops were dispersed based on the terrain, and the distance between the battalions was several kilometers. The companies were dispersed around the battalion command post to maximize integration with the surrounding environment, and the camping was more in line with actual combat requirements. "In the future battlefield, dispersed deployment according to actual combat requirements can effectively improve battlefield survivability and ensure the completion of combat missions." Staff Officer Deng said that this kind of camping method may not look as impressive as the "camping village" on the surface, but officers and men generally feel that the battlefield atmosphere is stronger.

During the interview, the reporter saw that not only the scene of "a road leading to the camp and tents neatly connected" disappeared, but also the scene in the squad tents was different: there were no neatly stacked "tofu blocks", but instead combat backpacks that could be carried away; there were no fancy "jars and cans", but only combat readiness materials closely related to the war; daily necessities were classified and stored according to combat readiness requirements, which was convenient for daily use and quick packing and taking away.

"Such simple facilities can meet the daily living needs of officers and men? Can they cope with emergencies?" In response to the reporter's question, a leader of the brigade said: "Although the training conditions are relatively simple, there is no lack of combat functions and support elements."

The leader introduced that during the field training, they adopted the method of "combining movement and stillness, air-ground integration, day and night joint patrols, mutual support, and echelon matching" to establish a camp defense system, with various forces scientifically configured, and guard posts and air defense positions interspersed in between, so that emergencies can be handled at any time. They also worked hard to improve equipment and facilities such as field cooking and field showers to ensure that troops can be effectively supported even when they are dispersed.

It is understood that while the brigade adjusted the deployment of the camping area according to battlefield standards, it also integrated actual combat concepts into the combat positions. Since the training this year, the brigade's officers and men have focused on matching their work training with actual combat standards, optimizing and upgrading various training modes, and promoting the improvement of training efficiency.

东部战区陆军某旅强化法治教育提升新兵防诈意识

来源：解放军报 作者：韦仕麒 段雅琪 责任编辑：郭妍菲 2025-07-08

东部战区陆军某旅强化法治教育提升新兵防诈意识——

精准施教构筑思想“防火墙”

■韦仕麒 段雅琪

“感谢部队及时干预，帮我们识破骗局，避免了财产损失！”日前，东部战区陆军某旅新兵小李的父亲给部队打来电话表达感激. 该旅通过持续加强教育，帮助官兵提升反诈防骗意识，避免了一场针对新兵群体的电信网络诈骗.

不久前，小李父亲接到一个电话，对方自称是“派出所民警”，告知他小李涉嫌一起交通肇事案件，需向伤者进行赔偿，否则将面临被起诉的风险. 交流中，当对方得知小李刚入伍不久，便以“若不尽快转账小李可能‘当不成兵’”为由催促小李父亲打款. 父亲十分着急，在准备向对方汇款前，他拨通了小李的电话进一步询问情况. 接到消息的小李意识到可能遭遇骗局，一边安抚父亲情绪告知他切莫随意转账，一边向连队干部报告了情况. 后经公安机关核查，确认此为诈骗电话，小李不存在任何涉案记录.

该旅领导介绍，新兵社会阅历浅，对各类诈骗手段辨识能力较弱. 一些不法分子利用新兵特点，冒充国家机关部门实施诈骗，不仅可能造成官兵财产损失，还易引发新兵思想波动，干扰训练秩序，影响内部安全稳定.

为切实提升新兵法治素养和防范能力，该旅与驻地公安、银行、电信等部门建立常态联系机制，形成军地联动、快速响应的反诈协作网. 同时，紧贴新兵特点开展专题普法活动，驻地民警深度剖析各类案例，揭示诈骗常见手法、话术陷阱与识别要点，强调任何执法机关不会随意索要钱款、验证码等，引导官兵掌握“不轻信、不转账、不泄露、速报告”的应对流程.

此前，初入军营的小王也曾收到一条“某征兵办公室”发来的短信，短信称他“涉嫌校园非法贷款”，若不配合调查会被列为“失信人员”受到严肃处理. 小王回想起自己入伍前曾在某校园贷机构登记过个人信息，当时虽未贷款，但因自己丢失过身份证，他担心有人冒充自己身份贷款，于是忧心服役前途受到影响，内心焦虑不安，学习训练都心不在焉. 班长小谭发现异常后，迅速摸清情况并上报. 旅保卫科立即启动军地协作机制，协调地方相关部门展开核查甄别，很快确认这是一条诈骗信息. 连队干部对小王进行了细致的心理疏导和反诈知识再教育，彻底消除了他的顾虑.

送法至一线，防诈护兵心. 通过敏锐感知动态、精准教育防范、高效军地协作，该旅新兵群体整体反诈防骗能力明显提升. “以前觉得诈骗离自己很远，没想到花样这么多！现在知道怎么识别应对，心里踏实多了. ”新兵小陈的感慨道出大家的心声. 卸下思想包袱的新兵们，训练场上生龙活虎，训练劲头更足了.

A Certain Brigade of the Eastern Theater Command Army Strengthens Legal Education to Enhance the Anti-Fraud Awareness of New Recruits

Source: PLA Daily Author: Wei Shiqi Duan Yaqi Editor: Guo Yanfei 2025-07-08

A certain brigade of the Eastern Theater Army strengthens legal education to enhance the anti-fraud awareness of new recruits——

Precise teaching builds a “firewall” of thought

■ Wei Shiqi Duan Yaqi

“Thanks to the troops for timely intervention, helping us to see through the scam and avoid property losses!” A few days ago, the father of Xiao Li, a new recruit of a certain brigade of the Eastern Theater Command Army, called the troops to express his gratitude. The brigade has continuously strengthened education to help officers and men improve their anti-fraud awareness and avoid a telecommunications network fraud targeting new recruits.

Not long ago, Xiao Li’s father received a call from a person who claimed to be a “policeman from the police station” and told him that Xiao Li was suspected of a traffic accident and needed to compensate the injured, otherwise he would face the risk of being sued. During the communication, when the other party learned that Xiao Li had just joined the army, he urged Xiao Li’s father to

pay the money on the grounds that “if Xiao Li does not transfer the money as soon as possible, he may not be a soldier.” The father was very anxious. Before he was about to remit money to the other party, he called Xiao Li to further inquire about the situation. After receiving the news, Xiao Li realized that he might have been scammed. While calming his father and telling him not to transfer money at will, he reported the situation to the company cadres. After verification by the public security organs, it was confirmed that this was a fraud call and Xiao Li had no record of being involved in the case.

The leaders of the brigade introduced that the recruits have little social experience and are weak in identifying various fraud methods. Some lawless elements take advantage of the characteristics of recruits and pretend to be state organs to commit fraud, which may not only cause property losses to officers and men, but also easily cause ideological fluctuations in recruits, disrupt training order, and affect internal security and stability.

In order to effectively improve the legal literacy and prevention capabilities of recruits, the brigade has established a normal contact mechanism with the local public security, banking, telecommunications and other departments to form a military-local linkage and rapid response anti-fraud cooperation network. At the same time, the special legal education activities were conducted in line with the characteristics of the new recruits. The resident police deeply analyzed various cases, revealed common fraud methods, traps and identification points, emphasized that no law enforcement agency would ask for money or verification codes at will, and guided the officers and men to master the response process of “not trusting, not transferring, not leaking, and reporting quickly”.

Previously, Xiao Wang, who had just entered the military camp, also received a text message from a “certain conscription office”, which stated that he was “suspected of illegal campus loans” and would be severely punished if he did not cooperate with the investigation. Xiao Wang recalled that he had registered his personal information with a campus loan institution before joining the army. Although he did not take out a loan at that time, he was worried that someone would impersonate him to take out a loan because he had lost his ID card. So he was worried that his future service would be affected, and he was anxious and distracted from study and training. After the squad leader Xiao Tan found the abnormality, he quickly found out the situation and reported it. The brigade security department immediately launched the military-civilian cooperation mechanism, coordinated the relevant local departments to conduct verification and identification, and soon confirmed that this was a fraudulent message. The company cadres conducted detailed psychological counseling and anti-fraud knowledge re-education for Xiao Wang, completely eliminating his concerns.

Send the law to the front line, prevent fraud and protect the soldiers’ hearts. Through keen perception of dynamics, precise education and prevention, and efficient military-civilian cooperation, the overall anti-fraud and anti-scam capabilities of the brigade’s recruits have been significantly improved. “I used to think that fraud was far away from me, but I didn’t expect there

were so many tricks! Now I know how to identify and deal with it, and I feel more at ease." The sigh of the recruit Xiao Chen expressed everyone's voice. The recruits who have unloaded their ideological burdens are full of energy on the training ground and are more motivated in training.

训练场+诊疗室，来看持证上岗的"战士医生"的新冲锋

来源：解放军报 作者：廉国锋 陶 磊 责任编辑：郭妍菲 2025-07-08

"战士医生"持证上岗

■廉国锋 解放军报特约记者 陶 磊

"多亏了小廖医生的精心治疗，不然我就要耽误比武了！"前不久，陆军某旅战士小谢在训练中不慎扭伤脚踝，在卫生连接受几次治疗后很快康复，如期参加了上级比武.

他口中提到的"小廖医生"，其实并非军医，而是一名持有执业医师资格证书的战士廖仲炎. 在该旅卫生连，像廖仲炎这样经过严格培训、持证问诊的"战士医生"还有好几个.

近年来，随着实战化演训不断深入，基层军医承担的日常医疗保障任务日益繁重. "在重大演训期或季节性疾病高发期，就诊等待时间长、部分轻症得不到及时治疗等问题影响官兵健康. "该旅卫生连军医李柏及坦言，这就需要更多专业医疗力量加入，更好服务基层官兵.

今年初，一次战术训练中，某连战士小李突感膝盖剧痛，无法站立. 同连战友余国淋曾在陆军军医大学士官学校学习过，他当即判断可能是半月板损伤，便立刻从连队急救包中取出弹性绷带加压包扎，利用辅助性保险液冷敷镇痛，然后将小李送到卫生连.

经军医后续检查证实，余国淋判断准确、处理得当，有效避免了伤情加重. 这件事让该旅领导印象深刻，他们进一步调研发现，全旅不乏学过医学专业的大学生士兵，有的还曾在地方医院实习过.

何不盘活内部资源，让他们更好地发挥特长？为此，该旅结合上级卫生机构业务相关规范认真研究后决定，遴选具备医师资格的战士，变更其执业地点，充实一线诊疗力量. 经过个人报名、基层推荐、专业考核等重重筛选，最终由上级业务部门批准，多名"战士医生"脱颖而出.

据了解，"战士医生"主要参与日常接诊和战地救护. 为帮助他们尽快适应岗位要求，该旅卫勤部门开展为期一个月的跟班强化集训. 系统学习部队卫生机构接诊规范，紧贴实战锤炼止血、包扎、固定、搬运等战场急救技能，掌握季节性疾病和常见多发病防控办法……这些"战士医生"进行了"战味"十足的加钢淬火.

“以前学的多是常见病治疗，可以‘坐下来慢慢看’，现在还要参与战伤和训练伤救治，随时准备处理紧急伤情. ”上个月，“战士医生”石鹏值班期间，列兵小刘一瘸一拐走进卫生连，反映小腿前侧持续酸痛. 石鹏为小刘做了触诊检查后，结合当前训练任务特点判断其为肌肉损伤. 经过 X 光检查，结果证实了石鹏的诊断，小刘及时暂停训练，避免了伤情恶化.

“战士医生”在训练日是战士，在坐诊日是医生. 针对“战士医生”这一特殊群体，该旅为他们建立弹性工作机制：每人每周坐诊 1 天，其余时间返回本职岗位与战友共同训练生活. 这样，既能确保其训练“不断线”，又能及时为基层官兵提供医疗保障.

据了解，该旅自“战士医生”持证上岗以来，官兵出现头疼脑热、磕碰扭伤等状况基本实现了“随到随治”.

Training Ground + Clinic, Let’s See the New Charge of the “NCO Doctor” Who Is Certified to Work

Source: PLA Daily Author: Lian Guofeng Tao Lei Editor: Guo Yanfei 2025-07-08

“NCO doctor” is certified to work

■ Lian Guofeng PLA Daily special correspondent Tao Lei

“Thanks to Dr. Xiao Liao’s careful treatment, otherwise I would have missed the competition!” Not long ago, Xiao Xie, a soldier of a certain brigade of the army, accidentally sprained his ankle during training. After receiving several treatments in the health company, he recovered quickly and participated in the superior competition as scheduled.

The “doctor Xiao Liao” he mentioned is actually not a military doctor, but a soldier Liao Zhongyan who holds a practicing physician qualification certificate. In the brigade’s health company, there are several “soldier doctors” like Liao Zhongyan who have undergone rigorous training and have a certificate to consult.

In recent years, with the continuous deepening of actual combat training, the daily medical support tasks undertaken by grassroots military doctors have become increasingly heavy. “During major training and exercise periods or seasonal disease peak periods, long waiting times for medical treatment and the lack of timely treatment for some mild illnesses affect the health of officers and men.” Li Baiji, a military doctor in the brigade’s medical company, said frankly that this requires more professional medical forces to join in and better serve grassroots officers and men.

Earlier this year, during a tactical training, a soldier in a certain company, Xiao Li, suddenly felt severe pain in his knee and was unable to stand. Yu Guolin, a comrade in the same company, had studied at the Non-commissioned Officer School of the Army Medical University. He immediately determined that it might be a meniscus injury, so he immediately took out an elastic bandage from

the company's first aid kit for pressure bandaging, used auxiliary insurance liquid for cold compress analgesia, and then sent Xiao Li to the medical company.

Subsequent examinations by military doctors confirmed that Yu Guolin's judgment was accurate and his treatment was appropriate, effectively avoiding the aggravation of the injury. This incident impressed the leaders of the brigade. They further investigated and found that there were many college student soldiers in the brigade who had studied medicine, and some had even interned in local hospitals.

Why not activate internal resources and let them better play their strengths? To this end, the brigade carefully studied the relevant business regulations of the superior health institutions and decided to select soldiers with medical qualifications, change their place of practice, and strengthen the front-line diagnosis and treatment force. After personal registration, grassroots recommendation, professional assessment and other screening, and finally approved by the superior business department, many "warrior doctors" stood out.

It is understood that "warrior doctors" mainly participate in daily reception and battlefield rescue. In order to help them adapt to the job requirements as soon as possible, the brigade's medical department conducted a one-month intensive training. Systematically study the reception regulations of military health institutions, closely follow the actual combat to hone battlefield first aid skills such as hemostasis, bandaging, fixation, and transportation, master seasonal diseases and common and frequently occurring diseases prevention and control methods... These "warrior doctors" have undergone a "war-like" steel quenching.

"I used to learn more about the treatment of common diseases, and I could 'sit down and watch slowly'. Now I have to participate in the treatment of combat injuries and training injuries, and be ready to deal with emergency injuries at any time." Last month, when "warrior doctor" Shi Peng was on duty, Private Xiao Liu limped into the health company and reported that the front of his calf was constantly sore. After Shi Peng palpated Xiao Liu, he judged that he had muscle injury based on the characteristics of the current training task. After an X-ray examination, the results confirmed Shi Peng's diagnosis, and Xiao Liu stopped training in time to avoid worsening of the injury.

"Soldier doctors" are soldiers on training days and doctors on clinic days. For this special group of "soldier doctors", the brigade has established a flexible working mechanism for them: each person has one clinic day a week, and the rest of the time they return to their posts to train and live with their comrades. In this way, it can ensure that their training is "uninterrupted" and provide medical support for grassroots officers and men in a timely manner.

It is understood that since the "soldier doctors" of the brigade took up their posts with certificates, officers and men have basically achieved "on-demand treatment" for headaches, fevers, bumps and sprains.

跨越 70 余载光阴，一对祖孙以一种特殊的形式在荣誉簿上“相遇”

来源：中国军网-解放军报 作者：屈凯明 涂明辉 赵治国 责任编辑：郭妍菲 发布：2025-07-08

荣誉簿里的祖孙“相遇”

■屈凯明 涂明辉

前不久，第 82 集团军某旅“新兴里战斗模范连”专门为上等兵侯方宇举行荣誉感召仪式，并将他写进连队荣誉簿. 而在这本荣誉簿的第 16 页，赫然记录着侯方宇的外公——战斗英雄于志贵的先进事迹. 跨越 70 余载光阴，祖孙二人以一种特殊的形式在荣誉簿上“相遇”，这不仅是两代革命军人之间的传承，更是红色基因生生不息的延续.

——编者

上等兵侯方宇是第 82 集团军某旅“新兴里战斗模范连”的一名战士. 在他还未出生时，外公于志贵就已经过世. 但是，外公的战斗故事他从小听到大.

①连队荣誉簿记载的于志贵相关事迹.

②于志贵获得的奖章、纪念章.

侯方宇（中）给连队战友讲述外公于志贵的战斗故事.

在抗美援朝战争中，于志贵作为侦察兵，曾参加了新兴里战斗. 面对武装到牙齿的敌军，他无惧生死、英勇作战，与连队战友在严寒条件下毙伤敌 300 余人、缴获榴弹炮 12 门，荣立二等功.

正是这些浸透着使命与热血的片段，在侯方宇心中种下了从军报国的种子. 去年 3 月，他毅然放弃攀岩教练工作，选择参军入伍.

“这是你外公留下的. 他生前最希望看到后代们穿上军装. ”离家那天，母亲将一枚珍藏多年的军功章交到侯方宇手中.

望着那枚有些褪色的军功章，侯方宇暗下决心：一定要在部队干出名堂，不辜负外公期望. 此刻，他并不知道，自己即将踏上的征途，会和外公的军旅轨迹悄然重合.

3 个月的新训转瞬即逝，侯方宇被分配到了“新兴里战斗模范连”. 下连第一天，指导员就带着新兵来到荣誉室，向大家讲述连队的辉煌战史——

1950 年 11 月，在抗美援朝新兴里战斗中，面对不可一世的敌军精锐“北极熊团”，连队先辈不畏生死、以劣胜强，一举捣毁“北极熊团”指挥所，缴获团旗、击毙团长. 战后，连队被授予“新兴里战斗模范连”荣誉称号.

“新兴里？不就是外公当年战斗过的地方嘛！”听着指导员的介绍，侯方宇不由得心跳加速.

参观荣誉室时，侯方宇的目光急切地扫过每一块展板. 突然，一张泛黄的老照片吸引了他的注意，那是一张连队先辈授勋时的合影. 虽然只在照片上见过外公的模样，但凭借深刻的记忆，他一眼就在人群中认出了年轻时的外公.

“妈！您快看，外公的照片！”当晚休息时间，侯方宇迫不及待与母亲进行视频通话. 当他颤抖着将手机摄像头对准连队老照片影集时，屏幕那头，母亲突然捂住嘴，泪水夺眶而出：“是你外公,真的是他！”

“原来，我被分到了外公当年战斗过的英雄连队！”侯方宇既激动又兴奋. 但是，他还是决定先把这件事藏在心底，等到干出一番成绩，再向连队报告.

然而，现实很快给他浇了一盆冷水. “战术动作不规范”“3000 米跑成绩提升缓慢”……起初，侯方宇在基础训练课目上屡屡受挫. 特别是每天晚点名，全连官兵共同喊响“新兴里战斗模范连”英雄称号时，侯方宇更是惭愧不已，总觉得自己愧做英雄的传人.

“决不能给外公丢脸！”夜深人静时，侯方宇悄悄拿出外公的军功章，看了又看、摸了又摸，反复想着母亲为他送行时说的那句话. 于是，他决定刻苦训练、奋起直追.

那天以后，别人跑五公里，他就跑十公里；别人练一遍战术动作，他自我加压，多练好几遍……尽管手掌磨出血泡，膝盖磕得青紫，但侯方宇从不叫苦叫累.

不久，营里组织军事比武. 万米接力比赛中，侯方宇接过最后一棒时，已经落后对手 20 多米. 此时，一种强烈的使命感与荣誉感涌上心头，他咬紧牙关全力冲刺，最终反超对手，为连队捧回冠军奖杯.

“好样的！”“不愧是英雄连队的兵！”比赛结束，战友们连声为侯方宇点赞. 他深受鼓舞，奋勇冲锋的劲头更足了.

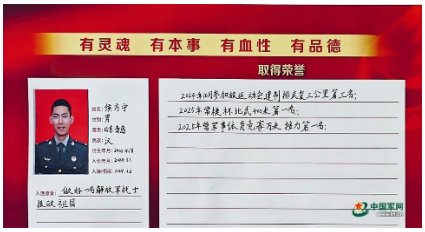
去年底，一场合成营进攻战斗演练中，该连遭“敌”电磁干扰，各班组协同配合不畅，陷入困境. 侯方宇主动请缨，跟随突击组前出. 凭借入伍前担任攀岩教练时积累的经验和技巧，他很快发现了一条容易被忽视的陡峭山路.

“这条路太危险，两边布满荆棘，根本没法爬上去. ”班长张杰皱起眉头.

“班长，我外公当年就是侦察兵，今天我也想证明自己. ”侯方宇的眼神里写满坚定.

班长拗不过他的犟劲，接受了他的请求. 侯方宇爬上陡石，在荆棘丛中摸索前进，全然不顾手上被划开的一道道口子.

很快，侯方宇成功破开一条通道，带领突击组其他成员迂回到“敌”侧翼，成功突袭“敌”指挥所. 夺取胜利后，侯方宇被战友们簇拥着，就像一位从战场上归来的英雄.



了解到侯方宇的情况，连队指定他担任连史讲解员. 每当讲到连队前辈在抗美援朝战场奋勇杀敌时，侯方宇的声音格外洪亮，眼神中也透着坚毅.

入伍以来，侯方宇多次在上级组织的比武中取得优异成绩，并被评为“训练标兵”.

在连队为他举行的荣誉感召仪式上，侯方宇双手抚摸着荣誉簿，郑重写下自己的名字. 那一刻，他仿佛穿越时空，与外公完成了一场无声的接力，烽火岁月的荣光与强军征程的奋进，就这样迎头“相遇”.

侯方宇（左二）和战友进行武装奔袭.

连队荣誉簿记录的侯方宇个人荣誉.

这天，侯方宇独自来到荣誉室，深情凝望展板上外公的照片，轻声报告：“您当年高擎的战旗，我们守护得很好……”侯方宇深知，未来的军旅路上，还将遇到很多新任务、新挑战，但他毫不畏惧，因为他知道自己正走在外公曾经走过的道路上.

而这本厚重的连队荣誉簿，也经过岁月沉淀，内化为该连特有的红色基因，被一代代连队官兵续写下去.

短评

期待更多这样的“荣誉同框”

■赵治国

在人民军队发展历程中，“荣誉”二字始终闪耀着夺目光芒，它是全军将士勇往直前的精神旗帜，也是革命军人拼搏奋进的力量源泉. 第 82 集团军某旅“新兴里战斗模范连”上等兵侯方宇与外公于志贵跨越时空的“相遇”启示我们：真正的传承，不光是英雄事迹的简单续写，更是直抵灵魂的精神接力.

其实，每一名官兵内心都渴望荣誉、渴望进步、渴望建立军功，关键要看带兵人如何去发现、去激发、去点燃. 一旦这种渴望变成官兵的一种责任、一种自觉、一种担当，就会迸发出惊人的能量.

赓续英雄血脉、发扬优良传统，不是守护灰烬，而是传递火焰. 要善于从丰富的红色资源中找到引发情感共鸣的“燃点”，在现实与历史之间搭建实现思想共振的“结点”，让每名官兵把个人梦想融入强军事业，将个人成长与部队发展紧密相连，用一场场战斗、一次次冲锋、一项项佳绩，在新时代新征程上跑好属于我们自己的这一棒.

逐梦强军，期待更多这样的“荣誉同框”.

Over the Past 70 Years, a Pair of Grandparents and Grandchildren “Met” in the Honor Book in a Special Way

Source: China Military Network-Liberation Army Daily Author: Qu Kaiming Tu Minghui Zhao Zhiguo Editor: Guo Yanfei Release: 2025-07-08

Grandparents and grandchildren “meet” in the honor book

■ Qu Kaiming Tu Minghui

Not long ago, the “Xinxingli Combat Model Company” of a brigade of the 82nd Group Army held an honor invocation ceremony for Private Hou Fangyu and wrote him into the company’s honor book. On page 16 of this honor book, the advanced deeds of Hou Fangyu’s grandfather, the combat hero Yu Zhigui, are clearly recorded. Over the past 70 years, the grandparents and grandchildren “met” in the honor book in a special way. This is not only the inheritance between two generations of revolutionary soldiers, but also the endless continuation of the red gene.

——Editor

Private Hou Fangyu is a soldier of the “Xinxingli Combat Model Company” of a brigade of the 82nd Group Army. Before he was born, his grandfather Yu Zhigui had passed away. However, he had heard stories about his grandfather’s battles since he was a child.

① Yu Zhigui’s deeds recorded in the company’s honor book.

② Medals and commemorative medals won by Yu Zhigui.

Hou Fangyu (middle) tells his company comrades about his grandfather Yu Zhigui’s battle stories.

During the War to Resist U.S. Aggression and Aid Korea, Yu Zhigui participated in the Xinxingli battle as a scout. Facing the enemy armed to the teeth, he fought bravely without fear of life and death. He and his company comrades killed and wounded more than 300 enemies in severe cold conditions, seized 12 howitzers, and was awarded the second-class merit.

It was these fragments soaked with mission and passion that planted the seeds of serving the country in Hou Fangyu’s heart. In March last year, he resolutely gave up his job as a rock climbing coach and chose to join the army.

“This is what your grandfather left behind. He wanted to see his descendants wearing military uniforms the most when he was alive.” On the day he left home, his mother handed Hou Fangyu a military medal that she had treasured for many years.

Looking at the faded military medal, Hou Fangyu secretly made up his mind: he must make a name for himself in the army and live up to his grandfather's expectations. At this moment, he did not know that the journey he was about to embark on would quietly overlap with his grandfather's military trajectory.

The three-month new training passed in a flash, and Hou Fangyu was assigned to the "Xinxingli Combat Model Company". On the first day of the company, the instructor brought the recruits to the honor room and told everyone about the company's glorious war history-

In November 1950, in the battle of Xinxingli during the War to Resist US Aggression and Aid Korea, facing the elite "Polar Bear Regiment" of the enemy army, the company's predecessors were not afraid of life and death, and defeated the strong with the inferior, destroyed the "Polar Bear Regiment" command post in one fell swoop, seized the regiment flag, and killed the regiment commander. After the war, the company was awarded the honorary title of "Xinxingli Combat Model Company".

"Xinxingli? Isn't it the place where my grandfather fought back then!" Listening to the instructor's introduction, Hou Fangyu couldn't help but his heartbeat accelerated.

When visiting the Honor Room, Hou Fangyu's eyes eagerly scanned every display board. Suddenly, a yellowed old photo caught his attention. It was a group photo of the company's ancestors being awarded medals. Although he had only seen his grandfather's appearance in the photo, he recognized his grandfather in his youth in the crowd at a glance with his deep memory.

"Mom! Look, grandpa's photo!" During the break that night, Hou Fangyu couldn't wait to make a video call with his mother. When he trembled and pointed the camera of his mobile phone at the company's old photo album, his mother on the other side of the screen suddenly covered her mouth and tears burst out: "It's your grandpa, it's really him!"

"It turns out that I was assigned to the heroic company where my grandfather fought back then!" Hou Fangyu was excited and excited. However, he decided to keep this matter in his heart first, and report to the company after he made some achievements.

However, reality soon poured a bucket of cold water on him. "Improper tactical movements" and "slow improvement in 3,000-meter running results"... At first, Hou Fangyu was repeatedly frustrated in basic training courses. Especially when the officers and men of the company jointly called out the heroic title of "Xinxingli Combat Model Company" during the roll call every evening, Hou Fangyu felt even more ashamed, and always felt that he was unworthy of being the successor of a hero.

"I must not bring shame to my grandfather!" In the dead of night, Hou Fangyu quietly took out his grandfather's military medal, looked at it again and again, touched it again and again, and repeatedly thought about the words his mother said when she saw him off. So he decided to train hard and catch up.

After that day, when others ran five kilometers, he ran ten kilometers; when others practiced tactical movements once, he put pressure on himself and practiced several more times... Although his palms were rubbed with blisters and his knees were bruised, Hou Fangyu never complained about being tired.

Soon, the camp organized a military competition. In the 10,000-meter relay race, when Hou Fangyu took over the last baton, he was already more than 20 meters behind his opponent. At this time, a strong sense of mission and honor surged in his heart. He gritted his teeth and sprinted with all his strength, and finally surpassed his opponent and won the championship trophy for the company.

“Good job!” “You are worthy of being a soldier of the heroic company!” After the game, his comrades praised Hou Fangyu. He was deeply inspired and was more motivated to charge forward.

At the end of last year, during a combined battalion offensive combat exercise, the company encountered electromagnetic interference from the “enemy”, and the coordination of various teams was not smooth, and they were in trouble. Hou Fangyu took the initiative to volunteer to follow the assault team. With the experience and skills accumulated as a rock climbing coach before joining the army, he quickly discovered a steep mountain road that was easily overlooked.

“This road is too dangerous, with thorns on both sides, and it is impossible to climb up.” Squad leader Zhang Jie frowned.

“Squad leader, my grandfather was a scout back then, and I want to prove myself today.” Hou Fangyu’s eyes were full of determination.

The squad leader couldn’t beat his stubbornness and accepted his request. Hou Fangyu climbed up the steep rock and groped forward in the thorns, completely ignoring the cuts on his hands.

Soon, Hou Fangyu successfully broke through a passage, led other members of the assault team to bypass the “enemy” flank, and successfully raided the “enemy” command post. After winning the victory, Hou Fangyu was surrounded by his comrades, like a hero returning from the battlefield.

After learning about Hou Fangyu’s situation, the company appointed him as the company history interpreter. Whenever he talked about the company’s predecessors fighting bravely in the Korean War, Hou Fangyu’s voice was particularly loud and his eyes were firm.

Since joining the army, Hou Fangyu has achieved excellent results in competitions organized by superiors many times and was named a “training model”.

At the honor calling ceremony held for him by the company, Hou Fangyu stroked the honor book with both hands and solemnly wrote his name. At that moment, he seemed to travel through time and space and completed a silent relay with his grandfather. The glory of the war years and the forging ahead of the journey of strengthening the army “met” head-on.

Hou Fangyu (second from left) and his comrades conducted an armed raid.

Hou Fangyu's personal honors recorded in the company's honor book.

On this day, Hou Fangyu came to the honor room alone, gazed at the photo of his grandfather on the display board with deep affection, and reported softly: "We have protected the battle flag you held high in the past very well..." Hou Fangyu knew that he would encounter many new tasks and challenges in his future military career, but he was not afraid, because he knew that he was walking on the road his grandfather had walked.

And this heavy company honor book has also been precipitated over the years and internalized into the company's unique red gene, which has been continued by generations of company officers and men.

Short review

Looking forward to more such "honor frames"

■ Zhao Zhiguo

In the development process of the People's Army, the word "honor" has always shone with dazzling light. It is the spiritual banner of the whole army and the source of strength for the revolutionary soldiers to fight and forge ahead. The "encounter" across time and space between Private Hou Fangyu of the "Xinxingli Combat Model Company" of a certain brigade of the 82nd Group Army and his grandfather Yu Zhigui tells us that true inheritance is not only a simple continuation of heroic deeds, but also a spiritual relay that reaches the soul.

In fact, every officer and soldier desires honor, progress, and military merit in their hearts. The key lies in how the leaders discover, inspire, and ignite them. Once this desire becomes a responsibility, a consciousness, and a responsibility of the officers and men, it will burst out with amazing energy.

To continue the bloodline of heroes and carry forward fine traditions is not to guard the ashes, but to pass on the flame. We must be good at finding the "ignition point" that triggers emotional resonance from the rich red resources, and build a "node" between reality and history to achieve ideological resonance, so that every officer and soldier can integrate their personal dreams into the cause of strengthening the army, closely link personal growth with the development of the troops, and use battles, charges, and achievements to run our own baton on the new journey in the new era.

Chasing the dream of a strong army, we look forward to more such "honor in the same frame".

从排斥抗拒到乐在其中，这名炊事班长在"幕后"收获精彩

来源：中国军网-解放军报 作者：钟雨龙 责任编辑：孙悦

2025-07-09

干好“幕后工作”，同样收获精彩

■第七十二集团军某旅下士 钟雨龙

前不久，连队举行入连仪式，欢迎新战友的到来，我作为炊事班班长，负责准备餐食.

“这个蛋糕很好吃”“旁边的水果捞也不错”……看着刚下连的新战友大快朵颐，我心里很满足.

“你看，干好‘幕后工作’，同样能收获成就感吧！”这时，指导员走到我的旁边，开口说道.

指导员的话有些耳熟，3 年多前，我被调整到炊事员岗位时，有人对我说过类似的话. 起初，我并不认同，但经过这几年的成长锻炼，我对此有了深刻的体会.

我从小就是个“军事迷”，高中毕业后，怀揣梦想参军入伍. 下连后，我一直作为炮手参加训练. 然而，就在我憧憬自己驾驶战车驰骋沙场时，一盆“冷水”泼来：我竟然被定岗为炊事员.

更让我感到心理失衡的是，同年入伍的战友每天穿梭在训练场，学装备、练专业，为未来亮剑战场做准备，而我却整天面对锅碗瓢盆和厨房灶台.

“指导员，我想申请换个岗位，炮手、侦察员都可以，只要别让我继续干炊事员就行. ”体验了数周枯燥乏味的炊事工作，我鼓足勇气，敲开了指导员宿舍房门.

指导员并没有直接回答，反而交给我一项任务：“明天开始，连队要展开家属临时来队住房翻修，你也参与一下. 等干完这个，再作决定. ”

我被打了一个措手不及，虽然不理解指导员的具体意图，还是应下了. 第二天，我跟着负责连队营房维修的班长郭五星一起，开启了为期一周的翻修工作.

刮涂腻子，排查管线，维修家具……不到两天，我就有点受不了：“郭班长，这活既无趣又繁杂，其中的辛苦大家也看不到，干着有啥意义呢？”

郭班长听后，微微一笑，说道：“有时候，并不是干惊天动地的大事才算有意义，干好‘幕后工作’，可以同样收获精彩. 试想一下，已婚战友能在温馨舒适的环境里，和来队家属团聚，度过幸福的时光，我们俩这些看似不起眼的付出，是不是就变得很有价值了？”

郭班长的一席话，点醒了我. 在这之后，我心甘情愿地跟着他忙前忙后，踏踏实实地将每一个房间、每一处角落都打理好，再没发过一句牢骚.

“指导员，我想明白了，我会在炊事员岗位好好干下去！”刚将家属临时来队住房翻修一新，我便找到指导员，撤回了之前的换岗申请.

接下来的日子，我从最基础的刀工勺工、切菜配菜入手，努力学习炊事技能. 一有闲暇，我便翻阅烹饪书籍、观看美食制作视频，学习方法、寻找灵感. 渐渐地，我学会了数十种主食和菜品的制作，并在今年初当上了炊事班班长.

不久后，连队外出驻训，训练和生活节奏陡然加快，加之有些水土不服，战友们普遍胃口不佳. 在制作饭菜过程中，我花了不少心思，确保不同口味偏好的战友都能吃饱吃好. 此外，我还根据天气状况推出解暑凉饮，结合任务实际开办“深夜食堂”，深受大家欢迎.

“这次实弹射击任务，我们完成得非常出色. 这离不开每一名指战员的攻坚克难，也离不开炊事班等保障人员的默默付出……”阶段总结会上，连主官对我的工作进行了肯定. 我暗下决心：一定把伙食保障工作做得更好.

从排斥抗拒到乐在其中，认识到伙食保障工作的价值后，我越发赞同这句话：三尺灶台，大有可为.

From Rejection and Resistance to Enjoyment, This Cooking Squad Leader Has Gained Wonderful Things “Behind the Scenes”

Source: China Military Network-Liberation Army Daily Author: Zhong Yulong Editor: Sun Yue

2025-07-09

Doing a good job in “behind the scenes” also brings wonderful things

■Corporal Zhong Yulong of a brigade of the 72nd Group Army

Not long ago, the company held a ceremony to welcome the arrival of new comrades. As the squad leader of the cooking squad, I was responsible for preparing meals.

“This cake is delicious” “The fruit salad next to it is also good”... Watching the new comrades who just joined the company feasting, I feel very satisfied.

“You see, doing a good job of “behind the scenes” can also gain a sense of accomplishment!” At this time, the political instructor walked to my side and talked.

The political instructor’s words sounded familiar. More than 3 years ago, when I was transferred to the position of a cook, someone said something similar to me. At first, I didn’t agree, but after a few years of growth and training, I have a deep understanding of this.

I have been a “military fan” since I was a child. After graduating from high school, I joined the army with my dream. After joining the company, I have been training as a gunner. However, just

when I was looking forward to driving a tank on the battlefield, a basin of "cold water" was poured: I was assigned to be a cook.

What made me feel even more psychologically unbalanced was that my comrades who joined the army in the same year shuttled through the training ground every day, learning equipment and practicing professional skills to prepare for the future battlefield, while I was facing pots and pans and kitchen stoves all day long.

"Instructor, I want to apply for a change of position, gunner, scout, just don't let me continue to be a cook." After experiencing several weeks of boring cooking work, I mustered up the courage and knocked on the door of the instructor's dormitory.

The instructor did not answer directly, but gave me a task: "Starting tomorrow, the company will start the temporary renovation of the housing for family members to come to the team, and you will also participate. After this is done, make a decision."

I was caught off guard. Although I didn't understand the instructor's specific intentions, I still agreed. The next day, I started a week-long renovation with Guo Wuxing, the squad leader in charge of the company barracks maintenance.

Scrape putty, check pipelines, repair furniture... In less than two days, I couldn't stand it: "Squad leader Guo, this work is boring and complicated, and no one can see the hard work. What's the point of doing it?"

After hearing this, squad leader Guo smiled and said: "Sometimes, it's not necessary to do earth-shattering things to be meaningful. Doing a good job of "behind-the-scenes work" can also be wonderful. Imagine that married comrades can reunite with their families in a warm and comfortable environment and spend a happy time. Wouldn't our seemingly insignificant efforts become very valuable?"

Squad leader Guo's words woke me up. After that, I willingly followed him to busy around, and took care of every room and every corner down to earth, and never complained again.

"Instructor, I've figured it out. I'll work hard as a cook!" I found the instructor and withdrew my previous job change application as soon as I renovated the temporary housing for my family members.

In the following days, I started with the most basic knife and spoon work, cutting vegetables and side dishes, and worked hard to learn cooking skills. Whenever I had free time, I would read cooking books, watch food making videos, learn methods, and look for inspiration. Gradually, I learned how to make dozens of staple foods and dishes, and became the squad leader of the cooking squad at the beginning of this year.

Soon after, the company went out for training, and the pace of training and life suddenly accelerated. In addition, some comrades-in-arms were not used to the local climate, and their

appetites were generally poor. In the process of making meals, I spent a lot of time to ensure that comrades-in-arms with different taste preferences could eat well. In addition, I also launched cooling drinks to relieve summer heat according to weather conditions, and opened a “late-night canteen” based on the actual tasks, which was very popular.

“We completed this live-fire shooting mission very well. This is inseparable from the hard work of every commander and fighter, and the silent dedication of the kitchen team and other support personnel...” At the stage summary meeting, the company commander affirmed my work. I secretly made up my mind: I must do a better job in food support.

From rejection and resistance to enjoyment, after realizing the value of food support work, I increasingly agree with this sentence: A three-foot stove can do a lot.

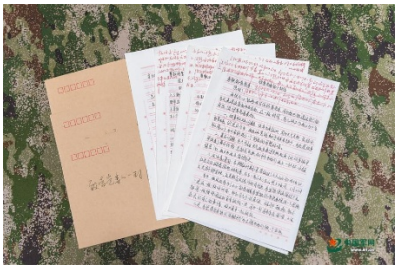
官兵心愿有人办！陆军某旅某营建立营党委信件机制暖兵心

来源：中国军网-解放军报 作者：毛英椿 谢文剑 责任编辑：王一亘 发布：2025-07-11



陆军某旅某营开展“给营党委的一封信”活动，畅通官兵建言献策渠道——

心愿有人办 心事有人听

■毛英椿 谢文剑

该营战士在阅读营党委的回信，

该营官兵写给营党委的部分信件，谢文剑摄

夏日深夜，明月当空, 检查完就寝秩序，陆军某旅某营陈教导员从抽屉里取出一沓信件，带着些许期待，逐封认真阅读, 这是该营在开展“给营党委的一封信”活动中收到的新一批来信,

“感谢营党委帮助我们解决生活中的难题”“一桩桩实事办进了我们心坎里”……不少信件字里行间，透出了官兵对部队的真挚感情，有的还对连队建设提出了意见建议,

回想这项活动的开展，陈教导员感触颇多,

那一年，新年度工作筹划展开，陈教导员通过设立“意见箱”、问卷调查等方式收集官兵意见建议，但收效平平, 可不久后，旅机关人员来基层现场办公时，官兵却表现得十分活跃, 战士小郑不仅列出当前大家关心的一些现实需求，还提出一些单位建设中存在的矛盾问题,

仔细分析官兵反映的问题，有不少依托营连自身便能较好解决, 为何官兵面对机关愿意开口，平时却很少向营连干部反映呢？这让陈教导员有些尴尬,

事后开展调研时，小郑坦言：与营连相比，向机关反映的问题解决得更快更直接,

此前有一次，小郑的保障卡损坏不能正常使用，于是向连队寻求帮助，可迟迟没得到回应, 他只能自己四处打听，后来去机关相关部门申请补办，机关还给送卡上门,

还有战士反映，向上级机关反映问题一般都会得到重视，能解决的当场解决，一时解决不了的也会有明确答复, 而向营连反映问题，事情不一定都能解决，问题说多了还容易被“贴标签”,

在营党委会上，大家就这个话题展开讨论, 有连队干部反思说，基层日常工作和训练任务较重，官兵反映问题后，有时忙起来一时就忘了，或是顾不上处理,

“营连主官与官兵朝夕相处，大家遇到矛盾困难当然应该首先向身边组织寻求帮助，工作繁忙绝非推诿的理由”“信任根基不牢，怎么能团结一心、攥指成拳”……陈教导员的分析，让不少人红了脸,

“营里的问题应该由营里自主解决, ”认真研究后，该营党委明确了责任落实制度，要求基层党组织主动担当作为, 着眼新时代官兵特点，他们把“话筒”交给官兵，每季度组织一次“给营党委的一封信”活动，官兵可以选择实名或者匿名，写下个人生活训练中的困难需求、对营连两级组织的看法期望、对单位全面建设的意见建议，等等, 每次活动，由营党委正副书记直接负责，并结合官兵恳谈会等时机对反映的意见建议、矛盾困难进行答复，明确责任人和解决期限，由基层官兵监督落实,

活动开始后，战士张泽抱着试一试的态度，给营党委写了一封信, “营区内有段坑洼不平的路，雨天路滑且无照明设备，易发生安全隐患……”收到信后，营党委立即响应，很快对营区道路、路灯等基础设施安全情况进行排查，协调工兵分队进行了修整,

此举调动了基层官兵的积极性，大家纷纷写信提出意见建议：“卫生区划分不科学，一些边边角角的地方常成为盲区”“标志服饰申领更换不及时，会被纠察通报‘着装不统一’”……

“官兵是基层建设的主角，解决官兵的挠头事，不仅是党委机关的事，也应是基层党组织的心头事, ”陈教导员深有感触地说，活动开展以来，不仅及时解决了官兵的急难愁盼，也架起了营党委与官兵之间的“连心桥”,

笔者见到，战士饶勇军写给营党委的信中夹着一张照片——是他在讲台上演讲的场景,

小饶性格内向、不善言谈，平时是个“闷葫芦”，站在全连面前讲话双腿都会不停发抖, 起初，他总把这些烦心事藏进心里，认为“领导哪顾得上战士的心事”, 有一次，抱着不求回复的心态，他将成长中遇到的困难与烦恼诉诸笔端，装入信封,

“在人生的航程中，每个人都是自己命运的掌舵者，要主动选择前行方向，而非随波逐流……”收到陈教导员的回信，小饶心中满是惊喜与感动, 后来，他鼓起勇气主动报名参加营里的演讲比赛，每天对着镜子苦练，让身边战友当观众、提意见, 最终，他在比赛中表现出色，获得第三名的好成绩,

“我从小到大都很普通，仿佛是个‘小透明’，入伍后也从没取得过什么成绩，是组织的鼓励和帮助，让我破天荒站上了领奖台……”细读战士心声，陈教导员感慨良多：“关心爱护战士本就是带兵人该做的事，但没想到一些举手之劳的小事，却能改变一名战士, ”

心愿有人办，心事有人听, 一封封信里，记录着官兵的日常点滴和真情实感，更在字里行间透露着对营党委沉甸甸的信任, 陈教导员说，随着活动开展，在基层党组织的协同下，许多基层训练和生活中的矛盾问题得到解决，官兵也从“写信试试看”变成“有话主动讲”，围绕日常工作训练等各方面提出不少“金点子”，大家的获得感幸福感不断增强，部队凝聚力战斗力也明显提高,

The Wishes of Officers and Men Are Fulfilled! A Battalion of a Certain Army Brigade Established a Letter Mechanism for the Battalion Party Committee to Warm the Hearts of Soldiers

Source: China Military Network-People’s Liberation Army Daily Author: Mao Yingchun Xie Wenjian Editor: Wang Yigen Release: 2025-07-11

A battalion of a certain brigade of the Army conducted the “Letter to the Battalion Party Committee” activity to open up channels for officers and men to make suggestions-

Wishes are fulfilled and concerns are listened to

■Mao Yingchun Xie Wenjian

The soldiers of the battalion are reading the reply of the battalion Party committee.

Some letters written by officers and men of the battalion to the battalion Party committee. Photo by Xie Wenjian

It was late at night in summer, and the moon was in the sky. After checking the sleeping order, Chen, a political instructor of a battalion of a certain brigade of the Army, took out a stack of letters from the drawer and read them carefully one by one with some expectations. This is a new batch of letters received by the battalion in the "Letter to the Battalion Party Committee" activity.

"Thank you to the battalion Party committee for helping us solve the problems in life" "One by one, the practical things have touched our hearts"... Many letters reveal the sincere feelings of the officers and men for the army, and some have also put forward opinions and suggestions on the construction of the company.

Recalling the development of this activity, Political Instructor Chen has a lot of feelings.

That year, the planning of the new year's work began. Political Instructor Chen collected opinions and suggestions from officers and men by setting up "suggestion boxes" and questionnaires, but the results were mediocre. But soon after, when the brigade staff came to the grassroots to work on site, the officers and men were very active. Soldier Xiao Zheng not only listed some current practical needs that everyone is concerned about, but also raised some contradictions in the construction of the unit.

Carefully analyzing the problems reflected by the officers and men, many of them can be better solved by relying on the battalion and company themselves. Why are the officers and men willing to speak up in front of the organs, but rarely report to the battalion and company cadres at ordinary times? This made Instructor Chen a little embarrassed.

When conducting research afterwards, Xiao Zheng admitted that compared with the battalion and company, the problems reflected to the organs were solved faster and more directly.

Previously, Xiao Zheng's security card was damaged and could not be used normally, so he asked the company for help, but he did not get a response. He could only ask around by himself, and later went to the relevant departments of the agency to apply for a replacement, and the agency also delivered the card to his door.

Some soldiers also reported that reporting problems to higher authorities would generally be taken seriously, and those that could be solved would be solved on the spot, and those that could not be solved for the time being would also receive a clear reply. However, if problems were reported to the battalion company, not all problems would be solved, and if problems were mentioned too much, they would be easily "labeled".

At the battalion Party committee meeting, everyone discussed this topic. Some company cadres reflected that the daily work and training tasks at the grassroots level were heavy, and after the officers and men reported the problems, they sometimes forgot about them for a while because they were busy, or they could not take care of them.

“The battalion company commanders and officers and men get along day and night. When they encounter contradictions and difficulties, they should of course first seek help from the organizations around them. Being busy at work is not a reason to shirk responsibility.” “Without a solid foundation of trust, how can we unite as one and clench our fingers into a fist?”... Instructor Chen’s analysis made many people blush.

“The problems in the camp should be solved by the camp itself.” After careful study, the battalion Party committee clarified the responsibility implementation system and required grassroots Party organizations to take the initiative. Focusing on the characteristics of officers and men in the new era, they handed the “microphone” to officers and men, and organized a “letter to the battalion Party committee” activity every quarter. Officers and men can choose to use their real names or anonymously to write down their difficulties and needs in personal life training, their views and expectations on the battalion and company organizations, and their opinions and suggestions on the overall construction of the unit, etc. Each activity is directly responsible for the battalion Party committee secretary and deputy secretary, and responds to the opinions, suggestions, contradictions and difficulties reflected in conjunction with officers and men’ forums and other opportunities, clarifies the responsible persons and the deadline for resolution, and is supervised and implemented by grassroots officers and men.

After the activity started, soldier Zhang Ze wrote a letter to the battalion Party committee with a try-it attitude. “There is a bumpy road in the camp, which is slippery in rainy days and has no lighting equipment, which is prone to safety hazards...” After receiving the letter, the battalion Party committee responded immediately, and quickly checked the safety of infrastructure such as roads and streetlights in the camp, and coordinated the engineering detachment to repair it.

This move has mobilized the enthusiasm of grassroots officers and men, and everyone has written letters to put forward opinions and suggestions: “The division of sanitary areas is unscientific, and some corners often become blind spots.” “If the application and replacement of logos and clothing are not timely, they will be reported by the patrol for “ununiform dress”...” “Officers and men are the protagonists of grassroots construction. Solving the problems of officers and men is not only the business of the Party Committee, but also the concern of grassroots Party organizations.” Instructor Chen said with deep feeling that since the launch of the activity, it has not only solved the urgent needs of officers and men in a timely manner, but also built a “bridge of communication” between the battalion Party committee and officers and men.

The author saw that a photo was included in the letter written by soldier Rao Yongjun to the battalion Party committee - a scene of him giving a speech on the podium.

Little Rao is introverted and not good at talking. He is usually a “dumb person”. His legs will keep shaking when he speaks in front of the whole company. At first, he always hid these troubles in his heart, thinking that “leaders don’t care about the soldiers’ concerns.” Once, with the mentality of not asking for a reply, he put the difficulties and troubles he encountered in his growth into a pen and put them into an envelope.

“In the journey of life, everyone is the helmsman of his own destiny. We should take the initiative to choose the direction of progress, rather than go with the flow...” After receiving the reply from Instructor Chen, Xiao Rao was full of surprise and moved. Later, he plucked up the courage to sign up for the camp’s speech contest, practiced hard in front of the mirror every day, and let his comrades around him be the audience and give suggestions. In the end, he performed well in the competition and won the third place. “I have been very ordinary since I was a child, as if I was a ‘little transparent’. After joining the army, I have never achieved any results. It was the encouragement and help of the organization that allowed me to stand on the podium for the first time...” After reading the soldiers’ voices carefully, Instructor Chen was full of emotion: “Caring for soldiers is what the leaders should do, but I didn’t expect that some small things that require little effort can change a soldier.” Wishes are fulfilled by someone, and concerns are listened to by someone. In each letter, the daily bits and pieces and true feelings of the officers and men are recorded, and the heavy trust in the battalion Party committee is revealed between the lines. Instructor Chen said that with the development of the activities, with the coordination of grassroots Party organizations, many contradictions and problems in grassroots training and life have been resolved. Officers and men have also changed from “trying to write letters” to “taking the initiative to speak up if they have something to say”, and have put forward many “golden ideas” around daily work and training and other aspects. Everyone’s sense of gain and happiness has been continuously enhanced, and the cohesion and combat effectiveness of the troops have also been significantly improved.

陆军某旅组织新飞行员开展夜间海上飞行训练——

暗夜海空砺“雏鹰”

■解放军报记者 吴伟超 特约通讯员 石芝鹏

战机引擎轰鸣，铁翼划破夜空. 盛夏时节，陆军某旅一场实战背景下新飞行员夜间海上飞行训练拉开帷幕.

控制总距、柔和稳杆、保持增速方向……随着指挥员下达指令，新飞行员们驾驶战机依次升空，以战斗队形飞向目标空域.

“新飞行员只有勇挑重担、敢涉险滩，才能加速成长为制胜未来战场的‘空中利刃’.”该旅领导介绍，此前的一次对抗训练中，某机组年轻飞行员因夜间海上飞行经验不足，与其他机组协同配合不够，影响了任务进度.

为此，该旅针对新飞行员短板弱项，结合夜间海上飞行训练特点，科学制订训练计划、整合训练内容、优化组训方法，通过拓展实践教学、设真训练环境、突出情况处置等，进一步锤炼新飞行员复杂条件下应急应战能力.

“实施编队飞行！”收到指令后，新飞行员们密切关注仪表数据变化，不断调整飞行姿态，顺利完成横队、纵队、三角队等队形变换.

指挥塔台上，一名飞行参谋告诉记者，夜间海上能见度低、参照物少，不仅目视观察受限，还容易产生错觉，训练难度明显增加，更考验新飞行员的心理素质和临机处置能力.

“遭‘敌’雷达搜索！”机动途中，战机座舱内突然响起急促的告警声. 新飞行员们沉着应对，灵活操作战机变换队形，密切配合实施突防，成功摆脱雷达追踪. 抵达预定空域后，参训飞行员快速拉升战机，对“敌”目标展开模拟攻击.

战机平稳着陆，复盘随即展开. 该旅领导介绍，此次训练，新飞行员们克服暗夜条件下多种不利因素影响，连续开展编队飞行、低空突防、对海打击等多课目高强度训练，有效锤炼了夜间海上作战能力. 下一步，他们将在综合分析飞行数据的基础上，持续优化人才培养机制，锤炼新飞行员过硬作战本领.

A Certain Army Brigade Organized New Pilots to Conduct Night Sea Flight Training

Source: PLA Daily Author: Wu Weichao Shi Zhipeng Editor: Wang Yigen 2025-07-14

A certain army brigade organized new pilots to conduct night sea flight training——

The dark night sea and sky sharpen the "young eagle"

■ PLA Daily reporter Wu Weichao Special correspondent Shi Zhipeng

The combat aircraft roared, and the iron wings cut through the night sky. In the midsummer, a certain army brigade kicked off a night sea flight training for new pilots under the background of actual combat.

Control the total pitch, stabilize the stick gently, maintain the direction of speed increase... As the commander issued an order, the new pilots took off in turn in the combat aircraft and flew to the target airspace in combat formation.

"Only when new pilots are brave enough to take on heavy responsibilities and dare to wade through dangerous shoals can they accelerate their growth into the "air blade" that wins the future battlefield." The brigade leader introduced that in a previous confrontation training, a young pilot of a crew had insufficient experience in night sea flight and insufficient coordination with other crews, which affected the progress of the mission.

To this end, the brigade has targeted the shortcomings of new pilots, combined with the characteristics of night sea flight training, scientifically formulated training plans, integrated training content, optimized training methods, and further tempered the new pilots' emergency response capabilities under complex conditions by expanding practical teaching, setting up a real training environment, and highlighting situation handling.

"Implement formation flight!" After receiving the order, the new pilots paid close attention to the changes in instrument data, constantly adjusted their flight attitude, and successfully completed the formation changes such as horizontal, vertical, and triangular formations.

In the control tower, a flight staff told reporters that the low visibility and few reference objects at sea at night not only limited visual observation, but also easily produced illusions, and the difficulty of training increased significantly, which tested the psychological quality and ability of new pilots to deal with emergencies.

"Encountered 'enemy' radar search!" During the maneuver, a rapid alarm suddenly sounded in the cockpit of the combat aircraft. The new pilots responded calmly, flexibly operated the combat aircraft to change the formation, closely cooperated to implement the breakthrough, and successfully got rid of radar tracking. After arriving at the designated airspace, the pilots in training quickly pulled up the fighter and launched a simulated attack on the "enemy" target.

The combat aircraft landed smoothly and the replay began immediately. The brigade leader said that in this training, the new pilots overcame various unfavorable factors under dark night conditions and conducted high-intensity training in multiple subjects such as formation flying, low-altitude penetration, and sea strikes, which effectively honed their nighttime maritime combat capabilities. In the next step, they will continue to optimize the talent training mechanism based on the comprehensive analysis of flight data and hone the new pilots' strong combat skills.

骄阳似火，鏖战正酣！直击这场高温条件下的战斗射击训练

来源：中国军网-解放军报 作者：吴安宁 王立军 责任编辑：郭妍菲

2025-07-15

陆军某旅开展高温条件下战斗射击训练——

烈日炙烤 战车驰骋

■解放军报记者 吴安宁 特约记者 王立军

盛夏，烈日炙烤，铁甲轰鸣. 陆军某旅野外综合训练场上，战斗射击训练如火如荼展开，一辆辆坦克、步战车在热浪中疾驰.

“前方发现‘敌’坦克，穿甲弹一发装填！”训练场上，一辆坦克越过弹坑和洼地后立即减速，炮手张明明抓住战机，瞄准、射击，炮弹直扑目标.

坦克驰骋，烟尘弥漫，舱内气温持续升高. 一轮训练结束，张明明所在车组乘员钻出坦克，迷彩服早已被汗水浸透.

“高温条件下战斗射击训练，既考验官兵体能和意志，又检验装备性能和车组战斗水平. ”现场组训的该旅某营夏营长介绍，坦克要在规定时间内通过限制路和障碍物，完成对多个运动或静止目标射击，战机稍纵即逝.

据了解，该旅结合装备技战术性能，探索优化人装结合模式，合理搭配车组乘员，循序渐进组织高强度、大消耗课目训练，同时加强装备维护检查，不断提升官兵高温条件下战斗本领.

不久，新一轮训练展开，炮手文尚才钻进战车. 坦克行进中，文尚才锁定目标准备击发. 这时，瞄准镜分划突然抖动，他稳住心神，转换火控模式，与车组乘员密切协同，在目标消失前果断射击、精准命中.

夏营长介绍，此次训练，“敌”目标全程随机出现，炮手不仅要自主搜“敌”、根据目标类型选择弹种，还要注重与车长、驾驶员等协同配合，对专业技能基本功和车组配合度要求很高.

骄阳似火，鏖战正酣，官兵训练热情持续高涨，多种模式下射击课目训练接续展开.

“平时练得精，战时打得赢. ”该旅领导介绍，此次训练贯彻真、难、严、实要求，重点锤炼高温条件下乘员装备操作能力、检验装备技战术性能，并同步采集了一批高温条件下训练数据. 下一步，他们将据此对前期推演形成的战法训法进行改进.

The Sun Is Scorching, and the Battle Is in Full Swing! Watch This Combat Shooting Training Under High Temperature Conditions

Source: China Military Network-People’s Liberation Army Daily Author: Wu Anning Wang Lijun Editor: Guo Yanfei

2025-07-15

A certain army brigade conducted combat shooting training under high temperature conditions-

The scorching sun and the chariots galloping

■People’s Liberation Army Daily reporter Wu Anning Special Correspondent Wang Lijun

In midsummer, the scorching sun and the roar of armored vehicles. On the field comprehensive training ground of a certain army brigade, combat shooting training is in full swing, and tanks and infantry fighting vehicles are galloping in the heat wave.

“An ‘enemy’ tank is found in front, and the armor-piercing shell is loaded!” On the training ground, a tank immediately slowed down after crossing the crater and depression. Gunner Zhang Mingming seized the opportunity, aimed, fired, and the shells went straight to the target.

The tank galloped, smoke and dust filled the air, and the temperature in the cabin continued to rise. After a round of training, the crew members of Zhang Mingming’s crew got out of the tank, and their camouflage uniforms were already soaked with sweat.

“Combat shooting training under high temperature conditions not only tests the physical fitness and will of officers and men, but also tests the performance of equipment and the combat level of the crew.” Captain Xia of a battalion of the brigade who organized the training on site introduced that the tank must pass through restricted roads and obstacles within the specified time and complete the shooting of multiple moving or stationary targets. The opportunity is fleeting.

It is understood that the brigade combines the technical and tactical performance of equipment, explores and optimizes the combination of people and equipment, reasonably matches the crew members, and gradually organizes high-intensity and high-consumption training courses. At the

same time, it strengthens equipment maintenance inspections and continuously improves the combat skills of officers and men under high temperature conditions.

Soon, a new round of training began, and gunner Wen Shangcai got into the tank. While the tank was moving, Wen Shangcai locked the target and prepared to fire. At this time, the sight scale suddenly shook, he steadied his mind, switched the fire control mode, and worked closely with the crew members to decisively shoot and accurately hit the target before it disappeared.

Captain Xia introduced that in this training, “enemy” targets appeared randomly throughout the whole process. The gunners not only had to search for “enemies” independently and select the type of ammunition according to the target type, but also had to focus on coordination with the commander and driver, which required high professional skills and basic skills and the coordination of the crew.

The sun was scorching, the battle was in full swing, the officers and men’ training enthusiasm continued to rise, and shooting training in various modes continued.

“Practice well in peacetime, and win in wartime.” The leaders of the brigade introduced that this training implemented the requirements of truth, difficulty, strictness and reality, focusing on tempering the equipment operation ability of the crew under high temperature conditions, testing the technical and tactical performance of the equipment, and simultaneously collecting a batch of training data under high temperature conditions. In the next step, they will improve the tactics and training methods formed in the previous deductions.

立体突击锤炼硬功！陆军某旅联合友邻部队开展实战化训练

来源：中国军网-解放军报 作者：陈宇 胡云艳 张欢朋 责任编辑：郭妍菲 发布：2025-07-15

战鹰振翅 立体突击

——陆军某旅联合友邻部队开展实战化训练影像

■陈 宇 解放军报记者 胡云艳 特约通讯员 张欢朋 摄影报道

低空突防、模拟打击、机降渗透……近日，陆军某旅联合友邻部队展开一场多课目实战化训练.

机务人员维护检查战机.

作战队员快速登机.

战机编队起飞.

某训练场，一发信号弹划破天际. 多型满载作战队员的运输直升机，与伴随掩护的武装直升机接续升空，随后完成编组飞赴目标空域.

“前方遭‘敌’电磁干扰，注意规避！”飞行途中，“敌情”通报传来. 编队长机果断指挥各机组切换通信模式、保持无线电静默，并迅速变换飞行高度. 战机正在某海域上空飞行，海面波涛汹涌，巨大的气流冲击着机身. 飞行员沉着冷静，稳稳操控战机，成功处置复杂空情.

到达目标地域上空，编队迅速进入战斗状态. 瞄准、锁定、发射……在捕捉到“敌”目标的瞬间，武装直升机立即开火，实施精准打击.

打击完毕，运输直升机低空突入“战场”，采取机降和索降方式实施兵力投送. 着陆后，作战队员迅速组成战斗队形投入战斗，对“敌”残余力量展开围剿……

悬停索降.

Three-Dimensional Assaults Temper Hard Skills! A Certain Army Brigade Jointly Conducted Combat Training with Friendly Troops

Source: China Military Network-People’s Liberation Army Daily Author: Chen Yu Hu Yunyan Zhang Huanpeng Editor: Guo Yanfei Release: 2025-07-15

War eagle flaps wings and conducts three-dimensional assault

——A certain army brigade jointly conducted combat training with friendly troops

■ Chen Yu People’s Liberation Army Daily reporter Hu Yunyan Special correspondent Zhang Huanpeng Photo report

Low-altitude penetration, simulated strikes, airborne infiltration... Recently, a certain army brigade jointly conducted combat training with friendly troops.

Maintenance personnel maintain and inspect fighters.

Combat team members quickly board the plane.

Fighter formations take off.

At a certain training ground, a flare cut through the sky. Transport helicopters of various types fully loaded with combat team members took off in succession with armed helicopters accompanying cover, and then completed the formation and flew to the target airspace.

“Enemy electromagnetic interference ahead, pay attention to avoid it!” During the flight, the “enemy situation” report came. The leader of the formation decisively commanded each crew to switch the communication mode, maintain radio silence, and quickly change the flight altitude. The combat aircraft [helicopters] were flying over a certain sea area, the sea was rough, and huge airflows hit the fuselage. The pilot was calm and steady, and successfully handled the complex air situation.

Arriving over the target area, the formation quickly entered combat status. Aiming, locking, firing... At the moment of capturing the “enemy” target, the armed helicopter immediately opened fire and conducted a precise strike.

After the strike, the transport helicopter broke into the “battlefield” at low altitude and deployed troops by airdrop and rope drop. After landing, the combat team quickly formed a combat formation and entered the battle, encircling and suppressing the remaining “enemy” forces...

Hovering rope drop.

用时更长却被表扬？伪装网两面同时用体现谋打赢“活思维”

来源：解放军报 作者：刘含 王轶 责任编辑：郭妍菲 2025-07-16

隐蔽伪装考核，第 82 集团军某旅某连 5 班灵活应变——

一张伪装网，两面同时用

■刘 含 解放军报特约通讯员 王 轶

这天，正在野外驻训的第 82 集团军某旅某连，组织了一次隐蔽伪装考核. 考核结束，连长李成昊在讲评时对 5 班车组的表扬，引来一些官兵质疑：“都没有被‘敌’发现，但 5 班用时比我们长，他们怎么还能受到表扬呢？”

“5 班虽然不是用时最短的，但在规定时限内，能够根据实际情况，灵活使用伪装网，取得了更好的伪装效果，值得表扬. ”李成昊解释说.

时钟回拨到半个多小时前. 彼时，该连正在机动，李成昊随机下达指令：“敌”无人机侦察，各车组迅速寻找有利地形，进行隐蔽伪装.

接到指令后，5 班班长王帅过立刻观察周围环境，发现道路左前方地势起伏明显，利于隐蔽伪装，随即向车组下达命令：“加速向左前方机动. ”

到达选定位置后，在王帅过的带领下，车组成员立即着手搭设伪装网.

该连配发的伪装网有两个面，一面颜色偏绿、一面颜色偏黄，分别适用林地、荒漠等不同地形地貌. 5 班选择的隐蔽地点靠近道路，附近植被稀少，零星分布着一些低矮灌木丛，

地面呈现土黄色. 在这种情况下隐蔽伪装，通常将伪装网颜色偏黄的一面朝上，5 班最初的选择也是如此.

拆网、覆盖、撑杆、塑形……5 班很快搭好了伪装网. 然而，就在王帅过准备向排指挥员报告完成考核时，副班长郭士奎连忙出声制止：“班长，我觉得还有问题！”

原来，细心的郭士奎在做最后检查时发现，临近灌木丛的土壤呈深褐色，与伪装网色差较大，如果不做处理，有暴露目标的风险.

“要不，我们把伪装网翻过来，将旁边的灌木丛整个包住？”郭士奎建议. 另一名战士接着补充：“再折一些灌木枝插在伪装网上，效果会更好. ”

听着大家的发言，王帅过没有立即决断. 他抬眼观察周围环境，又仔细翻看伪装网，陷入了沉思：附近灌木丛分布零散、大小不一，面积不超过半张伪装网. 如果把整张伪装网都罩在上面，反而显得突兀，更容易引起“敌”无人机的注意.

时间所剩不多，如果重新选择隐蔽地点，肯定会超时. 情急之下，王帅过脑海中冒出一个“大胆”的想法：“单独使用伪装网的哪一面效果都不理想，能不能同时使用两个面呢？”

“班长，以前从没这样用过，能行吗？”王帅过话音刚落，质疑声随之而来.

“不试试怎么知道不行？”王帅过下定决心.

随后，5 班开始调整伪装网，完全遮住装备车辆后，他们把颜色偏黄一面的一部分翻过来，覆盖灌木丛附近的土壤，使之尽可能与周围环境一致. 完成隐蔽伪装没多久，他们就看见一架无人机从远处飞了过来.

伪装效果究竟如何？王帅过心里有些忐忑. 直到复盘讲评，连长提出表扬，他悬着的心才落了下来.

其实，李成昊早就注意到 5 班的“异样”——他们本来速度最快，但完成伪装后并没有立刻报告结束考核，而是再次进行了调整.

“借助无人机高空观察，我发现 5 班调整后的伪装效果更好. 更重要的是，他们敢于突破思维惯性、打破常规做法，同时使用伪装网的两个面. ”复盘时，李成昊一边回放考核视频，一边回应质疑，“反观其他一些车组，一味图快，却不注意观察周边环境，最终效果并不理想. 真实战场情况远比平时训练复杂，伪装网使用没有一定之规，应该更加灵活. ”

接着，李成昊带领官兵重温训练大纲对隐蔽伪装的要求：“使用制式和就便器材，采用多种手段，完成人员、掩体、车辆、武器和装备的隐蔽伪装. ”随后，他们组织讨论，深挖思维固化问题，反思训练考核中不符合实战的表现. 经过思想碰撞，大家达成共识：要进一步树牢战场思维、打仗意识，因时因势灵活运用战术战法.

这次考核过后，该连制订了针对不同地域、季节、装备的隐蔽伪装方案，并在演练中不断验证完善. 此外，他们还打破“自己考自己”的检验模式，与其他连队互为对手、互设条件开展考核，在真抓实备、真打实练中不断锤炼官兵实战能力.

亲历者说

野外驻训是“把兵练活”的好机会

■第 82 集团军某旅某连干部 李成昊

表扬 5 班，不仅因为他们的伪装效果好，更在于他们考核中展现出了灵活应变能力，而这正是我们连一些官兵缺乏的.

回顾这次考核，受地形地貌限制，各车组面对的挑战基本一样. 然而在使用伪装网时，多数车组只用了伪装网的一面，并没有根据实际情况随机作出调整. 复盘时，有人说是因为平时没练过所以没想到，也有人解释是为了更快完成考核以取得好成绩. 无论哪种理由，都暴露出一些官兵思维上的局限.

今年驻训展开后，我发现，一些官兵战场意识不够、实战意识不强. 一次演练，几名班长骨干不注意观察战场判断“敌情”，盲目听信导调人员通报的情况，结果打了败仗.

我们常讲“仗怎么打，兵就怎么练”，但在实践中，还是不可避免受到过往经历和思维习惯的影响，对真实战场的复杂程度设想不够，构设的条件场景与实际作战存在差距，导致一些官兵深陷“操场化模式”和“固定化套路”迟迟走不出来. 怎么解决这个问题？在我看来，野外驻训提供了绝佳的机会.

近些年，野外驻训已经成为各部队的“必修课”. 驻训点位不同，自然环境不同，带来的考验和挑战也会有所区别. 如果说营区训练是“磨剑”，那么驻训就是“淬锋”. 我们连党支部一班人研究讨论后认为，野外驻训是“把兵练活”的好机会，要抓住这个“黄金期”，将官兵置于贴近真实战场的环境条件、难以预测的“敌情”特情中，让他们在“出乎意料”的考验挑战里，突破思维局限、强化实战意识，提升应变能力、练就打赢本领.

基于这些思考，我们与一些兄弟连队签订了“互考协议”，在考核演练中轮流扮演“蓝军”. 障碍设置、袭击方式等均由“蓝军”自行确定，无需提前告知对方，以最大限度模拟战场上的“不确定性”，倒逼官兵进行“能力突围”. 而且，在扮演“蓝军”过程中，由于需要站在“对手”角度设计战斗，官兵们打开了观察战场的视野，拓展了思考战争的维度，平时参加演训活动也更懂得灵活应变了.

It Took Longer But Was Praised? Using Both Sides of the Camouflage Net at the Same Time Reflects the “Active Thinking” to Win the Battle

Source: PLA Daily Author: Liu Han Wang Yi Editor: Guo Yanfei 2025-07-16

During the concealed camouflage assessment, the 5th squad of a certain company of a certain brigade of the 82nd Group Army responded flexibly-

A camouflage net, used on both sides at the same time

■Liu Han PLA Daily Special Correspondent Wang Yi

On this day, a certain company of a certain brigade of the 82nd Group Army, which was stationed in the field, organized a concealed camouflage assessment. At the end of the assessment, the company commander Li Chenghao praised the 5th squad during the review, which attracted some officers and men to question: "They were not discovered by the 'enemy', but the 5th squad took longer than us, how could they still be praised?"

"Although the 5th squad did not take the shortest time, it was able to use the camouflage net flexibly according to the actual situation within the prescribed time limit, and achieved better camouflage effects, which deserves praise." Li Chenghao explained.

The clock went back to more than half an hour ago. At that time, the company was maneuvering, and Li Chenghao randomly issued an order: "Enemy" drone reconnaissance, each vehicle crew quickly finds favorable terrain for concealment and camouflage.

After receiving the order, Wang Shuaiguo, the squad leader of the 5th squad, immediately observed the surrounding environment and found that the terrain on the left front of the road was obviously undulating, which was conducive to concealment and camouflage. He immediately ordered the crew: "Speed up and maneuver to the left front."

After arriving at the selected location, under the leadership of Wang Shuaiguo, the crew members immediately set up a camouflage net.

The camouflage net distributed by the company has two sides, one side is green and the other side is yellow, which are suitable for different terrains such as woodlands and deserts. The concealed location selected by the 5th squad is close to the road, with sparse vegetation nearby, and some low bushes scattered around, and the ground is earthy yellow. In this case, for concealment and camouflage, the yellowish side of the camouflage net is usually facing up, which is also the case with the initial choice of the 5th squad.

Dismantling the net, covering, supporting poles, shaping... The 5th squad quickly set up the camouflage net. However, just as Wang Shuaiguo was about to report to the platoon commander that he had completed the assessment, the deputy squad leader Guo Shikui quickly stopped him: "Squad leader, I think there is still a problem!" It turned out that the careful Guo Shikui found during the final inspection that the soil near the bushes was dark brown, which was quite different from the camouflage net. If it was not treated, there would be a risk of exposing the target. "How about we turn the camouflage net over and cover the bushes next to it?" Guo Shikui suggested.

Another soldier then added: “If we break some more bush branches and insert them into the camouflage net, the effect will be better.” Listening to everyone’s speeches, Wang Shuaiguo did not make a decision immediately. He looked up at the surrounding environment, and then carefully looked through the camouflage net, and fell into deep thought: the nearby bushes were scattered and of different sizes, and the area did not exceed half of the camouflage net. If the entire camouflage net was covered on it, it would appear abrupt and more likely to attract the attention of the “enemy” drone. There was not much time left, and if he chose a new hiding place, he would definitely exceed the time limit. In a hurry, Wang Shuaiguo had a “bold” idea in his mind: “Either side of the camouflage net is not ideal when used alone. Can we use both sides at the same time?”

“Squad leader, I’ve never used it this way before. Will it work?” As soon as Wang Shuaiguo finished speaking, doubts followed.

“How do you know it won’t work if you don’t try it?” Wang Shuaiguo made up his mind.

Afterwards, Class 5 began to adjust the camouflage net. After completely covering the equipment vehicles, they turned over part of the yellowish side and covered the soil near the bushes to make it as consistent as possible with the surrounding environment. Not long after completing the concealed camouflage, they saw a drone flying from a distance.

How effective is the camouflage? Wang Shuaiguo was a little nervous. It was not until the review and review that the company commander praised him that his heart was relieved.

In fact, Li Chenghao had long noticed the “strangeness” of Class 5 - they were originally the fastest, but after completing the camouflage, they did not immediately report the end of the assessment, but made adjustments again.

“With the help of drones for high-altitude observation, I found that the camouflage effect of Class 5 after adjustment was better. More importantly, they dared to break through the inertia of thinking, break the conventional practices, and use both sides of the camouflage net at the same time.” During the review, Li Chenghao responded to doubts while playing back the assessment video, “On the other hand, some other crews were blindly seeking speed but did not pay attention to observing the surrounding environment, and the final effect was not ideal. The real battlefield situation is far more complicated than usual training. There is no fixed rule for the use of camouflage nets, and it should be more flexible.” Then, Li Chenghao led the officers and men to review the requirements of the training outline for concealment and camouflage: “Use standard and convenient equipment, and adopt a variety of means to complete the concealment and camouflage of personnel, bunkers, vehicles, weapons and equipment.” Afterwards, they organized discussions to dig deep into the problem of solidified thinking and reflect on the performance that did not conform to actual combat in the training assessment. After the collision of ideas, everyone reached a consensus: to further strengthen battlefield thinking and awareness of fighting, and flexibly use tactics and methods according to the time and situation. After this assessment, the company formulated concealment and camouflage plans for different regions, seasons, and

equipment, and continuously verified and improved them in exercises. In addition, they also broke the “self-test” test mode, and conducted assessments with other companies as opponents and set conditions for each other, constantly honing the actual combat capabilities of officers and men in real preparation and real practice.

Eyewitnesses said

Field training is a good opportunity to “train soldiers”

■ Li Chenghao, a cadre of a company of a brigade of the 82nd Group Army

Praise for Class 5, not only because of their good camouflage effect, but also because they showed flexible adaptability in the assessment, which is exactly what some officers and men in our company lack.

Looking back on this assessment, due to the limitations of terrain and topography, the challenges faced by each crew are basically the same. However, when using the camouflage net, most crews only used one side of the camouflage net and did not make random adjustments according to the actual situation. When reviewing, some people said that it was because they had not practiced before, so they did not expect it, and some people explained that it was to complete the assessment faster to get good results. No matter what the reason is, it exposes the limitations of some officers and men’ thinking.

After the training started this year, I found that some officers and men did not have enough battlefield awareness and actual combat awareness. During an exercise, several squad leaders did not pay attention to observing the battlefield to judge the “enemy situation” and blindly believed the situation reported by the command personnel, resulting in a defeat.

We often say “how the battle is fought, the soldiers are trained in the same way”, but in practice, it is still inevitable to be influenced by past experiences and thinking habits, and the complexity of the real battlefield is not enough. There is a gap between the constructed conditions and the actual combat, which has caused some officers and men to be trapped in the “playground mode” and “fixed routine” and have been unable to get out. How to solve this problem? In my opinion, field training provides an excellent opportunity.

In recent years, field training has become a “compulsory course” for all troops. Different training locations and natural environments will bring different tests and challenges. If camp training is “sharpening the sword”, then field training is “tempering the edge”. After research and discussion, a group of people from our company’s party branch believed that field training is a good opportunity to “train soldiers”. We must seize this “golden period” and place officers and men in environmental conditions close to the real battlefield and unpredictable “enemy situations” and special situations, so that they can break through the limitations of thinking, strengthen actual combat awareness, improve their adaptability, and practice winning skills in “unexpected” tests and challenges.

Based on these considerations, we signed a “mutual assessment agreement” with some brother companies, and took turns playing the “blue army” in assessment exercises. The obstacle setting and attack methods are determined by the “blue army” themselves, without informing the other party in advance, so as to simulate the “uncertainty” on the battlefield to the maximum extent, forcing officers and men to “break through their capabilities”. Moreover, in the process of playing the “blue army”, because they need to design battles from the perspective of the “opponent”, the officers and men have opened up their vision of observing the battlefield, expanded the dimension of thinking about war, and are more flexible in participating in training activities.

陆军某旅建立高素质军士人才队伍培养机制

来源：解放军报 作者：韩金鹏 李润科 责任编辑：乌铭琪 2025-07-18

陆军某旅建立高素质军士人才队伍培养机制——

为培养高级军士绘制成长“路线图”

■韩金鹏 解放军报特约通讯员 李润科

近日，陆军某旅组织高级军士拟选对象集中考核. 修理连技师、一级上士沈万里凭借扎实的理论基础、过硬的体能素质、精湛的专业技能，顺利通过考核，提前半年晋升为三级军士长. “感谢旅里为我制订的‘岗位调剂—学历升级—技能培训—实践强能’成长路径，让我更快符合了晋升高级军士的条件. ”沈万里说.

“这几年，随着改革转型深入推进，部队对高级军士人才的需求更加迫切. ”该旅领导介绍，以往，高级军士人才队伍培养存在“重使用、轻培养”“重当下、轻长远”等问题. 由于缺乏系统规划，一些高级军士岗位出现优秀人才青黄不接的现象.

对此，该旅根据有关规定，探索建立高级军士人才常态化培养机制，按照“超前培养、预先储备、梯次接续”的方式，遴选作风硬、技术精、表率好的中级军士作为高级军士培养对象，提前将他们放在高级军士对应岗位历练培养，并配套推出一系列激励措施.

实践中，他们坚持“引进来”与“走出去”相结合，邀请院校专家和厂家技术人员来队提供技术指导和专业授课；利用接收新装备等多种时机，择优选派中级军士前往科研院所、军工企业参加培训；根据晋升高级军士的基本条件，鼓励并组织中级军士参加函授或其他形式教育培训，提升他们的学历层次和技术资质. 此外，该旅注重在大项演训任务中摔打锻炼中级军士，帮助他们快速积累经验、提升能力.

去年，作为官兵公认的“武教头”，一级上士肖东升多次带队参加演习演训任务，并为单位培养了多名专业骨干. 该旅经过综合考虑，将肖东升列为高级军士培养对象，拟安排他到侦察科担任军士参谋.

根据军士参谋岗位任职要求，肖东升缺少相关培训经历. 为此，该旅机关及时向上级提报培训需求. 培训期间，肖东升认真刻苦，系统学习了参谋岗位所需知识. 归队后，他凭借出色表现顺利通过考察期，正式成为一名军士参谋. “从普通一兵成长为军士参谋，离不开组织的精心培养. ”肖东升说，“我一定再接再厉，立足岗位为部队建设贡献更多力量. ”

绘好成长“路线图”，跑出成才“加速度”. 该旅推行高级军士人才常态化培养机制以来，军士职业发展路径更加顺畅，培养使用机制更加完备，中、高级军士队伍动力活力进一步迸发，涌现出一批善管理、精组训、综合素质全面的“兵专家”. 该旅领导介绍，下一步，他们将继续完善人才培养机制，实施多项人才工程，为部队战斗力建设不断夯实人才基础.

A Certain Army Brigade Has Established a Mechanism for Cultivating High-Quality Sergeant Talents

Source: PLA Daily Author: Han Jinpeng Li Runke Editor: Wu Mingqi 2025-07-18

A certain army brigade has established a mechanism for cultivating high-quality sergeant talents

Drawing a growth “roadmap” for cultivating senior sergeants

■ Han Jinpeng Li Runke, special correspondent of PLA Daily

Recently, a certain army brigade organized a centralized assessment of candidates for senior sergeants. Shen Wanli, a technician of the repair company and a first-class sergeant, successfully passed the assessment with a solid theoretical foundation, excellent physical fitness, and superb professional skills, and was promoted to a third-class sergeant major six months ahead of schedule. “Thanks to the growth path of ‘job adjustment-education upgrade-skill training-practice strengthening’ formulated by the brigade for me, I met the conditions for promotion to a senior sergeant more quickly.” Shen Wanli said.

“In recent years, with the deepening of reform and transformation, the troops have a more urgent need for senior sergeant talents.” The leaders of the brigade introduced that in the past, the training of senior sergeant talents had problems such as “focusing on use and neglecting training” and “focusing on the present and neglecting the long-term”. Due to the lack of systematic planning, some senior sergeant positions have seen a lack of excellent talents.

In response to this, the brigade explored the establishment of a regular training mechanism for senior sergeant talents in accordance with relevant regulations. In accordance with the method of “advanced training, pre-reserve, and step-by-step succession”, it selected intermediate sergeants with a strong style, excellent skills, and good examples as the training targets for senior sergeants, placed them in the corresponding positions of senior sergeants in advance for training and training, and launched a series of incentive measures.

In practice, they insisted on combining “bringing in” with “going out”, inviting experts from colleges and universities and technical personnel from manufacturers to provide technical guidance and professional lectures to the team; taking advantage of various opportunities such as receiving new equipment, they selected and sent intermediate sergeants to scientific research institutes and military enterprises for training; based on the basic conditions for promotion to senior sergeants, they encouraged and organized intermediate sergeants to participate in correspondence courses or other forms of education and training to improve their academic level and technical qualifications. In addition, the brigade focuses on training mid-level sergeants in major training tasks to help them quickly accumulate experience and improve their abilities.

Last year, as a recognized “martial arts coach” by officers and men, First Sergeant Xiao Dongsheng led the team to participate in training tasks many times and trained a number of professional backbones for the unit. After comprehensive consideration, the brigade listed Xiao Dongsheng as a senior sergeant training target and planned to arrange him to serve as a sergeant staff in the reconnaissance department.

According to the requirements of the sergeant staff position, Xiao Dongsheng lacks relevant training experience. To this end, the brigade headquarters promptly reported the training needs to the superiors. During the training, Xiao Dongsheng worked hard and systematically learned the knowledge required for the staff position. After returning to the team, he successfully passed the probation period with his outstanding performance and officially became a sergeant staff. “From an ordinary soldier to a sergeant staff, it is inseparable from the careful training of the organization.” Xiao Dongsheng said, “I will continue to work hard and contribute more to the construction of the troops based on my position.”

Draw a good growth “roadmap” and run out of the “acceleration” of talent. Since the brigade implemented the regular training mechanism for senior sergeant talents, the career development path of sergeants has become smoother, the training and use mechanism has become more complete, the dynamic vitality of the middle and senior sergeant teams has further burst out, and a group of “soldier experts” with good management, excellent training and comprehensive qualities have emerged. The leaders of the brigade introduced that in the next step, they will continue to improve the talent training mechanism and implement a number of talent projects to continuously consolidate the talent foundation for the combat effectiveness of the troops.

陆军某旅深入学习贯彻中央军委政治工作会议精神

来源：解放军报 作者：刘颖函 韩帅 责任编辑：王一亘 2025-07-20

陆军某旅深入学习贯彻中央军委政治工作会议精神——

以上率下 向战攻坚

■解放军报记者 刘颖函 特约通讯员 韩 帅

“提高火炮射击精度，指挥员首先要吃透诸元计算原理，带头练精算准！”夏日，陆军某旅训练场硝烟未散，该旅党委成员和营连主官围坐一起，带头剖析问题、分享经验. 现场官兵深受感染，纷纷结合训练实践建言献策.

“习主席在中央军委政治工作会议上强调，坚持实事求是，坚持身教胜于言教，各级特别是高级干部要以身作则、率先垂范，以过硬作风和形象感召带动部队. ”该旅领导告诉记者，他们深入学习会议精神，严格贯彻落实“恢复和弘扬政治工作优良传统”这一重要部署，引导各级领导和机关干部带头研战谋战、冲锋在前，要求各级指挥员在练兵场上叫响“看我的”“跟我上”，在攻克险难课目、破解训练难题中站排头、当标杆.

实践中，该旅党委一班人沉到训练一线，紧盯制约战斗力生成的关键问题，与官兵同训同研. 在持续开展的“诸葛亮会”“精武大讲堂”等活动中，旅领导和机关干部带头分享个人心得、剖析训练短板、提出解决方案，引导官兵积极为战斗力建设集智聚力.

该旅侦察连组织某课目训练前，赵连长召集骨干围绕优化协同作业方法进行研讨. 训练开始后，赵连长第一个上场示范作业. “连长带头，给我们树立了榜样！”在赵连长带领下，全连官兵迅速掌握作业技巧，训练质效稳步提升.

某连战术驾驶训练场上，一场由各车长、炮长、驾驶员参加的集智研讨会气氛热烈. 该连干部针对“提高暗夜条件下复杂地形车组协同效率”抛出问题，引导官兵结合各自岗位深入思考、提出方案. 下士王勇拿出建议后，连队干部当即带领技术骨干评估可行性，并带头上车操作，验证其有效性. “干部冲在前，我们也要紧跟上！”官兵纷纷表示.

以上率下，向战攻坚. 随着学习贯彻中央军委政治工作会议精神持续深入，该旅党委一班人和营连主官带头研战谋战练战的作用更加明显，带动更多官兵积极投身战备训练，部队战斗力建设迈上新台阶.

A Certain Army Brigade Thoroughly Studied and Implemented the Spirit of the Central Military Commission’s Political Work Conference

Source: PLA Daily Author: Liu Yinghan Han Shuai Editor: Wang Yigeng 2025-07-20

A certain army brigade thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference——

Leading from top to bottom, heading for battle

■PLA Daily reporter Liu Yinghan Special correspondent Han Shuai

“To improve the accuracy of artillery shooting, commanders must first thoroughly understand the principles of various element calculations and take the lead in practicing accurate calculations!” In the summer, the smoke of gunpowder had not yet dissipated at the training ground of a certain army brigade. Members of the brigade’s Party Committee and battalion and company commanders sat together, taking the lead in analyzing problems and sharing experiences. The officers and men on the scene were deeply moved and offered suggestions based on training practice.

“President Xi stressed at the Central Military Commission’s Political Work Conference that we must seek truth from facts and insist that personal example is better than precept. All levels, especially senior cadres, must set an example and lead the troops with their excellent style and image.” The brigade leaders told reporters that they thoroughly studied the spirit of the meeting and strictly implemented the important deployment of “restoring and carrying forward the fine tradition of political work”, guiding leaders and cadres at all levels to take the lead in studying and planning wars and charging ahead, and requiring commanders at all levels to shout “watch me” and “follow me” on the training ground, and take the lead and set a benchmark in overcoming difficult subjects and solving training problems.

In practice, the brigade’s Party Committee has been working on the front line of training, focusing on the key issues that restrict the generation of combat effectiveness, and training and studying with officers and men. In the ongoing “Zhuge Liang Meeting” and “Jingwu Lecture Hall” and other activities, brigade leaders and cadres took the lead in sharing personal experiences, analyzing training shortcomings, and proposing solutions, guiding officers and men to actively gather wisdom and strength for combat effectiveness construction.

Before the brigade’s reconnaissance company organized a training session on a certain subject, Captain Zhao convened the backbones to discuss the optimization of collaborative operation methods. After the training began, Captain Zhao was the first to demonstrate the operation. “The company commander took the lead and set an example for us!” Under the leadership of Captain Zhao, the officers and men of the entire company quickly mastered the operation skills, and the quality and efficiency of training steadily improved.

At a certain company’s tactical driving training ground, a collective intelligence seminar attended by vehicle commanders, gunners, and drivers was held in a warm atmosphere. The company’s cadres raised the question of “improving the efficiency of vehicle group coordination in complex terrain under dark night conditions” and guided the officers and men to think deeply and propose solutions based on their respective positions. After Corporal Wang Yong made a suggestion, the company cadres immediately led the technical backbones to evaluate the feasibility, and took the lead in boarding the vehicle to operate and verify its effectiveness. “The cadres are in the front, and we must keep up!” The officers and men said one after another.

Leading by example, attacking the battle. As the study and implementation of the spirit of the Central Military Commission’s Political Work Conference continues to deepen, the role of the brigade’s Party Committee and battalion and company commanders in taking the lead in

researching, planning and training for warfare has become more obvious, leading more officers and men to actively participate in combat readiness training and taking the unit's combat effectiveness construction to a new level.

陆军某旅利用科技手段提升组训水平

来源：解放军报 作者：李卓煜 曾亮凯 责任编辑：郭妍菲 2025-07-22

陆军某旅利用科技手段提升组训水平

驾驶员有了"云端练兵场"

解放军报讯 李卓煜、曾亮凯报道：前不久，陆军某旅新驾驶员陈熠，在旅队模拟训练中心完成了第 151 次驾车"战斗". "这次模拟训练结束后，我将真正走上战位. "陈熠说.

借助模拟训练系统打造"云端练兵场"，加速新驾驶员能力生成，是该旅利用科技手段提升组训水平取得的可喜成果. 该旅领导介绍，近年来，他们依托模拟训练中心还原多种驾驶特情，充分发挥模拟训练系统的"磨刀石"作用，为新驾驶员战斗力生成按下"加速键".

笔者走进该旅模拟训练中心看到，大屏幕上，驾驶员们的操作数据一目了然. "模拟训练系统能实时记录驾驶员的操作数据，并生成动态曲线图，精准显示每名参训驾驶员的短板不足. "模拟训练中心负责人吴亮指着一名驾驶员的"陡坡起步"课目数据说，系统针对驾驶员在训练中暴露的不足，自动生成强化训练模块，帮助驾驶员高效开展补差训练.

说起模拟训练系统的这一功能，上等兵李登深有感触. 李登刚学习驾驶时，很快掌握了基础驾驶技能，但遇到特情时经常手忙脚乱. "借助模拟训练系统进行专项补差，我的特情处置能力稳步提升. "他高兴地说.

前不久一次实战化训练中，李登遭遇连贯特情. 面对"染毒地带"，他快速戴上防毒面具，果断降低车速拉大车距；遭"敌"炮火拦阻，车辆制动"失灵"，他熟练采取"发动机制动"方式控制车速，顺利通过"敌"炮火拦阻区，处置动作一气呵成.

"除了帮助驾驶员补齐能力短板，我们还将各车数据互联，在模拟训练系统中实现多车协同训练. "吴亮介绍，他们依托系统训练数据，不断优化战斗协同方案，并通过实战化演训对方案进行验证，不仅缩短了训练时间、节约了训练资源，还有效提升协同方案的可行性.

A Certain Army Brigade Uses Technology to Improve Its Training Level

Source: PLA Daily Author: Li Zhuoyu Zeng Liangkai Editor: Guo Yanfei 2025-07-22

A certain army brigade uses technology to improve its training level

Drivers have a “cloud training ground”

PLA Daily News Li Zhuoyu and Zeng Liangkai reported: Not long ago, Chen Yi, a new driver of a certain army brigade, completed his 151st driving “battle” at the brigade’s simulation training center. “After this simulation training, I will really take up my position,” said Chen Yi.

Using the simulation training system to create a “cloud training ground” and accelerate the generation of new drivers’ capabilities is a gratifying achievement of the brigade in using technology to improve its training level. The brigade leaders introduced that in recent years, they have relied on the simulation training center to restore a variety of driving special situations, give full play to the “grindstone” role of the simulation training system, and press the “accelerator” for the generation of new drivers’ combat effectiveness.

The author walked into the brigade’s simulation training center and saw that the drivers’ operating data were clear at a glance on the big screen. “The simulation training system can record the driver’s operating data in real time and generate a dynamic curve chart to accurately show the shortcomings of each participating driver.” Wu Liang, head of the simulation training center, pointed to the data of a driver’s “steep slope start” course and said that the system automatically generates a reinforcement training module for the shortcomings exposed by the driver during training, helping the driver to conduct remedial training efficiently.

Speaking of this function of the simulation training system, Corporal Li Deng was deeply touched. When Li Deng first learned to drive, he quickly mastered the basic driving skills, but he was often in a hurry when encountering special situations. “With the help of the simulation training system for special remediation, my ability to handle special situations has steadily improved.” He said happily.

In a practical training not long ago, Li Deng encountered a series of special situations. Facing the “contaminated zone”, he quickly put on a gas mask and decisively reduced the speed of the car to increase the distance between the cars; when he was blocked by “enemy” artillery fire and the vehicle brakes “failed”, he skillfully used the “engine brake” method to control the speed of the car and successfully passed the “enemy” artillery fire blocking area, and the handling action was done in one go.

“In addition to helping drivers fill in their shortcomings in ability, we will also interconnect the data of each vehicle to realize multi-vehicle collaborative training in the simulation training system.” Wu Liang introduced that they rely on system training data to continuously optimize the combat coordination plan and verify the plan through actual combat exercises. This not only shortens the training time and saves training resources, but also effectively improves the feasibility of the coordination plan.

陆军某团组织实战背景下卫勤保障训练

来源：解放军报 作者：马秋红 王驰 责任编辑：王一亘 2025-07-22

陆军某团组织实战背景下卫勤保障训练——

特情叠加练强战救技能

■马秋红 解放军报记者 王 驰

“前方阵地遭‘敌’打击，有人员受伤，命你部立即前出救治！”盛夏戈壁，烈日炎炎，陆军某团野外驻训场上，一场实战背景下卫勤保障训练火热展开. 接到导调指令，卫勤分队迅速出发.

车队刚抵达目标地域，分队指挥员立即下令放飞无人机搜集情报，进一步研判战场态势. 各组人员密切协同，选择隐蔽位置开设野战救护所. 救护组利用地形掩护，突破层层阻碍，成功找到“伤员”.

“只有平时训练从难从严设置特情，才能锤炼过硬本领，确保战时拉得出、上得去、打得赢. ”该团领导介绍，他们聚焦未来战场卫勤保障需求，突出复杂条件下战场搜救、伤员转运、野战手术等重难点课目训练，通过单项严训、连贯考评、综合演练等，帮助官兵找准能力短板；开展专项补差训练，锤炼官兵野战卫勤保障能力.

“下肢‘大出血’！”初步判明“伤情”，救护组快速进行止血包扎. 侦察组突然发现不远处有“敌”巡逻分队，救护组立即根据应急预案展开伪装，同时呼叫警戒组支援掩护，最终顺利摆脱“敌人”.

“前方道路被毁！”一波未平，一波又起. 救护组组长临危不乱，下令停车就地隐蔽，并打开地图重新规划路线……

野战救护所内，分类后送组快速对“伤员”进行检伤分类，重伤救治组实时监测“伤员”生命体征，做好应对突发情况准备.

“救护所位置暴露，迅速转移！”日落时分，警报再度响起. 官兵立即撤收装备，快速向预备阵地转移……

A Regiment of the Army Organized Medical Support Training under the Background of Actual Combat

Source: PLA Daily Author: Ma Qiuhong Wang Chi Editor: Wang Yigen 2025-07-22

A regiment of the army organized medical support training under the background of actual combat——

Special situation superposition to strengthen combat and rescue skills

■Ma Qiuhong PLA Daily reporter Wang Chi

“The front position was attacked by the ‘enemy’ and some people were injured. I order your unit to go forward and treat them immediately!” In the midsummer Gobi Desert, the sun was scorching. A medical support training under the background of actual combat was launched in the field training field of a regiment of the army. After receiving the command, the medical team set off quickly.

As soon as the convoy arrived at the target area, the commander of the team immediately ordered the release of drones to collect intelligence and further judge the battlefield situation. The personnel of each group worked closely together and chose a hidden location to open a field first aid station. The rescue team used the terrain to cover, broke through layers of obstacles, and successfully found the “wounded”.

“Only by setting up special situations in difficult and strict training can we hone our skills and ensure that we can be deployed, go up and win in wartime.” The leaders of the regiment introduced that they focus on the future battlefield medical support needs, highlight the training of difficult and key subjects such as battlefield search and rescue, wounded transfer, and field surgery under complex conditions, and help officers and men find their shortcomings through single-item strict training, continuous assessment, and comprehensive exercises; conduct special training to improve the field medical support capabilities of officers and men.

“Lower limbs ‘hemorrhage’!” After initially determining the “injury”, the rescue team quickly stopped the bleeding and bandaged it. The reconnaissance team suddenly found an “enemy” patrol team not far away. The rescue team immediately camouflaged according to the emergency plan, and called the alert team for support and cover, and finally got rid of the “enemy” successfully.

“The road ahead is destroyed!” One wave has not settled, and another wave has risen. The leader of the rescue team remained calm in the face of danger, ordered the car to stop and hide on the spot, and opened the map to re-plan the route...

In the field rescue station, the classified evacuation team quickly classified the “wounded”, and the seriously injured treatment team monitored the vital signs in real time and prepared for emergencies.

“The location of the rescue station has been exposed, move quickly!” At sunset, the alarm sounded again. The officers and men immediately withdrew their equipment and quickly moved to the reserve position...

第 81 集团军某旅运用红色资源深化教育实践活动

来源：中国军网-解放军报 作者：王平 卢运国 责任编辑：王一亘

2025-07-22

第 81 集团军某旅运用红色资源深化教育实践活动——

赓续传统强信念 向战淬火砺精兵

■王 平 卢运国

“这抔土来自松骨峰阵地，浸染着英烈的热血……”夏日，第 81 集团军某旅“强军故事会”火热展开. “松骨峰特功连”薛指导员动情讲述“英雄高地”土壤背后的故事，引发官兵共鸣. 这是该旅运用红色资源，深化教育实践活动的一个缩影.

“我们注重用好红色资源‘传家宝’，让革命精神和优良传统焕发新的生机. ”该旅领导介绍，在聚焦“铸牢政治忠诚、打好攻坚之战”深化教育实践活动中，他们结合部队任务、紧贴官兵思想实际，开展“学传统强信念、学战例强本领、学精神强作风”活动，让“钢多气多骨更硬”的信念深植官兵心中.

“松骨峰阻击战中，面对敌人的钢铁洪流和汽油弹，连队先辈无一人退缩，战斗至仅剩 7 人，仍死守阵地……”现场聆听那段荡气回肠的历史，新兵王浩然说：“先辈用‘钢少气多’赢得胜利，现在武器装备更先进了，我们更要以‘钢多气多’的底气和能力传承红色基因！”

“战斗中，敌机掷下的汽油弹，把先辈们身上烧着了火. 他们把枪一摔，身上、帽子上冒着火苗向敌人扑去……”一次对抗训练前，某连邓连长讲述松骨峰阻击战中先辈舍生忘死的血性胆气，官兵备受激励、士气高涨，顺利完成任务.

“习主席深刻指出，要把红色基因融入官兵血脉，让红色基因代代相传. ”该旅领导介绍，传承红色基因不是空洞的口号，而是使命所在、职责所系. 他们探索提高传统教育含战量，通过开展松骨峰阻击战情景教育等方式，使教育“动”起来、“活”起来，成为战斗力提升的推进器.

深化教育实践活动中，该旅还常态开展“松骨峰荣誉旗比武”“五好先进”评选等活动，引导激励官兵在学历史、悟精神、强作风中学习先进、争当先进.

“报告先辈，我们又有了新突破！”该旅某连二级上士、训练标兵吴新宇面对“英烈墙”庄严报告. 前不久，他和团队克服无经验、无教材、无先例等困难，赴科研院所和厂家深入调研，成功对无人机装备进行战场适应性改进，在战法运用上取得新突破.

赓续传统强信念，向战淬火砺精兵. 前不久，该旅参加整建制跨区机动训练，官兵奋力攻关、捷报频传，部队战斗力建设再上新台阶.

A Brigade of the 81st Group Army Uses Red Resources to Deepen Educational Practice Activities

Source: China Military Network-Liberation Army Daily Author: Wang Ping Lu Yunguo Editor: Wang Yigen

2025-07-22

A brigade of the 81st Group Army uses red resources to deepen educational practice activities——

Continue the tradition and strengthen the belief to temper the elite soldiers for war

■Wang Ping Lu Yunguo

“This soil comes from the Songgufeng position, soaked in the blood of heroes...” In the summer, the “Strong Army Story Meeting” of a brigade of the 81st Group Army was launched. Political Instructor Xue of the “Songgufeng Special Merit Company” emotionally told the story behind the soil of the “Heroic Highland”, which resonated with officers and men. This is a microcosm of the brigade's use of red resources to deepen educational practice activities.

“We pay attention to making good use of the red resources 'heirlooms' to give new vitality to the revolutionary spirit and fine traditions.” The brigade leaders introduced that in the focus on “forging political loyalty and fighting a tough battle” to deepen the educational practice activities, they combined the troops' tasks and closely followed the soldiers' ideological reality to conduct the “learning traditions to strengthen beliefs, learning battle examples to strengthen skills, and learning spirit to strengthen style” activities, so that the belief of “more steel, more spirit and more bones” is deeply rooted in the hearts of soldiers.

“In the Songgufeng blocking battle, facing the enemy's steel torrent and gasoline bombs, none of the company's predecessors retreated. They fought until only 7 people were left, still holding their positions...” Listening to the soul-stirring history on the spot, recruit Wang Haoran said: “The predecessors won the victory with 'less steel and more spirit'. Now that the weapons and equipment are more advanced, we must inherit the red gene with the confidence and ability of 'more steel and more spirit'!” “During the battle, the gasoline bombs dropped by the enemy planes set the predecessors on fire. They threw their guns, and rushed to the enemy with flames on their bodies and hats...” Before a confrontation training, Captain Deng of a certain company recounted the bloody courage of the predecessors in the Songgufeng blocking battle. The officers and men were greatly inspired and their morale was high, and they successfully completed the task. “President Xi profoundly pointed out that the red gene should be integrated into the blood of officers and men, and the red gene should be passed down from generation to generation.” The leaders of the brigade

introduced that inheriting the red gene is not an empty slogan, but a mission and responsibility. They explored ways to improve the combat content of traditional education, and through the situational education of the Songgufeng blocking battle, made education “dynamic” and “lively”, and became a booster for combat effectiveness.

In deepening the educational practice activities, the brigade also regularly conducted activities such as the “Songgufeng Honor Flag Competition” and the “Five Good Advanced” selection, guiding and encouraging officers and men to learn from the advanced and strive to be advanced in learning history, understanding spirits, and strengthening work style.

“Report to the predecessors, we have made a new breakthrough!” Wu Xinyu, a second-class sergeant and training model of a company of the brigade, solemnly reported in front of the “Wall of Heroes”. Not long ago, he and his team overcame difficulties such as no experience, no teaching materials, and no precedents, and went to scientific research institutes and manufacturers for in-depth research, successfully improved the battlefield adaptability of drone equipment, and made new breakthroughs in the use of tactics.

Continue the tradition and strengthen the belief, and temper the elite soldiers for war. Not long ago, the brigade participated in the cross-regional mobile training of the whole system. The officers and men worked hard to tackle the key problems and reported good news frequently, and the combat effectiveness of the troops reached a new level.

最美新时代革命军人风采丨张灿灿：风雪高原“探路者”

来源：中国军网-解放军报 作者：桑英豪 马嘉隆 孙利波 责任编辑：王一亘 发布：2025-07-22

开栏的话

奋斗铸就强军伟业，奋斗彰显军人本色. 强军新征程上，全军官兵坚持以习近平新时代中国特色社会主义思想为指导，深入贯彻习近平强军思想，坚决听党指挥、强化使命担当、埋头苦干实干、狠抓工作落实，取得了一系列成就，涌现出一大批模范.

在中国人民解放军建军98周年之际，中央宣传部、中央军委政治工作部联合发布12名“最美新时代革命军人”. 这 12 名官兵在平凡岗位做出不凡业绩，用辛勤的汗水、不懈的奋斗干出别样精彩、彰显使命担当，是全军官兵学习的榜样.

奋进强军路，打好攻坚战. 即日起，解放军报开设“最美新时代革命军人风采”专栏，讲述他们的奋斗故事，激励广大官兵挺膺担当、砥砺奋进，为打好实现建军一百年奋斗目标攻坚战、加快把人民军队建成世界一流军队而努力奋斗.

陆军某合成旅营长张灿灿——

风雪高原“探路者”

■桑英豪 解放军报记者 马嘉隆 特约记者 孙利波

训练中，张灿灿（右）下达战斗口令. 崔获阳摄

仲夏，海拔近 3000 米的某高原演兵场，风云激荡.

担负穿插任务的陆军某合成旅步兵分队，突遇“敌”装甲分队. 指挥员迅速研判、沉着应对：数架无人机从山后飞出，投烟雾弹掩护、实施电磁干扰、引导迫击炮火力打击……很快，步兵分队成功打开通道.

从隐蔽伪装到情报侦察，从掩护突入到要点打击，多型无人装备与步兵分队密切配合，让一次普通的战术训练，带着浓浓的战场气息.

筹划组织这场训练的，是该旅某营营长张灿灿. 从传统的摩托化步兵到指挥有人无人协同的战术训练，23 年军旅生涯、数次转换战位的他，以“日拱一卒”的韧劲闯出一条进击之路.

当兵，是张灿灿从小的梦想；当一名好兵，则是他参军后的目标. 刚入伍到红军连队，身体素质并不出众的他，盯着龙虎榜上的纪录暗暗较劲：天不亮，他就穿上 10 公斤重的沙背心，冲上结着冰碴的独木桥；爬战术梯时手套被磨破，手上的血痂和木刺粘在一起，他咬牙继续攀爬……

冲锋的征途，艰难又漫长. 凭借执着的“硬”劲，张灿灿陆续登上营连各个“龙虎榜”，在同批新兵中脱颖而出. “当身体逼近极限，坚持下去就会闯出一片新天地. ”张灿灿清楚地记得，那次难忘的重要转折，正是源自咬牙坚持后的“破茧”.

那年，张灿灿参加上级组织的高寒山地障碍比武. 当天，突降大雪，过 2 米深坑时，他不慎踩到结冰的坑沿，整个人失去重心栽入坑内，膝盖撞到坑底，剧痛让他眼前一黑.

在战友的加油声中，张灿灿拖着伤腿，起身继续冲刺. 愈发强烈的疼痛，让他每一步都像踩在刀尖上. 拼尽全力冲过终点，他成功打破比武纪录. 那年底，张灿灿荣立二等功，次年被保送入学、提干.

军旅生涯翻开新篇，新的挑战接踵而至. 一路走来，从战士到排长、连长，再到营长，张灿灿变的是身份，不变的是“红军传人”的底色. 这些年，他把一心向党、一意谋战、一腔热血、一往无前的红色精神融入血脉，在重重难关前坚守初心、坚持拼搏、坚定前行.

——从战斗员到指挥员，张灿灿始终坚信“带兵人的威信是靠本事挣来的”，坚持“自身过硬才是立身之本”. 他带头学装备、研战法，全营武器装备样样精通，新课目开训总是第一个站出来示范；无论哪次考核，个人综合成绩稳居全旅军官前列；

——从步兵连到炮兵连，走上连长岗位的张灿灿，自觉当起“新兵”. 他虚心向专家骨干请教，夜以继日背射表、练操作，快速实现专业转换和能力重构. 1 个月后的实弹射击，他带头打出首发命中、全部命中的好成绩；

——从摩步团到合成旅，改革重塑后，部队编制结构、装备配置、作战能力、协同方式、训练要求都与以往不同. 张灿灿主动带领官兵研究新战法，把步兵、火力、通信等专业教材翻得卷了边，终于在实兵演习中实现多兵种高效顺畅指挥.

23 年如一日扎根西部高原，给生于中原大地的张灿灿身上烙下鲜明的高原印痕. 肤色黝黑，源自风沙烈日的洗礼；身形精瘦，是因从未停止冲锋的步履.

任营长后，张灿灿对指挥能力的学习研究更加深入. 如何释放合成效能、打造独立遂行任务的战斗模块等，成为他日思夜想的课题.

有了想法就去研究，研究成熟就付诸实践. 某新型火炮列装后，张灿灿带领官兵奔赴雪线检验效能. 大家顶风冒雪奋战两个月，论证形成高寒环境下火炮射表，积累采集了不同海拔高度的装备性能参数.

“我们的未来战场在什么地方？又会是在什么状况下？这都无从得知，只有预设最难的情景，才能从容应对各种复杂挑战. ”一次高原驻训，高大的山体激发了张灿灿构设地下工事的灵感. 他立即组织研究攻关. 数月后，官兵着眼战场需要，构设出一个功能齐备、结构合理的综合掩蔽工事，成为众多兄弟单位指挥员观摩学习的标杆.

纵使风雪满身，心中奋斗之火始终熊熊燃烧. 这些年，从大漠戈壁到冰峰雪谷，再到千仞峭壁，张灿灿带领官兵苦训实练，总结探索出合成分队高原高寒条件下多条练兵经验.

身在西部高原，紧盯科技前沿. 张灿灿在惊叹无人智能技术深刻改变作战样式的同时，也思考着全营战训转型新路子. 听说某项训练有先行试点任务，他主动请战，带领官兵成立战法创新工作室和无人装备攻关组. 他们自研设备器材、编写训练教材、展开模拟训练，攻克 10 余项战训难题，探索形成的“智能+”无人训练模式在部队推广，一大批优秀骨干得到培养锤炼.

深夜，张灿灿的房间仍灯火通明. 他带领营部参谋和几名连主官，正一起研究讨论新的战术战法.

张灿灿告诉记者，打好实现建军一百年奋斗目标攻坚战到了关键时刻，自己向战打赢的冲锋步伐必须更快一些.

记者手记

坚持就是胜利

采访时，记者问了张灿灿一个问题：“一路走来，最重要的是什么？”他的回答简洁明了：“坚持就是胜利！”

从传统的摩托化步兵，到涵盖多要素、具备独立作战能力的合成部队营主官，再到探索有人无人协同作战的先行者之一，张灿灿在风雪高原留下的奋进足迹，步步铿锵. 他的成功启示我们，只要沉下心、不服输，坚持下去，再多困难也能克服.

坚持奋斗，必然付出艰辛的努力. 无论是在比武场上突破极限、创造纪录，还是在研战室内潜心钻研、谋求突破，都离不开恒心和毅力. 奋进新时代强军征途，每名官兵都要以“强军路上，建功有我；奋斗攻坚，责无旁贷”的坚定信念和必胜决心，主动挑“硬担子”，磨砺“铁肩膀”，为打好实现建军一百年奋斗目标攻坚战贡献力量.

The Most Beautiful Revolutionary Soldier Style in the New Era | Zhang Cancan: “Pathfinder” on the Snowy Plateau

Source: China Military Network-Liberation Army Daily Author: Sang Yinghao Ma Jialong Sun Libo Editor: Wang Yigen Release: 2025-07-22

Opening words

Struggle creates the great cause of strengthening the army, and struggle demonstrates the true colors of soldiers. On the new journey of strengthening the army, officers and men of the whole army adhere to the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, thoroughly implement Xi Jinping’s Thought on Strengthening the Army, resolutely obey the Party’s command, strengthen mission responsibility, work hard, and implement work, and have achieved a series of achievements and a large number of models have emerged.

On the 98th anniversary of the founding of the Chinese People’s Liberation Army, the Central Propaganda Department and the Political Work Department of the Central Military Commission jointly released 12 “Most Beautiful Revolutionary Soldiers of the New Era”. These 12 officers and men have made extraordinary achievements in ordinary positions, and have made outstanding achievements and demonstrated their mission responsibility with hard work and unremitting struggle. They are role models for officers and men of the whole army to learn from.

Strive to strengthen the army and fight a good battle. Starting today, the PLA Daily will open a column titled “The Most Beautiful Style of Revolutionary Soldiers in the New Era” to tell their stories of struggle, inspire officers and men to shoulder their responsibilities, forge ahead, and work hard to fight the tough battle to achieve the goal of the 100th anniversary of the founding of the army and accelerate the construction of the people’s army into a world-class army.

Zhang Cancan, battalion commander of a combined arms brigade of the army--”Pathfinder” on the snowy plateau

■ Sang Yinghao, PLA Daily reporter Ma Jialong, special correspondent Sun Libo

During training, Zhang Cancan (right) issued a battle order. Photo by Cui Huoyang

In midsummer, a highland military training ground with an altitude of nearly 3,000 meters was full of wind and clouds.

An infantry unit of a combined arms brigade of the army, which was responsible for the task of penetration, suddenly encountered an “enemy” armored unit. The commander quickly judged and responded calmly: several drones flew out from behind the mountain, dropping smoke bombs for cover, implementing electromagnetic interference, and guiding mortar firepower... Soon, the infantry unit successfully opened the passage.

From concealment and camouflage to intelligence reconnaissance, from covering breakthroughs to key strikes, multiple types of unmanned equipment and infantry units work closely together, giving an ordinary tactical training a strong battlefield atmosphere.

The person who planned and organized this training was Zhang Cancan, the battalion commander of a battalion in the brigade. From traditional motorized infantry to commanding manned and unmanned coordinated tactical training, he has a 23-year military career and has changed his position several times. He has forged a path of attack with the tenacity of “advancing one step at a time”.

Being a soldier has been Zhang Cancan’s dream since childhood; being a good soldier has been his goal after joining the army. When he first joined the Red Army company, he was not physically outstanding, and he stared at the records on the Dragon and Tiger List and competed secretly: before dawn, he put on a 10-kilogram sand vest and rushed onto the icy single-plank bridge; when climbing the tactical ladder, his gloves were worn out, and the blood scabs and wood thorns on his hands stuck together, but he gritted his teeth and continued to climb...

The journey of charging is difficult and long. With his perseverance, Zhang Cancan successively made it to the “Dragon and Tiger List” of the battalion and company, and stood out among the new recruits of the same batch. “When the body is close to the limit, if you persist, you will break into a new world.” Zhang Cancan clearly remembers that unforgettable and important turning point, which came from the “breaking out of the cocoon” after gritting his teeth and persisting.

That year, Zhang Cancan participated in the high-altitude mountain obstacle competition organized by the superiors. On that day, heavy snow suddenly fell. When crossing a 2-meter-deep pit, he accidentally stepped on the icy edge of the pit, lost his balance and fell into the pit. His knee hit the bottom of the pit, and the severe pain made his eyes black.

With the cheers of his comrades, Zhang Cancan dragged his injured leg, got up and continued to sprint. The increasingly intense pain made him feel like he was stepping on the tip of a knife with every step. He tried his best to rush to the finish line and successfully broke the record of the competition. At the end of that year, Zhang Cancan was awarded the second-class merit, and was recommended to enter school and promoted to officer the following year.

A new chapter in his military career has been opened, and new challenges have followed. Along the way, from a soldier to a platoon leader, company commander, and then to a battalion commander, Zhang Cancan's identity has changed, but his basic character as a "Red Army descendant" has not changed. Over the years, he has integrated the red spirit of being devoted to the Party, determined to fight, passionate, and indomitable into his blood, and has adhered to his original aspirations, persisted in hard work, and moved forward firmly in the face of numerous difficulties.

--From a combatant to a commander, Zhang Cancan has always believed that "the prestige of a leader is earned by ability" and insisted that "one's own strength is the foundation of one's life." He took the lead in learning equipment and studying tactics, and was proficient in all weapons and equipment of the entire battalion. He was always the first to stand up and demonstrate when new subjects were opened for training; no matter which assessment, his personal comprehensive score was firmly in the forefront of the officers of the brigade;

--From an infantry company to an artillery company, Zhang Cancan, who took the position of company commander, consciously became a "new soldier." He humbly asked experts and backbones for advice, memorized shooting tables and practiced operations day and night, and quickly realized professional transformation and capacity reconstruction. One month later, in the live-fire shooting, he took the lead in hitting the first shot and hitting all the targets;

——From the motorized infantry regiment to the combined brigade, after the reform and reshaping, the unit's organizational structure, equipment configuration, combat capability, coordination method, and training requirements are different from the past. Zhang Cancan took the initiative to lead officers and men to study new tactics, flipped through the professional textbooks of infantry, firepower, and communications, and finally achieved efficient and smooth command of multiple arms in live-fire exercises.

Rooted in the western plateau for 23 years, Zhang Cancan, who was born in the Central Plains, has left a distinct plateau mark on his body. His dark complexion comes from the baptism of wind, sand and scorching sun; his lean figure is because he never stops charging.

After becoming the battalion commander, Zhang Cancan's study and research on command ability has become more in-depth. How to release the effectiveness of synthesis and create combat modules that can independently conduct tasks have become topics that he thinks about day and night.

If you have an idea, go to study it, and put it into practice when the research is mature. After a new type of artillery was put into service, Zhang Cancan led officers and men to the snow line to test its effectiveness. Everyone fought against the wind and snow for two months, demonstrated and formed an artillery firing table in a high-cold environment, and accumulated and collected equipment performance parameters at different altitudes.

"Where will our future battlefield be? And what will it be like? There is no way to know. Only by presetting the most difficult scenario can we calmly deal with various complex challenges." During a plateau training, the tall mountains inspired Zhang Cancan to build underground fortifications. He immediately organized research and tackled the problem. A few months later, the officers and men focused on the needs of the battlefield and built a comprehensive shelter fortification with complete functions and reasonable structure, which became a benchmark for commanders of many brother units to observe and learn.

Even if the wind and snow covered his body, the fire of struggle in his heart was always burning. In recent years, from the Gobi Desert to the ice peaks and snow valleys, and then to the thousand-foot cliffs, Zhang Cancan led officers and men to train hard and practice, summarizing and exploring multiple training experiences of the combine arms unit under high-cold conditions on the plateau.

Being in the western plateau, keep a close eye on the forefront of science and technology. While Zhang Cancan marveled at the profound changes in combat styles caused by unmanned intelligent technology, he was also thinking about new ways to transform the combat training of the entire battalion. Hearing that a certain training had a pilot task, he took the initiative to ask for the battle and led the officers and men to set up a combat innovation studio and an unmanned equipment research group. They developed their own equipment, compiled training materials, conducted simulation training, and overcame more than 10 combat training problems. The "intelligent +" unmanned training model formed by exploration was promoted in the army, and a large number of outstanding backbones were trained and tempered.

Late at night, Zhang Cancan's room was still brightly lit. He led the battalion staff and several company commanders to study and discuss new tactics and methods.

Zhang Cancan told reporters that the battle to achieve the goal of the 100th anniversary of the founding of the army has reached a critical moment, and his charge to win the battle must be faster.

Reporter's Notes

Persistence is victory

During the interview, the reporter asked Zhang Cancan a question: “What is the most important thing along the way?” His answer was concise and clear: “Persistence is victory!”

From traditional motorized infantry, to the commander of a combined arms force battalion with multiple elements and independent combat capabilities, to one of the pioneers in exploring manned and unmanned coordinated operations, Zhang Cancan’s footprints of progress left on the snowy plateau are sonorous step by step. His success tells us that as long as we calm down, refuse to admit defeat, and persist, we can overcome any difficulties.

Persistence in struggle must pay hard efforts. Whether it is breaking through limits and setting records in the competition field, or concentrating on research and seeking breakthroughs in the research and warfare room, it is inseparable from perseverance and perseverance. On the journey of strengthening the army in the new era, every officer and soldier must take the initiative to take on “hard burdens” and sharpen “iron shoulders” with the firm belief and determination to win that “on the road to strengthening the army, I will make contributions; struggle and overcome difficulties, I have no choice but to do my duty” to contribute to the battle to achieve the goal of the 100th anniversary of the founding of the army.

陆军某旅某连 “成果分享会”让革新成果赋能战斗力

来源：解放军报 作者：张康 韦仕麒 责任编辑：孙悦 2025-07-23

陆军某旅某连常态举办“成果分享会”——

集聚官兵智慧 涌流创新活水

■张 康 韦仕麒

随着“成果分享会”的持续举办，陆军某旅某连干部张超圣，对“官兵的智慧是无穷的”这句话有了更深刻的体会.

该连组织的这项活动始于去年，时间灵活机动、形式不拘一格，官兵们分享的成果五花八门：有自行改进的装备零件，有自编的操作要领顺口溜，有探索创新的训练方法，还有总结归纳的维修经验……张超圣说，这些成果一头连着官兵智慧、一头直通连队战斗力，正在成为他们提升自主抓建能力的新动能.

“为什么会想到举办这样的活动？”面对笔者的好奇，张超圣回答说，这得先从一次穿越机训练说起.

训练中，几架穿越机在通过一个门型障碍前，齐刷刷“栽了跟头”. “怎么又串频了？这毛病啥时候能改啊？”该连下士林二樵摘下图传眼镜，声音里满是焦躁.

这已经是那一周第三次，因图传眼镜出现串频问题，导致穿越机训练被迫“搁浅”. 眼看新增训练课目遭遇瓶颈，连队党支部一班人同样很着急.

当晚复盘会上，大家就“向上级求援”还是“依靠自己解决”拿不定主意，讨论陷入僵局. 正当众人一筹莫展时，四班班长陈燎源默默起身，从上衣口袋掏出一个小东西：“我自购了一个定向天线，能让几副图传眼镜同时工作不串频. ”

在场的骨干半信半疑，现场安装进行测试，发现显示屏上的“雪花”果然消失了，画面变得清晰稳定.

困扰多时的棘手问题解决了，按理说应该皆大欢喜，没想到，一名副班长突然向陈燎源“发难”：“陈班长，你有这宝贝，怎么不早点拿出来？”陈燎源脸一下子红了，回复的语气却很生硬：“这是我琢磨出来的，原本准备自己留着用. ”

这一幕，引发张超圣思考：战士有了改进训练质效的革新成果，为什么不愿分享呢？

和一些官兵交流过后，张超圣分析认为，虽个别官兵存在私心，但主要原因是连队没有提供展示交流的机会.

连队党支部研究决定，搭建一个汇聚智慧的交流平台，“成果分享会”应运而生.

陈燎源成为“成果分享会”的第一位推介人. 他从安装调试、注意事项等方面，详细介绍了图传眼镜加装定向天线的方法.

讲台上，陈燎源侃侃而谈；讲台下，官兵们专注听讲，不时在笔记本上记录着关键信息.

除了陈燎源，其他官兵也带着自己的革新成果登台亮相. 优化战备库室秩序的“收纳管理法”，自制的便携工具箱，提高夜间射击效率的辅助技巧……张超圣没有想到，首次“成果分享会”开始仅 2 个小时，大家就贡献了近 30 个“金点子”和实物.

该连没有让“成果分享会”止于“分享”，他们设计了完整的成果转化链路：痛点征集—方案比拼—实践检验—推广使用.

所以，每次“成果分享会”后，该连都会从中筛选出管用可行的创意方案进行孵化验证，达到预期效果后，再在全连范围推广.

成果共享、人人受益. 连队官兵团结互助、集智攻关的氛围更加浓厚. 一班班长自制的图上量算工具尺，助力新兵提高了训练成绩；三排排长结合执勤经验制作的“特情处置手卡”，让年轻战士少走了弯路；七班副班长编写的刺杀训练“呼吸步法顺口溜”，提升了整体训练质效……

“官兵们的智慧成果，给连队战斗力建设不断注入创新活水. ”该连主官说，“成果分享会”不仅解决了具体问题，还塑造着连队文化. 官兵们依靠创新革新攻坚克难的意识和能力日渐增强.

The “Results Sharing Meeting” of a Certain PLAA Brigade’s Company Enables the Combat Effectiveness of Innovation

Source: PLA Daily Author: Zhang Kang Wei Shiqi Editor: Sun Yue 2025-07-23

A certain company of a certain brigade of the army regularly holds a “results sharing meeting”——

Gathering the wisdom of officers and men and flowing innovative living water

■ Zhang Kang Wei Shiqi

With the continuous holding of the “results sharing meeting”, Zhang Chaosheng, a cadre of a certain company of a certain brigade of the army, has a deeper understanding of the saying “the wisdom of officers and men is infinite”.

This activity organized by the company began last year. The time is flexible and the form is not limited to one style. The results shared by officers and men are varied: there are self-improved equipment parts, self-compiled operation essentials, jingles, exploration and innovation training methods, and summarized maintenance experience... Zhang Chaosheng said that these results are connected to the wisdom of officers and men on one end and directly to the combat effectiveness of the company on the other end, and are becoming a new driving force for them to improve their ability to build independently.

“Why did you think of holding such an event?” In response to the author’s curiosity, Zhang Chaosheng replied that it all started with a drone training.

During the training, several drones “fell” in unison before passing through a gate-shaped obstacle. “Why is there frequency jamming again? When can this problem be fixed?” The company’s sergeant Lin Erqiao took off his image transmission glasses, his voice full of anxiety.

This was the third time that week that the drone training was forced to “run aground” due to frequency jamming problems with the image transmission glasses. Seeing that the new training courses encountered a bottleneck, a group of people in the company’s party branch were also very anxious.

At the review meeting that night, everyone was undecided about whether to “ask for help from superiors” or “rely on themselves to solve it”, and the discussion was deadlocked. Just when everyone was at a loss, the squad leader of the fourth squad, Chen Liaoyuan, stood up silently and took out a small thing from his jacket pocket: “I bought a directional antenna myself, which can

allow several pairs of image transmission glasses to work at the same time without frequency interference."

The backbones present were skeptical and installed it on site for testing. They found that the "snowflakes" on the display screen disappeared and the picture became clear and stable.

The thorny problem that had troubled them for a long time was solved. It should be a happy ending for everyone. Unexpectedly, a deputy squad leader suddenly "challenged" Chen Liaoyuan: "Squad leader Chen, you have this treasure, why didn't you take it out earlier?" Chen Liaoyuan's face turned red, but his tone of reply was very stiff: "This is what I figured out, and I was going to keep it for myself."

This scene caused Zhang Chaosheng to think: Why are soldiers unwilling to share the innovative results of improving training quality and efficiency?

After communicating with some officers and men, Zhang Chaosheng analyzed that although some officers and men had selfish intentions, the main reason was that the company did not provide opportunities for display and communication.

The company party branch decided to build a communication platform that gathers wisdom, and the "results sharing meeting" came into being.

Chen Liaoyuan became the first promoter of the "results sharing meeting". He introduced in detail the method of adding directional antennas to the image transmission glasses from the aspects of installation and debugging, precautions, etc.

On the podium, Chen Liaoyuan talked freely; under the podium, the officers and men listened attentively and recorded key information in their notebooks from time to time.

In addition to Chen Liaoyuan, other officers and men also took their own innovative achievements to the stage. "Storage management method" to optimize the order of the combat readiness warehouse, homemade portable toolbox, auxiliary skills to improve night shooting efficiency... Zhang Chaosheng did not expect that only 2 hours after the first "results sharing meeting" started, everyone contributed nearly 30 "golden ideas" and physical objects.

The company did not let the "results sharing meeting" stop at "sharing". They designed a complete results transformation link: pain point collection-solution competition-practice test-promotion and use.

Therefore, after each "results sharing meeting", the company will select useful and feasible creative solutions for incubation and verification, and then promote them throughout the company after achieving the expected results.

Share the results and everyone will benefit. The atmosphere of solidarity, mutual assistance and collective wisdom of the company's officers and men is even stronger. The self-made measuring tool ruler on the map made by the squad leader of the first squad helped the recruits improve their

training results; the “special situation handling hand card” made by the platoon leader of the third platoon based on his duty experience helped young soldiers avoid detours; the “breathing and stepping jingle” for assassination training compiled by the deputy squad leader of the seventh squad improved the overall training quality and effectiveness...

“The wisdom of the officers and men has continuously injected innovative vitality into the construction of the company’s combat effectiveness.” The company commander said that the “results sharing meeting” not only solved specific problems, but also shaped the company’s culture. The officers and men’ awareness and ability to overcome difficulties through innovation and reform are increasing day by day.

学典型，立标杆！第 81 集团军某旅创新评选机制激活练兵动力

来源：解放军报 作者：郑波 卢运国 责任编辑：孙悦 2025-07-23

第八十一集团军某旅创新典型评选机制激发练兵动力——

典型引路　实干立标

■郑 波　卢运国

“火力组掩护，破障组跟紧我……”近日，第 81 集团军某旅组织一场实战化对抗训练，班长吴新宇缜密研判战场态势，带领全班穿过“敌”防守薄弱地带，引导步战车及时驶入预定位置，对“敌”展开合围.

“旅里推行‘五好’典型评选机制，让我们找准了奋斗目标、明晰了奋斗方向.”走下演训场，吴新宇自豪地说. 前不久，他刚被旅里评为“爱军精武”典型.

“一个典型就是一面旗帜. 我们探索构建常态化、规范化的典型评选机制，就是为了充分发挥身边榜样的示范引领作用.”该旅领导介绍，以往评选先进典型，存在“重年终表彰、轻日常激励”“重任务表现、轻平时积累”等现象. 为此，他们研究制订涵盖爱军精武、爱学成才、爱岗敬业、爱连如家、爱兵如己 5 个不同类别的“五好”典型评选方案，科学设定标准，优化评选流程，每月评选一批官兵身边的先进典型，激发官兵干事创业热情.

战士王艳玲刚入伍时学习专业技能感到有些吃力. 在“五好”典型评选机制激励下，她下定决心提升自身能力素质，一边补习文化知识，一边苦练专业技能. 经过刻苦学习，她不仅取得了大专文凭，还成功取得心理治疗师资质，成为旅队心理咨询室的心理骨干. 前不久，王艳玲被评为“爱学成才”典型，成为大家学习的榜样.

“在我们眼里，曹指导员就像一位贴心的大哥哥！”某连指导员曹壮始终把官兵冷暖放在心上，受到大家称赞. 他为家庭困难的官兵建立“一人一策”帮扶档案，利用休假时间前往困

难官兵家中探望. 在曹壮的带领下，连队凝聚力、战斗力不断提升. 在最近一次“五好”典型评选中，他被评为“爱岗敬业”典型.

让典型引路，用实干立标. “五好”典型评选机制的推行，让该旅官兵学有目标、追有方向，练兵备战热情持续高涨. 前不久，在上级组织的一场实战化考核中，该旅多个课目成绩名列前茅.

Learn from Models and Set Benchmarks! An 81st Group Army Brigade Innovates the Selection Mechanism to Stimulate Training Motivation

Source: PLA Daily Author: Zheng Bo Lu Yunguo Editor: Sun Yue 2025-07-23

A brigade of the 81st Group Army innovates the model selection mechanism to stimulate training motivation——

Model leads the way and sets benchmarks

■ Zheng Bo Lu Yunguo

“The firepower group covers, the obstacle removal group follows me closely...” Recently, a brigade of the 81st Group Army organized a practical confrontation training. The squad leader Wu Xinyu carefully judged the battlefield situation, led the whole class through the weak defense area of the “enemy”, and guided the infantry fighting vehicles to the predetermined position in time to encircle the “enemy”.

“The brigade has implemented the ‘five good’ model selection mechanism, which has helped us find the goal and clarify the direction of struggle.” Wu Xinyu said proudly after walking off the training ground. Not long ago, he was rated as a model of “loving the army and mastering martial arts” by the brigade.

“A model is a banner. We explore the construction of a normalized and standardized model selection mechanism in order to give full play to the exemplary and leading role of the models around us.” The brigade leaders introduced that in the past, there were phenomena such as “focusing on year-end commendation and neglecting daily incentives” and “focusing on task performance and neglecting daily accumulation” in the selection of advanced models. To this end, they studied and formulated a “five-good” model selection plan covering five different categories: loving the army and martial arts, loving learning and becoming talents, loving the job and being dedicated, loving the company as home, and loving the soldiers as themselves. They set standards scientifically, optimized the selection process, and selected a group of advanced models around officers and men every month to stimulate their enthusiasm for doing things and starting businesses.

Soldier Wang Yanling felt a little strenuous in learning professional skills when she first joined the army. Inspired by the “five-good” model selection mechanism, she made up her mind to improve

her ability and quality, while tutoring cultural knowledge and practicing professional skills. After hard study, she not only obtained a college diploma, but also successfully obtained the qualification of a psychotherapist and became a psychological backbone of the brigade's psychological counseling room. Not long ago, Wang Yanling was named a "love learning and becoming talents" model and became a role model for everyone to learn from.

"In our eyes, Political Instructor Cao is like a caring big brother!" Cao Zhuang, a Political Instructor of a certain company, always cares about the well-being of officers and men, and is praised by everyone. He established a "one-person-one-policy" assistance file for officers and men with family difficulties, and used his vacation time to visit the homes of officers and men in need. Under the leadership of Cao Zhuang, the cohesion and combat effectiveness of the company have been continuously improved. In the latest "five good" model selection, he was rated as a "love for work and dedication" model.

Let the model lead the way, and set the standard with practical work. The implementation of the "five good" model selection mechanism has enabled the officers and men of the brigade to learn with goals and pursue directions, and their enthusiasm for training and preparation for war has continued to rise. Not long ago, in a practical assessment organized by the superiors, the brigade ranked among the top in many subjects.

从"训过"到"训精"，这个连队补差强化训练筑牢制胜根基

来源：解放军报 作者：黄建建 刘小云 责任编辑：孙悦 2025-07-24

第 82 集团军某旅"红三连"开展补差强化训练——

训过的课目再"回炉"

■黄建建 解放军报特约通讯员 刘小云

射击训练时，现场临机嵌入特情，倒逼官兵采用多种方式应对；战场防护训练，设置复杂战术背景，让官兵自主选择最佳穿戴姿势……近日，塞北某地，第 82 集团军某旅"红三连"对部分基础课目进行补差强化训练.

"已经训过的基础课目，也要进行再次'回炉'. "该连干部余聪说，与以往不同，此次训练难度更高、标准更严.

前段时间，连队组织班排之间"红蓝"对抗训练，余聪带领的二排为攻方，七班为守方，于密林深处交锋. 二排运用"正面佯攻，翼侧包抄"的打法，向七班防守区域紧逼. 眼看就要将其合围时，己方电台突遭电磁干扰，只得紧急使用旗语通联，但因信号员动作不够熟练，没能及时将信息传达到位. 七班抓住战机一举实现突围，二排最终铩羽而归.

“平时大家总使用电台通联，对旗语训练这样的基础课目不够关注，面对突发情况掉了链子.”余聪复盘整个过程，进行了深刻反思.

一旁的二级上士、班长谢四江坦言，这样的情况他也遇到过. 去年他所在班参加班战术考核，考核组临机下达就地构筑掩体指令，大家低头细看，脚下碎石遍布、地形崎岖，而此前训练时多是相对平整松软的地面. 官兵最终硬着头皮开挖，但由于平时训练强度和难度不够，此次作业中伪装效果不佳、掩体牢固性不够，结果被判“不及格”.

“训过了不等于训好了，基础课目练不实，战场上要吃大亏.”复盘时，该连连长赵普告诉大家，一些基础课目简单易上手，有人认为只要考核达到最低标准就算掌握了. 实际上，有的课目虽看似简单，但掉以轻心训不扎实，就会变成“木桶上的短板”，战场环境错综复杂，想要克敌制胜，必须训实训好每一项课目.

随后，连队干部骨干趁热打铁，将复盘会开成“揭短会”，深入查摆基础训练方面存在的短板弱项. 大家你一言我一语，将问题逐一揪出：手雷投掷训练时，战士们大多采用单一姿势，导致特殊地势环境下的精准度不高；战场救护训练时，发生概率较低的部分伤情，大家习惯用口述代替实际操作……

随后的连队行政例会上，他们组织各课目教练员对照自己负责的教学课目，制订“回炉”计划，重新拟定标准要求，在战术训练课目中有针对性地加入部分基础课目，实现多种课目融会贯通.

开辟通路时，做出爆破动作后不再依照惯例直接冲击，而是认真评估爆破效果后，再依托有利地形分段跃进；观察报知训练时，设置多种类型的移动目标，全方位锤炼官兵指示引导能力……如今，该连训风更实，考风更严. 在近日一次战术考核中，连队各课目成绩提升明显.

From “Trained” to “Trained Well”, This Company’s Supplementary and Intensive Training Lays a Solid Foundation for Victory

Source: PLA Daily Author: Huang Jianjian Liu Xiaoyun Editor: Sun Yue 2025-07-24

The “Red Third Company” of a brigade of the 82nd Group Army conducted supplementary and intensive training--

The trained subjects were “retrained”

■Huang Jianjian, special correspondent of the PLA Daily Liu Xiaoyun

During shooting training, special situations were embedded on the spot, forcing officers and men to respond in various ways; battlefield protection training, set up complex tactical backgrounds, allowing officers and men to choose the best wearing posture independently... Recently, in a place

in Saibei, the “Red Third Company” of a brigade of the 82nd Group Army conducted supplementary and intensive training on some basic subjects.

“The basic subjects that have been trained must also be “retrained” again.” Yu Cong, a cadre of the company, said that unlike in the past, this training is more difficult and has stricter standards.

Some time ago, the company organized a “red and blue” confrontation training between squads and platoons. The second platoon led by Yu Cong was the attacker, and the seventh squad was the defender. They fought in the depths of the dense forest. The second platoon used the tactics of “frontal feint attack and flank attack” to press the defense area of the seventh squad. When it was about to be surrounded, the radio station was suddenly interfered with by electromagnetic interference, and had to use flag communication urgently, but because the signalman was not skilled enough, the information was not conveyed in time. The seventh squad seized the opportunity to break through in one fell swoop, and the second platoon finally returned in defeat.

“Usually, everyone always uses the radio to communicate, and does not pay enough attention to basic subjects such as flag training. When faced with emergencies, they lose the chain.” Yu Cong reviewed the whole process and reflected deeply.

Xie Sijiang, a second-class sergeant and squad leader, admitted that he had encountered such a situation. Last year, his class participated in the class tactical assessment. The assessment team issued an order to build a bunker on the spot. Everyone looked down and saw that there were gravels everywhere and the terrain was rugged, while the ground during previous training was relatively flat and soft. The officers and men finally dug it up, but due to the lack of intensity and difficulty in normal training, the camouflage effect was not good and the bunker was not strong enough in this operation, and they were judged as “failed”.

“Training does not mean training well. If the basic subjects are not practiced well, they will suffer a great loss on the battlefield.” During the review, the company commander Zhao Pu told everyone that some basic subjects are simple and easy to use. Some people think that as long as the assessment reaches the minimum standard, they will be considered to have mastered it. In fact, although some subjects seem simple, if they are not trained well, they will become “the short board on the barrel” if they are not trained well. The battlefield environment is complicated. If you want to defeat the enemy, you must practice every subject well.

Subsequently, the company cadres and backbones struck while the iron was hot and turned the review meeting into a “shortcomings meeting” to thoroughly investigate the shortcomings and weaknesses in basic training. Everyone spoke up and found out the problems one by one: during the grenade throwing training, most soldiers adopted a single posture, resulting in low accuracy in special terrain environments; during battlefield rescue training, for some injuries with a low probability of occurrence, everyone was used to using oral instructions instead of actual operations...

In the subsequent company administrative regular meeting, they organized the instructors of each subject to compare the teaching subjects they were responsible for, formulate a “retraining” plan, re-draft the standard requirements, and add some basic subjects to the tactical training subjects in a targeted manner to achieve the integration of multiple subjects.

When opening up a path, after making a blasting action, they no longer follow the convention of direct impact, but after carefully evaluating the blasting effect, they rely on favorable terrain to leap forward in stages; during observation and reporting training, various types of moving targets are set to fully hone the officers and men’ ability to instruct and guide...Now, the company’s training style is more practical and the examination style is more rigorous. In a recent tactical assessment, the company’s scores in various subjects have improved significantly.

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：刘杰 肖静玲 责任编辑：王一亘 2025-07-25

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

主动问需 倾心解难

■刘 杰 肖静玲

“部分体能训练器材需要维修”“跑步路线设计不够合理”“休假离队交通不便”……前不久，陆军某旅机关现场办公会上，官兵围绕日常训练和生活中遇到的难题畅所欲言，旅机关干部边听边记，现场拿出对策并明确整改时限. 这是该旅开展深入贯彻中央八项规定精神学习教育，着力改进工作作风，提升服务基层质效的一个缩影.

“服务基层就是服务战斗力建设，党委和机关干部只有深入基层摸实情、解难题，才能让官兵心无旁骛投入战备训练. ”该旅领导介绍，深入贯彻中央八项规定精神学习教育开展以来，他们对标对表中央八项规定精神、军委十项规定及其实施细则精神，牢固树立“基层至上、士兵第一”理念，把为基层解难纾困作为改进工作作风的出发点和落脚点，以高效优质的服务，提振官兵干事创业精神状态.

实践中，该旅着力构建常态化调研帮建机制，创新推行“服务直达”模式，要求各级领导和机关干部变“坐等上门”为“主动问需”，带头深入基层现场办公，通过面对面交流，精准掌握官兵急难愁盼，逐项拉单列表，指定专人负责，确保事事有回音、件件有着落.

据了解，该旅“服务直达”模式推行以来，已累计解决训练保障、营区整修、家属就业等方面问题百余个. 随着官兵反映的问题逐个“销号”，大家对旅党委机关服务基层的满意度进一步提升.

前段时间，该旅某营新配发装备在融入协同作战体系时遇到难题. 该营在旅机关现场办公会上，将问题直报机关. 旅机关相关部门迅速响应，成立攻关小组深入调研，很快拿出切实可行的解决方案. 后续训练中，新装备协同质效明显提升. “机关靠前服务，办事效率倍增. ”战士刘焕林感慨地说.

主动问需，倾心解难. 随着深入贯彻中央八项规定精神学习教育不断走深走实，该旅各级工作作风更加扎实，部队凝聚力、向心力不断提升. 旅领导介绍，下一步，他们将持续深化作风建设，探索服务基层的新方法、新途径，让官兵切实感受到更多转改作风带来的新变化.

A Certain Army Brigade Has Conducted a Thorough Study and Education on the Spirit of the Eight Central Regulations

Source: PLA Daily Author: Liu Jie Xiao Jingling Editor: Wang Yigeng 2025-07-25

A certain army brigade has conducted a thorough study and education on the spirit of the eight central regulations——

Take the initiative to ask for needs and solve problems with all your heart

■Liu Jie Xiao Jingling

“Some physical training equipment needs to be repaired”, “The running route design is not reasonable enough”, “Leaving the team for vacation is inconvenient”... Not long ago, at the on-site office meeting of a certain army brigade, officers and men spoke freely about the problems encountered in daily training and life. The brigade cadres listened and took notes, and came up with countermeasures on the spot and clarified the rectification time limit. This is a microcosm of the brigade’s in-depth study and education on the spirit of the eight central regulations, focusing on improving work style and improving the quality and efficiency of serving the grassroots.

“Serving the grassroots is serving the construction of combat effectiveness. Only when the Party Committee and the cadres of the organs go deep into the grassroots to find out the real situation and solve problems can the officers and men devote themselves to combat readiness training without distraction.” The leaders of the brigade introduced that since the implementation of the study and education of the spirit of the Central Eight Regulations, they have benchmarked the spirit of the Central Eight Regulations, the Ten Regulations of the Military Commission and their implementation rules, firmly established the concept of “grassroots first, soldiers first”, and took solving problems and relieving difficulties for the grassroots as the starting point and foothold for improving work style, and boosted the entrepreneurial spirit of officers and men with efficient and high-quality services.

In practice, the brigade has focused on building a regular investigation and assistance mechanism, and innovatively implemented the “direct service” model, requiring leaders and cadres at all levels to change from “waiting for door-to-door” to “actively asking for needs”, taking the lead in going deep into the grassroots to work on site, and through face-to-face communication, accurately grasp the urgent needs of officers and men, list items one by one, and designate specific people to be responsible, to ensure that everything has a response and everything has a solution.

It is understood that since the implementation of the “direct service” model of the brigade, more than 100 problems in training support, camp renovation, and family employment have been solved. As the problems raised by officers and men are “closed” one by one, everyone’s satisfaction with the brigade party committee’s service to the grassroots is further improved.

Some time ago, a battalion of the brigade encountered difficulties in integrating newly issued equipment into the coordinated combat system. The battalion reported the problem directly to the brigade at the on-site office meeting of the brigade. The relevant departments of the brigade responded quickly, set up a research team to conduct in-depth research, and quickly came up with a practical solution. In the subsequent training, the quality and efficiency of the new equipment were significantly improved. “The agency is in the front service, and the efficiency of work has doubled.” Soldier Liu Huanlin said with emotion.

Take the initiative to ask for needs and solve problems with all your heart. With the in-depth implementation of the spirit of the Central Eight Regulations, the work style of the brigade at all levels has become more solid, and the cohesion and centripetal force of the troops have been continuously improved. The brigade leaders introduced that in the next step, they will continue to deepen the style of work construction, explore new methods and new ways to serve the grassroots, and let the officers and men really feel more new changes brought about by the transformation of work style.

第 81 集团军某旅"法律服务站"为官兵解决涉法问题 20 余起

来源：解放军报 作者：张桂海 任和 责任编辑：王一亘 2025-07-26

第 81 集团军某旅

“法律服务站”倾心解兵忧

解放军报讯 张桂海、任和报道：“感谢组织的关心帮助，帮我解除了后顾之忧. ”前不久，得知战士小李家里遇到涉法纠纷，第 81 集团军某旅“法律服务站”及时提供法律援助，帮助他的家里通过法律途径解决了纠纷，让小李心里倍感温暖.

“维护军人军属合法权益，做好官兵维权服务工作，是落实‘基层有所盼、机关抓紧办’的具体举措. ”该旅领导介绍，近年来，他们遴选法律骨干成立“法律服务站”，开通法律服务

热线，方便官兵随时咨询法律问题. “法律服务站”梳理官兵及家属遇到的涉法问题，建立问题台账，针对涉法需求向驻地司法局发出“普法订单”，邀请法律专家“送法上门”，开展法治宣讲，帮助官兵理解掌握法律知识，强化法治意识，提升依法维权能力.

去年，该旅几名战士在地方机构报名参加成人学历提升项目，交完报名费后，报考机构却联系不上. 该旅“法律服务站”得知情况后，立即安排法律骨干提供专业指导，协助几名战士向当地法院起诉. 他们还协调地方相关部门与涉事机构沟通，最终该机构同意分期归还费用.

“既要依法维权，更要培塑官兵法治意识和法治素养，不断提升尊法学法守法用法意识. ”该旅领导介绍，他们注重抓好正面普法宣传和反面案例警示，深入开展法治教育；常态举办“法治讲堂”，邀请法律专家来队开展讲座，围绕“军人军属权益保护实务”等主题宣讲法律知识；利用“宪法宣传周”“民法典宣传月”等时机，灵活开展形式多样的法治教育.

近年来，该旅“法律服务站”先后为官兵及家属提供法律援助 70 余次，跟进解决各类涉法问题 20 余起，有效维护了军人军属合法权益. 随着系列举措落地落实，该旅官兵办事依法、遇事找法、解决问题用法、化解矛盾靠法的能力明显增强，官兵投身练兵备战的热情更加高涨.

The “Legal Service Station” of an 81st Group Army Brigade Has Solved More Than 20 Legal Issues for Officers and Men

Source: PLA Daily Author: Zhang Guihai Ren He Editor: Wang Yigen 2025-07-26

A brigade of the 81st Group Army

“Legal Service Station” is dedicated to solving soldiers’ worries

PLA Daily News Zhang Guihai and Ren He reported: “Thanks to the organization’s care and help, it has helped me relieve my worries.” Not long ago, it was learned that the soldier Xiao Li’s family encountered a legal dispute. The “Legal Service Station” of a brigade of the 81st Group Army provided legal aid in a timely manner and helped his family resolve the dispute through legal channels, which made Xiao Li feel warm in his heart.

“Maintaining the legitimate rights and interests of soldiers and their families and doing a good job in protecting the rights of officers `and men is a concrete measure to implement the “grassroots expectations and the organs to do it quickly.” The leaders of the brigade introduced that in recent years, they have selected legal backbones to establish a “Legal Service Station” and opened a legal service hotline to facilitate officers `and men to consult legal issues at any time. The “Legal Service Station” sorts out the legal issues encountered by officers `and men and their families, establishes a problem log, issues a “legal education order” to the local judicial bureau in response to legal needs, invites legal experts to “deliver the law to the door”, conducts legal publicity, helps officers

`and men understand and master legal knowledge, strengthen legal awareness, and improve their ability to protect their rights in accordance with the law.

Last year, several soldiers of the brigade signed up for an adult education improvement project at a local institution. After paying the registration fee, the institution could not be contacted. After learning about the situation, the “Legal Service Station” of the brigade immediately arranged for legal backbones to provide professional guidance and assisted several soldiers in suing the local court. They also coordinated the relevant local departments to communicate with the institution involved, and finally the institution agreed to return the fees in installments.

“We must not only safeguard our rights according to the law, but also cultivate the officers’ `and men’ awareness of the rule of law and legal literacy, and constantly improve their awareness of respecting, learning, abiding by and using the law.” The leaders of the brigade introduced that they pay attention to positive legal publicity and negative case warnings, and carry out in-depth legal education; regularly hold “Legal Lecture Halls”, invite legal experts to the team to give lectures, and preach legal knowledge around themes such as “Practical Protection of the Rights and Interests of Soldiers and Their Families”; use opportunities such as “Constitutional Publicity Week” and “Civil Code Publicity Month” to flexibly carry out various forms of legal education.

In recent years, the brigade’s “Legal Service Station” has provided legal aid to officers and men and their families more than 70 times, followed up and solved more than 20 legal issues, and effectively safeguarded the legitimate rights and interests of soldiers and their families. With the implementation of a series of measures, the officers and men of the brigade have significantly enhanced their ability to act in accordance with the law, find the law when encountering problems, use the law to solve problems, and rely on the law to resolve conflicts, and the officers and men are more enthusiastic about training and preparing for war.

打通救援通道！陆军第 82 集团军某旅架起生命之桥

来源：中国军网 作者：强天林 王贵婧 何航等 责任编辑：李佳琦 发布：2025-07-30

“通了，通了！”7 月 29 日 17 时 02 分，西沟村百余名被困群众相互搀扶踏上抢通的生命通道——王北沟门桥.

连日暴雨致使山洪肆虐，冲毁了位于河北省承德市滦平县西沟村对外联络通道. 陆军第 82 集团军某旅闻令而动，紧急出动百余名官兵、数十台（套）重型工程装备，星夜疾驰抵达灾区后，迅速投入抢险救灾一线，抢通被阻断的交通线.

清除淤泥、填装石料、加固地基，官兵们顶着湍急的水流在部分路基崩塌的险境中争分夺秒，连续奋战四个小时后，近三公里受损的“肠梗阻”路段宣告贯通，重型架桥车、满载物资的卡车、救护车纷纷通过，向着被困村庄挺进.

架起生命之桥后，该旅官兵转战下一个战场，目标只有一个，全力打通最后几处道路断点. 截至发稿时，官兵仍在一线持续救援.

Opening a Rescue Route! A Brigade of the 82nd Group Army Builds a Bridge of Life.

Source: China Military Network. Authors: Qiang Tianlin, Wang Guijing, He Hang, etc. Editor: Li Jiaqi. Published: 2025-07-30

“It’s open, it’s open!” At 5:02 PM on July 29th, over a hundred trapped residents of Xigou Village supported each other and stepped onto the newly opened lifeline—the Wangbeigoumen Bridge.

Days of heavy rains caused devastating flash floods, destroying the external communication channel of Xigou Village in Luanping County, Chengde City, Hebei Province. Upon receiving the order, a brigade of the 82nd Group Army dispatched over a hundred soldiers and dozens of heavy engineering equipment. After rushing to the disaster area overnight, they quickly joined the rescue and relief efforts, re-opening the blocked transportation routes. Clearing silt, filling with rocks, and reinforcing the foundation, soldiers braved turbulent currents and the danger of partial roadbed collapse, working against the clock. After four hours of continuous work, the nearly three-kilometer-long, damaged, “intestinal obstruction” section of road was finally cleared. Heavy bridge-laying vehicles, trucks loaded with supplies, and ambulances passed through, advancing toward the trapped village.

After building the bridge of life, the brigade’s soldiers moved on to the next battleground, with a single goal: to clear the final few road blocks. As of press time, soldiers were still on the front lines conducting rescue work.

顾大局要有“度”，陆军某旅六连科学统筹让主责主业归位

来源：中国军网-解放军报 作者：金 心 童祖静 责任编辑：孙悦 2025-07-31

顾大局不是“照单全收”

■陆军某旅某营干部 金 心

“这次上级组织的专业技能课目抽考，咱们营整体成绩不错，但六连优良率不足，必须要好好反思.”前段时间，在陆军某旅某营党委议战议训会上，营长的一席话，让六连尚连长瞬间红了脸.

在我的印象中，六连训练刻苦、作风扎实，尚连长又是组训能手，这次成绩出现下滑让人意外. 会后，我找到尚连长了解情况.

“其实也没啥……”谈话时，尚连长欲言又止. 随后，他略显无奈地说，连队这段任务较多，还承担了大量公差勤务，官兵的训练时间受到较大影响，所以才导致成绩不理想.

尚连长这么一说我才知道. 原来，六连官兵此前对于上级交给的任务总是坚决接受并高质量完成，无论是课目示范、场地设置，还是卫生整治、公差勤务，尚连长都会带官兵抢着干. 官兵偶有怨言，尚连长也会及时教育引导：“上级多交任务是信任，咱们连的格局一定要大.”

前段时间，旅队组织战术训练，需要在作业室内堆一个地形沙盘，尚连长立即安排一排长带十几名战士去完成. 后来，机关某部门让帮忙构设值班室，另一个部门又通知要求派人布置野战文化氛围……六连官兵忙于应付这些工作，去训练场的人数远达不到标准.

了解这些后，我告诉尚连长：“你能时刻从集体利益出发干工作，这点值得表扬，单位也需要更多像你这样顾大局的好干部，但‘顾大局’也要讲原则，公差勤务需要集体分担，我们可以及时向组织反映，在不影响正常工作训练秩序的基础上进行科学统筹. 如果来者不拒，这样不仅完成不好任务，还会占用大量工作、训练和休息时间，影响到备战打仗主责主业.”听了我的话，尚连长连连点头.

我也把相关情况及时向营党委做了汇报，营党委带领各连对进一步加强工作统筹做了调查研究，很快拿出了管用举措.

如今，尚连长仍然识大体、顾大局，对上级赋予的工作任务积极执行，但不再是“照单全收”. 遇到困难，他也会及时向营党委和机关提报需求，请求协调增援.

“现在不仅训练没有落下，各级交代的任务也完成得更高效了.”尚连长笑着说，在最近一次考核中，六连的成绩又重回前列.

Considering the Overall Situation Requires a Sense of Proportion. The Sixth Company of an Army Brigade Has Scientifically Coordinated Its Work to Ensure Its Primary Responsibilities Are Fully Realized.

Source: China Military Network - PLA Daily Author: Jin Xin, Tong Zujing Editor: Sun Yue 2025-07-31

Considering the overall situation does not mean "accepting everything" at face value.

■ Jin Xin, a cadre from a battalion in an Army brigade

"In this random test on professional skills organized by higher authorities, our battalion performed well overall, but the Sixth Company's excellent rate was insufficient. We must reflect on this." Some time ago, at a Party Committee meeting on combat and training for a battalion in an Army brigade, the battalion commander's remarks made Captain Shang of the Sixth Company blush.

In my impression, the Sixth Company trains diligently and has a solid work style, and Captain Shang is a skilled trainer. This decline in performance is surprising. After the meeting, I approached Captain Shang to understand the situation.

"It's nothing serious..." Captain Shang paused as we spoke. Then, with a hint of resignation, he explained that the company had been overwhelmed with tasks and extensive errands, significantly impacting the soldiers' training time, leading to unsatisfactory results.

Only after Captain Shang's words did I understand. It turned out that the soldiers of the Sixth Company had always resolutely accepted and completed the tasks assigned by their superiors with high quality. Whether it was demonstrating a lesson, setting up the field, maintaining sanitation, or performing errands, Captain Shang would lead the soldiers in rushing to do it. Even when soldiers occasionally complained, Captain Shang would promptly offer guidance: "More tasks from superiors are a sign of trust. Our company must have a broad vision."

Some time ago, the brigade organized tactical training that required building a terrain sand table in the operation room. Captain Shang immediately assigned a platoon leader and a dozen soldiers to complete the task. Later, a department in the headquarters requested assistance in setting up a duty room, while another department requested personnel to establish a field combat atmosphere... The soldiers of the Sixth Company were so busy juggling these tasks that the number of people attending the training grounds fell far short of the required number. After learning about this, I told Captain Shang, "You always work with the collective interest in mind, which is commendable. The unit needs more good cadres like you who prioritize the overall situation. However, this 'focus' also requires adherence to principles. Omissions and duties need to be shared collectively. We can promptly report this to the organization and scientifically coordinate them without disrupting normal work and training. If we accept everyone, not only will we fail to complete the task, but it

will also take up a significant amount of work, training, and rest time, impacting our primary responsibility of preparing for war." Captain Shang nodded repeatedly after hearing my words.

I also promptly reported the relevant situation to the Battalion Party Committee, which led the various companies in conducting research and study on how to further strengthen work coordination and quickly came up with effective measures.

Today, Captain Shang still maintains a broad perspective and proactively executes tasks assigned by superiors, but he no longer simply accepts them. When he encounters difficulties, he promptly reports his needs to the Battalion Party Committee and headquarters, requesting coordinated reinforcements. "Not only have we kept up with our training, but we've also completed tasks assigned by all levels more efficiently," Captain Shang said with a smile. In the most recent assessment, the Sixth Company's performance returned to the top.

陆军某旅感悟王杰精神内涵，接过接力棒写好军旅新篇章

来源：解放军报 作者：王浩东 余睿喆 宋世杰 等 责任编辑：郭妍菲 2025-08-01

写在前面

今年是中国人民解放军建军 98 周年. 从石破天惊第一枪，到井冈山上红旗飘；从万里长征救亡图存，到南征北战解放全国……人民军队筚路蓝缕、艰苦奋斗，为党和人民立下不朽功勋.

岁月流转，又逢"八一". 连日来，各基层部队组织开展丰富多彩的活动，教育引导官兵回望来路、赓续传统，积蓄力量、奋勇前行. 本期，我们把目光聚焦王杰生前所在部队，看他们如何接过先辈手中的接力棒，写好属于自己的军旅篇章.

今天，我们向老班长报告

■王浩东 余睿喆 解放军报特约记者 宋世杰

陆军某旅王杰生前所在连官兵在王杰雕像前宣誓. 万智奇 摄

“老班长，我们向您报告！”

盛夏，淮海大地热浪滚滚. 在八一建军节来临之际，陆军某旅王杰生前所在连官兵执行演训任务归来，征尘未洗便整齐列队，表达对老班长王杰的深切缅怀之情.

烈日下，“一不怕苦、二不怕死”8 个大字熠熠生辉.

“王杰班”班长黄龙率先走出队列，向王杰雕像敬了一个军礼：“老班长，前不久，咱们班运用新研究的无人协同战法，精准制‘敌’，打了个漂亮仗！”

近年来，“王杰班”高标准完成各项训练任务，人人通过专业等级考核，具备“一专多能”能力. 按照新大纲要求，他们积极调整训练内容、创新组训方法，并立下誓言，决心在今年的体系演习中“拔头筹”“争头功”.

这份自信，源于实战实训的摔打磨砺. 多年前的一次演训，导调组判定驾驶员“阵亡”. 瞬间，战车趴窝，让束手无策的黄龙猛醒：“战场呼唤复合型人才！”事后，“王杰班”率先在全旅开展减员战斗训练，人人“一专多能”、个个一肩多职，实现战斗力倍增.

“连队新配发了某新型侦察无人机，大家都积极学习操作方法，跟着技术骨干加班加点攻关研练. 今年初，我通过了无人机操作手中级考核……”紧接着，副班长周志鹏满怀欣喜向老班长报告.

在周志鹏的成长道路上，王杰老班长一直“伴随”左右. 周志鹏的父亲是“王杰班”第 16 任副班长，他从小听着老班长的英雄事迹长大. 大学毕业后，周志鹏沿着父亲的足迹参军. 下连后成绩垫底，他就把自己关进荣誉室，向老班长检讨. 此后，他像王杰当年“专拣坚硬坦克道挖雷坑”一样，对标大纲苦练. 2023 年 4 月，在全旅装甲步兵班综合射击考核中，他成为唯一命中所有目标的机枪手. 入伍不到 4 年，周志鹏已熟练掌握 10 余种武器装备，是全旅公认的“全能枪手”.

“老班长好！我是‘王杰班’第 298 名战士. 在大家的关心帮助下，我不仅克服了不善言辞的问题，变得开朗健谈，还主动参加演讲比赛、担任荣誉室解说员，前段时间被连队评为‘理论学习标兵’……”彝族战士毛军向老班长汇报入班一年多来的成长收获.

刚到“王杰班”那段时间，看着黄龙每天帮王杰叠被子，毛军曾感到不解. 黄龙告诉他，这是缅怀老班长的仪式，也是感悟英雄精神的过程.

毛军听了仍有些懵懂，但后来在认识王杰、走近王杰、读懂王杰的过程中，他感觉自己“思想的经脉被打通了”. 如今每晚熄灯前，他都会擦拭王杰雕像，向老班长汇报一天的工作.

心中有信仰，脚下才会有力量. 毛军平时不仅狠练体能、精研专业，还铆足劲学理论. 现在，他已经成为全连上等兵中的佼佼者.

“老班长，去年以来，我带领连队的炮手多次完成射击任务，26 名炮手通过专业等级考核……”火炮技师谢彬彬站在王杰雕像前，向老班长报喜.

2017 年 4 月，谢彬彬从别的连队交流而来，成为改革调整后“王杰班”的第一任炮手. 此前从未接触过步战车的他，感受到巨大压力：“‘王杰班’是年年拿第一的‘金牌班’，可不能在我这里掉链子. ”

为了尽快掌握步战车的操作和维修技能，谢彬彬白天钻到车里动手实操，晚上又捧着教材钻研学习. 到了夏天，步战车内部温度达到 40 摄氏度，他一待就是几个小时. 凭着这份努力，谢彬彬迅速成长为旅里的“最佳射手”，并在 2022 年离开“王杰班”，成为连队的火炮技师.

这些年，装备快速更新换代，增加了火炮的维修难度，这让谢彬彬产生一种强烈的本领恐慌. “要给别人一碗水，自己先要有一桶水. ”打开他的储物柜，记者看到里面整齐摆放着厚厚的资料，详细记录着各种故障疑难点以及解决方法. 在他的带动下，连队涌现出 20 多名优秀射手，并在多项任务和比武中斩获佳绩.

“王杰牺牲前，凡是参加工兵专业比武均名列榜首，获得‘一级技术能手’称号，是当时爱军精武的典型. ”谢彬彬告诉记者，和老班长比起来，他还做得很不够，一定要更加刻苦努力，再立新功.

“王杰的枪，我们扛；王杰的歌，我们唱. 一不怕苦、二不怕死，一心为革命，永远跟着党……”目光转回到报告现场，官兵们此时高唱《王杰的枪我们扛》，嘹亮的军歌在营区久久回荡……

时光流转，精神永恒. 回到宿舍后，黄龙对记者说，王杰精神不仅仅是连队荣誉室里那面永不褪色的英雄旗帜，更是滋养一代代官兵的精神源泉，尤其是“一不怕苦、二不怕死”的战斗精神，永远激励新时代官兵向着强军兴军的目标不断冲锋、不断突破.

怀揣《王杰日记》 追寻英雄足迹

■陆军某旅“王杰班”班长 黄 龙

2025 年 7 月 14 日，是老班长王杰牺牲 60 周年纪念日. 我与全班成员一起走进连队荣誉室，追忆英雄光辉事迹，感悟英雄精神内涵.

画像上，老班长眼神坚毅. 60 年前，在组织民兵训练时，为保护在场的 12 名民兵和人武干部，他毅然扑向即将爆炸的炸药包，年轻的生命永远定格在 23 岁.

作为“王杰班”第 32 任班长，我读了很多遍《王杰日记》，也常向战友讲述王杰的英雄事迹，讲他“一不怕苦、二不怕死”的战斗精神和“三不伸手”的崇高品格. 可日子久了，大家心里也有问号：爆炸发生前，王杰不也是普通一兵吗？那惊天动地的壮举，那毫不畏惧的英雄气，究竟从何而来？

今年 6 月，为了缅怀老班长，旅里组织开展“红色寻根行”活动. 作为寻根小组成员，我带着战友们的疑问，怀揣《王杰日记》，踏上了追寻老班长成长足迹的旅途.

“其实，王杰刚到部队时也曾迷茫过、困惑过……”第一站，我们来到王杰生前战友徐汝明家中拜访. 徐老告诉我们，王杰入伍时的梦想是当一名坦克兵，而新兵集训结束后，他却被分到工兵班，未能如愿开上坦克. 他认为自己念了 9 年书，却在抡大锤，是大材小用.

面对梦想与现实的差距，王杰十分失落，干工作也变得态度消极. 时任连队指导员冯安国注意到他的异常，于是在谈心时送给他一本毛泽东同志写的《愚公移山》，鼓励他从中汲取奋进力量.

学习，搭建了进步的阶梯，让王杰逐渐走出了迷茫. 思想转变后的他，以革命者的激情投入施工之中. 在同期入伍的战友中，他第一个加入共青团，还被评为“五好战士”，荣立个人三等功，熟练掌握了工兵专业五大技术.

“抡大锤太用力，手都肿了，吃饭只能哆哆嗦嗦地用勺子，就这样，他还要坚持……”他没有被现实困难打倒，反而越挫越勇. 听着徐老的讲述，一个比画像更加有血有肉的王杰逐渐呈现在我眼前.

第二站，我们直奔老班长的故乡——山东省金乡县华堌村. 1968 年，这里改名为“王杰村”.

“王杰就读过的县一中，前身是湖西抗日中学，有着深厚的红色底蕴. ”该县政德教育中心讲师李可阳说，王杰在这里读书，身处于浓厚的爱党爱国爱军氛围中. 当时学校组织迁葬抗日烈士遗骸，16 岁的他，曾亲手捧起同样 16 岁的烈士刘思代的遗骨……也许从那一刻起，从军报国的种子，就在王杰的心田中深深扎根.

在王杰生前战友冯明臣家里，我们感受到了一个更鲜活、更有“兵味”的老班长形象. “他有个绰号，叫‘闲不住’. 一有任务，他总是冲在最前面. ”冯老讲起一个故事：有一次，在坑道施工过程中，王杰的右手被沥青烫伤，但他坚持说施工任务重，不能去住院，此后一直铆在工地上.

“即使休息时间，他也要找些事干. ”冯老笑着说，王杰特别爱学习，尤其痴迷学理论，“叔叔给我寄了一本《毛泽东选集》第四卷，可把他羡慕坏了，一有空就过来借看. 他用党的理论武装头脑，把革命事业看得比啥都重. ”

接着，我去了内蒙古阿荣旗. 王杰小时候，曾随父母移居于此. 我途中一路走，一路听，一路想，一路翻看《王杰日记》. 从少年时期厚植爱国情怀，到军旅生涯思想成熟；从“三不伸手”的高尚情操，到“一不怕苦、二不怕死”的英勇无畏，老班长的形象，在我心里越来越清晰立体.

“王杰不只在书里、在日记里，更永远在我们心里. ”返回部队后，我们把此次寻访获得的资料汇编成册，将所见所闻制成系列短片，作为新的教育素材，帮助战友走近英雄、学习英雄，进而成为英雄. 透过大家真挚的眼神，我能感受到“红色寻根行”的意义所在，也懂得了学习王杰不是简单的缅怀，而是通过深入了解那个有血有肉、有困惑有成长的青年战士，追溯他精神力量的源泉. 这比单纯歌颂英雄更有力量，更有价值.

王杰用生命谱写了一曲英雄壮歌，给我们留下了丰厚的精神财富. 奋进新征程，我们一定以王杰为榜样，争当英雄传人，书写属于我们这一代人的青春篇章.

（杨光、凡春龙整理）

An Army Brigade Reflects on the Essence of Wang Jie’s Spirit and Takes Up the Baton to Write a New Chapter in Its Military History

Source: PLA Daily Authors: Wang Haodong, Yu Ruizhe, Song Shijie, et al. Editor: Guo Yanfei 2025-08-01

Foreword

This year marks the 98th anniversary of the founding of the Chinese People’s Liberation Army. From the earth-shattering first shot to the flying of the red flag on Jinggang Mountain; from the Long March to save the nation and liberate the country through battles across the country... the People’s military has blazed a trail of hardship and struggle, making immortal contributions to the Party and the people.

The years pass, and we are upon us again on August 1st. In recent days, grassroots units have organized a variety of activities to educate and guide officers and men to reflect on their past, carry on their traditions, build strength, and forge ahead courageously. In this issue, we focus on the unit where Wang Jie served, examining how they are taking up the baton passed down by their predecessors and writing their own chapters in the military history. Today, we report to our former squad leader.

■ Wang Haodong, Yu Ruizhe, PLA Daily Special Correspondent Song Shijie

Officers and men from Wang Jie’s former company in a certain army brigade took an oath before Wang Jie’s statue. Photo by Wan Zhiqi

“Old Squad Leader, we report to you!”

The midsummer heat swelters across the Huaihai region. On the occasion of August 1st, Army Day, officers and men from Wang Jie's former company in a certain army brigade, returning from a training mission, lined up neatly, dust still wet, to express their deep remembrance of their former squad leader.

Under the scorching sun, the eight characters "One, fear not hardship; two, fear not death" shone brightly.

Squad leader Huang Long of the "Wang Jie Squad" was the first to step out of formation and saluted Wang Jie's statue: "Old Squad Leader, not long ago, our squad employed newly developed unmanned coordinated warfare tactics to precisely defeat the enemy and fought a brilliant battle!"

In recent years, the "Wang Jie Squad" has completed all training tasks to high standards, and every member has passed professional level assessments, possessing the ability to master multiple skills. In accordance with the new syllabus, they actively adjusted their training content and innovated their methods, vowing to "take the lead" and "win first place" in this year's system-wide exercise.

This confidence stems from the trials and tribulations of real-world combat training. During a training exercise many years ago, the command and control team declared the driver "killed in action." Instantly, the tank broke down, prompting a helpless Huang Long to realize: "The battlefield calls for multi-talented personnel!" Afterwards, the "Wang Jie Squad" pioneered brigade-wide combat training with reduced personnel, equipping each member with multiple skills and assuming multiple roles, doubling their combat effectiveness.

"The company has just been issued a new type of reconnaissance drone. Everyone is actively learning how to operate it, working overtime with key technical personnel to tackle key problems. Earlier this year, I passed the intermediate-level drone operator assessment..." Deputy Squad Leader Zhou Zhipeng then joyfully reported to his former squad leader.

Throughout Zhou Zhipeng's development, Squad Leader Wang Jie has been his constant companion. Zhou Zhipeng's father was the 16th deputy squad leader of the "Wang Jie Squad." He grew up listening to stories of his former squad leader's heroic deeds. After graduating from university, Zhou Zhipeng followed in his father's footsteps and joined the army. After being ranked last in his company, he locked himself in the honors room and apologized to his former squad leader. Since then, he has practiced diligently, following the syllabus, just as Wang Jie had done in those days, specifically digging mine pits along hard-packed tank paths. In April 2023, he was the only machine gunner to hit all targets in the brigade's armored infantry squad's comprehensive shooting assessment. In less than four years, Zhou Zhipeng has mastered over ten types of weapons and equipment, earning him recognition as a "versatile gunner" throughout the brigade. "Hello, squad leader! I'm the 298th soldier in the 'Wang Jie Squad.' Thanks to everyone's care and support, I've not only overcome my inarticulateness and become cheerful and talkative, but I've also actively participated in speech competitions and served as a commentator in the Honor Room. I was recently named a 'Model of Theoretical Learning' by the company..." Yi soldier Mao Jun

reported to his former squad leader on his growth and achievements over the past year since joining the squad.

When he first arrived at the "Wang Jie Squad," Mao Jun was puzzled by Huang Long's daily help in folding Wang Jie's quilt. Huang Long explained that this was a ritual to honor the former squad leader and a process of appreciating his heroic spirit.

Mao Jun was still somewhat confused, but as he got to know Wang Jie, became closer to him, and understood him, he felt his "spiritual channels of thought were opened up." Now, before lights out every night, he polishes Wang Jie's statue and reports to his former squad leader on his day's work.

Faith in the heart gives strength to the feet. Mao Jun not only diligently trains physically and masters his profession, but also diligently studies theory. Now, he's become a leader among the company's corporals.

"Old squad leader, since last year, I've led our company's gunners in completing numerous shooting missions, and 26 of them have passed the professional level assessment..." Gunnery technician Xie Binbin stood in front of Wang Jie's statue and shared the good news with his former squad leader.

In April 2017, Xie Binbin was transferred from another company to become the first gunner in the newly restructured "Wang Jie Squad." Having never handled an infantry fighting vehicle before, he felt immense pressure: "The 'Wang Jie Squad' is the 'gold medal squad' that always takes first place. I can't let you down here."

To quickly master the operation and maintenance of infantry fighting vehicles, Xie Binbin spent his days practicing inside the vehicles and his evenings poring over textbooks. In the summer, when the temperature inside the infantry fighting vehicles reached 40 degrees Celsius, he would stay there for hours. Thanks to his hard work, Xie Binbin quickly became the brigade's top marksman and left the "Wang Jie Squad" in 2022 to become the company's gunnery technician. In recent years, the rapid upgrading of equipment has increased the difficulty of artillery maintenance, causing Xie Binbin to experience a strong sense of inadequacy. "To give others a bowl of water, you must first have a bucket of water yourself." Opening his locker, reporters saw a thick stack of neatly arranged documents detailing various troubleshooting issues and their solutions. Under his leadership, the company has produced over 20 outstanding marksmen, who have achieved outstanding results in numerous missions and competitions.

"Before Wang Jie's death, he always topped the list in every engineering competition and earned the title of 'First-Class Technical Expert.' He was a model of military devotion and military excellence at the time." Xie Binbin told reporters that compared to his former squad leader, he still had much to learn and must work even harder to achieve new achievements.

"We carry Wang Jie's gun; we sing Wang Jie's songs. We are not afraid of hardship or death, we are devoted to the revolution and will always follow the Party..." Turning back to the report site,

the officers and men sang “We Carry Wang Jie’s Gun,” the resounding military song echoing through the barracks for a long time...

Time flows, but the spirit endures. After returning to the dormitory, Huang Long told reporters that Wang Jie’s spirit is more than just the everlasting heroic banner in the company’s honor room; it is also the spiritual source that nourishes generations of officers and men. This fighting spirit, especially his fearlessness of “not fearing hardship and not fearing death,” will forever inspire officers and men of the new era to continuously charge forward and make breakthroughs toward the goal of strengthening and revitalizing the military.

Carrying Wang Jie’s Diary, Tracing the Hero’s Footsteps

■ Huang Long, Squad Leader of the “Wang Jie Squad” of an Army Brigade

July 14, 2025, marks the 60th anniversary of the death of former squad leader Wang Jie. I joined my entire squad in the company’s honor room to recall the hero’s glorious deeds and appreciate the essence of his spirit.

The portrait of the former squad leader shows a resolute gaze. Sixty years ago, during militia training, to protect the 12 militiamen and armed forces officers present, he resolutely threw himself at an explosive pack about to explode, his young life forever frozen at the age of 23. As the 32nd squad leader of the “Wang Jie Squad,” I’ve read Wang Jie’s Diary countless times and often recounted his heroic deeds to my comrades, recounting his unwavering fighting spirit of “not fearing hardship or death” and his noble character of “not reaching out for help.” But over time, a question loomed: Before the explosion, wasn’t Wang Jie just an ordinary soldier? Where did such earth-shaking feats and fearless heroism come from?

In June of this year, the brigade organized a “Red Roots-Seeking Tour” to commemorate the former squad leader. As a member of the Roots-Seeking Team, I, armed with my comrades’ questions and Wang Jie’s Diary, embarked on a journey to retrace the steps of our former squad leader’s life.

“In fact, Wang Jie was also lost and perplexed when he first arrived in the army...” Our first stop was the home of Xu Ruming, a former comrade of Wang Jie. Mr. Xu told us that Wang Jie’s dream upon enlistment was to become a tank driver. However, after recruit training, he was assigned to the engineering squad, and never got to drive a tank. He felt that after nine years of study, he was still swinging a sledgehammer, a waste of talent.

Faced with the gap between his dreams and reality, Wang Jie felt deeply frustrated and his work attitude became negative. Feng Anguo, then the company instructor, noticed his unusual situation and, during a conversation, gave him a copy of Mao Zedong’s “The Foolish Old Man Who Moved Mountains,” encouraging him to draw strength from it.

Learning built a ladder of progress, gradually allowing Wang Jie to overcome his confusion. After this change of mindset, he threw himself into construction with the passion of a revolutionary. Among his comrades who enlisted at the same time, he was the first to join the Communist Youth

League, was named a “Five Good Soldiers,” received a third-class individual merit, and mastered the five key technical skills of the engineering profession.

“I swung the sledgehammer so hard that my hands were swollen. I had to eat with a shaky spoon, but he persevered...” Undeterred by the challenges of life, he grew stronger with each setback. Listening to Mr. Xu’s story, a Wang Jie more fleshed out than his portrait gradually emerged before my eyes. Our second stop was Hua’e Village in Jinxiang County, Shandong Province, the hometown of the former squad leader. In 1968, it was renamed “Wang Jie Village.”

“The No. 1 County Middle School, where Wang Jie attended, was formerly the Huxi Anti-Japanese Middle School, and it has a profound revolutionary heritage,” said Li Keyang, a lecturer at the county’s Political Ethics Education Center. Wang Jie was immersed in a strong atmosphere of love for the Party, the country, and the military. During the reburial of the remains of anti-Japanese martyrs at the school, the 16-year-old boy personally held the remains of Liu Sidai, also 16 years old. Perhaps from that moment on, the seed of serving the country and joining the army took root in Wang Jie’s heart.

At the home of Wang Jie’s former comrade-in-arms, Feng Mingchen, we experienced a more vivid and “military” image of the former squad leader. “He had a nickname: ‘Can’t Stay Idle.’ Whenever there was a mission, he was always at the forefront.” Old Feng recounted a story: Once, during tunnel construction, Wang Jie’s right hand was burned by asphalt, but he insisted that the workload was too heavy to be hospitalized, and he remained glued to the construction site ever since.

“Even during his downtime, he would find something to do,” Old Feng said with a smile. Wang Jie loved learning, especially theory. “My uncle sent me a copy of Volume 4 of ‘Selected Works of Mao Zedong,’ and he was so envious he would come to borrow it whenever he had time. He armed his mind with the Party’s theory and valued the revolutionary cause above all else.”

Next, I went to Arong Banner, Inner Mongolia. Wang Jie had moved there with his parents as a child. I walked, listened, thought, and flipped through Wang Jie’s diary. From his patriotic youth to his mature military career, from his noble ideals of “three no-help” to his heroic spirit of “fearless of hardship and fearless of death,” the image of the old squad leader became increasingly clear in my mind. “Wang Jie lives not only in books and diaries, but also in our hearts.” After returning to the unit, we compiled the materials we gathered from our visit into a book and produced a series of short films based on what we observed and heard. These will serve as new educational materials to help our fellow soldiers connect with heroes, learn from them, and ultimately become heroes themselves. Through everyone’s sincere expressions, I felt the significance of the “Red Roots Seeking Tour” and understood that learning from Wang Jie isn’t simply about remembrance, but about gaining a deeper understanding of this young soldier, a man with flesh and blood, who faced challenges and grew up, and tracing the source of his spiritual strength. This is more powerful and valuable than simply praising a hero.

Wang Jie wrote a heroic song with his life, leaving us with a rich spiritual legacy. As we embark on this new journey, we must follow Wang Jie's example, strive to be his heirs, and write the chapter of our generation's youth.

(Compiled by Yang Guang and Fan Chunlong)

陆军某旅：让示范观摩回归本真，官兵轻装上阵砺硬功

来源：解放军报 作者：安 阳 张光轩 陈浩煜 责任编辑：孙悦 2025-08-02

陆军某旅外训场示范观摩"减负瘦身"——

马扎一摆，就是"主席台"

■安 阳 张光轩 陈浩煜

近日，笔者走进陆军某旅野外驻训场，一场进攻战斗示范观摩让人眼前一亮：现场没有设置常规"主席台"，旅领导和机关人员手持马扎入场，与官兵一同落座后，观摩直接开始.

"示范观摩没有搭设'主席台'？"见笔者满是疑惑，一旁负责统筹协调的作训科李参谋解释道："旅里明确提出示范观摩要减少不必要形式，把精力全部放在内容质量上，所以，马扎一摆就是'主席台'."

改变，源于一场战术训练示范观摩. 李参谋介绍，那次观摩前，担任演示任务的一位连长带着骨干多次考察场地，研究现场布置. 为了提升效果，机关负责科室带着连队人员推演流程，还特意找了一名曾学习过播音主持的战士担任解说员.

孰料，那场示范并未赢得满堂喝彩，反而因内容陈旧导致效果不佳，现场观摩的上级领导也给出"流程正规，内容空洞"的评价.

此事引起该旅党委一班人高度重视. 他们调研后发现，那位连长的经历并非个例. 过去组织示范观摩，不论机关还是基层，为了给上级留下"好印象"、展示工作"高标准"，总要花费大量精力在不必要的事务上：有的精心设置"主席台"，从打印桌牌到准备器材，耗费人力物力财力；有的舍本逐末，不关注观摩的内容质量，却关注一些无关紧要的细节，反复验收让官兵疲惫不堪……

"示范观摩本是为了共享成果，却流于形式，根子是党委机关导向偏移. "为彻底纠治示范观摩中的形式主义，该旅深挖"问题背后的问题"，对示范观摩形式进行精简，删除设置"主席台"、拉场地标语、喷绘展板、层层验收等非必要环节步骤，要求机关督促示范单位重点展示经验做法，真正发挥示范观摩对基层建设的指导作用.

在此基础上，他们还从各个方面对示范观摩“瘦身”：充分考虑实际，控制示范观摩次数，每次严选参与人数，防止干扰基层正常秩序；创新方式方法，采用下发示范图片、视频等形式代替部分现地观摩，允许营连在机关指导下结合实际进行调整，使各项标准设置更加利于战备……

形式上，数量少了；内容上，质量精了. 笔者看到的这场进攻战斗示范观摩，不仅没有设置“主席台”，而且参与示范的人员入场即开始. 整个过程，模拟构设多种战场环境，指挥员根据战场态势灵活变换进攻队形，官兵密切协同、灵活处置，受到观摩人员一致点赞. 大家纷纷表示，这场观摩战味足，学到很多实在管用的招法.

“不再为繁琐程序劳心费神，示范观摩质效自然水涨船高. ”观摩结束，某连一名干部深有体会地说，过去受领示范观摩任务，机关科室、连队官兵总会有会场设置不合理的顾虑；如今，旅里的鲜明导向让大家卸下“包袱”，可以将全部精力用在内容准备上.

前不久，该旅组织铁路装卸载示范观摩，现场没有刻意编排的观摩队列和整齐摆放的展示材料，大家按照方便观看的原则快速落座，解说员的讲解简洁凝练、干货满满. 后续任务中，官兵充分运用观摩所学组织远程机动，全程安全顺利.

务实导向鲜明，官兵士气高昂. 该旅野外驻训以来，不见兴师动众的示范观摩，没有大张旗鼓的应景活动，官兵轻装上阵，全身心投入练兵备战，一系列战法训法得到充分检验.

编余小议

求真务实砍“虚招”

从哲学角度讲，形式是内容的存在和表现方式. 任何事物、任何工作、任何活动，都要通过一定的形式来体现其内容，是办事情、推动工作的必需.

然而，如果过分强调或夸大形式，偏离或脱离实际，仅在形式上做文章，就会成为形式主义，正如马克思所言，“如果形式不是内容的形式，那么它就没有任何价值了”. 所以，形式与形式主义仅一步之遥，尺度把握不好，就很容易产生形式主义.

实践证明，如果脱离内容搞形式，把精力用在“不打粮食”的工作上，认认真真走过场、轰轰烈烈搞形式，这样的积极性越高，危害性就越大. 凡是能打胜仗的部队，从来都是不驰于空想，不骛于虚声. 各级无论是日常办公、还是演习演训，都应求实务实，力戒虚招子、假把式，砍去那些与战斗力建设无关的形式主义，切实担负起能打仗、打胜仗的使命职责，真正做到全部精力向打仗聚焦、全部工作向打仗用劲.

An Army Brigade: Returning Demonstration and Observation to Their True Purpose, Allowing Soldiers to Equip Themselves with Light Equipment and Sharpen Their Skills

Source: PLA Daily Author: An Yang, Zhang Guangxuan, Chen Haoyu Editor: Sun Yue 2025-08-02

An Army Brigade's Field Training Demonstration and Observation "Reduces Burden and Slims Down"—

A Stool Becomes a "Platform"

■ Anyang, Zhang Guangxuan, Chen Haoyu

Recently, I visited an Army brigade's field training site and was struck by an offensive combat demonstration and observation: there was no conventional "Platform." Brigade leaders and staff entered the field holding stools, took their seats with the soldiers, and the demonstration began immediately.

"There's no 'Platform' for the demonstration and observation?" Seeing my puzzled expression, Staff Officer Li from the Operations and Training Section, who was in charge of overall coordination, explained, "The brigade has clearly stated that demonstrations and observations should reduce unnecessary formalities and focus entirely on the quality of the content. Therefore, a stool becomes a 'Platform'."

The change stemmed from a tactical training demonstration and observation. Staff Officer Li explained that before the demonstration, a company commander, responsible for the demonstration, led key personnel on multiple inspections of the site and researched the on-site layout. To enhance the effectiveness, the responsible department led the company personnel through a process walkthrough and even recruited a soldier with experience in broadcasting and hosting to serve as the narrator.

Unexpectedly, the demonstration failed to garner widespread acclaim. Instead, the outdated content led to poor results. The superiors who observed the demonstration also commented that the process was formal but the content was hollow.

This incident attracted the attention of the brigade's Party Committee. After investigation, they discovered that the company commander's experience was not an isolated case. In the past, when organizing demonstrations and observations, both headquarters and grassroots units, in an effort to impress superiors and demonstrate high standards, often expended considerable effort on unnecessary tasks. Some meticulously set up the "rostrum," from printing table signs to preparing equipment, wasting manpower, material resources, and financial resources. Others focused on trivial details, neglecting the quality of the demonstration content. Repeated inspections left officers and men exhausted.

"Demonstrations and observations are meant to share achievements, but they've become a formality. The root cause is a misaligned orientation within the Party Committee." To thoroughly address the formalism inherent in demonstrations and observations, the brigade delved into the "problems behind the problems" and streamlined the format, eliminating unnecessary steps like

setting up the “rostrum,” displaying slogans, spray-painting display boards, and layered inspections. The brigade also instructed headquarters to urge demonstration units to prioritize their experiences and practices, ensuring that demonstrations and observations truly play a guiding role in grassroots development. On this basis, they also streamlined the demonstrations in various aspects: taking practical considerations into account, limiting the number of demonstrations and carefully selecting participants each time to prevent disruption to normal grassroots operations; innovating methods and approaches, replacing some on-site observations with the distribution of demonstration images and videos, allowing battalions and companies to adjust based on their actual conditions under the guidance of headquarters, thereby making the various standards more conducive to combat readiness...

In terms of form, the number has been reduced; in terms of content, the quality has been refined. The offensive combat demonstration I witnessed not only lacked a “rostrum,” but also began as soon as participants entered the venue. Throughout, the process simulated various battlefield environments, with commanders flexibly changing offensive formations based on the battlefield situation. Officers and men worked closely together and flexibly, earning unanimous praise from the observers. They all expressed that the observation was a rich experience and that they learned many practical and effective strategies. “Without the hassle of tedious procedures, the quality and effectiveness of demonstrations and observations will naturally improve.” After the observation, a cadre from a certain company remarked with deep understanding. In the past, when tasked with demonstrations and observations, officers and men from headquarters, departments, and company units would always worry about the inappropriate venue setup. Now, the brigade’s clear direction has freed everyone up and allowed them to focus fully on content preparation.

Not long ago, the brigade organized a railway loading and unloading demonstration and observation. There were no deliberately arranged lines or neatly arranged display materials. Everyone quickly took their seats, aligning their convenience. The instructor’s explanation was concise and informative. In subsequent missions, the soldiers fully utilized what they learned from the observations to organize long-distance maneuvers, ensuring a safe and smooth process.

With a clear pragmatic orientation, the morale of the soldiers is high. Since the brigade’s field training began, there have been no elaborate demonstrations or extravagant events. Instead, the soldiers have been lightly equipped and fully committed to training and preparation, fully testing a series of tactics and training methods. Post-Editorial Commentary

Seeking Truth and Being Pragmatic, Cutting Out “Fake Tactics”

From a philosophical perspective, form is the way content exists and manifests. Any object, any work, any activity must embody its content through a certain form. This is essential for getting things done and promoting progress.

However, if form is overemphasized or exaggerated, deviating from or becoming detached from reality, and focusing solely on form, it becomes formalism. As Marx said, “If form is not the form

of content, then it has no value." Therefore, there's only a fine line between form and formalism; if the balance is not properly grasped, formalism can easily result.

Practice has proven that if form is divorced from content, if energy is devoted to "unproductive" work, if one diligently goes through the motions and engages in grandiose formalities, the higher the enthusiasm, the greater the harm. Every victorious army never indulges in idle fantasies or pursues empty reputations. Whether it is daily office work or exercises and training, all levels should be realistic and pragmatic, avoid empty tricks and false moves, cut out formalism that is irrelevant to combat effectiveness construction, and truly shoulder the mission and responsibility of being able to fight and win battles, truly focus all energy on fighting and devote all work to fighting.

刀锋不卷刃 战旗别样红——陆军第七十五集团军某营"白刃格斗英雄连"

来源：新华社 作者：李龙伊 责任编辑：林诗清 2025-08-03

盛夏时节，陆军第七十五集团军某营"白刃格斗英雄连"营房前，举行了一场授刺刀仪式.

授刀时刻，班长田巴特将刺刀郑重交到新战友手中.

田巴特郑重提问："当战斗到最后一人，你是否会和先辈们一样，敢于向敌人亮出你的刺刀？"

下士陆伟园的回答掷地有声："作为'白刃格斗英雄连'第 5717 名战士，我敢！宁可前进一步死，绝不后退半步生！"

时间回溯. 1940 年 8 月，百团大战烽火点燃. 在寿阳县大落坡村，山西青年抗敌决死队第一纵队二十五团八连，与前来偷袭的日寇展开白刃格斗，最终击毙 40 多名日军，取得胜利.

此战，一举挫败日军偷袭的阴谋，保证了我军作战计划圆满完成. 战后，八路军总部授予该连"白刃格斗英雄连"荣誉称号.

新时代，"白刃格斗英雄连"由传统步兵转型为特战力量，官兵们扛起先辈们用鲜血染红的战旗，接过先辈们浴血奋战的刀锋，在强军征程上继续冲锋.

精神，在一代代官兵血液里传承

连史馆展柜里，有一把锈迹斑驳的刺刀. 下士适伊航说，这是大落坡反偷袭战中，连队先辈们使用过的刺刀.

"每次走进连史馆，看到这把刺刀，想到先辈们的事迹，我的信念就更加坚定——一定要像他们一样，逢敌亮剑、直面万难，做有血性的革命军人. "适伊航感慨.

血性，铭刻在连队的基因里.

走进连史馆，连史讲解员、二级上士陈孟向记者讲述了大落坡反偷袭战中，那惊险的战斗细节——

面对端着刺刀的日军，连队时任政治指导员张万清高声大喊：“同志们，跟我冲呀！”官兵们英勇地冲了上去，与敌展开激烈的白刃格斗.

一时间，冲杀声和刺刀撞击声交织，官兵们刺刀捅弯了就用枪托砸，枪托砸碎了就用小锹砍. 一名战士被刺中腹部仍坚持战斗，死死抱住一个敌人，用牙齿咬断其咽喉，最后与敌同归于尽……

这撼天动地的壮举，拼杀出了中华民族不屈的血色荣光，凝结成连队不朽的连魂：“铁心跟党，敢打硬仗，誓死杀敌.”

“杀！”演练场上，刺杀操演练杀声震天、士气如虹. 要成为一名合格的“白刃格斗英雄连”传人，刺杀格斗已成为必修课.

连队指导员徐尤秀说，曾有年轻战士问，当前战争形式已发生变化，近距离格斗场合越来越少，训练刺杀操是否还有必要？

徐尤秀给年轻战士讲了一个连史故事. 连队第九任连长李亥生，曾是一名久经沙场的军人，参加过抗日战争、解放战争. 儿子李晋南长大后，像父亲一样入伍到“白刃格斗英雄连”.

送别那天，李亥生嘱咐儿子：“一定要练强本领，接替我为国家尽责出力！”入伍后，李晋南在各项任务中亮刺刀、打头阵. 一次边境作战中，李晋南主动请缨，奋勇杀敌，不幸壮烈牺牲.

“战争不仅是物质的较量，更是精神的比拼. 我们练刺刀，练的不只是格斗能力，更是传承逢敌亮剑的军人血性、有我无敌的战斗精神.”徐尤秀说. 先辈的故事，解开了这名年轻战士的疑惑. 他训练更加刻苦，练刺杀操时拼杀劲头更足.

传承，见于行动.

二级上士蔡雪华始终难忘，连队转型为特战连后，第一次参加伞降训练的情形.

跳伞，是特战队员的必备技能. 尽管大家都经过扎实的模拟训练，“三肿三消，才上云霄”，但真的站到千米高空的机舱里，还是难免紧张. 飞机上，大家沉默着，没有笑容.

“当时，连长感受到官兵们紧张情绪，告诉大家‘我先跳，跟着我’. 到达点位后，他率先一跃而下.”蔡雪华说. 看着连长先跳下去，官兵们都受到鼓舞. 尽管是第一次跳伞，有的战士还严重恐高，但大家都毅然跳下飞机，无人退缩.

“我想到，大落坡反偷袭战斗中，连长、指导员也是一样带头冲锋. 这就是精神的传承. ”蔡雪华说，“朵朵伞花，在高空中绽放. 那一刻，我们战胜了恐惧，收获了勇气. ”

荣光，在一项项重大任务中续写

连队营房前，6 面战旗一字排开、猎猎招展. “英勇顽强”“白刃格斗英雄连”“攻无不克 守无不胜”“钢铁堡垒”“老山英雄连”“抗震救灾英雄连”……连队曾 6 次被上级授予荣誉称号，写满荣光.

其中，“白刃格斗英雄连”战旗，曾两次在大阅兵中接受检阅. 这面红色战旗，自太行烽火中走来，历经战火淬炼，早已熔铸为精神之刃，深植官兵血脉.

战旗在，荣誉在.

2019 年，国庆 70 周年阅兵战旗方队选拔受阅官兵，连队战士杨时龙光荣入选.

“得知自己有机会擎着‘白刃格斗英雄连’战旗参加阅兵，我激动得一整夜没睡着. 第二天凌晨 4 点，我就打好了背包，出发前往上级单位报到. ”当时的情景，杨时龙记忆犹新.

训练过程很苦. 累的时候，杨时龙就凝望着屋顶的百面战旗，“白刃格斗英雄连”战旗在其中很显眼的位置. “每当我想放弃时、觉得疲惫时，它都鼓舞着我，给我不竭动力. ”他说.

一次军姿训练，要连续笔直站立数小时. 火辣辣的阳光下，杨时龙衣服早已湿透. 时间过半，身边陆续有战士坚持不下去，报告退出.

当时，杨时龙的信念只有一个——“决不放弃”. 时间一分一秒过去，他坚持着最标准的动作，直到训练结束，收获了方队教员的肯定.

最终，杨时龙通过所有考验，高擎“白刃格斗英雄连”战旗通过天安门广场接受了党和人民的检阅. 阅兵结束后，他激动地流下热泪：“我没有辱没‘白刃格斗英雄连’的荣光！”

信念在，方向在.

2021 年，田巴特作为中国代表队的一员，参加了国际军事比赛中的“侦察尖兵”比武. 田巴特给自己立下“军令状”：“作为‘白刃格斗英雄连’战士，代表中国军队出战，必须为国争光！”

急行军课目中，迎着漫天风沙，田巴特和队友们全副武装前行. 作为第四支出发的队伍，赛程过半，他们就赶上了提前一小时出发的一支外军队伍.

然而，前方道路变窄，且已被堵住. 想反超第一名，他们别无选择. “没有路，就蹚开一条路！”面对满是倒刺的灌木丛，田巴特和队友毅然扎了进去，披荆斩棘前行.

距终点 1 公里时，可以看到五星红旗迎风飘扬，田巴特大喊：“中国必胜！”大家很是振奋，并肩向终点冲锋. 最终，中国代表队在该课目中勇夺第一名.

荣光，就这样在一项项重大任务中续写.

“官兵珍视荣誉，都以自己是‘白刃格斗英雄连’一员而自豪. 无论面对什么任务，大家都有一个坚定的信念——为连队争光，为战旗添彩. ”徐尤秀感慨.

极限，在一次次拼尽全力后突破

“连队的赫赫威名是打出来的. 八十余载峥嵘岁月，历经大小战役战斗 200 余次. 新时代的英雄传人深知，唯有精武强能，才能不负荣光. ”连长金建杰说.

金建杰常问官兵们 3 个问题：训练场上，能否咬牙突破身体极限？任务面前，能否毫不犹豫挺身而出？假如战争来临，能否发挥手中武器的最大效能？

官兵们用行动作答.

去年，陆军举办特战小队集训比武，来自全陆军的优秀特战队员共同展开角逐. 比武历时长、强度大，对参训人员的体能和能力都是严峻考验. 经过 4 个多月的强化集训，下士向佳飞通过遴选，代表旅队参加比武.

作为重火器手，向佳飞要携带全小队最重的装备，总负重近 50 公斤. 最后一个课目，定向越野 35 公里中，由于前期集训落下的腰伤复发，每前进一步就感到钻心地疼，豆大的汗珠噼里啪啦地往下淌.

“‘白刃格斗英雄连’的兵，要做永不卷刃的刀锋，爬也要爬到终点！”他选择勒紧护腰继续向前，胜利冲过终点. 比武结束后，向佳飞获评“金牌勇士”.

敢于挑战极限，动力从何而来？

“战争年代，连队先辈们无惧强敌，带着自制的大刀、手雷，打败穷凶极恶的敌人. 新时代的我们，先进武器在手，唯有拼尽全力，才对得起先辈们的付出. ”向佳飞说.

“训练累的时候，我经常到连史馆走走看看，汲取力量. 轻抚着先辈们的照片，仿佛能触摸到历史的温度. ”中士张兆涛感慨，“在这个战斗的集体，我们要不断精武强能，将‘白刃’锋芒越磨越利. ”

备战打仗，他们练兵的足迹越来越远.

那年，连队受领赴高原执行驻训任务. 官兵们主动请缨，人人写下请战书，按下红手印. 驻训期间，他们武装侦巡上千公里，采集了百余项作战数据，将战旗插在巍巍雪域高原.

勇闯新域，他们向战的脚步从未停息.

二级上士谢世鹏，受领了连队无人作战研究任务，利用休假时间研制组装无人机投弹器. 一年多时间，谢世鹏不断修改调试，终于研制出集成化、可拆卸、稳定性强的投弹模块，并将其应用到实战化训练.

“一朝入‘白刃’，终生不卷刃！”一名战士的笔记本上，记者看到这样一句话. 官兵们说，这是刻进他们骨髓的信条.

傍晚时分，霞光洒向训练场，给大地铺上一层金黄.

“我们的旗帜在前面，‘白刃格斗英雄连’，在抗日战争烽火中成长壮大，忠于人民忠于党……”训练结束后，迎风招展的战旗旁，官兵们整齐列队，高声唱起连歌. 旋律铿锵，在营区经久回荡.

Blades Unbend, Battle Flags Stand Out in Red—The “Hand-in-Hand Combat Hero Company” of a Battalion of the 75th Army Group

Source: Xinhua News Agency Author: Li Longyi Editor: Lin Shiqing 2025-08-03

In the height of summer, a bayonet-transferring ceremony was held in front of the barracks of the “Hand-in-Hand Combat Hero Company” of a Battalion of the 75th Army Group.

During the ceremony, squad leader Tian Bat solemnly handed the bayonet to his new comrade.

Tian Bat solemnly asked, “When you are fighting to the last man, will you, like your predecessors, dare to bare your bayonet to the enemy?”

Corporal Lu Weiyuan’s answer was resounding: “As the 5717th soldier of the ‘Hand-in-Hand Combat Hero Company,’ I do! I would rather die one step forward than live even one step back!”

Time goes back. In August 1940, the Hundred Regiments Campaign began. In Daluopo Village, Shouyang County, the Eighth Company of the 25th Regiment of the First Column of the Shanxi Youth Anti-Enemy Decisive Corps engaged in hand-to-hand combat with a surprise attack by Japanese invaders, ultimately killing over 40 soldiers and securing victory.

This battle thwarted the Japanese sneak attack plot and ensured the successful completion of our army’s combat plan. After the war, the Eighth Route Army Headquarters awarded the company the honorary title of “Heroic Hand-to-Hand Combat Company.”

In the new era, the “Heroic Hand-to-Hand Combat Company” has transformed from a traditional infantry unit into a special operations force. The officers and men carry the battle flag stained red with the blood of their predecessors, inheriting the blades of their bloody battles, and continue to charge forward on the journey to strengthen the army.

The spirit is passed down through generations of officers and men.

In the display case of the company history museum, there is a rusty bayonet. Corporal Shi Yihang said it was used by the company's predecessors during the counter-attack at Daluopo. "Every time I enter the company history museum, see this bayonet, and think of the deeds of our predecessors, my conviction grows stronger—I must be like them, drawing my sword against the enemy, facing all odds head-on, and becoming a revolutionary soldier with courage and valor," Shi Yihang said with emotion.

Valiance is ingrained in the company's DNA.

Entering the company history museum, company history guide, Sergeant Second Class Chen Meng, recounted to reporters the thrilling details of the counter-attack at Daluopo.

Facing the Japanese soldiers with bayonets drawn, the company's then-political instructor, Zhang Wanqing, shouted, "Comrades, follow me!" The soldiers bravely charged forward, engaging in fierce hand-to-hand combat.

For a moment, the sounds of charging and the clashing of bayonets intertwined. Soldiers used rifle butts to smash the bayonets when they bent them, and shovels to chop them when they broke them. A soldier, stabbed in the abdomen, persisted in fighting, clinging to an enemy, severing his throat with his teeth, and ultimately perishing alongside his enemy...

This earth-shaking feat forged the unyielding glory of the Chinese nation and embodied the company's immortal spirit: "Unwaveringly follow the Party, dare to fight tough battles, and swear to kill the enemy to the death."

"Kill!" On the training ground, the cries of assassination drills resonated loudly, and morale soared. To become a qualified successor to the "Heroic Hand-to-Hand Combat Company," assassination combat has become a compulsory course.

Company instructor Xu Youxiu recounted a story from the company's history: Li Haisheng, the company's ninth commander, was a battle-hardened soldier who participated in the War of Resistance Against Japanese Aggression and the War of Liberation. When his son, Li Jinnan, grew up, he joined the "Heroic Hand-to-Hand Combat Company," just like his father. On the day of his farewell, Li Haisheng instructed his son: "You must strengthen your skills and succeed me in fulfilling my duty to the country!" After joining the army, Li Jinnan wielded his bayonet and led the charge in various missions. During one border battle, Li Jinnan volunteered and bravely fought the enemy, tragically losing his life heroically.

"Warfare is not only a physical battle, but also a spiritual one. When we practice bayonet firing, we're not only developing our combat prowess, but also inheriting the soldier's valor, the sword-drawing spirit and the invincible fighting spirit," said Xu Youxiu. The stories of his predecessors resolved the young soldier's doubts. He trained even harder, and his fighting spirit during bayonet drills was even more intense.

Inheritance is reflected in action.

Sergeant Second Class Cai Xuehua will never forget the first parachute training he participated in after his company was transformed into a special operations company.

Parachuting is an essential skill for special operations soldiers. Although everyone undergoes rigorous simulation training, "three swellings and three reductions before taking to the sky," they still inevitably feel nervous when they actually stand in the cockpit of a plane a thousand meters above the ground. On the plane, everyone was silent, no one smiled.

"At that moment, the company commander sensed the soldiers' nervousness and told them, 'I'll jump first, follow me.' After reaching the designated position, he leaped first," said Cai Xuehua. Seeing the company commander jump first inspired the soldiers. Although it was their first time parachuting, and some soldiers were severely afraid of heights, everyone resolutely jumped from the plane, no one flinching.

"I thought of the Daluopo anti-ambush battle, when the company commander and instructor also led the charge. This is the inheritance of the spirit," said Cai Xuehua. "Parasols bloomed in the sky. At that moment, we overcame fear and gained courage."

Glory, continued in each major mission.

In front of the company barracks, six battle flags fluttered in a row. "Heroic and Tenacious," "Heroic Company in Hand-to-Hand Combat," "Invincible in Attack and Defense," "Iron Fortress," "Heroic Company of Laoshan," "Heroic Company in Earthquake Relief"... The company has been awarded six honorary titles by higher authorities, a record of glory. The battle flag of the "Heroic Hand-to-Hand Combat Company" has been reviewed twice in major military parades. This red battle flag, borne from the flames of war on the Taihang Mountains, has been tempered by the flames of battle and has long been forged into a spiritual blade, deeply embedded in the blood of the officers and men.

As long as the battle flag remains, so does the honor.

In 2019, during the selection of officers and men for the battle flag formation for the 70th National Day parade, Yang Shilong, a soldier from the company, was honored to be selected.

"When I learned I had the opportunity to participate in the parade bearing the battle flag of the 'Heroic Hand-to-Hand Combat Company,' I was so excited I couldn't sleep all night. The next morning at 4 a.m., I packed my backpack and set off to report to my superior unit." Yang Shilong remembers the scene vividly.

The training was grueling. When he felt tired, Yang Shilong would gaze at the hundreds of battle flags on the roof, with the "Heroic Hand-to-Hand Combat Company" flag prominently displayed among them. "Whenever I felt like giving up or exhausted, it inspired me and gave me endless motivation," he said.

One military posture training session required standing at attention for several hours. Under the scorching sun, Yang Shilong's clothes were already soaking wet. Halfway through the training session, soldiers around him began to give up and reported their withdrawal.

At that time, Yang Shilong had only one belief: "Never give up." As the minutes ticked by, he maintained his perfect form until the end of the training, earning the praise of the parade instructor.

Finally, Yang Shilong passed all the tests and marched through Tiananmen Square, carrying the "Heroic Hand-to-Hand Combat Company" flag aloft, to receive the review of the Party and the people. After the parade, he shed tears of emotion: "I have not dishonored the glory of the 'Heroic Hand-to-Hand Combat Company'!"

With faith, there is direction.

In 2021, Tian Batte, as a member of the Chinese delegation, participated in the "Scouting Vanguard" competition at the International Military Competition. Tian Batte made a self-proclaimed pledge: "As a member of the 'Heroic Hand-to-Hand Combat Company,' representing the Chinese army, I must win glory for my country!"

During the forced march, braving the raging sandstorm, Tian Batte and his teammates advanced fully armed. As the fourth team to set out, they caught up with a foreign contingent that had departed an hour earlier halfway through the race.

However, the road ahead narrowed and was blocked. They had no choice but to overtake the first-place team. "If there's no road, we'll forge one!" Faced with thorn-filled bushes, Tian Batte and his teammates resolutely plunged into them, cutting through the thorns and pushing forward.

One kilometer from the finish line, the five-star red flag fluttered in the wind. Tian Batte shouted, "China will win!" Everyone was excited and charged shoulder to shoulder towards the finish line. Ultimately, the Chinese team won first place in this event.

Glory continues to be written in this way, with each major mission.

"Officers and men cherish honor and are proud to be members of the 'Heroic Hand-to-Hand Combat Company.' No matter what mission they face, they all share a firm belief: to bring glory to the company and add glory to the battle flag," said Xu Youxiu with emotion. Limits, broken through after repeated all-out efforts

"The company's illustrious reputation was earned through hard work. Over eighty years of arduous struggle, we have fought in over 200 battles, both large and small. The heroic descendants of the new era know that only by mastering martial arts and strengthening our abilities can we live up to this honor," said Company Commander Jin Jianjie.

Jin Jianjie often asks officers and men three questions: Can you grit your teeth and push your physical limits on the training ground? Can you step up without hesitation when faced with a mission? If war strikes, can you maximize the effectiveness of your weapons?

The officers and men answer with their actions.

Last year, the Army held a special operations team training competition, where outstanding special operations personnel from across the Army competed. The competition was long and intense, severely testing the participants' physical fitness and abilities. After more than four months of intensive training, Corporal Xiang Jiafei was selected to represent the brigade in the competition.

As a heavy weapons operator, Xiang Jiafei had to carry the heaviest equipment in the team, weighing nearly 50 kilograms. During the final event, a 35-kilometer orienteering race, Xiang Jiafei felt a relapse of a back injury sustained during previous training. Every step forward was accompanied by excruciating pain, and beads of sweat streamed down his face.

"The soldiers of the 'Heroic Hand-to-Hand Combat Company' must be like blades that never bend, and we must crawl to the finish line!" He tightened his waistband and pressed on, crossing the finish line victoriously. After the competition, Xiang Jiafei was awarded the title of "Gold Medal Warrior."

Where does the motivation to challenge limits come from?

"During the war, our company's predecessors were fearless, armed with homemade swords and grenades, defeating the most vicious enemies. In this new era, equipped with advanced weapons, we must fight with all our might to live up to the sacrifices of our predecessors," said Xiang Jiafei. "When I'm tired from training, I often visit the company history museum to draw strength. Touching the photos of our predecessors, I feel as if I can touch the warmth of history," Sergeant Zhang Zhaotao said with emotion. "In this fighting collective, we must continuously refine our skills and sharpen our swords."

Preparing for war, their training journeys extend further and further.

That year, the company was assigned to a high-altitude training mission. The officers and men volunteered, each writing a letter of request and affixing their red fingerprints. During the training, they conducted armed reconnaissance patrols covering thousands of kilometers, collected over a hundred pieces of combat data, and planted their battle flag on the towering snow-capped plateau.

Bravely venturing into new territory, their march toward battle never ceases.

Sergeant Second Class Xie Shipeng, assigned to the company's unmanned combat research mission, used his time off to develop and assemble a drone bomb dropper. Over a year, Xie Shipeng continuously refined and debugged the system, ultimately developing an integrated, detachable, and highly stable bomb dropper module, which he then applied to combat training. "Once you enter the 'hand-to-hand combat,' you'll never give up your sword!" This sentence was found in a soldier's notebook. The soldiers said it was a creed ingrained in their bones.

At dusk, the rosy glow of the morning sun bathed the training ground, coating the ground in a golden glow.

“Our flag is before us, the ‘Heroic Hand-to-Hand Combat Company,’ growing strong amidst the flames of the Anti-Japanese War, loyal to the people and the Party...” After the training session, the soldiers lined up neatly beside the fluttering battle flag and sang the company song in unison. The sonorous melody echoed through the camp for a long time.

第 81 集团军某旅侦察二连：因人施策挖潜 培养岗位尖兵

来源：解放军报 作者：董子萱 王若龙 刘 敏 责任编辑：孙悦 2025-08-04

第八十一集团军某旅侦察二连营造“人人皆可成才、人人尽展其才”环境——

因人施策挖潜 培养岗位尖兵

■董子萱 王若龙 解放军报记者 刘 敏

前不久，记者到第 81 集团军某旅采访，很多官兵不约而同地提到了侦察二连，一时激起了记者的好奇.

到达该连后，指导员宋永帅把记者带到荣誉室，首先映入眼帘的是一面立功墙. “过去 3 年，我连官兵荣立 4 个二等功、11 个三等功，还有 6 名战士提干……”宋永帅自豪地介绍着. 记者感到，这份亮眼的“成绩单”是如何取得的，确实值得探究一番.

漫步来到训练场，记者看见一名新兵双手紧握绳索，两腿一收一蹬，奋力向上爬升.

宋永帅告诉记者，这名战士叫张建奥，是全营新兵中第一个爬绳“登顶”的战士，展现出较高的素质潜能，现在已经成为连队重点培养的对象.

在该连，像张建奥这样的新兵并不在少数，不仅是因为连队有“训练要争先、比武拿名次”的传统，更因为有一批侦察尖兵立起精武标杆. 班长陈龙伟，就是其中的代表.

“陈班长曾多次在上级组织的比武中摘得桂冠. 一次实兵对抗训练，陈龙伟主动请缨担负‘敌’后侦察任务，抢着完成难度最大、危险系数最高的工作……”谈起自己的班长，张建奥赞不绝口，眼神里满是崇拜.

“为了成为像陈班长一样的侦察尖兵，张建奥没少跟学、加练，战术动作、战斗体能等都有了明显进步. ”宋永帅说，有陈龙伟这样的班长骨干带头，许多战士都以“成为一名优秀的侦察兵”为目标，一门心思提升能力.

但是，实现这个目标谈何容易！素质要求高、专业难度大，不是每个人都能如愿，怎么办？面对记者的提问，宋永帅介绍，连队主官和班长骨干会反复考察每一名新兵的表现，结合本人意愿和岗位需要制订“成长路线图”，进行精细化培养.

在此之前，该连对于人才培养，一直有着这样的考量：“侦察兵作为‘尖刀上的刀尖’，其优势不在多，而在精. ”

因此，连队党支部大力推进“尖刀班”组建，却引起了不解和争议——“好苗子都进了‘尖刀班’，其他班怎么办？”那段时间，连队主官顶着压力，听取建议，一步步完善“尖刀班”动态进出机制，人才建设才步入正轨.

这让党支部一班人认识到，只有创造好的条件，官兵才能最大限度发挥个人优势，挖掘自身潜能，成为本职岗位上的尖兵.

不同于训练尖兵在比武场、演训场上一展身手，连队的保障人员一度默默无闻.

在一次“互赞会”上，战士王梓萌的名字被提及的次数最多. 那天，他第一次觉得自己对连队很重要.

当时，连队刚参加完上级组织的侦察班组连贯比武，载誉而归. 大家纷纷提到，前期训练器材不足，是王梓萌主动到兄弟连队协调，保证了连队训练的正常展开. 不仅如此，每天训练开始前，他早早将器材摆放到位，训练结束后，又默默地将器材清点收拢，进行维护保养.

“最开始，他的训练成绩并不是很突出，人也比较内向，但是对组织安排的工作特别认真负责. ”宋永帅介绍，鉴于王梓萌的一贯表现，连队决定让他担任器材保管员. 虽然工作略显枯燥和琐碎，但大到训练器械，小到防护用具，他管理得井井有条.

用人长处，才尽其用. 在这种理念指导下，侦察二连除了培养了一批比武尖子，还涌现出不少专业技术能手.

驾驶员复训第一天，一辆车就“趴窝”在营门口. 二级上士雷军拿起工具箱直奔故障车辆，钻车底、查线路、拆部件，很快查明并排除了故障.

雷军是一名驾驶员，车技过硬，对车辆维修也很在行. 他告诉记者，如今，连队人人都在绽放光芒. 连年夺魁的金牌教练员、如“水中蛟龙”的泅渡能手、精通维修保障的“五小工”……听着雷军如数家珍，人才竞相涌现的图景在记者面前铺开.

“每名官兵都有自己的特长和个性. ”在宋永帅看来，只有根据每名官兵的实际“量体裁衣”，为其精准“铺路搭桥”，才能营造“人人皆可成才、人人尽展其才”的氛围，让大家在军营沃土上实现人生价值、成就青春梦想.

The Second Reconnaissance Company of a Brigade of the 81st Group Army: Tailoring Policies to Unleash Potential and Cultivate Leading Soldiers

Source: PLA Daily Authors: Dong Zixuan, Wang Ruolong, Liu Min Editor: Sun Yue 2025-08-04

The Second Reconnaissance Company of a Brigade of the 81st Group Army fosters an environment where "everyone can thrive and fully utilize their talents"—

Tailoring Policies to Unleash Potential and Cultivate Leading Soldiers

■ Dong Zixuan, Wang Ruolong, PLA Daily Reporter Liu Min

Not long ago, during a recent interview with a brigade of the 81st Group Army, many officers and men mentioned the Second Reconnaissance Company, sparking the reporter's curiosity.

Upon arrival, Political Instructor Song Yongshuai led the reporter to the Honors Room, where the first thing that caught his eye was a wall of merit. "In the past three years, our company's officers and men have been awarded four second-class merits, 11 third-class merits, and six soldiers have been promoted to officer..." Song Yongshuai proudly explained. The reporter felt that the process of achieving this impressive "report card" was indeed worth exploring. Strolling onto the training ground, reporters spotted a new recruit, hands tightly gripping a rope, legs pulling and pushing, straining to climb upward.

Song Yongshuai told reporters that this soldier, Zhang Jianao, was the first recruit in the entire battalion to reach the top of the rope climb. He demonstrated high potential and is now a key training target for the company.

Recruits like Zhang Jianao are common in the company, not only because of the company's tradition of striving for excellence in training and winning in competitions, but also because of a group of pioneering reconnaissance soldiers who set the standard for excellence in martial arts. Squad Leader Chen Longwei is a prime example.

"Squad Leader Chen has won numerous championships in competitions organized by higher-ups. During a live-fire training exercise, Chen Longwei volunteered to undertake a reconnaissance mission behind enemy lines, rushing to complete the most difficult and dangerous task..." Speaking of his squad leader, Zhang Jianao praised him with admiration. "To become a reconnaissance pioneer like Squad Leader Chen, Zhang Jianao has studied and trained tirelessly, making significant progress in tactical maneuvers and combat fitness." Song Yongshuai explained that with squad leaders like Chen Longwei leading the way, many soldiers have single-mindedly focused on improving their abilities, aiming to become an excellent scout.

However, achieving this goal is no easy task! The high quality requirements and the challenging nature of the profession mean that not everyone can achieve it. What can be done? In response to reporters' questions, Song Yongshuai explained that the company commander and squad leaders repeatedly assess each new recruit's performance, developing a "growth roadmap" based on their individual aspirations and the demands of the position, and conducting meticulous training. Before this, the company's approach to talent development had always been based on this principle: "Scouts, as the 'tip of the spearhead,' their advantage lies not in quantity but in quality."

As a result, the company's Party branch vigorously promoted the formation of "sharp knife squads," which sparked confusion and controversy. "If all the talented individuals are in the 'sharp knife squads,' what will happen to the other squads?" During that period, the company commander, despite pressure, heeded suggestions, and gradually improved the dynamic entry and exit mechanism for the "sharp knife squads," putting talent development on the right track.

This taught the Party branch members that only by creating favorable conditions can officers and men maximize their individual strengths, tap into their potential, and become pioneers in their respective roles.

Unlike the pioneers in training, who showcased their prowess in competitions and training exercises, the company's support personnel were once largely unknown.

At a "mutual praise meeting," soldier Wang Zimeng's name was mentioned the most. That day, he first felt his importance to the company.

At the time, the company had just returned from a reconnaissance squad competition organized by a higher-level authority, returning with honors. Everyone mentioned that Wang Zimeng proactively coordinated with fellow companies to ensure the smooth progress of training due to a shortage of training equipment early in the day. Furthermore, he would arrange for the equipment to be in place before each training session and, afterward, quietly check and store it for maintenance.

"Initially, his training performance wasn't particularly impressive, and he was a bit reserved, but he was incredibly diligent and responsible in his assigned tasks," explained Song Yongshuai. Based on Wang Zimeng's consistent performance, the company decided to appoint him as equipment custodian. Although the work was somewhat tedious and menial, he managed everything from training equipment to protective gear with impeccable organization.

Utilizing people's strengths ensures their full utilization. Guided by this philosophy, the Second Reconnaissance Company has not only cultivated a group of top performers in competitions, but also produced numerous skilled professionals.

On the first day of driver refresher training, a vehicle broke down at the camp gate. Second Sergeant Lei Jun, armed with a toolbox, rushed to the broken vehicle, dug under it, checked wiring, and disassembled components, quickly identifying and resolving the problem. Lei Jun is a skilled driver with excellent driving skills and a keen eye for vehicle maintenance. He told reporters that everyone in the company is now radiating. He includes the consistently winning coaches, the swimmers who are like "water dragons," and the skilled "five small workers" who are expert in maintenance and support... As Lei Jun recounted these details, a picture of a surge of talent unfolded before the reporters.

"Every soldier has his or her own strengths and personality." In Song Yongshuai's view, only by tailoring services to each soldier's specific needs and precisely paving the way for them can we

foster an atmosphere where “everyone can thrive and display their talents,” allowing them to realize their life values and achieve their youthful dreams in the fertile soil of the military camp.

北部战区陆军某旅：服务到一线 新风拂边关

来源：解放军报 作者：李小健 邱 泉 责任编辑：孙悦 2025-08-04

北部战区陆军某旅——

服务到一线 新风拂边关

■李小健 邱 泉

炎炎夏日，北部战区陆军某旅“‘六送’下基层”活动如期展开. 机关通过文艺演出、理论宣讲等方式，将“文化、法纪、安全、心理、理论、健康”6 项服务送至边防一线.

相较以往，今年的机关服务队多了一条“规矩”——站岗做饭轮流上、设备展开撤收自己来，全程不占用基层一车一人. 这是该旅党委强化“基层至上、士兵第一”理念，着力改进工作作风的务实举措，深受基层官兵欢迎.

据了解，该旅部署分散、点多线长，即便同为一个连队战友，有时一年到头也难见几面. 正因如此，一线官兵对远道而来的机关服务队格外热情——主动帮忙布置场地、腾出宿舍安排住宿、申请派车运送给养……盛情之下，队员们常常难以拒绝.

今年上半年，该旅领导结束蹲点调研，将此情况摆上台面讨论：“好作风是服务的题中应有之义，机关‘六送’下基层，不能给基层增添负担. ”党委一班人研究决定，今后开展类似活动必须坚持“三不”原则：不影响正课、不增加负担、不占用资源，确保机关暖心服务真正送到每名官兵心坎上.

“大家辛苦了，下面由我们接替你们！”每到一个点位，为确保宣讲和演出尽可能全员覆盖、不落一人，服务队其余队员或走上哨位，或走进厨房，各尽其责. 队员王梦远、孙楠擅长厨艺，在服务基层过程中，他们把拿手菜逐连逐哨做了个遍，得到官兵好评；集中理论宣讲结束后，队员宋子龙把讨论课堂搬到训练场旁，与大家围坐一起，进行答疑解惑.

“机关服务队不仅送来了精神食粮，更送来了好作风. ”某边防连指导员郭泽光讲述了自己目睹的场景：“演出人员上哨位，带队干部下厨房，大家自带被褥，工作无需帮忙. ”

服务到一线，新风拂边关. 机关服务队作风的转变，是该旅党委倾心为基层解难的缩影. 他们在强军网开设“有问必答”专栏，将基层反映的问题“定人头、定事项、定时限”跟踪解决；深化挂钩帮带机制，常委带业务科室负责人下沉基层，现场办公……

A Brigade of the Northern Theater Command Army: Serving the Front Lines, Bringing a New Breeze to the Border

Source: PLA Daily Author: Li Xiaojian, Qiu Quan Editor: Sun Yue 2025-08-04

A Brigade of the Northern Theater Command Army -

Serving the Front Lines, Bringing a New Breeze to the Border

■Li Xiaojian, Qiu Quan

In the scorching summer heat, a brigade of the Northern Theater Command Army launched its "Six Deliveries to the Grassroots" campaign as scheduled. Through performances and theoretical lectures, the headquarters delivered six services—culture, law and order, safety, psychology, theory, and health—to the front lines of border defense.

Compared to previous years, this year's headquarters service team has added a new rule: guard duty and cooking are rotated, and equipment deployment and removal are done independently, without requiring any vehicles or personnel from the grassroots. This is a pragmatic measure taken by the brigade's Party Committee to strengthen the concept of "grassroots first, soldiers first" and to improve work style, and it has been well received by grassroots officers and men.

It is understood that the brigade's dispersed deployment and extensive routes mean that even comrades in the same company may rarely see each other throughout the year. Because of this, frontline officers and men were particularly enthusiastic about the headquarters service team, who traveled from afar. They offered to help set up the venue, vacate dormitories for accommodation, and request vehicles to deliver supplies... Such generous offers were often difficult for the team members to refuse.

In the first half of this year, the brigade leadership concluded their on-site research and discussed the situation: "Good work style is an integral part of service. The headquarters' 'Six Deliveries' to the grassroots must not burden them." The Party Committee decided that future similar activities must adhere to the "Three Nos" principle: no disruption to regular classes, no additional burden, and no diversion of resources, ensuring that the headquarters' heartwarming service truly reaches every officer and soldier.

"Thank you for your hard work, we'll take over!" At each location, to ensure that the presentations and performances reached as many personnel as possible, the remaining members of the service team would take up their posts or go into the kitchen, each fulfilling their respective duties. Team members Wang Mengyuan and Sun Nan are skilled cooks. While serving at the grassroots level, they prepared their signature dishes at each company and post, earning praise from officers and men. Following the concentrated theoretical lecture, team member Song Zilong moved the

discussion room to the training ground, where he sat down with everyone to answer questions and resolve doubts.

“The headquarters service team not only provided spiritual nourishment, but also fostered a positive work style,” said Guo Zeguang, an instructor at a border defense company, recounting a scene he witnessed: “Performers went to their posts, and team leaders went to the kitchen. Everyone brought their own bedding, and no assistance was needed.”

Serving the front lines, a new spirit is sweeping across the border. The transformation of the headquarters service team’s work style embodies the brigade’s Party Committee’s dedication to addressing challenges at the grassroots level. They launched a “Questions and Answers” column on the Strong Army website, tracking and resolving issues raised by the grassroots with specific individuals, specific issues, and specific deadlines. They also deepened the linkage and mentoring mechanism, with members of the Standing Committee leading department heads to the grassroots level for on-site work.

陆军某旅组织高温条件下多炮种协同训练

来源：解放军报 作者：刘华山 曹臻浩 责任编辑：郭妍菲 2025-08-04

陆军某旅组织高温条件下多炮种协同训练——

酷暑时节砺精兵

■刘华山 曹臻浩

烈日炎炎，热浪蒸腾，硝烟弥漫. 近日，陆军某旅火力分队一场实兵实弹对抗训练在高温高湿条件下紧张展开.

“完成射击准备！”首轮火力打击开始，各炮组沉着应对，接收参数后迅速依托火控系统解算射击诸元、完成弹药选择，在极端天气下展现出较强的灵活性.

“高温是天然的‘磨刀石’，今天洒下的每一滴汗水，都是在为未来战场积累作战经验.”该旅领导介绍，此次训练官兵不仅要面对陌生地域、恶劣天候的挑战，还要接受比以往训练标准更严、时限更短的考验，而且在训练中，导调组改变了常见的多炮齐射模式，临机指定不同火炮独立摧毁特定目标，给训练增加了难度.

刚完成射击的炮管还在发烫，一组官兵立刻撤出. 另一炮组官兵迅速进行射击准备. “瞄准！”口令过后，瞄准手虽然汗流满面，依然目不转睛地盯着瞄准镜.

“高温给装备性能和人员耐力都带来巨大挑战，为此我们探索出‘轮转木马’的打击模式.”分队指挥员陈伟平介绍，根据训练实际，他们将参训官兵分为射击、机动、准备 3 个小组，

采用轮换方式持续发扬火力，不仅有效避免单一炮位长时间暴露和人员体能消耗的问题，还在高温条件下检验了多炮种协同、多方式打击的战法.

“战斗”继续进行，某炮长果断指挥炮组预选多个射击阵位，按照“射击—机动—射击”流程实施快打快撤，在机动中保存自身力量，在分散中保持与整体的联动.

“‘敌’装甲分队突破炮火封锁，立即拦阻！”收到导调指令，火力打击队自主解算射击诸元，对装甲集群实施饱和打击. 一轮火力压制完成，无人机迅速升空，精准评估毁伤效果.

走下训练场，官兵已是大汗淋漓. 在复盘总结中，大家针对训练中暴露出的问题展开热烈讨论，并制订针对性改进措施，为下一步专攻精练找准方向.

An Army Brigade Conducts Multi-Artillery Coordinated Training in High-Temperature Conditions

Source: PLA Daily Author: Liu Huashan, Cao Zhenhao Editor: Guo Yanfei 2025-08-04

An Army Brigade Conducts Multi-Artillery Coordinated Training in High-Temperature Conditions --

Scorching Summer, Sharpening Soldiers

■ Liu Huashan, Cao Zhenhao

The sun scorches, the heat waves rise, and the smoke of gunpowder thickens. Recently, a firepower unit of an Army brigade conducted an intense live-fire confrontation training exercise in high temperature and high humidity.

“Fire preparation complete!” The first round of fire began. Each artillery unit responded calmly. After receiving the parameters, they quickly relied on the fire control system to calculate the firing parameters and complete ammunition selection, demonstrating strong flexibility in the extreme weather. “High temperatures are a natural ‘grindstone.’ Every drop of sweat we shed today is accumulating combat experience for future battlefields.” Brigade leaders explained that this training session not only challenged soldiers in unfamiliar terrain and inclement weather, but also required them to meet stricter standards and shorter deadlines than in previous training sessions. Furthermore, during the training, the command and control team altered the typical multi-gun salvo pattern, assigning different guns to independently destroy specific targets, adding to the training’s difficulty.

The gun barrels, still scorching from their firing, immediately withdrew as one group of soldiers. The other group quickly prepared for firing. “Aim!” After the command, the gunner, sweating profusely, remained fixed on the scope. “High temperatures pose a significant challenge to both equipment performance and personnel endurance. To address this, we’ve developed a ‘rotating’

strike model," explained Chen Weiping, the squadron commander. Based on actual training, the participating soldiers were divided into three groups: firing, maneuvering, and preparation. This rotational approach continuously unleashed firepower. This not only effectively avoided prolonged exposure to a single artillery position and the resulting physical exhaustion of personnel, but also tested the coordinated, multi-artillery attack strategy under high-temperature conditions.

As the "battle" continued, a gunner decisively directed his crew to preselect multiple firing positions, implementing a "fire-maneuver-fire" process of rapid engagement and retreat, conserving their own strength while maneuvering and maintaining coordination with the overall team while dispersing.

"The 'enemy' armored unit has broken through the artillery blockade; immediately intercept!" Upon receiving the command, the fire strike team independently calculated the firing parameters and launched a saturation strike against the armored cluster. After completing a round of fire suppression, the drone quickly took off to accurately assess the damage.

Leaving the training ground, the soldiers were already sweating profusely. During the review and summary, everyone had a heated discussion on the problems exposed in the training, and formulated targeted improvement measures to find the right direction for the next step of focusing on refinement.

酷暑时节砺精兵！直击陆军某旅多炮种协同训练现场

来源：中国军网-解放军报 作者：刘华山 曹臻浩 责任编辑：郭妍菲

2025-08-04

陆军某旅组织高温条件下多炮种协同训练——

酷暑时节砺精兵

■刘华山 曹臻浩

烈日炎炎，热浪蒸腾，硝烟弥漫. 近日，陆军某旅火力分队一场实兵实弹对抗训练在高温高湿条件下紧张展开.

"完成射击准备！"首轮火力打击开始，各炮组沉着应对，接收参数后迅速依托火控系统解算射击诸元、完成弹药选择，在极端天气下展现出较强的灵活性.

"高温是天然的'磨刀石'，今天洒下的每一滴汗水，都是在为未来战场积累作战经验."该旅领导介绍，此次训练官兵不仅要面对陌生地域、恶劣天候的挑战，还要接受比以往训练标准更严、时限更短的考验，而且在训练中，导调组改变了常见的多炮齐射模式，临机指定不同火炮独立摧毁特定目标，给训练增加了难度.

刚完成射击的炮管还在发烫，一组官兵立刻撤出. 另一炮组官兵迅速进行射击准备. “瞄准！”口令过后，瞄准手虽然汗流满面，依然目不转睛地盯着瞄准镜.

“高温给装备性能和人员耐力都带来巨大挑战，为此我们探索出‘轮转木马’的打击模式.”分队指挥员陈伟平介绍，根据训练实际，他们将参训官兵分为射击、机动、准备 3 个小组，采用轮换方式持续发扬火力，不仅有效避免单一炮位长时间暴露和人员体能消耗的问题，还在高温条件下检验了多炮种协同、多方式打击的战法.

“战斗”继续进行，某炮长果断指挥炮组预选多个射击阵位，按照“射击—机动—射击”流程实施快打快撤，在机动中保存自身力量，在分散中保持与整体的联动.

“‘敌’装甲分队突破炮火封锁，立即拦阻！”收到导调指令，火力打击队自主解算射击诸元，对装甲集群实施饱和打击. 一轮火力压制完成，无人机迅速升空，精准评估毁伤效果.

走下训练场，官兵已是大汗淋漓. 在复盘总结中，大家针对训练中暴露出的问题展开热烈讨论，并制订针对性改进措施，为下一步专攻精练找准方向.

A Scorching Summer Heats Up the Troops! A Live Look at an Army Brigade’s Multi-Artillery Coordinated Training Exercise.

Source: China Military Network - PLA Daily Author: Liu Huashan, Cao Zhenhao Editor: Guo Yanfei

2025-08-04

An Army brigade conducts multi-artillery coordinated training in high-temperature conditions.

A scorching summer heats up the troops.

■Liu Huashan, Cao Zhenhao

The sun blazes, the heat waves rise, and the smoke of gunfire fills the air. Recently, a firepower unit of an Army brigade conducted an intense live-fire confrontation training exercise in high temperature and high humidity.

“Fire preparation complete!” The first round of fire began. Each artillery unit responded calmly. After receiving the parameters, they quickly relied on the fire control system to calculate the firing parameters and select ammunition, demonstrating strong flexibility in the extreme weather. “High temperatures are a natural ‘grindstone.’ Every drop of sweat we shed today is accumulating combat experience for future battlefields.” Brigade leaders explained that this training session not only challenged soldiers in unfamiliar terrain and inclement weather, but also required them to meet stricter standards and shorter deadlines than in previous training sessions. Furthermore, during the

training, the command and control team altered the typical multi-gun salvo pattern, assigning different guns to independently destroy specific targets, adding to the training's difficulty.

The gun barrels, still scorching from their firing, immediately withdrew as one group of soldiers. The other group quickly prepared for firing. "Aim!" After the command, the gunner, sweating profusely, remained fixed on the scope. "High temperatures pose a significant challenge to both equipment performance and personnel endurance. To address this, we've developed a 'rotating' strike model," explained Chen Weiping, the squadron commander. Based on actual training, the participating soldiers were divided into three groups: firing, maneuvering, and preparation. This rotational approach continuously unleashed firepower. This not only effectively avoided prolonged exposure to a single artillery position and the resulting physical exhaustion of personnel, but also tested the coordinated, multi-artillery attack strategy under high-temperature conditions.

As the "battle" continued, a gunner decisively directed his crew to preselect multiple firing positions, implementing a "fire-maneuver-fire" process of rapid engagement and retreat, conserving their own strength while maneuvering and maintaining coordination with the overall team while dispersing.

"The 'enemy' armored unit has broken through the artillery blockade; immediately intercept!" Upon receiving the command, the fire strike team independently calculated the firing parameters and launched a saturation strike against the armored cluster. After completing a round of fire suppression, the drone quickly took off to accurately assess the damage.

Leaving the training ground, the soldiers were already sweating profusely. During the review and summary, everyone had a heated discussion on the problems exposed in the training, and formulated targeted improvement measures to find the right direction for the next step of focusing on refinement.

陆军某旅抓好野外驻训期间为基层解难工作

来源：解放军报 作者：李卓煜 曾亮凯 责任编辑：郭妍菲 2025-08-05

陆军某旅抓好野外驻训期间为基层解难工作

“移动服务站”设在驻训点

解放军报讯 李卓煜、曾亮凯报道：“我们对野外驻训期间的解难流程进行了优化，并在流程表上标注了具体负责人和联系电话……”夏日，陆军某旅野外驻训场上，部队管理科陈参谋结合他们新制订的驻训常见问题解答手册，为官兵答疑解惑. 据了解，为让官兵全身心投入驻训任务，该旅在驻训点设立“移动服务站”，伴随式提供政策咨询、业务办理、技术保障等服务，赢得官兵好评.

“‘移动服务站’设在驻训点，暖心又贴心.”拿着刚刚办好的公积金贷款批准书，某坦克连中士邢又木高兴地说，由于驻训任务重、节奏快，加之点位分散，以往办理类似业务需多次往返机关，如今机关相关部门工作人员在“移动服务站”现场办公，为大家排忧解难.

该旅领导介绍，今年驻训开始前，他们针对前期收集梳理的“业务办理耗时长”“政策咨询渠道少”“装备检修效率低”等问题，抽调人力资源、装备维修、财务等科室骨干组成“移动服务站”，定期前往各驻训点位巡回开展服务. 他们还建立督导落实机制，通过督导检查、双向评议和跟踪问效，确保服务站高质高效运行、实实在在解难.

开设“战地图书馆”、成立“心理服务小分队”、配发便携式净水设备……据了解，该旅在驻训地开设“移动服务站”以来，已累计解决官兵急难问题数十个，推出多项为基层服务的务实举措，有效激发官兵训练热情.

An Army Brigade Is Strengthening Its Efforts to Resolve Issues for Its Grassroots Units During Field Training

Source: PLA Daily Author: Li Zhuoyu, Zeng Liangkai Editor: Guo Yanfei 2025-08-05

An Army brigade is strengthening its efforts to resolve issues for its grassroots units during field training.

“Mobile service stations” have been set up at training sites.

PLA Daily reports: “We have optimized the problem-solving process during field training and have marked specific responsible persons and contact numbers on the process chart...” During the summer, during a field training camp at an Army brigade, Staff Officer Chen from the Force Management Section answered questions from officers and men using their newly developed frequently asked question (FAQ) manual. To ensure soldiers fully engage in their training mission, the brigade has established “mobile service stations” at training sites, providing policy consultation, business processing, technical support, and other services. These services have earned praise from officers and men. “The ‘Mobile Service Station’ at the training site is heartwarming and thoughtful,” said Sergeant Xing Youmu of a tank company happily, holding a newly obtained Housing Provident Fund loan approval. Due to the heavy workload and fast pace of the training, as well as the scattered locations, similar matters previously required multiple trips to headquarters. Now, staff from relevant departments are working on-site at the “Mobile Service Station,” helping everyone resolve issues.

Brigade leaders explained that before this year’s training began, they addressed issues identified earlier, such as “long processing times,” “limited policy consultation channels,” and “inefficient equipment maintenance.” They assigned key personnel from human resources, equipment maintenance, and finance departments to form “Mobile Service Stations,” which regularly traveled to various training locations to provide services. They also established a supervisory and

implementation mechanism, ensuring the high-quality and efficient operation of the service stations and their effective solutions through inspections, two-way reviews, and performance follow-up. Opening a “battlefield library”, establishing a “psychological service team”, distributing portable water purification equipment... It is understood that since the brigade opened the “mobile service station” at the training site, it has solved dozens of urgent problems for officers and men, launched a number of practical measures to serve the grassroots, and effectively stimulated the training enthusiasm of officers and men.

直播授课在军营“走红”，陆军某旅的教育课堂新亮点十足

来源：中国军网-解放军报 作者：王飞虎 李天文 刘小云 责任编辑：郭妍菲 发布：2025-08-05

陆军某旅开掘红色资源提升思想政治教育质效——

现地寻根开直播 源头活水入课堂

■王飞虎 李天文 解放军报特约通讯员 刘小云

又一次授课结束了，陆军某旅“红三连”指导员孙义意犹未尽，还有再讲一堂的冲动. 这是前不久，孙义在参与该旅红色历史寻根活动途中，为数百公里外的全营官兵进行微课直播后的强烈感受.

直播中，孙义化身“网络博主”在红色场馆边走边讲，在线回答战友提问，大家积极互动，课堂氛围热烈. 课后，不少官兵感慨：“这种直播教育课很有参与感、代入感！”

寻根返回后，孙义将获得的资料融入课堂，在野外驻训地为官兵授课. 徐超 摄

直播教育授课是该旅开掘红色资源，激活教育课堂的新举措. 今年以来，该旅为补充完善旅队历史资料，遴选优秀政治教员和视频拍摄骨干组成多个小分队，沿着单位发展脉络开展寻根活动. 活动中，每个小分队及时运用寻根成果开展现地线上授课，激活教育课堂“一池春水”，引导官兵传承红色基因，弘扬优良传统.

孙义所在的一营前身是晋察冀军区某团，在“百团大战”中因作战勇猛果敢、连战连捷，获得“势如破竹”荣誉战旗. 孙义带领的小分队深入山西、河北等地，追寻部队抗战光辉历程.

在某红色场馆，听完首任团长李和辉轻伤不下火线，牺牲时年仅 26 岁的英雄事迹后，孙义内心深受震撼，决定采取现地直播方式，把故事中鲜为人知的细节，讲给全营官兵听.

广泛收集史料、反复打磨讲稿、精选直播场景……经过两天精心准备，孙义以“英雄从不后退”为主题，讲了一堂 20 分钟的微课，引发热烈反响. 干部余聪在线上留言：“没有昔日英雄的献身，哪有现在的美好生活. 我们唯有传承红色基因，创造出更好的成绩，才能无愧于他们的牺牲奉献！”

第一次直播授课成功，孙义有了一些心得. 他认为，形式只是影响教育效果的一个方面，更重要的是内容要紧扣官兵关切，回应现实需求. 按照这一思路，在接下来的寻根路上，孙义带着小分队查证历史资料，探寻战斗故事，以“战斗遗址讲战例”“听儿子回忆父亲抗战往事”为主题，又进行了两次直播授课，效果一次比一次好.

某连张指导员也参加了寻根活动. 他所在连队曾被中央军委授予“英雄侦察连”荣誉称号. 此次寻根，张指导员走访曾在连队服役的 10 名参战老兵，从老兵口中证实和完善了连史记录上的诸多细节.

寻根过程中，张指导员听到最多的是老兵讲打仗的故事，感触最深的是老兵的战斗精神. 一次，听老连长王振林讲述连队官兵侦察某高地与敌遭遇，大家冒着枪林弹雨冲锋的经过，张指导员激动不已，责任感油然而生：要把这种精神传递给更多人.

返营后，在上级机关支持下，张指导员邀请王振林来队授课. 授课当天，大礼堂里座无虚席，王振林深情讲述当年血与火的生死较量，听“打过仗的老兵”讲“打仗的故事”，官兵们热血沸腾、深受触动.

列兵潘国琦此前对训练有些畏难情绪. 听完这堂课后，他主动针对短板弱项展开专攻精练，每天练习负重越野，向战友请教专业技能. 经过一段时间的努力，潘国琦在营里组织的比武中取得手榴弹投远第二名.

为充分用好红色历史寻根活动成果，该旅要求各小分队在寻根过程中采集大量视频、图片、文字等素材，与全旅政治教员共享，融入教育课堂，组织官兵在课后围绕“传承先辈精神 争当打赢先锋”开展讨论辨析.

该旅机关还对素材进行筛选剪辑，区分不同主题制作宣传片，在营区大屏幕上展播，方便官兵观看学习. 在红色历史和英雄故事的感召激励下，该旅官兵责任感使命感更加强烈，练兵备战状态愈发饱满昂扬. 近期，该旅在野外展开实兵对抗训练，官兵们灵活运用战术战法应对各种特情，没有人叫苦喊累.

Livestreaming Lectures Are Trending in Military Camps, Highlighting the New Educational Opportunities within an Army Brigade

Source: China Military Network - PLA Daily Author: Wang Feihu, Li Tianwen, Liu Xiaoyun Editor: Guo Yanfei Published: 2025-08-05

An Army brigade is tapping into revolutionary heritage resources to enhance the quality and effectiveness of ideological and political education.

Livestreaming on-site root-seeking activities brings fresh insights into the classroom.

■ Wang Feihu, Li Tianwen, PLA Daily Special Correspondent Liu Xiaoyun

Another lecture has concluded, and Sun Yi, political instructor of the "Red Third Company" of an Army brigade, is still eager to give another lecture. This was Sun Yi's experience recently after conducting a livestream micro-lecture for the entire battalion hundreds of kilometers away while participating in the brigade's red history root-seeking activities.

During the livestream, Sun Yi, embodying a "web blogger," walked through revolutionary venues, giving lectures and answering questions from his online comrades. The lively interaction created a lively classroom atmosphere. After the class, many soldiers expressed their gratitude, saying, "This livestream education class is so engaging and immersive!"

After returning from his roots-seeking trip, Sun Yi incorporated the materials he gathered into his classroom, teaching soldiers at his field training location. Photo by Xu Chao

Livestream education classes are a new initiative for the brigade to tap into revolutionary resources and revitalize its educational classroom. Since the beginning of this year, to supplement and improve the brigade's historical archives, the brigade has selected outstanding political instructors and videographers to form teams to conduct root-seeking activities along the unit's developmental trajectory. During these activities, each team leveraged the findings from the root-seeking activities to conduct on-site online classes, revitalizing the educational classroom and guiding soldiers to inherit the revolutionary legacy and promote fine traditions.

Sun Yi's 1st Battalion, formerly a regiment of the Shanxi-Chahar-Hebei Military Region, was awarded the "Unstoppable" honorary battle flag for its valor and successive victories during the "Hundred Regiments Offensive." Sun Yi's team has traveled extensively to Shanxi, Hebei, and other regions to trace the glorious journey of the unit during the War of Resistance Against Japanese Aggression. At a revolutionary venue, Sun Yi was deeply moved after hearing the heroic story of the first regimental commander, Li Hehui, who died at the age of 26 despite a minor injury. He decided to livestream the story to the entire battalion.

After two days of meticulous preparation, Sun Yi collected extensive historical materials, carefully polished his speech, and selected livestream scenes. He delivered a 20-minute micro-lecture on the theme, "Heroes Never Retreat," which garnered enthusiastic responses. Officer Yu Cong commented online, "Without the sacrifices of past heroes, we wouldn't have the wonderful life we have today. Only by carrying on the revolutionary legacy and achieving even greater results can we live up to their sacrifices!"

Sun Yi's first livestream lecture was a success, and he gained some insights. He believes that format is only one aspect of educational effectiveness; more importantly, the content must be relevant to the concerns of soldiers and address their real-world needs. Following this approach, Sun Yi led his team on their subsequent root-seeking journey, researching historical materials and exploring battle stories. They conducted two more livestreamed lectures, each with greater impact, themed "Recounting Battle Examples at Battle Sites" and "Listening to Sons Reminisce Their Fathers' Wartime Stories."

Instructor Zhang, a company commander, also participated in the root-seeking activities. His company had been awarded the honorary title of "Heroic Reconnaissance Company" by the Central Military Commission. During this root-seeking trip, Instructor Zhang interviewed 10 veterans who had served in the company, verifying and refining numerous details in the company's historical records.

During the root-seeking process, Instructor Zhang heard most of the veterans' stories about the battle, and what touched him most deeply was their fighting spirit. Once, listening to former company commander Wang Zhenlin recount how his company encountered the enemy while scouting a high ground, charging under heavy fire, Zhang was deeply moved and a sense of responsibility emerged: to pass on this spirit to more people.

After returning to the camp, with the support of higher authorities, Instructor Zhang invited Wang Zhenlin to teach at the company. On the day of the lecture, the auditorium was packed. Wang Zhenlin recounted with deep emotion the life-and-death struggles of those days. Listening to the "war stories" told by a "veteran soldier" moved the soldiers passionately and deeply.

Private Pan Guoqi had previously been somewhat intimidated by training. After this class, he proactively focused on his weaknesses, practicing cross-country running with weights daily and asking his comrades for advice on specialized techniques. After a period of hard work, Pan Guoqi won second place in the long-range grenade throw competition organized by the battalion.

To fully utilize the results of the Red History Roots-Seeking Activities, the brigade required each team to collect a large amount of video, image, and text materials during the process. These materials were shared with the brigade's political instructors and incorporated into the classroom. After the classes, soldiers were invited to hold discussions and analysis around the theme of "Inheriting the Spirit of Our Forefathers and Striving to Be Vanguards in Victory."

The brigade headquarters also screened and edited the materials, creating promotional videos based on different themes, which were then shown on large screens throughout the camp for easy viewing and learning. Inspired by revolutionary history and heroic stories, the brigade's officers and men have a stronger sense of responsibility and mission, and their training and combat readiness have become even more vigorous and energetic. Recently, the brigade conducted live-fire combat training in the field, where officers and men flexibly applied tactics and strategies to respond to various special situations, without complaining of fatigue.

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：闫帅印 宋子洵 责任编辑：李佳琦 2025-08-06

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

求真务实改作风 深入一线解难题

■闫帅印 解放军报记者 宋子洵

战备等级转换，旅保障部干部郑振合理安排出动顺序，协调兄弟单位油料保障；实兵推演，旅侦察科干部王海峰实时更新敌我作战态势，帮助营连指挥员科学决策；网络攻防对抗，旅信息保障科干部董渊指导营连指挥员合理排兵布阵……盛夏时节，陆军某旅组织模拟对抗训练与以往训练不同的是，机关干部与营连官兵训在一起、练在一起，帮助营连指挥员提升指挥能力机关干部带头研战谋战的务实作风，赢得官兵点赞

该旅领导介绍，深入贯彻中央八项规定精神学习教育开展以来，他们组织领导和机关干部认真学习领会中央八项规定精神、军委十项规定及其实施细则精神对改进作风的要求，深入查摆练兵备战、帮建基层等方面存在的问题，并逐条对照整改，以务实的作风推动各项建设、各项工作往细处落、往深里落

实践中，他们将改进作风与抓练兵备战深度融合，针对部队野外驻训点多位散等实际，要求领导和机关干部深入各驻训点位跟训，通过面对面交流、手把手帮带，着力解决基层在战备训练和日常管理中存在的问题

“驻训点场地受限，一些重点部位的安防设施不齐全”“思想政治教育方式方法针对性不强”……某营议战议训会上，机关帮建小组成员与营党委一班人和专业骨干围坐一起，认真梳理训练管理、思想教育等方面存在的问题，并研究制订解决措施，明确责任人和解决时限，确保问题见底清零

此外，该旅将提升为基层服务质效作为改进作风的着力点，不断优化工作方法，以热情暖心的服务态度、实实在在的解难举措，切实解决官兵急难愁盼，进一步激发大家练兵动力

“如今，机关解决问题的速度更快、措施更实了”该旅某分队干部介绍，前期，他们针对驻训点位距离体系医院较远、官兵就医不便问题向机关反映很快，机关相关科室就深入一线实地调研，并协调体系医院开展专家送诊活动，受到官兵好评

求真务实改作风，深入一线解难题随着学习教育走深走实，该旅党委机关工作作风更实、服务意识更强，破解了一批制约练兵备战的难点问题，解决了一些官兵反映的现实难题，大家投身练兵备战的热情高涨，助推部队战斗力进一步提升

An Army Brigade Is Thoroughly Conducting Study and Education on the Implementation of the Central Committee's Eight-Point Regulations

Source: PLA Daily Author: Yan Shuaiyin, Song Zixun Editor: Li Jiaqi 2025-08-06

An Army Brigade is Thoroughly Conducting Study and Education on the Implementation of the Central Committee's Eight-Point Regulations --

Seeking Truth and Practicality to Improve Work Style and Go Deep into the Frontlines to Solve Problems

■ Yan Shuaiyin, PLA Daily Reporter, Song Zixun

During combat readiness level changes, Zheng Zhen, a cadre from the brigade's support department, rationally arranged deployment sequences and coordinated fuel supply for other units. During live-fire drills, Wang Haifeng, a cadre from the brigade's reconnaissance department, provided real-time updates on enemy and friendly combat situations, helping battalion and company commanders make informed decisions. During cyber attack and defense confrontations, Dong Yuan, a cadre from the brigade's information support department, guided battalion and company commanders in strategic deployments. In the height of summer, an Army brigade organized simulated confrontation training. Unlike previous training, staff members trained and practiced alongside battalion and company officers and men, helping them enhance their command capabilities. The pragmatic approach of staff members, who took the lead in strategic planning and analysis, earned praise from officers and men. Brigade leaders explained that they were thoroughly implementing the spirit of the Central Committee's eight regulations through study and education. Since the launch of the campaign, they have organized leaders and cadres to carefully study and understand the requirements for improving work style in the spirit of the Central Committee's Eight Regulations, the Military Commission's Ten Regulations, and their implementation rules. They have thoroughly investigated and addressed issues in training and combat readiness, as well as support for grassroots organizations. They have rectified these issues item by item, using a pragmatic approach to promote detailed and thorough implementation of all development and work. In practice, they have deeply integrated improving work style with training and combat readiness. In light of the scattered nature of the troops' field training sites, they have required leaders and cadres to visit and follow up with them at each site. Through face-to-face communication and hands-on guidance, they have focused on resolving issues at the grassroots level in combat readiness training and daily management. Training sites are limited, and security facilities in some key areas are incomplete. "Ideological and political education methods and approaches are not targeted enough." At a battalion's combat and training meeting, members of the headquarters support team sat down with the battalion's Party Committee and key professional personnel to carefully identify problems in training management and ideological education. They

then developed solutions, clearly defined responsibilities and deadlines, and ensured that all issues were addressed.

In addition, the brigade focused on improving the quality and effectiveness of its grassroots services, continuously optimizing its work methods. With a warm and caring service attitude and practical problem-solving measures, it effectively addressed the urgent needs of officers and men, further stimulating their motivation for training.

“If... “Today, the headquarters is resolving issues more quickly and with more practical measures,” said a detachment officer from the brigade. Initially, they reported to headquarters the inconvenience caused by the distance between their training location and the system hospital, which hindered medical care for soldiers. The relevant departments conducted on-site investigations and coordinated with the system hospital to provide expert consultations, which was well received by soldiers. [The text then abruptly shifts topics.] Seeking truth from facts, improving work styles, and addressing problems on the front lines have deepened and strengthened the Party Committee’s work style and service awareness. They have addressed a number of issues hindering training and preparation, resolving some of the practical challenges raised by soldiers. The enthusiasm for training and preparation has surged, further enhancing the unit’s combat effectiveness.

陆军某旅开展复杂气象条件下飞行考核

来源：解放军报 作者：张志敏 童祖静 责任编辑：李佳琦 2025-08-06

陆军某旅开展复杂气象条件下飞行考核——

穿云破雨向战飞

■张志敏 解放军报特约记者 童祖静

夏日，浓云密布、海浪翻涌，陆军某旅多架直升机穿越云层，一场复杂气象条件下飞行考核在某沿海区域展开

“气象条件突变！”战机刚飞至任务区域上空，海上天气骤变，一阵强侧风让战机出现抖动飞行指挥塔台里，指挥员紧盯实时气象数据，沉着指挥机组人员依据风向、风速快速修正偏差，调整飞行姿态飞行员凭借过硬技术和密切配合，顺利完成飞行考核任务

“复杂气象条件是砥砺飞行本领的‘磨刀石’”该旅领导介绍，此次考核依托海上复杂气象条件展开，考核中临机导调多个高难度课目，倒逼飞行员在复杂环境中练协同、练战法，进一步提升部队全天候作战能力

谈及开展复杂气象条件下飞行考核的初衷，该旅飞行参谋讲起去年一次失利经历对抗训练中，该旅某机组受海上复杂气象条件影响，未能成功实施超低空突防，还被对方火控系统锁定，导致任务失利

训练结束后，该旅痛定思痛，认真总结经验，多措并举提高部队实战化水平他们结合不同环境、不同天候条件，修订完善空中特情险情、地面应急保障等处置预案，并围绕提升飞行员应急处置能力展开专攻精练；合理调配机组人员，常态邀请领航、气象、通信等专业人员进行授课辅导；推开模拟训练、实飞训练、进阶考核的梯次训练模式，锤炼飞行员态势感知、协同作战等能力

“遭遇海上团雾，能见度低！”绵绵阴雨中，20余个战术飞行课目轮番展开塔台指挥员结合天候变化临机导调，战机时而穿云破雨实施隐蔽突击，时而沿着山脊线飞行规避“敌”雷达搜索，飞行员快速反应和应急处置能力得到有效检验

考核归来，参考人员立即展开复盘总结他们针对考核中暴露出的问题制订整改措施，确保打一仗进一步

An Army Brigade Conducts Flight Assessment in Complex Weather Conditions

Source: PLA Daily Author: Zhang Zhimin, Tong Zujing Editor: Li Jiaqi 2025-08-06

An Army Brigade Conducts Flight Assessment in Complex Weather Conditions --

Piercing Clouds and Rain to Fight

■Zhang Zhimin, PLA Daily Special Correspondent, Tong Zujing

On a summer day, amidst dense clouds and surging seas, several helicopters from an Army brigade pierced the clouds, conducting a flight assessment in complex weather conditions in a coastal area.

“Weather conditions suddenly changed!” Just as the combat aircraft approached the mission area, the weather at sea suddenly shifted, and a strong crosswind caused the aircraft to shake In the flight control tower, the commander closely monitored real-time weather data and calmly directed the crew to quickly correct deviations based on wind direction and speed, adjusting flight attitude. The pilots, with their exceptional skills and close coordination, successfully completed the flight assessment “Complex weather conditions are the ‘grindstone’ that sharpens flying skills.” Brigade leaders explained that this assessment, conducted under complex weather conditions at sea, involved improvisation and multiple challenging tasks, forcing pilots to practice coordination and tactics in complex environments, further enhancing the unit’s all-weather combat capabilities.

Discussing the original intention of conducting flight assessments in complex weather conditions, the brigade’s flight staff officer recounted a failed experience last year. During a confrontation training exercise, a crew from the brigade, hampered by complex weather conditions at sea, failed

to successfully conduct an ultra-low-altitude penetration and was even locked onto by the enemy's fire control system, resulting in mission failure.

After the training, the brigade reflected on its mistakes, carefully summarized its experience, and implemented multiple measures to improve the unit's combat readiness. They revised and improved emergency response plans for special air situations and dangerous conditions, as well as ground emergency support, to accommodate diverse environments and weather conditions. They also focused on enhancing pilots' emergency response capabilities. They rationally deployed crews and regularly invited professionals in navigation, meteorology, and communications to provide instruction and guidance. They implemented a tiered training model encompassing simulation training, actual flight training, and advanced assessments to hone pilots' situational awareness and coordinated operations.

"Encountered fog at sea, visibility is low!" Amidst the persistent rain, over 20 tactical flight courses were conducted. Tower controllers made impromptu adjustments based on weather conditions. Combat aircraft sometimes flew through the clouds and rain for covert assaults, and sometimes flew along mountain ridges to evade "enemy" radar detection. The pilots' quick reaction and emergency response capabilities were effectively tested.

After returning from the assessment, participants immediately conducted a review and summary. They formulated corrective measures for any issues identified during the assessment, ensuring continued improvement.

"心里话信箱"传心声，看指导员如何激活战士隐藏"潜能"

来源：中国军网-解放军报 作者：杞卫东 王璨然 谭志 责任编辑：郭妍菲

2025-08-07

善于发掘战士的"潜能爱好"

■第七十七集团军某旅某连指导员 杞卫东

"感谢指导员，是您的鼓励和帮助让我重拾信心. "前不久，上等兵小刘对我表达了谢意. 看着他从沉默寡言变得满脸自信，我很是欣慰.

小刘以前比较内向，下连一年多来很少主动和战友交流，训练成绩也不突出. 每次集体活动，他常默默待在角落，找他交流谈心，他也总是问一句答一句，不愿多说.

一天晚饭后，我路过宿舍时，忽然听到一阵悠扬的口琴声. 推门一看，小刘正在专注地吹奏. 见我进来，他慌忙收起口琴解释："我就是随便吹吹. "

“没想到你还有这门才艺. ”我问他，“以前咋没见你吹过？”小刘低着头说：“我觉得自己吹得不好，怕大家见笑……”

交流中我发现，小刘不是不想融入集体，只是由于不够自信，这才隐藏了自己的爱好特长.

我在连务会上讲了此事，大家研究后决定，由小刘负责连队的文化活动策划，组织“军营才艺角”. 我宣布后，见小刘有些惊讶与忐忑，便拍拍他的肩膀鼓励说：“大胆去做，有困难随时找我. ”

活动策划期间，小刘在和战友的交流中渐渐打开了心扉，能力也得到大家认可. “军营才艺角”活动中，他上台表演口琴独奏，点燃了现场气氛. 在他的带动下，官兵纷纷上台展示才艺.

这段经历让我意识到，很多年轻官兵怀有一技之长，创造条件让他们发挥特长，既可以展示个人风采，又可以服务连队建设发展.

为了更加深入了解官兵，我开始尝试在连队设置“心里话信箱”，鼓励战士们实名或匿名写下心声；每周五定期开展“谈心夜话”，引导大家在轻松氛围中畅所欲言，说出真实想法.

一次“谈心夜话”，聊到体能训练话题时，二级上士季瑞云随口对身边战友说：“我上大学时学的是体育专业，专长是田径类项目，如果没来当兵，我可能就是一名体育老师了. ”

听了季瑞云的分享，其他战士也纷纷畅所欲言. 二级上士王国栋说在地方时考取了驾驶证，有两年货车司机经历；上等兵李浩禹说自己大学学的是计算机专业……

这些都被我们记在心里. 很快，在连队支持下，王国栋成为驾驶复训教练员，带出 10 多名优秀驾驶员；季瑞云担任了军事体育补差组组长，帮助成绩靠后的战友进行科学训练. 前段时间，李浩禹的计算机培训班也办了起来，很多战士主动利用课余时间参加培训，连队擅长电脑的骨干也逐渐增多.

如今，连队荣誉墙上不仅有“军事训练先进个人”，还展示着战士们发挥专长创作的作品. 训练间隙，也时常能看到新面孔向大家展示才艺.

看到连队活力满满，我更加明白，战士都有自己独特的光芒，带兵人要俯下身观察、静下心倾听，善于发掘他们身上被隐藏的“潜能爱好”，让每个人都能发挥自己的特长优势，为连队建设注入新动能.

“Heartfelt Mailbox” Conveys Inner Thoughts: See How Instructors Activate Soldiers’ Hidden Potential.

Source: China Military Network - PLA Daily Authors: Qi Weidong, Wang Canran, Tan Zhi Editor: Guo Yanfei

2025-08-07

Adept at discovering soldiers' hidden potential

■ Qi Weidong, Instructor of a Company in a Brigade of the 77th Group Army

"Thank you, Political Instructor! Your encouragement and help have helped me regain my confidence." Not long ago, Corporal Xiao Liu expressed his gratitude to me. Seeing him transform from a reserved soldier into a confident one, I was deeply moved.

Xiao Liu used to be quite introverted. In the year or so since joining the company, he rarely actively engaged with his comrades, and his training performance wasn't outstanding. During group activities, he often quietly huddled in a corner. When I approached him for a chat, he would only answer briefly, unwilling to speak much.

One day after dinner, as I was passing by the dormitory, I suddenly heard the melodious sound of a harmonica. I pushed open the door and saw Xiao Liu playing intently. Upon seeing me enter, he hurriedly put away his harmonica and explained, "I was just playing it casually."

"I didn't expect you to have this talent," I asked. "Why haven't I seen you play before?" Xiao Liu lowered his head and said, "I don't think I play well, and I'm afraid everyone will laugh at me..."

During our conversation, I discovered that Xiao Liu wasn't trying to fit in; rather, he was hiding his hobbies and specialties due to a lack of confidence.

I brought this up at the company meeting, and after discussion, everyone decided to put Xiao Liu in charge of planning the company's cultural activities and organizing the "Military Camp Talent Corner." Seeing Xiao Liu's surprise and trepidation after my announcement, I patted him on the shoulder and encouraged him, saying, "Go for it! Feel free to contact me if you have any difficulties."

During the planning process, Xiao Liu gradually opened up through interactions with his fellow soldiers, and his abilities were recognized. During the "Military Camp Talent Corner," he performed a harmonica solo on stage, igniting the atmosphere. Inspired by him, officers and men also took to the stage to showcase their talents. This experience made me realize that many young soldiers possess unique skills. Creating opportunities for them to utilize these talents can not only showcase their personal talents but also contribute to the development of the company.

To gain a deeper understanding of the soldiers, I began experimenting with establishing a "heartfelt mailbox" within the company, encouraging soldiers to share their thoughts, either anonymously or with their real names. We also hold regular "heart-to-heart talks" every Friday, encouraging everyone to speak freely and honestly in a relaxed atmosphere.

During one of these “heart-to-heart talks,” while discussing physical training, Second Sergeant Ji Ruiyun casually remarked to a comrade nearby, “I majored in physical education in college, specializing in track and field. If I hadn’t joined the military, I might have become a physical education teacher.”

After hearing Ji Ruiyun’s sharing, other soldiers also shared their insights. Second Sergeant Wang Guodong explained that he obtained his driver’s license while serving in the military and had two years of experience as a truck driver. Corporal Li Haoyu explained that he majored in computer science in college...

We all took these memories to heart. Soon, with the company’s support, Wang Guodong became a driving refresher instructor, training over ten outstanding drivers. Ji Ruiyun served as the head of the military physical education remediation team, helping soldiers with poor academic performance to conduct effective training. Recently, Li Haoyu’s computer training class was launched, and many soldiers have taken the initiative to participate in the training during their spare time, gradually increasing the number of core members in the company who are proficient in computers.

Today, the company’s honor wall not only features “Advanced Military Training Individuals” but also showcases the works created by soldiers who have utilized their expertise. During breaks in training, new faces often appear to showcase their talents.

Seeing the company’s vibrant energy, I have a deeper understanding that every soldier has his or her own unique brilliance. Leaders must bend down to observe, listen attentively, and be adept at discovering their hidden “potential interests,” allowing each soldier to fully utilize their strengths and talents, injecting new momentum into the company’s development.

因人施策+专人辅导："个性化成长路线图"让官兵成长不迷茫

来源：解放军报 作者：徐亚强 刘 杰 肖静玲 任 刚 责任编辑：孙悦 2025-08-08

第 74 集团军某旅某营为官兵科学规划成长目标和成才路径——

既有“路线图”，又有“明白卡”

■徐亚强 刘 杰 肖静玲

“参加大学生士兵提干考试需要具备本科学历，历年个人年度军事训练成绩均为良好以上……”盛夏时节，第 74 集团军某旅某连训练间隙，陈指导员正在为列兵则巴古丽讲解她的“个性化成长路线图”. 则巴古丽认真聆听，不时点头.

“清晰的目标、明确的路径、实时的提醒，让每名战士对个人发展不再茫然，避免在成长的关键节点被硬性条件卡住. ”看着训练场上大家斗志昂扬的样子，陈指导员欣慰之余，不禁回想起去年连队骨干调整时遇到的尴尬情况.

当时，一班班长退伍离队. 副班长张友根专业成绩优异，军事素质过硬，且具备丰富的管理经验，本是接任班长的不二人选. 然而，按照规定，担任班长需持有高级职业技能鉴定证书，张友根恰恰缺少这一“硬件”，不符合班长岗位任职条件，所以连队只能另觅人选.

这一结果令张友根备受打击，也在官兵中引起不小震动. 战士们或担忧自身发展受限，纷纷找文书询问政策规定；或察觉自身条件与晋升目标存在差距，训练时情绪低落……

看着战士们的反应，陈指导员心中五味杂陈. 一名优秀的骨干因不符合硬性条件而成长受阻，同样令他倍感遗憾. 事实上，连队始终落实上级要求为官兵制订个人成长路线图，涵盖各个阶段的发展目标和路径规划，平时干部骨干也常常提醒大家对自己的事多上心. 但即便这样，为何仍有战士被这些“硬门槛”卡住？

为了弄清原因，陈指导员召开了一次恳谈会. 会上，战士们纷纷打开话匣子——

有人反映，成长路线图内容粗略，只明确了目标等内容，参考价值有限，且集中存放于连部，查阅不便；有人认为，一次性填写一年的目标，更像完成上级任务，未能真正结合自身实际和岗位需求；还有人提到，路线图填写后即归档，缺乏动态更新与常态跟踪机制，与连队日常管理和激励措施脱节，难以发挥应有的“导航”与激励作用.

陈指导员将大家的心声逐一记录下来，并带到随后召开的营党委会上，引起营党委高度重视.

他们调研发现，类似张友根这样对选晋流程、硬性标准等知之不深的情况并非个例，不少战士对关系个人发展的政策规定说不清道不明，对脚下路通向何方、实现目标需具备哪些条件，心中并无清晰图景.

“现有的成长路线图，重形式轻实效、重填写轻跟踪，且过于概略不够精准，在引导官兵成长方面作用发挥不明显. ”该营唐营长一针见血地指出问题，“制订成长路线图的目的在于为官兵成长提供更精准的指引，决不能流于形式. ”

该营党委立行立改，吸取以往经验教训，按照“能用、管用、官兵爱用”原则，要求各连重新制订官兵成长路线图. 一方面，细化成长路线图内容，依据个人特点针对性制订阶段目标、完成时限、所需条件、政策依据等，并拆解形成简洁直观的成长“明白卡”，便于官兵随时查看. 另一方面，发挥目标引领作用，将成长目标完成情况与日常讲评、个人表现等挂钩，定期复盘总结. 同时，明确各连主官、班排长作为官兵落实成长路线图的“第一辅导员”，跟踪官兵的成长进展，及时提供指导和帮助.

“现在的成长路线图突出一人一案、因人施策，军事训练达标节点、专业技能进阶要求、学历提升建议方案等清晰明确，每一个阶段性目标都标注着具体时限和要求，劲往哪儿使，我心里明镜似的，工作训练更有动力了.”战士李久辰高兴地说.

某连班长隆财荣表现出色，多次在上级比赛中为连队赢得荣誉，可惜在服役期满时因缺少晋升高级军士必备的专科学历，不得不选择延期服役. 他坦言，“以往的成长路线图内容过于笼统，我得知晋升条件后立即报名提升学历，但已无法在晋升前取得毕业证.”这让他一度对自己的发展前景感到迷茫与不安. 后来，连队根据营里安排，为隆财荣制订更为精细的成长路线图，安排专人指导他学习相关知识，帮助他尽快获得专科学历证书，很快，隆财荣重新振奋精神，积极投入训练.

“人才培养要紧贴实际、着眼长远，把官兵的‘成长账’算清，把每个阶段的‘发力点’校准，让他们心中有方向、脚下有力量.”该营唐营长说.

如今在该营，战士们经常会拿出自己的成长路线图对照复盘，大家正按照规划朝着自己的目标努力前进.

短 评

变“结果管理”为“过程管理”

■任 刚

在人才竞争日趋激烈的今天，精细化培养人才不是选择题，而是必答题. 第 74 集团军某旅某营一名战士因缺少硬性条件而与班长岗位失之交臂的经历告诉我们，通过制订成长路线图培养人才，必须与个人意愿、能力、发展目标、岗位需求、政策规定等结合起来，变“结果管理”为“过程管理”，因人施策、长期帮带，不能流于形式、浮于表面.

当前，很多基层部队都在为官兵制订成长路线图，成效各有不同，其差别就在于是否解决了“常不常用、管不管用、好不好用”的问题. 从上文提到的案例不难看出，只有把目标规划纳入全流程管理，让帮带举措形成制度机制，才能引导官兵消除“不知向何处发力”的迷茫，规避前路可能遇到的“卡点”，在成长过程中踩准步点、行稳致远.

也就是说，帮助官兵成长成才，制订路线图只是第一步，还必须按照“项目化管理、工程化推进”的理念，将“路线图”细化为“施工图”，像盖一座建筑那样，按照图纸规划的任务、路径、时间、节点、标准等，有计划有步骤地施工. 只有这样，成长路线图才能最终落地见效.

Tailored Strategies Plus Dedicated Coaching: The “Personalized Growth Roadmap” Helps Soldiers Navigate Their Growth Without Confusion.

Source: PLA Daily Author: Xu Yaqiang, Liu Jie, Xiao Jingling, Ren Gang Editor: Sun Yue 2025-08-08

A battalion of a brigade of the 74th Group Army has scientifically planned growth goals and development paths for its soldiers—Both a "roadmap" and a "clear card" are available.

■Xu Yaqiang, Liu Jie, Xiao Jingling

"To take the college student soldier promotion exam, you must have a bachelor's degree and have achieved good or above annual military training results..."[2] In the height of summer, during a break in training at a company of a brigade of the 74th Group Army, Political Instructor Chen was explaining Private Zebaguli's "Personalized Growth Roadmap." Zebaguli listened attentively, nodding frequently. "Clear goals, a clear path, and real-time reminders will help every soldier navigate their personal development without feeling lost, and avoid being held back by rigid requirements at critical junctures." Watching the high spirits on the training ground, Political Instructor Chen, while pleased, couldn't help but recall the awkward situation encountered during the company's core personnel adjustments last year.

At the time, the squad leader of Squad 1 was released from active duty before being promoted. Deputy Squad Leader Zhang Yougen, with his excellent academic performance, strong military skills, and extensive management experience, was the perfect candidate to take over. However, regulations required a high-level vocational skills certification, which Zhang Yougen lacked, necessitating a search for another candidate.

This outcome was a significant setback for Zhang Yougen and sent shockwaves through the ranks. Soldiers worried about their own development limitations and sought information about policies and regulations; others, realizing the gap between their qualifications and promotion targets, became depressed during training.

Watching the soldiers' reactions, Political Instructor Chen felt a mixture of emotions. He also felt deeply regretful that an excellent cadre's growth was hindered by a failure to meet the rigid requirements. In fact, the company consistently implements superiors' requirements to develop personal growth roadmaps for officers and men, covering development goals and path planning for each stage. Leading cadres regularly remind everyone to pay close attention to their own work. But even so, why do some soldiers still feel stuck by these "hard barriers"?

To understand the reasons, Political Instructor Chen convened a meeting. At the meeting, the soldiers opened up.

Some complained that the growth roadmaps were sketchy, only specifying specific goals and other information, making them of limited reference value. Furthermore, they were stored centrally at company headquarters, making them difficult to access. Others felt that filling out annual goals at

[2] Note: The PLA began setting specific education goals in the late 2000s for its enlisted members to become junior grade (high school education), intermediate grade (associates degree), and senior grade (bachelor's degree).

once was more like completing a superior's assignment and failed to truly integrate individual needs with the demands of their positions. Still others noted that the roadmaps were filed away after completion, lacking dynamic updates and regular tracking mechanisms. This disconnected them from the company's daily management and incentives, making them unable to fully serve as the guiding and motivational tools they should.

Political Instructor Chen took note of everyone's concerns and brought them to the subsequent battalion Party Committee meeting, where they received significant attention. Their investigation revealed that Zhang Yougen's lack of understanding of the selection and promotion process and mandatory standards was not an isolated case. Many soldiers were confused about the policies and regulations related to their personal development, lacking a clear picture of where their path would lead them and what conditions were needed to achieve their goals.

"The existing growth roadmaps prioritize form over effectiveness, filling out forms over tracking, and are too general and inaccurate, making them ineffective in guiding the growth of soldiers," Battalion Commander Tang pointedly pointed out. "The purpose of developing growth roadmaps is to provide more precise guidance for soldier growth; it must not be a formality."

The battalion's Party Committee immediately implemented changes, drawing on past experiences and lessons. Based on the principles of "usable, effective, and soldier-friendly," each company was instructed to revise its growth roadmaps. First, the roadmaps were refined, with individual-specific goals, deadlines, required conditions, and policy support. These maps were then broken down into simple and intuitive "cards" for soldiers to review at any time. On the other hand, we leverage the guiding role of goals, linking the completion of growth goals with daily reviews and individual performance, and conducting regular reviews and summaries. Furthermore, each company commander and squad leader is designated as the "primary counselor" for soldiers implementing the growth roadmap, tracking their progress and providing timely guidance and assistance.

"The current growth roadmap emphasizes individualized planning and tailored strategies. Military training milestones, professional skill advancement requirements, and recommended plans for academic advancement are clearly defined. Each milestone is clearly marked with specific deadlines and requirements. I have a clear understanding of where to focus my efforts, and this has given me greater motivation for work and training," said soldier Li Jiuchen happily.

Squad leader Long Cairong of a certain company performed exceptionally well, winning numerous awards for his company in higher-level competitions. Unfortunately, at the end of his service, he lacked the required associate's degree for promotion to senior sergeant, forcing him to extend his service. He admitted, "The previous growth roadmap was too general. I immediately applied to upgrade my academic qualifications after learning the promotion requirements, but I was unable to obtain my diploma before the promotion." This left him feeling confused and uneasy about his future prospects. Later, according to the battalion's instructions, the company developed a more detailed growth roadmap for Long Cairong, assigned dedicated personnel to guide him in learning

relevant knowledge, and helped him obtain his associate's degree as quickly as possible. Soon, Long Cairong regained his spirits and actively participated in training.

"Talent development must be grounded in reality and focused on the long term. We must clearly calculate the soldiers' 'growth accounts' and calibrate the 'focus points' at each stage, giving them a clear sense of direction and strength to work towards," said Battalion Commander Tang.

Now, soldiers in the battalion frequently review their growth roadmaps, and everyone is working diligently toward their goals according to the plan.

Short Commentary

Changing from "Result Management" to "Process Management"

■ Ren Gang

In today's increasingly fierce competition for talent, meticulous talent development is no longer optional but a must. The experience of a soldier in a battalion of a brigade of the 74th Group Army who missed out on the position of squad leader due to a lack of specific qualifications demonstrates that talent development through development roadmaps must be integrated with individual aspirations, abilities, development goals, job requirements, and policy regulations. This shifts from "results management" to "process management," requiring tailored strategies and long-term mentoring. This approach must not be superficial or superficial.

Currently, many grassroots units are developing development roadmaps for officers and men, with varying successes. The difference lies in whether these roadmaps address the issues of frequent use, effectiveness, and effectiveness. The aforementioned case study clearly demonstrates that only by incorporating goal planning into full-process management and institutionalizing mentoring initiatives can officers and men overcome the confusion of not knowing where to focus their efforts, avoid potential roadblocks, and maintain steady progress in their development. In other words, developing a roadmap is only the first step in helping soldiers grow and develop. Following the principles of "project-based management and engineering-based advancement," the "roadmap" must be broken down into a "construction plan." Like building a building, construction must proceed in a planned and step-by-step manner, following the tasks, paths, timelines, milestones, and standards outlined in the blueprint. Only in this way can the growth roadmap ultimately be implemented and bear fruit.

从"各自为战"到"合力制敌"，高炮分队协同锻造"火力铁拳"

来源：解放军报 作者：果志雄 杨兴灿 责任编辑：郭妍菲 2025-08-08

第 81 集团军某旅着力强化官兵协同意识——

融合锻造"火力铁拳"

■果志雄 解放军报特约通讯员 杨兴灿

“长点射，放！”夏日，第 81 集团军某旅组织高炮分队防空训练. 随着火舌喷涌，目标被成功摧毁.

训练间隙，官兵围绕战法训法成果展开讨论. 雷达站长提出，目标靶机不停变换飞行轨迹并释放电磁干扰，正是他们及时发挥雷达作为高炮“眼睛”的作用，成功预测目标靶机机动路线，才将其牢牢捕获. 而炮班长认为，命中目标主要是因为炮班快速反应、精准射击. 特别是当目标靶机利用云层规避搜索时，炮班利用瞄准具进行跟踪，短时间内完成重新捕获，保证了有效射击.

正当大家讨论之际，防空警报突然响起，官兵迅速重返战位. 针对双方讨论焦点，指挥员临机设置雷达搜索模块故障、高炮遭“敌”打击损毁、通信网络遭“敌”强电磁干扰等多种特情.

这一次，没有雷达锁定引导，炮班没摸着目标的影子；高炮被“毁”，雷达没了火力掩护、自身难保……各作战单元缺少相互支援，官兵手忙脚乱，最终败下阵来.

“战场意识缺乏，特情处置能力有待加强”“平时协同训练不深入，特情一多就打乱仗”……训练结束，复盘检讨会随即展开，官兵从多方面分析问题、查找原因.

“防空作战讲究众人一杆枪，每个战位、每个人都不可或缺，都连着战斗力！”此事很快被该旅领导知晓，随后的党委议战议训会上，一班人一致认为，现代战争是体系与体系的对抗，人员装备都只是战斗力链条上的一环，环环相扣才会产生合力，相互协作才能制胜打赢.

对此，他们举一反三，深入查找部队存在的类似现象. 导弹分队与高炮分队信息共享不畅、导弹号手协同配合不紧密、支援保障单元与火力单元战场衔接不及时等问题，被逐一检视剖析.

为提升部队协同作战能力，该旅打出一套“组合拳”：采取技术原理互教、作战场景互换、指挥席位轮岗等方式，增进各专业相互间了解，提升协同作战耦合度；常态组织协同训练，通过设置指挥中断、炮手伤亡等临机特情，锤炼各专业极端条件下应急协同能力；建立训练双向讲评机制，按照彼此对照、逐个讲评的方式，查找补齐能力短板，打通各作战单元协同链路.

融为一体锻造“火力铁拳”. 前不久，该旅组织新一轮对抗训练. 面对来袭“敌”机，高炮分队官兵分工合理、配合默契、忙而不乱. 随着火舌划破长空，目标被精准命中，战斗用时较以往进一步缩短.

Google Translation

From “Fighting Alone” to “Jointly Defeating the Enemy,” the Anti-Aircraft Artillery Unit Collaborates to Forge an “Iron Fist of Firepower.”

Source: PLA Daily Author: Guo Zhixiong, Yang Xingcan Editor: Guo Yanfei 2025-08-08

A brigade of the 81st Group Army is striving to strengthen officers and men’ awareness of coordination—Forging an “iron fist of firepower” through integration

■ Guo Zhixiong, PLA Daily Special Correspondent, Yang Xingcan

“Long bursts, fire!” In the summer, an 81st Group Army brigade conducted air defense training for its anti-aircraft artillery unit. With a burst of flames, the target was successfully destroyed.

During a break in the training, officers and men discussed the results of their tactics and training. The radar station commander noted that the target drone constantly changed its flight path and released electromagnetic interference. It was their timely use of the radar as the anti-aircraft artillery’s “eyes” that successfully predicted the target drone’s maneuvering path and enabled them to securely capture it. The artillery squad leader, however, attributed the successful hits to the squad’s quick response and precise firing. In particular, when the target drone used cloud cover to evade search, the artillery crew tracked it with their sights, quickly reacquiring it and ensuring effective fire.

Amidst the discussion, the air defense alarm suddenly sounded, prompting officers and men to quickly return to their positions. Addressing the key points of the discussion, the commander improvised various special scenarios, including a radar search module failure, damage to the anti-aircraft gun from enemy fire, and strong electromagnetic interference from the enemy on the communications network.

This time, without radar lock-on guidance, the artillery crew had no idea where to find the target; with the anti-aircraft gun destroyed, the radar lost its firepower, leaving the crew vulnerable... The lack of mutual support among the various combat units left the officers and men flustered and ultimately defeated.

“Battlefield awareness is lacking, and the ability to handle special situations needs to be strengthened.” “Routine coordinated training is not thorough, and the proliferation of special situations leads to disarray.”... Following the training, a review meeting was held, where officers and men analyzed the issues from multiple perspectives and identified the causes. “Air defense combat requires everyone, one gun. Every position and every person is indispensable and connected to combat effectiveness!” This incident quickly became known to the brigade leadership. At the subsequent Party Committee meeting on combat and training, everyone unanimously agreed that modern warfare is a system-on-system confrontation, and personnel and equipment are merely links in the chain of combat effectiveness. Only by connecting these links can a synergistic force be generated, and only through mutual cooperation can victory be achieved.

They drew inferences from this incident and conducted a thorough investigation of similar issues within the unit. Issues such as poor information sharing between missile and anti-aircraft artillery units, lack of coordination between missile operators, and delayed battlefield connection between support and firepower units were examined and analyzed one by one. To enhance the troops' coordinated combat capabilities, the brigade has implemented a comprehensive approach: mutual teaching of technical principles, exchange of combat scenarios, and rotation of command posts enhance mutual understanding among various disciplines and strengthen interoperability. Regular coordinated training is conducted, using improvisations such as command interruptions and gunner casualties to hone the emergency coordination capabilities of each discipline under extreme conditions. A two-way review and evaluation mechanism for training has been established, using a comparative and individual review process to identify and address capability shortcomings and strengthen the coordination links among various combat units.

Forging an "iron fist of firepower" through integration. Not long ago, the brigade conducted a new round of confrontation training. Facing incoming "enemy" aircraft, the anti-aircraft artillery unit maintained a clear division of labor, coordinated well, and remained focused. As flames streaked across the sky, the target was accurately hit, further shortening the engagement time compared to previous exercises.

第 77 集团军某旅组织政治干部开展检视剖析

来源：解放军报 作者：刘卓　张磊峰　李佳豪 责任编辑：郭妍菲 2025-08-08

第 77 集团军某旅组织政治干部开展检视剖析——

言行一致，立起忠诚担当好样子

■刘卓　解放军报记者　张磊峰　特约记者　李佳豪

"对照政治干部应有的好样子找差距，我自身存在工作中'唱黑脸'不够等问题，对部属的监督重工作、轻生活，有怕批评多了、话讲重了影响团结的思想顾虑……"

盛夏高原，第 77 集团军某旅"揽镜自照，看一看政治干部该是什么样"学习研讨活动，在某野外驻训地拉开序幕. 登上发言席，该旅政委首先对照《关于大力弘扬优良传统、全面肃清流毒影响 重塑政治干部形象威信的若干规定》中明确的 7 个方面内容，主动揭短亮丑，逐项检视剖析. 随后，全旅政治干部纷纷以己为靶，查摆差距不足、作出整改承诺.

"勇于自我革命，是政治忠诚的具体表现. "这名政委向记者介绍，在长期血与火的斗争中，一代代政治干部秉持对党忠诚、为党负责的政治自觉，坚持实事求是思想路线，较真碰硬开展自我批评、持之以恒进行自我完善，形成了自省自励的优良传统，"学习贯彻规定，

强化政治忠诚，很重要的一条就是发扬这一优良传统，在查摆不足中明晰自身缺什么，在警钟长鸣中明辨不该做什么，在承诺践诺中明确今后该怎么做”.

基于这一认识，该旅党委将开展自我批评和从严检讨反思，作为政治干部学习贯彻规定、带头徙木立信、重塑形象威信的重要抓手，通过组织检视剖析、接受警示教育、明确行为清单、进行承诺践诺等方式，引导政治干部强信念、明追求、正言行，在从严肃毒除弊中铸牢政治忠诚.

“规定将强化政治忠诚摆在首位，要求我们政治干部‘自觉先受教育、真受教育’. 反观自身，我过去在增强思想改造的自觉性上，还存在一些不足. ”通过检视剖析，该旅某连李指导员找到自身差距. 作为一名军事素质过硬的基层军官，过去他认为忠诚于党就是把本领练强，做到只要党一声令下，随时都能上战场，而理论知识有时间学就行. “对党忠诚，不能只凭朴素的情感，还要以理论上的清醒引领政治上的坚定. ”在承诺践诺中，李指导员对照规定要求，主动申请与组织科科长结成助学对子，尽快将前期落下的理论学习课程补上.

揽镜自照除己弊，常思前鉴助内省. 近日，为强化政治干部立德修身干事的自觉性，该旅对照规定制订正反两方面行为规范清单，制作系列微漫画并在强军网政治工作板块展播. 作为漫画的主要创作者之一，旅宣传科何科长绘制的“往来清爽一杯茶，胜过饭桌一杯酒”“别让老乡同学圈，伤了纯洁战友情”“成长进步凭实绩，投机钻营不可取”“权力职务党赋予，个人靠山莫依附”等多幅作品，赢得战友点赞.

“反观上级通报的一些违法违纪案件，当事人大多信奉关系学、官场术，最终在团团伙伙中滑向深渊. ”谈及创作思路，何科长告诉记者，“作为政治干部，我们必须从负面案例中汲取教训、引以为戒，真正把错误思想根子拔除掉、把正确价值观念立起来，做到不用公权谋私利、不搞钻营走捷径. ”

“不改其心、不移其志、不毁其节”，是该旅某营张教导员的座右铭. 该营前身部队曾被授予“群众工作模范团”荣誉称号，这些年来，张教导员带领官兵常态赴驻地村镇开展助民服务，助力乡村振兴.

“为表达感谢，曾有群众送来土特产甚至是财物，我都婉言谢绝. ”每次遇到类似情况，张教导员都会主动向旅纪委报告. 谈及此事，他说：“对党忠诚，是政治干部的灵魂和本色，必须做到襟怀坦白，向组织讲真心话、老实话，决不能遮遮掩掩. ”近日，该旅结合规定组织警示教育，张教导员作为授课人登上讲台. 对于这堂教育课，该旅政治干部纷纷给出高度评价：“他的授课之所以有说服力，靠的就是言行一致、以身作则. ”

言行一致，立起忠诚担当好样子. 连日来，面对大项训练任务接踵而至的实际，该旅政治干部纷纷请缨，训练打头阵、攻坚冲在前，用实际行动掀起贯彻落实规定的热潮.

A 77th Group Army Brigade Conducted a Self-Examination and Analysis of Its Political Cadres.

Source: PLA Daily Author: Liu Zhuo, Zhang Leifeng, Li Jiahao Editor: Guo Yanfei 2025-08-08

A brigade of the 77th Group Army conducted a self-examination and analysis of its political cadres—"Consistent words and deeds, setting an example of loyalty and responsibility."

■Liu Zhuo, PLA Daily Reporter; Zhang Leifeng, Special Correspondent; Li Jiahao

"Comparing myself with the ideal political cadre, I've identified shortcomings. I've been insufficiently 'playing the bad guy' in my work, overseeing my subordinates more than their personal lives, and I'm concerned that excessive criticism and harsh words will undermine unity..."

In the midsummer of the plateau, a brigade of the 77th Group Army kicked off a study and discussion activity titled "Looking in the Mirror, Examining What Political Cadres Should Be" at a field training location. Taking the stage, the brigade's political commissar first compared himself with the seven areas specified in the "Regulations on Vigorously Promoting Fine Traditions, Comprehensively Eradicating Corrupt Influences, and Rebuilding the Image and Prestige of Political Cadres," proactively exposing and analyzing each of his shortcomings. Afterwards, political cadres throughout the brigade took themselves as targets, identified shortcomings, and made commitments to rectify them.

"The courage to undergo self-revolution is a concrete manifestation of political loyalty," the political commissar told reporters. Throughout the long and arduous struggle, generations of political cadres have upheld the political consciousness of loyalty and responsibility to the Party, adhered to the ideological line of seeking truth from facts, rigorously engaged in self-criticism, and persevered in self-improvement, forming a fine tradition of self-reflection and self-motivation. "Learning and implementing the regulations and strengthening political loyalty is crucial to carrying forward this fine tradition. By identifying shortcomings, we can clearly identify what we lack; by keeping the alarm bell ringing, we can discern what we should not do; and by fulfilling our commitments, we can clarify what we should do in the future."

Based on this understanding, the brigade's Party Committee will conduct self-criticism and rigorous self-examination and reflection as key tools for political cadres to learn and implement the regulations, establish credibility, and rebuild their image and prestige. Through organizational self-examination and analysis, advocacy education, a clear behavioral checklist, and the fulfillment of commitments, we will guide political cadres to strengthen their convictions, clarify their aspirations, and uphold their words and deeds, forging a strong political loyalty through the serious elimination of corruption. "The regulations prioritize strengthening political loyalty, requiring our political cadres to 'consciously receive education first, and truly receive it.' Looking back at myself, I've had some shortcomings in strengthening my awareness of ideological transformation." Through self-examination and analysis, Instructor Li of a company within the brigade identified

his shortcomings. As a grassroots officer with strong military qualities, he previously believed that loyalty to the Party meant strengthening his skills, ready to go to the battlefield at the Party's command, and that theoretical knowledge only needed to be studied when there was time. "Loyalty to the Party cannot be based solely on simple emotions; it must also be guided by theoretical clarity and political firmness." In fulfilling his promise, Instructor Li, in accordance with the regulations, proactively applied to form a student aid partnership with the head of the Organization Department to catch up on the theoretical courses he had missed earlier.

Look in the mirror to eliminate one's own shortcomings, and constantly reflect on past mistakes to foster introspection. Recently, to strengthen the awareness of political cadres in cultivating morality and working hard, the brigade compiled a list of both positive and negative behavioral norms in accordance with the regulations, produced a series of micro-comics, and displayed them on the political work section of the Strong Army website. As one of the main creators of the comics, Chief He of the Brigade's Publicity Section drew a number of artwork, including "A refreshing cup of tea is better than a glass of wine at the dinner table," "Don't let fellow villagers and classmates circle around, it will damage the pure friendship of comrades," "Growth and progress depend on actual performance; opportunism and personal gain are unacceptable," and "Power and position are granted by the Party; do not rely on personal patrons," which have won praise from fellow soldiers.

"In contrast, in some cases of violations of laws and discipline reported by superiors, the parties involved mostly believed in the art of networking and officialdom, ultimately sliding into the abyss amidst cliques and gangs." Discussing his creative thinking, Chief He told reporters, "As political cadres, we must learn lessons from these negative cases and draw warnings from them. We must truly eradicate the roots of erroneous thinking and establish correct values, ensuring that we do not use public power for personal gain or seek shortcuts."

"Do not change your heart, do not waver in your resolve, and do not destroy your integrity" is the motto of Instructor Zhang of a battalion in the brigade. The battalion's predecessor was once awarded the honorary title of "Model Regiment for Mass Work." Over the years, Instructor Zhang has led officers and men in regular visits to villages and towns where they are stationed to provide services and support rural revitalization.

"To express their gratitude, some residents have offered local specialties and even gifts, but I politely declined." Whenever such situations arise, Instructor Zhang proactively reports them to the brigade's disciplinary committee. Speaking of this, he said, "Loyalty to the Party is the soul and essence of a political cadre. We must be open and honest, speaking the truth to the organization without any ambiguity." Recently, the brigade organized a warning education session in accordance with the regulations, with Instructor Zhang as the lecturer. The brigade's political cadres praised the lecture highly, saying, "His lectures are so persuasive because he is consistent in his words and deeds, leading by example."

Consistent in words and deeds, he sets an example of loyalty and responsibility. In recent days, faced with a continuous stream of major training tasks, the brigade's political cadres have volunteered to lead the training and tackle key challenges, using concrete actions to ignite a wave of enthusiasm for implementing the regulations.

如何应对夏训“烤”验？陆军某旅这套 “组合拳” 超给力！

来源：解放军报 作者：雷兆强 闻苏轶 汪 博 张才新 责任编辑：孙悦 2025-08-09

陆军某旅做好野外驻训期间服务保障工作——

高温演兵场吹来清凉的“风”

■雷兆强 闻苏轶 汪 博

高温，既是夏季训练绕不开的“拦路虎”，也是战斗力生成的“磨刀石”. 如何科学应对“烤”验，确保官兵身心健康、训练安全高效？陆军某旅结合驻训点位分散、训练环境恶劣等特点，打出“降温解压”组合拳，筑牢防暑降温与心理解压双重防线.

环境越是艰苦，组训越要科学

天色渐暗，喧嚣了一天的驻训场迎来了阵阵凉风，原本应下午组织的体能训练在夕阳下展开.

“环境越是艰苦，组训越要科学. ”该旅领导表示，为破解高温环境下“生理易疲劳、心理易烦躁”的难题，旅党委一班人按照依据装备性能拓展、区分岗位专业组训、针对具体课目强化的思路，尝试开展分层分步分时训练，明确要求各单位根据实时气温灵活调整训练计划.

训练更灵活，质效节节高. 大漠戈壁的帐篷内，某连连长肖乐指着训练计划表介绍，针对新兵第二适应期特点，他们每天根据天气预报动态调整训练内容. 当气温超过 35 摄氏度时，将 5 公里武装越野改为 400 米冲刺、单双杠等中低强度训练；阳光照射强度大时，增加伪装隐蔽训练，避免长时间暴晒；傍晚则组织“沙坑俯卧撑”“低姿匍匐过沙丘”等趣味体能课目，让官兵在放松身心的同时提高能力素质.

列兵小文初到驻训点时，在战术训练中匍匐动作变形，被班长批评后情绪烦躁，总觉得心里有团“火”压不下去，休息时也躲在帐篷里，对工作训练提不起劲来.

连队动态调整训练计划后，小文发现心里的那团“火”逐渐消失了. 清晨，他跟着队伍在微凉的戈壁滩上进行 3 公里跑；午后时段，他们在帐篷里钻研高温环境下的战术协同要领，笔记本上记满要点.

如今，越来越多的“小文”在科学训练的节奏中，逐渐找到了心理上的“最佳温度”，练兵热情在张弛有度中持续升温.

“心理温度”越高，疏导越要及时

傍晚时分，尽管太阳西斜，但丛林的气温依旧闷热难耐. 一场由连队心理骨干组织的“团体战术协同”心理行为训练，在官兵的欢声笑语中进行.

“高温高湿的训练环境，直接影响官兵心理状态，切实发挥好心理骨干作用，对提高官兵心理防护能力至关重要. ”该旅领导介绍，他们从基层遴选优秀干部骨干组建心理服务队，扎实开展心理骨干专题培训，采取体验式、互动式、研讨式等教学方法，突出团体心理辅导、个体心理咨询、心理与精神问题早期识别等内容，不断增强心理服务的贴近性、针对性、时效性.

列兵小钱因不适应驻训节奏，情绪烦躁，训练成绩下滑，还与战友发生了口角. 连队心理骨干发现后主动与他谈心，了解到他因体能跟不上逐渐产生自卑和焦虑情绪. 随后，心理骨干带小钱参加团体心理游戏，帮助他缓解心理压力，提升团队协作意识，同时还结合情绪管理课内容，教授他简单实用的心态调节方法技巧. 在心理骨干的耐心帮助下，小钱渐渐卸下心理包袱，脸上的笑容越来越多，训练成绩也稳步提升.

短 评

野外驻训，也给情绪“降降温”

■张才新

打仗不避寒冬酷暑，练兵不择气候温度. 对部队官兵来说，炎炎夏日正是练兵好时节，既能锤炼官兵适应复杂环境的战斗本领，又能砥砺不畏艰苦的战斗意志. 但是，长时间在高温环境下进行高强度训练，不仅容易造成人员生理中暑，还可能会导致“情绪中暑”，从而影响官兵身心健康，阻碍部队战斗力生成. 因此，做好高温练兵心理服务工作，既是对官兵的人文关怀，也是提升训练质效的重要一环.

从心出发，用思想“清泉”滋润心田. 通过开展专题讲座、组织线上微课等形式，向官兵讲清高温环境下引发焦虑、烦躁等情绪的成因表现，教授他们一些简单实用技巧，让官兵了解“情绪波动不可怕，科学应对有办法”. 另一方面，通过适时开展“奋斗者说”故事会等活动，引导官兵从思想深处把“要我坚持”转化为“我要坚持”，不断强化自我认同.

科学施训，用互动“凉风”吹散焦躁. 高温环境下，要科学统筹训练内容，将高强度课目与恢复性、技能性课目有机结合、穿插进行；合理安排训练时间和休息时间，避免在持续极端高温下进行长时间、极限化课目“车轮战”. 此外，训练之余可适时组织团体心理行为训练或开展一些轻松游戏，增进团体协作意识的同时也让官兵紧绷的神经“松一松”.

特色保障，用贴心“疗法”驱散燥热. 服装灵活安排，饮食清爽，住宿通风……想方设法把保障做到心坎上，才能为情绪“降温”提供基础，还可以通过使用电风扇、增加洒水拖地次数等物理降温措施，营造凉爽的休息环境.

建强队伍，用骨干“堤坝”筑牢防线. 建强一支懂心理、会疏导的骨干队伍，能够让情绪“降暑”工作落地见效. 从各单位遴选责任心强、善于观察的官兵担任心理骨干，明确“每日观察、每周汇总、每月分析”职责，定期组织交流分享，形成“横向到边、纵向到底”的心理防护网络，确保心理服务工作持续开展.

How to Cope with the Harsh Summer Training? An Army Brigade’s “Combination Punch” Is Incredibly Effective!

Source: PLA Daily Author: Lei Zhaoqiang, Wen Suyi, Wang Bo, Zhang Caixin Editor: Sun Yue 2025-08-09

An Army brigade ensures service and support during field training—

A cool breeze blows across the high-temperature training ground

■Lei Zhaoqiang, Wen Suyi, Wang Bo

High temperatures are both an unavoidable obstacle to summer training and a sharpening stone for combat effectiveness. How can we scientifically cope with these harsh conditions to ensure the physical and mental health of officers and men and safe and efficient training? Taking into account the dispersed nature of the training locations and harsh training environment, an Army brigade implemented a combination of “cooling and stress-relieving” measures, building a dual defense against heatstroke and psychological stress relief.

The harsher the environment, the more scientific the training must be.

As the sky darkened, a cool breeze greeted the training ground, which had been bustling all day. Physical training, originally scheduled for the afternoon, began under the setting sun. “The more challenging the environment, the more scientific the training must be.” Brigade leaders stated that to address the challenges of “physical fatigue and psychological irritability” in high temperatures, the brigade’s Party Committee has experimented with tiered, step-by-step, and time-based training, focusing on expanding training based on equipment performance, organizing training based on job-specific expertise, and strengthening specific subjects. They explicitly mandated that all units flexibly adjust their training plans based on the actual temperature.

More flexible training has resulted in consistently improved quality and effectiveness. Inside a tent in the desert, Company Commander Xiao Le pointed to the training schedule and explained that, to address the characteristics of the recruits’ second acclimatization period, they dynamically adjust training content daily based on the weather forecast. When temperatures exceed 35 degrees

Celsius, the 5-kilometer armed cross-country run is replaced with a 400-meter sprint, parallel bars, and other low-intensity exercises. When sunlight is intense, camouflage and concealment training are added to avoid prolonged exposure to the sun. In the evenings, engaging physical training exercises like “sandpit push-ups” and “low-stance crawling across sand dunes” are organized, allowing soldiers to relax and improve their skills. When Private Xiaowen first arrived at the training base, he misbehaved during tactical training. After being criticized by his squad leader, he became irritable and felt a burning fire within him that he couldn’t suppress. He even hid in his tent during breaks, losing enthusiasm for work and training.

After the company dynamically adjusted its training plan, Xiaowen found that fire within him gradually extinguished. In the early morning, he joined the team for a 3-kilometer run in the cool Gobi Desert. In the afternoon, they huddled in their tents to study the key points of tactical coordination in high-temperature environments, filling their notebooks with key points.

Nowadays, more and more “Xiaowens” are finding their psychological “sweet spot” through the scientific training rhythm, and their enthusiasm for training continues to rise through a balanced balance of tension and relaxation.

The higher the “psychological temperature,” the more timely counseling is needed.

In the evening, even though the sun was setting, the jungle temperature remained unbearably sweltering. A psychological and behavioral training session on “Group Tactical Coordination,” led by the company’s psychologist, took place amidst the laughter and joy of the officers and men. “The high temperature and high humidity training environment directly impacts the psychological state of soldiers. Effectively leveraging the role of psychological support personnel is crucial to improving soldiers’ psychological resilience.” Brigade leaders explained that they selected outstanding cadres and backbones from the grassroots to form a psychological service team. They conducted thorough training for these support personnel, utilizing experiential, interactive, and seminar-based teaching methods. They emphasized group counseling, individual counseling, and early identification of psychological and psychiatric issues, continuously enhancing the relevance, pertinence, and timeliness of psychological services.

Private Xiao Qian, struggling with the pace of training, became irritable, his training performance declined, and he even had an argument with a comrade. Upon discovering this, the company’s psychological support personnel took the initiative to talk with him and learned that he was developing low self-esteem and anxiety due to his lack of physical fitness. The support personnel then took Xiao Qian to group psychological games to help him relieve stress and enhance his teamwork skills. They also incorporated emotional management lessons into their lessons, teaching him simple and practical mindset adjustment techniques. With the patient support of the support personnel, Xiao Qian gradually released his psychological burdens, began to smile more and more, and his training performance steadily improved. Short Commentary

Field training also helps cool down emotions.

■ Zhang Caixin

Warfare doesn't avoid winter or summer, and military training doesn't discriminate between weather and temperature. For troops, the scorching summer heat is an ideal time for training, honing their combat skills in complex environments and strengthening their resolve to brave adversity. However, prolonged, high-intensity training in high-temperature environments can not only easily lead to physical heatstroke but also "emotional heatstroke," impacting soldiers' physical and mental health and hindering their combat effectiveness. Therefore, providing effective psychological support for soldiers undergoing high-temperature training is both a compassionate commitment and a crucial component in improving the quality and effectiveness of training.

Starting from the heart, nourishing the soul with the "clear spring" of thought. Through special lectures and online micro-courses, we explain to soldiers the causes and manifestations of anxiety and irritability in high temperatures, teach them simple and practical techniques, and help them understand that "emotional fluctuations are not to be feared; there are scientific solutions." On the other hand, through timely activities such as "Strugglers Speak" storytelling sessions, we can guide soldiers to transform "I must persist" into "I will persist," thereby strengthening their self-identity.

Scientific training should be implemented, using interactive "cool breezes" to dispel anxiety. In high-temperature environments, training content should be scientifically coordinated, organically integrating and interweaving high-intensity exercises with restorative and skill-based exercises. Training and rest periods should be rationally arranged to avoid a continuous, prolonged, and extreme training cycle under sustained extreme heat. Furthermore, group psychological and behavioral training or relaxing games can be organized as appropriate after training to enhance teamwork and relax soldiers' nerves.

Specialized support should be provided, using thoughtful "therapy" to dispel the heat. Flexible clothing arrangements, fresh meals, and well-ventilated accommodations... Taking every possible approach to providing support that reaches the heart of the soldiers will lay the foundation for cooling down their emotions. Physical cooling measures such as using electric fans and increasing the frequency of watering and mopping can also be used to create a cool resting environment.

Strengthen the team, using the backbone of the team as a strong defense. Building a strong team of psychologically savvy and counseling professionals will ensure the effectiveness of emotional "cooling" efforts. Responsible and observant officers and men from various units will be selected to serve as psychological backbones. Their responsibilities will be clearly defined as "daily observation, weekly summary, and monthly analysis." Regular exchanges and sharing will be organized to form a comprehensive psychological protection network, ensuring the continued delivery of psychological services.

第 80 集团军某旅："心理服务小分队"为官兵注入"心"动能

来源：解放军报 作者：王坤 马剑铮 责任编辑：孙悦 2025-08-09

第 80 集团军某旅开展心理服务下基层活动

心灵呵护伴官兵健康成长

解放军报讯 王坤、马剑铮报道：前段时间，第 80 集团军某旅新兵小孙因难以适应训练节奏而出现情绪波动. 该旅“心理服务小分队”主动靠前，为他制订心理疏导方案，帮他调整状态. 很快小孙又精神饱满地投入训练，并在前几天因训练成绩突出被评为“进步之星”.

“官兵心理健康不仅影响个人成长，也关乎部队凝聚力和战斗力. ”该旅领导介绍，他们根据部队实际和官兵需求，遴选心理骨干组建“心理服务小分队”，定期开展心理服务下基层活动，守护官兵心理健康.

实践中，他们邀请军地心理专家为“心理服务小分队”开展集中辅导，提升心理骨干专业素养；探索建立“体系医院心理专家、卫生连心理咨询师、心理服务小分队队员”三级联动机制，及时掌握官兵思想动态和心理变化，对于心理问题做到早发现、早干预、早疏导；对家中突遭变故、身体患有伤病的官兵，安排“心理服务小分队”定期走访，针对性开展心理服务. 此外，“心理服务小分队”梳理典型案例汇编《心理健康知识手册》，巡诊期间，他们结合手册为官兵讲解防范心理健康问题的方法举措，提升大家心理防护能力.

今年驻训以来，该旅“心理服务小分队”在各驻训点开设心理服务联络站，为官兵提供全天候服务. 某连张班长反映，平时训练成绩不错的战士小罗，由于此前一次考核表现不佳，导致现在每次参加考核就紧张，训练成绩不断下滑.

“心理服务小分队”了解情况后，安排心理骨干为小罗进行疏导，并为他制订心理训练套餐. 一段时间后，小罗的抗挫折能力显著增强. 前不久，该旅组织创破纪录比武，小罗取得狙击专业第一名.

“官兵在哪里，心理服务就延伸到哪里. ”该旅领导介绍，他们将持续总结心理服务下基层活动的经验，结合演习演训等大项任务，组织“心理服务小分队”上阵地、进战位，为官兵提供科学心理服务，筑牢官兵心理健康防线.

An 80th Group Army Brigade: A “Psychological Service Team” Infuses Soldiers with “Heart” Energy.

Source: PLA Daily Author: Wang Kun, Ma Jianzheng Editor: Sun Yue 2025-08-09

A brigade of the 80th Group Army carries out psychological service activities at the grassroots level.

Psychological care accompanies the healthy growth of soldiers.

PLA Daily reports by Wang Kun and Ma Jianzheng: Some time ago, a new recruit, Xiao Sun, from a brigade of the 80th Group Army, experienced mood swings due to difficulty adapting to the training pace. The brigade's "Psychological Service Team" proactively stepped in to develop a psychological counseling plan to help him adjust. Xiao Sun quickly returned to training with high spirits, and was recently named a "Star of Progress" for his outstanding training performance.

"The mental health of soldiers not only affects their personal growth, but also the cohesion and combat effectiveness of the unit." Brigade leaders explained that based on the unit's actual conditions and the needs of soldiers, they selected key psychological personnel to form a "Psychological Service Team." The team regularly conducts psychological service activities at the grassroots level to safeguard the mental health of soldiers. In practice, they invited military and local psychological experts to provide intensive counseling to the "Psychological Service Team" to enhance the professional competence of key psychological personnel. They also explored establishing a three-tiered linkage mechanism involving "system hospital psychologists, health company counselors, and psychological service team members" to promptly monitor soldiers' ideological and psychological developments, enabling early detection, intervention, and guidance of psychological issues. For soldiers experiencing unexpected family changes or physical injuries, the "Psychological Service Team" regularly visits and provides targeted psychological services. Furthermore, the "Psychological Service Team" compiled a "Mental Health Knowledge Handbook" based on typical case studies. During their visits, they used the handbook to explain preventative measures for mental health issues and enhance their psychological resilience.

Since this year's training, the brigade's "Psychological Service Team" has established psychological service liaison stations at various training locations, providing round-the-clock services to soldiers. Company Squad Leader Zhang reported that Xiao Luo, a soldier who usually performed well in training, now experiences anxiety during each assessment due to poor performance on a previous assessment, and his training performance has steadily declined. After understanding Xiao Luo's situation, the "Psychological Service Team" assigned a key psychologist to counsel him and developed a psychological training program for him. Over time, Xiao Luo's resilience to setbacks has significantly improved. Not long ago, the brigade organized a record-breaking competition, where Xiao Luo took first place in the sniper specialty.

"Wherever soldiers are, psychological services will be extended there," brigade leaders explained. They will continue to summarize their experience with grassroots psychological service activities and, in conjunction with major exercises and training, organize "Psychological Service Teams" to be deployed to battlefields and combat positions to provide scientific psychological services and strengthen the soldiers' mental health.

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：童祖静 韩帅 责任编辑：郭妍菲 2025-08-09

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

建章立制促新风 凝心聚力谋打赢

■解放军报特约记者 童祖静 特约通讯员 韩 帅

“各类物资申领流程清晰、过程便捷，助推保障效益提升. ”近日，陆军某旅保障部赵助理员依据《野外驻训物资器材保障实施细则》，快速完成野外驻训急需器材的申领和下发. 这是该旅通过健全规章制度推动作风建设常态化长效化的一个缩影.

“作风问题具有反复性和顽固性，必须保持常抓的韧劲、长抓的耐心，在坚持中见常态，向制度建设要长效. ”深入贯彻中央八项规定精神学习教育开展以来，该旅党委一班人认真学习中央八项规定精神、军委十项规定及其实施细则精神，深刻认识到，只有扎紧制度笼子，坚持用制度管权、管人、管事，时时处处按法规制度办事，才能实现作风建设制度化、规范化、常态化.

为此，该旅党委成立专项工作组，深入机关科室和基层营连调研，梳理出部分领域存在制度规定不完善、贯彻执行不到位等问题. “这些问题表面看是工作方法问题，根子在于制度落实不细、执行标准不严. ”座谈中，不少官兵坦言.

针对这些问题，该旅根据法规文件精神，结合自身实际，修订完善《机关服务基层限时办结制度》《野外驻训物资器材保障实施细则》等规章制度，要求各级刚性落实，并建立追踪问效机制.

实践中，该旅还通过建立健全“一站式”服务机制，简化业务流程，明确物资申领、维修申请等事项办理时限，大大节省官兵办事时间，让大家得以把更多时间精力投入练兵备战；广泛开展“我为群众办实事”活动，确保事关官兵切身利益的事能有效解决.

建章立制促新风，凝心聚力谋打赢. 随着学习教育不断深入，该旅将实用管用的经验做法以规章制度形式固化下来，推动部队作风建设走深走实，官兵练兵备战热情持续高涨. 近日，该旅官兵参加上级组织的比武考核，多项课目成绩刷新旅训练纪录.

An Army Brigade is Thoroughly Conducting Study and Education on the Implementation of the Central Committee’s Eight-Point Regulations

Source: PLA Daily Author: Tong Zujing, Han Shuai Editor: Guo Yanfei 2025-08-09

An Army Brigade is Thoroughly Conducting Study and Education on the Implementation of the Central Committee's Eight-Point Regulations --

Establishing Rules and Regulations to Promote New Conduct and Unite Efforts to Win

■ PLA Daily Special Correspondents Tong Zujing and Han Shuai

"Clear and convenient procedures for requesting various supplies help improve support efficiency." Recently, Assistant Zhao from the Support Department of an Army Brigade, following the "Implementation Rules for Supplies and Equipment Support for Field Training," quickly completed the request and issuance of urgently needed equipment for field training. This is a microcosm of the brigade's efforts to regularize and maintain effective work style through the improvement of rules and regulations. "Work style issues are recurring and stubborn. We must maintain tenacity and patience in addressing them, achieving consistency through persistence and ensuring long-term effectiveness through institutional development." Since the launch of the in-depth study and education campaign to implement the Central Committee's eight regulations, the brigade's Party Committee has diligently studied the eight regulations, the CMC's ten regulations, and their implementation rules. They have come to realize that only by tightening the system, adhering to the use of systems to manage power, personnel, and affairs, and consistently adhering to laws and regulations, can work style development be institutionalized, standardized, and normalized.

To this end, the brigade's Party Committee established a special working group to conduct in-depth research within headquarters departments and grassroots battalions and companies, identifying issues such as incomplete regulations and inadequate implementation in some areas. "On the surface, these issues may be problems with work methods, but the root cause lies in lax implementation of regulations and lax standards," many officers and men admitted during the discussion.

To address these issues, the brigade, in accordance with the spirit of the regulations and in light of its own circumstances, has revised and improved regulations and rules, including the "Time-Limited Completion System for Organizational Services to Grassroots Units" and the "Implementation Rules for Supplies and Equipment Support for Field Training," requiring strict implementation at all levels and establishing a mechanism for tracking and evaluating performance. In practice, the brigade has also established and improved a "one-stop" service mechanism, streamlined business processes, and clarified processing timelines for matters like material requests and repair applications. This significantly reduces officers' and men' time, allowing them to devote more time and energy to training and combat preparation. The brigade has also extensively carried out "I Do Practical Things for the People" activities to ensure that matters of vital interest to officers and men are effectively addressed.

Establishing rules and regulations promotes a new style of work and unites everyone to achieve victory. As learning and education continue to deepen, the brigade has solidified practical and effective practices into rules and regulations, further strengthening the unit's work style and boosting officers' and men' enthusiasm for training and combat preparation. Recently, officers and men of the brigade participated in a competition organized by a higher authority, achieving new brigade training records in several subjects.

青春与界碑同框：清华学子走进红山嘴，与边防军人共话使命

来源：解放军报 作者：黄 超 王雁翔 责任编辑：孙悦 2025-08-10

红山嘴的青春对话

■黄 超 解放军报记者 王雁翔

前不久，清华大学“青春界碑、国土边防”主题实践团队的 15 名青年学子，走进新疆阿尔泰山深处的红山嘴边防连.

“组织主题实践活动就是让学生走出校园，体验边防军人戍边生活，感悟军人的家国情怀与担当. ”清华大学武装部副部长王晓丽告诉记者，他们组织青年学子走进多个边防哨所，与青年官兵共话使命担当.

“远看红山梁，近看白茫茫，半年无家书，让人愁断肠. 红山嘴素有‘雪海孤岛’之称，每年大雪封山期超过半年. ”连队荣誉室内，连史讲解员、中士郑子腾向青年学子们讲述一张张老照片背后的戍边故事，“在这里，一代代边防官兵忠诚履行使命，用青春和热血守护边关安宁. ”

“封山期有新鲜水果和蔬菜吃吗？”博士研究生赵雨陶好奇地问.

“大雪封山前，我们会提前储备过冬物资. 天气好的时候，直升机会为连队运送新鲜蔬菜. ”一级上士黄国英告诉大家，在各级的关心关怀下，哨所的条件越来越好.

进入封山期，连队还会组织开展“红山大舞台”“红山故事会”等文化活动. “红山嘴并不寂寥，跟山下一样青春飞扬. ”下士曾令情说.

活动中，青年学子们一边聆听一边思考. 来自航天航空学院的马世育曾在学校一堂国防教育课上，听一位从边防部队退役返校的学长讲述从军经历. “今天我真正明白，对祖国深沉的爱、坚定的理想信念和使命担当，是边防军人牺牲奉献的力量之源. ”马世育说.

经上级批准，青年学子们跟随官兵一起巡逻. 在曾令情的带领下，几名战士和青年学子一起踏上前往界碑的巡逻路. 途中经过一处陡峭山坡时，脚下石头打滑，大家手脚并用向上攀登.

“非常累，感觉双腿沉得抬不起来，心怦怦直跳，但走在祖国的边防线上，我感到特别自豪. ”大二学生李佳明大口喘着粗气说. 他的腿前段时间受伤还没完全康复，同学们都劝他休息. 他却说：“官兵在边防爬冰卧雪，我来这里是向他们学习的. ”

抵达巡逻点位时，青年学子们已疲惫不堪，脸上却洋溢着自豪. 站在山巅俯瞰壮美山河，大家难掩兴奋之情. 随后，战士和青年学子们一起在界碑前，面向国旗庄严宣誓.

返回路上，青年学子们在巡逻车上畅谈感悟与收获. “行走在祖国的边防线上，我更加懂得军人的坚守与奉献. 毕业后，我也要到祖国和人民最需要的地方发光发热. 如果有机会，我也想穿上军装，为强军事业贡献力量. ”大二学生朱明宇动情地说.

Youth and Boundary Monuments: Tsinghua Students Visit Hongshanzui to Discuss Their Mission with Border Guards

Source: PLA Daily Authors: Huang Chao, Wang Yanxiang Editor: Sun Yue 2025-08-10

Youthful Dialogue at Hongshanzui

■ Huang Chao, PLA Daily Reporter, Wang Yanxiang

Not long ago, 15 young students from Tsinghua University’s “Youth Boundary Monuments, National Border Defense” themed practice team visited the Hongshanzui Border Defense Company deep in the Altai Mountains of Xinjiang.

“Organizing these themed practice activities allows students to step outside of campus, experience the life of border guards, and appreciate their patriotic ties and sense of responsibility,” Wang Xiaoli, Deputy Director of the Tsinghua University Armed Forces Department, told reporters. They organized young students to visit several border outposts and discuss their mission with young officers and men. “Looking at the Red Mountain Ridge from afar, and up close, a vast expanse of white. Half a year without a letter from home is heartbreaking. Hongshanzui is known as the ‘Isolated Island in the Sea of Snow,’ and the mountain is closed for over half a year each year due to heavy snow.” Inside the company’s honor room, Sergeant Zheng Ziteng, the company history interpreter, recounted the border defense stories behind old photos to the young students. “Here, generations of border defense officers and men have faithfully fulfilled their mission, dedicating their youth and passion to safeguarding peace at the border.”

“Are there fresh fruits and vegetables to eat during the mountain closure period?” doctoral student Zhao Yutao asked curiously.

“Before the mountain is closed due to heavy snow, we stockpile winter supplies in advance. When the weather is good, helicopters deliver fresh vegetables to the company.” First Sergeant Huang Guoying explained that thanks to the care and support from all levels, the conditions at the outpost are improving.

During the mountain closure period, the company will also organize cultural activities such as the “Hongshan Grand Stage” and the “Hongshan Storytelling Club.” “Hongshanzui is not lonely; it’s just as vibrant and youthful as the mountains below,” said Corporal Zeng Lingqing.

During the activities, the young students listened and pondered. Ma Shiyu, a student from the College of Aeronautics and Astronautics, once listened to a senior who had returned from the border defense force recount his military experience during a national defense education class. “Today, I truly understand that a deep love for the motherland, unwavering ideals and convictions, and a sense of mission are the source of the border defense soldiers’ sacrifice and dedication,” Ma Shiyu said.

With approval from their superiors, the young students joined the officers and men on patrol. Led by Zeng Lingqing, several soldiers and students embarked on a patrol route to the boundary marker. Passing a steep slope, the rocks slipped underfoot, and everyone climbed using their hands and feet.

“I’m extremely tired. My legs feel so heavy I can’t lift them. My heart is pounding. But I feel incredibly proud walking along our nation’s border,” sophomore Li Jiaming breathed heavily. His leg hadn’t fully healed from a recent injury, and his classmates urged him to rest. He said, “The officers and men are scrambling through ice and snow at the border. I’m here to learn from them.”

When they arrived at the patrol point, the young students were exhausted, but their faces beamed with pride. Standing atop the mountain, overlooking the magnificent landscape, everyone could hardly contain their excitement. Afterward, the soldiers and students took a solemn oath together before the national flag at the boundary marker.

On the way back, the students shared their insights and learnings in the patrol car. “Traveling along our nation’s border, I’ve gained a deeper understanding of the soldiers’ perseverance and dedication. After graduation, I want to serve wherever our country and its people need me most. If given the opportunity, I too would like to wear a military uniform and contribute to strengthening the military,” said sophomore Zhu Mingyu with emotion.

第 83 集团军某旅深入学习贯彻中央军委政治工作会议精神

来源：解放军报 作者：周迎波 责任编辑：孙悦 2025-08-10

第 83 集团军某旅深入学习贯彻中央军委政治工作会议精神——

向战育才，加钢淬火铸劲旅

■周迎波

“归队后，我要充分运用所学知识，为部队战斗力建设添砖加瓦. ”前不久，第 83 集团军某旅组织百余名官兵参加无人机专业培训并通过了考核鉴定，将学习成果带回战位. 这是该旅紧贴使命任务，加快锻造高素质、专业化军事人才队伍的一个缩影.

该旅领导说，习主席在中央军委政治工作会议上，深刻阐明政治建军时代要求，特别强调要确保人民军队始终人才辈出. 贯彻这一重要指示精神，必须将人才培养作为战略任务来抓，坚持向战育才，始终把能打仗、打胜仗作为人才工作出发点和落脚点，确保官兵能够驾驭现代战争、有效履行新时代使命任务.

该旅领导介绍，曾有一段时间，面对新专业新装备，一些官兵存在“专业未学精学透”“有情况靠厂家”等问题，导致面对突发情况时处置不及时，影响训练质效. 一次实战化训练中，列装不久的某型装备突发故障，现场的维修技师束手无策，只能原地等待救援.

对此，该旅认真总结教训，决心下大力气培养高素质、专业化军事人才，确保人才供给侧精准对接战场需求侧. 他们坚持“走出去”与“引进来”相结合，常态开展技术研讨交流会、群众性技术革新等活动，通过任务牵引、以老带新、手把手帮教等方式，鼓励官兵岗位创新、岗位成才；推动“主战专业有行家、小特专业有骨干、新质专业有人才”人才培养体系建设，建立完善培养提高、任务磨砺等 7 类机制，加快人才成长步伐；积极协调军地院校、科研机构，为骨干人才跟学培训、创新攻坚提供有力支持.

精通主战装备维修的技术能手，立足岗位开展革新攻关、荣获多项国家专利的军士创客……随着一系列举措落地见效，该旅越来越多的优秀人才脱颖而出，成为部队建设的中坚力量. 某连一级上士唐运禄针对装甲抢修车需频繁更换吊具问题，将几种不同类型吊具改进为一种通用吊具，有效提高了车辆抢修效率.

随着学习贯彻中央军委政治工作会议精神不断深入，该旅向战育才导向更加鲜明，各类高素质、专业化军事人才活跃练兵一线，助推部队战斗力建设水平稳步提升.

An 83rd Group Army Brigade Has Thoroughly Studied and Implemented the Spirit of the Central Military Commission’s Political Work Conference.

Source: PLA Daily Author: Zhou Yingbo Editor: Sun Yue 2025-08-10

A brigade of the 83rd Group Army has thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference.

Cultivating Talents for War, Tempering Steel to Forge a Powerful Brigade

■ Zhou Yingbo

“After returning to the unit, I will fully utilize the knowledge I’ve learned to contribute to the unit’s combat effectiveness.” Not long ago, a brigade of the 83rd Group Army organized over a hundred officers and men to participate in specialized drone training, pass the assessment, and bring the results back to their posts. This is a microcosm of the brigade’s efforts to closely adhere to its mission and accelerate the forging of a contingent of high-quality, professional military personnel.

The brigade leader stated that at the Central Military Commission’s Political Work Conference, President Xi Jinping profoundly expounded on the requirements of the era of politically building the army, particularly emphasizing the need to ensure that the People’s Army continues to produce a steady stream of talented personnel. To implement this important directive, talent development must be prioritized as a strategic task. We must persist in cultivating combat-oriented personnel, always prioritizing the ability to fight and win battles as the starting point and end point of talent development, ensuring that officers and men are capable of mastering modern warfare and effectively fulfilling their missions in the new era.

Brigade leaders explained that, for a period of time, faced with new specialties and equipment, some officers and men struggled with issues like “not thoroughly learning their profession” and “relying on manufacturers when necessary.” This led to delayed response to emergencies and compromised the quality and effectiveness of training. During one combat training exercise, a recently deployed piece of equipment suddenly malfunctioned, leaving on-site maintenance technicians helpless and unable to remedy the situation, forced to wait for assistance.

The brigade has carefully reviewed these lessons and is determined to vigorously cultivate high-quality, professional military personnel, ensuring that the supply of talent is precisely aligned with battlefield demand. They adhere to a combination of “going global” and “bringing in” initiatives, regularly holding technical seminars and exchanges, and mass technology innovation activities. Through mission-driven initiatives, mentoring by veterans, and hands-on mentoring, they encourage officers and men to innovate and develop within their roles. They promote the development of a talent training system characterized by “experts in core combat specialties, backbones in specialized specialties, and talented individuals in emerging specialties,” establishing and improving seven mechanisms, including training and advancement, and on-the-job training, to accelerate talent development. They actively coordinate with military and civilian academies and research institutions to provide strong support for key personnel’s training and innovation.

Technical experts proficient in the maintenance of core combat equipment, and sergeant-in-chief makers who innovate and tackle key problems in their roles and have been awarded multiple national patents... As a series of initiatives bear fruit, more and more outstanding talents within the brigade have emerged, becoming the backbone of the force’s development. Sergeant First Class Tang Yunlu of a certain company addressed the frequent replacement of slings on armored repair vehicles by improving several different types of slings into a single universal sling, effectively improving vehicle repair efficiency. As the study and implementation of the spirit of the Central

Military Commission's Political Work Conference continues to deepen, the brigade's orientation towards training talents for combat has become more distinct. Various types of high-quality and professional military talents are actively training on the front line, helping to steadily improve the combat effectiveness of the troops.

陆军某旅将"减员操作"列入日常训练着力培养一专多能人才

来源：解放军报 作者：张子庚　张毛 责任编辑：郭妍菲 2025-08-10

陆军某旅着力培养一专多能人才——

"减员操作"成为训练常态

■张子庚　解放军报特约通讯员　张毛

"炮手'受伤'，车长顶替进入战位……"盛夏时节，西北戈壁，陆军某旅防空专业一场实弹射击比武考核火热进行，炮手曾海龙"意外受伤"后，车长王金旭迅速进入射击位置，精准命中目标.

"战场态势瞬息万变，'减员'是作战中经常面对的情况."该旅领导介绍，他们扎实开展专业"换手"训练，大力培养一专多能型骨干人才，源于一次失败教训.

一次演训中，进入阵地攻坚阶段，导调组临机设置"战斗减员"特情，要求官兵迅速接替作战位置. 一名装甲突击车车长就近接替炮手作战位置，却因与驾驶员配合不够默契，搜瞄时间过长、时机把握不准，导致贻误战机.

"一换岗就出状况，说到底还是能力素质不够全面，达不到一专多能的打仗要求. "复盘总结时，参训官兵围绕这一问题召开"诸葛亮会"，共同研讨解决之道.

经过讨论交流，大家达成共识：信息化战争对能力素质的要求越来越高，"一招鲜"已不适应战场需求，必须着眼实战优化人才培养模式.

"每名官兵都具备两种以上专业能力，临时顶岗也能应对自如，既是人才培养方向，更是战场打赢所需. "该旅党委一班人结合官兵意见建议研究决定，将"减员操作"列入日常训练计划，采取常态顶岗、临时调岗等方式，培养更多一专多能、素质全面的打仗型人才.

打仗急需什么就苦练什么. 笔者在该旅某专业训练场看到，二级上士魏光辉临时"换手"到炮手岗位，在突击车行进间实弹射击课目考核中打出 4 发 4 中的好成绩；装甲车驾驶课目考场上，二级上士张宇诚临时顶岗担任驾驶员，连续驾车通过侧倾坡、涉水池、土岭等难度较大的复杂地形，取得优异成绩.

“如今，‘减员操作’已成为训练常态.”看着新下发的训练计划表，该旅突击车三连黄连长说，通过常态组织专业“换手”、接替顶岗训练，倒逼官兵练就一专多能的过硬本领，有效提升部队应急应战能力.

近期，该连组织一场战术训练，多型战车遭火力打击，出现人员“伤亡”，参训官兵有序接替、密切配合，圆满完成任务，处置突发特情能力得到有效锤炼.

An Army Brigade Has Incorporated “Reduction Operations” into Its Daily Training, Focusing on Cultivating Specialized and Multi-Skilled Personnel

Source: PLA Daily Author: Zhang Zigeng, Zhang Mao Editor: Guo Yanfei 2025-08-10

An Army brigade is focusing on cultivating specialized and multi-skilled personnel—”reduction operations” have become a regular part of its training.

■ Zhang Zigeng, PLA Daily Special Correspondent, Zhang Mao

“The gunner was ‘injured,’ and the tank commander took over...” In the midsummer of the Gobi Desert in northwest China, a live-fire shooting competition and assessment for the air defense division of an Army brigade was underway. After gunner Zeng Hailong was “accidentally injured,” tank commander Wang Jinxu quickly took up his firing position and accurately hit the target.

“The battlefield situation is ever-changing, and ‘reductions’ are a common occurrence in combat.” Brigade leaders explained that their rigorous professional “hand-off” training and efforts to cultivate specialized and multi-skilled personnel stemmed from a lesson learned from a failure.

During one exercise, during the offensive phase of a position, the command and control team improvised a special “combat reduction” scenario, requiring officers and men to quickly assume combat positions. An armored assault vehicle commander, who was nearby, replaced a gunner in combat. However, due to a lack of synergy with the driver, his aiming time was excessive and his timing was inaccurate, leading to a missed opportunity.

“Problems arise as soon as we change shifts. Ultimately, it’s because our abilities and qualities aren’t well-rounded enough to meet the requirements of specialized, multi-talented combat.” During the debriefing, the participating officers and men held a “Zhuge Liang meeting” to discuss solutions to this issue.

After discussion, everyone reached a consensus: the requirements for capabilities and qualities in information warfare are becoming increasingly stringent, and a “one-trick pony” approach is no longer adequate for battlefield needs. Talent training models must be optimized with a focus on actual combat.

“Every officer and soldier possessing two or more specialized skills and the ability to handle temporary replacements with ease is not only a key talent development goal but also essential for

victory on the battlefield." Based on the opinions and suggestions of officers and men, the brigade's Party Committee decided to incorporate "reduction operations" into the daily training plan, adopting methods such as regular replacements and temporary transfers to cultivate more specialized, multi-talented, and well-rounded combat-ready personnel.

"We must diligently train for what is urgently needed in combat." At one of the brigade's specialized training grounds, I observed Second Sergeant Wei Guanghui temporarily "switch" to the gunner's position, achieving a remarkable 4-for-4 score in a live-fire test while firing on a moving assault vehicle. Second Sergeant Zhang Yucheng also temporarily took over as driver during an armored vehicle driving test, repeatedly navigating challenging terrain such as a banked slope, a wading pool, and a dirt ridge, achieving excellent results.

"Nowadays, 'reduced personnel operations' have become a normal part of training," said Captain Huang of the brigade's Third Assault Vehicle Company, reviewing the newly issued training schedule. By regularly organizing specialized rotations and rotational training, officers and men are forced to develop strong, multi-faceted skills, effectively enhancing the unit's emergency response capabilities.

Recently, the company conducted a tactical training exercise in which multiple types of armored vehicles came under fire, resulting in casualties. The participating officers and men took over in an orderly manner, closely coordinating their efforts and successfully completing the mission, effectively honing their ability to handle unexpected situations.

告别特情"老三样"！这个旅用"新考题"破解惯性思维

来源：中国军网-解放军报 作者：罗洋 王杰 武诗韬 何曦 责任编辑：孙悦

2025-08-11

从"老三样"到"新考题"

——第 77 集团军某旅提高对抗训练质效的一段经历

■罗 洋 王 杰 解放军报记者 武诗韬

清晨的大西北，暖风卷着沙尘，刮过第 77 集团军某旅训练场，某地空导弹连正严阵以待.

突然，刺耳的防空警报撕裂了这里的宁静. 随着"敌机"编队低空突进，一场对抗训练骤然打响.

"目标消失！"雷达刚捕获目标，突遭强电磁干扰. 几乎同时，"化学沾染"警报拉响，小股"敌人"趁乱展开偷袭……多种特情接踵而至，连长何曦带领官兵沉着应对，最终指挥火力单元实施精准抗击.

“打出这套‘组合拳’，就是倒逼部队在各种危局险局中锤炼提升应急处置能力.”导调组组长王刚一边紧盯战场态势，一边介绍，这种多域复合、连环嵌套的特情设计，正是旅党委近年来引导官兵强化打仗意识、提高实战本领的积极探索.

王刚介绍，曾几何时，“装备故障”“通信中断”“通过‘染毒’地带”一度成为特情设置的“老三样”. 久而久之，对何时何地出现何种特情，官兵都了如指掌，处置起来也不费劲，大大降低了对抗难度.

更严重的是，一些官兵由此养成了惯性思维，想当然地认为：真实战场无非就是这样.

有一次，在对抗训练第一阶段，导调组给出了“某型装备发生故障”的特情，参训连队按预案很快完成了处置；进入第二阶段，导调组临时设计了一道“隐形考题”：在红方防空导弹连全力拦截模拟空中目标的关键时刻，同步释放高强度、多频段电磁压制信号. 该连雷达瞬间“雪花”满屏，目标信号瞬间消失.

然而此时，官兵们的注意力都集中在严防对方的“硬摧毁”上，对电磁“软杀伤”反应迟钝，未能及时采取反制措施. 靶机被击落后，防空体系却在“敌”持续干扰下陷入“瘫痪”.

连队应对特情“老三样”绰绰有余，可情况一变便露马脚、“掉链子”，这怎么能行？

意识到问题的严重性，该旅训练部门开始尝试作出改变，在对抗训练中增设新特情. 由于对强度、时机和各要素间的关联性把握不准，时间一长，这些新特情逐渐被固化下来，又成为新版“老三样”，官兵们很快摸清了套路，之前存在的问题仍然没有得到解决.

“兵无常势，水无常形. 在未来战场上，唯一不变的可能就是变！”议战议训会上，该旅党委一班人要求机关进一步改进对抗训练组织方式，特别在特情设置上，要突出“挑战性”和“陌生感”，充分预想将来打仗可能遇到的各种情况.

为构设更加逼真的实战环境和条件，他们着眼现代战争特点，结合使命任务和装备实际，对现有的“特情库”进行了扩容，新增电磁压制、智能干扰与诱骗、网络攻击、极限通信、后勤供应链切断等数十种特情，并分别制订了应对处置方案.

同时，在对抗训练过程中，他们一改以往的单一特情导调模式，对不同特情进行交叉组合，提高应对处置难度. 不仅如此，导调员还可以根据战场态势和部队表现，临时设置“特情库”外的特情或改变特情原有条件，让“出乎官兵意料”成为常态.

特情“换题”、导调“变脸”，如平湖投石，在该旅官兵心里激起层层波澜，一场针对不实战法训法的反思整改深入展开.

“那次的教训，让我们彻底明白，只会熟练使用武器远远不够，还要学会研判战场态势，料敌于先、制敌于前，提升识局、谋局、控局、破局能力！”何曦告诉记者，那场对抗训

练结束后，他们专门把复杂电磁环境下装备操作、应急情况处置、指挥通信抢修等内容，纳入重点训练课目，定期与经常担任“蓝军”的兄弟连队进行战法探讨.

深夜，该旅作训科办公室灯火通明，王刚正和几名参谋围坐在电子沙盘前，研究下一次防空对抗训练应该加入哪些特情. “把特情设得难一些、活一些，部队就能离实战更近一些. ”王刚坦言，未来战场陌生复杂、瞬息万变，导调员不可能穷尽所有情况. 最重要的是通过这种方式，引领和倒逼官兵主动思战谋战研战，心无旁骛、全力以赴把打仗本领练过硬.

亲历者说

莫让特情成“常情”

■何 曦

算起来，我在训练场上摸爬滚打也有很多年了. 其间，我经历过很多的特情，真切感受到了我军实战化训练的强劲脉动.

在过去，处置特情对我们来说，可谓“手拿把掐”：装备故障，派出骨干及时修理；地域“染毒”，立刻穿戴装备做好防护；通信中断，马上启用备用方案. 那时，导调组打的几乎是“明牌”，官兵处置起来轻车熟路.

后来，“老三样”有了新变化，加入了一些新情况，但处置流程大差不差，每次训练就像抽考题，对照不同情况给出相应方案即可.

特情不“特”成“常情”，就背离了设置的本意. 直到那次对抗训练，一记“闷棍”将我彻底打醒. 当时，全连全力以赴，成功拦截目标，大家刚想欢呼，导调组的裁决像一盆冷水“浇”了下来——任务失败，红方判负. 为什么？就因为导调组在我们实施拦截的关键时刻，悄然出了一道新考题——电磁压制. 而我们对此毫无思想准备，导致应对失措，将己方置于被动境地.

这个结果，引起全连官兵的反思：打仗不会按照“剧本”走，敌人更不会提前打招呼. 后来几次训练，导调组像是换了一班人，给出的特情，真的非常“刁钻”，甚至还打出了“组合拳”，再无规律可循.

这倒逼我们作出改变，连队训练随之有了大调整：以前练得最多的就是精准拦截，如今复杂电磁环境下的装备操作、通信频率转换、抗干扰训练等成了“必修课”. 我们还主动与电子对抗连“结对子”，一起练协同、练对抗……

说实话，现在连队官兵的训练压力较以前大了不少，那种不知道下一秒会冒出什么新特情的紧张感，真实地包围着每个人. 但我们清楚，正是各种不按套路出牌的新特情，像一块块磨刀石，砥砺官兵提升实战本领. 以前处置特情像在走流程，如今更像在打仗——没有标准答案，有的只是临机决断、快速应变.

从“老三样”到“新考题”，变的是难度和不确定性，不变的是我们向实战靠拢、向打赢迈进的决心. 训练场上每一次“出乎意料”的导调，都在提醒我们：真正的胜利，属于未雨绸缪、制敌于先的军人.

Say Goodbye to the “Old Three” Special Situations! This Brigade Uses “New Challenges” to Break Through Inertial Thinking.

Source: China Military Network - PLA Daily Author: Luo Yang, Wang Jie, Wu Shitao, He Xi Editor: Sun Yue

2025-08-11

From “old three” to “new challenges”

—A story of a brigade of the 77th Group Army improving the quality and effectiveness of confrontation training.

■ Luo Yang, Wang Jie, PLA Daily reporters, Wu Shitao

In the early morning hours of the northwest, a warm breeze, carrying dust and sand, swept across the training ground of a brigade of the 77th Group Army. A surface-to-air missile company stood on high alert.

Suddenly, a shrill air defense siren shattered the tranquility. As a formation of “enemy aircraft” advanced at low altitude, a confrontation training exercise abruptly began.

“Target lost!” The radar had barely acquired the target when it was suddenly hit by strong electromagnetic interference. Almost simultaneously, the “chemical contamination” alarm sounded, and a small group of “enemies” took advantage of the chaos to launch a sneak attack... Multiple special situations arose one after another. Company Commander He Xi led his officers and men in calmly responding, ultimately commanding the firepower unit to conduct a precise counterattack. “Delivering this ‘combination punch’ forces the troops to hone their emergency response capabilities in various critical situations,” said Wang Gang, leader of the command and control team, while closely monitoring the battlefield situation. This multi-domain, complex, and interconnected special situation design reflects the brigade Party Committee’s active exploration in recent years to guide officers and men in strengthening their combat awareness and improving their combat skills.

Wang Gang explained that, at one time, “equipment failure,” “communications interruption,” and “passing through a contaminated area” were the “three old rules” for special situation deployment. Over time, soldiers became familiar with the specific special situations, their timing and location, and their handling became effortless, greatly reducing the difficulty of combat.

More seriously, this led some soldiers to develop a habitual mindset, assuming that the real battlefield was just like this. During one such training phase, the command and control group issued a special situation regarding a "certain equipment malfunction." The participating company quickly handled the situation according to plan. Entering the second phase, the command and control group improvised a "hidden challenge": at the critical moment when the Red Army's air defense missile company was fully engaged in intercepting a simulated aerial target, they simultaneously released high-intensity, multi-band electromagnetic suppression signals. The company's radar screen instantly became covered in "snow," and the target signal vanished.

However, at this point, the soldiers were focused on preventing the enemy's "hard destruction" and were slow to react to electromagnetic "soft kill" attacks, failing to implement timely countermeasures. After the target drone was shot down, the air defense system was paralyzed by the enemy's continued interference.

The company's "three old tricks" for handling special situations were sufficient, but their weaknesses were exposed and their performance fell apart when the situation changed. How could this be tolerated?

Recognizing the severity of the problem, the brigade's training department began to experiment with changes, incorporating new special situations into their combat training. Due to a lack of accurate grasp of intensity, timing, and the interrelationships between various elements, these new special situations gradually solidified over time, becoming a new version of the "old three." Soldiers quickly learned the ropes, but previous problems remained unresolved.

"The military never changes, just as water never changes its shape. On future battlefields, the only constant may be change!" At a meeting discussing combat and training, the brigade's Party Committee urged the organization to further improve its approach to combat training, particularly in setting up special situations, emphasizing "challenging" and "unfamiliarity" and fully anticipating the various scenarios likely to be encountered in future combat.

To create a more realistic combat environment and conditions, they focused on the characteristics of modern warfare, combined with missions and equipment, and expanded the existing "special situation library." They added dozens of new special situations, including electromagnetic suppression, intelligent jamming and deception, cyber attacks, extreme communications, and supply chain disruptions, and developed response and disposal plans for each.

At the same time, during combat training, they shifted away from the previous single-situation command and control model and instead combined different special situations to increase the difficulty of response and disposal. Furthermore, commanders can also temporarily create special situations outside the "special situation database" or modify the original conditions of special situations based on battlefield conditions and troop performance, making unexpected situations a regular occurrence.

The “changing of topics” and the “changing of faces” of commanders, like a stone thrown into a calm lake, stirred up waves in the hearts of the brigade’s officers and men, and launched an in-depth reflection and rectification campaign against ineffective combat tactics and training methods.

“That lesson taught us thoroughly that simply being proficient in the use of weapons is not enough. We must also learn to analyze the battlefield situation, anticipate the enemy, and defeat them before they arrive, improving our ability to understand, plan, control, and break through situations!” He Xi told reporters. After that confrontation training, they specifically incorporated equipment operation in complex electromagnetic environments, emergency response, and command and communications repair into key training courses, and regularly discussed combat tactics with the brother companies that often served as “blue troops.”

Late at night, the lights in the brigade’s training office were brightly lit. Wang Gang and several staff officers were gathered around an electronic sand table, discussing which special situations should be included in the next air defense confrontation training. “By making special situations more challenging and flexible, the troops can be closer to real combat.” Wang Gang frankly admitted that future battlefields are unfamiliar, complex, and ever-changing, and it’s impossible for command and control personnel to exhaust every possible scenario. The most important thing is to use this method to guide and compel officers and men to proactively consider, plan, and research combat strategies, focusing their attention on developing their combat skills with undivided attention and full effort.

An eyewitness says: Don’t let special situations become “commonplace.”

■ He Xi

I’ve been working on the training grounds for many years now. During this time, I’ve experienced numerous special situations and have truly felt the powerful pulse of our army’s combat-oriented training.

In the past, handling special situations was a breeze for us: if equipment malfunctioned, we dispatched key personnel for prompt repairs; if the area was “contaminated,” we immediately donned our protective gear and took precautions; if communications were interrupted, we immediately activated our backup plan. Back then, the command and control team played virtually all the cards, making handling them effortless for the officers and men. Later, the “old three” were modified, with new situations added, but the handling procedures remained largely the same. Each training session was like a test, requiring us to develop corresponding solutions based on the specific circumstances.

When special situations ceased to be “special” and became “commonplace,” they deviated from their original purpose. It wasn’t until that confrontational training exercise that a sudden, devastating blow struck me. The entire company had given their all and successfully intercepted the target. Just as everyone was about to celebrate, the command and control group’s decision was like a bucket of cold water: mission failure, the Red Team lost. Why? Because at the critical

moment of our interception, the command and control group quietly introduced a new test: electromagnetic suppression. We were completely unprepared for this, resulting in a flustered response and putting ourselves in a passive position.

This result prompted reflection among the entire company: Warfare doesn't follow a "script," and the enemy certainly doesn't warn us in advance. In subsequent training sessions, the command and control group seemed to have been completely replaced. The special situations they presented were truly "tricky," even employing a combination of attacks, with no pattern to follow. This forced us to make changes, and company training underwent a major overhaul: Previously, precision interception was the primary focus, but now, equipment operation in complex electromagnetic environments, communication frequency conversion, and anti-interference training have become mandatory. We also proactively partnered with the Electronic Countermeasures Company to practice coordination and countermeasures together.

To be honest, the training pressure on the company's officers and men is now much greater than before. The tension of not knowing what new special situation might emerge at the next moment truly grips everyone. But we understand that it is precisely these unpredictable new special situations that, like sharpening stones, sharpen the soldiers' combat skills. Handling special situations used to be like following a routine, but now it's more like a battle—there are no standard answers, only improvisation and rapid response.

From the "old three things" to the "new test," what has changed is the difficulty and uncertainty, but what remains unchanged is our determination to approach real combat and win. Every "unexpected" command on the training ground reminds us: true victory belongs to soldiers who plan ahead and take the lead.

连队巧搭平台，让官兵在专属“舞台”重拾自信练强本领

来源：中国军网-解放军报 作者：屈昆鹏 责任编辑：孙悦

2025-08-11

善于搭台才能“好戏连台”

■中部战区陆军某旅某连干部 屈昆鹏

“今天体能考核，我的成绩达到优秀标准了！谢谢您的帮助，我会继续努力，为连队争光！”这天，上等兵褚鑫兴冲冲地前来报喜，听着他的话，我颇感欣慰，看来连队为他搭建的“舞台”奏效了.

褚鑫是一名大学生士兵，刚下连时，因体能较差，常被班长刘永彪带着加练. 然而一段时间过后，他的成绩却不升反降. 为弄清原委，我向刘永彪了解情况. 他无奈地告诉我，褚鑫是个很有头脑的兵，平时也爱谈天说地，可一到体能训练时间就变得很抵触，不知为啥.

于是，我找到褚鑫谈心，他沮丧地说道：“班长带我练了那么久，体能训练依旧没长进，有时候真觉得自己不是当兵的料……”我意识到，不是刘永彪的训练方法不对，而是褚鑫的自信心被磨没了. 但他的长处也很明显——头脑灵活、善于思考. 我暗想，是不是可以以此为突破口，换个方式帮带他.

恰逢单位组织理论知识竞赛，我和连长商议后，决定推荐褚鑫参加. 得知消息，他既意外又犹豫，我鼓励他：“你知识面广，理论功底好，不让你这个大学生去让谁去？好好准备，我们全力支持！”为帮他备赛，我专门抽出时间整理资料、协助辅导，这让他燃起了斗志.

比赛当天，凭借扎实积累和冷静发挥，褚鑫荣获二等奖. 之后一段时间，我们几个带兵人也常用他的事例鼓励其他战友. 这份认可让褚鑫十分感动，他主动找到班长，请教训练方法，体能训练更加积极. 一段时间后，他的成绩终于有了提升，还在最近的 3000 米跑考核中再次突破自己.

褚鑫的经历，让我感触很深：战士各有禀赋，补短贵在得法. 要善于为他们创造机会，并给予充分信任，让他们的转变发自内心. 连务会上，我的想法得到大家一致认可. 于是，我们根据官兵的不同情况和特点，积极为他们“搭台”.

下士范海韬性格内向，平时沉默寡言，但他的防护课目成绩一直很优秀. 我便向骨干提议，可以分批组织新兵向他请教防护技巧. 次日训练时间，面对新兵，他起初还有些紧张，但做起示范动作却干净利落. 见大家听得专注，他变得自信起来，眼里也有了光. 几次下来，他明显开朗多了，集体活动也踊跃参加，如今已开始主动为连队建设建言献策了.

前段时间，旅里打算组织关于官兵关系的沉浸式教育，把任务交给了我们连，我立即想到了下士白博文. 这名战士性格耿直，有时与战友产生争执. 在我的组织下，白博文和几位曾与他有过摩擦的战士共同参与其中. 不出所料，第一次排练他就因意见不合与他人发生了争论.

我因势利导，把白博文带到荣誉室，向他讲述连队官兵团结合作、攻坚克难的故事，并与他一起分析存在的问题，告诉他如何与战友和谐相处. 当晚，他主动向战友道了歉. 教育当天，凭借默契配合，白博文和战友再现了多个典型场景，赢得了阵阵掌声.

看着这些同志的变化，我想，解决官兵的问题不应拘于一隅，而要开动脑筋，为他们提供改变自己、向上向好的平台. 如此一来，官兵们才能不断成长成才，连队工作才能“好戏连台”.

（郭杰峰、张钊整理）

The Company Cleverly Created a Platform, Allowing Officers and Men to Regain Confidence and Strengthen Their Skills on Their Own "Stage"

Source: China Military Network - PLA Daily Author: Qu Kunpeng Editor: Sun Yue

2025-08-11

A good stage-setting is the key to a "continuously successful performance."

■ Qu Kunpeng, Company Cadre, Central Theater Command Army Brigade

"Today, I achieved excellent results in my physical fitness test! Thank you for your help. I will continue to work hard and bring honor to the company!" That day, Corporal First Class Chu Xin excitedly came to share the good news. Hearing his words, I felt deeply relieved. It seemed the "stage" the company had built for him was working.

Chu Xin is a college student soldier. When he first joined the company, his physical fitness was poor, so squad leader Liu Yongbiao often took him to practice extra training. However, after a while, his performance declined instead of improving. To understand the situation, I contacted Liu Yongbiao to find out. He told me helplessly that Chu Xin was a very intelligent soldier, usually chatty and open-minded, but when it came to physical training, he became very resistant. I didn't know why.

So, I went to talk to Chu Xin, and he said dejectedly, "My squad leader has been training with me for so long, but I still haven't improved in physical training. Sometimes I really feel like I'm not cut out for the military..." I realized it wasn't Liu Yongbiao's training methods that were wrong, but Chu Xin's confidence that had been worn away. However, his strengths were also obvious—his quick mind and ability to think. I wondered if I could use this as a breakthrough and coach him in a different way.

Coincidentally, the unit was organizing a theoretical knowledge competition, and after discussing it with the company commander, I decided to recommend Chu Xin to participate. He was surprised and hesitant to hear the news. I encouraged him, "You have a wide range of knowledge and a solid theoretical foundation. Who else can go if not you, a college student? Prepare well. We have our full support!" To help him prepare for the competition, I took time to organize materials and provide coaching, which ignited his fighting spirit.

On the day of the competition, Chu Xin won second prize with his solid preparation and calm performance. For a while afterward, several of us commanders frequently used his example to encourage our fellow soldiers. Chu Xin was deeply moved by this recognition, and he proactively sought out his squad leader for advice on training methods and became even more enthusiastic about physical training. After a while, his performance finally improved, and he even surpassed his own record in the recent 3,000-meter run assessment.

Chu Xin's experience resonated deeply with me: Soldiers each have their own talents, and the key to overcoming them lies in finding the right method. We must be good at creating opportunities for them and giving them full trust, allowing their transformation to come naturally. At the company meeting, my ideas were unanimously endorsed. So, we actively provided support for them based on their individual circumstances and characteristics.

Corporal Fan Haitao was introverted and usually quiet, but he consistently excelled in protective training. I suggested to the core staff that we organize groups of new recruits to learn protective techniques from him. The next day, during training, he was initially nervous before the new recruits, but he demonstrated the movements with a swift and efficient execution. Seeing everyone listening intently, his confidence grew, and his eyes lit up. After a few sessions, he became noticeably more cheerful, actively participated in group activities, and now actively offers suggestions for company development.

Some time ago, the brigade planned to organize an immersive training session on officer-soldier relations and assigned the task to our company. Corporal Bai Bowen immediately came to mind. This soldier, known for his straightforward character, sometimes argued with his comrades. Under my guidance, Bai Bowen and several other soldiers with whom he had previously clashed participated in the session. As expected, he engaged in an argument during the first rehearsal over a disagreement.

I capitalized on this situation and brought Bai Bowen to the Hall of Honor. I shared stories of the company's officers and men working together to overcome challenges, analyzed existing problems with him, and taught him how to get along harmoniously with his comrades. That evening, he proactively apologized to his comrades. On the day of the training session, Bai Bowen and his comrades, with their tacit cooperation, reenacted several typical scenarios, earning rounds of applause.

Observing the changes in these comrades, I realized that addressing the problems of officers and men shouldn't be confined to a single rut; rather, we should be more creative and provide them with a platform for self-improvement and improvement. Only in this way can officers and men continue to grow and develop, and the company's work can be "excellent and continuous."

(Compiled by Guo Jiefeng and Zhang Zhao)

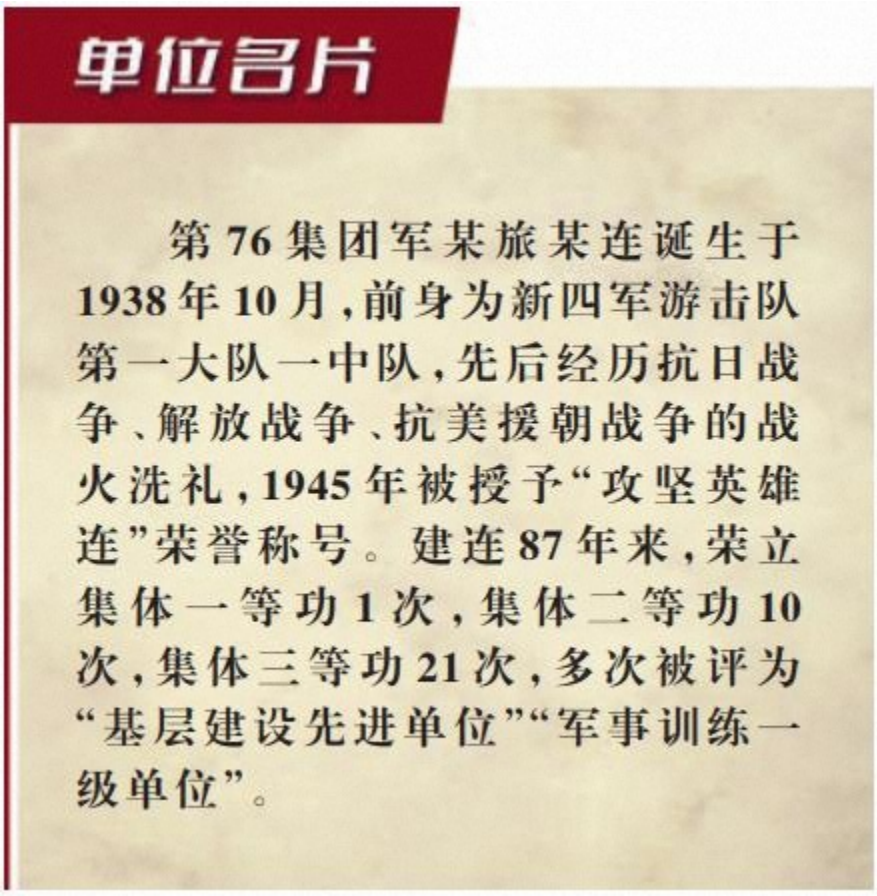
从烽火硝烟中走来："攻坚英雄连"用拼搏续写新时代强军篇章



来源：中国军网-解放军报 作者：王雲峤 严 楚 责任编辑：孙悦

2025-08-11

第七十六集团军某旅某连传承发扬先辈战斗精神——

攻坚克难永向前

■王雲峤 严 楚

昆仑腹地，狂风漫卷，一场信息化对抗训练激战正酣.

红方指挥所内气氛紧张——任务进程中的超近程侦察无人机信号突告中断！所有人的目光，瞬间聚焦在第 76 集团军某旅某连代理排长、二级军士长宋国峰身上.

“确认高寒低氧引发电池故障，马上执行预备方案！”这位经验丰富的老兵迅速做出判断. 调整侦察波次、无缝切换备用链路、展开应急抢修……一套由宋国峰主导摸索并经全连反复锤炼的“战场快修”流程，此刻成为扭转危局的关键支点.

“不管遇到何种突发情况，这个连队都能出色完成任务. 因为每名官兵身上，都能看到战斗英雄王连生的影子. ”该旅领导介绍，“攻坚英雄连”是从抗日战争的烽火硝烟中走来的.

1945 年 5 月，该连前身奉命参与位于安徽宿县西南的任集战斗. 为摧毁敌炮楼、火力点，司号员王连生带领敢死队在枪林弹雨中匍匐前行. 在手指被炸断 4 根的艰难条件下，他冒死将手榴弹塞进了敌人的机枪射击孔内. 此次战斗，全连官兵敢打敢拼、英勇冲锋，全连

106 人牺牲 90 人，仅剩 16 人，为宿南战役的胜利作出了重大贡献. 战后，连队被新四军第 4 师授予“攻坚英雄连”荣誉称号，王连生也荣获“二等战斗英雄”称号.

几十年来，连队南征北战、攻坚克难，凝结形成了连魂精神，先后涌现出“华东二等人民英雄”赵运球、阎正起，“特等战斗英雄”吴起修等英模人物. 每逢新兵下连、新干部调入，他们的第一堂课就是学习连队光辉历史；每逢重大任务，连队主官都会组织官兵在连旗前宣誓，重温先辈事迹、感悟战斗精神. 随着一代代官兵不懈努力，“敢于在前、敢于攻坚、敢于拼搏”的战斗精神，流淌在连队每名官兵的血液中.

进入新时代，“攻坚英雄连”官兵继承和发扬红色基因，在任务面前展现出非凡的血性和毅力.

一次训练考核，连队官兵不仅要在高海拔地区负重行军，还要应对临时导调的各类特情. 考核指令发出，连长一马当先带领官兵向终点进发. 风越来越大，肩上的背囊也越来越重. 行至最后几公里时，一些官兵接连出现身体不适等状况.

“‘攻坚英雄连’的战旗，是连队先辈用鲜血染红的. 今天的考核，我们绝不能让这面战旗失了色！”连长一边关心战友，一边从背包里拿出战旗激励大家. 随后，大家你拉我、我推你，咬牙坚持着冲向终点.

这场考核，全连官兵一人不落，以优异成绩夺得第一名. 年底，连队因任务表现突出，被上级评为“砺剑高原强军先锋”标兵单位.

那年调整改革后，上级为连队配发了一批新型侦察装备，同时新增 10 余项课目. 官兵们秉持“敢于在前、敢于攻坚、敢于拼搏”的战斗精神，向新高地发起冲锋. 以二级军士长宋国峰和一级上士王志辉师徒为主的骨干团队，二话不说接下攻关任务，一头扎进专修室.

“曾经，前辈们用血肉炸碉堡，如今，咱们啃下新课目、难课目，也是一种战斗和攻坚. ”怀揣这样的信念，连队官兵夜以继日地学习研究，探索研究出一系列满足现实需要的解决方法.

一次训练中，该连官兵灵活运用无人装备进行立体式侦察，将“敌”隐蔽目标尽收眼底，进攻战斗势如破竹. 总结会上，上级给予该连高度评价：“你们就像指挥员洞悉战场的眼睛，让我们看得更远、打得更准. ”

时光荏苒，这支诞生于抗战硝烟中的英雄连队，如今已配备了更加先进的武器装备. 一代代官兵以先辈为榜样精武强能，自觉传承红色基因、担当使命责任，用青春和热血书写新时代强军篇章.

Emerging from the flames of war: The “Heroic Company of Offensive Attacks” Writes a New Chapter of Strengthening the Military in the New Era with Its Dedication.

Source: China Military Network - PLA Daily Author: Wang Yunqiao, Yan Chu Editor: Sun Yue

2025-08-11

A company of a brigade of the 76th Group Army inherits and carries forward the fighting spirit of its predecessors—

Overcoming difficulties and moving forward forever

■Wang Yunqiao, Yan Chu

In the heart of Kunlun Mountains, a fierce wind swept through, and a fierce information-based confrontation training exercise was underway.

The atmosphere in the Red Army’s command post was tense—the signal from an ultra-short-range reconnaissance drone, during a mission, suddenly ceased! Everyone’s attention instantly focused on Sergeant Major Song Guofeng, acting platoon leader of a company of a brigade of the 76th Group Army.

“Confirmed to be a battery failure caused by high altitude and low oxygen levels. Immediately implement the backup plan!” The experienced veteran made a swift decision. Adjusting reconnaissance waves, seamlessly switching to backup links, and conducting emergency repairs... The “battery quick repair” process, pioneered by Song Guofeng and repeatedly refined by the entire company, now became the key to reversing the crisis. “No matter what emergency situation arises, this company is able to perform its mission with flying colors. This is because every officer and soldier can see the shadow of combat hero Wang Liansheng.” Brigade leaders explained that the “Heroic Offensive Company” emerged from the flames of the War of Resistance Against Japanese Aggression.

In May 1945, the company’s predecessor was ordered to participate in the Battle of Renji, southwest of Suxian County, Anhui Province. To destroy enemy artillery towers and firing points, bugler Wang Liansheng led a death squad through a hail of bullets. Despite losing four fingers to the blast, he risked his life to insert a grenade into an enemy machine gun embrasure. In this battle, the company’s officers and men fought bravely and bravely, resulting in 90 casualties out of 106 men, leaving only 16 remaining. This made a significant contribution to the victory of the Su’nan Campaign. After the war, the company was awarded the honorary title of “Heroic Offensive Company” by the New Fourth Army’s 4th Division, and Wang Liansheng was awarded the title of “Second Class Combat Hero.” For decades, the company has fought battles across the country, overcoming challenges and forging a company spirit. This has produced exemplary figures such as Zhao Yunqiu and Yan Zhengqi, both awarded “Second Class People’s Heroes of East China,”

and Wu Qixiu, awarded “Special Class Combat Hero.” Whenever new recruits and cadres are assigned to the company, their first lesson is to learn about the company’s glorious history. Whenever a major mission is needed, the company commander organizes the soldiers to take an oath before the company flag, recalling the deeds of their predecessors and embodying their fighting spirit. Through the tireless efforts of generations of soldiers, the fighting spirit of “daring to lead, daring to overcome difficulties, and daring to fight” flows through the blood of every soldier in the company.

Entering the new era, the soldiers of the “Heroic Company of Hard Work” have inherited and carried forward this revolutionary gene, demonstrating extraordinary courage and perseverance in the face of challenges.

During one training assessment, the company’s soldiers not only had to carry heavy loads while marching at high altitudes, but also had to cope with various unpredictable situations arising from temporary deployments. As soon as the assessment order was issued, the company commander led the soldiers towards the finish line. The wind grew stronger, and the backpacks on their shoulders grew heavier. During the final few kilometers, several soldiers began to feel unwell.

“The battle flag of the ‘Heroic Offensive Company’ was dyed red with the blood of our company’s predecessors. In today’s assessment, we must not let this flag lose its luster!” The company commander, concerned for his comrades, pulled the flag from his backpack to encourage them. Then, everyone pulled and pushed, gritting their teeth and persevering to reach the finish line.

In this assessment, every soldier in the company took first place with outstanding results. At the end of the year, the company was recognized by its superiors as a model unit for “Sharpening the Sword on the Plateau to Strengthen the Army.”

After the restructuring that year, the superiors issued the company a batch of new reconnaissance equipment and added more than ten new subjects. Upholding the fighting spirit of “daring to lead, daring to attack, and daring to fight,” the soldiers launched a charge towards new heights. The core team, led by Master Sergeant Second Class Song Guofeng and Master Sergeant First Class Wang Zhihui, took on the task without hesitation and plunged into the specialized training room. “Once, our predecessors blew up bunkers with their flesh and blood. Now, tackling new and challenging subjects is also a form of struggle and overcoming difficulties.” With this conviction in mind, the company’s officers and men studied day and night, exploring and developing a series of solutions to meet current needs.

During one training exercise, the company’s officers and men flexibly utilized unmanned equipment for three-dimensional reconnaissance, capturing the enemy’s hidden targets and advancing with unstoppable force. At the summary meeting, superiors lauded the company: “You are like the commander’s eyes, perceiving the battlefield, allowing us to see further and strike more accurately.”

Time flies, and this heroic company, born in the smoke of the War of Resistance Against Japanese Aggression, is now equipped with even more advanced weaponry. Generations of officers and men have emulated their predecessors, honing their skills, consciously inheriting the revolutionary spirit, shouldering their mission, and writing the chapter of a strong military in the new era with their youth and passion.

陆军某旅开展复杂气象条件下险难课目训练

来源：解放军报 作者：吴骁峰 李潇潇 责任编辑：郭妍菲 2025-08-11

陆军某旅开展复杂气象条件下险难课目训练——

战风斗沙淬铁翼

■吴骁峰 李潇潇

近日，某训练场，陆军某旅依托复杂气象条件，开展大场次、多机型、全要素直升机跨昼夜飞行训练，全面锤炼飞行员技战术水平，并检验全天候保障能力.

“可以起飞！”随着塔台发出指令，数架直升机引擎轰鸣、拔地而起.

然而，编队升空后便遭遇强沙尘，能见度骤然降低，直升机机身剧烈颠簸. 强侧风裹挟着沙粒不断敲打舷窗，驾驶舱内，飞行员小朱推拉操纵杆，不断调整飞行姿态.

“液压失效，立即处置！”编队飞行途中，导调组临机设置特情. 小朱立即驾驶直升机脱离编队，选择较为平坦的着陆地进行迫降，空中机械师迅速展开维修，顺利排除故障.

“打仗不挑天气，不分昼夜. ”该旅领导介绍，入夏以来，训练场周边风沙不断，这种天气是飞行训练最好的“磨刀石”. 他们在保证飞行安全的同时，进一步提升训练难度，围绕复杂气象条件下的编队飞行、夜间超低空突防等训练课目展开专攻精练.

上半场训练结束，直升机编队接续返航. 肆虐的风沙让地面机务保障面临“大考”. 机务、场务官兵迅速前出展开维护检查作业.

暮色四合，夜间飞行训练随即展开. 暗夜中，山体与天幕几乎融为一体，沙尘在探照灯柱中来回翻涌. 刚完成改装训练的飞行员小虢登上战机，进行夜航训练.

“注意，西北方向出现‘沙尘墙’！”塔台指挥员的声音在耳机中格外清晰.

小虢驾机升空后，飞行教员立即提醒他转为仪表飞行，保持编队间距. 随后，小虢按照仪表指引，熟练操纵战机，顺利穿过“沙尘墙”.

“‘敌’跟踪！”一波未平，一波又起. 面对新特情，小虢立即操纵战机下降高度，掠地飞行规避“敌”雷达搜索. 同时，利用夜视仪及综显平台仔细搜索“敌”具体位置.

“目标锁定！”小虢驾驶战机进入攻击航线，他果断按下发射按钮，成功对目标实施打击.

时至子夜，随着最后一架战机平稳着陆，复盘总结随即开始. 飞行讲评室内，灯光亮如白昼，飞行员们认真回看飞行视频.

窗外，狂风呼啸. 机库内，地勤人员正对战机进行全面检查，清理钻入机身的沙尘.

次日，一场新的飞行训练将展开……

An Army Brigade Conducts Training on Difficult and Dangerous Subjects in Complex Weather Conditions

Source: PLA Daily Author: Wu Xiaofeng Li Xiaoxiao Editor: Guo Yanfei 2025-08-11

An Army Brigade Conducts Training on Difficult and Dangerous Subjects in Complex Weather Conditions --

Fighting Wind and Sand, Tempering Iron Wings

■ Wu Xiaofeng Li Xiaoxiao

Recently, at a training ground, an Army brigade, leveraging complex weather conditions, conducted large-scale, multi-aircraft, and full-element helicopter flight training, comprehensively honing the pilots’ technical and tactical skills and testing their all-weather support capabilities.

“Clear to take off!” With the command from the control tower, several helicopters roared to life.

However, once the formation took off, they encountered strong sandstorms, which dramatically reduced visibility and caused the helicopters to pitch violently. Strong crosswinds, carrying sand particles, constantly battered the windows. Inside the cockpit, pilot Xiao Zhu pushed and pulled the joystick, constantly adjusting the flight attitude.

“Hydraulic failure, immediate action!” During the formation’s flight, the command and control team improvised a special situation. Xiao Zhu immediately separated his helicopter from the formation and made an emergency landing on a relatively flat surface. The flight mechanics quickly began repairs and successfully corrected the malfunction.

“Warfare isn’t about weather, and it doesn’t matter day or night,” explained the brigade’s leadership. Since the beginning of summer, the training ground has been plagued by incessant sandstorms, making this weather a perfect “sharpening stone” for flight training. While ensuring flight safety, they have also increased the difficulty of training, focusing on subjects such as formation flying in complex weather conditions and nighttime ultra-low-altitude penetrations.

The first half of training concluded, and the helicopter formations returned home. The raging sandstorms posed a significant challenge to ground maintenance support. Maintenance and ground crews quickly moved forward to conduct maintenance and inspections.

Dusk fell, and night flight training began. In the darkness, the mountains merged almost seamlessly with the sky, and dust swirled back and forth between the searchlights. Pilot Xiao Guo, who had just completed his modification training, boarded his combat aircraft for night flight training.

“Attention, a ‘sand wall’ is emerging to the northwest!” The tower controller’s voice was remarkably clear through the headset. After Xiao Guo took off, the flight instructor immediately reminded him to switch to instrument flight and maintain formation spacing. Following the instrument guidance, Xiao Guo skillfully maneuvered the aircraft, successfully passing through the “sand wall.”

“Enemy tracking!” One wave of news followed. Faced with this new situation, Xiao Guo immediately lowered his aircraft’s altitude, flying close to the ground to evade enemy radar detection. Simultaneously, he used his night vision goggles and the integrated display to carefully scan for the enemy’s specific location.

“Target locked!” Xiao Guo maneuvered the aircraft into the attack path. He decisively pressed the launch button, successfully striking the target.

At midnight, with the last aircraft landing smoothly, the debriefing began. In the flight review room, the lights were as bright as day, and the pilots were diligently reviewing the flight video.

Outside the window, the wind howled. Inside the hangar, ground crew members were conducting a thorough inspection of the aircraft, cleaning the sand and dust that had penetrated the fuselage.

The next day, a new round of flight training would begin...

从老设备到新终端，西北边塞的数据和电波藏着不变的坚守

来源：解放军报 作者：董浩 责任编辑：王粲 2025-08-12

不同的身影，同样的坚守

■董 浩

旅史长廊，红色殿堂，霓虹灯下，火炬燃烧.

时值八一建军节，单位组织官兵参观旅史长廊，我和大家一起，透过一件件实物展品，追寻部队的战斗轨迹.

走到荣誉墙转角处，展柜中一台老旧的无线电侦听设备吸引了我的目光. 设备外壳斑驳，上面还留着几道划痕，仿佛在诉说着它在喀喇昆仑风雪中的坚守故事.

恍惚间，我的思绪又回到军校毕业后第一次参与高原巡逻的日子. 那天，风像刀一样，刮得人脸生疼. 我们背着 30 多斤重的装备，在海拔 5000 多米的雪坡上一步一步往上挪. 每走几步就得停下来大口喘气，肺里像是塞了一团棉花，怎么吸气都不够用.

最要命的是那段冰坡. 我死死抓着安全绳，靴子在光滑的冰面上直打滑. 突然一个趔趄，我整个人往下滑了好几米，要不是腰间的保护绳绷住，差点就摔下悬崖. 那一刻，我死死抠着冰缝，听着碎石滚落深渊的回声，冷汗把内衣都浸透了.

好不容易爬到山顶，还没来得及喘匀气，队长就命令我们立即展开设备. 我的手指早就冻得不听使唤，拧个螺丝都要折腾半天. 回到营地，我的靴子和袜子已经冻在一起，只能用温水慢慢化开. 那晚躺在帐篷里，头疼得像要炸了一样，翻个身都能听见防潮垫下冰碴子的碎裂声. 我盯着帐篷顶，听着外面凄厉的风声，第一次认真思考：受这些苦到底值不值得.

第二天执行任务时，这种情绪更强烈了. 寒风卷着雪粒砸在帐篷上，噼啪作响. 我裹着大衣，盯着屏幕上跳动的信号波形，手指冻得发僵，却不敢漏掉任何一个细微变化. 高原的电磁环境复杂，我一遍遍调整参数，可数据采集还是难以达到理想的效果. 那晚，我盯着屏幕上杂乱的波形，缺氧让脑子昏沉，孤独感像雪一样一层层压下来.

第二天，我忍不住向队长诉苦. 他没讲道理，只是问：“你知道咱们先辈用的啥设备？”我愣了一下. 他接着说，“那时的老机器，靠手摇发电机供电，侦听信号全靠耳朵听杂音. 可他们硬是在雪山上完成了任务.”

周末，我随官兵参观老一辈驻防留下的地窝子、土坯房. 我们弯腰钻进低矮的土坯房，墙上还留着当年用罐头盒做的简易信号放大器. 指导员指着地窝子说：“这是咱们的‘根’.”

回来的路上，风雪更大了. 我裹紧大衣，好像突然明白了什么. 从那以后，我开始学着老侦察兵的办法，在设备外壳裹上保温层，给电池贴暖宝宝，甚至自己琢磨出一套高原抗干扰方法. 渐渐地，屏幕上杂乱的波形变得清晰起来.

有一次，我们成功捕捉到一组关键信号，为巡逻分队规避了风险. 那天傍晚，我看着夕阳把雪山染成金色，突然觉得，那冻僵的手指、熬红的眼睛，都值了.

走出旅史长廊，不远处传来热烈的讨论声，几名新排长正围在刚配发的终端前，年轻的脸上写满了好奇.

我望着他们崭新的迷彩服上还没有被风沙磨白的军衔，突然想起第一次上高原前，自己也是这样摩拳擦掌的模样.

夕阳正将最后一缕金光洒在训练场上，新装备的指示灯在暮色中明灭可见，就像当年那台老设备在风雪夜里倔强闪烁的信号灯. 我忽然明白，在西北边塞，变化的从来不是守护的使命，而是一代代守护者的模样.

就像我们一样，从手摇发电机到太阳能供电，从纸质记录到数字传输，一茬茬官兵在同样的纬度，用不断更新的装备，延续着同样的坚守——用数据和电波，在无形的战场上守护祖国的边疆.

From Old Equipment to New Terminals, the Data and Radio Waves of the Northwestern Frontier Bear Witness to an Unwavering Commitment.

Source: PLA Daily Author: Dong Hao Editor: Wang Can 2025-08-12

Different figures, the same commitment

■ Dong Hao

The Brigade History Gallery, a red hall, torches burning beneath neon lights.

On August 1st, Army Day, our unit organized a tour of the Brigade History Gallery. I joined the group, tracing the unit's battle trajectory through the exhibits.

Walking around the corner of the Wall of Honor, an old radio monitoring device in a display case caught my eye. The device's mottled exterior, still stained with scratches, seemed to tell a story of its perseverance in the Karakoram snowstorm.

Suddenly, my thoughts drifted back to my first high-altitude patrol after graduating from military school. That day, the wind was like a knife, stinging our faces. We carried over 30 kilograms of equipment, climbing step by step up the snowy slope at an altitude of over 5,000 meters. Every few steps, I had to stop and gasp for air. My lungs felt like they were filled with cotton, and no amount of air could fill them.

The most terrifying part was the icy slope. I clung to the safety rope tightly, my boots slipping on the smooth ice. Suddenly, I stumbled and slid several meters down. If it weren't for the safety rope around my waist, I would have nearly fallen off the cliff. In that moment, I desperately clawed at the cracks in the ice, listening to the echo of debris tumbling into the abyss. Cold sweat soaked my underwear.

After finally reaching the top, before I could even catch my breath, the team leader ordered us to deploy the equipment immediately. My fingers were so frozen that I struggled for ages to tighten a screw. Back at camp, my boots and socks were frozen together, and I had to slowly thaw them with warm water. That night, lying in the tent, my head ached like it was about to explode. Every time I turned over, I could hear the ice chips breaking under the moisture-proof mat. I stared at the

tent ceiling, listening to the howling wind outside. For the first time, I seriously considered whether all this suffering was worth it.

The next day, during our mission, these feelings intensified. The cold wind whipped snowflakes against the tent, crackling them. Wrapped in my coat, I stared at the signal waveform dancing on the screen, my fingers numb from the cold, yet I dared not miss a single subtle change. The electromagnetic environment on the plateau is complex. I adjusted the parameters over and over again, but data collection remained elusive. That night, I stared at the chaotic waveforms on the screen, my mind groggy from lack of oxygen, and loneliness weighed down like layers of snow.

The next day, I couldn't help but complain to my captain. He didn't respond, simply asking, "Do you know what equipment our ancestors used?" I was stunned. He continued, "Those old machines relied on hand-cranked generators for power, and detecting signals relied solely on listening for noise. Yet, they persevered and completed their mission on the snowy mountains."

Over the weekend, I joined the soldiers to visit the dugouts and adobe houses left behind by the older generation of garrisons. We ducked into a low-rise adobe hut, where a simple signal amplifier made from a can still remained on the wall. The instructor pointed to the dugout and said, "This is our 'roots.'"

On the way back, the wind and snow intensified. I wrapped myself tightly in my coat, as if something had suddenly dawned on me. From then on, I began to imitate the old scouts, wrapping insulation around the equipment, applying heat packs to the batteries, and even devising my own method for resisting high-altitude interference. Gradually, the chaotic waveforms on the screen became clearer.

One time, we successfully captured a critical signal, averting danger for the patrol. That evening, as I watched the sunset paint the snow-capped mountains golden, I suddenly felt that the frozen fingers and red eyes had all been worth it.

Exiting the Brigade History Gallery, I heard a lively discussion not far away. Several new platoon leaders were gathered around their newly issued terminals, their young faces brimming with curiosity. I gazed at their brand-new camouflage uniforms, their ranks still unbleached by the wind and sand, and suddenly remembered myself, eagerly preparing for battle, before my first trip to the plateau.

The setting sun cast its last golden rays across the training ground, and the indicator lights of the new equipment flickered in the twilight, just like the signal lights on that old equipment, stubbornly blinking on a snowy night. I suddenly understood that in the northwestern frontier, what changes is never the mission of defense, but the image of the defenders from generation to generation.

Just like us, from hand-cranked generators to solar power, from paper records to digital transmission, successive generations of soldiers, at the same latitude, using ever-improving

equipment, continue the same steadfast resolve—using data and radio waves to protect the motherland's frontiers on an invisible battlefield.

激流险滩砺精兵！第 81 集团军某旅开展水上技能训练

来源：解放军报 作者：卢运国 李润科 责任编辑：王粲 2025-08-12

第 81 集团军某旅开展水上技能训练——

激流险滩砺精兵

■卢运国 解放军报特约通讯员 李润科

清晨，某湍急的水面上，一艘艘冲锋舟与皮划艇正犁开波浪，加速向目标水域挺进. 第 81 集团军某旅一场战术背景下的水上技能训练紧张进行，官兵围绕水上射击、操舟救援等课目展开专攻精练.

“‘敌’目标出现，立即展开火力攻击！”接到命令，下士李权紧握操纵杆，与艇员配合进行水上突击，顺利消灭“敌人”. 随后，官兵按预案立即组织撤离，一时间，各艇原地转向，迅速划分负责点位，水面上溅起阵阵浪花.

该旅领导介绍，此次训练全程嵌入复杂特情，官兵要在激流险滩中保持战斗队形，精准打击动态目标，复杂水域环境下的技战术水平和应急处置能力得到有效检验.

“遭‘敌’火力封锁，开辟新航道！”一波未平，一波又起. 接到新的指令后，各艇组官兵迅速行动、密切配合：一级上士袁灵辉研判水流、岸滩地形后，借助手势旗语向战友传递信息. 其他艇组迅速发起佯攻，袁灵辉所在艇组则借机迂回至侧翼浅滩，在芦苇丛遮挡下隐蔽突进，成功撕开突围“缺口”.

“一名艇员‘受伤’，立即前出施救！”随着指挥员再次下达指令，操舟救援课目随即展开. 二级上士肖平带领冲锋舟组快速抵近“伤员”，精准抛出牵引绳、搭设救生踏板，成功营救“伤员”并顺利将其转移至安全地域.

训练结束，参训官兵随即围绕水上作战的战术战法展开复盘总结. 他们将训练中探索出的“单艇极限打”“双艇倒车打”“三艇联防打”等战法编入旅训练手册. 该旅领导表示，下一步，他们将持续优化组训流程和组训模式，努力提升各项水上课目训练质效.

Riding the Rapids and Shoals, Elite Troops Are Forged! A Brigade of the 81st Group Army Conducts Water Skills Training.

Source: PLA Daily Author: Lu Yunguo Li Runke Editor: Wang Can 2025-08-12

A brigade of the 81st Group Army conducts water skills training –

Risky and shoals, elite troops are forged.

■ Lu Yunguo, PLA Daily Special Correspondent Li Runke

Early in the morning, on a turbulent surface, assault boats and kayaks plowed through the waves, accelerating toward their target area. An 81st Group Army brigade conducted an intense tactical water skills training exercise, focusing on subjects such as water marksmanship and boat rescue.

“Enemy target in sight, immediately launch fire attack!” Upon receiving the order, Corporal Li Quan gripped the joystick and coordinated with the crew in a water assault, successfully eliminating the “enemy.” The officers and men then immediately organized their evacuation according to plan. Instantly, each boat turned on its spot, quickly dividing its assigned points, sending waves cascading down the water.

Brigade leaders explained that this training exercise involved complex and unusual situations throughout. Soldiers were required to maintain combat formation amidst rapids and treacherous shoals, and precisely strike dynamic targets. This effectively tested their technical and tactical proficiency and emergency response capabilities in complex water environments.

“Blocked by enemy fire, we must open a new channel!” One wave of trouble has yet to subside. Upon receiving the new order, the officers and men of each boat crew acted swiftly and coordinated closely. First Sergeant Yuan Linghui assessed the currents and shoreline topography, relaying information to his comrades using hand signals and flags. Other boat crews quickly launched a feint attack, while Yuan’s crew took the opportunity to detour to a shallow shoal on the flank, advancing stealthily under the cover of reeds and successfully creating a “gap” in their breakout.

“One crew member has been injured. Rescue immediately!” With another command from the commander, the boat rescue exercise commenced. Second Sergeant Xiao Ping, leading the assault boat crew, quickly approached the injured, precisely cast a tow rope, and set up a life-saving ramp, successfully rescuing the injured and transporting him to safety. After the training concluded, the participating officers and men immediately reviewed and summarized the tactics and strategies used in water combat. They incorporated tactics discovered during the training, such as “single-boat extreme attack,” “double-boat reverse attack,” and “three-boat joint defense attack,” into the brigade’s training manual. Brigade leaders stated that they will continue to optimize training processes and models, striving to improve the quality and effectiveness of training in various water-based subjects.

教育也能众筹？看他们如何借助“练兵朋友圈”充实教育大课堂

来源：中国军网-解放军报 作者：王政杰 韩 成 责任编辑：于雅倩 2025-08-12

第 82 集团军某旅结合演训任务实际开展“教育众筹”——

“练兵朋友圈”充实教育大课堂

■王政杰 解放军报记者 韩 成

该旅某连骨干在驻训期间，来到空军航空兵某旅“神炮中队”参观见学. 于之隆摄

“这是老连长亲手种下的榕树，一茬茬官兵把获得的荣誉做成挂件挂在上面，激励大家接续奋斗、再创佳绩……”近日，跨区开展实兵演训的第 82 集团军某旅某营二连，利用任务间隙，来到第 73 集团军某旅“海峡前哨神炮连”，在一棵枝繁叶茂的榕树下，聆听该连官兵讲述干事创业的故事.

而此时，在千里之外的濒海滩头野营驻训地，该旅某连干部蒋宇正带领理论骨干紧锣密鼓筹备一堂关于“在大项任务中锤炼战斗精神”的教育课，为与一同驻训的友邻单位互动交流作准备.

骄阳似火，兵撒千里，一场场别开生面的“教育众筹”，紧跟任务转换，在该旅演训一线陆续展开，有效激发了官兵斗酷暑、战高温的练兵热情.

“借助‘练兵朋友圈’充实教育大课堂，让思想政治教育与战训任务实现有机融合.”该旅领导告诉记者，近年来，所属部队实战化演训活动不断增多，任务转换快，点位分布范围广，给集中开展教育带来诸多挑战. 为此，他们决定联合友邻驻训部队、演训练兵对手、任务地域单位等，通过“众筹”共享教育资源，采取大专题小课题、小讲台大课堂等相结合的方式，有效破解了动散条件下教育难题.

在葱茏的榕树下抬头仰望，该旅某营二连新排长夏小寅感触良多. 今年是他第一次跟随部队参加跨区演训. 由于指挥经验不足，夏小寅在几次战术训练中表现欠佳，这让他一时间陷入了迷茫.

“在一次战斗中，‘钢铁战士’装填手胡德安全身大面积烧伤，但仍强忍剧痛坚守战位……”听着“海峡前哨神炮连”战友讲述的故事，夏小寅深受触动，随即在笔记本中写下感悟激励

自己：“军人就是要有不怕死、敢拼命的精气神，遇到困难不能轻言放弃，只要持续努力，一定会收获成功. ”

“教育众筹”不仅增强了集中教育的感召力，更为开展随机教育带来了灵感.

去年，该旅赴大漠戈壁组织实弹射击演训. 某连某班班长张永泽发现，由于训练强度大、工作节奏快，班里个别同志因疲惫出现低落情绪. 当张永泽思索如何给大家提振士气时，一次跟随连队到空军航空兵某旅“神炮中队”参观见学的经历，让他找到了答案.

回到驻训地后，张永泽召集全班战士来到炮阵地上，从作业包中掏出一张自己在“空中神炮手”鲍寿根雕像前的留影，讲述这位传奇飞行员永不言弃、苦练本领的奋斗故事，听得大家心潮澎湃.

从那天起，全班同志在张永泽的带领下，白天顶着烈日推演战法、强固技能，晚上加班加点查摆问题、研究对策，最终在考核中取得优异成绩，被该旅表彰为“神炮班”.

“教育众筹”还带动了更多官兵参与其中，从倾听者变成讲述者. 前不久，该旅某连在任务期间与东部战区陆军某部组织开展共建活动. 连队中士龙刚自信地站上讲台，向友邻单位战友介绍连队建设情况和取得的荣誉. 而在一年前，他还是个不善言辞、对学习提不起劲头的被动“倾听者”.

谈到自己的转变，龙刚坦言，每次“教育众筹”准备阶段，连队都会召集多名官兵集思广益. 在与战友们一起设计内容、分享想法的过程中，他逐渐被大家积极热烈的备课热情感染，也有了走上讲台的愿望. 经过一段时间的努力，他终于如愿以偿，用出色表现赢得阵阵掌声.

与第 76 集团军某旅特战营营长交流成才感悟，与“刘老庄连”指导员分享战斗精神培育做法……该旅领导介绍，近年来，随着“练兵朋友圈”的不断扩大，他们通过“教育众筹”逐渐构建起生动灵活、形式新颖、内容丰富的大课堂，“教育炉火”越燃越旺，教育质效明显提升.

据介绍，该旅将不断研究丰富“教育众筹”的内容和形式，建立常态运行机制，盘活更多优质教育资源，不断提升部队思想政治教育质效.

短 评

动中抓教贵在灵活多样

■李静阳

革命战争年代，我军经常处于“打起背包就出发，到了战场就战斗”的机动状态，即使在打仗任务重、时间紧的情况下，抓教育也毫不放松. 战壕里的官兵夜话、冲锋前的简短动员，

往往能让部队迸发出强大的战斗力，靠的就是把灵活多样的教育融入实战，及时统一思想，实时激发斗志.

近年来，随着建设转型步伐加快、备战任务越来越重、练兵节奏更加紧凑，动散部署已成为大多数基层部队的常态，动中抓教也要因地制宜、顺时而变. 第 82 集团军某旅紧贴演训任务实际，巧借兄弟部队教育资源提升动中抓教质效的做法，值得借鉴.

当前，野外驻训、实兵演习等任务正在展开. 这一时期，既是部队战斗力增长的关键期，也是官兵思想的活跃期. 但是，由于点位分散、任务密集等原因，思想政治教育不可避免面临人员难集中、时间难保证、资源难统筹等矛盾问题. 此时，如果思想政治教育跟不上，官兵的“思想疙瘩”解不开，就可能影响部队安全稳定和工作任务完成.

教育的目的是保证打赢. 因此，部队越是动态分散，越是任务繁重，越要重视抓好思想政治教育. 这就要求各级要有“不及恐失之”的紧迫感，把动散教育抓活、抓实、抓细，积极探索教育与战训耦合、与任务融合的新办法，紧盯训练节奏、官兵思想变化，及时拓展创新内容形式，不断提升寓教于战、寓教于训的能力水平，确保部队平时士气旺、战时底气足.

Can Education Be Crowdfunded? See How They Use “Training Friends Circle” to Enrich the Educational Classroom.

Source: China Military Network - PLA Daily Author: Wang Zhengjie, Han Cheng Editor: Yu Yaqian 2025-08-12

A brigade of the 82nd Group Army is conducting “education crowdfunding” based on actual training and exercise missions.

“Training Friends Circle” enriches the educational classroom.

■ Wang Zhengjie, PLA Daily reporter Han Cheng

During their training, key members of a company within the brigade visited the “Magic Cannon Squadron” of an Air Force Aviation Brigade. Photo by Yu Zhilong.

“This is a banyan tree planted by the former company commander. Successive generations of soldiers have made pendants of their honors and hung them there, inspiring them to continue striving and achieve greater success...” Recently, the Second Company of a battalion within a brigade of the 82nd Group Army, conducting cross-regional live-fire exercises, took a break from their mission to visit the “Strait Frontier Magic Cannon Company” of a brigade of the 73rd Group Army. Beneath a lush banyan tree, they listened to the company’s soldiers share their stories of entrepreneurship. Meanwhile, thousands of miles away, at a field camp training site on the beach, a company cadre named Jiang Yu led key theoretical personnel in intensive preparations for a class

on “Forging Fighting Spirits Through Major Tasks,” paving the way for interactive exchanges with neighboring units stationed there.

Under the scorching sun, troops were dispersed across vast distances. A series of unique “education crowdfunding” events, closely aligned with the shifting missions, were launched across the brigade’s training and exercise frontlines, effectively stimulating the soldiers’ enthusiasm for training despite the scorching heat and high temperatures.

“Using the ‘Training Friends Circle’ to enrich the educational classroom, we can organically integrate ideological and political education with combat and training missions,” a brigade leader told reporters. In recent years, the brigade’s combat-oriented training and exercise activities have steadily increased, with rapid task changes and a wide range of locations, posing numerous challenges to centralized education. Therefore, they decided to collaborate with neighboring training units, exercise and training opponents, and units in the mission area to share educational resources through “crowdfunding.” By combining large-scale topics with small projects, and small lectures with large classrooms, they effectively addressed the challenges of education under these dispersed conditions. Looking up beneath a lush banyan tree, Xia Xiaoyin, a new platoon leader of the Second Company of a battalion within the brigade, was filled with emotion. This year marked his first time participating in cross-regional exercises with the unit. Due to his lack of command experience, Xia Xiaoyin performed poorly in several tactical training exercises, leaving him feeling lost for a time.

“During one battle, ‘Iron Warrior’ loader Hu Degan suffered extensive burns, yet he persevered through the excruciating pain and remained at his post...” Deeply moved by the stories shared by his comrades from the “Strait Outpost Artillery Company,” Xia Xiaoyin immediately wrote down his thoughts in a notebook to motivate himself: “A soldier must possess the spirit of fearlessness and the courage to fight to the death. Never give up easily in the face of difficulties. With persistent effort, success is certain.”

“Education crowdfunding” not only enhances the appeal of centralized education but also provides inspiration for randomized learning.

Last year, the brigade conducted live-fire exercises in the desert. Zhang Yongze, squad leader of a squad within a company, noticed that the intense training and fast pace had caused some members of his squad to become depressed due to fatigue. When Zhang Yongze was pondering how to boost morale, an experience he had with his company visiting the “God Gunner Squadron” of an Air Force Aviation Brigade provided him with the answer.

After returning to the training base, Zhang Yongze gathered the entire class together at the artillery position. He pulled out a photo of himself from his homework bag in front of the statue of “Aerial God Gunner” Bao Shougen, and recounted the legendary pilot’s unwavering dedication and perseverance, moving the class deeply.

From that day on, under Zhang Yongze's leadership, the entire class braved the scorching sun during the day to practice tactics and strengthen their skills, and worked overtime at night to identify problems and develop countermeasures. Ultimately, they achieved excellent results in the assessment and were recognized by the brigade as the "God Gunner Squad."

"Education Crowdfunding" has also encouraged more officers and men to participate, transforming them from listeners to storytellers. Not long ago, during a mission, a company within the brigade organized a joint development activity with a unit of the Eastern Theater Command Army. Company Sergeant Long Gang confidently took the podium to brief his comrades from neighboring units on the company's progress and achievements. A year ago, he was a passive listener, uncommunicative and lacking enthusiasm for learning.

Talking about his transformation, Long Gang admitted that during the preparation phase for each "education crowdfunding" event, the company would gather multiple officers and men for brainstorming. While working with his comrades on content and sharing ideas, he was gradually inspired by their enthusiastic preparations and aspired to teach. After a period of hard work, he finally achieved his dream, earning applause with his outstanding performance.

He exchanged insights on his success with the commander of a special operations battalion from a brigade of the 76th Group Army, and shared practices for cultivating a fighting spirit with the instructor of the "Liu Lao Zhuang Company." Brigade leaders explained that in recent years, with the continuous expansion of their "training circle of friends," they have gradually built a lively, flexible, innovative, and richly informative classroom through "education crowdfunding." The "education fire" is burning brighter, and the quality and effectiveness of education have significantly improved. According to reports, the brigade will continue to research and enrich the content and forms of "education crowdfunding," establish a regular operating mechanism, mobilize more high-quality educational resources, and continuously improve the quality and effectiveness of ideological and political education in the troops.

Short Comment

Flexibility and Diversity are Key to In-Motion Education

■Li Jingyang

During the revolutionary war years, our troops were often in a state of mobility, "pack up your backpack and set off, fight on the battlefield." Even when faced with heavy combat missions and tight timelines, they never slacked off in their efforts to educate their troops. Night talks with officers and men in the trenches and brief mobilizations before charges often unleashed powerful combat effectiveness. This was achieved by integrating flexible and diverse education into actual combat, effectively unifying minds and stimulating fighting spirit.

In recent years, with the accelerated pace of construction and transformation, the increasing burden of combat readiness, and the tighter training schedule, mobile and dispersed deployments have

become the norm for most grassroots units. In-motion education must also adapt to local conditions and the times. A brigade of the 82nd Group Army closely aligned itself with its training and exercise missions, skillfully leveraging educational resources from other units to improve the quality and effectiveness of in-motion education, a practice worth emulating.

Currently, field training and live-fire exercises are underway. This period is both a critical one for growing the troops' combat effectiveness and a period of ideological activity for officers and men. However, due to dispersed locations and intense missions, ideological and political education inevitably faces challenges such as difficulty concentrating personnel, ensuring time commitments, and coordinating resources. If ideological and political education fails to keep pace and resolves the ideological issues facing officers and men, it could impact the safety and stability of the troops and the completion of their missions.

The purpose of education is to ensure victory. Therefore, the more dynamically dispersed the troops are and the more arduous their missions, the greater the importance of strengthening ideological and political education. This requires all levels to have a sense of urgency, fearing failure, and to ensure that dynamic and dispersed education is dynamic, effective, and detailed. They should actively explore new methods for integrating education with combat training and missions, closely monitor the pace of training and the evolving mentality of officers and men, and promptly develop innovative content and formats. They should continuously enhance their ability to integrate education into combat and training, ensuring high morale in peacetime and strong confidence in wartime.

从“一人出彩”到“全班过硬”：看这位班长如何带出“标兵班”

来源：解放军报 作者：吴超 责任编辑：王粲 2025-08-13

从“一人出彩”到“全班过硬”

■吴 超

前段时间，第 81 集团军某旅一营 10 名官兵登上“光荣榜”，其中 3 人来自一连二班：余闯，旅政治教员比武第一名；易彦明，旅炮手专业比武第一名；高森，旅演讲比赛“强军风采奖”.

“去年开始，二班奋起直追，大家进步幅度非常明显，连续几个季度都是营里上榜人数最多的班.”该营刘教导员告诉笔者，二班能取得现在的成绩，班长余闯功不可没.

余闯是旅里的训练标兵，多次在上级比武中夺得荣誉，被集团军评为“金牌教练员”，还曾荣立二等功.

然而，与此同时，二班其他战士的表现不温不火，鲜有亮眼成绩. 此前一次旅里组织的专业考核，余闯名列前茅，班里战友却成绩平平，甚至有人排名垫底.

于是就出现了略显尴尬的一幕：余闯个人表现突出、频获荣誉；二班在连队考核评比中却屡屡排名落后，受到连主官点名批评.

“想要成为一名优秀的班长，仅仅自身素质过硬还不够.”连长对余闯说，“作为班长，把全班带过硬，才算真正尽到职责.”

连长的话让余闯陷入反思. 班务会上，他从战友的发言中，找到问题所在：虽然自己在比武中摘金夺银，给大家作出榜样，但也因备战个人比武分散了精力，疏于帮带班里战士共同进步. 还有战士坦言，有时遇到难题，不愿请教班长，生怕耽误他训练.

在这之后，余闯调整精力分配，将更多的心思放在班里战士身上.

余闯现在随身携带一个笔记本，他说那是“带兵手册”，上面记录着他对班里每名战友的长处和不足的分析，以及为他们量身定制的成长规划.

以战士高森为例，余闯的“带兵手册”上这样记录：高森长处是上肢力量强、表达能力强；不足是耐心不够、容易放弃. 余闯为他规划的成长路径是先在优势课目取得成绩建立信心，再逐步补齐短板.

下连后，高森因训练成绩落后开始自暴自弃. 察觉到异样后，余闯没有任其“自由生长”，而是积极寻找解决办法. 留心观察平时训练，他发现，高森在需要用到上肢力量课目中表现突出. 比如手榴弹使用，高森虽然投掷时发力方法不正确，但成绩始终排名靠前.

余闯以此作为突破口，帮助高森纠正投掷姿势，改掉了痼癖动作. 不久后，旅里举办军事体育运动会，高森夺得手榴弹使用课目第四名.

余闯趁机为高森设置阶段性小目标，引导他固强补弱. 一段时间后，高森不仅军事训练进步明显，还登上了旅演讲比赛的舞台. 伴随一次次突破，高森变得越来越自信.

随着余闯把更多精力用在带兵上，二班战士面貌一新、士气高涨. 一年多来，他们在各类比武竞赛、考核评比中陆续取得好成绩，令兄弟班排刮目相看.

与此同时，余闯没有放松自我要求，参加旅政治教员比武取得第一名，参加军事体育运动会夺得单项课目冠军……

从“一人出彩”到“全班过硬”，如今二班已经成为一连的“标兵班”. 最近，该旅组织专业技术能手评定，余闯被评为“一级专业技术能手”，二班其他参评战士被评为“二级专业技术能手”.

Google Translation

From “One Person’s Excellence” to “The Whole Class’s Excellence”: See How This Squad Leader Leads a “Model Squad”

Source: PLA Daily Author: Wu Chao Editor: Wang Can 2025-08-13

From “One Person’s Excellence” to “The Whole Class’s Excellence”

■ Wu Chao

Recently, 10 officers and men from the 1st Battalion of a brigade of the 81st Group Army were honored on the “Honor Roll.” Three of them were from the 2nd Squad of the 1st Company: Yu Chuang, who took first place in the brigade’s political instructor competition; Yi Yanming, who took first place in the brigade’s gunner competition; and Gao Sen, who won the “Strong Army Style Award” in the brigade’s speech contest.

“Since last year, the 2nd Squad has been catching up fast. Everyone has made significant progress, and for several consecutive quarters, we have been the squad with the most students on the list in the battalion.” Instructor Liu of the battalion told the author that squad leader Yu Chuang has made an indelible contribution to the 2nd Squad’s current achievements.

Yu Chuang is a model trainer in the brigade, having won numerous awards in higher-level competitions, been named a “Gold Medal Instructor” by the Group Army, and has also been awarded Second Class Merit. However, at the same time, the performance of the other soldiers in the second squad was lukewarm, with few outstanding achievements. In a previous brigade-organized professional assessment, Yu Chuang ranked at the top, while his comrades performed mediocrely, with some even placing last.

This created a somewhat awkward situation: Yu Chuang’s individual performance was outstanding, earning numerous honors; while the second squad consistently ranked poorly in company-wide assessments, they were singled out for criticism by the company commander.

“To be an excellent squad leader, it’s not enough to simply be strong yourself,” the company commander told Yu Chuang. “As a squad leader, you must lead the entire squad well to truly fulfill your responsibilities.”

The company commander’s words prompted Yu Chuang to reflect. At a squad meeting, he identified the problem from his comrades’ comments: Although he had won gold and silver medals in competitions and set an example for everyone, he had been distracted by preparing for individual competitions, neglecting to help the other soldiers in his squad improve. Some soldiers confessed

that when they encountered difficult problems, they were reluctant to ask the squad leader for help, fearing that it would delay his training.

After this, Yu Chuang adjusted his focus, focusing more on the soldiers in his squad. Yu Chuang now carries a notebook he calls his “leadership manual,” in which he records his analysis of the strengths and weaknesses of each soldier in his squad, along with customized growth plans for each.

Take soldier Gao Sen as an example. Yu Chuang’s “leadership manual” records: Gao Sen’s strengths are upper body strength and expressiveness; his weaknesses are impatience and a tendency to give up easily. Yu Chuang’s planned growth path for him is to first achieve success in strong subjects to build confidence, then gradually address his weaknesses.

After joining the company, Gao Sen began to despair due to his lagging training performance. Upon noticing this, Yu Chuang didn’t let him “grow on his own” but actively sought solutions. Observing his training sessions, he discovered that Gao Sen excelled in subjects requiring upper body strength. For example, with grenades, Gao Sen consistently ranked high despite incorrectly applying force when throwing.

Using this as a breakthrough, Yu Chuang helped Gao Sen correct his throwing posture and eliminate his habitual movements. Soon after, the brigade held a military sports meet, and Gao Sen won fourth place in the grenade handling competition.

Yu Chuang seized the opportunity to set small, gradual goals for Gao Sen, guiding him to strengthen his strengths and overcome his weaknesses. Over time, Gao Sen not only made significant progress in military training but also competed in the brigade’s speech contest. With each breakthrough, Gao Sen grew increasingly confident.

As Yu Chuang focused more of his energy on leading the troops, the soldiers of Second Squad took on a new look and boosted their morale. Over the past year, they have consistently achieved strong results in various competitions, assessments, and evaluations, impressing fellow squads and platoons.

At the same time, Yu Chuang continued to strive for self-improvement, winning first place in the brigade’s political instructor competition and championship in individual events at the military sports meet.

From “one outstanding individual” to “the entire squad performing well,” Second Squad has now become the company’s “model squad.” Recently, the brigade organized a professional and technical expert evaluation, and Yu Chuang was recognized as a “First-Class Professional and Technical Expert,” while other participating soldiers from Second Squad were recognized as “Second-Class Professional and Technical Expert.”

新疆军区某综合训练基地教研部组织论文展评活动

来源：解放军报 作者：杨晶 徐月 责任编辑：王粲 2025-08-13

笔尖蘸硝烟 论文写战场

——新疆军区某综合训练基地教研部组织论文展评活动侧记

■杨 晶 徐 月

“看，刘教员在论文中引用了我们单位的演训案例……”这天，在新疆军区某综合训练基地机关楼大厅，不少官兵驻足在展板前，观摩学习一篇篇学术论文. 从提升新装备教学效能到探索智慧化组训模式，从复杂战场环境下的心理引导到经典战例的启示运用，这些凝结着研究思考的成果，出自基地教研部文职人员之手.

前段时间，教研部以学兵培训为契机，鼓励文职人员总结提炼各自专业领域的实践经验，形成具有普遍指导意义的理论成果，并通过展评活动激发大家的积极性.

某教研室副主任、文职人员蔡艳斌系统梳理了自己在基层调研收集的大量案例，总结出开展教学组训的方法，撰写的论文给一线带兵人带来启示. 在他的带动引导下，许多文职人员报名参加论文展评活动.

起初，文职人员小赵撰写论文时，只是简单堆砌现有教案. “写论文就像画地图，不仅要标出路线，还要讲清楚‘为什么这样走’‘如何通过不同地形’. ”教研部领导审阅初稿后，与他认真探讨改进方向. 后续，小赵深入剖析装备教学中遇到的问题，以“车工专业教学要点”为主题重新撰写论文，让大家眼前一亮.

“这场展评活动，不只是论文的静态展示，更像是‘笔尖上的淬炼’‘思想上的交锋’. ”基地领导表示，他们聚焦内容的深度、认知的广度和对部队训练的实际价值，对论文逐篇审阅，并邀请基层官兵担任特别评审，让论文带硝烟味，聚焦练兵备战现实课题.

阅读了文职人员小张撰写的军事心理学专业论文后，一名基地领导指出，可以将心理数据与任务数据相结合，科学分析各心理维度与任务表现之间的关联，探寻更加科学的人员筛选和人才测评体系，促进人才选拔任用和监督管理的科学化、制度化、规范化. 一名连长则结合自身带兵经历，提出了优化训练场景设置、锤炼战士心理韧性的建议. 大家的想法给小张带来很多启发，帮她进一步完善了论文内容.

笔尖蘸硝烟，论文写战场. “一篇有价值的论文必须根植基层沃土，直面部队需求，经得起官兵的审视和战场的检验. ”置身于开放平等的研究氛围中，文职人员徐超深受触动，表示要让纸上严谨的逻辑推演，尽快转化为训练场上更高效的组训方法和更优异的训练成绩.

The Teaching and Research Department of a Comprehensive Training Base under the Xinjiang Military Command Held a Paper Exhibition and Review Event.

Source: PLA Daily Author: Yang Jing, Xu Yue Editor: Wang Can 2025-08-13

Pens Dipped in Gunpowder, Papers Describe the Battlefield

—A Sidelight on a Paper Exhibition and Review Event Organized by the Teaching and Research Department of a Comprehensive Training Base under the Xinjiang Military Command

■ Yang Jing, Xu Yue

“Look, Instructor Liu cited our unit’s training exercises in his paper...” That day, in the lobby of the headquarters building at a comprehensive training base under the Xinjiang Military Command, many officers and men paused before display boards, studying academic papers one after another. From improving the effectiveness of teaching new equipment to exploring intelligent training models, from psychological guidance in complex battlefield environments to the inspirational application of classic combat examples, these are the fruits of research and reflection, culminating in the work of the civilian staff of the base’s Teaching and Research Department.

Recently, the Teaching and Research Department, leveraging student soldier training, encouraged civilian staff to summarize and refine practical experience in their respective fields, developing theoretical findings with universal guiding significance, and stimulating their enthusiasm through exhibition and review events. Cai Yanbin, a civilian and deputy director of a teaching and research department, systematically reviewed numerous case studies collected during his field research and developed methods for conducting teaching and training. His paper provided inspiration for frontline commanders. Under his guidance, many civilian personnel signed up for the paper exhibition and review.

At first, civilian Xiao Zhao simply reworked existing lesson plans when writing his paper. “Writing a paper is like drawing a map. It’s not just about marking the route, but also about clearly explaining ‘why’ and ‘how to navigate different terrains.’“ After reviewing the initial draft, the teaching and research department leader carefully discussed with him how to improve it. Later, Xiao Zhao deeply analyzed the problems encountered in equipment teaching and rewrote his paper on the theme of “Key Points in Lathe Engineering Teaching,” which was a revelation.

“This exhibition and review is more than just a static presentation of the papers; it’s more like a ‘refining of the pen’ and a ‘challenge of ideas.’“ Base leaders explained that they focused on the depth of content, the breadth of understanding, and the practical value to troop training. They reviewed each paper individually and invited grassroots officers and men to serve as special judges, giving the papers a sense of combat effectiveness and focusing on the real-world issues of training and preparation. After reading a military psychology paper written by civilian Xiao Zhang, a base leader suggested combining psychological data with mission data to scientifically analyze the

correlation between various psychological dimensions and mission performance, explore more scientific personnel screening and talent assessment systems, and promote the scientific, institutionalized, and standardized selection, appointment, and supervision of talent. A company commander, drawing on his own experience leading troops, offered suggestions for optimizing training scenarios and strengthening soldiers' psychological resilience. The group's insights inspired Xiao Zhang and helped her further refine her paper.

The pen dips into the smoke of war, and the paper writes about the battlefield. "A valuable paper must be rooted in the fertile soil of the grassroots, directly address the needs of the troops, and withstand the scrutiny of officers and men and the test of the battlefield." Civilian Xu Chao, deeply moved by the open and equal research atmosphere, expressed his desire to quickly translate the rigorous logical deductions on paper into more efficient training methods and superior training results on the training ground.

18 人申请留队，这个连队的"甜蜜烦恼"从何而来？

来源：解放军报 作者：皇甫少阳 嵇虎城 石芝鹏 郑亚鹏 责任编辑：王粲 2025-08-13 09:17:30

退伍季，机务三连又现"留队热"

■皇甫少阳 嵇虎城 解放军报特约通讯员 石芝鹏

"手心手背都是肉，最后留谁？"拿着一沓留队申请书，陆军某旅机务三连指导员陈志远欣喜的同时也犯了愁.

进入8月，士兵选晋工作陆续展开，该连遇到一个难题：22名即将满服役期的战士，有18人申请留队，但连队名额有限，并非都能如愿.

这些年，大部分满服役期的战士都想留在部队继续发展. 今年 3 月，就因为想留队的人太多，连队几次组织考核排名优中选优，陈志远不得不做一些未能如愿的战士的思想工作. 如今，"留队热"再次出现.

为什么会这样？陈志远说，答案就写在一份份留队申请书里.

"谁生病，干部骨干都会嘘寒问暖；谁家里有困难，连队都会想办法帮助解决. 连队就像家一样，让人不舍得离开. "下士余夏宇这样写道.

去年夏天，余夏宇的老家遭遇洪水灾害，他家房屋和农田受损严重. 连队得知情况后，第一时间帮他申请困难家庭救济金，解了燃眉之急，这让他和家人深受感动.

"我申请留队继续干，就是想用实际行动回报组织的关爱和战友的支持. "余夏宇对笔者说.

“穿上军装、成为军人，是我感到最荣耀的事. ”二级上士马敏祥同样申请留队. 在申请书里，他写道：“这些年，国家陆续出台的惠军利兵政策，军人已成为全社会尊崇的职业. ”

去年，马敏祥在多项重要任务中表现出色，年底荣立三等功. 今年初，当地人武部和村镇干部敲锣打鼓，一起把立功喜报送到他家里.

一人立功，全家光荣. 收到立功喜报，马敏祥的父母高兴得合不拢嘴，还给儿子提出了殷切期望：只要组织需要，就一直在部队干.

所以，马敏祥早早就明确要留队，他想在军营施展才华、建功立业，成为家人的骄傲.

翻到中士陈修一的留队申请书，陈志远嘴角微微上扬，想起了几天前的一个“小插曲”. 当时，陈修一向陈志远表达了留队的想法，陈志远打趣道：“你不想退伍回家了？”陈修一使劲摇头，说：“我在军营能实现个人价值，连队没有放弃我，我不能轻易‘撂挑子’. ”

6 年前，刚下连时，因体能较弱，陈修一参加训练考核经常排名靠后. 他一度怀疑自己不是当兵的料，甚至萌生过退伍的念头. 连队干部一边鼓励他树立信心、刻苦训练，一边安排班长骨干与他结成对子.

在战友们的帮助下，陈修一不仅恢复了自信，还逐渐成长为连队专业骨干. 一次装备检查中，陈修一凭借过硬的专业素质，及时发现并成功排除一起重大故障，荣立三等功.

一级上士卢代军再次申请延期服役的理由，与大部分战友类似.

“我来当兵就是为了保家卫国. ”入伍 17 年，卢代军从一名地面保障机械员成长为空中机械技师. 尤其这几年，他数十次跟随战机升空保障，在火热的练兵备战氛围里，体会到什么是军人的使命与担当.

看完战士们的留队申请书，陈志远与连长说起这个“幸福的烦恼”，连长却很乐观：“大家都想留队，这是好事，对连队是一种肯定，对其他官兵也是莫大的激励. ”

陈志远听后豁然开朗. 确实，换个角度想，战士们愿意留队，说明军人这个职业越来越有吸引力，也反映出连队工作让大家收获了成就感、幸福感，对这个集体更有归属感、认同感.

随后，陈志远和党支部一班人就士兵选晋工作统一了思想：一方面，组织好谈心交心，引导即将满服役期的战士正确对待走留；另一方面，严格落实制度规定，基于工作实绩量才、聚焦打仗要求选才、确保风清气正留才，坚持全程公平公正公开，让“晋升的硬气，落选的服气”.

这些天，陈志远漫步营区，总能看到即将满服役期的战士依旧保持十足的干劲：场坪上，二级上士王坤不惧高温、爬上爬下，细致检查战机每一处细节，汗水湿透工作服；体能训练时间，上等兵马心雨自我加压，背着沙袋“冲圈”……

“我们只管干好工作、刻苦训练，是留队还是离队，都听组织的. ”同样面临走留选择的中士周凡，道出了大家的心声.

“这‘烦恼’透着甜！”陈志远笑着说，眼下，士兵选晋工作正在进行，党支部按照程序全面考察每一名符合条件的战士. 他希望不管最终结果如何，大家都能一如既往、爱连如家.

短 评

“留队热”说明了啥

■郑亚鹏

近年来，基层部队持续出现战士“留队热”. 这种现象恰似一面多棱镜，折射出时代发展、军队建设、当代青年人价值追求等方面的深刻变迁.

战士愿意留队、争相留队，首先是部队向心力、凝聚力、感召力持续增强的生动注脚. 同时也从另一个方面说明，这些年来，部队各级对年轻官兵尤其是网生代战士的思想塑造、情感厚植和价值引领取得了显著成效. 越来越多的有志青年自觉将个人的理想追求与国家和民族的前途命运紧密结合，希望留在“绿色方阵”，继续在火热军营建功立业，为强国强军贡献力量.

需要指出的是，面对“留队热”，各级必须积极做好相关工作，既要科学合理地安排留队名额，完善考核选拔机制，坚持全程公开透明，确保真正优秀、部队需要的人才能够留下来，又要加强后续培养，想方设法为留队战士创造更大的空间、提供更为广阔的舞台，帮助他们持续提升能力素质、锤炼胜战本领. 还有一点也很重要，就是各级要想方设法保护好这种热情和积极性，让“从军热”“留队热”保持下去，使之成为社会和军营的一种风尚.

18 People Applied to Stay in the Army. Where Does this Company’s “Sweet Trouble” Come From?

Source: PLA Daily Author: Huangfu Shaoyang, Ji Hucheng, Shi Zhipeng, Zheng Yapeng Editor: Wang Can 2025-08-13

During demobilization season, the Third Maintenance Company is once again experiencing a “stay-in” trend.

■ Huangfu Shaoyang, Ji Hucheng, PLA Daily Special Correspondent Shi Zhipeng

“Everyone is a member of this team. Who will be left in the end?” Holding a stack of applications to stay in the army, Chen Zhiyuan, political instructor of the Third Maintenance Company of a certain army brigade, was both delighted and worried.

In August, the selection and promotion process for soldiers began, and the company faced a dilemma: 18 of the 22 soldiers who were about to complete their service had applied to stay, but the company had limited vacancies, so not all of them could be granted.

In recent years, most soldiers who have completed their service have wanted to remain in the army to continue their careers. In March of this year, because so many soldiers wanted to stay, the company organized several assessments to select the best candidates. Chen Zhiyuan had to do some psychological work for those who didn’t get their wish. Now, the “stay-in fever” has resurfaced.

Why is this happening? Chen Zhiyuan said the answer lies in the applications for stay-in.

“When anyone is sick, the cadres and backbone staff will take good care of them; when anyone has family difficulties, the company will find a way to help. The company is like home, making it hard to leave,” wrote Corporal Yu Xiayu.

Last summer, Yu Xiayu’s hometown was hit by floods, severely damaging his house and farmland. Upon learning of the situation, the company immediately helped him apply for relief funds for needy families, alleviating his immediate needs. This deeply touched him and his family.

“I applied to stay in the company because I want to repay the organization’s care and the support of my comrades with concrete actions,” Yu Xiayu told me.

“Wearing the uniform and becoming a soldier is the greatest honor I have ever felt.” Second Sergeant Ma Minxiang also applied to stay. In his application, he wrote, “In recent years, the country has successively introduced policies that benefit the military, and military service has become a profession respected by the whole society.”

Last year, Ma Minxiang performed outstandingly in several important missions, earning him a third-class merit at the end of the year. Earlier this year, the local armed forces and village officials, accompanied by drums and gongs, delivered the congratulatory announcement to his home.

One person’s merit brings honor to the whole family. Upon receiving the news of his meritorious service, Ma Minxiang’s parents were overjoyed and expressed their earnest wish for their son: to remain in the army as long as the organization needed him.

Thus, Ma Minxiang made it clear early on that he wanted to stay in the army. He wanted to display his talents, achieve great things, and become the pride of his family.

Following Sergeant Chen Xiuyi’s application to stay in the army, Chen Zhiyuan’s lips curled slightly, recalling a “little incident” from a few days ago. At that time, Chen Xiuyi expressed his desire to stay in the army to Chen Zhiyuan. Chen Zhiyuan jokingly asked, “Don’t you want to go

home after retiring?" Chen Xiuyi shook his head vigorously and said, "I can realize my personal value in the military. The company hasn't given up on me, so I can't just 'quit'."

Six years ago, when he first joined the company, Chen Xiuyi often ranked low in training assessments due to his poor physical fitness. He briefly doubted his military chops and even considered retiring. Company officials encouraged him to build confidence and train diligently, while also pairing him with squad leaders and key personnel.

With the help of his comrades, Chen Xiuyi not only regained his confidence but also gradually grew into a professional leader in the company. During an equipment inspection, Chen Xiuyi, with his exceptional professionalism, promptly discovered and successfully resolved a major malfunction, earning him a third-class merit.

First Sergeant Lu Daijun's reasons for applying for another extension of his service were similar to those of most of his comrades. "I joined the army to defend my country." After 17 years in the military, Lu Daijun has progressed from a ground support mechanic to an aerial mechanic. In recent years, he's flown dozens of times on combat aircraft, experiencing the intense atmosphere of training and combat readiness.

After reviewing the soldiers' applications to stay, Chen Zhiyuan shared this "happy dilemma" with his company commander. The commander was optimistic: "Everyone wants to stay. This is a good thing. It's a recognition of the company and a great encouragement to the other officers and men."

Chen Zhiyuan's perspective was suddenly enlightened. Indeed, from another perspective, the soldiers' willingness to stay indicates that the military profession is becoming increasingly attractive. It also reflects that company work has given them a sense of accomplishment, happiness, and a deeper sense of belonging and identification with the collective. Afterward, Chen Zhiyuan and the Party branch team reached a consensus on the selection and promotion process for soldiers. On the one hand, they would organize heart-to-heart talks to guide soldiers nearing the end of their service in properly considering whether to stay or leave. On the other hand, they would strictly implement regulations, assessing talent based on performance, focusing on combat requirements, ensuring a clean and honest environment, and maintaining a fair, just, and open process throughout, ensuring that "those who are promoted are confident and those who are eliminated are convinced."

These days, as Chen Zhiyuan strolls through the barracks, he often sees soldiers nearing the end of their service still maintaining their high spirits. On the field, Sergeant 2nd Class Wang Kun, braving the heat, climbs up and down, meticulously inspecting every detail of a fighter jet, his work clothes drenched in sweat. During physical training, Senior Soldier Ma Xinyu pushes himself to the limit, running laps while carrying a sandbag...

"We just have to do our jobs well and train hard. Whether we stay or leave is up to the organization," Sergeant Zhou Fan, also facing the decision of whether to stay or leave, echoed everyone's sentiments. "This 'trouble' is sweet!" Chen Zhiyuan said with a smile. The selection and promotion process for soldiers is currently underway, and the Party branch is thoroughly examining each

eligible soldier according to procedures. He hopes that no matter the final outcome, everyone will continue to love their unit as always, loving it like home.

Short Comment

What does the “Stay in the Army Fever” indicate?

■ Zheng Yapeng

In recent years, grassroots units have seen a persistent “stay in the army fever.” This phenomenon, like a multifaceted lens, reflects profound changes in the development of the times, military development, and the values pursued by contemporary youth.

The soldiers’ willingness and eagerness to stay in the army is, first and foremost, a vivid testament to the unit’s growing centripetal force, cohesion, and appeal. It also demonstrates that over the years, all levels of the military have achieved remarkable results in shaping the thinking, nurturing emotions, and guiding the values of young officers and men, especially those born during their youth careers. More and more aspiring young people are consciously aligning their personal ideals with the future of the country and nation, hoping to remain in the “Green Echelon,” continue to make contributions in the vibrant military camp, and contribute to strengthening the nation and the military. It’s important to point out that in response to the “retention craze,” all levels must proactively implement relevant measures. They must scientifically and rationally allocate quotas for those who remain, improve the assessment and selection mechanisms, and maintain transparency throughout the entire process to ensure that truly outstanding personnel needed by the military are retained. They must also strengthen follow-up training and find ways to create greater space and a broader platform for those who remain, helping them continuously improve their abilities and hone their combat skills. It’s also crucial that all levels ensure that this enthusiasm and motivation persists, ensuring that the “military enlistment” and “retention” craze become established practices in society and the military.

特刊丨第 77 集团军“金刚钻”旅传承先辈精神续写战旗新荣光

来源：中国军网-解放军报 作者：雷兆强 刘新垚 马嘉隆 责任编辑：郭妍菲 发布：2025-08-14

第七十七集团军“金刚钻”旅传承先辈精神——

续写战旗新荣光

■雷兆强 刘新垚 解放军报记者 马嘉隆

战车轰鸣，铁流滚滚. 盛夏时节，第 77 集团军“金刚钻”旅的一场实战化战术训练火热进行.

现场，一支战斗分队在无人机引导下，迂回穿插，精准抵达“敌”侧翼. 在装甲集群的火力掩护下，该分队向山顶发起猛攻，攻占“敌”指挥所.

“作为‘金刚钻’传人，我们就要有这股无坚不摧、无往不胜的战斗精神！”带队执行任务的申连长告诉记者，近年来，旅队多次承担全军重大任务，他们发扬“金刚钻”精神，化压力为动力、变挑战为机遇，探索出一大批新战术、新战法，不断淬炼胜战刀锋.

走进该旅史馆，一面鲜红的“金刚钻”战旗映入眼帘. “这面战旗承载着先辈们的牺牲奉献，也见证了后来者的战斗足迹. ”战旗下，一级上士顾建威向新兵讲述着战旗背后的故事.

1942 年，为了反蚕食反“扫荡”，新四军 2 师 10 团突破火力封锁，与伪军进行白刃格斗，攻克了在淮北地区号称“万无一失的铁桶”的杞岗，被上级授予“金刚钻”光荣称号. 新四军代军长陈毅称赞该团“英勇顽强、战斗作风好”.

1946 年的解放战争中，该旅前身部队奉命攻打安徽泗县. 在西关小窑战斗中，9 连 2 排排长吴克斌带头抱着炸药包冲向敌人碉堡，壮烈牺牲. 战斗结束后，五班班长马森贵在战斗小结中总结出“三个没有”的战斗口号：“没有克服不了的困难，没有完成不了的任务，没有战胜不了的敌人”.

聆听顾建威的深情讲述，新兵们一致表示，要像先辈们那样英勇善战、敢于攻坚，为这支部队不断增光添彩.

“让老兵给新兵讲传承，这只是众多教育实践活动的一项. ”顾建威告诉记者，“旅队引导官兵叫响战斗口号续写新荣光，体现在方方面面. ”

多年来，该旅坚持组织“感动金刚钻”人物评选和颁奖仪式，为“金刚钻”3 个字赋予新的时代内涵. 连队晚点名时，官兵都会呼喊“三个没有”战斗口号，让这一信念扎根于心.

“金刚钻”成为官兵心中始终高擎的旗帜，“三个没有”战斗口号融入一批又一批官兵血脉，催生出无穷力量.

2017 年，这支英雄部队换羽新生，由传统摩托化步兵团向新型陆军合成旅转型. 在探索合成作战新模式和战斗力生成新路子的“时代考卷”前，该旅官兵再次叫响“三个没有”战斗口号，开始了新一轮的加速冲锋——

依托集团军某项试点任务，该旅集中信息化骨干人才开展攻关，顺利打通联合作战指挥链路；将各兵种专业融在一起练，进行“一站式”考核，让各营连间交叉互学成为常态，合成作战思维深入人心；多次承担全军重大任务，结合列装新型武器装备，探索出一大批新战术、新战法……

“叫响战斗口号，如今已成为全旅上下的共识. ”该旅领导告诉记者，最近，聚焦“铸牢政治忠诚、打好攻坚之战”深化教育实践活动，该旅组织了一系列活动：将“金刚钻”这个团的光荣历史和涌现出的战斗英雄事迹编印成册，下发官兵；成立红色寻根小分队，沿着先辈们的转战路线，用直播镜头向官兵讲述“金刚钻”精神形成、发展历程；广泛开展“讲‘金刚钻’战斗故事、看‘金刚钻’战斗影片、唱‘金刚钻’战斗歌曲”活动，重温“金刚钻”精神，激发官兵斗志.

“金刚钻”精神融入官兵血脉，新的能量与活力始终在凝聚. 官兵们用实际行动续写“金刚钻”精神的新荣光. 前不久，野外驻训期间，该旅官兵刚刚参加完上级战斗力检验评估考核，征尘未洗便展开群众性练兵比武竞赛. 官兵们战风沙、斗酷暑，进行极限射击、应用射击等多课目竞技，最终多名士兵被评为“优秀射手”“进步之星”.

Special Issue | The 77th Group Army’s “Diamond Drill” Brigade Carries on the Spirit of Its Forefathers, Continuing to Write New Glories for the Battle Flag

Source: China Military Network - PLA Daily Author: Lei Zhaoqiang, Liu Xinyao, Ma Jialong Editor: Guo Yanfei Published: 2025-08-14

The 77th Group Army’s “Diamond Drill” Brigade Carries On the Spirit of Its Forefathers -

Continuing to Write New Glories for the Battle Flag

■ Lei Zhaoqiang, Liu Xinyao, PLA Daily Reporter Ma Jialong

Tanks roared, and a stream of steel rolled. In the height of summer, a combat-oriented tactical training exercise for the 77th Group Army's "Diamond Drill" Brigade was in full swing.

At the scene, a combat unit, guided by drones, maneuvered and intersected, precisely reaching the enemy's flank. Under the cover of armored fire, the unit launched a fierce assault on the mountaintop, capturing the enemy's command post. "As descendants of the 'Diamond Drill', we must possess this indestructible and unstoppable fighting spirit!" Company Commander Shen, who led the brigade on the mission, told reporters. In recent years, the brigade has undertaken numerous major military missions. Carrying forward the "Diamond Drill" spirit, they have transformed pressure into motivation and challenges into opportunities, exploring a large number of new tactics and strategies, and constantly sharpening their edge for victory.

Entering the brigade's history museum, a bright red "Diamond Drill" battle flag catches the eye. "This battle flag bears the sacrifices of our predecessors and bears witness to the footsteps of those who followed," said Sergeant First Class Gu Jianwei, recounting the story behind the battle flag to the new recruits.

In 1942, to counter encroachment and "mopping-up" operations, the 10th Regiment of the 2nd Division of the New Fourth Army broke through a fire blockade, engaged in hand-to-hand combat with the puppet troops, and captured Qigang, known as the "infallible iron barrel" in the Huaibei region. They were awarded the honorable title of "Diamond Drill" by their superiors. Chen Yi, Acting Commander of the New Fourth Army, praised the regiment for its "bravery, tenacity, and excellent fighting style." During the 1946 Liberation War, the predecessor unit of the brigade was ordered to attack Sixian County, Anhui Province. During the battle of Xiguan Xiaoyao, Wu Kebin, platoon leader of the 2nd Platoon of the 9th Company, led a charge towards an enemy bunker carrying a pack of explosives and died a heroic death. After the battle, Ma Sengui, squad leader of the 5th Squad, formulated the battle slogan "Three No's" in his battle summary: "There are no difficulties that cannot be overcome, no tasks that cannot be completed, and no enemies that cannot be defeated."

Listening to Gu Jianwei's heartfelt recounting, the new recruits unanimously expressed their desire to emulate the bravery and forge ahead like their predecessors, continuing to bring glory to the unit.

"Having veterans share their legacy with new recruits is just one of many educational and practical activities," Gu Jianwei told reporters. "The brigade guides officers and men to raise their battle slogans and continue to write new glories, and this is reflected in all aspects."

For many years, the brigade has consistently organized the "Touching Diamond" selection and award ceremony, imbuing the three characters "Diamond" with new contemporary meaning. During the company's evening roll call, officers and men chant the battle cry "Three No's," ensuring this belief takes root in their hearts.

“Diamond Drill” has become a banner that the officers and men always hold high. The battle cry “Three No’s” has been woven into the blood of successive generations of soldiers, energizing them with boundless strength.

In 2017, this heroic unit underwent a transformation, transitioning from a traditional motorized infantry regiment to a new type of Army combined arms brigade. Facing the “test of the times” of exploring new models of combined arms warfare and new approaches to combat effectiveness, the brigade’s officers and men once again shouted the battle cry “Three No’s,” embarking on a new round of accelerated advancements.

Relying on a pilot mission from the group army, the brigade focused its core information technology talent on key research and development, successfully establishing a joint operational command chain. It integrated the expertise of various arms into training, conducting “one-stop” assessments, and fostered cross-disciplinary learning between battalions and companies, fostering a deep understanding of combined arms warfare. The brigade has repeatedly undertaken major military missions, and, in conjunction with the deployment of new weapons and equipment, has explored a large number of new tactics and strategies...

“Raising the battle cry,” now a common practice. “It has become a consensus throughout the brigade.” Brigade leaders told reporters that recently, focusing on deepening the educational and practical activities of “Forging Firm Political Loyalty and Winning the Battle of Hard Knocks,” the brigade has organized a series of activities: A booklet has been compiled about the glorious history of the “Diamond Drill” regiment and the heroic deeds of its predecessors, which has been distributed to officers and men; a red roots-seeking team has been established to follow the battle routes of their predecessors and use live broadcasts to tell officers and men about the formation and development of the “Diamond Drill” spirit; and extensive activities such as “Telling Diamond Drill Battle Stories, Watching Diamond Drill Battle Films, and Singing Diamond Drill Battle Songs” have been carried out to revisit the “Diamond Drill” spirit and inspire the fighting spirit of officers and men.

The “Diamond Drill” spirit is ingrained in the blood of officers and men, constantly gathering new energy and vitality. Officers and men are continuing to write new chapters of glory for the “Diamond Drill” spirit through concrete actions. Not long ago, during field training, the brigade’s officers and men, fresh from participating in a superior’s combat effectiveness inspection and assessment, engaged in mass training competitions, barely dusted off from the battle. The officers and men fought against the wind and sand and the scorching heat, and competed in multiple subjects such as extreme shooting and applied shooting. In the end, many soldiers were rated as “Excellent Shooters” and “Stars of Progress.”

第 81 集团军某旅:“双向选岗”为战斗力生成按下“加速键”

来源：中国军网-解放军报 作者：卢运国 王晨旭 马 铮 责任编辑：孙悦

2025-08-14

第 81 集团军某旅提升新兵专业对口率缩短培养周期——

“双向选岗”促进人岗适配

■卢运国 王晨旭 马 铮

郑飞 绘

“‘敌’指挥所坐标成功回传！”近日，第 81 集团军某旅一场实战化训练打响. 上级下达指令后，新兵赵安岐沉着操作侦察装备，精准定位关键目标所在位置，顺利完成任务. 相较以往新兵达到同一技能水平所需的平均培养时间，赵安岐用时不到一半.

小赵的快速成长并非偶然. 该旅领导告诉笔者，为提升新兵岗位适配率、缩短成长周期，他们在按部队需要指令分配前提下，探索构建“双向选岗、精准定岗”机制，举办“双向选岗会”，通过面对面双向互选的形式，加快新兵战斗力生成.

选岗前，他们集中组织摸底测评，首先摸清新兵兴趣特长、个人想法、基础能力素质等情况. “双向选岗会”现场，为了让新兵了解不同专业的差别和特点，各专业班长依次上台，围绕班组人才需求、日常职责、装备类型等方面推荐岗位.

“我们是战场的保障尖兵，开路架桥不在话下，为战友们保驾护航”“我们是防空利刃，虽然人在地面，但守卫的是祖国的天空”“我们侦察班是全旅的尖刀，随时准备面对急难险重任务……”侦察班林班长的话，点燃了小赵心中的激情. “报告，我申请加入侦察班！”他第一个举手发言.

因爷爷和父亲也曾是侦察兵，小赵从小注重锻炼，体能基础较好，在新兵连脱颖而出. “希望能接过父辈的接力棒，成为一名光荣的侦察兵！”自我推荐时，小赵难掩内心的激动.

岗位介绍结束后，各专业班长拿着新兵摸底测评的成绩单和选岗手册，结合部队需求、个人意愿、专业特长与岗位特点，对照专业匹配度、任务适应力、发展潜力等方面标准，对新兵进行遴选. 经过组织全面衡量、整体统筹，以部队建设需要为根本出发点，兼顾个人发展愿望和能力特长，制订分配计划. 最终，小赵如愿分到侦察班.

选岗结束，小赵和其他几名战友来到侦察班所在营区. 当晚，老兵们为新兵精心准备了一份“礼物”——一场实战化训练观摩.

“前方发现‘敌’阵地……”夜幕下，老兵们利用地形掩护，熟练运用红外热成像仪、无人机等先进装备，精准定位“敌”方火力点，整个过程行云流水. 现场观摩，加深了小赵对岗位的认识了解.

“当然，双向选岗首先要考虑部队建设和战斗力提升需求，并非所有新兵都能得偿所愿. ”现场一名干部说，对于这些新兵，营连会结合岗位实际和个人特长进行培养帮带，帮助他们成长成才.

新兵高俊鹏入伍前曾考取驾照，驾驶经验比较丰富. 起初，他对前沿技术装备很感兴趣，一心想去无人机班组，但部队正在筹备跨区域机动演训，运输投送任务繁重，急需驾驶技能人才. “双向选岗会”上，班长骨干综合评估高俊鹏专业技能与岗位需求，最终将他分配到司机班.

看着身边战友奔赴心仪岗位，高俊鹏有些失落. 指导员察觉到他的情绪，多次主动找他谈心，还联系其家人说明岗位的重要性.

“指导员夸你驾驶技术好，部队正需要你这样的人才！”一次和家人视频通话时，母亲的鼓励和期许让高俊鹏认识到此前想法的狭隘. 他告诉母亲：“组织需要我，我就要干出个样子！”

一次实战化训练遭遇极端天气，通往前线的道路多处塌方. 紧急时刻，高俊鹏与班组成员重新规划路线，并凭借精湛技术，驾驶重载运输车将保障物资准时送达.

任务归来，面对新老战友的赞许，高俊鹏觉得找到了自身价值，决心在这个战位上干出彩. 他提醒自己，首轮定岗后还有“岗位实习期”，只有努力通过考核，才能正式定岗.

那段时间，他沉下心来认真钻研复杂路况的驾驶技巧，加班加点学习车辆故障应急维修技术，最终以优异成绩通过定岗考核.

该旅人力资源科科长告诉笔者，“双向选岗会”举办以来，已有超过 40 名新兵参与到旅队大项任务中，新兵们普遍表示“坚决服从组织安排，一切为了部队需要”“成长更快了、干劲更足了”. 下一步，他们将持续探索完善这一做法，为部队战斗力生成按下“加速键”.

An 81st Group Army Brigade: “Two-Way Job Selection” Accelerates Combat Effectiveness.

Source: China Military Network - PLA Daily. Authors: Lu Yunguo, Wang Chenxu, Ma Zheng. Editor: Sun Yue.

2025-08-14

A brigade of the 81st Group Army is improving the professional matching rate of new recruits and shortening the training cycle.

“Two-way job selection” promotes personnel-job matching.

■Lu Yunguo, Wang Chenxu, Ma Zheng

Illustration by Zheng Fei

“The coordinates of the ‘enemy’ command post have been successfully transmitted!” Recently, a brigade of the 81st Group Army commenced a combat-oriented training exercise. Following the command from his superiors, new recruit Zhao Anqi calmly operated his reconnaissance equipment, accurately located the key target, and successfully completed the mission. Compared to the average training time required for new recruits to reach the same skill level, Zhao Anqi took less than half the time.

Zhao’s rapid growth is no accident. Brigade leaders told me that to improve recruits’ job fit and shorten their development cycle, they are exploring a “two-way job selection and precise assignment” mechanism, based on unit-specific instructions. They hold “two-way job selection meetings” to accelerate the development of new recruits’ combat effectiveness through face-to-face, two-way selection.

Before the job selection process, they conduct a comprehensive assessment to understand the recruits’ interests, strengths, personal preferences, and basic abilities and qualities. At the “two-way job selection meeting,” to help the recruits understand the differences and characteristics of different specialties, squad leaders from each specialty take turns to recommend positions based on their team’s talent needs, daily responsibilities, and equipment types.

“We are the vanguard of battlefield support, building roads and bridges without a problem, safeguarding our comrades.” “We are the sharp edge of air defense. Although we are on the ground, we guard the nation’s skies.” “Our reconnaissance squad is the spearhead of the brigade, ready to face urgent, difficult, and dangerous missions at any time...” Squad Leader Lin’s words ignited Xiao Zhao’s passion. “Report! I apply to join the reconnaissance squad!” He was the first to raise his hand. Because his grandfather and father were also scouts, Xiao Zhao has been diligently exercising since childhood, developing a strong physical foundation and standing out in the recruit company. “I hope to carry on the baton from my father and become a glorious scout!” Xiao Zhao couldn’t contain his excitement as he recommended himself.

After the position briefings, squad leaders from each specialty took the recruit assessment results and the position selection manual and selected the new recruits based on the unit's needs, individual preferences, professional expertise, and the specifics of the position, comparing their professional compatibility, mission adaptability, and development potential. After a comprehensive assessment and overall coordination, the organization formulated a placement plan based on the needs of the unit and taking into account individual development aspirations and strengths. Ultimately, Xiao Zhao was assigned to the reconnaissance squad as he had hoped.

After the position selection, Xiao Zhao and several other comrades arrived at the reconnaissance squad's barracks. That evening, the veterans prepared a "gift" for the new recruits—a practical training observation session. "Enemy positions spotted ahead..." Under the cover of night, veterans used the terrain for cover and expertly employed advanced equipment like infrared thermal imagers and drones to precisely locate enemy fire points. The entire process flowed effortlessly. Observing the situation on-site deepened Xiao Zhao's understanding of his position.

"Of course, the dual-role selection process prioritizes unit development and combat effectiveness, and not all new recruits will be able to fulfill their desired assignments," said a cadre on the scene. For these recruits, the battalion and company will provide training and guidance tailored to their specific positions and individual strengths, helping them grow and develop.

Recruit Gao Junpeng had obtained a driver's license before joining the army and had extensive driving experience. Initially, he was intrigued by cutting-edge technology and equipment and wanted to join the drone team. However, the unit was preparing for cross-regional mobile training exercises, which required heavy transportation and delivery tasks and urgently needed skilled pilots. At the dual-role selection meeting, the squad leader and key personnel comprehensively assessed Gao Junpeng's professional skills and position requirements, ultimately assigning him to the driver class.

Watching his comrades depart for their desired positions, Gao Junpeng felt a sense of loss. The political instructor noticed his emotions and approached him several times for heart-to-heart talks. He also contacted his family to explain the importance of his position.

"The political instructor praised your driving skills and said, 'The army needs people like you!'" During a video call with his family, Gao Junpeng's mother's encouragement and expectations made him realize his previous narrow-mindedness. He told her, "The organization needs me, so I must deliver!"

During a combat training exercise, extreme weather conditions caused landslides on the road leading to the front line. In this critical moment, Gao Junpeng and his team replanned the route and, with his superb skills, drove a heavy-duty transport truck to ensure the timely delivery of supplies.

After returning from the mission, faced with praise from both new and old comrades, Gao Junpeng felt he had found his true value and was determined to excel in this position. He reminded himself

that after the initial assignment, there would be a “position probationary period,” and only after diligently passing the assessment could he be officially assigned.

During that time, he dedicated himself to diligently studying driving techniques for complex road conditions and worked overtime to learn emergency vehicle repair techniques. He ultimately passed the assessment with flying colors. The brigade’s Human Resources Section Chief told the author that since the “Two-Way Job Selection Meeting” was held, over 40 new recruits have participated in major brigade missions. The recruits generally expressed their commitment to “firmly obeying organizational arrangements and working for the needs of the unit,” and their “growth has accelerated and their motivation has increased.” They will continue to explore and refine this approach, accelerating the growth of the brigade’s combat effectiveness.

是对手更是战友！新老教员同台竞技让政治教育入脑入心

来源：解放军报 作者：王可可 王驰 责任编辑：孙悦 2025-08-14

第 76 集团军某旅提升政治教员授课能力——

排长与教导员同台竞技

■王可可 解放军报记者 王驰

近日，第 76 集团军某旅组织了一场政治教员比武. 与以往不同的是，这次，不同衔级、不同职务的政治教员同台竞技，在比拼较量中互学互助、共同成长.

“年年组织比武，能力不能总在原地踏步. ”该旅领导告诉记者，以往，政治教员群体存在以职级区分水平、以年龄衡量能力的现象，部分教导员内生动力不足，授课内容和形式也缺少新意. 有的指导员、排长理论积累不够，欠缺实操经验，课上照本宣科多，很难入脑入心. 为此，他们打破常规，要求各营至少选派一名教导员、一名指导员和近两年新任排长参赛，让不同层级的政治教员在同台较量中切磋交流、取长补短，实现能力跃升.

比武中，某营教导员李宁引经据典、剖析深刻，以扎实的理论、严谨的逻辑获得好评；年轻排长周亚文则凭借鲜活的案例、浅显易懂的语言，赢得官兵阵阵掌声. 二人表现各有千秋.

距离复赛还有一段时间，两个人积极交流，相互学习对方长处.

李宁借鉴周亚文“用故事讲透道理”的思路，反复打磨教案，力求用鲜活的语言讲述年轻官兵奋斗故事，授课愈发生动饱满，既接地气又鼓干劲.

参赛期间首次站上讲台的周亚文缺乏相关经验，在试讲时遇到不少问题. 李宁将自己多年来总结的授课技巧倾囊相授，并经常帮他对授课风格和内容深度进行再打磨，引导周亚文

将原本零散的事例进行归纳，总结出“现象—原因—对策”的讲解方式，提升了授课内容的理论性、思辨性.

复赛如期而至. 经过激烈比拼，评委组结合比赛表现、成长进步、官兵反响等方面综合评分，两人都取得了佳绩，都有明显进步. 走下比武场，周亚文很是感慨：“感谢李教导员的帮带，我们是对手，更是战友！”

“教导员队伍经验丰富，在思想深度和课堂把控上更胜一筹；年轻排长思维活跃，思想观点新颖，更贴近战士心理. ”现场评委表示，比武场不仅是竞技舞台，更是交流互鉴平台. 新老教员相互学习、取长补短，能有效提升政治教员队伍的水平和活力.

“年轻同志思想活、有朝气，值得我们学习. ”看到台上新生代教员的精彩表现，有丰富授课经验的教导员李亮受到启发，主动摒弃传统套路，将红色歌曲搬上讲台，营造了良好的课堂氛围. 授课中，他结合主题讲述红色歌曲背后的革命故事，增加互动环节，形式新颖、内容有深度，让官兵们印象深刻. 课后组织讨论时，他引导大家将个人困惑与部队发展联系起来，深刻领会感悟新时代革命军人的职责使命. 这堂课受到大家一致欢迎.

记者了解到，该旅已将比武中涌现的一批精品课纳入“教育资源库”，同时组织优胜者开展基层巡回授课，进一步推动比武成果转化，持续提升政治教育质效.

Rivals, But More Than Comrades! New and Veteran Instructors Compete on the Same Stage to Ensure Political Education Sinks into the Minds and Hearts of the People.

Source: PLA Daily Author: Wang Keke, Wang Chi Editor: Sun Yue 2025-08-14

A brigade of the 76th Group Army improves the teaching abilities of political instructors –

Platoon leaders and political instructors compete on the same stage

■ Wang Keke, PLA Daily reporter, Wang Chi

Recently, a brigade of the 76th Group Army organized a political instructor competition. Unlike previous competitions, this time, political instructors of different ranks and positions competed on the same stage, learning from each other and growing together through the competition.

“We can’t just stand still in our ability to hold competitions year after year,” a brigade leader told reporters. In the past, political instructors were categorized by rank and measured by age. This led to some political instructors lacking motivation, and their teaching content and format lacked innovation. Some political instructors and platoon leaders lacked theoretical knowledge and practical experience, and their lectures were largely rote, making them difficult to internalize. To this end, they broke with convention, requiring each battalion to select at least one political instructor, one counselor, and a newly appointed platoon leader from the past two years to participate. This allowed political instructors at different levels to compete on the same stage,

exchange ideas, learn from each other's strengths, and achieve significant improvements in their capabilities.

During the competition, Li Ning, a battalion political instructor, drew praise for his insightful analysis, drawing on classic texts and delivering solid theoretical and rigorous logic. Young platoon leader Zhou Yawen, on the other hand, drew applause from officers and men with his vivid case studies and accessible language. Each presented with their own strengths.

With time remaining until the rematch, the two actively exchanged ideas and learned from each other's strengths.

Li Ning, drawing on Zhou Yawen's approach of "using stories to convey lessons," repeatedly refined his lesson plans, striving to use vivid language to tell the stories of the young soldiers' struggles. His lectures became increasingly vivid and engaging, both grounded and inspiring.

During the competition, Zhou Yawen, who was new to the podium, lacked relevant experience and encountered numerous challenges during his trial lecture. Li Ning shared his years of experience in teaching techniques with Zhou Yawen, frequently helping him refine his teaching style and depth of content. He guided Zhou Yawen in synthesizing previously scattered examples and developing a "phenomenon-cause-countermeasure" approach, enhancing the theoretical and critical thinking of his teaching.

The rematch arrived as scheduled. After a fierce competition, the judging panel evaluated both political instructors based on their performance, growth, and feedback from officers and men. Both achieved excellent results and demonstrated significant improvement. Leaving the competition arena, Zhou Yawen expressed deep emotion: "I am grateful to Political instructor Li for his guidance. We are not only rivals, but also comrades!"

"The political instructor team is experienced and excels in depth of thought and classroom control. The young platoon leaders are active thinkers with innovative perspectives that are more in tune with the soldiers' minds." The judges commented that the competition is not only a competitive arena, but also a platform for exchange and mutual learning. Learning from each other, both veteran and new political instructors can effectively enhance the quality and vitality of the political instructor team.

"The young comrades are active and energetic, worthy of our learning." Inspired by the brilliant performances of the new generation of political instructors, Li Liang, a seasoned political instructor, abandoned traditional routines and incorporated revolutionary songs into the classroom, creating a positive atmosphere. During the lecture, he recounted the revolutionary stories behind the songs, integrating them with the theme and adding interactive elements. The innovative format and profound content left a lasting impression on the officers and men. During the post-class discussion, he guided the students to connect their personal struggles with the development of the military, fostering a deep understanding and appreciation of the responsibilities and mission of revolutionary soldiers in the new era. The class was universally praised.

Reporters learned that the brigade has incorporated a number of excellent courses from the competition into its “Education Resource Library” and is organizing the winners to conduct field tours to further promote the application of the competition’s findings and continuously improve the quality and effectiveness of political education.

第 74 集团军某旅某连加强科学统筹

来源：解放军报 作者：陈太照 肖静玲 责任编辑：郭妍菲 2025-08-15 07:15:42

第 74 集团军某旅某连加强科学统筹——

布置工作任务不再“令出多头”

■陈太照 肖静玲

这天，第 74 集团军某旅某连陈指导员找到战士余远宁，让他为连队设计宣传册. 余远宁擅长使用制图和视频剪辑等电脑软件，经常负责此类工作. 但这次，他没有像往常那样一口答应，而是有些欲言又止.

原来，前段时间，陈指导员安排余远宁设计连队荣誉榜，但并未告知余远宁的班长刘焕林，刘焕林便按照原定计划给余远宁布置了其他任务. 这样一来，余远宁两头赶工，最后还是耽误了班里的工作.

“大家没说什么，但我心里很难受，班长对我也没有以前亲近了……指导员，以后安排任务时，您能不能先跟班长说一声？”得知事情原委，陈指导员有些愧疚，立即带着余远宁找刘焕林说明情况，两人的误会随之化解.

这件事让陈指导员开始反思自己的工作方式. 在此之前，他认为把任务直接安排到人、“一竿子插到底”，可以减少层级、提高工作效率. 但连队是个大集体，需要各级干部骨干齐心协力、密切配合，如果大家都这样“各自为战”安排工作，势必会造成混乱，长此以往连队建设发展也会受到影响.

针对此事，陈指导员召集干部骨干开会讨论，他的想法迅速引发大家热议. “干部骨干必须加强沟通. ”中士郭宝文说，上周排长让他负责装备讲解，可班长又安排他配合参与训练课目示范. “时间紧、任务重，两边都催得急，哪样干得都不踏实. ”

一班副班长张友根接过话茬，建议连队安排工作尽量打好提前量. 有一次，他正带着全班搭建专修室，突然接到连队通知，下午体能时间组织小比武. 大家刚干完体力活就匆忙上阵，由于身心疲惫，成绩可想而知……

陈指导员仔细记录意见建议，并在会后立即着手改进：一方面加强系统协调，利用连务会统筹安排一周工作，确保任务不扎堆、部署“不撞车”；另一方面，要求干部骨干之间多沟通、多协商，避免因为“令出多头”导致战士左右为难.

变化很快发生. 战士们不再为“分身乏术”犯愁，干部骨干之间的配合也更加默契. 陈指导员感触颇深：“工作安排要‘一盘棋’，任务部署要‘留余地’，解决问题要‘听兵声’，这样连队建设才能正规有序、蒸蒸日上. ”

A Company in an 84th Group Army Brigade Strengthens Scientific Coordination.

Source: PLA Daily Author: Chen Taizhao, Xiao Jingling Editor: Guo Yanfei 2025-08-15

A company in a brigade of the 74th Group Army strengthens scientific coordination—

Assigning tasks is no longer “multiple orders.”

■ Chen Taizhao, Xiao Jingling

One day, political instructor Chen from a company in a brigade of the 74th Group Army approached soldier Yu Yuanning and asked him to design a brochure for the company. Yu Yuanning, skilled in computer software like graphics and video editing, often took on such tasks. But this time, he didn’t agree immediately as usual, and instead hesitated.

Recently, political instructor Chen had assigned Yu Yuanning to design the company’s honor roll, but he hadn’t informed Yu Yuanning’s squad leader, Liu Huanlin. Liu Huanlin, in turn, assigned Yu Yuanning other tasks as originally planned. This left Yu Yuanning scrambling to complete tasks, ultimately delaying his squad’s work. “No one said anything, but I’m upset. The squad leader isn’t as close to me as before... Political instructor, next time you assign tasks, could you please tell the squad leader first?” Upon learning the full story, Political instructor Chen felt a pang of guilt and immediately took Yu Yuanning to Liu Huanlin to explain the situation. The misunderstanding between the two was resolved.

This incident caused Political instructor Chen to reflect on his work style. Previously, he believed that assigning tasks directly to individuals and “pulling the needle” would reduce layers and improve efficiency. However, the company is a large collective, requiring the concerted efforts and close coordination of cadres at all levels. If everyone were to “work independently” in this way, it would inevitably lead to chaos and, in the long run, would also affect the company’s development.

Political instructor Chen convened a meeting of cadres to discuss this matter, and his idea quickly sparked heated discussion. “Cadres must strengthen communication,” said Sergeant Guo Baowen. Last week, his platoon leader had assigned him to explain the equipment, but the squad leader had assigned him to participate in training demonstrations. “Time is tight, the workload is heavy, and with both sides pushing us, we can’t really work hard.”

Zhang Yougen, the deputy squad leader of the first squad, took over and suggested that the company plan its work as far in advance as possible. On one occasion, he was leading the entire squad in setting up a training room when they received a notice from the company for a small competition during the afternoon's physical training period. Everyone rushed into the competition right after finishing their physical work, exhausted both physically and mentally. The results were predictable...

Political instructor Chen carefully noted the comments and suggestions and immediately began implementing improvements after the meeting. First, he strengthened system coordination, using company meetings to coordinate the week's work to ensure that tasks were not clumped and deployments were not overwhelmed. Second, he encouraged more communication and consultation among key personnel to avoid the dilemma of soldiers being caught between multiple orders.

Changes occurred quickly. Soldiers no longer worried about being stretched thin, and key personnel collaborated more effectively. Political instructor Chen was deeply touched: "Work arrangements should be 'one chess game', task deployments should 'leave room for maneuver', and problem solving should 'listen to the soldiers' voices'. Only in this way can the company construction be regular, orderly and prosperous."

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：张翔龙 韩伟 责任编辑：郭妍菲 2025-08-15

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

深入一线解难题 暖心服务励斗志

■张翔龙 韩 伟

"如今，暖心举措落地落实，大家练兵备战的劲头更足了！"近日，陆军某旅二级军士长刘海龙请假回家陪护家属生产，孩子出生后不到两天，他就接到单位机关干部核实信息的电话，很快享受到子女保教费的福利待遇，这让刘海龙心里倍感温暖.

"服务基层就是服务战斗力，党委和机关干部只有真正深入一线察实情、谋实招、解难题，才能激发官兵干事创业动力活力. "该旅领导介绍，深入贯彻中央八项规定精神学习教育开展以来，他们对标对表中央八项规定精神、军委十项规定及其实施细则精神，把为基层解难纾困作为改进工作作风的着力点，要求各级领导和机关干部利用现场办公会、检查督导、蹲点帮建等时机，变"坐等汇报"为"主动上门"，变"检查问题"为"解决难题"，以热情暖心的服务、排忧解难的举措，让官兵感受到转作风带来的新变化.

实践中，该旅定期组织官兵恳谈会，由旅领导统筹组织机关各部门人员，与官兵代表座谈交流、倾听意见，能现场解决的立即解决，一时难以解决的，明确负责人和解决时限；设立“基层服务日”，组织机关工作人员组成服务队，赴不同点位现场办公，既实现了精准解难，又密切了官兵关系；梳理福利待遇有关制度规定，将涉及官兵切身利益的条文汇编成册下发基层，便于官兵随学随用，想方设法打通服务基层“最后一公里”.

据介绍，前期该旅针对暑期军人家属来队探亲多的实际，提前筹划修缮家属来队住房，确保每间住房设施齐全、环境温馨、住用舒适. 他们还帮助协调解决军人家属就业、子女入学入托等难题，解除官兵后顾之忧，让官兵心无旁骛投身训练.

深入一线解难题，暖心服务励斗志. 随着深入贯彻中央八项规定精神学习教育不断走深走实，该旅党委机关以扎实的作风、务实的举措，解决了一批基层急难愁盼问题，官兵斗志更加昂扬，圆满完成多项任务.

An Army Brigade Solidly Conducts Study and Education on the Implementation of the Central Committee’s Eight-Point Regulations

Source: PLA Daily Author: Zhang Xianglong, Han Wei Editor: Guo Yanfei 2025-08-15

An Army Brigade Solidly Conducts Study and Education on the Implementation of the Central Committee’s Eight-Point Regulations --

Deeply Addressing Problems on the Front Lines, Inspiring Confidence through Heartwarming Service

■ Zhang Xianglong, Han Wei

“Now that these heartwarming measures have been implemented, everyone’s training and preparations are even more motivated!” Recently, Sergeant Major Liu Hailong of an Army Brigade requested leave to accompany his family during childbirth. Less than two days after the birth, he received a call from a unit official verifying his information and quickly received childcare benefits, which brought him immense warmth. “Serving the grassroots is serving combat effectiveness. Only by truly going to the front lines to investigate the realities, devise practical strategies, and resolve problems can the Party committees and cadres inspire the motivation and vitality of officers and men to work and start businesses.” The brigade leader explained that since the in-depth study and education campaign to implement the Central Committee’s eight regulations, they have aligned themselves with the Central Committee’s eight regulations, the CMC’s ten regulations, and their implementation rules. They have prioritized resolving difficulties at the grassroots level as a key area for improving their work style. Leaders and cadres at all levels are required to utilize opportunities such as on-site office meetings, inspections and supervision, and on-site assistance to shift from “waiting for reports” to “actively visiting” and from “inspecting problems” to “solving them.” With warm and thoughtful service and solutions to problems, they are allowing

officers and men to feel the new changes brought about by this shift in work style. In practice, the brigade regularly organizes consultations with officers and men. Brigade leaders coordinate and organize personnel from various departments to discuss and exchange opinions with representatives of officers and men. Issues that can be resolved on the spot are addressed immediately, while those that are difficult to resolve immediately are assigned specific responsibilities and deadlines. The brigade also established “Grassroots Service Days,” organizing staff members to form service teams and conduct on-site work at various locations. This not only ensures precise problem-solving but also strengthens officer-soldier relationships. The brigade also reviewed relevant regulations on welfare benefits, compiling a manual of those pertinent to officers and men’ interests for distribution to the grassroots level, enabling soldiers to learn and apply them as they go. This effort aims to bridge the “last mile” of grassroots service.

According to reports, the brigade, in anticipation of the high number of military family members visiting the brigade during the summer, pre-emptively planned renovations to ensure each residence is fully equipped, comfortable, and welcoming. They also help coordinate solutions to problems such as employment for military family members and schooling and childcare for their children, alleviating worries for officers and men and allowing them to focus on training.

They address challenges on the front lines and provide heartwarming service to inspire morale. As the study and education on the spirit of the Central Committee’s eight regulations continues to deepen and become more practical, the brigade’s Party Committee has solved a number of urgent and difficult problems at the grassroots level with a solid style and pragmatic measures. The officers and men are more motivated and have successfully completed many tasks.

“突击连”的士兵突击

来源：中国军网 作者：杨晓霖 责任编辑：王丽娟 发布：2025-08-15

“突击连”的士兵突击

■中国军网记者 杨晓霖

突击,

要写下这两个字，每一笔都重若千钧,

起手一横，出师抗日首战大捷，打破了日军所谓“不可战胜”的神话，鼓舞了全民族抗战必胜的信心；竖笔如刀，白刃厮杀死战不退，毙敌 100 余人，“猛打猛攻、首冲敌阵”刻入连魂；转折钩提，面对转型重塑的时代大考，实现由摩托化到机械化再到合成化的“三级跳”；撇捺飞扬，夜间夺控战斗，敢冲锋、善谋算，头一个突破“敌”阵地，“平型关大战突击连”的英雄战旗高高飘扬……

凝结在战旗上的这“突击”二字，蘸着历史的浓墨重彩，书写着新时代“突击铁拳”的篇章,

执笔人，是每一个“兵”,

“平型关大战突击连”官兵高擎战旗，向新的胜利发起突击, 张佳兴 摄

传奇或平淡

我们都有自己的故事要讲

梁立超是“平型关大战突击连”——陆军第 79 集团军某旅装步九连——第 12345 个兵,

他一直记得自己获得这个编号时的“小激动”——英雄的连队，“特别”的编号，仿佛预示着自己将要“崭露头角”,

梁立超有这个自信——新兵营里，他体能突出，3 公里比同年兵快半分钟，拉单杠直接超出平均成绩十多个, 可到了九连却发现，这些都是“平常事”,

二级上士王烽，九连公认的体能尖子，全旅“体能尖兵”比武连续两年第一；驾驶员王振民，能驾驶、会通信、精射击，是响当当的“六边形战士”；二级上士董丰，荣获中蒙“草原伙伴-2024”陆军联合训练“跑步射击”比赛第一名……自己真的配得上九连吗？那时的梁立超，心里满是失落迷茫,

连队荣誉室里，指导员栗新朝给新兵们讲起了 1937 年的那场仗——

“七七事变”后，侵华日军对华北进行疯狂进攻, 日军第 5 师团第 21 旅团一部 4000 多人乘汽车百余辆，沿灵丘至平型关西犯,

连队前身——八路军第 115 师 685 团 2 营 5 连——作为“突击连”，奉命在关沟以北高地伏击日军先头部队,

战斗中，五连“猛打猛攻、首冲敌阵”，率先抢占制高点，居高临下，打退了日军一波又一波的进攻, 弹药打光了，就装上刺刀、抡起大砍刀同鬼子肉搏，绰号“猛子”的连长曾贤生冲在最前，在弹药用尽后又接连刺死 10 多个鬼子，拉响了最后一颗手榴弹与敌人同归于尽；有的战士刺刀被打掉，就抱着敌人一起跳下悬崖, 连长牺牲了排长顶上，排长牺牲了班长顶替，班长牺牲了战士接替指挥……战斗结束时，全连 160 人只剩 30 多人，除了少数传奇英雄的故事流传至今，很多战士的名字已经湮没在历史长河中,

“但你能说他们不值得崇敬吗？”听到栗新朝的问题，梁立超眼含热泪地摇头：每一名战士的誓死突击，才铸就这场胜利, 从这一刻起，他相信，九连里每个人都重要，每个人都要在这里喷涌自己心头的那团火，把英雄的连队，锻造成更硬的钢,

“平型关大战突击连”组织抗战精神学习教育, 戴胜丰 摄

人人都知晓这段历史，人人都在“突击”，所以九连的兵，个个都有自己的故事可讲——

体能尖兵王烽对着新兵有些“唠叨”：体能差？“练！拼了命去练！”别看现在王烽一身“腱子肉”，新兵时也曾体能考核垫底, 咋办？练呗！不论严寒酷暑，他每天坚持早起进行 10 公里体能训练；白天在训练场努力钻研专业，晚上加练进行肢体力量强化……那年年终考核，他一举摘得全连综合第一，“夺冠”的滋味至今难忘,

机枪手艾则孜有点懊恼：每年群众性练兵比武成绩最好的班排，可以将战友们的“全家福”挂进荣誉室, 今年的比武中，艾则孜在强项课目上失误，让一排错失了这个机会, 但他并不气馁，“明年，我一定把这项荣誉赢回来！”

驾驶员王楠已经入伍 9 年，没有比武场上的金牌，没有惊天动地的伟业，但他的自豪一点不少：他驾驶的战车，始终保持着最佳状态，从未发生一次故障,

……

今年，梁立超在栗新朝带领下，发挥自己的建模特长，参与到连队荣誉室翻新工作里, 走进崭新的荣誉室，梁立超站在平型关大捷英烈群体的雕像前，向先辈们轻声讲述着后来人的故事,

遥远又贴近

“平型关”是我们的“精神坐标”

平型关在哪儿？

下士马文凯再熟悉不过了, 作为一名土生土长的平型关人，这三个字常常出现在他的日常生活里——家门口那条大路的名字，家附近那个最大超市的招牌，还有一座全国各地游客络绎不绝的纪念馆……

平型关到底啥样？

上等兵尚坤从来没去过, 但那里的高程、山林、道路、水系他熟稔于心，在兵棋推演的虚拟战场里，他触摸过这片悬崖陡峭、沟壑曲折的土地,

更多的九连官兵，是从“平型关大战突击连”那面战旗中，回望历史硝烟中的平型关, 那座距离遥远的关口，因为这面战旗变得近在咫尺，它成为九连官兵心中的重要坐标，提示着“突击”的方向,

那年，还是新兵的刘鑫代表连队走上比武场，斩获全旅第二, “咱九连‘见第一眼红，不拿第一脸红’，指导员，明年我还要去，为连队争第一！”满怀雄心的刘鑫，目标直指“第一”, 第二年的比武，机枪分解结合，第一！武装三公里越野，第一！单杠引体向上，第一！……多个课目高居榜首，总冠军似乎近在眼前，刘鑫却在最拿手的课目上马失前蹄，被对手反超，再次与“第一”失之交臂,

回到连队，刘鑫躲进库房偷偷掉眼泪，甚至萌生了退伍回家的念头, 时任指导员姜丰把他带到战旗前，语重心长地说：“平型关大战中，我们的前辈与敌寇白刃格斗，战场上不分谁先谁后，敢拼就是第一！看着这面旗告诉我，你还敢拼吗？”

“我敢！”这是刘鑫的回答, 第三年，刘鑫眼中再无杂念，只有那面浸染硝烟的战旗, 比武场上，他稳扎稳打，全力拼搏，最终成绩揭晓，刘鑫的名字赫然列于榜首,

战场上奋勇杀敌，训练场上勇猛突击，88 年来，“平型关大战突击连”人人都有这股拼劲,

一次夜间战斗训练，中士陈希姜驾驶战车通过崎岖山路，剧烈的起伏将车顶驾驶舱门颠开, 如果不闭合舱门，炮长就无法射击，突击任务可能功亏一篑, 颠簸中，陈希姜摸索着尝试关闭上下晃动的舱门，却忽然感觉手上一凉，好像被夹了一下, 顾不上仔细查看，他迅速转动门闩紧锁舱门，继续驾驶战车突进,

直到完成突击任务，陈希姜才感到钻心的疼, 跳下战车，战友看到他手掌和衣服上全是血迹，立即将他送到医院, 医生检查后发现，陈希姜的小拇指已被夹骨折,

“平型关大战突击连”在演习中向阵地发起冲击, 戴胜丰 摄

一次演练现场，连队遭“敌”重创、损伤惨重，是组织部队后撤寻找时机，还是继续发起冲击与“敌”决战？担负尖刀班任务的二班长吴继星，心中回响起平型关战场上先辈们决死突击的呐喊，他顶住压力，带领班内战士依托现场环境，灵活采取战术战法勇猛突围，成功逆转颓势，率先完成演习任务,

今年 4 月，马文凯随连队回到平型关“寻根”, 这位生于斯长于斯的“00 后”战士，第一次走进平型关烈士陵园, 24 座白色墓丘静卧于此，长眠着当年为守护这片山河而牺牲的先烈——他们中许多人，与此刻的马文凯年纪相仿，甚至更小, 在这里，马文凯明白了连队荣誉室里那面战旗为何如此沉重，也终于清晰地触摸到那个深植于九连血脉的精神坐标,

合葬冢前，马文凯与战友们蹲下身来，仔细擦拭墓丘上的灰尘，将边角的青苔也轻轻刮净, 他手掌触摸着冰冷的墓石，心中却一片滚烫，耳边拂过山间的风，仿佛是先辈们在问：“今天的‘突击连’，还敢拼吗？”

——“我敢！”

钢多气更盛

锻造一把永不卷刃的胜战钢刀

周午阳永远难忘 2018 年的那次实弹射击演练, 坐在炮长位置上，按下击发按钮前，一把锈迹斑斑的大刀浮现在他眼前,

此前一年，九连经历转隶移防，由传统步兵向装甲步兵转型, 对官兵们来说，“装甲”两字犹如一道难关，横亘在转型之路上,

从“摩托化”到“履带式”，不到半年的时间里，官兵刚摸透装备“脾气秉性”，连队再次换装某新型装甲步兵战车, 相比以往老装备，新装备专业信息化程度高、技术要求高, 装备展开训练后不久，首次迎接上级摸底考核，结果车长、炮长、驾驶员，3 个主要专业及格率不足 60%,

那年寒冬，某新型步战车实弹射击现场，被誉为“神枪手”的中士周午阳脱靶 3 发, “不合格”！显示屏上的三个大字刺痛了周午阳，也让九连的官兵们红了脸,

在与兄弟单位展开的红蓝对抗中，官兵们同样“错漏”频出：指挥员仍按步兵思维摆兵布阵，把新装备当作“代步车”；驾驶员只求开得动，不注重与车长、炮长协同……他们被熟练步兵与装甲火力配合的蓝军打得措手不及、节节败退,

“平型关大战突击连”在演习中向集结地域开进, 张帅 摄

装备更先进了，可怎么驾驭手里这把“利剑”？大家一时犯了难,

时任连长李远超将官兵们拉到了荣誉室，展柜里静静躺着一把大刀,

连队新兵在入连时就见过它——平型关大战中，连队先辈手持这样的大刀与武器精锐的敌寇拼杀；但他们从没有这样认真地凝视过它——透过斑驳的锈迹，仿佛能看到当年的血与火，刀口卷刃也挡不住一股锋锐之气，那是凝聚在大刀上的突击精神,

“那时候我们装备不如人，靠气取胜, 如今‘利剑’在手，我们要做到钢多气更硬！”面对时代之变，九连官兵又一次以血性突击，跨越转型之路上的“平型关”：10 余种新型装备的上万字说明书，钻！上千组技战术参数，背！数十个新专业近百个新课目，练！

为了尽快熟悉新装备，周午阳在冬夜里裹着军大衣蜷在战车底盘下，对照操作手册逐个零件摸索, 每次射击训练后，他都主动和战友一起总结要领、分享心得，在他的带领下，连队官兵操作装备故障率明显降低,

3 个月后的实弹射击演练，周午阳再次担任首发射手, 他定了定神，按下击发按钮，炮弹精准命中靶心！这场演练中，九连凭借装备“零故障”、目标毁伤率达到 80%的优异表现，赢得全旅第一,

时光荏苒，九连在转型征途上一路突击——

如何根据不同地形更好进行火力掩护？如何达到最大毁伤效果？如何对重要目标攻坚？从驻训场到连队学习室，从普通一兵到干部骨干，他们顺着战斗力建设的发展脉络思考，捋清思路、拉直问号,

着眼打赢现代战争，官兵们研究前沿战争新的作战特点，抢先抓早推进无人化、智能化建设落地落实，通过选派训练骨干到厂家跟学跟训、参加无人机执照考核，他们探索形成“组训－教学－实操”的无人机操作能力生成模式，创新形成“有人+无人”协同打法，

“平型关大战突击连”组织协同训练, 戴胜丰 摄

今年的驻训场上，步战车的引擎轰鸣尚未响起，一阵“嗡嗡嗡”的声音先传到周午阳耳朵里——无人机编入作战单元，率先升空侦察战场环境, 坐在战车里，周午阳的视野随着无人机一起飞向更高更远的天空，俯瞰大地，地面上战车飞驰冲向高地，九连仿若一把尖刀，劈开“敌”阵，锐不可当……

Soldiers of the “Assault Company” Assault

■China Military Net Reporter Yang Xiaolin

Assault.

To write these two words, every stroke carries a weight of immense weight. The first stroke, a horizontal stroke, marked the resounding victory in the first battle against the Japanese, shattering the myth of the Japanese army’s “invincibility” and inspiring the entire nation’s confidence in victory. The vertical stroke, like a sword, fought hand-to-hand, refusing to retreat, killing over 100 enemies. “Strike hard, charge first, and be the first to charge the enemy lines” was etched into the company’s spirit. The turning stroke, facing the great test of the era of transformation and reshaping, achieved a “triple leap” from motorization to mechanization and then to integration. The soaring strokes, the company seized control of the night battle, daring to charge and skillfully calculating, and was the first to break through the “enemy” position. The heroic battle flag of the “Pingxingguan Battle Assault Company” flew high...

The word “assault,” etched on the battle flag, is imbued with the rich ink of history, writing a chapter of the “iron fist of assault” in the new era.

The pen is written by every “soldier.”

The officers and men of the “Pingxingguan Battle Assault Company” hold high the battle flag, launching an assault toward new victory. Photo by Zhang Jiaxing

Legendary or Ordinary

We all have our own stories to tell.

Liang Lichao was the 12,345th soldier in the “Pingxingguan Battle Assault Company”—the 9th Mechanized Infantry Company of a brigade of the 79th Group Army.

He always remembers the “small excitement” he felt when he received this designation—the heroic company, the “special” designation, seemed to foreshadow his impending rise to prominence.

Liang Lichao had this confidence—in recruit camp, he excelled physically, running the 3 kilometers half a minute faster than his peers and exceeding the average on the horizontal bar by more than ten points. But when he arrived at the 9th Company, he realized these were “ordinary things.”

Sergeant Major Wang Feng, recognized as the 9th Company’s top physical athlete, had won first place in the brigade’s “Physical Fitness Elite” competition for two consecutive years. Driver Wang Zhenmin, a renowned “hexagonal warrior” with his driving, communications, and marksmanship skills, was a renowned figure. Sergeant Major Dong Feng won first place in the “Running Shooting” competition during the China-Mongolia “Grassland Partners-2024” joint army training...was he truly worthy of the 9th Company? At that time, Liang Lichao felt lost and confused.

In the company’s honor room, political instructor Li Xinchao recounted the battle of 1937 to the new recruits.

After the July 7 Incident, the invading Japanese army launched a frenzied offensive against North China. Over 4,000 troops from the 21st Brigade of the 5th Division, boarding over 100 vehicles, advanced along Lingqiu to Pingxingguanxi.

The company’s predecessor, the 5th Company, 2nd Battalion, 685th Regiment, 115th Division of the Eighth Route Army, was tasked with ambushing the Japanese vanguard on the high ground north of Guangou.

During the battle, the 5th Company launched a fierce attack, charging the enemy lines head-on. They were the first to seize commanding heights and, from their commanding position, repelled wave after wave of Japanese attacks. When their ammunition ran out, they fixed their bayonets and wielded their machetes in hand-to-hand combat with the Japanese. Company Commander Zeng Xiansheng, nicknamed “Mengzi,” rushed to the front. Even after his ammunition ran out, he stabbed and killed more than ten Japanese soldiers in quick succession, then detonated his last grenade and perished alongside them. Some soldiers, their bayonets knocked off, simply jumped

off the cliff, hugging their enemies. When the company commander died, the platoon leader took over. When the platoon leader died, the squad leader took over. When the squad leader died, the soldiers took over command... By the end of the battle, only a little over 30 men remained out of the company's 160. While the stories of a few legendary heroes have survived, the names of many have been lost to history.

"But can you say they aren't worthy of respect?" Hearing Li Xinchao's question, Liang Lichao shook his head with tears in his eyes. The desperate charge of every soldier was the key to this victory. From that moment on, he believed that every member of the Ninth Company mattered. Everyone must unleash the fire within them, forging this heroic company into even stronger steel. The "Pingxingguan Battle Assault Company" organized a study session on the spirit of the War of Resistance. Photo by Dai Shengfeng.

Everyone knows this history, everyone was involved in the "assault," so every soldier in the Ninth Company has their own story to tell.

Physical fitness expert Wang Feng nags the new recruits: "Poor physical fitness?" "Practice! Practice like hell!" Despite Wang Feng's current muscular build, he once ranked last in the physical fitness test as a new recruit. So what? Practice! Regardless of the cold or heat, he insisted on waking up early every day for a 10-kilometer physical training session. During the day, he diligently studied his specialty at the training ground, and at night, he practiced to strengthen his limbs. That year, in the year-end assessment, he took first place in the company overall. The feeling of "winning" is still unforgettable.

Machine gunner Ai Zezi was a little frustrated: Every year, the squad and platoon with the best performance in the mass training competition get to hang a "family portrait" of their comrades in the Hall of Honor. In this year's competition, Ai Zezi made a mistake in his strong subject, causing the first platoon to miss this opportunity. But he remained undaunted. "Next year, I will definitely win this honor back!"

Driver Wang Nan has been in the army for nine years. He hasn't won a gold medal in a competition, nor achieved any earth-shattering feats, but he's just as proud: the tank he pilots is always in top condition, never having a single breakdown.

This year, under the leadership of Li Xinchao, Liang Lichao utilized his modeling skills to participate in the renovation of the company's Hall of Honor. Entering the brand-new Hall of Honor, Liang Lichao stood before the statue of the heroes of the Pingxingguan Victory, whispering to the forefathers the stories of those who came after them.

Distant yet near

"Pingxingguan" is our "spiritual coordinate."

Where is Pingxingguan?

Corporal Ma Wenkai is all too familiar with it. As a native of Pingxingguan, these three words frequently appear in his daily life—the name of the main road outside his home, the sign for the largest supermarket nearby, and a memorial hall that attracts tourists from all over the country...

What is Pingxingguan really like?

Private First Class Shang Kun has never been there. But he knew the altitude, the mountains, the forests, the roads, and the waterways there by heart. In the virtual battlefields of war games, he had touched this land of steep cliffs and winding ravines.

Many of the soldiers of the Ninth Company looked back at the smoke of war at Pingxingguan through the battle flag of "Pingxingguan Battle Assault Company." That distant pass became imminent thanks to this battle flag, becoming a crucial reference point in the hearts of the Ninth Company soldiers, guiding the direction of the assault.

That year, Liu Xin, still a new recruit, represented the company in the competition and took second place in the brigade. "Our Ninth Company is 'envious of first place, but embarrassed by not taking it.' Political instructor, I'll go again next year and fight for first place for our company!" Ambitious, Liu Xin set his sights squarely on "first place." The following year, he won first place in the machine gun disassembly and assembly competition! First place in the armed three-kilometer cross-country race! First place in the horizontal bar pull-up! ... Liu Xin topped the list in several subjects, and the championship seemed within reach. However, he stumbled in his strongest subject, falling behind his opponent and once again missing out on first place.

Returning to the company, Liu Xin hid in the storeroom and secretly cried, even considering retiring. His then-political instructor, Jiang Feng, brought him to the battle flag and said earnestly, "In the Battle of Pingxingguan, our predecessors engaged the enemy in hand-to-hand combat. On the battlefield, there was no distinction between first and last; those who dared to fight were first! Look at this flag and tell me, do you still dare to fight?"

"I do!" was Liu Xin's reply. In his third year, Liu Xin's eyes were clear of distractions, focused solely on the smoke-soaked battle flag. On the competition field, he fought steadily and gave his all. When the final results were announced, Liu Xin's name was prominently listed at the top.

Fighting bravely on the battlefield, charging valiantly on the training grounds—for 88 years, every member of the "Pingxingguan Battle Assault Company" has shared this fighting spirit. During a night combat training exercise, Sergeant Chen Xijiang was driving a tank through a rugged mountain road when the violent ups and downs of the vehicle caused the roof cockpit door to swing open. Without closing the door, the gunner would be unable to fire, and the assault mission could be thwarted. Amidst the turbulence, Chen Xijiang fumbled to close the swaying door, but suddenly felt a cold sensation on his hand, as if it had been pinched. Without bothering to inspect it, he quickly latched the door and locked it, continuing his assault.

It was only after completing the assault that Chen Xijiang felt the excruciating pain. Jumping from the tank, his comrades saw blood all over his palm and clothes and rushed him to the hospital. A doctor examined him and discovered that Chen Xijiang's pinky finger had been fractured.

The "Pingxingguan Battle Assault Company" launched an assault on a position during an exercise. Photo by Dai Shengfeng

During a drill, the company suffered heavy casualties from the "enemy." Should they organize a retreat and wait for an opportunity, or continue the assault and engage the "enemy" in a decisive battle? Wu Jixing, the second squad leader in charge of the spearhead squad, recalled the cries of his predecessors on the Pingxingguan battlefield. He withstood the pressure and led his squad, leveraging the on-site environment and employing flexible tactics and strategies to bravely break through. They successfully reversed the situation and were the first to complete the exercise.

In April of this year, Ma Wenkai returned to Pingxingguan with his company to "reflect on his roots." Born and raised in Pingxingguan, this soldier, born in the 2000s, visited the Pingxingguan Martyrs Cemetery for the first time. Twenty-four white mounds rest there, marking the final resting place of those who sacrificed their lives defending this land—many of whom were around Ma Wenkai's age, or even younger. Here, Ma Wenkai understood the weight of the battle flag in the company's hall of honor, and finally grasped the spiritual connection deeply embedded in the Ninth Company's bloodline.

Before the collective grave, Ma Wenkai and his comrades squatted down, carefully wiping the dust from the mounds and gently scraping the moss from the corners. His palm touched the cold tombstone, but his heart burned. The mountain breeze brushed past his ears, as if the ancestors were asking, "Do today's 'Assault Company' still dare to fight?"

"I do!"

More steel, more courage

Forging a steel sword that never loses its edge

Zhou Wuyang will never forget the live-fire drill in 2018. Sitting in the gunner's seat, before pressing the trigger, a rusty broadsword loomed before his eyes.

The previous year, the 9th Company had undergone a relocation, transitioning from traditional infantry to armored infantry. For the officers and men, the word "armor" was a hurdle, a hurdle that stood in the way of this transformation.

From "motorized" to "tracked," in less than six months, just as the officers and men had mastered the equipment's characteristics, the company was once again equipped with a new type of armored infantry fighting vehicle. Compared to the older equipment, the new equipment was highly specialized and information-based, and required higher technical requirements. Shortly after the equipment began training, it underwent its first preliminary assessment by superiors. The results

showed that the pass rate for the three key specialties, vehicle commander, gunner, and driver, was less than 60%.

That winter, during a live-fire exercise with a new infantry fighting vehicle, Sergeant Zhou Wuyang, known as a "sharpshooter," missed the target three times. "Failed!" The three large words on the display screen stung Zhou Wuyang, and the officers and men of the Ninth Company blushed.

During the Red-Blue confrontation with a sister unit, the officers and men also made frequent mistakes: Commanders still deployed their troops according to infantry thinking, treating the new equipment as "transport vehicles"; drivers focused solely on driving the equipment, neglecting coordination with the vehicle commander and gunner... They were caught off guard by the Blue Force, which was skilled in combining infantry and armored firepower, and were forced to retreat step by step.

The "Pingxingguan Battle Assault Company" advanced toward the assembly area during the exercise. Photo by Zhang Shuai.

The equipment was more advanced, but how to wield this "sharp sword"? Everyone was puzzled.

Then-Company Commander Li Yuanchao ushered the soldiers into the Hall of Honor, where a broadsword lay quietly in a display case.

The new recruits had seen it upon joining the company—during the Battle of Pingxingguan, their predecessors had wielded such broadswords, fighting against the best-armed enemy. But they had never gazed at it so intently—through the mottled rust, one could almost see the blood and fire of those days. Even the rusty edge couldn't hold back the sharp aura embodied in the broadsword—the assault spirit embodied in the broadsword.

"Back then, we were inferior in equipment, relying on our aura to prevail. Now, with our 'sharp sword' in hand, we must strive for greater steel and even greater aura!" Faced with the changing times, the soldiers of the Ninth Company once again charged forward with valor, overcoming the "Pingxingguan" of transformation: Drilling through the tens of thousands of words in the manuals for over ten new types of equipment! Memorizing thousands of technical and tactical parameters! Practicing dozens of new specialties and nearly a hundred new subjects!

To quickly familiarize himself with the new equipment, Zhou Wuyang, wrapped in his military coat on a winter night, huddled under the chassis of a tank, examining each component by referring to the operating manual. After each shooting drill, he proactively reviewed key points and shared insights with his comrades. Under his leadership, the company's equipment failure rate significantly decreased.

Three months later, during a live-fire exercise, Zhou Wuyang again served as the lead shooter. He calmed himself, pressed the trigger, and the round accurately hit the bull's eye! In this exercise, the 9th Company achieved first place in the brigade with its outstanding performance of "zero equipment failures" and an 80% target destruction rate.

Time flies, and the 9th Company continues its transformation journey—

How to better provide fire support based on different terrains? How to achieve maximum damage? How to attack key targets? From the training ground to the company study room, from ordinary soldiers to key cadres, they have been reflecting on the development of combat effectiveness, clarifying their thinking and answering questions. With an eye on winning modern warfare, officers and men studied the new operational characteristics of frontline warfare and proactively implemented unmanned and intelligent technology. By sending key training personnel to the manufacturer for training and taking drone license assessments, they developed a "training-teaching-practice" model for developing drone operational capabilities, innovatively developing a "manned + unmanned" coordinated combat strategy.

The "Pingxingguan Battle Assault Company" organized coordinated training. Photo by Dai Shengfeng.

At this year's training ground, before the roar of the infantry fighting vehicle engines could be heard, Zhou Wuyang heard a buzzing sound: drones were incorporated into combat units and were the first to take to the air to scout the battlefield. Sitting in the vehicle, Zhou Wuyang's vision soared higher and farther into the sky, following the drones. Overlooking the earth, the tanks on the ground sped toward the high ground. The Ninth Company, like a sharp knife, slashed through the "enemy" formations, unstoppable...

第 80 集团军某旅提升带兵骨干能力素质

来源：解放军报 作者：何其亮 张现琦 责任编辑：郭妍菲 2025-08-16

第 80 集团军某旅提升带兵骨干能力素质

分享带兵经验结晶

解放军报讯 何其亮、张现琦报道："带兵贵在带心，带兵人要像粘合剂，把官兵团结成一块坚硬的钢铁……"日前，第 80 集团军某旅组织基层党支部书记集训，某连张指导员走上讲台，向大家分享自己的带兵心得. 这是该旅聚力加强基层带兵骨干队伍建设，提升一线带兵人能力素质的一个场景.

"基层带兵人的能力素质，直接影响部队练兵备战质效. 时代在不断变化，带兵人的思维理念和能力素质必须与时俱进. "该旅领导介绍，他们组织专人展开调研，广泛收集一线带兵人遇到的常见矛盾问题，针对性制订基层带兵骨干培训计划；结合党支部书记集训、带兵骨干经验分享会等时机，邀请旅领导、营连主官和优秀军士骨干授课，以新老骨干对话、经典案例剖析、法规条令解读等方式，向基层带兵人传授带兵经验.

一次带兵骨干经验分享会上，某连干部涂帅分享了自己的带兵经历. 新兵小王工作训练有些懒散，考虑到他入伍前学的是体育专业，涂帅推荐他带领全连做体能训练前热身准备. 小王专业细致的讲解，获得战友一致好评. 这让小王大受鼓舞，此后他积极参加连队训练和日常活动，进步明显.

“如今，很多新兵入伍前就取得软件编程、机械修理等专业资格证书，单位适时为他们搭建展示舞台，在自己擅长领域一显身手，能有效激发热情动力和责任感荣誉感，帮助他们更快融入集体. ”涂帅分享的经验，让不少带兵骨干受到启发.

据了解，该旅定期召集基层带兵骨干，围绕带兵实践中的难点堵点问题集智攻关，引导大家人人进入角色、个个建言献策，梳理总结出一批管用实用招法. 下一步，他们将梳理汇编基层常见带兵问题及其应对措施，供各级带兵人学习借鉴.

An 80th Group Army Brigade Is Improving the Capabilities and Quality of Its Core Leadership Personnel

Source: PLA Daily Author: He Qiliang, Zhang Xianqi Editor: Guo Yanfei 2025-08-16

A brigade of the 80th Group Army is improving the capabilities and quality of its core leadership personnel.

Sharing leadership experience

PLA Daily reports by He Qiliang and Zhang Xianqi: “Leading troops requires heart. Leaders should be like glue, uniting officers and men into a solid piece of steel...” Recently, a brigade of the 80th Group Army held a training session for grassroots Party branch secretaries. Political Instructor Zhang of a certain company took the podium to share his leadership experience. This is a scene of the brigade’s efforts to strengthen the grassroots leadership team and improve the capabilities and quality of frontline leaders. “The competence and quality of grassroots leaders directly impact the quality and effectiveness of the troops’ training and combat readiness. Times are constantly changing, and leaders’ mindsets, concepts, and competences must keep pace.” Brigade leaders explained that they organized a dedicated team to conduct research, collecting extensive information on common conflicts and problems encountered by frontline leaders, and developing a targeted training plan for grassroots leaders. They also invited brigade leaders, battalion and company commanders, and outstanding sergeants to give lectures during Party branch secretary training sessions and experience-sharing sessions for leadership leaders. Through dialogues with veteran and new leaders, analysis of classic cases, and interpretation of laws and regulations, they shared their leadership experience with grassroots leaders.

At one such experience-sharing session, company cadre Tu Shuai shared his own leadership experience. New recruit Xiao Wang was somewhat lazy during work and training. Considering that he had majored in physical education before enlisting, Tu Shuai recommended that he lead the

entire company in pre-training warm-ups. Xiao Wang's professional and detailed explanations were well-received by his fellow soldiers. This greatly encouraged Xiao Wang, and he has since actively participated in company training and daily activities, making significant progress. "Today, many new recruits have already obtained professional qualifications in areas like software programming and mechanical repair before joining the army. Units provide them with a platform to showcase their expertise in their areas of expertise, effectively stimulating their enthusiasm, motivation, sense of responsibility and honor, and helping them integrate more quickly into the team." Tu Shuai's experience has inspired many key leaders.

It is understood that the brigade regularly convenes grassroots leadership cadres to pool their expertise and address practical challenges. They encourage everyone to immerse themselves in their roles and contribute ideas, ultimately developing a series of effective and practical strategies. Next, they will compile a compilation of common grassroots leadership issues and their responses for reference by leaders at all levels.

第八十二集团军某旅重塑政治干部形象威信

来源：解放军报 作者：付善柱 钱晓虎 责任编辑：郭妍菲 2025-08-16

第八十二集团军某旅重塑政治干部形象威信——

在直面问题解决矛盾中淬炼党性

■付善柱 解放军报记者 钱晓虎

"保障连这次成功'逆袭'！"近日，第 82 集团军某旅传出喜讯：单位全面建设水平一度靠后的某保障连，在前不久举行的集团军专业比武中，不仅夺得总评第一的优异成绩，更一举荣获 8 个单兵专业、3 个班组作业和分队综合项目的桂冠.

这份来之不易的成绩单，是该旅充分发挥政治干部身先士卒、模范带头作用的实际成果. 探究该连实现"漂亮转身"的秘诀，记者感到，关键在于连队指导员在直面问题、解决矛盾中淬炼党性，让不良风气无处藏身.

"书记是党组织建设的'领头雁'，要善于把'多种声音'调成'一首乐曲'. "从指导员转岗任连长的该连韩连长告诉记者，当初刚任指导员时，面对连队训练成绩垫底的严峻现实，他没有选择回避，而是以此为突破口，召开党支部会议，引导大家翻箱倒柜找问题，将打仗意识弱化、担当作为不够、组训模式僵化等制约战斗力生成的痛点堵点悉数摆上桌面. 党支部一班人在"红脸出汗"中坦诚交流、凝聚共识，为连队发展找准努力方向，推动连队全面建设驶入"快车道".

“一个单位人心不齐、建设不好，往往是因为内部风气不正. ”该旅领导介绍，保障连的“漂亮转身”证明，恪守党性原则，必须将弘扬斗争精神作为破解难题的利器，将坚持讲真话、报实情作为夯实基层建设根基的硬要求.

该旅某连王指导员对此深有体会. 在带领连队争创“四铁”先进单位过程中，他讲团结更讲原则：面对训练标准打折扣的现象，他及时叫停、严抓整改；发现干部骨干管理中无原则迁就的苗头，他立即纠偏……凭借敢抓敢管的硬作风，王指导员带领全连捧回沉甸甸的“四铁”先进单位奖牌. “立起政治干部形象威信，首先要坚决摒弃‘和稀泥’的庸俗哲学，在直面问题中坚持原则、较真碰硬. ”他感慨道.

“讲真话、报实情是党性要求，更是打赢需要！”该旅组织政治干部围绕“践行政治工作好传统 立起政治干部好样子”主题展开讨论辨析时，机关干部苗泽东对“讲真话、报实情”理解更深. 此前，他从连队调整到机关工作. 到新岗位后，他结合基层工作经历，客观反映机关服务基层过程中存在的一系列问题，助推机关服务基层工作机制持续完善.

连队从全面建设基础薄弱，到蜕变为比武“黑马”；领导机关从训练场上带头攻坚克难，到想方设法为基层解难纾困……关键在政治干部带头作用发挥明显，是政治工作威力和作用的充分体现. 讨论辨析中，该旅党委一班人深切感到，重塑政治干部形象威信，很重要的一条，是要让党性原则在直面问题、解决矛盾的实践中可知可感. 当民主集中制成为凝聚共识、破解难题的“金钥匙”，当斗争精神成为向积弊开刀的“手术刀”，当讲真话、报实情成为服务战斗力建设的“硬标尺”，政治干部形象威信便会在破解一个个具体问题中立起来.

An 82nd Group Army Brigade Is Rebuilding the Image and Prestige of Its Political Cadres.

Source: PLA Daily Author: Fu Shanzhu, Qian Xiaohu Editor: Guo Yanfei 2025-08-16

A brigade of the 82nd Group Army is rebuilding the image and prestige of its political cadres –

Tempering Party spirit by confronting problems and resolving contradictions

■ Fu Shanzhu, PLA Daily reporter, Qian Xiaohu

“The support company has successfully ‘turned the tide’!” Recently, a brigade of the 82nd Group Army announced good news: A support company, once ranked low in overall unit development, not only achieved first place in the recent Group Army professional competition but also won first place in eight individual specialties, three squad and team operations, and a comprehensive unit event.

This hard-earned achievement is a tangible result of the brigade’s political cadres fully leveraging their exemplary leadership. Exploring the secret to this company’s remarkable turnaround, reporters believe the key lies in the company instructors tempering their Party spirit by confronting problems and resolving contradictions, leaving no room for unhealthy practices. “The secretary is

the ‘leader’ of Party organization development and must be adept at blending ‘multitudes of voices’ into ‘a single melody.’“ Company Commander Han, who transitioned from instructor to company commander, told reporters that when he first assumed the position, faced with the harsh reality of his company’s poor training performance, he didn’t shy away from it. Instead, he used this as a catalyst to convene a Party branch meeting, encouraging everyone to thoroughly investigate and identify issues. He laid out the pain points and bottlenecks hindering combat effectiveness, such as a weakened combat awareness, insufficient sense of responsibility, and a rigid training model. The Party branch members engaged in candid discussions and forged consensus amidst intense discussion, identifying the right direction for the company’s development and accelerating its comprehensive development.

“A unit’s lack of unity and poor development often stems from a corrupt internal atmosphere.” Brigade leaders explained that the support company’s remarkable transformation demonstrates that upholding Party principles requires fostering a spirit of struggle as a powerful tool for resolving challenges and insisting on speaking the truth and reporting the facts as a crucial requirement for strengthening the foundation of grassroots development.

Political Instructor Wang of a company within the brigade has a deep understanding of this. In leading the company in its pursuit of becoming a “Four Irons” Advanced Unit, he prioritized unity over principles. When faced with compromised training standards, he promptly halted them and rigorously enforced rectification. When he discovered signs of unprincipled compromise in the management of key cadres, he immediately corrected them. With his unwavering approach and unwavering commitment to management, Instructor Wang led the entire company to win the prestigious “Four Irons” Advanced Unit medal. “To establish the prestige and credibility of political cadres, we must first resolutely reject the vulgar philosophy of ‘smoothing things over’ and, in confronting problems head-on, adhere to principles and confront them head-on,” he said with emotion.

“Telling the truth and reporting the facts is a requirement of Party spirit and even more essential for winning battles!” During a discussion among the brigade’s political cadres on the theme of “Practicing Good Traditions in Political Work and Setting a Good Example for Political Cadres,” Miao Zedong, a staff cadre, gained a deeper understanding of the concept of “telling the truth and reporting the facts.” He had previously transferred from the company to the staff. In his new position, drawing on his grassroots work experience, he objectively reflected on a series of issues facing the staff in their grassroots services, contributing to the continuous improvement of the staff’s mechanisms for serving the grassroots. The company’s transformation from a weak foundation for comprehensive development to a “dark horse” in competitions; leadership has gone from spearheading overcoming challenges on the training ground to finding ways to address difficulties at the grassroots level... The key lies in the clear leadership role played by political cadres, fully demonstrating the power and impact of political work. During discussions and analysis, the brigade’s Party Committee members deeply felt that a crucial step in reshaping the image and prestige of political cadres is to make the principles of Party spirit tangible and tangible

in confronting problems and resolving contradictions. When democratic centralism becomes the "golden key" to building consensus and resolving difficulties, when the spirit of struggle becomes the "scalpel" to address long-standing problems, and when telling the truth and reporting the facts become the "hard yardstick" for building combat effectiveness, the image and prestige of political cadres will be established through solving specific problems.

9 年"结对认亲"，新疆军区某部与群众共谱 "幸福协奏曲"

来源：解放军报 作者：彭星宇 庄继红 严文苹 责任编辑：孙悦 2025-08-16

新疆军区某部与驻地少数民族群众"结对子，认亲戚"，经常性开展志愿服务活动——

天山脚下传来"幸福的声音"

■彭星宇 庄继红 严文苹

清晨，新疆乌鲁木齐市天山区中湾街北社区军民同心园广场上乐声阵阵.

"前阵子古尔邦节的时候，更热闹呢！"社区维吾尔族居民买买提·阿布拉江说，那几天，新疆军区某部官兵带着米、面、油等生活物资来到社区，看望生活有困难的群众. 走访结束，官兵还和社区群众一起载歌载舞、共庆节日.

"他们是我们的'亲戚'！"提到新疆军区某部官兵，中湾街北社区居民几乎异口同声.

自 2016 年起，新疆军区某部官兵来到中湾街北社区开展"结对子，认亲戚"活动，这个社区的许多居民就多了一群"兵亲戚". 他们平日里来义务劳动、巡诊，逢年过节走访慰问，还为社区修建了一座小广场.

从军民同心园的乐曲，到社区居民家的欢笑，在这个常有"兵亲戚"往来的地方，处处可以听见"幸福的声音".

维吾尔族老人家的敲门声：

"这门'亲戚'永远断不了"

周末，新疆军区某部军医陈疆龙带着医药箱，来到结对的维吾尔族老人阿依木·买买提家. 才刚敲两下，阿依木老人就打开了门.

"我估摸着你该来了，一直等着呢！"阿依木拉着陈疆龙的手，把他迎进屋里.

自从陈疆龙和阿依木老人结对，他就常来"走亲戚". "阿依木阿姨关节不大好，特别是换季的时候，总是不舒服，所以我经常来看她. "陈疆龙说.

笔者问起阿依木老人，和这位“兵亲戚”认识多久了？老人先是说“1 年”，随后又说“9 年”.

“1 年”是阿依木老人与陈疆龙结对的时间，“9 年”则是该部开展“结对子，认亲戚”活动的时长.

阿依木老人是第一批与部队官兵结对的. 那时，该部安排副主任孙立新与她结成“亲戚”. 阿依木老人患有关节炎，发作时连走路都成问题，孙立新便定期上门看望，为她送药、按摩. 在孙立新的悉心照料下，阿依木老人的身体渐渐好转.

去年，孙立新退役离队. 离别前，他特意带军医陈疆龙来到阿依木老人家：“阿姨，我退役以后，小陈就是您的‘亲戚’了.”阿依木老人握着孙立新的手说：“我知道，我们在部队上的这门‘亲戚’永远断不了.”

就这样，陈疆龙接过了这根“接力棒”. 知道阿依木老人记性不太好，他把药品仔细分装，放在老人触手可及的床头；天凉下来，他马上提醒老人注意保温，换上更厚的棉被.

在这支部队里，像这样的“亲戚”越来越多. 起初，官兵主要同少数民族老人、家庭困难群众结对，近几年来，结对的范围逐渐扩大. 官兵定期来社区看诊、慰问，群众也常邀请官兵到家中做客、过节，“亲戚”往来更加密切，军民感情愈加深厚.

“什么事都想着我们，休假回家带来好吃的，也想着给我尝尝.”阿依木老人笑着说，“听到他们敲门的声音，就像听到幸福来敲门.”

听障儿童的笑声：

“你们给了孩子新的人生”

中湾街北社区群众买买提·阿布拉江永远记得，那是一个阳光明媚的下午. 在医院的走廊里，当儿子用含混不清的声音喊出“阿塔”（维吾尔语，意为“爸爸”）时，这个高大的维吾尔族汉子瞬间红了眼眶.

“感谢解放军，给了我儿子新的人生！”提起儿子的治疗经历，买买提激动不已.

2022 年，买买提 3 岁的儿子被诊断为先天性听力障碍，高昂的治疗费用让他一筹莫展. 没过几天，与他结对的某部助理工程师单宝玉上门走访，买买提向他吐露了孩子的病情.

“你放心，我们来想办法！”单宝玉立即向单位汇报情况，协调驻地儿童医院为孩子治疗，并多方筹措资金，购买了助听器.

经过治疗，买买提的儿子语言能力基本恢复，能够与人正常交流. “今年准备上小学了！”买买提高兴地说，“孩子能够正常上学，多亏了‘兵亲戚’！”

上次去看望买买提一家人，单宝玉发现，买买提的儿子虽然说话有些费力，可“解放军叔叔”却说得清晰有力.

“这是我们专门教他的. ”买买提告诉单宝玉，“这是帮了我们的人，这个称呼一定要学会！”

作为该部群众工作负责人，单宝玉介绍，像买买提这样因家庭成员患病或残疾导致生活困难的群众，是他们的重点帮扶对象.

社区维吾尔族居民穆尼热，独自一人带着 3 个孩子. 大女儿和小女儿分别在读大学与中学，儿子因智力障碍，在特殊教育中心读书. 该部干部与穆尼热结对后，对 3 个孩子都进行了资助，还定期为小女儿辅导功课.

“走进群众的家门，孩子们的笑声就是对我们工作的最大肯定. ”单宝玉说.

军民同心园的歌声：

“这是团结的最好见证”

“以前这里是一片荒地，现在成了社区最热闹的地方. ”站在军民同心园广场前，中湾街北社区居委会主任郭泳成告诉笔者.

这个广场的建设，源于某部开展的一次爱民志愿服务活动.

2021 年 1 月，一场大雪突如其来，造成乌鲁木齐市多条道路堵塞. 该部派出官兵组成清雪小队，配备清雪车，来到中湾街北社区帮助清理积雪.

“我们这片有很多老小区，街道比较窄，部队的清雪车进不来，子弟兵们就返回营区拿工具，人工帮我们清理. 那天气温很低，大家的脸冻得红彤彤的，我们给他们送热茶，他们也顾不上喝. ”回忆起那天的场景，郭泳成感动不已.

清雪时，一块空地引起了官兵的注意：“社区里有这么大一片空地，怎么没有利用起来呢？”

“我们不仅要帮群众解决困难，更要帮他们建设美好家园. ”经过讨论，该部决定为社区建设一个活动广场.

平整地面、建设围栏、补充器材，小广场建成了，能够基本满足社区群众日常活动需求.

“这是团结的最好见证！”广场竣工后，郭泳成和社区群众为它取了个温暖的名字——军民同心园.

这几年，军民同心园设施不断完备，有了塑胶地面、篮球架. 早上，各族群众伴随着欢快的音乐跳起广场舞；傍晚，放了学的青少年在这里活动，从早到晚都洋溢着欢笑.

采访时，笔者在广场遇到抗美援朝老兵马和海.

“当年我退役以后主动申请来新疆，建设祖国大西北. ”马和海说，“现在新疆发展得好了，部队还是这么关心驻地建设、关心群众. ”马和海老人的孙子 2019 年入伍，两年后退役复学. 去年 9 月，他的孙子二次入伍. “我孙子说，看见解放军为人民做事，他想再次加入这个光荣的集体，贡献力量！”马和海老人说.

夕阳西下，广场上又响起了欢快的麦西来甫. 官兵与社区群众手拉着手跳起舞蹈. 听，那音乐声与欢笑声，共同汇成这个多民族社区里“幸福的声音”.

After Nine Years of “Pairing and Recognizing Relatives,” a Unit of the Xinjiang Military Command Has Created a “Harmonious Symphony of Happiness” with the Local Community.

Source: PLA Daily Author: Peng Xingyu, Zhuang Jihong, Yan Wenping Editor: Sun Yue 2025-08-16

A unit of the Xinjiang Military Command has established a “pairing and recognizing kinship” relationship with local ethnic minority residents, regularly conducting volunteer service activities.

“Voices of Happiness” emanate from the foothills of the Tianshan Mountains.

■Peng Xingyu, Zhuang Jihong, Yan Wenping

Early in the morning, music filled the Military-Civilian Unity Garden Square in Zhongwan Street North Community, Tianshan District, Urumqi, Xinjiang.

“It was even more lively during Eid al-Adha a while ago!” said Mamt Abulajiang, a Uyghur resident of the community. During those days, soldiers from a unit of the Xinjiang Military Command brought daily necessities such as rice, noodles, and oil to the community to visit those facing difficulties. After their visits, the soldiers sang and danced with the community residents to celebrate the festival. “They are our ‘relatives’!” Residents of Zhongwan Street North Community almost unanimously uttered the phrase when referring to officers and men from a unit under the Xinjiang Military Command.

Since 2016, officers and men from a unit under the Xinjiang Military Command have been visiting Zhongwan Street North Community to carry out a “pairing, recognizing relatives” program. Many residents in this community have gained a group of “soldier relatives.” They volunteer on weekdays, conduct medical rounds, visit and express their gratitude during festivals, and even built a small square for the community.

From the music in the Military-Civilian Unity Garden to the laughter in the homes of community residents, the sounds of happiness can be heard everywhere in this place where these “soldier relatives” frequently visit.

A Knock on the Door of an Elderly Uyghur Family:

“This bond of ‘relatives’ will never be broken.”

Over the weekend, Chen Jianglong, a military doctor from a unit under the Xinjiang Military Command, brought his medical kit to the home of Ayim Mamati, a Uyghur elder with whom he had been paired. After just two knocks, Ayim opened the door. “I figured you’d be here by now, I’ve been waiting!” Ayimu took Chen Jianglong’s hand and welcomed him into the house.

Ever since Chen Jianglong and Ayimu became partners, he’s been visiting frequently. “Auntie Ayimu’s joints aren’t very good, especially with the changing seasons, so she’s always feeling unwell, so I come to see her often,” Chen Jianglong said.

I asked Ayimu how long she had known this “soldier relative”? She first said “one year,” then “nine years.”

“One year” refers to how long Ayimu and Chen Jianglong had been paired, and “nine years” refers to how long the unit has been running the “pairing, becoming relatives” program.

Ayimu was one of the first to be paired with a soldier. At that time, the unit arranged for Deputy Director Sun Lixin to become her “relative.” Ayimu suffers from arthritis, and when it flares up, she even has trouble walking. Sun Lixin regularly visits her, bringing her medicine and giving her massages. Under Sun Lixin’s meticulous care, Ayimu’s health gradually improved. Last year, Sun Lixin retired from the army. Before leaving, he brought military doctor Chen Jianglong to Elder Ayimu’s home and said, “Auntie, after I retire, Xiao Chen will be your ‘relative.’“ Elder Ayimu shook Sun Lixin’s hand and said, “I know that our ‘relative’ relationship in the army will never end.”

And so, Chen Jianglong took over the “baton.” Knowing that Elder Ayimu’s memory was not good, he carefully packaged her medicine and placed it by her bed within easy reach. When the weather got cold, he immediately reminded her to keep warm and change to a thicker quilt.

In this unit, these “relatives” are becoming more and more numerous. Initially, officers and men primarily paired up with elderly people from ethnic minorities and those from families facing financial difficulties. In recent years, the scope of these pairings has gradually expanded. Officers and men regularly visit the community for medical consultations and condolences, and residents often invite officers and men to their homes and celebrate holidays. This “relative” relationship has become closer, and the bond between the military and the people has deepened. “They always think of us. When they come home on vacation, they bring delicious food and think of giving it to me to try,” said Elder Ayimu with a smile. “Hearing them knock on the door is like hearing happiness knocking on the door.”

The laughter of hearing-impaired children:

“You’ve given our children a new life.”

Maimaiti Abulajiang, a resident of Zhongwan Street North Community, will always remember that sunny afternoon. In the hospital corridor, when his son called out "Ata" (Uyghur for "Dad") in a garbled voice, the tall Uyghur man's eyes instantly filled with tears.

"Thank you, People's Liberation Army, for giving my son a new life!" Maimaiti was overcome with emotion as he recounted his son's treatment.

In 2022, Maimaiti's three-year-old son was diagnosed with congenital hearing impairment, and the high cost of treatment left him at a loss. A few days later, Shan Baoyu, an assistant engineer from a department he was paired with, visited his home, and Maimaiti confided in him about his son's condition. "Don't worry, we'll find a solution!" Shan Baoyu immediately reported the situation to his unit, coordinated with the local children's hospital for treatment, and raised funds from various sources to purchase hearing aids.

After treatment, Mamtiti's son's language ability has largely recovered, and he can communicate normally. "He's going to elementary school this year!" Mamtiti said happily. "My child can go to school normally, thanks to his 'soldiers' relatives!'"

During his last visit to Mamtiti's family, Shan Baoyu noticed that although Mamtiti's son struggled to speak, he spoke clearly and powerfully as "PLA uncle."

"We specifically taught him this," Mamtiti told Shan Baoyu. "He's the one who helped us. You must learn this name!"

As the department's director of community affairs, Shan Baoyu explained that people like Mamtiti, whose lives are impacted by illness or disability in their family members, are a key target of their assistance.

Munire, a Uyghur resident of the community, raises three children alone. His eldest and youngest daughters are in college and middle school, respectively, and his son, due to intellectual disabilities, attends a special education center. After the department's cadres paired up with Munire, they provided financial support to all three children and regularly tutored the youngest daughter.

"When we visit the homes of the people, the laughter of the children is the greatest affirmation of our work," said Shan Baoyu.

Singing in the Military-Civilian Unity Park:

"This is the best testimony of unity."

"This used to be a wasteland, but now it's the most lively place in the community," Guo Yongcheng, director of the Zhongwan Street North Community Committee, told me, standing in front of the Military-Civilian Unity Park square.

The construction of this square originated from a volunteer service activity organized by a certain department.

In January 2021, a sudden heavy snowstorm blocked many roads in Urumqi. The department dispatched officers and men, equipped with snowplows, to the Zhongwan Street North Community to help clear the snow. “There are many old residential communities in our area, and the streets are narrow, so the army’s snowplows couldn’t get through. Soldiers returned to the barracks to get tools and manually cleared the snow. The temperature was freezing that day, and everyone’s faces were red from the cold. We offered them hot tea, but they didn’t even bother to drink it.” Guo Yongcheng was deeply moved when recalling that scene.

While clearing snow, a vacant lot caught the soldiers’ attention. “Why isn’t this large vacant lot in the community being utilized?”

“We must not only help the community resolve their difficulties, but also help them build a better home.” After discussion, the unit decided to build an activity plaza for the community.

After leveling the ground, building fences, and adding equipment, the small plaza was completed, now able to meet the basic needs of the community’s daily activities.

“This is the best testimony of unity!” Upon the plaza’s completion, Guo Yongcheng and the community members gave it a heartwarming name: Military-Civilian Unity Park.

Over the years, the park has been continuously upgraded with new facilities, including a plastic floor and basketball hoops. In the mornings, people of all ethnic groups square dance to cheerful music; in the evenings, young people after school hang out here, filling the air with laughter from morning till night.

During an interview, I met Ma Hehai, a veteran of the Korean War.

“After I retired, I volunteered to come to Xinjiang to help build our motherland’s northwest,” Ma Hehai said. “Now that Xinjiang has developed well, the troops still care about the development of the base and the people.” Ma Hehai’s grandson enlisted in 2019 and returned to school two years later. Last September, his grandson enlisted a second time. “My grandson said that after seeing the PLA working for the people, he wanted to join this glorious collective again and contribute!” said Ma Hehai.

As the sun set, the cheerful Maixilaifu music rang out again in the square. Soldiers and community members joined hands and danced. Listen: the music and laughter merged into the “sound of happiness” in this multi-ethnic community.

军营观察丨寻根：一支年轻连队的英雄血脉

来源：解放军报 作者：刘德文 左文杰 邓宏洲 田 亮 责任编辑：孙悦 2025-08-18

荣誉室里有一面“留白墙”

■刘德文

盛夏，晚风吹拂. 一次特别的晚点名在陆军某旅侦察连荣誉室里展开.

“下面，请值班员将这次建制连考核全旅第二的成绩记录到荣誉室‘留白墙’上. 我们又在连史上写下了厚重的一笔. ”连长说完，现场响起热烈的掌声.

看着此时战友们一双双明亮的眼睛，连队罗指导员的思绪回到两年前——

“人家是有荣誉的老连队，咱们连成立还不到 6 年，哪来什么荣誉……”某日，罗指导员偶然听见几位新兵的讨论. 原来，在下连前，新兵团曾组织他们参观了旅里其他荣誉连队的荣誉室，兄弟单位的光辉历史让他们很是羡慕. 从此，建设连史设施的想法留在罗指导员的脑海中.

不久后，旅里启动“红色家底”守护工程，要求各单位系统梳理历史、挖掘红色资源.

为了补齐历史拼图，该连开始了“寻根行动”. 为寻找连队前身侦察排的资料，罗指导员在旅史馆“泡”了大半个月. 功夫不负有心人，连队前身侦察排的所获荣誉被悉数找出.

抓住这个时机，罗指导员将建设连队荣誉室的想法向黄连长提出，两人一拍即合. 他们将方案上报机关后，很快得到批复.

当晚，连队文书就把经军人委员会讨论后的荣誉室设计方案拿给官兵们看. “我在 2020 年拿过集团军创破纪录比武第三名，能进荣誉室吗？”二级上士杜华建一边浏览方案，一边问文书. 原来，大家都希望自己的名字能够出现在荣誉室中.

看到官兵的积极性，罗指导员提出了一个想法：专门留下一面空白的墙，让大家去书写自己创造的荣誉.

当荣誉室如期建成，这面没有内容的“留白墙”，成了荣誉室里最引人注目的地方.

下士刘海云每次经过这面“留白墙”时，都会在心里给自己鼓劲：“下次一定要在集团军比武取得前三名，把属于自己的荣誉记录在这里. ”这份坚定的决心缘于一次比武失利.

去年，刘海云参加集团军侦察比武遭遇意外——比赛临时更换新型装备，他和战友由于对装备不够熟悉，耗时远高于其他对手.

实战化的比武场上，每个课目的失误都可能会被“放大”. 顶着大比分落后的沉重压力，刘海云没有放弃，最终凭借其他课目的超常发挥，获得综合总评第六名的成绩.

“写满这面‘留白墙’是我们共同的愿望. ”刘海云说，他们时常走进荣誉室，重温每一个奋斗故事. 当看到“留白墙”上的空白，为连队创造历史的热血总会涌上心头.

寻根：一支年轻连队的英雄血脉

■刘德文 左文杰 邓宏洲

走进陆军某旅侦察连荣誉室，这间由宿舍改造的小小空间，让人感慨不已. 这里，既是荣誉的殿堂，也是未来的序章.

在这里，一面“越海侦察英雄”锦旗在射灯下熠熠生辉，无声诉说着 1949 年先辈泅渡海峡送情报的壮举；还有一面特意预留的“留白墙”，静待着属于新时代官兵的荣光.

如果从连队调整组建之日起算，这支连队仅有 8 岁；如果追根溯源，这支队伍已走过 79 载岁月.

在这间 8 岁连队的荣誉室里，79 年的红色血脉在无声诉说中不断延续. 连队官兵正用热血和青春书写着属于他们的崭新故事.

陆军某旅侦察连组织开展班组考核. 刘德文摄

连史不是尘封的档案，而是官兵正在书写的篇章

2017 年，该连由原警卫侦察连侦察排为基础扩建成连. 起初，面对新的建制和新的任务要求，以往的成就和荣誉似乎都被“归零”，部分官兵出现能力转型的焦虑和职业发展的担忧.

“连队的未来在哪里？我们的未来在哪里？”面对部分官兵的疑问，时任李指导员说道，“你们的样子就是连队的样子.”

二级上士杜华建至今记得，听到指导员的话后，大家一门心思抓训练，想尽办法提成绩，抓紧一切时间跟上转型步伐.

“连队调整组建后，大家集中精力练专业，日常训练量一下子就上来了.”杜华建说. 当时，还是上等兵的他在新连队训练一个多月就吃不消了，过关升级非常吃力. 眼看自己与身边战友的差距越拉越大，性格内向的他，变得更加沉默寡言.

如今，看着连队荣誉室中记载的杜华建取得的一项项成绩，一级上士郭金川颇有感慨：“没想到曾经的那个‘文弱书生’收获了这么多的荣誉！”

训练没有捷径可走. 腿受伤了，杜华建就加大力度训练上肢力量，手上磨出的老茧越来越厚；连队没有足够高的攀登场，他就把哑铃片绑在子弹袋上，通过负重训练提升速度.

在不懈努力下，杜华建最终冲到了队伍最前列. 他连续多年在集团军创破纪录比武中摘金夺银，被评为集团军“练兵备战先进个人”. 如今，他训练时被哑铃磨破的子弹袋和比武夺冠后领奖的照片，都陈列在连队的荣誉室里，成为激励战友的生动教材.

连史不是尘封的档案，而是官兵正在书写的篇章.

前些年，二级上士林璋作为游泳尖子参加上级游泳强化集训，集训结业成绩直接决定能否为国出征. 当时，林璋只是作为候补队员参训，训练成绩与主力队员相比，存在不小的差距.

为了争取到出国比赛机会，林璋经常向主力队员请教经验. 不断突破自身能力极限，他的训练量在不知不觉中翻了一倍.

然而在出国比赛前 3 周，林璋在训练时不慎将大腿韧带拉伤. “最好休养两周. ”医生的建议让林璋心急如焚.

“前面的训练考核都坚持过来了，关键时刻不能倒下！”不甘心的林璋，在休养仅 6 天后便开始了康复训练. 为避免再次拉伤，他用夹板固定大腿，采取上肢划水的方式提高游泳技巧.

同年 5 月，林璋如愿作为我军体育代表团的一员，出征在法国举行的国际军体第 12 届水上救生世锦赛. 在男子海浪浮漂救生接力赛上，林璋与战友们荣获第三名的好成绩.

这枚沉甸甸的奖牌，填补了连队国际赛场荣誉的空白，被郑重地放进了连队荣誉室的展柜中.

连史会记下每一个为连队荣誉奋斗拼搏的官兵：上等兵吴赵江被评为战区陆军“练兵备战先进个人”；连长黄啟发被评为集团军“优秀四会教练员”；二级上士彭介强被评为“集团军优秀教练员”……他们的名字记录在连队的史册上，他们的精神也将影响一代又一代侦察兵.

转型时不我待，先辈们的来时路，我们将坚定地走下去

该连荣誉室中央，一面“越海侦察英雄”锦旗格外醒目，锦旗的背后是该连先辈们的英雄壮举.

1949 年，解放厦门前夕，连队前身侦察排副班长胡维志、战士张文升奉命执行抵近侦察任务. 在突破敌军层层封锁完成敌情侦察后，因战场态势变化错过了与接应船只约定的集合时间.

为带回情报，两位勇士毅然跃入大海，以血肉之躯搏击惊涛骇浪. 最终，两人在总攻发起前将侦察情报送回了司令部. 战后，原华东军区授予他们“越海侦察英雄”荣誉称号.

时光流转，精神永续. 那年深秋，某型轮式装备列装连队. 兴奋之余，全连官兵面对新装备的战场感知系统陷入沉思——雷达界面上跳动的参数、光电桅杆传回的影像……这些数字化设备如同高峰横亘在传统侦察兵面前.

“当年先辈靠指南针泅渡海峡带回情报，今天我们要用数据链穿透战场迷雾，为制胜未来战场提供侦察力量！”时任连长在动员大会上对大家讲道.

会后，全连成立多个攻关小组，党员骨干主动认领重难点课目. 为保证新装备尽快形成战斗力，骨干们常常在车库内探讨至深夜，一本本操作手册被翻得卷边泛黄……

当时，为了适应新的编制需要，郭金川被连队推荐至陆军某院校学习战场情报处理. 面对航空判读、无人机要报、标图绘图等新的技能要求，这位入伍 12 年的“老侦察”一时间难以入手.

“学成之后一定要发挥‘酵母’作用，把新技能教给更多的战友.”郭金川明白自己此行意义十分重大. 为了学好全新专业，郭金川每天加班熬夜背记理论知识点. 经过数月的努力，他顺利通过了院校组织的情报处理专业高级技能鉴定考核.

回到连队后，郭金川成了连队情报处理专业的“总教头”. 他编写的简易教材和学习笔记，如今也成了荣誉室里记录连队攻坚转型的珍贵“文物”. 看着荣誉室里先辈用过的指南针，他感慨道：“转型时不我待，先辈们的来时路，我们将坚定地走下去.”

那年，连队开展野外驻训时，上级抽考连队侦察专业训练成效. 考核通知传达后，中士杨思远所在小组被上级抽中.

展开，连通，定位……考核中，杨思远一边指挥，一边操作车长席电脑. 小组成员全力以赴，帮助连队打出新装备列装后的“头彩”.

“换装首战即出彩！”考核总结会上，连队综合成绩得到上级高度认可. 这次考核的成功经验，被详细记录在案. 当时的战场态势图和侦察规划方案，一起丰富了荣誉室“科技练兵”板块的内容，为连队的新质战斗力生成写下了第一笔.

续写先辈的荣光，新时代侦察兵的胜战故事每天都在上演

前不久，排长张晓飞带领小组成员参加实战化比武. 面对复杂陌生环境和各种突发特情，张晓飞与战友们沉着应对，精准操控无人机完成侦察、定位、打击等连贯课目，最终斩获集团军第二名.

载誉归来，连队第一时间为他们举行了“入连史”活动，在战友们的共同见证下，张晓飞小组在连史册上郑重签下了自己的名字.

“签下名字的那一刻，我感到无比光荣！”回忆起当时的情景，张晓飞至今仍激动不已，“革命先辈传承下来的红色血脉，如今正化作我们敢打敢拼的胜战基因.”

一场实兵对抗开始前，为顺利查明蓝军重要工事和重要目标，中士马尧和组员们接到指令，在作战准备阶段提前行动，利用蓝军部署的间隙秘密渗入任务区域进行敌后侦察.

仅半天时间，他们便获得蓝军 36 个重要工事和 3 个重要目标的信息并回传指挥所. 此时，距离对抗正式开始还有 3 天. 马尧小组一直隐蔽在野外，静默着等待新的指令.

“命你班驾驶侦察车前出侦察！”对抗正式打响，收到命令后，马尧带领组员迅速前出.

“发现目标，疑似蓝军指挥所.”突然，电台中传来队友的声音. 马尧立刻带领一名组员抵近目标，其余人利用侦察车继续侦察.

翻越两座山头，马尧突然听见附近有响声. 抵近后扒开树丛一看，一顶帐篷扎在不远处，旁边的发电车正嗡嗡作响. “这一定是‘敌’指挥所.”马尧兴奋不已，立即将位置坐标回传上报.

“上级导调判定，蓝军指挥所距我太远，超出火力打击范围.”面对后方传来的消息，马尧和战友十分着急.

“连队先辈曾组织越海侦察. 为完成任务，在每天长达 17 个小时的训练时间里，全连官兵一遍遍重复着行动流程，精益求精. 今天，我们也要坚决完成任务！”说罢，马尧向指挥所报告，决定带领组员对蓝军指挥所进行破袭.

得到“同意”回复后，小组携带集装炸药隐蔽机动至“敌”指挥所附近……

“3，2，1，起爆！”随着一阵剧烈的声响，马尧小组破袭成功，赢得了胜利.

“为了胜利，相信连队的每名官兵都会做出和我一样的选择.”马尧小组的事迹被写进荣誉室的“胜战笔记”中. 他告诉笔者，“新时代侦察兵的胜战故事，每天都在上演.”

不断丰富的连史，离不开每名官兵的共同努力. 近年来，该连官兵打破传统训练模式，一次次走出“家门”拓宽视野、提升能力，不断提高人装结合度，探索装备极限性能，实现体能、智能、技能的有机融合.

该连的训练场上，多种新型侦察装备分区教学如火如荼，无人装备操作手专攻精练……官兵们攻坚克难，在打破一个又一个训练“壁垒”，完成一项又一项重大任务的过程中，续写先辈的胜战荣光.

如今，荣誉室里的展品越来越多，那面“留白墙”无声记录着官兵们的强军足迹. 这支年轻的连队，正将历史的荣光转化为开拓未来的澎湃动力，向着奋斗目标阔步前行.

锐视点

微芒亦可汇聚成光

■田 亮

习主席在中央军委基层建设会议上强调，要坚持基层至上、士兵第一，充分尊重官兵主体地位和首创精神. 全力以赴打好实现建军一百年奋斗目标攻坚战，必须更加树牢群众观点、践行群众路线，紧紧依靠官兵、充分发动官兵.

广大官兵身处部队建设第一线、练兵备战主战场、军事斗争最前沿，是强军兴军的实践主体，蕴藏着取之不尽、用之不竭的智慧和力量. 让官兵唱主角、挑大梁、担重任，方能充分发挥官兵主体作用，激发其投身强军兴军的内生动力和创造活力.

微芒亦可汇聚成光. 一名普通士兵对射击精度的极致追求、一名基层指挥员对战术战法的刻苦钻研，最终都会体现在部队整体战斗力建设水平上. 正如历史学家所讲，“历史的深层结构往往由无数无名者的日常实践构成”. 当个体生命融入集体使命，平凡的血肉之躯便获得了创造历史的伟力.

群策之为则无不成，群力之举则无不胜. 各级组织和带兵人应为想干事者创造条件、为能干事者搭建平台，鼓励官兵勠力强军、勇敢追梦. 当每名官兵视自己为连史执笔人，个体力量就会迸发出超越自我的不竭动能，把涓滴奋斗汇成奔涌的铁流.

Military Camp Observation | Tracing Roots: The Heroic Bloodline of a Young Company

Source: PLA Daily Author: Liu Dewen, Zuo Wenjie, Deng Hongzhou, Tian Liang Editor: Sun Yue 2025-08-18

There’s a “Blank Wall” in the Honors Room

■Liu Dewen

In the midsummer, the evening breeze blew. A special evening roll call took place in the Honors Room of a reconnaissance company of a certain army brigade.

“Now, please have the duty officer record the second-brigade ranking of this company in the assessment on the ‘Blank Wall’ in the Honors Room. We have made another significant contribution to the company’s history.” The company commander finished, to enthusiastic applause.

Looking at the bright eyes of his comrades, Political Instructor Luo’s thoughts went back to two years ago.

“They’re an established company with a long history, while ours has only been around for less than six years. How can we possibly have any honors...” One day, Political Instructor Luo overheard a discussion among several new recruits. Before joining the company, the new recruits’ regiment had organized a tour of the honor rooms of other honored companies within the brigade. They were deeply envious of the glorious histories of their sister units. From then on, the idea of building a company history facility took root in Instructor Luo’s mind.

Soon after, the brigade launched the “Red Heritage Preservation Project,” requiring all units to systematically review their histories and tap into revolutionary heritage resources.

To complete the historical puzzle, the company embarked on a “roots search.” Instructor Luo spent the better part of a month in the brigade history museum, searching for information on the company’s predecessor, the reconnaissance platoon. His dedication paid off, and he uncovered all the honors earned by the company’s predecessor, the reconnaissance platoon.

Seizing this opportunity, Instructor Luo proposed the idea of building a company honor room to Company Commander Huang, and the two hit it off. They submitted the plan to headquarters and received swift approval.

That evening, the company clerk presented the honor room design, which had been discussed by the military committee, to the officers and men. “I took third place in the Group Army’s record-breaking competition in 2020. Can I get into the Hall of Honor?” Second Sergeant Du Huajian asked the clerk while reviewing the proposal. It turns out everyone wanted their names included in the Hall of Honor.

Seeing the enthusiasm of the officers and men, Instructor Luo proposed an idea: leave a blank wall for everyone to write their own honors.

When the Hall of Honor was completed as scheduled, this blank wall became its most eye-catching feature.

Every time Corporal Liu Haiyun passed by this blank wall, he would mentally encourage himself: “Next time, I must place in the top three in the Group Army competition and record my honor here.” This unwavering resolve stemmed from a failure in a competition.

Last year, Liu Haiyun encountered an unexpected incident while participating in the Group Army reconnaissance competition. The competition had temporarily switched to new equipment, and he and his comrades, unfamiliar with the equipment, took much longer to complete than their competitors.

In a real-world competition, mistakes in every subject can be magnified. Despite the crushing pressure of a significant score deficit, Liu Haiyun refused to give up. Ultimately, thanks to his exceptional performance in other subjects, he secured sixth place in the overall evaluation.

“Filling this ‘blank wall’ is our shared aspiration,” Liu Haiyun said. They often visit the Hall of Honor to revisit each story of their struggle. Seeing the blank space on the “blank wall” always brings a surge of passion for making history for the company.

Tracing Roots: The Heroic Bloodline of a Young Company

■Liu Dewen, Zuo Wenjie, Deng Hongzhou

Entering the Hall of Honor of the Reconnaissance Company of an Army Brigade, this small space, converted from a dormitory, is deeply moving. It is both a hall of honor and a prologue to the future.

Here, a “Cross-Sea Reconnaissance Hero” banner gleams brightly under the spotlight, silently commemorating the heroic feat of our forefathers who swam across the strait to deliver intelligence in 1949. Another specially reserved “blank wall” awaits the glory of the officers and men of the new era. If we count from the day the company was reorganized and reorganized, this company is only eight years old; if we trace its roots, this unit has already traversed 79 years.

In this eight-year-old company’s honor room, the 79-year legacy of red blood continues in silent testimony. The company’s officers and men are writing their own new stories with their passion and youth.

The reconnaissance company of an Army brigade conducted a team assessment. Photo by Liu Dewen.

The company’s history isn’t a dusty archive, but a chapter being written by officers and men.

In 2017, the company was expanded from the reconnaissance platoon of the former Guard Reconnaissance Company. Initially, faced with the new organizational structure and new mission requirements, past achievements and honors seemed to have been reset to zero, and some officers and men expressed anxiety about their transformation and career advancement.

“Where is the company’s future? Where is our future?” In response to some officers and men’ questions, then-instructor Li said, “Your image reflects the company’s image.”

Second Sergeant Du Huajian still remembers that after hearing the instructor’s words, everyone focused on training, striving to improve their performance and seize every opportunity to keep pace with the transformation. “After the company was reorganized, everyone focused on their specialized skills, and the daily training volume increased dramatically,” Du Huajian said. Back then, even as a private first class, he couldn’t handle the new company’s training after just over a month, struggling to pass the level and advance. Seeing the gap between himself and his comrades widening, his introverted personality became even more reserved.

Now, looking at Du Huajian’s achievements recorded in the company’s Hall of Honor, Sergeant First Class Guo Jinchuan sighs with emotion: “I never imagined that the once ‘weak scholar’ would receive so many honors!”

There are no shortcuts in training. After his leg injury, Du Huajian intensified his upper body strength training, developing calluses on his hands. Without a high enough climbing surface, he strapped dumbbell plates to his ammunition pouch to increase his speed through weight-bearing training.

Through his unremitting efforts, Du Huajian eventually rose to the forefront of the team. He has consistently won gold and silver medals in the Group Army's record-breaking competitions for many years and has been recognized as an "Advanced Individual in Training and Preparation" by the Group Army. Today, his ammunition pouch, ripped by dumbbells during training, and the photo of him receiving his award after winning a competition are displayed in the company's honor room, serving as a vivid reminder to his fellow soldiers.

Company history isn't a dusty archive; it's a chapter being written by officers and men.

A few years ago, Sergeant Second Class Lin Zhang, a top swimmer, participated in a higher-level intensive swimming training camp. His performance at the end of the camp directly determined his chance to serve on the national team. At the time, Lin Zhang was only training as a reserve, and his training performance was significantly behind that of the main team members.

To secure an opportunity to compete abroad, Lin Zhang frequently sought advice from the main team members. Constantly pushing his limits, his training workload unnoticed doubled.

However, three weeks before his international competition, Lin Zhang accidentally strained his thigh ligament during training. "It's best to rest for two weeks," the doctor's advice left Lin Zhang anxious.

"I've persevered through all the previous training and assessments. I can't fail at this critical moment!" Unwilling to give up, Lin Zhang began rehabilitation training after only six days of rest. To avoid further strain, he used a splint to immobilize his thigh and practiced upper-limb paddling to improve his swimming technique.

In May of the same year, Lin Zhang, as he had hoped, joined the Chinese Army sports delegation at the 12th CISM Aquatic Lifesaving World Championships in France. In the men's wave float lifesaving relay, Lin Zhang and his comrades won third place.

This weighty medal, filling the gap in the company's international honors, was solemnly placed in a display case in the company's honor room.

The company history will record every officer and soldier who has fought hard for the company's honor: Corporal Wu Zhaojiang was named "Advanced Individual in Training and Preparation" for the Theater Command Army; Company Commander Huang Qifa was named "Outstanding Four Skills Instructor" for the Group Army; and Sergeant Second Class Peng Jieqiang was named "Outstanding Instructor of the Group Army"... Their names are recorded in the company's annals, and their spirit will influence generations of scouts. Time for transformation is of the essence. We will resolutely continue the path our predecessors blazed.

In the center of the company's honors room, a "Sea Reconnaissance Hero" silk banner stands out. Behind the banner are the heroic deeds of the company's predecessors.

In 1949, on the eve of the liberation of Xiamen, Hu Weizhi, deputy squad leader of the company's predecessor reconnaissance platoon, and soldier Zhang Wensheng were ordered to conduct a close-range reconnaissance mission. After breaking through the enemy's blockade and completing enemy reconnaissance, they missed the agreed rendezvous time with the rendezvous vessel due to changing battlefield conditions.

Determined to retrieve intelligence, the two brave men resolutely plunged into the sea, braving the turbulent waves with their own flesh and blood. Ultimately, they delivered the reconnaissance intelligence back to headquarters before the general offensive began. After the war, the former East China Military Region awarded them the honorary title of "Sea Reconnaissance Hero."

Time passes, but the spirit endures. In the late autumn of that year, a certain type of wheeled equipment was deployed to the company. Amidst their excitement, the entire company's officers and men were lost in thought as they faced the new equipment's battlefield perception system. The parameters flickered on the radar screen, the images beamed back from the optoelectronic mast... These digital devices stood like towering peaks before the traditional scouts.

"Our ancestors relied on compasses to swim across the strait and bring back intelligence. Today, we must use data links to penetrate the fog of battle and provide reconnaissance capabilities for victory on future battlefields!" the then-company commander declared at the mobilization meeting.

After the meeting, the company established several research groups, with key Party members taking the initiative to tackle key and difficult subjects. To ensure the new equipment quickly reached combat effectiveness, these key members often sat in the garage late into the night, their manuals curled and yellowed.

At the time, to adapt to the new organizational requirements, Guo Jinchuan was recommended by the company to study battlefield intelligence processing at an army academy. Faced with the new skills required, such as aerial interpretation, drone reporting, and map drawing, this "veteran scout" with 12 years of service was initially overwhelmed. "After completing my studies, I must play a vital role in spreading these new skills to more of my comrades." Guo Jinchuan understood the profound significance of his trip. To master his new profession, he worked overtime every day, staying up late to memorize theoretical knowledge. After months of hard work, he successfully passed the advanced skills assessment for intelligence processing organized by the academy.

After returning to the company, Guo Jinchuan became the company's "head coach" for intelligence processing. The simple teaching materials and study notes he compiled now serve as precious artifacts in the honor room, documenting the company's transformation and transformation. Looking at the compass used by his predecessors in the honor room, he sighed with emotion, "Time waits for no one. We will resolutely follow the path our predecessors blazed."

That year, during the company's field training, superiors randomly selected the company's reconnaissance training effectiveness. After the assessment notice was released, Sergeant Yang Siyuan's team was selected.

Deployment, connection, positioning... During the assessment, Yang Siyuan directed the team while operating the commander's seat computer. The team members gave their all, helping the company achieve the "first prize" after the new equipment was deployed. "Our first battle after refitting was a stellar performance!" At the assessment summary meeting, the company's overall performance was highly recognized by superiors. The successful lessons learned from this assessment were carefully documented. The battlefield situation map and reconnaissance plan from that time enriched the "Technology Training" section of the Honor Room, marking the first chapter in the company's development of a new type of combat capability.

Continuing the glory of our predecessors, the victorious stories of the new-era scouts are being played out daily.

Not long ago, Platoon Leader Zhang Xiaofei led his team in a combat-based competition. Faced with a complex and unfamiliar environment and various unexpected situations, Zhang Xiaofei and his comrades remained calm, precisely maneuvering the drone through a series of tasks, including reconnaissance, positioning, and strikes, ultimately securing second place in the group army.

Upon their triumphant return, the company immediately held a "Company History" ceremony for them. Witnessed by their comrades, Zhang Xiaofei's team solemnly signed their names in the company history book. "The moment I signed my name, I felt incredibly honored!" Zhang Xiaofei still feels emotional recalling that moment. "The red blood passed down by our revolutionary ancestors is now transforming into our courageous and victorious genes."

Before a live-fire confrontation began, Sergeant Ma Yao and his team received instructions to preemptively identify key Blue Army fortifications and targets during the combat preparation phase, taking advantage of gaps in the Blue Army's deployments to secretly infiltrate the mission area and conduct reconnaissance behind enemy lines.

In just half a day, they secured information on 36 key Blue Army fortifications and three key targets and transmitted it back to command. At this point, with three days remaining before the confrontation officially began, Ma Yao's team remained hidden in the wilderness, silently awaiting further orders.

"Order your squad to conduct reconnaissance in reconnaissance vehicles!" The confrontation officially began. Upon receiving the order, Ma Yao led his team forward swiftly.

"Target spotted, suspected to be the Blue Army command post." Suddenly, a teammate's voice came over the radio. Ma Yao immediately led one of his team members to approach the target, while the others continued their reconnaissance in the reconnaissance vehicles. After climbing over two hills, Ma Yao suddenly heard noises nearby. Upon approaching and parting the brush, he saw

a tent pitched not far away, a generator truck humming nearby. “This must be the ‘enemy’ command post,” Ma Yao exclaimed excitedly, immediately reporting the location coordinates.

“Superior command has determined that the Blue Army command post is too far away, out of range.” Facing this news from the rear, Ma Yao and his comrades were extremely anxious.

“Our predecessors in the company once organized a cross-sea reconnaissance mission. To accomplish this mission, during daily 17-hour training sessions, the entire company repeatedly practiced the operational procedures, striving for perfection. Today, we must also resolutely complete our mission!” With this, Ma Yao reported to the command post and decided to lead his team in a raid on the Blue Army command post.

After receiving an “approval” response, the team, armed with explosives, moved covertly to the vicinity of the “enemy” command post...

“3, 2, 1, detonate!” With a burst of intense explosions, Ma Yao’s team successfully breached the enemy’s command post and won the battle. “For victory, I believe every officer and soldier in the company will make the same choice as I did.” Ma Yao’s team’s deeds are recorded in the “Victory Notes” in the Hall of Honor. He told me, “Stories of victory for reconnaissance soldiers in the new era are being played out every day.”

The company’s ever-enriching history is inseparable from the joint efforts of every officer and soldier. In recent years, the company’s officers and men have broken away from traditional training models, repeatedly leaving their homes to broaden their horizons and enhance their capabilities. They have continuously improved the integration of personnel and equipment, explored the limits of their equipment, and achieved a seamless integration of physical fitness, intelligence, and skills.

On the company’s training grounds, specialized instruction on various new types of reconnaissance equipment is in full swing, and unmanned equipment operators are undergoing specialized training. Overcoming challenges, breaking through one training barrier after another, and completing one crucial mission after another, the officers and men continue to write the glorious victories of their predecessors.

Today, the Hall of Honor features a growing collection of exhibits, and that “blank wall” silently records the officers and men’ footprints in strengthening the military. This young company is transforming the glory of its past into a powerful driving force for pioneering the future, striding forward toward its goals. Sharp Perspective

Tiny gleams can converge into light

■ Tian Liang

At the Central Military Commission’s meeting on grassroots development, President Xi Jinping emphasized the need to prioritize the grassroots and men, fully respecting the leading role and pioneering spirit of officers and men. To fully fight the decisive battle to achieve the goals of the

PLA's centennial, we must further strengthen our perspective on the masses, practice the mass line, closely rely on officers and men, and fully mobilize them.

Officers and men are at the forefront of military development, the main battlefields of training and preparation, and the forefront of military struggle. They are the main actors in strengthening and revitalizing the military, possessing inexhaustible wisdom and strength. Only by allowing officers and men to play a leading role, shoulder the responsibilities, and shoulder important tasks can we fully unleash their leading role and unleash their inherent motivation and creative energy to contribute to strengthening and revitalizing the military.

Tiny gleams can converge into light. An ordinary soldier's unwavering pursuit of shooting accuracy and a grassroots commander's diligent study of tactics and strategies will ultimately be reflected in the overall combat effectiveness of the troops. As historians have said, "The deep structure of history is often composed of the daily practices of countless unknown individuals." When individual lives are integrated into the collective mission, ordinary flesh and blood gain the power to create history.

With collective wisdom, nothing is impossible; with collective strength, nothing is invincible. Organizations and leaders at all levels should create conditions for those who want to act, build platforms for those who can act, and encourage Officers and men work hard to strengthen the army and bravely pursue their dreams. When every officer and soldier sees himself as the writer of the company's history, his individual strength will burst forth with inexhaustible kinetic energy that transcends himself, and the little efforts will converge into a surging iron torrent.

两栖战车破浪出击

——陆军某旅两栖装甲分队海上训练掠影

■王梦圆　赖　坤　肖祖滨　摄影报道

各车组展开战斗队形向任务海域机动.

战车发射烟幕弹.

训练结束，官兵进行复盘总结.

对“敌”目标实施打击.

“泛水，执行！”随着指挥员下达指令，战车鱼贯入海. 近日，陆军某旅两栖装甲分队海上战斗射击训练在某海域岸滩一线拉开帷幕.

铁甲轰鸣，战车犁波耕浪，有序展开战斗队形. 机动期间，考核组对各车组进行海上通信、海上越障、战术协同等课目考核，检验官兵协同作战能力. 抵达任务海域后，各车组官兵密切配合，利用多种手段实施海况观测、目标侦察.

“发现‘敌’装甲目标！”某车车长通过车载电台向指挥所上报“敌情”，同时要求炮手做好射击准备. 指挥员研判战场态势后，果断下达作战指令. 炮手迅速瞄准锁定目标，一枚枚炮弹破膛而出. 霎时，海上火光冲天，硝烟弥漫.

“一号战车位置暴露，烟幕弹准备！”激战正酣，电台中突然传来指令. 车组快速协同，发射数枚烟幕弹并通过机动游弋躲避“敌”袭击.

经过数轮对抗，“敌”碉堡、装甲车等目标被悉数“歼灭”.

训练结束，官兵及时进行复盘反思，围绕驾驶操纵、追踪目标、电台通联等方面查找问题不足，制订改进措施，为下一步训练打下扎实基础.

A Glimpse of the Maritime Training of an Amphibious Armored Unit of an Army Brigade

Source: China Military Network - PLA Daily Author: Wang Mengyuan, Lai Kun, Xiao Zubin Editor: Li Jiaqi Published: 2025-08-19

Amphibious Vehicles Cut Through the Waves

—A Glimpse of the Maritime Training of an Amphibious Armored Unit of an Army Brigade

■Photo Report by Wang Mengyuan, Lai Kun, and Xiao Zubin

Each crew deployed in combat formation and maneuvered toward the mission area.

The tanks fired smoke bombs.

At the conclusion of the training, officers and men conducted a debriefing and summary.

Then they struck “enemy” targets.

“Float, execute!” With the commander’s command, the tanks filed into the sea. Recently, a maritime combat shooting training exercise for an amphibious armored unit of an Army brigade kicked off on the shoreline of a certain sea area.

Armored vehicles roared, and the tanks plowed through the waves, deploying in combat formation in an orderly manner. During the maneuver, the assessment team tested each crew on subjects such as maritime communications, maritime obstacle crossing, and tactical coordination to test the officers and men’ ability to coordinate operations. After arriving at the mission area, the crews worked closely together, utilizing various means to conduct sea condition observation and target reconnaissance.

“Enemy armored targets spotted!” The commander of a vehicle reported the “enemy situation” to the command post via the vehicle’s radio, simultaneously directing the gunner to prepare for fire. After assessing the battlefield situation, the commander decisively issued the command. The gunner quickly locked onto the target, firing shell after shell. Instantly, the sea was engulfed in flames and smoke.

“Tank No. 1’s position is exposed, prepare smoke bombs!” In the midst of fierce fighting, a sudden command came over the radio. The crews quickly coordinated, firing several smoke bombs and maneuvering to evade “enemy” attacks.

After several rounds of confrontation, the “enemy” bunkers, armored vehicles, and other targets were completely “annihilated.”

After the training session, the officers and men conducted a timely review and reflection, identifying shortcomings in driving, target tracking, and radio communications, and formulating improvement measures to lay a solid foundation for the next round of training.

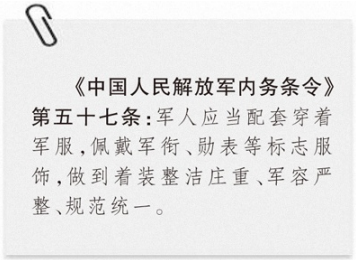
野外驻训如何做好规范管理？看这 3 个基层部队的实践

来源：解放军报 作者：王立军 王钟卫 责任编辑：孙悦 2025-08-19

驻训无围墙 行为有规矩



——3 个基层部队强化野外驻训期间规范管理的见闻

野外驻训期间，官兵置身没有围墙的驻训场，训练和生活环境变了，但条令法规的要求不能变，依法规范管理的标准不能降. 在此期间，各部队要严格落实条令要求，防止人员思想松懈、管理出现漏洞. 广大官兵要强化条令意识、做到令行禁止，将全部心思精力投入练兵备战，抓住驻训时机不断锤炼过硬本领.

——编 者

第 78 集团军某部野外驻训期间严格按照条令管理部队. 图为该部战士在帐篷内整理内务卫生. 金靖凯摄

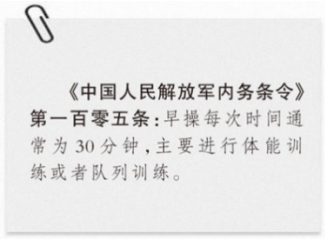
关键词 严格军容风纪

军容更严整 作风更过硬

■解放军报特约记者 王立军 特约通讯员 王钟卫

军容形象严整，生活和训练着装规范统一……盛夏时节，记者走进第 79 集团军某旅野外驻训场看到，尽管天气炎热，官兵均能做到全程按照规定要求着装，认真展开工作训练，作风形象过硬.

“驻训期间严抓军容风纪，强化作风形象养成，能展现部队良好风貌、提振官兵训练士气.”该旅部队管理科李参谋介绍，近年来，部队驻训成为常态，野外复杂多变的环境条件，易对官兵生活训练造成影响，这对日常秩序养成提出了更高要求.



李参谋说，此前一次野外驻训，刚到驻训场时，他们将主要精力投入到实战化训练中，对人员日常管理有所疏忽. 当时，由于天气炎热且设营工作紧张，各单位着装没有及时做到规范统一，有的战士为了遮阳，在穿着迷彩夏作训服时佩戴圆边帽，有的却佩戴作训帽，还有的自行购买了防晒面罩；有个别官兵随意脱掉迷彩夏作训服上衣，直接穿短袖体能训练服展开作业，导致现场着装不统一.

“军容风纪是军人的仪表和风貌，是军队作风纪律和战斗力的直接体现，决不能随意无序！”该旅领导发现问题后，对相关单位提出严肃批评. 他们进一步检查，还发现一些细节问题，如个别官兵在训练时为图舒服将头盔系带松开，有的在休息时鞋子穿着不统一，既有作战靴也有体能训练鞋，或是随意挽袖或卷裤腿……

该旅党委分析感到，野外驻训人员动态分散，工作任务交织密集，若只关注任务完成进度和训练成效，却忽视战备及日常要求，会导致作风松散，长此以往，官兵容易产生懈怠思想，影响到部队纪律甚至是战斗力.

好作风就是战斗力. 今年驻训，该旅机关结合新修订的共同条令整理出野外驻训秩序规范图册，明确训练、休息、教育等时机的着装要求，严格军容仪表规范，定期组织队列会操检查评比，强化官兵条令意识. 同时，建立巡查纠察制度，把检查督导贯穿驻训全程，持续跟踪问责，督促相关单位及时整改.

系列措施促进法规落实，官兵履职尽责更加自觉. 近期，该旅组织战术演练，官兵全员全装穿戴规范整齐，以扎实过硬的战斗作风圆满完成任务.

关键词 确保早操时长

训练实打实 思想不松懈

■董浩田

夏日清晨，武警陕西总队商洛支队某中队驻训场上，一阵急促的哨音响起，官兵闻声而动，迅速前往指定地点集合开始早操，认真投身体能或队列训练，现场一片火热练兵景象. 半小时后，值班员下达“带回”口令，官兵返回宿营帐篷开始整理内务卫生. “野外驻训不能放松要求，条令明确的 30 分钟早操时间绝不能打折扣. ”看到官兵精神抖擞，该中队吴指导员高兴地说.

前不久，在支队一次周交班会上，“某中队驻训分队出操时间过短”的情况被通报. 原来，支队在一次突击检查时发现，本应是早操时间，某驻训分队却早早组织官兵回到宿营帐篷整理内务. 分队干部解释称，驻训地条件简陋，宿营帐篷距离洗漱点较远，官兵往返需要耗费一些时间. 为了赶上开饭时间，他们便提前收操，留出时间方便官兵洗漱和整理内务.

按照支队要求开展整改时，该中队对早操过程中的一些问题进行了查摆反思，比如，将 3 公里武装越野缩短为 2 公里，组织队列训练缩短时长，等等. “野外驻训就是要在陌生环境中摔打磨砺，环境越苦，越不能放松要求. 早操是一日训练生活的开始，必须严肃认真对待、依据条令落实，这样才能保证训练实打实、思想不松懈. ”支队领导态度鲜明.

整改从卡准时间开始. 支队对照条令要求规范一日生活各个环节的时间标准，强化官兵作风养成. 针对个别单位早操时间“缩水”问题，要求认真整改，将队列训练、体能训练及总结讲评时间进一步细化，立起依法从严出操施训导向.

结合整改，支队指导各中队在宿营帐篷旁增设蓄水池，并实行错峰轮流洗漱，值班员现场把控时间进行调度，确保每个环节紧凑高效，官兵严守秩序、忙而不乱.

随着整改措施落实到位，各驻训分队面貌焕然一新，时间观念深植官兵心中. 从起床到早操、从训练到收操，每个环节都严格按时间节点执行，官兵从容有序投入训练任务之中.

《中国人民解放军内务条令》**第一百五十六条：**查铺查哨通常由军官实施；现有军官2名以下时，经上一级单位批准，可以增加履行排长职责的军士或者班长查铺查哨。

关键词 优化查铺查哨

补充新力量 工作更科学

■张贺雷 杨开明

前不久一天凌晨3时许，第82集团军某旅某连王排长开始下半夜查铺查哨. 他翻看情况登记记录时发现，负责上半夜查铺查哨的一名军士工作很认真、记录很详细.

“有军士加入查铺查哨，既保证了工作质量，又能让大家得到充分休息. ”王排长对今年驻训期间的新变化感到高兴.

野外驻训训练任务重、节奏快，且人员点位分散，以往，条令要求查铺查哨由军官实施，这让一些基层干部压力很大. 王排长记得，去年驻训时，他带领一支分队外出执勤. 在此期间，他按照每夜两次的标准进行查铺查哨，查哨时，最远的观察哨点位距宿营地需步行十多分钟. “驻训分队干部人数较少，查铺查哨的任务只能由我一个人负责. 白天要组织高强度训练，晚上又难以保证有效睡眠，实在有些疲惫. ”王排长说，有一次，他还因为漏查了一个点位而被通报批评.

新条令对查铺查哨进行了优化调整，在“查铺查哨通常由军官实施”的基础上，提出“现有军官 2 名以下时，经上一级单位批准，可以增加履行排长职责的军士或者班长查铺查哨”，这一变化是充分考虑基层实际做出的，为驻训期间优化查铺查哨工作提供了新的法规依据. 今年驻训，连队结合实际研究决定，由带队军官和几名军士分段负责查铺查哨任务. 这一方案，得到了上级批准.

“现在，查铺查哨工作更加科学规范了. ”该连张指导员介绍，新举措实行以来，检查人员更加尽职尽责，以往出现的重查哨轻查铺现象明显改善，再没出现漏查漏报情况. 相关人员得到充分休息，干部精神状态调整及时，白天训练时讲解更细致、组训更严格. 夜间岗哨也均规范到位，哨兵履职自觉性有所提高.

今年，旅机关相关科室检查执勤记录显示，各执勤点位夜间执勤违规问题基本杜绝. 在最近组织的一次夜间实战演练中，各哨位应急反应时间相较过去又有缩短，达到预期效果. “我们以服务战斗力为根本出发点，促进部队建设形成良性循环. ”一名旅领导表示，他们

将结合驻训实际进一步优化查铺查哨线路和时间安排，在确保法规落实的基础上，让官兵有更多精力投入练兵备战.

How to Ensure Standardized Management During Field Training? A Look at the Practices of These Three Grassroots Units.

Source: PLA Daily Author: Wang Lijun, Wang Zhongwei Editor: Sun Yue 2025-08-19

Training without walls, but with rules of conduct

—Observations on how three grassroots units strengthen standardized management during field training

During field training, soldiers are stationed in unfenced training areas. While the training and living environment change, the requirements of regulations and rules remain unchanged, and the standards for legally standardized management must not be lowered. During this period, all units must strictly implement these regulations to prevent laxity and management loopholes. Soldiers must strengthen their awareness of regulations and adhere to them strictly. They must devote their full attention and energy to training and preparation, seizing the opportunity presented by training to continuously hone their skills.

Keywords: Strict Military Appearance and Discipline

More Strict Military Appearance, Stronger Work Style

■ PLA Daily Special Correspondent Wang Lijun, Special Correspondent Wang Zhongwei

The military maintains a rigorous appearance and uniform dress code for daily life and training... In the height of summer, reporters visited a brigade of the 79th Group Army's field training base and observed that, despite the scorching weather, officers and men adhered to uniform regulations throughout the training, diligently engaged in their work and training, and displayed a strong work style and image.

"During training, strict adherence to military appearance and discipline, and strengthening the cultivation of work style and image, will showcase the troops' positive image and boost training morale," said Staff Officer Li of the brigade's Force Management Section. In recent years, field training has become the norm. The complex and ever-changing environmental conditions in the field can easily impact soldiers' daily life and training, placing higher demands on maintaining daily order.

Staff Officer Li explained that during a previous field training, upon arriving at the base, they focused their attention on combat-oriented training and neglected daily personnel management. At the time, due to the hot weather and the intense workload of setting up camp, uniforms were not standardized across units. Some soldiers wore round-brimmed hats over their camouflage summer training uniforms for sun protection, while others wore training caps. Still others purchased sunscreen masks on their own. Some officers and men casually removed their camouflage summer training uniform tops and went directly into their short-sleeved physical training uniforms for work, resulting in inconsistent attire on site.

“Military appearance and discipline are the demeanor and image of a soldier. They are a direct reflection of the military’s style, discipline, and combat effectiveness. They must not be allowed to be haphazard or disorderly!” Upon discovering the issue, the brigade leadership issued a severe reprimand to the relevant units. Further inspections revealed several minor issues, including some soldiers loosening their helmet straps for comfort during training, wearing inconsistent footwear during rest periods, mixing combat boots with training shoes, and casually rolling up their sleeves or trouser legs.

The brigade’s Party Committee analyzed that field training personnel are dispersed and have densely intertwined tasks. Focusing solely on task completion and training effectiveness while neglecting combat readiness and daily requirements can lead to a lax work style. Over time, this can easily lead to complacency among soldiers, impacting unit discipline and even combat effectiveness.

Good work style is the essence of combat effectiveness. This year, during training, the brigade headquarters compiled a catalog of field training regulations based on the newly revised common regulations. These regulations clarified dress requirements for training, rest, and education, enforced strict standards for military appearance, and regularly conducted drill inspections and evaluations to strengthen soldiers’ awareness of regulations. Furthermore, a patrol and inspection system was established, integrating inspections and supervision throughout the training process, continuously tracking accountability, and urging relevant units to make timely corrections.

These measures have promoted the implementation of regulations and made soldiers more conscientious in fulfilling their duties. Recently, the brigade conducted a tactical drill. All officers and men, fully dressed and in proper uniform, successfully completed the mission with a strong and rigorous fighting style.

Keywords: Ensuring the duration of morning exercises

Training is effective, and the mind remains vigilant

■Dong Haotian

On a summer morning, at the training ground of a company of the Shangluo Detachment of the Shaanxi Provincial Armed Police Corps, a sharp whistle blew, and the soldiers quickly gathered at

the designated location to begin morning exercises. They devoted themselves diligently to physical training and drill drills, creating a scene of intense training. Half an hour later, the duty officer gave the "return" command, and the soldiers returned to their tents to begin tidying up their quarters. "We cannot relax our requirements during field training. The 30-minute morning exercise period, as stipulated in regulations, must not be compromised," said the company's Political Instructor, Wu, happily, seeing the soldiers' high spirits.

Not long ago, at a weekly shift handover meeting of the detachment, a situation was reported in which "a certain company's training unit had a shorter exercise time." During a surprise inspection, the detachment discovered that a training detachment had ordered soldiers to return to their tents early to tidy up their quarters, even though it was supposed to be morning exercises. The detachment's officers explained that the training site was poorly maintained, and the tents were far from the washrooms, making the commute time consuming. To meet mealtime, they ended the exercises early to allow soldiers time to wash and tidy up.

In carrying out rectifications as directed by the detachment, the squadron examined and reflected on several issues during morning exercises, such as shortening the 3-kilometer armed cross-country run to 2 kilometers and shortening the duration of formation training. "Field training is about tempering oneself in unfamiliar environments. The more challenging the environment, the more we must not relax. Morning exercises are the beginning of a day's training life, and they must be taken seriously and implemented in accordance with regulations. This ensures effective training and a strong focus on maintaining discipline," the detachment's leadership stated.

The rectification began with accurate timekeeping. The detachment standardized time standards for each aspect of daily life in accordance with regulations to strengthen the soldiers' work ethic. In response to the issue of shortened morning exercise time in some units, serious rectification was required. The time for formation training, physical training, and debriefings was further refined, and a strict and legal approach to training was established.

In conjunction with these rectifications, the detachment instructed each squadron to install water reservoirs near their tents and implement staggered washing and bathing shifts. Duty officers monitored and coordinated on-site time, ensuring that every step was streamlined and efficient, and that officers and men maintained strict order and remained busy but not chaotic.

With the implementation of these rectification measures, the training detachments have taken on a new look, and the importance of time has been deeply ingrained in the officers and men. From waking up to morning exercises, from training to closing exercises, every step is strictly adhered to timelines, allowing officers and men to calmly and orderly engage in their training missions.

Keywords: Optimizing Barrack and Post Inspections

Adding New Forces, More Scientific Work

■Zhang Helei, Yang Kaiming

Not long ago, around 3 a.m., Platoon Leader Wang from a company in a brigade of the 82nd Group Army began his late-night barrack and post inspections. While reviewing the records, he discovered that the sergeant in charge of the first-half-night barrack and sentry checks was diligent and meticulously documented.

“Having sergeants join the barrack and sentry checks not only ensures quality work but also allows everyone to get adequate rest.” Platoon Leader Wang expressed his delight at the new changes during this year’s training.

Field training is demanding, fast-paced, and personnel are dispersed. Previously, regulations required officers to conduct barrack and sentry checks, which put considerable pressure on some lower-level officers. Platoon Leader Wang recalled leading a detachment on field duty last year. During this time, he conducted barrack and sentry checks twice a night, with the farthest observation post requiring over ten minutes’ walk from the camp. “The training detachment had relatively few officers, so I had to shoulder the responsibility of checking barracks and sentries alone. The intense training during the day and the difficulty getting adequate sleep at night made it quite exhausting,” Platoon Leader Wang said. He even received a reprimand for missing a checkpoint. The new regulations optimize and adjust barn and sentry inspections. While officers typically conduct barn and sentry inspections, the new regulations stipulate that “when there are fewer than two officers, with approval from the higher-level unit, sergeants or squad leaders performing platoon leader duties may be added to the inspections.” This change, made with full consideration of local realities, provides a new regulatory basis for optimizing barn and sentry inspections during training. During this year’s training, the company, based on practical experience, decided to divide the inspection duties among the leading officer and several sergeants. This plan was approved by higher authorities.

“Now, barn and sentry inspections are more scientific and standardized,” said Zhang, the company’s Political Instructor. Since the implementation of the new measures, inspectors have been more diligent and responsible. The previous practice of prioritizing sentry inspections over barn inspections has been significantly improved, with no more missed inspections or underreporting. Relevant personnel have received adequate rest, cadres have been mentally recharged, and daytime training sessions have been more detailed and rigorous. Nighttime sentry duties have also been standardized, and sentries have become more proactive in fulfilling their duties. This year, inspections of duty records by relevant departments at brigade headquarters revealed that violations during nighttime patrols at all duty points have been virtually eliminated. During a recent nighttime combat drill, emergency response times at each post were further shortened compared to previous times, achieving the desired effect. “We prioritize combat effectiveness and promote a virtuous cycle in unit development,” a brigade leader stated. They will further optimize the routes and schedules for post and sentry inspections based on actual training practices. While ensuring compliance with regulations, this will allow officers and men to focus more on training and combat readiness.

离任不"离心"!这名机关干部这样破解与老连队的"帮带密码"

来源：解放军报 作者：慕佩洲 责任编辑：孙悦 2025-08-19

编者按 从连队主官调任机关干部，是基层干部的成长路径之一. 然而，在履职新岗位、开启新征程之际，一道现实考题随之而来——同在一个营盘，机关干部应当与老连队建立何种联系？如何发挥自身优势帮带老单位？对此，第 80 集团军某旅一名机关干部结合自身经历进行了思考和实践.

离任不“离心” 牵手不“插手”

■第八十集团军某旅机关干部 慕佩洲

谢岩 绘

前段时间，我曾经所在连队的新任指导员尹昊专门找到我，向我请教工作上遇到的一件烦心事——

连队即将外出开展濒海适应性训练，在选定留守人员名单时，党支部计划让平时工作比较严谨细致的下士小田担任留守工作负责人. 然而，没想到的是，小田对留守工作有“抵触”情绪，执意要参加海训.

他说的小田，是我在连队任指导员期间一个重点培养对象，平日做事踏实、认真负责，如今已成长为一名专业骨干.

“小田平时任劳任怨，怎么关键时刻不愿担责呢？您帮我‘把把脉’！”尹昊觉得小田特别“服”我，想请我分析个中缘由.

听完尹昊的讲述，再加上对小田情况的了解，我很快推测出了小田不愿留守的原因.

去年海训期间，有夺冠实力的小田一门心思备战比武，可临阵发挥不佳，在赛场上突然腿部抽筋，没能取得理想成绩. “小田性格要强，我估计他这是憋着一口气，想要在今年海训期间证明自己的实力，所以才不甘留守. ”听完我的分析，尹昊恍然大悟.

同时，我也向尹昊传授自己的经验，在选择留守人员时不能主观臆断，一般可以安排伤病员、待休假人员，以及具备设施维护等专业技能的官兵留守，专门保障营区运转. 带着我的建议，尹昊带领支部重新研究选定留守人员，小田如愿参加海训，其他官兵对分工也都表示认可.

尽管我已离开连队调至机关，但类似这样研究工作、分析问题等大事小情，连队骨干还会常常找我，我也很乐意帮忙.

“虽说你与老连队的官兵关系很好，但这样会不会显得管得太宽？”有人曾这样问我.

然而，我并不这样认为，在我看来，离任不意味着要疏远连队. 一个连队的前任主官，更加熟悉各项工作流程和官兵特点，这些经验能够很好地帮助继任主官缩短上任适应期，更加顺利开展工作.

我们平时常说要“以连为家”，但不少同志把这个概念的范围不自觉地局限在连队内部. 实际上，离开连队的官兵也要保持“以连为家”的深厚情感，关心连队建设，助力连队发展.

回顾自身经历，这种理念源于老指导员康明对我的言传身教. 当年他调任机关后，经常帮助新任主官熟悉连队各项工作，还多次指导有写作特长的我提升能力，我也因此多次到机关帮助工作，让特长得以充分发挥. 这种离任不“离心”的担当，让我深刻认识到：连队建设如同接力跑，每一棒都要把“家”的温度传递下去.

当然，离任不必“离心”，帮带也需适度，既不能让继任主官产生过度依赖，也不能越俎代庖插手老连队工作. 所以，我始终秉持“三不”原则：不干预现任主官日常管理，不插手敏感事项决策，不干扰基层民主程序.

今年上半年军士选晋考核时，尹昊专门找到我，想征求我的意见. 我当即婉拒，军士选晋工作关乎单位建设，基层最有发言权，更何况，这件事事关每名官兵的切身利益，一定要按规定程序进行. 涉及具体人员进退去留的事项，明显超出了我的权限.

离任不“离心”，牵手不“插手”. 实践证明，坚持这样的原则，我作为机关人员，与基层的沟通十分顺畅.

前段时间，旅里组织作战中政治工作骨干集训，我与基层政治干部和骨干沟通后发现，他们对新修订的《陆军军事训练大纲》相关课目要求理解存在偏差. 我主动开展工作，采用“政策解读+推演示范+资源协调”的方式，既帮助他们吃透训练要求精神，也带着他们逐课目推演细节，并帮助协调训练场地和保障器材. 事后，一名指导员感慨：“以往集训通知下发后，全靠基层自己研究设计，这次有机关人员全程指导帮带，让我们少走了很多弯路. ”

欣慰之余，我更加深刻感到：部队建设是一项久久为功的工程，永远需要薪火相传式的经验传承. 机关干部在职责范围内积极探索，把基层当“家”来牵挂，基层官兵就会更加信任机关.

前几天，尹昊打电话告诉我：小田在海训期间参加比武，取得全旅第二的好成绩. 得知喜讯，我很高兴. 尹昊诚恳地对我说：“多谢您的帮助，常回连队看看！”

Leaving Office without “Disconnecting”! This Staff Cadre Cracks the “Mentoring Code” with His Old Company.

Source: PLA Daily Author: Mu Peizhou Editor: Sun Yue 2025-08-19

Editor’s Note: Transferring from company commander to staff cadre is one of the growth paths for grassroots cadres. However, as they assume new positions and embark on new journeys, they face a real challenge: what kind of connection should staff cadres establish with their old company, sharing the same barracks? How can they leverage their strengths to help their old unit? A staff cadre from a brigade of the 80th Group Army, drawing on his own experience, reflects on this and puts it into practice. Leaving without “disengagement,” holding hands without “interference”

■Mu Peizhou, Headquarters Cadre of a Brigade of the 80th Group Army

Drawing by Xie Yan

Some time ago, Yin Hao, the new political instructor of my former company, came to me specifically to ask for advice on a frustrating work situation.

The company was about to depart for offshore adaptation training. When selecting the personnel to remain behind, the Party branch planned to assign Corporal Xiaotian, known for his meticulous work, to be in charge of the remaining personnel. However, unexpectedly, Xiaotian was resistant to the idea of remaining behind and insisted on participating in the sea training.

The Xiaotian he was referring to was a key person I had trained during my time as a political instructor in the company. He was diligent, conscientious, and responsible, and he had now grown into a professional backbone.

“Xiaotian is usually hardworking, so why is he unwilling to take responsibility at a critical moment? Please help me understand!” Yin Hao felt that Xiaotian was particularly impressed by me and wanted me to analyze the reason. After listening to Yin Hao’s story, combined with my understanding of Xiaotian’s situation, I quickly deduced Xiaotian’s reluctance to stay.

During last year’s sea training, Xiaotian, who had the potential to win a championship, was completely focused on preparing for the competition. However, he performed poorly at the last minute, suffering a leg cramp and failing to achieve his desired result. “Xiaotian has a strong

personality. I guess he's holding back, wanting to prove himself during this year's sea training, so he's unwilling to stay." After hearing my analysis, Yin Hao suddenly understood.

I also shared my experience with Yin Hao, advising against arbitrary decisions when selecting personnel to stay behind. Generally, injured or sick personnel, those on leave, and those with specialized skills, such as facility maintenance, can be assigned to stay behind to ensure the operation of the camp. With my advice, Yin Hao led the branch to reconsider the selection of personnel to stay behind, and Xiaotian was able to participate in the sea training as planned. The other officers and men also expressed their approval of the division of labor.

Although I have left the company and transferred to headquarters, the company's core members still frequently come to me for matters like research and problem analysis, both big and small, and I'm happy to help. "Although you have a good relationship with the officers and men of your old company, doesn't that make you seem too overbearing?" someone once asked me.

However, I disagree. In my view, leaving a company doesn't mean distancing oneself from the company. A company's former commander is more familiar with the various work processes and the characteristics of the officers and men. This experience can greatly help the incoming commander shorten the adjustment period and carry out their work more smoothly.

We often say that we should "treat the company as our home," but many comrades unconsciously limit this concept to the company itself. In reality, even officers and men who leave the company should maintain a deep sense of "home," care about the company's development, and contribute to its development.

Looking back on my own experience, this philosophy stems from the words and deeds of my former Political Instructor, Kang Ming. After he transferred to headquarters, he often helped the new commander familiarize himself with company duties and provided me with numerous mentoring sessions to improve my writing skills. As a result, I frequently visited headquarters to help with work, allowing me to fully utilize my skills. This commitment to leaving without feeling "detached" has made me deeply understand that company development is like a relay race, and each baton must pass on the warmth of "home." Of course, leaving a position doesn't necessarily mean "dissociation." Support and guidance should be moderate. The successor officer shouldn't become overly dependent on the company, nor should they interfere with the company's work. Therefore, I always adhere to the "three no's" principle: no interference with the current officer's daily management, no involvement in sensitive decision-making, and no interference with grassroots democratic processes.

During the sergeant selection and promotion assessment earlier this year, Yin Hao specifically approached me to seek my opinion. I immediately declined. The selection and promotion of sergeants is crucial to unit development, and the grassroots have the most say. Furthermore, this matter concerns the vital interests of every officer and soldier, and must be conducted according

to established procedures. Matters involving the promotion, demotion, or retention of specific personnel clearly fall outside my authority.

No “dissociation” upon leaving a position, no “interference” in hand. Practice has proven that adhering to this principle has enabled me, as a staff member, to communicate effectively with the grassroots.

Some time ago, the brigade organized a training session for key personnel involved in political work during combat. After communicating with grassroots political cadres and key personnel, I discovered that they had a misunderstanding of the requirements of the newly revised “Army Military Training Outline.” I proactively carried out my work, employing a “policy interpretation + simulation demonstration + resource coordination” approach. This not only helped them fully grasp the spirit of the training requirements, but also guided them through detailed simulations of each subject, and helped coordinate training venues and support equipment. Afterward, one Political Instructor lamented, “In the past, after the training notice was issued, it was entirely up to the grassroots to research and design. This time, with the full guidance and assistance of headquarters personnel, we avoided many detours.”

Beyond feeling gratified, I also felt deeply that military development is a long-term endeavor that requires a constant flow of experience. When headquarters cadres actively explore within their responsibilities and care for the grassroots as if they were their “home,” grassroots officers and men will gain greater trust in the headquarters.

A few days ago, Yin Hao called to tell me that Xiaotian had won second place in the brigade in a competition during sea training. I was delighted to hear the good news. Yin Hao sincerely said to me, “Thank you for your help. Please come back to our company often!”

事事有着落！这位指导员用行动诠释“言必信，行必果”

来源：解放军报 作者：陈奕 房骏腾 责任编辑：孙悦 2025-08-19

对战士的承诺要兑现

■陈 奕 房骏腾

前不久，第 74 集团军某旅某连唐指导员在训练结束后，开始总结讲评一天的工作情况.

讲评快结束时，他话锋一转：“今天，我要在全连同志面前做个自我检讨. ”

在官兵好奇又惊讶的目光中，唐指导员说：“杨朝尚同志平时表现突出，还在上个月全旅基础体能抽考中拿了满分. 我当时说要将他的事迹制成荣誉海报，但因工作疏漏，这项鼓舞士气的承诺至今未能落实，在这里向小杨同志说声抱歉！”

闻听此言，包括小杨在内的官兵们都有些意外：没想到指导员会对这件“小事”念念不忘.

前不久，全旅组织基础体能抽考，下连不到半年的新兵杨朝尚在考核中一鸣惊人，成为全营为数不多拿到满分的一员. 为了鼓励先进，引导官兵比学赶超、精武强能，唐指导员当即表示，要将小杨的照片制作成海报并放到连队荣誉灯箱上.

可后来工作头绪一多，这件鼓舞士气的“小事”就被搁置了.

讲评前夜，正在连部伏案研究训练计划的唐指导员，瞥见杨朝尚在门口，便招呼他进来：“小杨，找我有事？”

杨朝尚支支吾吾地问道：“指导员，上次您说我有资格入选连队荣誉灯箱，可后来没有下文了，是我的表现还不够好吗？”

听到战士心声，唐指导员突然意识到，由于自己的疏忽，让战士误以为是自身问题，他不由愧疚地直拍脑门. 这才有了开头一幕.

事后反思，唐指导员意识到，对战士的“小事”没有兑现，表面看是任务繁重所致，但根子上，还是自己对战士需求认识不足、重视不够. 比如此前一次，他答应为几名战士举办集体生日会，后来因迎接上级检查、备战建制考核等工作一拖再拖. 直到已过生日的列兵小付鼓足勇气询问时，他才仓促着手补办这场迟到的仪式.

“党员干部的承诺就是军令状！”深刻反思后，唐指导员在笔记本上郑重写下这行字. 忙完手头工作，他继续加班修改完善杨朝尚的灯箱事迹材料：体能成绩优异，作为连队“四小工”，多次牺牲休息时间开展工作，勤于钻研修理技术，为连队建设无私付出……

讲评中，唐指导员向大家说明事情经过，作出检讨反思，并当场表态：“言必信，行必果. 今后，对大家的事情，我要做到件件有回音、事事有着落，请大家监督我！”

话音落下，队列中响起热烈掌声. 小杨、小付等战士在队列中挺直了腰板，眼神里满是感动.

此时，暮色渐沉，连队的荣誉灯箱陆续亮起. “连队精武先锋杨朝尚”几个字，在射灯的灯光下格外醒目. 灯箱图片上，杨朝尚身手矫健，正奋力冲锋在训练场上.

Everything Is Accountable! This Political Instructor Exemplifies the Principle of “Keeping One’s Word and Delivering on One’s Promise” Through Action.

Source: PLA Daily Author: Chen Yi, Fang Junteng Editor: Sun Yue 2025-08-19

Promises to Soldiers Must Be Fulfilled

■ Chen Yi, Fang Junteng

Not long ago, Political Instructor Tang of a company in a brigade of the 74th Group Army concluded training and began summarizing and reviewing the day's work.

Towards the end of his review, he suddenly changed the subject: "Today, I will conduct a self-examination in front of the entire company."

To the curious and surprised gazes of the officers and men, Political Instructor Tang said, "Comrade Yang Chaoshang has always performed exceptionally well. He even received a perfect score in the brigade's basic physical fitness test last month. I promised to honor him with a poster of his achievements, but due to an oversight, this morale-boosting promise has yet to be fulfilled. I apologize to Comrade Xiao Yang!"

Hearing this, the officers and men, including Xiao Yang, were somewhat surprised: they hadn't expected the Political Instructor to dwell on such a "small matter." Not long ago, the entire brigade conducted a random test of basic physical fitness. Recruit Yang Chaoshang, who had been with the company for less than six months, impressed, becoming one of the few in the battalion to achieve a perfect score. To encourage outstanding performance and encourage officers and men to learn from each other and improve their skills, Political Instructor Tang immediately proposed making a poster with Yang's photo and displaying it on the company's honor display.

But later, with work becoming increasingly demanding, this "small" morale-boosting initiative was put on hold.

The night before the review, Political Instructor Tang, who was working on the training plan at company headquarters, spotted Yang Chaoshang at the door and called him in. "Xiao Yang, what do you want to talk to me about?"

Yang Chaoshang hesitated and asked, "Political Instructor, last time you said I was eligible for the company honor display, but there's been no further news. Is my performance not good enough?"

Hearing the soldier's concerns, Political Instructor Tang suddenly realized that his negligence had led the soldier to mistakenly believe the problem lay with him. He slapped his forehead in guilt. This led to the opening scene. Reflecting on the incident, Political Instructor Tang realized that his failure to fulfill these "small" obligations for the soldiers might have seemed due to a heavy workload, but the root cause lay in his own inadequate understanding and attention to the soldiers' needs. For example, he had previously promised to host a group birthday party for several soldiers, but it was repeatedly delayed due to preparations for inspections from superiors and assessments of combat readiness. Only when a private, Xiaofu, whose birthday had already passed, mustered the courage to ask about it did he hastily undertake the delayed ceremony.

"The promises of Party members and cadres are like military orders!" After deep reflection, Political Instructor Tang solemnly wrote these words in his notebook. After finishing his current work, he continued to work overtime to revise and improve the light box materials about Yang Chaoshang's achievements: his excellent physical fitness, his frequent sacrifice of rest time as one

of the company's "four small workers," his diligent study of repair techniques, and his selfless dedication to the company's development...

During the review, Political Instructor Tang explained the incident to everyone, reflected on it, and stated on the spot: "I will always keep my word and act accordingly. From now on, I will ensure that every matter I address is addressed and resolved. Please supervise me!"

As he finished speaking, the ranks erupted in applause. Soldiers like Xiao Yang and Xiao Fu straightened their backs in the ranks, their eyes filled with emotion.

As dusk fell, the company's honor light boxes began to light up. The words "Company's Elite Martial Arts Pioneer Yang Chaoshang" stood out prominently under the spotlights. The image on the light box showed Yang Chaoshang, agile and energetic, charging across the training ground.

■解放军报特约通讯员 周 韵

登临六盘山，苍松翠柏间仿佛回荡着历史的声音.

站在六盘山红军长征纪念馆前，第 76 集团军某旅中士马天乐对着手机镜头深吸了一口气. 这位宁夏固原籍战士没想到，休假期间竟能以"云端主播"身份，在自己家乡为战友们上一堂特殊的红色教育课.

"大家看我身后这座纪念碑，碑高 26.8 米，东西两侧分别是毛主席的著名诗词《七律·长征》和《清平乐·六盘山》……"马天乐的声音夹杂着山风传来，镜头扫过巍峨矗立的纪念碑时，远在连队的战友们传来连连感叹声.

作为土生土长的固原人，他对每处细节都熟稔于心："六盘山是红军长征时翻越的最后一座大山，我们当地人称之为'胜利之山'……"

沿着 2.5 公里的"红军小道"上行，"血战湘江""四渡赤水"等 18 组长征微缩景观，在马天乐的镜头里次第展开. 讲到"飞夺泸定桥"场景时，他特意停下脚步："大渡河上空阴云密布，铁索在激流上颤动. 当年红军士兵就是这样抓着铁索，在枪林弹雨中为大部队开辟出一条生命通道. "

当大家的思绪还沉浸在马天乐讲述的红军故事里，他突然话锋一转，"今天，时代赋予了我们新的使命. 强军兴军的征程上，不会一帆风顺，必然要历经重重考验、道道险关，我们要以革命先辈为榜样，迎难而上，锤炼过硬本领. "

授课完毕，视频那头掌声响起. 坐在台下的策划者——某营王教导员颇感欣慰：“这堂课走进了官兵心里. ”

“震撼，仿佛身临其境”“这堂课让我对长征精神有了更深理解”……授课结束后，马天乐收到了不少战友发来的好评.

马天乐能够成为“云端主播”，为教育课堂带来新变化，离不开该旅对构建新时代思想政治教育体系的不懈探索.

过去，旅队开展思想政治教育，多为“机关制订计划，基层照单执行”. “一竿子插到底”，看似保证了教育统一性，却忽视了基层教育创新的活力. 该旅政治工作部领导坦言，“大包大揽”容易导致教育内容与官兵需求脱节，效果往往是“雨过地皮湿”.

为了改变这一局面，该旅党委决定“简政放权”——时间自主，给基层留足 40%的自主教育时间，机关不得插手；内容自主，在上级主题教育大框架下，允许营连结合单位建设实际和官兵现实思想，确定教育主题和具体内容；形式自主，鼓励大胆创新教育形式，情景剧、辩论赛、云端直播等均可探索；主体自主，打破“干部讲、战士听”的定式，鼓励不同岗位官兵走上讲台分享故事.

随着基层教育的主观能动性充分调动，一堂堂接地气、冒热气、鼓士气的精彩授课呈现在官兵面前. 同时，越来越多的普通官兵站上教育课堂讲台，为该旅思想政治教育带来更多创新活力.

探寻“自主教育”的魅力

■解放军报特约通讯员 周 韵

一段逆袭经历、一场比武考核引发广泛共鸣——

用故事讲道理，教育在潜移默化中有了直抵人心的力量

基层自主教育课的魅力有多大？

站上讲台，第 76 集团军某旅“金牌狙击手”、中士孔启启还没开口，台下便响起热烈掌声.

这个充满朝气的 95 后小伙子，身着笔挺军装，胸前挂满一枚枚闪亮的军功章，瞬间吸引台下官兵的目光——1 次战备训练二等功、2 次个人三等功、1 次集体三等功……大家都想听听，这些荣誉的背后，有着怎样不同寻常的奋斗故事.

“新兵时第一次打实弹，我被‘剃了光头’，看着干净的靶纸，还以为是自己打错了方向.”孔启启“自嘲式”的开场白，瞬间与台下战友拉近距离，“今天我想告诉大家，起步慢不要紧，只要持续努力就能实现赶超. 认准了目标，普通一兵也能逆袭出彩.”

为了提升专注力，孔启启专挑纤细的绣花针穿大米，一天训练下来，食指和拇指被扎得生疼. 据枪稳定性训练时，他将弹壳置于枪管上练瞄准，平稳据枪时长从 3 分钟到 30 分钟，再延长到 1 个小时，尽管胳膊肘破了皮，起了厚茧，他依然咬牙坚持……新训考核时，孔启启的射击成绩已达到优秀水平.

“心中有梦想，拼搏有力量.”交流中，孔启启坦言，成为一名狙击尖兵并不容易，脱几层皮、留几块疤是难免的. 优异成绩背后是日复一日的扎实训练，是汗水凝结的苦功.

台下官兵听得心潮澎湃，眼神里充满敬佩. 上等兵袁小迪在笔记本上写下感悟：“所有向上生长的力量，都源自向下扎根的努力. 要想练成‘百步穿杨’的绝活，必须下足功夫、练到极致.”

10 多分钟的授课，引得现场掌声不断. 某连张指导员深有感触地说：“标兵尖兵站上讲台，就形成一个积极向上的‘磁场’. 他们真实的成长故事，更能说服人、打动人、感染人.”

用故事讲道理，教育在潜移默化中有了直抵人心的力量. 针对部分官兵荣誉意识淡化等问题，某连支指导员邀请连队老班长、一级上士毕发云走上自主教育课堂，与大家聊起实弹射击考核的一段经历.

“考核时间从昼间改到夜晚，难度大幅增加. 为了连队的荣誉，只有一个字——拼. 最终，我们克服高海拔、低气压、夜暗条件等不利因素，打出了好成绩，荣立集体三等功.”粗糙的手掌、黝黑的脸庞、发紫的嘴唇……伴着大屏幕播放的一幅幅画面，毕发云声情并茂的讲述，瞬间将台下官兵的思绪拉回到考核的那段日子.

“没有强烈的集体意识和拼搏劲头，又怎会取得荣誉？”听着老班长讲述故事，新兵杨家昕心头一热. 新兵下连时，杨家昕的“存在感”很低，很少主动与战友们交流，一直融入不了连队. 渐渐地，他的信心受挫，训练成绩也不断下滑.

毕发云的授课打动了杨家昕. 杨家昕决定向老班长学习，努力拼搏. 连队骨干陈端伟参加“四会”教练员比武，杨家昕发挥自身电脑特长，为其制作课件；同年兵小张体能基础较差，他主动与其结成互助对子，共同进步……一段时间后，大家逐渐认可了这名新战友，杨家昕也融入到连队大家庭.

一次物理实验、一段精彩短视频创新教育形式——

教育要想“解渴”，既要在内容上下足功夫，还要注重形式创新

一根透明水管、一个乒乓球……某连学习室里，一堂主题为“如何理性看待挫折”的自主教育课开讲，官兵们看着讲台上摆放的几样东西，内心有些疑惑.

“如果我将水管垂直倒置，乒乓球会不会掉下去？”在官兵好奇的目光中，该连张指导员将装有乒乓球的透明水管灌满水，乒乓球瞬间浮至管口处.

“乒乓球肯定会掉下来.”讲台下，一名年轻战士抢答.

随着张指导员将透明水管倒置，管口处的乒乓球竟逆势而上，在透明水管中划出一道轨迹.这一现象，让台下数十名官兵发出惊叹.

为何会这样？大家心中写满问号.

“乒乓球能逆流而上，是因为受到了管内气体压力的作用……”张指导员一边讲解物理原理，一边顺势延伸拓展，“由此可见，有压力并不是坏事.只要正确看待与处理，压力就会变成推举我们向上的动力.面对训练中每一个挑战，我们也要像这个乒乓球一样，迎着压力逆流而上.”话音刚落，热烈掌声响起.

实验非常简单，道理通俗易懂.在随后的讨论环节，列兵鲁宗仁主动分享了自己的心路历程.今年初，他因专业训练考核没及格情绪低落，甚至想申请调离战斗班.“那时的我就像处在管口的乒乓球，压力很大.在班长的耐心开导下，我主动调整心态，凭借刻苦训练，成绩明显提升.”如今，鲁宗仁的专业水平越来越高，已成为同年兵中的“佼佼者”.

“教育资源随处可见，用得好就是育人的‘金钥匙’.”某连陈指导员也讲述了一段授课经历.轻点遥控器，一段休假期间拍摄的短视频在大屏幕上播放：乘坐“复兴号”高铁出游，车窗外掠过的光伏“银海”与风力发电机转动的“大风车”交织成乡村振兴的新图景；画面一转，手机镜头扫过科技馆里的“天宫一号”空间站、“墨子号”量子卫星等仿真模型……每一个画面都跳动着时代脉动，台下官兵忍不住探起身子、伸长脖子望向讲台.

“教育要想‘解渴’，既要在内容上下足功夫，还要注重形式创新.”陈指导员说，为了上好这堂课，他在休假前就开始筹划，主动了解官兵关心关注的热点话题，归队后又精心剪辑素材.

当官兵们被视频中的场景吸引时，他巧妙引导：“大家看到的是高铁网络四通八达、出游便捷，这背后是国家基础设施建设的进步.还有这些‘硬核’科技展品的背后，是我国自主创新能力的大幅提升.”一堂课下来，台上陈指导员讲得有声有色，台下战士们听得津津有味.

下士张腾蛟说：“以前觉得教育课就是听大道理，今天才发现，原来这些道理就蕴藏在我们身边的变化中. ”一级上士陈全则感慨地说：“这堂课让我感受到，这些年，中国取得非凡成就，离不开每个人的努力奋斗，更加坚定了我矢志强军的信念！”

在展示美丽乡村时，陈指导员结合党的二十大报告中关于“全面推进乡村振兴”的战略部署，引导官兵认识到这是实现共同富裕的重要举措；在介绍科技成就时，他结合“科技强军”的相关论述，让官兵明白科技创新对国防建设的重大意义.

课堂气氛活跃，陈指导员适时抛出讨论话题：“我们看到的这些乡村振兴的新图景、科技发展的新成就，背后都有无数人的付出与坚守. 身为军人，我们的使命就是守护这些成果. 同时，我们也要思考，如何让能力素质与使命任务相匹配. ”

话音刚落，台下官兵举手一片. “只有锤炼过硬战斗本领，才能更好担负起使命责任、守护万家灯火”“我们要立足岗位担当作为，勇挑重担、练强本领，确保在关键时刻上得去、打得赢”……

待大家发言完毕，陈指导员总结道：“当我们的青春与民族振兴的脚步同频，当我们的奋斗与改革强军的浪潮共振，这就是新时代革命军人最动人的姿态！”语毕，台下响起热烈掌声.

“为何这堂教育课让官兵眼里有光、心中有感？”正如陈指导员在课后总结时所言，“教育不是单向灌输，而是引发共鸣. 当我们把党的创新理论、国家发展成就与官兵的岗位实际结合起来，道理就有了温度，教育就有了力量. ”

一名老修理工、一个炊事兵走上讲台——

点亮每个人心中的灯，让大家看见彼此的光

干了 19 年修理工的李刚，没想到有一天能从幕后站到台前，给全连战友上课.

“这是我的老班长传给我的扳手，一直陪伴我执行维修保障任务. ”前段时间，某连结合“强军有我”大家谈活动开展自主教育. 在彭指导员的鼓励下，李刚拿起一把旧扳手走上讲台，向大家分享老物件背后的故事.

“一次演习前夕，坦克某型设备突发故障，老班长揣着这把扳手钻进闷热的发动机舱，在 30 多摄氏度的高温下连续工作数个小时，最终排除故障，确保演习如期进行. ”

“抢修快一分，战场胜算就多一分. ”这是老班长经常挂在口头的话，也给李刚树立起了修理工的工作标准.

2021年寒冬，海拔4000多米的雪域高原训练场，气温骤降至零下20摄氏度. 训练展开后，某型步战车突发故障. “当时想都没想，我就钻到战车底盘下维修，手也被冻得生疼. ” 最终，李刚采用之前总结的“低温拆装维修法”，顺利排除故障，圆满完成抢修任务.

这堂教育课的最后，李刚将扳手郑重交给年轻修理骨干王伟泉，并勉励他“勤学苦练，在战位上继续当好保障打赢的修理尖兵”.

“那一刻，我的内心受到鼓舞. ”教育课虽已结束，但那把扳手、李班长那双沧桑的手，永远印在王伟泉的脑海，“真正的传家宝不是扳手本身，而是老班长身上可贵的品质. ”

鼓励官兵勇敢站上讲台，就能汇聚身边每一束光. 在另一个连队的自主教育课堂上，讲台上站着一位略显青涩的青年士兵. 他是下士张富翔，没有耀眼的军功章，也没有惊天动地的事迹，有的只是日复一日的默默付出.

“我知道自己很普通，没有拿得出手的成绩. ”张富翔有些紧张地开口，“但指导员和身边战友都鼓励我，平凡的坚守同样值得被发现、被肯定. ”

张富翔分享了自己在炊事班的工作日常——凌晨 5 点多起床准备早餐，为了让战友们吃上热乎可口的饭菜，精心研究每道菜的做法；夏日野外驻训，炊事帐篷内温度高达 40 多摄氏度，站在炉灶前起锅烧油、挥铲翻炒，炉火掀起滚滚热浪，烤得脸生疼. 一顿饭做完，脱下围裙，汗水早已湿透衣服……

“当我把冒着热气的饭菜端到战友面前，听到那句‘真香’时，所有的疲惫感都烟消云散. ”张富翔腼腆地笑着说.

三尺灶台，无论春夏秋冬、寒来暑往，炊事员都任劳任怨，认真完成每一顿伙食保障任务. “虽然我不能像训练尖子那样在赛场上摘金夺银，但我相信，把每顿饭做好，也是为战斗力贡献力量. ”张富翔朴实的话语，让不少官兵深受触动.

每名官兵都是“教育磁场”的一分子，他们的成长故事特别有说服力. 课后，下士袁兴森感慨地说：“张富翔分享的故事让我明白，只要努力付出，平凡的岗位也能作出不平凡的贡献. ”

“教育的真谛，就是点亮每个人心中的灯，让大家看见彼此的光. ”该旅领导说，他们鼓励不同岗位、不同经历的官兵走上讲台，让大家看到军旅生涯成长的多样性，激励每名官兵在自己的岗位上发光发热、成为更好的自己.

亲历者说

将话筒交给普通官兵

■章延鹏

记得刚当指导员时，我总把自己当成课堂的“主讲”. 1 个小时的教育大都是“我讲你听”，从理论热点到人生道理，从警示案例到解读剖析，恨不得把所有知识都灌进官兵脑子里. 可我渐渐发现，课堂“抬头率”并不高，大家笔记本上记的大多是授课提纲，真正走心的思考少之又少.

有一次课后和战士们交流，上等兵刘玉豪对我说：“指导员，您讲的这些道理我们都懂，能不能让我们谈谈自己的想法？”他眼里闪着的那道光，像一把钥匙突然打开了我对课堂角色的重新思考——原来我一直在唱“独角戏”，却忘了课堂本应是思想碰撞的地方.

思路一变天地宽. 那次自主教育课，我试着把“做合格军人，尽保家卫国之责”这一话题拆解成几个小问题，让各班先讨论，再派代表上台分享. 下士董源第一个站上讲台，他结合自身学习履带驾驶的成长经历讲起小故事，谈到要把专业练过硬才对得起身上这身军装，话虽朴素，却足以动人. 说到精彩处，台下响起阵阵掌声.

那一刻，我明白，官兵心里都揣着一团火，缺的是点燃火花的引子. 现在我备课的重点，更多放在如何设计有张力的话题、如何捕捉发言中的思想火花、如何在观点碰撞时把握方向——就像一位“老政工”所言，好的教育者要像炊事班的掌勺人，懂得什么时候该添柴、什么时候该翻锅，让锅里的菜肴越做越香.

Sergeant Becomes “Cloud Live Broadcaster”

■ PLA Daily Special Correspondent Zhou Yun

Climbing Liupan Mountain, the voice of history seems to echo among the verdant pines and cypresses.

Standing in front of the Liupan Mountain Red Army Long March Memorial Hall, Sergeant Ma Tianle of a brigade of the 76th Group Army took a deep breath into his phone camera. This soldier, a native of Guyuan, Ningxia, never imagined that during his leave, he would be able to serve as a “cloud live broadcaster” and provide a special Red Army education lesson for his comrades in his hometown.

“Everyone, look at this monument behind me. It’s 26.8 meters tall. On its east and west sides are Chairman Mao’s famous poems, “Seven-Character Verse: The Long March” and “Qingpingle:

Liupan Mountain"..." Ma Tianle's voice carried over the mountain breeze. As the camera panned across the towering monument, sighs of admiration echoed from his comrades in the distant company. As a native of Guyuan, he's intimately familiar with every detail: "Liupan Mountain was the last major mountain the Red Army crossed during the Long March. We locals call it 'Victory Mountain'..."

Ascending the 2.5-kilometer "Red Army Trail," Ma Tianle captures 18 miniature scenes of the Long March, including the "Bloody Battle of the Xiangjiang River" and the "Four Crossings of the Chishui River." When describing the scene of the "Flying Capture of Luding Bridge," he paused: "Dark clouds gathered over the Dadu River, and iron chains trembled on the turbulent current. Back then, Red Army soldiers clung to these chains, carving a path for their troops amidst the hail of bullets."

While everyone was still lost in Ma Tianle's recounting of the Red Army's stories, he suddenly shifted the subject: "Today, the times have given us a new mission. The journey to strengthen and revitalize the military will not be smooth sailing; we will inevitably face numerous trials and tribulations. We must follow the example of our revolutionary predecessors, rise to the challenge, and hone our skills."

The lecture concluded, and applause erupted from the other end of the video. Sitting in the audience, the planner, Political Instructor Wang of a certain battalion, was gratified: "This class has touched the hearts of the officers and men."

"It was as if I were there myself," "This class gave me a deeper understanding of the spirit of the Long March."

After the lecture, Ma Tianle received many positive comments from his fellow soldiers. Ma Tianle's success as a "cloud anchor" and the resulting changes in classroom education are inseparable from the brigade's relentless pursuit of building a new-era ideological and political education system.

In the past, the brigade's ideological and political education efforts were often conducted through a "headquarters-developed plan, grassroots units humbly implemented." This "one-size-fits-all" approach seemingly ensured educational uniformity, but it neglected the vitality of grassroots innovation. Leaders of the brigade's Political Work Department admitted that this "overwhelming" approach easily led to a disconnect between educational content and the needs of soldiers, often resulting in a "meager" effect.

To address this situation, the brigade's Party Committee decided to streamline administration and delegate power. The brigade mandated time autonomy, allowing grassroots units 40% of their own time for independent education, with headquarters prohibited from interfering. Content autonomy: Within the framework of the higher-level thematic education campaign, battalions and companies were allowed to determine themes and specific content based on their unit development and the current thinking of soldiers. Form autonomy: encouraging bold innovation in educational formats,

including situational dramas, debates, and cloud-based livestreaming. Subject autonomy: breaking the stereotype of "cadres speaking, soldiers listening," encouraging soldiers from various positions to share their stories from the podium. With the full mobilization of grassroots education initiatives, officers and men are presented with engaging, down-to-earth, enthusiastic, and inspiring lectures. At the same time, an increasing number of ordinary officers and men are taking the podium, bringing more innovative vitality to the brigade's ideological and political education.

Exploring the Charm of "Autonomous Education"

■ PLA Daily Special Correspondent Zhou Yun

A brigade of the 76th Group Army is leveraging the Military History Gallery to conduct educational activities, inspiring officers and men to focus on their posts and make contributions. Photo by Liu Aizhen

A story of a comeback and a competition have resonated widely—

Using stories to teach lessons, education has the power to subtly reach people's hearts.

How appealing are autonomous grassroots education classes?

Standing on the podium, Sergeant Kong Qiqi, a "gold medal sniper" from a brigade of the 76th Group Army, was met with enthusiastic applause from the audience before he even opened his mouth. This energetic young man, born after 1995, dressed in a crisp military uniform and adorned with a dazzling array of medals, instantly captured the attention of the soldiers and officers in the audience. He received a second-class merit for combat readiness training, two third-class individual merits, and a third-class collective merit. Everyone wanted to hear the extraordinary struggles behind these honors.

"As a new recruit, my first live-fire practice was shaved. Looking at the clean target paper, I thought I'd hit the wrong target." Kong Qiqi's self-deprecating opening remarks instantly connected him with his fellow soldiers. "Today, I want to tell you that starting slow doesn't matter. With persistent effort, you can catch up. With a clear goal, even an ordinary soldier can achieve remarkable success."

To improve his concentration, Kong Qiqi used a delicate embroidery needle to thread rice. After a day of training, his index finger and thumb were painfully pricked. During gun-holding stability training, he placed shell casings on the barrel to practice aiming. He maintained steady hold for periods ranging from three minutes to 30 minutes, then to an hour. Despite his elbows being bruised and callused, he persevered. During the initial training assessment, Kong Qiqi's shooting performance reached excellent levels.

"With dreams in mind, hard work gives you strength." During the exchange, Kong Qiqi admitted that becoming a sniper pioneer is no easy task, and that it's inevitable to suffer some setbacks and

bear a few scars. His outstanding achievements are the result of daily, relentless training and painstaking effort.

The soldiers in the audience were moved to tears, their eyes filled with admiration. Corporal First Class Yuan Xiaodi wrote in his notebook: “All upward growth stems from the effort of rooting down. To master the unparalleled skill of ‘hitting the target from a hundred paces away,’ you must put in the hard work and practice to perfection.”

The 10-minute lecture drew continuous applause from the audience. Instructor Zhang of a certain company said with deep feeling, “When these exemplary soldiers take the podium, they create a positive ‘magnetic field.’ Their authentic stories of growth are more persuasive, moving, and inspiring.”

Using storytelling to convey truths, education subtly and profoundly reaches the heart. To address the issue of a weakened sense of honor among some officers and men, the instructor of a certain company invited the company’s veteran squad leader, Sergeant First Class Bi Fayun, to a self-directed education class to share his experience during a live-fire shooting assessment.

“The assessment shifted from daytime to nighttime, significantly increasing the difficulty. For the company’s honor, there was only one word: fight. Ultimately, we overcame the unfavorable conditions of high altitude, low air pressure, and darkness, achieved excellent results, and were awarded the Third Class Collective Merit.” Bi Fayun’s eloquent recounting, accompanied by images displayed on the big screen, instantly brought the officers and men in the audience back to the days of the assessment. “Without a strong sense of community and a fighting spirit, how can one achieve honor?” Listening to the old squad leader’s story, new recruit Yang Jiaxin’s heart warmed. When he first joined the company, Yang Jiaxin had a low sense of presence, rarely actively interacting with his comrades, and struggled to integrate into the company. Gradually, his confidence eroded, and his training performance steadily declined.

Bi Fayun’s teachings impressed Yang Jiaxin. He decided to learn from the old squad leader and strive for excellence. When company cadre Chen Duanwei participated in the “Four Skills” instructor competition, Yang Jiaxin used his computer skills to create courseware for him. He also partnered with fellow soldier Xiao Zhang, whose physical foundation was weak, to help him improve together. Over time, everyone gradually accepted this new comrade, and Yang Jiaxin became part of the company family. A physics experiment and a compelling short video offer innovative educational approaches.

To quench education’s thirst, it requires not only focused effort on content but also innovation in form.

A transparent water pipe and a ping-pong ball... In a company study room, a self-directed lesson on the theme of “How to Rationally View Setbacks” began. The soldiers, perplexed, surveyed the objects on the podium.

“If I turn the pipe upside down, will the ping-pong ball fall through?” As the soldiers watched with curiosity, Instructor Zhang filled the pipe with water, containing the ping-pong ball. The ball instantly floated to the top of the pipe.

“It will definitely fall,” a young soldier responded from the podium.

As Instructor Zhang inverted the pipe, the ping-pong ball at the top unexpectedly rose against the flow, carving a path through the water. This phenomenon amazed the dozens of soldiers in the audience.

Why did this happen? Everyone was filled with questions. “The ping-pong ball can swim upstream because of the pressure of the gas inside the tube...” Political Instructor Zhang explained the physics principle and expanded on it. “This shows that pressure isn’t a bad thing. As long as we view and handle it correctly, it can become a driving force that propels us forward. Facing every challenge in training, we must be like the ping-pong ball, swimming upstream under pressure.” As soon as he finished speaking, warm applause broke out.

The experiment was very simple, and the principle was easy to understand. During the subsequent discussion, Private Lu Zongren took the initiative to share his own journey. Earlier this year, he was depressed after failing the professional training assessment and even considered requesting transfer from the combat squad. “At that time, I was like a ping-pong ball stuck at the end of a tube. The pressure was immense. With the patient guidance of the squad leader, I adjusted my mindset and, through diligent training, my performance improved significantly.” Today, Lu Zongren’s professional level continues to rise, and he has become a leader among his peers.

“Educational resources are everywhere, and using them effectively is the ‘golden key’ to educating people,” Political Instructor Chen from a certain company also recounted a teaching experience. With a flick of the remote control, a short video filmed during vacation played on the big screen: A trip on the Fuxing high-speed train, the “silver sea” of photovoltaics passing by the window and the whirring “windmills” of wind turbines interweave to create a new picture of rural revitalization. Then, the camera pans across the Science and Technology Museum, showcasing simulations of the Tiangong-1 space station and the Micius quantum satellite... Each scene pulses with the spirit of the times, and the soldiers in the audience can’t help but lean forward and crane their necks to gaze at the podium.

“To quench the thirst of education, we must not only focus on content but also on innovative forms.” Political Instructor Chen explained that to deliver this lesson effectively, he began planning before his vacation, proactively understanding the hot topics of concern to the soldiers, and meticulously editing the footage upon his return. As the soldiers were captivated by the scenes in the video, he skillfully guided them: “What you see is the extensive high-speed rail network and convenient travel, which reflects the progress of national infrastructure. And behind these ‘hardcore’ technological exhibits lies the significant improvement of my country’s independent innovation

capabilities." Throughout the lecture, Political Instructor Chen's presentation was eloquent and engaging, and the soldiers in the audience listened with rapt attention.

Corporal Zhang Tengjiao said, "I used to think that education classes were just about listening to big principles, but today I realize that these principles are actually hidden in the changes around us." Sergeant First Class Chen Quan said with emotion, "This class has made me realize that China's extraordinary achievements over the years are inseparable from the hard work of everyone involved, and it has further strengthened my resolve to strengthen the military!"

When showcasing beautiful rural areas, Political Instructor Chen drew on the strategic deployment of "comprehensively promoting rural revitalization" in the report of the 20th National Congress of the Communist Party of China, guiding the soldiers to understand this as a key measure for achieving common prosperity. When introducing scientific and technological achievements, he incorporated relevant discussions on "strengthening the military through science and technology," helping the soldiers understand the crucial significance of scientific and technological innovation for national defense. The classroom atmosphere was lively, and Political Instructor Chen timely initiated the discussion: "The new vision of rural revitalization and the new achievements in scientific and technological development we see are the result of the dedication and perseverance of countless people. As soldiers, our mission is to protect these achievements. At the same time, we must also consider how to align our capabilities with our mission."

As soon as he finished speaking, the officers and men in the audience raised their hands. "Only by honing strong combat skills can we better shoulder our mission responsibilities and protect the lights of countless families." "We must take responsibility in our posts, bravely shoulder heavy responsibilities, and strengthen our skills to ensure we can step up and win at critical moments."

After everyone finished speaking, Political Instructor Chen concluded: "When our youth synchronizes with the pace of national rejuvenation, when our struggle resonates with the wave of reform and strengthening the military, this is the most moving gesture of revolutionary soldiers in the new era!" His words were met with warm applause from the audience. "Why did this lesson sparkle in the soldiers' eyes and resonate in their hearts?" As Political Instructor Chen remarked after the class, "Education isn't about one-way indoctrination; it's about igniting resonance. When we integrate the Party's innovative theories and the nation's achievements with the soldiers' realities, the truth takes on warmth and the education gains power."

A veteran mechanic and a cook took the podium—

Lighting the light in everyone's heart, allowing everyone to see each other's light.

Li Gang, a mechanic for 19 years, never imagined he would one day step forward from behind the scenes to teach his fellow soldiers.

"This is the wrench my old squad leader passed down to me. It's always been with me during maintenance and support missions." Recently, a company conducted independent education in

conjunction with the “Strengthening the Army, I Am Here” campaign. Encouraged by Political Instructor Peng, Li Gang took up an old wrench and shared the story behind it. “On the eve of an exercise, a tank’s equipment suddenly malfunctioned. The old squad leader, armed with this wrench, crawled into the sweltering engine compartment and worked continuously for several hours in temperatures exceeding 30 degrees Celsius, ultimately resolving the problem and ensuring the exercise went on as planned.”

“The faster the repair, the greater the chance of victory on the battlefield.” This was the old squad leader’s frequent motto, and it also set the standard for Li Gang as a repairman.

In the cold winter of 2021, at a training ground over 4,000 meters above sea level, the temperature plummeted to -20 degrees Celsius. During the training exercise, a certain infantry fighting vehicle suddenly malfunctioned. “Without a second thought, I crawled under the vehicle’s chassis to repair it, my hands throbbing with cold.” Ultimately, Li Gang employed the “low-temperature disassembly and repair method” he had previously developed, successfully resolving the problem and completing the repair mission.

At the end of the training session, Li Gang solemnly handed the wrench to Wang Weiquan, a young repair specialist, and encouraged him to “study hard and continue to be a pioneering repairman who ensures victory at your post.” “At that moment, I was deeply inspired.” Though the class was over, the wrench and Squad Leader Li’s weathered hands remained forever etched in Wang Weiquan’s mind. “The true heirloom isn’t the wrench itself, but the precious qualities of the old squad leader.”

Encouraging officers and men to bravely take the podium can help gather every ray of light around them. During another company’s independent education class, a somewhat immature young soldier stood at the podium. He was Corporal Zhang Fuxiang. He had no dazzling military medals or earth-shattering achievements, only quiet dedication day after day. “I know I’m ordinary, with no achievements to show for myself,” Zhang Fuxiang said nervously. “But my instructors and fellow soldiers have encouraged me, believing that ordinary perseverance is worth being recognized and acknowledged.”

Zhang Fuxiang shared his daily work in the kitchen squad: waking up after 5 a.m. to prepare breakfast, meticulously researching the recipes for each dish to ensure his comrades have a hot and delicious meal. During summer field training, temperatures in the kitchen tent soared over 40 degrees Celsius. Standing over the stove, heating oil and stirring with a spatula, the heat whipped up, burning my face. After a meal was ready, I took off my apron, soaked with sweat...

“When I brought the steaming hot meal to my comrades and heard them say, ‘It smells so good,’ all my fatigue vanished,” Zhang Fuxiang said with a shy smile.

Behind the three-foot stove, regardless of season, season, or season, the cooks worked tirelessly, diligently completing every meal. “Although I can’t win gold and silver medals in the competition

like the top athletes, I believe that making every meal well can also contribute to the combat effectiveness.

Zhang Fuxiang's simple words deeply touched many soldiers.

Every soldier is part of this "educational magnet," and their stories of growth are particularly compelling. After the class, Corporal Yuan Xingsen said with emotion, "The stories Zhang Fuxiang shared made me realize that with hard work, even ordinary positions can make extraordinary contributions."

"The true meaning of education is to illuminate the light within each person, allowing everyone to see the light in each other." Brigade leaders said they encourage soldiers from diverse positions and backgrounds to take the podium, showcasing the diversity of military career development and inspiring each soldier to shine in their roles and become better versions of themselves.

Eyewitness Accounts

Giving the Microphone to Ordinary Soldiers

■ Zhang Yanpeng

I remember when I first became a Political Instructor, I always considered myself the "main lecturer" in class. The hour-long lectures were mostly "I talk, you listen," ranging from theoretical hot topics to life lessons, from cautionary tales to interpretations and analyses, eager to cram every bit of knowledge into the soldiers' heads. However, I gradually noticed that the class wasn't very active. Most of the notes in everyone's notebooks were just lecture outlines, with very little genuine reflection.

One time, while discussing with the soldiers after class, Corporal First Class Liu Yuhao said to me, "Political Instructor, we understand the principles you're explaining. Could we share our own thoughts?" The glint in his eyes suddenly opened a key to a new understanding of my role in the classroom. I'd been performing a one-man show, forgetting that the classroom is supposed to be a place for the exchange of ideas.

A shift in perspective opened up a new world. During that self-directed learning session, I tried to break down the topic of "Becoming a qualified soldier and fulfilling our duty to defend our country" into several smaller questions, allowing each class to discuss them first before sending representatives to the podium. Corporal Dong Yuan was the first to take the podium. He shared a story about his own journey learning track driving, emphasizing the importance of mastering the profession to perfection. Worthy of the uniform he wears, his words, though simple, are deeply moving. When he reached a climax, the audience erupted in applause.

At that moment, I understood that officers and men all carry a fire within them; what they lack is the spark to ignite it. Now, my lesson preparations focus more on crafting compelling topics, capturing the sparks of thought in speeches, and maintaining direction when ideas collide. As an

old political worker once said, a good educator should be like the head chef in the kitchen, knowing when to add firewood and when to stir the pot, ensuring the dishes continue to simmer and flavor.

一位“铁甲神医”的冲锋：“党员”二字就是军令状

来源：中国军网-解放军报 作者：刘含 王轶 责任编辑：于雅倩

2025-08-20

第八十二集团军某旅三级军士长王鹏程——

“党员”二字就是军令状

■刘 含 解放军报特约通讯员 王 轶

“坦克抛锚，请求支援！”机动途中，电台里传来急促的呼叫声.

“让我来！”紧急时刻，第 82 集团军某旅三级军士长王鹏程主动请缨，火速前出.

他俯身贴住装甲板，仔细听金属部件细微的异响，小臂上青筋随着发动机的震颤突突跳动.“传动箱第三组齿轮间隙不正常！”片刻，他猛地直起身，指节敲在装甲板上……

随着轰鸣声再次响起，这位被旅队官兵称为“铁甲神医”的老兵，又一次成功排除故障.

“凡事冲在前、干在前.”提及王鹏程，不少战友都知道这名党员骨干的最大特点.

那年冬天，野外训练场遭遇寒潮，一辆综合扫雷车突发故障，液压油像动脉破裂般喷溅.

“这台装备在下一步行动中还有重要任务，今晚必须修好！”毫无疑问，这是一块难啃的骨头，但王鹏程毫不迟疑，带着工具钻入车里.

时间流逝，天色渐黑，寒风更加凛冽，给装备维修增加了不少困难. 为了方便使用工具，他索性扯开防寒面罩，用牙齿咬住手电筒照明.

经过近 9 个小时的挑灯夜战，综合扫雷车故障终于被成功排除.

“‘党员’二字，就是沉甸甸的军令状，提醒自己一刻不敢松懈.”王鹏程心里，时刻有根党员责任的弦紧绷着.

那一年，旅里配发新装备，王鹏程比操作人员还着急，经常念叨“一旦有故障，我们修不好，那就是大问题”. 为了尽快掌握维修技巧，他从基础理论开始学起，查资料、背理论、做笔记，一有时间就泡在修理车间，把装备的性能和故障问题记录下来反复琢磨，遇到不会的就联系厂家师傅请教，想方设法提升修理水平.

入伍 17 年，王鹏程时刻保持着冲锋姿态，熟练掌握 6 型主战装备维修技能，排除故障千余起. 作为单位骨干，他带头参加上级组织的履带装备修理资质认证，带领分队战友加班加点学理论，挑灯夜战练技能，身上常常满是油污. 休息时间，当大多数战友已经入睡时，他仍在思考怎么提高组训效率. 最终，他带队顺利通过资质认证.

一人强不算强，整体强才是真过硬. 作为单位唯一考取履带底盘修理技师资格的“大师傅”，王鹏程向上级申请成立能力强化班，一对一进行帮带，把自己的心得经验倾囊传授给战友，累计培养 20 余名能独立执行修理任务的骨干人才，其中 10 余人还考取了履带底盘修理高级资格证书.

The Charge of an “Ironclad Miracle Doctor”: “Party Member” Is a Military Order

Source: China Military Network - PLA Daily Authors: Liu Han, Wang Yi Editor: Yu Yaqian

2025-08-20

Sergeant Major Wang Pengcheng of a Brigade of the 82nd Group Army --

“Party Member” Is a Military Order

■Liu Han, PLA Daily Special Correspondent Wang Yi

“Tank stalled, requesting support!” A hurried call came over the radio during a maneuver.

“Let me do it!” In this critical moment, Master Sergeant Class 3 Wang Pengcheng of a Brigade of the 82nd Group Army volunteered and rushed forward.

He leaned over the armor plate, listening carefully to the subtle creaking of metal components. The veins in his forearms throbbed with the vibration of the engine. “The clearance in the third gear of the transmission case is abnormal!” A moment later, he stood up straight and rapped his knuckles on the armor plate...

As the roaring sounded again, the veteran, known as the “Ironclad Miracle Doctor” by the brigade officers and men, had once again successfully troubleshooted a fault. “Always at the forefront, always working at the forefront.” When Wang Pengcheng was mentioned, many of his comrades knew the most defining characteristic of this Party cadre.

That winter, during a cold snap at a field training ground, a mine-clearing vehicle suddenly malfunctioned, sending hydraulic oil gushing out like a burst artery.

“This equipment has a crucial mission in the next operation. It must be repaired tonight!” It was undoubtedly a tough nut to crack, but Wang Pengcheng didn’t hesitate, grabbing his tools and getting into the vehicle.

Time passed, darkness grew, and the wind intensified, making repairs even more difficult. To make it easier to use the tools, he simply tore off his cold-weather mask and held a flashlight with his teeth.

After nearly nine hours of burning the midnight oil, the mine-clearing vehicle's malfunction was finally fixed.

"The word 'Party member' is a heavy military order, a reminder to never slack off." Wang Pengcheng, the string of his Party member's responsibility, was always taut within him. That year, the brigade was issued new equipment. Wang Pengcheng was even more anxious than the operators, often muttering, "If there's a malfunction and we can't fix it, that's a huge problem." To quickly master maintenance techniques, he began with the fundamentals, researching, memorizing, and taking notes. He spent every spare moment in the repair shop, documenting the equipment's performance and malfunctions, repeatedly pondering them. When he encountered a problem he didn't understand, he contacted the manufacturer's technicians for advice, finding every possible way to improve his repair skills.

After 17 years in the military, Wang Pengcheng maintained a relentless focus, mastering the maintenance of six types of main battle equipment and troubleshooting over a thousand malfunctions. As a key member of his unit, he took the lead in participating in the tracked equipment repair qualification certification organized by his superiors. He led his comrades in studying theory and practicing late into the night, often covered in grease. During breaks, when most of his comrades had already fallen asleep, he would still ponder how to improve training efficiency. Ultimately, he led his team through the certification.

Strength alone is not strength; overall strength is true strength. As the only "master chef" in the unit who has passed the qualification of track chassis repair technician, Wang Pengcheng applied to his superiors to set up a capacity enhancement class, providing one-on-one assistance and passing on his experience to his comrades. He has trained more than 20 backbone talents who can independently perform repair tasks, and more than 10 of them have also passed the advanced qualification certificate for track chassis repair.

陆军某旅组织夜间长途机动训练

来源：解放军报 作者：米久江 裴永桢 责任编辑：郭妍菲 2025-08-24

陆军某旅组织夜间长途机动训练——

兵车辚辚子夜开进

■米久江 解放军报记者 裴永桢

“紧急集合！”初秋子夜，急促的哨音打破陆军某旅营区的宁静，一场临机长途机动训练紧张展开. 该旅官兵迅速完成物资装载、车辆检查，在夜空下集结完毕，驾驶战车朝目标地域开进.

“仗怎么打，兵就怎么练. ”该旅领导介绍，此次训练全程模拟真实战场环境，不设脚本、临机导调，设置多种复杂特情，检验部队长途机动能力和应急应战水平.

“发现‘敌’无人机侦察. ”车队出发不久，特情突至. 指挥员迅速下达指令：“立即采取隐蔽措施，干扰组实施电磁干扰！”官兵迅速行动，借助夜色就地隐蔽车辆，成功摆脱“敌”无人机追踪.

一波未平，一波又起.“前方桥梁遭‘敌’破坏！”面对突发情况，道路抢修组迅速前出展开作业. 运输分队则立刻调整路线，沿着一条隐蔽山路迂回前进.

夜色如墨，视线受阻. 车队在微光条件下艰难前行，“敌”情再度传来：“小股‘敌’袭扰！”刹那间，枪声大作，“敌”从两侧高地发起攻击. 运输分队迅速抢占有利地形组织防御，各战斗小组与“敌”展开激烈交火. 关键时刻，突击小组摸黑穿插至“敌”侧翼，对其形成包围之势，一举将其歼灭.

经过数小时的长途机动和战斗，部队按时抵达目标地域，顺利完成物资运输任务.

“此次训练，官兵之所以能沉着应对、高效处置，得益于平时的刻苦训练和充足准备. ”该旅领导介绍，近年来，他们紧贴任务实际，不断优化应急预案，加强实战化训练，确保部队在任何情况下拉得出、上得去、打得赢.

An Army Brigade Conducts Nighttime Long-Distance Maneuver Training

Source: PLA Daily Author: Mi Jiujiang, Pei Yongzhen Editor: Guo Yanfei 2025-08-24

An Army Brigade Conducts Nighttime Long-Distance Maneuver Training --

Troops and Vehicles Rumble into the Midnight

■ Mi Jiujiang, PLA Daily Reporter, Pei Yongzhen

“Emergency Assembly!” A hurried whistle shattered the tranquility of an Army brigade’s barracks at midnight in early autumn, as an impromptu long-distance maneuver training exercise commenced. The brigade’s officers and men quickly loaded supplies and inspected their vehicles, assembled under the night sky, and drove their vehicles toward their target area.

“Training is the way the battle is fought,” explained brigade leaders. This training simulates a real battlefield environment, with no scripts, improvisations, and various complex special situations to test the troops’ long-distance maneuverability and emergency response capabilities.

“Enemy drone reconnaissance detected.” Shortly after the convoy departed, a sudden emergency situation arose. The commander quickly issued the order: “Immediately take cover, and the jamming team will implement electromagnetic interference!” The officers and men acted swiftly, using the cover of darkness to conceal their vehicles and successfully evading the “enemy” drone’s tracking.

One crisis arose before another. “The bridge ahead has been destroyed by the “enemy”!” Faced with the sudden situation, the road repair team quickly advanced and began operations. The transport unit immediately adjusted its route, taking a circuitous route along a secluded mountain road.

The night was as dark as ink, obstructing vision. The convoy struggled forward in the dim light, and the “enemy” alert was received again: “Small groups of “enemy” are harassing us!” In an instant, gunfire rang out, and the “enemy” launched an attack from the high ground on both sides. The transport unit quickly seized advantageous terrain and organized a defense. The combat teams engaged in fierce firefights with the “enemy.” At a critical moment, the assault team infiltrated the “enemy” flank in the darkness, encircling them and annihilating them in one fell swoop.

After several hours of long-distance maneuvers and fighting, the troops arrived at the target area on schedule, successfully completing the supply transport mission. “The reason why the officers and men were able to respond calmly and handle the situation efficiently during this training is due to their usual hard training and sufficient preparation.” The brigade leader introduced that in recent years, they have been closely following the actual tasks, continuously optimizing emergency plans, and strengthening practical training to ensure that the troops can be deployed, go up, and win under any circumstances.

陆军某旅组织跨昼夜对抗训练

来源：解放军报 作者：张翔龙 李优 责任编辑：郭妍菲 2025-08-24

陆军某旅组织跨昼夜对抗训练——

铁流滚滚连贯突击

■张翔龙 李 优

铁甲轰鸣，硝烟弥漫. 前不久，陆军某旅装甲分队机动至某陌生地域，展开一场跨昼夜对抗训练.

“只有平时练过硬，战时才能打得赢. ”该旅领导介绍，此次对抗训练，他们从难从严设置多种特情，在近似实战环境下检验装甲分队快速反应能力，锤炼官兵全时域实战硬功.

“头车底盘遭‘敌’打击，丧失行动能力. ”机动途中，特情突至. 指挥员冷静研判、沉着应对，迅速命令装甲分队一部分正面牵制，一部分迂回包抄. 各车组密切协同、精准操作，成功击退“敌”袭扰. 与此同时，修理组根据无人机回传画面，规划抢救路线. 修理人员在火力掩护下密切配合，卸绳、拉展、连接等动作一气呵成，成功将故障车辆拖运至后方.

抵达作战地域后，面对“敌”猛烈火力，装甲分队快速展开战斗队形，凭借机动灵活战术和强劲火力优势，一举突破“敌”坚固防御.

夜幕降临，装甲分队全时保持无线电静默. 进攻时间一到，他们便以迅雷不及掩耳之势，向“敌”前进指挥所发起突袭.

“冲击执行！”随着指挥员一声令下，装甲分队立即前出，向着预定目标发起进攻……一路突击一路特情，车组配合默契、行动有力，灵活采取多种打法，顺利夺占“敌”前沿阵地.

“夜暗条件下路况不熟悉，险些贻误战机”“地形运用不当，导致不必要战损”……训练结束，官兵立即组织复盘总结. 大家围绕训练中暴露出的问题，针对性制订强训补训措施，为下一步训练找准着力点.

An Army Brigade Conducts Cross-Day and Night Combat Training

Source: PLA Daily Author: Zhang Xianglong Li You Editor: Guo Yanfei 2025-08-24

An Army Brigade Conducts Cross-Day and Night Combat Training—

A Rolling Iron Stream and Continuous Assault

■ Zhang Xianglong Li You

Armored armor roars, smoke fills the air. Not long ago, an armored unit of an Army brigade maneuvered into an unfamiliar area to conduct a cross-day and night combat training exercise.

“Only by training hard in peacetime can we win in wartime,” explained the brigade’s leadership. During this combat training, they employed various challenging and rigorous scenarios to test the armored unit’s rapid response capabilities in a near-real-combat environment and hone the officers and men’ combat skills across all timescales.

“The lead vehicle’s chassis was hit by ‘enemy’ damage, rendering it incapable of movement.” During the maneuver, a sudden and unexpected situation arose. The commander calmly assessed the situation and responded with composure, quickly ordering some units of the armored unit to engage the enemy head-on and others to conduct a flanking maneuver. The close coordination and precise operation of the various vehicle crews successfully repelled the harassing ‘enemy’ attack. Meanwhile, the repair team planned a rescue route based on the drone feed. Under cover from fire,

the repair crews worked closely together, unloading the ropes, deploying them, and connecting them in one seamless process, successfully towing the disabled vehicle to the rear.

After arriving at the combat area, facing intense enemy fire, the armored unit quickly deployed into battle formation. Leveraging their agile tactics and superior firepower, they broke through the enemy's fortified defenses.

As night fell, the armored unit maintained radio silence. Once the attack time arrived, they launched a lightning-fast assault on the enemy's forward command post.

"Charge, execute!" With the commander's command, the armored unit immediately advanced, attacking the designated target... The assault was accompanied by unexpected challenges along the way. The crews coordinated effectively, acting with tact, and flexibly employing a variety of tactics to successfully capture the enemy's forward positions.

"Unfamiliarity with the road conditions in the darkness of night nearly cost us our opportunity to fight," "Inappropriate use of the terrain resulted in unnecessary casualties." Following the training, the officers and men immediately conducted a review and summary. Focusing on the problems exposed during the training, everyone formulated targeted measures to strengthen and supplement training, and find the focus for the next round of training.

打破专业壁垒！第 80 集团军某旅创新组训提高装备维修效能

来源：解放军报 作者：王勇 付君臣 责任编辑：孙悦 2025-08-25

第 80 集团军某旅立足实战提高装备维修效能

打破专业壁垒 强化协同意识

解放军报讯 王勇、特约记者付君臣报道："接上级通报，一辆步战车遭'敌'炮火袭击受损，命你部组织抢修……"日前，第 80 集团军某旅展开一场实战背景下的装备抢修训练. 接到命令后，一个抢修小组立即前出，来自不同专业的官兵密切协同，快速完成装备受损情况评估、紧急修理等作业，得到训练督导组高度认可.

"抢修速度快一秒，打赢胜算就多一分. "该旅领导介绍，以往他们大多区分专业组织装备抢修训练，这种组训方式虽然有助于夯实各专业官兵维修技能基础，但不利于提升官兵战场协同水平. 一旦面对装备多系统受损等复杂情况，极易出现官兵配合不到位、维修效率不高等问题. 为此，该旅打破专业壁垒，推行跨专业组训模式，引导官兵强化协同意识，提升战场装备抢修质效.

一方面，该旅优化训练方式，将装备的底盘、电气、光电火控等维修课目整合为"综合故障排除"训练模块，组织官兵跨专业学习相关基础技能；另一方面，按照实战实保标准，

组建多个由不同岗位技师组成的抢修小组，常态化开展重难点课题研究和实装操作训练. 此外，他们还结合比武考核、临机拉动等时机，从难从严设置战场环境，随机导调设置综合性故障等复杂特情，锤炼官兵协同处置装备故障的实战本领.

记者在训练现场看到，某型装甲车遭“敌”炮火打击后，出现发动机熄火、电气部件失灵、通信中断等情况，抢修小组迅速前出并分工作业：底盘修理工排查动力系统，电气修理工检修车辆电路，通信修理工抢修车载设备模块……不多时，各项故障被顺利排除，战车重新投入战斗.

Breaking Down Professional Barriers! An 80th group army brigade uses innovative training to improve equipment maintenance efficiency.

Source: PLA Daily Author: Wang Yong, Fu Junchen Editor: Sun Yue 2025-08-25

A brigade of the 80th Group Army is improving equipment maintenance efficiency based on real-world combat.

Breaking down professional barriers and strengthening coordination.

PLA Daily reports by Wang Yong and special correspondent Fu Junchen: “We’ve received a report from superiors that an infantry fighting vehicle was damaged by ‘enemy’ artillery fire. Your unit is ordered to organize emergency repairs...” Recently, a brigade of the 80th Group Army conducted equipment repair training in a real-world combat setting. Upon receiving the order, a repair team immediately deployed. Officers and men from different specialties worked closely together to quickly assess equipment damage and perform emergency repairs, earning high praise from the training supervision team.

“Every second faster the repair, the better the chance of victory.” The brigade leader explained that in the past, they mostly organized equipment repair training based on their respective specialties. While this training approach helped strengthen the maintenance skills of officers and men from different specialties, it was not conducive to improving their battlefield coordination. When faced with complex situations like equipment with multiple systems damaged, problems such as poor coordination and inefficient repairs are common. To address this, the brigade has broken down specialized barriers and implemented a cross-disciplinary training model to strengthen coordination and enhance the quality and effectiveness of battlefield equipment repairs.

On one hand, the brigade optimized its training methods, integrating maintenance courses related to chassis, electrical systems, and optoelectronic fire control into a comprehensive troubleshooting training module, allowing officers and men to learn relevant foundational skills across disciplines. On the other hand, in accordance with actual combat and maintenance standards, multiple repair teams composed of technicians from different positions were established to regularly conduct research on key and difficult topics and practical equipment operation training. Furthermore, they

also used challenging and rigorous battlefield environments, including competitions and impromptu drills, to randomly simulate complex and special scenarios such as complex faults, honing officers and men' practical skills in collaboratively resolving equipment failures. The reporter saw at the training site that after a certain type of armored vehicle was hit by "enemy" artillery fire, the engine stalled, electrical components failed, and communications were interrupted. The repair team quickly moved forward and divided the work: chassis repairmen checked the power system, electrical repairmen inspected the vehicle circuits, and communications repairmen repaired the on-board equipment modules... Soon, all faults were successfully eliminated and the tanks were back in battle.

第 82 集团军某旅作战支援营某连：荣誉之光照亮转型之路

来源：解放军报 作者：屈凯明 于浩楠 赵治国 责任编辑：孙悦 2025-08-25

第 82 集团军某旅作战支援营某连激励官兵用拼搏奋斗书写崭新连史——

荣誉之光照亮转型之路

■屈凯明 于浩楠

初秋，太行腹地，第 82 集团军某旅作战支援营某连组织一场"荣誉进连史"仪式. 中士欧海华胸戴红花，向战友们讲述自己在集团军比武中夺冠的经历. 随后，在官兵的注视下，他将自己的姓名和成绩郑重地写进连队荣誉簿.

"荣誉是军人的第二生命，作为一支新调整组建连队，我们充分发挥荣誉激励作用，培塑官兵崇尚荣誉、争创荣誉的精气神. "谈及连队组建以来的奋斗历程，该连指导员李昭赫感触良多.

调整改革中，该连官兵从 3 个不同兵种单位抽调重组. 涉及专业多，骨干人才匮乏；装备新、技术含量高，组训施教无经验借鉴；官兵彼此不熟悉，归属感不强……组建之初，一道道难题摆在连队党支部面前. "官兵普遍缺乏信心，干事创业热情不足. "该连时任指导员李军回忆说，那段时间支部一班人感到压力很大.

面对转型路上的挑战，连队党支部达成共识：官兵是连队主体，更是连史书写者，要想把大家拧成一股绳，就必须用荣誉之光照亮连队转型之路，最大限度调动官兵精武强能积极性. 为此，连队党支部研究决定：凡在旅级以上单位组织的比武竞赛中取得名次，或是对连队建设有突出贡献的官兵，都可以在连队专门组织的"荣誉进连史"仪式上，亲手将自己的姓名和成绩写进连队荣誉簿.

前不久，该连组织战备拉动. 图为官兵奔赴战位. 陈天锦摄

“在荣誉簿上写下姓名的那一刻，我感到无比光荣，同时也觉得肩上的责任沉甸甸的. ”该连干部封紫宇是将姓名写进连队荣誉簿的第一个人，回忆起当时的情景，他仍激动不已.

当时，新装备列装连队不久，由于技术含量高、操作比较复杂，新装备迟迟没有生成战斗力. 为打破局面，时任班长封紫宇主动申请前往厂家跟训. 跟训期间，他白天顶着烈日上装学操作、练技能，晚上加班加点背理论、编教案. 老茧子磨出战斗力，汗珠子摔出真功夫. 归队后，封紫宇将学到的技术倾囊相授，带领班组成功破解新装备多个训练难题.

封紫宇主动请缨、奋力攻坚，帮助连队打开了工作局面. 连队党支部研究决定，为他专门组织一次“荣誉进连史”仪式.

鲜红的连旗、热烈的掌声……仪式当天，封紫宇昂首挺胸上台，在空白的连队荣誉簿上一笔一画写下自己的名字. 封紫宇的光荣时刻，让二级上士张坤龙深受触动.

从原单位转隶到该连后，张坤龙从原来的防空专业调整为通信对抗专业. 走上新岗位，厚厚的专业书籍和陌生的装备，让这个曾在专业比武中摘金夺银的训练尖子，一度打起“退堂鼓”. 在封紫宇的激励下，他重新给自己定目标、作计划，对照训练大纲逐条逐项找短板，不仅很快掌握了新装备操作技能，还摸索出一整套训练方法. 凭借出色表现，张坤龙也将自己的名字写进连队荣誉簿.

“一个标兵能影响一个班排，一个班排却不一定能辐射一个连队. ”李军回忆，随着封紫宇、张坤龙等精武标兵不断出现，标兵所在班的训练成绩明显提升，但连队整体建设水平却不见大的起色. 原来，连队官兵来自不同单位，大家的训练方式、思维模式等不尽相同，集体荣誉感、单位归属感也不强，平时训练中时常出现单打独斗、各自为战的情况.

为强化官兵“以连为家”的集体意识，该连聚焦个人与连队的关系，组织官兵开展群众性大讨论.

“作为一支新调整组建连队的成员，我们每个人都是这个集体的一部分，也是连队创业史的书写者. ”讨论中，李军的发言引发官兵反思. 讨论活动结束后，该连配套开展“集体荣誉怎么看”“我为连队建设献一计”等活动，官兵主动建言献策，为连队发展提出数十条建议.

道理越辩越明，干劲越来越足. 从那以后，连队创先争优的氛围逐渐浓厚，官兵投身训练的热情愈发高涨. 不久，连队接到参加上级组织的建制连比武的通知. “这对我们来说，既是考验也是机遇. ”现任连长赵乐天回忆，“当时，大家铆足了劲，渴望为连队夺得第一块集体奖牌. ”

营房前立起“荣誉争夺战”倒计时牌，每天更新距离比武开始的天数；楼道里挂起“英雄榜”，每周评出的训练标兵的照片被张贴到宣传栏；岗哨桌上摆放连队荣誉簿，激励大家把奋斗故事写入连史……

那段时间，连队官兵心往一处想、劲往一处使，连续展开专业技能强化训练.

比武如期而至. 训练场上，连队官兵克服多种不利因素，在复杂电磁环境下与多个连队展开激烈比拼，一举夺得建制连和最小作战单元总评“双第一”，顺利捧回连队第一块集体奖牌，创造了崭新连史.

“连队每项成绩、每份荣誉，都是官兵拼搏奋斗获得的. ”谈起连队转型攻坚的经历，李昭赫深有感触地说，虽然连队基础相对薄弱，但大家团结一致、携手向前，不断创造新荣誉.

据了解，该连自调整组建以来，连续多年取得专业比武建制连总评第一，还被集团军表彰为“练兵备战先进单位”，并荣立集体二等功.

“随着连队建设越来越好，荣誉簿上的名字和故事也越来越多. ”李昭赫介绍，他们将连队荣誉簿作为新兵、新干部“下连第一课”的鲜活教材，激励大家崇尚荣誉、珍惜荣誉、创造荣誉.

2024 年，新战士张亚康来到该连. “下连第一课”上，张亚康被连队荣誉簿上的故事深深吸引. 战区陆军“专业尖兵”张德洋、集团军“百名优秀班长”鞠平安、个人二等功获得者杨壤志……阅读他们的事迹后，张亚康暗下决心：“我也要成为连史书写者！”

心中有榜样，奋斗有方向. 在战友们的帮带下，张亚康苦练精训，训练成绩进步明显. 日前，他参加集团军专业技能比武，一举打破纪录.

短　评

崇尚荣誉才能创造荣誉

■赵治国

荣誉是军人的第二生命. 在我军近百年的奋斗历程中，无数血染的战旗、金色的勋章，如繁星般闪耀着璀璨光辉. 在荣誉与使命的召唤下，一代代官兵把对梦想的执着、对信仰的追求与对党的忠诚、对人民的热爱融为一体，用青春和热血书写忠诚与担当的强军答卷.

崇尚荣誉才能创造荣誉. 在国防和军队改革大潮中，一批新调整组建连队应运而生，加入人民军队的战斗序列. 这些连队没有悠久辉煌的连史，也缺少厚重闪耀的“荣誉家底”，空白的连队历史只能靠官兵去书写. 第 82 集团军某旅作战支援营某连以连队荣誉簿为抓手，激发官兵“我能行、我要拼”的旺盛斗志，加速连队转型步伐，在连史上留下浓墨重彩的一笔.

当前，我军正向着实现建军一百年奋斗目标加速奋进，练强战斗力的每节“链条”是题中应有之义. 各级应充分发挥官兵主体作用，充分激发广大官兵精武强能的行动自觉，推动部队建设全面发展、全面进步、全面过硬.

A Company of the Combat Support Battalion of a Brigade of the 82nd Group Army Inspires Officers and Men to Write a Brand-New Company History Through Hard Work and Striving -

The Light of Honor Illuminates the Path of Transformation

■ Qu Kaiming, Yu Haonan

In early autumn, in the heart of the Taihang Mountains, a Company of the Combat Support Battalion of a Brigade of the 82nd Group Army held a ceremony titled “Honor Enters Company History.” Sergeant Ou Haihua, wearing a red flower on his chest, recounted to his comrades his experience winning the Group Army competition. Then, under the gaze of officers and men, he solemnly inscribed his name and achievements into the company’s honor roll.

“Honor is a soldier’s second life. As a newly reorganized company, we fully leverage the motivational power of honor to cultivate a spirit among our officers and men that values and strives for honor.” Company Instructor Li Zhaohe expressed deep emotion as he discussed the company’s journey since its establishment. During the restructuring and reform, the company’s officers and men were reorganized by being drawn from three different military units. The company’s diverse specialties led to a shortage of key personnel; the equipment was new and technologically demanding, resulting in a lack of experience in training and instruction; officers and men were unfamiliar with one another, and their sense of belonging was weak... Initially, the company’s Party branch faced numerous challenges. “Officers and men generally lacked confidence and enthusiasm for work and entrepreneurship,” recalled Li Jun, the company’s then-instructor. During that period, the Party branch felt immense pressure.

Faced with the challenges of transformation, the company’s Party branch reached a consensus: officers and men are the core of the company and the writers of its history. To unite everyone, they

must illuminate the company's transformation path with the light of honor and maximize their enthusiasm for excellence. To this end, the company's Party branch decided that officers and men who achieved distinction in competitions organized by brigade-level or higher units, or who have made outstanding contributions to the company's development, could personally have their names and achievements inscribed in the company's honor book during a specially organized "Honor in Company History" ceremony. Not long ago, the company organized a combat readiness drill. The photo shows officers and men rushing to their positions. Photo by Chen Tianjin.

"The moment my name was written in the honor roll, I felt incredibly honored, yet at the same time, I felt a heavy sense of responsibility on my shoulders." Company officer Feng Ziyu was the first person to have his name inscribed in the company's honor roll, and he still feels emotional when recalling that moment.

At the time, the company had just received new equipment. Due to its high technical content and complex operation, the new equipment had been slow to become combat-ready. To break this rut, Feng Ziyu, then squad leader, volunteered to go to the manufacturer for training. During the training, he braved the scorching sun during the day to learn how to operate the equipment and practice his skills, and worked overtime at night to memorize theory and compile lesson plans. Calluses forge combat effectiveness, and sweat forges true skill. After returning to the unit, Feng Ziyu shared all the skills he had learned, leading his team to successfully overcome numerous training challenges with the new equipment.

Feng Ziyu volunteered and worked tirelessly to help the company break new ground. The company's Party branch decided to organize a ceremony specifically for him, honoring him with his honor.

Amidst the bright red company flag and enthusiastic applause... On the day of the ceremony, Feng Ziyu walked onto the stage with his head held high and wrote his name, stroke by stroke, in the blank company honor roll. Second Sergeant Zhang Kunlong was deeply moved by Feng Ziyu's glorious moment.

After transferring from his previous unit to the company, Zhang Kunlong switched from air defense to communications warfare. The new position, the thick professional textbooks, and the unfamiliar equipment made this top trainee, who had previously won gold and silver medals in professional competitions, briefly consider quitting. Encouraged by Feng Ziyu, he set new goals and plans, carefully examining the training syllabus and identifying his shortcomings. He quickly mastered the new equipment and developed a comprehensive training methodology. His outstanding performance earned Zhang Kunlong his name in the company's honor roll. "A model soldier can influence a squad or platoon, but a squad or platoon may not necessarily influence the entire company." Li Jun recalled that with the continuous emergence of exemplary warriors like Feng Ziyu and Zhang Kunlong, the training performance of their squads improved significantly, but the overall development of the company remained largely unchanged. It turned out that the officers and men of the company came from different units, with varying training methods and

mindsets. They lacked a strong sense of collective honor and belonging to the unit, and routinely engaged in independent struggles during training.

To strengthen the soldiers' collective consciousness of "treating the company as their home," the company focused on the relationship between individuals and the company and organized a large-scale mass discussion.

"As members of a newly reorganized company, each of us is part of this collective and a contributor to the company's founding history." During the discussion, Li Jun's remarks sparked reflection among the soldiers. Following the discussion, the company launched accompanying activities such as "How Do We View Collective Honor?" and "I Offer a Plan for Company Development." Soldiers actively offered suggestions and provided dozens of recommendations for the company's development.

The more they debated, the clearer the truth became, and their motivation grew. From then on, the company's atmosphere of striving for excellence grew stronger, and the officers and men' enthusiasm for training intensified. Soon, the company received a notice to participate in a competition organized by higher authorities for established companies. "This was both a test and an opportunity for us," recalled current Company Commander Zhao Letian. "At the time, everyone was working incredibly hard, eager to win the company's first collective medal."

A countdown board for the "Honor Competition" was erected in front of the barracks, updating the number of days until the competition began daily. A "Hero List" hung in the corridor, with photos of the weekly training role models posted on bulletin boards. A company honor book was placed on the sentry desk, encouraging everyone to write their stories of struggle into the company's history.

During that time, the company's officers and men worked together with unity, continuously strengthening their professional skills.

The competition arrived as planned. On the training ground, the company's officers and men overcame numerous disadvantages and fiercely competed against multiple companies in a complex electromagnetic environment. They won first place in both the established company and the smallest combat unit overall evaluations, successfully winning the company's first collective medal and creating a new chapter in the company's history. "Every achievement and honor the company has achieved is the result of the hard work and dedication of the officers and men." Speaking deeply about the company's transformation and breakthrough, Li Zhaohe said, "Although the company's foundation was relatively weak, everyone worked together to forge ahead, constantly creating new honors."

It is understood that since its reorganization, the company has consistently achieved first place in the overall evaluation of established companies in professional competitions for many years. It has also been recognized by the Group Army as an "Advanced Unit in Training and Preparation" and awarded a Second-Class Collective Merit.

“As the company continues to improve, the more names and stories are added to the honor roll.” Li Zhaohe explained that they use the company honor roll as a vivid teaching material for new recruits and cadres during their “first lesson after joining the company,” encouraging them to value, cherish, and create honor.

In 2024, new soldier Zhang Yakang joined the company. During his first lesson, Zhang Yakang was deeply captivated by the stories in the company honor roll. Zhang Deyang, the Theater Army’s “Professional Vanguard,” Ju Ping’an, one of the Group Army’s “100 Outstanding Squad Leaders,” and Yang Rangzhi, recipient of the Second Class Merit... After reading their stories, Zhang Yakang secretly resolved, “I too want to be a company history writer!”

With role models in mind, his struggles have direction. With the help of his comrades, Zhang Yakang diligently trained and achieved significant improvement in his training. Recently, he broke a record in a Group Army professional skills competition.

Short Comment

Only by valuing honor can one create honor.

■ Zhao Zhiguo

Honor is a soldier’s second life. Throughout our army’s nearly century-long struggle, countless blood-stained battle flags and golden medals have shone brightly like stars. Driven by the call of honor and mission, generations of officers and men have integrated their dedication to their dreams and pursuit of faith with their loyalty to the Party and their love for the people, using their youth and passion to write a strong military story of loyalty and responsibility.

Only by valuing honor can one create honor. Amidst the tide of national defense and military reform, a number of newly restructured companies have emerged and joined the People’s Army’s combat ranks. These companies lack a long and glorious history, nor a rich and shining legacy of honors. Their blank histories can only be written by the officers and men. A company in the Combat Support Battalion of a brigade of the 82nd Group Army, leveraging the company’s honor roll, has galvanized its soldiers’ fierce fighting spirit of “I can do it, I will fight,” accelerated its transformation, and left a significant mark in its history.

Currently, our army is accelerating its progress toward achieving the goal of its centennial. Strengthening each link in the chain of combat effectiveness is essential. All levels should fully leverage the leading role of officers and men, fully inspiring their conscious drive to refine their military skills and enhance their capabilities, and promoting the all-round development, progress, and overall excellence of the military.

"两带两学"育良才，陆军某保障大队打造新装备维修人才队伍

来源：中国军网-解放军报 作者：王传强 徐润东 责任编辑：于雅倩

2025-08-26

陆军某保障大队打造新装备维修人才队伍

“两带两学”育良才

解放军报讯 王传强、徐润东报道：“放飞！”初秋时节，某飞行训练场上，随着指挥员一声令下，一架刚修理好的某新型无人机呼啸升空，按照指令顺利完成飞行动作. 这标志着陆军某保障大队已具备该型无人机自主维修能力.

“以往，维修新型无人机需要依托生产厂家，程序相对繁琐，修理耗时也较长，一定程度上制约了部队新域新质战斗力快速生成. ”该大队领导介绍，针对这一难题，他们决定以人才队伍建设为抓手，提升新型装备“即来即修”的保障能力.

为此，该大队探索实施“专家带团队、师傅带徒弟，学习新装备、学研新技术”的“两带两学”育才工程. 针对新型装备维修保障特点，他们与相关院校、厂家合作建立人才联培共育机制，采取“岗位实践、厂家培训、院校升级”等方式，不断提升官兵专业技术水平. 他们还配套建设无人机保障专修工作区，不断提升新型装备维修保障能力.

针对部分新型装备配件附件消耗量大的实际，该大队配备大型 3D 打印设备，实现易损配件附件快速制造. 为破解基层单位检修设备少、维修能力弱的难题，他们广泛开展“小发明、小创造、小革新”活动，自主攻关研发出一批实用管用的检修设备.

该大队领导介绍，“两带两学”育才工程实施以来，单位的维修专业人才队伍不断壮大，不少骨干已具备多种型号装备维修保障能力. 下一步，他们将聚力打造集装备维修、人才培训、科研革新、器材储供等功能于一体的新型装备保障中心，锻造过硬新域新质装备保障能力.

“Two Belts, Two Learnings” Cultivates Talent: An Army Support Battalion Builds a New Equipment Maintenance Team

Source: China Military Network - PLA Daily Author: Wang Chuanqiang, Xu Rundong Editor: Yu Yaqian

2025-08-26

An Army Support Battalion Builds a New Equipment Maintenance Team

“Two Belts, Two Learnings” Cultivates Talent

PLA Daily reports: Wang Chuanqiang and Xu Rundong: “Let it fly!” In early autumn, at a flight training ground, at the commander’s command, a newly repaired new type of drone soared into the air, successfully completing its flight maneuvers as instructed. This marks the Army Support Battalion’s acquisition of independent maintenance capabilities for this type of drone.

“Previously, repairing new drones required relying on the manufacturer, resulting in a relatively cumbersome and time-consuming process. This, to a certain extent, hindered the rapid development of the unit’s new domain and new quality combat capabilities.” The battalion leader explained that to address this challenge, they decided to focus on talent development to enhance the “on-demand repair” support capabilities for new equipment. To this end, the brigade has explored and implemented a “Two Leads, Two Learnings” talent development program, which features experts leading teams and masters mentoring apprentices, enabling them to learn new equipment and research new technologies. Targeting the unique characteristics of new equipment maintenance and support, they have partnered with relevant colleges and manufacturers to establish a joint talent development mechanism, employing methods such as on-the-job training, factory training, and college upgrades to continuously enhance the professional and technical skills of officers and men. They have also established a dedicated drone maintenance work area to continuously improve their maintenance and support capabilities for new equipment.

Given the high consumption of parts and accessories for some new equipment, the brigade has equipped itself with large-scale 3D printing equipment to enable rapid production of vulnerable parts and accessories. To address the challenges of limited maintenance equipment and weak maintenance capabilities at the grassroots level, they have extensively engaged in “small inventions, small creations, and small innovations,” independently developing a number of practical and effective maintenance equipment.

Brigade leaders explained that since the implementation of the “Two Leads, Two Learnings” talent development program, the unit’s maintenance professional team has continued to grow, with many key personnel now possessing maintenance and support capabilities for a wide range of equipment models. In the next step, they will focus on building a new equipment support center that integrates equipment maintenance, talent training, scientific research and innovation, equipment storage and supply, and forge strong new-domain and new-quality equipment support capabilities.

暗夜飞行、紧急机降……陆军某旅组织跨昼夜飞行训练

来源：中国军网-解放军报 作者：胡其武 邵博康 责任编辑：于雅倩

2025-08-26

陆军某旅组织跨昼夜飞行训练——

“夜鹰”飞入山谷

■解放军报特约通讯员 胡其武 记者 邵博康

战机轰鸣，铁翼飞旋. 初秋，陆军某旅一场跨昼夜实战化飞行训练拉开战幕.

“起飞！”接到指令，多架直升机按战术编组依次升空，直奔数百公里外的目标地域.

该旅领导介绍，此次训练全程融入战术背景，采取昼夜连贯、实景模拟等方式实施，包括空地火力打击、多路立体攻击等内容，旨在深入推进战训耦合，加速提升部队实战能力.

“前方即将进入山谷，注意飞行安全. ”起飞不久，长机机长提示各机组，“加强观察，保持好飞行姿态，编队目视跟进. ”

编队绕过蜿蜒山体，在峡谷间穿行. 突然，前方风向、风速发生变化. 面对特情，编队各机飞行员熟练操纵机载设备、沉稳驾驶战机，顺利飞越危险空域.

“未来战场复杂多变，加快提升部队遂行多样化任务能力是当务之急. ”该旅领导介绍，为此，他们突出以战领训，在训练中将条件设真、设险、设实，把山谷迷航、雷达侦测、空中拦截等多种特情融入训练，不断提升部队真打实抗水平.

记者了解到，此次跨昼夜训练，他们根据训练内容合理搭配机组人员. 训练前，飞行员围绕任务特点研究制订多套作战方案，并针对任务规划、特情处置等环节进行反复研究.

得益于前期的充足准备，长机飞行员在训练中应对自如. 面对“敌”空中拦截，他驾驶战机快速机动至有利位置，果断对“敌”实施打击.

暮色四合，直升机编队经过短暂的油料补充后，再次升空投入训练. 由于夜间山谷能见度低、观察距离受限，加之夜晚气温骤降、气流紊乱，飞行员不敢有一丝马虎，根据仪表参数变化不断调整直升机姿态.

正当编队借助夜视仪器搜索目标时，特情突至：“5 号地域‘伤员’情况危急，请迅速前往实施救援. ”收到指令后，任务机组迅速赶往目标地域，暗夜飞行、紧急机降、运送“伤员”……整个过程高效顺畅.

“此次跨昼夜飞行训练，重在考验飞行员全天候态势感知和装备操作能力. ”该旅领导告诉记者，近年来，他们通过模拟真实战场环境，提升飞行训练“含战量”，部队全时待战、随时能战的能力持续提升.

Dark-Night Flights, Emergency Landings... An Army Brigade Conducted Cross-Day and Night Flight Training.

Source: China Military Network - PLA Daily. Author: Hu Qiwu, Shao Bokang. Editor: Yu Yaqian.

2025-08-26

An Army brigade conducted cross-day and night flight training—

“Nighthawk” flew into the valley.

■ PLA Daily Special Correspondent Hu Qiwu, Reporter Shao Bokang

Combat aircraft roared, wings whirled. In early autumn, an Army brigade launched a cross-day and night combat flight training exercise.

“Take off!” Upon receiving the command, multiple helicopters took off in tactical formations, heading for the target area hundreds of kilometers away.

Brigade leaders explained that this training was fully integrated into the tactical context, conducted through continuous day and night operations and real-world simulations. It included air-to-ground firepower strikes and multi-pronged, three-dimensional attacks. The goal was to further integrate combat and training and accelerate the improvement of the troops’ combat capabilities. “We’re about to enter a valley ahead, please pay attention to flight safety,” the captain of the lead aircraft reminded the crews shortly after takeoff. “Keep observation, maintain a good flight attitude, and follow the formation visually.”

The formation skirted a winding mountain range and passed through a canyon. Suddenly, the wind direction and speed ahead changed. Facing the unusual situation, the pilots of each aircraft in the formation expertly operated their onboard equipment and calmly piloted their aircraft, successfully navigating the dangerous airspace.

“Future battlefields are complex and volatile, and accelerating the improvement of the troops’ ability to carry out diverse missions is a top priority,” explained the brigade’s leadership. To this end, they emphasized training based on combat scenarios, creating realistic, dangerous, and practical training conditions. They incorporated various unusual scenarios, such as valley navigation, radar detection, and aerial interception, to continuously enhance the troops’ combat readiness.

Reporters learned that during this multi-day and night training exercise, crew members were strategically assigned based on the training content. Before the training, the pilots developed multiple operational plans based on the mission’s characteristics and repeatedly researched aspects such as mission planning and unusual situation handling.

Thanks to their thorough preparation, the lead pilot handled the training with ease. Facing an “enemy” aerial intercept, he quickly maneuvered his fighter jet to a favorable position and decisively launched an attack.

As dusk fell, the helicopter formation, after a brief refueling, took off again for training. Due to the low visibility and limited observation range in the valley at night, coupled with the sudden

drop in temperature and turbulent airflow, the pilots took no chances, constantly adjusting the helicopter's attitude according to changing instrument parameters.

Just as the formation was searching for the target using night vision equipment, a sudden emergency message arrived: "The 'injured' in Area 5 is in critical condition. Please proceed to rescue immediately." Upon receiving the order, the mission crew quickly rushed to the target area, flying in the dark, making an emergency landing, and transporting the "injured"... The entire process was efficient and smooth.

"This cross-day and night flight training focuses on testing pilots' all-weather situational awareness and equipment operation capabilities." Brigade leaders told reporters that in recent years, they have enhanced the combat content of flight training by simulating real-world battlefield environments, continuously improving the unit's ability to remain combat-ready and operational at all times.

陆军某旅组织多兵种训练：暗夜出击 协同制胜

来源：中国军网-解放军报 作者：张文哲 杨茂生 责任编辑：李佳琦 发布：2025-08-26

"'敌'占据主要道路和制高点，命你部做好战斗准备！"初秋深夜，某野外训练场，陆军某旅一场多兵种协同训练有序展开.

侦察分队官兵趁着夜色潜入密林，炮兵分队官兵运用夜视装备展开侦搜，主战分队官兵向任务区域快速机动……随着指挥员一声令下，各作战单元迅速展开行动.

"战争不分昼夜，我们组织夜间训练，就是要引导官兵时刻保持'弓满弦、带甲眠'的备战状态. "该旅领导介绍，此次训练，他们紧贴实战构设多兵种协同作战场景，围绕隐蔽接敌、引导打击等课目展开专攻精练，锤炼官兵夜战本领.

"仅剩 3 号道路可供装甲车辆通行，且'敌'反装甲武器已占据有利地形. "机动途中，根据侦察分队传回的情报，指挥员迅速研判战场态势，果断调整进攻战术和协同时机.

步兵、侦察、电抗分队持续袭扰，吸引"敌"注意. 装甲车辆迅速疏散隐蔽，待炮兵分队实施火力打击时，借炮火声掩盖发动机轰鸣，沿 3 号道路全速开进.

各分队合力突击，顺利抵达预定地域后，立即投入"战斗". 官兵实时共享战场信息，保持密切协同，很快瓦解"敌"外围防线，最终成功占领"敌"指挥所，完成既定任务.

晨曦微露，参训官兵征衣未解，就地展开复盘. 针对查找出的"敌情预想不充分""隐蔽接敌意识不强"等短板不足，他们逐一制订针对性补差计划，为接下来的训练找准方向.

An Army Brigade Conducts Multi-Service Training: Striking in the Dark, Coordinated for Victory

Source: China Military Network - PLA Daily Author: Zhang Wenzhe, Yang Maosheng Editor: Li Jiaqi Published: 2025-08-26

“The ‘enemy’ has occupied the main roads and commanding heights. Your unit is ordered to prepare for battle!” Late one night in early autumn, at a field training ground, a multi-service coordinated training exercise for an Army brigade commenced in an orderly fashion.

Reconnaissance troops infiltrated the dense forest under cover of darkness, artillery troops employed night vision equipment for reconnaissance, and main combat troops rapidly maneuvered toward their mission area... At the commander’s command, each combat unit swiftly sprang into action.

“War knows no day or night. We organize nighttime training to ensure our soldiers remain ‘bows fully strung, armored to sleep,’” explained the brigade leader. For this training, they closely replicated actual combat scenarios involving multi-service coordinated operations, focusing on covert engagements and guided strikes to hone their nighttime combat skills. “Route 3 is the only remaining route for armored vehicles, and the enemy’s anti-armor weapons have already occupied advantageous terrain.” During the maneuver, based on intelligence transmitted by the reconnaissance team, the commander quickly assessed the battlefield situation and decisively adjusted offensive tactics and coordination timing.

Infantry, reconnaissance, and countermeasure teams continued harassment, attracting the enemy’s attention. The armored vehicles quickly dispersed and took cover, waiting for the artillery team to launch a fire attack. Using the sound of artillery fire to mask the roar of their engines, they advanced at full speed along Route 3.

The various teams worked together to successfully reach the designated area and immediately engaged in “battle.” Sharing battlefield information in real time and maintaining close coordination, the officers and men quickly dismantled the enemy’s outer defenses and ultimately successfully captured the enemy command post, completing their assigned mission.

At dawn, the participating officers and men, still in their uniforms, began a review on the spot. They developed targeted remedial plans for identified shortcomings, such as “inadequate anticipation of the enemy situation” and “lack of awareness of covert engagements,” to guide the subsequent training.

官兵巡逻途中.

巡逻官兵在界碑前面对国旗庄严宣誓.

官兵检查边防设施.

官兵协力攀登山崖.

初秋，驻守南国边陲的陆军某边防连官兵，又一次踏上边关巡逻路.

上午 8 时许，巡逻分队官兵乘坐巡逻车向着边境线进发. 山路蜿蜒崎岖，巡逻车在陡峭的山崖上缓慢行驶. 途经一处危险路段时，官兵们紧抓扶手，就连军犬都紧绷着身体，发出急促的喘息声.

到达下车点后，官兵们迅速整理武器装备，改为徒步行进. 山峦叠嶂，天气多变. 巡逻分队刚刚翻过一个山头，万里晴空骤然“变脸”，瞬间下起倾盆大雨. 山路湿滑泥泞，官兵们小心翼翼地前行，还要提防随时可能出现的毒蛇毒虫. 一位老兵介绍说，执行巡逻任务的官兵几乎人人脸上、手上都有被荆棘划破和被毒虫叮咬的血痕. 在边防，大家对此已见怪不怪.

“前方 600 米处发现边防设施损毁，搜索组前出侦察，其他人员做好战斗准备……”突然，巡逻分队接到上级情况通报，随即展开一场边境应急处突训练.

下午 3 时许，经过 7 个多小时的艰难行进，巡逻分队抵达此次巡逻的最后一个点位. 官兵们认真检查边防设施，随后登上哨楼观察边情.

完成巡逻任务后，官兵们在界碑前展开五星红旗，面对国旗庄严宣誓：“边关有我在，请祖国和人民放心……”铮铮誓言，在山谷间久久回荡.

A Glimpse of Soldiers from an Army Border Defense Company on Duty

Source: China Military Network - PLA Daily Author: He Fanglin, Yang Dongyang, Liang Tong Editor: Li Jiaqi 2025-08-26

Crossing Mountains and Ridges to Patrol the Border

—A Glimpse of Soldiers from an Army Border Defense Company on Duty

■ Photo Report by He Fanglin, Yang Dongyang, and Liang Tong

Soldiers on patrol.

Patrol officers and men solemnly swear an oath before the national flag in front of a boundary marker.

Soldiers inspect border defense facilities.

Soldiers work together to climb a cliff.

In early autumn, soldiers from an Army border defense company stationed on the southern border once again embarked on a border patrol.

Around 8 a.m., the patrol team boarded a patrol car and headed for the border. The mountain road was winding and rugged, and the patrol car drove slowly along the steep cliffs. Passing a dangerous section, the soldiers held on to the handrails tightly, and even the military dog tensed, panting rapidly.

After arriving at the drop-off point, the soldiers quickly gathered their weapons and equipment and resumed their journey on foot. The mountains are rugged and the weather is unpredictable. Just as

the patrol team crested a hill, the clear blue sky suddenly changed, and a torrential downpour began. The mountain path was slippery and muddy, and the soldiers proceeded cautiously, wary of venomous snakes and insects. A veteran soldier explained that nearly every patrolman bore bloody marks on their faces and hands from thorns and insect bites. This was commonplace at the border.

“Damaged border facilities have been discovered 600 meters ahead. The search team is conducting reconnaissance. The rest of the team is preparing for action...” Suddenly, the patrol team received a report from their superiors and immediately began a border emergency response drill.

At around 3:00 PM, after over seven hours of arduous travel, the patrol team arrived at the final point of their patrol. The soldiers carefully inspected the border facilities and then ascended the sentry tower to observe the situation. After completing the patrol mission, the officers and men unfolded the five-star red flag in front of the boundary marker and solemnly swore in front of the national flag: “I am here at the border, please rest assured, motherland and people...” The solemn oath echoed in the valley for a long time.

Footage of an Army Brigade’s Air Defense Battalion Conducting Live-Fire Training

Source: PLA Daily Author: Lu Mingkai, Lin Min Editor: Zhang Shuo 2025-09-02

Sharp Arrows Released

—Videos of a Live-Fire Training Conducted by an Army Brigade’s Air Defense Battalion

■ Photo Report by Lu Mingkai and Lin Min

Recently, an Army brigade’s air defense battalion conducted live-fire training to hone officers and men’ ability to navigate complex air situations.

As the piercing air defense sirens blared, each combat detachment responded quickly. Radar operators, intently glued to their screens, searched for traces of incoming targets in the complex electromagnetic environment.

“Target detected in the southeast!” The commander, after quickly analyzing the air situation based on radar data, decisively issued the command. The anti-aircraft artillery detachment quickly adjusted its firing angle, while the surface-to-air missile detachment urgently prepared for missile fire.

“Fire!” With the commander’s command, air defense missiles, like arrows from a bow, whizzed towards their targets. Meanwhile, the anti-aircraft artillery detachment’s fire formed a dense web of fire in the air, fiercely engaging the low-altitude penetration targets. The new target drone used in this training exercise was reportedly capable of simulating a variety of aerial threats, increasing the training’s difficulty. Facing a complex and ever-changing aerial situation, the soldiers flexibly employed tactics and strategies to successfully complete the combat mission.

As night fell, new “enemy information” arrived. All combat detachments responded to the call and quickly engaged in a new round of combat.

Soldiers quickly boarded their vehicles.

vehicles maneuvered.

Nighttime concentrated fire.

Missiles roared, hurtling towards their targets.

三面战旗一堂课！陆军某旅某连官兵在荣誉故事中汲取奋进力量

来源：解放军报 作者：王子牛 黄海 责任编辑：王粲 2025-09-03

聆听荣誉故事 汲取奋进力量

■王子牛 解放军报特约通讯员 黄 海

该连指导员（讲台中间站立者）在讲述连队历史. 王子牛 摄

初秋的一天，第 74 集团军某旅某连官兵，齐聚训练中心，上了一堂连史教育课.

“同志们，我连成立以来 3 次被授予荣誉称号. 今天，我想和大家一起重温历史，聊一聊‘荣誉与传承’这个话题. ”该连黎指导员开宗明义，“下面，有请战旗登场！”

黎指导员话音刚落，6 名战士护送 3 面战旗——“北上抗日先锋连”“大生产模范连”“精武强能标兵连”走到台前. 红绸旗面、金色大字，诉说着连队南征北战、艰苦奋斗、精武强能的光辉岁月.

“第一面战旗，‘北上抗日先锋连’. ”随着两名护旗战士上前一步，黎指导员娓娓道来，台下官兵认真聆听——

1934 年 11 月 16 日，为了抗日救亡，连队随红 25 军高举“中国工农红军北上抗日第二先遣队”旗帜，从河南省罗山县何家冲出发，前往陕北. 12 月 8 日，行至陕西省洛南县三要司时，国民党军队占据易守难攻的九泉山高地疯狂阻击，妄图歼灭红 25 军.

情况危急，该连干部带领部分官兵，携带少量枪支弹药和砍刀，徒手攀上九泉山侧面陡壁直插敌后，打乱守敌防御部署. 山下大部队顺势发起进攻，一举攻下高地.

“这是红 25 军入陕后打的第一场胜仗. ”黎指导员说，此战过后，连队被红 25 军授予“北上抗日先锋连”荣誉称号.

“第二面战旗，‘大生产模范连’. ”黎指导员接着介绍，“这是抗日战争时期，我连被授予的第二个荣誉称号. ”

卢沟桥事变爆发后，1937 年 10 月，该连被编入八路军陕甘宁边区留守兵团. 1941 年前后，由于日寇疯狂进攻和“扫荡”、国民党实施军事包围和经济封锁，解放区陷入严重困境.

“在党中央的号召下，我连先赴南泥湾开荒，后赴槐树庄生产，官兵一手拿枪、一手拿锄，边反‘扫荡’边耕种，硬是开垦出大片良田，超额完成‘耕作两年余粮一年’的目标. ”讲到此处，黎指导员手指战旗说道，“因完成任务出色，1943 年 12 月，八路军陕甘宁联防司令部授予连队‘大生产模范连’荣誉称号. ”

话毕，大家的目光投向了“精武强能标兵连”战旗. “这是我连在和平建设时期获得的荣誉. ”黎指导员继续介绍第三面战旗.

2006 年，连队整建制换装某型武器. 为了尽快形成战斗力，连队党支部立下“军令状”.

缺教程、缺人才、缺经验，是连队当时面临的最大困难，但官兵们没有被吓倒. 认真研读武器说明书，请教厂家技术人员……他们边摸索、边操作、边完善，经过 5 个月集智攻关，不仅编写了操作规程和训练教案，圆满完成示范任务，还在当年的实弹射击检验中，实现首发命中、发发命中.

更精彩的故事还在后面. 该连以换装转型为契机，深入开展实战化训练，完成几十个课目试训论证，多次参加重大演习，培养了一大批专业人才. 2011 年 3 月，该连被授予“精武强能标兵连”荣誉称号.

“大家有什么感想，可以结合自己的经历谈一谈. ”讲述完毕，黎指导员组织互动讨论.

“如果分别用一个关键词描述 3 面战旗代表的精神，我觉得是‘胜战’‘奋斗’和‘攻坚’. ”中士吴宏鑫第一个起身，分享自己去年的经历.

一次，上级将举行战场救治专业比武，吴宏鑫第一时间报了名. 进入集训队后，他需要与许多经验丰富的卫生员同场竞技，争夺比武“入场券”.

集训内容多、难度大，只是连队兼职卫生员的吴宏鑫，考核成绩经常排名倒数，这让他打起了“退堂鼓”.

一次和其他单位战友讨论军史，说到九泉山战斗时，吴宏鑫猛然醒悟：“面对武器装备和作战地形均占优的敌人，革命先辈没有退缩，而是选择英勇战斗，不惜牺牲生命. 与他们比起来，我现在遇到的这点困难根本不值一提！”

从那以后，吴宏鑫自我加压苦练，成绩不断提升，最终脱颖而出走上比武场，并夺得个人第三名.

“连队的荣誉战旗带给我的，是要始终保持勇于攻坚、追求卓越的那股闯劲. ”吴宏鑫说完，一级上士李政钊接着发言.

新兵下连后，李政钊一心想成为炮长，为此苦练操作. 然而，一次演练给他泼了一盆冷水——装定参数出现误差，他却不知原因何在、如何处置，连长对他提出批评.

“我那时才明白，要想成为一名炮长，必须全面掌握装备原理性能. ”李政钊回忆说，“装备原理晦涩难懂，但想到当年的老兵在没有教程、人才和经验的情况下，仍能依靠攻坚啃下‘硬骨头’，我觉得自己也可以做到. ”想通之后，李政钊开始刻苦学习相关专业知识和技能. 两年后，他如愿走上炮长岗位.

榜样的力量是无穷的. 站在战旗前，下士杨智宏、上等兵覃溪也讲述了自己的奋斗故事，现场不时响起阵阵掌声.

“相信听了战友们的分享，大家对‘敢于攻坚、敢打必胜、敢挑重担、敢当先锋’的连队精神有了更深感悟. ”教育课临近结束，黎指导员接过话头，进行总结，“历史的接力棒，已经传到我们这一代人手中. 我们一定要传承发扬革命先辈的优良传统和作风，把‘四敢’精神落实到练兵备战中、体现在一人一岗上，为如期实现建军一百年奋斗目标贡献力量. ”

三面战旗一堂课，奋进路上有来人. 据了解，讲述荣誉背后的故事，已成为该连教育课堂上的一个“保留节目”. 一茬茬官兵结合思想实际和不同任务，深入挖掘、常讲常新，从中源源不断地汲取干事创业的强劲动力.

Three Battle Flags, One Lesson! Officers and Men of a Company in a Certain Army Brigade Draw Strength From Stories of Honor.

Source: PLA Daily Author: Wang Ziniu, Huang Hai Editor: Wang Can 2025-09-03

Listen to stories of honor, draw strength from forging ahead

■ Wang Ziniu, PLA Daily Special Correspondent Huang Hai

The company political instructor (standing in the center of the podium) recounts the company’s history. Photo by Wang Ziniu

On an early autumn day, officers and men of a company in a certain brigade of the 74th Group Army gathered at the training center for a company history lesson.

“Comrades, our company has been awarded honorary titles three times since its founding. Today, I would like to review this history with you and discuss the topic of ‘honor and inheritance,’“ said Instructor Li of the company. “Now, please welcome the battle flags!”

As soon as Political Instructor Li finished speaking, six soldiers escorted three battle flags—the “Northward Anti-Japanese Pioneer Company,” the “Model Company for Mass Production,” and the “Model Company for Advanced Martial Arts and Strong Ability”—to the stage. The red silk banner, adorned with golden characters, recounts the company’s glorious years of battles, arduous struggles, and refined military prowess.

“The first battle flag, ‘Northward Anti-Japanese Vanguard Company.’“ As two flag bearers stepped forward, Instructor Li recounted the story, and the soldiers in the audience listened intently.

On November 16, 1934, in the fight against Japanese aggression and national salvation, the company, along with the 25th Red Army, held high the banner of “Second Advance Team of the Chinese Workers’ and Peasants’ Red Army Northward Anti-Japanese War,” and set out from Hejia Chong, Luoshan County, Henan Province, for northern Shaanxi. On December 8, upon reaching Sanyaosi, Luonan County, Shaanxi Province, the Kuomintang army, occupying the easily defended and impenetrable Jiuquan Mountain heights, launched a ferocious attack, attempting to annihilate the 25th Red Army.

In dire straits, company cadres led a group of soldiers, armed with limited firearms, ammunition, and machetes, and scaled the steep flanks of Jiuquan Mountain with their bare hands, advancing directly behind enemy lines and disrupting their defensive arrangements. The larger force below seized the opportunity and launched an offensive, capturing the heights in one fell swoop. “This was the first victory won by the Red 25th Army after entering Shaanxi,” Instructor Li said. After this battle, the company was awarded the honorary title of “Northward Anti-Japanese Vanguard Company” by the Red 25th Army.

“The second battle flag was the ‘Model Company for Mass Production,’“ Instructor Li continued. “This was the second honorary title awarded to our company during the War of Resistance Against Japanese Aggression.”

After the Lugou Bridge Incident, in October 1937, the company was incorporated into the Eighth Route Army’s Shaanxi-Gansu-Ningxia Border Region Rear Guard Corps. Around 1941, due to the Japanese invaders’ relentless attacks and “mopping-up operations,” and the Kuomintang’s military encirclement and economic blockade, the liberated areas fell into serious difficulties. “At the call of the Party Central Committee, our company first went to Nanniwan to open up wasteland, and then to Huaishuzhuang for production. Armed with rifles in one hand and hoes in the other, we cultivated the land while fighting the ‘mopping-up’ campaigns. We reclaimed vast tracts of fertile farmland, exceeding the goal of ‘two years of cultivation and one year of surplus grain.’“ At this point, Instructor Li pointed to the battle flag and said, “For our outstanding performance, in

December 1943, the Eighth Route Army's Shaanxi-Gansu-Ningxia Joint Defense Command awarded our company the honorary title of 'Model Company for Mass Production.'"

After this, everyone's attention turned to the battle flag of "Model Company for Excellence in Military Skills and Strong Abilities." "This is an honor our company has earned during the period of peacetime construction," Instructor Li continued, introducing the third battle flag.

In 2006, the entire company was equipped with a certain type of weapon. To quickly develop combat effectiveness, the company's Party branch issued a "military pledge."

The company's greatest challenges at the time were a lack of training, personnel, and experience, but the officers and men remained undaunted. Carefully studying weapon manuals and consulting with manufacturer technicians... they explored, operated, and refined their techniques. After five months of collective effort, they not only developed operating procedures and training lesson plans, successfully completing the demonstration mission, but also achieved first-shot hits and every shot hit during live-fire tests that year.

More exciting stories lie ahead. Taking the opportunity of the equipment change and transformation, the company conducted in-depth combat-oriented training, completed dozens of training sessions, participated in numerous major exercises, and trained a large number of professional personnel. In March 2011, the company was awarded the honorary title of "Model Company for Elite Martial Arts and Strong Capabilities."

"What are your thoughts? Feel free to share your own experiences." After the presentation, Instructor Li led an interactive discussion.

"If I had to use a keyword to describe the spirit represented by each of the three battle flags, I think it would be 'victory,' 'struggle,' and 'overcoming difficulties.'" Sergeant Wu Hongxin was the first to stand up and share his experiences from the previous year.

Once, his superiors were planning a battlefield medical professional competition, and Wu Hongxin signed up immediately. After entering the intensive training unit, he faced competition with experienced medical personnel, vying for a spot in the competition.

The training was extensive and challenging, and Wu Hongxin, a part-time company medical officer, often ranked near the bottom in assessments, which made him consider quitting.

During a military history discussion with comrades from other units, the Battle of Jiuquan Mountain came to a sudden realization: "Faced with an enemy superior in both weaponry and terrain, our revolutionary predecessors didn't retreat, but chose to fight bravely, even at the cost of their lives. Compared to them, the difficulties I face now are nothing!"

Since then, Wu Hongxin has pushed himself to the limit, his performance steadily improving, and he ultimately emerged victorious, winning third place in the competition.

“The company’s honorary battle flag has instilled in me the courage to persevere and strive for excellence,” Wu Hongxin said, followed by the speech of First Sergeant Li Zhengzhao.

After joining the company, Li Zhengzhao, a new recruit, was determined to become a gunner and diligently practiced his skills. However, a drill proved disheartening for him. When the set parameters showed an error, he didn’t know the cause or how to handle it, leading to criticism from his company commander.

“It was then that I realized that to become a gunner, I had to thoroughly understand the principles and performance of the equipment,” Li Zhengzhao recalled. “The equipment principles were obscure and difficult to understand, but thinking about how the veterans back then, without instruction, talent, or experience, were able to overcome these challenging tasks, I felt I could do it, too.” With this understanding in mind, Li Zhengzhao diligently studied the relevant professional knowledge and skills. Two years later, he finally achieved his dream of becoming a gunner.

The power of example is immense. Standing before the battle flag, Corporal Yang Zhihong and Private First Class Qin Xi shared their stories of struggle, drawing applause from the audience. “I believe that after listening to the sharing of our comrades, everyone has gained a deeper understanding of the company spirit of ‘daring to tackle tough problems, daring to fight and win, daring to shoulder heavy responsibilities, and daring to be pioneers.’“ As the class drew to a close, Instructor Li took over and summarized, “The baton of history has been passed to our generation. We must inherit and carry forward the fine traditions and style of our revolutionary predecessors, implement the ‘Four Dare’ spirit in training and preparation, and embody it in every individual and every position, so as to contribute to the timely realization of the goals of the PLA’s centenary.”

Three battle flags, one lesson, newcomers on the road to progress. It is understood that telling the stories behind honors has become a staple of the company’s classroom instruction. Successive generations of soldiers, drawing on their current thinking and diverse tasks, delve deeply into these stories, constantly revisiting them and drawing strong motivation from them to persevere and strive for success.

昼夜连贯铸“铁拳”，第 81 集团军某旅开展实弹射击训练

来源：解放军报 作者：马京京 贾豪天 责任编辑：李佳琦 2025-09-06

第 81 集团军某旅开展实弹射击训练——

昼夜连贯铸“铁拳”

■马京京 贾豪天

战车驰骋，烟尘飞扬. 日前，第 81 集团军某旅组织装甲分队开展跨昼夜实弹射击训练，全面检验装甲分队快速反应能力，锤炼官兵全时域实战硬功.

“前方道路塌陷！”接到特情通报，现场指挥员根据侦察组回传的路况信息，指挥编队根据重新制订的行军路线向预定地域机动.

各车组完成战场机动后，迅速转换战斗队形，向目标发起突击. 装甲车内，车长通过观瞄系统锁定“敌”坚固工事，炮手灵活选择射击弹种和射击方式.

“发射！”随着指挥员一声令下，数辆战车对“敌”工事发起集火打击. 顷刻间，目标区域火光冲天、硝烟弥漫.

“只有从难从严从实战出发，在真打实抗中摔打磨砺，才能练就过硬本领. ”该旅领导介绍，此次训练，他们全程融入战术背景，将不同专业的兵力装备以模块化方式编组衔接，根据不同战场环境灵活配置，围绕运动通信、车组协同、火力打击等课目，采取昼夜连贯的方式实施，通过优化训练模式、探索作战方法、释放装备潜能，不断提高装甲分队火力打击效能.

训练中，实战化课目接连展开，特情险情相互交织. “‘敌’卫星过顶侦察！”首轮突击刚结束，特情接踵而至. 指挥员当机立断，指挥编队利用地形展开隐蔽伪装.

一波未平，一波又起. “‘敌’直升机低空突袭”的通报传来，各车组密切协同，用高射机枪迅速构建防空火力网.

夜幕降临，“战斗”还在继续. 指挥车内，参谋人员运用指挥信息系统，将侦察获取的“敌情”数据分发至各作战单元. 官兵借助微光、红外等夜视器材，快速补充弹药、检查装备状态，展开新一轮打击行动.

该旅领导介绍，他们将针对训练中发现的问题不足制订改进措施，进一步优化训练方案，强化各兵种专业间的协同训练，培塑官兵体系作战思维，将“硬指头”攥成“铁拳头”，不断夯实部队战斗力基础，做到“像打仗一样训练，像训练一样打仗”.

An 81st Group Army Brigade Conducts Live-Fire Exercises, Forging an “Iron Fist” Day and Night.

Source: PLA Daily Author: Ma Jingjing, Jia Haotian Editor: Li Jiaqi 2025-09-06

A brigade of the 81st Group Army conducts live-fire exercises—

A brigade of the 81st Group Army conducts live-fire exercises, forging an “iron fist” day and night.

■Ma Jingjing, Jia Haotian

Tanks gallop, smoke and dust billow. Recently, an armored unit of a brigade of the 81st Group Army conducted live-fire exercises across day and night, comprehensively testing the unit’s rapid response capabilities and honing the officers and men’ combat skills in all-time combat scenarios.

“The road ahead has collapsed!” Upon receiving a special intelligence report, the on-site commander, based on road condition information transmitted by the reconnaissance team, directed the formation to maneuver toward the designated area according to a re-planned marching route.

After completing the battlefield maneuvers, each vehicle crew quickly changed combat formation and launched an assault on the target. Inside the armored vehicle, the commander locked onto the enemy’s fortifications using the sighting system, while the gunner flexibly selected the type of ammunition and firing method. “Fire!” With the commander’s command, several tanks launched a concentrated fire attack on the “enemy” fortifications. Instantly, flames shot up into the sky and smoke filled the target area.

“Only by starting with difficult, rigorous, and real combat, tempered by real combat, can we develop strong skills.” The brigade leader explained that during this training, they fully integrated tactical training, modularly integrating troops and equipment from different disciplines, flexibly deploying them to suit different battlefield environments. Focusing on mobile communications, vehicle-crew coordination, and firepower strikes, they conducted continuous training day and night. By optimizing training models, exploring combat methods, and unleashing the potential of equipment, they continuously improved the firepower strike effectiveness of the armored units.

During the training, practical exercises were carried out one after another, intertwining special and dangerous situations. “Enemy satellites are conducting overhead reconnaissance!” Just as the first round of assaults concluded, special situations arose. The commander acted decisively, directing the formation to utilize the terrain for concealment and camouflage.

One wave of challenges had not yet subsided, but another arose. Upon receiving the report of a “low-altitude enemy helicopter raid,” the crews coordinated closely, rapidly establishing an anti-aircraft fire network with anti-aircraft machine guns.

As night fell, the “battle” continued. Inside the command vehicle, staff utilized the command information system to distribute reconnaissance data on the “enemy situation” to each combat unit. Soldiers, using low-light and infrared night vision equipment, quickly replenished ammunition, checked the status of their equipment, and launched a new round of strike operations.

Brigade leaders explained that they would formulate improvement measures to address shortcomings identified during training, further optimize training plans, strengthen interdisciplinary training across various arms, cultivate a systematic combat mindset among officers and men, and transform “hard fingers” into “iron fists.” This would continuously strengthen the foundation of the unit’s combat effectiveness, ensuring the goal of “training like fighting, and fighting like training.”

“奋斗者说”战地强军故事会引导官兵投身火热的练兵实践

来源：解放军报 作者：郑烨 李连杰 责任编辑：王粲 2025-09-07

你我身边的故事

■郑 烨 李连杰

初秋时节，西北戈壁，骄阳似火. 第 74 集团军某旅在野外驻训地举办了一场“奋斗者说”战地强军故事会. 来自基层营连的 11 组参赛选手走上讲台，讲述革命先辈和身边战友的奋斗故事，为驻训官兵带来一场直抵心灵的精神洗礼.

“这次故事会采用情景讲述与文艺表演相结合的形式，生动展现基层官兵的精神风貌. ”该旅宣传科干事介绍.

情景表演《先辈的奋斗》，以新四军横山保卫战的史实为蓝本创作. 舞台上，演员们身着不同年代的军装，完成了一场跨越时空的对话：老一辈革命先辈讲述投身抗战、浴血奋战的峥嵘故事；新时代革命军人分享扎根军营、在实战化训练中苦练本领的实践. 这场对话，不仅串联起不同历史时期革命军人的奋斗足迹，更生动诠释了奋斗精神.

“从当年老一辈扛枪打鬼子、为民族争独立，到现在我们在和平年代练硬功、为强国强军奋斗，不管啥时候，革命军人都是以苦干实干诉说忠诚. ”故事会现场，战士潘丽周说.

情景讲述《逐梦强军 无悔青春》，串联起两代军人的青春答卷. 烽火岁月里，革命先辈怀赤诚赴战场，高呼着“中国不亡，有我”，以热血筑长城；新时代军营里，青年官兵接力前行，大声喊出“强国强军，有我”的铿锵誓言，让青春答卷在强军征程上续写荣光.

有一种坚守，是军人戍守边疆、护卫家国的执着；有一种奉献，是军属扛起后方、温暖人心的担当. 情景表演《嫂子还有 5 秒到达战场》，取材于该旅卫生连战士罗挺的真实经历. 作品生动讲述了军嫂默默付出、坚定支持着军人丈夫事业的故事. 军嫂们的无私奉献，既是军人冲锋在前的底气，也是国防建设不可或缺的温暖力量.

故事会临近尾声，大屏幕上播放了以该旅“十大强军标兵”故事为内容录制的微视频《青春与青春的对话》，鲜活呈现了标兵们在演训场上冲锋在前、在保障一线精益求精、在技术岗位攻坚克难等场景，引发官兵强烈共鸣.

该旅领导介绍，他们通过从革命先辈的烽火故事中感悟初心使命，从身边榜样的奋斗足迹中汲取前行动力，不断引导官兵投身火热的练兵实践 .

The “Strugglers Speak” Battlefield Military Strengthening Storytelling Session Guides Officers and Men Into Intense Training.

Source: PLA Daily Author: Zheng Ye, Li Lianjie, Editor: Wang Can 2025-09-07

Stories Around You and Me

■ Zheng Ye, Jet Li

In early autumn, the northwestern Gobi Desert scorches with a scorching sun. A brigade of the 74th Group Army held a “Strugglers Speak” Battlefield Military Strengthening Storytelling Session at its field training site. Eleven teams of contestants from grassroots battalions and companies took the stage to recount the struggles of revolutionary predecessors and their comrades, providing a spiritual awakening for the trainees.

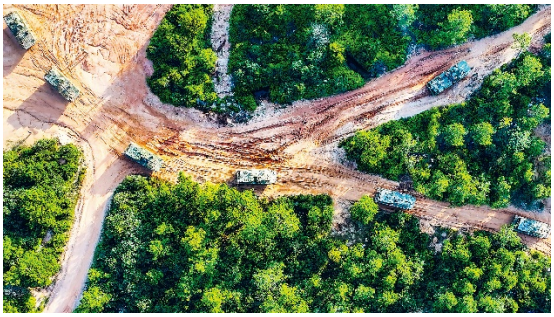
“This storytelling session combines situational storytelling with artistic performances to vividly showcase the spirit of grassroots officers and men,” said an officer from the brigade’s publicity department.

The situational performance, “The Struggle of Our Forefathers,” is based on the historical events of the New Fourth Army’s Battle of Hengshan. On stage, actors dressed in military uniforms from different eras engaged in a dialogue that transcended time and space: older generations of revolutionaries recounted their heroic deeds during the War of Resistance Against Japanese Aggression, while new-generation revolutionary soldiers shared their experiences rooted in the military camp and honing their skills through combat-oriented training. This dialogue not only connected the struggles of revolutionary soldiers from different historical periods but also vividly illustrated their fighting spirit.

“From the older generation who bore arms to fight the Japanese invaders and strive for national independence, to today, in peacetime, we practice hard work and strive to strengthen our country and military, no matter the time, revolutionary soldiers have always demonstrated their loyalty through hard work and dedication,” said soldier Pan Lizhou at the storytelling session.

The scenario storytelling, “Pursuing the Dream of a Strong Army, No Regrets in Youth,” connected the youthful experiences of two generations of soldiers. During the war years, revolutionary ancestors bravely marched to the battlefield, chanting “China will not perish, I am here,” building the Great Wall with their blood. In the military camps of the new era, young officers and men take the baton, reciting the resounding oath “Strong nation, strong army, I am here,” allowing their youth to continue writing a glorious chapter in the journey of strengthening the military.

There is a kind of perseverance, the dedication of soldiers guarding the frontiers and protecting their country; there is a kind of devotion, the responsibility of military families shouldering the responsibility of supporting the home front and warming the hearts of the people. The situational



performance “Sister-in-law Has 5 Seconds to Arrive at the Battlefield” is based on the real-life experience of Luo Ting, a soldier in the brigade’s medical company. It vividly tells the story of military wives who silently dedicate themselves and steadfastly support their military husbands’ careers. The selfless dedication of these wives is not only the confidence of soldiers charging forward, but also an indispensable source of warmth and support for national defense. As the storytelling session drew to a close, a short video titled “A Dialogue Between Youth,” featuring the stories of the brigade’s “Ten Model Soldiers for a Strong Army,” played on the big screen. The video vividly depicted these role models charging ahead on the training grounds, striving for excellence on the front lines, and overcoming challenges in their technical positions, resonating deeply with the officers and men.

Brigade leaders explained that they draw inspiration from the revolutionary stories of their predecessors, draw motivation from the hard work of their role models, and continuously guide officers and men to engage in the arduous practice of training.

陆军某旅紧贴实战需求组织战斗射击考核——

濒海练兵检验协同能力

■王国尊 马剑铮

渤海之滨，碧波翻涌. 日前，陆军某旅组织装甲分队机动至鲁东某地，开展一场多目标、多弹种战斗射击考核，全面检验部队协同配合和精确打击能力.

天空刚泛起鱼肚白，一阵急促的哨声打破寂静. 人员集合、物资装载、弹药请领……装甲分队官兵闻令而动，快速向预定地域机动.

抵达目标阵地后，装甲分队官兵高效协同、密切配合，迅速展开射击前准备工作.

“发现‘敌’碉堡群，1 车短停射击，2 车右侧迂回……”考核现场，战车驰骋、烟尘弥漫. 指挥员冷静指挥各车组协同配合，灵活利用地形对目标展开射击.

完成首轮目标清除后，新的特情接踵而至. “右前方 1000 米，发现‘敌’装甲车！”确定“敌”目标方位后，车长伏斐进行任务部署，驾驶员何荣发驾驶战车占据有利地形，炮手杜洋迅速瞄准锁定目标.“‘敌’装甲目标，歼灭！”随着伏斐一声令下，炮弹呼啸而出，目标被成功摧毁.

“组织多目标、多弹种战斗射击考核，不仅能有效检验装备技战术性能和车组战斗水平，更能增强官兵协同意识、锤炼部队打赢能力. ”该旅领导介绍，他们遵循“按纲施训、科学组训”原则，将“真、难、严、实”要求贯穿训练考核全程，全面提升官兵遂行作战任务能力.

“油温上升过快，接近临界值！”何荣发驾驶战车爬坡时，驾驶面板亮起预警红灯. 伏斐结合装备特点，果断进行散热降温处置. 随着油温指针稳定下来，战车继续向预定地域前进.

“平时练得精，战时才能打得赢. ”该旅领导表示，他们将对此次训练考核中采集的实弹射击数据和摸索出的管用招法进行梳理分析，不断优化战法训法，提升官兵协同作战能力.

An Army Brigade Conducts Combat Shooting Assessments in Accordance with Actual Combat Requirements

Source: PLA Daily Author: Wang Guozun, Ma Jianzheng Editor: Wang Yun 2025-09-08

An Army Brigade Conducts Combat Shooting Assessments in Accordance with Actual Combat Requirements --

Nearshore Training Tests Coordination Capabilities

■ Wang Guozun, Ma Jianzheng

The Bohai Sea coastline churns with blue waves. Recently, an Army brigade mobilized its armored detachment to a location in eastern Shandong to conduct a multi-target, multi-ammunition combat shooting assessment, comprehensively testing the unit's coordination and precision strike capabilities.

Just as dawn broke, a rapid whistle shattered the silence. Personnel mustered, supplies loaded, ammunition collected... The armored detachment, upon command, rapidly maneuvered to the designated area.

After arriving at the target position, the armored detachment coordinated efficiently and closely, quickly carrying out pre-fire preparations.

"An 'enemy' bunker cluster spotted. One vehicle briefly stopped to fire. Two vehicles detoured to the right..." Tanks raced through the assessment site, a cloud of dust billowing. The commander calmly directed the various crews to coordinate and flexibly utilize the terrain to engage the targets.

After completing the initial round of target elimination, new special situations arose. "Enemy armored vehicles spotted 1,000 meters to the right!" After determining the location of the "enemy" target, Commander Fu Fei deployed the mission. Driver He Rongfa maneuvered the tank to a favorable position, and gunner Du Yang quickly aimed and locked onto the target. "Enemy armored target, destroy!" With Fu Fei's command, the shells roared out, successfully destroying the target.

"Organizing multi-target, multi-ammunition type combat shooting assessments not only effectively tests the technical and tactical performance of equipment and the combat proficiency of the crews, but also enhances officers' and men' collaborative awareness and strengthens the unit's ability to win." Brigade leaders explained that they adhered to the principle of "training according to the guidelines and scientifically organizing training," incorporating the requirements of "truthfulness, difficulty, strictness, and practicality" throughout the training and assessment process, comprehensively enhancing officers and men' ability to carry out combat missions.

"Oil temperature rising too rapidly, approaching critical value!" He Rongfa was driving his tank up a hill when a red warning light illuminated on the dashboard. Fu Fei decisively implemented heat dissipation and cooling measures based on the equipment's characteristics. As the oil temperature indicator stabilized, the tank continued its advance toward the designated area.

"Only by practicing diligently in peacetime can we win in wartime." The brigade's leadership stated that they will analyze the live-fire data collected during this training assessment and the effective tactics discovered, continuously optimizing tactics and training methods to enhance the coordinated combat capabilities of officers and men.

第八十三集团军某旅聚力提升夜战本领：暗夜织网淬利剑

来源：解放军报 作者：程致远 胡瑞智 责任编辑：王粲 2025-09-14

第八十三集团军某旅聚力提升夜战本领——

暗夜织网淬利剑

■程致远 解放军报特约记者 胡瑞智

秋日，渤海湾畔，夜色如墨. 第 83 集团军某旅组织的一场战术训练悄然打响.

“占领射击阵地，执行！”随着一阵急促的防空警报响起，指挥所迅速下达指令，该旅防空分队趁夜色掩护，多路并进，快速向射击阵地机动.

“打仗不分昼夜，必须把复杂战场环境想透、把危局险局布实，让部队在极限条件下淬火成钢. ”该旅领导告诉记者，他们紧盯战场需求、优化指挥链路，聚焦微光条件下车辆驾驶、信息通联、协同打击等开展专攻精练，探索解决暗夜条件下作战指挥、战场机动、阵地设置等难题，畅通情报共享和信息传输链路，聚力提升官兵夜间作战本领.

午夜时分，部队进入预定地域. 指挥车内，红方指挥员调取指挥、侦察、保障、火力诸元等作战要素信息，一体筹划；阵地上，官兵通过手势等方式交流，展开微光条件下抢占阵地、隐蔽伪装、弹药装填等操作.

很快，蓝方多架战机采取低空飞行方式，交替掩护向阵地快速逼近. 红方雷达操作手精准捕捉目标，并将空情信息实时上报指挥所. 红方指挥员根据回传信息，实时研判战场态势.

“目标锁定，3、2、1，发射！”目标进入射击范围后，红方指挥员立即下达攻击指令，目标被精准“摧毁”. 随后，蓝方改变策略，多架战机从不同方向采取低空突袭、俯冲急降等方式，规避雷达搜捕，伺机实施攻击.

“‘敌’机反射面较小，雷达回波不稳”“各炮班切换瞄准模式”……面对特情，红方指挥员沉着冷静，及时组织各炮班调整打击方式. 据介绍，夜间射击环境与白天完全不同，在不依靠雷达的情况下，炮手夜间视野受限、搜捕目标难度加大等问题，考验炮长指挥能力.

月朗星稀，“敌”机与夜空融为一体. 红方指挥员根据目标态势划分攻击阵位、明确抗击时机……官兵密切协同，精准打击目标.

晨光熹微，“中军帐”内灯火通明，复盘检讨随即展开. 记者了解到，下一步，他们将对夜间射击成果进行系统梳理、整合优化，紧盯短板弱项展开专攻精练，持续提升组网预警、火力抗击能力，加速锻造全天候“防空利剑”.

A Brigade of the 83rd Group Army Is Focusing on Improving Its Night Combat Capabilities: Weaving a Network in the Dark, Sharpening Its Sword.

Source: PLA Daily Author: Cheng Zhiyuan, Hu Ruizhi Editor: Wang Can 2025-09-14

A brigade of the 83rd Group Army is focusing on improving its night combat capabilities:

Weaving a network in the dark, sharpening its sword.

■ Cheng Zhiyuan, PLA Daily Special Correspondent, Hu Ruizhi

On an autumn day, along the shores of Bohai Bay, the night was as dark as ink. A tactical training exercise organized by a brigade of the 83rd Group Army quietly commenced.

"Occupy the firing position, execute!" As a rapid burst of air defense sirens sounded, the command post quickly issued orders. Under cover of darkness, the brigade's air defense units advanced in multiple directions, rapidly maneuvering toward the firing position. "Fighting is a day-and-night affair. We must thoroughly consider the complex battlefield environment and prepare for dangerous and precarious situations, tempering the troops under extreme conditions." Brigade leaders told reporters that they closely monitor battlefield needs and optimize command links, focusing on low-light vehicle driving, information communication, and coordinated strikes. They are exploring solutions to challenges such as combat command, battlefield maneuvering, and position deployment in the dark of night, facilitating intelligence sharing and information transmission, and focusing on enhancing soldiers' nighttime combat capabilities.

At midnight, the troops entered the designated area. Inside the command vehicle, the Red Army commander accessed information on command, reconnaissance, support, and firepower, planning a comprehensive operation. On the battlefield, soldiers communicated through hand gestures and other means, carrying out low-light operations such as seizing positions, concealing camouflage, and loading ammunition.

Soon, multiple Blue Army combat aircraft [probable helicopters], flying at low altitude and providing alternating cover, rapidly approached the position. Red Army radar operators accurately acquired targets and reported air situation information to the command post in real time. Based on this feedback, Red Army commanders assessed the battlefield situation in real time. "Target locked, 3, 2, 1, fire!" As the target entered firing range, the Red Army commander immediately issued the attack order, effectively "destroying" it. Subsequently, the Blue Army changed its strategy, deploying multiple combat aircraft from different directions, employing low-altitude raids and swooping maneuvers to evade radar detection and seize the opportunity to strike.

"The enemy aircraft's reflective surface is small, and the radar return is unstable," "Each artillery crew switched aiming modes." Faced with this unusual situation, the Red Army commander remained calm and promptly organized the crews to adjust their attack strategies. It is reported that

nighttime shooting conditions are completely different from daytime ones. Without radar, the gunners' field of view is limited, making target acquisition more difficult, a test of the gunners' command abilities.

The moon was bright, the stars were sparse, and the enemy aircraft blended seamlessly into the night sky. The Red Army commanders divided their attack positions based on the target's situation and determined the timing for counterattacks. Officers and men coordinated closely, striking the target with precision.

As dawn shone, the lights in the "central military tent" were brightly lit, and a review and reassessment began. The reporter learned that in the next step, they will systematically sort out, integrate and optimize the results of night shooting, focus on the shortcomings and weaknesses, carry out specialized training, continuously improve the network warning and firepower resistance capabilities, and accelerate the forging of an all-weather "air defense sword."

发挥官兵主体作用！陆军某旅群策群力打造“行走的课堂”

来源：中国军网-解放军报 作者：李卓煜 曾亮凯 责任编辑：王粲

2025-09-15

第八十二集团军某旅发挥官兵主体作用改进教育方式——

群策群力打造“行走的课堂”

■李卓煜 曾亮凯

“狼牙山五壮士的英雄精神，已成为一种民族精神的象征……”日前，第 82 集团军某旅某连组织一场野营拉练. 行军途中，连队特意组织官兵来到狼牙山五壮士纪念碑前，二级上士杨天柱为大家深情讲述军史故事，给大家上了一堂生动的现地教育课.

“狼牙山五壮士壮烈跳崖时，年龄与我们相仿. 面对生死考验，他们毅然选择舍身跳崖. 与他们相比，我们平时训练中那点苦算不了什么！”讨论中，该连中士李创有感而发. 这堂生动的教育课，让该连官兵深受触动. 后续拉练途中，官兵士气高昂，圆满完成各项任务.

“教育要想取得实效，一个重要因素是坚持从官兵中来、到官兵中去，发挥他们在教育中的主体作用. ”该旅领导介绍，他们紧贴年轻官兵思想特点，发动官兵共同参与制订教育计划，通过组织召开“诸葛亮会”“机关基层双向交流会”等，广泛收集官兵的金点子、好创意，集思广益优化教育内容、改进教育方式.

利用野营拉练时机组织现地教育课，就来自理论骨干杨天柱的一条建议. 该旅领导介绍，部队大项任务多、人员分散，开展教育面临人员难集中、时间难同步等问题，杨天柱的建议为破解动散条件下的教育难题提供了新思路.

为把这堂教育课讲好，野营拉练展开前，杨天柱广泛查阅资料，并在机关的帮助指导下确定了授课主题. 授课结束后，官兵普遍反映，因地制宜开设“行走的课堂”，让教育授课更加接地气、有生气，有效调动了官兵参与教育、接受教育的主动性积极性.

“行走的课堂”受到欢迎，该旅趁热打铁，鼓励更多官兵积极建言献策. 上等兵陈泳吉提出“VR 重走长征路”的建议，被旅机关采纳. 借助 VR 技术打造的沉浸式教育课堂上，官兵身临其境体悟红军将士“爬雪山”“过草地”的艰辛，感悟伟大长征精神的深刻内涵. 下士王平建议与某边防部队共建“远程教育微课堂”. 通过线上聆听边防官兵讲述戍边故事，大家深刻理解了边防军人的职责与使命.

该旅领导介绍，在官兵的共同努力下，旅队教育课堂呈现一派火热景象，教育质效不断提高，助推训练热情水涨船高.

Leveraging the Leading Role of Officers and Men! An Army Brigade Works Together to Create a “Walking Classroom”

Source: China Military Network - PLA Daily Author: Li Zhuoyu, Zeng Liangkai Editor: Wang Can

2025-09-15

A Brigade of the 82nd Group Army Leverages the Leading Role of Officers and men to Improve Educational Methods --

Working Together to Create a “Walking Classroom”

■ Li Zhuoyu, Zeng Liangkai

“The heroic spirit of the Five Heroes of Langya Mountain has become a symbol of national spirit...” Recently, a company of a brigade of the 82nd Group Army organized a camping and training exercise. During the march, the company specially organized officers and men to visit the Langya Mountain Five Heroes Monument. Sergeant Second Class Yang Tianzhu passionately recounted military history stories, providing a vivid, on-site educational lesson.

“When the Five Heroes of Langya Mountain heroically jumped off the cliff, they were about the same age as us. Faced with a life-or-death situation, they resolutely chose to sacrifice their lives. Compared to them, the hardships we endure in training are nothing!” Sergeant Li Chuang of the company remarked during the discussion. This engaging educational lesson deeply touched the

company's officers and men. During the subsequent training exercise, morale was high, and they successfully completed all tasks.

"A key factor in achieving effective education is to consistently source from and reach the officers and men, giving them a leading role in the process." Brigade leaders explained that they closely followed the ideological characteristics of young officers and men, mobilizing them to participate in developing the education plan. By organizing "Zhuge Liang Meetings" and "Two-Way Exchange Meetings between Headquarters and Grassroots," they gathered valuable insights and creative ideas from officers and men, pooling their wisdom to optimize the content and methods of the education.

The idea of utilizing the opportunity of a camping exercise to organize on-site education sessions originated from a suggestion by Yang Tianzhu, a key theoretical member. Brigade leaders explained that the numerous major missions and dispersed personnel in the unit made it difficult to concentrate personnel and synchronize timelines for education. Yang Tianzhu's suggestion provided a new approach to addressing the challenges of education under these mobile and dispersed conditions.

To ensure the effectiveness of this educational lesson, Yang Tianzhu conducted extensive research before the camping exercise and, with the help and guidance of headquarters, determined the topic for the lecture. After the course, soldiers generally commented that the tailored "walking classroom" made the teaching more grounded and lively, effectively motivating soldiers to participate in and receive education.

The "walking classroom" initiative was well-received, and the brigade seized the opportunity to encourage more soldiers to contribute ideas and suggestions. Corporal Chen Yongji proposed a "VR Retracing the Long March," which was adopted by brigade headquarters. Using VR technology, soldiers experienced the hardships of the Red Army soldiers as they "climbed snow-capped mountains" and "crossed grasslands," and grasped the profound meaning of the Long March spirit. Corporal Wang Ping proposed co-creating a "remote education micro-classroom" with a border defense unit. By listening to border defense officers and men share their stories online, they gained a deeper understanding of the responsibilities and mission of border soldiers.

Brigade leaders explained that thanks to the concerted efforts of soldiers, the brigade's educational classrooms have become vibrant, the quality and effectiveness of education have been continuously improved, and training enthusiasm has soared.

陆军某旅抓好首长机关训练：以上率下淬炼过硬"中军帐"

来源：中国军网-解放军报 作者：宋福仪 王宏阳 责任编辑：王粲

2025-09-15

第 80 集团军某旅抓好首长机关训练——

以上率下淬炼过硬“中军帐”

■宋福仪 解放军报特约通讯员 王宏阳

初秋，第 80 集团军某旅组织一场首长机关军事训练考核. 考核结果显示，参考人员总体成绩稳步提升.

“抓训练先抓机关，强部队先强中枢. 只有把首长机关训练切实突出出来，要求严于部队，标准高于部队，落实好于部队，素质强于部队，才能确保首长机关平时组织部队练好兵、战时指挥部队打胜仗. ”该旅领导介绍，此前，他们在一次调研中发现，部分机关人员存在重业务轻训练、重体能轻技能的现象，导致参训率不高、训练成绩下滑. 旅党委一班人研究感到，首长机关训练质效不高，既有机关工训矛盾突出等因素影响，也有当兵打仗、带兵打仗、练兵打仗的思想树得不牢的原因.

为此，该旅组织机关干部深入开展以“三查三看”为主题的讨论辨析，通过查思想观念，看随时准备打仗思想是否树牢；通过查能力素质，看打赢本领是否过硬；通过查作风训风，看实战化训练要求是否落实. 同时，他们严格立起按实战要求考、从严从实评的鲜明导向，倒逼机关干部立足岗位精武强能.

为确保机关干部军事训练刚性落实，该旅探索出台一系列具体抓训措施：每月组织 6 天集中训练，练强指挥能力、练好战斗本领、练硬战斗作风；要求每人每周必须完成“五个一”，即一份军事理论试卷、一份战术计算、一份作战文书拟制、一份指挥信息系统想定作业、一份手工标图，做到人人参训、人人参考、人人过关……

“以前机关组织训练，有的干部常以‘工作忙抽不开身’为由请假. ”该旅一位机关干部说，如今有了刚性措施，大家即使因时间冲突缺席训练，也会自觉加班加点补训，以保证课目不落、进度不拖.

穿戴防毒装具训练、地图判读训练、基础体能训练……笔者翻阅该旅机关军事训练周表发现，机关干部训练内容安排得满满当当. 该旅领导介绍，组训实践中，他们不仅系统组织战术标图、作战文书拟制、一体化指挥平台操作等课目学习培训，还常态邀请院校专家来队授课辅导，通过情景模拟、实案剖析、研讨交流等方式，帮助机关干部打牢军事素质基础.

练兵先练“排头兵”，强军先强“中军帐”. 该旅领导介绍，为推动首长机关训练进一步走深落实，他们要求旅领导带头组训任教、带头参训参考、带头从难从严，以上率下立起大抓军事训练鲜明导向，带动部队整体训练水平提高. 前不久，该旅组织战备拉动训练，机关各要素密切协同，训练过程连贯流畅、有条不紊，部队筹划指挥和应急作战能力得到有效检验.

An Army Brigade Strengthens Training for Chiefs' Organs: Leading from Above to Strengthen a Strong "Central Military Command"

Source: China Military Network - PLA Daily Author: Song Fuyi, Wang Hongyang Editor: Wang Can

2025-09-15

A Brigade of the 80th Group Army Strengthens Training for Chiefs' Organs - Leading from Above to Strengthen a Strong "Central Military Command"

■ Song Fuyi, PLA Daily Special Correspondent, Wang Hongyang

In early autumn, a brigade of the 80th Group Army conducted a military training assessment for chiefs' organs. The assessment results showed that the overall performance of the participants steadily improved.

"To strengthen training, we must first strengthen the organs; to strengthen the troops, we must first strengthen the central command. Only by truly highlighting the training of chiefs' organs, with stricter requirements, higher standards, better implementation, and higher quality than the troops, can we ensure that the chiefs' organs organize the troops to train well in peacetime and command them to victory in wartime." Brigade leaders explained that, during a previous survey, they found that some personnel in the organs prioritized business over training, and physical fitness over skills, resulting in low training participation rates and declining training results. The brigade Party Committee concluded that the quality and effectiveness of training for the leadership staff was low, influenced by factors such as prominent conflicts between work and training, as well as a lack of a strong understanding of serving, leading, and training for combat.

To this end, the brigade organized in-depth discussions and analyses among staff members focused on the "Three Inquiries and Three Observations." These included examining their ideological perspectives to determine whether they were firmly entrenched in a commitment to combat readiness; examining their capabilities and qualities to determine their ability to win; and examining their work styles and training practices to determine whether they were implementing the requirements of combat-oriented training. At the same time, they rigorously established a clear policy of testing staff according to combat-oriented requirements and conducting rigorous and realistic evaluations, forcing staff members to focus on improving their skills and capabilities in their roles. To ensure the rigid implementation of military training for headquarters cadres, the brigade has explored and implemented a series of specific training measures: six days of intensive training each month to strengthen command capabilities, combat skills, and a strong fighting style; each person is required to complete "five ones" each week: a military theory exam, a tactical calculation, a combat document draft, a command information system scenario exercise, and a hand-marked map, ensuring that everyone participates, consults, and passes the test...

“In the past, when headquarters organized training, some cadres often requested leave, citing ‘work was too busy to spare,’“ said a brigade headquarters cadre. Now, with these rigid measures in place, even if they miss training due to schedule conflicts, they will voluntarily work overtime to make up for it, ensuring that they complete all the lessons and meet all the deadlines.

Training in gas protection gear, map reading, and basic physical training... A review of the brigade’s weekly military training schedule reveals a jam-packed schedule for headquarters cadres. Brigade leaders explained that during training, they not only systematically organized training on subjects such as tactical mapping, drafting operational documents, and operating an integrated command platform, but also regularly invited experts from universities to provide instruction and guidance. Through scenario simulations, case analysis, and discussions, they helped staff build a solid foundation of military proficiency.

Training troops begins with training the vanguard, and strengthening the military begins with strengthening the central command. Brigade leaders explained that to further deepen and implement training for leadership staff, they require brigade leaders to take the lead in organizing and teaching training, participating in and consulting on training, and implementing rigorous and demanding training. This, from top to bottom, establishes a clear direction for focusing on military training, driving overall improvement in the unit’s training. Recently, the brigade conducted combat readiness training exercises, with close coordination among all staff elements, ensuring a smooth and organized training process. This effectively tested the unit’s planning, command, and emergency response capabilities.

特刊丨第八十三集团军某旅“王老沟英雄连”：转型攻坚 迎难而上

来源：解放军报 作者：刘扬 杜晓阳 胡璞 责任编辑：王粲 2025-09-15

第八十三集团军某旅“王老沟英雄连”——

转型攻坚 迎难而上

■刘 扬 杜晓阳 解放军报记者 胡 璞

“王老沟英雄连”进行任务前动员. 沈晨朝 摄

9月3日，纪念中国人民抗日战争暨世界反法西斯战争胜利80周年大会，在天安门广场隆重举行. 第83集团军某旅副连长樊玮高擎“王老沟英雄连”战旗通过天安门广场，接受党和人民的检阅.

“这是我军旅生涯最光荣的一刻. ”阅兵式结束后，樊玮仍激动不已，“86 年前，‘王老沟英雄连’先辈顽强战斗、英勇杀敌，不惧流血牺牲，用生命换来了这面荣誉战旗. ”

“王老沟英雄连”前身，是八路军120师警备6团3营7连. 1939年6月，7连随团转移，行进至山阴县王老沟村时与日军遭遇. 日军凭借武器装备优势抢占王老沟各个制高点. 顶着敌人强大火力，6 团发起猛烈攻击，迅速将敌人分割包围并连夺两座山头，日军被迫退至王老沟南山，负隅顽抗.

7 连连长主动请缨，带领官兵成立敢死队，趁夜色攻上南山，并与敌人展开拉锯战，最终击退了敌人.

王老沟一战有效阻击了日军“扫荡”，成功掩护晋绥边区委员会顺利转移. 1939 年 8 月，八路军120师授予7连“王老沟英雄连”荣誉称号.

此后，“王老沟英雄连”随团参加百团大战，打破日军“囚笼政策”；继而转战雁北，开展反“扫荡”战斗，频繁抗击敌人……

在血与火的考验中，“王老沟英雄连”形成了“血战到底，永不言败”的精神. 时光荏苒，精神永存，血性已深深刻进一代代官兵的骨子里.

一次实兵演训，该连担负某高地主攻任务. “蓝军”利用地形优势，在唯一一条进攻路线上，设置多个隐蔽火力点. 一时间，他们“伤亡”惨重.

“我来当诱饵，引‘敌’暴露，你们负责歼灭！”危急时刻，该连车长李泽林挺身而出. 最终，他们成功突破“蓝军”防线.

当“王老沟英雄连”战旗插上阵地，该连官兵心中充满胜利的喜悦. 那一刻，他们深深懂得了，连队荣誉室里那面满是弹孔的战旗，意味着什么.

改革调整中，该连向合成体制下新型坦克连转型. 新的力量编成优化带来了作战样式变化，挑战也接踵而至：老技术难以驾驭新装备，老战法难以适应新任务，老经验难以解决新问题……

第一次新装备操作考核，经验丰富的车长刘新建，连基础参数设置都没完成，成绩在全连垫底. “夜里躺在床上辗转反侧，总觉得自己对不起这身军装. ”他在日记中写道，“11 年的兵龄不是资本，跟不上时代，迟早会被淘汰. ”

为了尽快掌握新装备，刘新建拿出当新兵时的钻劲和韧劲——连队组织培训，他坐在最前排；厂家技术人员前来指导，他整天追着请教；笔记本上，他记满了装备原理图、操作口诀、故障代码……几个月后，他已熟记各项参数、学会操作流程.

在“王老沟英雄连”采访，记者感受最深的，是该连官兵对于提高打仗能力的渴望和迫切. 该连车库墙上挂着一个错题本，专门记录官兵在训练中出现的错误操作. 宿舍走廊里，悬挂的不是过往荣誉，而是比武失利的通报、演习中暴露的问题、装备故障分析报告，以及对应的整改方案.

“狭路相逢勇者胜. 我们一定要迎难而上，啃下这块‘硬骨头’！”转型攻坚中，该连官兵齐心协力，不仅逐步熟练驾驭新装备，还探索创新多个战法，编写出新装备战术课目组训规范，为合成营坦克连训练蹚出一条新路.

那年在朱日和，该连换装后首次参加跨区演习. 如何实现与其他兵种单位的合成作战，成了摆在他们面前的又一难题.

“能不能合兵一处？怎么样攥指成拳？”当时，每个人心中都画着问号. 察觉到连队出现负面情绪，该连主官及时组织了一次题为“以连史砺斗志，以英魂鉴己身”的讨论辨析，旨在统一思想认识，激发奋进动力.

“当年，在王老沟山头上，连队先辈打光最后一颗子弹，依旧用刺刀杀出一条血路，赢得了胜利. 如今，我们站上演兵场，难道要让这点困难挡住胜利的脚步吗？”时任连长的发言，直击官兵灵魂.

随后，该连组织干部骨干，梳理情报处理、火力统筹、步坦协同、抢修急救等方面存在的问题，制订改进方案，并根据演习需要，设计出多兵种协同战术，受到兄弟单位认可. 重整旗鼓的该连官兵，抓住演习前的最后时间专攻精练、熟悉战法.

演习正式打响. 面对“蓝军”坚固防线，“王老沟英雄连”火力支援精准覆盖，步坦推进有条不紊. 时任连长指挥坦克群佯攻吸引火力，步兵分队则迂回包抄. 最终，该连以较低战损突破“敌”阵地，获得导演部高度评价.

“英雄连队的密码，镌刻在历史的记忆里，更奔涌在每一茬官兵的热血中！”该连干部说，时代在变，任务在变，“王老沟英雄连”官兵敢于突击、英勇无畏的战斗意志始终未变.

新征程上，“王老沟英雄连”紧紧扭住转型建设不放，狠抓练兵备战不松，在实战实训中锤炼胜战本领，锻造“合成铁拳”，向着建军一百年奋斗目标阔步迈进.

Special Issue | The “Wanglaogou Hero Company” of a Brigade of the 83rd Group Army: Transforming and Overcoming Challenges

Source: PLA Daily Author: Liu Yang, Du Xiaoyang, Hu Pu Editor: Wang Can 2025-09-15

The "Wanglaogou Hero Company" of a Brigade of the 83rd Group Army - Transforming and Overcoming Challenges

■Liu Yang, Du Xiaoyang, PLA Daily Reporter Hu Pu

The "Wanglaogou Hero Company" conducts pre-mission mobilization. Photo by Shen Chenchao

On September 3, a grand ceremony commemorating the 80th anniversary of the victory of the Chinese People's War of Resistance Against Japanese Aggression and the World Anti-Fascist War was held in Tiananmen Square. Fan Wei, deputy company commander of a brigade of the 83rd Group Army, carried the battle flag of the "Wanglaogou Hero Company" high through Tiananmen Square to receive the review of the Party and the people. "This is the most glorious moment of my military career," Fan Wei said, still overcome with emotion after the parade. "86 years ago, the forefathers of the 'Wanglaogou Hero Company' fought tenaciously, bravely killed the enemy, and sacrificed their lives without fear of bloodshed. They earned this honorary battle flag."

The "Wanglaogou Hero Company" was formerly the 7th Company, 3rd Battalion, 6th Security Regiment, 120th Division, Eighth Route Army. In June 1939, the 7th Company was transferred with the regiment and encountered Japanese troops while marching to Wanglaogou Village, Shanyin County. Leveraging their superior weaponry, the Japanese seized commanding heights in Wanglaogou. Facing overwhelming enemy firepower, the 6th Regiment launched a fierce attack, quickly dividing and encircling the enemy and capturing two hilltops. The Japanese were forced to retreat to the southern hills of Wanglaogou, where they fought a desperate defense.

The 7th Company commander volunteered to lead his officers and men in forming a death squad. Under cover of darkness, they attacked the southern hills and engaged in a seesaw battle, ultimately repelling the enemy. The Battle of Wanglaogou effectively blocked the Japanese mopping-up operation and successfully protected the relocation of the Shanxi-Suiyuan Border Region Committee. In August 1939, the 120th Division of the Eighth Route Army awarded the 7th Company the honorary title of "Wanglaogou Hero Company."

Thereafter, the "Wanglaogou Hero Company" participated in the Hundred Regiments Campaign, breaking the Japanese "cage policy"; then, it moved to Yanbei, conducting counter-mopping-up operations and frequently engaging in enemy operations...

Through the trials of blood and fire, the "Wanglaogou Hero Company" forged the spirit of "fighting to the bitter end, never giving up." Time passes, but the spirit endures, and this valor has been deeply etched into the bones of generations of officers and men.

During a live-fire exercise, the company was tasked with the main assault on a high ground. The "Blue Army" took advantage of the terrain and established multiple concealed firepower points along the only attack route. In a short period of time, they suffered heavy casualties. "I'll act as

bait, drawing the ‘enemy’ out of the way. You’ll be responsible for destroying them!” In this critical moment, the company’s tank commander, Li Zelin, stepped forward. Ultimately, they successfully broke through the “Blue Army” defenses.

When the “Wanglaogou Hero Company” battle flag was hoisted on the battlefield, the officers and men of the company were filled with the joy of victory. At that moment, they deeply understood the significance of the bullet-riddled battle flag in the company’s hall of honor.

During the reform and adjustment, the company transformed into a new type of tank company under a combined power structure. The new force structure optimization brought changes to the combat style, and challenges ensued: old technology struggled to control new equipment, old tactics struggled to adapt to new missions, and old experience failed to solve new problems...

In the first new equipment operation assessment, the experienced tank commander Liu Xinjian failed to even complete the basic parameter settings, ranking last in the company. “I tossed and turned in bed at night, always feeling unworthy of this uniform,” he wrote in his diary. “Eleven years of military service is no asset. I can’t keep up with the times, and sooner or later I’ll be eliminated.”

To master the new equipment as quickly as possible, Liu Xinjian summoned the same perseverance and tenacity he had as a new recruit. During company training sessions, he sat in the front row; when manufacturer technicians came to provide guidance, he would constantly ask for advice. His notebooks were filled with equipment schematics, operating instructions, and fault codes... After a few months, he had memorized every parameter and mastered the operating procedures.

While interviewing the “Wanglaogou Hero Company,” the reporter was most struck by the company’s soldiers’ eagerness and urgency to improve their combat capabilities. Hanging on the wall of the company’s garage is a notebook dedicated to errors made during training. In the dormitory corridors, hanging instead of past honors, are notices of competition failures, problems exposed during exercises, equipment failure analysis reports, and corresponding corrective action plans. “When faced with a narrow road, the brave prevail. We must rise to the challenge and overcome this ‘tough nut’!” During the transformation and key breakthrough, the company’s officers and men worked together, not only gradually becoming proficient in the use of new equipment but also exploring and innovating various tactics. They developed training specifications for new equipment and tactics, blazing a new trail for the training of the combined arms battalion tank company.

That year in Zhurihe, the company participated in its first cross-regional exercise since its refit. Achieving combined operations with other arms units became another challenge.

“Can we unite? How can we form a fist?” Everyone was wondering. Noticing negative sentiment within the company, the company commander promptly organized a discussion titled “Using the company’s history to sharpen our fighting spirit and drawing inspiration from the heroic spirits of our heroes” to unify their thinking and inspire motivation for progress. “Back then, on the peak of

Wanglaogou, our company's forefathers fired their last bullet, still fighting their way through with bayonets and winning victory. Now, standing on the battlefield, are we going to let such a small difficulty stand in our way of victory?" The then-company commander's words resonated deeply with the officers and men.

The company subsequently organized key personnel to sort out existing problems in intelligence processing, firepower coordination, infantry-tank coordination, and emergency repairs. They developed improvement plans and, based on the needs of the exercise, designed multi-service coordinated tactics, which were recognized by fellow units. Regrouping, the company's officers and men seized the final moments before the exercise to focus on refining and familiarizing themselves with their tactics.

The exercise officially commenced. Facing the "Blue Army'" solid defenses, the "Wanglaogou Hero Company" provided precise fire support, while the infantry and tanks advanced in an orderly manner. The then-company commander directed the tank group to launch a feint attack to draw fire, while the infantry units deployed a flanking maneuver. Ultimately, the company broke through the "enemy" position with minimal casualties, earning high praise from the commanding staff. "The code of the heroic company is etched in the memory of history and flows through the blood of every generation of officers and men!" Company officials said. Times and missions change, but the courage and fearlessness of the soldiers of the "Wanglaogou Hero Company" remain unchanged.

On the new journey, the "Wanglaogou Hero Company" remains firmly committed to transformation and construction, focusing on training and preparation. Through real-world training, they hone their combat prowess, forging a "synthetic iron fist," and striding forward toward the goal of the PLA's centennial.

东南某海域，波涛汹涌. 岸滩阵地上，第 73 集团军某旅某营官兵整装待发.

“作为左权传人，我们要传承英雄精神，在演训任务中敢打必胜、勇往直前！”该营教导员高擎战旗站在队伍前方，作誓师动员.

海风中，战旗猎猎作响. 红绸旗面上，“左权独立营”5 个大字被阳光照得发亮.

眼前这一幕，让记者的思绪穿越时空，回到了 83 年前.

“左权独立营”前身是辽县独立营，1941 年组建后，主要负责保卫警戒执勤等任务，多次掩护八路军总部机关转移.

1942 年 5 月，日军对华北抗日根据地进行铁壁合围式的“大扫荡”. 25 日，在辽县麻田附近，时任八路军副参谋长的左权，亲率部队掩护中共中央北方局和八路军总部突围转移. 激战中，左权不幸被日军炮弹弹片击中，壮烈牺牲.

1942 年 9 月 18 日，经晋冀鲁豫边区政府批准，为永久纪念在辽县殉国的左权，辽县改名为左权县. 同月，八路军总部授予该营“左权独立营”称号.

此后，“左权独立营”两次配合主力部队攻打襄垣、祁县纱厂，解决太行军区被服用布困难；两次参加白晋路破袭战，打击敌铁路运输，为黄崖洞兵工厂提供了大量钢轨作为原料.

历经抗日战争、解放战争、抗美援朝战争的战火洗礼，经历多次转隶、移防、改革调整，“左权独立营”官兵始终秉承先辈精神，从未停止向前冲锋的脚步.

进入新时代，面对转型建设中遇到的新情况、新问题，“左权独立营”官兵始终积极应对、主动求变，在探索中寻找破解方法.

那年初秋，多军兵种实战化演习前，“左权独立营”受领一项任务——全员全装在规定时间内完成机降.

“全员”意味着无论兵龄资历、能力素质，都要达到任务要求；“全装”意味着机降时需穿戴装具、携带装备；“规定时间”则要求必须熟练掌握机降技巧.

“难！”听到任务内容，就连经验丰富的高级军士，都连连摇头.

这是转型以来，该营第一次担负实战化背景下的机降任务. 然而，留给他们攻坚的时间只有一个月，同时还要面对经验不足、教材短缺、场地缺乏等现实困难.

怎么办？议战议训会上，营党委一班人意见一致：任务必须完成，没有条件就创造条件！

于是，他们把训练场边荒地清理出来，搭设模拟高台；联系兄弟单位，借鉴训练经验、学习技巧方法；搜集相关资料，干部带着训练骨干，一句一句研究……

最终，该营成功探索出一套机降方法，并在演习中按照要求顺利完成机降任务，受到上级表扬.

该营教导员说，作为以英雄姓名命名的部队，无论过去，还是现在，每临重大任务、重要关头，官兵们都始终敢挑重担、攻坚克难.

去年一次实兵对抗演训，该营遭遇困局，一处易守难攻的要地被“蓝军”层层设障、重兵封锁，进攻通路受阻.

“让我来！”这时，某连班长战攀主动请缨，带领班里爆破手，抱着炸药包，冲向“蓝军”阵地.

短短百米坡路，他们或匍匐，或跃进，在“蓝军”火力压制中，行进得十分艰难，但没有一人退却. 战攀抓住“蓝军”火力减弱空当，高喊“跟我冲”，带领大家迅猛前出. 点燃炸药包，扔向障碍物，他们随即翻滚撤离.

“砰！”第一道障碍被炸开. 该营破障分队紧接着展开轮流爆破、协同冲锋、交替掩护，最终成功开辟通路.

1941 年 11 月，左权指挥八路军总部特务团进行黄崖洞保卫战，创造了以少胜多的经典战例. 在这次战斗中，有 12 名战士坚守兵工厂中心工事阵地，最终全部壮烈牺牲，后被追认为“黄崖洞保卫战十二勇士”.

“崇尚英雄，学习英雄，成为英雄. ”该营教导员告诉记者，“战士们在演训中的英勇表现，正是官兵传承英雄精神的具体行动. ”

该营历来重视党史军史学习教育，引导官兵从革命先辈身上汲取拼搏奋斗的精神养料，培塑敢打敢拼、能打硬仗、善打恶战的战斗作风.

今年是抗战胜利 80 周年，也是该营授称 83 周年，他们以此为契机开展系列配合活动：开设“左权讲堂”，宣扬英烈事迹；邀请抗战老兵来营参观交流，帮助官兵进一步体悟英雄精神……营党委一班人的认识很一致，就是用革命先烈百折不挠、奋勇争先的必胜信念，砥砺官兵血性胆气，打造攻无不克、战无不胜的英雄队伍.

前不久一次体系对抗训练，该营担负主攻任务，突击队中出现了不少新兵的身影.

“下连不久就在这么重要的任务中打主攻，新兵们能行吗？不怕他们拖后腿？”记者不解地问.

“练兵备战等不起也慢不得. 让新战士早闻‘硝烟味’、在‘战火’中淬炼，可以缩短成长周期，早日成为能打仗的兵.”该营营长回答得很坚决，“‘左权独立营’的官兵，不论是谁，即使刚下连、初来队，都要从第一天起，树牢‘当兵打仗、带兵打仗、练兵打仗’的意识. ”

9 月 3 日，北京天安门广场，该营排长吴蒙希高擎“左权独立营”战旗，接受了党和人民的检阅. 与此同时，千里之外的营区，该营官兵通过电视屏幕，见证了这无上荣光的时刻，大家心潮澎湃、倍感自豪.

83 年，从太行山区到东南沿海，纵使部队驻地转换、武器装备更新、使命任务拓展，“左权独立营”官兵的本色始终未变：战旗所指，就是他们冲锋的方向；先辈精神，就是他们奋进的力量！

铭记历史　缅怀先烈

The waves surged in a southeastern sea area. On the beach, soldiers of a battalion of a brigade of the 73rd Group Army prepared for battle.

"As descendants of the Zuoquan people, we must carry on the heroic spirit, dare to fight and win, and forge ahead courageously in training and exercises!" The battalion instructor, holding the battle flag high, stood at the front of the troops and gave a rallying oath.

The battle flag fluttered in the sea breeze. The five large characters "Zuoquan Independent Battalion" on the red silk banner shone brightly in the sunlight. This scene sent the reporter's mind careening back 83 years.

The "Zuoquan Independent Battalion," formerly the Liaoxian Independent Battalion, was established in 1941. Its primary mission was security and patrol duties, and it repeatedly provided cover for the relocation of the Eighth Route Army headquarters.

In May 1942, the Japanese army launched an ironclad "mopping-up" operation against the anti-Japanese base areas in North China. On the 25th, near Matian in Liaoxian County, Zuo Quan, then Deputy Chief of Staff of the Eighth Route Army, personally led his troops to cover the escape and relocation of the Northern Bureau of the CPC Central Committee and the Eighth Route Army headquarters. During the fierce fighting, Zuo Quan was tragically struck by shrapnel from a Japanese artillery shell and died heroically.

On September 18, 1942, with the approval of the Shanxi-Hebei-Shandong-Henan Border Region Government, Liaoxian County was renamed Zuoquan County to permanently commemorate Zuo Quan, who died in Liaoxian. That same month, the Eighth Route Army Headquarters awarded the battalion the title "Zuoquan Independent Battalion." Afterwards, the "Zuoquan Independent Battalion" twice cooperated with the main force to attack the Xiangyuan and Qixian cotton mills, resolving the Taihang Military Region's bedding and cloth shortage. It also participated in two raids on the Baijin Railway, disrupting enemy railway transportation and providing a large amount of steel rails as raw material for the Huangyadong Arsenal.

Through the baptism of fire of the War of Resistance Against Japanese Aggression, the War of Liberation, and the War to Resist U.S. Aggression and Aid Korea, and undergoing numerous transfers, relocations, reforms, and adjustments, the officers and men of the "Zuoquan Independent Battalion" have always upheld the spirit of their predecessors and never ceased their charge forward.

In the new era, facing new situations and challenges encountered during the transformation and construction, the officers and men of the "Zuoquan Independent Battalion" have consistently responded proactively, actively sought change, and sought solutions through exploration.

In the early autumn of that year, before a multi-service combat exercise, the “Zuoquan Independent Battalion” received a mission: complete an airdrop with full equipment within the specified time.

“Full” meant that all personnel, regardless of seniority, ability, or qualifications, met the mission requirements; “fully equipped” meant that all personnel were required to wear and carry equipment during the airdrop; and “specified time” required proficiency in airdrop techniques. “Difficult!” Even experienced senior sergeants shook their heads upon hearing the mission’s details.

This was the first time the battalion had undertaken an airdrop mission in a combat-oriented environment since its transformation. However, they only had one month to complete the task, and faced practical challenges such as inexperience, a shortage of teaching materials, and a lack of training space.

What to do? At a meeting discussing combat and training, the battalion Party Committee unanimously agreed: The mission must be accomplished, and if the conditions didn’t exist, they would create them!

So, they cleared wasteland near the training ground and built a simulated platform. They contacted other units to learn from their training experiences and techniques. They collected relevant materials, and cadres, along with key training personnel, meticulously studied each sentence...

Finally, the battalion successfully developed a set of airdrop methods and successfully completed the mission in accordance with requirements during the exercise, earning praise from their superiors.

The battalion instructor said that as a unit named after a hero, the officers and men have always bravely shouldered heavy responsibilities and overcome difficulties in every major mission and critical moment, both in the past and present. During a live-fire confrontation exercise last year, the battalion encountered a difficult situation. A strategic location, easily defended but difficult to attack, was heavily barricaded by the “Blue Army” troops, blocking their path.

“Let me do it!” At that moment, squad leader Zhan Pan volunteered, leading his squad’s demolition team, armed with explosive packs, and charging towards the “Blue Army” position.

The short 100-meter slope, they either crawled or leaped forward, facing the “Blue Army’s” suppressive firepower. The advance was extremely difficult, but no one retreated. Seizing the moment when the “Blue Army’s” firepower waned, Zhan Pan shouted, “Follow me!” and led everyone forward swiftly. He ignited the explosive packs and threw them at the obstacles, and they immediately rolled away.

“Bang!” The first obstacle was blown away. The battalion’s obstacle-clearing team then engaged in rotating demolition, coordinated charges, and alternating cover, ultimately successfully opening a path.

In November 1941, Zuo Quan commanded the Eighth Route Army Headquarters Special Forces Regiment in the Battle of Huangyadong, creating a classic example of defeating a larger force with a smaller force. During this battle, 12 soldiers defended the central fortifications of the arsenal and ultimately died heroically. They were later posthumously recognized as the "Twelve Heroes of the Battle of Huangyadong."

"Respect heroes, learn from heroes, and become heroes," the battalion instructor told reporters. "The soldiers' heroic performance during the exercises and training is a concrete example of officers and men carrying on the heroic spirit."

The battalion has always attached great importance to the study and education of Party and military history, guiding officers and men to draw spiritual nourishment from the revolutionary predecessors and cultivate a fighting style that is daring to fight, capable of fighting tough battles, and adept at fighting difficult battles.

This year marks the 80th anniversary of the victory of the War of Resistance Against Japanese Aggression and the 83rd anniversary of the battalion's title. They have taken this opportunity to launch a series of supporting activities: opening the "Zuoquan Lecture Hall" to promote the deeds of the martyrs; inviting veterans of the War of Resistance Against Japanese Aggression to visit and exchange ideas with the battalion to help officers and men further appreciate the heroic spirit... The battalion Party Committee is united in its understanding: to use the revolutionary martyrs' unyielding and courageous belief in victory to strengthen the officers and men' courage and build an invincible and victorious heroic team. During a recent system-to-system confrontation training exercise, the battalion was tasked with the main attack mission, and many new recruits were present in the assault team.

"Soon after joining the company, they're already leading the attack in such a crucial mission. Can these new recruits handle it? Aren't they a drag?" the reporter asked, puzzled.

"Training and preparation for war can't wait or be slowed down. Exposing new soldiers to the 'smell of gunpowder' and the 'fires of war' early on can shorten their growth cycle and help them become combat-ready sooner," the battalion commander replied firmly. "Every soldier of the 'Zuoquan Independent Battalion,' regardless of their rank, even if they've just joined the company or the unit, must firmly establish the mindset of 'serving in battle, leading in battle, and training for battle' from day one."

On September 3rd, in Beijing's Tiananmen Square, Platoon Leader Wu Mengxi, bearing the "Zuoquan Independent Battalion" battle flag, received the review of the Party and the people. Meanwhile, thousands of miles away, soldiers at the battalion witnessed this supremely glorious moment on television, their hearts overflowing with pride. For 83 years, from the Taihang Mountains to the southeastern coast, despite shifting bases, upgrading weapons and equipment, and expanding missions, the officers and men of the Zuoquan Independent Battalion have

remained true to their values: wherever the battle flag points, they charge; the spirit of their predecessors fuels their progress!

高炮分队夜间对空抗击.

导弹出击，拦截来袭之“敌”.

官兵吊装导弹.

奔向战位.

南国海滨，浪急潮涌. 急促的防空警报骤然响起，第 74 集团军某旅防空营一场实弹射击训练拉开战幕.

“占领阵地，实施警戒侦察！”地导分队各作战单元雷达迅速进入对空值守状态. 夜幕降临，“敌”机快速接近阵地. 雷达操纵员紧盯屏幕，规避干扰，跟踪捕捉目标. 随着射击命令下达，导弹呼啸而出，直扑目标.

“‘敌’无人机抵近！”高炮分队接到“敌情”通报. 指挥员快速研判战场态势，合理分配火力. “长点射，放！”目标刚进入射程范围，数门高炮同时喷吐火舌，“敌”无人机被成功击落.

此时，防空雷达又捕捉到海面低空来袭目标. 指挥员迅速下达作战指令，部署在海岸的官兵随即投入战斗……

拂晓时分，训练结束. 野营帐篷内灯火通明，参训官兵趁热打铁复盘总结，针对训练中暴露的问题集智攻关，逐项研究破解.

Footage of a Live-Fire Training Exercise Conducted by the Air Defense Battalion of a 74th Group Army Brigade

Source: China Military Network - PLA Daily Author: Shi Wei, Jin Shuo, Li Bin Editor: Wang Yun Published: 2025-09-16

Drawing the Bow in the Dark

—Video of a live-fire training exercise conducted by the Air Defense Battalion of a Brigade of the 74th Group Army

■Shi Wei, Jin Shuo, PLA Daily Special Correspondent Li Bin Photo Report

An anti-aircraft artillery unit conducts nighttime air defense operations.

Missiles launch, intercepting the incoming “enemy.”

Soldiers hoist missiles.

Rushing to their positions.

The waves surge along the southern coast. A sudden, shrill air defense alarm blares, signaling the start of a live-fire training exercise conducted by the Air Defense Battalion of a Brigade of the 74th Group Army.

“Occupy the position, conduct alert and reconnaissance!” Radars from all combat units of the ground-to-air missile unit quickly enter air defense mode. As night falls, “enemy” aircraft rapidly approach the position. Radar operators keep their eyes fixed on the screen, avoiding interference and tracking their targets. As the command to fire was given, missiles roared out, heading straight for the target.

“Enemy drone approaching!” The anti-aircraft artillery unit received the “enemy situation” report. The commander quickly assessed the battlefield situation and allocated firepower appropriately. “Long burst, fire!” As the target entered range, several anti-aircraft guns simultaneously unleashed flames, successfully shooting down the “enemy” drone.

At this moment, air defense radar detected a low-altitude target approaching over the sea. The commander quickly issued combat orders, and the officers and men deployed on the coast immediately engaged...

At dawn, the training concluded. The camping tents were brightly lit, and the participating officers and men took advantage of the opportunity to review and summarize the training, pooling their wisdom to address the problems exposed during the training, researching and solving them one by one.

陆军某旅依据新条令要求为地方院校选派军事教员

来源：解放军报 作者：尚明玺 马嘉隆 王璨然 等 责任编辑：王粲 2025-09-20

陆军某旅依据新条令要求为地方院校选派军事教员——

“兵教官”人人都是“四会”教练员

■尚明玺　解放军报记者　马嘉隆　王璨然

国无防不立，善教得民心. 国防教育是建设和巩固国防的基础，是增强民族凝聚力、提高全民素质的重要途径. 新修订的《中国人民解放军内务条令》对国防教育相关事宜作出明确规定. 今年的 9 月 20 日是第 25 个全民国防教育日，部队各级应以“全民国防教育月”为契机，严格按照新条令有关要求，创新方法形式，丰富手段载体，为培养全民国防观念、增强全民国防意识贡献力量.

关于国防教育，新修订的《中国人民解放军内务条令》第八十九条明确规定：军队单位为有组织的国防教育活动选派军事教员，提供必要的军事训练场地、设施、器材和其他便利条件，应当按照军队有关规定组织实施.

军事教员吴仙（右）为参训学生纠正动作. 尚明玺 摄

镜　头

金秋九月，西南某地方大学操场上，一支由 500 名大一新生组成的匕首操方阵正在进行汇报演出. 刚步入高校的青年学子们英姿飒爽、朝气蓬勃. 操场一角，协助该校开展军训工作的陆军某旅军事教员们整齐列队，悄然登上返回营区的车.

记者了解到，一个多月来，该旅根据上级命令，为前期提报需求的多所驻地高校选派军事教员，协助开展新生军训. “过去，驻地高校也曾多次向旅队提出，希望我们为学生军训派遣军事教员，但由于流程复杂、涉及业务部门多，落实起来费时费力，牵扯了不少精力. ”该旅部队管理科阳科长告诉记者，如今，情况大不相同，新条令明确规定，军队单位为有组织的国防教育活动选派军事教员.

“新条令为军队单位与地方院校携手开展国防教育活动提供了依据，选派军事教员流程更规范、审批更高效. ”阳科长介绍，为高标准完成带训工作，机关按照优秀“四会”教练员标准，遴选 50 余名军政素质过硬的官兵担任地方院校军事教员，并组织为期半个月的强化集训，确保他们在军地交流期间展现军人良好形象和过硬作风.

“我们坚持逐个课目过关、逐人考核验收. 针对学生军训特点，我们还将带兵经验与教学法深度融合，总结提炼更有针对性的组训方法. ”强化集训负责人、二级上士杨洪鑫告诉记者，强化集训期间，军事教员们白天在训练场反复练习训练动作，晚上加班加点背记教学法要点.

“这张‘教官证’来之不易.”一级上士、军事教员吴仙介绍，尽管组训经验丰富，但他依然感到这次选拔难度很高：不仅要求擒拿格斗等课目全面过硬，还对军事理论、组训技能作出明确规定. 集训最终考核阶段，军事教员们不仅要熟练默写规范教学法，还要登台进行教学展示，由旅队抽组的考核组综合评定是否达标，确保军事教员队伍全面过硬.

“作为这次军训的教官，今后一段时间里，我将和大家并肩战斗……”记者在另一所地方高校军训现场看到，军事教员们与参训学生初次见面时的自我介绍经过统一规范. 该校军训总教官、某营赵副营长告诉记者，尽管参加今年带训工作的“兵教官”们人人都是“四会”教练员，但为高标准完成此次带训任务，他们在任务筹备阶段抽组专业骨干精心编撰了《学生军训工作手册》，从维护军人形象的军事教员“十个禁止”，到初次见面时的介绍词和平时交流注意事项，再到各课目组训时的原则方法，内容具体全面，操作性很强.

“转身刺出时，要注意腰部发力……”烈日下，杨洪鑫耐心为参训学生示范动作，短短几天就已经嗓音沙哑. “我们严格按照‘严肃活泼、紧张有序、耐心细致’原则开展带训工作，认真下达每一个口令、示范每一个动作.”杨洪鑫介绍，带训期间，他们始终以军人标准严格要求自己.

“教官的一言一行让我看到了中国军人的样子，他们就是我心中‘最可爱的人’.”大一新生小李说，他从小就有军旅梦. 在军事教员的影响下，他对军营更加向往，更加坚定了参军报国的信念.

“每次训练间隙，经常会有学生热情地询问军营生活. 我们会在遵守保密要求的前提下，与他们分享军营故事和装备知识，在他们心中种下关心国防、热爱国防的种子.”赵副营长介绍，对于大学生来说，军训是对意志品质的磨砺、对国防素养的锤炼，对于军事教员来说，也是一堂提升军人使命感荣誉感的现地教育课.

亲　历

他们很棒，就像我带的兵

■武警重庆总队某支队一级上士　郭德智

9月，山城依旧闷热. 随着开学季到来，我又一次踏入大学校园，执行第6次带训任务. 看着眼前面庞青涩的“05后”新生，我心里不禁嘀咕：高温天气训练，他们能否坚持得下来？

这份担心是有原因的. 一方面，我总觉得“05后”年轻人体能基础偏弱；另一方面，今年训练内容升级，嵌入战术、擒敌等课目，对大学新生来说难度加大.

没想到，上了训练场，新生们的表现让我大吃一惊——即便被太阳晒得汗水直流，也没有人叫苦喊累；几次训练间隙，我让他们到树荫下休息，可没过多久，他们就跑回训练场自己加练.

军训期间，一名加练低姿匍匐的男生让我印象深刻. 因为动作不熟练，几趟下来，他的手肘、膝盖被磨破了皮，后背也被铁丝网划出一道口子. 我叫他去医务室包扎一下，他却摆手说不要紧，还问我：“教官，我的动作标准吗，像不像一名新兵？”我望向他，郑重地回答道：“像！你很棒！”

山城的天气说变就变，一次练习队列时，大雨突至. “有谁想去避雨，打报告！”我告诉他们，这种情况可以申请出列，但队列中没有一个人主动离开.

雨水从他们的脸庞滑落，一双双明亮的眼睛，透着坚定执着. 那一刻，我仿佛感到脚下的操场就是战场，而他们，就是我带的兵.

雨越下越大，水花在脚步间飞溅，他们呼号响亮、步履铿锵. 从这群年轻人身上，我看见了永不服输的劲头、感受到了蓬勃向上的朝气、读懂了深沉而炽热的爱国情怀. 他们的青春热情不仅点燃了他们自己，也深深感染了我.

带训任务结束后，我回到部队. 每次想起军训任务中的一幕幕画面，我都会勉励自己：一定要刻苦训练，努力建功军营.

（解放军报特约记者张永清整理）

点　睛

发挥优势作用 共筑国防长城

■梁　宇

武备之要务，当以强心为先. 全民国防教育，须臾不可轻视.

《中华人民共和国国防教育法》和《中国人民解放军内务条令》均对国防教育相关事宜作出明确规定. 军队单位应树牢条令意识、法规意识，主动担当作为、加强统筹协调，充分发挥军队在国防教育中的优势作用，积极支持参与全民国防教育，不断推动国防教育走深走实、国防观念深入人心.

国家的富强、民族的复兴，离不开全民国防教育的普及和全民国防意识的增强. 我们生活在一个没有战争的国家，但并非生活在一个没有战争的时代. “宜未雨而绸缪，勿临渴而掘井”. 战争可能千日不打，国防观念却不可一日松懈，必须紧跟时代步伐持续开展全民国防教育，增强全民爱国主义的深厚情感、居安思危的忧患意识、崇军尚武的思想观念.

军队作为国防建设的主体力量，在教育内容、师资力量、装备设施等方面拥有开展国防教育的显著优势，在新时代全民国防教育中理应走在前列、做好表率. 军队单位应充分发挥自身优势，用好红色资源、用好战史战例、用好军史场馆，通过选派优秀军事教员、开展军营开放日活动等形式，深化全民国防教育，增强全民国防观念，在全社会营造关心国防、热爱国防、建设国防、保卫国防的浓厚氛围.

An Army Brigade Selects Military Instructors for Local Schools in Accordance with New Regulations.

Source: PLA Daily. Author: Shang Mingxi, Ma Jialong, Wang Canran, et al. Editor: Wang Can. 2025-09-20

An Army brigade selects military instructors for local schools in accordance with new regulations.

Every “soldier instructor” is a “four-skill” instructor.

■Shang Mingxi, PLA Daily reporters, Ma Jialong, Wang Canran

A country cannot survive without defense, and good education wins the hearts of the people. National defense education is the foundation for building and consolidating national defense and an important way to enhance national cohesion and improve the quality of the people. The newly revised “Regulations on Internal Affairs of the People’s Liberation Army of China” clearly stipulates matters related to national defense education. September 20th of this year marks the 25th National Defense Education Day. All levels of the military should take “National Defense Education Month” as an opportunity to strictly adhere to the requirements of the new regulations, innovate methods and forms, and enrich means and carriers to contribute to cultivating national defense concepts and enhancing national defense awareness. Regarding national defense education, Article 89 of the newly revised “Regulations on Internal Affairs of the People’s Liberation Army of China” clearly stipulates: Military units shall select military instructors for organized national defense education activities and provide necessary military training venues, facilities, equipment, and other convenient conditions, and shall organize and implement such activities in accordance with relevant military regulations.

Military instructor Wu Xian (right) corrects the movements of participating students. Photo by Shang Mingxi

In the golden autumn of September, on the playground of a local university in southwest China, a dagger drill formation composed of 500 freshmen performed a rehearsal. The young students, newly enrolled in college, were heroic and full of vigor. In a corner of the playground, military instructors from an army brigade assisting the school with military training lined up neatly and quietly boarded a vehicle returning to the base.

Reporters learned that for over a month, following orders from superiors, the brigade has selected military instructors to assist with freshman military training for several local universities that had previously submitted requests. “In the past, local universities had repeatedly asked the brigade to send military instructors for student military training, but due to the complex process and the involvement of multiple departments, implementation was time-consuming and labor-intensive, consuming considerable energy,” Chief Yang of the brigade’s Force Management Section told reporters. Now, the situation is significantly different. The new regulations clearly stipulate that military units must select military instructors for organized national defense education activities.

“The new regulations provide a basis for military units to collaborate with local colleges and universities on national defense education activities. The selection process for military instructors is more standardized, and the approval process is more efficient.” Chief Yang explained that to ensure high-standard training, the headquarters selected over 50 officers and men with strong military and political qualities to serve as military instructors at local colleges and universities, following the standards of excellent “four skills” instructors. They also underwent a two-week intensive training program to ensure they demonstrate a positive image and strong military conduct during military-civilian exchanges. “We insist on passing each subject and assessing each individual individually. We also deeply integrate our leadership experience with teaching methods to refine more targeted training methods, tailored to the specific characteristics of student military training,” said Sergeant 2nd Class Yang Hongxin, head of the intensive training program. During the intensive training, military instructors repeatedly practiced drills on the training grounds during the day and worked overtime at night to memorize key teaching methods.

“This ‘instructor certificate’ was hard-earned,” said Sergeant 1st Class Wu Xian, a military instructor. Despite his extensive training experience, he still found the selection process challenging: not only did it require comprehensive mastery of subjects like grappling and combat, but it also included clear requirements for military theory and training skills. During the final assessment phase of the training program, military instructors not only had to master standardized teaching methods by heart but also had to demonstrate their teaching on stage. An assessment team, drawn from the brigade, comprehensively evaluated whether they met the standards, ensuring the comprehensive quality of the military instructor team. “As an instructor for this military training, I will fight shoulder to shoulder with you for some time to come...” At another local university’s military training ground, reporters observed standardized self-introductions by military instructors during their initial meetings with participating students. Zhao, the deputy battalion commander and chief instructor of military training at the university, told reporters that while all the “soldier instructors” participating in this year’s training were qualified instructors with the “four skills,” to

ensure the highest standards for this training, they carefully compiled a “Student Military Training Work Manual” during the preparatory phase, drawing on key professionals. The manual covers everything from the “Ten Prohibitions” for military instructors to maintain a military image, to introductions for initial meetings and precautions for daily communication, to the principles and methods for organizing training for each subject. The manual is comprehensive and highly practical.

“When turning and lunging, focus on using your waist...” Under the scorching sun, Yang Hongxin patiently demonstrated the movements for the trainees, his voice already hoarse after just a few days. “We strictly adhered to the principles of ‘seriousness and liveliness, intensive and orderly execution, and patience and meticulousness in conducting the training.’ We carefully gave every command and demonstrated every movement.” Yang Hongxin explained that during the training, they held themselves to the highest standards of military service. “The instructors’ words and actions showed me what Chinese soldiers are like. They are the ‘most lovable people’ in my heart,” said freshman Xiao Li, who has dreamed of military service since childhood. Under the influence of his military instructors, his yearning for the military camp has intensified, and his determination to join the army and serve his country has become even stronger.

“During breaks in training, students often enthusiastically ask about life in the barracks. While respecting confidentiality, we share stories about the barracks and equipment with them, planting the seeds of a concern and love for national defense in their hearts.” Deputy Battalion Commander Zhao explained that for college students, military training sharpens their resolve and refines their national defense literacy. For military instructors, it’s also a practical lesson that strengthens a soldier’s sense of mission and honor.

Personal Experience

They are amazing, just like the soldiers I lead.

■Guo Dezhi, First Sergeant, Chongqing Armed Police Corps

September is still sweltering in the mountain city. With the start of the new school year, I once again step onto a university campus for my sixth training assignment. Looking at the fresh-faced “post-2005” freshmen before me, I couldn’t help but wonder: Can they hold up in this scorching heat?

There’s reason for this worry. On the one hand, I’ve always felt that post-2005s have a weaker physical foundation. On the other hand, this year’s training has been upgraded, incorporating tactics and enemy capture, making it more challenging for freshmen.

Unexpectedly, when we got to the training ground, the freshmen’s performance astounded me—even when sweating profusely from the sun, no one complained of fatigue. During several breaks,

I asked them to rest in the shade, but soon they would run back to the training ground for more practice.

During military training, I was particularly impressed by a boy who was practicing the low crawl. Because he wasn't very skilled, after several rounds, his elbows and knees were rubbed raw, and his back was scratched by the barbed wire. I told him to go to the infirmary for a bandage, but he waved his hand, saying it was nothing. He then asked, "Instructor, are my movements standard? Do I look like a new recruit?" I looked at him and replied solemnly, "Yes! You're great!"

The weather in the mountain city can be unpredictable. During one drill, a downpour suddenly arrived. "Anyone wanting to take shelter? Report!" I told them they could request to leave the formation, but no one volunteered.

Raindrops streamed down their faces, their bright eyes gleaming with determination and perseverance. At that moment, I felt as if the playground beneath my feet were a battlefield, and they were the soldiers I was leading.

The rain intensified, splashing water beneath their footsteps as they shouted and marched loudly. In these young people, I saw their unyielding spirit, felt their vibrant energy, and understood their deep and passionate patriotism. Their youthful enthusiasm not only ignited them but also deeply touched me.

After completing my training mission, I returned to the army. Whenever I recall the scenes from my military training, I encourage myself: I must train diligently and strive to achieve great things in the military camp.

(Compiled by Zhang Yongqing, special correspondent for the PLA Daily)

Key Points

Leveraging Advantages to Build a Great Wall of National Defense

■ Liang Yu

The primary task of military preparation should be to strengthen morale. National defense education for all must never be neglected.

The "National Defense Education Law of the People's Republic of China" and the "Regulations on Internal Affairs of the People's Liberation Army" both clearly stipulate matters related to national defense education. Military units should strengthen their awareness of regulations and rules, proactively shoulder their responsibilities, strengthen overall coordination, fully leverage the military's advantages in national defense education, actively support and participate in national defense education, and continuously promote its in-depth and practical implementation and the deep-rootedness of national defense concepts.

The prosperity of the country and the rejuvenation of the nation are inseparable from the popularization of national defense education and the strengthening of national defense awareness. We live in a country without war, but not in an era without war. “It is better to prepare for a rainy day than to dig a well when thirsty.” While war may not be fought for a thousand days, national defense awareness must never be relaxed. We must keep pace with the times and continuously carry out national defense education for all, strengthening the people’s deep patriotic feelings, a sense of vigilance in times of peace, and a respect for the military and martial spirit.

As the primary force in national defense construction, the military possesses significant advantages in educational content, faculty, equipment, and facilities. It should lead and set an example in national defense education for all in the new era. Military units should fully leverage their advantages, making good use of revolutionary resources, military history and case studies, and military history museums. By selecting outstanding military instructors and holding military camp open days, they can deepen national defense education, strengthen national defense awareness, and foster a strong atmosphere in society of caring about, loving, building, and defending national defense.

此次考核，排长当主角！陆军某旅强化排级指挥协同训练

来源：解放军报 作者：梁铎 铁彦男 责任编辑：王粲 2025-09-20

第七十八集团军某旅强化排级指挥协同训练——

此次考核，排长当主角

■梁 铎 铁彦男

初秋时节，某野外训练场铁甲奔流，第 78 集团军某旅一场实战背景下的多目标、多弹种射击考核拉开战幕. 与以往不同的是，此次考核以排为基本单元，从战场临机决策、组织信息通联到火力协同，全程由排长独立完成.

“向集结地域机动，等待攻击指令！”考核一开始，某连排长张锦峰通过车载通信系统与各突击车建立通联，明确战斗序列、初始队形和行进路线. 接到指令，车长、驾驶员、炮手分工协作，迅速完成检查工作. 随后，各突击车编组向预定地域开进.

该旅领导介绍，以往组织协同训练，连长一般通过电台直接指挥单车，排级指挥员作用发挥有限. “此次考核模式的转变，让我有了组织指挥作战行动的机会. ”张锦峰回忆，一次多要素对抗训练中，“敌”释放强电磁干扰，导致与连指挥所失联. 战斗打响后，他不仅未能第一时间组织全排机动，排所在位置还被“敌”发现.

“现代战争中，作战单元小型化特征日益显现，对排级指挥员的指挥能力提出了更高要求. ”那次训练结束后，该旅领导意识到，必须下大力解决排级指挥员指挥技能偏弱、协同能力

不强的问题. 为此，他们专门组织基层排长集中展开专题理论学习，安排优秀营连指挥员传授经验方法和心得体会，常态化组织连排自主对抗训练，着力提升基层排长的理论素养和指挥能力.

“制胜未来战场，排级指挥员必须具备复杂环境下快速定下决心、有效组织协同、灵活分配火力的过硬本领. ”该旅领导介绍，此次考核，他们主动设置难局、险局、危局，倒逼排级指挥员把技能练到极致、把武器用到极限.

“前方发现‘敌’碉堡群，区分火力，依次摧毁！”考核现场，张锦峰沉着研判态势，果断下达火力打击指令. 各车立即占领有利射击阵位，排长指挥所在车组率先开火，首发便命中目标. 其他车组按照指令依次展开火力打击，接连摧毁“敌”碉堡.

“左前方‘敌’装甲车企图迂回，右前方发现‘敌’机枪阵地！”完成首轮目标清除后，导调指令接踵而至. 张锦峰判明目标性质、威胁等级，向各车组下达新指令：“1 车、2 车对左翼装甲车进行交叉火力歼灭，3 车压制右前方机枪点. ”

各车驾驶员闻令而动，炮手快速捕捉目标、测距瞄准、果断击发. 一枚枚炮弹呼啸而出，精准命中“敌”装甲目标和机枪阵地.

置身考场，张锦峰感触颇深：“从建立通联、确定攻击路线，到分配目标、火力支援，每个环节的协同效率都直接影响战斗成败. 排指挥员不仅要精通单车战术，更要具备全局视野和指挥多车协同的能力. ”

该旅领导介绍，此次射击考核，排级指挥员较好地完成了任务，但也暴露出实战意识不强、特情处置不灵活等问题. 下一步，他们将持续淬炼排指挥员在构建指挥链、临机决策、多车火力协同等方面能力，不断强化排级指挥员指挥能力.

Platoon Leaders Take Center Stage in This Assessment! An Army Brigade Strengthens Platoon-Level Command and Coordination Training.

Source: PLA Daily Author: Liang Duo, Tie Yanan Editor: Wang Can 2025-09-20

A brigade of the 78th Group Army strengthens platoon-level command and coordination training.

Platoon leaders take center stage in this assessment.

■ Liang Duo, Tie Yanan

In early autumn, at a field training ground, armored vehicles churned as a brigade of the 78th Group Army launched a multi-target, multi-ammunition shooting assessment in a real-world combat setting. Unlike previous assessments, this one was organized around the platoon, with the

platoon leader independently responsible for the entire process, from improvisational battlefield decision-making, organizing information communications, to firepower coordination.

“Maneuver to the assembly area and await attack orders!” At the outset of the assessment, Platoon Leader Zhang Jinfeng of a certain company established communication with each assault vehicle via the vehicle-mounted communication system, clarifying the battle order, initial formation, and route. Upon receiving the order, the vehicle commander, driver, and gunner worked together to quickly complete the inspection. Subsequently, the assault vehicles formed into groups and moved toward the designated area. Brigade leaders explained that in previous coordinated training, company commanders typically directed individual vehicles directly via radio, limiting the role of platoon commanders. “This shift in assessment model has given me the opportunity to organize and direct combat operations,” Zhang Jinfeng recalled. During a multi-element confrontation training exercise, the “enemy” released strong electromagnetic interference, causing communication with the company command post to be lost. After the battle began, not only did he fail to immediately organize the entire platoon’s maneuver, but his position was also discovered by the “enemy.”

“In modern warfare, the increasingly miniaturized nature of combat units places higher demands on the command capabilities of platoon commanders.” After that training session, brigade leaders realized they needed to address the weak command skills and coordination capabilities of platoon commanders. To this end, they organized specialized theoretical study sessions for grassroots platoon leaders, arranged for outstanding battalion and company commanders to share their experiences and insights, and regularly organized company and platoon independent confrontation training to enhance the theoretical knowledge and command capabilities of grassroots platoon leaders. “To win on future battlefields, platoon commanders must possess the unmatched ability to quickly make decisions, effectively organize and coordinate, and flexibly allocate firepower in complex environments.” Brigade leaders explained that during this assessment, they proactively set up difficult, risky, and dangerous situations, forcing platoon commanders to hone their skills and use their weapons to the utmost.

“We’ve discovered a cluster of ‘enemy’ bunkers ahead. Distinguish your firepower and destroy them sequentially!” At the assessment site, Zhang Jinfeng calmly assessed the situation and decisively issued the order for a fire strike. Each vehicle immediately took up advantageous firing positions. The platoon leader directed his crew to open fire first, and their first shot hit the target. Following the order, the other crews launched fire strikes, destroying the ‘enemy’ bunkers one after another.

“‘Enemy armored vehicles are attempting a detour to the left ahead, and an ‘enemy’ machine gun position has been discovered to the right ahead!” After completing the initial round of target elimination, command and control instructions followed. Zhang Jinfeng determined the nature of the target and the threat level and issued new instructions to each crew: “Vehicle 1 and 2, conduct

crossfire to destroy the armored vehicles on the left wing; vehicle 3, suppress the machine gun position to the right front."

The drivers of each vehicle acted upon command, and the gunners quickly acquired the target, measured the range, and fired decisively. Shell after shell roared out, accurately hitting the "enemy" armored targets and machine gun positions.

In the examination room, Zhang Jinfeng was deeply impressed: "From establishing communications and determining the attack route to assigning targets and providing fire support, the efficiency of coordination at every stage directly affects the success of the battle. Platoon commanders must not only be proficient in individual vehicle tactics, but also possess a comprehensive perspective and the ability to coordinate multiple vehicles."

Brigade leaders explained that the platoon commanders performed well in the shooting assessment, but also exposed issues such as a lack of real-world combat awareness and inflexible handling of special situations. Moving forward, they will continue to hone the platoon commanders' abilities in establishing a chain of command, making impromptu decisions, and coordinating multiple vehicles' firepower, thereby continuously strengthening their command capabilities.

榜样力量点燃奋斗激情！陆军某部深化教育实践活动

来源：解放军报 作者：魏良熙 刘煜 责任编辑：王粲 2025-09-21 07:47:36

陆军某部发挥榜样示范作用深化教育实践活动——

强化正向激励 点燃奋斗激情

■魏良熙 刘 煜

秋日，陆军某部礼堂内座无虚席，一场"奋斗者说"强军故事会热烈展开.

"困难再大也要上，这是修理兵的职责所在！"该部某分队分队长钱辉走上讲台，同战友分享自己执行任务的经历. 去年底，上级赋予该分队某型设备修复任务. 面对任务挑战，钱辉和战友白天铆在现场采集数据，晚上仔细推敲方案，最终圆满完成任务.

"我们要向钱班长学习，练就过硬本领、聚力攻坚克难，全面提升履行使命任务能力. "听完钱辉的奋斗故事，台下官兵深受触动，纷纷表示要发扬奋斗精神，在任务一线勇当先锋、敢打头阵.

"这些典型从官兵中来，他们的事迹可感可学，更有说服力和感染力. "该部领导介绍，在聚焦"铸牢政治忠诚、打好攻坚之战"深化教育实践活动中，他们注重发挥官兵身边典型榜样示范作用，遴选所属单位优秀班长、训练尖兵、技术能手等，分享奋斗故事，激励官兵

对标先进、创先争优；更新完善“典型故事库”，遴选理论骨干成立理论小分队，深入一线开展教育授课，进一步引导官兵坚定强军信念、提振奋斗精神.

前不久，针对新转岗战友专业基础较薄弱等问题，该部一级军士长顾海山主动申请承担驾驶专业集训教学任务. 他把车舱作为教学课堂，围绕装备原理、故障排除等进行详细讲解. 在顾海山手把手帮带下，新转岗战友快速成长，并顺利通过考核.

据了解，该部突出实践导向，坚持把深化教育实践活动融入战、建、备一体推进，在发挥榜样示范作用基础上，持续丰富教育形式；开展“学习英雄 建功立业”活动，引导官兵在聆听先辈事迹、感悟英雄精神中激发胜战之气；拓展联教联学平台，与友邻英模单位建立共建机制，在思想政治教育、军事训练等方面互学互鉴、共同进步. 各级领导干部还带头深入训练一线，将教育“准星”对准打仗“靶心”，聚力解决影响部队战斗力提升的重难点问题.

该部某连干部金狄坤带头冲锋、敢闯敢拼，在专业集训中取得个人第一的好成绩；教员董洋牵头组织某型装备训练，带领官兵集智破解训练难题……随着深化教育实践活动深入开展，该部官兵矢志打赢的信念更加坚定、奋斗热情持续高涨.

The Power of Role Models Ignites Passion for Striving! An Army Unit Deepens Its Educational and Practical Activities.

Source: PLA Daily Author: Wei Liangxi, Liu Yu Editor: Wang Can 2025-09-21

An Army unit leverages role models to deepen its educational and practical activities –

Strengthening positive motivation and igniting passion for striving

■ Wei Liangxi, Liu Yu

On an autumn day, the auditorium of an Army unit was packed as a “Strugglers Speak” storytelling event focused on strengthening the military unfolded.

“No matter how difficult the situation, we must advance. This is the duty of a repairman!” Qian Hui, the leader of a detachment within the unit, took the podium and shared his mission experiences with his comrades. Late last year, the unit was tasked with repairing a certain type of equipment. Faced with the challenging task, Qian Hui and his comrades spent their days collecting data on-site and their nights meticulously refining plans, ultimately completing the mission successfully. “We must learn from Squad Leader Qian, cultivate strong skills, focus on overcoming challenges, and comprehensively enhance our ability to fulfill our mission.” After hearing Qian Hui’s story of struggle, the officers and men in the audience were deeply moved and expressed their determination to carry forward the spirit of struggle and bravely take the lead on the front lines.

“These role models come from among the soldiers themselves. Their deeds are tangible and learnable, making them more persuasive and inspiring.” Unit leaders explained that during the in-depth education and practice activities focused on “forging firm political loyalty and winning the battle against tough challenges,” they emphasized leveraging the exemplary role models within the ranks. They selected outstanding squad leaders, training pioneers, and technical experts from their units to share their stories of struggle, encouraging them to benchmark against advanced units and strive for excellence. They also updated and improved the “Exemplary Story Library,” selected key theoretical experts to form a theoretical team, and conducted on-site education and lectures, further guiding the soldiers’ resolve to strengthen the military and boost their fighting spirit.

Recently, to address the weak professional foundation of newly transferred comrades, Sergeant Second Class Gu Haishan of the unit volunteered to undertake intensive training in driving. He used the vehicle cabin as a classroom, providing detailed explanations on equipment principles and troubleshooting. Under Gu Haishan’s hands-on guidance, the newly transferred comrade quickly grew and successfully passed his assessment.

It is understood that the unit emphasizes a practical orientation, integrating in-depth educational practice activities into the integrated advancement of combat, construction, and preparation. Based on the exemplary role played by these units, the unit continuously enriches its educational offerings. It carries out the “Learn from Heroes, Make Contributions” campaign, guiding officers and men to inspire a spirit of victory by listening to the stories of their predecessors and embracing their heroic spirit. It also expands joint education platforms and establishes co-construction mechanisms with neighboring exemplary units, fostering mutual learning and progress in ideological and political education, military training, and other areas. Leading cadres at all levels also take the lead in engaging in on-the-ground training, focusing their education efforts on the “bull’s eye” of combat, and focusing on resolving key and difficult issues that hinder the unit’s combat effectiveness. Jin Dikun, a cadre of a company of the unit, took the lead in charging, daring to take risks and fight hard, and achieved the first place in the professional training; instructor Dong Yang took the lead in organizing training on a certain type of equipment, and led the officers and men to pool their wisdom to solve training problems... With the deepening of the education and practice activities, the officers and men of the unit are determined to win and their fighting spirit continues to rise.

陆军某旅为军士队伍搭建创新平台破解战训难题

来源：解放军报 作者：简立夫 廖晓彬 责任编辑：王粲 2025-09-21 07:46:51

陆军某旅为军士队伍搭建创新平台破解战训难题

五个“士兵工作室”落户修理连

陆军某旅某营修理连组织“张涛工作室”揭牌仪式. 林江鹏 摄

编者按　习主席强调，要尊重官兵主体地位，发扬军事民主，鼓励创新创造，把广大官兵练兵热情激发出来、练兵智慧凝聚起来. 陆军某旅鼓励并支持基层连队创办“士兵工作室”，积极为专业技术过硬、演训经验丰富的军士搭建创新平台，以任务为牵引进行集智攻关，将训练难题变成研究课题，将战位需求化为创新动力，充分挖掘现有装备潜能、大胆革新创新，加速部队战斗力生成.

解放军报讯　简立夫、特约记者廖晓彬报道：“希望你们紧盯备战打仗，弘扬工匠精神，为破解战训难题提供更多‘金点子’……”前不久，陆军某旅某营修理连二级上士张涛接过教导员递来的“张涛工作室”牌匾，自豪之情溢于言表. 这是近年来该连成立的第 5 个以士兵名字命名的工作室.

“为专业技术过硬、演训经验丰富的军士搭建创新平台，是加速提升部队战斗力的迫切需要. ”谈及创办“士兵工作室”的初衷，该旅领导向记者讲起一件事. 一次训练任务中，某型装甲车因故障“趴窝”，技术骨干轮番上阵却束手无策，不得不求助厂家支援. 这件事让旅党委一班人意识到：必须扔掉厂家伴随保障这根“拐杖”，建强自己的技术保障团队.

命名，是搭台更是挖潜. 修理连一级军士长司升春，有 20 余年高炮维修经验，被官兵誉为“高炮神医”. 2022 年 3 月，以他的名字命名的“司升春工作室”在该连率先挂牌成立. 2024 年，该连二级上士王福康在全国“匠心杯”装备维修职业技能大赛中荣获金奖，该连随即成立“王福康工作室”. 在上级推动下，通过高级技师职业技能鉴定的二级军士长徐成杰、三级军士长裴玉宝，也相继拥有以各自名字命名的工作室. 前段时间，张涛在上级组织的“大师傅”专业集训中获总评第一，专业成果得到广泛认可. 经各级充分论证，以张涛名字命名的工作室成立.

该连王指导员告诉记者，“士兵工作室”的人员组成，按照专业分工不同，跨班排进行选拔，兄弟单位相关技术骨干也可申请加入. 工作室领衔的“兵专家”和成员平时在各自岗位上履职尽责，遇有专业领域内重难点课题时，以任务为牵引进行集智攻关，将训练难题变成研究课题，将战位需求化为创新动力，充分挖掘现有装备潜能，加速部队战斗力生成.

“士兵工作室”的高效稳定运行，离不开该旅各级多措并举营造创新环境条件：常态更新硬件设施，购买加工机床、3D 打印机等物资器材，鼓励技术骨干大胆革新创新；与修理工厂、军队院校、训练基地建立联培共育机制，通过“请进来”和“走出去”提升骨干专业能力；在评功评奖和留队晋衔上，按照有关政策给予倾斜，进一步立起了“有为者有位”的鲜明导向；建立容错机制，鼓励技术骨干大胆尝试，助力更多专业人才拔节成长……

前不久，由“徐成杰工作室”革新改进的“模块化野战抢修工具箱”在训练场上大放异彩. 那次训练中，部分装备在复杂地形长途机动时出现故障. 关键时刻，徐成杰带领工作室成员紧急前出抢修，利用自研工具使维修时间缩短近一半. 采访中记者发现，这款工具箱不仅模块分明、轻巧便携，还增加了防水功能，更适于野外抢修. 如今，它已被该旅推广使用.

工作室虽小，成果却不少. 谈起“士兵工作室”的创新成果，王指导员如数家珍：“司升春工作室”创新研制的“击发控制装置模拟器”，大幅提升教学指导和特情处置效率；“王福康工作室”发明的精密仪器便携式修理箱，能为野外修理精密仪器提供无尘、恒温、明亮的良好条件……截至目前，该连已有数十个小革新、小发明被全旅推广使用，还有多项创新成果在申请国家专利.

“士兵工作室”让创新激情在基层竞相迸发，助推人才加速成长. 一级上士刘帅是“徐成杰工作室”的一员，近年来跟随工作室多次参加重大保障任务. 下一步，他计划与徐成杰区分不同车型维修，展开专攻精研. 刘帅说：“命名，是光荣更是责任. 我一定努力提升本领，期待着有一天用自己的名字命名工作室！”

An Army Brigade Has Established an Innovation Platform for Its Sergeants to Address Combat Training Challenges.

Source: PLA Daily Author: Jian Lifu, Liao Xiaobin Editor: Wang Can 2025-09-21

An Army brigade has established an innovation platform for its sergeants to address combat training challenges.

Five “Soldier Studios” have been established in a repair company.

The repair company of a battalion in an Army brigade held an unveiling ceremony for the “Zhang Tao Studio.” Photo by Lin Jiangpeng.

Editor’s Note: President Xi Jinping emphasized the importance of respecting the leading role of officers and men, promoting military democracy, and encouraging innovation and creativity to unleash the enthusiasm and wisdom of officers and men in training. An Army brigade is encouraging and supporting grassroots companies to establish “Soldier Studios,” actively building an innovation platform for sergeants with strong professional skills and rich training experience. These studios, driven by missions, allow for collective research, transforming training challenges

into research topics and position requirements into driving innovation. They are fully tapping the potential of existing equipment, boldly innovating, and accelerating the development of the unit's combat effectiveness. PLA Daily, Jian Lifu, and special correspondent Liao Xiaobin report: "I hope you will focus on preparing for war, promote the spirit of craftsmanship, and provide more 'golden ideas' to solve combat training challenges..." Not long ago, Sergeant Second Class (二级上士) Zhang Tao of the Repair Company of a battalion in an Army brigade accepted the "Zhang Tao Studio" plaque from his instructor, his pride overflowing. This is the fifth studio named after a soldier established by the company in recent years.

"Establishing an innovation platform for soldiers with strong professional skills and rich training experience is an urgent need to accelerate the improvement of the unit's combat effectiveness." Speaking about the original intention of establishing the "Soldier Studio," a brigade leader recounted an incident to reporters. During a training mission, an armored vehicle broke down due to a malfunction. Technical backbones took turns to assist, but were unable to resolve the issue, forcing them to seek support from the manufacturer. This incident made the brigade Party Committee realize that they must abandon the "crutch" of manufacturer support and build a strong technical support team.

Naming is not only about setting the stage but also about tapping potential. Master Sergeant Class-1 (一级军士) Si Shengchun of the Repair Company has over 20 years of experience in anti-aircraft artillery maintenance and is known among officers and men as a "miracle doctor of anti-aircraft artillery." In March 2022, the company established its first "Si Shengchun Studio," named after him. In 2024, Sergeant Second Class (二级上士) Wang Fukang of the company won the gold medal in the National "Craftsmanship Cup" Equipment Maintenance Vocational Skills Competition, prompting the company to establish the "Wang Fukang Studio." Under the guidance of superiors, Master Sergeant Class-2 (二级军士长) Xu Chengjie and Master Sergeant Class-3 (三级军士长) Pei Yubao, who passed the senior technician professional skills assessment, also have their own studios named after them. Recently, Zhang Tao received first place overall in a "Master Chef" professional training intensive organized by superiors, earning wide recognition for his professional achievements. After thorough review at all levels, the studio named after Zhang Tao was established.

Political Instructor Wang of the company told reporters that personnel for the "Soldier Studio" will be selected across squads and platoons based on their specialized work, and relevant technical personnel from sister units can also apply to join. The "soldier experts" and members of the studio diligently perform their duties in their respective positions. When faced with challenging and critical issues in their specialized fields, they focus on the mission to collectively tackle them, transforming training challenges into research topics and position requirements into driving forces for innovation. They fully tap the potential of existing equipment and accelerate the unit's combat effectiveness.

The efficient and stable operation of the “Soldier Studio” is inseparable from the brigade’s multi-pronged approach to fostering an innovative environment: They regularly update hardware facilities, purchase equipment such as processing machines and 3D printers, and encourage key technical personnel to boldly innovate. They establish joint training and development mechanisms with repair shops, military academies, and training bases, enhancing the professional capabilities of key personnel through both “inviting in” and “going out.” They provide preferential treatment in commendations and awards, as well as retention and promotions, in accordance with relevant policies, further establishing a clear principle of “promoting positions for those who demonstrate ability.” They establish a tolerance mechanism to encourage key technical personnel to boldly experiment, helping more professionals to grow rapidly.

Recently, the “modular field repair toolbox” innovated and improved by the “Xu Chengjie Studio” proved a hit on the training ground. During that training exercise, some equipment malfunctioned during long-distance maneuvers in complex terrain. At this critical moment, Xu Chengjie led the studio members to urgently repair the equipment, using their own tools to cut repair time by nearly half. During the interview, reporters discovered that this toolbox is not only modular and lightweight, but also waterproof, making it even more suitable for field repairs. It is now being promoted by the brigade.

Despite its small size, the studio has achieved considerable success. Instructor Wang recounted the innovative achievements of the “Soldier Studio”: “The firing control device simulator developed by the Si Shengchun Studio has significantly improved the efficiency of instruction and emergency response; the portable precision instrument repair box invented by the Wang Fukang Studio provides dust-free, constant temperature, and bright conditions for field repairs of precision instruments... To date, dozens of small innovations and inventions have been adopted by the entire brigade, and several are currently in the process of applying for national patents.

The “Soldier Studio” fosters a passion for innovation at the grassroots level, accelerating the development of talent. Sergeant First Class Liu Shuai, a member of the “Xu Chengjie Studio,” has participated in numerous major support missions with the studio in recent years. Next, he and Xu Chengjie plan to focus on repairing different types of vehicles and specialize in them. Liu Shuai said, “Naming is an honor and a responsibility. I will strive to improve my skills and look forward to one day naming my studio after myself!”

Sergeant First Class (一级上士刘帅是); Sergeant Second Class (二级上士张涛接); Sergeant Second Class (二级上士王福康); Master Sergeant Class-1 (一级军士长司升春); Master Sergeant Class-2 (二级军士长徐成杰); and Master Sergeant Class-3 (三级军士长裴玉宝)

从“来回跑”到“上门办”,“满天星”服务小分队为基层解难

来源：中国军网-解放军报 作者：刘芳芳 闫涛 责任编辑：徐占虎

2025-09-23

第 82 集团军某旅为基层官兵解决“办事难、跑路多”难题——

“满天星”服务小分队成立啦

■刘芳芳　闫涛

“‘满天星’服务小分队真是太周到了，省去了基层官兵跑机关的麻烦. ”秋日的一天，第 82 集团军某旅通信连文书董佳捧着刚审核完的报表，连连为机关点赞.

前段时间，该旅“满天星”服务小分队来到这个连解难帮困，带走了一批办理保障卡和差旅费报销的审核材料. 没过多久，他们就将审核好的材料送了回来. 这正是该旅机关为破解基层“办事难、跑路多”推出的全新举措.

该旅多个营区距机关较远，且点位分散，以往官兵往返办事需要耗费大量时间，容易影响到日常训练工作. 一次，为上报一份训练器材维修申请，某连下士叶润杰就因材料不全或办事人员临时有任务，往机关跑了好几趟. 此前，机关也曾推出一站式服务机制，但因业务流程等方面限制，并未得到很好落实.

不久后，该旅组织官兵恳谈会. 针对“基层办事难”这一问题，有官兵反映：“机关能不能定期派人员到基层现场办公？”

官兵的呼声很快得到旅党委的回应，他们表示，要以官兵需求为导向，切实把暖心服务送到基层一线，为基层解难帮困. “满天星”服务小分队应运而生，寓意机关服务像满天星一样，遍布基层各处.

“满天星”服务小分队成立后，每隔一段时间，机关各科室都会派出一名业务骨干组成小分队，通过上门服务帮助基层官兵办业务、解难题. 他们采取“批量处理+上门反馈”的工作模式，收集各营连待办事项，并分类整理后集中办理，再将办结材料送回各单位.

前不久，某连三级军士长杨锟家属在办理随军手续时，因对政策和流程不够熟悉，准备材料屡次出现问题，导致办理进度缓慢. 那几天，小分队恰巧来到该连，得知杨锟的情况后，人力资源科胡干事第一时间与他和家属对接，详细讲解所需材料和办理流程，协助整理各类证明文件，大大提高了办理效率.

很快，杨锟就拿到了随军手续文件. “小分队的到来，为我们连解决了很多问题，让官兵们可以把更多时间精力投入到练兵备战当中. ”该连干部王泽林说.

深入基层、服务一线，不仅要能解决问题，还要能主动发现问题. 一次，营房科王助理员到某连送完办结材料后，留意到该连学习室投影仪比较老旧、晾衣场在雨天出现了严重积

水，他便将这几条问题主动上报. 很快，机关派出专人深入各营连收集类似问题并统一汇总，列出整改清单，随后派出维修队、工程组陆续奔赴基层，解决了不少基层生活难题.

从基层“来回跑”到机关“上门办”，有效的服务举措就像一面镜子，让机关看到了基层的真实需求；更像一座桥梁，让上下级的沟通变得轻松顺畅. 某营王教导员感慨地说：“当机关主动走下来，我们感受到的不仅是办事效率的提升，更有一种真正被组织重视和关心的温暖. ”

笔者了解到，该旅还不断拓展机关服务范围，比如开设“政策微课堂”解读政策法规、邀请军医开展巡诊、组织机关干部与基层官兵结成互助对子等，力求更好更精准地为基层官兵服务、解决难题.

From “Running Back and Forth” to “On-Site Services,” the “Mantianxing” Service Detachment Solves Problems for Grassroots Officers and Men.

Source: China Military Network - PLA Daily Author: Liu Fangfang, Yan Tao Editor: Xu Zhanhu

2025-09-23

A brigade of the 82nd Group Army is solving the problem of “difficulty in getting things done and frequent trips” for grassroots officers and men.

The “Mantianxing” service detachment has been established.

■Liu Fangfang, Yan Tao

“The ‘Mantianxing’ service detachment is truly thoughtful. It saves grassroots officers and men the trouble of running back and forth to the headquarters.” One autumn day, Dong Jia, a clerk in the communications company of a brigade of the 82nd Group Army, held up a newly reviewed report and gave the headquarters a thumbs-up.

Some time ago, the brigade’s “Mantianxing” service detachment visited the company to help with a problem, taking away a batch of review materials for applying for insurance cards and travel expense reimbursements. Shortly thereafter, they returned the reviewed materials. This is a new initiative launched by the brigade headquarters to address the “difficulty in getting things done and frequent trips” faced by grassroots officers and men. Many of the brigade’s camps are far from headquarters and scattered across the city. Previously, soldiers had to travel back and forth for errands, which often disrupted daily training. On one occasion, Corporal Ye Runjie of a certain company had to make several trips to headquarters to submit a request for repairs for training equipment due to incomplete documents or staff being on temporary assignments. Previously, headquarters had introduced a one-stop service mechanism, but due to limitations in business processes and other factors, it wasn’t fully implemented.

Soon after, the brigade held a meeting for officers and men. Regarding the difficulty of handling affairs at the grassroots level, one soldier asked, “Can headquarters regularly send personnel to the grassroots level for on-site work?”

The brigade’s Party Committee quickly responded to the soldiers’ concerns, stating that they would prioritize the soldiers’ needs and provide heartwarming services to the grassroots level, addressing their challenges. The “Mantianxing” service detachment was established, symbolizing that headquarters services, like the stars in the sky, are spread throughout the grassroots. Since the establishment of the “Mantianxing” service detachment, each department has periodically dispatched a key staff member to form a team to provide on-site service and assist grassroots officers and men with their business and resolve issues. They employ a “batch processing + on-site feedback” approach, collecting pending tasks from each battalion and company, categorizing and organizing them for centralized processing, and then sending the completed materials back to their respective units.

Not long ago, the family of Third Sergeant Major Yang Kun of a certain company encountered repeated problems preparing documents while applying for accompanying them to the military due to a lack of familiarity with policies and procedures, resulting in slow processing. The team happened to visit the company during those days. Upon learning of Yang Kun’s situation, Human Resources Officer Hu immediately met with him and his family, explaining the required materials and procedures in detail and assisting with the organization of various supporting documents, significantly improving the efficiency of the process.

Yang Kun quickly received his accompanying documents. “The arrival of the team has resolved many issues for our company, allowing officers and men to devote more time and energy to training and preparation for combat,” said Wang Zelin, a cadre from the company. Serving the front lines at the grassroots level requires not only the ability to solve problems but also the ability to proactively identify them. Once, after delivering completed documents to a company, Assistant Wang from the Barracks Department noticed that the projector in the company’s study room was old and that the laundry area was flooded during rainy days. He proactively reported these issues. Headquarters quickly dispatched personnel to various battalions and companies to collect and compile similar issues, compiling a list of corrective measures. Maintenance and engineering teams were then dispatched to the grassroots level, resolving many of the grassroots’ daily challenges.

From “running back and forth” to “visiting” by the headquarters, effective service initiatives serve as a mirror, allowing headquarters to see the real needs of the grassroots; more importantly, they act as a bridge, facilitating smooth and easy communication between superiors and subordinates. Instructor Wang of a battalion said with emotion, “When headquarters proactively visit us, we feel not only improved efficiency but also a genuine sense of care and concern from the organization.”

The author learned that the brigade is also continuously expanding its headquarters services. For example, they offer “policy micro-classrooms” to explain policies and regulations, invite military

doctors to conduct medical rounds, and establish mutual assistance pairs between headquarters cadres and grassroots officers and men. These efforts aim to provide better and more targeted services to grassroots soldiers and resolve their challenges.

别轻易批评战士“小聪明”

■陆军某旅某连二级上士　张伟杰

这几日，连队组织射击理论学习. 看着班里下士纪明聪站在讲台上，自信满满地与战友们分享自己总结出的射击方法，我由衷为他高兴. 此前，我曾由于存在惯性认知，打击了他的创新积极性.

那一次，旅里组织狙击手集训，我被指定为集训队教员. 考虑到纪明聪专业基础扎实、工作认真负责，我便推荐他加入了集训队.

有次理论学习结束后，我按惯例组织集训队员交流体会，大家都畅所欲言时，性格开朗乐观的纪明聪却一直沉默不语. 察觉到他的异样后，那天休息时我约纪明聪在操场散步.

在我循循善诱下，他慢慢道出了原因. 前段时间，集训队组织战术训练，纪明聪结合日常思考，提出了一套能够提升运动射击精度的方法，还以近几次射击成绩为佐证，没想到却遭到我的批评.

我一下回想起来. 当时临近集训结业考核，小纪成绩一向稳定，我希望他能够凭实力取得好成绩，便提醒他“要扎实训练，不要耍这些‘小聪明’”. 在我潜意识里，觉得入伍没几年的新同志琢磨不出什么有价值的东西，于是没怎么思考就否定了他的想法.

这次看到小纪脸上失落的表情，我猛然意识到，为了研究这一训练方法，他肯定投入了不少精力. 于是，我郑重向他道歉.

回到宿舍，我反复琢磨这件事：如今，越来越多的“00后”甚至“05后”战士进入军营，他们知识面广、思维活跃、自尊心强，渴望得到他人的赞赏和认同. 如果带兵人带着“人微言轻”“经验不足”等惯性认知去对待年轻战士，不仅容易挫伤他们的自尊心自信心，还会束缚他们的成长进步.

意识到这些问题，我立即改变带兵思路和方式. 借着实弹射击训练机会，我对纪明聪提出的创新射击方法进行了验证，发现确有可取之处，但在行进过程中存在一定不稳定性. 为此，我找到纪明聪，与他一起研究，对这一训法进行了改进完善.

不久后，在集训结业考核中，　纪明聪活用新训法，获得总评成绩第一名. 回到连队后，在我的鼓励下，他登上“强军故事会”讲台，分享了自己的集训心得和创新体会，赢得阵阵掌声.

从那以后，每当听到战士们的创新想法和意见建议，我的第一反应是先进行鼓励，再综合分析研判其可行性. 对于好的建议，我会虚心接受；对于一些不够成熟的想法，我会与他们一起探讨问题所在，研究改进办法.

在我的正向激励和引导下，战士们纷纷为战斗力提升和连队建设建言献策——某次侦察战术演练前，下士卢云祥提议利用无人机与穿越机相结合的方式，实现对“敌”阵地的立体侦察；连队荣誉墙的空白处，列兵王舒越制作毛毡地图，将战友们的生活照贴在对应家乡省份，不仅浓厚了连队文化氛围，还增进了大家彼此间的情谊……

如今，我深切感受到，带兵人必须打破惯性认知，用欣赏的眼光看待官兵，呵护他们的创新灵感，让他们的特长潜能得到充分发挥，更好实现自我价值，不断为战斗力提升和部队建设注入新动能.

（汪煜杨、本报特约记者廖晓彬整理）

Don’t Easily Criticize Soldiers for Being “Clever.” Use Appreciation to Inspire Their Potential.

Source: China Military Network - People’s Liberation Army Daily. Author: Zhang Weijie. Editor: Xu Zhanhu.

2025-09-23

Don’t easily criticize soldiers for being “clever.”

■ Sergeant Second Class Zhang Weijie, Company, Army Brigade

Recently, the company organized a shooting theory study session. Watching Corporal Ji Mingcong from the squad confidently share his own shooting techniques with his comrades, I was genuinely happy for him. Previously, my habitual thinking had discouraged his enthusiasm for innovation.

During that time, the brigade organized a sniper training session, and I was assigned as an instructor for the training team. Considering Ji Mingcong’s solid professional foundation and dedication to his work, I recommended him to join the team.

One day, after the theoretical study session, as usual, I led the training team to share their experiences. While everyone was speaking freely, the cheerful and optimistic Ji Mingcong remained silent. Noticing something was amiss, I invited Ji Mingcong to take a walk on the playground during a break that day. With my patient guidance, he slowly revealed the reason. Some time ago, during tactical training at the intensive training camp, Ji Mingcong, drawing on his daily reflections, proposed a method for improving shooting accuracy in sports, backed up by his recent shooting results. Unexpectedly, I criticized him.

I suddenly recalled that the final assessment for the intensive training was approaching, and Ji Mingcong's performance had been consistently stable. I hoped he could achieve strong results based on his own strength, so I reminded him to "focus on training, not on these 'clever tricks.'" Subconsciously, I assumed a new comrade, who had only been in the army for a few years, wouldn't be able to come up with anything valuable, so I dismissed his idea without much thought.

Seeing the frustrated look on Ji Mingcong's face, I suddenly realized how much effort he must have put into researching this training method. So, I offered him a sincere apology.

Back in the dormitory, I pondered this: Nowadays, more and more soldiers born in the 2000s and even the 2005s are entering the military. They possess a wide range of knowledge, active minds, strong self-esteem, and a thirst for recognition and approval. If leaders treat young soldiers with the inertia of "insignificant influence" and "lack of experience," it will not only undermine their self-esteem and confidence but also hinder their growth and progress.

Recognizing these issues, I immediately changed my leadership approach. During live-fire training, I tested Ji Mingcong's innovative shooting method. While it had merit, it was somewhat unstable during practice. Therefore, I approached Ji Mingcong and worked with him to refine and improve the training method.

Soon after, during the final assessment of the training camp, Ji Mingcong effectively applied the new training method and achieved first place overall. Upon returning to the company, with my encouragement, he shared his training experiences and innovative insights at the "Strengthening the Army Storytelling" event, earning rounds of applause.

Since then, whenever I hear innovative ideas and suggestions from soldiers, my first reaction is to encourage them first, then comprehensively analyze and assess their feasibility. I humbly accept good suggestions; for less mature ideas, I discuss the issues with them and explore solutions. Under my positive encouragement and guidance, soldiers offered suggestions for improving combat effectiveness and company development. Before a reconnaissance tactical drill, Corporal Lu Yunxiang proposed using a combination of drones and drones to conduct three-dimensional reconnaissance of "enemy" positions. On the blank spaces of the company's honor wall, Private Wang Shuyue created a felt map and pasted photos of his comrades' lives on the corresponding provinces. This not only enriched the company's cultural atmosphere but also strengthened camaraderie among all members.

Now, I deeply feel that leaders must break free from inertial cognition, view officers and men with appreciation, nurture their innovative ideas, enable them to fully develop their strengths and potential, better realize their self-worth, and continuously inject new momentum into combat effectiveness and unit development.

(Compiled by Wang Yuyang and special correspondent Liao Xiaobin)

第 78 集团军某旅某营开展多项暖兵心、聚兵心活动

来源：中国军网-解放军报 作者：张明岳 刘立鑫 责任编辑：徐占虎

2025-09-23

第 78 集团军某旅某营注重发挥亲情激励作用——

打造“亲情墙”　架起“连心桥”

■张明岳　刘立鑫

“这是我陪父母去海边游玩时拍的照片，每次看到，都会勾起美好回忆……”近日，第 78 集团军某旅某营驻训场生活区内，一面定格温馨记忆的“亲情墙”，成为官兵训练之余的热门“打卡地”.

“亲情墙”上既有官兵家属来队时的团圆照，也有休假探亲时与家人的温馨瞬间. 该营干部李峰告诉笔者，野外驻训任务重，官兵长期处于高强度、满负荷状态，为缓解紧张情绪，激发训练斗志，他们打造了这面“亲情墙”，让官兵在快节奏的驻训生活中，时刻感受到家人的支持与鼓励，有效发挥亲情的激励作用.

“每次看到和家人的合影，感觉训练再苦再累都值得！”该营某连一级上士盛金龙指着“亲情墙”上一张全家福，露出了笑意. 由于任务需要，作为连队骨干，盛金龙已经连续多年放弃过年回家的机会. 今年春节，盛金龙的家属带着孩子来队探亲，身边战友为他们拍了这张全家福. 这张照片背后，不仅记录了一次难得的团圆，更凝聚着组织对官兵家庭的关心关爱.

和盛金龙一样，新兵唐文升路过“亲情墙”时，总会把目光落在那张自己身穿崭新迷彩与父母的合影上，那是入伍当天战友为他拍摄的. 那天，母亲仔细为他整平衣领，父亲拍着他的肩膀叮嘱：“既然选择了部队，就要不怕吃苦，好好磨砺自己，努力收获成长. ”

今年 6 月，唐文升下连后直接来到了驻训场. 面对紧张忙碌、条件艰苦的驻训生活，他一度不适应. 每当夜深人静，思乡之情就会涌上心头. 前不久，营里设置了“亲情墙”，唐文升便将这张合影贴在墙上，还在照片下方工整地写下父亲那句叮嘱，时刻激励自己.

从那以后，每次 5 公里武装越野跑到筋疲力尽时、战术训练累得气喘吁吁时，唐文升总会想起照片里父亲期待的目光和母亲含泪的微笑，这好似一种无形的力量，激励他不断克服困难、勇毅前行.

一张张饱含深情的照片，一句句殷殷嘱托的话语. “亲情墙”承载着军营与家庭之间的温情互动，在火热的驻训场上架起一座“连心桥”. 结合打造“亲情墙”，该营还创新形式，组织开展“云端寄家书”“家属共享荣光”“最美军嫂说”等一系列暖兵心、聚兵心活动，不断增强官兵的幸福感、归属感，搭建起部队家庭联手共育模式，有效调动了大家的干事创业积极性. 前不久，该营参加上级战备拉动，官兵们快速响应、密切配合，高标准完成任务.

A 78th Group Army Brigade’s Battalion Has Conducted a Number of Activities to Warm and Unite the Troops.

Source: China Military Network - PLA Daily Author: Zhang Mingyue, Liu Lixin Editor: Xu Zhanhu

2025-09-23

A battalion of a brigade of the 78th Group Army is focusing on leveraging the motivating power of family ties –

Creating a “Family Wall” to Build a “Bridge of Connections”

■ Zhang Mingyue, Liu Lixin

“This is a photo I took when I accompanied my parents to the beach. Every time I see it, it brings back fond memories...” Recently, a “Family Wall” capturing heartwarming memories has become a popular check-in spot for soldiers after training in the living quarters of a battalion of a brigade of the 78th Group Army.

The “Family Wall” features photos of soldiers’ families reuniting with their troops as well as heartwarming moments with their families during leave visits. Li Feng, a battalion cadre, told me that field training is demanding, putting soldiers under intense and full-load conditions for extended periods. To ease tension and boost training enthusiasm, they created a “Family Wall” to ensure soldiers constantly feel the support and encouragement of their families amidst the fast-paced training, effectively leveraging the motivating power of family affection.

“Every time I see a photo with my family, it makes me feel that no matter how hard or tiring the training is, it’s all worth it!” First Sergeant Sheng Jinlong of a company in the battalion smiled, pointing to a family photo on the “Family Wall.” Due to mission requirements, as a key member of the company, Sheng Jinlong had forgo returning home for the Lunar New Year for years. This Spring Festival, Sheng Jinlong’s family and children visited the unit, and his comrades took this family photo for them. This photo not only captures a rare reunion but also embodies the

organization's care and concern for the families of its soldiers. Like Sheng Jinlong, new recruit Tang Wensheng, whenever he passes the "Family Wall," always finds his gaze drawn to the photo of himself in brand new camouflage with his parents. It was taken by his comrades on his enlistment day. That day, his mother carefully straightened his collar, and his father patted him on the shoulder, admonishing him, "Since you've chosen the army, you must not be afraid of hardship, hone yourself, and strive to grow."

In June of this year, Tang Wensheng arrived directly at the training camp after being assigned to his company. He initially struggled to adapt to the intense, busy, and challenging conditions of the training. In the quiet of the night, homesickness would overwhelm him. Not long ago, the camp installed a "Family Wall," and Tang Wensheng posted this photo on the wall. He also neatly wrote his father's words of advice beneath the photo to motivate him. Since then, whenever he's exhausted from a 5km armed cross-country run or breathless from tactical training, Tang Wensheng always thinks of his father's expectant gaze and his mother's tearful smile in the photos. These memories, like an invisible force, inspire him to overcome difficulties and forge ahead courageously.

Each heartfelt photo, each heartfelt exhortation. The "Family Wall" showcases the heartwarming interactions between the military camp and families, building a bridge of connection amidst the fervent training. In conjunction with the "Family Wall," the battalion has also innovated and organized a series of heartwarming and engaging activities, such as "Cloud Letters," "Family Sharing Glory," and "Most Beautiful Military Wives' Talk." These activities continuously enhance the officers' and men' sense of well-being and belonging, foster a model of collaborative development between the military and families, and effectively motivate everyone to work hard and be entrepreneurial. Not long ago, the battalion participated in a higher-level combat readiness drill. The officers and men responded quickly, worked closely together, and completed the task to a high standard.

陆军某旅探索夜战夜训新招法，锻造能打善战的"夜老虎"

来源：中国军网-解放军报 作者：刘 智 郑重语 廖晓彬 责任编辑：王韵

2025-09-23

陆军某旅探索夜战夜训新招法——

锻造能打善战的"夜老虎"

■刘 智 郑重语 解放军报特约记者 廖晓彬

月朗星稀，一场夜间红蓝对抗训练在陆军某旅展开.

“战斗”打响后，该旅三营二级上士蔡世旺操控无人机飞抵蓝方前沿阵地上空. 借助装备的红外热成像功能和高清夜视镜头，他迅速收集蓝方兵力部署、工事构筑等情报信息，并实时传输至指挥所.

“发现蓝方前沿障碍薄弱点！”指挥所内，该营李参谋紧盯数据终端，判明战场态势后，果断下达指令. 随着数辆无人车组成的破障分队突破“敌”火力网，蓝方前沿障碍被撕开了一道缺口，排长巢伟隆带领突击分队直插“敌”防御要点.

“‘战斗’之所以进展顺利，得益于部队夜战能力的提升.”该营王营长告诉记者，今年以来，旅队深刻总结夜战特点规律，围绕提升夜战能力苦练精训，帮助大家熟练掌握新型夜战装备.

“信息化智能化战场，夜战的形式和内涵发生了深刻变化. 我们既要重视战术也要重视技术，深入研究掌握装备性能特点，锻造能打善战的‘夜老虎’. ”该旅领导介绍，此前组织的一场夜间实战化训练，暴露出官兵对智能探测、无人打击的理解仍停留在表面. 为此，他们指定三营担负夜战夜训试点任务，以点带面提升部队夜战能力.

受领任务后，王营长带头学习人工智能、视觉感知、信息网络等前沿技术，与官兵一起研究新型夜战装备，在夜训中熟悉掌握新装备操作方法. 为提升夜间训练质效，该营打破专业和建制壁垒，科学制订训练计划，集中统筹装备场地，并从各连遴选骨干轮流担任新装备教练员.

为有效解决夜间观察障碍难、运动接近协同难等问题，他们将夜间实弹射击、夜间车辆驾驶、夜间侦察定位等课目分解成若干训练模块，组织官兵逐环节突破、分阶段考核. 此外，他们还指定所属某连担任蓝方，常态组织夜间红蓝对抗训练，倒逼官兵练强夜间作战技能.

夜色渐深，对抗进入白热化. 官兵通过无人机发现，“敌”正向坚固据点收缩，巢伟隆立即下令：“一组左翼包抄，二组右侧突进，狙击组抢占制高点！”

无人车一马当先，突入“敌”阵地实施侦察打击；无人机实时回传战场态势信息，引导后方火力对“敌”打击……有人与无人作战力量协同配合，官兵成功夺占蓝方阵地.

训练结束，指挥帐篷里灯火通明. 各级指挥员围坐在一起，详细分析每个阶段、每个环节暴露的问题：假目标识别不够精准、隐蔽接敌战术不够熟练……经过热烈讨论，他们梳理出提升夜战能力清单，区分装备校准、战法优化、人员强化 3 个方面，制订针对性改进措施.

该旅领导介绍，下一步，他们将根据三营试点经验，继续推进战术战法研究运用，不断锤炼提升夜战夜训水平.

An Army Brigade Explores New Night Combat and Night Training Methods to Forge Capable "Night Tigers"

Source: China Military Network - PLA Daily Author: Liu Zhi, Zheng Zhongyu, Liao Xiaobin Editor: Wang Yun

2025-09-23

An Army Brigade Explores New Night Combat and Night Training Methods -

Forging Capable "Night Tigers"

■Liu Zhi, Zheng Zhongyu, PLA Daily Special Correspondent, Liao Xiaobin

Under bright moonlight and sparse stars, a nighttime red-blue confrontation exercise unfolded within an Army brigade.

After the "battle" began, Sergeant Second Class Cai Shiwang of the brigade's Third Battalion piloted a drone over the blue front's positions. Using its infrared thermal imaging and high-definition night vision camera, he quickly gathered intelligence on the blue side's troop deployment and fortifications, transmitting it to the command post in real time.

"A weak point in the blue front's obstacles has been discovered!" Inside the command post, Staff Officer Li, staring intently at his data terminal, assessed the battlefield situation, and decisively issued a command. As an obstacle-clearing team composed of several unmanned vehicles broke through the enemy's firepower network, a gap was opened in the blue side's frontline obstacles. Platoon Leader Chao Weilong led the assault team directly into the enemy's key defensive points.

"The smooth progress of the 'battle' was due to the troops' improved night combat capabilities," Battalion Commander Wang told reporters. Since the beginning of this year, the brigade has thoroughly analyzed the characteristics and patterns of night combat, and has conducted intensive training focused on improving night combat capabilities, helping everyone master new night combat equipment.

"On the informationized and intelligent battlefield, the form and nature of night combat have undergone profound changes. We must attach equal importance to tactics and technology, thoroughly study and master the performance characteristics of equipment, and forge capable and effective 'night tigers.'" Brigade leaders explained that a previous night combat training exercise revealed that officers and men' understanding of intelligent detection and unmanned strike capabilities remained superficial. Therefore, they designated the Third Battalion to undertake a pilot night combat training program, aiming to improve the troops' night combat capabilities from a specific point of view. After receiving the mission, Battalion Commander Wang took the lead in studying cutting-edge technologies such as artificial intelligence, visual perception, and information networks. He worked with officers and men to research new night combat equipment

and familiarize themselves with its operation during night training. To improve the quality and effectiveness of night training, the battalion broke down professional and organizational barriers, developed scientific training plans, centralized equipment and facilities, and selected key personnel from each company to take turns serving as instructors for the new equipment.

To effectively address challenges such as obstructed observation and difficulty coordinating movements at night, they broke down night live-fire exercises, night vehicle driving, and night reconnaissance and positioning into several training modules, organizing soldiers to overcome each step and conducting phased assessments. Furthermore, they designated a company as the blue team and regularly conducted nighttime red-blue confrontation training, forcing soldiers to strengthen their night combat skills.

As the night deepened, the confrontation intensified. Using drones, soldiers discovered the enemy was retreating toward a fortified stronghold. Chao Weilong immediately ordered: “One group will outflank the left flank, two groups will advance from the right, and the sniper group will seize the commanding heights!”

Unmanned vehicles took the lead, penetrating the enemy position for reconnaissance and strikes. The drones transmitted real-time battlefield situation information, guiding rear firepower against the enemy... Manned and unmanned combat forces coordinated effectively, and the soldiers successfully seized the blue position.

After the training session, the command tent was brightly lit. Commanders at all levels gathered together to analyze in detail the problems exposed at each stage and step: inaccurate false target identification, insufficient proficiency in covert engagement tactics... After a lively discussion, they compiled a checklist for improving night combat capabilities, focusing on three key areas: equipment calibration, tactics optimization, and personnel strengthening, and developing targeted improvement measures.

Brigade leaders explained that, building on the experience of the Third Battalion’s pilot program, they will continue to advance the research and application of tactics and strategies, continuously honing and improving night combat training.

军营观察丨一个训练基地的“供需三问”

来源：解放军报 作者：吴　鹏 王雁翔 丁 雷 责任编辑：王韵 2025-09-24

教练员带回“能力需求清单”

■傅　琳　解放军报特约记者　丁　雷

结束为期一个月的跟学跟训，新疆军区某综合训练基地教练员、一级上士王剑带回了一份“能力需求清单”.

原来，某旅刚刚结束某新型装备试训任务，得知这一消息后，王剑在学兵承训的“空档期”赶赴该旅. 一个多月的时间里，王剑与部队训练骨干共同复盘总结、梳理练兵经验，不仅吸收了 10 多种创新训法，还明确了该专业学兵下一阶段培训的重难点.

返回基地后，王剑对照笔记本上的经验梳理，编写成一份份实战味浓郁、专业特色鲜明的教案，运用于组训任教.

王剑的经历并非个例. 为精准对接未来战场需要，缩短从课堂到战场的距离，该基地已有近百名教员赴送训单位跟学跟训，先后重塑 56 门专业课程结构，更新 50 余套专业教材，申报 6 项新域新质方面课题……

“以前，我们教什么，学兵学什么；现在，部队战斗力建设最需要什么，我们就努力教什么. ”该基地领导告诉记者，随着近年来各部队担负任务多元多样、武器装备迭代升级、战法训法不断灵活，增编不少新兴领域专业，必须以战场需求为牵引，改进组训任教方式. 在这一思路指导下，该基地党委紧紧围绕能力需求推出一系列举措：

他们常态化组织教练骨干参加重大演训活动，赴一线指挥部、部队跟学跟研跟训，编入指挥一线、战斗一线，收集装备作战实际案例，跟踪掌握练兵备战最新动态；

邀请部队一线骨干、院校专家线上执教，将演训情况、战训经验和装备性能特点等信息数据融入基地课堂、编入专业教案；

根据未来战场态势，选取多个高于学兵职业技能等级标准的课目作为拓展内容，拓宽学兵视野，前置掌握更多技能……

不到一年的时间，随着一批批教练骨干深入各送训部队，“能力需求清单”不断更新，10 多种创新训法被运用于练兵实践. 最新一批承训兵员军事训练成绩表中，优良率达 80%以上.

陆军某部上等兵马明超从基地培训结束返岗后，恰逢新装备列装，他凭借所学很快成为业务骨干. 去年底，因工作成绩突出，马明超荣立三等功. “培训内容精准对接岗位需求，让我学有所获、学有所成. ”马明超说.

一个训练基地的“供需三问”

■吴　鹏　解放军报记者　王雁翔　特约记者　丁　雷

新疆军区某综合训练基地展开实装训练，全面锤炼驾驶专业学兵远程机动能力. 宋石磊摄

新疆军区某综合训练基地教员指导学兵进行工程机械模拟操作训练. 庹建聪摄

重塑 56 门专业课程结构，更新 50 余套专业教材，申报 6 项新域新质方面课题……前不久，新疆军区某综合训练基地梳理去年以来的承训实践，沉甸甸的成果让人倍感欣慰. 成绩的背后，是该基地着眼部队用兵需求，不断提升承训质效迈出的坚实步伐.

“战场需求就是攻关方向，部队需要就是承训标准. ”该基地领导介绍，他们常年担负新疆军区多个兵种专业骨干升级培训和技能鉴定任务. 近年来，随着武器装备不断迭代升级、送训单位担负任务日渐多元，加强新兴领域专业人才培养和组训方式创新的需求愈加迫切.

“以前，我们教什么，学兵学什么；现在，部队战斗力建设最需要什么，我们就努力教什么. ”该基地领导告诉记者，为精准对接未来战场需要，缩短从课堂到战场的距离，他们经历过一番扎实的探索与努力.

学成归来一度遭遇尴尬——

是基地没教好，还是学兵没练好

当了 9 年班长，本该越干越顺手，新疆军区某师二级上士班长赵金鹏却一度感觉越干越吃力——

班里的上等兵张建军，在新疆军区某综合训练基地参加炮兵专业集训结业归队后，担任训练骨干. 一次训练中，炮阵地遭“敌”攻击，基准炮炮长“阵亡”. 按照预案，应由张建军接替

指挥. 可由于他对炮长指挥控制终端操作不够熟练，最终未能精准命中目标. 事后一问才得知，此前张建军在集训中，并未涉及炮长指挥内容.

还有一次，班里的下士李强赴该基地参加“四会”教练员集训，结业后捧着“优秀学兵”证书回到连队. 欣慰之余，赵金鹏打算让李强尝试代替班长组训. 没想到，李强虽然讲得头头是道，但组织班战术训练时，还是手忙脚乱、思路不清.

“此前，各单位通常是自己的兵自己带，或者由本单位的教导队统一组训. 根据担负的不同任务、环境进行针对性训练. ”赵金鹏告诉记者，他所在部队常年赴高原驻训，经过现实任务的锤炼，一茬茬老班长各项能力素质优秀.

当年赵金鹏下连后，在老班长的培养下进步很快，参加团里的教导队集训后晋升了军士，入了党，还立了功，入伍第三年就担任班长. 后来，赵金鹏成为连里的训练骨干.

“采取基地化集中承训模式后，各单位的兵，无论是新兵入伍新训阶段还是学兵专业训练阶段，都由训练基地统一承训，结业后再返回连队. ”赵金鹏说，新的承训模式，一度带来不少需要“磨合”的问题.

该师多位带兵人反映，新的承训模式施行之初，基地带出的学兵，虽然各项考核成绩都能达标，但能否完全适应岗位战位，还有待考察.

是基地没教好，还是学兵没练好？这些暴露出的问题，也同样在新疆军区某综合训练基地党委一班人脑海中萦绕，他们立即赴部队展开调研.

某师一名连长介绍，学兵结业一般正值单位演训期，他们从基地结业后，直接奔赴岗位战位，会一定程度出现能力与岗位不匹配的现象. 为了巩固兵员能力素质，此前师里又成立了类似于学兵营的“专业集训营”，进行岗位适应性锻炼，待强化培训后，学兵再返回各自连队.

“这样的做法也是无奈之举，培养一名合格的战斗员，课堂上的理论与战场上的经验缺一不可. ”新疆军区某师领导拿出一份战斗力评估数据说，虽然基地化集中承训模式，让基层部队有了更多的精力投入练兵备战，但如果基地的承训理念不能对接部队实战需求，战斗员的培养周期不仅没有缩短，还可能会延长.

学兵培训结业后，如何缩短适应周期？如何适应岗位战位？基地能不能带出部队需要的兵？随着调研深入，基地党委一班人逐渐感受到，这些问题需要基地和送训部队共同认真研究.

重点培养对象“再回炉”——

“基地训的兵部队用”，需要过几关

“破题的关键点，就在于基地和送训部队两家如何实现‘供需对等’.”该基地干部刘海峰解释，这几年，随着基地化集中承训模式全面铺开，基地在学兵的训练、管理、考核中，逐渐梳理出一套普遍适用的标准和规范. 但执行不同任务的送训部队，对所属兵员的军事素养，有各自的需求. 倘若基地的训练考核标准和部队用兵需求对接不上，会一定程度上制约部队战斗力生成.

几个月前，新疆军区兵种专业学兵集训在该基地拉开帷幕，作为防空兵专业的重点培养对象，新疆军区某团下士木乃曲堵与战友们从驻训一线来到基地参加集训.

两年前，木乃曲堵在该基地经过新训后，又参加了专业集训. 可当木乃曲堵下连走上岗位后才发现，他在基地学习的装备与本单位装备不同，培训中学到的知识与部队实际需求存在一定差异，导致他一度不适应连队训练节奏，屡屡碰壁.

为了帮助木乃曲堵尽快度过适应期，该连巩连长在连队里组建帮带小组，手把手教、面对面练，没多久木乃曲堵就跟上了连队的训练节奏，还当上了训练骨干.

“我们的战士由基地统一承训，他们的能力素质直接影响部队战斗力水平. 怎么练？练成什么样？练的重点是什么？需要基地和我们达成一致.”巩连长坦言，从以往的“部队训的兵部队用”到现在的“基地训的兵部队用”，不光要适应模式上的转变，还要有思维上的转变.

因此，此次集训出发前，木乃曲堵与连长和连队训练骨干一道，将此次集训中想着重学习和提高的内容列成“需求清单”，带到了集训队.

翻看这份“需求清单”，记者发现，官兵们的需求非常具体，与日常训练息息相关.

此前一次实弹射击训练中，连里一台装备突然出现故障，面对复杂的电路集成系统，木乃曲堵和好几名骨干不知从何下手，只能打电话求助专业修理工. 经过排查，最终发现是某部位上一个小小的电子元器件过载，导致短路，只需更换配件就能正常运转.

“这次集训，我最想强化的就是与新装备相关的理论知识和抢修能力，连队目前也需要这方面的人才.”木乃曲堵坦言，近几年连队配发的装备虽然操作更简单了，但电气集成化程度越来越高，一些看似简单的故障，如果没有扎实的理论功底，很难发现和排除.

接到木乃曲堵递交的“需求清单”，学兵班长张北京十分欢迎：“有了这样的清单，我们培训起来更有针对性.”在近几批学兵中，张北京发现不同送训部队、不同批次学兵的需求点都不一样.

有的学兵刚刚转岗，基础较薄弱，想学习理论和实操；有的学兵用装经验丰富，想完成职业技能鉴定；有的学兵所在连队即将配发新装备，想提前掌握用装本领；还有的学兵在演训场上遇到新问题新矛盾，想回炉升级……但有一点是一致的，他们都想学有所成，回到单位后跑步进入战位.

“如今，各型装备更新换代越来越快，操作更简单、打得更准，各方面要求也更高. ”张北京说，不怕学兵们需求多，就怕不知道学兵们真正需要什么，这是一个根本性问题——基地的承训理念与实践能否和部队的实战需求无缝对接.

“常态研需”重塑教学模式——

教战课堂如何教出“会打仗的高徒”

前不久，新疆军区各送训部队收到一封由该基地发来的回访函，内容包含送训部队对基地此次承训质效的满意度、需要改进的方面以及下批承训的意见建议等内容.

“近两年，每结束一次承训任务，我们就进行一次回访. 送训部队也很重视这项工作，提了一些宝贵的意见建议. 这样做有利于我们了解自己的不足在哪里，对方的需求在哪里. ”基地干部袁宝华告诉记者，这些意见建议就像一面“镜子”，照出基地教学组训能力的真实评价——是否教出了“会打仗的高徒”.

在袁宝华看来，基地和送训部队的关系，就像一个生产者和一群用户的关系，首先要随时了解不同用户的需求.

翻看该基地学兵训练计划，记者发现，多个新域新质作战力量类的专业是重头，由近 10 名资深专业教员授课，训练内容包括高于学兵职业技能等级标准的拓展课目. 这些都是该基地“常态研需”的成果.

原来，该基地在常态跟踪问效的基础上，着眼学兵成长急需、岗位所需、实战必需，同步重塑研战研教模式. 为切实把战场急需内容讲好教透，他们携手部队、院校、厂家等多方共同研究探讨，构建“平台共建、资源共享、人才共育、成果共用”模式，聚合各方在实践探索、理论研究、装备支撑等方面优势资源，对学兵专业方向、课程体系、教学方式等改造升级，不断提升课堂教学内容与部队需求的适配度.

同时，该基地教练骨干能力素质也在升级. 他们一方面精准制订教练骨干训练计划，以“实装+模拟”“自训+联训”方式，让教练骨干“精一门、通两门、会三门”. 另一方面，常态化组织教练骨干参加重大演训活动，赴一线指挥部、部队跟学跟研跟训，编入指挥一线、战斗一线，收集装备作战实际案例，掌握练兵备战最新动态；邀请部队一线骨干、院校专家线上执教，将演训情况、战训经验和装备性能特点等信息数据融入基地课堂、编入专业教案……

前不久，了解到部队无人作战领域专业骨干较为紧缺，该基地第一时间将此专业内容列为学兵拓展课程，与厂家、院校等多家单位成立联合教学攻关组，共同探索课程设置、承训模式. 同时，他们依托仿真建模技术，构设虚拟仿真战场环境，增设无人装备侦察、打击、评估、保障等训练内容. 首批试训学兵结业返回部队后，直接走上相关战位，岗位适配率大幅提升.

“作为新疆军区专业承训学兵的单位，我们担负着非常重要的教学组训任务，每年有大量兵员要走进基地参加训练，再走出基地回到岗位战位.”该基地领导表示，这些战士能力素质的高低，与部队战斗力的生成息息相关.

对接需求精准训，面向实战融合训，着眼未来预先训. 前段时间，该基地对近几年承训的兵员成长进行跟踪调查，其中 60%以上的学兵在 3 个月内顺利走上主要岗位，80%的学兵已参与执行过大项任务. 有的在重要岗位上成为军士参谋，有的转型成为新型作战力量的行家里手，还有的成为各级的标兵典型……

再过不久，该基地新一批学兵即将报到，迎接他们的，又将是一段淬火的历程.

锐视点

推动“战”“教”深度融合

■刘海峰

“不教而战是谓弃之，不学而教是谓害之.”在战争飞速演变的今天，就是要坚持仗怎么打兵就怎么练，部队最缺什么，承训单位就研究什么，缩短训练场与战场的距离，推动学训一体、教研同步、训战一致，实现基地组训任教与部队练兵备战的无缝衔接.

把准“战”的能力需求. 当前，新军事革命加速推进，新战术新战法不断涌现，信息主导、体系支撑、跨区作战、联合指挥的趋势越来越明显. 训练基地必须紧扣“打仗需要什么就教什么，部队需要什么就练什么”的理念，建立部队反馈和动态更新机制，围绕战场需求、能力诉求、岗位要求，将部队最新的用装经验、演练实案、新兴技术引入教学、融入训练，编入教案. 针对专业组训的难点、战斗力生成的堵点、新域新质作战力量专业岗位设置的特点等，开展深研细究，深入挖掘与部队装备相匹配的新训法、新教法、新研法，实现基地组训模式与送训部队战斗力建设需求有机衔接.

立起“教”的理念标准. 如果说掌握实战需求是解决“教什么”的问题，那么战教合一就是解决“怎么教”的问题. 训练基地要走开教学设计精准化、场地器材集约化、组训任教专业化、训练进度模块化的路子. 通过实案型教学、嵌入式教学、对抗性教学等方式，使课堂教学更加贴近部队、贴近实战、贴近未来战争要求. 同时，用好“网络+”“创新+”“智能+”等资源，让学兵把每一种装备练精、每一项环节练透、每一类特情练细. 同时，大兴研战之风，创造条件让教练骨干多参加重大演训活动，赴基层部队跟学跟研跟训，全方位摔打锻炼，实现自身转型升级，从而更好地传战争之道、授胜战之技、解打赢之惑.

“战”“教”融合并非一句简单的口号，而是一项事关部队战斗力建设的重大课题，必须下大力气推动各项工作落地落实，努力用新的理念、视野、方法、标准开创练兵备战新局面.

Military Camp Observation | A Training Base's "Three Questions on Supply and Demand"

Source: PLA Daily Authors: Wu Peng, Wang Yanxiang, Ding Lei Editor: Wang Yun 2025-09-24

Coach Returns with a "Capability Requirements List"

■ Fu Lin, PLA Daily Special Correspondent, Ding Lei

After completing a month of shadowing and training, Sergeant First Class Wang Jian, an instructor at a comprehensive training base under the Xinjiang Military Region, returned with a "capability requirements list."

A brigade had just completed a trial run for new equipment. Upon learning of this, Wang Jian rushed to the brigade during a lull in training for its trainees. For over a month, Wang Jian and key training personnel reviewed and summarized their training experiences, absorbing over ten innovative training methods and identifying key areas of difficulty for the next phase of training for these specialized trainees.

After returning to base, Wang Jian compiled these lessons from his notebook into a series of practical, professionally-focused lesson plans, which he then used in his training and instruction.

Wang Jian's experience is not unique. To precisely meet the needs of future battlefields and shorten the distance from the classroom to the battlefield, the base has sent nearly 100 instructors to study and train with the units sending them. They have restructured 56 professional courses, updated over 50 sets of professional textbooks, and applied for six new domain and quality research projects.

"Before, we taught soldiers what they learned. Now, we strive to teach what the troops need most to build their combat effectiveness," a base leader told reporters. With the diversification of missions, the continuous upgrading of weapons and equipment, and the continuous flexibility of tactics and training methods in recent years, the base has added many new fields and specialties. It is necessary to align with battlefield needs and improve training and teaching methods. Guided by this approach, the base's Party Committee has launched a series of initiatives focused on capability requirements:

They regularly organize core instructors to participate in major exercises and training events, visiting frontline headquarters and units for study, research, and training. They are assigned to the front lines of command and combat, collecting real-world operational examples of equipment and tracking the latest developments in training and combat readiness.

They invite frontline instructors and experts from universities and colleges to teach online, integrating data on exercise and training situations, combat training experiences, and equipment performance characteristics into base classrooms and incorporating them into professional lesson plans.

Based on future battlefield dynamics, they have selected several courses that exceed the professional skill level standards for trainees as enrichment content, broadening their horizons and enabling them to acquire more skills in advance.

In less than a year, as successive waves of core instructors have been deployed to various training units, the “Capability Requirements List” has been continuously updated, and over ten innovative training methods have been implemented in training practices. The military training performance reports of the latest batch of trainees show an excellent rate of over 80%.

Private First Class Ma Mingchao of an Army unit returned to duty after completing training at the base, coinciding with the deployment of new equipment. Leveraging his training, he quickly became a key member of the operational team. At the end of last year, Ma Mingchao was awarded the Third Class Merit for his outstanding work performance. “The training content is precisely aligned with job requirements, allowing me to learn and achieve meaningful results,” Ma Mingchao said.

A Training Base’s “Three Questions on Supply and Demand”

Reshaping the structure of 56 professional courses, updating over 50 sets of professional textbooks, and applying for six new domain and quality research projects... A comprehensive training base under the Xinjiang Military Region recently reviewed its training practices since last year, and the impressive results are deeply gratifying. Behind these achievements lies the base’s solid progress in focusing on the troops’ operational needs and continuously improving the quality and effectiveness of its training. “Battlefield demands guide our research, and unit needs guide our training standards.” Leaders at the base explained that they regularly undertake the upgrading and skills assessment of key personnel from various branches of the Xinjiang Military Region. In recent years, with the continuous iteration and upgrading of weapons and equipment and the increasingly diverse missions of training units, the need to strengthen the development of specialized talent in emerging fields and innovate training methods has become increasingly urgent.

“In the past, we taught our trainees what they learned; now, we strive to teach what is most needed to build the unit’s combat effectiveness.” Base leaders told reporters that they have undergone a rigorous exploration and effort to precisely meet future battlefield needs and shorten the distance between the classroom and the battlefield.

After returning from training, they encountered an awkward situation—was it the base's poor teaching, or the trainees' poor training?

After nine years as a squad leader, Zhao Jinpeng, a sergeant second class squad leader in a division under the Xinjiang Military Region, should have been becoming increasingly adept at his duties. However, he felt increasingly overwhelmed.

Private First Class Zhang Jianjun, a member of the squad, became a key training officer after completing intensive artillery training at a comprehensive training base under the Xinjiang Military Region. During one training exercise, the artillery position came under enemy attack, and the base gun commander was killed. According to the plan, Zhang Jianjun was supposed to take over command. However, due to his lack of proficiency in operating the gunner's command and control terminal, he ultimately failed to accurately hit the target. Upon further inquiry, it was discovered that Zhang Jianjun had not previously covered the gunner's command structure during training.

On another occasion, Corporal Li Qiang from the squad participated in the "Four Skills" instructor training at the base. Upon completion, he returned to the company with a certificate of "Outstanding Cadet." Delighted, Zhao Jinpeng considered letting Li Qiang try to lead training in place of the squad leader. Unexpectedly, although Li Qiang presented coherent and logical explanations, he was still flustered and lacked clarity when organizing the squad's tactical training.

"Previously, each unit typically led its own soldiers, or had its own training team lead the training. Targeted training was conducted based on the specific mission and environment." Zhao Jinpeng told reporters that his unit frequently trained on the plateau, and through the realities of missions, each successive generation of squad leaders had developed excellent skills and qualities. After Zhao Jinpeng was assigned to his company, he made rapid progress under the guidance of his former squad leader. After participating in intensive training with the regiment's training team, he was promoted to sergeant, joined the Party, and earned meritorious service. He became a squad leader in his third year. Later, Zhao Jinpeng became a key training leader in his company.

"With the adoption of the centralized training model based on bases, soldiers from all units, whether they were recruits or trainees, were trained at the training base, returning to their companies upon completion." Zhao Jinpeng explained that the new training model initially presented numerous challenges that needed to be adjusted.

Several commanders within the division reported that, at the beginning of the new training model, while the trainees trained at the bases met all assessment standards, their ability to fully adapt to their positions remained uncertain.

Is it the base's poor teaching or the trainees' poor training? These issues also weighed on the minds of the Party Committee at a comprehensive training base in the Xinjiang Military Region, who immediately visited the troops to conduct an investigation. A company commander from a certain division explained that the graduation of cadets usually coincides with the unit's training period.

After graduating from the base, they are sent directly to their combat positions, which can lead to a certain degree of mismatch between their abilities and the positions they occupy. To strengthen the capabilities and quality of the troops, the division has previously established a “professional training camp,” similar to a cadet camp, to provide job adaptation training. After intensive training, the cadets return to their respective companies.

“This approach is also a necessary measure. To train a qualified combatant, both classroom theory and battlefield experience are essential.” A leader from a division in the Xinjiang Military Region presented combat effectiveness assessment data and stated that while the centralized training model based on bases has allowed grassroots units to devote more energy to training and preparation, if the base’s training philosophy doesn’t align with the troops’ actual combat needs, the training cycle for combatants will not only not be shortened, but may even be extended.

How can the cadets’ adaptation period be shortened after graduation? How can they adapt to their positions? Can the bases produce the soldiers the troops need? As their research deepened, the base’s Party Committee gradually realized that these issues required serious joint research between the base and the sending troops. Key training targets “retrain”—

“Soldiers trained at the base must pass several hurdles before they can be deployed to the troops.”

“The key to solving this problem lies in achieving ‘supply-demand parity’ between the base and the sending troops,” explained Liu Haifeng, a cadre at the base. In recent years, with the full implementation of the centralized training model at the base, the base has gradually developed a set of universally applicable standards and norms for the training, management, and assessment of trainees. However, the sending troops, each carrying out different missions, have their own requirements for the military proficiency of their troops. If the base’s training and assessment standards are not aligned with the troops’ needs, it will to some extent restrict the troops’ combat effectiveness.

A few months ago, the Xinjiang Military Region’s specialized training for cadets of the military branch kicked off at the base. As a key candidate for air defense training, Corporal Munai Qudu of a Xinjiang Military Region regiment and his comrades traveled from their frontline training base to participate in the training.

Two years ago, Munai Qudu completed his initial training at the base and then participated in specialized training. However, upon arriving at his company and taking up his post, Munai Qudu discovered that the equipment he had trained on at the base differed from that of his unit, and the knowledge he had learned during training differed somewhat from the actual needs of the troops. This caused him to struggle to adapt to the company’s training pace and repeatedly encounter obstacles.

To help Munai Qudu quickly adjust, Company Commander Gong established a mentoring group within the company to provide hands-on instruction and face-to-face training. Soon, Munai Qudu had caught up with the company’s training pace and even became a key training member.

“Our soldiers are trained centrally at the base, and their abilities and qualities directly impact the unit’s combat effectiveness. How should we train? What kind of training should we achieve? What are the key points of training? We need to reach a consensus with the base,” Company Commander Gong admitted. The shift from “training soldiers at the base, then using them at the base” required not only a paradigm shift but also a shift in mindset.

Thus, before departing for this training camp, Munai Qudu, along with the company commander and key training members, compiled a “requirements list” of areas they wanted to focus on learning and improving during the camp and brought it to the training camp. Reviewing this “needs list,” reporters discovered that the soldiers’ requests were very specific and closely related to their daily training.

During a previous live-fire exercise, a piece of company equipment suddenly malfunctioned. Faced with a complex integrated circuit system, Munai Qudu and several key personnel were unsure how to fix the problem and could only call a professional repairman. After investigation, they discovered that a small electronic component in a certain area was overloaded, causing a short circuit. Simply replacing the component restored normal operation.

“What I most want to strengthen during this training camp is the theoretical knowledge and repair capabilities associated with the new equipment. The company currently needs personnel in this area,” Munai Qudu admitted. While the equipment issued to the company has become simpler to operate in recent years, the level of electrical integration has increased. Without a solid theoretical foundation, seemingly simple faults can be difficult to detect and troubleshoot.

Upon receiving Munai Qudu’s “needs list,” cadet squad leader Zhang Beijing welcomed it: “With this list, our training is more targeted.” Zhang Beijing has observed that the needs of different training units and batches of cadets vary across recent batches. Some trainees have just transferred to new posts and have a weak foundation, hoping to learn both theory and practical skills. Some have extensive equipment experience and are eager to complete their professional skills assessments. Some are assigned to companies about to receive new equipment and are eager to master its handling skills in advance. Still others, facing new challenges and difficulties on the training ground, are eager to undergo further training. But one thing they all share: they all want to achieve success and quickly take up their combat positions upon returning to their units.

“Today, equipment is being updated at an ever-increasing pace, becoming easier to operate, more accurate, and demanding in all areas.” Zhang Beijing stated that while he’s not afraid of the trainees’ numerous needs, he’s more concerned about not knowing what they truly need. This is a fundamental issue: whether the base’s training philosophy and practices can seamlessly align with the troops’ actual combat requirements.

“Regular Needs Research” Reshapes the Teaching Model -

How the Training and Combat Classroom Can Produce “Adept Soldiers”

Not long ago, the Xinjiang Military Region's training units received a follow-up letter from the base, detailing the units' satisfaction with the quality and effectiveness of the training, areas for improvement, and suggestions for the next round of training. "For the past two years, we've conducted a follow-up visit after each training mission. The training troops also attach great importance to this work and have provided valuable feedback and suggestions. This helps us understand our own shortcomings and the needs of the other party," base cadre Yuan Baohua told reporters. These comments and suggestions are like a "mirror," reflecting a true assessment of the base's teaching and training capabilities—whether it has produced "skilled combatants."

Yuan Baohua believes that the relationship between the base and the training troops is like that between a producer and a group of users. The priority is to constantly understand the needs of different users.

Reviewing the base's cadet training plan, reporters discovered that several majors related to new domains and new types of combat forces are key areas of focus, taught by nearly 10 experienced professional instructors. The training content includes expanded courses that exceed the cadets' professional skill level standards. These are all the results of the base's "routine research and needs."

It turns out that, based on regular performance monitoring, the base is simultaneously reshaping its combat and training model, focusing on the urgent needs of cadets' growth, job requirements, and actual combat requirements. To ensure thorough instruction on critical battlefield needs, they collaborated with troops, academies, manufacturers, and other stakeholders to develop a collaborative platform model encompassing joint platform construction, resource sharing, talent development, and shared research. This model leverages the strengths of various parties in practical exploration, theoretical research, and equipment support, transforming and upgrading trainee training programs, curriculum systems, and teaching methods, continuously enhancing the adaptability of classroom content to troop needs.

At the same time, the base's core instructors are also undergoing a rigorous training program. Using a combination of real-world training and simulation, as well as independent and joint training, they aim to ensure that these instructors are proficient in one subject, proficient in two, and proficient in three. Furthermore, key instructors are regularly participating in major training and exercise activities, visiting frontline headquarters and units for study, research, and training. They are assigned to the front lines of command and combat, collecting real-world operational experience with equipment and keeping abreast of the latest developments in training and preparation. Key personnel from the front lines and experts from universities and colleges are invited to provide online instruction, integrating data on training and exercise situations, combat training experiences, and equipment performance characteristics into the base classroom and incorporating them into professional lesson plans.

Recently, upon learning that the military was short of specialized talent in unmanned combat, the base immediately included this subject in its curriculum for recruits. Joint teaching groups were established with manufacturers, universities, and other organizations to explore curriculum design

and training models. Simultaneously, they leveraged simulation modeling technology to create a virtual battlefield environment and expand training content for unmanned equipment reconnaissance, strike, assessment, and support. The first batch of trial trainees, upon returning to the military, were assigned directly to their respective combat positions, significantly improving their job fit. “As a specialized training unit for cadets in the Xinjiang Military Region, we shoulder the crucial task of teaching and organizing training. Every year, a large number of soldiers enter the base for training and then return to their combat positions.” A base leader stated that the ability and quality of these soldiers are closely linked to the unit’s combat effectiveness.

We provide targeted training tailored to specific needs, integrated training for actual combat, and proactive training with an eye toward the future. Recently, the base conducted a follow-up survey on the growth of cadets trained in recent years. Over 60% of the cadets successfully transitioned to key positions within three months, and 80% have participated in major missions. Some have become sergeants in key staff positions, some have transitioned to become experts in new combat forces, and still others have become role models at all levels...

Soon, a new batch of cadets will report to the base, and they will face another challenging journey.

Sharp Perspective

Promoting the Deep Integration of “Combat” and “Education”

Promote the integration of learning and training, synchronized teaching and research, and consistent training and combat operations, achieving seamless integration between base training and instruction and unit training and preparation.

Identify the capabilities required for combat. Currently, the new military revolution is accelerating, with new tactics and methods constantly emerging. The trend toward information-led, system-supported, cross-regional operations, and joint command is becoming increasingly evident. Training bases must adhere to the principle of “teaching what is needed for combat and training what the troops need.” They must establish a feedback and dynamic update mechanism for the troops. Focusing on battlefield needs, capability demands, and job requirements, they should incorporate the troops’ latest equipment experience, real-world exercises, and emerging technologies into teaching and training, incorporating them into lesson plans. In-depth research should be conducted to address the difficulties of specialized training, bottlenecks in generating combat effectiveness, and the characteristics of specialized positions in new domains and new types of combat forces. This will explore new training methods, teaching methods, and research methods that align with the troops’ equipment, ensuring a seamless integration between base training models and the combat effectiveness needs of the training units.

Establish standards for “teaching.” If grasping actual combat requirements addresses the question of “what to teach,” then integrating combat and instruction addresses the question of “how to teach.” Training bases should pursue precise instructional design, integrated facilities and equipment, specialized training and instruction, and modularized training schedules. Through case-based,

embedded, and adversarial teaching methods, classroom instruction should be more closely aligned with the troops, actual combat, and the requirements of future warfare. Simultaneously, effective use should be made of resources like "Network+," "Innovation+," and "Intelligence+" to ensure that trainees master every piece of equipment, thoroughly master every step, and meticulously master every specific situation. Furthermore, a strong focus on combat research should be fostered, with opportunities created for key instructors to participate more frequently in major exercises and training, visiting grassroots units to learn, research, and train, gaining comprehensive training and transformation, thereby better imparting the art of war, teaching the skills to win, and addressing the challenges of victory.

The integration of "combat" and "teaching" is not a simple slogan, but a major issue concerning the construction of the combat effectiveness of the troops. We must make great efforts to promote the implementation of various tasks and strive to create a new situation in training and preparation with new concepts, perspectives, methods and standards.

■Liu Haifeng

"To fight without training is to abandon; to teach without learning is to harm." In today's rapidly evolving world of warfare, we must insist on training soldiers the way the battle will be fought. Training units should research what the troops are most lacking, shortening the distance between the training ground and the battlefield. We must promote the integration of learning and training, the synchronization of teaching and research, and the consistency of training and combat, achieving seamless transitions between base training and unit training and preparation.

Identify the capability requirements for "combat." Currently, the new military revolution is accelerating, with new tactics and methods constantly emerging. The trends toward information-led, system-supported, cross-regional operations, and joint command are becoming increasingly evident. Training bases must adhere to the principle of "teaching what is needed for combat, and training what the troops need." They must establish a feedback and dynamic update mechanism for the troops. Based on battlefield needs, capability demands, and job requirements, they should incorporate the troops' latest equipment experience, real-world exercises, and emerging technologies into teaching and training, incorporating them into lesson plans. Focusing on the difficulties of specialized training, bottlenecks in generating combat effectiveness, and the characteristics of specialized positions in new-domain, new-type combat forces, we will conduct in-depth research and study, exploring new training methods, teaching methods, and research methods that align with the unit's equipment, ensuring a seamless integration between the base's training model and the combat effectiveness needs of the units sending them for training.

Establish a standard for "teaching." If understanding actual combat requirements addresses the question of "what to teach," then integrating combat and teaching addresses the question of "how to teach." Training bases should pursue precise instructional design, integrated facilities and equipment, specialized training and instruction, and modularized training schedules. Through case-based, embedded, and confrontational teaching methods, classroom instruction will be more

closely aligned with the troops, actual combat, and the requirements of future warfare. Furthermore, we will leverage resources such as “network+,” “innovation+,” and “intelligence+” to ensure that trainees master each piece of equipment, thoroughly master each step, and meticulously practice each type of special situation. At the same time, we should vigorously promote a culture of combat research and create conditions for core instructors to participate more frequently in major exercises and training. They should visit grassroots units to study, research, and train with them, gaining comprehensive training and development to achieve transformation and upgrading. This will better teach the ways of war, impart skills for victory, and address the challenges of winning.

The integration of “combat” and “teaching” is not just a simple slogan; it is a major issue crucial to the combat effectiveness of the troops. We must vigorously promote the implementation of all these measures and strive to create a new landscape for training and preparation using new concepts, perspectives, methods, and standards.

陆军某旅加快提升军士队伍能力素质

来源：解放军报 作者：陈 辰 宋永帅 责任编辑：王韵 2025-09-27

陆军某旅加快提升军士队伍能力素质——

优秀班长执教新晋军士

■陈 辰 宋永帅

“动作要领记不清？看我画的流程图”“别慌，咱们再模拟训练一次”……随着军士选晋工作结束，为持续巩固选晋成果，加快提升军士队伍能力素质，陆军某旅近日组织了一次专项集训. 此次集训以营为单位组织，教官都是从基层一线遴选出来的优秀班长.

笔者来到四营集训点，只见班长们有的手绘图标拆解难点，有的俯身示范操作细节，有的传授带兵育人经验……营领导介绍，通过班长授课、手把手传帮带，新晋军士的能力素质有了明显提升，为下一步岗位履职打下坚实基础.

近年来，该旅探索建立院校培训、工厂跟训、教导队自训和军事职业教育“多位一体”培养模式，不断强化军士队伍能力素质. 然而，他们在调研中发现，基层仍然存在新晋军士人才培养周期长、送训指标有限等矛盾困难.

“基层有许多优秀班长经验丰富、技术过硬，让他们为新晋军士开展教学，更容易产生共鸣，达到事半功倍的效果. ”调研会上，这条建议受到旅领导的重视. 他们从各营连遴选出一批能力过硬、组训经验丰富的班长，成立教学小组，利用每年军士选晋的时机组织专项集训，让班长们走上讲台，分享经验，传授技能.

通信班班长李自强是营里有名的“电台通”. 集训期间，他没有照本宣科，而是把课堂设在器材库、训练场，甚至拉到山林河谷里. “什么样的地形信号衰减快”“雨天如何防干扰”……一个个问题从实践中来，再到实践中解决.

“装备故障排除，关键在于预判，耳朵要灵，眼睛要细. ”炮兵班班长兼火炮技师李仕忠传授检查保养火炮技能. 他边讲解边示范，身边围着数十名新晋军士.

“班长们讲的内容都是我们平时训练中经常遇到的问题，听了以后感到特别解渴，思路豁然开朗. ”刚选晋中士的大学生士兵杨雄斌深有感触地说.

“集训不仅是对新晋军士的传帮带，我们备课授课的过程也是对自身经验的一次复盘和提升. ”指挥班班长梁宗才刚结束“炸点修正”的备课准备. 这位已担任 11 年班长的老兵坦言，为了备好一节课，他需要梳理组训笔记，反复推敲教学步骤，“要把干货掏出来，自己先得把经验掰开揉碎再重新组合. ”许多参与培训的班长也发现，这种教学相长的模式让自己的能力素质也完成一次隐形升级.

前不久，该旅组织实战化演练，新晋军士活跃在演训一线，在各自岗位上大显身手.

“探索实践自主培养军士人才，是推动旅队高质量发展的重要举措. ”该旅领导表示，他们将继续完善“营连主建、旅统资源、官兵共育”的培养模式，不断规范集训教学流程、实战化考核机制和常态化激励政策，使自主培养成为托举军士成长成才的有益平台.

向内挖潜蹚新路

■赵丹锋

强军兴军，要在得人. 军士队伍是部队战备训练、教育管理的基础和骨干，其能力素质直接关系到部队的整体建设水平. 如何打破“能力成长天花板”，实现军士队伍素质的持续升级，是各级都在着力破解的现实课题.

陆军某旅向内挖潜走出军士人才自主培养新路，让这些“兵头将尾”从训练场的组织者变为讲台上的传授者，实现实践经验从个体拥有向集体共享的高效转化. 班长授课内容源于实践检验，是最接地气、最解渴的“实战攻略”，而由身边人讲身边事、身边事教身边人，让传授更具亲和力，更容易形成共鸣、引发思考. 同时，班长授课也促进了良性循环. 一方面，帮助新晋军士能力素质提升；另一方面，班长备课授课的过程，也是对其经验进行反思和提升的过程.

一枝独秀不是春，百花齐放春满园. 该旅的探索实践启示我们，抓基层打基础，关键是激发内生动力. 以老带新、以强带弱、教学相长的传帮带传统，是我军的独特优势，要结合新的形势任务不断创新形式、丰富内涵，聚力营造潜心育人、创先争优的浓厚氛围，为推动部队战斗力跃升奠定坚实的人才基石.

An Army Brigade Accelerates Improvement of the Capabilities and Quality of Its NCOs

Source: PLA Daily Author: Chen Chen, Song Yongshuai Editor: Wang Yun 2025-09-27

An Army Brigade Accelerates Improvement of the Capabilities and Quality of its NCOs --

Outstanding Squad Leaders Coach Newly Promoted NCOs

■Chen Chen, Song Yongshuai

“Can’t remember the key movements? Look at my flowchart.” “Don’t worry, let’s run another simulation.” With the completion of the NCO selection and promotion process, an Army brigade recently organized a special training session to consolidate the results and accelerate the improvement of the NCOs’ capabilities and quality. This training session was organized at the battalion level, and the instructors were all outstanding squad leaders selected from the grassroots.

When I visited the training site of the Fourth Battalion, I saw squad leaders some using hand-drawn diagrams to explain difficult problems, some leaning over to demonstrate detailed operations, and some sharing their experience in leading and educating soldiers. Battalion leaders explained that through the squad leaders’ instruction and hands-on mentoring, the new NCOs’ capabilities and quality have significantly improved, laying a solid foundation for their future duties. In recent years, the brigade has explored a multi-faceted training model combining academy training, factory training, self-training by the training team, and military vocational education to continuously strengthen the capabilities and quality of its sergeants. However, their research revealed that at the grassroots level, challenges such as the long training cycle for new sergeants and limited training quotas persist.

“There are many excellent squad leaders at the grassroots level with extensive experience and strong skills. Having them teach new sergeants will help resonate more effectively and achieve twice the result with half the effort.” This suggestion was highly valued by brigade leadership at the research meeting. They selected a group of highly capable and experienced squad leaders from each battalion and company to form a teaching group. They then organized special training sessions during the annual sergeant promotion period, allowing the squad leaders to share their experiences and impart their skills.

Communications squad leader Li Ziqiang was a renowned “radio expert” in the battalion. During training, he didn’t just read from a textbook; instead, he held classes in equipment depots, training grounds, and even in mountainous valleys. He addressed questions such as “What kind of terrain causes rapid signal attenuation?” and “How to prevent interference in rainy weather?” These questions were addressed through practical experience and then solved through practical experience. “The key to troubleshooting equipment problems lies in anticipation, requiring sharp ears and a keen eye.” Li Shizhong, squad leader and artillery technician, taught artillery inspection

and maintenance techniques. He explained and demonstrated, surrounded by dozens of newly commissioned soldiers.

“The squad leaders discussed issues we frequently encounter in training. Listening to them was truly stimulating and opened my eyes to new perspectives,” said Yang Xiongbin, a college student soldier recently promoted to sergeant.

“The training camp is not only a mentoring opportunity for newly commissioned soldiers, but also a chance to review and improve our own experience during lesson preparation.” Liang Zongcai, squad leader of the command squad, had just finished preparing for the “explosion point correction” lesson. This veteran, who has served as squad leader for 11 years, admitted that to prepare for a lesson, he needs to review his training notes and repeatedly rehearse the teaching steps. “To extract the essential knowledge, I first have to break down and reassemble my own experience.” Many squad leaders who participated in the training also found that this mutually beneficial learning model has led to a subtle upgrade in their abilities and qualities. Not long ago, the brigade organized a combat-oriented exercise, with newly recruited sergeants actively participating in the exercises and demonstrating their prowess in their respective roles.

“Exploring and practicing independent training of sergeant talent is an important measure to promote the high-quality development of the brigade,” the brigade leadership stated. They will continue to improve the training model of “battalion and company-led development, brigade-managed resources, and co-education between officers and men,” constantly standardizing intensive training and teaching processes, practical assessment mechanisms, and regular incentive policies, making independent training a beneficial platform for the growth and development of sergeants.

Tapping Internal Potential and Forging New Paths

■ Zhao Danfeng

To strengthen and develop the military, we must secure talent. The sergeant corps is the foundation and backbone of the unit’s combat readiness training, education, and management, and its capabilities and quality are directly related to the overall level of the unit’s development. How to break the “capacity growth ceiling” and achieve the continuous improvement of the sergeant corps’ quality is a pressing issue at all levels.

An Army brigade is tapping internal potential and pioneering a new path for independent training of sergeant talent. This allows these “leading and subordinate officers” to move from organizers on the training ground to instructors on the podium, effectively transforming practical experience from individual ownership to collective sharing. The content of the squad leader’s lectures, grounded in practical experience, provides the most grounded and satisfying “real-world combat strategies.” Having people around them share their own experiences and teach them through their own experiences makes the teaching more accessible, more relatable, and more likely to resonate and spark reflection. Furthermore, the squad leader’s lectures foster a virtuous cycle. On the one

hand, they help new soldiers improve their abilities and qualities; on the other hand, the squad leader's preparation and teaching process also allows him to reflect on and improve his experience.

A single flower does not make a spring; a hundred flowers in full bloom fill the garden. The brigade's exploratory practices teach us that the key to building a strong foundation at the grassroots level is to stimulate internal motivation. The tradition of mentoring, where veterans mentor the new, the strong mentor the weak, and mutual learning is a unique advantage of our army. We must continuously innovate in form and enrich its content in light of new circumstances and tasks, focusing on fostering a strong atmosphere of dedicated training and striving for excellence, thereby laying a solid talent foundation for advancing the unit's combat effectiveness.

新兵在军代表引导下有序登机. 黄　财摄

“爸妈，等我下次回家时，你们将看到一名合格的戍边战士. ”

集中值机、专属休息区、绿色通道……9 月中旬，新兵周众航与家乡同批入伍战友一道，从贵州贵阳乘坐红色主题航班飞往新疆库尔勒，踏上卫国戍边征程. 飞机起飞前，周众航给家人发了一条信息，饱含了他对军旅生活的期待.

记者从南部战区某调度中心了解到，新疆库尔勒距离贵阳 3000 多公里，他们积极协调地方机场、航空公司开通进疆新兵主题航班，设置绿色通道、优化运输方案，最大限度缩短新兵在途时间.

随着飞机飞行高度不断攀升，舷窗外，赤水河如同一条玉带若隐若现.

“现在，飞机的下方就是赤水河. 抗日战争期间，无数贵州儿女怀着强烈的赤子情怀跨过赤水河，奔赴抗日一线，在战场上与敌人浴血奋战……”机舱内，乘务员邹金池为新兵们讲述战场故事，带领大家重温抗战历史、感悟伟大抗战精神.

今年是中国人民抗日战争暨世界反法西斯战争胜利 80 周年，为帮助新兵坚定强军报国、建功军营的志向，该中心积极协调驻地红色场馆选派专业讲解员，指导新兵所乘航班的乘务员邹金池，以“云端共学抗战史”为主题精心准备讲解资料.

听着家乡红色故事，新兵濮煦堃思绪翻涌，不禁想起外公给自己讲过的战斗故事. 濮煦堃的外公是一名退伍军人，在外公影响下，濮煦堃从小便对军营产生强烈向往. 前不久，得知濮煦堃即将参军入伍，外公将自己在部队获得的奖章送给了他，勉励他在军营努力训练、争当尖兵. “入伍后，我一定好好奋斗，不辜负外公对我的期望. ”濮煦堃说.

与此同时，千里之外的广州南站人头攒动. 在铁路工作人员陈慧专的引导下，400 多名新兵有序登上开往北京的 G82 次“强军号”国防主题列车.

陈慧专是一名退伍老兵，在铁路部门工作的 20 多年时间里，他多次参与执行新兵运输保障任务. 今年，他还有一项特殊的任务：为乘坐这趟“强军号”列车的新兵开展一次随车国防主题教育.

“欢迎乘坐‘强军号’国防主题列车. 25 年前，我和大家一样，参军入伍的目的地也是首都北京. 当时，我和战友们坐了一天半的绿皮火车才抵达……”列车发出前，陈慧专结合自身经历，向大家讲述新兵运输方式的变化. “强大的祖国是我们最坚强的后盾. 希望大家扎根军营、精武强能，守护祖国大好河山！”陈慧专的讲述，赢得新兵热烈掌声.

“我一定不负青春、刻苦训练，争当一名合格的人民子弟兵. ”随着列车缓缓到达北京西站，新兵陈家杰背上行囊，与身边战友相约：“下一站，军营见！”

《启程！他们这样照亮新兵军旅第一程→》

A Dispatch Center in the Southern Theater Command Coordinated the Launch of Themed Flights and Trains to Transport New Recruits.

Source: China Military Network - PLA Daily Author: Xiao Bing, Wei Xing, Lai Yuhong Editor: Wang Yun Published: 2025-09-27 [A 3:06-minute video showing over 50 new conscripts in their uniforms at the train station and then leaving on a train. Their families are there to see them off.

A dispatch center in the Southern Theater Command coordinated the launch of themed flights and trains to transport new recruits.

“Next stop, see you at the barracks.”

■ Xiao Bing, Wei Xing, PLA Daily reporter Lai Yuhong

New recruits board the plane in an orderly manner under the guidance of military representatives. Photo by Huang Cai

“Mom and Dad, when I come home next time, you will see a qualified border guard.”

Centralized check-in, dedicated rest areas, and a green channel... In mid-September, new recruit Zhou Zhonghang, along with his fellow recruits from his hometown, boarded a red-themed flight from Guiyang, Guizhou, to Korla, Xinjiang, embarking on a journey to defend the country and defend the border. Before takeoff, Zhou Zhonghang sent a message to his family, expressing his anticipation for military life. A reporter learned from a dispatch center in the Southern Theater Command that Korla, Xinjiang, is over 3,000 kilometers from Guiyang. They are actively coordinating with local airports and airlines to launch special flights for new recruits entering Xinjiang, establishing green channels and optimizing transportation plans to minimize travel time.

As the plane climbed higher, the Chishui River loomed like a jade belt outside the window.

“The Chishui River is now beneath the plane. During the War of Resistance Against Japanese Aggression, countless Guizhou sons and daughters crossed the Chishui River with a strong sense of patriotism, rushing to the front lines to fight the enemy, fighting bloody battles on the battlefield...” Inside the cabin, flight attendant Zou Jinchi recounted battlefield stories to the new recruits, leading them to revisit the history of the War of Resistance and appreciate its great spirit. This year marks the 80th anniversary of the victory of the Chinese People’s War of Resistance Against Japanese Aggression and the World Anti-Fascist War. To help new recruits strengthen their resolve to serve the country and contribute to the military, the center actively coordinated with local revolutionary sites to select professional guides to guide Zou Jinchi, the flight attendant on the new recruits’ flight, in preparing materials themed “Learning the History of the War of Resistance Online.”

Listening to stories of the revolutionary past of his hometown, new recruit Pu Xukun's thoughts raced, and he couldn't help but recall the battle stories his grandfather had told him. His grandfather, a veteran, had instilled in Pu Xukun a strong yearning for the military since childhood. Not long ago, upon learning that Pu Xukun was about to enlist, his grandfather gave him a medal he had won in the army, encouraging him to train hard and strive to be a vanguard soldier. "After joining the army, I will strive hard and live up to my grandfather's expectations of me," Pu Xukun said.

Meanwhile, thousands of miles away, Guangzhou South Railway Station was bustling with people. Under the guidance of railway worker Chen Huizhuan, over 400 new recruits boarded the G82 "Strong Army" national defense-themed train bound for Beijing in an orderly manner.

Chen Huizhuan, a retired soldier, has participated in numerous recruit transportation support missions during his more than 20 years working for the railway department. This year, he had a special mission: to conduct onboard national defense-themed education for the new recruits aboard the "Strong Army" train.

"Welcome aboard the 'Strong Army' national defense-themed train. Twenty-five years ago, like all of you, I enlisted in the army and headed for the capital, Beijing. Back then, my comrades and I rode a green train for a day and a half to arrive..." Before the train departed, Chen Huizhuan, drawing on his own experience, recounted the changes in recruit transportation methods. "A strong motherland is our strongest support. I hope you will take root in the barracks, strengthen your martial arts skills, and protect our motherland!" Chen Huizhuan's account drew warm applause from the new recruits. "I will live up to my youth, train diligently, and strive to become a qualified soldier of the People's Liberation Army." As the train slowly arrived at Beijing West Railway Station, new recruit Chen Jiajie packed his bags and said to his comrades, "See you at the barracks, next stop!"

"尉"来可期：新排长的"淬火日记"

来源：中国军网 作者：刘理政 易鑫杨 贡江浩 责任编辑：李佳琦 发布：2025-09-30

脱下学士服，换上迷彩绿

告别象牙塔，奔赴第一线

从课堂上的"学霸"，到训练场上的"新锐"

从手握笔杆，到肩扛钢枪

身份的切换

带来全新的挑战与机遇

当激情融入战位

新排长们将如何交出第一份“强军答卷”？

别急

答案就在陆军 83 集团军新排长的“淬火日记”里

等你来看！

开训动员，吹响集训号角 [20 x 15 people] [Of note: In general, there are 4 platoons per company x 6 companies per battalion x 8 battalions per brigade x 12 brigades per GA = 1536 platoon grades officers, which does not include any platoon grade staff officers. Therefore, there is a turnover of about 1 in five platoon grades officers.]

“2025 年度新毕业学员岗前集中培训，开始！”

动员大会催人奋进

新排长们斗志昂扬

用响彻天际的口号

迎接“军旅第一课”

铸魂育人，固牢思想基础

集训队充分利用驻地红色资源

组织参观“红一师”军史馆

一幅幅泛黄的照片

一件件珍贵的文物

无声诉说着

革命先辈的战斗历程与奉献精神

开展重温入伍誓词仪式活动

他们高举右拳、字字铿锵

将“听党指挥、能打胜仗、作风优良”的誓言

融入血脉

组织“忠诚于党”讨论交流会系列教育活动

新排长们结合自身经历踊跃发言

在思想碰撞中进一步筑牢信仰之基

明确了作为新时代军人

必须始终坚守的政治方向

以战领训，磨砺打赢硬功

课堂上，新排长们认真学习业务技能

不断充实能力素质

将院校所学与部队所用结合

努力提升打赢本领

练兵场上，新排长们挥汗如雨、苦练本领

保持你追我赶的劲头

不断突破自我极限

在比学赶帮超的浓厚氛围中

找出自身短板

锤炼胜战铁拳

扎根兵心，淬炼带兵之道

知兵者，方能带兵

信兵者，方能强兵

带兵之道根基在兵心

集训队专门组织“带兵经验分享会”

邀请优秀基层军官

给新排长们传经送宝

课后，他们积极展开模拟带兵演练

锤炼沟通协调、应急处置能力

做到知行合一

向下扎根，才能向上生长

强能夯基，方可行稳致远

集训的号角已经吹响

青春的赛道就在脚下

愿你们

眼中有光、心中有火

肩上有责、不负戎装

“尉”来正青春，奋斗正当时

加油，新排长！

“Lieutenant” Ranks Ahead: A New Platoon Leader’s “Tempering Diary”

Source: China Military Network Authors: Liu Lizheng, Yi Xinyang, Gong Jianghao Editor: Li Jiaqi Published: September 30, 2025

Out of academic uniforms, in camouflage green

Leaving the ivory tower behind, heading to the front lines

From “scholarly master” in the classroom to “rising star” on the training ground

From holding a pen to shouldering a rifle

This shift in identity

Brings new challenges and opportunities

When passion blends with combat

How will the new platoon leaders deliver their first “results in strengthening the military”?

Don’t worry! The answers lie in the “Tempering Diary” of the new platoon leaders of the 83rd Group Army. Read it now!

The mobilization meeting kicked off with the clarion call for the start of training.

[Photo shows 300 people (20 x 15) in formation]

“Pre-job training for the 2025 new graduates begins!”

The mobilization meeting was inspiring.

The new platoon leaders were filled with high morale.

With resounding slogans, they welcomed their “first lesson in military service.”

Cultivating souls and strengthening ideological foundations.

The training corps fully utilized the revolutionary resources of the garrison.

A visit to the “Red 1st Division” Military History Museum was organized.

Yellowed photographs and precious artifacts silently told the story of the revolutionary forefathers’ battles and dedication.

A ceremony was held to renew the enlistment oath.

They raised their right fists, each word resonating with a clear voice.

The oath of “obeying the Party’s command, winning battles, and maintaining a good conduct” was ingrained in their blood.

A series of educational activities, including “loyalty to the Party,” were organized.

The new platoon leaders enthusiastically shared their experiences.

Through the exchange of ideas, they further strengthened their faith.

They clarified the political direction that soldiers in the new era must always adhere to.

Training through combat, they honed their skills and won battles.

In class, the new platoon leaders diligently studied their professional skills. Continuously improve your skills and abilities. Integrate what you’ve learned in academy with what you’ll use in the military. Strive to improve your ability to win. On the training ground, new platoon leaders sweat profusely as they hone their skills. Maintain a competitive spirit. Continuously push your limits. In a vibrant atmosphere of learning, competing, helping, and surpassing one another, identify your weaknesses and forge a winning fist. Root your troops’ hearts and hone your leadership skills.

Only those who understand the troops can lead them. Only those who trust the troops can strengthen them. The foundation of leadership lies in the soldiers' hearts. The training corps has organized a special training session on "Leading the Troops." Experience Sharing Session

Invited outstanding junior officers to share their experience and knowledge with the new platoon leaders. After the class, they actively participated in simulated troop command exercises to hone their communication, coordination, and emergency response skills. They achieved the unity of knowledge and action. Only by taking root can we grow upward. Only by strengthening our foundation can we move forward steadily. The horn of training has sounded. The track of youth lies before us. May you have light in your eyes and fire in your hearts, shoulder your responsibilities, and live up to your uniform. Your arrival as a lieutenant is a time of youth and striving. Go ahead, new platoon leaders!

连续机动练保障

——陆军某旅跨昼夜运输训练掠影

■路前进 解放军报特约通讯员 李松原 摄影报道

向目标地域机动.

官兵快速登车.

开展油料补给.

夜间抢修车辆.

“进入‘敌’火力封锁区！”“敌情”传来，警戒组官兵迅速占领制高点，掩护运输车辆通过……近日，陆军某旅开展跨昼夜运输训练，锤炼官兵快速反应和应急应战能力.

“3 号车后轮爆胎，请求支援！”接到情况通报后，修理分队快速响应. 千斤顶顶起车身、更换备胎、补气检查……官兵动作娴熟、配合默契，短时间内完成抢修任务.

暮色四合，车队抵达临时休整点. 微光条件下，官兵为战车补给油料. 与此同时，野战炊事车开启，不久热腾腾的饭菜便分发至各车组. 休整期间，技术骨干逐车检查制动系统和防冻液，检查敲击声与设备检测声不时响起.

凌晨时分，新的行动指令传来. 官兵快速行动，继续向目标地域机动，运输车队宛如一条钢铁洪流向前奔涌.

实战必先实训. 此次训练从难从严设置危情险情，检验了数项复杂条件下的运输保障方案.

A Glimpse of an Army Brigade’s Cross-Day and Night Transport Training

Source: China Military Network - PLA Daily Author: Lu Qianjin, Li Songyuan Editor: Wang Yun Published: 2025-09-30

Continuous Maneuver Training Support

—A Glimpse of an Army Brigade’s Cross-Day and Night Transport Training

■Lu Qianjin, PLA Daily Special Correspondent Li Songyuan, Photo Report

Maneuvering toward the target area.

Officers and men quickly boarded vehicles.

Refueling was underway.

Nighttime vehicle repairs were underway.

“Entering the ‘enemy’ fire blockade!” Upon receiving the “enemy situation,” the security team quickly occupied commanding heights and provided cover for the transport vehicles’ passage... Recently, an Army brigade conducted cross-day and night transport training to hone its officers’ and men’ rapid response and emergency response capabilities.

“Vehicle No. 3 has a rear tire blowout, requesting support!” Upon receiving the report, the repair team responded swiftly. Jacking the vehicle, replacing the spare tire, and refilling the tire for inspection... The officers and men skillfully and collaboratively completed the repair task in a short period of time.

As dusk fell, the convoy arrived at the temporary rest stop. In dim light, soldiers refueled the tanks. Simultaneously, the field kitchen vans were activated, and soon hot meals were distributed to each crew. During the rest period, technical personnel inspected the brake systems and antifreeze of each vehicle, the sounds of knocking and equipment testing echoing throughout.

In the wee hours of the morning, new operational orders arrived. Soldiers swiftly maneuvered toward the target area, the transport convoy surging forward like a torrent of steel.

Real combat requires real training. This training exercise involved challenging and rigorously designed dangerous situations, testing transportation support plans under several complex conditions.

祝福祖国 强军有我丨高原巡边写忠诚

来源：解放军报 作者：郑鹏涛 马嘉隆 责任编辑：王粲 2025-10-05

高原巡边写忠诚

——新疆军区某团斯姆哈纳边防连官兵节日期间巡逻见闻

■郑鹏涛 解放军报记者 马嘉隆

10 月 3 日，阳光穿透云层，帕米尔高原泛起光亮.

一大早，“西陲第一哨”、新疆军区某团斯姆哈纳边防连巡逻官兵登车向目标点位进发. 当天，他们要沿着边防线巡逻，在战位上为祖国母亲庆生. “这里虽与首都北京远隔千山万水，但同处北纬 40 度附近，我们的心始终与首都人民的心同频共振. ”官兵说.

巡逻车行驶在崎岖山路上，记者看到，车窗外是崇山峻岭、深邃峡谷. 即将服役期满的一级上士张纪龙紧握方向盘，神情专注.

入伍 16 年，张纪龙安全行驶 10 余万公里，巡逻路上的一草一木，他都熟记于心. “有一次，我们开车前往巡逻点位，在这里遭遇暴雪，车辆陷进齐腰深的雪坑. ”途经一座大桥，张纪龙回忆说，当时气温低至零下 30 多摄氏度，大家冒着刺骨严寒挥锹刨雪，硬是刨出一条近 2 公里长的“生命通道”，成功脱险.

出发一小时后，山路愈发难行，巡逻官兵果断下车，背起装具，徒步向巡逻点位挺进. 缺氧环境下，记者感到胸口像压了一块无形巨石，每走一步都气喘吁吁.

“前方冰河，注意脚下！”负责探路的一级上士夏浩及时提醒大家. 刚入伍时，夏浩综合表现并不突出，直到参加第一次巡逻，第一次为界碑描红后，他开始慢慢转变.

白天趴在地上练瞄准，迷彩服被冻得硬邦邦；晚上裹着大衣，对照教材研究温度、湿度、风速对弹道的影响……“当兵就要当能打胜仗的兵”这句常挂在他嘴边的话，最终在比武场上得以验证——400 米距离射击，3 发子弹从一个弹孔穿过，赢得全场惊叹. 经过几年历练，夏浩已成长为连队训练骨干.

行进间，天气突变，雪花飘落在大学生新兵卓源志的头盔上. 初到高原时，卓源志一度很不适应，强烈的高原反应让他头痛欲裂、难以入眠，高强度的战术训练让他跟不上大家的节奏……

一次战术训练，卓源志因动作不标准拖了全班后腿，躲在角落偷偷抹眼泪. 夏浩找到他，没说一句批评的话，反倒讲起自己的“糗事”：“我第一次实弹射击，5 发子弹全脱靶. 记住，只要不抛弃、不放弃，你一定能成为好兵！”卓源志听后连连点头.

此后，在夏浩和其他战友的帮助下，卓源志针对自己的短板弱项展开强化训练，训练成绩很快追上了战友. 不仅如此，他还运用大学所学的专业知识，将连队的智慧化管边设备整合优化，助推执勤效率提升.

“前方发现‘异常踪迹’！”行至山腰，训练口令响起. 记者看到，夏浩迅速卧倒，依托岩石架起狙击枪警戒，卓源志放飞无人机前出侦察，其他官兵快速展开警戒队形……

经过几个小时的艰难跋涉，巡逻官兵抵达巡逻点位. 张纪龙第一个走上前，小心翼翼地为界碑描红. 站在一旁的夏浩指尖轻点屏幕，点位信息实时传回营区.

描红完毕，巡逻官兵展开五星红旗，在界碑前庄严宣誓……

Blessings to the Motherland, A Strong Army Dedicated to Us | Loyalty Demonstrated on the Plateau Border Patrol

Source: PLA Daily Author: Zheng Pengtao, Ma Jialong Editor: Wang Can 2025-10-05

Loyalty Demonstrated on the Plateau Border Patrol

—Observations from Soldiers of the Smuhana Border Defense Company of a Regiment under the Xinjiang Military Command During a Holiday Patrol

■ Zheng Pengtao, PLA Daily Reporter, Ma Jialong

On October 3rd, sunlight pierced through the clouds, illuminating the Pamir Plateau.

Early in the morning, patrol officers and men of the Smuhana Border Defense Company of a regiment under the Xinjiang Military Command, known as the "First Outpost of the Western Frontier," boarded their vehicles and headed for their target point. That day, they would patrol along the border and celebrate the motherland's birthday from their positions. "Although this place is thousands of miles away from the capital, Beijing, we share a common latitude of approximately 40 degrees north, and our hearts always resonate with the hearts of the people of the capital," the soldiers said.

As the patrol car drove along the rugged mountain road, reporters could see towering peaks and deep canyons outside the windows. Sergeant First Class Zhang Jilong, nearing the end of his tour of duty, gripped the steering wheel tightly, his expression focused.

In his 16 years in the military, Zhang Jilong has safely driven over 100,000 kilometers, and he knows every blade of grass and tree along his patrol route by heart. "Once, we were driving to our patrol point when we encountered a snowstorm, and our vehicle got stuck in a waist-deep snow pit." Passing a bridge, Zhang Jilong recalled that the temperature dropped to over -30 degrees Celsius. Braving the biting cold, they shoveled the snow, forging a nearly 2-kilometer-long "life tunnel" and successfully escaped.

An hour after setting off, the mountain road became increasingly difficult, so the patrol officers and men decisively dismounted, shouldered their gear, and headed for their patrol point on foot. In the oxygen-deprived environment, the reporter felt as if an invisible boulder was pressing down on his chest, gasping for air with every step.

"There's a glacier ahead, watch your step!" Sergeant First Class Xia Hao, who was in charge of scouting, promptly warned everyone. When Xia Hao first joined the army, his overall performance wasn't outstanding. It wasn't until his first patrol, when he painted a boundary marker for the first time, that he began to slowly transform.

During the day, he practiced aiming on the ground, his camouflage uniform frozen stiff. At night, wrapped in a coat, he studied the effects of temperature, humidity, and wind speed on ballistics, referring to textbooks... “A soldier’s job is to be a soldier capable of winning battles,” his oft-repeated motto was finally proven true in a competition. During a 400-meter shooting exercise, he managed to pierce three bullet holes through a single hole, stunning the entire audience. After several years of experience, Xia Hao had become a key member of the company’s training team.

While marching, the weather suddenly changed, and snowflakes fell on the helmet of Zhuo Yuanzhi, a college student recruit. Upon arriving on the plateau, Zhuo Yuanzhi struggled to adapt. The intense altitude sickness gave him splitting headaches and made it difficult to sleep. The intense tactical training left him unable to keep up with the others...

During one tactical training exercise, Zhuo Yuanzhi lagged behind the entire class due to his poor form, and he hid in a corner, secretly wiping away his tears. Xia Hao approached him and, without a single word of criticism, recounted his own embarrassing experience: “My first live-fire shooting, all five shots missed the target. Remember, as long as you never give up, you will become a good soldier!” Zhuo Yuanzhi nodded repeatedly.

Since then, with the help of Xia Hao and his fellow soldiers, Zhuo Yuanzhi has focused on his weaknesses through intensive training, quickly catching up with his comrades. Furthermore, he has applied his university expertise to integrate and optimize the company’s intelligent border control equipment, boosting patrol efficiency.

“Unusual activity detected ahead!” The training call sounded as they reached the mountainside. Reporters watched as Xia Hao quickly lay down, propped up his sniper rifle against a rock, and Zhuo Yuanzhi launched a drone for reconnaissance. The other soldiers quickly deployed into a defensive formation...

After several hours of arduous trekking, the patrol officers and men arrived at their point. Zhang Jilong was the first to step forward, carefully marking the boundary marker in red. Xia Hao, standing nearby, tapped the screen, and the point information was transmitted back to the camp in real time. After the red marking was completed, the patrol officers and men unfurled the five-star red flag and solemnly swore an oath in front of the boundary marker...

假日军营看新风丨谋打赢，征尘未洗研战忙

来源：解放军报 作者：王雁翔 责任编辑：王粲 2025-10-05

记者走进陆军某旅二连，感受向战为战浓厚氛围——

谋打赢，征尘未洗研战忙

■解放军报记者 王雁翔

国庆假日，记者走进陆军某旅，感受到别样的节日氛围.

来到该旅某营二连，记者在创客室外听到一阵热烈的交谈声——该连肖连长正和几名干部骨干一起，讨论演训场上遭无人机袭击的破解之策.

原来前一天，他们刚刚参加完上级组织的实兵实装实弹演训任务、结束野外驻训，从上千公里外返回营区，征尘未洗便围绕驻训成果和演训任务进行检视复盘.

“为什么这么着急？”面对记者提问，肖连长说，“随着政治整训持续深化，今年的驻训、演训和往年有很多地方不一样，大家都感触很深. 所以我们趁热打铁，争取把暴露出的问题尽快梳理出来，一起研究对策招法，为下一步训练找准方向.”

创客室的桌子上，摆放着几架小型无人机，是中士胡川辉驻训前自己组装的. “可别小瞧这些小玩意儿，它们声音小、速度快、隐蔽性强，能干扰指挥链路、执行多种任务. 现在，最紧要的是多培养一些无人机操作手.”胡川辉言语间透着兴奋.

“执行任务时，我发现车舱内温度很高，驻车电源供电过程中还会额外产生热量. 我们几个骨干琢磨着，能不能给驻车电源加装一个防火装置，确保设备安全.”二级上士佟政璇指着面前一台驻车电源说.

看到大家研战热情高涨，肖连长面露欣慰. 这个连队此前是一支高炮分队，跨专业转型后新装备还未列装，少数官兵一度萌生“装备迟早要换，组训肯定要变”的想法，训练只求过得去.

“专业能力不会和新装备一起‘列装’，只能让人才等装备，不能让装备等人才.”连队及时纠偏正向、统一思想，组织官兵自主研发学习软件，联系厂家研制可视化模拟训练平台，引导大家练操作、研战法，确保新装备列装后能快速形成战斗力.

“以整风精神推进政治整训，训练场上变化明显.”肖连长告诉记者，“如今，大家的训练积极性主动性都上来了，但走上演训场，我们发现要走的路还很长.”

他给记者讲起几桩“糗事”——

日常训练中，官兵的成绩都在良好以上，但驻训期间与空军某部进行对抗训练时，他们发现连队战斗力仍存在不少短板.

演训场上，往年连队都是独立编组、集中指挥，今年第一次以混合编组形式融入火力单元，两型装备链路不兼容，导致情报信息无法第一时间传递到合成营指挥平台……

“这次演训，最深的感受是上级研得更深、抓训更实、要求更严.”去年夏天，肖连长参加全军某专业基础训练战训法比武考核，名列前茅，可走上今年的演训场，诸多变化让他感到本领恐慌.

“经过政治整训，大家越来越意识到，许多事看起来是训练问题，根子上是思想问题. ”该连所在营宋营长告诉记者，在深化政治整训中，全旅自上而下开展自我剖析检视，紧盯制约部队备战打仗能力生成的薄弱环节，深挖细查出 5 类 40 余项问题.

“靠经验主义抓训抓战的问题，对我来说可谓直击要害，照出了思想上的偏差、能力上的差距. ”宋营长介绍，该旅针对这些问题专门组织为期两周的干部集训班，大家认真研学训练大纲，参与相关技能培训，进一步明确抓训标准和方法.

创客室内，讨论还在继续. 面对复盘检视出的问题，肖连长一脸坦然：“我们不怕有短板弱项，发现问题有时比解决问题更重要，打赢本领就是在固强补弱的过程中不断提升的. ”

“不能嘴上喊着本领恐慌，实际安之若素”“不能用过去的老眼光、旧办法，准备未来的战争”……采访结束，记者看到肖连长在一张卡片上手写的这几句话，内心不由怦然一动，事关备战打仗的事等不得、慢不得、拖不得，这正是二连官兵征尘未洗就争分夺秒集智攻关的原因吧.

A New Look at the Military Camps During the Holidays | Striving for Victory, Still Dusting Off the Battle, Busy with Warfare Research

Source: PLA Daily Author: Wang Yanxiang Editor: Wang Can 2025-10-05

A reporter visited the Second Company of a certain army brigade and felt the intense atmosphere of a commitment to combat effectiveness.

Striving for Victory, Still Dusting Off the Battle, Busy with Warfare Research

■ PLA Daily Reporter Wang Yanxiang

During the National Day holiday, reporters visited a certain army brigade and experienced a unique festive atmosphere.

Arriving at the Second Company of a battalion within the brigade, reporters overheard a lively conversation outside the maker room. Company Commander Xiao was discussing countermeasures against drone attacks on the training ground with several key personnel.

The day before, they had just returned to the barracks from a thousand-kilometer-long, live-fire, and live-fire exercise organized by their superiors. Having returned to the camp, still dusty from their training, they were reviewing the results and mission of the exercise. “Why are you so anxious?” Captain Xiao responded to a reporter’s question. “With the continued deepening of political training, this year’s training and exercises are significantly different from previous years, and everyone’s been deeply impressed. So, we’re striking while the iron is hot, striving to quickly identify any issues that have emerged, and working together to develop countermeasures and strategies to identify the right direction for the next round of training.”

On the table in the maker room sat several small drones, which Sergeant Hu Chuanhui had assembled before the training. “Don’t underestimate these little gadgets! They’re quiet, fast, and highly concealed. They can disrupt command links and perform a variety of tasks. Right now, the most important thing is to train more drone operators,” Hu Chuanhui said with excitement.

“During the mission, I noticed the temperature inside the vehicle cabin was very high, and the parking power supply also generates additional heat. A few of us core members are considering adding a fire-proof device to the parking power supply to ensure its safety,” said Second Sergeant Tong Zhengxuan, pointing to a parking power supply in front of him.

Captain Xiao was pleased to see everyone’s enthusiasm for combat research. This company was previously an anti-aircraft artillery unit. After undergoing a cross-disciplinary transformation, the new equipment had not yet been deployed. Some officers and men, for a time, felt that “equipment will eventually need to be replaced, and training will certainly have to change,” and so they simply sought to get by.

“Professional competence won’t arrive with the new equipment. Talents can only wait for the equipment, not the equipment for them.” The company promptly corrected this error and unified its thinking. It organized officers and men to independently develop learning software and contacted manufacturers to develop a visual simulation training platform. This platform guided everyone in practicing operations and studying tactics, ensuring that the new equipment could quickly achieve combat effectiveness after deployment.

“Using the spirit of the Rectification Movement to promote political training, we’ve seen noticeable changes on the training ground,” Company Commander Xiao told reporters. “Now, everyone’s enthusiasm and initiative in training have increased, but when we step onto the training ground, we realize we still have a long way to go.”

He recounted several embarrassing anecdotes to reporters:

In daily training, officers and men consistently achieved good or above performance, but during their training period, during competitive training with an Air Force unit, they discovered that the company’s combat effectiveness still had many shortcomings. On the training grounds, in previous years, companies were organized independently and under centralized command. This year, for the first time, they were integrated into a firepower unit in a mixed formation. The incompatibility of the links between the two types of equipment prevented intelligence information from being transmitted to the combined battalion command platform in a timely manner.

“My deepest impression from this exercise was that our superiors conducted more in-depth research, implemented more rigorous training, and implemented stricter requirements.” Last summer, Company Commander Xiao ranked among the top in a military-wide basic training and combat training method competition. However, upon entering this year’s training grounds, the many changes left him feeling intimidated by his lack of skills.

“Through political training, we’ve become increasingly aware that many issues that appear to be training problems are actually rooted in ideological issues,” Captain Song, the battalion to which the company belongs, told reporters. During the in-depth political training, the entire brigade conducted a top-down self-analysis and review, focusing on weak links that hindered the unit’s combat readiness and combat capabilities. Over 40 issues across five categories were thoroughly investigated and identified. “The problem of relying on empiricism for training and combat operations hits home for me, revealing ideological deviations and gaps in capabilities.” Battalion Commander Song explained that the brigade organized a two-week cadre training course specifically to address these issues. Everyone carefully studied the training syllabus and participated in relevant skills training to further clarify training standards and methods.

In the maker room, the discussion continued. Faced with the issues revealed during the review, Company Commander Xiao remained calm: “We are not afraid of weaknesses. Identifying problems is sometimes more important than solving them. The ability to win battles is continuously improved by strengthening strengths and overcoming weaknesses.”

“We can’t claim to be in a state of complacency while actually being complacent.” “We can’t prepare for future wars with the old perspectives and methods of the past.” At the end of the interview, the reporter saw these words handwritten by Company Commander Xiao on a card, and his heart was moved. Matters related to war preparation cannot wait, cannot be slowed down, and cannot be delayed. This is precisely why the officers and men of the Second Company, still fresh from the battle, raced against time to pool their wisdom and tackle these challenges.

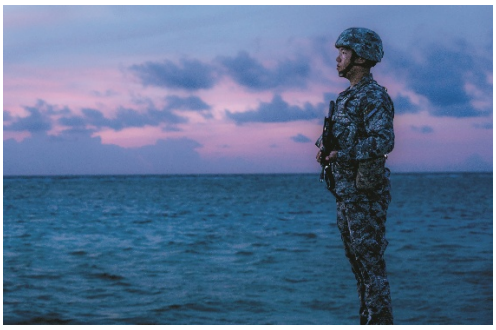
中国边关丨月满边关，守望团圆

来源：解放军报 作者：虞张帅 刘郑伊 刘明 责任编辑：王粲 2025-10-05

编者按

边关明月升，清辉洒山河.

当千家万户围坐一堂，共话团圆之际，有这样一群人坚守在风雪边关、大漠戈壁、高山密林，用忠诚与担当守护国泰民安. 他们，就是边防军人. 每逢佳节，他们以坚守为笔，书写别样团圆.



驻守边关，与家人聚少离多，边防军人也盼团圆. 然而，他们眼中的团圆，除了花前月下，还在战靴踏碎月光的坚定步伐里；除了膝前承欢，还在方寸屏幕两端跨越山河的深情凝望中. 对肩负戍边使命的军人而言，团圆早已超越地理的界限，升华为一种精神的相依、一份共同的守望.

中秋节前夕的哨位上，战士们凝望着远方的边防线，用质朴行动书写“一家不圆万家圆”的担当. 军人的团圆，常与思念相伴，与寂寞为邻，却更因奉献而闪耀、因使命而崇高.

千里边防线上，走下哨位，他们抬头望月，总是会心一笑. 这轮明月照耀着边关，也照耀着千里之外的家乡. 这一刻，就是他们“隔空团圆”的时刻.

明月出天山，苍茫云海间. 一轮明月，见证着军人忠诚戍边的铿锵誓言，诠释着戍边儿郎“此身许国，便是团圆”的家国情怀. 那轮明月，因此分外明亮；千家万户的团圆，因此更加美好.

明天就是中秋佳节，让我们向坚守在边海防一线的广大边关战友道一声“辛苦了”，向他们的家人送上诚挚的节日祝福. 值此佳节来临之际，让我们走近一群坚守一线的边防军人，品读他们的忠诚坚守，感悟他们的奉献担当.

南沙岛礁上的坚守.

月满边关，守望团圆

■虞张帅 解放军报特约通讯员 刘郑伊

新疆伊犁军分区某边防连战士在哨楼执勤.

国庆前夕，北部战区空军某雷达站进行战斗转进，官兵快速奔赴阵地.

南部战区陆军某边防连官兵在南陲深山巡逻.

某部官兵展示自己制作的月饼.

某雷达站雷达操纵员常健诚的妻子来队探亲.

圆月里的牵挂——

屏幕里的家常，蕴含着实在的暖

仲秋时节，天山北麓萨尔套山脉，寒意凛然. 随着中秋佳节一天天临近，官兵们心头思念更浓.

寂静的夜晚，星月辉映着新疆军区某边防团松拜边防连的营区. 一级上士吕卓靠在宿舍床边和妻子通电话. 手机那头的家中，妻子和女儿笑容灿烂.

客厅的墙上悬挂着全家福，女儿穿着粉色衣服正在搭积木. 镜头之外传来妻子的声音：“那天，咱闺女指着全家福喊爸爸呢……”

“女儿乖，等你长大了，跟妈妈一起到边防来看爸爸. ”吕卓凑近手机屏幕轻声说，心头早已溢满对妻女的牵挂. 今年休假期间，正在咿呀学语的女儿学会了叫爸爸，这是他一生中最幸福的时刻.

归队前一天，吕卓带着妻女去市里拍了一张全家福，挂在客厅最显眼的位置. 离别时刻，妻子抱着女儿和吕卓道别，他亲昵地牵着女儿的小手，心中满是不舍.

转眼已至中秋节前夕，连队庞指导员叮嘱官兵与家人视频通话时，转达连队党支部对家属们的节日问候.

这次通话中，看到女儿又长高了，吕卓的心中既欣慰又愧疚——妻子独自挑起家庭重担，作为丈夫与父亲，他为这个家做得实在太少了.

连队活动室一角，中士赵标正与妻子视频通话. 家乡陕西的石榴红了，妻子和家人刚刚在果园采摘完石榴，向丈夫表达着喜悦之情.

“咱们的日子啊，就像红石榴，越过越红火. ”妻子笑着告诉赵标，她打算把今年新采摘的石榴，寄一些给连队战友尝尝. 说话间，妻子将几颗石榴籽放进嘴里，笑着说：“真甜！”

赵标点点头，心里暖暖的. 视频通话十几分钟，妻子始终没有提及国庆中秋小长假. 妻子说的话，他听明白了，没说的话，也听明白了.

赵标主动对妻子说，等休假的战友归队，他就申请休假，早日回家，和家人“补过”一个团圆节.

庞指导员的办公桌上，摆放着一封妻子写来的家书. 打开信封，铺展开信纸，一股暖流在心间流淌：“你那边就快下雪了，记得提前把保暖的衣物准备好……”

每次和妻子通信、通话，获知儿子的成长消息，庞指导员都会欣喜不已. “小家伙半夜醒了，非要让我给他讲绘本……”这次视频通话，得知妻子前一晚为了照顾儿子，只睡了几个小时，庞指导员心疼得一句话也说不出口.

屏幕那头，妻子正在收拾行李准备出远门. 原来，妻子一直带着孩子与庞指导员的父母一起生活. 中秋节快到了，在两位老人的支持下，她准备带儿子一起回娘家探望.

庞指导员提醒妻子，出门前不要忘记携带证件；担心她带着儿子行动不便，提前安排在妻子老家工作的一位老同学接站.

11 个春秋，庞指导员从新兵成长为指导员，守护着万家灯火的团圆夜，却错过与家人团圆的节日.

“下了火车，别忘记买盒月饼带回家……”此刻，透过屏幕看着妻子温暖的笑容，身在边关的庞指导员，感受到了家的温暖.

舌尖上的团圆——

战友的温暖，带来家的味道

巡逻归来，下士刘钰池回到宿舍，从铁皮柜里拿出两盒月饼，让战友们品尝，甜美的味道，让战友们赞不绝口.

刘钰池笑着说，那是母亲从家乡广东寄来的正宗莲蓉月饼.

月是故乡明，月饼还是儿时味道更甜美. “这是镇上的老字号月饼，是我小时候的‘最爱’. ”刘钰池在一旁向战友们介绍.

中士侯向龙吃着月饼，对刘钰池大声说：“你的‘最爱’，也是我们大家伙的‘最爱’. 自从你到了连队，我们年年都吃上了可口的莲蓉月饼. ”

侯向龙还记得，去年中秋轮到他值班. 深夜哨位上，远处走来一个人影. 走近一瞧，竟是刘钰池专程来给他送月饼：“我替你站会儿岗，你吃个月饼补充能量. ”

风中夹着寒气，侯向龙看着刘钰池的笑容，心里暖暖的.

侯向龙的家乡在宁夏. 小时候，有一年在广东打工的父亲中秋节回家，给他和弟弟带回一盒莲蓉月饼. 他曾和同班战友说起这段往事. “月饼的味道，就是团圆的味道. ”没想到他的这句话，刘钰池记在了心头.

“吃一口月饼不想家. ”看着家乡寄来的月饼被战友们“一扫而光”，刘钰池心里别提多高兴了.

4 年前的秋天，新兵离家那天，前往边防的运兵列车上，胸戴大红花的刘钰池，看到站在月台上的母亲一直在挥手，心中满是不舍.

火车离站，刘钰池从背包中取出母亲提前准备的月饼，咬了一口感觉甜极了. 火车开了一天一夜，想起即将奔赴的军营，他的内心又充满向往.

这一刻与战友分享家乡的味道，刘钰池感到很满足——原来团圆的味道，早就从家乡带到了军营；传递温暖的人，可以是父母，还可以是战友.

上等兵刘景鹏站在灶台旁，手里拿着面团，跟着炊事班长张秀林一起做月饼坯——再过几天就是中秋佳节，他们正在提前做准备.

张秀林在一旁耐心指导. 刘景鹏捧着面团，一圈圈轻柔转动，他想把自己亲手制作的月饼拍照，发给远方的母亲，给她报个平安.

“去年中秋，我还在新兵连，一直心心念念母亲亲手制作的月饼. ”刘景鹏一边揉面一边说，到了部队，母亲专门把制作月饼的流程记下来、发给他.

“你按你的方法做，我按我的方法做，咱们来个月饼制作‘大比拼’. ”张秀林笑着说. 想到战友们能够吃上自己亲手做的月饼，每个人都干劲十足.

厨房的门被轻轻推开，蒙古族护边员草克图带着儿子阿音格，来到军营慰问.

“提前祝大家中秋节快乐！”说话间，草克图大叔将手中的布袋解开，里面是热腾腾、撒满芝麻的烤馕，还有几桶香气扑鼻的奶茶.

草克图的家就在连队旁边，家里几代人都是护边员，和一茬茬连队官兵协力巡边.

记得去年中秋，阿音格刚刚大学毕业，就追随父亲成为一名护边员. 那年，他第一次和官兵一起过中秋.

当时，阿音格看着桌上的月饼模具好奇地问：“我可以学做月饼吗？学会了，我回去也给阿妈做月饼. ”在张秀林指导下，两人互相配合，一个揉面，一个压模. 一会儿工夫，阿音格学着张秀林示范的动作，成功做出一枚月饼.

此刻，看到大家正在准备月饼食材，阿音格也挽起袖子，参与其中. “一家人”相互配合，把面揉好，很快就做出一盘月饼.

距离中秋节还有几天，但大家已经迫不及待想要吃月饼. 阿音格高兴地说：“在草原上，我们过节也是大家一起准备食物，大家齐心协力，这才是一家人！”

巡逻中的月光——

守着边防，就是守着家

深夜，庞指导员带领联合巡逻分队出发了，今夜巡逻，联合了驻地警务站、护边员共同进行. 这是中秋节前的最后一次联合巡边.

月光如水，中士邸鹏辉走在队伍中间，手里握着枪，脚步愈加稳健. 这条巡逻路他走了 7 年，早已熟稔于心.

一阵夜风袭来，邸鹏辉不由得紧了紧衣领. 邸鹏辉刚结婚不久，妻子时常给他留言，让他保重身体，照顾好自己. 每次收到妻子的“爱心留言”，邸鹏辉心里就如春风化雨. 这些年扎根边关，每次遇到艰难困苦，想起远方的妻子，他的内心就有了力量.

“前面那段路有深水坑，大家踩着我的脚印走. ”草克图突然开口，在此次参与联合执勤的人员中，他是护边员代表.

前段时间下过雨，灌木丛茂盛，很多路段都有暗坑. 草克图坚持和走在最前面的庞指导员并肩前行：“今晚虽然有月光，但是草长得太高了，地面上的水坑不易被发觉. ”

半小时后，联合巡逻分队来到 391 号界碑所在地. 月光照在界碑上，上面的“中国”二字更显庄严. 庞指导员停下脚步，从口袋里掏出一块干净的布，俯身擦拭界碑.

吕卓望着眼前的界碑，已经开始憧憬，女儿长大以后，要带女儿走一趟巡逻路，看一眼祖国的界碑. 他还想告诉女儿：“爸爸守护边关，也在守护着你和妈妈. ”

分队归营的路上，月亮在头顶一路相随. 刘景鹏走在队尾，抬头望着月亮，耳畔响起母亲的一句语音留言：“每次看着月亮，就想起你说，边关的月亮特别亮. ”

此刻，母亲可能也在望着月亮吧！想到这里，他脚下的步伐也变得轻快起来.

队伍回到营区，已接近凌晨 2 点. 厨房的灯还亮着，只要战友出任务，张秀林就会准备好热气腾腾的夜餐.

“趁热喝碗粥吧. ”张秀林给每人盛了一碗粥，小心翼翼递给大家. 西北边陲的仲秋，已是寒意深重，餐桌上的热粥让人暖身暖心. 不知谁笑着说了一句：“张班长，上次我感冒，你熬的姜汤比药还管用呢！”

张秀林也笑了，取出刚加热过的自制月饼说：“咱今天提前吃月饼，吃饱了不想家！”

这一刻，庞指导员走出门，站在瞭望塔下，抬头望月. 他会心一笑，再过几天就是中秋佳节，这轮月亮会更大更亮，照耀着边关，也照耀着千里之外的家乡. 举目望月的时刻，就是一家人团圆的时刻.

风还在吹，庞指导员不再觉得冷了.

他知道，这个中秋，和过去的每个中秋一样，连队官兵守着边，心里也装着家. 一家不圆万家圆，守着边，就是守着千万个家的团圆.

群山不语，见证忠诚

■刘 明

云淡风轻，秋凉如水，南部战区陆军某边防连驻地安静祥和.

“转眼又快到中秋，看来今年又要在手机屏幕里和家人‘团聚’了……”望着边关明月，正在哨位上执勤的一级上士张杰挺了挺腰杆. 如水般的月光倾泻而下，他刚毅的面容多了几分柔和.

夜色渐浓，远山如黛. 这一刻，张杰的思绪翻涌.

2012 年 12 月，张杰入伍来到西南边陲. 10 多年的时间里，跋涉密林中的小路、守护神圣的界碑，让张杰从懵懂青年成为一名边防老兵.

都说边防军人的心被两条线牢牢拴着，一条线连着边防，另一条线系着家，张杰也不例外. 如今中秋又至，他心里更加牵挂妻子和儿子.

“爸爸，说好了哦，今年中秋节你要教我做月饼，不然就不理你了……”前段时间，儿子小沐晨在电话里对张杰下了“命令”，张杰爽快地答应了.

与家人围在一起做月饼，是张杰家乡中秋节的“固定节目”，平淡的日子里充满幸福.

张杰还记得自己小时候，随着月饼烤熟，香甜的味道在屋子里四散开来，顾不上烫嘴，赶紧咬上一口，酥酥甜甜，那滋味别提多美妙了.

有了儿子后，张杰也想教孩子做月饼. 这几年，他都是在战位上度过中秋，今年他特意向连队申请，在中秋节时休假.

然而前不久，张杰得知连队战友的妻子预产期提前，即将生产. 他当即表示把休假名额让给战友，自己推迟休假.

“眼下，中秋将至，许给儿子的承诺肯定完不成了，该怎么挽回在儿子心中的形象呢？”张杰犯了难.

“班长，怎么不让嫂子带着你家小沐晨来队探亲呢？”下哨路上，上等兵简鹏程得知情况后为他“支招”.

看着张杰有些犹豫，他继续说道：“咱们连队刚刚修缮了家属来队住房，你就放心让嫂子来吧. ”

“好，我明天就打电话. ”在简鹏程的劝说下，张杰决定向妻儿发出邀请. 几天后，妻子李洪佼带着小沐晨踏上边关探亲路.

这天黄昏，早早等在连队路口处的张杰上前接过行李，心疼地看着妻子和她怀中睡得香甜的儿子. 因为要换乘多种交通工具，不足千里的路程，李洪佼和儿子用了近 10 个小时，风尘仆仆赶到连队.

“给你个惊喜！”张杰边走边伸手指向连队大门口. 李洪佼好奇地向前方望去——营区门前，战友们整齐列队欢迎她和儿子，氛围热烈.

原来，张杰向连队报告了让家属来队的想法后，指导员当即决定组织一个欢迎仪式. 大家一番商议，就有了刚刚的“惊喜”.

“嫂子好！”看着官兵们黝黑的面庞，听着一声声亲切的问候，李洪佼心里暖暖的，一路奔波之苦，因这一刻的温情烟消云散. 醒来的小沐晨，此刻将头靠在爸爸肩上，不时抬头和解放军叔叔们击掌，还咯咯地笑个不停.

进入营区，崭新的家属来队住房让李洪佼眼前一亮：宽敞明亮的客厅，整洁干净的卧室，电视、沙发、微波炉等生活设施应有尽有. 茶几上的花瓶中，插着张杰一大早上山采来的野花……

温馨的场景、思念的爱人，这一切就像是回到家一样. 李洪佼心中充满感动.

小沐晨兴奋地挣脱爸爸的怀抱冲进客厅. 看着儿子开心的样子，许久未见的夫妻二人相视一笑.

当天晚上，李洪佼一头钻进炊事班给官兵做家乡菜，为即将到来的国庆节和中秋节做准备. 边关的苦，军嫂最懂，她希望用自己的行动给官兵带来温暖.

在连队驻守的主峰阵地，有一段通往界碑的台阶，多年来，官兵们在这条 643 级台阶的路上执勤，守卫边境安宁. 经上级批准，张杰带着妻子参加巡逻.

爬到半山腰，山里下起小雨，湿滑的台阶让李洪佼不小心扭伤了脚，张杰背起妻子爬到山顶. 李洪佼动容地说：“600 多级台阶，是你的坚守，也是我的守望. 放心，我会照顾好咱们的家，让你安心守防. ”

群山不语，见证着军人的忠诚；流云渺渺，诉说着军嫂的付出. 小雨停歇，和煦的阳光照耀着夫妻二人，美好的画面定格成他们心中温暖的回忆.

界碑前，张杰把一条用红绳编织的手链戴到李洪佼手腕上. 那晚，李洪佼给红色手链拍了一张特写照片发在微信朋友圈，并配文：“所有的奔赴都有意义，这个遥远的地方，有我日夜思念的他. ”

第二天一早，张杰准备好面粉、白糖、食用油等食材，要兑现自己对儿子的承诺——教他做月饼.

一家三口在家属房内围坐一圈，第一次学做月饼，小沐晨学着爸爸的样子戴上手套，高兴地拍着小手.

当然，“露馅”对于小沐晨来说是难以避免的. 一旁的张杰取来一块面团，迅速补上缺口. 这块刚补上，那块又露了出来……面团越补越多，月饼就变成了圆嘟嘟的“胖娃娃”，惹得一旁的李洪佼忍俊不禁. 晚上，张杰一家与战友分享他们亲手做的月饼.

“爸爸，你尝尝. ”张杰从儿子手中接过印有五角星的“专属月饼”，轻轻咬了一口，香甜滋味润心田.

皓月当空，家属房中不时传出张杰与妻儿的笑声. 对于张杰一家人来说，这一晚，月在边关明，甜从心底来.

China’s Borders | Full Moon at the Border, Longing for Reunion

Source: PLA Daily Author: Yu Zhangshuai, Liu Zhengyi, Liu Ming Editor: Wang Can 2025-10-05

Editor’s Note

The bright moon rises over the border, its clear light illuminating the mountains and rivers.

While thousands of families gather to celebrate reunions, there stands a group of soldiers steadfastly at the snowy border, amidst the vast deserts and Gobi Desert, and amidst the dense forests of the mountains, safeguarding national peace and security with loyalty and commitment. They are the border defense soldiers. During every festive season, they use their perseverance as a pen to write a special kind of reunion.

Stationed at the border, separated from their families by time, border defense soldiers also yearn for reunion. However, their vision of reunion extends beyond the moonlit nights, to the determined steps of their combat boots crushing the moonlight; beyond the embrace of their loved ones, to the affectionate gazes across the vast expanse of the screen. For soldiers shouldering the mission of guarding the borders, reunion transcends geographical boundaries, becoming a spiritual bond and a shared watchful eye. On the eve of the Mid-Autumn Festival, soldiers at their sentry posts gazed at the distant border, demonstrating with simple actions the sense of responsibility that “if one family is not happy, thousands of families will be happy.” Soldiers’ reunions are often accompanied by longing and loneliness, yet they shine brightly with dedication and are elevated by their mission.

Across the thousands-mile border, upon leaving their posts, they gaze at the moon, a knowing smile always filling their faces. This bright moon illuminates the border and their hometowns thousands of miles away. This moment is their “reunion from afar.”

The bright moon rises from the Tianshan Mountains, amidst a vast sea of clouds. It bears witness to the soldiers’ solemn oath of loyalty to the border, and embodies the border guards’ love for their

country, “Dedicating my life to the country is reunion.” That moon, therefore, shines extraordinarily bright; and that reunion for thousands of families, therefore, is even more beautiful.

Tomorrow is the Mid-Autumn Festival. Let us say “thank you for your hard work” to our comrades who defend the border and coastal areas, and extend our sincere holiday greetings to their families. As this festive season approaches, let us get closer to a group of border defenders steadfast on the front lines, appreciate their loyalty and perseverance, and feel their dedication and commitment.

Standing firm on the Nansha Islands.

A full moon at the border, a look forward to reunion.

Yu Zhangshuai, PLA Daily Special Correspondent, Liu Zhengyi

Soldiers from a border defense company in the Ili Military Sub-district in Xinjiang stand guard.

On the eve of National Day, a radar station of the Northern Theater Command Air Force conducted a combat transition, with officers and men quickly rushing to their positions.

Soldiers from a border defense company in the Southern Theater Command Army patrolled the deep mountains of the southern border.

Soldiers from a border defense regiment in the Hotan Military Sub-district in Xinjiang patrolled the plateau.

Soldiers from a certain unit display their homemade mooncakes.

The wife of Chang Jiancheng, a radar operator at a radar station, visited the unit.

Concern under the full moon—

Homely conversations on the screen contain genuine warmth.

In mid-autumn, the Sartao Mountains, at the northern foot of the Tianshan Mountains, are chilly. As the Mid-Autumn Festival approaches, the soldiers’ longing for their loved ones grows stronger. On a quiet night, the stars and the moon shone brightly on the camp of the Songbai Border Defense Company, a border defense regiment under the Xinjiang Military Command. First Sergeant Lü Zhuo leaned against his bed in the dormitory, talking on the phone with his wife. Back home, his wife and daughter beamed.

A family photo hung on the living room wall, and his daughter, dressed in pink, was playing with building blocks. His wife’s voice drifted off camera: “The other day, our daughter pointed at the family photo and called out ‘Daddy...’“

“My dear daughter, when you grow up, come with Mommy to the border to see Daddy,” Lü Zhuo whispered softly, leaning close to the phone screen, his heart overflowing with longing for his wife and daughter. During his leave this year, his babbling daughter learned to call him “Daddy,” a moment he had never experienced before.

The day before returning to the army, Lü Zhuo took his wife and daughter to the city to take a family photo, which they hung prominently in the living room. At their departure, his wife held their daughter in her arms as Lü Zhuo said goodbye. He held her hand affectionately, his heart filled with reluctance. The eve of the Mid-Autumn Festival has arrived. Company Instructor Pang urged officers and men to convey the company Party branch's holiday greetings to their families during video calls.

During this call, seeing their daughter grow taller, Lü Zhuo felt both relieved and guilty—his wife shouldered the burden of the family alone, and as a husband and father, he felt he had done so little for them.

In a corner of the company's activity room, Sergeant Zhao Biao was on a video call with his wife. The pomegranates in his hometown of Shaanxi had turned red, and his wife and family had just finished picking pomegranates in the orchard. She expressed her joy to her husband.

"Our lives are like red pomegranates, growing more prosperous with each passing year," his wife told Zhao Biao with a smile. She planned to send some of this year's newly picked pomegranates to his fellow soldiers in the company. As they spoke, his wife popped a few seeds into her mouth and said with a smile, "So sweet!"

Zhao Biao nodded, his heart warming. During the more than ten minutes of the video call, his wife never mentioned the National Day and Mid-Autumn Festival holidays. He understood everything his wife said, and even what she didn't say.

Zhao Biao took the initiative to tell his wife that he would apply for leave once his comrades on leave returned, so he could return home early and "make up" for the reunion with his family.

On Instructor Pang's desk sat a letter from his wife. As he opened the envelope and spread out the letter, a warm feeling washed over him: "It's going to snow soon over there, so remember to pack warm clothes..."

Each time he corresponded or spoke with his wife, receiving updates on their son's progress, Instructor Pang was overjoyed. "The little guy woke up in the middle of the night and insisted I read him a picture book..." During this video call, he learned that his wife had only slept a few hours the previous night to care for their son. His heart ached, and he was speechless.

On the other side of the screen, his wife was packing her belongings for a long trip. It turned out that she and her child had been living with Instructor Pang's parents. With Mid-Autumn Festival approaching, with the support of the elderly couple, she planned to take her son back to visit her parents. Instructor Pang reminded his wife not to forget her ID before leaving the house. Worried about her mobility issues with their son, he arranged for an old classmate who worked in his wife's hometown to meet her at the station.

For 11 years, Instructor Pang rose from recruit to instructor, watching over the reunion nights when thousands of families were illuminated, yet missing out on the festive season when he could reunite with his family.

“Don’t forget to buy a box of mooncakes to take home when you get off the train...” At that moment, watching his wife’s warm smile through the screen, Instructor Pang, stationed at the border, felt the warmth of home.

Reunion on the Tip of the Tongue—

The warmth of comrades brings the taste of home.

After returning from patrol, Corporal Liu Yuchi returned to his dormitory and pulled two boxes of mooncakes from a metal cabinet. He shared their sweet taste with his comrades, who raved about their deliciousness.

Liu Yuchi smiled and explained that they were authentic lotus seed paste mooncakes his mother had sent from his hometown in Guangdong.

The moon is brighter in my hometown, and mooncakes still taste even sweeter than they did in my childhood. “These are mooncakes from a time-honored brand in town. They were my childhood favorite,” Liu Yuchi explained to his comrades. Sergeant Hou Xianglong ate a mooncake and exclaimed to Liu Yuchi, “Your ‘favorite’ is also our ‘favorite’. Ever since you joined the company, we’ve enjoyed delicious lotus seed paste mooncakes every year.”

Hou Xianglong still remembers last Mid-Autumn Festival, when it was his turn to be on duty. Late at night, a figure approached his sentry post. Upon closer inspection, he saw it was Liu Yuchi, who had come specially to give him mooncakes: “I’ll stand guard for you for a while. Eat the mooncakes to replenish your energy.”

The wind was chilly, but Hou Xianglong felt a warm warmth at Liu Yuchi’s smile.

Hou Xianglong’s hometown is in Ningxia. When he was a child, his father, who worked in Guangdong, came home for Mid-Autumn Festival and brought him and his younger brother a box of lotus seed paste mooncakes. He once recounted this memory with his classmates. “The taste of mooncakes is the taste of reunion.” Unexpectedly, his words would take Liu Yuchi to heart. “One bite of mooncake makes me miss home.” Seeing the mooncakes sent from home being devoured by his comrades, Liu Yuchi was overjoyed.

Four years ago in the autumn, on the day a new recruit left home, Liu Yuchi, wearing a large red flower on his chest, saw his mother waving from the platform, feeling a wave of reluctance.

As the train pulled away, Liu Yuchi pulled the mooncakes his mother had prepared from his backpack and took a bite, finding them incredibly sweet. After a day and a night on the train, the thought of the barracks he was about to head to filled him with longing.

Sharing the taste of home with his comrades in this moment, Liu Yuchi felt deeply satisfied—it turns out the taste of reunion had long been carried from home to the barracks; those who conveyed warmth could be parents or comrades.

Private First Class Liu Jingpeng stood by the stove, dough in hand, making mooncake bases with the cook squad leader, Zhang Xiulin. With the Mid-Autumn Festival just a few days away, they were making advance preparations.

Zhang Xiulin patiently guided him. Liu Jingpeng held the dough, gently turning it in circles. He wanted to take a photo of his handmade mooncakes and send them to his mother far away to reassure her of his well-being.

“Last Mid-Autumn Festival, when I was still in the recruit company, I couldn’t stop thinking about the mooncakes my mother made,” Liu Jingpeng said as he kneaded the dough. After arriving in the army, his mother wrote down the mooncake-making process and sent it to him.

“You do it your way, I’ll do it mine. Let’s have a mooncake-making competition,” Zhang Xiulin said with a smile. The thought of their comrades enjoying their own mooncakes energized everyone.

The kitchen door gently opened, and Mongolian border guard Cao Ketu arrived at the barracks with his son, Ayinge, to offer their condolences.

“Happy Mid-Autumn Festival to everyone in advance!” As he spoke, Cao Ketu untied the cloth bag in his hand, revealing steaming hot, sesame-sprinkled naan and several buckets of fragrant milk tea. Cao Ketu’s family lives right next to the company. His family has been border guards for generations, patrolling the border alongside successive generations of company officers and men.

I remember last Mid-Autumn Festival, when Ayinge, fresh out of college, joined his father as a border guard. That year, he celebrated Mid-Autumn Festival with the soldiers for the first time.

Looking at the mooncake molds on the table, Ayinge curiously asked, “Can I learn how to make mooncakes? If I learn, I’ll go back and make mooncakes for my mother.” Under Zhang Xiulin’s guidance, the two worked together, one kneading the dough while the other pressed the mold. In a short while, Ayinge, following Zhang Xiulin’s instructions, successfully formed a mooncake.

Seeing everyone preparing the ingredients for the mooncakes, Ayinge rolled up her sleeves and joined in. The “family” worked together, kneading the dough and quickly creating a plate of mooncakes.

Mid-Autumn Festival was still a few days away, but everyone was already eager to enjoy the mooncakes. Ayinge said happily, “On the grasslands, we celebrate festivals together by preparing food. We all work together—that’s what family means!”

Moonlight on Patrol—

Guarding the border is guarding home

Late at night, Instructor Pang led the joint patrol team out. Tonight's patrol involved a joint effort from the local police station and border guards. This was the last joint patrol before the Mid-Autumn Festival.

The moonlight shone like water. Sergeant Di Penghui walked at the center of the team, rifle in hand, his steps growing more steady. He had walked this patrol route for seven years and knew it by heart.

A gust of night wind blew, and Di Penghui couldn't help but tighten his collar. Di Penghui had just gotten married, and his wife often left him messages, urging him to take care of himself. Every time he received her "loving message," Di Penghui felt a warm warmth. Having spent years at the border, whenever he faced hardship, he thought of his wife far away, and his heart was filled with strength. "There's a deep puddle on the road ahead. Everyone, follow my steps," Cao Ketu suddenly spoke up. He was the border patrol representative on this joint patrol.

It had rained recently, and the brush was thick, leaving many sections of the road dotted with potholes. Cao Ketu insisted on walking side by side with Instructor Pang, who was at the front. "Although there's moonlight tonight, the grass is so tall that the puddles on the ground are hard to spot."

Half an hour later, the joint patrol team arrived at Boundary Marker No. 391. The moonlight shone on the marker, making the word "China" appear even more majestic. Instructor Pang paused, pulled a clean cloth from his pocket, and leaned over to wipe the marker.

Lü Zhuo gazed at the marker before him and began to dream of taking his daughter on a patrol route when she grew up, to see the nation's boundary markers. He also wanted to tell her, "Dad is guarding the border, and he's also guarding you and Mom."

The moonlight followed the team all the way back to camp. Liu Jingpeng walked at the end of the team, looking up at the moon. His mother's voicemail echoed in his ears: "Every time I look at the moon, I remember you saying it's especially bright at the border."

At that moment, his mother might be looking at the moon too! Thinking of this, his steps became more brisk.

It was almost 2 a.m. when the team returned to the camp. The kitchen lights were still on. Whenever his comrades were on a mission, Zhang Xiulin would prepare a steaming hot supper.

"Have a bowl of porridge while it's still hot." Zhang Xiulin poured each person a bowl and carefully passed it. Mid-autumn in the northwestern borderlands was already chilly, but the hot porridge on the table warmed the body and soul. Someone smiled and said, "Squad Leader Zhang, last time I caught a cold, the ginger soup you made was more effective than medicine!"

Zhang Xiulin smiled back, took out some freshly heated homemade mooncakes, and said, “Let’s have some mooncakes early today. I won’t miss home after eating!”

At that moment, Instructor Pang walked out the door and stood under the watchtower, looking up at the moon. He smiled knowingly. The Mid-Autumn Festival was just a few days away, and the moon would be even larger and brighter, illuminating the border and his hometown thousands of miles away. Looking up at the moon was a time for family reunion.

The wind still blew, and Instructor Pang no longer felt cold.

He knew that this Mid-Autumn Festival, like every other, the company’s officers and men guarded the border, their hearts filled with their homes. If one family isn’t reunited, thousands will be; guarding the border means guarding the reunion of millions of families.

The Silent Mountains Witness Loyalty

■Liu Ming

The clouds were light and the breeze was gentle, the autumn chill like water. The garrison of a border defense company of the Southern Theater Command Army was peaceful and tranquil.

“Mid-Autumn Festival is almost here again. It looks like I’ll be ‘reuniting’ with my family on my phone screen again this year...” Sergeant First Class Zhang Jie, on duty at his post, straightened his back, gazing at the bright moon at the border. The watery moonlight poured down, softening his resolute face.

The night deepened, and the distant mountains were a deep, inky black. At this moment, Zhang Jie’s thoughts raced.

In December 2012, Zhang Jie enlisted in the army and arrived at the southwestern border. Over the past decade, trekking through dense forests and guarding sacred boundary markers has transformed Zhang Jie from a naive young man into a veteran border guard.

It’s said that the hearts of border guards are bound by two threads: one to the border, the other to home. Zhang Jie is no exception. Now that Mid-Autumn Festival is approaching, his thoughts are even more focused on his wife and son.

“Dad, we agreed. This Mid-Autumn Festival, you have to teach me how to make mooncakes. Otherwise, I won’t talk to you anymore...” His son, Xiao Muchen, recently gave Zhang Jie an “order” over the phone, and Zhang Jie readily agreed.

Making mooncakes with his family is a Mid-Autumn Festival tradition in Zhang Jie’s hometown, filling the ordinary days with happiness. Zhang Jie still remembers his childhood, when the sweet aroma of baked mooncakes filled the house. He’d bite into them, not caring if they were too hot, and the crispy, sweet taste was simply divine.

After having a son, Zhang Jie wanted to teach him how to make mooncakes. For the past few years, he'd spent the Mid-Autumn Festival at his post. This year, he specifically requested a permit from his company, , taking leave during the Mid-Autumn Festival.

However, not long ago, Zhang Jie learned that a company comrade's wife was about to give birth, her due date brought forward. He immediately offered his leave to his comrade and postponed his own.

"With the Mid-Autumn Festival approaching, I'm definitely not going to be able to fulfill the promise I made to my son. How can I restore my image in his eyes?" Zhang Jie was in a dilemma.

"Squad leader, why don't you let your sister-in-law bring your child, Muchen, to visit the company?" On the way to the post, Corporal First Class Jian Pengcheng, upon learning of the situation, offered him some advice.

Seeing Zhang Jie's hesitation, he continued, "Our company has just renovated the housing for families, so you can rest assured and let your sister-in-law come."

"Okay, I'll call tomorrow." With Jian Pengcheng's persuasion, Zhang Jie decided to invite his wife and child. A few days later, his wife, Li Hongjiao, brought their child, Muchen, to the border to visit their family.

That evening, Zhang Jie, who had been waiting at the company's intersection early, stepped forward to take the luggage, looking with heartache at his wife and their son, who slept soundly in her arms. Having to transfer multiple modes of transportation, the journey of less than a thousand miles took Li Hongjiao and his son nearly 10 hours to reach the company.

"I've got a surprise for you!" Zhang Jie pointed toward the company gate as he walked. Li Hongjiao looked ahead curiously—comrades lined up neatly in front of the barracks to welcome her and her son, the atmosphere warm and welcoming.

It turned out that after Zhang Jie informed the company about the idea of inviting family members to the camp, the instructor immediately decided to organize a welcoming ceremony. After some discussion, they came up with this "surprise."

"Hello, sister-in-law!" Looking at the dark-skinned faces of the officers and men and hearing their warm greetings, Li Hongjiao felt a warm warmth in his heart. The pain of the long journey melted away in this moment of warmth. Little Muchen, awake, rested her head on her father's shoulder, occasionally looking up to high-five the PLA soldiers and giggling. Entering the barracks, Li Hongjiao was struck by the brand-new family housing: a spacious, bright living room, a neat and clean bedroom, and all the amenities he needed, including a TV, sofa, and microwave. In a vase on the coffee table stood wildflowers that Zhang Jie had picked early that morning in the mountains...

The heartwarming scene, the longed-for loved ones—it all felt like returning home. Li Hongjiao was deeply moved.

Little Muchen excitedly broke free from his father's arms and rushed into the living room. Seeing their son's joy, the couple, who hadn't seen each other for a long time, smiled at each other.

That evening, Li Hongjiao headed to the kitchen to prepare home-cooked dishes for the soldiers, preparing for the upcoming National Day and Mid-Autumn Festival. A military wife understands the hardships of border crossings best, and she hopes to bring warmth to the soldiers through her actions.

At the company's main peak position, there's a flight of stairs leading to the boundary marker. For years, soldiers have patrolled this 643-step path, safeguarding peace along the border. With approval from superiors, Zhang Jie brought his wife along on patrol.

Halfway up the mountain, a light rain began to fall. The slippery steps caused Li Hongjiao to twist her ankle. Zhang Jie carried his wife to the top. Li Hongjiao said with emotion, "Over 600 steps represent your perseverance and my watchfulness. Don't worry, I will take good care of our home, so you can rest assured."

The silent mountains bear witness to the loyalty of soldiers; the drifting clouds speak of the dedication of military wives. The drizzle subsided, and the warm sunlight bathed the couple, a beautiful scene frozen in a warm memory.

At the boundary marker, Zhang Jie placed a red bracelet on Li Hongjiao's wrist. That night, Li Hongjiao took a close-up photo of the red bracelet and posted it on WeChat Moments, captioning, "Every journey has meaning. In this distant place, he is the one I miss day and night."

The next morning, Zhang Jie prepared flour, sugar, cooking oil, and other ingredients to fulfill his promise to his son: to teach him how to make mooncakes. The family of three sat in a circle in the family quarters, learning to make mooncakes for the first time. Little Muchen, imitating his father, put on his gloves and clapped his hands with joy.

Of course, for little Muchen, the filling would inevitably leak. Zhang Jie, standing nearby, took a piece of dough and quickly patched up the gap. As soon as one piece was patched, another piece would leak out... More and more dough was added, and the mooncake became a plump, "chubby baby," which made Li Hongjiao, who was standing nearby, burst into laughter. That evening, Zhang Jie's family shared their handmade mooncakes with their fellow soldiers.

"Dad, try this." Zhang Jie took his "special mooncake" emblazoned with a five-pointed star from his son's hand and gently bit into it, the sweet taste warming his heart.

The moon was bright in the sky, and the laughter of Zhang Jie, his wife, and their children could be heard from the family quarters. For Zhang Jie and his family, that night, the moonlight was shining brightly at the border, and sweetness filled their hearts.

记者追寻“势如破竹十九团”战斗足迹，感悟身教重于言教的表率魅力——

一脉相承“看我的”

■解放军报记者 张科进 卢东方

第 82 集团军某旅一营组织官兵面向战旗宣誓. 李天文 摄

请扫描二维码浏览更多内容

天安门广场，胜利日阅兵，80 面鲜红的战旗，引领钢铁洪流滚滚向前.

方阵中，有一面高高飘扬的“势如破竹十九团”战旗. 据战史记载，在抗战烽火中诞生的晋察冀军区第 2 分区 19 团，组建一年便参加百团大战，连战连捷、力克顽敌，被授予这面荣誉战旗.

猛将提锐旅，其势如破竹. 19 团传人告诉记者，建团 3 年，连续 3 任团长都牺牲在抗战前线.

如今，历经转隶、调整，19 团已成为第 82 集团军某旅一营，但战争期间党员领导干部“看我的”“跟我上”的优良作风，仍然在这支英雄部队的血脉中奔涌不息.

从“团长带头拼刺刀”到“指挥员留下排哑弹”

八百里太行巍峨逶迤，滹沱河环抱着山下的梁家寨，滚滚东流.

沿着蜿蜒的山道，记者一行攀上山西盂县和五台县交界的牛道岭山顶. 一营“铁血山英雄连”指导员孙义指着山脚下一片山峦说：“1940 年，1200 多名日伪军进犯五台县东南的柏兰镇，团长李和辉奉命率组建仅半年的 19 团在此阻击. ”

当地一位 90 岁高龄的老人告诉记者，他父亲曾给 19 团官兵担任过向导，多次向他讲起那场战斗的情景.

那场战斗异常激烈，从清晨打到黄昏. 眼看弹药即将打光，李和辉从警卫员手中抢过上了刺刀的“三八大盖”，从战壕里跳出来，带领官兵向敌人发起白刃战，不幸被一发机枪子弹打穿肚子，重伤倒地.

团长倒下后，副政委曾美接替指挥. 这场恶战，连长倒下排长补上，排长牺牲班长顶替，全团死死地与敌人缠斗在一起. 最终，日寇悉数被歼，伪军大部逃跑.

令人震撼的是，继李和辉牺牲后，该团第二任团长熊德臣、第三任团长刘桂云，在两年内也相继牺牲.

多年后，英国元帅蒙哥马利说出一句名言：“我要告诫我的同行，不要同中国军队在地面上交手，这要成为军事家的一条禁忌！”这句话，就是蒙哥马利访华时，在参观这支英雄部队操练后所说.

据不完全统计，19 团牺牲在抗日战场上的官兵有据可查者近千人.

清风拂过烈士陵园内的一座座墓碑，记者不禁思索：“当这些年轻官兵扑向敌人的时候，他们难道一点儿都不曾害怕吗？”

在陕西渭南拜访该营老前辈、90 多岁志愿军老兵刘纪民时，记者得到了答案——

“怕啊，当然怕. 可每当冲锋时，连长、排长、党员带头上，我们也就不怕了. ”忆及入朝后的首场战斗，刘纪民告诉记者，当年他才十几岁，是班里年龄最小的兵. 战斗中，总是干部骨干冲在前面，大家很快就变得勇敢了.

阳明堡奇袭战、平型关白刃战、兴道村歼灭战……一场场战斗让日军惊呼：“在共产党的军队里，领头的全冲在前面，这样的队伍非常难对付. ”

战时带头冲锋陷阵，平时带头严守纪律. 在冀中地区，至今还流传着“独臂将军赔碗钱”的故事. 当地群众告诉记者，120 师独立第三支队司令员贺炳炎带队紧急转移时，不慎碰碎房东王大娘家的粗瓷碗，当即留下“八路损坏，定当赔偿”的纸条，并塞入双倍赔偿的钱款，百姓赞叹此举“胜过官府万句言”.

“今天，‘看我的’仍然是最过硬的党性和作风！”野外驻训场上，该营火力连战士张盛斌动情地回忆起一件往事——

2018 年实弹演训任务中，一门车载迫击炮突发炮弹留膛故障. 现场指挥员宋昱霖第一时间将战士们疏散到安全位置，自己带领一名骨干排除故障. 退膛时，宋昱霖的手指被炮弹砸伤，但他一声不吭，直至故障排除.

一场秋雨过后，塞北草原秋风萧瑟、凉意袭来，官兵在野外刻苦训练，斗志昂扬. 战士们告诉记者，野外训练场上有一条不成文的规定："吃饭时战士不打满、干部不端碗，野营时战士睡里头、干部睡风口. "

众所周知，这样的规定在我军部队十分普遍.

从"战时抢主攻"到"平时争任务"

"八路军有个十九团，十九团有个刘团长. 刘团长英勇又善战，他是咱们的好首长……"在盂县上社镇里独头村，群众给记者唱起民谣，讲起 19 团第三任团长刘桂云的故事.

刘桂云牺牲后，乡亲们将他安葬在里独头烈士陵园，自发为他守陵.

"刘桂云有非常强烈的求战欲，经常主动创造战机消灭敌人. "当地党史专家告诉记者，1943 年 10 月，获悉日军要护送 40 多名所谓"立功"人员和大批武器途经附近，身体负伤、躺在担架上的刘桂云主动向分区请战："请组织把我放在战斗最激烈的地方！"

这一战，19 团大获全胜.

烽火硝烟中，舍命求战的我军指挥员，岂止刘桂云！

"我前进，你们跟着我；我停止，你们推动我；我后退，你们枪毙我. "百团大战纪念馆一号展厅墙上，铭刻着 3 行大字. 讲解员李洋告诉记者，这是八路军第 129 师新编 10 旅旅长范子侠生前常说的 3 句话.

在关家垴战斗中，范子侠率部冲锋，左手腕被子弹打穿. 上级命令他好好养伤，可几天后他就回到前线. 他说，左腕负伤"无害于执枪前线".

战斗中，范子侠带领官兵夜袭桑掌桥、智取测石火车站、攻克草帽山据点，次次都是迎着死神冲锋.

从柏兰镇阻击战到兴道村歼灭战，从太原"登城第一功"到天津城头第一旗，从首破三八线、血战阿里山到曲桥里、鸭谷里阻击战……在一营先辈参加的一场场大战、恶战中，各级干部骨干屡屡在战场上抢主攻、拔头筹.

领导带头，一脉相承，今昔同辉.

秋风秋雨中，一营官兵正在草原驻训场上忙碌，为某新型战车试验做准备. 记者了解到，今年，他们承担了多项重大任务，工作本已十分饱满，但得知有试验任务，营党委第一时间向旅党委请缨，硬是把任务“抢”到了自己手中.

“战斗力建设是一场竞速赛，一刻也歇不得！”该营营长告诉记者，“战时抢主攻，平时争任务，这是我们的光荣传统.”

不久后，一营将开赴某训练基地参加演训，临行前组织全体干部与梁家寨革命历史纪念馆视频连线. 面对老团长们的画像，教导员语气激昂地鼓劲动员：“越是环境险恶、任务艰巨，领导干部越要主动作为，全部心思向带兵打仗、练兵备战聚焦，圆满完成上级交给的任务.”

从“战场失联敢决断”到“演习失利勇担责”

高原戈壁，飞沙走石.

有一年，一营官兵一路风尘仆仆，驾驶某新型装备从平原挺进高原，准备展开一系列试验训练. 但戈壁滩上突发沙尘暴，能见度大大降低，给新装备极限试验增添了不小风险.

试验要不要继续？官兵的身体能不能承受？……有人觉得还是保守点好，让上级机关定夺，否则出了事只能自己承担后果.

“那么，我们的意见是什么？”党委会上，营党委书记、教导员这样问道，并拿营史上赫赫有名的阿里山（战后被当地改名为铁血山）战斗激励大家——

抗美援朝期间，机炮连在穿插奔袭途中与上级失去联系，却恰好与南朝鲜军精锐第 1 师的一个主力团遭遇. 狭路相逢勇者胜，连队指挥员果断出手，组织部队先敌开火、先敌攻击，打得南朝鲜军措手不及，仓皇逃跑.

“要不要追？”机炮连主要负责火力支援，追击战斗并不是他们的强项. 更何况，一个连追击一个团的大事，要不要上报？

战机稍纵即逝，连长岳忠义当机立断主动追击，硬是撵着敌人一个团，一路追到德里以南地区.

这一追，让南朝鲜军第 1 师本应“齐头并进”的几个团，被吓得不敢前进，就地转入防御. 战后，志愿军第 66 军先后授予该连“猛攻如猛虎、坚守如泰山”“铁血山英雄连”两面锦旗.

“如果身处一线的指挥员害怕担风险，坐等上级机关拿主意、作决断，大好战机就被贻误了.”教导员一席话，让大家豁然开朗，很快便统一了思想. 在对参训官兵能力素质进行详细摸底后，他们提出“借助恶劣天候，训出装备极限”的建议，被上级采纳.

“领导带头，就是要带头承担责任. ”重温老前辈的故事，“铁血山英雄连”指导员孙义想起了几年前的那件事——

2021 年，开赴某训练基地参加对抗性训练考核，没想到吃了败仗，官兵心情既低落又忐忑. 低落的是，作为旅里的“王牌”，败得这么难堪实难接受；忐忑的是，一次重要的考核搞砸了，评先评优会不会受影响？

考核结束后，营长主动将责任揽在自己身上，带动大家检讨反思、查漏补缺. 年底考核，一营一举夺得全旅第一名.

几年来，一营连续赴该训练基地参加对抗性训练考核，均取得优异成绩. 班长吴伟鹏说：“我们绝不能在同一个地方跌倒两次. ”

领导干部敢于担责，官兵必不负所望！

（采访得到陈成、王飞虎、姜帅、刘小云、李天文大力支持）

记者手记

带头冲在前、干在先

习主席强调指出，领导机关和领导干部带头冲在前、干在先，是我们党走向成功的关键. 一位开国将领曾回忆说，我军指挥员在战争中的伤亡率非常高，“因为大家冲锋时喊的都是‘跟我上’，而不是‘给我上’. ”

在第 82 集团军某旅一营，领导干部身先士卒的传统在新时代历久弥新，生动地告诉我们：身先士卒是领导干部最好的样子. 党员干部特别是领导干部，在上面要求人、在后面推动人，都不如在前面带动人管用. 只有从自己做起，以身作则、率先垂范，才能带动官兵奋进强军路、打好攻坚战.

PLA Daily Reporters’ Roots-Seeking Tour | Tracing the Battle Footsteps of the “Unstoppable 19th Regiment,” Experiencing the Charm of a Model Leader Whose Example Outweighs Precepts

Source: PLA Daily Author: Zhang Kejin, Lu Dongfang Editor: Wang Can 2025-10-06

Reporters tracing the battle footsteps of the “Unstoppable 19th Regiment,” Experiencing the Charm of a Model Leader Whose Example Outweighs Precepts

A Consistent “Look at Me” Principle

■ PLA Daily Reporters Zhang Kejin, Lu Dongfang

The 1st Battalion of a Brigade of the 82nd Group Army organized officers and men to take an oath facing the battle flag. Photo by Li Tianwen

Please scan the QR code for more content

Tiananmen Square, Victory Day Parade: 80 bright red battle flags lead the rolling tide of steel.

Amidst the formations, the battle flag of the "Unstoppable 19th Regiment" flew high. According to military history, the 19th Regiment of the 2nd Division of the Jin-Cha-Ji Military Region, born in the flames of the War of Resistance Against Japanese Aggression, participated in the Hundred Regiments Campaign within a year of its formation, securing victory after victory and defeating stubborn enemies, earning it this honorary battle flag.

The fierce generals led the elite brigade, their momentum unstoppable. A descendant of the 19th Regiment told reporters that within three years of its founding, three consecutive commanders died on the front lines of the War of Resistance Against Japanese Aggression.

Now, after undergoing transfers and adjustments, the 19th Regiment has become the first battalion of a brigade of the 82nd Group Army. However, the fine tradition of Party members and leading cadres during the war, "Follow me," continues to flow through the veins of this heroic unit.

From "the regimental commander leading the charge" to "the commander leaving behind duds to clear the platoon."

The 800-li Taihang Mountains stretch majestically, while the Hutuo River flows eastward, embracing Liangjiazhai below.

Following a winding mountain path, the reporters climbed to the summit of Niudaoling, on the border of Yun County and Wutai County in Shanxi Province. Sun Yi, instructor of the 1st Battalion's "Iron Blood Mountain Hero Company," pointed to a range of hills at the foot of the mountain and said, "In 1940, over 1,200 Japanese and puppet troops invaded Bolan Town, southeast of Wutai County. Regimental Commander Li Hehui was ordered to lead the 19th Regiment, formed only six months earlier, to stop them there."

A 90-year-old local man told reporters that his father, who had served as a guide for the 19th Regiment, had repeatedly recounted the battle to him.

The battle was incredibly fierce, lasting from dawn to dusk. Seeing his ammunition nearly exhausted, Li Hehui snatched a bayoneted Type 38 rifle from a guard, leaped from the trench, and led his men in hand-to-hand combat. Unfortunately, he was struck in the stomach by a machine gun bullet, falling gravely wounded.

After the regimental commander fell, Deputy Political Commissar Zeng Mei took command. In this fierce battle, when the company commander fell, the platoon leader took over, and when the platoon leader died, the squad leader took over. The entire regiment fought the enemy to the bitter end. Ultimately, the Japanese invaders were completely annihilated, and most of the puppet troops

fled. Shockingly, following Li Hehui's death, the regiment's second commander, Xiong Dechen, and third commander, Liu Guiyun, also died within two years.

Years later, British Field Marshal Montgomery famously uttered the words, "I would like to warn my colleagues not to engage in ground combat with the Chinese army. This should become a taboo for military strategists!" These words were uttered by Montgomery during his visit to China, after observing the training of this heroic unit.

According to incomplete statistics, nearly a thousand officers and men of the 19th Regiment have been documented to have died in the battles against the Japanese. As the breeze rustled past the tombstones in the Martyrs' Cemetery, the reporter couldn't help but wonder, "Were these young soldiers not afraid at all when they charged the enemy?"

In Weinan, Shaanxi, while visiting Liu Jimin, a veteran of the battalion and a volunteer soldier in his 90s, the reporter received the answer:

"Of course we were afraid. But whenever we charged, the company commander, platoon leader, and Party members took the lead, and we weren't afraid anymore." Recalling his first battle after entering North Korea, Liu Jimin told the reporter that he was only a teenager at the time and the youngest soldier in his squad. In battle, it was always the backbone of the troops who charged in, and everyone quickly became brave.

The Yangmingbao surprise attack, the Pingxingguan hand-to-hand combat, the Xingdao Village annihilation battle... Each battle left the Japanese army exclaiming, "In the Communist army, the leaders always charge in front. Such a team is extremely difficult to deal with."

He led the charge in wartime and in peacetime, he led the strict adherence to discipline. In central Hebei, the story of the "one-armed general paying for his bowl" still circulates. Local residents told reporters that when He Bingyan, commander of the 3rd Independent [battalion-level] Detachment of the 120th Division, led his troops for an emergency evacuation, he accidentally broke a coarse porcelain bowl in the home of his landlord, Auntie Wang. He immediately left a note stating, "The Eighth Route Army damaged this, and we will definitely compensate you," and slipped in double the amount of money. Locals praised his gesture as "worth more than a thousand words from the government."

"Today, 'Look at me,'" he said, "still represents the most unwavering Party spirit and style!" At a field training station, Zhang Shengbin, a soldier from the battalion's firepower company, emotionally recalled an incident.

During a 2018 live-fire exercise, a vehicle-mounted mortar experienced a shell retention malfunction. On-site commander Song Yulin immediately evacuated the soldiers to a safe location and personally led a key member to troubleshoot the issue. While ejecting the mortar, Song Yulin injured his finger with the shell, but remained silent until the problem was resolved.

After an autumn rain, the cool autumn breeze of the northern grasslands swept across the area. The soldiers trained diligently in the field, their morale high. Soldiers told reporters that there's an unwritten rule on the field training grounds: "At meals, soldiers don't fill their bowls, and cadres don't carry their bowls. When camping, soldiers sleep inside, and cadres sleep in the wind."

It's no secret that this rule is common in our military.

From "seizing the lead attack in wartime" to "competing for missions in peacetime"

"The Eighth Route Army had the 19th Regiment, and the 19th Regiment had a Commander, Liu. Commander Liu was brave and skilled in battle, and he was a good leader for us..." In Lidutou Village, Shangshe Town, Yun County, villagers sang folk songs for reporters, recounting the story of Liu Guiyun, the third commander of the 19th Regiment.

After Liu Guiyun's death, villagers buried him in the Lidutou Martyrs Cemetery and took it upon themselves to guard his tomb. "Liu Guiyun had an extremely strong desire to fight, often proactively creating opportunities to destroy the enemy." A local Party history expert told reporters that in October 1943, upon learning that the Japanese army was escorting over 40 so-called "meritorious" personnel and a large quantity of weapons through the vicinity, Liu Guiyun, wounded and lying on a stretcher, volunteered to the division headquarters: "Please, organization, place me where the fighting is most intense!"

In this battle, the 19th Regiment won a resounding victory.

Liu Guiyun was not the only commander who risked his life in the smoke of war!

"When I advance, you follow me; when I stop, you push me; when I retreat, you shoot me."

These three lines of inscription are engraved on the wall of Exhibition Hall 1 of the Hundred Regiments Offensive Memorial Hall. Tour guide Li Yang told reporters that these were three phrases often used by Fan Zixia, commander of the newly formed 10th Brigade of the 129th Division of the Eighth Route Army.

During the Battle of Guanjiazhai, Fan Zixia led his troops in a charge and was shot in the left wrist. His superiors ordered him to recuperate, but he returned to the front a few days later. He said the wound in his left wrist "would not harm him on the front lines."

During the battle, Fan Zixia led officers and men in a nighttime assault on Sangzhang Bridge, the strategic capture of Ceshi Railway Station, and the conquest of the Caomao Mountain stronghold, each time charging headlong into death.

From the Bailan Town blocking battle to the Xingdao Village annihilation campaign, from the "first merit of climbing the city wall in Taiyuan" to the first flag on the city wall of Tianjin, from the first breach of the 38th parallel, the bloody battle of Alishan, to the Quqiaoli and Yaguli blocking battles...in the fierce and fierce battles fought by the First Battalion's predecessors, cadres and backbones at all levels repeatedly took the lead and won the first battles on the battlefield.

Leaders take the lead, a common thread, shining today and in the past.

Amidst the autumn wind and rain, officers and men of the First Battalion were busy on the grassland training grounds, preparing for the testing of a new tank. Reporters learned that this year, they had undertaken many major tasks and were already very busy, but when they learned of the testing mission, the Battalion Party Committee immediately volunteered to the Brigade Party Committee, forcing the task into their own hands. “Building combat effectiveness is a race, and we can’t rest for a moment!” the battalion commander told reporters. “In wartime, we seize the main attack, and in peacetime, we compete for missions. This is our glorious tradition.”

Soon, the First Battalion will depart for a training base for exercises. Before departure, all officers will have a video conference with the Liangjiazhai Revolutionary History Memorial Hall. Facing portraits of veteran regimental commanders, the instructor spoke passionately, “The more dangerous the environment and the more arduous the task, the more proactive leading cadres must be, focusing their entire attention on leading troops in battle, training, and preparing for war, and successfully completing the tasks assigned by superiors.”

From “daring to make decisive decisions when contact is lost on the battlefield” to “bravely taking responsibility for exercise failures”

The highlands and Gobi Desert, with flying sand and boulders.

One year, the officers and men of the First Battalion, exhausted by the journey, drove a new piece of equipment from the plains to the plateau, preparing for a series of test exercises. However, a sudden sandstorm in the Gobi Desert significantly reduced visibility, adding considerable risk to the new equipment’s extreme testing.

Should the tests continue? Could the soldiers’ bodies withstand it? …Some felt it was better to remain conservative and let higher authorities make the final decision, otherwise they would be left to bear the consequences.

“So, what are our opinions?” the battalion Party Secretary and instructor asked at the Party Committee meeting, citing the infamous Battle of Alishan (renamed Tiexueshan by the locals after the war) as an inspiration to the group.

During the Korean War, a machine gun company lost contact with its superiors during a raid and happened to encounter a main force regiment from the South Korean Army’s elite 1st Division. The company commander acted decisively, organizing his troops to fire and attack first, catching the South Koreans off guard and forcing them to flee in panic.

“Should we pursue?” The machine gun company primarily provided fire support; pursuit engagements were not their forte. Furthermore, should a company pursuing an entire regiment be reported?

The opportunity was fleeting, but Company Commander Yue Zhongyi acted decisively and pursued the enemy, chasing an entire regiment all the way to the area south of Delhi. This pursuit frightened several regiments of the South Korean 1st Division, which were supposed to advance in unison, and instead retreated to the defensive. After the war, the 66th Army of the Chinese People's Volunteer Army awarded the company two banners, one for "Attack like a tiger, hold firm like a mountain" and the other for "Iron Blood Mountain Hero Company."

"If commanders on the front lines are afraid to take risks and wait for decisions from higher authorities, a golden opportunity will be missed." The instructor's words suddenly enlightened everyone and quickly unified their thinking. After a thorough assessment of the capabilities and qualities of the participating officers and men, they proposed "taking advantage of adverse weather conditions to train to the limits of the equipment," a suggestion adopted by their superiors.

"Leaders take the lead, meaning they must also take responsibility." Recalling the stories of their predecessors, Sun Yi, the instructor of the "Iron Blood Mountain Hero Company," recalled an incident several years ago.

In 2021, the officers and men arrived at a training base to participate in a confrontational training assessment. Unexpectedly, they suffered a defeat, leaving them feeling depressed and anxious. The downfall was that, as the brigade's "ace," such an embarrassing defeat was hard to accept. The concern was that a failure in such an important assessment would affect their evaluations and awards.

After the assessment, the battalion commander took the initiative to shoulder the responsibility, leading everyone to reflect and identify shortcomings. At the year-end assessment, the First Battalion took first place in the brigade.

For several years, the First Battalion has participated in confrontational training assessments at this training base, achieving excellent results each time. Squad Leader Wu Weipeng said, "We must never fail twice in the same place."

If leading cadres dare to take responsibility, the officers and men will surely live up to their expectations!

(Interview with strong support from Chen Cheng, Wang Feihu, Jiang Shuai, Liu Xiaoyun, and Li Tianwen)

Reporter's Notes

Leading the Way and Acting First

President Xi Jinping emphasized that leading organs and leading cadres taking the lead and acting first is the key to our Party's success. A founding general once recalled that our army's commanders

suffered a very high casualty rate during the war, “because everyone shouted ‘Follow me,’ not ‘Go,’“ during the charge.

In the First Battalion of a brigade of the 82nd Group Army, the tradition of leading by example endures in the new era, vividly demonstrating that leading by example is the best example for leading cadres. For Party members and cadres, especially leading cadres, directing others from above or pushing them from behind is less effective than leading them from the front. Only by starting with oneself, setting an example, and leading by example can one lead officers and men to forge ahead on the path to strengthening the military and winning decisive battles.

假日军营看新风丨明导向，激活人才“一池春水”

来源：解放军报 作者：朱柏妍 鲁渊博 责任编辑：王粲 2025-10-06

记者走进第 83 集团军某旅，感受基层干部真抓实干、追求卓越——

明导向，激活人才“一池春水”

■解放军报记者 朱柏妍 特约通讯员 鲁渊博

国庆佳节，记者走进第 83 集团军某旅机关办公楼，看到节前刚调整到保卫干事岗位的干部张振宇，在一摞厚厚的资料上作标注. 留意观察，只见他写下一句批注：“此项法规条文的具体适用场景，需要结合旅里的实际再详细梳理. ”

整理完手头资料，他跟记者谈起自己节假日的安排：“岗位调整了，能力必须跟上，假期正是补短强能的好时机. ”

采访中，记者了解到，有着 12 年边防服役经历的张振宇军事素质过硬，去年底从边防一线交流来到该旅. 旅队按照人岗相适的选人用人原则，先安排他在部队管理科帮助工作，上个月正式任命其为保卫科干事.

“这是对张干事能力素质的认可，也是我们旅打破岗位壁垒、优化人才配置的具体实践. ”该旅领导表示，结合持续深入推进政治整训，他们着力匡正选人用人风气，严格对标对表军队好干部标准，选优配强各级干部骨干，立起凭过硬素质立身、靠突出实绩进步的鲜明导向，激发干部干事创业动力活力.

“您好，请出示证件、登记信息. ”营区大门哨位上，刚由排长调整为副连长的郭开宏正对进入营区的人员进行查验. 节前，他主动申请在假日期间承担哨位执勤任务，这不仅让战友获得了更多休息时间，自己也能更快熟悉情况.

郭开宏原是某合成营火力排排长. 旅党委根据培养晓战争、懂技术的专业化复合型人才原则，将具备专业优势的郭开宏调整至作战支援营某连担任副连长. 这是该旅优化人才结构、提升部队战斗力的生动一幕.

“组织把我放到现在这个岗位上，就是希望我能突破专业局限，成为一名全能型军官. ”郭开宏深知肩上责任重大，虽然这个假期忙于工作学习，但他没觉得辛苦，心中只有满满的紧迫感.

路过训练场，记者看到一名身着作训服的干部正拿着一张战备预案表，与几名战士展开讨论. 一问得知，这名干部是某营侦察连连长王汝军. 这个假期，他们连担负营里的防火应急值班任务，他正和几名骨干研究完善应急预案.

“紧急集合，防火分队出动！”一阵急促的警报声打断了记者的采访，值班员哨音与指令同步下达. 王汝军带领官兵肩扛水带、手提灭火器，快速奔向集合点……

目送官兵身影远去，同行的一名旅领导向记者介绍了王连长的成长经历. 1 年前，王汝军还是某连指导员，任职期间多次被评为旅“优秀政治教员”. 今年初，旅党委结合整顿用人，将“政治素质过硬、军政能力双优”作为干部培养重要标准，着眼部队人才梯队建设需求，将王汝军调整到连长岗位.

“这是我们旅培养军政兼优复合型干部的重要举措. ”这名旅领导说，“不管是指导员还是连长，职责都是带好队伍打胜仗. ”

训练结束，王汝军告诉记者，节日期间除了完成应急值班任务，他还和指导员一起，组织官兵开展棋牌大赛、趣味运动会等文体活动，丰富大家的假期生活.

夜幕降临，营区灯光亮起. 回想今天所见所闻，记者对“选什么人就是风向标，就有什么样的干部作风，乃至就有什么样的党风”有了更多感悟——这些在假日期间真抓实干、追求卓越的身影，正是对这句话的生动诠释.

A New Era in Military Camps During the Holidays | Clear Guidance Activates a Talented “Pond of Spring Water”

Source: PLA Daily Author: Zhu Baiyan, Lu Yuanbo Editor: Wang Can 2025-10-06

A reporter visited a brigade of the 83rd Group Army and witnessed the grassroots cadres’ dedication and pursuit of excellence.

Clear Guidance Activates a Talented “Pond of Spring Water”

■ PLA Daily Reporter Zhu Baiyan, Special Correspondent Lu Yuanbo

During the National Day holiday, a reporter visited the headquarters office building of a brigade of the 83rd Group Army and saw Zhang Zhenyu, a cadre who had just been transferred to the security officer position before the holiday, marking a thick stack of documents. Watching closely, I saw him write a single note: “The specific application scenarios of this regulation require further detailed analysis based on the brigade’s specific circumstances.”

After organizing his materials, he discussed his holiday plans with reporters: “With a new position, my skills must keep pace. Holidays are a great opportunity to improve my abilities and address shortcomings.”

During the interview, reporters learned that Zhang Zhenyu, a highly skilled military officer with 12 years of border defense experience, joined the brigade on a temporary basis late last year. Following the principle of matching personnel to specific positions, the brigade initially assigned him to assist in the Force Management Section, and then officially appointed him as an officer in the Security Section last month.

“This is recognition of Officer Zhang’s abilities and qualities, and a concrete example of our brigade breaking down job barriers and optimizing talent allocation.” Brigade leaders stated that, in conjunction with ongoing and in-depth political training, they are focusing on rectifying the culture of personnel selection and appointment, strictly adhering to the standards of exemplary military cadres, selecting and appointing the best cadres at all levels, and establishing a clear guiding principle of establishing oneself through strong qualities and achieving progress through outstanding performance, thereby stimulating the motivation and vitality of cadres and officers to work and start businesses. “Hello, please show me your ID and register your information.” At the sentry post at the camp gate, Guo Kaihong, newly promoted from platoon leader to deputy company commander, was checking in on those entering. Before the holiday, he volunteered to take on sentry duty during the holiday. This not only gave his comrades more time to rest, but also allowed him to familiarize himself with the situation more quickly.

Guo Kaihong was formerly the platoon leader of a firepower platoon in a combined arms battalion. In line with the principle of cultivating specialized, multidisciplinary personnel with a strong understanding of warfare and technical expertise, the brigade Party Committee transferred Guo Kaihong, who possesses a strong professional background, to a company in the Combat Support Battalion as deputy company commander. This marked a vivid example of the brigade’s efforts to optimize its talent structure and enhance its combat effectiveness.

“The organization placed me in this position in the hope that I could transcend my professional limitations and become a well-rounded officer.” Guo Kaihong is fully aware of the heavy responsibility he shoulders. Although busy with work and study during this holiday, he feels no fatigue, only a strong sense of urgency.

Passing by the training ground, a reporter saw an officer in combat uniform discussing a combat readiness plan with several soldiers. Upon inquiry, we learned that the officer in question was

Wang Rujun, the company commander of a battalion's reconnaissance company. This holiday, his company was on duty for the battalion's fire emergency response, and he was working with several key personnel to refine the emergency plan.

"Emergency assembly, fire prevention squad dispatched!" A rapid siren sounded, interrupting the reporter's interview. The officer's whistle echoed the command. Wang Rujun led the officers and men, shouldering hoses and carrying fire extinguishers, as they quickly rushed to the assembly point...

Watching the soldiers disappear, a brigade leader accompanying them shared Captain Wang's life story with the reporter. A year ago, Wang Rujun was the instructor of a company. During his tenure, he was repeatedly recognized as the brigade's "Outstanding Political Instructor." Earlier this year, the brigade Party Committee, in conjunction with a personnel restructuring, established "strong political qualities and excellent military and political abilities" as key criteria for cadre training. Focusing on the unit's talent development needs, Wang Rujun was transferred to the position of company commander. "This is a key measure for our brigade to cultivate highly skilled, multidisciplinary cadres with both military and political expertise," the brigade leader said. "Whether you're an instructor or a company commander, your responsibility is to lead the troops to victory."

After the training, Wang Rujun told reporters that during the holiday, in addition to completing emergency duty, he and his instructors also organized cultural and sports activities, such as chess and card competitions and fun games, to enrich everyone's holiday life.

As night fell, the lights in the camp came on. Reflecting on what I saw and heard today, I gained a deeper understanding of the saying, "The people we choose are a weather vane, determining the style of cadres and, ultimately, the style of the Party." These individuals, working diligently and striving for excellence during the holiday, vividly illustrate this saying.

调查问卷为何设计成白纸？"问兵心"背后有真心

来源：解放军报 作者：刘权达 责任编辑：王粲 2025-10-08

"问兵心"背后有真心

■第八十三集团军某旅某营干部 刘权达

"战友们，利用地形地物一定要注意以下几个细节……"前些天，旁听班长杨旭光讲解战术动作，我发现，他以前常说的"口头禅"消失了.

一次饭后闲聊，有的新兵向我反映，他们的班长抓训练管理时，说话不太注意，经常语出伤人.

我有些诧异，因为前段时间刚组织过官兵关系问卷调查，大家并无此类反映.

带着疑问，我来到一个连队座谈，排长宋文博率先发言：“调查问卷设置的都是选择题，难免挂一漏万，有些问题想反映，却无处填写. ”一级上士丁兴接过话茬：“军人家属临时来队住房里的部分电器出现故障，可调查问卷没有涉及相关内容. ”后来，营连再组织问卷调查，他索性每个选项都勾选“十分满意”.

“看来，问题出在调查问卷的设计上. ”会上，我与党委一班人商定，每月组织“一张白纸问兵心”活动，官兵想写什么就写什么，有什么意见反映什么意见，是否实名由本人自行决定. 营里负责梳理问题清单，营党委分工负责协调解决.

那天，当一张张空白的 A4 纸摆放在官兵面前时，大家先是感到惊奇，了解营党委的用意后，便认真地写了起来. 半小时过后，“问卷”纷纷交了上来. 上等兵李泽旭写道：“驻训点远离市区，官兵前往体系医院看病很不方便，建议安排专车保障. ”有人“吐槽”夜间巡逻站哨体力消耗较大，下哨后只能自备零食和泡面充饥. 有人匿名反映个别班长骨干缺乏耐心，说话常带难听的“口头禅”，还专门点了“杨旭光”的名……看着一个个贴近实情、冒着“热气”的问题和建议，再对比之前组织的问卷调查效果，我觉得营里这一招用对了.

问题摸得准，措施才能定得实. 统计就医需求，协调机关安排专车集中送诊；指导军人委员会征集伙食意见，开设“深夜食堂”；举办“我心目中的好班长”交流分享会，帮助班长骨干文明带兵、科学带兵、用情带兵……接下来那段时间，我和其他营领导格外忙碌，内心无比充实. 在此期间，我专门和杨旭光谈心，指出他的问题所在.

就这样，“一张白纸问兵心”活动，我们坚持了半年多，官兵们反映的问题逐渐减少. 我明显感到，大家心气更顺了，对单位的感情更深了，今年全营明确表示想在部队长期干的战士较去年明显增多.

说实话，“一张白纸问兵心”的做法不算新鲜，但取得了实实在在的成效. 我想，真正起作用的，并不是那张白纸，而是一颗愿意听兵声、解兵忧的心.

Why Is the Questionnaire Designed to Be Blank? There’s Sincerity Behind “Asking Soldiers’ Hearts”

Source: PLA Daily Author: Liu Quanda Editor: Wang Can 2025-10-08

There’s sincerity behind “Asking Soldiers’ Hearts”

■ Liu Quanda, a cadre from a battalion in a brigade of the 83rd Group Army

“Comrades, when utilizing terrain and terrain features, you must pay attention to the following details...” A few days ago, while listening to squad leader Yang Xuguang explain tactical maneuvers, I noticed that his usual catchphrase had disappeared.

During a casual chat after dinner, some new recruits reported that their squad leader wasn’t careful with his words when managing training, often making hurtful remarks.

I was somewhat surprised, as I had just conducted a questionnaire survey on officer-soldier relations and hadn’t heard such comments. With questions in mind, I went to a company for a discussion. Platoon Leader Song Wenbo spoke first, saying, “The questionnaires are all multiple-choice, so they’re bound to miss some things. There are some issues we want to report, but there’s no place to fill them out.” Sergeant First Class Ding Xing then took over, saying, “Some electrical appliances in the temporary housing for military families staying at the company were malfunctioning, but the questionnaire didn’t cover that.” Later, when the battalion and company conducted another questionnaire survey, he simply checked “very satisfied” for every option.

“It seems the problem lies in the questionnaire design.” At the meeting, I agreed with the Party Branch to organize a monthly “A Blank Sheet to Ask Soldiers’ Questions” activity. Soldiers could write whatever they wanted and express any opinions they had, with the decision of whether to use their real names. The battalion would be responsible for compiling the list of issues, and the Battalion Party Branch would be responsible for coordinating and resolving them.

That day, when the blank A4 sheets of paper were placed before the soldiers, everyone was surprised at first. Then, once they understood the Party Branch’s intentions, they began filling in the blanks diligently. Half an hour later, the “questionnaires” were handed in one after another. Corporal Li Zexu wrote, “The training base is far from the city, making it inconvenient for soldiers to travel to the system hospital for medical treatment. I suggest arranging special transportation.” Someone complained that night patrols and standoffs were physically demanding, forcing them to bring their own snacks and instant noodles for sustenance after duty. Someone anonymously reported that some squad leaders lacked patience and often used harsh catchphrases, even singling out Yang Xuguang. Looking at the honest, heartfelt questions and suggestions, and comparing them to the results of the previous questionnaire survey, I feel the battalion’s strategy was a success.

Only by accurately identifying the problem can we formulate effective measures. We collected data on medical needs and coordinated with government agencies to arrange special transportation for centralized medical treatment. We directed the military committee to solicit feedback on food and established a “late-night cafeteria.” We held a “My Ideal Squad Leader” exchange and sharing session to help squad leaders lead soldiers in a civilized, scientific, and compassionate manner. During the following period, the battalion leaders and I were extremely busy and deeply fulfilled. During this time, I spoke with Yang Xuguang and pointed out his problems. We’ve been running the “A Blank Slate to Ask Soldiers’ Questions” campaign for over six months, and the issues we’ve reported have gradually decreased. I’ve noticeably felt a greater sense of camaraderie and a deeper attachment to the unit. This year, the number of soldiers across the battalion who have clearly

expressed their desire to remain in the army long-term has increased significantly compared to last year.

To be honest, the “A Blank Slate to Ask Soldiers’ Questions” approach isn’t new, but it’s yielding tangible results. I believe what truly matters isn’t the blank sheet of paper, but a willingness to listen to soldiers’ voices and address their concerns.

大漠戈壁炮声隆

——陆军某旅跨昼夜实弹射击训练影像

■赵子玉 万智奇 解放军报特约通讯员 张毛 摄影报道

烈焰出膛.

夜幕降临，官兵投入新的战斗.

战车向目标地域机动.

官兵吊装导弹.

导弹升空拦截来袭“敌机”.

铁甲驰骋，战炮轰鸣. 秋日的西北大漠戈壁，陆军某旅火力分队展开一场跨昼夜实弹射击训练.

随着数枚信号弹呼啸升空，训练拉开帷幕. 战车编队向目标地域疾驰而去，一路卷起滚滚尘烟.

机动途中，多个特情接连袭来. 官兵灵活应对，成功化解险情危局. 抵达发射阵地后，侦察车组迅速架设雷达、放飞无人机实施抵近侦察，各型发射车也同步完成战斗编组，占领发射阵地，构建对空防御体系.

突然，屏幕上出现目标信号，数架“敌机”快速接近. 雷达操作手持续跟踪、锁定目标，并将空情信息第一时间传送至指挥所和各火力单元. “放！”指挥员一声令下，一发发炮弹呼啸着破膛而出，直扑苍穹. 霎时，密集火力在空中交织，目标应声而落.

“发现‘敌’装甲集群，按预定方案实施火力打击！”空中威胁刚解除，指挥所随即向炮兵分队下达作战命令. 官兵快速计算参数、装定诸元、装填弹药……“预备，放！”完成一轮集火射击后，火箭炮分队快速转移，榴炮分队则继续实施急促射击，补充打击残余目标.

夜幕降临，硝烟未散. 接到新的作战命令，官兵借助微光重新调整参数、修正诸元，向“敌”阵地发起新一轮火力打击……

Footage of an Army Brigade Conducting a Day-Night Live-Fire Exercise

Source: PLA Daily Author: Zhao Ziyu, Wan Zhiqi, Zhang Mao Editor: Xu Zhanhu 2025-10-09

Artillery Roars in the Desert

—Videos of an Army Brigade Conducting a Day-Night Live-Fire Exercise

■ Zhao Ziyu, Wan Zhiqi, PLA Daily Special Correspondent Zhang Mao, Photo Report

Flames burst forth from the barrels.

As night falls, soldiers engage in a new battle.

Tanks maneuver toward the target area.

Soldiers hoist missiles.

Missiles launch into the air to intercept incoming “enemy aircraft.”

Armored vehicles gallop, artillery roars. In the autumn deserts of northwest China, a firepower unit of an Army brigade conducts a day-night live-fire exercise.

The training begins with the roar of several signal flares. The tank formation speeds toward the target area, stirring up clouds of dust.

During the maneuver, multiple unexpected situations arise. Soldiers respond flexibly, successfully defusing dangerous situations. Upon arriving at the launch site, the reconnaissance vehicle crew quickly set up radar and launched drones for close-in reconnaissance. The various launch vehicles simultaneously completed combat formation, occupied the launch site, and established an air defense system.

Suddenly, a target signal appeared on the screen, revealing several “enemy aircraft” rapidly approaching. Radar operators continuously tracked and locked onto the targets, immediately transmitting air situation information to the command post and various firepower units. “Fire!”

The commander shouted, and shell after shell roared out of the barrel, soaring into the sky. Instantly, intense air fire intertwined, and the target fell.

“Enemy armored cluster detected, fire attack according to the planned plan!” As soon as the air threat was eliminated, the command post immediately issued the combat order to the artillery unit. The officers and men quickly calculated parameters, set parameters, and loaded ammunition... “Ready, fire!” After completing a round of concentrated fire, the rocket artillery unit quickly moved, while the howitzer unit continued with rapid fire to replenish the remaining targets.

Night fell, and the smoke of gunfire lingered. After receiving the new combat order, the officers and men used the dim light to readjust the parameters and correct the various factors, launching a new round of firepower strikes on the “enemy” positions...

第 72 集团军某旅运输连探索运用“三互”组训模式

来源：中国军网-解放军报 作者：刘华山 朱昊崟 张宸铭 责任编辑：乌铭琪

2025-10-09

第 72 集团军某旅运输连探索运用“三互”组训模式——

把集体锻造成“一块整钢”

■刘华山 朱昊崟 张宸铭

“全员及格”“优秀率大幅提升”……前不久，拿到最新一期驾驶专业考核成绩单，第 72 集团军某旅运输连朱指导员喜上眉梢. 这次考核，以往排名靠后的几个班进步幅度大，带动连队整体成绩提升.

“这充分证明，连队推出的‘三互’组训模式效果明显. ”朱指导员向笔者介绍，“三互”组训模式即“互点将、互示范、互讲评”，打破了以往集中资源组训的模式，实现训练资源共享，促进了集体进步.

此前有一次，旅队组织共同课目考评. 为取得好成绩，连队集中训练骨干组成“尖兵小组”，倾斜训练资源，试图打造样板、做好示范. 但一段时间下来，“尖兵小组”的示范带动效果非但不明显，还影响了整体成绩.

复盘剖析时，有班长坦言，骨干都抽走了，重难点课目组训人手根本不够，顾头顾不了尾；有战士反馈，骨干经常不在班里，大家的训练在低水平徘徊；也有新兵直言，高难度驾驶课目没有经验丰富的教练指导，心里有些犯怵……

“样板示范代替不了手把手指导，说到底还是没有发挥好训练尖子的辐射带动作用. ”认真听取官兵意见，朱指导员意识到了问题所在，“一花独放不是春，应该让训练尖子回到岗位发挥酵母作用，带动集体‘百花齐放’. ”

很快，该连党支部针对试点中暴露出的问题症结，研究决定探索“三互”组训模式：“互点将”，引导新驾驶员根据自身短板弱项在全连范围互相“点”师傅，让优质教学资源惠及各班；“互示范”，组织优秀驾驶员轮流到各班巡回示教，让先进经验集体共享；“互讲评”，训练中推行跨班排交叉观摩、集体会诊，在互评互学中发现问题、补短强能.

资源撒下去，“酵母”活起来. “三互”组训模式，激活了连队训练的“一池春水”.

训练场上，上等兵邱原正跟着“点”的师傅——高级驾驶员龙开峰，认真练习倒库移位. 龙开峰一边帮他校正方向盘，一边告诉他：“如今大家可以互相取长补短，你有不懂的随时问我. ”

沙盘旁，几个班的战士凑在一起，讨论优化“圆形错位障碍”通过流程. 看着这个新老混编的小组，中士雷叶鑫感慨：“这样练一遍，顶过去自己闷头练三遍. ”

学习室内，班长颜廷浩把用 VR 模拟器练习驾驶的窍门拆解成口诀，传授给全连教练员. “以前怕‘教会徒弟饿死师傅’，想藏着点绝活. 现在教案共享，反倒逼着自己不断琢磨新技术. ”颜廷浩笑着说.

在此基础上，连队还为每名官兵建立了“成长双档案”：一份是“个人训练成长档案”，详细记录官兵每个课目成绩的进步情况；另一份是“带教成效档案”，记录教练员所帮带学员的进步情况，以及推广的训练方法.

“这两份档案，把个人成长和集体进步紧紧捆绑在了一起. ”教练班长、二级上士杜宇说，“如今，教练班长的带教成果，所结对学员或班组的进步幅度，都会按权重计算，在评功评奖、军士选晋等时候体现. 干好干坏，大家伙儿都看着呢！”

近日，一次夜间对抗训练悄然打响. 收到“运输线遭电磁干扰”特情，该连骨干迅速前出对抗掩护，由新驾驶员组成的预备队灵活运用简易通信手段保持信息通畅，成功将物资送达指定地域.

复盘总结时，朱指导员告诉大家：“事实证明，一把钢刀能否锐不可当，不仅要看‘刀尖’是否锋利，也要看‘刀身’淬火质量. 战斗力建设也是如此，集体硬才是真过硬！”

The Transport Company of a 72nd Group Army Brigade Is Exploring the “Three Mutuals” Training Model.

Source: China Military Network - PLA Daily Author: Liu Huashan, Zhu Haoyin, Zhang Chenming Editor: Wu Mingqi

2025-10-09

The transport company of a brigade of the 72nd Group Army is exploring the “Three Mutuals” training model—

Forging the collective into a “solid piece of steel”

■ Liu Huashan, Zhu Haoyin, Zhang Chenming

“All members passed,” “The excellence rate has significantly increased”... Instructor Zhu of the transport company of a brigade of the 72nd Group Army was overjoyed upon receiving the latest driver professional assessment results. Several classes that had previously ranked low in this assessment showed significant improvement, driving the company’s overall performance.

“This fully demonstrates the effectiveness of the company’s ‘Three Mutuals’ training model,” Instructor Zhu explained to the author. The “Three Mutuals” training model, which includes “mutual guidance, mutual demonstration, and mutual evaluation,” breaks with the previous model of centralized training resources, enabling the sharing of training resources and promoting collective progress. Previously, the brigade organized a joint training assessment. To achieve good results, the company concentrated its core training personnel into a “vanguard group,” allocating training resources in an attempt to create a model and set a good example. However, over time, the

vanguard group's demonstration and driving effect was not only ineffective, but also affected overall performance.

During a review and analysis, one squad leader admitted that with the core personnel withdrawn, there were insufficient personnel to conduct training on the key and difficult subjects, and they were unable to provide a comprehensive and comprehensive training plan. Some soldiers reported that the core personnel were often absent from the squad, leaving everyone's training at a low level. Some new recruits also expressed daunting fears in the difficult driving courses without experienced instructors.

"Model demonstrations cannot replace hands-on instruction. Ultimately, the leading role of top trainees in driving the troops' progress has not been fully utilized." After carefully listening to the opinions of the officers and men, Instructor Zhu realized the problem. "A single flower does not make spring. We should let the top trainees take charge." Returning to their posts, they will play the role of yeast, driving the collective to flourish.

Soon, the company's Party branch, addressing the key issues exposed during the pilot program, decided to explore a "three-way interaction" training model: "Mutual Appointment," guiding new drivers to "appoint" each other as mentors throughout the company based on their weaknesses, allowing all classes to benefit from high-quality teaching resources; "Mutual Demonstration," organizing outstanding drivers to rotate through various classes for demonstrations, allowing for the collective sharing of advanced experience; and "Mutual Review," promoting cross-class observation and collective consultation during training, identifying problems and strengthening weaknesses through mutual evaluation and learning.

The resources were spread, and the "yeast" came to life. The "three-way interaction" training model has revitalized the company's training.

On the training ground, Corporal First Class Qiu Yuan was diligently practicing reverse parking maneuvers with his mentor, Senior Driver Long Kaifeng. While helping him adjust the steering wheel, Long Kaifeng told him, "Now we can learn from each other. If you have any questions, feel free to ask me."

Beside the sand table, soldiers from several squads gathered to discuss optimizing the process for clearing the "circular misaligned obstacle." Looking at this mixed group of veterans and newcomers, Sergeant Lei Yexin sighed, "Practice this once, and then you'll have to practice it three times on your own."

In the study room, Squad Leader Yan Tinghao broke down the tips for practicing driving with a VR simulator into mantras and passed them on to all the company's instructors. "I used to be afraid of 'teaching the apprentice and starving the master,' so I wanted to keep my unique skills hidden. Now that I share my lesson plans, it forces me to constantly hone my skills," Yan Tinghao said with a smile.

Additionally, the company has established “dual development files” for each officer and soldier: one is a “personal training growth file,” which details the soldier’s progress in each subject; the other is a “teaching effectiveness file,” which records the progress of the trainees the instructor has helped guide and the training methods they have promoted. “These two files tightly link individual growth and collective progress,” said Sergeant 2nd Class Du Yu, a drill squad leader. “Now, the squad leader’s teaching achievements and the progress of their paired students or teams will be weighted and reflected in merit and award evaluations, sergeant promotions, and other evaluations. Everyone is watching!”

Recently, a nighttime confrontation training exercise quietly commenced. Upon receiving a warning of electromagnetic interference on the transport line, the company’s core members quickly advanced to provide cover. A reserve team composed of new pilots flexibly utilized simple communications to maintain smooth communication and successfully delivered supplies to the designated area.

During the debriefing, Instructor Zhu told everyone, “Facts have proven that the unstoppable sharpness of a steel knife depends not only on the sharpness of the ‘tip’ but also on the quality of the quenching of the ‘blade’. The same is true for combat effectiveness. True strength lies in collective strength!”

第 78 集团军某旅探索推行年轻军官轮岗代职机制

来源：中国军网-解放军报 作者：孟璠玓 责任编辑：乌铭琪

2025-10-09

第 78 集团军某旅探索推行年轻军官轮岗代职机制——

岗前打基础 任职有底气

■解放军报特约通讯员 孟璠玓

“代理指导员工作筹划思路清、开展教育方法活，还积极帮助官兵解决实际困难，点赞！”日前，上任不久的第 78 集团军某旅警卫勤务连代理指导员蔡志丹，凭借过硬的综合素质，受到连队官兵好评.

“蔡志丹的成长进步，是旅队探索推行年轻军官轮岗代职机制，夯实任职能力基础取得的可喜成果.”该旅领导介绍，此前，他们在基层调研时发现，不少年轻排长、副连长、副指导员走上主官岗位后，虽工作热情高，但处理棘手问题时缺乏清晰思路和管用招法，既影响基层抓建质效，也容易挫伤个人工作积极性.

如何解决年轻干部适岗问题，为基层培养更多综合素质过硬的优秀带兵人？该旅党委结合单位特点和年轻干部任职需求研究决定，探索推行年轻干部轮岗代职机制，让工作能力强、发展潜力大的年轻干部经受更多岗位锻炼.

前期该旅部分连主官被推荐到院校参加晋升培训，不少主官岗位临时空缺. 该旅机关以此为契机，安排一批能力基础扎实、思想作风过硬的优秀排长、副连长、副指导员和机关干部到连主官岗位代职锻炼，并指定任职经验丰富的连主官、营主官跟进帮带，既丰富带兵经验、打牢任职基础，又通过轮岗代职检验年轻军官岗位适应能力，为下一步干部调整任用提供参考.

“感谢组织的信任和培养，让我经受了锻炼、收获了成长. ”该旅卫生连杨指导员任职前是战勤计划科的一名优秀参谋，机关经验丰富、业务素质过硬，一直渴望到连主官岗位锻炼. 年轻干部轮岗代职机制推开后，他第一时间报名并顺利通过选拔，成为卫生连代指导员.

代职之初，他面临兵情摸不准、融入官兵慢等难题，开展工作颇有压力. 但他没有气馁，主动向连长学习方法思路，深入班排开展谈心交心，能力素质稳步提升，很快打开了工作局面. 岗位代职没多久，他便被正式任命为卫生连指导员.

“基础不牢，地动山摇. 岗前打牢任职基础、夯实带兵能力，正式任职时才能得心应手、行稳致远. ”该旅领导介绍，他们在总结前期经验基础上，尝试将代职岗位从连主官向营主官延伸，取得可喜成效.

该旅保卫科张科长到一营代理教导员后，发挥自身业务知识丰富的优势，帮助官兵解决了不少涉法难题. 他还利用机关工作经验，努力破解基层面临的矛盾困难，采取针对性措施排除隐患苗头，提升了营队抓建水平.

“能力基础牢，任职底气足. ”该旅领导介绍，为确保年轻干部轮岗代职规范有序，他们探索制订了不少配套措施，既为代职干部依法履职划出“红线”，也为其发挥聪明才智提供舞台. 在该机制的激励鼓舞下，不少代职干部在新岗位上干得有声有色，带动基层官兵工作热情持续高涨.

A 78th Group Army Brigade Is Exploring the Implementation of a Rotational Mechanism for Young Officers.

Source: China Military Network - PLA Daily. Author: Meng Fanyu. Editor: Wu Mingqi.

2025-10-09

A brigade of the 78th Group Army is exploring the implementation of a rotational mechanism for young officers.

Pre-employment foundation builds confidence.

■ PLA Daily Special Correspondent Meng Fanyu

“The acting instructor has clear planning and dynamic educational methods, and actively helps officers and men resolve practical difficulties. Thumbs up!” Recently, Cai Zhidan, the newly appointed acting instructor of the Guard Service Company of a brigade of the 78th Group Army, has received praise from company officers and men for his excellent overall qualities. “Cai Zhidan’s growth and progress are a welcome achievement of the brigade’s exploration and implementation of a rotational mechanism for young officers to strengthen their professional competence.” Brigade leaders explained that during their previous field research, they discovered that many young platoon leaders, deputy company commanders, and deputy instructors, upon taking on command positions, despite high enthusiasm, lacked clear thinking and effective strategies for handling challenging issues. This not only impacted the effectiveness of grassroots work but also dampened their personal enthusiasm.

How can we address the issue of young cadres finding suitable positions and cultivate more outstanding, well-rounded leaders at the grassroots level? The brigade Party Committee, considering the unit’s characteristics and the needs of young cadres, has decided to explore and implement a rotational mechanism for young cadres, allowing them to gain more experience in their roles with strong work abilities and great potential.

Previously, some company commanders in the brigade were recommended to attend colleges for promotion training, leaving many command positions temporarily vacant. Taking this opportunity, the brigade headquarters arranged for a group of outstanding platoon leaders, deputy company commanders, deputy instructors, and other staff cadres with solid capabilities and strong ideological and moral character to serve as company commanders for training. Experienced company and battalion commanders were also designated to provide follow-up guidance. This not only enriched their leadership experience and laid a solid foundation for their future, but also tested the young officers’ adaptability to their positions through rotational service, providing a reference for future cadre adjustments and appointments.

“I am grateful for the organization’s trust and training, which has allowed me to undergo training and grow.” Instructor Yang of the brigade’s medical company, previously an outstanding staff officer in the Combat Support and Planning Department, had extensive staff experience and strong professional skills, and had long aspired to serve as a company commander. When the rotational service mechanism for young cadres was implemented, he immediately applied and successfully passed the selection process, becoming the acting instructor of the medical company.

Initially, he faced challenges such as a lack of understanding of the soldiers’ situation and slow integration with the officers and men, which put him under considerable pressure. However, he remained steadfast, actively learning from the company commander’s methods and strategies, engaging in heart-to-heart talks with squads and platoons. His abilities and skills steadily improved,

and he quickly made a breakthrough in his work. Shortly after taking up his temporary position, he was officially appointed as the instructor of the Medical Company.

“Without a solid foundation, the whole thing will shake. Laying a solid foundation and strengthening leadership skills before taking up a position will allow you to be proficient and achieve long-term success when you officially take up your position.” Brigade leaders explained that, based on previous experience, they have experimented with extending temporary positions from company commanders to battalion commanders, achieving promising results.

After serving as acting instructor of the First Battalion, Section Chief Zhang of the Brigade’s Security Department leveraged his extensive professional knowledge to help officers and men resolve numerous legal challenges. He also leveraged his experience working in the military to resolve conflicts and difficulties faced by grassroots units, implementing targeted measures to eliminate potential risks and enhance the battalion’s overall leadership.

“With a solid foundation of capabilities, you have the confidence to take on your new position.” Brigade leaders explained that to ensure the standardized and orderly rotation of young cadres, they have explored and implemented a number of supporting measures, setting a “red line” for temporary officers to perform their duties in accordance with the law while also providing a platform for them to fully demonstrate their talents. Inspired by this mechanism, many temporary officers have performed effectively in their new positions, boosting the enthusiasm of grassroots officers and men.

军报记者寻根行丨踏访抗战红色场馆，感悟我军政治工作服务打仗的优良传统

来源：解放军报 作者：钱晓虎 郭丰宽 责任编辑：徐占虎 2025-10-10

记者踏访抗战红色场馆，感悟我军政治工作服务打仗的优良传统——

让“生命线”焕发蓬勃生机

■解放军报记者 钱晓虎 郭丰宽

“平型关大战突击连”正在进行战术训练. 戴胜丰摄

金秋的华北大地，层林尽染.

走进平型关大捷纪念馆，一份 1937 年 9 月 29 日的《新中华报》，一版头条格外醒目：《在抗日战争中——八路军开始第一个大胜利》.

一个巨大的问号，悬挂在太行山上：国民党军队丧师失地，接连失利，装备落后、补给匮乏的八路军为何能出师首战即告捷，打破日军“不可战胜”的神话？

答案，就藏在贯穿我军抗战历史的政治工作里——设立军政委员会统揽全局，恢复政委编制筑牢组织根基，到田间地头动员军民保家卫国，战壕里宣讲“打胜仗、救中国”……

1944 年，毛泽东同志在修改《关于军队政治工作问题的报告》时，写下一段重要论述，“共产党领导的革命的政治工作是革命军队的生命线”.

如今，踏访座座抗战红色场馆，我们更能看清：那些在血与火中沉淀的我军政治工作服务打仗的优良传统，正是这条“生命线”的蓬勃生机所在.

从“豆腐也要当铁打”，到“弯弓射日到江南”——

“一切政治工作，都是为了前线的胜利”

乔沟，平型关大战主战场，红叶映着残垣.

“就是在这里，八路军靠着‘豆腐也要当铁打’的信念，打垮了日军精锐.”平型关大捷纪念馆文史研究部主任毛春桃说.

“‘豆腐也要当铁打’，说的是我们八路军自知装备、保障条件远不如日军. 在这种情况下作战，取胜难度很大，既要集中优势兵力作战，更要有打败敌人的钢铁意志.”毛春桃介绍，大战前，有的官兵受国民党军队接连战败的影响，信心不足. 八路军各团政训处主任立即率领各级政治干部下沉一线，激励士气.

有个指导员叫杨俊生，战斗中左臂被刺刀刺穿、鲜血直流，但仍死死抱住一名日军军官. 战斗结束，他所在连队被授予“平型关大战突击连”荣誉称号.

“还有什么比保家卫国的事情，更能让一群热血青年为之奉献一切？”战后杨俊生回忆，看到敌人就想起战前动员时团长讲的“赶跑侵略者，为父老乡亲报仇”这句话，不把“豆腐当铁打”都不行！

为谁当兵？为谁打仗？为谁流血？为谁牺牲？这就是战火中的政治工作者首先要告诉战士的问题.

“抗战期间，国民政府停发了八路军的军饷，为什么缺衣少粮的八路军却始终没有像国民党军队那样拉夫征粮、盘剥百姓，铁打的军纪丝毫没有松懈？”寻访昔日战场，这个问号其实早有答案——

早在 1929 年 12 月，毛泽东同志在《关于纠正党内的错误思想》一文中，就专门点明：单纯军事观点的一个来源是“政治水平低”. 他说，红军和白军根本不同，就在于红军把党的政治工作放在极端重要的位置.

“弯弓射日到江南，终夜喧呼敌胆寒. ”这是陈毅元帅的诗句. 当太行山上烽火燃烧的时候，远在江淮的新四军里，也活跃着政治工作者的身影.

1939 年 1 月 18 日凌晨，新四军二支队三团在粟裕带领下，冒雨迂回行进 25 公里，对安徽芜湖官陡门的日伪军据点实施远程奔袭作战. 雨夜中，文艺战士、宣传队员一边踏着泥泞行军，一边鼓动战士们奋勇前进. 21 日凌晨 4 时，部队发起进攻，全程仅 20 分钟，就大获全胜.

我军的高昂士气和强大向心力、凝聚力来自哪里？美国军官卡尔逊在访问山西八路军驻地时认为，“政治工作是八路军军事行动获胜的最重要因素”.

同时，敌人也看到了这支中国军队的不同寻常. 日本战史记载，1940 年日军的肃正工作强调“方面军的讨伐重点，必须全面指向共军”. 由此可见，日军对八路军、新四军的重视与忌惮. 记者查阅资料发现，1941 年 3 月，日军至少有 75.4%的兵力用来与八路军、新四军作战. 我党领导的革命抗日武装力量，仅全面抗战期间，就歼灭日伪军 171.4 万余人.

“重回乔沟，寻访老家. ”今年夏天，陆军某旅“平型关大战突击连”在政治整训中，派出官兵代表来到平型关大捷纪念馆寻根.

与此同时，千里之外的大阅兵训练场上，连队的战旗正飘扬在受阅部队的战旗方阵中.

“一切政治工作，都是为了前线的胜利. 战争年代，我军政治工作在血与火的淬炼中积淀形成了‘围绕中心、服务大局’的优良传统. ”连队第 47 任指导员栗新朝告诉记者，和平时期，政治工作容易出现游离中心、脱离实际、远离战场的现象. 这面火红的战旗永远启示我们，我军政治工作因战而生、因战而兴，强军新征程上，一定要发挥“生命线”这个根本优势.

从“留田突围无声的战斗”，到“两个行家里手”——

“上马能杀敌、下马能做思想工作”

沂蒙山的秋天，飞瀑流泉，松柏苍翠.

在这里，记者听到一首当年流传在山东抗日根据地的歌谣：“展开游击战争，打到敌人后方，拆桥破路，攻城夺粮……”

这首歌谣，形象描述了抗战期间 115 师政委罗荣桓指挥的“留田突围”战术特点.

“1941 年 11 月初，日军对沂蒙山区留田村抗日根据地展开‘大扫荡’，罗荣桓以独创的‘翻边战术’，率领 3000 多人跳出 30000 多敌人的包围圈，一举粉碎日军的‘清乡’‘蚕食’行动. ”沂蒙革命纪念馆讲解员刘国栋介绍说，“留田突围”展现了罗荣桓作为一名政治干部出色的军事才能.

随军记者、德国人汉斯·希伯也在当年的突围队伍中. 后来，他在《无声的战斗》一文中写道：“这次突围，未费一枪一弹，未损一兵一卒，便安全跳出敌人的重重包围. 八路军罗荣桓政委指挥的这场无声的战斗，必将成为抗战史上的典型范例，名扬天下……”

“上马能杀敌、下马能做思想工作. ”这是战争年代我军政治干部的共同特点.

1933 年，萧华担任“少共国际师”政委，带领部队反“围剿”. 1938 年，萧华任八路军东进抗日挺进纵队司令员兼政委，带领部队反“扫荡”. 毛泽东曾风趣地对萧华说：“你一时司令，一时政委，一时山东，一时东北，出息好大呦！”

这句赞扬萧华的话，在毛泽东心中沉淀成一条规律. 1964 年 5 月，毛泽东在向外宾介绍中国革命战争胜利经验时说：“只有会做政治工作的人才会打仗，不懂政治的人就不会打仗. ”

“提前送水到阵地. ”平型关大捷纪念馆，一张 115 师作战地图上写着这样 7 个字. “这是聂荣臻同志的笔迹，当时他是副师长，同时负责政治工作. ”讲解员介绍，平型关大战从清晨持续到下午，聂荣臻因为懂作战，才能想到水在战斗中的重要性，他提出的一系列建议为胜利提供了有力支撑.

“抗战中，我军政治干部贡献的不仅仅是智慧和才华，还有鲜血和生命. ”讲解员的话将记者的思绪再次引向江南烽火——

1939 年 3 月 7 日，新四军第一支队二团 22 岁的政治处主任萧国生，亲率一个连掩护主力突围，光荣牺牲. 时任第一支队司令员陈毅在《追悼模范政工人员萧国生》一文中指出：“萧国生不愧为抗战中政工人员的模范. ”

“我军从小到大、从弱到强，政治工作与军事行动始终深度融合，军政分工不分家. ”国防大学政治学院教授刘轶告诉记者，“新修订的《军队政治工作条例》，对政治干部实施组织指挥、提高军事素质、成为政治工作和军事工作‘两个行家里手’提出明确要求. ”

“习主席强调指出，政治干部要努力学军事、学指挥、学科技，全面提高综合素质和实际能力，政治工作要成为行家里手，军事工作也要成为行家里手，这样才能把政治工作做好. ”刘轶说，今天，我们持续深化政治整训，强调政治工作不要偏离中心，就是恢复和弘扬我军的光荣传统，使政治工作的准星聚焦战斗力靶心，永葆政治工作“为战生威”的强大优势.

从“战地识字牌”到“战地政工 APP”——

“越聚焦中心研究打仗，政治工作的招法越多”

前不久，某部官兵到八路军太行纪念馆参观. 官兵的平板电脑上，有一个“战地政工 APP”. 一名班长向记者介绍：“‘战地政工 APP’可以在线学习、交流思想. ”

看着官兵手里的平板电脑，记者不禁想起八路军战士使用的“战地识字牌”.

“当时，官兵天天行军打仗，学习时间少，加上大多数人没接受过教育，政治干部讲的很多道理，他们听不明白. ”八路军太行纪念馆讲解员连小敏介绍说，针对这种情况，政治干部们想出了一个好主意——行军时让每个战士背一块“识字牌”，上面写着“打倒日本帝国主义”“万众一心灭日寇”等字样. 后面的战友一边走路，一边学习，“既扫了盲，又宣传了思想”.

从“战地识字牌”到“战地政工 APP”，两块“板”跨越时空，但政治工作“向战而行”的初心没有变. 连小敏感慨地说，我军的政治工作从不“死板僵化”，总是充满新意——

“政治工作跟着游击战走”. 沂蒙山区，面对日军“清乡”“蚕食”行动，罗荣桓组织“武装宣传队”深入敌占区，用群众听得懂的方言快板宣传抗日，动员了 20 万群众参军. 为瓦解争取伪军，采用点“红黑点”、记“善恶录”的办法和“唤子索夫”运动，开展“身在曹营心在汉”宣传，仅在 1943 年就瓦解伪军 7000 余人.

“囚笼锁不住捷报”. 百团大战期间，八路军政治部为粉碎日军“铁路为柱、公路为链、碉堡为锁”的“囚笼政策”，创新推出“战地快报”，通过前线记者实时传回的战报，在阵地上办起“流动宣传栏”，将一线战况实时告诉全体官兵，极大提振了士气.

“保证每一颗子弹都瞄准敌人”. 时任八路军第 120 师政治部主任甘泗淇回忆，八路军创新总结出“运动战中的政治动员”“游击战中的群众工作”“攻坚战中的党员突击队”等差异化方法. 面对文化水平低的战士，他们把战术要领编进山歌，让战士们耳熟能详，一听就懂.

“老前辈的做法告诉我们，越聚焦中心研究打仗，政治工作的招法越多. ”记者来到“平型关大战突击连”采访，栗新朝带领记者体验连队开发的“平型关精神 VR 体验系统”：戴上眼镜，就能“穿越”到 1937 年的乔沟战场，感受当年战士们“猛打猛攻”的英勇作战场景.

“新兵上课，先体验 VR，比课堂讲授更有感染力. ”栗新朝介绍说，为保证政治工作跟着任务走、贴着实战做，连队还开发了“打赢微课堂”小程序，战士们可利用训练间隙学习战术技巧、交流心得，深受大家欢迎.

前不久，第 73 集团军某旅“强军精武红四连”官兵来到信阳市商城县伏山乡七里山村，开展“红色寻根”活动. 这里，是八路军第 129 师 769 团三营营长赵崇德烈士的故乡.

这个连的前身，就是英名赫赫的“夜袭阳明堡战斗模范连”. 连队干部党伟滔告诉记者，这些年，营区训练时，他们把教育课堂设在荣誉室内，引导官兵重温先辈战斗故事；奔赴演训场前，他们隆重举行誓师动员仪式，开展挑应战、表决心等活动；演训任务间隙，他们组织训法辩论赛、强军故事会……连队出色完成一次次大项任务.

党伟滔说：“老营长一直没有离开我们，‘攻必克、战必胜，不畏难、不畏险’的战斗精神，在连队代代传承！”

（采访得到苗鹏、王立军、李建国、梁鑫、刘泽宏大力支持）

记者手记

为战而生 向战而行

枪炮声在哪里响起，政治工作就要到哪里去. 翻开我军战史，政治工作者的脚步始终向着战火硝烟奔跑，“为战而生、向战而行”的初心在每一场胜仗中熠熠生辉.

前辈们用鲜血和生命创造的优良传统启示我们，政治工作决不能陷入“自我循环”怪圈，绝不能脱离备战打仗的中心任务搞“自我设计”，决不能远离官兵火热的战斗生活做“表面文章”. 必须切实把政治工作贯穿战斗力建设各个环节，融入军事斗争准备全过程，进一步提升政治工作服务备战打赢效能. 只有这样，我军的“生命线”才能真正焕发生命力，政治工作的威力才能充分发挥出来.

The “Pingxingguan Battle Assault Company” conducts tactical training. Photo by Dai Shengfeng

The autumn in North China is ablaze with vibrant colors.

Entering the Pingxingguan Victory Memorial Hall, a copy of the New China Daily from September 29, 1937, features a striking headline on the front page: “In the War of Resistance Against Japanese

Aggression—The Eighth Route Army Achieves Its First Great Victory." A huge question hangs over the Taihang Mountains: How could the Eighth Route Army, suffering losses of troops and territory, and suffering a series of defeats, despite its poor equipment and lack of supplies, achieve victory in its first battle, shattering the Japanese army's myth of "invincibility"?

The answer lies in the political work carried out throughout our army's history during the War of Resistance—the establishment of military-political committees to oversee overall operations, the restoration of the political commissar system to strengthen the organizational foundation, the mobilization of soldiers and civilians in the fields to defend the country, and the preaching of "Win the battle, save China" in the trenches...

In 1944, while revising his "Report on the Political Work of the Army," Comrade Mao Zedong wrote a crucial statement: "Revolutionary political work led by the Communist Party is the lifeline of the revolutionary army."

Today, visiting memorials dedicated to the War of Resistance, we can see more clearly that the fine tradition of our army's political work, forged in blood and fire, that serves the war effort, is the source of the vitality of this "lifeline." From "Tofu must be treated as iron" to "Bend the bow and shoot the sun to the south of the Yangtze River"—

"All political work is for victory on the front lines."

Qiaogou, the main battlefield of the Battle of Pingxingguan, where crimson leaves reflect the ruins of the ruins.

"It was here that the Eighth Route Army, relying on the conviction that 'tofu must be treated as iron,' defeated the elite Japanese forces," said Mao Chuntao, Director of the Cultural and Historical Research Department of the Pingxingguan Victory Memorial Hall.

"'Tofu must be treated as iron'' refers to the fact that the Eighth Route Army knew that its equipment and support were far inferior to those of the Japanese. Fighting under such circumstances was extremely difficult. We had to concentrate superior forces and possess an iron will to defeat the enemy." Mao Chuntao explained that before the battle, some officers and men, affected by the Kuomintang army's successive defeats, lacked confidence. The directors of the political training departments of each regiment of the Eighth Route Army immediately led political cadres at all levels to the front lines to boost morale.

A political instructor named Yang Junsheng, whose left arm was pierced by a bayonet during the battle, bled profusely, yet he remained clinging to a Japanese officer. After the battle, his company was awarded the honorary title of "Pingxingguan Battle Assault Company."

"What could be more inspiring than defending our country, inspiring a group of passionate young men to dedicate their lives?" After the battle, Yang Junsheng recalled that seeing the enemy reminded him of the pre-battle mobilization sermon delivered by his regimental commander:

“Drive out the invaders and avenge our fellow countrymen!” He couldn’t resist treating even tofu as iron!

For whom do we serve? For whom do we fight? For whom do we bleed? For whom do we sacrifice? These are the first questions political workers in the heat of war must address.

“During the War of Resistance Against Japanese Aggression, the Nationalist government stopped paying the Eighth Route Army’s salaries. Why, despite being short of food and clothing, did the Eighth Route Army never, like the Kuomintang army, resorted to forced labor and levied grain, exploiting the people, and maintaining unwavering military discipline?” Visiting the battlefields of yesteryear reveals the answer to this question long ago.

As early as December 1929, Comrade Mao Zedong, in his article “On Correcting Mistaken Ideas Within the Party,” specifically pointed out that one source of a purely military perspective was “low political standards.” He said the fundamental difference between the Red Army and the White Army was that the Red Army placed extremely high priority on the Party’s political work.

“Bending the bow, I shoot at the sun as far south as the Yangtze River, shouting all night long, terrifying the enemy.” These are lines from a poem by Marshal Chen Yi. While beacons burned in the Taihang Mountains, political workers were also active in the New Fourth Army, far away in the Yangtze and Huaihe River regions.

In the early morning of January 18, 1939, the Third Regiment of the Second Detachment of the New Fourth Army, led by Su Yu, braved the rain and marched 25 kilometers in a circuitous route, launching a long-range assault on the Japanese and puppet army stronghold at Guandoumen in Wuhu, Anhui. During the rainy night, artists and propaganda team members marched through the mud, encouraging the soldiers to advance bravely. At 4 a.m. on the 21st, the troops launched their attack, which took only 20 minutes and resulted in a resounding victory.

Where did our army’s high morale, strong centripetal force, and cohesion come from? During a visit to the Eighth Route Army’s headquarters in Shanxi, American officer Carlson believed that “political work was the most important factor in the Eighth Route Army’s success in military operations.” At the same time, the enemy also saw the extraordinary nature of this Chinese army. Japanese military history records that the Japanese military’s rectification efforts in 1940 emphasized that “the focus of the front army’s attack must be fully directed against the Communist army.” This demonstrates the Japanese army’s importance and fear of the Eighth Route Army and the New Fourth Army. A reporter’s research revealed that in March 1941, at least 75.4% of the Japanese army was deployed in combat against the Eighth Route Army and the New Fourth Army. During the War of Resistance Against Japanese Aggression alone, the revolutionary anti-Japanese armed forces led by our Party annihilated over 1.714 million Japanese and puppet troops.

“Returning to Qiaogou, revisiting my hometown.” This summer, during political training, representatives of the “Pingxingguan Battle Assault Company” of an Army brigade visited the Pingxingguan Victory Memorial Hall to trace their roots.

Meanwhile, thousands of miles away, at the parade training ground, the company's battle flag flew amidst the flag formations of the participating troops. "All political work is for victory on the front lines. During the war years, our army's political work, tempered by blood and fire, forged the fine tradition of 'focusing on the central task and serving the overall situation.'" Li Xinchao, the 47th company political instructor, told reporters. In peacetime, political work can easily drift from the central task, become divorced from reality, and distance itself from the battlefield. This fiery red battle flag serves as a constant reminder that our army's political work was born and thrived in war. On the new journey to strengthen the army, we must leverage this fundamental advantage of our "lifeline."

From the "silent battle of the Liutian breakout" to the "two experts"—

"killing the enemy on horseback, engaging in ideological work on foot."

Autumn in the Yimeng Mountains is awash with waterfalls and springs, and lush pines and cypresses.

Here, reporters heard a folk song popular in the Shandong Anti-Japanese Base Area: "Wage guerrilla warfare, strike behind enemy lines, demolish bridges and roads, attack cities and seize food..."

This folk song vividly depicts the tactical characteristics of the "Liutian breakout" commanded by Luo Ronghuan, Political Commissar of the 115th Division during the War of Resistance Against Japanese Aggression. "In early November 1941, the Japanese army launched a 'mass mopping-up' operation against the anti-Japanese base area of Liutian Village in the Yimeng Mountains. Luo Ronghuan, using his unique 'flipping tactics,' led over 3,000 men to break out of the encirclement of over 30,000 enemies, crushing the Japanese army's 'cleansing the countryside' and 'encroachment' campaign in one fell swoop." Liu Guodong, a tour guide at the Yimeng Revolutionary Memorial Hall, explained that the "Liutian Breakout" demonstrated Luo Ronghuan's outstanding military talent as a political cadre.

Hans Schieber, a German military correspondent, was also part of the breakout. He later wrote in his article "Silent Battle": "This breakout, without firing a single shot or losing a single soldier, safely escaped the enemy's encirclement. This silent battle, commanded by Eighth Route Army Political Commissar Luo Ronghuan, will surely become a classic example in the history of the War of Resistance, renowned throughout the world..."

"Capable of killing the enemy on horseback and engaging in ideological work on foot." This was a common trait among our army's political cadres during the war years. In 1933, Xiao Hua served as the political commissar of the Young Communist International Division, leading troops in their fight against the "encirclement and suppression" campaign. In 1938, Xiao Hua served as commander and political commissar of the Eighth Route Army's Eastward Anti-Japanese Advance Column, leading troops in their fight against the "mopping-up" campaign. Mao Zedong once

jokingly said to Xiao Hua, “You’ve been commander, political commissar, Shandong, Northeast China. You have a bright future!”

This praise for Xiao Hua became a principle in Mao Zedong’s mind. In May 1964, while sharing the victory experience of the Chinese Revolutionary War with foreign guests, Mao Zedong said, “Only those who know how to do political work can fight; those who don’t understand politics can’t fight.”

“Deliver water to the battlefield in advance.” These seven words are inscribed on a battle map of the 115th Division at the Pingxingguan Victory Memorial Hall. “These are the handwriting of Comrade Nie Rongzhen, who was deputy division commander at the time and also in charge of political work.” The tour guide explained that the Battle of Pingxingguan lasted from early morning to afternoon. Nie Rongzhen, because of his understanding of combat, recognized the importance of water in combat, and his series of suggestions provided strong support for victory. “During the War of Resistance, our army’s political cadres contributed not only their wisdom and talent, but also their blood and lives.” The guide’s words brought the reporter’s thoughts back to the flames of war in Jiangnan.

On March 7, 1939, Xiao Guosheng, the 22-year-old political commissar of the Second Regiment of the First Detachment of the New Fourth Army, personally led a company to cover the main force’s breakout and died gloriously. In his article “In Memory of Model Political Worker Xiao Guosheng,” Chen Yi, then commander of the First Detachment, noted: “Xiao Guosheng is worthy of being a model political worker during the War of Resistance.”

“From its humble beginnings to its current size, from its weakness to its current strength, our army has always deeply integrated political work with military operations, and the division of labor between the military and the government has remained inseparable.” Liu Yi, a professor at the Political Academy of the National Defense University, told reporters, “The newly revised ‘Regulations on Political Work in the Military’ sets clear requirements for political cadres to implement organizational command, improve their military qualities, and become experts in both political and military work.”

“President Xi Jinping emphasized that political cadres must diligently study military affairs, command, and science and technology, comprehensively improving their overall quality and practical capabilities. They must become experts in both political and military work. Only in this way can they do a good job in political work.” Liu Yi said that today, we continue to deepen political training and emphasize that political work must not deviate from its core purpose. This is to restore and carry forward the glorious traditions of our army, keep the crosshairs of political work focused on the bull’s-eye of combat effectiveness, and forever maintain the powerful advantage of political work in “creating power for war.” From “Battlefield Literacy Cards” to “Battlefield Political Work Apps”—

“The more focused we are on studying warfare, the more strategies we have for political work.”

Not long ago, soldiers from a certain unit visited the Eighth Route Army Taihang Memorial Hall. Each soldier's tablet computer contained a "Battlefield Political Work App." A squad leader explained to reporters, "The 'Battlefield Political Work App' allows for online learning and exchange of ideas."

Looking at the tablet computers in the soldiers' hands, the reporter couldn't help but think of the "Battlefield Literacy Cards" used by Eighth Route Army soldiers.

"At the time, soldiers were on the march and fighting every day, leaving little time for study. Furthermore, most were uneducated, so they couldn't understand many of the principles explained by the political cadres." Lian Xiaomin, a tour guide at the Eighth Route Army Taihang Memorial Hall, explained that to address this situation, the political cadres came up with a brilliant idea: to have each soldier carry a "literacy card" during the march, inscribed with slogans like "Down with Japanese Imperialism" and "Unite as One to Destroy the Japanese Invaders." The soldiers behind them would study as they marched, "both improving their literacy and promoting their ideology." From "Battlefield Literacy Cards" to the "Battlefield Political Work App," these two "boards" have transcended time and space, but the original aspiration of political work—"to march toward war"—remains unchanged. Lian Xiaomin remarked with emotion that our army's political work has never been "rigid and inflexible," always full of innovation—"political work follows guerrilla warfare." In the Yimeng Mountains, facing the Japanese army's "cleansing the countryside" and "encroachment" campaigns, Luo Ronghuan organized "armed propaganda teams" deep into enemy-occupied areas, using dialectal rap to promote anti-Japanese resistance and mobilized 200,000 people to join the army. To disintegrate and win over the puppet troops, they employed methods like "red and black dots," "records of good and evil," and the "calling sons and asking husbands" campaign, promoting the "body in Cao's camp, heart in Han" propaganda. In 1943 alone, they disintegrated over 7,000 puppet troops.

"A cage cannot contain victory news." During the Hundred Regiments Campaign, the Eighth Route Army's Political Department, in an effort to shatter the Japanese "cage policy" of "railways as pillars, roads as chains, and blockhouses as locks," innovatively launched the "Battlefield Express." Using real-time battle reports from frontline reporters, they set up "mobile bulletin boards" on the battlefields, providing real-time updates on the battle situation to all officers and men, greatly boosting morale.

"Ensure every bullet is aimed at the enemy." Gan Siqi, then Director of the Political Department of the 120th Division of the Eighth Route Army, recalled that the Eighth Route Army innovatively developed differentiated methods such as "political mobilization in mobile warfare," "mass work in guerrilla warfare," and "Party member assault teams in key offensives." To address the less educated soldiers, they incorporated tactical essentials into folk songs, making them familiar and readily understood. "The practices of our predecessors tell us that the more we focus on the core of warfare, the more strategies we will have for political work." Reporters visited the "Pingxingguan Battle Assault Company," where Li Xinchao led them through the company's

“Pingxingguan Spirit VR Experience System.” By donning the glasses, they can “travel back” to the Qiaogou battlefield of 1937 and experience the heroic battles of the soldiers.

“New recruits are encouraged to experience VR first before class; it’s more engaging than classroom lectures.” Li Xinchao explained that to ensure political work aligns with missions and actual combat, the company has developed a “Winning Micro-Classroom” app, allowing soldiers to learn tactical skills and exchange experiences during breaks in training. This app has been very popular.

Not long ago, soldiers from the “Strengthening the Army and Improving Military Skills Red Fourth Company” of a brigade of the 73rd Group Army visited Qilishan Village, Fushan Township, Shangcheng County, Xinyang City, to conduct a “Red Roots-Seeking” activity. This is the hometown of martyr Zhao Chongde, commander of the 3rd Battalion, 769th Regiment, 129th Division of the Eighth Route Army. This company’s predecessor is the renowned “Model Company for the Night Raid on Yangmingbao.” Company officer Dang Weitao told reporters that over the years, during training at the barracks, they have held educational sessions in the Honor Room, guiding officers and men to recall the battle stories of their predecessors. Before heading to the training grounds, they hold solemn mobilization ceremonies and conduct activities such as challenging and expressing determination. Between training missions, they organize debates on training methods and storytelling sessions on strengthening the military. The company has successfully completed major tasks one after another.

Dang Weitao said, “The old battalion commander has never left us. His fighting spirit of ‘attack and conquer, fight and win, fear no difficulty or danger’ has been passed down from generation to generation in the company!”

(Interview with the generous support of Miao Peng, Wang Lijun, Li Jianguo, Liang Xin, and Liu Zehong)

Reporter’s Notes

Born for war, marching towards war

Wherever the sound of gunfire is heard, there political work must be carried out. Looking back at our military’s history, political workers have always marched toward the flames of war. Their original aspiration, “Born for war, marching toward war,” shines brightly in every victory.

The fine traditions forged by our predecessors with their blood and lives remind us that political work must never fall into a vicious cycle of self-inflicted failure, must not engage in self-design divorced from the central task of preparing for war, and must not engage in superficial work detached from the intense combat life of officers and men. Political work must be truly integrated into every aspect of combat effectiveness building and the entire process of military combat preparation, further enhancing its effectiveness in supporting combat readiness and victory. Only

in this way can our military's "lifeline" truly be revitalized and the full power of political work be fully unleashed.

第七十四集团军某旅改进评比表彰机制强化荣誉激励作用

来源：中国军网-解放军报 作者：赵泽伦 邓联军 责任编辑：乌铭琪

2025-10-11

第七十四集团军某旅改进评比表彰机制强化荣誉激励作用——

平时奋勇争先 评时底气充足

■赵泽伦 解放军报特约记者 邓联军

日前，第 74 集团军某旅组织第三季度评比表彰大会，一批任务完成出色、工作实绩突出的官兵和先进单位受到表彰.

"没想到，我们长期隐居幕后，也有机会登上领奖台，得到大家的认可. "谈及近期取得的成绩，受到表彰的二级上士詹浩难掩激动.

"大力开展评比表彰活动，旨在发挥'以评促建'导向作用，更好激励官兵立足岗位、建功军营. "该旅领导介绍，他们结合单位工作实际和官兵思想特点，探索优化评比表彰实施办法，通过"奖当其人、奖当其绩、奖当其时"的一系列务实举措，牢固立起"干在平时、比在平时、争在平时"鲜明导向.

谈及优化评比表彰实施办法的初衷，该旅组织科干事钟锐给记者展示了一份季度评比表彰材料清单.

此前，每到阶段性评比表彰展开前，钟锐就得对照清单与各业务部门人员一起核对数据、汇总材料. 因涉及项目多、准备周期长，一定程度上影响了其他工作进度.

有同感的，还有该旅某连文书张嘉源. 每次准备评比材料，张嘉源总是忙得团团转，既怕准备不到位影响单位成绩，又怕占用过多时间耽误其他工作.

原本旨在激发官兵创先争优动力、促进基层全面建设的评比表彰活动，为何导致"基层忙、机关累"？该旅机关针对这一问题深入展开调研，有的官兵表示，评比表彰材料清单涉及的项目事无巨细、面面俱到，统计汇总费时费力；一些官兵认为，机关工作组搜集评比材料时，习惯把工作重点放在查找问题上，导致基层单位只愿"保底"不愿"出彩"……

深入分析官兵意见建议，该旅领导经过反复研讨达成共识，确定了改进方向：探索优化评比表彰实施办法，改进评比表彰工作机制，充分发挥表彰奖励的正向激励作用.

此后，该旅探索建立“营连自评—机关分评—党委审定”工作流程，给予基层单位“自我评价权”，自下而上梳理经验、盘点成绩，鼓励基层官兵广泛参与，推动评比表彰工作与基层全面建设有机结合、互促共进.

“这次评比，我们营能排名靠前，得益于评比表彰实施办法的优化改进. ”该旅某营程教导员说，作为调整组建时间不长的新单位，他们与其他“家底厚实”的单位同台比拼并不占优势. 在营连自评环节，营党委一班人经过综合权衡，在自评一栏填了“中等”. 没想到，表彰大会上，该营思想政治教育、机要密码管理等方面工作受到表扬.

“机关既横向比建设水平，也纵向看进步幅度，评比时综合衡量我们这一阶段取得的进步，为我们争取到不少加分项. ”谈及评比结果，程教导员感慨地说，机关的表扬肯定让全营官兵深受鼓舞，大家憋足一股劲，争取下次评比达到“优秀”等级.

该旅领导介绍，新的评比表彰办法施行以来，他们坚持聚焦主责主业、突出向战务战，大力表彰在各类比武考核中取得突出成绩的官兵，及时召开评比表彰大会，引导全体官兵对标先进学、紧盯差距改，进一步找准奋斗目标、明确努力方向.

此外，他们还规定，机关每季度不再单独组织阶段性评比检查，而是把日常检查、训练考核、教育检查结果作为评判依据，并用好容错机制，为敢闯敢干的官兵卸下思想包袱，有效激发官兵干事创业的热情动力.

走进该旅训练场，某营修理连一级军士长潘小升正趴在车底“把脉问诊”，确保外训机动车辆“零故障”. 潘小升说，装备故障率是评比表彰的一项重要内容，对维修骨干来说，“零故障”是最过硬的加分项.

该营程副营长告诉记者，新的评比表彰办法明确将工作成效与评比结果挂钩，只有扎扎实实拿下每个加分项，才能在评比中稳操胜券.

专业考核成绩突出、保障任务完成出色……细数近期的工作成绩，程副营长满心欢喜地说：“新的评比表彰办法，立起向战为战、有为有位鲜明导向，大家创先争优的劲头更足了. ”

A 74th Group Army Brigade Has Improved Its Evaluation and Commendation Mechanism to Strengthen the Role of Honor in Incentivizing Personnel.

Source: China Military Network - PLA Daily Author: Zhao Zelun, Deng Lianjun Editor: Wu Mingqi

2025-10-11

A brigade of the 74th Group Army has improved its evaluation and commendation mechanism to strengthen the role of honor in incentivizing personnel.

Striving for excellence in peacetime, confident in evaluations

■ Zhao Zelun, PLA Daily Special Correspondent, Deng Lianjun

Recently, a brigade of the 74th Group Army held its third-quarter evaluation and commendation conference, honoring a number of officers, soldiers, and advanced units for outstanding mission performance and outstanding work achievements.

“I never thought that after so long in the background, we would have the opportunity to step onto the podium and receive recognition.” Second Sergeant Zhan Hao, who received the honor, could not contain his excitement as he spoke of his recent achievements. “Vigorously carrying out evaluation and commendation activities aims to leverage the guiding role of ‘evaluation to promote development’ and better motivate officers and men to stay focused on their posts and contribute to the military.” Brigade leaders explained that they have explored and optimized the implementation methods for evaluation and commendation, taking into account the unit’s actual work and the ideological characteristics of the officers and men. Through a series of practical measures to “reward the right people, reward the right performance, and reward the right time,” they have firmly established the clear direction of “working in peacetime, competing in peacetime, and striving in peacetime.”

Discussing the original intention of optimizing the evaluation and commendation implementation methods, Zhong Rui, an officer in the brigade’s Organization Department, showed reporters a list of materials for quarterly evaluation and commendation.

Previously, before each period of evaluation and commendation, Zhong Rui had to check data and compile materials with personnel from various departments using the list. Due to the large number of projects involved and the long preparation period, this had a certain impact on the progress of other work.

Zhang Jiayuan, a clerk in a company within the brigade, shared this sentiment. Every time Zhang Jiayuan prepared evaluation materials, he was always busy, worried that inadequate preparation would affect the unit’s performance and that it would take up too much time and delay other work. Why, originally intended to inspire soldiers to strive for excellence and promote comprehensive grassroots development, has the appraisal and commendation program resulted in “busy grassroots units and tiring headquarters”? The brigade’s headquarters conducted in-depth research into this issue. Some soldiers expressed concern that the list of items for appraisal and commendation materials was extremely detailed and comprehensive, making compilation time-consuming and laborious. Others felt that the headquarters working group, when collecting appraisal materials, tended to focus on identifying problems, leading grassroots units to only seek to “get by” and not “excel.”

After thoroughly analyzing the opinions and suggestions of soldiers, the brigade leadership, after repeated discussions, reached a consensus and identified a direction for improvement: exploring ways to optimize the implementation of appraisal and commendation, improving the appraisal and

commendation mechanism, and fully leveraging the positive incentive effect of commendation and rewards.

Since then, the brigade has explored establishing a “battalion and company self-evaluation - headquarters sub-evaluation - Party Committee review” process, granting grassroots units the right to self-evaluate. This process allows for a bottom-up review of experiences and achievements, encouraging broad participation from grassroots soldiers, and promoting the organic integration of appraisal and commendation work with comprehensive grassroots development, fostering mutual advancement. “Our battalion’s high ranking in this evaluation is thanks to the optimization and improvement of the evaluation and commendation implementation methods,” said Instructor Cheng of a battalion in the brigade. As a relatively new unit, they were not at an advantage compared to other units with stronger foundations. During the self-evaluation process for the battalion and company, the battalion Party Committee, after comprehensive consideration, entered “average” in the self-evaluation column. Unexpectedly, at the commendation meeting, the battalion’s ideological and political education, confidential code management, and other aspects were praised.

“The headquarters not only compared the level of development horizontally, but also the extent of progress vertically. The comprehensive assessment of our progress during this period earned us a number of bonus points.” Speaking of the evaluation results, Instructor Cheng expressed his deep inspiration for the battalion’s officers and men, who are determined to achieve “excellent” status in the next evaluation. Brigade leaders explained that since implementing the new evaluation and commendation system, they have consistently focused on their core responsibilities and prioritized combat operations. They have vigorously commended officers and men who have achieved outstanding results in various competitions and assessments, and have held timely evaluation and commendation conferences to guide all officers and men to learn from advanced performance, focus on gaps, and address shortcomings, further clarifying their goals and the direction of their efforts.

In addition, they have also stipulated that headquarters will no longer organize separate quarterly evaluations and inspections. Instead, they will use the results of daily inspections, training assessments, and educational inspections as the basis for evaluation. They will also effectively utilize a fault-tolerant mechanism to relieve the burdens of daring officers and men, effectively stimulating their enthusiasm and motivation for entrepreneurship.

Entering the brigade’s training ground, Sergeant Major Pan Xiaosheng of a battalion’s maintenance company was crouching under a vehicle, “taking its pulse” and ensuring zero failures for its motor vehicles during field training. Pan Xiaosheng explained that equipment failure rate is a key component of evaluation and commendation, and for key maintenance personnel, “zero failures” is a crucial bonus. Deputy Battalion Commander Cheng told reporters that the new evaluation and commendation system clearly links work performance to evaluation results. Only by earning every bonus point can one secure victory in the evaluation.

Outstanding professional assessment results, excellent completion of support missions... Recounting recent work achievements, Deputy Battalion Commander Cheng said with joy, “The new evaluation and commendation system sets a clear direction for combat-oriented work and for achieving outstanding performance. This has intensified our enthusiasm for innovation and excellence.”

陆军某旅某支援保障连凝聚兵心士气破解转型难题

来源：解放军报 作者：李力迪 景元玺 责任编辑：王粲 2025-10-13

陆军某旅某支援保障连凝聚兵心士气破解转型难题——

把连队锻造成“一块整钢”

■解放军报记者 李力迪 景元玺

该连工兵分队组织实爆作业. 胡庆峰 摄

“三等功连”、旅军体运动会建制连第一名、“四铁”先进单位……

日前，记者来到陆军某旅采访. 站在该旅某支援保障连荣誉墙前，面对眼前整齐排列的一面面锦旗、奖状，记者不禁有些好奇：一个在部队调整改革中新组建的连队，为何能在短时间内获得这么多耀眼的成绩？

“调整组建之初，连队官兵来自不同单位，从事侦察、通信等多个专业，除基础训练阶段为整建制训练外，官兵大部分时间都是在各自训练场地‘单打独斗’. ”该连指导员尹志朋告诉记者，当时，官兵训练时点位分散、休息时分区分块，大家既不合心也不合力，荣誉感、归属感不强. 尽管连里尝试采取多种方法凝心聚力，但效果并不理想.

更让连队干部头疼的是，不少班长骨干个人能力很强，所带班排总体成绩却在低位徘徊. 一次连务会上，剖析这一现象时，有的班长骨干认为，年轻战士个性强、思想活、不服管，带兵人只好“顺其自然”；而一些新兵吐槽，感到有的老兵拿资历“压人”，不好相处.

面对老兵新兵之间的思想冲突，如何将连队拧成一股绳、让大家心往一处想、劲往一处使，成为摆在连队党支部面前的一道考题. 支部一班人经过深入思考，提炼出“把连队当家，把战友当兄弟，把岗位当事业”的“三把”精神，从党员骨干抓起，从作风养成抓起，聚力增强官兵上下同心干事创业的积极性、主动性.

他们利用新兵下连、老兵退伍等时机，安排来自不同单位的班长骨干交叉任职，将训练成绩突出、综合素质过硬的骨干安排到各班，通过人员调整逐步扭转连队“一盘散沙”的局面.

调整组建不久，连队唯一一名装甲底盘技师转业，当过两年驾驶员的一级上士王瑞成为公认的最佳接替人选. 面对新的岗位，王瑞二话不说扛起重担.

一次，该连接到两个月后参加重大演训任务的命令. 然而，连队那时刚刚更换了主战装备，维修保障还处于起步探索阶段. 为确保顺利完成演训任务，备战期间，王瑞每天带领班里战士钻进车库，一干就是 10 多个小时.

“我们承担着全营战车的修理保障任务，不尽快熟练掌握新装备修理技能，睡觉都不踏实. ”凭着这股钻劲、狠劲、韧劲，王瑞很快将新装备的性能特点摸清，为圆满完成重大演训任务奠定了基础. 担任装甲底盘技师以来，王瑞累计处理各类故障百余起、培养出多名骨干人才，是连队响当当的技术尖子，用行动树立了榜样，成为战士们学习追赶的目标.

为进一步凝聚军心士气，该连常态组织“先进典型故事会”活动，让来自不同单位的官兵登台讲述老连队光荣传统，结合个人成长经历分享感悟体会，让大家在互学互鉴中增进了解和认同. 他们还积极搜集整理连队先进典型事迹，以微讲堂的方式教育激励官兵向榜样学习、向典型看齐.

战士小蓝平时训练刻苦，但理论学习有些吃力. 了解情况后，连队理论骨干钟登杰主动靠上去，与小蓝结成学习对子. 为把理论知识尽可能讲得深入浅出，钟登杰结合党史军史故事，把宏大的理论掰开揉碎，转换成小蓝一听就懂的“兵言兵语”. 经过半年的努力，小蓝的理论基础日益扎实，逐渐成长为连队的理论骨干.

在干部骨干的示范带动下，该连官兵关系越来越融洽，支部一班人趁热打铁，大力引导班长骨干为年轻战士当标杆、作表率，进一步提升连队的凝聚力.

那年 7 月，驻地遭遇洪水袭击，该连官兵闻令而动、迅速驰援，党员骨干纷纷递交请战书，主动申请到抗洪一线去、到最危险的地方去. 在他们感召下，全连官兵昼夜鏖战、化身为堤，筑起一道护佑群众生命财产安全的铜墙铁壁.

人心越来越齐，斗志越燃越旺. 在“三把”精神的激励下，该连官兵见任务就上. 支部一班人秉持“让有为者有位，让能干者优先”的理念，按照“支委带骨干，骨干带群众”的思路，一级做给一级看，一级带着一级干，在官兵中立起以上率下的鲜明导向，大家干事创业劲头更足，连队全面建设基础越来越牢，逐渐从原来的“一盘散沙”变成“一块整钢”.

一级上士周洋备战上级比武，舍弃与来队家属团聚时间主动参训，所在团队取得陆军第一名的优异成绩；二级上士刘通综合素质过硬，在旅军体运动会上取得个人项目三个第一、两个第二的好成绩，所带班组荣立集体二等功；中士王和彬主动申请转岗到无人机专业，成长为旅无人机教练员……谈及连队的发展变化，尹志朋感慨地说：“骨干冲在前，战士跟得上，连队就没有建不强的道理. ”

短 评

当好部队建设的“顶梁柱”

■杨 猛

习主席指出，坚持以身作则、以上率下，这是一种有效的领导方法和工作方法. 干部骨干身先士卒、率先垂范，勇当练兵备战的“刀尖子”、抓建基层的“领头雁”，就能产生强大的示范效应，带动官兵共同进步、共同提高，推动部队全面发展、全面过硬.

部队改革调整过程中，一大批适应打仗需求、聚焦未来战场的新调整组建连队应运而生. 新的使命任务、新的武器装备、新的编制体制，对部队深化全面建设、提升核心战斗力提出了新的更高要求. 面对调整组建后工作千头万绪、任务繁重艰巨的挑战，陆军某旅某支援保障连充分发挥干部骨干带头作用，激励感召官兵不断争创荣誉，交出一份优异的强军答卷.

言传不如身教，表态不如表率. 无论时代如何发展、环境如何变化，干部骨干作为部队建设的“顶梁柱”，以身作则的优良传统不能丢、以上率下的示范作用不能弱. 攻坚建军百年，建设一流军队，各级带兵人更要模范带头，在大项任务中培塑“啃骨头”的魄力，在日常训练中厚植“站排头”的勇气，用实际行动感召官兵、激励官兵、带动官兵，为强军兴军凝聚强大正能量.

“Third Class Merit Company,” first place among established companies in the brigade’s military sports meet, and an advanced “Four Irons” unit...

Recently, a reporter visited an Army brigade for an interview. Standing before the honor wall of a support and maintenance company, faced with the neatly arranged banners and certificates, the reporter couldn’t help but wonder: How could a company newly formed during the military restructuring and reform achieve so many impressive achievements in such a short period of time? “At the beginning of the company’s restructuring, the officers and men came from different units and specialized in various disciplines, such as reconnaissance and communications. Aside from basic training, which involved full-unit training, the soldiers spent most of their time working independently at their respective training grounds,” company political instructor Yin Zhipeng told reporters. At the time, the soldiers trained in scattered locations and rested in separate areas. They were neither focused nor motivated, and their sense of honor and belonging was weak. Although the company tried various methods to unite the soldiers, the results were unsatisfactory.

Adding to the company’s concerns, many squad leaders were highly capable, yet the overall performance of their squads and platoons remained low. During a company meeting, analyzing this phenomenon, some squad leaders suggested that young soldiers were strong-willed, active thinkers, and unruly, so leaders simply let things take their course. Some new recruits, however, complained that some veteran soldiers used their seniority to bully others and were difficult to get along with. Faced with ideological conflicts between veterans and new recruits, the company’s Party branch faced a challenge: how to unite the company and ensure everyone’s unity of purpose and shared focus. After thorough reflection, the branch team devised the “Three Masteries” principle: “Treat the company as your home, treat your comrades as your brothers, and treat your post as your career.” Starting with key Party members and cultivating good work practices, they focused on strengthening the enthusiasm and initiative of officers and men to work together.

They capitalized on opportunities like the arrival of new recruits and the retirement of veterans to cross-post squad leaders from different units, assigning key personnel with outstanding training performance and strong overall qualities to various squads. Through personnel adjustments, they gradually reversed the company’s fragmented situation.

Shortly after the reorganization, the company’s only armored chassis technician retired. First Sergeant Wang Rui, who had served as a driver for two years, became the recognized top candidate

to replace him. Faced with the new position, Wang Rui took on the heavy responsibility without hesitation.

Once, the company received orders to participate in a major training exercise two months later. However, the company had just replaced its main combat equipment, and maintenance support was still in its infancy. To ensure the smooth completion of training and exercise missions, Wang Rui led his squad into the garage every day during preparations, working for over 10 hours straight.

“We are responsible for the maintenance and support of the entire battalion’s tanks. If we don’t quickly master the repair techniques for this new equipment, we won’t be able to sleep soundly.” With this perseverance, determination, and tenacity, Wang Rui quickly mastered the performance characteristics of the new equipment, laying the foundation for the successful completion of this major training and exercise mission. Since assuming the position of armored chassis technician, Wang Rui has handled over a hundred various malfunctions and trained numerous key personnel. He is a renowned technical expert in the company, setting an example through his actions and becoming a role model for the soldiers to emulate.

To further strengthen morale, the company regularly organizes “Advanced Model Storytelling Sessions,” where officers and men from various units share the glorious traditions of their former company and their personal experiences, fostering mutual understanding and recognition. They also actively collected and compiled stories of exemplary company figures, using micro-lectures to educate and encourage officers and men to learn from and emulate role models.

Soldier Xiao Lan trained diligently, but struggled with theoretical study. After understanding his situation, Zhong Dengjie, a key theoretical cadre in the company, approached him and formed a study pair with Xiao Lan. To make theoretical knowledge as accessible as possible, Zhong Dengjie incorporated stories from Party and military history, breaking down the vast theoretical concepts into soldier-speak that Xiao Lan could readily grasp. After six months of hard work, Xiao Lan’s theoretical foundation became increasingly solid, and he gradually became a key theoretical cadre in the company.

Led by the exemplary leadership of these key cadres, the relationship between officers and men in the company grew increasingly harmonious. Seizing the opportunity, the branch team actively encouraged squad leaders and key personnel to serve as role models for younger soldiers, further strengthening the company’s cohesion.

That July, the base was hit by a flood. Upon receiving the order, the company’s officers and men rushed to the scene. Key Party members submitted petitions to join the front lines of flood control, volunteering to be deployed to the most dangerous areas. Inspired by them, the entire company fought day and night, transforming themselves into a dam, building an iron wall to protect the lives and property of the people.

With growing unity, their fighting spirit grew stronger. Inspired by the “Three Masters” spirit, the company’s officers and men leapt at the task. The branch committee adhered to the principle of

“giving positions to those who are capable and prioritizing those who are competent.” Following the principle of “branch committee members leading key personnel, and key personnel leading the masses,” they set an example for the next level and guided the next level. This established a clear guiding principle of leading by example among the officers and men, intensifying their drive for progress and entrepreneurship. The company’s overall development foundation has become increasingly solid, gradually transforming from a “scattered group” into a “solid unit.” First Sergeant Zhou Yang, preparing for a competition with his superiors, sacrificed time to reunite with his family members and actively participated in training, resulting in his team achieving first place in the Army. Second Sergeant Liu Tong, demonstrating exceptional overall competence, achieved three first places and two second places in individual events at the brigade’s military sports meet, earning his team a Second Class Merit. Sergeant Wang Hebin voluntarily applied for a transfer to the drone field and became the brigade’s drone instructor. Discussing the company’s development and changes, Yin Zhipeng said with emotion, “With backbone cadres leading the charge and men keeping up, there’s no reason the company can’t grow strong.”

Short Comment

Be the “Pillar” of Unit Building

■ Yang Meng

President Xi Jinping pointed out that leading by example and leading from above is an effective leadership and work method. When backbone cadres take the lead, acting as the “sharp edge” of training and preparation, and the “leading goose” of grassroots development, they can create a powerful demonstration effect, driving the common progress and improvement of officers and men, and promoting the all-round development and excellence of the unit. During the process of military reform and adjustment, a large number of newly reorganized companies adapted to combat needs and focused on future battlefields have emerged. New missions, new weapons and equipment, and a new organizational structure have placed new and higher demands on the deepening of comprehensive military development and the enhancement of core combat capabilities. Faced with the complex and arduous tasks posed by the reorganization, a support and assurance company within a certain Army brigade has fully leveraged the leading role of its core cadres, inspiring and motivating officers and men to continuously strive for honors and deliver an outstanding performance in strengthening the military.

Words speak louder than words, and statements speak louder than example. Regardless of how the times develop and the environment changes, core cadres, as the “pillars” of military development, must not abandon the fine tradition of leading by example and their exemplary role from above. To achieve the centennial goal of the founding of the People’s Liberation Army and build a world-class military, leaders at all levels must set an example, cultivate the courage to tackle tough challenges in major tasks, and strengthen the courage to take the lead in daily training. They must inspire, motivate, and lead officers and men through concrete actions, gathering strong positive energy for a strong and resilient military.

陆军某旅探索分层施教模式：同一堂课有了不同“打开方式”

来源：解放军报 作者：侯典垚 张亚坤 责任编辑：王粲 2025-10-13

第 82 集团军某旅探索分层施教模式——

同一堂课有了不同“打开方式”

■侯典垚 张亚坤

前段时间，第 82 集团军某旅某营野外驻训地，一场关于“军人婚恋观”的教育课在 3 个不同点位同步展开. 全营官兵被分成“单身”“未婚”“已婚”3 个群体，某连中士鲁亚勋、刘书磊和二级上士杨远智作为对应的授课教员，分别进行授课.

这种场景，让笔者眼前一亮，该营教导员梁超介绍，这是他们探索分层施教模式的一次尝试.

此前，该旅机关对经常性思想教育情况进行了一次调研. 不少官兵反映，一些教育课程设置与自己关系不大，很难入脑入心.

“不是官兵不愿听，而是他们的思想脉搏，我们没把准. ”梁超告诉笔者，经过反思总结，他们发现以往的经常性思想教育特别是官兵自主教育，虽然内容丰富、形式多样，但不够聚焦，“要讲的”和“想听的”并不在一个频道上.

为此，该旅决定改变“一锅煮”的教育模式，探索以营为单位，区分不同岗位、不同层次的官兵，差异化设置经常性思想教育内容，灵活开展“精准滴灌”式的分层施教，既保证了全员覆盖，又做到了有的放矢.

笔者跟随梁超先后来到此次“军人婚恋观”教育的授课地点，3 个平行课堂各有侧重、各具特色：已婚官兵聚集在营部帐篷前，杨远智结合自身经历，与战友们探讨什么是婚姻中的“包容与理解”；未婚官兵围坐在 400 米障碍训练场一旁，刘书磊围绕恋爱中的“认识与磨合”，组织大家讨论；而大多数单身官兵，则在连队学习室里，在鲁亚勋的引导下，对“人生伴侣应具备的优秀品质”展开辨析. 一位刚结婚不久的排长说：“这样的专题讨论很有针对性，大家都能敞开心扉，相互交流经验. ”

“是不是所有的教育都适合采用这种模式呢？”面对笔者的疑问，梁超没有直接给出答案，而是举了两个例子——

一次战斗精神教育，旅机关尝试区分两个层次组织实施：梁超本人为军官和高级军士授课，他结合历史战例和现代战争特点，深入探讨战斗精神的时代内涵；各连指导员为年轻战士

授课，注重用身边人身边事，激发官兵的血性胆气. 授课结束后，两个课堂的官兵还会聚在一起，进行讨论交流.

一次理想信念教育，军官、军士、义务兵先分组听课，然后再集中交流，不同身份不同年龄带来的不同感受，让官兵对什么是理想信念、如何坚定理想信念，有了更立体更深入的认识.

不难看出，这两次教育，都是从“分”到“合”、先“分”后“合”. 梁超说，官兵们反映，通过这种实践，大家反而有了更多新鲜感，迫切想知道另外一个课堂讲了什么，另外一群战友说了什么.

然而，新的问题随之产生. “分层施教模式，对政治教员提出了更高要求. ”某连指导员说，他现在不仅要准备通用教案，还要针对不同群体设计专门内容，虽然工作量增加了，但看到教育效果显著提升，再苦再累也是值得的.

这个问题，旅党委一班人也看在眼里. 他们坦言，分层施教应该具体问题具体分析，不能一概而论，更不能僵化执行，从一个极端走向另一个极端. 更为科学务实的做法是，区分主题教育、基础教育和经常性思想教育，结合各单位人员和任务实际，按照教育计划和内容，进行通盘考虑和整体设计.

“同一堂课有了不同的‘打开方式’，比千篇一律、一副面孔效果要好. ”该旅领导介绍，随着调整改革的深入，部队动散成为常态，再像以往那样“拉开架势上大课”变得越来越不现实. 开展分层施教，使教育有了更大的灵活性和适用性，有利于抓好教育落实.

一级上士刘鹭是分层施教模式的坚定拥护者. 在他看来，官兵年龄不同、经历各异、认知能力也存在差别，让他们在同一个课堂“齐步走”，显然有人“吃不饱”，有人“吃不消”. “平时，大家都诟病教育‘一刀切’‘大呼隆’，如今，这个问题有了破解之法，我们要做的就是如何进一步完善它. ”

据了解，该旅党委正在广泛征求官兵意见，研究制订分层施教模式的“2.0 版”.

An Army Brigade Explores a Differentiated Teaching Model: The Same Lesson Offered in Different Ways

Source: PLA Daily Author: Hou Dianyao, Zhang Yakun Editor: Wang Can 2025-10-13

A Brigade of the 82nd Group Army Explores a Differentiated Teaching Model –

The Same Lesson Offered in Different Ways

■Hou Dianyao, Zhang Yakun

Recently, a battalion of a brigade of the 82nd Group Army held a simultaneous education session on “Military Personnel’s Views on Love and Marriage” at three different locations during a field training camp. The battalion’s officers and men were divided into three groups: “single,” “unmarried,” and “married.” Company Sergeants Lu Yaxun, Liu Shulei, and Sergeant 2nd Class Yang Yuanzhi served as instructors, each teaching the corresponding classes.

This scene was truly eye-opening. The battalion’s instructor, Liang Chao, explained that this was an attempt to explore a differentiated teaching model.

Previously, the brigade’s headquarters conducted a survey on regular ideological education. Many officers and men reported that some of the curriculum was not relevant to them and was difficult to internalize. “It’s not that the soldiers were unwilling to listen, but rather that we didn’t grasp their ideological pulse,” Liang Chao told the author. After reflection, they found that their previous regular ideological education, especially the soldiers’ self-directed education, while rich in content and diverse in form, lacked focus. What they wanted to say and what they wanted to hear were not on the same page.

To this end, the brigade decided to change its “one-size-fits-all” education model and explore ways to differentiate regular ideological education content for soldiers at different positions and levels within the battalion. This approach allows for a flexible, “precision drip irrigation” approach to tiered instruction, ensuring full coverage while also ensuring targeted delivery. The author followed Liang Chao to the teaching location of the “Military Personnel’s View on Marriage and Love” education. The three parallel classes had their own focus and characteristics: married officers and men gathered in front of the battalion tent, and Yang Yuanzhi combined his own experience to discuss with his comrades what is “tolerance and understanding” in marriage; unmarried officers and men sat around the 400-meter obstacle training ground, and Liu Shulei organized a discussion on “getting to know and getting used to each other” in love; and most of the single officers and men, under the guidance of Lu Yaxun, in the company study room, analyzed the “excellent qualities that a life partner should possess.” A recently married platoon leader said, “These thematic discussions are very targeted, allowing everyone to open up and share experiences.”

“Is this model suitable for all types of education?” Liang Chao didn’t directly answer my question, but instead gave two examples.

During a combat spirit training session, brigade headquarters experimented with two different levels of organization and implementation: Liang Chao himself lectured officers and senior NCOs, incorporating historical examples and the characteristics of modern warfare to delve into the contemporary meaning of combat spirit; while company instructors lectured young soldiers, focusing on inspiring their courage and bravery through examples from their own lives. After the sessions, soldiers from both classes gathered for discussions.

During a training session on ideals and beliefs, officers, NCOs, and conscripts first attended the lecture in groups, then gathered for a discussion. The diverse experiences brought by their different identities and ages gave soldiers a more comprehensive and in-depth understanding of ideals and beliefs and how to strengthen them.

It's easy to see that both sessions progressed from "division" to "integration," first "division" and then "integration." Liang Chao said that soldiers reported that this practice actually gave them a greater sense of freshness, eager to learn what was being taught in another class or what another group of comrades had to say.

However, this also led to new problems. "The differentiated teaching model places higher demands on political instructors," said a company instructor. He now not only has to prepare general lesson plans but also design specialized content for different groups. While the workload has increased, the significant improvement in educational effectiveness makes the hard work worthwhile.

The brigade Party Committee has also recognized this problem. They frankly acknowledge that differentiated teaching should be analyzed on a case-by-case basis, not generalized, and certainly not rigidly implemented, going from one extreme to another. A more scientific and pragmatic approach is to differentiate between thematic education, basic education, and regular ideological education, and to comprehensively consider and design the education plan and content based on the specific personnel and tasks of each unit. "Different ways of presenting the same lesson are more effective than a cookie-cutter, one-size-fits-all approach." Brigade leaders explained that with the deepening of adjustments and reforms, troop mobility has become the norm, making the traditional "large, grand lectures" increasingly unrealistic. Implementing differentiated instruction allows for greater flexibility and adaptability in education, facilitating effective implementation.

Sergeant First Class Liu Lu is a staunch supporter of the differentiated instruction model. He believes that soldiers have varying ages, experiences, and cognitive abilities; putting them all in the same classroom will clearly underwhelm some and overwhelm others. "Usually, everyone criticized the 'one-size-fits-all' and 'broad-brush' approach to education. Now, we have a solution to this problem. Our focus is on further improving it."

It is understood that the brigade's Party Committee is consulting with soldiers and developing a "2.0" version of the differentiated instruction model.

连长的一句话打醒了他："差不多"里永远练不出战斗力！

来源：解放军报 作者：岳鹏 责任编辑：王粲 2025-10-13

告别"差不多"，练就"神枪手"

■第 83 集团军某旅二级上士 岳 鹏

“班长，我评上一级‘神枪手’了！”不久前，我们旅“神枪手”考核评定结果公布，下士江月林兴冲冲跑到我面前，激动地向我报告这个喜讯. 看着他神采飞扬的样子，我眼前不禁浮现出一年前那个在树荫下垂头丧气的上等兵.

那是一次野外驻训期间举行的狙击专业考核. 在决定胜负的 500 米距离上，江月林射出的子弹擦着靶子边缘飞过，成绩被判无效. 考核结束后，我找到独自坐在训练场角落的他. “刚才是怎么回事？风速计算对了吗？”我问道. 江月林低着头，声音里满是懊悔：“没来得及细算，我觉得差不多，没想到……”

“差不多？”这 3 个字像一根针，瞬间刺痛了我的神经. 因为，这让我想起了曾经的自己，也是一名被“差不多”耽误的狙击手.

刚入伍时，凭借首次实弹射击就打出满环成绩，我入选了狙击班. 这让我产生了错觉，以为靠着所谓的“天赋”就能在岗位上立足. 训练中，我开始满足于“过得去就行”，比武得了第四名，竟安慰自己“比上不足，比下有余”.

一次实兵对抗训练，我在汇报目标距离时，由于时间紧迫，心里想的是“差不多”，嘴上却给出肯定的答案. 结果，弹道发生偏差，让整个狙击小组功亏一篑. 事后，连长严肃地对我说：“战场不会给你第二次机会，‘差不多’里永远练不出战斗力！”这句话如同当头一棒，顿时把我打醒了.

从那以后，我像换了一个人. 烈日下、大雨中、黑夜里，只要参加训练，我就高标准要求自己，把每一个技术细节都努力练到极致.

后来，陆军举办狙击比武，连续 52 小时、11 个课目的连贯作业，将我的体能逼到极限：筋疲力尽、双腿抽筋、眼冒金星……每当想要放弃时，那次因“差不多”导致的失败经历就会闯入我的脑海. 我咬牙提醒自己，这一次，决不能有任何侥幸和懈怠，必须坚持到底. 最终，我取得了第三名的好成绩，登上领奖台.

我把这段刻骨铭心的经历，讲给江月林听. 沉默许久后，他眼中的迷茫渐渐消散，取而代之的是坚毅和果敢.

第二天，江月林主动找到我，要求结成训练对子. 从此，训练场上多了一个跟自己死磕的兵——练据枪，他趴在地上一动不动，眼睛死死盯着准星，枪管上的弹壳，从 1 枚加到 3 枚；判风速，他对着风速仪一遍遍背记不同风向角的弹道偏差表，直到“一口清、一算准”. 同时，他开始加练体能，强化心理素质，整个人由内而外透着一股不服输的劲儿.

短短一年，江月林成长为连队公认的狙击能手. 在最近这次条件严苛的“神枪手”考核评定中，他凭借过硬的实力和稳定的发挥，将一级“神枪手”的殊荣收入囊中.

战场不会同情“差不多先生”，胜利永远眷顾能打胜仗的兵. 庆幸的是，我没有让发生在自己身上的那一幕，在战友身上重演.

The Company Commander’s Words Woke Him Up: “Almost” Will Never Cultivate Combat Effectiveness!

Source: PLA Daily Author: Yue Peng Editor: Wang Can 2025-10-13

Say Goodbye to “Almost,” Become a “Sharpshooter”

■ Yue Peng, Second Sergeant, 83rd Group Army Brigade

“Squad Leader, I’ve been promoted to First-Class ‘Sharpshooter’!” Not long ago, the results of our brigade’s “Sharpshooter” assessment were announced. Corporal Jiang Yuelin excitedly ran up to me and shared the good news. Seeing his beaming expression, I couldn’t help but picture the dejected Corporal, sitting under the shade of a tree a year ago.

It was a sniper assessment during field training. At the decisive 500-meter range, Jiang Yuelin’s bullet grazed the edge of the target, and his score was disqualified. After the assessment, I found him sitting alone in a corner of the training ground. “What happened just now? Did you calculate the wind speed correctly?” I asked. Jiang Yuelin lowered his head, his voice filled with regret: “I didn’t have time to calculate it carefully. I thought it was about right. I didn’t expect...”

“About right?” Those three words were like a needle, instantly piercing my nerves. It reminded me of myself, a sniper who was once held back by “about right.”

When I first joined the army, I scored a perfect score on my first live-fire exercise and was selected for the sniper squad. This gave me the illusion that I could succeed in my position simply by relying on so-called “talent.” During training, I began to settle for “just getting by.” When I finished fourth in a competition, I consoled myself with the thought, “Not as good as the best, but better than the worst.”

During a live-fire exercise, when reporting the target distance, due to time constraints, I mentally thought, “About right,” but verbally gave a positive answer. As a result, the trajectory of the bullet deviated, and the entire sniper team failed. Afterwards, the company commander sternly told me, “The battlefield won’t give you a second chance. You’ll never develop combat effectiveness by being ‘about right’!” That statement was like a wake-up call, instantly waking me up. From then on, I felt like a completely different person. Under scorching sun, in pouring rain, in the darkness of night, whenever I participated in training, I held myself to high standards, striving to perfect every technical detail.

Later, the Army held a sniper competition. The 52-hour, 11-part series pushed my physical limits: exhaustion, leg cramps, and dizziness. Every time I felt like giving up, the memory of that failure, caused by “almost,” would come flooding back to me. I gritted my teeth and reminded myself that this time, I wouldn’t take any chances or slack off; I had to persevere to the end. Ultimately, I took third place and stood on the podium.

I recounted this unforgettable experience to Jiang Yuelin. After a long silence, the confusion in his eyes gradually dissipated, replaced by a resolute determination and courage.

The next day, Jiang Yuelin approached me and asked to be a training partner. From then on, the training ground had a dedicated soldier. When practicing rifle handling, he lay motionless on the ground, his eyes fixed on the crosshairs, the shells in the barrel increasing from one to three. He repeatedly memorized the trajectory deviation tables for different wind angles in front of the anemometer until his readings were clear and his calculations accurate. At the same time, he began to work on his physical fitness and mental fortitude, his entire being radiating a relentless spirit.

In just one year, Jiang Yuelin had become the company’s recognized sniper expert. In the recent rigorous “Sharpshooter” assessment, he earned the distinction of First-Class “Sharpshooter” for his exceptional skill and consistent performance.

he battlefield has no sympathy for “Mr. Almost”; victory always favors the soldier who can win. Fortunately, I didn’t let the same experience that happened to me happen to my comrades.

踏访新时代边关丨走进东风泉哨所，聆听流淌在官兵心间的守哨泉音

来源：解放军报 作者：梁成鑫 王雁翔 王梦缘 责任编辑：徐占虎 2025-10-13

东风泉哨所：一泓清泉润兵心

■梁成鑫 解放军报记者 王雁翔 特约通讯员 王梦缘

“先有泉水后有哨”，图为连队驻地附近的东风泉. 开吾赛尔摄

这是一个坐落在北疆戈壁荒原之上，因一泓清泉而得名的哨所.

苍茫的戈壁深处，巴丹吉林沙漠腹地，新疆军区某团“忠诚戍边模范连”——东风泉哨所驻守于此.

这里飞沙走石、烈日暴晒、方圆百里无人烟. 官兵外出巡逻，走出营门便是无人区，手机难有信号、展眼不见绿色、耳边只闻风声. 荒凉的戈壁滩上，泉水从何而来？

进驻戈壁，水是头等大事. 几十年前，时任连队副连长主动请缨，带领一队人马骑骆驼找水源. 他们跋涉 7 天 7 夜，终于在一个遥远的地方找到几簇红柳，当即抡起铁锹镐头凿开砂石，直至石缝之中涌出清泉.

泉水奔涌，犹如心头拂过一缕东风. 后来，连队整建制搬迁到涌泉之地驻扎. 连队也因泉得名：东风泉哨所. 几十年岁月更迭，在一泓泉水边，官兵建哨守哨，从第一代营房到第五代营房，守防环境显著变化，戍边卫国的初心在清泉滋润下从未改变.

如今的东风泉哨所，营门前栽种一片新绿，一如官兵脸上自信而耀眼的笑容. 营区后院的沙枣树上，一串串熟透的沙枣仿佛晶莹的红宝石，那是清泉滋润兵心的见证.

不久前，解放军报记者驱车探哨，采撷戍边故事. 请跟随记者，走进哨所官兵的心灵世界，聆听流淌在他们心间的守哨泉音.

——编 者

“不管在哪里坚守，知道为何而奋斗，就没人会觉得苦”

东风泉边防连，驻守戈壁滩半个多世纪. 营区坐落在一条狭长的山谷之中，走进营院，可见第三至第五代营房，从谷底向山坡依山势而建.

第五代营房坐落在坡顶的空地上：红砖白瓦，玻璃阳光棚，让人眼前一亮. 远处的山坡上是第四代营房，至今仍作连队库室使用.

一级上士岳明明带领记者向戈壁深处走去. 这里是上世纪 70 年代修建的连队第二代营房遗址，土坯结构的房屋已经坍塌. 狂风卷着砂砾，打在脸上如针扎一般，老营区的一块石壁上，“扎根黑戈壁，忠诚守边防”10 个大字艳红如初.

37 岁的岳明明是连队兵龄最长的兵. 在他眼中，“像红柳把根扎，像骆驼抗风沙”的连队精神，连同镌刻在石壁上的这几个大字，早已化作流淌在身体中的血脉，滋养着一茬茬官兵扎根荒漠、卫国守边的情怀.

扎根戈壁，首先要有水源. 曾几何时，连队吃水要去几百公里外拉，滴水贵如油.

为缓解吃水难题，时任副连长王治顺主动请缨外出找水. 头天晚上他和战友伴着油灯写下遗书，第二天一早就骑着骆驼出发了.

走了 7 天 7 夜，在行将绝望之际，他们在遥远的戈壁深处，找到几簇红柳. 已经断水断粮的王治顺与战友一起抡铁锹，在沙石下挖坑，终于挖出一泓清泉.

如今，那簇象征生命与希望的红柳更加茂盛，像搬迁到这里的连队官兵一样，顽强地在荒漠中扎根.

当年官兵们挖出的泉眼虽已在 10 多年前干涸，但上级在附近重新勘探出两口深井. 岳明明对记者说：“汩汩的清泉，保障着官兵们的生活用水，也传承着连队的‘魂’. ”

他说话时头往前伸，梗着脖子，记者以为他睡觉时落枕了. 他笑说，巡逻时没注意，脖颈晒脱了皮.

夏天，这里气温高达 45℃，地表温度超过 70℃，官兵们在戈壁巡逻，全程在烈日下暴晒，稍不留神就会被晒伤.

但在岳明明眼里，这些伤痛早已不算什么. “柏油路、长明电，通网络、空调房，巡逻乘车与徒步相结合……”他向记者历数连队近年来的新变化，在他看来，连队守防环境一天比一天好，坚守的日子越过越甜，作为戈壁守哨人，更要为祖国站好岗、放好哨.

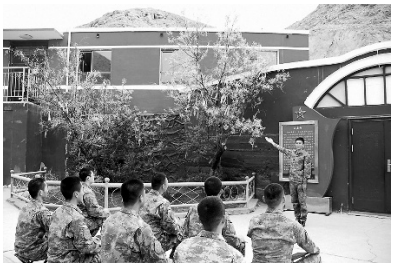
向国旗宣誓.

在连队荣誉室，记者还了解到更多“先苦后甜、苦中有甜”的坚守故事.

那年连队建设新营房，需要开凿陡峭山体，连续招标几次，都因施工条件艰苦无人接标.

“别人不愿干，咱自己干. ”时任连长带领党员干部身先士卒，背着沉重的空压机钻棒，吊在半山腰作业，安全绳在腰部和腿部勒出道道血痕……一年后，一座多功能营房建成了.

岳明明入伍之初，赶上连队安装新光缆. 他和战友早出晚归，在坚硬的戈壁滩上挖光缆沟，奋战多日，裸露的皮肤被晒脱了皮. 最难啃的“硬骨头”地段，他们握着镐头和铁锤钢钎使劲抡，双手虎口被“震麻”，吃饭时手都握不住筷子.



还有一次，上级组织考核. 5 公里武装越野展开期间，沙尘暴来了，5 米之外看不清人影，考核结束时，几个连队难分胜负. “再来！咱们再比一次. ”时任连长不服输、提出倡议，全连战友跃跃欲试、纷纷响应.

新一轮比赛开启，他们以绝对优势摘下桂冠. 兄弟单位纷纷为他们的顽强与团结竖起大拇指. 那一刻，全连战友喜极而泣.

“不管在哪里坚守，知道为何而奋斗，就没人会觉得苦. ”岳明明说，带领战友们夺冠的连长入伍就在东风泉哨所，考学提干后主动申请回到这里. 尽管驻守戈壁条件艰苦，许多守哨官兵却把根扎在了这里，因为在这里，大家守得问心无愧，守出了军人本色.

“人跟树一样，把根扎深扎实，才能向上生长”

连队后院有几棵沙枣树. 从记者的房间向窗外望去，有两棵树并排而立，都有碗口粗，红艳艳的沙枣挂在枝叶间.

一位排长在“夫妻树”前讲述连队光荣传统故事. 开吾赛尔摄

这是一对“夫妻树”. 过去连队没通信信号，也没长明电和柏油路，官兵探亲休假归队从酒泉倒三趟车，连队再派车去上百公里外接站，在茫茫戈壁辗转两三天才能抵达连队.

因为偏远艰苦，连队官兵不愿让妻子来队探亲. 那年春天，老兵惠伟平的妻子瞒着他来到东风泉. 站在丈夫亲手栽种的沙枣树下，她流着泪表示，也要种下一棵树. 要让两棵树相依相伴，一起卫国守防.

在这个连队，这样的坚守故事不胜枚举. 一级上士罗劼曾有一位同乡战友，刚入伍来到戈壁滩便伤心流泪：“这一眼望不到边的戈壁荒滩怎么过？”

罗劼劝慰他，再咬牙坚持两年，时间很快就过去了. 谁知服役期满，那一茬同年兵中有三分之二想留队，因为选晋军士名额有限，最终留下的人不多. 那位同乡不得已离队，那天，他哭得像个孩子.

在罗劼看来，这位同乡的两次流泪，代表了两种不同的心境，也见证着一名战士内心的成长.

“晚上站哨，四周漆黑，连队的灯光就是戈壁滩上唯一的光亮. ”刚到连队时，罗劼也曾失落迷茫. 当过兵的父亲在电话里开导他：“人跟树一样，把根扎深扎实，才能向上生长. ”

种树，对于连队来说是件大事. 全连平均每年种下一两百棵树，来年却只有十几棵存活. 怀着对绿色的渴望，官兵想尽一切办法把树种活.

连队门前栽种一排树，官兵告诉记者，每棵树下都有一个石槽，石槽底部连着树坑. 他们定期将石槽灌满水，如同地漏一般，不间断向树根供水.

罗劼当兵 14 年，到现在只种活几棵榆树. “我们不气馁，只要有一线希望，就会年年种. ”罗劼的眼神闪亮，似乎在告诉记者，种树就是种希望.

“这棵沙枣树是我种的，我呵护它就像呵护我的眼睛. ”战士任壮修告诉记者，这棵树是他的扎根树，凝结着他的辛勤汗水.

任壮修来自山东青岛，家境殷实，入伍前花钱大手大脚. 父母特意让他参军入伍，到部队接受锻炼.

初到连队，任壮修心里“别”着一股劲儿，找各种理由逃避训练，一心盼着退伍那一天.

跟着战友走上巡逻路，任壮修渐渐被战友的奉献担当精神所感染. 就像戈壁滩上的红柳在“经霜吐红”之后茁壮成长，半年后的他，样样工作冲在前面，也渐渐找到自信，开始思考怎样的青春才有价值.

那天给树浇完水后，任壮修前去换哨. 一路走，他一路和记者回忆：去年 3 月，自己顺利选晋下士，给母亲打电话报告喜讯，母亲一听却哭了，她不放心儿子继续戍边.

任壮修在电话中对母亲说，好多战友想留队，却因名额有限未能如愿，几个同年兵离队时反复叮嘱他替自己守防，他还说：“我不是一个人在战斗，只有继续坚守，才能不负身后一双双热切的目光. ”

“坚持你所热爱的，热爱你所坚持的，就是最好的青春”

营院门外的“巴掌田”中，一簇簇枸杞长势喜人.

连队张连长说，枸杞种子是宁夏籍战士马飞虎带回来的.

那年军校毕业，张连长主动申请到艰苦地区工作，分配到某连任排长. 几年后调任连队主官，他又主动申请到东风泉哨所任连长.

官兵巡守边防线. 开吾赛尔摄

巡逻路烈日如火，经常狂风骤起，官兵在戈壁荒山无处藏身，张连长同官兵们商议后，决定在巡逻路上重要点位建几个掩体，既可做潜伏观察点，巡逻途中突遇恶劣天气也可暂时躲避.

于是，他和战士们巡逻时，沉重的装具和背囊上，又多了钢钎、铁锹、锤子和十字镐. 4个多月时间，他们在坚硬的山头凿出 6 个掩体，仅十字镐就挖坏 25 把. 为了让掩体更坚固耐用，他们特意把盖掩体顶棚的粗木用沥青泡过，以增强防腐性.

“也许在别人眼里，这里是荒凉的，但我们不觉得，因为这里是我们守卫的家. 是家，就要主动开展建设，营造拴心留人的环境. ”张连长说.

营区对面山脚下，有一片辽阔斜坡. 张连长思忖了很久，向营里汇报想法：将斜坡铲平，为连队建设一个多功能综合训练场.

营里派出施工机械支持，但山坡铲平后，大量工作需要人工完成.

在两年多的时间里，全连官兵顶着烈日风沙，平场地、建障碍场，一点点完成了所有建设.

“你把官兵当家人，官兵就把连队当家建. ”在东风泉哨所，每一名老兵都怀有对连队质朴而真挚的情感.

妻儿来队探亲，岳明明一家三口来到界碑前. 开吾赛尔摄

几年前，岳明明的父亲在整修老家房屋时不慎摔伤，他的弟弟在外地求学，家人都希望他脱下军装，回乡挑起家庭重担.

当时岳明明即将服役期满，面对进退走留，他爬上一座入伍之初就喜欢独处的山头，坐在山石上反复思量.

一个声音对他说：“连队人才青黄不接，我这个老兵怎能离得开？”

另一个声音也在耳边回响：“在边防扎根 12 年，我曾摘金夺银，也曾立功受奖，还当上了班长，青春没有虚度，是该回亲人身边尽孝了……”

然而，还没等他向连队吐露心声，连长的一句“连队需要你，请你留下来”，马上让他改变了主意，坚持初心，留在连队.

几年后，岳明明一级上士服役期满，当他再次征求家人的意见时，竟意外得到家人的支持：“既然离不开，全家一起支持你！”

岳明明悬着的心放下了. 他在写给党支部的思想汇报中真诚地说道：“只要连队需要，我愿一直守着边防线！”

杜坤坐在山坡上眺望远方. 开吾赛尔摄

“如果不来这里，我这辈子都体会不到界碑在军人心中的分量. ”中士杜坤说.

杜坤是昆明医学院临床口腔专业的本科生. 他参军的想法很单纯，先圆了军旅梦，回去再续当口腔医生的梦.

学完报务专业来到东风泉，第一次接水刷牙，水里一股咸涩味，他以为自己杯子没洗干净. 班长看着他呵呵笑：“这水已经净化过了. ”

流鼻血、拉肚子，在身体因水土不服饱受折磨时，战友的关怀与温暖，为他的心灵打开另一扇窗：“我从 3000 多公里之外的昆明来这里，不是来被人照顾的，战友能做到的事，我也能做到. 我要和大家一样，努力成为一名合格的边防军人. ”

“坚持你所热爱的，热爱你所坚持的，就是最好的青春. ”明白了这个道理，杜坤每天精神抖擞，他笑着对记者说：“如果天气晴好，这里的蓝天白云、璀璨星空，跟我的家乡一样美. ”

前年义务兵服役期满，家人和同学担心他荒废了专业学习，打电话劝他退伍. 杜坤还是选择留队选晋中士.

Dongfengquan Outpost: A Clear Spring Soothes Soldiers' Hearts

■ Liang Chengxin, PLA Daily Reporter, Wang Yanxiang, Special Correspondent, Wang Mengyuan

"First there was the spring, then there was the outpost." Photo by Kai Wusail

This is an outpost nestled in the Gobi Desert of northern Xinjiang, named after a clear spring.

Deep in the vast Gobi Desert, in the heart of the Badain Jaran Desert, stands the Dongfengquan Outpost, a "Model Company of Loyal Border Guards" of a regiment under the Xinjiang Military Command.

Here, amidst whirring sand and boulders, scorching sun, and a hundred-mile radius of uninhabited land. When soldiers go out on patrol, they find themselves in uninhabited territory, with barely any cell phone signal, no greenery to be seen, and only the sound of the wind. Where does spring water come from in the desolate Gobi Desert?

When stationed in the Gobi Desert, water is paramount. Decades ago, the then-deputy company commander volunteered to lead a team on camels in search of a water source. After seven days and nights of trekking, they finally found a few clusters of red willows in a remote area. They immediately wielded shovels and pickaxes to chip away at the gravel until a clear spring gushed out from the cracks.

The rushing spring water was like a gentle breeze blowing through my heart. Later, the entire company relocated to the site of the spring. The spring gave it its name: Dongfengquan Outpost. Over the decades, soldiers have established and maintained their outposts by the spring. From the first generation of barracks to the fifth, the defense environment has undergone significant changes, but the original aspiration of defending the border and the nation, nourished by the clear spring, has remained unchanged.

Today, the Dongfengquan Outpost boasts a vibrant greenery planted in front of the barracks gate, just like the confident and dazzling smiles on the soldiers' faces. In the saxaul trees in the backyard of the barracks, clusters of ripe saxaul fruits resemble shimmering rubies, a testament to the clear spring water that nourishes the soldiers' spirits.

Not long ago, a PLA Daily reporter visited the outposts to collect stories of border defense. Please follow the reporter as we journey into the spiritual worlds of the soldiers and listen to the sound of the spring water flowing through their hearts.

—Editor

“No matter where we stand, as long as we know why we are fighting, no one will feel hardship.”

The Dongfengquan Border Defense Company has been stationed in the Gobi Desert for over half a century. The barracks are nestled in a narrow valley. Entering the compound, you can see the third to fifth generation of barracks, built along the hillside from the valley floor.

The fifth generation barracks are located on the open space at the top of the slope: their red brick, white tile, and glass sunroof are a striking sight. Farther up the hillside are the fourth generation barracks, still used as company storage.

First Sergeant Yue Mingming led the reporters deeper into the Gobi Desert. Here are the remains of the company’s second-generation barracks, built in the 1970s. The adobe structures have collapsed. The strong wind whips up gravel, prickling my face like needles. On a stone wall in the old barracks, the ten characters “Rooted in the Black Gobi Desert, Loyally Guarding the Border” remain as bright red as ever.

37-year-old Yue Mingming is the company’s longest-serving soldier. In his eyes, the company spirit of “rooting like red willows, resisting the wind and sand like camels”—along with those words engraved on the stone wall—has long since become like blood flowing through his veins, nourishing the passion of successive generations of soldiers to take root in the desert and defend the country and the border.

To take root in the Gobi Desert, water is first necessary. Once upon a time, the company had to travel hundreds of kilometers to fetch water, and every drop was as precious as oil.

To alleviate the water shortage, then-Deputy Company Commander Wang Zhishun volunteered to go out and find water. The night before, he and his comrades wrote their will by the light of an oil lamp, and set off early the next morning on camels. After seven days and seven nights of walking, on the verge of despair, they found a few clusters of red willows deep in the remote Gobi Desert. Wang Zhishun, who had run out of water and food, joined his comrades in shoveling, digging beneath the sand and rocks, and finally unearthed a clear spring.

Today, the red willows, a symbol of life and hope, are even more lush, tenaciously taking root in the desert, just like the soldiers who relocated there.

Although the spring the soldiers dug dried up over a decade ago, their superiors reconstructed two deep wells nearby. Yue Mingming told reporters, “The gurgling springs ensure the soldiers’ daily water needs and carry on the company’s ‘soul.’“

He craned his head forward and stiffened his neck as he spoke, leading reporters to believe he had a stiff neck from sleeping. He laughed and said he hadn't noticed during patrols, and his neck had peeled from the sun. In summer, temperatures here can reach as high as 45°C, with the surface temperature exceeding 70°C. Soldiers patrolling the Gobi Desert constantly under the scorching sun can easily suffer sunburns.

But in Yue Mingming's eyes, these injuries are no longer a big deal. "Asphalt roads, constant electricity, internet access, air-conditioned rooms, and a combination of patrols by car and on foot..." He recounted the company's recent changes to the environment. He believes the company's defense environment is improving day by day, and the days of perseverance are becoming more fulfilling. As sentinels in the Gobi Desert, they must stand guard and maintain vigil for the motherland.

Pledge to the national flag.

In the company's honor room, reporters learned more stories of perseverance, "hardships before sweetness, bitterness within sweetness."

That year, the company built new barracks, requiring excavation into the steep mountainside. Several bids were issued, but no one accepted due to the challenging construction conditions.

"If others don't want to do it, we'll do it ourselves." The then-company commander led Party members and cadres, leading by example. They carried heavy air compressor drill rods and worked suspended mid-mountain, their safety ropes leaving bloody marks on their waists and legs... A year later, a multi-purpose barracks was built.

When Yue Mingming first joined the army, he happened to be working on the company's new fiber optic cable installation. He and his comrades toiled day and night, digging trenches for the cables in the hard Gobi Desert. Their exposed skin was sunburned and peeling. In the toughest sections, they wielded pickaxes, hammers, and chisels with such force that their knuckles went numb, and they couldn't even hold chopsticks while eating.

Another time, during a 5-kilometer armed cross-country run, a sandstorm arrived, making it impossible to see beyond five meters. By the end of the test, the companies were neck and neck. "Come again! Let's compete again!" Unwilling to admit defeat, the then-company commander proposed, and the entire company responded eagerly. A new round of competition began, and they won the championship with a commanding advantage. Their fellow units gave them a thumbs-up for their tenacity and unity. At that moment, the entire company wept with joy.

"No matter where we stand, as long as we know why we're fighting, no one will feel the hardship," said Yue Mingming. The company commander who led his comrades to victory enlisted at the Dongfengquan outpost and, after passing the entrance exam and being promoted, applied to return there. Despite the harsh conditions of the Gobi Desert, many soldiers on duty have planted their

roots here, because here, they stand guard with a clear conscience and embody their true military spirit.

“People, like trees, must have deep and solid roots in order to grow upwards.”

There are several saxaul trees in the company’s backyard. Looking out the window from my room, I see two trees standing side by side, both as thick as bowls, their branches adorned with vibrant red saxaul fruits.

A platoon leader recounts the company’s glorious traditions in front of the “husband and wife trees.” Photo by Kai Wusaier.

These are a pair of “husband and wife trees.” In the past, the company had no communication signal, no constant electricity, and no paved roads. Soldiers returning from family leave had to take three buses from Jiuquan, and the company would then send another bus to meet them at a station hundreds of kilometers away. It would take two or three days of traveling through the vast Gobi Desert to reach the company.

Because of the remote and difficult conditions, the company’s officers and men were reluctant to allow their wives to visit. That spring, veteran Hui Weiping’s wife came to Dongfengquan without telling him. Standing beneath the saxaul tree her husband had planted, she tearfully expressed her desire to plant one, too. She wanted the two trees to stand together and defend the country.

Such stories of perseverance are countless in this company. First Sergeant Luo Jie once had a comrade from his hometown who, upon enlisting, burst into tears when he arrived in the Gobi Desert, asking, “How can we survive this endless wasteland?”

Luo Jie comforted him, urging him to persevere for another two years, and time flew by. However, upon completion of their service, two-thirds of his fellow enlisted soldiers wanted to remain in the company, but due to limited vacancies for promotion to sergeant, only a few remained. That fellow villager had no choice but to leave the company, and that day, he cried like a child.

In Luo Jie’s view, his fellow villager’s two tears represented two different states of mind, and also witnessed a soldier’s inner growth.

“Standing sentry at night, it was pitch black, and the company lights were the only illumination in the Gobi Desert.” When he first arrived at the company, Luo Jie felt lost and confused. His father, a former soldier, counseled him over the phone: “People, like trees, must have deep, solid roots in order to grow upward.”

Tree planting is a major undertaking for the company. The company plants an average of 100 to 200 trees each year, but only a dozen survive the following year. Driven by a desire for greenery, the soldiers do everything they can to keep the trees alive.

A row of trees was planted in front of the company gate. Soldiers told reporters that beneath each tree was a stone trough, connected to a tree pit. They regularly filled the troughs with water, acting

like floor drains, continuously supplying water to the tree roots. Luo Jie has been a soldier for 14 years, and to date, he's only managed to plant a few elm trees. "We won't give up. As long as there's a glimmer of hope, we'll plant trees every year," Luo Jie's eyes sparkled, as if telling the reporter that planting trees is planting hope.

"I planted this saxaul tree. I care for it like I care for my own eyes," soldier Ren Zhuangxiu told the reporter. This tree is his root, embodying his hard work and sweat.

Ren Zhuangxiu, from Qingdao, Shandong, comes from a well-off family. Before joining the army, he spent lavishly. His parents specifically wanted him to join the army and receive training.

When he first arrived at the company, Ren Zhuangxiu was filled with a sense of urgency, finding all sorts of excuses to avoid training, eagerly anticipating the day he'd be discharged.

As he followed his comrades on patrol, Ren Zhuangxiu gradually became inspired by their dedication and commitment. Just like the red willows in the Gobi Desert, thriving after frost, six months later, he was at the forefront of every task, gradually regaining his confidence and beginning to reflect on what constitutes a meaningful youth. After watering the trees that day, Ren Zhuangxiu went to change his post. As he walked, he reminisced with reporters: Last March, he was successfully promoted to corporal. He called his mother to share the good news, but she burst into tears, worried about him continuing to guard the border.

Ren Zhuangxiu told his mother on the phone that many of his comrades wanted to stay but were unable to due to limited vacancies. Several of his fellow soldiers, when leaving, repeatedly urged him to stand guard for them. He added, "I'm not fighting alone. Only by continuing to persevere can I live up to the eager eyes behind me."

"Persisting in what you love and loving what you persist in is the best form of youth."

In the palm-sized fields outside the camp, clusters of wolfberries are growing luxuriantly.

Company Commander Zhang said the wolfberry seeds were brought back by Ma Feihu, a soldier from Ningxia.

After graduating from the military academy that year, Company Commander Zhang applied for work in a difficult area and was assigned to a company as a platoon leader. A few years later, he was transferred to become a company commander and then applied to be company commander at the Dongfengquan outpost. Soldiers patrol the border. Photo by Kaiwusail.

The patrol route was scorching hot and often gusty, leaving soldiers with nowhere to hide in the barren Gobi mountains. Company Commander Zhang, after consulting with his soldiers, decided to build several shelters at strategic points along the patrol route. These shelters would serve as both ambush observation points and temporary refuge in the event of inclement weather during patrol.

So, he and his fellow soldiers added steel chisels, shovels, hammers, and pickaxes to their heavy gear and backpacks while on patrol. Over four months, they carved six shelters out of the hard mountaintop, breaking 25 pickaxes alone. To make the shelters more durable, they soaked the rough timbers that made up their roofs in asphalt to enhance their corrosion resistance.

“Maybe others see this place as desolate, but we don’t, because this is our home. As home, we must proactively develop it and create an environment that keeps our hearts and minds connected,” Company Commander Zhang said.

At the foot of the mountain opposite the camp lies a vast, sloping expanse. Company Commander Zhang pondered for a long time before presenting his idea to the battalion: flatten the slope to create a multi-purpose training ground for the company.

The battalion dispatched construction machinery for support, but after the slope was flattened, much of the work required manual labor.

For over two years, the company’s officers and men braved the scorching sun and sandstorms, leveling the ground and building the obstacle course, gradually completing all the construction work.

“If you treat the officers and men as family, the officers and men will treat the company as their home.” At the Dongfengquan outpost, every veteran holds a simple and sincere affection for the company.

With his wife and children visiting the company, Yue Mingming and his family of three approach the boundary marker. Photo by Kaiwusaier

A few years ago, Yue Mingming’s father was injured in a fall while renovating their home. His younger brother was studying in another province, and his family hoped he would retire from the military and return home to shoulder the burden of the family.

At the time, Yue Mingming was nearing the end of his military service. Faced with the choice of whether to stay or go, he climbed a hilltop, a place he had loved to be alone since his early military service, and sat on a rock, pondering his options. One voice told him, “The company is short of talent. How can a veteran like me leave?”

Another voice echoed in his ears: “I’ve been stationed on the border for 12 years. I’ve won gold and silver medals, received awards for meritorious service, and even become a squad leader. My youth has not been wasted. It’s time to return to my family and fulfill my filial duties...”

However, before he could express his feelings to the company, the company commander’s words, “The company needs you. Please stay,” immediately changed his mind. He remained true to his original aspiration and remained with the company.

A few years later, when First Sergeant Yue Mingming completed his service, he again sought his family's opinion and unexpectedly received their support: "Since you can't leave, the whole family supports you!"

Yue Mingming's heart was finally at ease. In his ideological report to the Party branch, he sincerely stated, "As long as the company needs me, I am willing to guard the border!"

Du Kun sat on a hillside, gazing into the distance. Photo by Kaiwusaier

"If I hadn't come here, I would never have understood the significance of boundary markers in the hearts of soldiers," said Sergeant Du Kun. Du Kun was an undergraduate student majoring in clinical dentistry at Kunming Medical College. His reason for joining the army was simple: to fulfill his military dream first and then pursue his dream of becoming a dentist.

After completing his radio operator program, he arrived at Dongfeng Spring. The first time he brushed his teeth with water, it tasted salty and astringent. He thought he hadn't rinsed the cup properly. The squad leader looked at him and chuckled, "This water has been purified."

Suffering from nosebleeds and diarrhea, and suffering from acclimatization, the care and warmth of his comrades opened another window to his heart: "I came here from Kunming, over 3,000 kilometers away, not to be taken care of. What my comrades can do, I can do too. I will strive to become a qualified border defense soldier, just like everyone else."

"Persisting in what you love, and loving what you persist in, is the best form of youth." Understanding this truth, Du Kun is full of energy every day. He smiled and told reporters, "If the weather is fine, the blue sky, white clouds, and brilliant stars here are as beautiful as those in my hometown."

Two years ago, when his conscription service ended, his family and classmates, worried that he would neglect his professional studies, called to persuade him to leave the army. However, Du Kun chose to stay and was promoted to sergeant.

攻坚"十四五"非凡这五年丨陆战雄师面向战场加速转型

来源：中国军网-解放军报 作者：钱晓虎 李佳豪 责任编辑：徐占虎 发布：2025-10-13

以科技赋能重塑战场维度

陆战雄师面向战场加速转型

陆军某旅开展无人机侦察训练（资料照片）. 黄鹤明摄

解放军报讯 记者钱晓虎、特约记者李佳豪报道：“以前怎么也没想到，我们装甲兵有朝一日也能利用光学、红外和雷达传感器，远距离、无死角感知战场态势. ”近日，一场合成营战术演练结束后，陆军某旅车长孙永明感慨地说. 他告诉记者，以往他们习惯了利用驾驶潜望镜窥视战场，如今随着新一代主战坦克列装部队，作战模式已从过去的近距离“拼刺刀”转变为超视距作战，装甲兵的战位坐标系也完成了由地面二维，向空地、网电一体的更高维度转变.

沙场，标定着一名士兵坐标系的“维度”之变；碧波，则承载着一支新质作战力量坐标系的“广度”之变——深秋滨海，某陆航旅飞行员杜潞正驾机进行海上训练.

从世界屋脊到大漠戈壁，从贺兰山麓到万里海疆……走出座舱，杜潞指着机场内“机动作战、立体攻防”的标语说，这些年，他和战友们的练兵航迹延伸得越来越远.

与杜潞一样，陆军某旅某合成营袁营长也深切感受到陆军的转型变化. 在刚刚结束的一场实战化演训中，他不仅能调遣自己营里的“车马炮”，还能呼叫其他军兵种配属力量提供支援、联袂歼“敌”.

谈及这幅“战车共战鹰一色，炮弹与导弹齐飞”的练兵新图景，袁营长自豪地说：“今天的作战模式已超越了传统陆战尺度，成为我军联合作战的一个缩影. ”

以科技赋能重塑战场维度. 从东海之滨到西部高原，从南国密林到北国雪原……踏访陆军部队座座营盘，“变化”成为官兵口中的高频词.

且看“跨度”之变——越来越多的新型装备列装部队，编制岗位更加细化，一批新兵种、新专业相继诞生. 前不久，某新型火箭炮威武列阵通过天安门广场，光荣接受党和人民检阅. 在其完美亮相的背后，是某旅数百名“神炮手”跨界转岗、能力转型，昼夜奋战苦学新专业的全力托举.

且看“速度”之变——金秋塞北，某演训场，枪炮声还未响起，一场无声对决已在电磁空间上演. 激烈对抗中，某旅电子对抗分队率先致“敌”指挥通信链路瘫痪，抢占制胜先机.

且看“高度”之变——作为一名步兵，某旅下士田思政对航空器在不同高度气动性能、雷达探测高度等飞行数据熟稔于心. 他告诉记者，这些年，随着无人化、智能化武器装备相继列装部队，他也成为一名兼职无人机飞手，从地面一跃“飞”上了天空，“高度”是他战位坐标系中的关键参数.

广度、尺度、跨度、速度、高度……一个个新“参数”，构成了陆军部队全新战位坐标系；孙永明、杜潞、田思政……奋进“十四五”，一名名官兵的精彩亮相，塑造出陆战雄师的崭新形象.

近日，刚刚结束跨区驻训的某旅官兵顾不上休整，立即投入到某项新战法试训任务中. “启新又一程，未到下鞍时. ”谈及此事，该旅官兵话语铿锵，“这就是我们这代革命军人的如山使命——向着如期实现建军一百年奋斗目标奋力冲锋，跑出强军加速度！”

Overcoming the Extraordinary Five Years of the 14th Five-Year Plan | The Land Force Accelerates Its Battlefield Transformation

Source: China Military Network - PLA Daily Author: Qian Xiaohu, Li Jiahao Editor: Xu Zhanhu Published: October 13, 2025

Empowering the Army with Technology to Reshape the Battlefield

The Land Force Accelerates Its Battlefield Transformation

An Army brigade conducts drone reconnaissance training (file photo). Photo by Huang Heming

PLA Daily Reporter Qian Xiaohu and Special Correspondent Li Jiahao report: “I never imagined that our armored troops would one day be able to utilize optical, infrared, and radar sensors to perceive the battlefield situation from a long distance and with no blind spots.” Sun Yongming, a vehicle commander of an Army brigade, said with emotion after a recent combined battalion tactical exercise. He told reporters that they used to peer into the battlefield through driver’s periscopes. Now, with the deployment of the new generation of main battle tanks, the combat mode has shifted from close-range bayonet combat to beyond-visual-range combat. The armored troops’ combat position coordinate system has also evolved from a two-dimensional ground-based system to a higher-dimensional system integrating air, ground, network, and electronic warfare. The battlefield marks the shifting dimensions of a soldier’s coordinate system; the emerald waters carry the shifting breadth of a new combat force’s coordinate system. In late autumn, on the coast, pilot Du Lu of an Army Aviation Brigade is conducting maritime training.

From the roof of the world to the vast desert, from the foothills of the Helan Mountains to the vast sea... Stepping out of the cockpit, Du Lu points to the airport’s sign that reads “Mobile Operations, Three-Dimensional Offense and Defense” and explains that over the years, he and his comrades have expanded their training routes further and further.

Like Du Lu, Captain Yuan of a combined arms battalion in an Army brigade has also deeply felt the Army's transformation. In a recently concluded live-fire exercise, he was able to not only mobilize his own battalion's artillery, but also call on forces from other services for support and jointly defeat the enemy. Speaking of this new training landscape of "tanks and eagles alike, artillery shells and missiles flying in unison," Battalion Commander Yuan proudly stated, "Today's combat model has transcended the traditional scale of land warfare and has become a microcosm of our military's joint operations."

Technology empowers and reshapes the battlefield. From the shores of the East China Sea to the western plateaus, from the dense forests of the south to the snowy plains of the north... visiting army camps, "change" becomes a frequent word on the lips of officers and men.

Observe the shift in "span"—an increasing number of new equipment is being deployed, organizational positions are becoming more refined, and a host of new military branches and specialties are emerging. Not long ago, a new type of rocket launcher marched majestically through Tiananmen Square, proudly receiving the review of the Party and the people. Behind its flawless appearance lies the dedicated support of hundreds of "master gunners" from a certain brigade, who have transitioned across fields, transformed their capabilities, and diligently studied new specialties day and night.

Observe the shift in "speed"—in the golden autumn of the northern frontier, at a training ground, before the sound of gunfire rang out, a silent confrontation was already unfolding in electromagnetic space. During a fierce confrontation, a brigade's electronic warfare unit was the first to paralyze the enemy's command and communications links, seizing the initiative for victory.

Observe the transformation of "altitude"—As an infantryman, Corporal Tian Sizheng of a certain brigade is intimately familiar with aircraft aerodynamic performance at different altitudes, radar detection altitudes, and other flight data. He told reporters that in recent years, with the induction of unmanned and intelligent weapons and equipment, he has become a part-time drone pilot, leaping from the ground into the sky. "Altitude" is a key parameter in his combat position coordinate system.

Breadth, scale, span, speed, altitude... these new "parameters" constitute the Army's new combat position coordinate system. Sun Yongming, Du Lu, Tian Sizheng... As we forge ahead into the 14th Five-Year Plan, the brilliant appearances of each officer and soldier are shaping the new image of the Land Force.

Recently, officers and men of a certain brigade, having just concluded cross-regional training, skipped time for rest and immediately plunged into a new tactical training mission. "We are embarking on a new journey, and it's not time to dismount yet." Speaking of this, the officers and men of the brigade spoke with a strong voice, "This is the unshakable mission of our generation of revolutionary soldiers - to charge forward towards the goal of achieving the centenary of the

founding of the People's Liberation Army as scheduled, and to accelerate the pace of building a strong army!"

敢打必胜 勇当尖刀

——陆军某旅"强军精武红四连"传承红色基因影像

■郑佳峻 徐晓龙 解放军报特约通讯员 刘志勇 摄影报道

执行任务前举行宣誓活动.

借助智能设备开展模拟训练.

官兵参加战备拉动.

战术训练中，官兵驾驶战车快速机动.

初秋，华东某训练场，一场综合战术训练激战正酣. 面对劲敌，陆军某旅“强军精武红四连”创新运用战法，精准锁定摧毁“敌”指挥所.

该连诞生于 1927 年黄麻起义，98 载峥嵘岁月，历经数百次战役战斗洗礼，屡建奇功. 2015 年，习主席签署命令，授予该连“强军精武红四连”荣誉称号.

抗战烽火中，连队官兵勇往直前，奋力杀敌. 1937 年 10 月 19 日，连队夜袭阳明堡日军机场，烧毁日军飞机 24 架、毙敌百余人，创造了步兵打飞机的经典战例. 战后，八路军 129 师授予该连“夜袭阳明堡战斗模范连”荣誉称号. 今年 9 月 3 日，纪念中国人民抗日战争暨世界反法西斯战争胜利 80 周年大会隆重举行，由 80 面抗战英模部队荣誉旗帜组成的战旗方队气势如虹通过天安门广场. “夜袭阳明堡战斗模范连”战旗在其中随风飘扬，光荣接受了党和人民的检阅.

赓续血脉，矢志强军. 新征程上，连队官兵牢记统帅嘱托，以冲锋姿态投身强军实践. 某型新装备列装不到百天，战斗射击全员达标；参加上级各类比武考核，刷新 7 项纪录，夺得 57 个名次；探索“无人+”“智能+”战法训法，打造“强军精武智能专修室”……近年来，该连多次参加重大演训任务并取得优异成绩，被陆军表彰为“践行强军目标标兵单位”.

Dare to Fight and Win, Bravely Serve as the spearhead—Images of the “Strengthening Army and Elite Military Red Fourth Company” of an Army Brigade Carrying Forward the Red Gene

Source: China Military Network - PLA Daily Author: Zheng Jiajun, Xu Xiaolong, Liu Zhiyong Editor: Wang Can Published: 2025-10-14

Dare to fight and win, bravely serve as the spearhead

—Images of the “Strengthening Army and Elite Military Red Fourth Company” of an Army Brigade Carrying Forward the Red Gene

■ Zheng Jiajun, Xu Xiaolong, PLA Daily Special Correspondent Liu Zhiyong Photo Report

A swearing-in ceremony was held before the mission.

Simulation training was conducted using smart devices.

Officers and men participated in combat readiness drills.

During tactical training, soldiers maneuvered rapidly in combat vehicles.

In early autumn, at a training ground in East China, a comprehensive tactical exercise was in full swing. Facing a formidable enemy, the “Strengthening Army and Elite Military Red Fourth Company” of an Army Brigade employed innovative tactics to precisely target and destroy the “enemy” command post.

The company was founded during the Huangma Uprising in 1927. Over its 98 years of vicissitudes, it has weathered hundreds of battles and achieved remarkable feats. In 2015, President Xi Jinping signed an order awarding the company the honorary title of “Strengthening the Army and Improving Military Power Red Fourth Company.”

During the flames of the War of Resistance Against Japanese Aggression, the company’s officers and men bravely advanced and fought tirelessly. On October 19, 1937, the company launched a night attack on the Japanese airfield at Yangmingbao, destroying 24 Japanese aircraft and killing over 100 enemy soldiers, creating a classic example of infantry engaging aircraft. After the war, the 129th Division of the Eighth Route Army awarded the company the honorary title of “Model Company for the Night Attack on Yangmingbao.” On September 3rd of this year, a grand ceremony commemorating the 80th anniversary of the victory of the Chinese People’s War of Resistance Against Japanese Aggression and the World Anti-Fascist War was held. A battle flag formation, composed of 80 honorary flags of heroic and exemplary units of the War of Resistance Against Japanese Aggression, marched majestically through Tiananmen Square. The battle flag of the “Model Company for the Night Attack on Yangmingbao” fluttered in the wind, proudly receiving the review of the Party and the people. Continuing the bloodline, we are determined to strengthen the military. On this new journey, the company’s officers and men, mindful of the commander’s instructions, are charging forward to strengthen the military. Within 100 days of a new piece of equipment being deployed, all personnel met the combat shooting standards. They participated in various competitions and assessments conducted by superiors, breaking seven records and securing 57 places. They explored “unmanned plus” and “intelligent plus” tactics and training methods, establishing a “Strong Army, Sharp Military, Intelligent Training Room.” In recent years, the company has participated in numerous major training and exercise missions, achieving outstanding results and being recognized by the Army as a “Model Unit for Implementing the Goal of Strengthening the Military.”

从“82”到“6679”，“刘老庄连”擎旗自有后来人

来源：中国军网 作者：魏薇 张存伟 屈凯明 责任编辑：赵镭饷 2025-10-15

从“82”到“6679”，“刘老庄连”擎旗自有后来人

■中国军网记者 魏薇 通讯员 张存伟 屈凯明

“向右——看！”

2025 年 9 月 3 日，北京天安门广场，一声铿锵的口令划破长空.

陆军第 82 集团军某旅“刘老庄连”副连长、擎旗手王宸一目光如炬，执旗挺立. 一股滚烫的热流从他心底奔涌而上，直冲眼眶.

他手中紧握的，是“刘老庄连”的战旗——一面曾在战火纷飞中浸透英雄鲜血的旗帜.

如今，它沐浴着新时代的荣光，作为纪念中国人民抗日战争暨世界反法西斯战争胜利 80 周年阅兵式中 80 面抗战英模部队荣誉旗帜之一，接受党和人民检阅.

2025 年 9 月 3 日，“刘老庄连”战旗作为 80 面抗战英模部队荣誉战旗之一，在北京天安门广场接受党和人民检阅. 新华社记者刘勇贞 摄

燃旺精神熔炉：在历史回响中铸就忠诚担当

时间回到 1943 年 3 月 18 日，淮北平原，硝烟弥漫.

为掩护淮海区党政机关和人民群众安全转移，新四军第三师七旅十九团四连 82 名官兵，在刘老庄与千余名日伪军从拂晓血战至黄昏，最终全部壮烈牺牲.

乡亲们含泪掩埋烈士，又送 82 名青年参军，新四军第三师七旅重新组建连队并命名“刘老庄连”——这支为了人民全员牺牲、又依靠人民涅槃新生的英雄连队，旗帜再次高高飘扬.

80 多年过去，钢铁信念从未褪色.

在“刘老庄连”的荣誉室内，几件文物默默诉说着一段感天动地的历史：一杆在白刃战中捅弯的步枪枪管，几段烧焦的护木和砸断的枪托.

对于连史讲解员、中士张宇航而言，它们不仅是陈列的展品，更是每次讲述都会让他和战友们为之振奋的精神火种.

2021 年，刚入伍的张宇航就听说旅里有个英模单位“刘老庄连”. “先进连队标准高、要求严. ”下连之初，他心里满是忐忑.

然而，义务兵服役期满时，这个曾经想着“熬两年就退伍”的兵，第一个递交留队申请. 而今，张宇航已经成长为连队的训练尖子和理论骨干，被旅表彰为“四有”优秀士兵.

是什么让他发生如此转变？

“进了‘刘老庄连’，就像踏进了一条奔涌的河！”张宇航坦言，一开始是被连队那股劲儿推着走，后来慢慢自己发力，现在带着战友一起冲.

这股劲儿从何而来？连队官兵你一言我一语地道出缘由——

新兵聆听战旗的故事. 解放军报记者栾铖 摄

新兵下连第一件事是走进连队荣誉室，参观红色文物；第一堂课是聆听“八十二勇士”血战刘老庄的故事；学的第一首歌是连歌，看的第一部影片是《刘老庄八十二壮士》.

每天晚点名齐唱连歌、高喊连魂；每季度动态更新荣誉簿；每年评选“新时代刘老庄八十二勇士”.

训练场上，干部骨干第一个上、第一个投、第一个考；公差勤务、站哨帮厨，干部战士一个标准；遇到脏活累活，党员站前排、骨干带头干.

连队政治指导员戴天骄常说：“我们‘刘老庄连’就像一个大熔炉，进门一块铁，出炉硬如钢. ”

这座熔炉的能量，不仅锻造了个体，更凝聚了集体.

2023 年夏天，华北多地遭遇洪涝灾害. 当时，“刘老庄连”大部分官兵正在南苏丹执行维和任务，留守的 26 人中，大多是入伍不久的新兵.

得知上级因“任务险重”没有将他们列入首批救援队伍，官兵们仍连夜准备救援器材，打好背囊，写下请战书，按上 26 枚红手印：“我们‘刘老庄连’全体官兵誓死要上抗洪一线. ”

获准驰援后，这群年轻战士立刻奔赴灾区投入抢险，搬运沙袋、填堵决口、涉水打桩，不分昼夜高强度作业，脖颈晒脱了皮，迷彩服结成泥壳，脚底磨出血泡，却始终没有一人退后半步. 连续奋战多天，圆满完成任务.

临行前，他们将借宿学校打扫干净，桌椅摆放整齐，在教室黑板上，为同学们深情写下：“你们只管好好学习，我们负责保家卫国. ”

远在万里之外的维和营地，连长朱明朝接到过两次连队打来的电话：一次是战士们奔赴灾区的集体请战，一次是从抗洪大堤传回的捷报. “电话那头，那帮小子七嘴八舌地说‘任务完成了’，虽然嗓子都累哑了，但那个兴奋劲儿，隔着万里都能感受到. ”朱明朝说着，眼圈红了，“虽然他们来连队时间不长，但已经长出了‘刘老庄连’的骨头. ”

这份印着 26 个红手印的请战书，如今就珍藏在连队荣誉室，与先烈的遗物并肩陈列. 它们跨越时空，共同诠释着“全心全意为人民服务”的不变宗旨.

续写英雄荣光：在加钢淬火中磨砺胜战刀锋

在“刘老庄连”的花名册上，每个名字前都有一个特殊的数字. 它不是冰冷的序号，而是融入军人生命的精神代码，是英雄传人的身份印记，更是一份需要终身践行的荣光承诺.

“我是‘刘老庄连’英雄传人，我的战斗编号是 6679. 我将发扬连魂精神，生命不息、战斗不止……”今年 7 月，在连队战斗编号授予仪式上，新兵董洪运面向战旗，庄严宣誓.

他明白，这组数字承载着历史的重量——1943 年刘老庄战斗结束后，连队重建，官兵们决定从“第 83 号”起续写花名册，让英雄血脉永不断绝.

“只有为连旗增光的义务，没有给连旗抹黑的权利. ”这句话从入连第一天起就刻在了连队每名官兵心里. 董洪运更是憋着一股劲，“我的战斗编号是全连最大的数字，说明我是最新的兵，但新绝不等于弱. ”

为了真正撑起这个编号，董洪运把自己“钉”在训练场. 体能训练，他穿上沙背心负重练习，瞄着连队“龙虎榜”上的纪录咬牙逼近；装备操作，他对照规程不断磨合，摸索出提升效率的实用技巧.

在汗水浇灌的日子里，董洪运的训练成绩稳步提升，首次考核就拿下总评“优秀”——而这，仅仅是他迈出“6679”的第一步. 作为荣誉集体的一员，董洪运明白，全面过硬才称得上是“刘老庄连”的兵.

训练争第一、比武夺红旗，在“刘老庄连”，人人都在为荣誉传承而战.

2022 年，连队班长洪何亮参加旅狙击集训. 步兵专业出身的他，面对清一色的侦察专业尖子，第一次摸底考核成绩垫底. 想在短短三周内实现逆袭，几乎是不可能完成的任务.

这个倔强的老兵和自己较上了劲. 练据枪，他一趴就是几个小时，汗水顺着脸往下滴，枪管上的弹壳从一个垒到三个，完成一天训练，胳膊抖得握不住筷子；练专注，他蒙上眼睛，凭感觉用针尖穿米粒，手指头扎破了就缠上胶布接着练，吃饭排队嘴里还背着参数；练稳定，他专挑冲完四百米、心率最快的那一刻出枪瞄准. 最终，他硬是靠实力拿下集训第一，被连队评为“新时代刘老庄八十二勇士”.

今年 4 月，“刘老庄连”又迎来了洪班长的另一桩喜事——一对双胞胎儿子平安出生. 他第一时间把照片发在朋友圈，战友们纷纷留言：“好好培养俩‘小勇士’，将来咱连队的编号，等着他们来接续！”

“每年评选‘新时代刘老庄八十二勇士’，就是要让英雄血脉可见、可感、可传承.”戴天骄说，只有成为尖刀上的刀尖，才有资格将自己的战斗编号与“八十二勇士”传人画上等号.

作为土生土长的刘老庄人，二级上士杨永杰更加珍视这份荣誉. 每次休假回家，乡亲们问得最多的就是：“在英雄连队干得咋样？没给咱老家丢人吧？”

入伍以来，他屡次登上军事训练“龙虎榜”，但一次比武失利，却让他彻夜难眠. “刘老庄籍的兵输了”这个念头如同夜色一样沉重. 他独自走进荣誉室，借着微光，看着老连旗良久未动：“先烈们用生命换来的荣誉，是肩上沉甸甸的责任，更是我们闯关夺隘的底气.”

很快，战友们就发现杨永杰有了新变化. 训练场上，他不再单纯追求碾压式的胜利，而是专注于“战场生存”和“极限反杀”. 他苦练单手构筑掩体，每次筋疲力尽时，心里就铆着一股劲，“如果实战中我一只手受伤，难道就坐以待毙吗？”最近，他又在琢磨怎么在极端环境下提高出枪速度. 驱使他前进的不再是对失败的恐惧，而是“绝境也要杀出血路”的必胜信念.

“从刘老庄走来，更要为刘老庄争光！”杨永杰说，82 年来，共有 170 名刘老庄籍战士在这支英雄连队服役，大多数人都成长为训练骨干，他们的名字，永远铭刻在连队的荣誉史册里.

“刘老庄连”开展仪式教育，激励官兵奋斗强军. 解放军报记者栾铖 摄

瞄准未来战场：在转型攻坚中锻造合成精兵

“距离下一场战争打响还有 0 日.”

在“刘老庄连”营房门前的电子显示屏上，一条标语格外醒目.

和全军许多英模连队一样，他们也曾经历转型之痛. 如何续写英模连队荣光，打赢下一场战争？是官兵亟须作答的时代考题.

几年前的一场实兵演习，上级为连队配属了侦察、电抗、工兵等多支力量. 然而，这场预期中的“强强联合”却“痛点”频现，因协同不畅，转型不久的“刘老庄连”险尝败绩.

“体系练兵的时代来了，我们准备好了吗？”复盘会上，时任连长邢光超的发问刺痛了所有人. 官兵们深刻反思：单兵再强，若无法融入体系，终将成为未来战场上的“孤岛”.

连队党支部率先达成共识：在合成营的“大棋盘”上，不仅要当好“棋子”，还要具备“棋手”思维.

“换脑”成为第一步. 邢光超的突击背包里，多了一份不断更新的“火力计划”. 他带着连队干部骨干走进炮兵分队拜师学艺，从最基础的口令、射表开始学起.

连队官兵也到工兵、电抗等兄弟单位跟训见学，一步一动夯实协同基础. 通过反复演练，他们摸索出一套适合步兵分队的火力呼叫规范，在后续演习中发挥了关键作用.

训练间隙，官兵进行复盘总结. 解放军报记者栾铖 摄

2022 年，现任连长朱明朝接过了转型的接力棒. 他带领连队利用体系演习、合成训练的机会，接续蹚开“开门练兵、跨界协同”的新路子.

“过去觉得步兵能冲能打就是王道，现在一个班要能协同炮兵火力、能呼叫空中支援，必须成为一个精干多能的作战节点.”朱明朝感慨道.

转型成果在近期演习中经受住了检验. 面对蓝军电磁干扰、无人机袭扰、道路被毁等多重特情，连队官兵见招拆招，迅速实施反制，调集道路抢修分队顺利脱困，采取有人无人协同进攻破除一道道障碍. 硝烟散去，一条开阔的通路被成功打开.

然而置身合成转型浪潮，官兵们还要应对更多未知的挑战. “一招鲜”再也无法“吃遍天”，战场呼唤的是“一专多能、多专多能”的复合型人才.

为此，连队为每名官兵量身定制成长“路线图”，建立个性化“数据库”，将训练成绩曲线图挂在“研战角”精细分析，动态调整训练计划. 自那时起，和其他专业力量绑在一起训，和友邻分队捆在一起练，成为这支老牌英模连队的新传统.

一次战术演练，班长洪何亮在两名战友“阵亡”后，一人顶替两个战位继续战斗，成功端掉“敌”多个火力点. 连长朱明朝介绍，这得益于他经历过 4 个不同专业岗位的锤炼.

如今，连队干部人人精通驾驶、通信、射击，超七成的军士都像洪何亮一样，不断拓宽能力边界，成长为适应战场环境的“多面手”.

今年上半年，连队主动请缨担任某试点建设任务，全连官兵全身心投入有人无人协同战法的研练中.

跨界，需要敢于清零的勇气. 面对全新的无人平台武器装备，从军 15 年、换过 5 次岗位的一级上士朱二帅，再一次从零开始！

为尽快掌握无人平台武器装备操作，他将说明书、示范规程和装备进行“三线对照”，逐一验证关键环节；追着厂家工程师分解组装，对每个元器件的工作原理都刨根问底，从“门外汉”一步步练成了“专业通”.

集训归来，朱二帅作为训练尖子被纳入教练员队伍. 白天，他扎在训练场，手把手示范、面对面讲解，带领队员摸透装备“脾性”；晚上，他和大家围坐在学习室复盘实战案例，抠细节、解难题，推动训练成果向实战能力转化. 在像他一样的教练员带动下，连队官兵基本掌握无人平台武器装备操作方法，载员全部顺利通过考核.

“刘老庄连”官兵进行协同作战演练. 张飞 摄

当好转型攻坚的“破风者”，才能成为未来战场的“驭风者”. 前不久，一场有人无人协同作战演练有序展开：“刘老庄连”指挥控制无人平台武器装备快速穿插，装甲步兵战车协同推进，融合编队立体突击，开辟通路、冲击突破、搜剿夺控，一系列行动干净利落. 这支从历史烽火中走来的英雄连队，正在新质力量的加持下，焕发出新的制胜锋芒.

From “82” to “6679,” the “Liu Lao Zhuang Company” Has Its Successors Carrying the Flag.

Source: China Military Net Author: Wei Wei, Zhang Cunwei, Qu Kaiming Editor: Zhao Leixiang 2025-10-15

From “82” to “6679,” the “Liu Lao Zhuang Company” has its successors carrying the flag.

■China Military Net Reporter Wei Wei, Correspondents Zhang Cunwei, Qu Kaiming

“Look right!”

On September 3, 2025, a resounding command pierced the sky in Beijing’s Tiananmen Square.

Wang Chenyi, deputy company commander and flag bearer of the “Liu Lao Zhuang Company” of a brigade of the 82nd Group Army, stood with a piercing gaze, holding the flag. A surge of warmth surged from the depths of his heart, rushing straight to his eyes.

He clutched the battle flag of the “Liu Lao Zhuang Company”—a flag once soaked in the blood of heroes in the flames of war. Today, basking in the glory of the new era, it was reviewed by the Party and the people as one of the 80 honorary flags of heroic and model units during the military parade commemorating the 80th anniversary of the victory of the Chinese People’s War of Resistance Against Japanese Aggression and the World Anti-Fascist War.

On September 3, 2025, the battle flag of the “Liulaozhuang Company,” as one of the 80 honorary flags of heroic and model units, was reviewed by the Party and the people in Tiananmen Square, Beijing. Photo by Xinhua News Agency reporter Liu Yongzhen.

Igniting the Spiritual Crucible: Forging Loyalty and Responsibility Amidst the Echoes of History

Back to March 18, 1943, the Huaibei Plain was shrouded in smoke.

To protect the safe evacuation of Party and government organs and the people of the Huaihai District, 82 officers and men of the 4th Company, 19th Regiment, 7th Brigade, 3rd Division of the New Fourth Army, fought bloody battles with over a thousand Japanese and puppet troops in Liulaozhuang from dawn to dusk, ultimately sacrificing their lives heroically. The villagers buried the martyrs with tears and sent 82 young men to join the army. The 7th Brigade of the 3rd Division of the New Fourth Army reorganized the company and named it the “Liu Lao Zhuang Company”—a heroic company that sacrificed its entire force for the people and, relying on the people, was reborn. The flag once again flies high.

Over 80 years have passed, but the iron will has never faded.

In the honor room of the “Liu Lao Zhuang Company,” several artifacts silently tell a moving story: a rifle barrel bent in hand-to-hand combat, several charred handguards, and a broken stock.

For Sergeant Zhang Yuhang, the company history interpreter, these artifacts are more than just exhibits; they are a spiritual spark that inspires him and his comrades with every retelling.

In 2021, Zhang Yuhang, newly enlisted, heard about the brigade's model unit, the "Liu Lao Zhuang Company." "Advanced companies have high standards and strict requirements." Upon joining the company, he was filled with trepidation. However, when his conscription term expired, this soldier, who had once considered "just hustling for two years and then leaving," was the first to apply to stay in the army. Today, Zhang Yuhang has become the company's top trainer and theoretical leader, recognized by the brigade as an outstanding soldier with "four qualities."

What made him undergo this transformation?

"Joining the 'Liu Lao Zhuang Company' was like stepping into a surging river!" Zhang Yuhang admitted. Initially, he was propelled by the company's energy, then gradually exerted his own strength, and now he leads his comrades in the charge.

Where does this energy come from? Company officers and men shared their reasons—

New recruits listen to the story of the battle flag. (Photo by PLA Daily reporter Luan Cheng)

The first thing new recruits do upon joining the company is visit the company's honor room and view revolutionary relics; their first lesson is to listen to the story of the bloody battle of Liu Lao Zhuang by the "Eighty-Two Heroes"; their first song is the company song, and their first film is "The Eighty-Two Heroes of Liu Lao Zhuang." Every evening, roll call is called, and the company song and company spirit are chanted in unison. The honor roll is updated quarterly, and the "Eighty-Two Heroes of Liu Lao Zhuang in the New Era" are selected annually.

On the training ground, cadres and backbone members are the first to go, the first to submit, and the first to take the test. Cadres and men are held to the same standards for errands, stand guard, or help in the kitchen. When it comes to the dirty and arduous work, Party members take the front rank, and backbone members take the lead.

Company Political Instructor Dai Tianjiao often says, "Our 'Liu Lao Zhuang Company' is like a melting pot. We enter as a piece of iron, and emerge as hard as steel."

The energy of this melting pot not only forges individuals but also unites the group.

In the summer of 2023, floods struck many areas of North China. At the time, most officers and men of the "Liu Lao Zhuang Company" were on peacekeeping missions in South Sudan. Of the 26 who remained behind, most were recent recruits. Despite learning that their superiors had not included them in the first rescue team due to the "difficult and dangerous mission," the soldiers worked tirelessly overnight, packed their backpacks, and signed a letter of request, affixing 26 red fingerprints: "All officers and men of the 'Liu Lao Zhuang Company' swear to fight on the front lines of flood control."

After receiving approval to provide assistance, these young soldiers immediately rushed to the disaster area to engage in rescue work, carrying sandbags, filling breaches, and wading through the water to drive piles. They worked tirelessly day and night, their necks sunburned, their camouflage uniforms crusted with mud, and their feet blistered with blood. Yet, not a single one retreated. After days of continuous hard work, they successfully completed their mission.

Before leaving, they cleaned the school where they were staying, neatly arranged the desks and chairs, and wrote affectionately on the classroom blackboard for their classmates: “Just study hard, we will defend our country.”

Thousands of miles away at the peacekeeping camp, Company Commander Zhu Mingchao received two calls from his company: one from the soldiers’ collective request to join the rescue efforts in the disaster area, and the other from the victory report from the flood control levee. “On the other end of the phone, those guys kept saying ‘Mission Accomplished!’ Even though their voices were hoarse from exhaustion, their excitement was palpable even thousands of miles away,” Zhu Mingchao said, his eyes welling up. “Although they haven’t been with the company long, they’ve already developed the bones of the ‘Liu Lao Zhuang Company.’“

This letter of request, stamped with 26 red handprints, is now treasured in the company’s honor room, displayed alongside the relics of the martyrs. Transcending time and space, they together embody the unchanging purpose of “serving the people wholeheartedly.”

Continuing the Glory of Heroes: Sharpening the Blade of Victory through Tempering

On the roster of the “Liu Lao Zhuang Company,” each name is preceded by a special number. It’s not just a cold serial number, but a spiritual code woven into the very fabric of a soldier’s life, a seal of identity for the descendants of heroes, and a glorious promise to be fulfilled throughout one’s life. “I am a descendant of the heroes of the ‘Liu Lao Zhuang Company,’ and my combat number is 6679. I will carry forward the spirit of the company, and I will fight as long as I live...” At the company’s combat number awarding ceremony in July of this year, new recruit Dong Hongyun faced the battle flag and solemnly swore an oath.

He understood that these numbers carried the weight of history—after the Liu Lao Zhuang battle in 1943, the company was rebuilt, and the officers and men decided to continue the roster from “No. 83” onward, ensuring the continuation of the heroic bloodline.

“We have the obligation to bring honor to the company flag, not the right to bring discredit upon it.” This statement was etched in the hearts of every soldier in the company from day one. Dong Hongyun was filled with determination. “My combat number is the highest in the company, which means I’m the newest, but new doesn’t mean weak.”

To truly uphold this number, Dong Hongyun “pinned” himself to the training ground. During physical training, he donned a sand vest and practiced with weights, gritting his teeth to close in

on the company's record on the "Dragon and Tiger List." When operating equipment, he constantly reviewed procedures and developed practical techniques to improve efficiency.

Through these days of hard work, Dong Hongyun's training results steadily improved, earning an overall rating of "Excellent" on his first assessment—and this was just the first step toward achieving "6679." As a member of an honored collective, Dong Hongyun understood that only a well-rounded individual could be called a member of the "Liu Lao Zhuang Company."

Striving for first place in training and winning red flags in competitions, everyone in the "Liu Lao Zhuang Company" fought to pass on their honor.

In 2022, Company Squad Leader Hong Heliang participated in the brigade's sniper training intensive. A veteran of infantry, he faced an all-star class of reconnaissance specialists and placed last on his first assessment. Achieving a comeback in just three weeks seemed a near-impossible task.

This stubborn veteran challenged himself. To practice holding a rifle, he would lie prone for hours, sweat dripping down his face, the barrel piled high with bullet casings, then piled three at a time. By the end of a day's training, his arms were shaking so much he couldn't even hold chopsticks. To practice concentration, he blindfolded himself and used the tip of a needle to pierce a grain of rice by feel. When he pricked his finger, he bandaged it and continued practicing, memorizing the parameters while waiting in line for meals. To practice stability, he chose the moment after finishing the 400-meter sprint and when his heart rate was at its highest to draw his rifle and aim. Ultimately, he won first place in the training camp through sheer strength and was recognized by the company as one of the "Eighty-Two Heroes of Liulaozhuang in the New Era."

In April of this year, the "Liulaozhuang Company" welcomed another happy event for Squad Leader Hong: the safe birth of twin sons. He immediately posted the photo on his WeChat Moments, and his comrades commented, "Raise these two 'little warriors' well! We'll have them inherit our company's number in the future!"

"The annual selection of the 'Eighty-Two Heroes of Liulaozhuang in the New Era' is to make the heroic legacy visible, tangible, and passed down." Dai Tianjiao said that only those who are at the forefront of the spearhead are worthy of having their combat number equated with the heirs of the "Eighty-Two Heroes."

As a native of Liulaozhuang, Second Sergeant Yang Yongjie cherishes this honor even more. Every time he returns home on leave, the most common question from his fellow villagers is, "How are you doing in the heroic company? Have you brought shame to our hometown?"

Since joining the army, he has repeatedly made the "Dragon and Tiger List" of military training, but a defeat in a competition left him sleepless. The thought, "The soldiers from Liulaozhuang have lost," weighed heavy as the night. He walked alone into the Hall of Honor, and in the dim light, he gazed at the old company flag for a long time without moving. "The honor earned by the

martyrs with their lives is a heavy responsibility on our shoulders, and it is also the confidence we need to overcome obstacles and conquer new paths."

Soon, his comrades noticed a change in Yang Yongjie. On the training ground, he no longer simply pursued crushing victories, but instead focused on "battlefield survival" and "extreme counterattacks." He diligently practiced building cover with one hand, and whenever he felt exhausted, a surge of determination built within him: "If I injure one hand in actual combat, will I just sit there and wait for death?" Recently, he's been figuring out how to increase his rifle draw speed in extreme conditions. What drives him forward is no longer the fear of failure, but the unwavering conviction to fight his way through even the most desperate situations.

"Coming from Liulaozhuang, I must bring honor to Liulaozhuang!" Yang Yongjie said. Over the past 82 years, 170 soldiers from Liulaozhuang have served in this heroic company, most of whom have become key training personnel, their names forever etched in the company's annals of honor. The "Liu Lao Zhuang Company" held a ceremonial education session to inspire officers and men to strive for a stronger military. (Photo by PLA Daily reporter Luan Cheng)

Targeting the Future Battlefield: Forging Elite Combined Forces Through Transformation

"There are 0 days left until the next war begins."

A slogan stands out prominently on the electronic display screen in front of the barracks of the "Liu Lao Zhuang Company."

Like many exemplary companies across the military, they too have experienced the pain of transformation. How to continue the legacy of exemplary companies and win the next war is a pressing challenge facing officers and men.

A few years ago, during a live-fire exercise, superiors assigned the company several units, including reconnaissance, electrical reactors, and engineers. However, this anticipated "strong alliance" encountered numerous "pain points." Due to poor coordination, the newly transformed "Liu Lao Zhuang Company" narrowly avoided defeat.

"The era of systematic training has arrived. Are we ready?" At the review meeting, then-Company Commander Xing Guangchao's question stung everyone. The officers and men reflected deeply: No matter how strong an individual soldier is, if he or she cannot integrate into the system, he or she will eventually become an "island" on the future battlefield.

The company's Party branch was the first to reach a consensus: On the "big chessboard" of the combined battalion, they must not only be good "chess pieces" but also possess the mindset of "chess players."

"Brain transformation" became the first step. Xing Guangchao's assault backpack now contained a constantly updated "fire plan." He led key company cadres to the artillery unit to learn from their masters, starting with the most basic commands and firing charts.

Company officers and men also visited other units such as the engineering and reactor corps for training, strengthening the foundation of coordination step by step. Through repeated drills, they developed a set of fire call protocols suitable for infantry units, which played a key role in subsequent exercises.

During training breaks, officers and men conducted debriefings. (Photo by PLA Daily reporter Luan Cheng)

In 2022, the current company commander, Zhu Mingchao, took over the baton of transformation. He led the company, leveraging opportunities offered by system exercises and combined training, to continue forging a new path of "open training and cross-disciplinary coordination."

"In the past, we thought infantrymen were the best at charging and fighting. Now, a squad must be able to coordinate artillery firepower and call for air support; it must become a highly capable and versatile combat node," Zhu Mingchao said with emotion.

The results of this transformation were put to the test in recent exercises. Faced with multiple challenges, including electromagnetic interference from the blue force, drone harassment, and road destruction, the company's officers and men quickly countered each challenge, mobilizing a road repair team to successfully escape the predicament and employing coordinated manned and unmanned offensives to overcome one obstacle after another. When the smoke cleared, a wide-open path was successfully opened.

However, amidst the wave of combined transformation, officers and men must face many more unknown challenges. "One trick" is no longer enough to suffice. The battlefield calls for multi-talented individuals with both specialized and multi-skilled skills.

To this end, the company tailored a growth "roadmap" for each officer and soldier, established a personalized "database," and displayed training performance curves in the "Research and Combat Corner" for detailed analysis, allowing for dynamic adjustments to training plans. Since then, training alongside other specialized units and neighboring squads has become a new tradition for this veteran and exemplary company.

During a tactical exercise, squad leader Hong Heliang, after two of his comrades were killed, single-handedly filled in for both positions and continued fighting, successfully eliminating multiple enemy fire points. Company Commander Zhu Mingchao attributed this success to his experience in four different specialized positions.

Today, every officer in the company is proficient in driving, communications, and shooting, and over 70% of the sergeants, like Hong Heliang, are constantly expanding their capabilities and becoming versatile individuals adaptable to battlefield conditions.

In the first half of this year, the company volunteered to undertake a pilot project, with all officers and men fully committed to the research and practice of manned and unmanned coordinated combat tactics.

Crossing boundaries requires the courage to start from scratch. Faced with brand-new unmanned platform weapons and equipment, Sergeant First Class Zhu Ershuai, a veteran of 15 years and five rotations, once again started from scratch!

To quickly master the operation of unmanned platform weapons and equipment, he conducted a "three-way comparison" of the manual, demonstration procedures, and equipment, verifying each key step one by one. He also accompanied the manufacturer's engineers as they disassembled and assembled the equipment, thoroughly understanding the working principles of every component, gradually transforming himself from a "novice" to a "professional expert."

After returning from training camp, Zhu Ershuai, recognized as a top performer, was recruited to the coaching team. During the day, he spent time on the training ground, providing hands-on demonstrations and face-to-face explanations, helping the team thoroughly understand the equipment's characteristics. At night, he gathered with the team in the study room to review real-world combat cases, delving into details and solving problems, ultimately translating training results into operational capabilities. Led by coaches like him, the company's officers and men have mastered the basic operation of unmanned platform weapons and equipment, and all crew members have successfully passed the assessment.

Officers and men of the "Liu Lao Zhuang Company" conduct coordinated combat exercises. Photo by Zhang Fei.

Only by being the "windbreakers" of transformation and breakthrough can we become the "windriders" of the future battlefield. Not long ago, a manned-unmanned coordinated combat exercise was carried out in an orderly manner. The "Liu Lao Zhuang Company" commanded and controlled the rapid interspersal of unmanned platform weapons and equipment, coordinated the advance of armored infantry fighting vehicles, and integrated formations to carry out three-dimensional assaults. They opened up pathways, launched breakthroughs, searched and seized control, and performed a series of operations with clean and efficient execution. This heroic company, emerging from the flames of history, is now radiating a new edge of victory with the blessing of new strength.

陆军某防空旅实弹射击训练掠影

来源：中国军网-解放军报 作者：刘志升 张杰 卢陆 责任编辑：徐占虎 发布：2025-10-16

烈焰腾空铸坚盾

——陆军某防空旅实弹射击训练掠影

■刘志升 张杰 卢陆 摄影报道

夜幕下，高炮分队打击”敌”目标.

战车机动转移阵地.

吊装导弹.

导弹呼啸出膛.

9 月下旬，陆军某防空旅组织官兵远程机动至某训练场，开展跨昼夜实弹射击训练，锤炼精确打击和持续作战能力.

进入预备阵地不久，雷达捕获”敌”空中来袭目标. 接到”敌情”通报，地空导弹营官兵闻令而动，快速奔向各自战位. 雷达飞旋、导弹起竖，官兵很快做好战斗准备.

“‘敌’机释放电磁干扰！”雷达操纵员见招拆招，操作设备紧紧”咬”住目标. 指挥员神色凝重紧盯雷达屏幕，等待最佳射击时机. 关键时刻，指挥员果断下达开火指令，导弹呼啸着扑向目标. 霎时，阵地烟尘滚滚，空中目标应声”开花”.

完成首轮抗击任务后，为防备”敌”火力反击，指挥员迅速下达指令，组织官兵转移阵地.

借着夜幕掩护，多架”敌”机悄然临近，企图发起低空突袭. 便携式导弹分队官兵在”敌”来袭方向布下埋伏，待目标进入射程后，发射导弹实施拦截.

与此同时，部署在阵地前沿的高炮分队严阵以待. “发射！”指挥员话音刚落，一枚枚炮弹破膛而出，在天地间织出一张火力覆盖网，成功摧毁目标.

Flames Soar to the Sky, Forging a Strong Shield

—A Glimpse of Live-Fire Training with an Army Air Defense Brigade

■Photo Report by Liu Zhisheng, Zhang Jie, and Lu Lu

Under the cover of night, an anti-aircraft artillery unit strikes “enemy” targets.

Tanks maneuver and relocate.

Missiles are hoisted.

Missiles roar out of their barrels.

In late September, an Army air defense brigade mobilized officers and men to a training ground over a long distance to conduct live-fire training across day and night, honing their precision strike and sustained combat capabilities.

Shortly after entering their reserve positions, radar detected an incoming “enemy” aerial target. Upon receiving the “enemy situation” alert, officers and men of the surface-to-air missile battalion responded to the call and quickly rushed to their respective positions. With radars swirling and missiles erected, the soldiers quickly prepared for battle.

“The ‘enemy’ aircraft is releasing electromagnetic interference!” The radar operator countered the attack, manipulating the equipment to lock onto the target. The commander stared intently at the radar screen, awaiting the perfect moment to fire. At the crucial moment, the commander decisively gave the command to fire, and missiles roared towards the target. Instantly, smoke and dust billowed from the position, and the aerial target exploded.

After completing the initial round of defense, the commander quickly issued orders to relocate the troops to prevent a counterattack from the “enemy.”

Under cover of darkness, several “enemy” aircraft quietly approached, attempting a low-altitude surprise attack. The portable missile unit set up an ambush in the direction of the “enemy” attack, and once the target came within range, they launched missiles to intercept it.

Meanwhile, the anti-aircraft artillery unit, deployed at the front of the position, stood ready. “Fire!” As soon as the commander uttered the word, shell after shell burst forth, weaving a web of fire between heaven and earth, successfully destroying the target.

“八十二勇士”今犹在

——来自第 82 集团军某旅”刘老庄连”的报告（上）

■解放军报记者 梁蓬飞 钱晓虎 张良 特约记者 张圣涛

“刘老庄连”组织进攻战斗演练. 解放军报记者 栾 铖摄

向前，向前——

2025 年 9 月 3 日，纪念中国人民抗日战争暨世界反法西斯战争胜利 80 周年阅兵式. 80 面鲜红的战旗引领钢铁洪流隆隆驶来，人们的目光饱含深情与敬意.

当电视转播镜头对准第 82 集团军某旅副连长王宸一擎握的”刘老庄连”战旗时，画面里出现了一个长达 20 秒的特写.

1943 年 3 月 18 日，为掩护淮海区党政机关和人民群众安全转移，该连前身新四军第三师七旅十九团四连，在江苏淮阴刘老庄奋勇抗击日伪军，82 名官兵全部壮烈牺牲. 战后，当地群众选送 82 名优秀青年参军，新四军第三师七旅重新组建四连，并命名为”刘老庄连”.

82年来，”刘老庄连”历经多次调整改革、转隶移防，官兵换了一茬又一茬，但他们始终赓续弘扬革命先辈忠勇无畏、血战到底的传统和作风，在强军兴军征程上，不断续写新的荣光.

“八十二勇士”今犹在，英雄笑慰有传人.

培塑英雄魂：”生命不息、战斗不止！”

中原腹地，一场实兵对抗演练激战正酣. 担任开路先锋的”刘老庄连”官兵，被一条 10 多米宽的河流挡住去路.

“掩护工兵架桥！”一班刚刚前出，就遭”敌”炮火覆盖，全班无一”生还”. 此时，后续部队正在疾速开进，如果道路受阻，必然迟滞作战进程.

紧急关头，二班及时赶到，决定从另外一个方向开辟通路. 然而，隐藏在密林中的”敌”暗堡吐出”火舌”，不断有人中弹”倒下”.

“牺牲再大，也要坚决完成任务！”班长伍林急红了眼，接连甩出 2 枚手榴弹，利用浓烟的掩护匍匐跃进. 待他把”敌”火力点拔除，将铁丝网撕开一道口子时，全班仅剩他一人.

这一幕，与 82 年前的那场战斗何其相似.

面对千余名敌人，四连官兵从拂晓鏖战至黄昏，直到全部牺牲……自那时起，一茬茬连队官兵血脉里注入了”生命不息、战斗不止”的英雄魂. 从辽沈、平津战场到解放海南岛，从边境追击残敌到自卫反击作战，”刘老庄连”一直是令敌闻风丧胆的尖刀利刃.

进入新时代，面对新使命、新任务、新要求，”刘老庄连”打牢官兵听党指挥的思想根基，把能打胜仗作为最高追求，向着一个个”新战场”发起冲锋.

“英雄那么近，鲜血这么热……”政治整训课堂上，炮手曹宝刚的思绪穿越时空. 他把学习党的创新理论与争做”八十二勇士”传人结合起来，深刻检视自己在铸魂精武等方面存在的不足，与战友们分享心得感悟，”在‘刘老庄连’，对党忠诚从来不是抽象的概念、嘴上的口号，而是内心的信念、脚下的行动……”

七月的贺兰山，热浪蒸腾，黄沙滚滚，中部战区陆军 5 支装甲劲旅展开激烈角逐.

过障碍、穿雷区，完成多兵器多目标射击……比拼开始，”刘老庄连”403 车组一马当先.

突然，令人揪心的一幕发生了：驾驶员张飞在协助曹宝刚装填作业时，右手食指不慎被装弹机刮掉一块肉，指甲掉了一半.

刹那间，张飞额头渗出豆大的汗珠. 他只是简单包扎了一下，就立即返回驾驶舱，驾驶战车狂飙突进. 飞溅在座椅和仪表盘上的血滴，让曹宝刚仿佛看到了当年”八十二勇士”浴血奋战的身影.

最终，403 车组以驾驶第一名、射击第二名的成绩，勇夺”双车赛”项目冠军. 受此激励，其他战友在后续比赛中越战越勇，包揽步战车组 4 枚金牌.

“喝彩，不要在战争来临之前！”曹宝刚说，”刘老庄连”官兵有自己的荣誉观，他们的目光始终锚定制胜未来战场.

不满足大纲要求、不满足常规练兵、不满足单个过硬，是”刘老庄连”官兵给自己立下的”铁规矩”. 连队开展训练、培养人才，有很多标准更高、要求更严的”附加条件”——

战术基础训练，先冲刺 400 米再匍匐通过低桩铁丝网；轻武器分解结合，蒙眼模拟夜暗环境操作；应急战备拉动，将全过程各环节拆解为 40 个要点，严抠分秒之差；打造”一专多能”车组，车长、驾驶员、炮手能够互换岗位，载员必须精通多型武器……

“自找苦吃”“自加难度”的千锤百炼，换来的是连队不断上扬的战斗力曲线——

那一年，战斗力检验评估，他们改变以往编组模式，创新装甲步兵战法，射击命中率提高 15%、射击准备时间缩短 40%，实现一个班就能协同炮兵火力打击、直接呼叫空中掩护.

那一天，红蓝对抗实兵演练，他们扮演”红军”取胜后，立即向导演部申请当”蓝军”，从对手视角”出难题”，锤炼提升应急应战本领.

那一次，担负作战力量创新试点任务，他们深研科技之变、战争之变、对手之变，探索”有人+无人”等组训方法，为全旅基层连队战斗力建设蹚出一条新路.

在”刘老庄连”门口，有一块警示牌，上面的标语格外醒目：”距离下一场战争打响还有 0 日. “正是怀着这样强烈的忧患和打仗意识，连队官兵在今天的演兵场，点燃未来战场的烽火.

传承英雄志：”有我在，连旗不倒！”

又是一年”退伍季”，”刘老庄连”即将送别几名老兵.

这天，下士樊张毅和往常一样，早早起床，加练体能.

“马上就要退伍了，为啥还这么拼？”一名新战友不解地问.

“过两天，连队和兄弟单位比武，我可不能拖后腿. “樊张毅语气坚定，说出了大家常挂在嘴边的那句话：”有我在，连旗不倒！”

“有我在，连旗不倒”，是”八十二勇士”的英雄遗志，也是”刘老庄连”官兵的铿锵誓言.

战士邓江林参加旅预提指挥军士集训，起初教练班长见他文弱，打趣他不像”刘老庄连”的兵. 没想到，邓江林练起来就像”拼命三郎”，每天早上 5 点背着 10 公斤重的沙袋跑 10 公里，回来后继续跟着队伍出操. 几天过去，他的脚后跟被作战靴磨出血泡.

教练班长看着心疼，劝他休养. 邓江林听了直摇头：”虽然我来‘刘老庄连’时间不长，但已经长出了英雄的骨头. “他用创可贴封住伤口，又冲向训练场.

中士崔帅宇的背囊里，装着一张 4 年前拍摄的合影，照片上连队官兵全副武装，在连旗下挺立，唯独没有他自己.

那年 3 月 18 日，连队组织战斗体能训练，官兵背着 10 多公斤重的背囊，全副武装行军 42 公里. 在最后 5 公里冲刺阶段，入伍刚半年的崔帅宇体力不支，逐渐掉队.

“加油，帅宇！想想今天是什么日子，一定要坚持住！”班长吕康存见状，一把接过崔帅宇的背囊，大声鼓励道.

崔帅宇心里清楚，这一天意味着什么. 但当时，他的身体像电量耗尽的蓄电池，每走一步都异常吃力.

到达终点，连队组织拍摄”全家福”，崔帅宇主动离开队列，羞愧地说：”我虽然走完了全程，但没有达到要求，不配出现在‘刘老庄连’的合影里. “

知耻后勇. 当天晚上，崔帅宇给自己制订了”强能计划”，立志成为体能尖兵、专业骨干.

“作为英雄传人，就要有英雄的样子. “经过一段时间的努力，崔帅宇成长为一名优秀的装甲射手，并在上级组织的射击考核中打出了”全部命中”的战绩. 前段时间，崔帅宇被连队评为”新时代刘老庄八十二勇士”.

走进连队荣誉室，记者见到了”新时代刘老庄八十二勇士”榜单. 在这份榜单里，现任连长朱明朝名列其中.

2022 年 6 月，朱明朝被任命为”刘老庄连”连长. 报到那天，他从前任连长邢光超手里，接过一份正在修改的训练方案.

邢光超忘不了，那场实兵对抗，”刘老庄连”这个无坚不摧的”铁拳头”，却发挥失常：兵种协同脱节、火力运用僵化，被”蓝军”压制得一时无法动弹.

这一仗彻底打醒了邢光超. 复盘检讨会上，他说得最多的两个字就是：”转型！”

原来，新体制下，连队一些官兵的思维观念、战法训法还停留在”合成”的大门外. 曾经所向披靡的”刘老庄连”，急需作出改变.

时不我待，说干就干. 邢光超抱着炮兵教材，走进火力连拜师取经，连队班长骨干纷纷到兄弟单位”跨界”学习. 合成作战的兵力协同、恶劣天候的无人侦察、强干扰条件下的通信组网……随着官兵对体系作战的认识不断深入，一套实用高效的装甲步兵班引导火力打击方法新鲜出炉.

实战检验的时刻很快到来. 面对”蓝军”的犀利攻势，邢光超将此方法运用于各个战位，精准引导友军火力，成功摧毁”敌”目标.

“‘刘老庄连’变得更强了！”上级考核组的肯定，并没有让邢光超停下脚步. 交接工作时，他反复叮嘱朱明朝，一定接着把”开门练兵”深入开展下去.

这些年，在朱明朝带领下，”刘老庄连”官兵利用实兵演习、合成训练等时机，探索深化专业协同训练，那份训练方案不断更新扩容，形成 2.0 版、3.0 版……

砥砺英雄气：”我有勇气成为连队下一名烈士！”

“刘老庄连”，一个番号，将一座村庄和一支连队紧紧相连.

82 年前，为了保护刘老庄百姓，四连官兵抛头颅、洒热血，战死沙场. 82 年来，”刘老庄连”官兵始终牢记人民军队宗旨，将全心全意为人民服务的赤子情怀融入骨子里、体现在行动中.

革命战争年代生死与共，和平建设时期守望相助. 走进”刘老庄连”就会发现，英雄从未远去，英雄就在身边.

2023 年夏天，京津冀地区连续出现强降雨天气，引发洪涝灾害，严重危及人民群众生命财产安全.

灾情就是命令！根据上级统一部署，”刘老庄连”所在旅紧急驰援.

然而，救灾车辆一辆接着一辆驶出营区，早早就在车场等候的”刘老庄连”官兵，却迟迟没有接到命令.

原来，当时”刘老庄连”大部分官兵正在南苏丹执行维和任务，营区仅剩 26 人留守. 旅党委考虑到任务重、风险高，就没有将他们列入其中.

暴雨预警！汛情告急！得知缘由的 26 名官兵再也坐不住了，合写了一份请战书，按上红手印，递交党组织——

请战书简短有力：”我们‘刘老庄连’誓死要上抗洪一线！誓死要上抗洪一线！誓死要上抗洪一线！”

26 个手印力透纸背，26 颗红心似火燃烧. 旅领导深受感动，批准他们连夜出动，与大部队会合.

次日拂晓，26 名官兵刚抵达任务区，就迅速展开构筑堤坝工作，与旅队其他战友一道搬运沙袋、封堵决口、涉水打桩……21 个小时后，上级通报传来：”洪峰安全过境！”他们马上转战附近村镇，帮助受灾群众恢复生产生活秩序.

这一切，被天津市静海区青年孙铭朝看在眼里. 他发现，这些满身泥泞的战士和自己一样年轻，却在干着保护人民的大事，一颗从军报国的种子就此萌芽. 2024 年 3 月，孙铭朝如愿入伍，恰好分到”刘老庄连”.

下连第一课学连史，孙铭朝在荣誉室见到了那份按着 26 个红手印的请战书，了解了”刘老庄连”的主要事迹. 最令他震撼的，是视频资料里官兵高喊的一句誓词：”我有勇气成为连队下一名烈士！”

这是何等的气魄！这是何等的决绝！那一刻，他突然明白了，为什么指导员说，人民子弟兵除了人民利益一无所求，为了人民利益一无所惜.

如今，孙铭朝在”刘老庄连”不断成长，连史就像一部英雄传记，在他眼前徐徐展开——

1998 年夏天，长江流域发生特大洪涝灾害，”刘老庄连”官兵紧急前往抗洪前线. 当他们赶到武汉段洪湖大堤时，水位已远超警戒线，堤坝内侧出现了一个漩涡，随时可能决堤.

时任连长杨伟标带领官兵跳入湍急的水中，组成”人墙”截流，对堤坝进行加固. 当地群众心疼不已，含着热泪说：”这哪里是干活，简直在拼命！”

险情刚排除，新的洪峰汹涌而来，堤面很快被撕开一道缺口. 全连官兵叫响”誓与大堤共存亡”，投入新一轮鏖战，用血肉之躯筑起了一道钢铁防线.

2008 年 5 月 12 日，汶川发生特大地震，废墟之上，挺立起一面鲜红的战旗. “铁军来了！”当时，”刘老庄连”隶属于素有”铁军”之称的某红军师，官兵冒着频发的余震，徒步进入”生命孤岛”，展开生死营救，用满腔赤诚为受灾群众撑起一片天.

进入一栋随时可能坍塌的楼房搜救前，一名师领导向官兵喊道：”是独生子女的，请举手！”现场没有一人举手. 这名领导又喊：”是党员的，请举手！”大家齐刷刷地把手举了起来.

2025 年 3 月 11 日，在家休假的”刘老庄连”一级上士吕康存带着 3 岁的儿子，到云龙湖风景区游玩，耳边突然传来急促的呼救声：”快来人啊！救命啊！”

循声望去，只见 20 多米之外的湖面上，一个小男孩正在扑腾挣扎.

没有丝毫迟疑，吕康存把儿子往身边游客怀里一塞，转身冲过去，一头扎进冰冷的湖水，奋力将落水男孩救起……

报国何止在沙场？遍地盛开英雄花. “刘老庄连”连史上，类似的壮举还有不少. 从”打仗的英雄”到”爱民的英雄”，只要党和人民需要，无论何时何地遇到何种危险，他们都会奋不顾身、勇往直前.

因为，这是 82 条生命换来的不朽番号，这是 82 年奋斗铸就的英雄连队.

赓续红色血脉 当好英雄传人

■解放军报评论员

有一面荣誉旗帜，高高飘扬，激励强军胜战；有一种红色血脉，传承赓续，书写英雄荣光.

今年是中国人民抗日战争暨世界反法西斯战争胜利 80 周年. 当前，全军正持续深化政治整训，大力宣传第 82 集团军某旅”刘老庄连”的先进事迹，对于传承弘扬伟大抗战精神，巩固拓展政治整训成效，引领广大官兵统一思想、锚定目标、担当作为，在党的旗帜下奋斗建军百年、奋进强军一流具有重要现实意义. “刘老庄连”历经红色血脉浸润、革命战争洗礼、时代熔炉淬炼，是以铮铮铁骨战强敌、以血肉之躯筑长城的英雄传人，是新时代坚决听党指挥、永葆性质宗旨的先进典型，是矢志奋斗强军、忠实履行使命的时代先锋. 他们的先进事迹必将激励全军官兵踔厉奋发、勇毅前行，为如期实现建军一百年奋斗目标贡献智慧和力量.

“刘老庄连”是诞生于抗日烽火的英雄连队. 1943 年 3 月，该连为掩护淮海区党政机关和人民群众安全转移，在江苏淮阴刘老庄与千余名日伪军殊死搏斗，连队 82 名勇士全部壮烈牺牲，被朱德同志赞誉为”我军指战员的英雄主义的最高表现”. 战后，当地群众选送 82 名优秀青年参军，新四军第三师七旅重新组建连队并命名为”刘老庄连”. 82 年来，”刘老庄连”官兵赓续红色血脉，当好英雄传人，坚决听党话、铁心跟党走. 进入新时代，连队坚持用习近平强军思想建连育人，传承发扬先辈”把生命献给党和人民”的热血忠诚，不断巩固纯洁光荣，努力在备战打仗中当先锋立新功，出色完成跨区演训、国际维和、抗洪抢险等重大任务.

凡树有根，方能生发；凡水有源，方能奔涌. 习主席深刻指出，在长期实践中，人民军队在党的旗帜下前进，形成了一整套建军治军原则，发展了人民战争的战略战术，培育了特有的光荣传统和优良作风. 这是人民军队从胜利走向胜利的传家法宝，是人民军队必须永志不忘的红色血脉. “刘老庄连”82 年战旗高扬、凯歌高奏、英雄辈出，根本在于他们赓续红色血脉，把红色基因一代代传下去. 这个连队铸就了”生命不息、战斗不止”的连魂精神，立起了”珍惜荣誉当传人、全面过硬树标杆”的连训，坚持开展”学传统、话传承”活动. 事

实证明，红色血脉及其铸就的英雄基因，不但是人民军队从小到大、屡克强敌的制胜法宝，更是走好强军新征程、建设世界一流军队的重要保证. 我军之所以成为党和人民完全可以信赖的英雄部队，很重要的一个原因就在于有无数个像”刘老庄连”这样的英雄连队，大力传承红色基因，确保血脉永续、根基永固、优势永存.

战旗永飘扬，强军谱新篇. 当前，实现建军一百年奋斗目标到了爬坡过坎、收官冲刺最吃劲的时候. 越是接近目标，越是任务艰巨，越需要广大官兵弘扬我党我军优良传统，争当英雄传人、时代新人，凝聚起推进强军事业的坚定意志和强大力量. 全军要像”刘老庄连”那样，坚持不懈用习近平新时代中国特色社会主义思想凝心铸魂，深入贯彻习近平强军思想，赤诚纯粹、听令景从；深化政治整训，加强政治锻造、思想改造，把信仰信念融入血脉，把革命先辈用鲜血和生命铸就的光荣传统和优良作风传承下去、弘扬开来；聚力练兵备战，苦练打赢本领，培育战斗精神，用胜战追求硬骨强能，靠英雄气概砥胆激气，勠力同心、铁骨担当，全力以赴打好实现建军一百年奋斗目标攻坚战，在强军新征程上砥砺奋进、再立新功.

Forward, Forward—

On September 3, 2025, a military parade commemorating the 80th anniversary of the victory of the Chinese People’s War of Resistance Against Japanese Aggression and the World Anti-Fascist War took place. Eighty bright red battle flags led the rumbling torrent of steel, and the people’s gazes were filled with deep affection and respect. When the television camera focused on the battle flag of the “Liu Lao Zhuang Company” held by Wang Chenyi, deputy company commander of a brigade of the 82nd Group Army, a 20-second close-up appeared.

On March 18, 1943, to protect the safe relocation of Party and government organs and civilians in the Huaihai region, the company, formerly the 4th Company of the 19th Regiment of the 7th Brigade of the 3rd Division of the New Fourth Army, bravely fought against the Japanese and puppet troops in Liu Lao Zhuang, Huaiyin, Jiangsu. All 82 officers and men died heroically. After the war, local residents selected 82 outstanding young men to join the army. The 4th Company of the 7th Brigade of the 3rd Division of the New Fourth Army was reorganized and named the "Liu Lao Zhuang Company."

Over the past 82 years, the "Liu Lao Zhuang Company" has undergone numerous adjustments and reforms, transfers and relocations, and a succession of officers and men. However, they have always upheld the traditions and style of their revolutionary predecessors, known for their loyalty, bravery, and fighting to the death, and have continuously written new chapters of glory on the journey to strengthen the military.

The "82 Heroes" still exist today, their heroic smiles comforting their descendants. Cultivating Heroic Spirits: "Life never ends, the fight never ends!"

In the heart of the Central Plains, a live-fire confrontation exercise raged. The soldiers of the Liulaozhuang Company, spearheading the path, were blocked by a river over 10 meters wide.

"Protect the engineers as they build the bridge!" Squad One had barely advanced when they came under enemy fire, leaving no one alive. At this critical juncture, the following troops were advancing rapidly; a blocked path would inevitably delay the battle.

At this critical juncture, Squad Two arrived and decided to open a passage from another direction. However, the enemy bunker hidden in the dense forest erupted in flames, and men were repeatedly struck and killed.

"No matter how great the sacrifice, we must resolutely complete the mission!" Squad Leader Wu Lin, his eyes red with anxiety, threw two grenades in quick succession, using the thick smoke as cover to creep forward. By the time he had eliminated the enemy's firing point and torn a hole in the barbed wire, he was the only one left in the squad. This scene bears a striking resemblance to the battle 82 years ago.

Facing over a thousand enemies, the soldiers of the Fourth Company fought fiercely from dawn to dusk, until they all perished... Since then, successive generations of company officers and men have been imbued with the heroic spirit of "never rest, never cease fighting." From the Liaoshen and Pingjin battlefields to the liberation of Hainan Island, from pursuing remaining enemies along the border to self-defense counterattacks, the "Liu Lao Zhuang Company" has always been a fearsome force that intimidated the enemy.

Entering a new era, facing new missions, new tasks, and new requirements, the "Liu Lao Zhuang Company" has firmly established the ideological foundation of obedience to the Party's command, making victory its highest pursuit and charging forward on each "new battlefield."

“The heroes are so close, their blood so hot...” During a political training class, gunner Cao Baogang’s thoughts journeyed through time and space. He combined studying the Party’s innovative theories with striving to become a successor to the “Eighty-Two Warriors,” deeply examining his shortcomings in cultivating his spirit and refining his martial arts skills, and shared his insights with his comrades. “In the ‘Liu Lao Zhuang Company,’ loyalty to the Party has never been an abstract concept or a slogan, but a deep conviction and action...”

In July, amidst the sweltering heat and billowing yellow sand in the Helan Mountains, five armored brigades of the Central Theater Command Army engaged in a fierce competition.

Negotiating obstacles, navigating minefields, and completing multi-weapon, multi-target shooting... The competition began, and the 403rd tank crew of the “Liu Lao Zhuang Company” took the lead.

Suddenly, a heartbreaking scene unfolded: while assisting Cao Baogang with loading, driver Zhang Fei accidentally scraped a piece of flesh off his right index finger on the loader, losing half his nail.

Instantly, beads of sweat broke out on Zhang Fei’s forehead. He simply bandaged the wound and immediately returned to the cockpit, driving his tank at full speed. The blood splattering on the seats and dashboard reminded Cao Baogang of the “Eighty-Two Warriors” fighting bravely.

Ultimately, the 403rd crew won the “Dual Vehicle Competition” with first place in driving and second place in shooting. Inspired by this, the other comrades fought with increasing courage in subsequent competitions, winning all four gold medals in the infantry fighting vehicle group.

“Cheers, but not before the war!” Cao Baogang said. The officers and men of the “Liu Lao Zhuang Company” have their own concept of honor, their sights fixed on victory on future battlefields.

Not meeting the requirements of the syllabus, not settling for routine training, and not settling for individual excellence are the “iron rules” the officers and men of the “Liu Lao Zhuang Company” have set for themselves. The company’s training and talent development required many “additional conditions” with higher standards and stricter requirements.

Basic tactical training involved a 400-meter sprint followed by a crawl through low-pile wire mesh; light weapons disassembly and assembly, with blindfolds simulating nighttime operations; emergency combat readiness drills, breaking down each step of the process into 40 key points, meticulously scrutinizing every second; and the development of a “multi-talented” vehicle crew, with commanders, drivers, and gunners able to interchange roles, requiring crew members to be proficient in multiple weapon types.

This relentless tempering of self-imposed hardship and increased difficulty resulted in the company’s steadily rising combat effectiveness.

That year, during combat effectiveness assessments, they changed their previous organizational structure and innovated armored infantry tactics, increasing their accuracy by 15% and reducing firing preparation time by 40%. This enabled a single squad to coordinate artillery fire and directly call for air cover. That day, during a live-fire exercise between Red and Blue forces, after their victory as the "Red Army," they immediately applied to the command center to become the "Blue Army," posing challenges from the enemy's perspective and honing their emergency response and combat capabilities.

On that occasion, tasked with piloting combat force innovation, they deeply studied changes in technology, warfare, and the enemy, exploring training methods such as "manned + unmanned," blazing a new trail for combat effectiveness building for the brigade's grassroots companies.

At the entrance of the "Liu Lao Zhuang Company," a warning sign stands out with the slogan: "0 days until the next war begins." It is with this intense sense of crisis and combat awareness that the company's officers and men ignite the flames of future battlefields on today's training ground.

Carrying on the heroic spirit: "As long as I am here, the company flag will not fall!"

It's "retirement season" again, and the "Liu Lao Zhuang Company" is about to bid farewell to several veterans.

That day, Corporal Fan Zhangyi, as usual, rose early and expended his physical training. "You're about to be discharged, why are you still fighting so hard?" a new comrade asked, puzzled.

"In two days, our company will be competing against other units, and I can't be a drag." Fan Zhangyi spoke with a firm voice, uttering the words everyone often said: "As long as I'm here, the company flag won't fall!"

"As long as I'm here, the company flag won't fall" is the heroic will of the "82 warriors" and the solemn oath of the officers and men of the "Liu Lao Zhuang Company."

Soldier Deng Jianglin participated in the brigade's pre-promotion training for command sergeants. Initially, the instructor, seeing him frail, joked that he didn't look like a soldier from the "Liu Lao Zhuang Company." Unexpectedly, Deng Jianglin trained like a workaholic. Every morning at 5 a.m., he'd run 10 kilometers carrying a 10-kilogram sandbag, and then continue to train with the team after returning. After a few days, his heels were rubbed with blisters from his combat boots.

The instructor, feeling sorry for him, advised him to rest. Deng Jianglin shook his head upon hearing this. "Although I haven't been with the Liulaozhuang Company long, I've already grown into a hero." He sealed his wound with a Band-Aid and rushed back to the training ground.

In Sergeant Cui Shuaiyu's backpack was a group photo taken four years earlier. In the photo, the company's officers and men, fully armed, stood tall under the company flag, but he was the only one missing.

On March 18th of that year, the company organized combat physical training. The soldiers, fully armed, carried backpacks weighing over 10 kilograms and marched 42 kilometers. During the final 5-kilometer sprint, Cui Shuaiyu, who had been in the army for only six months, began to lose strength and gradually fell behind.

“Come on, Shuaiyu! Think about the day. You must persevere!” Squad Leader Lü Kangcun saw this, grabbed Cui Shuaiyu’s backpack, and shouted encouragement.

Cui Shuaiyu knew the significance of this day. But at the time, his body felt like a depleted battery; every step was an effort. Upon reaching the finish line, the company organized a “family photo.” Cui Shuaiyu took the initiative to leave the formation, saying shamefully, “Although I completed the entire course, I didn’t meet the requirements and don’t deserve to be in the ‘Liu Lao Zhuang Company’ photo.”

Knowing shame, Cui Shuaiyu became stronger. That evening, he created a “strengthening plan” for himself, determined to become a physical leader and a professional backbone.

“As the heir of a hero, I must act like a hero.” After a period of hard work, Cui Shuaiyu developed into an excellent armored shooter and achieved a “perfect hit” record in a shooting assessment organized by higher authorities. Recently, Cui Shuaiyu was named one of the “82 Heroes of Liu Lao Zhuang in the New Era” by the company.

Entering the company’s honor room, reporters saw a list of the “82 Heroes of Liu Lao Zhuang in the New Era.” Among them was the current company commander, Zhu Mingchao.

In June 2022, Zhu Mingchao was appointed company commander of the “Liu Lao Zhuang Company.” On the day he reported for duty, he received a training plan that was being revised from his predecessor, Xing Guangchao. Xing Guangchao will never forget that live-fire confrontation. The “Liu Lao Zhuang Company,” once an invincible “iron fist,” underperformed: disjointed inter-service coordination, rigid firepower utilization, and temporarily pinned down by the “Blue Army.”

This battle completely awakened Xing Guangchao. At the review meeting, the two words he spoke most often were: “Transformation!”

It turned out that under the new system, the thinking, tactics, and training of some officers and men in the company were still outside the realm of “combined warfare.” The once-invincible “Liu Lao Zhuang Company” urgently needed to change.

Time waited for no one, so action was taken. Xing Guangchao, armed with artillery textbooks, entered the firepower company to learn from the master. Squad leaders and key members of the company also traveled to other units to “cross-disciplinary” and learn. Combined force coordination, unmanned reconnaissance in adverse weather, communication networking under strong interference... As officers and men deepened their understanding of system-based warfare, a practical and efficient method for guided fire strikes by armored infantry squads was developed.

The time for actual combat testing was soon approaching. Facing the fierce offensive of the "Blue Army," Xing Guangchao applied this method to every position, precisely directing friendly fire and successfully destroying the "enemy" target.

"'Liu Lao Zhuang Company has become even stronger!" The recognition from the superior assessment team did not deter Xing Guangchao. During the handover, he repeatedly urged Zhu Mingchao to continue the "open-door training" initiative.

Over the years, under Zhu Mingchao's leadership, the officers and men of the "Liu Lao Zhuang Company" have utilized opportunities such as live-fire exercises and combined training to explore and deepen professional and coordinated training. The training program has been continuously updated and expanded, resulting in versions 2.0 and 3.0...

Cultivating heroic spirit: "I have the courage to become the company's next martyr!"

"Liu Lao Zhuang Company," a designation, closely connects a village and a company.

82 years ago, to protect the people of Liu Lao Zhuang, the officers and men of the Fourth Company sacrificed their lives on the battlefield. For 82 years, the officers and men of the "Liu Lao Zhuang Company" have always borne in mind the purpose of the people's army, ingraining their unwavering commitment to serving the people and embodying it in their actions.

They shared life and death during the revolutionary war years and supported each other during the period of peace and construction. Entering the "Liu Lao Zhuang Company" reveals that heroes are never far away; they are always at hand.

In the summer of 2023, heavy rainfall continued in the Beijing-Tianjin-Hebei region, triggering floods and severely endangering the lives and property of the people.

The disaster is the order! Following the unified command from higher authorities, the brigade to which the "Liu Lao Zhuang Company" belongs rushed to provide emergency assistance.

However, as rescue vehicles rolled out of the barracks one after another, the officers and men of the "Liu Lao Zhuang Company," who had been waiting in the parking lot, received no orders.

It turned out that most of the officers and men of the "Liu Lao Zhuang Company" were on peacekeeping missions in South Sudan at the time, leaving only 26 men behind in the barracks. The brigade Party Committee, considering the heavy workload and high risk, omitted them from the mission.

Heavy Rain Warning! Flood Situation is Imminent! Upon learning the reason, the 26 soldiers could no longer sit still. They jointly wrote a letter of request, affixed their red handprints, and submitted it to the Party organization.

The letter was brief and powerful: "We, the 'Liu Lao Zhuang Company,' swear to fight the floods! We swear to fight the floods! We swear to fight the floods!"

The 26 handprints pierced through the paper, 26 red hearts burning like fire. Deeply moved, the brigade leadership approved their overnight deployment to join the main force.

At dawn the next day, upon arriving at the mission area, the 26 soldiers quickly began constructing the embankment. Working alongside their comrades in the brigade, they carried sandbags, sealed breaches, and waded through the water to drive piles. Twenty-one hours later, a report arrived from their superiors: “The flood peak has safely passed!” They immediately moved to nearby villages and towns, helping the affected people restore normal life and work.

All of this was witnessed by Sun Mingchao, a young man from Jinghai District, Tianjin. He realized that these mud-covered soldiers, just as young as himself, were doing the important work of protecting the people. Thus began the seed of his desire to join the army and serve his country. In March 2024, Sun Mingchao enlisted as he had hoped, and was assigned to the “Liu Lao Zhuang Company.”

In his first lesson, he learned about the company’s history. In the honors room, Sun Mingchao saw the letter of request for battle, stamped with 26 red handprints, and learned about the key achievements of the “Liu Lao Zhuang Company.” What struck him most was the oath chanted by the officers and men in the video: “I have the courage to become the company’s next martyr!”

What courage! What determination! In that moment, he suddenly understood why the instructor said, “The people’s soldiers seek nothing but the interests of the people and will sacrifice nothing for their benefit.”

Now, as Sun Mingchao continues to grow in the “Liu Lao Zhuang Company,” the company’s history unfolds before him like a heroic biography.

In the summer of 1998, devastating floods struck the Yangtze River basin, and officers and men from the “Liu Lao Zhuang Company” rushed to the front lines. When they arrived at the Honghu Dam in Wuhan, the water level had far exceeded the warning line, and a vortex had formed inside the dam, threatening to burst at any moment. Then-Company Commander Yang Weibiao led his men into the turbulent water, forming a “human wall” to divert the flow and reinforce the levee. The local residents, heartbroken, tearfully exclaimed, “This isn’t just work; it’s risking their lives!”

Just as the danger was averted, a new flood surged in, quickly tearing a breach through the levee. The entire company, pledging to “live and die with the levee,” engaged in a new round of fierce battle, building an iron line of defense with their flesh and blood.

On May 12, 2008, a devastating earthquake struck Wenchuan. Amidst the ruins, a bright red battle flag rose. “The Iron Army is here!” The “Liu Lao Zhuang Company,” then affiliated with a Red Army division known as the “Iron Army,” shouted. Braving frequent aftershocks, the soldiers trekked into the “island of life,” carrying out life-or-death rescue operations and providing a safe haven for the affected people with their wholehearted dedication. Before entering a building threatened with collapse, a division leader called out to the soldiers, “Only children, please raise

your hands!" No one raised their hands. The leader then shouted, "Party members, please raise your hands!" Everyone raised their hands in unison.

On March 11, 2025, Sergeant First Class Lü Kangcun of the "Liu Lao Zhuang Company," on leave, was visiting the Yunlong Lake Scenic Area with his three-year-old son when he heard a sudden, urgent cry for help: "Help! Help!"

Looking for the sound, he saw a little boy struggling on the lake surface over 20 meters away.

Without hesitation, Lü Kangcun shoved his son into the arms of a nearby tourist and turned to They rushed forward, plunged headfirst into the icy waters, and struggled to rescue the drowning boy...

Serving the country extends beyond the battlefield. Heroes bloom everywhere. The history of the "Liu Lao Zhuang Company" is filled with similar feats. From "heroes of war" to "heroes of loving the people," they bravely forge ahead regardless of danger, whenever and wherever the Party and the people need them.

For this is an immortal designation earned at the cost of 82 lives, a heroic company forged through 82 years of struggle.

Carrying on the Red Bloodline, Becoming a Good Heroic Successor

■ PLA Daily Commentator

There is a flag of honor flying high, inspiring a strong army to victory; there is a red bloodline, passed down through generations, writing the glory of heroes.

This year marks the 80th anniversary of the victory of the Chinese People's War of Resistance Against Japanese Aggression and the World Anti-Fascist War. The entire military is currently deepening its political training and vigorously promoting the exemplary deeds of the "Liu Lao Zhuang Company" of a brigade of the 82nd Group Army. This is of great practical significance for carrying forward the great spirit of the War of Resistance Against Japanese Aggression, consolidating and expanding the achievements of this training, and guiding officers and men to unify their thinking, focus on their goals, and shoulder their responsibilities, striving under the banner of the Party to celebrate the centennial of the founding of the PLA and build a first-class military. The "Liu Lao Zhuang Company," steeped in revolutionary blood, tempered by revolutionary war, and forged in the crucible of the times, represents a legacy of heroes who fought powerful enemies with unwavering resolve and built a Great Wall with their flesh and blood. They are exemplary models of resolutely following the Party's command and upholding its nature and purpose in the new era, and they are pioneers of the times committed to strengthening the PLA and faithfully fulfilling its mission. Their exemplary deeds will surely inspire all officers and men to forge ahead with courage and determination, contributing their wisdom and strength to achieving the goals of the PLA's centennial on schedule.

The “Liu Lao Zhuang Company” is a heroic company born in the flames of the War of Resistance Against Japanese Aggression. In March 1943, to protect the safe evacuation of Party and government organs and civilians in the Huaihai region, the company engaged in a desperate battle against over a thousand Japanese and puppet troops in Liulaozhuang, Huaiyin, Jiangsu. All 82 brave soldiers died heroically, a feat hailed by Comrade Zhu De as “the highest expression of heroism among our army’s officers and men.” After the war, local residents selected 82 outstanding young men to join the army, and the 7th Brigade of the 3rd Division of the New Fourth Army reorganized the company and named it the “Liulaozhuang Company.” For 82 years, the officers and men of the “Liulaozhuang Company” have carried on the revolutionary legacy, serving as heroic heirs, resolutely obeying the Party’s instructions and following its lead. Entering the new era, the company persists in cultivating and educating its members based on Xi Jinping Thought on Strengthening the Military, inheriting and carrying forward the passionate loyalty of its predecessors who “dedicated their lives to the Party and the people,” continuously consolidating its pure and glorious legacy, striving to be pioneers and achieve new feats in combat preparations, and successfully completing major missions such as cross-regional exercises and training, international peacekeeping, and flood relief.

A tree can only grow if it has roots; a river can only flow if it has a source. President Xi Jinping profoundly pointed out that, through long-term practice, the People’s Army has advanced under the banner of the Party, developing a comprehensive set of principles for building and managing the army, developing the strategies and tactics of people’s war, and cultivating unique, glorious traditions and fine work styles. This is the heirloom that has enabled the People’s Army to advance from victory to victory, and it is the red bloodline that the People’s Army must never forget. The “Liu Lao Zhuang Company” has flown high its battle flag, sung its triumphant songs, and produced countless heroes for 82 years, fundamentally due to its continued red bloodline and the transmission of its red gene from generation to generation. This company has forged the company spirit of “Life never ends, fighting never ends,” established the company training of “cherishing honor as successors, comprehensively improving and setting an example,” and consistently carried out activities to “learn from tradition and discuss inheritance.” Facts have proven that this red bloodline and the heroic genes it has forged are not only the magic weapon that has enabled the People’s Army to grow from humble beginnings to repeatedly defeat powerful enemies, but also a crucial guarantee for successfully embarking on the new journey of strengthening the military and building a world-class force. A crucial reason why our army has become a heroic force that the Party and the people can fully trust is that it has countless heroic companies like the “Liu Lao Zhuang Company,” diligently carrying forward the revolutionary gene, ensuring the continuity of its bloodline, the solidification of its foundation, and the enduring strength of its advantages.

The battle flag will always fly high, and a new chapter will be written for a strong army. Currently, the struggle to achieve the goals of the PLA’s centenary has reached the most challenging stage of climbing the hills and overcoming obstacles, and the final sprint. The closer we get to the goal, the more arduous the task becomes, and the more we need our officers and men to uphold the fine

traditions of our Party and Army, strive to be the heirs of heroes and the new generation of men, and unite the unwavering will and powerful strength to advance the cause of a strong military. The entire army should, like the “Liu Lao Zhuang Company”, persist in using Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era to unite hearts and build souls, thoroughly implement Xi Jinping Thought on Strengthening the Military, be sincere and pure, and obey orders; deepen political training, strengthen political forging and ideological transformation, integrate faith and belief into the blood, and pass on and promote the glorious traditions and fine style forged by revolutionary predecessors with their blood and lives; focus on training and preparation for war, work hard to practice winning skills, cultivate a fighting spirit, use victories to pursue hard bones and strong capabilities, rely on heroism to inspire courage and spirit, work together, take on responsibilities, and go all out to fight the tough battle to achieve the goal of the centenary of the founding of the army, forge ahead on the new journey of strengthening the army, and make new contributions.

第 73 集团军某旅舟桥分队正在进行舟桥泛水. 袁德坤摄

“如果非要说有什么遗憾，那就是没有亲眼见过战车在自己架设的舟桥上通行. “

前不久，第 73 集团军某旅马上服役期满的一级上士李光浩变得异常忙碌. 他加班加点整理自己在专业领域的心得体会，汇编成册交接给连队的新任骨干. 当被指导员问及军旅生涯是否留有遗憾时，他说出了这样一句话.

作为一名多年从事舟桥专业的老兵，舟桥架设的过程有多么艰难，他再清楚不过. 然而，每当舟桥架好，他和战友们就要迅速随队疏散隐蔽. 参与架设那么多座舟桥，他从未有机会亲眼见过”钢铁洪流”驶过舟桥的情形.

遗憾中见光荣. 李光浩深知，这就是舟桥兵的使命：力挽天堑化通途，甘为胜战作基石.

读不懂架桥的意义，就当不好一名舟桥兵

第 73 集团军某旅舟桥分队开展渡河保障训练. 袁德坤摄

烈日当空，热浪袭人. 宽阔湍急的江面上，一座浮桥正争分夺秒地向对岸延伸.

列兵尚万钦稳稳地站在门桥上，手中的锚机灵活转动，脚下的桥身岿然不动. 此刻，他动作干净利落、协同精准到位. 或许你想象不到，就在几个月前，他还对架桥训练有畏难情绪.

一次架桥训练中，尚万钦的左脚被铁锚意外撞到，钻心的疼痛令他数夜难眠. 自那以后，他对训练产生了难以言说的抵触. 曾经的冲劲不见了，取而代之的是犹豫和迟疑.

转机，发生在一个车炮场日. 一级上士曾毅强一边保养装备，一边和身旁搭手帮忙的尚万钦聊着天.

“刚当兵那会儿，总觉得舟桥兵太苦太累，整天不是扛桥板就是打地桩，风吹日晒，还净是幕后工作. “曾毅强一边捣弄着手上的工具，一边羡慕地望向远方，”看人家装甲兵驰骋沙场、特种兵上天入海，多威风！”

“既然又苦又累，那您为啥一干就是 14 年？”尚万钦的一句反问，将这位舟桥老兵的思绪拉回到那一年的演训场上——

那天，舟桥分队收到导调组通报：”蓝军”炸毁我主要渡河通道，命令你们立即开辟新渡场.

当时，天空淅淅沥沥下着小雨. 作为门桥连接手，曾毅强在摇晃的甲板上艰难作业，全凭经验和手感一寸寸校准孔位，用尽全身力气将钢销砸入.

门桥合龙后，官兵们浑身湿透，甚至有几名官兵累得直不起腰.

演训结束当天，装甲分队的战友专程来致谢：”你们架的桥真稳！没有你们，我们根本完不成任务！”

回忆起那段经历，曾毅强满脸自豪：”从那时起，我才真正明白‘干惊天动地事，做隐姓埋名人’这句话的含义. “

他语重心长地对尚万钦说：”你看，没有我们，再强的部队也只能望河兴叹！我们每拧紧一个螺栓，每固定一节门桥，都是在为胜利铺路. “

14 年来，曾毅强从普通舟桥作业手成长为门桥长，带出的骨干遍布全连. 他就像一颗拧紧的螺丝钉，牢牢铆在战位上.

舟桥兵的价值，不在于被看见，而在于被需要. “当大部队需要过江时，我们就是那座桥！”一场新兵和老兵之间的对话，让尚万钦开始重新思考岗位的价值和意义.

前方道路更加清晰，脚下步伐愈发坚定. 从此，训练场上多了个”拼命三郎”. 尚万钦比以往训练更加刻苦认真，立志要像曾毅强一样，成为一名出色的舟桥兵.

前不久，上级组织战术演练，尚万钦因综合表现突出，受到分队领导的点名表扬. 他在个人笔记上写下一句话：”读不懂架桥的意义，就当不好一名舟桥兵. “连队马上要迎来一批新兵，他想把这句话分享给更多新战友.

看到钢铁长龙在脚下合龙，那种自豪感无法用语言形容

在舟桥兵中，有这么一句行话：判断兵龄长短无需看军衔，只要看脸——肤色黢黑的肯定是老兵.

事实的确如此. 三级军士长汪猛，是全连肤色最黑的那个，同样也是兵龄最长的那个.

“如果身上的肤色不够黑、手上的老茧不够厚，只能说明你练得还不到位，离一名合格的舟桥兵还有差距. “这是汪猛常对新战友们说的一句话. 话粗理不粗，在他看来，一名合格的舟桥兵就得经历千锤百炼.

中士宋明炜时常想起自己刚下连时的情形，汪猛的那双手深深震撼了他——掌心堆叠着厚厚的老茧，纹路深陷.

宋明炜首次参加舟桥专业训练时，正值盛夏，分队在野外驻训. 作为舟桥作业手，他每天都要推动沉重的桥板，反复练习相同的动作.

高温炙烤下，桥板温度超过 50 摄氏度. 每次洗澡时，他身上被太阳晒脱皮的地方，都火辣辣地疼.

每每看到身边战友训练一天后累得精疲力尽的样子，汪猛都会为他们加油鼓劲. 作为一名舟桥老兵，汪猛的身上同样伤痕累累……

令年轻战友不解的是，这个身上经常贴着膏药的老兵，一上训练场就生龙活虎起来，精气神十足.

“打不倒我的，只会使我更强大.“汪猛乐观向上的心态感染着身边的战友.

当舟桥兵，是体力与技术的双重考验.汽艇驾驶员肖旭宏对此有着更为深刻的理解.

湍急的江面上，汽艇驾驶员必须精准操纵汽艇，将牵引门桥送达预定位置.风速、水流速度、门桥重量，每一个因素都要纳入计算，操作的精准度极其严苛.

这样的训练不仅考验驾驶员的方向感，更对油门、操纵手柄与方向盘等操作提出了严格要求.

在湍急江流中保持较高航速时，肖旭宏需时刻双手紧握、全力稳舵.在与方向盘的长期”较量”中，他的大拇指落下伤病，隐隐作痛.

经过数千小时苦练，肖旭宏掌握了”铁掌驭轻舟”的绝技，实现了保障门桥牵引操作”零失误”.

在舟桥分队有”铁掌”之称的，何止肖旭宏一人.老兵们摊开手掌，大都可见一圈叠一圈的老茧.它们记录着门桥下水时钢缆摩擦的灼热、浪涛中竭力稳住桩基的震颤，以及无数个日夜中青春与使命一次次攥紧的坚定.

“舟桥兵的训练很苦很累，要求也很高，但不少人来了就不想走.“每到退伍季，某连郭指导员就挠头不已.连队服役期满主动申请留队的战士人数远超其他连队，而留队指标有限，他不得不逐一做思想工作.

面对战士们递来的一份份留队申请书，郭指导员说：”这恰恰说明，大家对舟桥兵岗位的认同，这也算是幸福的烦恼吧！”

这种认同，源于一种深刻的价值体验.正如汪猛接受记者采访时说的那样：”看到钢铁长龙在脚下合龙，那种自豪感无法用语言形容.所有的苦累，在那一刻都值了.“

环环相扣，共同托举起承载千军万马的钢铁通途

“一个人强不算强，百人同舟才能跨越江海.“在上等兵王怀霈的笔记本上，记录着这么一句话.

王怀霈是一名二次入伍的战士.下连以来，他留意到一个现象：文体活动时间，无论是球场竞赛、棋牌博弈，还是休息间隙的闲谈笑语，老班长和刚下连的新兵总能毫无隔阂地打成一片，玩在一起、乐在一起.

在他原先服役的部队，战友们相处得也很和谐，但舟桥兵这种亲密无间的感觉，似乎更进一步. 不过，这一步是”进”在哪里，他一时还没有琢磨透.

经过近 2 年的淬炼，王怀霈找到了答案——舟桥架设之时，没有军衔高低，只有战位不同，每一个人都是庞大体系中不可或缺的一个”齿轮”，彼此必须严丝合缝，才能精准咬合. 正是这种并肩作战、命运相系的关联，催生出舟桥兵之间分外浓厚的战友情谊.

那年 8 月，台风刚刚过境，河水一夜暴涨. 演练中，上级要求他们迎难而上，挑战极限条件下架桥作业：真正的战场无法选择天候时机，胜战须从险中求.

彼时，王怀霈刚下连不久，被分配到门桥连接组. 浊浪翻滚，门桥在浪涌中剧烈颠簸. 他和战友们一起在摇晃的门桥甲板上并肩作战，奋力打捞连接构件.

他们半跪在湿滑的门桥边缘，合力将沉重的锚机楔入孔位. 浑厚的口号声在他们喉咙里滚动：”一、二，拉！”

此刻，没有谁是孤胆英雄，只有互为支撑的臂膀、彼此呼应的呐喊、心照不宣的默契. 当最后一节门桥在官兵协同推拉下轰然合龙，一条钢铁巨龙终于横跨于汹涌的江面之上.

回到临时码头，每个人从头到脚裹满了泥浆，大家打量着彼此的”狼狈”模样，不约而同地发出了爽朗的笑声. 那一刻，王怀霈真切体会到什么叫同舟共济.

精密如齿轮的协同体系也意味着，任何一个战位的失误都可能被放大、牵动全局.

一次综合演练中的合龙阶段，一名舟桥作业手凭个人经验擅自操作，未按门桥长指令执行，最终导致锚机卡滞. 几分钟的延误，在实战中足以让整座浮桥失稳溃散. 这次教训，如重锤般敲在每个人心上：协同不是口号，而是铁律.

为提升团队默契，近年来，舟桥分队多措并举，组织岗位轮换训练，让官兵切身体会不同战位的协同需求；打破班排建制，实现专业混编，促进日常沟通协作；常态开展团体辅导活动，营造团结氛围，深化战友情谊……这些举措进一步夯实了”千人一座桥、千人一条心”的深厚基础.

新时代的舟桥兵，早已突破单一战位的传统界限. 就像他们亲手架设的浮桥一样，每个节点紧密咬合，环环相扣，共同托举起承载千军万马的钢铁通途.

平时与战时之间，隔着一条必须跨越的鸿沟

“快！快！再快点！”走进舟桥分队各连，这样的催促声无处不在.

舟桥分队向队长告诉记者，他们常年担负上级应急出动任务，出动速度的标准较高. 在他看来，速度是检验舟桥兵战斗力的核心标尺.

改革转隶后的一场实战化演训任务，成为向队长刻骨铭心的记忆——

那次，分队受命在规定时间内完成浮桥架设，突然狂风大作，下起暴雨，任务进展受到影响，浮桥最终未能按时合龙.

那次失利，像一根刺深深扎进向队长心里，也让他更加清醒地意识到：平时与战时之间，隔着一条必须跨越的鸿沟.

带着这样的紧迫感，向队长带领舟桥分队不断突破极限、向战而行：他们常态组织恶劣天候下的舟桥架设训练，锤炼官兵复杂条件下应变能力；开展夜间架桥训练，提升官兵全天候作战能力；组织实战背景下的应急架桥演练，强化官兵在敌情威胁下的快速反应与协同作战水平……

对第一次夜间架桥训练，汽艇驾驶员肖旭宏记忆犹新. 那天，月光被乌云遮蔽，江面漆黑如墨，他负责拖曳门桥至精确坐标.

“向左偏行，减速行进！”指挥员急促的指令从电台传来. 黑暗中，肖旭宏感受到每一次油门控制、每一次舵角修正都如履薄冰. 他屏息凝神，凭借经验和手感完成一次次”盲投”. 当渡场开设完毕，他才发觉手心已被汗水浸湿.

“要想向速度要战斗力，依靠传统的架桥方式远远不够. “近年来，随着科技成果在练兵备战中的运用越来越广泛，向队长敏锐地意识到，传统的作业方式难以满足未来战场对舟桥架设的需求.

分队定期召开”诸葛亮会”，从指挥员到战斗员，围绕装备改装、技术革新、无人智能装备运用等话题畅所欲言；开设”舟桥小课堂”，邀请厂家专家前来授课，鼓励连队的”兵专家”走上讲台，分享经验……

走进演训场，科技赋能给舟桥架设带来诸多新场景——

二级上士苗泽天操控的无人机升空，如鹰隼俯视江面. 红外镜头扫过湍急的水面，将水文数据实时回传终端.

不远处，一级上士李向阳操控无人艇破浪探路，在江面划出精准航迹，完成复杂的水文勘测.

最亮眼的，当属舟桥技师汪猛所操作的门桥. 只见装备电动舷外机的门桥灵巧调姿、稳驭激流，严丝合缝地嵌入到钢铁巨龙中……

在一次演训复盘中，汪猛发现，门桥在恶劣环境下操控精度不足，分解转移效率偏低. 反复琢磨后，他意识到动力控制的缺陷是症结所在.

“必须给门桥装上更强劲的‘心脏’和‘大脑’！”经过无数次的计算和模拟试验，一个大胆的方案应运而生：为门桥加装大功率电动舷外机，配备无线电遥控系统，让门桥在江水中实现精准敏捷的机动.

改装的方案在演训中不断打磨，架桥与分解浮桥的时间被一次次压缩，实测数据有力证明：浮桥的架设效率和战场生存能力显著提高. 此刻，舟桥兵真切感受到创新带来的战斗力跃升.

“既要追求速度上的提升，也要确保战场上的可行性. “ 前不久，二级上士张明友把目光投向了战场隐蔽防护.

受民用降尘设备启发，张明友巧妙构思出”门桥作业水雾遮障系统”，利用高压水泵和特制喷头，在门桥作业区域周围形成一道浓厚、流动的水雾幕墙. 此举可以有效干扰敌光学侦察设备的探测，显著提升作业分队在敌威胁下的生存能力. 这个看似简单的创新，解决了战场防护的实际难题.

一切创新探索，只为胜战. 一场舟桥架设训练刚结束，舟桥分队迅速组织复盘研讨.

“增加无人智能装备的投入使用，减少人员暴露风险的同时提高作业效率”“要着力培养新作业手的‘一专多能’能力，确保战斗减员时每个战位能照常快速运转”……指挥所内，一次次”头脑风暴”为胜战寻觅新路.

记者手记

与钢铁为伍，与江河为伴

■解放军报特约记者 廖晓彬

舟桥，常被赋予壮美的意象. 钢铁长龙横卧天堑，在江河波涛上铺就通途，令人叹为观止. 然而，对常年征战在大江大河上的舟桥兵而言，舟桥架设远非想象中那般诗情画意.

湍急的江水中，脚下是摇晃不稳的门桥甲板，耳边是引擎的轰鸣与浪涛的嘶吼. 目之所及，只有冰冷的钢铁构件和官兵争分夺秒的身影. 颠簸、高压……这些词或许更能贴切地描述舟桥兵们日常的战斗状态.

第 73 集团军某旅舟桥分队，在改革强军的浪潮中淬炼成长，肩负着保障千军万马跨越江河的重任. 为了跨越天堑铺就通途，即使面对再恶劣的环境、再险峻的条件，他们都勇于冲锋、永不言弃.

从白天作业到夜间突袭，从炎炎烈日到狂风骤雨，舟桥兵不断挑战极限、超越自我. 在一场场实战化训练中，他们将保障力的链条锻造得更加坚韧牢靠.

如何高效嵌入协同保障的新链路、如何最大限度挖掘现有装备的潜能、如何创新适应更多陌生水域的新战法……作为一支机械化分队，他们瞄准未来战场，思考战斗力升级的新路径. 他们征服的不仅是自然天堑，更是战场险阻.

日复一日地与钢铁为伍、与江河为伴，舟桥兵将青春熔铸进一座座通往胜利的桥梁. 他们或许很少出现在聚光灯下，但每一次铁流滚滚的通途跨越，每一次实战化训练的有力保障，都是他们对使命最好的诠释.

舟桥兵的故事，就像那横跨江河的钢铁长龙，沉默而坚实. 浪花会记得，江河会记得，在天堑与通途之间，舟桥兵为胜利铺就的每一段征程.

A pontoon bridge unit from a brigade of the 73rd Group Army is carrying out a pontoon bridge operation. Photo by Yuan Dekun

“If I had to say anything, it would be that I never saw tanks plying the pontoon bridge I built.”

Not long ago, Sergeant First Class Li Guanghao, who was about to complete his service in a brigade of the 73rd Group Army, became extremely busy. He worked overtime to compile his professional insights and experiences, compiling them into a book to hand over to the company’s new core members. When asked by his instructor if he had any regrets about his military career, he uttered this:

As a veteran of the pontoon bridge industry for many years, he knew only too well the arduous process of building a pontoon bridge. However, whenever a pontoon bridge was completed, he and his comrades would quickly evacuate and take cover with the team. Despite participating in the construction of so many pontoon bridges, he had never had the opportunity to witness the “steel torrent” passing over them.

Amidst regret, there is glory. Li Guanghao knows full well that this is the mission of a pontoon bridge soldier: to transform natural barriers into a thoroughfare, and to lay the foundation for victory.

If one does not understand the significance of bridge construction, one cannot be a good pontoon bridge soldier.

A pontoon bridge detachment from a brigade of the 73rd Group Army conducts river crossing support training. Photo by Yuan Dekun.

The sun blazes brightly, the heat waves scorching. Across the vast, turbulent river, a floating bridge races to reach the other side.

Private Shang Wanqin stands firmly on the gate bridge, his windlass flexing deftly, the bridge beneath his feet unwavering. His movements are clean, efficient, and coordinated with pinpoint precision. You might not believe that just a few months ago, he was intimidated by bridge-building training. During a bridge-building exercise, Shang Wanqin's left foot was accidentally struck by an anchor, leaving him sleepless for several nights. From then on, he developed an inexplicable resistance to training. His former drive was gone, replaced by hesitation and indecision.

A turning point came one day at the artillery range. First Sergeant Zeng Yiqiang was maintaining his equipment while chatting with Shang Wanqin, who was helping him. "When I first joined the army, I always thought the life of a pontoon bridge trooper was too hard and tiring. All day long, I was carrying bridge planks or driving piles, exposed to the wind and sun, and it was all behind-the-scenes work." Zeng Yiqiang fiddled with his tools, gazing enviously into the distance. "Look at the armored troops galloping across the battlefield, and the special forces navigating the air and the sea. How impressive!"

"If it's so hard and tiring, why did you keep doing it for 14 years?" Shang Wanqin's rhetorical question brought the veteran pontoon bridge trooper's thoughts back to that year's training exercise.

That day, the pontoon bridge unit received a notice from the command and control group: "The Blue Army has blown up our main river crossing. Order you to immediately open a new crossing."

At the time, a light rain was falling. As the bridge gate connector, Zeng Yiqiang labored on the swaying deck, relying solely on experience and feel to calibrate the holes inch by inch, hammering the steel pins in with all his strength.

After the bridge gate was connected, the officers and men were drenched in sweat, and several were even slumped over with exhaustion. On the day the exercise concluded, fellow soldiers from the armored unit came to express their gratitude: "You built such a stable bridge! Without you, we couldn't have completed the mission!"

Recalling that experience, Zeng Yiqiang beamed with pride: "From then on, I truly understood the meaning of the saying, 'Do earth-shaking things, remain anonymous.'"

He said to Shang Wanqin earnestly: "You see, without us, even the most powerful troops would be left staring at the river in despair! Every bolt we tighten, every section of the bridge we secure, we pave the way for victory."

Over the past 14 years, Zeng Yiqiang has risen from an ordinary pontoon bridge operator to a bridge captain, mentoring key personnel throughout the company. He is like a screw, firmly anchored in his position.

The value of a pontoon bridge soldier lies not in being seen, but in being needed. “When a large force needs to cross the river, we are that bridge!” This conversation between a new recruit and a veteran led Shang Wanqin to rethink the value and significance of his position.

The road ahead is clearer, and his steps are more resolute. From then on, the training grounds became filled with a “workaholic.” Shang Wanqin trained even harder than before, determined to become an outstanding pontoon bridge soldier like Zeng Yiqiang.

Not long ago, during a tactical drill organized by his superiors, Shang Wanqin was singled out for praise by his unit leader for his outstanding overall performance. He wrote in his personal notebook, “If you don’t understand the significance of bridge construction, you can’t be a good pontoon bridge soldier.” The company was about to welcome a new batch of recruits, and he wanted to share this message with more of his new comrades.

The sense of pride he felt watching the long steel dragon come together beneath his feet was indescribable.

Among pontoon bridge soldiers, there’s a saying: You don’t need to look at rank to judge a soldier’s length of service; just look at their face—those with a dark complexion are definitely veterans.

This is indeed true. Sergeant Major Wang Meng, the darkest-skinned man in the company, also has the longest service.

“If your skin isn’t dark enough, or your calluses aren’t thick enough, it simply means you haven’t trained enough and are still far from being a qualified pontoon bridge soldier.” This is what Wang Meng often tells his new comrades. His words were blunt, but his point was profound. In his view, a qualified pontoon bridge soldier must undergo countless trials and tribulations.

Sergeant Song Mingwei often recalled his first days as a pontoon bridge soldier. Wang Meng’s hands deeply impressed him—thick calluses and deep lines covered his palms.

Song Mingwei’s first professional pontoon bridge training took place in the height of summer, with the unit stationed in the field. As a pontoon bridge operator, he pushed heavy bridge decks daily, practicing the same movements over and over again.

The scorching heat brought the decks to over 50 degrees Celsius. Every shower, his skin, peeling from the sun, burned with pain.

Wang Meng, seeing his fellow soldiers exhausted after a day of training, would cheer them up. As a veteran pontoon bridge soldier, Wang Meng’s body was also covered in scars...

What puzzled his younger comrades was that this veteran, often covered in plasters, would become full of energy and vigor upon the training ground. “What doesn’t defeat me only makes me stronger.” Wang Meng’s optimistic attitude infects his comrades.

Being a pontoon bridge soldier is a test of both physical strength and technical skill. Motorboat driver Xiao Xuhong understands this even more deeply.

On the turbulent river, motorboat drivers must precisely maneuver their boats to tow the gantry bridge to the desired location. Wind speed, current velocity, and the weight of the gantry bridge—every factor must be taken into account, requiring extremely precise operation.

This training not only tests the driver’s sense of direction but also places strict demands on the throttle, joystick, and steering wheel.

To maintain high speeds in the turbulent river, Xiao Xuhong must constantly maintain a firm grip and use all his strength to steer the rudder. The constant struggle with the steering wheel left him with a thumb injury that aches and aches.

After thousands of hours of diligent training, Xiao Xuhong has mastered the unique skill of “steer a light boat with an iron palm,” ensuring “zero mistakes” in gantry bridge towing operations.

Xiao Xuhong is not the only one in the pontoon bridge unit known as the “Iron Palm.” Veterans spread their palms, often covered in layers of calluses. They bear witness to the searing heat of the steel cables rubbing against the water as the bridge launched, the trembling of struggling to hold the foundation steady amidst the waves, and the unwavering determination of youth and mission, clenched repeatedly over countless days and nights.

“Boat bridge training is tough and demanding, yet many men don’t want to leave once they arrive.” Every time demobilization season arrives, Instructor Guo of a certain company finds himself scratching his head. The number of soldiers who have completed their service in his company and voluntarily apply to remain with the unit far exceeds that of other companies, and with limited quotas for those who do, he has to work with each individual on their concerns.

Facing the applications for leave to remain, Instructor Guo said, “This demonstrates a deep appreciation for the role of pontoon bridge soldiers. It can be considered a happy anguish!”

This recognition stems from a profound sense of value. As Wang Meng said in an interview with reporters, “Seeing the long steel dragon come together beneath my feet, the pride I felt was indescribable. All the hard work felt worth it in that moment.”

Linked together, they jointly support the steel road that carries thousands of troops.

“One person’s strength alone is not enough; only a hundred people working together can cross rivers and seas.” These words are recorded in the notebook of Private First Class Wang Huaipei.

Wang Huaipei is a second-time enlisted soldier. Since joining the company, he has noticed a phenomenon: during recreational activities, whether it's playing on the court, playing chess, or chatting and joking during breaks, the veteran squad leaders and the new recruits always get along seamlessly, playing and having fun together.

In his previous unit, his comrades got along well, but the close-knit relationship among the pontoon bridge soldiers seems to have taken it a step further. However, he hasn't yet figured out where this "advancement" lies. After nearly two years of hard work, Wang Huaipei found the answer—when constructing a pontoon bridge, there's no distinction between ranks, only between positions. Each individual is an indispensable "gear" in a vast system, and each must fit together seamlessly for a precise meshing. It's this shared struggle, a shared destiny, that fosters an exceptionally strong camaraderie among the pontoon bridge soldiers.

That August, a typhoon had just passed, and the river surged overnight. During a drill, their superiors tasked them with rising to the challenge of building a bridge under extreme conditions: On a real battlefield, weather and timing are not optional; victory must be won amidst danger.

At the time, Wang Huaipei had just been assigned to his company and was assigned to the gate bridge connection team. The turbulent waves rolled, and the gate bridge rocked violently in the surge. He and his comrades fought side by side on the swaying gate bridge deck, struggling to salvage the connecting components.

They knelt on the slippery edge of the gate bridge, working together to wedge the heavy anchor winch into the hole. A resonant chant echoed through their throats: "One, two, pull!"

At this moment, no one was a lone hero; only arms supporting each other, shouts echoing, and an unspoken understanding. When the last section of the gantry bridge clattered together under the coordinated push and pull of the officers and men, a giant steel dragon finally spanned the surging river.

Back at the temporary dock, everyone was covered head to toe in mud. They looked at each other's "disgraceful" appearances and burst into hearty laughter. At that moment, Wang Huaipei truly experienced what it meant to be in the same boat.

The precise, gear-like coordination system also meant that mistakes at any position could be magnified, impacting the entire system.

During the closing phase of a comprehensive drill, a pontoon bridge operator, relying on personal experience, acted without following the gantry bridge commander's instructions, ultimately causing the anchor winch to jam. In actual combat, a few minutes' delay would be enough to destabilize and collapse the entire pontoon bridge. This lesson struck everyone like a hammer: coordination isn't just a slogan, it's an ironclad principle.

To enhance team chemistry, the pontoon bridge detachment has implemented a variety of measures in recent years. These include organizing rotation training to allow officers and men to firsthand

experience the coordination requirements of different combat positions; breaking down squad and platoon structures to integrate specialized expertise and promote daily communication and collaboration; and regularly conducting group counseling sessions to foster a spirit of unity and deepen camaraderie. These initiatives have further solidified the foundation of "One Thousand men, One Bridge, One Heart."

The pontoon bridge troops of the new era have long transcended the traditional limitations of a single combat position. Just like the pontoon bridge they built with their own hands, each node meshes tightly, interlocking with each other, collectively supporting the iron road that carries thousands of troops.

Between peacetime and wartime lies a chasm that must be bridged.

"Hurry! Hurry! Hurry!" Walking through the various companies of the pontoon bridge detachment, this urging cry is ubiquitous.

The pontoon bridge detachment told reporters to their captain that they frequently undertake emergency deployment missions from superiors, and their standards for deployment speed are high. In his view, speed is the core criterion for testing the combat effectiveness of the pontoon bridge troops.

A combat-oriented training mission after the reform and transfer of command has become a deeply etched memory for Captain Xiang.

On that occasion, the unit was ordered to complete the construction of a pontoon bridge within the specified timeframe. Suddenly, strong winds and heavy rains blew, hampering the mission's progress and ultimately preventing the bridge from being completed on schedule.

That failure, like a thorn in Captain Xiang's heart, made him more acutely aware of the chasm that must be bridged between peacetime and wartime.

With this sense of urgency, Captain Xiang led the pontoon bridge unit to continuously push boundaries and forge ahead into combat. They regularly conducted pontoon bridge construction training in inclement weather to hone the soldiers' ability to respond to complex conditions; conducted nighttime bridge-building training to enhance the soldiers' all-weather combat capabilities; and conducted emergency bridge-building drills in real-world combat settings to strengthen the soldiers' ability to react quickly and coordinate operations under enemy threats.

Motorboat driver Xiao Xuhong vividly remembers his first nighttime bridge-building training session. That day, the moonlight was obscured by dark clouds, and the river was as black as ink. He was responsible for towing the pontoon bridge to the precise coordinates.

"Sideways to the left, slow down!" The commander's urgent instructions came over the radio. In the darkness, Xiao Xuhong felt every throttle control and every rudder angle adjustment as if

walking on thin ice. He held his breath, relying on experience and feel to complete each “blind throw.” Only when the crossing was completed did he realize his palms were soaked with sweat.

“If we want to achieve combat effectiveness through speed, relying on traditional bridge-building methods is far from enough.” In recent years, with the increasing application of scientific and technological achievements in training and preparation, Captain Xiang has keenly realized that traditional methods cannot meet the demands of future battlefield pontoon bridge construction. The detachment regularly holds “Zhuge Liang meetings,” where commanders and men alike can freely discuss topics such as equipment modification, technological innovation, and the use of unmanned intelligent equipment. They also hold “pontoon bridge mini-classrooms,” inviting manufacturer experts to give lectures and encouraging the company’s “soldier experts” to share their experiences.

On the training grounds, technology empowers many new scenarios for pontoon bridge construction.

Sergeant 2nd Class Miao Zetian pilots a drone, hawk-like, surveying the river. Its infrared camera scans the turbulent waters, transmitting real-time hydrological data back to the terminal.

Nearby, Sergeant 1st Class Li Xiangyang pilots an unmanned boat, blazing through the waves and carving a precise path across the river, completing complex hydrological surveys.

The most eye-catching feature is the portal bridge operated by pontoon bridge technician Wang Meng. Equipped with an electric outboard motor, the portal bridge deftly adjusts its position, steadfastly controls the turbulent current, and seamlessly integrates into the steel dragon.

During a training review, Wang Meng discovered that the portal bridge’s control precision was insufficient in harsh conditions, resulting in low efficiency in decomposition and transfer. After repeated consideration, he realized that the flaws in power control were the crux of the problem.

“We must equip the portal bridge with a more powerful ‘heart’ and ‘brain’!” After countless calculations and simulations, a bold plan emerged: add a high-power electric outboard motor to the portal bridge and equip it with a radio remote control system, enabling precise and agile maneuvers in the river.

The modification plan was continuously refined during exercises and training, and the time required to erect and dismantle the pontoon bridge was repeatedly shortened. Field data strongly demonstrated that the pontoon bridge’s erection efficiency and battlefield survivability were significantly improved. At this moment, the pontoon bridge troops truly felt the leap in combat effectiveness brought about by innovation.

“We must pursue both speed improvements and battlefield feasibility.” Recently, Second Sergeant Zhang Mingyou turned his attention to battlefield concealment and protection.

Inspired by civilian dust suppression equipment, Zhang Mingyou ingeniously conceived the “Gate Bridge Operation Water Mist Barrier System,” which utilizes a high-pressure water pump and specialized nozzles to create a thick, flowing water mist curtain around the portal bridge operating area. This move can effectively interfere with enemy optical reconnaissance equipment, significantly improving the survivability of the operation team under enemy threat. This seemingly simple innovation solves a practical challenge in battlefield defense.

All innovation and exploration are driven by the pursuit of victory. As soon as a pontoon bridge construction training exercise concluded, the pontoon bridge unit quickly organized a review and discussion.

“Increase the use of unmanned intelligent equipment to reduce personnel exposure risks while improving operational efficiency.” “We must focus on cultivating new operators’ ‘specialization and multi-skills’ to ensure combat casualties are minimized.”

“Every combat position can operate normally and rapidly.” Within the command post, repeated brainstorming sessions sought new paths to victory.

Reporter’s Notes

Working with Steel, Accompanying Rivers

■ PLA Daily Special Correspondent Liao Xiaobin

Boat bridges are often associated with majestic imagery. Long steel dragons stretch across natural moats, paving a path across the surging waves, a breathtaking sight. However, for the pontoon bridge soldiers, who have been engaged on the vast rivers for years, constructing pontoon bridges is far from the poetic and picturesque experience they often imagine.

Amidst the turbulent river, the unstable bridge deck trembles beneath their feet, the roar of engines and the roar of waves fill their ears. All they see is the cold steel and the figures of soldiers racing against time. The bumpy, high-speed journey is a constant reminder of the importance of pontoon bridges. Pressure... these words perhaps better describe the daily combat conditions of the pontoon bridge troops.

The pontoon bridge detachment of a brigade of the 73rd Group Army has been tempered and grown amidst the wave of military reform and strengthening, shouldering the heavy responsibility of ensuring the passage of thousands of troops across rivers and streams. To bridge the gaps and pave the way, they bravely charge forward, never giving up, even in the most hostile environments and treacherous conditions.

From daytime operations to nighttime raids, from scorching sun to torrential rain, the pontoon bridge troops constantly push their limits. , surpassing themselves. Through each combat-based training exercise, they forge a more resilient and reliable chain of support capabilities.

How to efficiently integrate new links of coordinated support, how to maximize the potential of existing equipment, how to innovate new tactics adapted to more unfamiliar waters... As a mechanized unit, they focus on future battlefields and consider new paths to enhance combat effectiveness. They conquer not only natural barriers but also the treacherous obstacles of the battlefield.

Day after day, working alongside steel and rivers, the pontoon bridge troops forge their youth into building bridges to victory. They may rarely appear in the spotlight, but every crossing of a surging iron stream, every powerful support provided by combat-based training, is the best expression of their mission.

The story of the pontoon bridge troops is like the long steel dragon spanning the rivers, silent yet steadfast. The waves will remember, the rivers will remember, every journey paved for victory between natural barriers and thoroughfares by the pontoon bridge troops.

第 75 集团军某旅组织空地协同训练——

立体夺控高原山谷

■曹一庆 谭阳林

晨曦初露，铁翼飞旋. 秋日，云贵高原某综合训练场上，第 75 集团军某旅一场高强度空地协同训练拉开战幕.

该旅领导介绍，此次训练，他们突出空地作战力量融合指挥与协同行动，全程嵌入复杂特情，在近似实战环境中全面锤炼部队指挥协调、战术配合、综合保障等能力.

“编队注意，沿山谷轴线隐蔽突防！”训练现场，部队闻令而动，直升机编队依地形起伏穿行于山谷之中，充分利用地形，规避“敌”雷达侦测.

突然，一架僚机驾驶舱内响起告警声. 飞行员立即实施机动规避，释放干扰弹，掩护长机实施打击.

攻防双方斗智斗勇，山谷战场硝烟四起. 在武装直升机的火力掩护下，一架运输直升机直扑“敌”纵深，快速实施机降行动.

成功降落地面后，突击队员放飞无人机进行临空侦察，精准掌握“敌”防御部署，并实时回传情报信息. 很快，目标数据分发至空中火力单元，多架武装直升机组成的打击编队立即对“敌”展开精确打击，为后续运输直升机分队成功开辟“安全走廊”.

随后，运输直升机分队迅即沿通道突进，精准投送后续兵力和装备. 完成机降和打击任务的各单元依预案交替掩护撤回，采取低空、多路、分散方式撤离战场，有效规避“敌”残余火力威胁.

“此次训练有效检验了部队在复杂电磁环境下突防、打击与回撤的全流程作战能力，彰显了部队在体系攻防、精准协同方面的实战化训练成果. ”该旅领导介绍，此次训练中，他们注重构建信息共享体系，使各火力单元能够实时全面掌握战场动态. 空中火力模块依据作战任务和实时态势，及时对“敌”关键节点实施压制打击.

“平时训在一起，战时才能联成一体. ”该旅一名飞行参谋介绍，此次训练，空中编队和地面突击力量同步实施指挥决策，有效缩短决策流程、提高打击效率，为后续组训施教积累了经验.

夕阳西下，硝烟渐散. 参训官兵齐聚一堂，围绕训练中暴露出的问题展开复盘总结. 大屏幕上，密密麻麻的数字和图表，清晰记录了训练中的火力精度、协同用时、毁伤效果等关键指标，为下一步改进训练方式提供了坚实的数据支撑.

A 75th Group Army Brigade Conducted Air-Ground Coordination Training.

Source: PLA Daily. Author: Cao Yiqing, Tan Yanglin. Editor: Xu Zhanhu. 2025-10-17.

A brigade of the 75th Group Army conducted air-ground coordination training—

Three-dimensional Conquest of the Plateau Valley

■Cao Yiqing, Tan Yanglin

Dawn breaks, and wings soar. On an autumn day, at a comprehensive training ground on the Yunnan-Guizhou Plateau, a brigade of the 75th Group Army commenced a high-intensity air-ground coordination training exercise.

Brigade leaders explained that this training emphasized the integrated command and coordinated operations of air-ground combat forces, fully engaging with complex special situations, and honing the troops' command and coordination, tactical coordination, and comprehensive support capabilities in a near-real-combat environment.

"Attention formation, conduct a covert penetration along the valley axis!" At the training site, the troops responded to the command. The helicopter formation navigated the valley, adapting to the undulating terrain and making full use of it to avoid "enemy" radar detection.

Suddenly, an alarm sounded from the cockpit of a wingman. The pilot immediately executed an evasive maneuver and released jamming flares to cover the lead aircraft's strike.

The attacking and defending sides engaged in a battle of wits and courage, and the valley was thick with smoke. Under the cover of attack helicopter fire, a transport helicopter plunged deep into enemy territory and quickly landed.

After successfully landing on the ground, the commandos launched a drone for aerial reconnaissance, accurately assessing the enemy's defensive deployment and transmitting intelligence back in real time. Target data was quickly distributed to the airborne firepower unit, and a strike formation consisting of multiple attack helicopters immediately launched a precision strike against the enemy, successfully creating a "safe corridor" for the following transport helicopter unit.

The transport helicopter unit then quickly advanced along the corridor, precisely deploying follow-up troops and equipment. After completing their landing and strike missions, the units alternated in providing cover for their withdrawal according to the pre-planned plan, employing a low-altitude, multi-route, and dispersed withdrawal from the battlefield to effectively evacuate the remaining enemy firepower. "This training effectively tested the troops' full-process operational capabilities for penetration, strikes, and withdrawal in a complex electromagnetic environment, demonstrating the troops' practical training achievements in systemic offense and defense, as well as precise coordination." Brigade leaders explained that during this training, they focused on building an information-sharing system, enabling each firepower unit to fully and comprehensively grasp battlefield dynamics in real time. The aerial firepower module, based on the combat mission and real-time situation, promptly implemented suppressive strikes against key enemy nodes.

“Training together in peacetime allows us to function as a unified force in wartime,” explained a brigade flight staff officer. During this training, the air formation and ground assault forces implemented simultaneous command and decision-making, effectively shortening the decision-making process and improving strike efficiency, accumulating experience for subsequent training and instruction.

As the sun set and the smoke gradually dissipated, the participating officers and men gathered to review and summarize the issues exposed during the training. On the large screen, densely packed numbers and charts clearly recorded key indicators such as firepower accuracy, coordination time, and damage effectiveness during the training, providing solid data support for further improvements to training methods.

“刘老庄连”组织进攻战斗训练. 解放军报特约记者 张永进摄

朱日和联合训练基地，像一位时光见证者，目睹了多少雄师劲旅上演的战争活剧.

今年 8 月，一场实兵对抗演练进入胶着状态，导调组突然宣布：“红方排长以上指挥员全部被定点‘清除’！”

这是一次超出作战预案的特情设置，用意十分明显：他们想看看，红方突击分队的班长骨干到底是啥水平. “刘老庄连”迅即拿出对策，由一班班长、四班班长分别接替连长、指导员，排指挥岗位由副班长递补，继续组织战斗，最终将连旗插上了蓝方固守的高地.

载誉归营途中，战车驶过高高的铁塔，只见塔身赫然写着 7 个鲜红的大字：从这里走向战场.

走向战场，需要有灵魂、有本事、有血性、有品德的勇士尖兵. 进入新时代，一茬茬“刘老庄连”战士厚植家国情怀，淬火铸魂强能，砥砺胜战本领. 如今的他们，时刻等待党和人民的一声号令.

一名士兵的追求有多高？

在军营里寻找最有意义的青春

这是“刘老庄连”两名战士之间的一次对话——

“提干失败，有没有想过退伍？”

“没有！”

“为什么？”

“因为在部队很幸福，我想干一辈子……”

提干失败的战士叫王熙炜，是一名大学生士兵. 早在读高中时，他就规划好了今后的人生——参军.

“好男儿就要去当兵！”分到“刘老庄连”后，王熙炜更加坚定了自己的选择，并深深爱上了火热的军营生活. 战友们说，他像一个移动的“活力源”，无论在哪里，不管干多苦多累的活，都阳光开朗、激情四射.

接受记者采访时，王熙炜道出了内心的秘密：“在英雄连队当兵，我渴望荣立真正的战功！”

在天津大学读书时，王熙炜学的是物流工程专业，虽然入伍不到两年，他已经在思考如何将自己掌握的知识，运用到标准化作业和军事交通领域.

与王熙炜一样怀着相似想法的，还有大学生士兵朱肖杰. 两人的不同之处在于，朱肖杰是追随同学的脚步参军的.

朱肖杰和下士严鹏飞是高中同学，朱肖杰考入大学读书，严鹏飞选择当兵，比朱肖杰早 3 年来到“刘老庄连”. 3 年里，两人一直保持着联系，严鹏飞跟朱肖杰说得最多的一句话就是，“在部队可以找到最有意义的青春”.

什么是“最有意义的青春”？严鹏飞没有明说. 来到连队后，朱肖杰渐渐找到了答案.

2008 年 5 月 12 日，薛芝武的家乡汶川发生大地震. 他从学校跑回家时，房屋已成一片废墟. 没过多久，一群穿着迷彩服的解放军官兵，高举“铁军来了”的旗帜，给灾区人民带来生的希望，也在他心里埋下了从军报国的种子.

两年后，薛芝武参军入伍，来到“刘老庄连”. 他惊喜地发现，连队所在旅正是当年的那支“铁军”.

在英雄连队这片沃土的滋养下，薛芝武不断成长进步，还担任五班班长、入了党. 五班在他的带领下，多次参加大项演训任务，荣立集体二等功.

“一个人，只有将自己的前途命运与国家和民族的前途命运结合起来，才能绽放最有意义的青春. ”从战友口中得知薛芝武的故事后，朱肖杰深深感到，作为新时代的青年人，最应该拥有的品质就是家国情怀.

家国情怀的动人之处，极致地体现在忠孝难以两全之时.

炮手曹宝刚，有个双胞胎哥哥曹刚. 当年，兄弟俩携手入伍来到“刘老庄连”的故事，经媒体报道后一时成为美谈. 然而，两年后的“退伍季”，两人面临一次艰难选择.

当时，兄弟俩军事训练成绩不分伯仲，留队都没有问题，可是命运弄人，他们的父亲得了重病，急需照顾.

“走还是留？到底谁走？”得知消息那晚，兄弟俩辗转难眠.

“咱俩比一下吧，胜出留下尽忠，输了回家尽孝！”第二天，弟弟向哥哥“下了战书”. 比武场上，兄弟俩互不相让，最终曹刚惜败.

脱下军装那天，曹刚眼含热泪鼓励弟弟：“留下来就好好干，当好‘刘老庄连’的兵！”“哥，你照顾好家，军旅路我替你接着走！”说完，两人紧紧拥抱在一起.

肩负梦想冲锋，曹宝刚越战越勇：2014 年勇夺“谁是终极英雄”比赛第一名，2015 年取得射击比武第一名，2016 年斩获“中部铁拳-坦克·铁骑”比武第一名……

“刘老庄连”的战士，都读过这样一封信，那是 1941 年，时任连队指导员李云鹏写给父母的家书——

“自儿离家已经年余，记得曾在本年四月间，于泗县郑集寄家信一封，不知大人收到否？回音否？如家音回报，可惜我也不能等收了……待风息波静，凯然而归，全家团聚，以报此恩. ”

这封信寄出不到两年，李云鹏就在刘老庄战斗中壮烈牺牲.

作为刘老庄人，朱肖杰对这封家书耳熟能详，但来到“刘老庄连”一年后，得知很多战友的入伍动机，他才真正读懂了它——

2024 年 3 月，家在天津市静海区的孙铭朝，被前来抗洪救灾的“刘老庄连”26 名官兵感动，毅然选择参军，成为“刘老庄连”的一员；

2024年7月，硕士研究生王麟虎从河南大学毕业，专程前往侵华日军南京大屠杀遇难同胞纪念馆参观，已经25岁的他当即决定参军；

2025年秋天，又一批刘老庄籍新兵慕名而来，他们从小听着“八十二勇士”的故事长大，立志成为英雄的传人……

这些年轻人，昨天还是家里的孩子、学校的学生，今天就成为共和国的士兵. 英雄的连队永远后继有人，英雄的军队始终英雄辈出！

一名士兵的眼光有多远？

无穷的“远方”，都与他们有关

今年 7 月，刚走出校门的学员张杭来到“刘老庄连”实习，参加的第一堂形势战备教育课，令他印象深刻.

连长朱明朝讲完周边局势后，进入讨论环节. 在校读书时就对国际地缘政治颇有研究的张杭正想举手发言，就被几个义务兵抢了先.

令他惊讶的是，这几名战士不仅摆事实、讲观点，还结合自己的判断给出应对之策. 其间，两名战士因看法不同，竟当场辩论起来.

“无穷的远方，无数的人们，都和我有关. ”张杭发现，“刘老庄连”的士兵对鲁迅先生的这句话有着自己的解读，他们的视野如此开阔，异国上空的战火硝烟、最新研发的武器装备、兄弟单位的创新做法，都会频频出现在连队的教育课堂或训练场上.

去年 3 月 18 日，上等兵许苏广作为连队代表，前往刘老庄参加祭奠英烈活动时，顺道赴某单位参观见学. 满眼的高技术和新装备，让他既心生羡慕又深受触动. 回到连队后，听说旅里要组织无人机操控手集训，身为炮手的许苏广第一时间报名参加.

“以前大家都认为，武装直升机是装甲兵的天敌，但从近期的武装冲突看，无人机俨然成为坦克和步战车的克星. ”许苏广入伍时间不长，但对最新军事动态的关注，让他产生了强烈的“本领恐慌”.

功夫不负有心人. 经过一个多月的强化学习训练，许苏广力压侦察营专业无人机操控手，在结业考核中取得优异成绩.

近年来，“刘老庄连”所在旅加快战斗力建设转型，一个装甲步兵班不再是“一台战车打天下”，还有多型单兵武器. 官兵强烈感到，要成为一名过硬的“合成步兵”，必须树立战场思维，掌握更多打仗本领.

那年，手工兵棋配发连队，三班副班长赵嘉鑫爱不释手. 只要有空，他就翻开兵棋使用说明书和交战规则，对着不同色块的方格和棋子摆练. 他渐渐发现，这块两米见方的“棋盘”，既蕴含着运筹帷幄的无穷奥妙，也无情击碎了一个个看似合理的现实.

譬如，以往规划前进路线时，途经的山头、桥梁甚至一个乡镇，在个别指挥员眼里就是地图上的黑点，“一脚油门就过去了”，很少考虑真实情况如何. 如今，经过手工兵棋推演，那些“拍脑门的谋略”“凭感觉的指挥”“差不多的行动”都被一一揭穿.

“都说未来战争是‘班长的战争’，在讲求精兵制胜的未来战场，班长虽身居指控末端，却关系全局，不仅要会带兵，更要会用兵！”赵嘉鑫介绍，一次班战术对抗训练，他运用手工兵棋制订出最佳进攻方案，带领全班以压倒性优势力克对手.

一石激起千层浪. 在“刘老庄连”，越来越多的战士“兵为将谋”，琢磨更多有关打仗的问题.

不久前的一次“被俘”经历，让八班副班长徐旭对夜战夜训有了新的思考.

那不过是连队组织的夜间对抗训练，一排、二排扮演“红军”，三排扮演“蓝军”. 刚进入侦察环节，自以为隐蔽巧妙的徐旭，就被“红军”一名战士通过单兵夜视仪发现了行踪.

“随着夜视装备的大量配发，夜色的掩护形同虚设，那么夜训到底应该训什么？”当徐旭把自己的想法上报后，连队随即将此列入课题，组织官兵集智攻关.

谈及此事，其所在营主官不禁感慨：“现在，在营连当主官压力很大，因为官兵之间几乎只有岗位之别了，很多战士的思维、眼光和解决问题的能力，已经不亚于干部了！”

一名士兵的肩膀有多硬？

“为了胜利，不惜牺牲自己的一切”

“真的假的？”

读到“刘老庄连”九班副班长熊江鑫“手撕铁丝网”的故事，兄弟连队的一名战士感到不可思议，专门前来求证.

今年初，旅里把“刘老庄连”的事迹结集成册，发给各连学习. 这里面还有另外一层考量：让其他连的官兵给“刘老庄连”挑挑刺.

2022 年初夏，一场实兵演练激战正酣. 熊江鑫所在的九班向“敌”纵深突进途中，被一道布满尖刺的铁丝网拦住了——这是向前攻击的唯一通道，两边皆是深沟，无法绕行.

时间分秒流逝，若不及时开辟通路，全排乃至全连的进攻将被打乱. 此时，九班仅剩 3 名载员，且爆破器材早已耗尽.

熊江鑫注意到，铁丝网两端固定在大树上，没有专门的工具很难破开. 情急之下，他快速匍匐到铁丝网前，徒手用力撕扯. 尖刺扎破手掌，鲜血直流，熊江鑫强忍疼痛，硬是将铁丝网的一端从树上拽了下来.

“‘刘老庄连’的战友真有血性！”得知真相，这名战士向熊江鑫竖起大拇指. 熊江鑫连连摆手：“我这事不算什么，谭森的表现才够‘硬核’！”

2023 年 4 月，联南苏团对中国维和步兵营进行战备能力评估. 不同以往，此次考核组刻意增加难度，在考核临近尾声时制造了一场“意外”——一名由外军扮演的“武装分子”突然蹿出，向维和营区核心点位冲去.

这名“武装分子”着实不简单. 为检验中国维和官兵的应急处突水平，考核组专门从别国维和部队里挑了一名体能高手.

作为中国维和步兵营快速反应班成员，谭森同样不简单. 别看他身材瘦小，却在旅里的比武中创造多项纪录.

“STOP！”来不及多想，谭森本能地带领快反班猛追上去.

当天气温高达 40 多摄氏度，这名“武装分子”有备而来，穿着短裤、短袖、跑鞋. 而谭森这边，个个全副武装，身上的负重有 10 多公斤. 在途经碎石路段时，谭森一脚踩滑，摔倒在地，右膝被划开一道口子.

就当大家以为这场考核就此结束时，谭森撑地而起，继续追击. 终于在一个拐弯处，谭森瞅准时机，一个箭步上前，使用抓捕器锁住那名“武装分子”的小腿，成功将其制伏.

有人说，一名士兵怎样，一个连队便怎样；一个连队怎样，一支军队就怎样. “刘老庄连”战士的“硬肩膀”，源自人民军队历史深处. 朱德同志在《八路军新四军的英雄主义》一文中，把刘老庄战斗与平型关大捷、阳明堡火烧敌机、百团大战、狼牙山五勇士壮烈跳崖等并列，称它们是“我军指战员的英雄主义的最高表现”.

“为了胜利，不惜牺牲自己的一切. ”那年 2 月，在一次作战中，时任副营长黄权国带领“刘老庄连”指战员，向盘踞在山上的敌人发起还击. 行至东侧山腰时，他们被敌人的雷区挡住了去路. 由于没有专业的排雷设备，黄权国找来一根 5 米多长的竹竿，匍匐在地连续捅爆 16 颗雷，荣立一等功，被誉为“排雷英雄”.

如今，这根只剩半米长的竹竿，被放置在“刘老庄连”的荣誉室里. 它的旁边，摆放着“八十二勇士”在战斗中遗留的物品——一根捅弯的步枪枪管、两段烧焦的护木、一个被砸断的枪托.

一名士兵的肩膀有多硬？过去和现在，“刘老庄连”已无数次作出回答. 我们有理由相信，在未来战场上，为了胜利，他们同样会像革命先辈那样，与敌人血战到底.

记者手记

一个连队的“历史感”与“未来感”

在“刘老庄连”采访，一个个年轻的士兵令人着迷——

说起军魂、宗旨、使命，他们好像从历史课本里走来，眼神纯洁而坚定；

谈及装备、战术、对手，他们又好像从未来图景中走来，目光凌厉而深邃.

同一名士兵，其双脚好似牢牢扎在优良传统的土壤，脑袋却勇敢地探向明天的战场.

可以说，过去 82 年间，无论走得多远，“刘老庄连”从未走出过刘老庄；无论走得多久，“刘老庄连”也没有离开“3 月 18 日”. 正是这种“时时回望”和“永远不忘”，让“刘老庄连”官兵步履铿锵、奋勇向前. 他们的信仰与初心奠基于此，他们的梦想与力量亦发源于此.

当一支军队把历史和未来融为一体，它必将把胜利与荣光收入囊中.

The “Liu Lao Zhuang Company” conducts offensive combat training. Photo by PLA Daily Special Correspondent Zhang Yongjin

The Zhurihe Joint Training Base, like a witness to time, has witnessed countless war dramas unfolding in powerful armies and brigades.

In August of this year, a live-fire confrontation exercise reached a stalemate when the command and control team suddenly announced: “All Red Army commanders above the rank of platoon leader have been targeted and ‘eliminated’!”

This was a special scenario beyond the operational plan, and the intention was clear: they wanted to test the caliber of the Red Army’s assault squad leaders. The “Liu Lao Zhuang Company” quickly devised a countermeasure. The squad leaders of the first and fourth squads replaced the company commander and instructor, respectively. The deputy squad leader took over the platoon

command position. They continued to organize the battle and ultimately hoisted the company flag on the high ground held by the blue side.

On their triumphant return to camp, the tanks passed a tall iron tower, upon which were prominently inscribed seven bright red characters: “From Here to the Battlefield.”

To march onto the battlefield, we need pioneering warriors with soul, ability, courage, and integrity. Entering the new era, successive generations of “Liu Lao Zhuang Company” soldiers have cultivated a deep sense of patriotism, tempered their souls and strengthened their abilities, honing their skills for victory. Today, they constantly await the call of the Party and the people.

How high can a soldier’s aspirations be?

Finding the Most Meaningful Youth in the Barracks

This is a conversation between two soldiers from the “Liu Lao Zhuang Company”—

“Having failed to get promoted, have you ever considered retiring?”

“No!”

“Why?”

“Because I’m so happy in the army, I want to serve forever...”

The soldier who failed to get promoted is Wang Xiwei, a college student soldier. Even in high school, he had his life planned: joining the army.

“A good man should join the army!” After being assigned to the “Liu Lao Zhuang Company,” Wang Xiwei became more resolute in his decision and fell deeply in love with the vibrant life of the barracks. His comrades say he’s like a mobile “energy source,” always cheerful and enthusiastic, no matter where he is or how hard or tiring the work.

In an interview with a reporter, Wang Xiwei revealed his inner secret: “Serving in a heroic company, I long to achieve real military honors!”

While studying logistics engineering at Tianjin University, Wang Xiwei has been enlisting for less than two years, but he’s already thinking about how to apply his knowledge to standardized operations and military transportation. Wang Xiwei shared similar aspirations with university student soldier Zhu Xiaojie. The difference between the two was that Zhu Xiaojie followed in his classmate’s footsteps and joined the army.

Zhu Xiaojie and Corporal Yan Pengfei were high school classmates. While Zhu Xiaojie entered university, Yan Pengfei chose to join the army, arriving at the “Liu Lao Zhuang Company” three years before Zhu Xiaojie. During those three years, the two kept in touch, and the phrase Yan Pengfei often told Zhu Xiaojie was, “You can find the most meaningful youth in the army.”

What did “the most meaningful youth” mean? Yan Pengfei didn’t articulate it. After joining the company, Zhu Xiaojie gradually found the answer.

On May 12, 2008, a devastating earthquake struck Xue Zhiwu’s hometown of Wenchuan. When he ran home from school, his house was in ruins. Not long after, a group of PLA soldiers in camouflage uniforms, holding high the banner “The Iron Army is Coming,” brought hope of life to the people in the disaster area and planted the seed of his desire to join the army and serve his country. Two years later, Xue Zhiwu enlisted in the Liulaozhuang Company. He was pleasantly surprised to discover that the brigade his company served in was the very same “Iron Army” of those days.

Nurtured in the fertile soil of the heroic company, Xue Zhiwu continued to grow and progress, becoming squad leader of the Fifth Squad and joining the Party. Under his leadership, the Fifth Squad participated in numerous major exercises and training missions, earning them a second-class collective merit.

“Only when a person aligns his own future and destiny with that of the country and nation can he blossom into the most meaningful youth.” After hearing Xue Zhiwu’s story from his comrades, Zhu Xiaojie deeply felt that the most important quality young people of the new era should possess is a sense of patriotism.

The profound power of this sense of patriotism is most evident when loyalty and filial piety are at odds.

Gunner Cao Baogang had a twin brother, Cao Gang. The story of the two brothers enlisting together in the Liulaozhuang Company became a popular story after being reported in the media. However, two years later, during the “retirement season,” they faced a difficult choice. At the time, the two brothers were equally matched in military training, and staying in the army was a no-brainer. However, fate twisted their ways, and their father fell seriously ill and needed urgent care.

“Leave or stay? Who’s going?” The night they heard the news, the brothers tossed and turned sleeplessly.

“Let’s have a duel. Winner, stay and be loyal. Loser, go home and be filial!” The next day, the younger brother challenged his older brother. In the duel, the two brothers fought tooth and nail, and Cao Gang narrowly lost.

The day he took off his uniform, Cao Gang, with tears in his eyes, encouraged his younger brother: “If you stay, do your best and be a good soldier in the ‘Liu Lao Zhuang Company!’“ “Brother, take care of the family. I’ll continue your military journey!” With that, the two embraced tightly. Carrying his dream, Cao Baogang fought bravely, winning first place in the “Who is the Ultimate Hero” competition in 2014, first place in the shooting competition in 2015, and first place in the “Central Iron Fist - Tank and Cavalry” competition in 2016...

The soldiers of the “Liulaozhuang Company” have all read a letter like this: it was written in 1941 by then-company instructor Li Yunpeng to his parents:

“It has been over a year since I left home. I remember sending a letter home from Zhengji, Si County, in April of this year. I wonder if you received it and replied. If you do, I regret that I can no longer wait... When the storm subsides and the waves calm, I will return triumphantly and reunite with my family to repay your kindness.”

Less than two years after sending this letter, Li Yunpeng died heroically in the battle of Liulaozhuang. As a native of Liulaozhuang, Zhu Xiaojie was familiar with this family letter. But it wasn’t until a year after joining the “Liulaozhuang Company” and learning about the motivations behind many of his comrades’ enlistment that he truly understood it.

In March 2024, Sun Mingchao, from Jinghai District, Tianjin, was so moved by the 26 officers and men of the “Liulaozhuang Company” who came to fight floods and disaster relief that he resolutely chose to join the army and become a member of the “Liulaozhuang Company.”

In July 2024, Wang Linhu, a master’s graduate student, graduated from Henan University and made a special trip to visit the Memorial Hall of the Victims of the Nanjing Massacre by Japanese Invaders. At the age of 25, he immediately decided to join the army.

In the fall of 2025, another group of new recruits from Liulaozhuang arrived. They had grown up hearing about the stories of the “Eighty-Two Heroes” and were determined to become descendants of heroes...

These young people, yesterday children and students, are now soldiers of the Republic. The heroic company will always have successors, and the heroic army will always produce heroes!

How far-sighted can a soldier be?

The infinite “distant horizon” is all about them.

In July of this year, freshly graduated student Zhang Hang arrived at the “Liu Lao Zhuang Company” for internship. His first combat readiness training class left a deep impression on him.

After Company Commander Zhu Mingchao explained the surrounding situation, the discussion began. Zhang Hang, already well-versed in international geopolitics during his time at school, was about to raise his hand to speak when several conscripts preempted him.

To his surprise, these soldiers not only presented facts and opinions but also offered countermeasures based on their own judgment. During this discussion, two soldiers, due to differing opinions, engaged in a debate on the spot.

“The infinite distance, countless people, are all about me.” Zhang Hang discovered that the soldiers of the “Liu Lao Zhuang Company” had their own interpretation of Mr. Lu Xun’s words. Their perspectives were so broad that the smoke of war over foreign lands, the latest weaponry, and the

innovative practices of sister units frequently appeared in the company's classrooms and training grounds. On March 18th of last year, Corporal First Class Xu Suguang, while representing his company, traveled to Liulaozhuang to participate in the memorial service for the martyrs, he also visited a certain unit. The sight of all the advanced technology and new equipment filled him with both envy and profound inspiration. Upon returning to his company, upon hearing that the brigade was organizing training for drone operators, Xu, a gunner, immediately signed up.

"Everyone used to think that attack helicopters were the natural enemy of armored forces, but recent armed conflicts have shown that drones have become the nemesis of tanks and infantry fighting vehicles." Xu Suguang's service life was short, but his constant focus on the latest military developments has given him a strong sense of "competitiveness anxiety."

Hard work pays off. After over a month of intensive training, Xu Suguang surpassed the professional drone operators in the reconnaissance battalion and achieved excellent results in the final assessment.

In recent years, the brigade to which the "Liulaozhuang Company" belongs has accelerated the transformation of its combat effectiveness. An armored infantry squad is no longer solely focused on one vehicle; it now employs a variety of individual weapons. Soldiers felt strongly that to become a competent "combined infantryman," they must cultivate a battlefield mindset and master a wide range of combat skills.

That year, handmade wargames were distributed to the company, and Zhao Jiaxin, deputy squad leader of the third squad, became obsessed with them. Whenever he had free time, he would open the game's instruction manual and rules of engagement, practicing with the different-colored squares and pieces. He gradually discovered that this two-meter-square "chessboard" not only contained the infinite mysteries of strategic planning, but also ruthlessly shattered seemingly reasonable realities.

For example, in the past, when planning routes, some commanders would simply view hilltops, bridges, and even towns as black dots on a map, "simply stepping on the accelerator" to pass through, with little regard for the actual situation. Now, through handmade wargame simulations, those impulsive strategies, intuitive commands, and quasi-actions have been exposed one by one. "It's said that future wars will be 'squad leaders' battles.' In the future battlefield, where victory depends on elite troops, squad leaders, though at the end of the command line, are crucial to the overall situation. They must not only lead their troops, but also master their use!" Zhao Jiaxin explained. During a squad tactical confrontation training exercise, he used a hand-made war game to develop the optimal attack plan, leading the squad to an overwhelming victory over the enemy.

A single stone stirs up a thousand ripples. In the "Liu Lao Zhuang Company," more and more soldiers are "serving as advisors," pondering more complex issues related to combat.

A recent experience of being "captured" gave Xu Xu, the deputy squad leader of Squad 8, new insights into night combat and night training.

It was simply a night confrontation exercise organized by the company. The first and second platoons played the "Red Army," while the third platoon played the "Blue Army." Just as Xu Xu entered the reconnaissance phase, despite his self-proclaimed stealth, he was spotted by a "Red Army" soldier using his night vision goggles. "With the widespread distribution of night vision equipment, the cover of darkness has become virtually useless. So, what exactly should night training cover?" After Xu Xu presented his idea, the company immediately made it a research topic and organized officers and men to pool their wisdom to solve the problem.

Talking about this, the commander of his battalion lamented, "Being a commander in a battalion or company is incredibly stressful these days. The only difference between officers and men is their position. Many soldiers' thinking, vision, and problem-solving abilities are now on par with those of the officers!"

How strong are a soldier's shoulders?

"For victory, I'm willing to sacrifice everything."

"Is it true?"

After reading the story of Xiong Jiangxin, deputy squad leader of the 9th squad of the "Liu Lao Zhuang Company," tearing barbed wire with his bare hands, a soldier from a fellow company was amazed and came to verify it.

Earlier this year, the brigade compiled the stories of the "Liu Lao Zhuang Company" into a book and distributed it to all companies for study. There was another consideration: to allow officers and men from other companies to criticize the "Liu Lao Zhuang Company."

In the early summer of 2022, a live-fire exercise was in full swing. While advancing deep into the "enemy," Xiong Jiangxin's squad, the Ninth Squad, was blocked by a barbed wire fence studded with spikes. This was the only route forward, flanked by deep trenches, making a detour impossible.

Time was running out. If a path wasn't opened up in time, the entire platoon's, and even the entire company's, advance would be disrupted. At this point, the squad had only three men remaining, and their explosives were long gone.

Xiong Jiangxin noticed that the ends of the barbed wire were fixed to trees, making it difficult to break without specialized tools. Desperate, he quickly crawled to the wire and tore at it with his bare hands. The spikes pierced his palm, drawing blood. Despite the pain, Xiong Jiangxin managed to pull one end of the wire from the tree.

"The comrades of the 'Liu Lao Zhuang Company' are truly courageous!" Upon learning the truth, the soldier gave Xiong Jiangxin a thumbs-up. Xiong Jiangxin waved his hands repeatedly, "My incident is nothing. Tan Sen's performance is truly 'hardcore'!"

In April 2023, the United Nations Mission in South Sudan (UNMISS) conducted a combat readiness assessment of the Chinese peacekeeping infantry battalion. Unlike previous assessments,

this time the assessment team deliberately increased the difficulty, creating an "accident" near the end of the assessment: a "militant" played by a foreign military suddenly appeared and rushed towards a key point in the peacekeeping camp.

This "militant" was truly remarkable. To test the emergency response capabilities of the Chinese peacekeepers, the assessment team specially selected a physically skilled individual from a foreign peacekeeping force.

As a member of the rapid reaction squad of the Chinese peacekeeping infantry battalion, Tan Sen was no less remarkable. Despite his small stature, he had set numerous records in brigade competitions.

"STOP!" Without a second thought, Tan Sen instinctively led the rapid reaction squad in pursuit.

The temperature that day soared over 40 degrees Celsius, and the "militant" came prepared, wearing shorts, a short-sleeved shirt, and running shoes. On Tan Sen's side, everyone was fully armed and carrying over 10 kilograms of gear. While passing a gravel section, Tan Sen slipped and fell, gashing his right knee.

Just when everyone thought the assessment was over, Tan Sen pulled himself up and continued his pursuit. Finally, at a bend, Tan Sen seized his opportunity, leaped forward, and used his grab device to lock onto the "militant's" calf, successfully subduing him.

Some say that the strength of a company is reflected in the character of a soldier, and the strength of an army is reflected in the character of a company. The "strong shoulders" of the soldiers of the "Liu Lao Zhuang Company" stemmed from the deep history of the People's Army. In his article "The Heroism of the Eighth Route Army and the New Fourth Army," Comrade Zhu De placed the Liu Lao Zhuang battle alongside the Pingxingguan victory, the burning of enemy aircraft at Yangmingbao, the Hundred Regiments Campaign, and the heroic leap of the five brave men from Langya Mountain, calling them "the highest manifestations of the heroism of our army's commanders and fighters." "For victory, we will sacrifice everything." In February of that year, during a battle, then-Deputy Battalion Commander Huang Quanguo led the officers and men of the "Liu Lao Zhuang Company" in a counterattack against the enemy entrenched in the mountains. Reaching the eastern slope, they were blocked by an enemy minefield. Lacking professional demining equipment, Huang Quanguo found a bamboo pole over five meters long and, crawling on the ground, detonated 16 mines in succession, earning first-class merit and being hailed as a "Mine Clearance Hero."

Today, the bamboo pole, now only half a meter long, rests in the "Liu Lao Zhuang Company" honor room. Next to it are the remains of the "Eighty-Two Warriors" left in battle—a bent rifle barrel, two charred handguards, and a broken stock.

How strong is a soldier's shoulder? The "Liu Lao Zhuang Company" has answered this question countless times, both in the past and present. We have reason to believe that on future battlefields,

like their revolutionary predecessors, they will fight the enemy to the bitter end for victory. Reporter's Notes

A Company's "Sense of History" and "Sense of the Future"

Interviewing the "Liu Lao Zhuang Company," each young soldier was captivating.

When discussing the military's spirit, purpose, and mission, they seemed to have stepped out of a history textbook, their eyes pure and resolute.

When discussing equipment, tactics, and opponents, they seemed to have stepped out of a vision of the future, their gazes sharp and penetrating.

The same soldier, with both feet firmly rooted in fine traditions.

The soldiers of the Liulaozhuang Company march forward courageously, their faith firmly planted in the soil, their heads bravely poised to face tomorrow's battlefield.

It can be said that over the past 82 years, no matter how far they have marched, the Liulaozhuang Company has never left Liulaozhuang; no matter how long they have traveled, the Liulaozhuang Company has never left March 18th. It is this constant recollection and unwavering commitment that enables the officers and men of the Liulaozhuang Company to march forward with unwavering determination. Their faith and original aspirations are rooted in this, and their dreams and strength stem from this.

When an army integrates history and the future, it will surely secure victory and glory.

第 74 集团军结合深化政治整训学习领会习近平强军思想

来源：解放军报 作者：陈奕 陈典宏 责任编辑：徐占虎 2025-10-19

第 74 集团军结合深化政治整训学习领会习近平强军思想——

学思践悟强根基 向战为战谋打赢

■陈奕 解放军报记者 陈典宏

"要着力纠治战斗精神弱化、敌情观念不强等问题……"近日，第 74 集团军组织党委理论学习中心组学习，一班人紧密结合深化政治整训，围绕《习近平论强军兴军（四）》进行深入思考讨论，在深学深悟中加强政治锻造、思想改造，自觉用学习成果凝聚意志、破解难题、推动发展.

"经常性思想工作，是在人的头脑里搞建设，离不开强有力的思想引领. "该集团军党委领导介绍，他们把学习《习近平论强军兴军（四）》作为党委理论学习中心组学习、干部理论轮训、部队思想政治教育重要内容，并与学习《习近平论强军兴军》、《习近平论强军兴

军（二）》、《习近平论强军兴军（三）》、《习近平强军思想学习纲要（2023 年版）》等结合起来，以多种形式原原本本学、全面系统学、联系实际学，深入领会习近平强军思想的深刻内涵，努力在学懂弄通做实上下功夫，加强政治锻造，培塑对党忠诚.

党委带头是最有力的引领. 实践中，该集团军党委常委坚持以上率下，结合深化政治整训，深学深悟《习近平论强军兴军（四）》中关于理想信念、党性修养、官德人品等方面重要论述，带头搞好自省式反思、常态化辨析，以自身清、自身正、自身硬树立好样子，带动形成上下同欲、团结奋进的良好局面.

“政治整训‘整’的是顽瘴痼疾、歪风邪气，‘训’的是政治立场、政治能力，解决的都是带全局性、根本性的深层次问题. ”围绕深入学习贯彻《习近平论强军兴军（四）》，该集团军领导表示，他们坚持抓政治整改与抓政治训练相统一，既查纠表象问题，更彻改深层次问题，着力淬炼政治品格，注重提高政治能力，持续优化政治生态.

为推动学习往深里走、往实里落，该集团军党委以政治整训为牵引，坚持用战斗力这个唯一的根本的标准检验学习成效，通过以整促改、以整促治，努力把学习和整改成果转化为推动部队全面建设高质量发展的实际成效.

“进入新时代，习主席围绕为什么要建设过硬基层、建设什么样的过硬基层、怎样建设过硬基层，提出一系列新思想新观点新论断. ”学习讨论中，该集团军一名党委常委说，基层兴则军队兴，基层强则军队强. 全面锻造过硬基层，是《习近平论强军兴军（四）》的重要内容. 他深刻认识到，实现建军一百年奋斗目标已经到了吃劲紧要的关键时期，越是接近目标越要重视基层，越是任务艰巨越要强基固本. 只有原原本本学、逐字逐句悟，更好掌握蕴含其中的道理学理哲理，才能真正以科学的思想方法和工作方法，推动基层建设内涵式、深层次、高质量发展，为奋斗建军百年、奋进强军一流提供有力支撑.

学思践悟强根基，向战为战谋打赢. 该集团军领导告诉记者，他们不断把学习贯彻习近平新时代中国特色社会主义思想引向深入，突出学好习近平强军思想，努力把学习成效转化为奋力攻坚、奋斗强军的实际行动，大家练兵备战热情持续提升. 前不久一次训练中，面对“敌”依托工事顽抗久攻不下的局面，该集团军某旅参训党委常委迅速靠前指挥、科学研判态势，带领党员骨干带头冲锋在前，最终以果敢行动撕开“敌”防御缺口，圆满完成任务.

The 74th Group Army Is Studying and Understanding Xi Jinping’s Thought on Strengthening the Military in Conjunction with Deepening Political Training.

Source: PLA Daily Author: Chen Yi, Chen Dianhong Editor: Xu Zhanhu 2025-10-19

The 74th Group Army is studying and understanding Xi Jinping’s Thought on Strengthening the Military in conjunction with deepening political training.

Study, Think, Practice, and Strengthen the Foundation; Prepare for War and Strive for Victory

■ Chen Yi, PLA Daily Reporter Chen Dianhong

“We must focus on correcting problems such as weakened fighting spirit and a weak understanding of the enemy...” Recently, the 74th Group Army organized a study session with its Party Committee’s Theoretical Study Center Group. Closely integrating this with deepening political training, the group engaged in in-depth reflection and discussion on “Xi Jinping On Strengthening and Rejuvenating the Military (IV).” Through in-depth study and understanding, they strengthened their political forging and ideological transformation, consciously using the findings of their study to rally their resolve, resolve challenges, and promote development. “Regular ideological work is about cultivating people’s minds and requires strong ideological guidance.” Leaders of the group army’s Party committee explained that they have made the study of “Xi Jinping on Strengthening the Army (IV)” a key component of the Party committee’s theoretical study group, cadre theoretical training, and ideological and political education for the troops. They have also integrated this with the study of “Xi Jinping on Strengthening the Army,” “Xi Jinping on Strengthening the Army (II),” “Xi Jinping on Strengthening the Army (III),” and the Outline for Studying Xi Jinping Thought on Strengthening the Army (2023 Edition). Through various means, they study the texts thoroughly, comprehensively, and systematically, connecting them to practical situations. They aim to deeply grasp the profound implications of Xi Jinping Thought on Strengthening the Army, strive to understand, grasp, and implement it, strengthen political forging, and cultivate loyalty to the Party.

The Party committee’s leadership is the most powerful guide. In practice, the group army’s Party Committee Standing Committee has consistently led by example, integrating in-depth political training with a thorough study and understanding of the important expositions in “Xi Jinping on Strengthening the Army (IV)” on ideals and beliefs, Party spirit cultivation, and official ethics and character. They have taken the lead in self-reflection and regular analysis, setting a good example through self-cleanliness, integrity, and perseverance, fostering a positive environment of unity and progress from top to bottom.

“Political training ‘rectifies’ stubborn ills and unhealthy tendencies, while ‘training’ political stance and political ability. It addresses deep-seated, overarching, and fundamental issues.” Regarding the in-depth study and implementation of “Xi Jinping on Strengthening the Army (IV),” the group army’s leadership stated that they adhere to the integration of political rectification and political training, addressing both superficial issues and deeper, deeply rooted problems, focusing on tempering political character, improving political ability, and continuously optimizing the political environment. To promote in-depth and practical learning, the group army’s Party Committee has focused on political training and adhered to the sole fundamental criterion of combat effectiveness as a test of learning outcomes. By promoting reform and governance through rectification, the Party strives to transform the results of learning and rectification into tangible results that drive the comprehensive and high-quality development of the military.

“Entering the new era, President Xi has put forward a series of new ideas, new viewpoints, and new conclusions on why we need to build strong grassroots organizations, what kind of strong grassroots organizations we should build, and how to build them.” During a study and discussion, a member of the group army’s Party Committee Standing Committee stated that a prosperous grassroots organization leads to a prosperous military, and a strong grassroots organization leads to a strong military. Comprehensively forging a strong grassroots organization is a key component of “Xi Jinping on Strengthening the Military (IV).” He deeply understands that achieving the goal of the PLA’s centenary has reached a critical and crucial stage. The closer we get to the goal, the more we must prioritize the grassroots, and the more arduous the task, the more we must strengthen our foundation. Only by thoroughly studying and comprehending the text word for word, and better grasping the underlying principles, theories, and philosophies, can we truly promote the enriched, in-depth, and high-quality development of grassroots development through scientific thinking and working methods, providing strong support for the centennial of the founding of the People’s Liberation Army and the development of a world-class military.

Study, think, and practice to strengthen the foundation, and strive for victory in battle. The group army’s leadership told reporters that they have continuously deepened their study and implementation of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, prioritizing the study of Xi Jinping’s Thought on Strengthening the Military. They have worked hard to translate the results of their study into concrete actions to overcome difficulties and strengthen the military, and their enthusiasm for training and preparation has continued to rise. During a recent training exercise, faced with the enemy relying on fortifications to resist for a long time, the Standing Committee of the Party Committee of a participating brigade of the group army quickly took command, scientifically assessed the situation, and led key Party members to take the lead in the charge. Ultimately, with decisive action, they tore through a gap in the enemy’s defenses and successfully completed the mission.

攻坚“十四五”非凡这五年丨科技赋能筑牢万里边关钢铁长城

来源：中国军网-解放军报 作者：钱晓虎 陈小菁 责任编辑：徐占虎 发布：2025-10-19

从传统守防向智能管控加速转型

科技赋能筑牢万里边关钢铁长城

近日，陆军某边防连官兵搭乘全地形巡逻车执行巡逻任务. 清 川摄

解放军报讯 记者钱晓虎、陈小菁报道：清晨，康苏沟哨所，值班班长郑亚奇轻点鼠标，通过电子监控系统发现几名可疑人员进入警戒区，无人机随即升空核实情况，整个处置过程不过几分钟. 这一幕是“十四五”期间我军边防部队现代化建设成就的缩影.

5 年来，我军边防部队强化科技赋能，在智能管控、装备转型、综合保障等领域迈上新台阶，万里边关正从传统守防向智能管控加速转型.

不断密织的网络信息体系，让边防管控实现从“信息孤岛”到“一网尽收”新跨越——

林海雪原，北部战区陆军某旅三角山边防连巡逻分队利用某信息系统，将一线情况实时传回连队指挥室；雨林深处，南部战区陆军某边防分队借助某型卫星系统与上级保持信息畅通……“十四五”期间，各级统筹推进信息系统一体化建设，构建起集指挥控制、综合保障于一体的平台. 今日边关，信息主导、科技赋能的管控体系初步形成.

某巡逻车内，北部战区陆军某边防连连长轻触电子屏幕即可掌握防区整体情况. “通过整合卫星通信等功能，指挥中心和一线哨所实现了信息无缝链接. 可视化管控让巡逻‘无死角’.”该连长介绍，智能影像系统遍布防区，连队实现指挥实时化、监控可视化、处置高效化，边情处置由“被动应对”转向“主动发现”，边防管控质效显著提高.

不断升级的武器装备，让边防执勤从“脚板丈量”迈向“科技助勤”新阶段——

深秋，西藏军区某边防团无人机群升空侦察，巡逻车快速机动. “过去靠‘铁脚板’和望远镜，现在靠‘数据链’和‘千里眼’，执勤巡逻质效明显提升.”该团一位老班长说.

近年来，一批适合复杂地形的新型巡逻车、全地形车、装甲车等装备陆续配发执勤一线，成为官兵的“巡逻助手”；从高空无人机到地面遥感传感器，从雷达预警体系到光学观察设备，“空天地一体、多维度覆盖”的立体网络全面覆盖；新一代单兵综合作战系统集成了防护、观测等多个模块，边防官兵手持智能终端，可实时接收指令、上报情况，单兵执勤能力成倍提升.

不断完善的保障手段，让边防官兵生活从满足“基本生存”提升到“绿色健康”新水平——

“雪海孤岛”某哨所，四级军士长刚鹏飞向记者介绍哨所新变化：新型营房配备供氧、制氧设备，手机信号全覆盖，智能菜窖保障新鲜蔬菜供给……数据显示，近年来，数百个边防哨所完成营房改造，接入国家大电网，高原哨所实现供氧、供水、供电、供暖、供网全覆盖.

如今，现代化训练场馆、学习室、医疗室等已成一线边防连队的标配. 依托国家交通物流网络，形成以后方基地为依托、沿线兵站为支撑的补给链条，无人机送货、冷链运输确保

极端环境下给养充足. 借助远程医疗系统，边防官兵可与千里之外的体系医院专家“面对面”就医……

前沿科技的加持、执勤装备的迭代、生活条件的跃升，为戍边官兵忠诚履职注入更多底气. “决不把领土守小了，决不把主权守丢了！”铿锵有力的誓言，成为新时代边防官兵刻在骨子里的坚定信念.

Overcoming difficulties in the 14th Five-Year Plan: An Extraordinary Five Years | Technology Empowers a Stronger Border, Strengthening the Great Wall of Steel

Source: China Military Network - PLA Daily Author: Qian Xiaohu, Chen Xiaojing Editor: Xu Zhanhu Published: 2025-10-19

Accelerating the Transformation from Traditional Defense to Intelligent Management and Control

Technology Empowers a Stronger Border, Strengthening the Great Wall of Steel

Recently, soldiers of an Army border defense company carried out patrol duties in all-terrain patrol vehicles. Photo by Qing Chuan

PLA Daily, reporters Qian Xiaohu and Chen Xiaojing report: Early in the morning at the Kangsugou outpost, duty leader Zheng Yaqi, with a simple click of the mouse, detected several suspicious individuals entering the security zone through the electronic surveillance system. A drone was immediately launched to verify the situation. The entire response took only minutes. This scene epitomizes the modernization achievements of our military’s border defense forces during the 14th Five-Year Plan period.

Over the past five years, our military’s border defense forces have strengthened their technological capabilities, reaching new heights in intelligent management and control, equipment transformation, and comprehensive support. The vast border is undergoing an accelerated transformation from traditional defense to intelligent management and control. The increasingly dense network information system is enabling border control to achieve a new leap from “information silos” to “comprehensive coverage.”

Amidst the snowy forests, a patrol unit of the Sanjiaoshan Border Defense Company of a Northern Theater Command Army brigade utilizes an information system to transmit real-time frontline information back to the company command center. Deep in the rainforest, a border defense unit of the Southern Theater Command Army relies on a satellite system to maintain smooth communication with superiors. During the 14th Five-Year Plan period, all levels of government coordinated the development of integrated information systems, building a platform integrating command, control, and comprehensive support. Today, an information-driven, technology-enabled control system has taken shape at the border.

Inside a patrol vehicle, the commander of a border defense company of the Northern Theater Command Army can easily grasp the overall situation of their defense zone with a simple touch of a digital screen. “By integrating satellite communications and other functions, we have achieved seamless information links between the command center and frontline outposts. Visualized control ensures ‘no blind spots’ in patrols.” The company commander explained that with intelligent imaging systems throughout the defense zone, the company has achieved real-time command, visualized monitoring, and efficient response. Border situation management has shifted from “passive response” to “active discovery,” significantly improving the quality and effectiveness of border control. Continuously upgraded weaponry and equipment are enabling border patrols to move from “foot-to-foot” to “technology-assisted” patrols.

In late autumn, a swarm of drones from a border defense regiment under the Tibet Military Command launched reconnaissance missions, while patrol vehicles maneuvered swiftly. “We used to rely on ‘iron feet’ and binoculars, but now we rely on ‘data links’ and ‘clairvoyance,’ and the quality and efficiency of patrols have significantly improved,” said a veteran squad leader from the regiment.

In recent years, a number of new patrol vehicles, all-terrain vehicles, and armored vehicles, suited to complex terrain, have been deployed to the front lines, serving as “patrol assistants” for officers and men. From high-altitude drones to ground-based remote sensing sensors, from radar warning systems to optical observation equipment, a comprehensive, multi-dimensional network encompassing “air, space, and ground integration” is now in place. A new generation of individual soldier integrated combat systems integrates multiple modules, including protection and observation. Border patrol officers and men use handheld smart terminals to receive commands and report situations in real time, exponentially enhancing their patrol capabilities. Continuously improving support measures have elevated the lives of border defense personnel from “basic survival” to a new level of “green and healthy.”

At a post on a remote island in the “Snow Sea,” Sergeant Major Gang Pengfei briefed reporters on the latest developments: new barracks equipped with oxygen supply and production equipment, full mobile phone coverage, and smart vegetable cellars ensuring a fresh supply of vegetables. Data shows that in recent years, hundreds of border defense posts have completed barracks renovations and connected to the national power grid, enabling these high-altitude posts to achieve full coverage of oxygen, water, electricity, heating, and network supply.

Modern training venues, study rooms, and medical rooms are now standard features for frontline border defense companies. Leveraging the national transportation and logistics network, a supply chain has been established, centered on rear bases and supported by military depots along the route. Drone delivery and cold chain transportation ensure adequate supplies in extreme environments. Thanks to telemedicine systems, border defense personnel can receive face-to-face medical treatment from experts at affiliated hospitals thousands of miles away.

The support of cutting-edge technology, the evolution of on-duty equipment, and the leap forward in living conditions have given border defense personnel greater confidence in their loyal service. “We will never shrink our territory, and we will never lose our sovereignty!” This sonorous and powerful oath has become a firm belief engraved in the bones of border guards in the new era.

陆军某旅：“电子侦察员”显威训练一线

来源：解放军报 作者：朱强 向黎鸣 责任编辑：乌铭琪 2025-10-20

陆军某旅

“电子侦察员”显威训练一线

解放军报讯 朱强、记者向黎鸣报道：地面，战车编队快速机动；空中，无人机临空侦察……仲秋时节，陆军某旅一场实兵对抗训练进入白热化阶段.

“前方发现小股‘敌特’！”训练现场，依据无人机回传的画面信息，某发射站站长方杰果断调整作战方案并下达指令：“保持跟踪！”

夜色如墨，无人机持续回传现场画面. 方杰根据“敌特”行进轨迹，快速判明“敌”方位部署并锁定“敌”指挥所位置. 随后，方杰果断调整战术，下达“迂回包抄、突袭敌后”指令. 夜色中，官兵在侦察小队配合下，对“敌”实施精准打击.

“无人机升空后，就像一名‘电子侦察员’，能够让我们看得更远，战术战法运用也更加灵活. ”方杰说，无人机功能作用在训练中得到充分发挥，得益于旅队推行的有人无人协同训练模式.

近年来，该旅党委将无人机应用作为提升战斗力的重要手段，在全旅范围内遴选培养无人机操作手，集中力量打造了一支结构合理、素质优良的无人机专业人才队伍. 平时训练中，他们利用模拟设备开展无人机操作训练，夯实官兵操作技能基础；构设不同实战背景，将无人机训练作为重要组成部分嵌入实战化训练全程；组织官兵围绕临空侦察、信号判别、目标识别等重难点内容开展专攻精练，引导大家在危局难局险局中练强“有人+无人”协同制胜本领.

“未来战场瞬息万变，只有平时练好、练精、练过硬，战时才能拉得出、上得去、打得赢. ”该旅领导介绍，他们将持续以战训需求为牵引，组织官兵紧盯短板弱项、加强实践历练，按照“课目更多元、要素更完善、场景更丰富”的原则，不断提升有人无人作战力量协同训练质量，从而实现优势互补、效能叠加.

An Army Brigade’s “Electronic Scouts” Demonstrate Prowess on the Front Lines of Training

Source: PLA Daily Author: Zhu Qiang, Xiang Liming Editor: Wu Mingqi 2025-10-20

An Army Brigade

“Electronic Scouts” Demonstrate Prowess on the Front Lines of Training

PLA Daily News Zhu Qiang and reporter Xiang Liming report: On the ground, tank formations maneuver rapidly; in the air, drones conduct overhead reconnaissance... In mid-autumn, a live-fire confrontation training exercise for an Army brigade entered its intense phase.

“A small group of ‘enemy spies’ spotted ahead!” Based on the footage transmitted back by the drones, Fang Jie, the station commander of a certain transmitter station, decisively adjusted his combat plan and issued the order: “Keep tracking!”

The night was as dark as ink, and the drones continuously transmitted footage from the scene. Based on the enemy spies’ movements, Fang Jie quickly determined the enemy’s position and deployment and located the enemy’s command post. Subsequently, Fang Jie decisively adjusted his tactics, issuing the order to “outflank and raid behind enemy lines.” In the darkness of the night, the soldiers, working with the reconnaissance team, launched a precise strike against the enemy. “Once launched, the drone acts like an ‘electronic scout,’ allowing us to see farther and employ tactics and strategies more flexibly.” Fang Jie explained that the drone’s capabilities were fully utilized during training, thanks to the brigade’s implementation of a manned-unmanned collaborative training model.

In recent years, the brigade’s Party Committee has prioritized drone use as a key means of enhancing combat effectiveness. It has selected and trained drone operators across the brigade, focusing its efforts on building a well-structured and highly qualified team of drone professionals. During routine training, they utilize simulated equipment to strengthen the soldiers’ operational skills. They also create diverse combat scenarios and integrate drone training as a key component throughout their actual combat training. They organize soldiers to focus on key and challenging areas such as aerial reconnaissance, signal discrimination, and target identification, guiding them to strengthen their “manned-unmanned” collaborative skills for victory in challenging and challenging situations. “The battlefield of the future is changing rapidly. Only by training well, practicing meticulously and practicing hard in peacetime can we be deployed, go up and win in wartime.” The brigade leaders introduced that they will continue to be guided by combat training needs, organize officers and men to focus on shortcomings and weaknesses, strengthen practical experience, and in accordance with the principle of “more diverse subjects, more complete elements, and richer scenarios”, continuously improve the quality of coordinated training of manned and unmanned combat forces, so as to achieve complementary advantages and superimposed efficiency.

攻坚“十四五”非凡这五年丨我军基层科研创新活力竞相迸发

来源：中国军网-解放军报 作者：李玥 贾启龙 责任编辑：徐占虎 发布：2025-10-21

从“零散化改进”向“体系化突破”转变

我军基层科研创新活力竞相迸发

第73集团军某旅官兵在“强军精武智能专修室”交流. 解放军报特约通讯员 刘志勇摄

解放军报讯 李玥、记者贾启龙报道：近日，全军首届小革新、小发明、小创造评选活动落下帷幕. 一批紧贴实战需求、破解训练难题、提升作战效能的创新成果集中亮相，其中科技创新类项目占比达90%. 这一数据表明，我军基层科研创新正从“零散化改进”向“体系化突破”转变，基层官兵的创新活力竞相迸发.

近年来，我军各级加大对基层科研一线的投入，建成“配套实验室、训练基地、创新工作室”三位一体的科研保障体系，依托云平台实现技术资源全域共享. 某边防旅研发的“智能边境管控系统”，融合传感、通信、数据分析等模块，研发过程中通过上级配发的仿真系统和专用测试设备，完成了复杂环境下的全流程验证. 基层科研骨干表示：“过去受条件限制，很多想法难以付诸实践. 现在有了体系化支撑，我们能够攻关更复杂的难题.”

记者发现，目前，基层科研骨干呈现“指技融合”的鲜明特点，既有精通作战指挥的一线指挥员，也有擅长人工智能等前沿技术的年轻军官、军士和文职人员. 参加此次评选活动的“联合作战模拟训练系统”研发团队，就由具有院校深造经历的营连级指挥员和专业技术军官组成，他们将实战经验与前沿技术深度融合，解决了多个训练难题. 近年来，各级通过拓宽人才引进渠道、完善联合培养机制，培养了一大批懂作战、精技术的复合型人才，为科技创新提供了坚实人才支撑.

全军各级积极为基层科研一线搭建创新平台，广泛开展技术比武、创新竞赛等活动，并设立专项奖励基金，激发官兵创新热情. 某部军士在研发“装备智能检测系统”过程中屡遭挫折，单位主官持续给予支持. 最终，这名军士攻克了技术难关. 这种“鼓励创新、宽容失败”

的浓厚氛围，让官兵敢于瞄准前沿领域开展攻关. 同时，跨部门、跨专业的联合攻关模式日益成熟，共享协作成为新风尚.

军事科学院系统工程研究院某所林副研究员表示：“目前，全军科研创新从过去侧重单一装备性能提升，转向更加注重体系融合、信息主导和整体效能倍增. ”据悉，基层科研一线官兵牢固树立科研创新服务备战打仗导向，将成果能否解决实战难题、融入作战体系、具备推广价值作为核心标准，创新领域涵盖指挥控制、情报处理、模拟训练、综合保障等方面，研究课题紧紧围绕提升联合作战能力，着力打通信息壁垒、优化作战流程.

专家认为，这种面向未来战场、面向体系能力的科研观念重塑，引导官兵自觉将创新活动提升到“系统解决方案”层面，推动了基层科研创新由零散化、小型化向集成化、平台化演进.

筑梦强军，创新驱动. 近年来，全军大力改善科研条件、优化人才队伍、营造创新氛围，激发了基层科研一线官兵的创造潜力. 大量科研成果在更广范围推广应用，为部队提升打赢能力注入新动能.

Overcoming the Challenges of the 14th Five-Year Plan: An Extraordinary Five Years | Our Army’s Grassroots Scientific Research and Innovation Vitality Is Bursting Away

Source: China Military Network - PLA Daily Author: Li Yue, Jia Qilong Editor: Xu Zhanhu Published: October 21, 2025

Shifting from “Scattered Improvements” to “Systematic Breakthroughs”

Our Army’s Grassroots Scientific Research and Innovation Vitality is Bursting Away

Officers and men from a brigade of the 73rd Group Army exchange ideas in the “Strengthening the Army and Improving Weapons Intelligent Training Room.” Photo by PLA Daily Special Correspondent Liu Zhiyong

PLA Daily: Li Yue and reporter Jia Qilong report: The PLA’s first Small Innovation, Small Invention, and Small Creation selection campaign recently concluded. A number of innovative achievements closely aligned with actual combat needs, addressing training challenges, and enhancing combat effectiveness were showcased, with 90% of these achievements categorized as scientific and technological innovation. This data demonstrates that our Army’s grassroots scientific research and innovation are shifting from “sporadic improvements” to “systematic breakthroughs,” and the innovative vitality of grassroots officers and men is bursting forth. In recent years, all levels of the military have increased their investment in grassroots scientific research, establishing a three-in-one scientific research support system consisting of supporting laboratories, training bases, and innovation studios. This system leverages cloud platforms to achieve full-scale sharing of technical resources. A border defense brigade developed an

“intelligent border control system” that integrates sensing, communications, and data analysis modules. During the development process, simulation systems and specialized testing equipment provided by superiors enabled full-process verification in complex environments. A key grassroots scientific researcher stated, “In the past, limited resources made it difficult to implement many ideas. Now, with systematic support, we can tackle more complex challenges.”

Reporters have observed that grassroots scientific researchers currently demonstrate a distinct “integration of command and technology.” This includes both frontline commanders proficient in combat command and young officers, NCOs, and civilian personnel skilled in cutting-edge technologies such as artificial intelligence. The development team for the “Joint Combat Simulation Training System,” which participated in this competition, is composed of battalion and company-level commanders and specialized technical officers with academic experience. They have deeply integrated practical combat experience with cutting-edge technology to address numerous training challenges. In recent years, by broadening talent recruitment channels and improving joint training mechanisms, all levels of the military have cultivated a large number of interdisciplinary talents with both operational and technical expertise, providing solid talent support for scientific and technological innovation.

All levels of the military have actively built innovation platforms for grassroots scientific research, widely held technical competitions and innovation contests, and established special reward funds to stimulate officers and men’ enthusiasm for innovation. A sergeant in a certain unit encountered repeated setbacks while developing an “intelligent equipment detection system,” but the unit’s chief officer provided continuous support. Ultimately, the sergeant overcame the technical difficulties. This strong atmosphere of “encouraging innovation and tolerating failure” has encouraged officers and men to boldly tackle cutting-edge research. At the same time, cross-departmental and cross-disciplinary joint research models are becoming increasingly mature, and shared collaboration has become a new trend.

Associate Researcher Lin from the Systems Engineering Institute of the Academy of Military Science stated, “Currently, the military’s scientific research and innovation have shifted from a focus on improving the performance of individual equipment to a greater emphasis on system integration, information dominance, and overall efficiency.” It is reported that grassroots scientific research personnel firmly adhere to the principle of scientific research and innovation serving combat readiness, focusing on whether the research results can solve practical problems, be integrated into the combat system, and possess dissemination value as core criteria. Innovation areas cover command and control, intelligence processing, simulation training, and comprehensive support. Research topics are closely focused on improving joint combat capabilities, breaking down information barriers, and optimizing combat processes.

Experts believe that this reshaping of scientific research concepts, oriented towards future battlefields and system capabilities, has guided personnel to consciously elevate innovation activities to the level of “system solutions,” promoting the evolution of grassroots scientific

research and innovation from fragmented and small-scale development to integrated and platform-based development.

Building a strong military is driven by innovation. In recent years, the military has vigorously improved scientific research conditions, optimized its talent pool, and fostered an innovative atmosphere, stimulating the creative potential of grassroots scientific research personnel. A large number of scientific research results have been widely disseminated and applied, injecting new momentum into the troops' ability to win battles.

秋日塞北，战车奔流. 第 82 集团军某旅演训场上，一场合成营战术训练如火如荼展开. 担负尖刀任务的“刘老庄连”官兵，一举突破“敌”防御前沿，向纵深发起攻击……

“刘老庄连”诞生于抗日烽火，是为了人民全员牺牲、依靠人民涅槃重生的连队. 一代代“刘老庄连”官兵，肩负人民的重托，御敌江淮、挺进东北、血战辽沈、南渡琼崖、西出剿匪……高擎战旗转战中华大地，从胜利走向胜利.

官兵在训练场研究战术战法. 张飞 摄

制作专题板报激发练兵热情. 张飞 摄

进入新时代，“刘老庄连”官兵赓续光荣传统，紧跟改革强军步伐，积极探索制胜未来战场新战法.

2021 年，“刘老庄连”实现了从“单兵作战”到“体系融合”的能力跃升. 2024 年，连队官兵参加上级组织的实弹射击演习时，面对复杂“敌情”灵活处置，先“敌”开火，赢得胜机. 2025 年，连队主动请缨担负旅无人智能试点建设任务，深入钻研无人平台武器装备，展开有人无人作战协同战法研练.

Tactical training is conducted in coordination between personnel and vehicles. Photo by Zhang Fei.

In the autumn days of the northern frontier, tanks raced forward. A combined battalion tactical training exercise was in full swing at the training grounds of a brigade of the 82nd Group Army.

The soldiers of the Liu Lao Zhuang Company, tasked with spearheading the attack, broke through the enemy's front lines and launched a deep offensive...

The Liu Lao Zhuang Company, born in the flames of the War of Resistance Against Japanese Aggression, is a company dedicated to the sacrifice of all its members for the people and reborn through the people. Generations of soldiers of the Liu Lao Zhuang Company, shouldering the people's trust, have defended the Yangtze and Huaihe Rivers, advanced into the Northeast, engaged in bloody battles in the Liaoshen region, crossed the Qiongya River to the south, and marched westward to suppress bandits... Carrying the battle flag high, they fought across China, advancing from victory to victory.

Producing a special bulletin board stimulates enthusiasm for training. Photo by Zhang Fei.

Entering the new era, the soldiers of the Liu Lao Zhuang Company continue their glorious traditions, closely follow the pace of military reform and strengthening, and actively explore new tactics to win on future battlefields.

In 2021, the Liu Lao Zhuang Company achieved a leap in capabilities from "individual combat" to "system integration." In 2024, during a live-fire exercise organized by superiors, company officers and men flexibly responded to a complex "enemy situation," firing first and securing victory. In 2025, the company volunteered to undertake the brigade's unmanned intelligent pilot program, delving deeply into unmanned platform weaponry and equipment, and conducting research and training on coordinated manned-unmanned combat tactics.

At the military parade commemorating the 80th anniversary of the victory of the Chinese People's War of Resistance Against Japanese Aggression and the World Anti-Fascist War, the battle flag formation was awe-inspiring. The battle flag of the "Liulaozhuang Company" fluttered in the wind, receiving the review of the Party and the people. (Photo by Zhang Lei, PLA Daily)

On March 18, 2025, company officers and men participated in a commemorative ceremony at the Liulaozhuang 82 Martyrs Cemetery. The photo shows officers and men taking an oath to the battle flag in front of the Martyrs' Monument. (Photo by Yang Shiwei)

The company held a ceremony at the training ground to welcome the officers and men back from the parade. (Photo by Zhang Fei)

Company cadres shared the company's glorious history with the soldiers. Photo by Zhang Fei

Amidst the transformation and breakthrough, the heroic battle flag bears a distinctive red. In recent years, the "Liu Lao Zhuang Company" has been awarded the Second Class Collective Merit once and the Third Class Merit four times, and has been recognized by the Army as an advanced "Four Iron" unit. Over 60 personnel have won gold and silver medals in competitions organized at all levels. On September 3rd of this year, at the military parade commemorating the 80th anniversary

of the victory of the Chinese People's War of Resistance Against Japanese Aggression and the World Anti-Fascist War, the company's battle flag fluttered in the wind, and 11 officers and men were selected to participate in the parade, proudly accepting the inspection of the Party and the people in Tiananmen Square. From Liu Lao Zhuang to Tiananmen Square, time and space have transformed, but what has changed is the company's appearance. What remains unchanged is the true character of the people's army: its spirit of loyalty, bravery, and courage.

陆军某旅强化官兵科学训练意识：训练热身不再“千篇一律”

来源：解放军报 作者：龚正 马剑铮 付君臣 等 责任编辑：王粲 2025-10-22

第 80 集团军某旅强化官兵科学训练意识——

训练热身不再“千篇一律”

■龚 正 马剑铮 解放军报特约记者 付君臣

施训看点

为有效控制训练伤发生，维护官兵身心健康，支撑部队战斗力建设，新版《军事体育训练大纲》针对存在的训练理念和技术落后，训练科学性、规范性不高等问题，明确规范“热身—训练—放松”闭合训练流程，创新技术方法，培养良好运动习惯.

转臂摇摆、伏地登山、转髋跳……10 月上旬，第 80 集团军某旅某连通用 400 米障碍训练前，先组织官兵进行热身训练. 记者注意到，热身时，他们不再简单地从头到脚“动”一遍，而是针对该课目特点，有针对性地活动身体.

训练现场，中士陈小林带领官兵进行“弓步走转体”训练.“这是专门针对 400 米障碍中‘三步桩’和‘壕沟’两个障碍设计的热身训练——弓步走可以激发大腿肌肉力量，转体能有效‘唤醒’核心力量，避免跨越障碍时由于发力不均导致腰胯受伤. ”陈小林一边纠正动作一边说.

陈小林介绍，以往“全身‘动’一遍”的训练方法，虽然能起到热身效果，但对一些专项课目而言作用并不明显. 比如说，3000 米跑等有氧训练课目，需要重点激活髋关节与心肺功能；引体向上等力量训练课目，则需要通过激活肩关节与肩胸肌肉韧带，以防造成训练伤.

“新版《军事体育训练大纲》遵循运动规律，高度关注基层官兵体能训练‘以跑练跑’‘以杠练杠’等问题，引入现代运动学理念，使组训施教更加科学规范，也更有针对性. ”该旅作训科庞参谋告诉记者，新大纲施行后，他们第一时间组织单位训练骨干学习大纲改点，引导官兵充分认识训练前热身的重要性和必要性. 为帮助组训人员进一步掌握科学热身方法，该旅还邀请院校军事体育专家来队授课，为官兵讲授不同课目的热身重点和注意事项.

翻开该连的周训练计划，记者看到，每个课目都备注了热身训练内容. “结合教学内容，我们针对不同课目设计了专项热身动作，帮助官兵快速激活肌肉的同时调动好身体机能. ”庞参谋介绍，如今他们采用“10 分钟热身+40 分钟训练+10 分钟放松”的模式组织训练，总时长没有增加，官兵的训练成绩却明显提升.

离训练结束大约还有 10 分钟，训练场上传来一声哨响. “所有人进行放松训练！”随着陈小林下达口令，参训官兵利用辅助器材展开放松训练.

“如今，10 分钟的放松训练已被正式列入基层连队周训练计划. ”庞参谋告诉记者，以单杠训练为例，如果训练后不进行充分放松，官兵很容易因肌肉酸痛影响后续训练.

新大纲施行后，该旅结合卫生员集训等时机，邀请部队医院专家开展专题讲座，为基层骨干和连队卫生员传授训练放松技巧. 他们还依托各营医务室打造集针灸、理疗等功能于一体的康复室，帮助官兵在高强度训练后缓解肌肉疲劳、加速体能恢复.

“自从热身放松成为训练‘必修课’，训练伤病率明显下降. ”该连韩连长表示，“热身—训练—放松”闭合训练流程帮助大家养成科学训练习惯. 如今，利用课余时间研究科学训练方法的场景处处可见，官兵“科学训练、高效训练”的意识显著增强.

观训小议

磨刀不误砍柴工

■杨 悦

军事体育是战斗力生成的基础，我军自诞生以来就一直高度重视军事体育训练.

近年来，随着科学训练理念不断深入人心，军事体育训练在内容、方法和理念方面都呈现出新气象. 新版《军事体育训练大纲》将基础知识单独成章，不仅系统普及了体育训练常识、运动人体科学和训练伤预防等方面的知识，还明确规范了“热身—训练—放松”闭合训练流程，使一些与科学训练理念不符的“土办法”“老套路”逐步退出训练场.

科学训练，理念先行. 理念是行动的“指挥棒”，直接影响军事体育训练效果. 第 80 集团军某旅摒弃“从头到脚‘动’一遍”的热身方法告诉我们，军事体育训练必须讲求科学，打“疲劳战”未必能取得预期效果. 只有遵循运动规律，合理负荷、循序渐进、分类施训、均衡发展，才能科学有效地提升官兵的体能素质.

磨刀不误砍柴工，体现的是科学训练与刻苦训练的有机统一. 各级带兵人既要从严组训，激发官兵精武强能动力，还要坚持科学训练理念，找准科学组训方法，在提升官兵训练成绩的同时帮助大家养成科学训练习惯，让每一滴汗水都为战斗力而流.

参训笔记

成绩提高了，伤病减少了

■第 80 集团军某旅某连干部 周 杰

新版《军事体育训练大纲》明确规范“热身—训练—放松”闭合训练流程，旅里按照新大纲规定，制订了新的训练方案. 方案公布后，却一度让连队训练骨干心存疑虑.

“操课只有一个小时，拿出 20 分钟来热身放松，到底值不值？”不少训练骨干认为，训练成绩是靠时间累积练出来的. 过去，为了把时间用在“刀刃”上，有的训练骨干压缩了训练前的热身时间，提高了部分课目训练成绩. 但久而久之，这种“唯强度论”的训练方式也给官兵身体健康埋下隐患，一些官兵因热身放松不到位，导致训练后肌肉酸痛甚至出现训练伤.

新的训练模式“行不行”，归根结底要靠事实说话. 试行一段时间后，“热身—训练—放松”闭合训练的效果逐渐显现：几名单杠成绩落后的官兵打了“翻身仗”，连队总体训练成绩水涨船高，训练伤的发生率也较往年明显下降. 前不久召开的一次训练形势分析会上，一名原本对新训练方案持怀疑态度的训练骨干由衷感慨：“热身放松不是训练的‘附加选项’，而是提升成绩、预防伤病的‘重要一环’. ”

平时训练中，我们区分不同课目制订针对性热身放松计划，真正实现了“练什么课目就做什么热身”，推动“热身—训练—放松”的闭合训练流程越来越规范.

如今，热身放松已成为连队训练的“必修课”，20 分钟的热身放松时间雷打不动. 更可喜的是，连队训练骨干不再依赖经验粗放式组训，而是通过聆听专家授课、学习运动学知识等方式，掌握了不少科学热身放松的方法.

An Army Brigade Strengthens Scientific Training Awareness among Officers and Men: Warm-Ups Are No Longer the “Same”

Source: PLA Daily Authors: Gong Zheng, Ma Jianzheng, Fu Junchen, et al. Editor: Wang Can 2025-10-22

A Brigade of the 80th Group Army Strengthens Scientific Training Awareness among Officers and Men - Warm-Ups Are No Longer the “Same”

■ Gong Zheng, Ma Jianzheng, PLA Daily Special Correspondents, Fu Junchen

Brigade soldiers conduct warm-up exercises before the general 400-meter obstacle course. Photo by Zhang Zhongbiao

Training Highlights

To effectively control training injuries, maintain the physical and mental health of officers and men, and support the development of unit combat effectiveness, the new edition of the “Military Physical Training Outline” addresses existing issues such as outdated training concepts and techniques, and the lack of scientific and standardized training. It clarifies and standardizes the closed training process of “warm-up-training-cool-down,” innovates technical methods, and cultivates good exercise habits. Arm swings, prone mountain climbers, hip-spin jumps... In early October, a company in a brigade of the 80th Group Army conducted warm-up exercises before a 400-meter obstacle course. Reporters noticed that during the warm-up, they no longer simply “moved” from head to toe, but instead employed targeted exercises tailored to the specific characteristics of the event.

At the training site, Sergeant Chen Xiaolin led the soldiers in a “lunge-walking and body-turning” exercise. “This is a warm-up specifically designed for the ‘three-step piles’ and ‘trench’ obstacles in the 400-meter obstacle course. The lunge-walking exercises stimulate thigh muscle strength, and the body-turning exercises effectively ‘awaken’ core strength, preventing hip and waist injuries caused by uneven force when crossing the obstacles,” Chen Xiaolin explained as he corrected the movements.

Chen Xiaolin explained that while the traditional “full-body-moving” training method provided a warm-up, it wasn’t as effective for some specific events. For example, aerobic exercises like the 3,000-meter run focus on activating the hip joints and cardiopulmonary function; strength exercises like pull-ups focus on activating the shoulder joints and shoulder-thoracic muscles and ligaments to prevent training injuries.

“The new edition of the Military Physical Training Outline adheres to the laws of movement and pays close attention to issues like ‘running to train running’ and ‘baring to train baring’ in grassroots physical training. It incorporates modern kinesiology concepts, making training and instruction more scientific, standardized, and targeted.” Staff Officer Pang from the brigade’s Operations Department told reporters that after the new syllabus went into effect, they immediately organized training personnel to review the revised syllabus and ensured that soldiers fully understood the importance and necessity of warming up before training. To help trainers further

master scientific warm-up techniques, the brigade also invited military sports experts from universities to teach soldiers the key points and precautions for warming up for different subjects.

Opening the company's weekly training plan, reporters saw that warm-up training content was noted for each subject. "Based on the teaching content, we've designed specific warm-up exercises for different subjects to help soldiers quickly activate their muscles and mobilize their body functions." Staff Officer Pang explained that they now use a "10-minute warm-up + 40-minute training + 10-minute cool-down" training model. While the total training time hasn't increased, the soldiers' training results have significantly improved.

With about 10 minutes left before the end of training, a whistle blew on the training ground. "Everyone, cool-down training!" Chen Xiaolin gave the order, and the participating soldiers began using assistive devices.

"Now, 10 minutes of cool-down training has been officially included in the weekly training plan for grassroots companies," Staff Officer Pang told reporters. For example, if soldiers don't fully cool down after horizontal bar training, muscle soreness can easily affect subsequent training.

Since the implementation of the new syllabus, the brigade has invited experts from the military hospital to conduct special lectures, including during medical training sessions, to teach grassroots personnel and company medical staff about relaxation techniques. They also built rehabilitation rooms integrating acupuncture, moxibustion, and physical therapy, leveraging each battalion's infirmary, to help soldiers relieve muscle fatigue and accelerate recovery after intense training.

"Since warm-up and relaxation became mandatory training, the training injury rate has dropped significantly," said Company Commander Han. This closed-loop training process of "warm-up-training-cool-down" has helped everyone develop scientific training habits. These days, using extracurricular time to study scientific training methods is commonplace, and men' awareness of "scientific and efficient training" has significantly increased.

Training Observation

Sharpening the Knife Doesn't Delay the Chopping of Wood

■ Yang Yue

Military physical education is the foundation of combat effectiveness, and our army has always attached great importance to it since its inception.

In recent years, as the concept of scientific training has become increasingly popular, military physical education has seen new developments in content, methods, and concepts. The new edition of the "Military Physical Training Outline" dedicates basic knowledge to a separate chapter. This not only systematically promotes knowledge about physical training, the science of the human body in motion, and training injury prevention, but also clearly standardizes a closed-loop training

process of “warm-up-training-cool-down,” gradually eliminating some “homegrown” and “old-fashioned” methods that contradict scientific training philosophies.

Scientific training begins with a philosophy. Philosophy guides action and directly impacts the effectiveness of military physical training. The fact that a brigade of the 80th Group Army abandoned the “head-to-toe” warm-up method demonstrates that military physical training must be scientifically grounded; a “fight to exhaustion” approach may not necessarily achieve the desired results. Only by adhering to the laws of motion, applying appropriate loads, proceeding step by step, implementing differentiated training, and achieving balanced development can we scientifically and effectively improve the physical fitness of officers and men.

“Sharpening the knife does not delay the chopping of wood” embodies the organic unity of scientific and diligent training. Leaders at all levels must not only rigorously organize training to inspire soldiers to excel in their martial arts, but also adhere to scientific training concepts and identify effective training methods. This will improve soldiers’ training performance while helping them develop scientific training habits, ensuring that every drop of sweat contributes to combat effectiveness.

Training Notes

Performance Improved, Injuries Reduced

■ Zhou Jie, Company Cadre, 80th Group Army Brigade

The new edition of the “Military Physical Training Outline” clearly defines the closed-loop training process of “warm-up-training-cool-down.” The brigade developed a new training plan in accordance with the new outline. However, after the plan was announced, it initially raised concerns among the company’s core training staff.

“Drills only last an hour. Is it really worth spending 20 minutes warming up and cooling down?” Many core training staff believe that training performance is built on accumulated practice. In the past, to maximize time, some core training staff reduced pre-training warm-up time, improving performance in some subjects. However, over time, this intensity-focused training approach has also posed health risks to soldiers. Some soldiers, due to inadequate warm-up and cool-down, have suffered post-training muscle soreness and even training injuries.

Ultimately, the effectiveness of the new training model will be determined by empirical evidence. After a period of pilot testing, the effectiveness of the closed-loop “warm-up-training-cool-down” training system has gradually become apparent: several soldiers who had lagged behind on the horizontal bar have made a comeback, the company’s overall training performance has improved, and the incidence of training injuries has significantly decreased compared to previous years. At a recent training situation analysis meeting, a key training member who was initially skeptical of the new training plan expressed heartfelt gratitude: “Warm-up and cool-down aren’t just an add-on to training; they’re a crucial part of improving performance and preventing injuries.”

During regular training, we develop targeted warm-up and cool-down plans for each subject, truly implementing the principle of "warm-up for the subject," and promoting the increasingly standardized closed-loop "warm-up-training-cool-down" training process. Warming up and relaxing have become a mandatory part of company training, with a 20-minute warm-up and relaxation period unwavering. Even more encouraging, the company's core training staff no longer rely on extensive, empirical training. Instead, they have mastered a number of scientific warm-up and relaxation techniques through expert lectures and kinesiology training.

第 73 集团军某旅机关持续改进工作作风增强主动服务意识

来源：解放军报 作者：皇甫少阳 张仁浩 责任编辑：王粲 2025-10-22

第 73 集团军某旅机关持续改进工作作风增强主动服务意识——

从"有求必应"到"未呼先行"

■皇甫少阳 张仁浩

"女儿在新学校适应得很好，放心吧. "结束驻训即将返营，第 73 集团军某旅某连二级军士长、机械技师江龙刚完成物资装载后，抽空给妻子打了一个电话，妻子高兴地给他讲起这段时间家里的情况.

今年，在旅机关积极协调帮助下，江龙刚的妻子办理了随军手续，他的女儿也在 9 月顺利转入部队驻地小学就读. 说起这件事，他难掩内心激动："以往是等我们有事找机关，现在经常是我们还未开口提出请求，机关就主动靠前服务解难了. "

此前，江龙刚与妻子长期两地分居，妻子带着女儿在江西老家生活. 今年初，他萌生了让妻女随军的念头，不仅想早日实现一家团圆，还想在兼顾工作训练的同时，更多参与孩子的成长过程.

虽然心里有了想法，但家属随军应满足什么条件，需要准备哪些材料，办理流程如何，家属工作调动、孩子上学怎么解决等问题，江龙刚还未来得及了解相关政策规定，只和连队潘指导员提了一下.

正在这时，该旅组织的第二季度机关业务科室下基层现场办公来到该连，收集官兵实际困难，提供上门服务. 在办公现场，该旅人力资源科孙干事从潘指导员口中了解到江龙刚有关情况，第一时间主动联系江龙刚，告知其家属随军政策、办理流程及所需材料.

机关的"未呼先行"，让江龙刚感到欣喜. 他按照孙干事的提示，上交了相关材料. 不到一个月时间，人力资源科就为其办完了随军手续.

今年 5 月，机关深入连队，摸底统计子女想转学到部队驻地就读的人员，江龙刚第一时间上报了信息. 最终，经过旅机关相关科室的积极协调，他的女儿顺利转到驻地一所重点小学就读.

彼时，江龙刚正在野外驻训，接到人力资源科打来的电话，他非常感动：“一家人终于团聚了，感谢组织的关心！”没有了后顾之忧，江龙刚全身心投入训练，先后完成多项保障任务，受到各级好评.

“以前，机关更多等着基层官兵上门提要求，现在机关转变为兵服务工作作风和方式，主动靠前、解难帮困.”孙干事介绍.

改变，源自基层的呼声. 今年初，该旅组织了一次机关基层双向恳谈会，有官兵反映：虽然到机关办事，门好进了、脸好看了，机关工作人员能做到“有求必应”了，但在主动服务上还有所欠缺.

此前，一个连队编制调整后，人员有所增加，但机关相关部门没有及时增发防毒面具、单兵帐篷等物资，导致个别训练课目受到影响.

“‘有求必应’只是第一步，机关还要努力做到‘未呼先行’.”旅党委一班人得知情况后，要求机关提高服务基层工作的主动性和针对性，预判基层需求、解决潜在问题，变“基层找上门”为“服务送上门”，用主动作为打通服务基层的“最后一公里”，让基层官兵感受到机关的担当与工作的温度.

该旅机关秉持“登门问、主动办”的理念，结合机关日常工作成立“服务基层小分队”，深入营连“流动办公”，同时建立“上门服务、受理建档、限时办结、跟踪问效”服务机制，要求机关干部走出办公室，深入一线解难帮困，持续提升机关服务基层质效.

前不久，机关督查组在基层检查时发现，卫生连外场营区车库数量不足，部分车辆只能停在道路上. 他们主动协调附近连队匀出几个车库，解决了卫生连的停车难题.

“以前是‘人找服务’，现在是‘服务找人’，让我们感到关心备至.”对此，某连中士邵飞颇有感触.

今年 6 月，邵飞家乡发生洪水并引发泥石流. 机关第一时间响应，根据登记的籍贯信息，主动找到他了解家庭受灾情况. 得知他家受灾严重，相关科室立即指导他申请家庭困难救济金，帮助他家渡过难关.

邵飞介绍，不仅如此，诸如官兵晋职晋衔时间、子女出生年月等基本信息，在机关都有备案，每当临近相关工作时间节点，机关各业务科室会打好提前量，及时提醒当事人做好准备.

机关工作作风更加务实，官兵们看在眼里、暖在心里. 前段时间，某连文书看到司务长吴梦阳在微信朋友圈分享女儿出生的喜悦，便将信息上报机关人力资源科. 随后，该科梳理了申领子女保教补助费相关要求，主动联系吴梦阳，提醒他准备好资料，返营后及时上交申请，享受应有的福利待遇. 放下电话，深受感动的吴梦阳在心里给机关同志点了一个大大的赞！

短 评

服务基层贵在主动靠前

■谢孝明

习主席强调，各级要把官兵冷暖放在心上，主动靠上去解决实际困难，把各方面保障做到位. 第 73 集团军某旅机关从“有求必应”到“未呼先行”，进一步改进工作作风，提升为兵服务工作的主动性，正是落实这一要求的务实行动.

必须承认，在实际工作中，仍有个别机关工作人员，在服务基层时存在“温差”与“落差”：有的“脚不沾土”，对基层建设中存在的一些问题，既不主动问也不实地看，问题“冒泡”了才匆忙处置；有的“眼不向下”，对家属随军安置、子女入学等官兵关心关注但有时难开口的事，总想着“官兵不说就不用管”；还有的“劲不用足”，为基层解难帮困成了“半截子工程”，既不主动协调，也不及时跟进……凡此种种表现，都是没有真正把基层官兵的冷暖放在心上，没有用心用情用力解决官兵的急难愁盼问题.

服务基层贵在主动靠前. 缺乏主动靠前的意识和行动，往往会让服务基层工作浮在表面、难见实效. 机关干部具体应该如何做？一是要多到训练场、班排宿舍等练兵备战一线，与官兵打成一片，面对面摸清基层“真情况”、心贴心掌握官兵“活思想”. 二是对于基层常见的困难、官兵普遍的诉求，要提前梳理、科学谋划、积极解难，建立问题清单、责任清单、时限清单，并及时推进解决，用“提前一步”避免“滞后应付”. 三是解决官兵的困难问题不推不拖，解决后还要跟踪问效，让主动靠前真正转化为问题彻底解决的实效.

The Headquarters Departments of a Brigade of the 73rd Group Army Continues to Improve Its Work Style and Enhance Its Proactive Service Awareness.

Source: PLA Daily Author: Huangfu Shaoyang, Zhang Renhao Editor: Wang Can 2025-10-22

The headquarters of a brigade of the 73rd Group Army continues to improve its work style and enhance its proactive service awareness.

From “responding to every request” to “acting before being called”

■ Huangfu Shaoyang, Zhang Renhao

“Don’t worry, my daughter is adapting well to her new school.” As he was about to return to camp after completing his on-site training, Sergeant Major and mechanical technician of a company in a brigade of the 73rd Group Army took time to call his wife after loading supplies. She happily told him about their family’s recent situation.

This year, with the active coordination and assistance of the brigade headquarters departments, Jiang Longgang’s wife completed the procedures to accompany the troops, and his daughter successfully transferred to the primary school at the military base in September. Talking about this, he couldn’t conceal his excitement: “In the past, we’d wait until we needed to contact the authorities. Now, they often proactively step forward to provide services and resolve issues before we even ask.”

Previously, Jiang Longgang and his wife had been separated for a long time, with his wife living with their daughter in their hometown in Jiangxi. Earlier this year, he entertained the idea of having his wife and daughter accompany the troops. He wanted not only to reunite as a family but also to be more involved in their children’s upbringing while balancing work and training.

Although he had the idea, Jiang Longgang hadn’t yet understood the relevant policies and regulations regarding the requirements for accompanying family members, the required documents, the application process, and how to handle family members’ job transfers and their children’s schooling. He only briefly mentioned it to his company instructor, Pan.

Just then, the brigade’s second-quarter headquarters department visited the company to gather information on the practical challenges faced by officers and men and provide on-site services. During the meeting, Sun, an officer from the brigade’s Human Resources Office, learned about Jiang Longgang’s situation from Political Instructor Pan and immediately contacted him to inform him of the policy, process, and required documents for accompanying family members. Jiang Longgang was delighted by the headquarters’ proactive response. Following Officer Sun’s instructions, he submitted the relevant documents. Within a month, the Human Resources Office had completed the accompanying procedures for him.

In May of this year, headquarters personnel visited the company to survey those whose children wished to transfer to a military school at the base. Jiang Longgang immediately reported this information. Ultimately, through the active coordination of relevant departments within the brigade headquarters departments, his daughter was successfully transferred to a key primary school at the base.

At the time, Jiang Longgang was stationed in the field when he received a call from the Human Resources Office. He was deeply moved: “My family is finally reunited! Thank you for the organization’s concern!” Freed from any worries, Jiang Longgang devoted himself to training, completing numerous support tasks and receiving praise from all levels.

“Previously, headquarters departments would wait for grassroots officers and men to come forward with requests. Now, headquarters departments have shifted their work style and approach to

serving soldiers, proactively stepping up to address challenges and difficulties," explained Officer Sun.

The change stems from the calls from the grassroots. Earlier this year, the brigade held a two-way consultation meeting between headquarters departments and grassroots organizations. Some officers and men reported that while access to headquarters departments has become easier and more welcoming, and staff are now responsive to every request, proactive service is still lacking.

Previously, a company's organizational structure was adjusted, resulting in an increase in personnel. However, the relevant headquarters departments failed to promptly issue additional supplies, such as gas masks and individual tents, impacting some training sessions.

"'Responding to every request' is only the first step; headquarters departments must also strive to 'act before it's needed.'" Upon learning of this situation, the brigade Party Committee urged headquarters departments to improve the proactive and targeted nature of its grassroots service efforts, anticipating grassroots needs and resolving potential problems. This shift from "grassroots seeking services" to "services delivered to the door," proactively bridging the "last mile" of grassroots service and ensuring that grassroots officers and men feel the headquarters departments' commitment and warmth. Adhering to the principle of "visiting and proactively addressing issues," the brigade headquarters departments established a "grassroots service team" in conjunction with its daily work. This team conducts mobile office work in battalions and companies. At the same time, a service mechanism featuring "on-site service, filing applications, timely completion, and follow-up performance evaluation" has been established. This requires headquarters departments cadres to step out of their offices and engage in on-the-ground assistance, resolving challenges and providing assistance, thereby continuously improving the quality and effectiveness of their grassroots services.

Not long ago, during a grassroots inspection, the headquarters departments inspection team discovered that the medical company's outfield camp was short of parking garages, forcing some vehicles to park on the road. They proactively coordinated with nearby companies to allocate several garages, resolving the company's parking challenges.

"Before, it was 'people looking for services,' but now 'services looking for people.' We feel deeply cared for," said Sergeant Shao Fei of a certain company.

In June of this year, floods and mudslides struck Shao Fei's hometown. The headquarters departments responded immediately, using his registered place of origin to contact him and learn about his family's disaster situation. Upon learning of the severity of his family's damage, the relevant department immediately guided him in applying for family hardship relief to help him overcome the difficult times. Shao Fei explained that, in addition to this, basic information such as the dates of officers and men' promotions and their children's births is also recorded within the headquarters departments. Whenever relevant deadlines approach, the various departments within

the headquarters departments will plan ahead and promptly remind the relevant personnel to prepare.

The headquarters departments' work style has become more pragmatic, and the officers and men see this with their own eyes and feel deeply. Some time ago, a company clerk saw Chief of Staff Wu Mengyang sharing his joy at the birth of his daughter on WeChat Moments and reported the information to the headquarters' Human Resources Office. The department then reviewed the requirements for applying for childcare subsidies and proactively contacted Wu Mengyang, reminding him to prepare his documents and submit his application promptly upon returning to camp so that he could receive the benefits he deserved. After hanging up the phone, Wu Mengyang, deeply moved, mentally gave his colleagues at the headquarters departments a big thumbs-up!

Short Comment

Serving the grassroots requires proactive engagement

■ Xie Xiaoming

President Xi Jinping emphasized that all levels of government must care deeply about the well-being of officers and men, proactively address practical challenges, and ensure comprehensive support. The headquarters departments of a brigade of the 73rd Group Army has gone from "responding to every request" to "acting before it's needed," further improving its work style and enhancing its proactive service to soldiers. This is a practical step towards implementing this requirement.

It must be acknowledged that, in practice, some staff members still exhibit a "gap" in their service to the grassroots. Some are "out of touch," neither proactively inquiring about nor investigating issues arising in grassroots development, and only hastily address them once they surface. Some are "down-to-earth," always thinking, "If soldiers don't ask, then don't bother." Still others are "lacking energy," leaving grassroots assistance a half-hearted project, neither proactively coordinating nor following up promptly. All of these manifestations demonstrate a lack of genuine concern for the well-being of grassroots soldiers, and a failure to apply their heart, soul, and energy to addressing their pressing needs.

Serving the grassroots requires proactive engagement. A lack of proactive awareness and action often results in superficial grassroots service efforts that lack real results. What should cadres do specifically? First, they should go to training grounds, squad dormitories, and other frontline training and preparation areas more often to mingle with officers and men, get to know the "real situation" at the grassroots level face to face, and get to know the "active thoughts" of officers and men from the heart. Second, they should sort out common difficulties at the grassroots level and the common demands of officers and men in advance, make scientific plans, and actively solve them. They should establish a list of problems, a list of responsibilities, and a list of deadlines, and promptly promote solutions, using "being one step ahead" to avoid "delayed coping." Third, they should not delay solving the difficulties of officers and men, and after solving them, they should

follow up and ask for results, so that proactive efforts can truly be transformed into the effective resolution of problems.

带兵有啥秘诀？他从“三把椅子”感悟带兵之道

来源：解放军报 作者：吴新 责任编辑：王粲 2025-10-22

从“三把椅子”感悟带兵之道

■新疆军区某连指导员　吴　新

那天，一个兄弟连队的指导员来到我宿舍，问了一个问题：“你带兵有啥秘诀？为啥大家都爱找你谈心？”

如果问我担任指导员以来，最有心得、最有成就感的事，我觉得是通过 3 把椅子，悟到了带兵道理.

我刚到连队任职时，宿舍内只有一把椅子. 现在屋内增加到 3 把椅子，两把放在办公桌旁，一把放在了门边.

一天，一级上士老李走进我宿舍，一屁股就坐在靠门的椅子上，双手抱胸，脸涨得通红.

老李是连队的修理能手，为人处事向来稳重. 平日里，他常常板着脸，话也不多. 看到他这么生气，我知道肯定是出了什么事. 我拉过一把椅子，坐到他身边.

过了好一会儿，情绪平复下来的老李终于开口：“现在的新兵真是不好带！今天有个新兵在维修时，操作不当把设备弄坏了. 这设备可是咱们连的‘金疙瘩’啊！”说着，他又激动起来，重重拍了一下椅子扶手.

我看着老李，并没有直接回应他的抱怨：“李班长，我知道你心疼设备，也理解你对新兵寄予厚望. ”我边说边拍了拍他的肩膀.

“我刚到连队时，心里很着急，想尽快拉近和大家的距离，可事与愿违. ”我指了指我们坐着的椅子，分享自己的经历，“一开始，战士们来找我谈心都是站在门口，没说几句话就走了. ”

这样的“站聊”持续了半个月，谈心的效果始终没有达到我的预期，我心里更着急了. 直到一天回宿舍，我站在门口看着自己常坐的那把椅子，终于发现了问题所在：“我坐你站”产生那么大的压迫感和距离感，战士们怎么愿意亲近我？

于是，我从储藏室搬来了一把椅子，最初位置放得比较远. 一天，某班王班长找我说事. 他一来就把椅子拽到我身边，膝盖几乎碰到我的椅子腿：“指导员，怎么坐这么远？咱们得挨着聊才热乎！”

王班长的话点醒了我. 然而等我把椅子挪到办公桌旁，情况并没有好转. 一些战士不愿坐得这么近，有的会把椅子拉远一点，有的还是站在门口. 这一度让我十分困扰.

“后来，我想明白了，椅子放几把、放在哪里都不重要. 我初来乍到，还是个陌生人，走进官兵内心需要时间. ”我接着说，“我又在门口放了一把椅子，只要大家愿意来找我谈心，想坐哪儿就坐哪儿. ”

在这之后，我将关注的重点放在提高每一次谈心的质量上，用真诚打动大家. 经过一段时间的努力，我能明显感到，自己和大家的心理距离拉近了，愿意和我说心里话的官兵增多了.

老李听着我的分享，陷入了沉思. 我继续说：“李班长，新兵刚接触新专业、新工作，难免会犯错. 咱们得给他们时间和空间去成长. 你想想，你刚入伍时，难道就没犯过错误吗？”

老李抬起头，看着我，脸上的怒气消了不少：“指导员，你说得对. 我入伍不久，也因为不懂操作把工具弄坏了，当时心里别提多害怕了，就怕被班长批评. ”

我笑了笑：“所以啊，咱们作为过来人，既然自己淋过雨，就给年轻人撑把伞. 换位思考一下，你总是这么严肃，新兵可能会因为害怕而不敢向你请教问题，这样反而不利于他们成长进步. ”

老李若有所思地点了点头：“指导员，我明白了. 我回去之后，会好好和那名新兵谈谈，教他正确的操作方法. ”

这次谈心过后，老李对待新兵的态度有了很大的转变. 他脸上有了笑容，经常主动和新兵们交流，手把手教他们维修技术. 战士们都说，李班长像变了一个人，大家都愿意跟他亲近了.

带兵是一个需要细心和耐心的工作，最重要的是用真心换真心. 这也是我透过 3 把椅子悟到的带兵之道.

What’s the Secret to Leading Troops? He Learned About Leadership from “Three Chairs”

Source: PLA Daily Author: Wu Xin Editor: Wang Can 2025-10-22

Learning about leadership from “three chairs”

■ Wu Xin, Instructor of a Company in the Xinjiang Military Command

One day, a political instructor from a fellow company came to my dormitory and asked, “What’s your secret to leading troops? Why do so many people want to talk to you?”

If I were to ask what has been the most insightful and fulfilling experience since I became a political instructor, I would say it was learning about leadership from three chairs.

When I first arrived at the company, there was only one chair in the dormitory. Now there are three: two by the desk and one by the door.

One day, Sergeant First Class Lao Li walked into my dormitory and plopped down on a chair by the door, his arms folded across his chest, his face flushed.

Lao Li was the company’s expert repairman and had always been a steady and composed person. On weekdays, he often had a stern face and spoke little. Seeing him so angry, I knew something must have happened. I pulled over a chair and sat down next to him.

After a while, Old Li, having calmed down, finally spoke: “New recruits these days are so hard to manage! Today, a new recruit accidentally broke a piece of equipment while repairing it. This piece of equipment is our company’s golden nugget!” As he spoke, he became excited again and slammed the armrest of his chair.

I looked at Old Li, but didn’t directly address his complaint. “Squad Leader Li, I know you care about the equipment, and I understand your high expectations for the new recruits,” I said, patting him on the shoulder.

“When I first arrived at the company, I was so anxious and wanted to quickly connect with everyone, but it didn’t go my way.” I gestured to the chairs we were sitting on and shared my own experience. “At first, the soldiers who came to talk with me would just stand at the door and leave after a few words.”

This “standing chat” went on for half a month, but the results never met my expectations, and I became even more anxious. One day, back at the dormitory, I stood at the doorway, looking at the chair I usually sat on. I finally realized the problem: “I sit, you stand” created such a sense of oppression and distance. How could the soldiers want to be close to me?

So, I brought a chair from the storage room, initially placing it quite far away. One day, Squad Leader Wang from a certain squad came to talk to me. As soon as he arrived, he pulled his chair close to me, his knees almost touching the legs of my chair. “Instructor, why are you sitting so far away? We need to be close together to chat!”

Squad Leader Wang’s words enlightened me. However, even after I moved the chair to the desk, the situation didn’t improve. Some soldiers refused to sit so close. Some would pull their chairs further away, while others would still stand at the doorway. This troubled me for a while. “Later, I realized it didn’t matter how many chairs we had or where we placed them. I was new here, a

stranger, and it would take time to get into the hearts of the soldiers." I continued, "I put another chair by the door. As long as anyone wanted to come and talk with me, they could sit wherever they wanted."

After that, I focused on improving the quality of each conversation, impressing everyone with my sincerity. After a period of effort, I could clearly feel the psychological distance between me and everyone shortened, and more soldiers were willing to share their true feelings with me.

Old Li listened to my sharing and fell into deep thought. I continued, "Squad Leader Li, new recruits are new to their profession and new jobs, so they're bound to make mistakes. We need to give them time and space to grow. Think about it, didn't you make mistakes when you first joined the army?"

Old Li looked up at me, his anger diminishing considerably. "Instructor, you're right. Shortly after joining, I also broke a tool because I didn't know how to operate it. I was so scared at the time, afraid of being criticized by the squad leader."

I smiled. "So, as veterans, since we've been through it ourselves, let's hold an umbrella for the young ones. Put yourself in their shoes. If you're always so serious, the new recruits might be afraid to ask you questions, which is actually detrimental to their growth and progress."

Old Li nodded thoughtfully. "Instructor, I understand. When I get back, I'll have a good talk with that new recruit and teach him the correct method."

After this talk, Old Li's attitude towards the new recruits changed significantly. He smiled and often took the initiative to communicate with the new recruits, teaching them maintenance techniques step by step. The soldiers all said that Squad Leader Li had become a completely different person, and everyone wanted to be close to him.

Leading troops requires meticulousness and patience, and most importantly, sincerity in exchange for sincerity. This is also the principle of leadership I learned through the three chairs.

第 78 集团军某旅引导官兵以实事求是的态度投入各项工作

来源：解放军报 作者：铁彦男 张光轩 等 责任编辑：王粲 2025-10-23

第 78 集团军某旅引导官兵以实事求是的态度投入各项工作——

上级改作风 基层见新风

■铁彦男　解放军报特约记者　张光轩

该旅任务分队官兵训练间隙开展战术研讨. 刘成祥 摄

“迎检不遮不掩、实事求是，让我们精准掌握了部队建设的真实底数. ”日前，上级工作组到第 78 集团军某旅检查工作，该旅求真务实迎接检查的做法，受到上级工作组好评.

起初，得知上级工作组即将到旅里检查工作的消息，该旅作训科韩参谋的第一反应是：抓紧查找工作漏洞，尽量让上级工作组“看亮点”.

令韩参谋没想到的是，工作协调会上，他和机关其他同志提出的“机关借用基层分队战备包迎检”“重点安排先进连队接受检查”等建议，当场遭到旅领导否决. 参会旅领导态度鲜明：平时什么样，迎检时就什么样. 上级工作组检查的初衷是指导工作、纠偏正向，以真实状态迎检有利于部队长远发展.

上级工作组如期来队. 面对检查，该旅无论机关还是分队“日常干啥就干啥”，训练和工作节奏丝毫不乱；工作组听取意见时，官兵发言实事求是、有一说一……

“部队发展建设是一项体系工程，必须遵循客观规律，把实事求是贯穿全过程. ”该旅一位领导坦言，实事求是一定程度上意味着要“亮丑”，但直面问题、解决问题，比回避问题、掩盖问题更能促进部队全面建设.

谈及这一理念的转变，这位领导讲起此前的一段经历.

一次迎检，该旅机关部门精心设置路线，提前发出迎检通知，在卫生、内务等方面对基层分队提出不少与检查内容无关的要求. 检查当天一大早，“迎检路线”上的连队组织官兵提前半小时起床打扫卫生、整理内务，基层正常战备秩序受到干扰. 上级工作组发现这一现象后，提出了严肃批评.

无独有偶. 该旅一名干部到一个先进连队任主官后，得知机关调研组计划到连队蹲点，便提前精心设计“迎检方案”，结果迎检内容光鲜亮丽，日常工作却接连“掉链子”.

该旅党委一班人就这类现象深入讨论感到，问题根源是少数官兵政绩观错位，人为掩盖问题，工作看似“卖力”，实质却是弄虚作假，丢掉了实事求是的好传统.

为此，该旅刀口向内，制订推行“抓建基层 36 条措施”，设置“基层建议奖”. 旅领导在全旅交班会上郑重强调：凡是向机关提出合理意见、为连队建设提出“金点子”的官兵，优先列为年度表彰对象；发现文过饰非、凌空蹈虚者，严肃问责.

“领导愿听真话，官兵才能放下包袱讲真话.”该旅组织科高科长告诉记者，“抓建基层36条措施”实行后，基层连队主动上报各类问题百余条，其中 30 余条意见建议经过研究论证，成为连队抓建新举措，10 余名官兵因提出“金点子”受到表扬.

同时，该旅深入开展“实事求是、解放思想”群众性大讨论，组织官兵学习我党我军坚持实事求是的光荣传统，教育引导官兵按客观规律办事，进一步树立求真务实的导向.

前段时间，该旅作训科张参谋在某连调研时发现，新上任的周连长训练抓得很紧，但官兵训练积极性不高、成绩提升不明显.

张参谋深入摸排后发现，周连长在军事训练上有些急于求成，将其在原单位推行的训练方法“照搬”到该连队. 然而，因两个连队官兵基础各异，拔苗助长式的组训思路导致官兵训练积极性受挫.

“既要尽力而为，又要量力而行、方法科学，才是坚持实事求是的工作态度. ”党支部会上，张参谋一针见血指出问题，周连长诚恳认账领账. 此后，他针对性调整组训模式.

一段时间后，该连官兵训练成绩逐步提升，连队整体成绩在季度训练考核中排名全营第一. 谈起这段经历，周连长深有体会地说：“实事求是的前提是把情况摸准、把措施定实. 只有摸清了实情，改进工作才能找准方向. ”

“闻过则改”是实事求是，“敢于创新”也是实事求是.

今年初，该旅组织一场训练观摩会，演示内容涵盖部分无人作战力量，需要一名专业负责人牵头组训. 然而，旅里缺少专业骨干人才. 经过细致摸排，从相关专业毕业的大学生新兵梁爽进入旅领导视野. 这名新兵不仅理论基础扎实，专业训练成绩也很过硬.

然而，一次任务碰头会上，有官兵提出质疑：观摩会是单位重点工作，选一名新兵当“教头”没有先例，出了问题怎么办？

“有没有先例跟能不能办成事是两码事，专业的事就应交给专业的人干. ”该旅一位领导指出，专业上的短板无法用资历弥补，忽视客观规律，就是违背实事求是. 果然，训练观摩会上，梁爽凭借出色的专业能力，受到各级领导的高度认可.

如今，该旅在部队建设各项工作中大兴求真务实之风：提拔使用干部注重听取群众意见，再进行考核；改变过去凭经验评估演训成果的做法，利用科技手段进行数字化评估，挤掉人情“水分”；大项工程决策前进行专业评估，从源头上避免盲目决策. 上级改作风，基层见实效. 一系列实打实的举措，助力官兵把全部精力向打仗聚焦、全部工作向打仗用劲，推动部队全面建设迈上新台阶.

《寻乌调查》与实事求是

1929 年 1 月，红四军主力向赣南闽西进军. 经过一年多时间，巩固扩大了红色区域，发展壮大了革命力量. 但在这一时期，党内出现了漠视调查研究、不愿了解实际情况，而把共产国际决议和苏联革命经验教条化的严重现象，因此造成不应有的损失. 这使毛泽东同志深感忧虑.

1930 年上半年，红军取得攻占大余、南雄、信丰、安远等县城的胜利. 5 月 4 日，毛泽东同志率红四军二纵队来到寻乌县城，在中共寻乌县委书记古柏的陪同下，徒步对县城进行详细考察，并一连召开了 10 多天的调查会，掌握了大量第一手材料. 诸如该县各类物产的产量、价格，县城各业人员数量、比例，各商铺经营品种、收入，各地农民分了多少土地、收入怎样，各类人群的政治态度等，他都了解得一清二楚. 同月，他根据这次调查和以往实际调查的切身体会，写下了《反对本本主义》（原名《调查工作》），鲜明提出“没有调查，没有发言权”“反对本本主义”等著名论断.

寻乌调查，对于毛泽东同志关于调查研究思想的系统形成和发展，对于他开创马克思主义中国化、确立中国共产党实事求是的思想路线，具有非常重要的意义和作用. 根据这次调查情况写成的 8 万多字的《寻乌调查》，是毛泽东同志写的篇幅最长的一篇调查报告. 1950 年，为指导土地改革运动，他又将《寻乌调查》细读了一番，亲笔将其中的《寻乌的土地斗争》部分内容作了修改.

知道更应知“道”

■刘含钰

实事求是是我们党认识世界和改造世界的根本要求，是党的思想路线，党的基本思想方法、工作方法、领导方法. 恢复和弘扬政治工作优良传统，关键是要坚持实事求是.

实事求是的重要性毋庸置疑. 然而，知道更应知“道”. 现实中，个别单位的政治整训持续深化不够，就在于没能坚持实事求是，一些违背实事求是的做法，有的是因为“不想”实事求是，有的是因为“不会”实事求是. 因此，“求”实事求是之“道”，至关重要.

厚实的马克思主义理论功底，是实事求是的理论基础. 历史启示我们，没有科学理论的指引，工作就容易陷入盲目性、片面性、被动性，就很难做到实事求是. 有马克思主义理论基础、有实际调查经验，有助于增强工作的原则性、系统性、预见性和创造性.

过硬的党性修养，是实事求是的思想基础. 从当前干部队伍实际看，坚持实事求是最需要解决的是党性问题. 做到实事求是，不仅需要正确的思想方法和工作方法，还需要公而忘私和不计个人得失的优秀品格. 党性强，就会坚持真理、修正错误，自觉为党分忧、为国尽责、为民奉献，实事求是就有了坚强的党性保证.

坚持求真务实，是实事求是的作风保证. 做到求真务实，“求真”是目标，“务实”是基础. “大人不华，君子务实. ”广大官兵尤其是领导干部时时处处坚持讲实情、出实招、办实事、求实效，实事求是的要求就能在各个部门、各个单位变成实实在在的行动.

不断解放思想，是实事求是的内在要求. 解放思想与实事求是是辩证统一的. 实践充分证明，只有解放思想，才能真正做到实事求是；只有实事求是，才是真正解放思想. 面对前进中各种可以预见和难以预见的矛盾问题，继续解放思想、坚持实事求是，勇于变革、勇于创新，永不僵化、永不停滞，有助于在深入研究新情况、不断解决新问题的实践中开创强军事业新局面.

A 78th Group Army Brigade Guides Officers and Men to Approach All Tasks with a Pragmatic Attitude.

Source: PLA Daily Author: Tie Yanan, Zhang Guangxuan, et al. Editor: Wang Can 2025-10-23

A brigade of the 78th Group Army guides officers and men to approach all tasks with a pragmatic attitude.

Superiors’ reforms have resonated with grassroots units.

■ Tie Yanan, PLA Daily Special Correspondent, Zhang Guangxuan

Officers and men of the brigade’s task force conducted tactical discussions during training breaks. Photo by Liu Chengxiang

“Being forthcoming with inspections without reservation and seeking truth from facts has allowed us to accurately grasp the true state of our military development.” Recently, a higher-level working group visited a brigade of the 78th Group Army for an inspection. The brigade’s pragmatic approach to the inspection was well-received by the working group.

Upon hearing the news that the higher-level working group was about to visit the brigade, Staff Officer Han of the brigade’s Operations and Training Office reacted with the urgency of identifying gaps and ensuring the higher-level working group “spotted the bright spots.” To Staff Officer Han’s surprise, at the work coordination meeting, suggestions he and other staff members put forward,

such as “the headquarters should borrow the combat readiness packages of grassroots units to prepare for the inspection” and “focus on arranging inspections for advanced companies,” were immediately rejected by brigade leadership. The brigade leaders present at the meeting were clear: “Whatever we do normally, we will behave the same way during the inspection.” The higher-level working group’s inspection is intended to guide work and correct errors, and preparing for the inspection with a realistic outlook is beneficial to the long-term development of the unit.

The higher-level working group arrived as scheduled. In the face of the inspection, the brigade, both headquarters and units, continued to “carry out their usual routines,” maintaining a consistent training and work rhythm. When the working group heard their opinions, officers and men spoke truthfully and honestly.

“The development of the military is a systematic project that must adhere to objective laws and adhere to the principle of seeking truth from facts throughout the entire process.” A brigade leader admitted that seeking truth from facts, while to some extent, means “exposing flaws,” directly confronting and resolving problems is more conducive to the overall development of the unit than avoiding or glossing over them.

Discussing this shift in perspective, the leader recounted a previous experience. During one inspection, the brigade’s headquarters meticulously planned a route, issued a pre-announcement, and imposed numerous requirements on grassroots units regarding hygiene and housekeeping that were irrelevant to the inspection. Early that morning, the companies along the “inspection route” had their officers and men wake up half an hour early to clean and maintain their rooms, disrupting the normal combat readiness of the grassroots units. Upon discovering this, the higher-level working group issued a severe reprimand.

Coincidentally, a cadre from the brigade, after being assigned as the commander of a leading company, learned that a headquarters research team planned to visit the company. He meticulously designed an “inspection plan” in advance. The result was a slick inspection plan, but daily work repeatedly failed to deliver.

The brigade’s Party Committee, after conducting an in-depth discussion of this phenomenon, concluded that the root cause was a misaligned view of performance among a few officers and men, who deliberately concealed issues. While seemingly diligent in their work, they engaged in deception and abandoned the fine tradition of seeking truth from facts.

To this end, the brigade focused its efforts internally, formulating and implementing “36 Measures for Strengthening Grassroots Units” and establishing a “Grassroots Suggestion Award.” At the brigade-wide handover meeting, brigade leadership solemnly emphasized that officers and men who provide reasonable suggestions to the headquarters and offer “golden ideas” for company development will be prioritized for annual commendations; those found whitewashing or making empty promises will be held accountable.

“Only when leaders are willing to listen to the truth can officers and men let go of their burdens and speak the truth,” the brigade’s Organization Department Chief told reporters. After the implementation of the “36 Measures for Grassroots Development,” grassroots companies have proactively reported over a hundred issues of various types. Over 30 of these suggestions have been researched and validated and incorporated into new company development initiatives. More than ten officers and men have been commended for their “golden ideas.”

At the same time, the brigade has conducted in-depth mass discussions on “seeking truth from facts and emancipating the mind,” organizing officers and men to study the glorious tradition of our Party and Army adhering to the principle of seeking truth from facts, educating and guiding officers and men to act in accordance with objective laws and further fostering a truth-seeking and pragmatic orientation. Some time ago, while conducting research at a certain company, Staff Officer Zhang from the brigade’s Operations and Training Department discovered that while the newly appointed Captain Zhou maintained rigorous training, the soldiers’ enthusiasm for training was low, and their performance hadn’t improved significantly.

After further investigation, Staff Officer Zhang discovered that Captain Zhou was somewhat overly eager for quick results in military training, copying the training methods implemented in his previous unit to this company. However, due to the different backgrounds of the soldiers in the two companies, this overly aggressive training approach dampened their enthusiasm.

“We must strive to do our best, act within our capabilities, and employ scientific methods—that is, to uphold a pragmatic approach to work.” At a Party branch meeting, Staff Officer Zhang pointedly pointed out the problem, to which Captain Zhou sincerely acknowledged the mistake. He subsequently adjusted his training approach accordingly.

Over time, the company’s training performance gradually improved, and the company’s overall performance ranked first in the battalion in the quarterly training assessment. Reflecting on this experience, Captain Zhou said with deep understanding: “Seeking truth from facts presupposes an accurate understanding of the situation and effective measures. Only by understanding the real situation can we find the right direction for improving our work.”

“Adjusting when we hear of mistakes is seeking truth from facts, as is “daring to innovate.”

Earlier this year, the brigade organized a training observation meeting. The demonstration covered some unmanned combat capabilities and required a professional leader to lead the training. However, the brigade lacked core professional talent. After careful investigation, Liang Shuang, a college graduate from a relevant major, came to the attention of brigade leaders. This recruit not only had a solid theoretical foundation but also demonstrated impressive professional training results.

However, during a mission meeting, an officer raised concerns: Observation meetings are a key unit task, and there’s no precedent for selecting a new recruit as a “coach.” What if something goes wrong?

“Whether there’s a precedent is different from whether the task can be completed. Professional matters should be left to professionals.” A brigade leader pointed out that professional shortcomings cannot be compensated by qualifications, and ignoring objective laws is a violation of seeking truth from facts. As expected, at the training observation meeting, Liang Shuang’s outstanding professional skills were highly recognized by leaders at all levels.

Today, the brigade is promoting a spirit of truth-seeking and pragmatism in all aspects of its military development. The promotion and appointment of cadres emphasizes public opinion before assessment. The brigade has shifted from the previous practice of evaluating training and exercise results based on experience to a digital evaluation using technology, eliminating the “water” of personal connections. Major project decisions are preceded by professional evaluations to prevent blind decisions at the source. When superiors improve their work style, the grassroots will see tangible results. This series of practical measures has helped officers and men focus their full attention and efforts on combat, propelling the comprehensive development of the military to a new level.

“Xunwu Investigation” and Seeking Truth from Facts

In January 1929, the main force of the Red Fourth Army advanced towards southern Jiangxi and western Fujian. Over a year, they consolidated and expanded the Red territory, growing and strengthening revolutionary forces. However, during this period, a serious phenomenon emerged within the Party: a disregard for investigation and research, an unwillingness to understand the actual situation, and a dogmatic adherence to Comintern resolutions and Soviet revolutionary experience, resulting in unnecessary losses. This deeply concerned Comrade Mao Zedong. In the first half of 1930, the Red Army successfully captured the county towns of Dayu, Nanxiong, Xinfeng, and Anyuan. On May 4th, Comrade Mao Zedong led the Second Column of the Red Fourth Army to Xunwu County. Accompanied by Gu Bo, Secretary of the Xunwu County Party Committee of the Communist Party of China, he conducted a detailed on-foot inspection of the county and held investigative meetings for over ten days, gathering a wealth of firsthand information. He gained a thorough understanding of the county’s production and prices of various products, the number and proportion of employees in various industries, the types of goods sold and their incomes in various shops, the amount of land distributed to farmers in various regions and their incomes, and the political attitudes of various groups of people. That same month, based on his personal experience with this and previous field investigations, he wrote “Oppose Book Worship” (originally titled “Investigation Work”), which prominently articulated the following statements: “No investigation, no right to speak” and “Oppose book worship.”

The Xunwu investigation played a crucial role in the systematic formation and development of Comrade Mao Zedong’s ideas on investigation and research, in his pioneering work on the Sinicization of Marxism, and in establishing the Chinese Communist Party’s ideological line of seeking truth from facts. The over 80,000-word “Xunwu Investigation,” based on this investigation, is Comrade Mao Zedong’s longest investigative report. In 1950, to guide the land reform

movement, he reread the “Xunwu Investigation” and personally revised the section titled “The Land Struggle in Xunwu.”

(Compiled by Chen Xiaonong, illustrations by Wang Ruihong)

Beyond knowing, we must also know the “Dao” (the Way).

■ Liu Hanyu

Seeking truth from facts is the fundamental requirement of our Party for understanding and transforming the world. It is the Party’s ideological line and its basic method of thinking, working, and leadership. The key to restoring and promoting the fine traditions of political work is to adhere to seeking truth from facts.

The importance of seeking truth from facts is undeniable. However, beyond knowing, we must also know the “Dao” (the Way). In reality, the lack of sustained and in-depth political training in some units stems from a failure to adhere to seeking truth from facts. Some practices that violate this principle stem from a lack of willingness or inability to do so. Therefore, pursuing the “Dao” (the Way) of seeking truth from facts is crucial. A solid foundation in Marxist theory is the theoretical basis for seeking truth from facts. History teaches us that without the guidance of scientific theory, work can easily fall into blindness, one-sidedness, and passivity, making it difficult to achieve truth from facts. A solid foundation in Marxist theory and practical investigation experience can help strengthen the principled, systematic, foresighted, and creative nature of work.

Strong Party character cultivation is the ideological foundation for seeking truth from facts. Judging from the current cadre landscape, adhering to the principle of seeking truth from facts primarily involves addressing Party character. Achieving truth from facts requires not only correct thinking and working methods but also the exceptional character of selfless dedication and disregard for personal gain and loss. Strong Party character leads to upholding truth, correcting errors, and conscientiously sharing the Party's concerns, fulfilling responsibilities for the country, and dedicating oneself to the people. This provides a strong guarantee for seeking truth from facts.

Adhering to seeking truth from facts and being pragmatic is the guarantee for a pragmatic approach. To achieve truth from facts, “seeking truth from facts” is the goal, while “being pragmatic” is the foundation. “A great man is not ostentatious; a gentleman is pragmatic.” If officers and men, especially leading cadres, always and everywhere insist on speaking the truth, taking practical measures, doing practical things, and seeking practical results, the principle of seeking truth from facts will be translated into tangible action in all departments and units.

Continuously emancipating the mind is an inherent requirement of seeking truth from facts. Emancipating the mind and seeking truth from facts are dialectically unified. Practice has fully demonstrated that only by emancipating the mind can we truly seek truth from facts; and only by seeking truth from facts can we truly emancipate the mind. Facing various foreseeable and

unforeseen contradictions and problems in our progress, we must continue to emancipate our minds, adhere to seeking truth from facts, be brave in reform and innovation, and never become rigid or stagnant. This will help us create a new situation in strengthening the military through in-depth study of new situations and the continuous resolution of new problems.

第 81 集团军某旅瞄准实战培养素质过硬的导调员队伍

来源：解放军报 作者：孙亚东 姜正旺 章志扬 责任编辑：王粲 2025-10-23

第 81 集团军某旅瞄准实战培养素质过硬的导调员队伍——

训练场有群“铁面判官”

■孙亚东 姜正旺 章志扬

秋高气爽，第 81 集团军某旅一场建制连战术训练拉开战幕.

风沙中，一架无人机盘旋侦察，红方侦察分队操纵手陈文杰紧盯电子屏幕，发现并锁定关键目标，立即向指挥员汇报坐标.

不料，导调员随即指出：“锁定目标为假目标，立即退出战斗序列！”原来，屏幕上的目标是蓝方布设的诱饵，这一误判导致红方关键位置暴露，遭到蓝方模拟火力覆盖.

笔者看到，这次训练不仅判罚严格，现场还特情险情频出. “通信节点遭电磁压制，处置不及时”“备用方案启动较慢，延误战机”……导调员下达的一道道指令，让官兵压力倍增、暴露不足.

“导调员必须是演训场规则的守护者，倒逼官兵练出能打胜仗的本领！”该旅领导告诉笔者，这群官兵眼中的“铁面判官”专挑软肋、专设难关，是推动从严从难训练的一支重要力量.

此前，该旅导调员数量有限、水平参差不齐，致使训练考评标准不一，难以全面评估战斗力水平. 新大纲进一步突出实战对抗，建设一支能力素质过硬、敢于较真碰硬的导调员队伍成为当务之急.

要当考场“判官”，须先成为训练高手. 经过调研，该旅系统梳理了导调工作的几类突出问题：职责不清、介入时机不准、特情设置僵化、评判标准模糊、数据支撑薄弱.

着眼问题，他们探索构建“培养+认证”机制，定期组织骨干集训与考核，要求持证才能上岗.

首批集训成员从各连懂指挥、善组训的骨干中遴选而出. 培训中，学员需轮流担任指挥员和导调员——前者设法突破险难，后者钻研如何精准“出题”、公正“判卷”. 角色互换，能让学员既掌握导调尺度，又深研对手战法，在接连不断的实战对抗中淬炼本领.

曾在比武中多次夺冠的某连二级上士麻雪威，初入导调集训队时，一时摸不到入门路径，设置的特情往往与实战需求脱节. 但他并未气馁，白天随教员剖析经典作战案例，晚上就和战友反复推演红蓝对抗导调方案.

一次实兵演习，麻雪威担任导调员时，灵活运用所学，设置通信遭到干扰等特情. 红方官兵在他设置的重重特情中临机应变，快速调整战术，经过艰苦奋战才突破困局完成任务. “只有自己先懂指挥、研透战法，才能导调出战场真情况，逼出战友过硬本领！”麻雪威感慨.

结合导调人才培养，该旅收集汇总各类战场新特情，建立起“特情库”，摒弃以往简单的“电台损坏”“道路被毁”等简单特情，加入电磁对抗等复杂情况，为“铁面判官”们提供了丰富考题素材.

刚结束一场高强度对抗训练，某连苏连长摘下头盔，汗珠顺着脸颊滑落. 训练过程中，导调员接连布设危局：电磁干扰骤然切断通信，小股“敌人”突袭侧翼，“敌”宣传品纷至沓来……特情接踵而至，战场态势瞬息万变，苏连长神经紧绷，凭借在以往战术训练中淬炼出的应变能力，迅速研判果断决策，紧前做好思想动员，随后带领一个排的兵力声东击西奇袭“敌”指挥所，最终全连惊险突围，完成战术目标. 他由衷感慨：“这些‘逼到绝境’的特情，是名副其实的‘磨刀石’！”

如今，一批批经过严格考核、持证上岗的新晋导调员，正活跃在该旅战术训练一线，倒逼官兵突破思维窠臼，在难局险局中谋对策、出奇招.

前不久一次集训中，一级上士胡跃斌与自己带教的导调员合力攻关，自制靶机代替传统信号，有效还原“敌机突袭”的场景. 受训部队在近似实战条件下接招应战，官兵们斗志昂扬灵活处置，锤炼了打仗本领.

An 81st Group Army Brigade Is Training a Highly Qualified Team of Commanders and Coordinators for Actual Combat.

Source: PLA Daily Author: Sun Yadong, Jiang Zhengwang, Zhang Zhiyang Editor: Wang Can 2025-10-23

A brigade of the 81st Group Army is training a highly qualified team of commanders and coordinators for actual combat.

A group of “iron-faced judges” stands at the training ground.

■Sun Yadong, Jiang Zhengwang, Zhang Zhiyang

A crisp autumn day marked the start of a tactical training exercise for a company within a brigade of the 81st Group Army.

Amidst the gusty sandstorm, a drone circled for reconnaissance. Chen Wenjie, the operator of the Red Army's reconnaissance unit, stared intently at the electronic screen. He spotted and locked onto a key target and immediately reported the coordinates to the commander.

Unexpectedly, the commander immediately pointed out, "The target you've locked onto is a decoy! Immediately withdraw from the battle sequence!" It turned out that the target on the screen was a decoy set by the Blue Army. This misjudgment exposed a key Red Army position, exposing it to simulated fire from the Blue Army.

This author observed that not only were the referees strictly disciplined during this training exercise, but there were also frequent and dangerous situations on the scene. "Communication nodes were electromagnetically suppressed, and timely action was not taken," "The backup plan was slow to activate, delaying the combat opportunity"... Each command issued by the commanders increased the pressure on the soldiers and exposed their shortcomings.

"Commanders must be the guardians of the training ground rules, forcing soldiers to develop the skills to win!" The brigade leader told the author. These "iron-faced judges," as the soldiers saw them, specifically targeted weaknesses and created challenges, making them a vital force in promoting rigorous and challenging training.

Previously, the brigade's limited number of commanders and their varying skills led to inconsistent training and assessment standards, making it difficult to comprehensively assess combat effectiveness. The new syllabus further emphasizes actual combat confrontation, making it imperative to build a team of commanders with strong capabilities and the courage to take tough measures.

To be a "judge" on the training ground, one must first be a master of training. After investigation, the brigade systematically identified several prominent issues in command and dispatch work: unclear responsibilities, inaccurate timing for intervention, rigid special situation settings, vague evaluation criteria, and weak data support. Focusing on these issues, they explored establishing a "training + certification" mechanism, organizing regular training and assessments for key personnel, requiring certification before taking up their posts.

The first batch of trainees was selected from key personnel from each company who were skilled in command and training. During the training, trainees took turns serving as commanders and coordinators—the former managing challenges while the latter delving into precise "setting" and impartial "grading." This role-swapping allowed trainees to master the principles of command and control while also deeply studying the tactics of their opponents, honing their skills through continuous real-world combat.

Ma Xuewei, a Second Sergeant from a certain company who had won numerous competitions, initially struggled to find his footing when he first joined the command and control training unit. The special situations he set up were often out of sync with actual combat requirements.

Undeterred, he spent his days analyzing classic combat cases with instructors and his nights repeatedly rehearsing red-blue confrontation command and control plans with his comrades.

During a live-fire exercise, Ma Xuewei, acting as coordinator, flexibly applied his training to create special situations such as communications jamming. The Red Army soldiers improvised and quickly adjusted their tactics in the face of numerous special situations he set up. After a grueling battle, they overcame the difficulties and completed the mission. “Only by understanding command and thoroughly studying tactics can one command and direct the true battlefield situation and force the best out of one’s comrades!” Ma Xuewei lamented.

In conjunction with the training of command and directing personnel, the brigade collected and compiled various new special battlefield situations, establishing a “special situation database.” This database, discarding simple special situations like “radio failure” and “road destruction,” now incorporates complex scenarios like electromagnetic countermeasures, providing a wealth of test material for the “iron-faced judges.”

Following a high-intensity confrontation training exercise, Captain Su of a certain company removed his helmet, beads of sweat streaming down his cheeks. During training, the commanders set up one dangerous situation after another: electromagnetic interference suddenly cut off communications, a small group of “enemy” raided the flank, and “enemy” propaganda was poured in... Special situations came one after another, and the battlefield situation was changing rapidly. Company Commander Su was on edge. Relying on the adaptability honed in previous tactical training, he quickly assessed and made decisive decisions, carried out ideological mobilization, and then led a platoon of troops to launch a surprise attack on the “enemy” command post from the east and west. Ultimately, the entire company broke through the encirclement and achieved its tactical objective. He said with heartfelt emotion: “These ‘extremely desperate’ special situations are truly ‘sharpening stones’!” Today, a group of new commanders who have passed rigorous assessments and obtained certificates are actively participating in the brigade’s tactical training. They force officers and men to think outside the box and devise countermeasures and unexpected strategies in difficult and dangerous situations.

During a recent training session, Sergeant First Class Hu Yuebin and the commanders he mentored worked together to solve a problem by using a custom-made target drone instead of traditional signals, effectively recreating the scene of an “enemy aircraft raid.” The trained troops responded to challenges under conditions close to actual combat. The officers and men were full of fighting spirit and handled the situation flexibly, which honed their combat skills.

陆军“风雷”飞行表演队以“钻石”图案通场.

观众驻足室内展馆参观.

开展搜索营救课目演示.

10 月 16 日至 19 日，以“开放创新，融合发展，培育新质生产力”为主题的第七届中国天津国际直升机博览会，在天津空港经济区举行.

本届直博会吸引了全球 30 余个国家和地区的近 400 家企业参展，首次设置“低空经济馆”，综合展现我国在新质生产力发展和低空经济领域取得的成绩.

陆军以静态展示、飞行表演和室内展览的形式参展，推出 14 型装备，包括陆航空突部队直升机、无人机及机载武器等现役主战装备. 同时，通过图文、视频等场景布设，展现了新时代陆军转型建设风采和陆航空突部队装备建设成果.

飞行表演作为直博会的标志性环节，由陆军“风雷”飞行表演队领衔. 高难度编队动作、单机特技飞行动作以及搜索营救、绕点回转等实战应用课目演示，为观众呈现了一场融合技术、艺术与力量的视觉盛宴. 此外，广受关注的直-20T 直升机飞行表演亮点纷呈，尽显优越动力性能和灵活操纵性能，给观众留下深刻印象.

The Army’s “Fenglei” flight demonstration team performed the “Four-Aircraft Blossom” aerobatic maneuver.

The Z-20T helicopter released jamming flares during the flight display.

The Army’s “Fenglei” flight demonstration team flew a “diamond” pattern.

Audience members stopped to explore the indoor exhibition hall.

A search and rescue demonstration was conducted.

From October 16th to 19th, the 7th China Tianjin International Helicopter Expo, themed “Open Innovation, Integrated Development, and Cultivating New Productivity,” was held in the Tianjin Airport Economic Zone. This year’s Helicopter Expo attracted nearly 400 exhibitors from over 30 countries and regions. The expo featured a “Low-Altitude Economy Pavilion” for the first time, showcasing my country’s achievements in developing new productivity and the low-altitude economy.

The Army showcased 14 types of equipment, including helicopters, drones, and airborne weapons from the Army’s air assault force, through static displays, flight demonstrations, and indoor exhibitions. The exhibits showcased the Army’s transformation and development in the new era, as well as the achievements of the Army’s air assault force equipment development, through graphic, text, and video presentations.

The flight demonstrations, a hallmark of the Helicopter Expo, were led by the Army's "Fenglei" flight demonstration team. Demonstrations of challenging formation maneuvers, individual aerobatic maneuvers, and practical application exercises such as search and rescue and point-to-point turns presented the audience with a visual feast that blended technology, artistry, and power. Furthermore, the highly anticipated Z-20T helicopter's flight demonstrations were a dazzling display, showcasing its superior power performance and agile maneuverability, leaving a deep impression on the audience.

第七届中国天津国际直升机博览会：中国"智造"托举铁翼飞旋

来源：中国军网-解放军报 作者：李岩 责任编辑：徐占虎 发布：2025-10-24

旋翼轰鸣中的时代回响

■解放军报记者 李 岩

10 月 20 日下午，伴随着最后一场飞行表演结束，停机坪渐归平静，第七届中国天津国际直升机博览会落下帷幕.

这场以"开放创新，融合发展，培育新质生产力"为主题的盛会，不仅为人们献上了一场场精彩的空中飞行特技表演，更是交出了一份我国直升机产业从"跟跑"到"领跑"的时代答卷.

直升机拉出的一缕缕彩烟还未散尽，观众们挥舞五星红旗的情景还清晰地刻在脑海中. 此时此刻回味本届天津直博会，记者发现，在现场听到最多的词语就是"震撼"与"自豪".

尽管深秋的津门大地已有些许寒意，但丝毫没能影响人们的观展热情. 据主办方介绍，每天 2 万张的参观票开售即被一抢而空，很多观众尤其是一些军迷以及摄影爱好者，早早就来到现场. 他们带着专业设备在前排蹲守，只为近距离一睹战鹰的雄姿.

在人群中，79 岁的马松林抑制不住内心喜悦，端着相机的手竟有些颤抖.

"57 年前我曾参军入伍，几十年来见证了部队发展壮大的坚实脚步，我为人民军队的今天感到自豪. "当直-20T 凌空释放出干扰弹，弹焰映照下，马松林的双眼微润.

在现场，记者看到许多父母带着孩子前来观展. 铁翼飞旋，承载着的不仅是老一辈人的希望与梦想，也为下一代埋下了强国强军的种子.

担负飞行表演解说工作的李欣然是陆军培养的首批女飞行员之一. 她告诉记者："看到许多小朋友、大朋友向我们招手，我感到很荣幸. 这是一种激励，更让我感到了一种责任. "

作为国家级直升机专业展会，天津直博会自 2011 年首届举办以来，始终是中国航空工业发展的"晴雨表". 从首届展会上国产直升机的首次集中亮相，到 2019 年直-20 国际航展首

秀的“惊艳登场”，再到如今直-20T、旋戈-600 等新装备的“集群现身”；从最初依赖进口发动机的“卡脖子”困境，到如今多领域核心技术的自主突破，十几年间的 7 届展会，恰似一部浓缩的中国直升机产业发展史，每一页都有着“自主创新”的印记.

据组委会统计，为期 4 天的展会吸引了约 7 万人次观展，来自 30 余个国家的近 400 家企业参展，聚焦低空经济、无人协同等前沿领域，举办了近 20 场国际合作论坛. 这届拥有 16 万平方米展区的展会，已然成为国际社会观察我国航空实力的重要窗口.

这是一次强军成果的震撼亮相，也是一次航空制造的自主宣言，还是一次低空产业的未来畅想. 旋翼的轰鸣声虽已远去，但它留下的启示愈发明晰：中国航空的自强，从来不是“单点突破”的偶然，而是“理念引领、制造支撑、创新赋能”的必然；天津直博会的舞台，也不仅仅是“装备秀场”，而是中国航空与世界对话、与未来牵手的桥梁. 相信这份“自强答卷”能催生出更强动力，托举着国防安全与经济发展之双翼，飞向更加高远的天空.

解放军报记者带您走进第七届中国天津国际直升机博览会——

中国“智造”托举铁翼飞旋

大型水陆两栖飞机 AG600 飞行表演.

10 月 16 日清晨，中国航空工业集团天津民用直升机产业基地内人头攒动. 随着武装直升机的旋翼搅动气流，陆军“风雷”飞行表演队的 7 机编队拖着彩烟掠过天际，第七届中国天津国际直升机博览会的大幕正式拉开.

这场以“开放创新，融合发展，培育新质生产力”为主题的盛会，在 16 万平方米的展区里，汇聚了 30 余个国家近 400 家企业研制的 52 架航空器，也描绘出中国直升机产业蓬勃发展的喜人图景.

从战鹰列阵的震撼表演到核心部件的自主突破，从军用直升机的实战化展示到低空经济的产业化落地，中国“智造”正在更加广阔的天地中，书写着航空强国的新篇章.

新老战鹰列阵：展现体系作战进阶之路

在飞行观摩区人们的欢呼声中，展示垂直爬升动作的直-20T 快速上升，稳健灵动. 突然，直-20T 释放出一排排干扰弹，弹焰和弹迹瞬时在蓝天上绘出醒目的弧线. 这是直-20T 首次亮相中国天津国际直升机博览会（以下简称“天津直博会”），一系列特技飞行动作，充分展示出它的飞行稳定性与机动能力.

“直-20T 的研制成功，填补了我国直升机谱系‘攻运结合’能力上的空白. ”航空工业直升机所副总师朱敏峰介绍说.

据悉，与直-20 相比，直-20T 变得更加多能. 其机身两侧增加了一对短翼，短翼上有 4 个挂点，除了可以用来挂载各型空地导弹、火箭发射巢，携带霹雳 90 这样的空空导弹外，还可以加挂电子战干扰吊舱，提升战场生存能力，或者携带副油箱增加航程. 直-20T 机身前

侧配备了大型光电瞄准设备，可支持更多模式的搜索和制导，应对更为复杂多变的战场环境.

“表演队的飞行特技不是单纯的‘炫技’. ”“风雷”飞行表演队的相关负责人介绍，“专业化的飞行表演是探索技战术的有效途径，可为陆航部队提高实战化训练水平和作战能力提供思路. ”

“这套空中动作每个细节都源自实战需求. ”刚结束直-20T 飞行表演的飞行员张骞向记者介绍说. 拥有 4000 多小时安全飞行记录的他，当天完成了悬停回转、跃升倒转等多个高难度课目. “刚才的跃升倒转，就是国际上所说的‘莱维斯曼机动’，在实战中能让直升机快速转换攻击方向，对目标实施连续打击. ”

“随着直升机越来越先进，我们将挑战更多具有实战意义的高难度动作. ”张骞自豪地说.

除了初次亮相的“新面孔”，记者在展会现场还遇到了不少“老朋友”，从中国自主研制的第一架直升机——直-5，到自主研制的直-9 系列直升机，再到以直-9 为基础研制的武装直升机——直-19，以及直-20 战术通用直升机、直-8L 运输直升机等. 这些新老机型的集中呈现，展现着我国直升机的进阶发展之路.

连续参加 5 届天津直博会，飞行员牛超对我军陆航部队这 10 年间的装备发展进程深有感触. 他表示，中国“智造”为部队提供了更多新型先进装备，推动了陆航部队战斗力大幅提升.

本届天津直博会，航空工业馆在布展时突出了体系作战概念. 在直-10ME 前，航空工业集团的展台讲解员林子钰向记者介绍说：“它可以与直-9、直-11、直-20 等多种机型构成纵深打击梯队，协同旋戈系列无人机形成精准打击、攻防兼备的作战体系. ”

发动机“扎堆”：动力装置研发实现新跨越

“双机对冲”飞行表演中，2 架直-10 从跑道两端上空 10 余米的高度快速相向机动飞行，以每小时 180 公里的时速擦肩而过. 精彩的表演，引发阵阵叫好声.

驾驶直-10 的飞行员刘波表示，能驾驶这型性能强大的直升机，他十分自豪. 而该机强大性能的背后，是其内部装配着我国自主研制的先进发动机.

走进室内展区，记者看到，中国航空发动机集团（以下简称“中国航发”）的展区前围满了参观者. 据了解，本届天津直博会上，中国航发携 1100 千瓦级发动机、涡轴-16 发动机、AES20发动机、氢燃料发动机、混电推进系统等多型先进直升机动力装置参展，多角度、全方位展示中国航发在直升机领域的创新突破与硬核实力.

作为飞机的“心脏”，航空发动机被誉为现代工业“皇冠上的明珠”，是国家科技实力和创新能力的重要体现.

1100 千瓦级发动机是中国航发自主研制的先进涡轴发动机，采用组合压气机、回流燃烧室、附件传动单元体等设计，结构紧凑轻巧、性能优越，拥有振动监测、寿命管理等功能，适用于 6 吨级的直升机.

民用直升机动力领域的突破同样亮眼. 涡轴-16 发动机的展台前，一同展示着由中国民用航空局颁发的型号合格证与生产许可证. 这款发动机功重比高、油耗低，已批量交付 AC352 中型民用直升机使用，打破了 7～8 吨级双发直升机动力装置依赖进口的局面. 旁边的 AES20 发动机，400 千瓦级的功率可适配 700～1200 公斤级轻型直升机，油耗比国外一些同类产品更低，具有较强的国际市场竞争力.

面向未来的绿色动力展区，兆瓦级氢燃料发动机散发着蓝色光晕. “这是国内首款实现 100%燃料掺氢的航空发动机. ”中国航发专家李韬介绍，本次展出的兆瓦级航空混合动力系统输出能量形式为电能，可用于 3 至 8 吨级电动垂直起降飞行器（eVTOL）和 10 至 20 吨级分布式电推进通航飞机，具有功率密度高、安全性好、低排放等特点，可为发展低空经济提供零排放的动力解决方案.

作为发动机与旋翼之间的“动力桥梁”，传动系统同样在迈向全面自主化. AC352 中型民用直升机的尾传动系统模型展示着内部精密结构，中间减速器、尾部减速器和传动轴组件形成高效的动力传输链，功重比达到国际先进水平. 据了解，AC313A、AC332 直升机尾传动轴的研制生产采用了精密铝合金管轴加工、管材无损检测、尾轴精密动平衡等关键技术，产品技术成熟可靠，目前已批量装机交付.

此外，中国航发还展出了多种精密零部件，集中展示了新技术、新材料以及高性能、高可靠性产品在航空动力领域的应用.

“从发动机到传动系统，从核心部件到材料工艺，我们已构建起全链条自主研制能力. ”中国航发相关负责人透露，目前国产动力系统已覆盖国内全部军民用直升机型号，且批量出口国际市场.

多型飞行器“首秀”：新质生产力助力低空经济腾飞

在本届天津直博会首次设立的低空经济馆内，多架造型别致的无人飞行器引人注目，参观者纷纷坐进一些“未来飞行器”内感受科技的魅力.

此次展会中，包括航空工业集团 HH100、亿航智能 EH-216S、零重力 RX1E 在内的多型低空飞行器首次展出. 这些科技感、未来感兼具的新型航空器，展现出发展低空经济的无限可能.

低空经济，这种新的经济形式，伴随着飞行器的形态革新而生，关乎未来生活方式的巨大改变. 航空救援、无人机配送、工业巡检、观光旅游……低空经济当前正步入快速发展期，开始释放科技发展的红利.

2024 年，低空经济首次写进我国政府工作报告. 据中国民航局预测，2025 年我国低空经济市场规模将达 1.5 万亿元，2035 年有望突破 3.5 万亿元.

随着低空经济的蓬勃发展，电动垂直起降飞行器热度持续走高. 在 10 月 16 日举办的民机销售集中签约活动中，由中国航空工业集团带来的国产首款重载电动垂直起降飞行器 AR-E800 斩获 20 架确认订单、140 架意向订单，成为备受关注的“签约冠军”.

“AR-E800 是集团公司第一款以商业销售为目标打造的 eVTOL 产品. ”AR-E800 项目负责人苗德建介绍道. 该项目团队在市场调研时发现，山区电网铁塔建设、基建工程材料吊装、农产品运输以及景区常态化物资补给等场景，对高载重、强适应性运输平台的需求十分迫切.

“eVTOL 一定会在低空经济中占据重要地位. ”苗德建表示，“我们也将持续根据市场需求与技术发展水平对产品进行升级，让更多产品飞进市场，服务民生. ”

近年来，航空工业集团贯彻落实国家发展低空经济的战略部署，发挥技术优势，加快布局 eVTOL 产业新赛道，推出多型产品. 本届展会开幕首日，航空工业集团就与各方签订了 193 架此类机型的意向及确认合同，涵盖有人直升机、无人装备等多个品类，同时发布了 AR-600、AR-2000 两款无人直升机新产品.

这不仅仅是订单的增长，更是产业信心的体现. 最新发布的《民用直升机中国市场预测年报（2025—2034）》预计，到 2029 年，我国民用直升机机队规模将突破 1700 架，飞行量将超过 30 万小时.

除了各类飞行器的展出，记者特别注意到首次亮相天津直博会的全国首个省级低空飞行服务平台. 据相关负责人郭炜介绍，该平台将对天津市低空飞行进行统筹管理，助推该市低空经济高效发展.

本届天津直博会上，国际化合作同样亮点纷呈，专业交流活动成果丰硕. “2025 中国直升机发展论坛”“京津冀低空经济协同发展研讨会”等高端论坛，汇聚国内外行业专家，把脉产业前沿. 一位参加天津直博会的外方代表感慨：“今年的展会规模更大、技术更前沿，中国企业在自主创新上的突破令人震撼. ”

从直-5 的艰难起步，到直-20T 的现身蓝天；从依赖进口发动机，到氢燃料动力尖端技术领域的自主突破；从单一机型的展示，到低空经济的发展及展现出的宏大图景，本届天津直博会不仅是一次装备迭代的展示，更是中国“智造”书写的时代答卷.

在旋翼的轰鸣声中，我国航空工业正以自强创新为笔，描绘着国防安全与经济发展协同推进的壮丽图景.

The 7th China Tianjin International Helicopter Expo: China's "Smart Manufacturing" Lifts Helicopters to Soar

Source: China Military Network - People's Liberation Army Daily Author: Li Yan Editor: Xu Zhanhu Published: 2025-10-24

Echoes of the Era in the Roar of Rotors

■ People's Liberation Army Daily Reporter Li Yan

On the afternoon of October 20th, with the conclusion of the final flight show and the gradual return of calm to the tarmac, the 7th China Tianjin International Helicopter Expo came to a close.

This grand event, themed "Open Innovation, Integrated Development, and Cultivating New Productivity," not only presented a series of spectacular aerial stunts but also demonstrated the transformation of my country's helicopter industry from a "follower" to a "leader."

The plumes of colorful smoke from the helicopters have yet to dissipate, and the image of the audience waving the five-star red flag is still vividly etched in our minds. Reflecting on the Tianjin Helicopter Expo, this reporter notes that the words most frequently heard at the event were "shocking" and "proud." Despite the chill of late autumn in Tianjin, it didn't dampen the crowds' enthusiasm for the exhibition. According to organizers, the 20,000 daily tickets sold out as soon as they went on sale. Many visitors, especially military enthusiasts and photography enthusiasts, arrived early. They staked out their seats in the front rows, armed with their professional equipment, just to get a close-up glimpse of the warplanes' majestic majesty.

Among the crowd, 79-year-old Ma Songlin couldn't contain his joy; his hands trembled as he held his camera.

"I joined the army 57 years ago. Over the past few decades, I've witnessed the army's steady growth and development. I'm proud of the People's Army today." As the Z-20T aircraft released jamming flares, Ma Songlin's eyes moistened slightly in the shimmering flames.

At the scene, reporters saw many parents and their children visiting the exhibition. The soaring wings carried not only the hopes and dreams of the older generation but also sowed the seeds for a strong nation and a strong military for the next generation.

Li Xinran, who was responsible for the flight performance commentary, was one of the first female pilots trained by the Army. She told reporters, "I feel honored to see so many children and adults waving to us. It's inspiring, but also gives me a sense of responsibility."

As a national-level professional helicopter exhibition, the Tianjin Helicopter Expo has served as a barometer of China's aviation industry development since its inaugural event in 2011. From the first concentrated display of domestically produced helicopters at the inaugural expo, to the

stunning debut of the Z-20 at the 2019 International Airshow, to the current clustered appearance of new aircraft like the Z-20T and the Xuan Ge-600; from the initial bottleneck of relying on imported engines to the current breakthroughs in core technologies across multiple fields, the seven expos over the past decade or more are like a condensed history of China's helicopter industry development, each page bearing the mark of independent innovation.

According to the organizing committee, the four-day expo attracted approximately 70,000 visitors, with nearly 400 companies from over 30 countries participating. The expo focused on cutting-edge fields such as the low-altitude economy and unmanned collaborative aircraft, and hosted nearly 20 international cooperation forums. This exhibition, with a 160,000-square-meter exhibition area, has become a crucial window for the international community to observe my country's aviation prowess.

It was a stunning showcase of the achievements of a strong military, a declaration of independence in aviation manufacturing, and a vision of the future of the low-altitude industry. Although the roar of the rotors has faded, the lessons it left behind are becoming increasingly clear: China's aviation self-reliance has never been the result of a single breakthrough, but rather the inevitable result of "ideological guidance, manufacturing support, and innovation empowerment." The Tianjin Helicopter Expo is more than just an equipment showcase; it is a bridge for China's aviation industry to engage with the world and embrace the future. I believe this "self-reliance" will generate even greater momentum, carrying the wings of national defense, security, and economic development to soar even higher.

A PLA Daily reporter takes you on a journey through the 7th China Tianjin International Helicopter Expo—

China's "Intelligent Manufacturing" Lifts Iron Wings to Soar

■ PLA Daily reporter Li Yan

The Army's "Fenglei" aerobatic team performs a flight demonstration.

The Army's "Fenglei" aerobatic team performs a flight demonstration.

The Army's "Fenglei" aerobatic team performs a flight demonstration.

A large amphibious aircraft, the AG600, performed a flight demonstration.

On the morning of October 16th, the Tianjin Civilian Helicopter Industrial Base of the Aviation Industry Corporation of China (AVIC) was bustling with activity. As the rotors of armed helicopters stirred the air, a seven-plane formation from the Army's "Wind and Thunder" aerobatic team streaked across the sky, trailing a trail of colored smoke. The curtains officially opened on the 7th China Tianjin International Helicopter Expo.

This grand event, themed "Open Innovation, Integrated Development, and Cultivating New Productivity," showcased 52 aircraft developed by nearly 400 companies from over 30 countries

across its 160,000 square meter exhibition area, painting a rosy picture of the booming development of China's helicopter industry.

From the stunning display of warplanes to the domestically developed breakthroughs in core components, from the combat-ready demonstrations of military helicopters to the industrialization of the low-altitude economy, China's "intelligent manufacturing" is writing a new chapter in its journey to becoming an aviation powerhouse in an ever-expanding landscape. A lineup of new and veteran fighter jets showcases the advancement of systemic combat.

Amid cheers from the crowd in the flight observation area, the Z-20T, demonstrating a vertical climb, soared swiftly and gracefully. Suddenly, the Z-20T released rows of jamming flares, their flames and trails drawing striking arcs across the blue sky. This marked the Z-20T's debut at the China Tianjin International Helicopter Expo (hereinafter referred to as the "Tianjin Helicopter Expo"), where a series of aerobatic maneuvers fully demonstrated its flight stability and maneuverability.

"The successful development of the Z-20T fills a gap in my country's helicopter portfolio in terms of 'combined attack and transport' capabilities," said Zhu Minfeng, deputy chief engineer of the Aviation Industry Corporation of China Helicopter Research Institute.

It is reported that compared to the Z-20, the Z-20T has become more versatile. A pair of stub wings have been added to its fuselage, each with four hardpoints. In addition to being able to mount various air-to-ground missiles, rocket launchers, and air-to-air missiles like the PL-90, it can also carry electronic warfare jamming pods to enhance battlefield survivability and auxiliary fuel tanks to extend its range. The front of the Z-20T fuselage is equipped with a large electro-optical aiming device, which supports a wider range of search and guidance modes, enabling it to cope with more complex and changing battlefield environments.

"The team's acrobatic performances are more than just a show of skill," said a representative of the "Fenglei" flight demonstration team. "Professional flight demonstrations are an effective way to explore technical and tactical techniques, and can provide insights for improving the Army Aviation Corps' combat training and operational capabilities."

"Every detail of this aerial maneuver is based on actual combat requirements," pilot Zhang Qian, who had just completed a Z-20T flight demonstration, told reporters. With over 4,000 hours of safe flight experience, he completed several challenging maneuvers that day, including hovering turns and a jump and inversion. "The jump and inversion I just did is what's known internationally as the 'Levi'sman maneuver,' which, in actual combat, allows the helicopter to quickly change attack direction and deliver continuous strikes on targets."

"As helicopters become increasingly advanced, we will challenge ourselves to perform more challenging maneuvers with real combat significance," Zhang Qian said proudly. In addition to the "new faces" making their debut, reporters also encountered many "old friends" at the exhibition, from China's first independently developed helicopter, the Z-5, to the independently developed Z-

9 series helicopters, the Z-19 armed helicopter developed based on the Z-9, as well as the Z-20 tactical general-purpose helicopter and the Z-8L transport helicopter. The concentrated display of these new and old models showcases the progressive development of my country's helicopter industry.

Having participated in five consecutive Tianjin Helicopter Expos, pilot Niu Chao was deeply impressed by the equipment development progress of the PLA Army Aviation Corps over the past decade. He stated that China's "intelligent manufacturing" has provided the troops with more new and advanced equipment, significantly boosting the combat effectiveness of the Army Aviation Corps.

At this year's Tianjin Helicopter Expo, the Aviation Industry Pavilion highlighted the concept of system warfare in its exhibition layout. In front of the Z-10ME, Lin Ziyu, an exhibitor at the Aviation Industry Corporation of China (AVIC), explained to reporters, "It can form a deep strike echelon with various aircraft models, including the Z-9, Z-11, and Z-20, and coordinate with the Xuan Ge series of unmanned aerial vehicles to form a precision strike, offensive, and defensive combat system."

Engine Clusters: Power Plant R&D Achieves a New Leap Forward

During the "Dual-Aircraft Counterattack" flight demonstration, two Z-10s rapidly maneuvered toward each other from an altitude of over 10 meters above either end of the runway, passing each other at a speed of 180 kilometers per hour. The spectacular performance drew rounds of applause.

Z-10 pilot Liu Bo expressed his pride in flying this powerful helicopter. Behind its powerful performance lies the advanced engine independently developed by my country.

Entering the indoor exhibition area, reporters saw the Aero Engine Corporation of China (AECC) booth crowded with visitors. At this year's Tianjin Helicopter Expo, AECC exhibited a variety of advanced helicopter propulsion systems, including 1100 kW engines, the WS-16 engine, the AES20 engine, hydrogen fuel cells, and hybrid-electric propulsion systems. These exhibits showcased AECC's innovative breakthroughs and core strength in the helicopter sector from multiple perspectives and in all aspects.

As the "heart" of an aircraft, aircraft engines are hailed as the "crown jewel" of modern industry and a crucial reflection of a nation's scientific and technological strength and innovation capabilities.

The 1100 kW engine, an advanced turboshaft engine independently developed by AECC, features a combined compressor, a recirculating combustion chamber, and an accessory transmission unit. It boasts a compact and lightweight structure, superior performance, and features vibration monitoring and lifecycle management capabilities, making it suitable for helicopters in the 6-ton class.

Breakthroughs in the civil helicopter propulsion sector were equally impressive. The WS-16 engine's type certificate and production license, issued by the Civil Aviation Administration of China, were displayed alongside the WS-16 engine's booth. This engine boasts a high power-to-weight ratio and low fuel consumption. It has been mass-delivered to the AC352 medium-sized civil helicopter, breaking the reliance on imported power units for twin-engine helicopters in the 7-8 ton class. The adjacent AES20 engine, with its 400-kilowatt power rating, is suitable for light helicopters weighing 700-1200 kilograms. Its fuel consumption is lower than similar foreign products, making it highly competitive in the international market.

In the future-oriented green power exhibition area, a megawatt-class hydrogen fuel cell engine emanated a blue halo. "This is China's first aircraft engine to achieve 100% hydrogen blending," explained Li Tao, a Chinese aerospace expert. The megawatt-class aviation hybrid power system on display outputs electricity and can be used in electric vertical take-off and landing vehicles (eVTOLs) in the 3-8 ton class and distributed electric propulsion general aviation aircraft in the 10-20 ton class. It boasts high power density, excellent safety, and low emissions, providing a zero-emission power solution for the development of the low-altitude economy.

Serving as the "power bridge" between the engine and the rotor, the transmission system is also moving towards full autonomy. A model of the tail drive system of the AC352 medium-sized civilian helicopter showcases its sophisticated internal structure. The intermediate reducer, tail reducer, and drive shaft assembly form an efficient power transmission chain, achieving an internationally advanced power-to-weight ratio. The development and production of the AC313A and AC332 helicopter tail drive shafts utilize key technologies such as precision aluminum alloy tube machining, non-destructive testing of tubes, and precision dynamic balancing of tail shafts. The products are technically mature and reliable, and have already been installed and delivered in batches.

In addition, AECC exhibited a variety of precision components, showcasing the application of new technologies, new materials, and high-performance, high-reliability products in the aviation power sector.

"From engines to transmission systems, from core components to material processing, we have established comprehensive independent R&D capabilities," an AECC representative revealed. Domestically produced power systems now cover all domestic military and civilian helicopter models and are exported in batches to the international market. Multiple Aircraft Debut: New Productivity Fuels the Low-Altitude Economy's Takeoff

In the Low-Altitude Economy Pavilion, established for the first time at this year's Tianjin Helicopter Expo, several uniquely designed unmanned aerial vehicles (UAVs) attracted attention, and visitors flocked to experience the charm of technology aboard some of these "future aircraft."

At the expo, a variety of low-altitude aircraft, including the Aviation Industry Corporation of China's HH100, the EHang Intelligent EH-216S, and the Zero Gravity RX1E, made their debut.

These new aircraft, embodying both technological and futuristic qualities, demonstrate the boundless potential of developing the low-altitude economy.

The low-altitude economy, a new economic form, has emerged alongside innovative aircraft designs and is poised to significantly transform future lifestyles. Applications include air rescue, drone delivery, industrial inspections, and tourism... The low-altitude economy is currently entering a period of rapid development, beginning to reap the dividends of technological advancement.

In 2024, the low-altitude economy was included in my country's Government Work Report for the first time. According to the Civil Aviation Administration of China (CAAC), the market size of my country's low-altitude economy will reach 1.5 trillion yuan in 2025 and is expected to exceed 3.5 trillion yuan by 2035.

With the booming low-altitude economy, interest in electric vertical take-off and landing (EVTL) aircraft continues to grow. At a civil aircraft sales signing event held on October 16th, the AR-E800, China's first domestically produced heavy-load EVTL aircraft, brought by the Aviation Industry Corporation of China (AVIC), secured 20 confirmed orders and 140 intention orders, becoming the highly anticipated "Signing Champion."

"The AR-E800 is the group's first eVTOL product designed for commercial sales," said Miao Dejian, AR-E800 project leader. Market research by the project team revealed an urgent need for high-load, highly adaptable transport platforms in applications such as power grid tower construction in mountainous areas, lifting materials for infrastructure projects, transporting agricultural products, and routinely supplying scenic areas.

"eVTOL will undoubtedly occupy a significant position in the low-altitude economy," said Miao Dejian. "We will also continue to upgrade our products based on market demand and technological advancements, bringing more products to market and serving the people."

In recent years, the Aviation Industry Corporation of China (AVIC) has implemented the national strategic plan for developing the low-altitude economy, leveraging its technological advantages to accelerate its expansion into the new eVTOL industry and launch a wide range of products. On the first day of this year's expo, the AVIC signed letters of intent and confirmation contracts for 193 eVTOL aircraft, covering a range of categories, including manned helicopters and unmanned systems. The company also released two new unmanned helicopters, the AR-600 and AR-2000.

This represents not only an increase in orders but also a reflection of industry confidence. The recently released "China Civil Helicopter Market Forecast Annual Report (2025-2034)" predicts that by 2029, my country's civil helicopter fleet will exceed 1,700 units, with flight hours exceeding 300,000.

In addition to the various aircraft on display, reporters particularly noted the debut of the nation's first provincial-level low-altitude flight service platform at the Tianjin Helicopter Expo. According

to Guo Wei, the relevant person in charge, the platform will coordinate the management of low-altitude flights in Tianjin and promote the efficient development of the city's low-altitude economy.

This year's Tianjin Helicopter Expo also featured numerous highlights of international cooperation, with fruitful professional exchange activities. High-level forums such as the "2025 China Helicopter Development Forum" and the "Beijing-Tianjin-Hebei Low-altitude Economy Coordinated Development Seminar" brought together domestic and international industry experts to discuss the industry's cutting-edge trends. A foreign representative attending the Tianjin Helicopter Expo remarked, "This year's exhibition is larger in scale, with more cutting-edge technology. The breakthroughs made by Chinese companies in independent innovation are astounding."

From the difficult beginnings of the Z-5 to the debut of the Z-20T; from reliance on imported engines to independent breakthroughs in cutting-edge hydrogen fuel cell technology; from the display of a single aircraft model to the development of the low-altitude economy and the grand vision it presents, this Tianjin Helicopter Expo is truly remarkable.

The event was not only a showcase of equipment evolution, but also a testament to China's "intelligent manufacturing" approach to the times.

Amid the roar of rotorcraft, my country's aviation industry, driven by self-reliance and innovation, is painting a magnificent picture of the coordinated advancement of national defense, security, and economic development.

军营观察丨一支功勋连队的“荣誉之战”

来源：解放军报 作者：郎子聪 李琳 等 责任编辑：王粲 2025-10-28 06:41:47

走进第 80 集团军某旅“红五连”，这里似乎和其他连队没有区别：整齐划一的内务，铿锵有力的呼号……

然而，走进荣誉室，满目的红色让记者精神为之一振. 整整 11 面荣誉战旗静静悬挂：“精忠排”“清江英雄部队”“战斗勇敢”“进军千里”“突破临津江英雄班”……每面战旗都是浴血战斗的铭记，都是先辈用生命锻造的荣光.

连长李金泽介绍，“红五连”前身为中国工农红军第 2 师机炮连，1933 年 6 月组建于江西省吉安市永丰县，历经土地革命战争、抗日战争、解放战争、抗美援朝战争百余场战斗洗礼，铸就了“闻战则喜，所向披靡”的不朽连魂.

连队历史绵延，至今已 92 载. 而如今，连队官兵平均年龄仅 24 岁. 和官兵聊起连队历史，记者强烈感受到年轻官兵对连队厚重荣誉的珍视，也看到了他们的压力与思考——

一边是战旗上赫赫威名带来的自豪感，一边是新装备迭代带来的本领恐慌；一边是连史中精神土壤的滋养，一边是现代信息流对老传统老经验的冲击.

英雄连队的官兵，如何赓续荣光，在属于自己的历史篇章中创造不凡业绩？于是，一场新时代的“荣誉之战”，在压力与思考中展开.

一支功勋连队的“荣誉之战”

一场比武遇冷暴露的思想包袱——

不能让荣誉成了官兵“不可承受之重”

指导员崔健记得，一年前他从机关接到任职命令，第一次走进“红五连”，就遇到了一件匪夷所思的事情.

全旅进行群众性练兵比武竞赛，五连竟然没人报名.

一番了解过后，崔健听到了战士们的心里话：“指导员，我怕上场万一失误了，给‘红五连’抹黑……”

“沉甸甸的荣誉，竟然成了沉甸甸的负担. ”崔健深感意外，“连队 2 次荣立集体一等功、7 次荣立集体二等功、18 次荣立集体三等功. 没想到因为格外珍惜荣誉，部分官兵竟背上了思想包袱. ”

不能让荣誉成了官兵“不可承受之重”. 怎么办？连队干部们寻找着破解方法.

很快迎来一个契机，旅、营、连三级联动开展专业大比武. 连队组织选拔，下士程扬以较大优势脱颖而出. 可没想到，他找到连长和指导员：“大比武高手如云，我能行吗？”

连长、指导员没有简单地给他打气，而是借机把连队当月的战斗精神教育课安排到了荣誉室.

“程扬，你说说‘精忠排’这面战旗的由来. ”

“1943 年初，日军对盐阜地区进行大扫荡. 我连在‘反扫荡’战斗中英勇顽强，3 排战士在指导员王恩祥带领下，面对强敌毫不畏惧，战至弹尽粮绝后，与敌展开肉搏战，击毙击伤 70 余名敌人，全排壮烈牺牲. 战斗结束后，3 排被授予‘精忠排’荣誉称号. ”

作为“红五连”一员，下连第一站到连队荣誉室，第一课讲连队光荣传统，第一首歌唱的是连歌，每月还坚持战史战例学习，程扬和战友们对这段辉煌历史如数家珍.

“那时的连队先辈，为了完成任务，战斗到全部牺牲，他们有退缩的吗？如今，面对比武，我们有退缩的余地吗？”

那堂课，大家围绕“荣誉是拼出来的，还是保出来的”畅所欲言. “一个荣誉等身的连队，就像体育场上曾经的冠军. 如果抱着‘守’的心态，比赛必然畏手畏脚、患得患失. 只有放开手脚、奋力拼搏，才有再次登顶的可能. ”

不少战士若有所思，程扬更是被深深触动. 他没再说什么，自己主动加练. 后来，在比武中，他一举夺得全营第一的好成绩，荣立三等功.

载誉归来，程扬的照片被悬挂在连队一楼门厅旁的墙上. 以此为例，连队党支部在全连展开“荣誉观”大讨论，激励官兵争创新的荣誉.

记者注意到，这面墙上，“铸红军魂、建精锐连”8 个大字下，不仅有官兵立功受奖的照片，还有“龙虎榜”“攻关榜”等内容.

对此，崔健说，让大家放下思想包袱，并不是靠一堂课、一次比武、一名战士的示范作用就能解决，但程扬比武的经历确实给连队带来了一股劲儿.

“我们要做的，就是把这股劲儿全方位激发出来. ”

前不久，连队远程机动至某野外训练场，接受上级军事训练检查考核. 中士张世龙成为炮长不足一个月，就被抽入实弹射击考核组，代表连队出战.

“过去，我一直以连队为骄傲. 今天，要让连队以我为骄傲. ”这一次，“冲”成了官兵的共同选择. 考核当天，遭遇战车瞄准数据跳变特情，张世龙果断切换手动校射模式，凭借自己牢记的弹道修正口诀，连续3发炮弹命中移动靶标，所在车组取得考核总评第一的好成绩.

如今，官兵观念的变化，给连队带来了累累硕果. 一张红榜，记录了近一年来连队“突围”的足迹：一级上士李茗霖蝉联旅军械员集训比武冠军；排长张梓轩研发训练考核器材在全旅推广；排长孙大禄利用 3D 感知模型助力营指挥编组作业考核取得优异成绩；排长刘亚林在新排长强训考核中取得综合成绩第二名……

前不久，连队荣誉室又添两块新奖牌：连队被旅评为“全员达标连”，被集团军表彰为“践行强军目标标兵单位”.

一轮班长大换位背后的担当意识——

我们看得最重的评价是能打胜仗

和“红五连”官兵一起摸爬滚打，记者发现了一个有意思的现象：连队班长大多是初级军士.

为什么不由经验丰富的老同志担任班长骨干呢？连长李金泽告诉记者，过去，管理骨干确实以中级以上军士为主. 变化，源于一次“危机”.

近年来，“红五连”迎来主战装备的全面换代. 看着威武的新战车，全连上下摩拳擦掌. 但首次实装机动训练，就有两辆新战车接连“趴窝”. 全连上上下下，心急如焚.

当晚，荣誉室灯火通明. 李金泽站在“进军千里”的锦旗前说：“同志们，看看这面旗！1949 年我连官兵奉命追歼逃敌，靠着铁脚板，连续行军 47 天，行程 1000 多公里. 如今，我们驾驭着可以日行千里新型战车，能力怎么能停留在过去？”

转型的阵痛，远比想象的强烈. 面对新型仪表盘和复杂的火控系统，一场全员参与的“能力升级”开始了. 连队骨干带头，成立装甲底盘、通信链路、火力打击 3 个攻关小组.

但矛盾随之凸显出来，参与攻关的都是班排骨干，他们还要担负繁杂的日常管理工作，时间紧迫、任务艰巨，如何实现效率最大化？

有人提出，能否让部分年轻同志担任管理骨干，从而将一些研战经验丰富的中高级军士从日常事务性工作中解脱出来，更专注地投入新装备训练中.

这一提议得到了连队党支部的支持. 部分老班长却有些抵触：“班长班长，兵头将尾”，这是一份“牌面”啊.

“装备转型任务、训法战法研究是当前第一要务，战斗力生成考核马上进行，这个时候顶得上去，才是真正的‘牌面’！”连长一番话，点醒了在场的人.

一场攻坚战打响了. 白天，官兵钻车底、摸管线、练协同；夜晚，啃原理、研手册、画图纸. 老班长单磊转岗装甲输送车驾驶员，将训练经验梳理归纳成 40 余条实用操作技巧，使驾驶员培养周期大幅缩短；老班长罗奎转岗为火炮技师，探索交叉滚动升级训法，有效提升训练质效……

在旅战斗力生成考核中，五连驾驶、通信、射击三大专业成绩全部优秀. 更令人振奋的是，作为全旅首个进行新装备实弹射击的连队，五连上第一车、打第一炮，首发命中，最终在旅战斗力生成检验考核中名列前茅.

“作为一支荣誉连队，我们看得最重的评价是能打胜仗. ”崔健发现，形成了共识，许多不好协调的关系舒畅了，看似难解的矛盾也化解了.

在不久前的一场红蓝对抗训练中，担负夺控清剿任务的五连官兵，在火力分队掩护下向“敌”发起冲锋. 平时作为主攻突击队的二排，在进攻受阻后，主动担负起支援任务，全力掩护其他排对“敌”重要目标发起夺控. 最终，三排率先夺占“敌”指挥所，为进攻打开了通道.

一次对抗失利唤醒的发展定力——

只能打顺风局，何谈进取精神

并非所有的叙事，如同电影里的“超级英雄”，能够“一路开挂”般讲下去.

五连也是如此.

仲夏时节，渤海湾畔，一场实战化对抗训练落下帷幕. 令人意外的是，已将新装备操作要领烂熟于心的五连官兵，在战斗打响后，因对情况判断失误、战术不贴合实际，导致封控行动被“敌”突破……

训练失利像块巨石，压在连队每个人心头.

排长徐申平时喜欢军史研究. 他提议，把对抗训练的复盘先放一放，大家先一起找一找，战功赫赫的五连历史上面临过哪些不利局面.

“1934 年，连队参加第五次‘反围剿’战斗，失败后参加长征. ”

“高扬战役中，连长牺牲，弹药打光，和日寇、伪军拼起了刺刀……”

一支 92 岁的连队，就是一部鲜活的历史教科书. “身经百战的五连，一路遇到的都是顺风局吗？只能打顺风局，何谈进取精神？”

徐申提出的问题，既是激励，也是思考：一支历史厚重的连队，既要有冲击胜利的勇气，也要有面对挫折和失利的发展定力.

复盘、总结、反思，连队党支部带领大家寻找失利的原因. 经过激烈讨论，大家认识到，这次训练，连队输在了战法打法滞后上. 尤其是侦察的“眼睛”不亮，再勇猛的拳头也打不准.

“五连需要插上‘信息之翼’，把无人机、无人车等新质装备的战法搞活. ”然而，无人机操作难度大，缺少专业教练员；日常训练任务重，缺少专研精练的时间；真实战场环境复杂，缺少模拟作战场地……进阶之路并非一帆风顺，五连官兵在磕磕绊绊的探索中坚定前行.

“荣誉连队有时也需要一点‘钝感力’. ”前来蹲点调研的一位机关干事坦言，带领“心气儿高”的年轻官兵面对失利甚至是失败的局面，需要的不仅是激励，更要有信任和宽容. “我们旅有 13 个历史厚重的荣誉连队，如何让荣誉连队一直‘红’下去，我们正探索建立一套科学的评优评先与动态管理机制，树立长期发展、全面进步的工作导向. ”

离开连队时，指导员崔健正在为集团军组织的新毕业排长集训做准备，记者在他发言稿上看到这样一段话：五连成长的过程，就是不断突破，又不断自我重塑的过程. 我们会有流泪的时刻，会有低头走路的时刻. 但只要走过去，这些时刻会化作光，照亮更远的征程.

亲历者说

接过先辈的旗 带好连队的兵

■崔 健

一年前，我调任“红五连”担任政治指导员. 到了连队，映入眼帘便是连队门前“战斗勇敢”4 个金光闪闪的大字.

尽管在机关工作时已对连队的历史和荣誉有所了解，但当真正面对这样一支历经战火洗礼、功勋战绩卓著、使命任务光荣的红军连队时，一份沉甸甸的责任和压力瞬间涌上心头.

上任后第一件事，我就来到连队荣誉室，一面面斑驳泛黄的荣誉战旗震撼着我的心灵：1948年1月，闻家台歼灭战，连队冲进敌阵地，俘敌1000余人，被授予“战斗勇敢”锦旗；1949 年 4 月，官兵徒步行军 1000 多公里追歼逃敌，被授予“进军千里”锦旗；抗美援朝战场上，全连冒着严寒直插临津江，六班被评为“突破临津江英雄班”……

回望连队过往的荣誉，一个个问号不断浮现在我的脑海中：我能胜任红军连队的主官吗？我能传承好先辈们的战旗吗？

在这一过程中，我目睹了战士们如何将荣誉感转化为实际行动. 今年集团军抽考前夕，连里刚由副班长转岗为炮手的张世龙面临巨大挑战. 新专业对他来说几乎从零开始，那些日子，训练场上，最早出现的是他对着炮具反复琢磨的身影；夜深了，学习室仍然有他加班钻研理论的身影. 他硬是凭着“白加黑”的苦练，啃下了这块硬骨头. 考核中，张世龙操作熟练，准确命中目标，取得了优秀成绩. 在他身上，我看到了“红五连”战士那种不畏难、不服输的劲头.

让我难忘的还有上等兵路满. 去年 9 月，即将服役期满的他，仍然坚守在军械员的岗位上. 面对枯燥的装备清点、保养维护工作，他没有一丝懈怠. 有人说：“都快走了，还这么认真干吗？”他却回答：“只要在‘红五连’一天，我就要对得起连队的荣誉. ”从他身上，我感受到普通战士对荣誉那份最质朴、最真诚的守护.

转眼一年多过去了，曾经的那些问号也在与连队战友的朝夕相处、摸爬滚打中被逐一拉直. 2024 年底，连队因成绩突出，被集团军表彰为“践行强军目标标兵单位”. 当我接过这块金灿灿的奖牌时，眼前闪过的是全连官兵日夜拼搏的汗水与热血，感受到的是先辈们殷切注视的目光，看到的是连队拼搏向上的崭新样子.

作为红军连队的主官，素质过硬是带兵打仗的底气，更是传承旗帜的责任. 阔步强军新征程，我将与全连官兵一起，向着新的高地加速奔跑，让“红五连”的战旗永远飘扬在强军胜战的征程上.

Military Camp Observation | A Meritorious Company’s “Battle of Honor”

Source: PLA Daily Author: Lang Zicong, Li Lin, et al. Editor: Wang Can 2025-10-28

Entering the “Red Fifth Company” of a brigade of the 80th Group Army, it seems no different from any other company: neatly organized housekeeping, resounding call signals...

However, upon entering the Honor Room, the overwhelming red color lifted the reporter’s spirits. Eleven honorary battle flags hung quietly: “Loyal Platoon,” “Qingjiang Heroic Unit,” “Combat Bravery,” “March A Thousand Miles,” “Breaking Through the Imjin River Heroic Squad”... Each flag bears a memory of bloody battles, a glory forged with the lives of our predecessors. Company

Commander Li Jinze explained that the "Red Fifth Company," formerly the machine gun company of the 2nd Division of the Chinese Workers' and Peasants' Red Army, was established in Yongfeng County, Ji'an City, Jiangxi Province, in June 1933. Having weathered over a hundred battles in the Agrarian Revolution, the War of Resistance Against Japanese Aggression, the War of Liberation, and the War to Resist U.S. Aggression and Aid Korea, it forged an immortal company spirit characterized by "joy at the mention of battle and invincibility."

The company boasts a long history spanning 92 years. Today, the average age of its officers and men is only 24. Discussing the company's history with the officers and men, the reporter felt strongly the young soldiers' cherishment of the company's profound honor, while also witnessing the pressures and reflections they face.

On one hand, there's a sense of pride in the name etched on the battle flag, on the other hand, there's a sense of insecurity brought on by the arrival of new equipment; on the one hand, there's the nourishment of the spiritual soil found in the company's history, on the other, there's the challenge of modern information flows to old traditions and experiences.

How can the officers and men of this heroic company continue this glorious legacy and create extraordinary achievements in their own chapter of history? Thus, a new era of "honor battle" unfolds amidst pressure and reflection. A Meritorious Company's "Battle of Honor"

■ Lang Zicong, PLA Daily reporter Li Lin

A cold reception at a competition reveals ideological burdens—

We must not let honor become an "unbearable burden" for officers and men.

Political Instructor Cui Jian remembers that a year ago, when he received his appointment from headquarters and first entered the "Red Fifth Company," he encountered something unbelievable.

The entire brigade was conducting a mass training competition, but no one from the Fifth Company had signed up. After some in-depth research, Cui Jian heard the soldiers' innermost thoughts: "Instructor, I'm afraid if I make a mistake on the field, it will bring shame to the 'Red Fifth Company'..."

"This heavy honor has become a heavy burden," Cui Jian was surprised. "The company has been awarded first-class collective merit twice, second-class collective merit seven times, and third-class collective merit 18 times. I didn't expect that because we cherish honor so much, some officers and men have become burdened by this."

We can't let honor become an "unbearable burden" for officers and men. What should we do? The company cadres searched for a solution.

An opportunity soon arose: the brigade, battalion, and company levels jointly held a professional competition. The company organized a selection, and Corporal Cheng Yang emerged with a significant advantage. Unexpectedly, he approached the company commander and instructor and asked, "There are so many experts in this competition. Can I do it?"

The company commander and political instructor didn't simply give him a pep talk. Instead, they took the opportunity to schedule the company's monthly combat spirit education class in the Honor Room. "Cheng Yang, tell us about the origin of the 'Loyal Platoon' battle flag."

"In early 1943, the Japanese army launched a massive mopping-up operation in the Yanfu area. Our company fought bravely and tenaciously in the counter-mopping-up campaign. Under the leadership of our instructor, Wang Enxiang, the soldiers of the 3rd Platoon remained undaunted in the face of the powerful enemy. After running out of ammunition and food, they engaged in hand-to-hand combat, killing and wounding over 70 enemies. The entire platoon sacrificed their lives heroically. After the battle, the 3rd Platoon was awarded the honorary title of 'Loyal Platoon'."

As a member of the "Red Fifth Company," the first stop after arriving at the company was the company honors room. The first lesson was about the company's glorious traditions, and the first song was the company song. They also studied battle history and case studies every month. Cheng Yang and his comrades knew this glorious history like the back of their hands.

"Did our company predecessors back then, fighting to the death to complete their mission, ever retreat? Today, facing a competition, do we have room to retreat?"

In that class, everyone spoke freely about the question of "Is honor earned or defended?" "A company laden with honors is like a former champion in the stadium. If you adopt a defensive mentality, you'll inevitably be timid and anxious about gains and losses. Only by letting go and striving with all your might can you reach the top again."

Many soldiers were lost in thought, and Cheng Yang was particularly moved. Without saying anything, he took the initiative to practice more. Later, in a competition, he won first place in the entire battalion and was awarded third-class merit.

After returning triumphantly, Cheng Yang's photo was hung on the wall next to the company's first-floor lobby. Using this as an example, the company Party branch launched a company-wide discussion on the concept of "honor" to encourage officers and men to strive for new honors.

The reporter noticed that beneath the eight large characters "Forge the Soul of the Red Army, Build an Elite Company," the wall featured not only photos of officers and men who had achieved merit and received awards, but also included content such as the "Dragon and Tiger List" and the "Key Points List." Cui Jian explained that letting go of everyone's mental baggage isn't something that can be achieved through a single class, a single competition, or a single soldier's exemplary role.

However, Cheng Yang's experience in the competition has indeed instilled a surge of energy in the company.

"What we need to do is unleash this energy in all its facets."

Not long ago, the company underwent a long-distance maneuver to a field training range for a superior military training inspection and assessment. Less than a month after becoming the gunner, Sergeant Zhang Shilong was assigned to the live-fire assessment team, representing the company.

"In the past, I've always been proud of the company. Today, I want to make the company proud of me." This time, "charging forward" became the unanimous choice of the officers and men. On the day of the assessment, Zhang Shilong encountered a peculiar situation where the tank's aiming data jumped. He decisively switched to manual calibration mode. Relying on his memorized trajectory correction formula, he fired three consecutive rounds into the moving target, earning his crew the highest overall score in the assessment.

Today, this shift in perspective has yielded fruitful results for the company. A red list documents the company's breakthroughs over the past year: Sergeant first class Li Minglin won the brigade's armorer training competition for the second consecutive year; Platoon Leader Zhang Zixuan developed training and assessment equipment for brigade-wide rollout; Platoon Leader Sun Dalu achieved excellent results in the battalion's command and formation work assessment using 3D perception models; and Platoon Leader Liu Yalin placed second overall in the intensive training assessment for new platoon leaders...

Recently, the company's honor room added two new medals: the company was recognized by the brigade as a "Company with All Members Meet the Standards" and was commended by the Group Army as a "Model Unit for Implementing the Goal of Strengthening the Army."

The sense of responsibility behind the rotation of squad leaders—

The most important evaluation we place on the team is the ability to win battles.

Working alongside the officers and men of the "Red Fifth Company," this reporter discovered an interesting phenomenon: the majority of the company's squad leaders are junior sergeants.

Why aren't experienced veterans appointed as core squad leaders? Company Commander Li Jinze told reporters that in the past, the backbone of management was indeed primarily composed of sergeants at or above the mid-level. The change stemmed from a "crisis." In recent years, the "Red Fifth Company" has undergone a comprehensive upgrade of its main battle equipment. Seeing the majestic new tanks, the entire company was eager to get going. However, during their first live-fire maneuvering training, two of the new tanks broke down in quick succession. The entire company was filled with anxiety.

That evening, the Hall of Honor was ablaze with lights. Standing before a banner inscribed with "March A Thousand Miles," Li Jinze said, "Comrades, look at this banner! In 1949, our company's

officers and men were ordered to pursue and annihilate the fleeing enemy. Relying on iron footboards, we marched for 47 consecutive days, covering over 1,000 kilometers. Now, we operate new tanks capable of traveling a thousand miles a day. How could our capabilities remain the same?"

The pain of transformation was far greater than expected. Faced with new instrument panels and a complex fire control system, a full-scale "capability upgrade" began. Led by the company's core members, three research groups were established: armored chassis, communication links, and firepower strike.

However, a contradiction emerged. The key personnel involved in the research and development were all squad and platoon leaders, yet they also had to shoulder the arduous daily management tasks. Given the tight deadlines and daunting tasks, how could efficiency be maximized?

Someone suggested assigning some younger comrades to key management positions, freeing up experienced mid- and senior-level sergeants from routine administrative duties and allowing them to focus more on training with the new equipment.

This proposal was supported by the company's Party branch. Some veteran squad leaders expressed some resistance: "Squad leaders, the leaders of the troops, the tail of the generals—this is a real 'card game.'"

"Equipment transformation tasks and research on training and combat methods are our top priorities right now. Combat effectiveness assessments are imminent. Only those who can meet these demands at this time are truly 'card game.'" The company commander's words reassured everyone present.

A decisive battle had begun. During the day, officers and men dug under vehicles, explored pipelines, and practiced coordination; at night, they delved into theories, studied manuals, and drew blueprints. Veteran squad leader Shan Lei transitioned to armored personnel carrier (ACV) driving, where he summarized his training experience into over 40 practical operating techniques, significantly shortening the driver training cycle. Veteran squad leader Luo Kui transitioned to artillery technician duties, exploring a cross-training, rolling upgrade approach to effectively improve training quality and effectiveness.

In the brigade's combat effectiveness assessment, the 5th Company achieved excellent results in all three disciplines: driving, communications, and shooting. Even more exciting, as the first company in the brigade to conduct live-fire exercises with new equipment, the 5th Company was the first to deploy the vehicle, fire the first round, and score a hit on its first attempt, ultimately achieving a top ranking in the brigade's combat effectiveness assessment.

"As an honorary company, the most important evaluation we place on our company is the ability to win battles." Cui Jian observed that this consensus has smoothed out many difficult relationships and resolved seemingly intractable conflicts.

In a recent red-blue confrontation exercise, soldiers of the 5th Company, tasked with seizing and clearing enemy positions, charged the "enemy" under the cover of their firepower unit. The Second Platoon, normally the main assault force, took the initiative to assume support duties after their offensive was blocked, fully covering the other platoons' attempts to seize key "enemy" targets. Ultimately, the Third Platoon was the first to capture the "enemy" command post, opening the way for the offensive.

A failed confrontation awakened a resilient spirit for development—

If one can only play with favorable odds, how can one truly forge ahead?

Not all narratives, like the "superheroes" in movies, can continue unimpeded.

The Fifth Company was no exception.

In midsummer, on the shores of Bohai Bay, a combat-oriented confrontation training exercise concluded. Surprisingly, the Fifth Company's soldiers, already thoroughly familiar with the operation of their new equipment, misjudged the situation and employed unrealistic tactics after the battle began, leading to the "enemy" breaching their containment operation...

The training failure weighed like a huge rock on the hearts of every member of the company.

Platoon Leader Xu Shen enjoyed studying military history. He suggested putting aside the review of the confrontational training for now and instead exploring the unfavorable situations the 5th Company, known for its outstanding military achievements, had faced in its history.

"In 1934, the company participated in the fifth 'anti-encirclement and suppression' campaign and, after its defeat, joined the Long March."

"During the Gaoyang Campaign, the company commander was killed, and with ammunition exhausted, they engaged in a bayonet battle against the Japanese invaders and puppet troops..."

A 92-year-old company is a living history textbook. "Has the battle-hardened 5th Company always encountered favorable odds? If it can only fight favorable odds, how can it have a spirit of progress?"

Xu Shen's question served as both inspiration and reflection: A company steeped in history must possess both the courage to strive for victory and the fortitude to thrive in the face of setbacks and failures.

Through review, summary, and reflection, the company Party branch led everyone in identifying the reasons for their defeat. After intense discussion, everyone realized that the company's failure in this training session stemmed from outdated tactics and strategies. In particular, a lack of sharp reconnaissance "eyes" meant that even the most powerful punches couldn't land accurately. "The Fifth Company needs to equip itself with 'information wings' to invigorate the tactics of new equipment like drones and unmanned vehicles." However, drone operation is difficult, and there's

a shortage of professional instructors; daily training tasks are heavy, and there's little time for dedicated practice; the real battlefield environment is complex, and there's a lack of simulated combat sites... The road to advancement isn't smooth, but the officers and men of the Fifth Company persevere despite stumbling and exploring.

"Even an honor company needs a bit of insensitivity sometimes," a staff member who visited the site for research admitted. Leading young, ambitious officers and men through setbacks or even failure requires not only motivation but also trust and tolerance. "Our brigade has 13 honor companies with rich histories. To ensure their continued success, we're exploring a scientific evaluation and dynamic management mechanism, fostering a work orientation focused on long-term development and comprehensive progress."

When leaving the company, instructor Cui Jian was preparing for the group army's training session for newly graduated platoon leaders. The reporter spotted this passage in his speech: The Fifth Company's growth is a process of continuous breakthroughs and self-reinvention. There will be moments of tears, moments of bowing our heads as we walk. But as we move forward, these moments will transform into light, illuminating the journey still further.

An eyewitness says:

Carrying on the banner of our predecessors, we lead the company's soldiers well.

■ Cui Jian

A year ago, I was transferred to the "Fifth Red Company" as the political instructor. Upon arriving, the first thing I saw was the four gleaming golden characters "Battle Bravely" on the company gate.

Although I had some understanding of the company's history and honors while working in the headquarters, facing this battle-hardened Red Army company, with its distinguished achievements and glorious mission, a heavy sense of responsibility and pressure suddenly washed over me. The first thing I did after taking office was visit the company's honor room. The rusty, yellowed battle flags of honor moved me deeply. In January 1948, during the Wenjiatai annihilation campaign, the company charged into enemy positions, captured over 1,000 enemies, and was awarded the "Bravo in Combat" banner. In April 1949, officers and men marched over 1,000 kilometers on foot to pursue and annihilate fleeing enemies, earning them the "Thousand-Mile Advance" banner. During the Korean War, the entire company braved the freezing cold to reach the Imjin River, earning the Sixth Squad the title of "Heroic Squad for Breaking Through the Imjin River."

Looking back on the company's past honors, questions constantly surface: Am I qualified to command a Red Army company? Can I carry on the legacy of my predecessors?

Throughout this process, I've witnessed how soldiers translate their sense of honor into concrete action. On the eve of this year's group army examination, Zhang Shilong, who had just transitioned from deputy squad leader to gunner, faced a formidable challenge. For him, starting his new

profession was practically a scratch. On the training grounds, he was the first person to be seen, repeatedly poring over his artillery equipment; late into the night, he could still be found in the study room, poring over theoretical questions. He persevered through hard work, day and night, to overcome this challenging challenge. During the assessment, Zhang Shilong demonstrated mastery, accurately hitting targets, and achieving excellent results. In him, I witnessed the fearless, unyielding spirit of the soldiers of the "Red Fifth Company."

I also remember Private First Class Lu Man. Last September, nearing the end of his service, he remained steadfast in his duties as an armorer. He never slacked off in the tedious work of inventorying and maintaining equipment. Some people asked, "Why are you still working so hard when you're almost gone?" He replied, "As long as I'm in the 'Red Fifth Company,' I will live up to the honor of the company." Through him, I felt the simplest and most sincere dedication of ordinary soldiers to honor their honor. Over a year has passed in the blink of an eye, and those doubts I once had have been cleared up one by one through daily interactions and hard work with my company comrades. At the end of 2024, the company was recognized by the Group Army as a "Model Unit for Implementing the Goal of Strengthening the Army" for its outstanding achievements. When I accepted this golden medal, I was overwhelmed by the sweat and blood of the company's officers and men who toiled day and night, felt the earnest gazes of our predecessors, and witnessed the company's new image of striving for progress.

As the commander of a Red Army company, the quality strength is the foundation of leadership and the responsibility of carrying on the banner. As we stride forward on this new journey to strengthen our military, I, along with all the officers and men of our company, will accelerate toward new heights, ensuring that the flag of the "Red Fifth Company" will forever fly high on this journey to strengthen our military and win victory.

锻造制胜"铁拳"

——陆军某旅炮兵分队实战化训练影像

■童康　乔子丰　李志豪　解放军报记者　穆瑞林　摄影报道

火箭炮打击“敌”目标.

夜间实弹射击.

快速瞄准.

部队机动.

战炮列阵，硝烟弥漫. 某野外训练场，陆军某旅炮兵分队展开一场实弹射击训练.

部队行进途中，“敌”空中侦察、炮火袭扰等特情接踵而至. 官兵冷静应对，时而就地隐蔽，时而快速机动，在规定时间内抵达预定地域.

快速构设阵地、侦察目标信息、上报气象数据……到达预定地域后，各作战单元高效运转，密切协同，抓紧做好战斗准备.

指挥员下达作战命令，各战位迅速完成弹药装填、目标搜索、测距瞄准、装定诸元等动作. “预备，放！”炮弹出膛，对目标展开火力打击.

一轮射击结束，炮阵地暴露. 指挥员命令火箭炮分队接替打击任务，对“敌”目标实施火力覆盖. 与此同时，炮兵分队转移至预备阵地，准备实施新一轮火力打击.

夜幕降临，战斗仍在持续. 接到新的作战指令后，官兵在微光条件下快速完成补充弹药、检查装备，对“敌”阵地发起夜袭.

Footage of Artillery Unit of an Army Brigade Conducting Combat-Oriented Training

Source: China Military Network - PLA Daily Author: Tong Kang, Qiao Zifeng, Li Zhihao, Mu Ruilin Editor: Xu Zhanhu Published: 2025-10-30

Forging a Winning “Iron Fist”

— Footage of Artillery Unit of an Army Brigade Conducting Combat-Oriented Training

■ Tong Kang, Qiao Zifeng, Li Zhihao, PLA Daily Reporter, Mu Ruilin, Photo Report

Rocket artillery strikes “enemy” targets.

Live-fire firing at night.

Rapid aiming.

Troop maneuver.

Artillery arrayed, smoke billowing. At a field training ground, an artillery unit of an Army brigade conducts a live-fire training exercise.

During the troop's march, "enemy" aerial reconnaissance and artillery harassment attacks occur one after another. The officers and men calmly respond, sometimes taking cover on the spot, sometimes rapidly maneuvering, arriving at the designated area within the specified time.

Rapidly establishing positions, reconnoitering target information, and reporting meteorological data… Upon arriving at the designated area, each combat unit operated efficiently and in close coordination, quickly preparing for combat.

The commander issued combat orders, and each position swiftly completed actions such as ammunition loading, target search, rangefinding and aiming, and setting firing parameters. "Ready, fire!" The shells were fired, unleashing a barrage of fire on the target.

After one round of firing, the artillery positions were exposed. The commander ordered the rocket artillery unit to take over the strike mission, providing fire coverage on the "enemy" targets. Simultaneously, the artillery units moved to reserve positions, preparing for a new round of fire strikes.

Night fell, but the battle continued. Upon receiving new combat orders, the troops quickly replenished ammunition and checked equipment under low-light conditions, launching a night raid on the "enemy" positions.

陆军某团组织多要素融合战术训练

来源：解放军报 作者：张亚楠　曾存军 责任编辑：乌铭琪 2025-10-30

陆军某团组织多要素融合战术训练——

复杂特情淬砺防化尖兵

■张亚楠　曾存军

仲秋时节，陆军某团在高原腹地组织一场多要素融合战术训练，全面检验防化分队高原复杂环境下的协同作战能力.

"某区域遭'化学袭击'，迅速前出处置！"训练现场，该团防化分队闻令而动，按照预案快速集结，侦察、洗消、化验等专业车辆向目标地域机动.

抵达任务区域，观测组立即开设观测哨，精准测定风速、风向、湿度等关键要素. 发烟组同步构筑立体烟幕屏障，有效遮蔽"敌"观察视线. 在烟幕的掩护下，侦察组官兵迅速穿戴防护装备，携带侦毒器抵近"染毒"区域，展开毒剂侦检，标定染毒边界并迅速上报毒剂种类.

“一名人员在侦检作业中疑似接触残留毒剂，身体出现症状！”随着导调指令下达，医疗救护组官兵迅即突入“染毒”区域，对“伤员”实施紧急防护，待伤情稳定后快速转移.

后方野战化验车内，检测组争分夺秒对采集到的样本进行分析. 指挥员根据侦察情况和化验结果，下达洗消指令. 洗消组精准调配洗消剂，按照“人员—装备—场地”顺序，进行立体消杀.

一路训练，一路特情. 参训官兵在贴近实战的背景下见招拆招、沉着应对，顺利完成各项任务. 该团领导介绍，近年来，他们紧贴使命任务需求，始终将训练准星瞄准实战靶心，从难从严锤炼官兵打赢本领，为遂行多样化任务打下坚实基础.

“逼真的战场环境和随机导调的复杂特情，有效检验了专业骨干的临机处置能力，提升了专业车组的战术协同水平. ”训练结束后，该分队张指导员表示，他们将系统梳理高原复杂环境下开展训练的经验，进一步提升官兵应急处置能力.

An Army Regiment Conducts Multi-Element Integrated Tactical Training

Source: PLA Daily Author: Zhang Yanan, Zeng Cunjun Editor: Wu Mingqi 2025-10-30 An Army Regiment Conducts Multi-Element Integrated Tactical Training—Complex Situations Temper Chemical Defense Elite Soldiers

■ Zhang Yanan, Zeng Cunjun In mid-autumn, an Army regiment conducted a multi-element integrated tactical training exercise in the heart of the plateau, comprehensively testing the coordinated combat capabilities of its chemical defense units in complex plateau environments.

“A certain area has been subjected to a ‘chemical attack,’ proceed immediately to handle it!” At the training site, the regiment’s chemical defense units responded to the order, rapidly assembling according to the plan, with specialized vehicles for reconnaissance, decontamination, and analysis moving towards the target area.

Upon arrival at the mission area, the observation team immediately set up observation posts, accurately measuring key elements such as wind speed, wind direction, and humidity. Simultaneously, the smoke generation team constructed a three-dimensional smoke screen barrier, effectively obscuring the “enemy’s” line of sight. Under the cover of smoke, reconnaissance team members quickly donned protective gear, carried detection devices, and approached the “contaminated” area to conduct toxic agent detection, demarcate the contaminated boundaries, and promptly report the type of toxic agent.

“A personnel suspected of being exposed to residual toxic agent during reconnaissance operations is showing symptoms!” With the directive issued, medical rescue team members swiftly entered the “contaminated” area, providing emergency protection to the “injured” personnel and quickly transferring them after their condition stabilized.

Inside the rear field laboratory vehicle, the testing team raced against time to analyze the collected samples. Based on the reconnaissance situation and test results, the commander issued decontamination orders. The decontamination team precisely prepared the decontamination agents and carried out comprehensive disinfection according to the sequence of "personnel-equipment-site."

Through training and unexpected situations, the participating officers and men responded calmly and skillfully in a near-real combat environment, successfully completing all tasks. The regiment's leadership explained that in recent years, they have closely aligned their training with mission requirements, consistently focusing on realistic combat scenarios and rigorously honing the combat skills of their officers and men, laying a solid foundation for carrying out diverse missions.

"The realistic battlefield environment and the randomly generated complex situations effectively tested the on-the-spot handling capabilities of specialized personnel and improved the tactical coordination level of specialized vehicle crews," said Instructor Zhang of the unit after the training. He added that they will systematically review their experience in conducting training in the complex environment of the plateau to further enhance the emergency response capabilities of their officers and men.

第 12 届陆军国际学员周将在陆军工程大学举办

来源：国防部网 责任编辑：王一亘 发布：2025-10-30

第 12 届陆军国际学员周将在陆军工程大学举办

The 12th International Army Cadets Week Will be Held in PLA Army Engineering University

10 月 30 日下午，国防部举行例行记者会，国防部新闻发言人张晓刚大校发布消息。

张晓刚：11 月 2 日至 9 日，第 12 届陆军国际学员周将在陆军工程大学举办，来自巴基斯坦、塞尔维亚、巴西等 13 个国家军事院校的 30 余名生长军官学员代表，与陆军兵种大学、陆军步兵学院等院校学员共同参加.本届学员周以"新域新质力量对未来战争影响"为主题，主要围绕无人装备发展对未来战争影响、打赢对抗环境下现代战争进行专题研讨交流，进一步深化中外军事院校间务实合作.

Zhang Xiaogang: The PLA Army Engineering University will host the 12th International Army Cadets Week (IACW) from November 2 to 9. Over 30 cadets from military academies of 13 countries including Pakistan, Serbia and Brazil will join their counterparts from the PLA Army Arms University and the PLA Army Infantry Academy to take part in the event. Under the theme of the Impact of New-domain and New-quality Forces to Future Warfare, this year's IACW will have discussions on such topics as the impact of unmanned equipment development to future

warfare and winning the modern warfare in contested environments. The IACW is a platform for Chinese and foreign military academies to deepen practical cooperation with each other.

“报告，多架小型无人机正向我炮阵地逼近！”深秋，野外驻训场上，第 72 集团军某旅炮兵分队一场贴近实战的建制营考核紧张进行. 记者发现，这场考核没有出现以往常见的“通过染毒地带”“无千斤顶更换轮胎”等常规特情，取而代之的是“指挥节点毁瘫”“遭‘敌’无人机群突袭”等新特情，让官兵应接不暇.

“在严格落实大纲要求基础上，此次考核取消了多个针对性不强、官兵驾轻就熟的常规特情课目. ”谈及考核改变的初衷，该旅作训科李参谋向记者讲起了他担任炮兵连连长时经历的一次考核.

当时，他带领全连按作战流程接受考核，连续处置多个特情，一路过关斩将. 就在他们完成炮火打击准备转移时，空中传来刺耳的呼啸声，多架携带“炸弹”的穿越机向阵地袭来. 因前期对空中威胁预想不足，缺乏有效应对手段，该连多个火力单元“受损”，考核最终被判定失败.

“面对新特情，大家虽心有不甘，但更加清醒地意识到，未来战场，敌人可能从任何方向、以任何手段发起攻击，防范敌无人机与穿越机，是未来作战中必须解决的难题. ”李参谋回忆，旅队在复盘中发现，随着火力打击距离不断延伸，作战形态和作战样式不断推陈出新，基于近距离战斗设置的传统特情已无法满足不同课目的练兵需求.

为此，该旅围绕战场变化、作战需求和装备运用特点充分预想，梳理“指挥节点毁瘫”“电磁干扰压制”“无人机突袭”等 6 类 10 余项新特情的处置方法，据此建立特情库并制订动态更新的特情处置手册. 他们将这些新特情融入考核全程，不断提升考核难度，全面锤炼官兵的应急处置能力.

记者在考核现场看到，考核组聚焦实战需求构设难局、危局、险局，轮番展开“反无人机阵地防卫”“指挥链路中断后火力单元自主协同”等综合特情课目考核，帮助官兵强化实战意识，推动部队新质作战能力不断提升.

火力打击一队指挥车遭“敌”远程火力打击，失去指挥能力；侦察分队侦获“敌”火力打击单元信息……考核现场，指挥员刘磊迅速判明态势，果断下达指令：“一队剩余火力单元由二队接替指挥，二队值班火炮立即与侦察分队直接通联，自主展开快反打击. ”官兵闻令而动、密切协同，按作战方案完成战力重构，迅速对“敌”实施反击.

Special Situation Setup of a Brigade of the 72nd Group Army Closely Resembles Battlefield Situations

Source: PLA Daily Author: Xiang Liming, Wang Linsheng Editor: Wang Can 2025-11-02

A Brigade of the 72nd Group Army— Special Situation Setup Closely Resembles Battlefield Situations

■PLA Daily Reporter Xiang Liming, Special Correspondent Wang Linsheng

“Report! Multiple small drones are approaching our artillery position!” In late autumn, at a field training ground, a battalion-level assessment of artillery units of a brigade of the 72nd Group Army, closely resembling actual combat, was underway. The reporter observed that this assessment did not feature the usual special situations such as “passing through contaminated areas” or “changing tires without a jack.” Instead, it presented new special situations such as “command node destroyed and paralyzed” and “ambushed by an enemy drone swarm,” leaving the officers and men overwhelmed.

“Based on strict adherence to the syllabus requirements, this assessment eliminated several routine emergency response exercises that were not particularly targeted and were already familiar to the soldiers.” Speaking about the rationale behind the assessment changes, Staff Officer Li from the brigade’s training section recounted an assessment he experienced when he was an artillery company commander.

t that time, he led his entire company through the assessment according to operational procedures, handling multiple emergencies one after another, successfully passing each test. Just as they were completing their artillery strike and preparing to move, a piercing whistling sound came from the

sky, and several flying aircraft carrying “bombs” attacked the position. Due to insufficient prior anticipation of the aerial threat and a lack of effective countermeasures, several of the company’s firepower units were “damaged,” and the assessment was ultimately deemed a failure.

“Faced with new contingencies, while everyone felt reluctant, they were more acutely aware that in the future battlefield, the enemy could launch attacks from any direction and using any means. Preventing enemy drones and drones from flying over enemy targets is a crucial challenge that must be addressed in future combat,” Staff Officer Li recalled. During debriefing, the brigade discovered that as the range of firepower continued to extend and combat forms and styles constantly evolved, traditional contingency scenarios based on close-range combat were no longer sufficient to meet the training needs of different training subjects.

Therefore, the brigade fully anticipated changes in the battlefield, operational requirements, and the characteristics of equipment use, and compiled methods for handling more than 10 new contingencies in 6 categories, including “command node destruction and paralysis,” “electromagnetic interference suppression,” and “drone attacks.” Based on this, they established a contingency database and developed a dynamically updated contingency handling manual. They integrated these new contingencies into the entire assessment process, continuously increasing the difficulty of the assessments and comprehensively honing the emergency response capabilities of officers and men.

Reporters at the assessment site witnessed the assessment team creating challenging, critical, and dangerous situations based on real combat needs. They conducted a series of comprehensive special situation assessments, including “anti-drone position defense” and “autonomous coordination of fire units after command link disruption,” helping officers and men strengthen their combat awareness and continuously improve the unit’s new-type combat capabilities.

The command vehicle of the first fire strike team was attacked by “enemy” long-range fire, losing its command capability; the reconnaissance unit detected information about the “enemy” fire strike unit… At the assessment site, Commander Liu Lei quickly assessed the situation and decisively issued the order: “The remaining fire units of the first team will be taken over by the second team. The second team’s on-duty artillery will immediately establish direct communication with the reconnaissance unit and autonomously launch a rapid counterattack.” Officers and men acted swiftly upon receiving the order, closely coordinating their efforts, completing the force reconstruction according to the operational plan, and rapidly launching a counterattack against the “enemy.”

陆军某旅引导党支部用好“左膀右臂”提升联建联创质效

来源：中国军网-解放军报 作者：王梦圆 责任编辑：王粲

2025-11-03

陆军某旅引导党支部用好“左膀右臂”提升联建联创质效——

党建带群建 基层添活力

■王梦圆

编者按 加强基层建设，很重要的一条就是坚持党建引领、以党建带群建，把“三大组织”打造成一块整钢. 相关法规对党支部、团支部、军人委员会“三大组织”的权责、职能、制度已有明确，但个别基层单位在运行过程中还存在联建联创理念不清、功能作用发挥不足等问题. 陆军某旅坚持加强新时代党建带群建工作，由党支部做好引领指导，两个群众组织当好参谋助手，坚持问题导向、创新招法，以党支部过硬带动两个群众组织过硬，推动基层建设全面进步. 他们的做法有一定借鉴意义.

探索① 完善群众组织成员能力生成链路

激活组织“细胞” 淬火练强筋骨

“这次月考我进步了 30 多名！”前不久，看到正在上级参加参谋业务集训的陆军某旅新排长李梓烨发来消息，连队党支部王书记颇感欣慰. 王书记感到，李梓烨这次能被推荐参加集训，与他担任连队团支部书记的历练有很大关系.

李排长履职之初，两个群众组织的纽带作用发挥并不明显，在实际工作中，往往是党支部在唱“独角戏”.

深入调研剖析，王书记发现，两个组织负责人虽然担任干部时间长，对连队情况比较清楚，但参加各类学习集训、带队执行任务多，在位时间断断续续. 有时少了负责人牵头，本该两个组织负责的工作就难以推进落实，最终形成支部大包大揽的局面.

党支部研究后，决定秉持“组织强则军队强”的原则，结合换届为两个组织选准配强负责人，以更好发挥作用. 比如，连队支委、一级上士王威模范作用好、群众威信高、管理经验丰富，由他担任军人委员会主任一职比较合适.

但在团支部书记人选上，党支部有些犯难. 在研究符合条件的几名新排长人选时，有支委认为“虽然新排长在位时间长，但毕竟对部队不够熟悉”，对他们能否胜任岗位提出疑问.

“既要看到新排长的局限，更要看到新排长的优势. ”王书记讨论时感到，新排长年轻有活力，和战士走得近，符合团支部定位，至于工作经验不足等短板，完全可以通过加强培养帮带快速补齐. 他的一番话，为大家消除了疑虑. 最终，李梓烨顺利走上连队团支部书记岗位.

两个组织换届后，他们广泛开展“书记带书记、委员带委员、党员带团员”活动，通过结对帮带、轮岗锻炼等方式，帮助两个组织成员快速提升履职本领. 在党支部指导下，李梓烨

带领团支部先后组织“新兵下连暨老兵表彰仪式”“野外读书会”等活动，在充分发挥团支部作用过程中，也快速融入部队，提升了个人能力素质.

实践中，连队进一步结合旅队“抓建能力培训”活动，完善“会前帮带—会上列席—会后指导”能力生成链路. 同时，由党员带团员青年结成“三互”小组，落实群众组织成员培养备份，每逢老兵复退、新兵入营等时机，及时择优补缺，确保组织工作不断线、队伍建设不断层.

群众性组织提供的平台，激发了连队人才成长活力. 下士毛梓清因实绩突出被增补进军人委员会，支部希望他辐射带动更多战友. 一开始小毛只会做不会教，党小组组长邓威就主动与他结对，手把手带他提高组训施教能力. 后来，毛梓清因发挥作用明显，被任命为班长，还被评为旅优秀“四会”教练员，两次荣立三等功，前不久被保送入军校深造.

毛班长离队前，与小组里素质比较过硬的团员、下士宋浪浪进行了交接. 如今小宋顺利补位，开展各项工作也是有声有色.

探索② 推动形成群众组织自转运行机制

督导主动作为 实现同频共进

一个周末，某连团支部组织的足球、排球比赛火热开展，官兵们尽情挥洒汗水；周日晚上的行政例会结束后，由军人委员会宣布本周“训练之星”“进步之星”等并组织颁奖，现场掌声热烈.

“只有更好嵌入日常工作，才能彰显两个组织的作用. ”该旅领导介绍，虽然相关法规对职责进行了明确，但以往两个组织对啥时干、干什么、怎么干等缺乏经验，往往要靠党支部督促，积极主动开展工作的意识能力有所欠缺.

着眼问题，旅党委决定依据相关制度规定，以基层经常性基础性工作为载体，进一步完善两个组织自转运行的机制：每年年初，各连党支部指导群众组织制订年度工作计划，理清党团员发展、组织生活落实等工作主线；每季度组织党支部带群众组织研究工作形势，及时纠偏正向；每月结合按纲建连形势分析部署当月重点任务；通过《周工作安排表》指导督促两个组织推进落实，将支部的决议、筹划拆解成具体任务目标，帮助群众组织增强组织自建、活动自谋、难题自解的能力.

“常态运行的机制有了，磨合的时间长了，工作自主性就提高了. ”某连党支部曾书记打开一张周表说，这几年官兵网上交友、婚恋问题值得关注，他一直想上一堂婚恋观教育课，但由于自己尚且单身，备课总感觉缺少一定说服力. 后来，两个组织积极建言献策，曾书记决定先由自己讲清军人的正确婚恋观，然后安排两个组织的已婚同志结合分层教育谈交友婚恋经历体会，最终取得了良好效果.

机制运行过程中，某连还梳理出一份群众性组织“周、月、季、年工作清单”. 打开这份电子清单，笔者看到，除了每个时间段的“规定动作”，还有两个组织根据群众反馈和工作实际向支部提出的“自选动作”. 在已完成工作之下，清单还附有流程步骤、经验总结、要点提示，以便积累经验更好开展今后工作.

“这份清单照着就能做. ”该连团支部陈副书记说，现在由团支部组织的每月集体生日，由军人委员会每半月组织的“吐槽会”，都已成为受连队官兵欢迎的特色活动.

举行授枪仪式、授予专属荣誉编号、面向军旗宣誓……前些日子，该旅新兵结束第二适应期集中训练，正式回到连队. 各连群众组织依据工作计划早早筹划，配合党支部组织了形式多样的下连仪式，引领新兵开启新的征程.

探索③ 每个岗位、班组编入“三大组织”成员

突出任务牵引 聚力攻坚克难

首发命中！发发命中！

前不久，某连三排列装某新型装备后，首次参加实弹检验. 带队支委、排长褚红潇最先上阵，两发导弹命中靶心，提振了全排士气信心. 最终三排取得了同类型单位的最好成绩.

“现在执行任务，每个班组都有三大组织成员，每个重要岗位都有党员、委员带着干，任务思路更清晰了，斗志也更旺盛了. ”褚排长说，他们排经常要单独执行任务，有时连队几项任务同时展开，连长、指导员分身乏术，可能兼顾不到他们. “时间短还好，但任务周期一长，没有组织运行，单靠排里几名骨干推动工作，任务效果难免会受到影响. ”

类似三排的情况，在该旅不是个例. 由于练兵备战任务较重，有些连、排甚至班一级经常要单独遂行任务，仅靠党支部班子、三五个干部，往往力量有限，有时很难做到面面俱到.

“大项任务关口成立‘党员突击队’，叫响‘我是党员跟我上’的传统做法仍然有效，但并不能完全满足形势任务的发展需要. ”该旅领导介绍，提高动散条件下任务攻坚能力，各级党组织还要充分调动群众组织积极性，发挥群众组织成员多、覆盖面广的优势.

针对大项任务个别群众组织“失声”“隐身”，从“助手”变成“下手”的情况，他们根据任务人数，科学安排“三大组织”成员参加编组，每个编组指定一名党员任组长，除党员突击队外，还视情成立团员先锋队. 官兵们普遍感到，将任务线和组织线铆合后，更加便于党群骨干互联、新老搭配互帮，做到党支部有号召部署，群众组织有响应跟进，形成合力攻坚的局面.

一次多军兵种联训，某连要抽组一支涵盖多个专业的小队参加. 出发前，党支部进行专题研究部署：组织教育动员，一体编配“三大组织”成员，把组织触角延伸到每个车组；任务

过程中团支部委员带领团员持续开展宣传鼓动，跟进宣扬好人好事；军人委员会委员及时发动参训官兵建言献策，动态收集思想反映和意见建议.

执行任务时，“三大组织”凝聚合力，先后配合舰艇官兵处置特情、采集装备数据、完成联训行动，多种训法战法得到检验.

“在任务编组内，大家既能感受到组织关怀，也能密切战友关系. ”某连装甲技师、党员王华杰说. 前期，上级组织装甲专业新乘员集训，支部确定王华杰担任参训组长，中士王钦炫、下士何明既是专业教练员也是两个组织成员. 执行任务时，三人密切协同，抓好人员思想、管理监督、生活保障等工作. 结业时，连队成绩过硬，1 人获得驾驶专业第一，1 人获得通信专业第三.

An Army Brigade Guides Party Branches to Effectively Utilize “Left and Right Arms” to Enhance the Quality and Efficiency of Joint Construction and Creation

Source: China Military Network - PLA Daily Author: Wang Mengyuan Editor: Wang Can

2025-11-03

An Army Brigade Guides Party Branches to Effectively Utilize “Left and Right Arms” to Enhance the Quality and Efficiency of Joint Construction and Creation—

Party Building Leads Mass Organization Building, Adding Vitality to Grassroots Levels

■Wang Mengyuan

Editor’s Note: A crucial aspect of strengthening grassroots construction is adhering to Party building leadership and using Party building to drive mass organization building, forging the “three major organizations” into a unified whole. Relevant regulations have clearly defined the powers, responsibilities, functions, and systems of the “three major organizations”—Party branches, Youth League branches, and men’ committees—but some grassroots units still face problems such as unclear concepts of joint construction and creation and insufficient functional role. An Army brigade insists on strengthening Party building leading mass organization building in the new era, with Party branches providing guidance and the two mass organizations acting as advisors and assistants. Adhering to a problem-oriented approach and innovative methods, the brigade aims to use the strength of the Party branches to drive the strength of the two mass organizations, promoting comprehensive progress in grassroots construction. Their approach has certain reference value.

Exploring ① Improving the Capacity Building Link of Mass Organization Members

Activating Organizational “Cells” and Strengthening Their Mechanisms

“I improved by more than 30 places in this monthly exam!” Not long ago, Secretary Wang of the company’s Party branch was quite pleased to see a message from Li Ziye, a newly appointed platoon leader in an army brigade who was attending a staff officer training session at a higher level. Secretary Wang felt that Li Ziye’s recommendation for the training was largely due to his experience as the company’s Youth League branch secretary.

At the beginning of Platoon Leader Li’s tenure, the bridging role of the two mass organizations was not obvious; in practice, the Party branch often played a “solo role.”

Through in-depth research and analysis, Secretary Wang discovered that although the leaders of the two organizations had served as cadres for a long time and were relatively familiar with the company’s situation, their time in office was intermittent due to numerous training sessions and missions. Sometimes, without the leadership of the leaders, the work that should have been the responsibility of the two organizations was difficult to promote and implement, ultimately leading to a situation where the branch took on everything.

After deliberation, the Party branch decided to uphold the principle that “a strong organization makes a strong army,” and, in conjunction with the leadership reshuffle, select and appoint capable leaders for the two organizations to better fulfill their roles. For example, Wang Wei, a senior sergeant on the company’s Party branch committee, was deemed suitable for the position of director of the soldiers’ committee due to his exemplary conduct, high public prestige, and rich management experience.

However, the Party branch faced some difficulties in selecting the secretary of the Youth League branch. When discussing several qualified new platoon leaders, some committee members questioned their suitability, stating that “although the new platoon leaders have been in office for a long time, they are not yet familiar enough with the troops.”

“We must recognize both the limitations and strengths of the new platoon leaders,” Secretary Wang remarked during the discussion. He felt that the new platoon leaders were young and energetic, close to the soldiers, and aligned with the Youth League branch’s positioning. As for shortcomings such as insufficient work experience, these could be quickly overcome through training and mentorship. His words dispelled everyone’s doubts. Ultimately, Li Ziye successfully assumed the position of secretary of the company’s Youth League branch.

Following the leadership transitions of both organizations, they extensively implemented a “secretary mentoring secretaries, committee members mentoring committee members, and party members mentoring youth league members” program. Through pairing assistance and job rotation, they helped members of both organizations quickly improve their ability to perform their duties. Under the guidance of the Party branch, Li Ziye led the Youth League branch in organizing activities such as “New Recruits Joining the Company and Veteran Commendation Ceremony” and “Field Reading Club.” While fully leveraging the role of the Youth League branch, members also quickly integrated into the unit, enhancing their individual abilities and qualities.

In practice, the company further integrated with the brigade's "Capacity Building Training" activities, refining the capacity-building chain from "pre-meeting mentoring—attending the meeting—post-meeting guidance." Simultaneously, Party members formed "three-way mutual assistance" groups with Youth League members to ensure the cultivation and backup of members in mass organizations. Whenever veterans retired or new recruits joined, timely selection of outstanding individuals filled vacancies, ensuring uninterrupted organizational work and continuous team building.

The platform provided by mass organizations stimulated the vitality of talent development within the company. Corporal Mao Ziqing was added to the Soldiers' Committee due to his outstanding performance, and the branch hoped he would inspire and motivate more comrades. Initially, Xiao Mao only knew how to do things but not how to teach. Deng Wei, the Party group leader, proactively paired him with Mao, providing hands-on guidance to improve his training and instruction abilities. Later, due to his significant contributions, Mao Ziqing was appointed squad leader and was also recognized as an outstanding "Four Abilities" instructor in the brigade, receiving two third-class merit awards. He was recently recommended for further studies at a military academy.

Before leaving the team, Squad Leader Mao handed over his duties to Song Langlang, a highly capable member of the Youth League and a corporal. Now, Song has successfully filled the vacancy and is carrying out various tasks effectively.

Exploration ② Promoting the Formation of a Self-Operating Mechanism for Mass Organizations

Supervision and Proactive Action Achieve Synergistic Progress

One weekend, a football and volleyball competition organized by a company's Youth League branch was in full swing, with soldiers giving their all. After the administrative meeting on Sunday evening, the Military Committee announced the week's "Training Stars" and "Most Improved Stars" and presented awards, receiving enthusiastic applause.

"Only by better integrating into daily work can the roles of the two organizations be truly demonstrated," the brigade leadership explained. Although relevant regulations clearly define responsibilities, the two organizations previously lacked experience in determining when, what, and how to do these tasks, often relying on the Party branch for supervision, and their proactive awareness and ability to carry out work were somewhat lacking.

Focusing on these issues, the brigade Party committee decided to further improve the self-operation mechanism of the two organizations, based on relevant regulations and using routine, fundamental work at the grassroots level as a vehicle: At the beginning of each year, each company's Party branch guides the mass organizations in formulating annual work plans, clarifying the main lines of work such as Party and Youth League member development and the implementation of organizational life; each quarter, the Party branch organizes the mass organizations to study the work situation and promptly correct deviations; each month, based on

the situation of building companies according to regulations, the key tasks for the month are analyzed and deployed; and a "Weekly Work Schedule" guides and supervises the implementation of the two organizations, breaking down the branch's resolutions and plans into specific tasks and goals, helping the mass organizations enhance their ability to build themselves, plan their own activities, and solve problems independently.

"With a well-established mechanism in place and sufficient time for adjustment, the initiative in our work has increased," said Secretary Zeng of a certain company's Party branch, opening a weekly schedule. He explained that the online dating and marriage issues among soldiers in recent years have warranted attention, and he had long wanted to give a lecture on marriage and relationships. However, being single himself, he felt his prepared lecture lacked persuasiveness. Later, with suggestions from two organizations, Secretary Zeng decided to first explain the correct views on marriage and relationships for soldiers, and then arrange for married comrades from both organizations to share their experiences and insights on dating and marriage in a tiered manner. This approach ultimately yielded positive results.

During the operation of the mechanism, the company also compiled a "weekly, monthly, quarterly, and annual work list" for its mass organizations. Opening this electronic list, one can see that in addition to the "required actions" for each time period, there are also "optional actions" proposed by the two organizations based on feedback from the masses and their actual work situation. Below the completed tasks, the list also includes process steps, experience summaries, and key points to help accumulate experience and better conduct future work.

"This checklist is easy to follow," said Deputy Secretary Chen of the company's Youth League branch. The monthly collective birthday celebrations organized by the Youth League branch and the bi-weekly "complaint sessions" organized by the soldiers' committee have become popular activities among the company's officers and men.

Holding rifle presentation ceremonies, awarding exclusive honorary numbers, and swearing oaths facing the military flag... A few days ago, the new recruits of the brigade completed their second period of intensive training and officially returned to their companies. The mass organizations of each company planned ahead according to the work plan, cooperating with the Party branch to organize various forms of welcoming ceremonies, guiding the new recruits on their new journey.

Exploration ③ Each position and squad is assigned members of the "Three Major Organizations"

Highlighting Task-Driven Efforts to Overcome Difficulties

First Shot Hit! Hit Every Time!

Not long ago, the third platoon of a certain company participated in its first live-fire test after being equipped with a new type of equipment. The platoon leader, Chu Hongxiao, was the first to go, hitting the bullseye with two missiles, boosting the morale and confidence of the entire platoon. Ultimately, the third platoon achieved the best results among units of its type.

“Now, when carrying out missions, each squad has three main organizational members, and each important position is led by a Party member or committee member. The mission strategy is clearer, and morale is higher,” said Platoon Leader Chu. He explained that their platoon often has to carry out missions independently, and sometimes several tasks are being carried out simultaneously within the company. The company commander and political instructor are often overwhelmed and may not be able to oversee them all. “Short-term missions are manageable, but with longer mission cycles, without organized operation, relying solely on a few key members in the platoon to drive the work inevitably affects the mission’s effectiveness.” The situation in the third platoon is not unique to this brigade. Due to the heavy workload of training and combat readiness, some companies, platoons, and even squads often have to carry out missions independently. Relying solely on the Party branch leadership and a few cadres is often insufficient, and it’s sometimes difficult to cover everything.

“Establishing ‘Party member assault teams’ at critical junctures of major missions and promoting the traditional approach of ‘I’m a Party member, follow me!’ remains effective, but it cannot fully meet the evolving needs of the situation,” the brigade leadership explained. To improve the ability to tackle missions under dispersed conditions, Party organizations at all levels must fully mobilize the enthusiasm of mass organizations and leverage their advantages of large membership and wide coverage.

In response to the situation where some mass organizations were “silent” or “hidden” during major tasks, transforming from “assistants” to “underlings,” they scientifically arranged members of the “three major organizations” into groups based on the number of personnel involved. Each group was led by a Party member, and in addition to Party member assault teams, Youth League member vanguard teams were also established as needed. The officers and men generally felt that aligning the task line with the organizational line facilitated communication between Party and mass leaders, and the pairing of new and experienced personnel for mutual assistance. This ensured that when the Party branch issued a call to action, the mass organizations responded and followed up, forming a united front to overcome challenges.

In one joint training exercise involving multiple services and branches, a company needed to assemble a small team encompassing multiple specialties. Before departure, the Party branch conducted a special study and deployment: organizing education and mobilization, and comprehensively assigning members of the “three major organizations,” extending organizational reach to every vehicle crew; during the mission, Youth League branch committee members led Youth League members in continuous propaganda and mobilization, following up on good deeds; and members of the soldiers’ committee promptly mobilized participating officers and men to offer suggestions and dynamically collect their thoughts, feedback, and opinions.

During the mission, the three organizations worked together seamlessly, assisting naval personnel in handling emergencies, collecting equipment data, and completing joint training operations, testing various training methods and tactics.

“Within the mission group, everyone felt the organization’s care and also developed strong camaraderie,” said Wang Huajie, an armored vehicle technician and Party member from a certain company. Prior to the mission, the higher command organized training for new armored vehicle crew members, and the branch appointed Wang Huajie as the training group leader. Sergeant Wang Qinxuan and Corporal He Ming served as both professional instructors and members of the two organizations. During the mission, the three worked closely together, ensuring personnel morale, management and supervision, and logistical support. At the end of the mission, the company achieved excellent results, with one member ranking first in driving and another ranking third in communications.

第七十七集团军某旅教育引导官兵扎牢对党忠诚的思想根子——

考验淬炼见真金

■毛彦苇 解放军报特约通讯员 刘 卓

雪域高原的严寒来得格外早，漫天风雪并没有影响火热的练兵热情.

这天，第 77 集团军某旅用一场实弹射击迎来上级的抽考. 多个波次、多型弹药火力打击过后，预设靶标被全部摧毁. 与这份亮眼的成绩单相比，官兵们不畏艰难困苦、一心只为打赢的那股拼劲，更令考核组欣慰：“经过政治整训洗礼，大家的精神面貌果然不一样！”

走进旅史馆，一幅标注着各种箭头的中国地图尤为醒目. 转战华北、逐鹿中原、进入两广、解放云南……一条不断延伸的转战路线，无声诉说着这支在抗日烽火中诞生的劲旅，在党的指挥下南征北战的光荣历史.

这条路线的最后一段，有两处格外明显的“转折”——2017 年初夏，该旅依令北上，从云南移防至重庆. 当年年底，部队奉命再度启程，一路向西，整建制驻防雪域高原.

“党叫干啥就干啥，打起背包就出发. ”一年两次移防，难度可想而知. 全旅官兵以党性应考、用忠诚作答，始终听令而动，雷厉风行.

这段经历，成为该旅开展政治整训的生动教材. 官兵们温故知新、常讲常新，通过专题授课、对照检查、讨论辨析、思想清理，不断扎牢永远听党话、跟党走的思想根子.

某营司务长谢武有 3 个孩子. 那年，一家人刚在云南团聚，结束 10 年的两地分居生活，他却要再一次告别妻儿.

一家之难，折射众家之难. “面对改革大考，没有思想斗争是不可能的，关键要看他最后作出了什么选择. ”该旅领导说，个人的进退走留、单位的撤并降改，都是现实考验，但在如山的军令面前，官兵没有一个人打退堂鼓.

“对党忠诚，从来不是抽象的概念、嘴上的口号，而是内心的信仰、脚下的行动. ”旅党委一班人头脑清醒：锻造忠诚品格，绝非朝夕之功，一定要经受反复淬炼.

整训中，他们把强根固本、纠正政治偏差作为重点，帮助官兵廓清思想认识和行为上的误区. 为了让党员干部有针对性地展开反躬自省，旅政委列举了几种现象——

执行上级的决策部署，有的单位打折扣、搞变通，嘴上说“结合自身实际”，实则是畏难推诿，不愿担当；

面对正常的岗位调整，有的干部挑挑拣拣，跟组织谈条件、讲价钱，把党性原则和组织纪律忘在了脑后；

有的领导干部逢会必讲忠诚，私下里却妄评妄议……

“大家身在基层，千万不要觉得这些问题离自己很远. 深究起来，其实每个人身上都或多或少存在，只是表现方式和程度不同而已. ”一名旅领导一针见血地说.

反思辨析时，一则往事被反复提及——

1950 年初，党中央指示 18 军进藏. 邓小平急令已被任命为川南行署主任的军长张国华速赴重庆受领最新任务. 1 月 10 日，接见 18 军领导时，邓小平开门见山：“今天谈话凭党性. ”张国华立即回答：“一切听从党安排. ”随后，他迅速返回部队准备有关事宜，并把不满 3 岁的女儿背在身上，挥师西进.

“今天谈话凭党性”“一切听从党安排”. 一问一答间，尽显对党的无限忠诚. 大家说，不同年代有不同的考验，但需要擦亮的是同一种政治本色.

现在，该旅移防西藏已满 5 年. 官兵们忘不了，当初步入新营区时看到的景象：窄小的院落、低矮的营房、斑驳的墙壁……

考验面前见忠诚. “再难，能有 18 军进藏难？”关键时刻，该旅党员干部站了出来，他们不等不靠，主动挑最重的担子、接最烫的山芋、啃最硬的骨头，发起新的冲锋. 如今，一座崭新的现代化军营拔地而起，官兵生活和训练条件得到极大改善.

驻守雪域高原，恶劣的自然环境，是检验官兵思想纯度的“试金石”，也是提升部队战斗力的“磨刀石”.

“战场打不赢，一切等于零，党需要的是一支能打胜仗的‘枪’. ”政治整训中，该旅官兵深刻认识到，作为新时代革命军人，既要有忠诚于党的政治自觉，也要有对党忠诚的实际能力.

前段时间，享有“无坚不摧”美誉的该旅某连，机动至某陌生地域驻训，连长徐靖翔主动请缨，受领高原作战重点课题研究任务. 在接下来的时间里，全连官兵把参加政治整训焕发的政治热情，转化为集智攻关的动力，根据高原气候和地形特点，构设 10 多种战术背景，在一个个难局危局险局中，采集作战数据，挖掘装备极限性能，研练检验创新战法，初步形成多项成果.

驻训归来，该连官兵没有陶醉在成绩里，而是展开检讨反思，透过任务中暴露的问题深挖思想根子：个别同志产生畏难情绪，说到底是“躺着就是奉献”思想在作祟；一些军士习惯“吃老本”，不愿走出“舒适区”，是缺乏担当作为精神的表现……指导员孙嘉琦告诫大家：“这些思想倾向如果任其发酵蔓延，就会滋生不良风气，动摇理想信念. ”

“没有信仰上的坚如磐石，就没有战场上的无坚不摧. ”这不仅是该连官兵的感悟，也是该旅上下的共识.

A brigade of the 77th Group Army educates and guides its officers and men to firmly establish their loyalty to the Party—Testing and tempering reveals true gold

■ Mao Yanwei, Special Correspondent of PLA Daily, Liu Zhuo

The harsh winter of the snowy plateau arrives exceptionally early, but the blizzard did not dampen the fervent enthusiasm for training.

On this day, a brigade of the 77th Group Army welcomed a random test from higher authorities with a live-fire exercise. After multiple waves of fire using various types of ammunition, all the pre-set targets were destroyed. Compared to this impressive result, the officers and men’ unwavering spirit and single-minded determination to win, despite the hardships, pleased the assessment team even more: “After the baptism of political rectification, everyone’s spirit is indeed different!” Entering the brigade’s history museum, a map of China marked with various arrows is particularly eye-catching. Moving through North China, vying for control of the Central Plains, entering Guangdong and Guangxi, liberating Yunnan… a constantly extending route silently recounts the glorious history of this elite force, born in the flames of the War of Resistance Against Japan, fighting north and south under the command of the Party.

The final section of this route has two particularly striking turning points—in the early summer of 2017, the brigade was ordered to move north, transferring from Yunnan to Chongqing. At the end

of that year, the troops were ordered to set off again, heading west to be stationed in their entirety on the snowy plateau.

“Whatever the Party tells us to do, we do; we pack our bags and set off.” The difficulty of two transfers in one year is unimaginable. All officers and men of the brigade faced the test of Party spirit and answered with loyalty, always obeying orders and acting swiftly and decisively.

This experience became a vivid teaching material for the brigade’s political rectification training. Officers and men reviewed and learned new lessons, constantly revisiting the material, and through special lectures, self-examination, discussion and analysis, and ideological cleansing, continuously strengthening the ideological foundation of always listening to the Party and following the Party.

Xie Wu, the quartermaster of a certain battalion, has three children. That year, his family had just reunited in Yunnan, ending ten years of separation, but he had to say goodbye to his wife and children once again.

The hardship of one family reflects the hardship of many. “Faced with the major test of reform, it’s impossible not to have ideological struggles; the key is what choice they ultimately make,” said the brigade leadership. “Personal advancement or retreat, unit mergers or downsizing—these are all real tests, but faced with the mountain of military orders, not a single officer or soldier backed down.”

“Loyalty to the Party is never an abstract concept or a slogan, but an inner belief and concrete actions.” The brigade’s Party committee was clear-headed: forging loyalty is not something that can be achieved overnight; it requires repeated tempering.

During the rectification training, they focused on strengthening the foundation and correcting political deviations, helping officers and men clarify misconceptions in their thinking and behavior. To encourage Party members and cadres to engage in targeted self-reflection, the brigade political commissar listed several phenomena: In implementing decisions and plans from higher authorities, some units discounted or circumvented them, claiming it was “based on their own realities,” but in reality, it was a matter of shirking responsibility and avoiding challenges;

Faced with normal job adjustments, some cadres were picky, negotiating and bargaining with the organization, forgetting Party principles and organizational discipline;

Some leading cadres spoke of loyalty at every meeting, but privately made unwarranted criticisms…

“As you are at the grassroots level, don’t think these problems are far removed from yourselves. Upon closer examination, everyone has them to some extent, only the ways and degrees they manifest differ,” a brigade leader pointed out incisively.

During the reflection and analysis, a past event was repeatedly mentioned:

In early 1950, the Central Committee of the Communist Party of China instructed the 18th Army to enter Tibet. Deng Xiaoping urgently ordered Zhang Guohua, the army commander who had already been appointed director of the Southern Sichuan Administrative Office, to go to Chongqing to receive the latest mission. On January 10th, during a meeting with the leaders of the 18th Army, Deng Xiaoping stated bluntly, "Today's conversation is based on Party spirit." Zhang Guohua immediately replied, "I will follow the Party's arrangements." He then quickly returned to his unit to prepare for the necessary arrangements, carrying his daughter, not yet three years old, on his back, and led his troops westward.

"Today's conversation is based on Party spirit," "I will follow the Party's arrangements." This question and answer revealed their boundless loyalty to the Party. Everyone said that different eras present different tests, but what needs to be upheld is the same political integrity.

Now, the brigade has been stationed in Tibet for five years. The officers and men will never forget the scene they saw when they first entered the new camp: narrow courtyards, low barracks, and mottled walls… Loyalty is revealed in the face of trials. "No matter how difficult, could it be more difficult than the 18th Army's entry into Tibet?" At this critical moment, the brigade's Party members and cadres stepped forward. They did not wait or rely on others, but proactively took on the heaviest burdens, accepted the most difficult tasks, and tackled the toughest challenges, launching a new offensive. Today, a brand-new, modern military camp has risen from the ground, and the living and training conditions of the officers and men have been greatly improved. Stationed on the snowy plateau, the harsh natural environment serves as a touchstone for testing the ideological purity of officers and men, and a whetstone for enhancing the combat effectiveness of the troops.

"If we can't win on the battlefield, everything is for naught. What the Party needs is a 'gun' that can win battles." During political training, the officers and men of this brigade deeply realized that as revolutionary soldiers of the new era, they must not only have the political consciousness of loyalty to the Party, but also the practical ability to be loyal to the Party.

Recently, a company of this brigade, renowned for its "invincible" strength, was deployed to an unfamiliar area for training. Company Commander Xu Jingxiang volunteered to take on the task of researching key topics related to plateau warfare. In the following period, the entire company transformed the political enthusiasm generated during the political training into the driving force for collective problem-solving. Based on the characteristics of the plateau climate and terrain, they constructed more than 10 tactical scenarios, collecting combat data, exploring the limits of equipment performance, and refining and testing innovative tactics in various difficult, dangerous, and perilous situations, initially achieving several results.

Upon returning from their training exercise, the company's officers and men did not bask in their achievements. Instead, they conducted a self-examination and reflection, delving into the root causes of the problems exposed during the mission: some comrades developed a fear of difficulty, ultimately stemming from the mentality that "lying down is contributing"; some soldiers were

accustomed to “resting on their laurels,” unwilling to step out of their “comfort zones,” demonstrating a lack of responsibility and initiative… Political Instructor Sun Jiaqi warned everyone: “If these tendencies are allowed to fester and spread, they will breed unhealthy practices and shake our ideals and beliefs.”

“Without unwavering faith, there can be no invincibility on the battlefield.” This is not only the company’s insight but also the consensus of the entire brigade.

“杀！杀！杀！”

深秋，记者一走进南部战区某部“模范红一连”，就被训练场上的火热场景所吸引. 战士们士气高昂展开刺杀训练，动作干净利落、整齐划一.

“马步击肋，上步砍劈……”一名年轻的中士一边下达口令，一边帮助战士纠正动作.

“这是刺杀操训练负责人李章，不仅军事素质过硬，还在上级组织的‘三会一好’政治教员比武中拿过第二名.”该连周指导员告诉记者.

入伍前，李章上过 3 年武校，体能基础扎实. 下连后，李章很快在军事训练中崭露头角，但理论学习就有些“挠头”.

在“模范红一连”，军政兼优是基本要求. 那次“三会一好”政治教员比武，周指导员特意将任务交给李章，鼓励他“大胆试、勇敢闯”.

备战比武期间，李章一有时间就查阅资料、修改讲稿，准备了大半个月.

“解放战争时期，我连前身部队一名战士在战斗中不幸中弹. 生命的最后一刻，他紧紧抓住班长的手问：‘班长，我这个表现够不够入党条件？’”比武那天，李章声情并茂的授课，深深打动了台下评委，取得第二名的好成绩，是参赛选手中唯一获奖的军士.

作为一名警卫战士，该怎么把“听党话、跟党走”落实到行动中？这次政治教员比武，让李章有了深刻的体会和认识.

如今，综合素质过硬的李章不仅入了党，还成为连队骨干，多次在比武竞赛中获奖.

人人学理论、人人用理论. 建连 95 年来，“模范红一连”的这个优良传统，一直延续到今天.

该连前身是中国工农红军中央警卫团第一连，是毛泽东同志指派警卫排长龙开富在井冈山创建的. 连队参加了娄山关、直罗镇、平型关等战役战斗 450 余次，以敢打硬拼、不辱使命的英勇表现，出色完成一系列安全警卫任务，被原广州军区授予“模范红一连”荣誉称号.

走进该连荣誉室，陈列柜里摆放着当年战士们用过的学习用品. 一本《中国共产党红军第四军第九次代表大会决议案》，已经泛黄起皱. 旁边摆放的一本册子上，写着“警卫战士条件”，其中一条是：“学习军事政治，熟练警卫任务，增加文化知识，开展自我批评，努力提高自己. ”

荣誉室墙上，一张张老照片，无声地诉说着连队走过的辉煌历程. 其中一张老照片，引起记者的注意. 照片中，几名战士利用行军间隙，抓紧时间学习马列著作. 周指导员告诉记者：“当年周恩来同志在国外求学期间，阅读了大量介绍社会主义和马克思主义基本原理的进步书籍. 他在日记中写道：想要想比现在还新的思想，做要做现在最新的事情，学要学离现在最近的学问. 对官兵来说，党的创新理论就是‘最近的学问’. 学习理论是连队一直传承的优良传统，一代代官兵在理论滋养下茁壮成长，不断夯实连队建设基础. ”

指着另一张两名战士的合影，周指导员介绍，这是连队战士李恒和金芝权参加上级军士警卫员集训时的照片. 那次集训考核，两人获得 3 个第一、1 个第二、1 个第三的好成绩，受到上级领导表扬. 他们两人，都是在“模范红一连”沃土里成长起来的.

李恒入伍前只有中专学历. 入伍之初，他一心想着服役期满就退伍. 后来，受连队浓厚的学习氛围熏陶，他渐渐养成了学习研究、读书思考的习惯.

长期的理论学习，转变了李恒的价值追求. 从一开始得过且过“熬日子”到后来一门心思“争一流”，李恒的训练成绩节节攀升，连续两年荣立三等功. 2022 年，李恒作为该部唯一一名保送入学的优秀士兵，进入陆军步兵学院学习.

00 后战士金芝权下连后，抓住一切机会，如饥似渴地学习理论知识、练强军事技能. 尽管入伍时间不长，但军事素质、理论素养全面过硬的他，已有多次执行重大任务的经历.

不久前，连队组织“读书分享会”，金芝权登上讲台，为战友们分享读书心得，鼓励大家“在不断进取中成为更好的自己”.

在“模范红一连”，官兵“日记一题、周学一文、月读一书”已成行为自觉. 连队注重利用各种学习资源，与驻地图书馆建立“图书流动机制”，定期更新学习室的图书；定期组织“读书分享会”、评选“理论学习之星”，大力营造浓厚学习氛围.

连队注重利用碎片化时间开展微教育，每次吃饭集合前，都组织官兵轮流分享红色经典、学习收获、成长故事，“3 分钟不嫌少、5 分钟不嫌多”.

新兵杨俊告诉记者，班长孙宇培每天休息前都会抽时间看会儿书，抽屉里的几本理论书籍被他翻得卷了边. 在连队官兵眼中，孙宇培是一个“传奇”：入伍第一年，军事体育训练成绩达标“特三级”，当上副班长；选晋军士前，他在训练中韧带受伤，出院没多久便走上考场，取得了良好成绩.

翻开孙宇培的读书笔记，里面密密麻麻记满了每一次理论学习的心得体会. 这种扎扎实实的学习精神，不仅加速了自己的成长，也深刻影响着身边战友.

杨俊入伍前，一直以为到部队就是操枪弄炮，来到连队才知道，自己主要的工作是站岗执勤. “征战沙场”的愿望落空，让他一度感到困惑.

“一艘航母想要发挥战斗力，少一颗螺丝钉都不行. 我们的岗位虽然平凡，责任却很重大. ”班长孙宇培的一番话，让杨俊深受触动，思想也发生了很大转变.

如今，杨俊成了连队国旗班的一员. 每当亲手升起国旗，他的心底都会涌起无比的自豪. 杨俊说连队的战斗口号“忠诚警卫事业，甘当无名英雄”，是官兵共同的座右铭.

每个人的一小步加起来，就是连队的一大步. 近年来，“模范红一连”所获荣誉铺满荣誉室整整一面墙，有 2000 多人次立功受奖.

“奋进强军路，打好攻坚战，每个人都是参与者、贡献者. 在平凡岗位上履行好普通一兵的职责，就是为如期实现建军一百年奋斗目标贡献力量. ”周指导员说，将继续坚持用党的创新理论建连育人，把官兵凝聚成“钢铁的集体”，推动连队建设全面进步、全面过硬.

探 源

理论创新每前进一步、理论武装就跟进一步

坚持用科学理论武装官兵，从思想上政治上建设和掌握军队，是我军政治工作优良传统，也是人民军队从胜利走向胜利的根本保证.

1929 年，红四军两次由赣南进入闽西，开辟了闽西革命斗争的崭新局面，但也面临着诸如单纯军事观点、主观主义、流寇思想等非无产阶级思想蔓延的严峻考验. 当年 12 月召开的古田会议，在高度重视党的组织建设的同时，着重强调加强党的思想建设，强调通过有计划地对党员进行马克思主义和党的正确路线教育，不断开展同党内错误思想的斗争，以保证党和红军内“无产阶级的思想领导”，并具体规定了开展思想教育的方法和途径.

1941 年，毛泽东同志在延安高级干部会议上作了《改造我们的学习》的报告，拉开了延安整风运动的序幕. 全党普遍整风从 1942 年春开始，主要任务是党的各级干部学习中央规定的文件，以整顿思想方法和思想作风为主，反对主观主义以整顿学风，反对宗派主义以整顿党风，反对党八股以整顿文风，使党的领导机关和干部进一步掌握了马克思列宁主义的普遍真理同中国革命实践相结合的原则，树立了联系群众、调查研究、实事求是的优良作风. 延安整风运动是一场以科学理论武装为重点的马克思主义思想教育运动，实现了全党思想上的统一、政治上的团结和行动上的一致，为夺取革命的胜利奠定了坚实思想政治基础.

新中国成立后，我们党始终坚持理论创新每前进一步、理论武装就跟进一步，保证了全党有效应对“赶考”路上的一切艰难险阻. 在古田全军政治工作会议上，习主席将我军在长期实践中形成的政治工作优良传统创造性地概括为“十一个坚持”，其中一条就是“坚持用科学理论武装官兵”. 从古田会议奠基到延安整风深化，再到新时代的赓续创新，“用科学理论武装官兵”已融入人民军队的精神血脉，成为确保军魂永固、战斗力不竭的根本所在.

（杨泽南整理、王瑞泓作图）

视 点

品出理论的“甘甜味”

■张 迪

古田会议召开前夕，毛泽东同志在给中央的信中写道：“惟党员理论常识太低，须赶急进行教育. 除请中央将党内出版物（布报，《红旗》，《列宁主义概论》，《俄国革命运动史》等，我们一点都未得到）寄来外，另请购书一批……我们望得书报如饥如渴，务请勿以事小弃置. ”在起草古田会议决议时，他又深刻指出：“为了红军的健全与扩大，为了斗争任务之能够负荷，都要从党内教育做起. ”

指导思想先进、理论武装先行，是我们党的特有优势，也是我军的重要法宝. 坚持用科学理论武装官兵，是我军政治工作的优良传统. 我军的历史和实践充分证明，没有革命的理论，就不会有革命的行动. 理论一经掌握群众，就会变成强大的物质力量.

理论武装贵在“求本”. 理论武装，不是教条式的死记硬背，而是要掌握马克思主义的立场、观点、方法. 应摒弃可以用专业学习替代理论学习的观点，纠治认为学不学无所谓、不学照样干工作的看法，杜绝做表面文章、不求实效的做法. 说到底，理论武装学的是一种根本性的认识论、方法论、价值论，是一种打根基、利长远的学习，不可或缺、至关重要.

理论武装重在“结合”. 一名基层教导员在分享工作体会时说，官兵看到身边的实践转化，就能品出理论的“甘甜味”. 政治干部结合官兵实际，结合工作实际，多形式多渠道展现党的创新理论的真理力量、精神力量、实践力量，帮助官兵搞清楚、弄明白理论的源泉是什么、实践基础是什么、战略考量是什么，就能引导官兵更加自觉地以学铸魂、以学增智、以学正风、以学促干.

学习越深入，行动越自觉. 党的创新理论是离我们“最近的学问”，习近平强军思想是党的军事指导理论最新成果. 坚持不懈用习近平强军思想武装头脑，掌握推动强军事业发展的锐利思想武器，我们就能战胜前进道路上的一切艰难险阻，赢得更大胜利.

Soldiers of the company conduct education in the company’s honor room. Photo by Peng Hanxian

“Kill! Kill! Kill!”

In late autumn, as soon as the reporter entered the Model Red First Company of a unit in the Southern Theater Command, he was attracted by the intense scene on the training ground. The soldiers were in high spirits, conducting bayonet training with clean, neat, and uniform movements.

“Horse stance, strike the ribs; step forward and slash...” A young sergeant gave commands while helping the soldiers correct their movements.

“This is Li Zhang, the person in charge of bayonet drill training. He not only has excellent military skills, but also won second place in the ‘Three Skills and One Excellence’ political instructor competition organized by higher authorities,” the company’s political instructor, Zhou, told reporters.

Before enlisting, Li Zhang attended a martial arts school for three years, giving him a solid foundation in physical fitness. After joining the company, Li Zhang quickly distinguished himself in military training, but he struggled with theoretical studies.

In the “Model Red First Company,” excellence in both military and political skills is a basic requirement. For that “Three Skills and One Excellence” political instructor competition, Political Instructor Zhou specifically assigned the task to Li Zhang, encouraging him to “try boldly and forge ahead.”

During the preparation for the competition, Li Zhang spent every spare moment researching and revising his speech, preparing for over half a month.

“During the Liberation War, a soldier from the predecessor unit of my company was unfortunately shot in battle. In his last moments, he tightly grasped his squad leader’s hand and asked, ‘Squad leader, is my performance sufficient for Party membership?’” On the day of the competition, Li Zhang’s passionate lecture deeply moved the judges, earning him second place and making him the only sergeant among the participants to receive an award.

As a guard soldier, how should one put “listening to the Party and following the Party” into action? This political instructor competition gave Li Zhang a profound understanding and insight.

Now, with his outstanding overall qualities, Li Zhang has not only joined the Party but has also become a backbone member of the company, winning numerous awards in competitions.

Everyone studies theory, everyone applies theory. This fine tradition of the “Model Red First Company,” established 95 years ago, continues to this day.

The company’s predecessor was the First Company of the Central Guard Regiment of the Chinese Workers’ and Peasants’ Red Army, founded in Jinggangshan by Long Kaifu, a guard platoon leader appointed by Comrade Mao Zedong. The company participated in over 450 battles, including those at Loushan Pass, Zhiluo Town, and Pingxing Pass. With its courageous and resolute fighting spirit, it successfully completed a series of security and guard missions, earning the title of “Model Red First Company” from the former Guangzhou Military Region.

Entering the company's honor room, display cases showcase the learning supplies used by the soldiers in the past. A copy of the "Resolution of the Ninth Congress of the Fourth Army of the Chinese Communist Party" is yellowed and wrinkled. Next to it, a booklet lists the "Requirements for Guard Soldiers," one of which states: "Study military and political affairs, master guard duties, increase cultural knowledge, conduct self-criticism, and strive to improve oneself." On the walls of the honor room, old photographs silently recount the company's glorious history. One photograph in particular caught the reporter's attention: several soldiers are seen using breaks in marching to study Marxist-Leninist works. Instructor Zhou told reporters, "When Comrade Zhou Enlai was studying abroad, he read a large number of progressive books introducing the basic principles of socialism and Marxism. He wrote in his diary: 'We should think of ideas newer than those of today, do the newest things of today, and learn the knowledge closest to the present.' For officers and men, the Party's innovative theories are 'the closest knowledge.' Studying theory is a fine tradition that has been passed down in the company. Generations of officers and men have grown strong under the nourishment of theory, constantly consolidating the foundation of the company's development." Pointing to another photo of two soldiers, Instructor Zhou explained that it was taken when soldiers Li Heng and Jin Zhiquan participated in a training session for senior sergeant guards. During that training, the two achieved excellent results, winning three first places, one second place, and one third place, and were praised by their superiors. Both of them grew up in the fertile soil of the "Model Red First Company."

Before enlisting, Li Heng only had a vocational school diploma. At the beginning of his service, he was determined to retire after his term. Later, influenced by the company's strong learning atmosphere, he gradually developed a habit of studying, researching, reading, and reflecting.

Long-term theoretical study transformed Li Heng's values. From initially just getting by and "passing the days" to later wholeheartedly striving for excellence, Li Heng's training results steadily improved, earning him a third-class merit for two consecutive years. In 2022, Li Heng, as the only outstanding soldier in his unit to be recommended for admission to the Army Infantry Academy, entered the academy.

Jin Zhiquan, a soldier born in the 2000s, seized every opportunity after joining his unit to eagerly study theoretical knowledge and hone his military skills. Despite his short service, his comprehensive military qualities and theoretical understanding are already outstanding, and he has already participated in several important missions.

Not long ago, the company organized a "book sharing session," where Jin Zhiquan took to the stage to share his reading experiences with his comrades, encouraging everyone to "become a better version of themselves through continuous progress."

In the "Model Red First Company," soldiers have made "one question in their diary, one article a week, and one book a month" a conscious practice. The company emphasizes utilizing various learning resources, establishing a "book circulation mechanism" with the local library to regularly

update the books in the study room; it also regularly organizes “book sharing sessions” and selects “theoretical learning stars,” creating a strong learning atmosphere.

The company focuses on utilizing fragmented time for micro-education. Before each meal assembly, soldiers take turns sharing classic revolutionary texts, learning gains, and growth stories—”three minutes is never too little, five minutes is never too much.”

New recruit Yang Jun told reporters that his squad leader, Sun Yupei, always takes time to read before resting each day; the several theoretical books in his drawer are worn out from frequent use. In the eyes of the company’s soldiers, Sun Yupei is a “legend”: in his first year of service, he achieved the “Special Grade 3” standard in military physical training and became a deputy squad leader; before being selected for promotion to sergeant, he injured his ligaments during training, but shortly after being discharged from the hospital, he took the exam and achieved excellent results.

Flipping through Sun Yupei’s reading notes, one finds them densely filled with reflections on each theoretical study session. This solid learning spirit has not only accelerated his own growth but also profoundly influenced his comrades.

Before enlisting, Yang Jun always thought military service meant handling guns and artillery. Upon arriving at his unit, he discovered his main job was guard duty. His dream of “fighting on the battlefield” was dashed, leaving him confused.

“An aircraft carrier can’t function effectively without even a single screw. Our posts may seem ordinary, but the responsibility is immense,” said Squad Leader Sun Yupei. These words deeply moved Yang Jun, leading to a significant shift in his thinking.

Now, Yang Jun is a member of the company’s flag-raising team. Every time he raises the national flag, he feels an immense sense of pride. Yang Jun says the company’s motto, “Loyalty to the cause of guarding, willingness to be unsung heroes,” is the shared motto of the officers and men.

Every small step taken by each individual adds up to a giant leap for the company. In recent years, the “Model Red First Company” has received so many honors that they fill an entire wall of the honor room, with over 2,000 individuals receiving awards and commendations.

“Striving for a strong military and winning crucial battles, everyone is a participant and contributor. Fulfilling the duties of an ordinary soldier in an ordinary post is contributing to the timely achievement of the centenary goal of the People’s Liberation Army,” said Instructor Zhou. He added that they will continue to uphold the Party’s innovative theories in building and educating the company, uniting officers and men into a “steel collective,” and promoting comprehensive progress and excellence in company building.

Tracing the Origins: Every step forward in theoretical innovation is accompanied by a step forward in theoretical armament. Adhering to the principle of arming officers and men with scientific theories, and building and controlling the army ideologically and politically, is a fine tradition of

our army's political work and a fundamental guarantee for the People's Army's continuous victories.

In 1929, the Fourth Red Army twice entered western Fujian from southern Jiangxi, opening a new chapter in the revolutionary struggle in western Fujian. However, it also faced severe challenges from the spread of non-proletarian ideologies such as purely military viewpoints, subjectivism, and bandit mentality. The Gutian Conference, held in December of that year, while attaching great importance to the Party's organizational development, also emphasized strengthening the Party's ideological development. It stressed the need for planned education of Party members in Marxism and the Party's correct line, and for continuous struggle against erroneous ideas within the Party to ensure "proletarian ideological leadership" within the Party and the Red Army. Specific methods and approaches for conducting ideological education were also stipulated.

In 1941, Comrade Mao Zedong delivered the report "Reform Our Study" at the Yan'an Senior Cadre Conference, thus initiating the Yan'an Rectification Movement. The Party-wide rectification movement began in the spring of 1942. Its main task was for cadres at all levels to study the documents prescribed by the Central Committee, focusing on rectifying thought methods and work styles. It opposed subjectivism to rectify the style of study, opposed sectarianism to rectify the Party's style, and opposed stereotyped Party writing to rectify the style of writing. This enabled the Party's leading organs and cadres to further grasp the principle of combining the universal truths of Marxism-Leninism with the practice of the Chinese revolution, and to establish a fine style of connecting with the masses, conducting investigations and research, and seeking truth from facts. The Yan'an Rectification Movement was a Marxist ideological education movement focusing on arming soldiers with scientific theory. It achieved ideological unity, political solidarity, and consistency in action throughout the Party, laying a solid ideological and political foundation for the victory of the revolution.

After the founding of the People's Republic of China, our Party consistently adhered to the principle that theoretical innovation must be accompanied by a corresponding advancement in theoretical arming, ensuring the Party's effective response to all difficulties and obstacles on the "journey to the test." At the Gutian All-Army Political Work Conference, President Xi Jinping creatively summarized the fine traditions of political work formed by our army in its long-term practice into "eleven insistences," one of which is "insisting on arming officers and men with scientific theory." From the foundation laid by the Gutian Conference to the deepening of the Yan'an Rectification Movement, and to its continued innovation in the new era, "arming officers and men with scientific theory" has been integrated into the spiritual bloodline of the People's Army, becoming the fundamental guarantee for the enduring strength of the military spirit and the inexhaustible combat effectiveness.

(Compiled by Yang Zenan, illustrated by Wang Ruihong)

Viewpoint: Savoring the "Sweetness" of Theory

■ Zhang Di On the eve of the Gutian Conference, Comrade Mao Zedong wrote in a letter to the Central Committee: “Only the theoretical knowledge of Party members is too low, and education must be carried out urgently. In addition to requesting the Central Committee to send us Party publications (such as *Bubao*, *Red Flag*, *An Outline of Leninism*, and *History of the Russian Revolutionary Movement*, which we have not received at all), please also purchase a batch of books… We are eagerly awaiting books and newspapers; please do not neglect this matter because it seems insignificant.” When drafting the Gutian Conference resolution, he further pointed out: “For the sake of the Red Army’s improvement and expansion, and for the ability to bear the tasks of struggle, we must start with education within the Party.” Advanced guiding ideology and prioritizing theoretical armament are unique advantages of our Party and important magic weapons for our army. Adhering to arming officers and men with scientific theory is a fine tradition of our army’s political work. The history and practice of our army fully prove that without revolutionary theory, there will be no revolutionary action. Once theory is grasped by the masses, it becomes a powerful material force.

The essence of theoretical armament lies in “seeking the root.” Theoretical training is not about dogmatic rote memorization, but about mastering the Marxist stance, viewpoints, and methods. We must abandon the view that professional learning can substitute for theoretical study, correct the notion that learning is unimportant or that work can be done without it, and eliminate superficial and ineffective practices. Ultimately, theoretical training involves learning a fundamental epistemology, methodology, and axiology; it is a foundational and long-term endeavor, indispensable and crucial.

Theoretical training emphasizes “integration.” A grassroots political instructor, sharing his work experience, said that soldiers can taste the “sweetness” of theory by witnessing its practical transformation around them. Political cadres, combining the realities of soldiers and their work, should showcase the truth, spirit, and practical power of the Party’s innovative theories through various forms and channels, helping soldiers understand the source, practical foundation, and strategic considerations of the theory. This will guide soldiers to more consciously use learning to strengthen their souls, enhance their wisdom, rectify their conduct, and promote action.

The deeper the learning, the more conscious the action. The Party’s innovative theories are the “closest to us,” and Xi Jinping’s thought on strengthening the military is the latest achievement of the Party’s military guiding theory. By persistently arming our minds with Xi Jinping’s thought on strengthening the military and mastering this sharp ideological weapon to promote the development of a strong military, we can overcome all difficulties and obstacles on our path forward and win even greater victories.

陆军、空军国际学员周分别在南京和西安开幕

来源：中国军网-解放军报 作者：尉寅础 肖力铭 杨正中 许怡真 责任编辑：林诗清

2025-11-04

陆军、空军国际学员周分别在南京和西安开幕

解放军报南京 11 月 3 日电 记者尉寅础、特约记者肖力铭报道：3 日上午，由陆军工程大学承办的第 12 届陆军国际学员周在南京开幕. 来自巴基斯坦、塞尔维亚、巴西等 13 国外军院校与我国 8 所陆军院校的学员混合编组，共同参加为期一周的训练和交流活动.

本届陆军国际学员周以“新域新质力量对未来战争影响”为主题，主要围绕无人装备发展对未来战争影响、打赢对抗环境下现代战争进行专题交流，进一步深化中外军事院校间务实合作. 活动期间，学员们将参与模拟联合国会议、专题研讨、领导（能）力挑战赛、装备参观和文化体验等活动.

据介绍，模拟联合国会议是本届陆军国际学员周的亮点之一，中外学员还将围绕人工智能在军事训练与未来战争中的伦理规范与应用边界展开对话，交流军事科技发展前沿动向.

自 2005 年以来，陆军国际学员周活动已成功举办 11 届，成为各国陆军院校交流思想、互学互鉴的重要平台，为推动国际军事教育合作、促进中外军队友好往来发挥了积极作用.

解放军报西安 11 月 3 日电 杨正中、记者许怡真报道：3 日上午，由空军工程大学承办的空军第 6 届国际学员周在西安开幕. 来自印度尼西亚、埃及、秘鲁等十余个国家的 33 名学员，与国防科技大学、空军航空大学等 12 所中方军事院校的学员混合编组，共同开展为期一周的学习训练、研讨交流和文化互动等活动.

本届空军国际学员周以“交流互鉴、厚植友谊、携手未来”为主题，旨在提升中外生长军官学员军事素养和跨文化交流能力，增进中外军队友好交流. 活动期间，中外学员将编成一个国际学员营，通过参观部队和观摩训练、参加军事科技研讨会、举行模拟联合国会议、体验中国传统文化等近 20 项丰富多彩的活动，进行深入的学习交流.

空军国际学员周活动自 2012 年开始，已成功举办 5 届. 活动为展示我军院校办学育人成果，深化国际军事教育交流合作，发展与各国空军友好关系发挥了积极作用.

The International Army and Air Force Cadet Weeks Open in Nanjing and Xi’an, respectively.

Source: China Military Network - PLA Daily Author: Wei Yinchu, Xiao Liming, Yang Zhengzhong, Xu Yizhen Editor: Lin Shiqing

2025-11-04

The International Army and Air Force Cadet Weeks Open in Nanjing and Xi’an, respectively.

PLA Daily, Nanjing, November 3 (Reporter Wei Yinchu, Special Correspondent Xiao Liming): The 12th International Army Cadet Week, hosted by the Army Engineering University, opened in

Nanjing on the morning of November 3. Cadet students from 13 foreign military academies, including those from Pakistan, Serbia, and Brazil, are mixed with students from 8 Chinese army academies to participate in a week-long training and exchange program.

This year's International Army Cadet Week focuses on the theme "The Impact of New Domain and New Quality Forces on Future Warfare," primarily discussing the impact of unmanned equipment development on future warfare and winning modern warfare in a confrontational environment, further deepening practical cooperation between Chinese and foreign military academies. During the event, cadets will participate in Model United Nations conferences, thematic seminars, leadership (capability) challenges, equipment visits, and cultural experiences.

According to reports, the Model United Nations conference is one of the highlights of this year's International Army Cadet Week. Chinese and foreign cadets will also engage in dialogue on the ethical norms and application boundaries of artificial intelligence in military training and future warfare, exchanging views on the latest developments in military technology.

Since 2005, the International Army Cadet Week has been successfully held 11 times, becoming an important platform for army academies from various countries to exchange ideas and learn from each other, playing a positive role in promoting international military education cooperation and fostering friendly exchanges between Chinese and foreign militaries.

Xi'an, November 3 (PLA Daily) – Yang Zhengzhong and reporter Xu Yizhen report: The 6th International Air Force Cadet Week, hosted by the Air Force Engineering University, opened in Xi'an on the morning of November 3. Thirty-three cadets from more than ten countries, including Indonesia, Egypt, and Peru, are mixed with cadets from 12 Chinese military academies, including the National University of Defense Technology and the Air Force Aviation University, to jointly conduct a week-long learning, training, seminars, exchanges, and cultural interactions.

This year's International Air Force Cadet Week, themed "Exchange and Mutual Learning, Strengthening Friendship, and Joining Hands for the Future," aims to enhance the military literacy and cross-cultural communication skills of Chinese and foreign officer cadets, and promote friendly exchanges between Chinese and foreign militaries. During the event, Chinese and foreign cadets will form an international cadet battalion and engage in in-depth learning and exchange through nearly 20 diverse activities, including visiting troops and observing training exercises, participating in military technology seminars, holding Model United Nations conferences, and experiencing traditional Chinese culture.

The Air Force International Cadet Week, which began in 2012, has been successfully held five times. The event has played a positive role in showcasing the achievements of our military academies in education, deepening international military education exchanges and cooperation, and developing friendly relations with air forces of other countries.

走进第 76 集团军某旅，感受凭素质立身、靠实绩进步的好风气

来源：解放军报 作者：臧乾雯 金雅兰 马嘉隆 责任编辑：郭妍菲 2025-11-04

开栏的话

政治整训是深入推进政治建军的战略抓手，是全面加强我军党的领导和党的建设的有力武器.

习主席在中央军委政治工作会议上强调，“发扬彻底的自我革命精神，持续深化政治整训”. 这一重要指示为新时代新征程深入推进政治整训指明了前进方向、提供了根本遵循. 全军各级深入贯彻中央军委政治工作会议精神，以整风精神深化政治整训，坚定不移推进政治整训往深里走、往实里落，座座军营正在发生很多喜人的变化.

即日起，解放军报开设“持续深化政治整训·军营新风”专栏，反映各部队持续深化政治整训给基层末端带来的新气象.

记者走进第 76 集团军某旅，感受凭素质立身、靠实绩进步的好风气——

让“颁奖台”成为“风向标”

■臧乾雯 解放军报记者 金雅兰 马嘉隆

金秋，祁连山腹地气温骤降. 距第 76 集团军某旅训练场还有一段距离，欢呼喝彩的声浪便朝记者一行涌来.

只见一座由重型机械化桥搭建的临时平台上，几名官兵身披“训练尖子”绶带，正接受表彰.

原来，这几名官兵在最近演训中表现出色，为充分营造“彰先励后”氛围，树起为战、务战、励战鲜明导向，该旅按绩施奖，在训练场上举行简短而热烈的颁奖仪式. “他们都是我们旅的顶梁柱. ”台下，某营宋营长和官兵热烈鼓掌.

第 76 集团军某旅班长唐源聪（左一）领奖归来. 张杰 摄

一排威严挺拔的身姿中，一张“娃娃脸”引起记者注意：这名看上去如此年轻的战士，也是骨干吗？“这是我们营兵龄最短、年龄最小的班长唐源聪. ”说起他，宋营长打开了“话匣

子”：去年底补充调整班长骨干时，组训能力突出的唐源聪虽符合相关条件，但与其他几名人选相比，兵龄短、年龄小，很多人认为他没有优势. 没想到，最后唐源聪被任命为班长.

“‘先来’者未必先冒尖，实力硬才能有机会. ”宋营长对记者说道，“别看他年纪小，技术非常过硬. ”

“嘟嘟嘟……”一阵哨音传来. 训练场上，一场骨干带头开展的技能小比武开始.

只见唐源聪驾驶挖掘机出发，又快又稳通过双轨桥、S 形弯道、起伏路等难行路段，并操作挖掘机铲斗从地上勾起 T 型钩，稳稳插入指定位置. 随后，他跳下车完成运电瓶、翻轮胎、滚油桶等一系列动作. 比武规模不大，但几个环节的设置很有讲究，不仅考验驾驶员操作机械的精准度，也磨炼他们的体能素质. 最终，唐源聪以用时最短、失误最少、总评分最高的成绩夺得冠军.

“选人用人风气好不好，官兵就看评功评奖、职级晋升、执行任务时，组织到底选谁、用谁. ”宋营长告诉记者，如今，唐源聪不仅是所在连队重难点课目教练员，还是旅里知名的“创客”. 他研发的“方向线辅助尺”“夜间作业折叠板”等训练辅助器材，已经通过检验，在旅里推广使用.

“持续深化政治整训，就要匡正选人用人风气，摒弃论资排辈、平衡照顾的旧观念. ”该旅领导说，“如今，论资排辈没市场了，平衡照顾被打破了，一些官兵在‘功劳簿’上躺不住了. ”

在该旅领导带领下，记者一行前往“老山筑城英雄连”，经过该旅车场，只见一排排工程机械装备排列整齐，一名干部正带领官兵检修车辆.

“沉下心来强本领、干业绩，心态才不会‘飘’. ”谈起自己的成长经历，这名干部直言“有些惭愧”. 今年第一季度旅里调整干部时，他本以为自己资历老、立过功，提升职务是“板上钉钉”的事. 结果，一些资历不如他，但工作能力更强、成绩更突出的干部得到提拔，他错失了机会. 如今，在这名干部心里，排辈分、熬年头的想法没了，他一心只想补齐短板、再立新功.

有人徒留遗憾、扼腕不已，也有人乘势而上、脱颖而出.

荣立三等功、被增补为连队党支部委员、成为负责旅队机具作业手职业技能鉴定考核的考官之一……去年底以来，一连串“好事”落在“老山筑城英雄连”二级上士李发光身上.

“会不会有人质疑，‘好事’怎么总‘轮’到他？”记者问道. 李发光的战友、上等兵郑绍亮摆摆手，语气坚定地说：“是金子就会发光. 这些‘好事’可不是‘轮’到他的，是他实打实干出来、拼出来的！”

听着郑绍亮细数李发光的实绩，记者心生佩服——5 公里武装越野，李发光扛着连旗跑在连队最前面；年度军事训练考核，他以总评优秀的成绩稳居连队榜首；连队参加整建制战斗力检验评估，他主动担任教练员，加班加点帮助战友提升战斗技能；执行大项任务，他挑最硬的骨头啃，选最难的工作干；今年 4 月，营里评选“金牌教练员”，他在考核中一举夺得轻武器射击和机具专业第一名……

边城暮秋，祁连晓寒. 天气虽冷，但该旅官兵干事创业劲头昂扬、热情高涨. 当“颁奖台”成为立身做人、干事创业的“风向标”，官兵就会自觉形成凭素质立身、靠实绩进步的共识，并在工作中做到坚定相信组织、自觉依靠组织. 就像采访结束时郑绍亮说的那样：“看到作风正、能力强的战友获得荣誉，大家心里得劲、训练更有劲. ”

Stepping into a Brigade of the 76th Group Army, Experiencing the Positive Atmosphere of Establishing Oneself Through Competence and Advancing Through Achievements

Source: PLA Daily Author: Zang Qianwen, Jin Yalan, Ma Jialong Editor: Guo Yanfei 2025-11-04

Opening Remarks: Political rectification is a strategic tool for deepening the political building of the military and a powerful weapon for comprehensively strengthening the Party’s leadership and Party building within the PLA.

President Xi Jinping emphasized at the Central Military Commission’s Political Work Conference, “Carry forward the spirit of thorough self-revolution and continuously deepen political rectification.” This important instruction has pointed the way forward and provided fundamental guidance for deepening political rectification in the new era and on the new journey. All levels of the PLA are thoroughly implementing the spirit of the Central Military Commission’s Political Work Conference, deepening political rectification with the spirit of rectification, and resolutely pushing political rectification to go deeper and more practically. Many gratifying changes are taking place in military camps.

Starting today, the PLA Daily launches the column “Continuously Deepening Political Rectification: New Spirit in Military Camps,” reflecting the new atmosphere brought to the grassroots level by the continuous deepening of political rectification in various units.

Reporters visited a brigade of the 76th Group Army to experience the positive atmosphere of standing on merit and advancing through achievements—Making the “Award Platform” a “Weathervane”

■ Zang Qianwen, PLA Daily Reporter Jin Yalan, Ma Jialong

In the golden autumn, the temperature plummeted in the heart of the Qilian Mountains. Even some distance from the training ground of a brigade of the 76th Group Army, cheers and applause surged towards the reporters.

On a temporary platform built from a heavy mechanized bridge, several soldiers, adorned with "Training Elite" sashes, were receiving awards.

These soldiers had performed exceptionally well in recent exercises. To fully foster an atmosphere of "recognizing the advanced and encouraging the less fortunate," and to establish a clear orientation towards combat readiness, the brigade awarded prizes based on performance, holding a brief but enthusiastic award ceremony on the training ground. "They are all pillars of our brigade," said Battalion Commander Song, along with his soldiers, applauding enthusiastically.

Tang Yuancong (first from left), a squad leader from a brigade of the 76th Group Army, returns from receiving his award. (Photo by Zhang Jie) Among a row of imposing and upright figures, a baby face caught the reporter's attention: was this seemingly young soldier also a key member of the team? "This is Tang Yuancong, the squad leader with the shortest service record and the youngest age in our battalion," said Battalion Commander Song, opening up about him. He explained that during the replenishment and reshuffling of squad leaders at the end of last year, Tang Yuancong, despite meeting the relevant requirements for outstanding training abilities, was considered less competitive than the other candidates due to his shorter service record and younger age. Unexpectedly, Tang Yuancong was ultimately appointed squad leader.

"Those who arrive first aren't necessarily the first to stand out; only those with strong skills have a chance," Battalion Commander Song told the reporter. "Don't underestimate him because of his young age; his skills are exceptional."

"Toot toot toot..." A whistle blew. On the training ground, a skills competition led by key personnel began.

Tang Yuancong drove an excavator, quickly and steadily navigating difficult sections such as a double-track bridge, S-shaped bends, and undulating roads. He then manipulated the excavator bucket to hook a T-shaped hook from the ground and steadily insert it into the designated position. He then jumped off the vehicle and completed a series of actions, including transporting batteries, flipping tires, and rolling oil drums. The competition was small in scale, but the design of each stage was meticulous, testing not only the drivers' precision in operating machinery but also their physical fitness. Ultimately, Tang Yuancong won the championship with the shortest time, fewest mistakes, and highest overall score.

"Whether the personnel selection and appointment system is good or not is judged by who the organization chooses and uses when evaluating merits, awards, promotions, and carrying out missions," Battalion Commander Song told reporters. Now, Tang Yuancong is not only an instructor for key and difficult subjects in his company but also a well-known "innovator" in the brigade. His developed training aids, such as the "direction line auxiliary ruler" and the "night operation folding board," have passed testing and are being promoted for use throughout the brigade.

“To further deepen political rectification, we must correct the prevailing atmosphere in personnel selection and appointment, and abandon the old concepts of seniority-based promotion and preferential treatment,” said a leader of the brigade. “Now, seniority-based promotion has no place, preferential treatment has been broken, and some officers and men are no longer content to rest on their laurels.”

Led by the brigade leadership, a group of reporters visited the “Heroic Company of Laoshan Fortification Construction.” Passing through the brigade’s vehicle yard, rows of engineering machinery were neatly arranged, and an officer was leading soldiers in vehicle maintenance.

“Only by focusing on improving skills and achieving results can one avoid becoming complacent,” the officer said, frankly admitting some shame when discussing his career path. During the brigade’s cadre reshuffle in the first quarter of this year, he assumed that his seniority and past achievements made promotion a certainty. However, some officers with less seniority but stronger work abilities and more outstanding achievements were promoted, and he missed the opportunity. Now, this officer has abandoned the idea of seniority-based promotion and focusing solely on improving his weaknesses and achieving new successes.

Some were left with regrets and deep remorse, while others seized the opportunity and rose to prominence.

Awarded a third-class merit, added to the company’s Party branch committee, and became one of the examiners responsible for the brigade’s machinery operator skills assessment… Since the end of last year, a series of “good things” have fallen upon Sergeant Li Faguang of the “Laoshan Fortress Construction Hero Company.”

“Won’t some people question why these ‘good things’ always seem to ‘come’ to him?” a reporter asked. Li Faguang’s comrade-in-arms, Private Zheng Shaoliang, waved his hand and said firmly, “Gold will always shine. These ‘good things’ didn’t just fall into his lap; he earned them through hard work and dedication!” Listening to Zheng Shaoliang recount Li Faguang’s achievements, the reporter felt admiration—in the 5-kilometer armed cross-country run, Li Faguang carried the company flag and ran at the front of the company; in the annual military training assessment, he consistently ranked first in the company with an excellent overall score; when the company participated in the overall combat effectiveness evaluation, he volunteered to serve as an instructor, working overtime to help his comrades improve their combat skills; when carrying out major tasks, he chose the toughest challenges and the most difficult jobs; in April of this year, in the battalion’s “Gold Medal Instructor” selection, he won first place in both light weapons shooting and machine tool specialties… Late autumn in the border town, a chill in the Qilian Mountains. Although the weather was cold, the officers and men of the brigade were full of enthusiasm and high spirits in their work. When the “award platform” becomes a “weathervane” for personal conduct and career advancement, officers and men will consciously form a consensus that they should establish themselves based on their qualities and advance through their achievements, and in their work, they will firmly believe in and consciously rely on the organization. Just as Zheng Shaoliang said

at the end of the interview: “Seeing comrades with good conduct and strong abilities receive honors makes everyone feel good and more motivated to train.”

有规范，还要灵活运用

■柴文静

天色渐暗，戈壁滩风沙滚滚. 借着一簇簇骆驼刺丛掩护，几名战士悄然穿行.

“东南方向疑似有小股‘敌人’出没！”在第 83 集团军某旅组织的这场红蓝对抗中，收到上等兵、潜伏哨小齐上报的情况，红方指挥员、某连周连长立即派侦察组前出处置.

行进中，侦察组组长、某班左班长低声提醒战友：“动作要标准规范，给对手来个出其不意……”组员们结合平时训练要求，压低身形、警惕观察、掩护前进.

不多时，小组一行人抵近至目标区域，可百般搜索不见“敌”踪. 疑惑之际，蓝方突然从四面八方包围过来，侦察组直接被“包了饺子”.

“我们行进规范合理，是怎么被发现的？”行动失败，左班长既憋屈又茫然.

这时，蓝方指挥员、作训科高科长拿起军用望远镜递给左班长，让他望向远处一处骆驼刺丛.

只见骆驼刺丛中，一只作战靴若隐若现. 这正是红方潜伏哨小齐所在位置. 尽管他潜伏全程悄无声息，但露出的作战靴已暴露了自己. 蓝方发现后并未轻举妄动，而是在周围设伏，守株待兔.

“潜伏哨动作符合平时训练规范，但若是根据现场隐蔽地域实际双脚稍微并拢，就能被吉利服和沙丘遮挡，我们也很难发现. ”高科长指出问题所在.

放下望远镜，看着身边“被俘”的战友们，左班长满脸通红：“小齐的潜伏动作是我给他规范的. 连长一直说要根据战场情况灵活应变，我今天终于理解了. ”

原来，以往日常训练中，左班长对全班战友要求比较严格，把每个训练动作规范得一清二楚，从持枪姿势到跃进路线，都要求保持统一，还经常组织正误对比来纠正班内人员的战术动作. 周连长曾提醒他，动作规范只是基础，“上了战场要灵活运用”.

“练兵备战固然需要高标准、严要求，标准战术动作也确实能够最大化提升作战效率，但若不考虑战场实际环境，固守教条、动作僵化，就会与实战要求背道而驰. ”复盘检讨时，周连长告诉大家.

他回忆，此前一次连战术考核，一名上等兵紧急接到“伤员左大腿骨折”特情. 这名战士冒着“炮火”前出检查伤情后，又转身跑回几十米外的装备车，翻找拿出夹板、急救包、止血带等急救用品. 整个过程规范有序，却足足持续了十多分钟. 当时他并未考虑到，伤员腰间的内腰带就可以被用作止血带，旁边散落的粗树枝也可当作简易夹板. 如果就便取材利用，伤员急救时间能大幅缩短，战场风险也会大大降低.

“标准动作有助于练好基本功，但要在此基础上活学活用”“打得赢才是硬标准”……见官兵纷纷点头，连长随即引导大家检视反思训练中存在的问题现象：潜伏伪装，地形因素考虑不周；掩体构筑，不按身形测量按固定标尺；装备运用，战术单一墨守成规，等等. 官兵你一言我一语，许多“病根”被一一挖出.

“战场上，只有规范动作还不够. ”厘清认识后，左班长改变了以往训练思路，日常训练更注重引导大家紧贴任务实际，因时因势灵活应对各类复杂情况.

后来一次跨昼夜对抗，左班长带领班组向“敌”指挥所侧翼迂回. 按原定路线，需穿越一片开阔地，但当晚月光皎洁，强行通过容易暴露. 左班长研判形势后，果断改变计划，选择从一条干涸沟渠中绕过，不仅成功避开“敌”夜视器材侦察，还比预定时间提前抵达，为后续行动赢得了主动.

On the Battlefield, Standardized Movements Must Be Applied Flexibly.

Source: PLA Daily Author: Chai Wenjing Editor: Wang Can 2025-11-06 Standardized movements must be applied flexibly.

■Chai Wenjing As dusk fell, the Gobi Desert was filled with rolling sandstorms. Under the cover of clumps of camel thorn bushes, several soldiers moved stealthily.

“There seems to be a small group of ‘enemy’ in the southeast!” During a red-blue force-on-force exercise organized by a brigade of the 83rd Group Army, upon receiving a report from Private First Class Xiao Qi, the Red Army commander, Company Commander Zhou, immediately dispatched a reconnaissance team to handle the situation.

On the march, the reconnaissance team leader, Squad Leader Zuo, whispered to his comrades: “The movements must be standard and standardized, to catch the enemy off guard…” The team members, adhering to their usual training requirements, kept a low profile, observed vigilantly, and advanced under cover.

Shortly afterward, the team approached the target area, but after a thorough search, they found no trace of the “enemy.” Just then, the Blue Force suddenly surrounded them from all sides, completely encircling the reconnaissance team.

“Our movement was perfectly planned and orderly, how were we discovered?” The failed operation left Squad Leader Zuo feeling frustrated and bewildered.

At that moment, the Blue Force commander, Section Chief Gao from the training department, handed Squad Leader Zuo a pair of military binoculars, pointing him towards a camel thorn thicket in the distance.

A combat boot was faintly visible in the camel thorn thicket. This was the location of Xiao Qi, the Red Force’s ambush sentry. Although he had remained silent throughout his infiltration, the exposed combat boot had given him away. The Blue Force, upon discovering him, did not act rashly but instead set up an ambush nearby, waiting for him to fall into their trap.

“The ambush sentry’s movements were in accordance with standard training, but if, based on the actual concealment area, his feet were slightly together, he could be concealed by the ghillie suit and sand dunes, making him difficult to spot,” Section Chief Gao pointed out the problem.

Putting down his binoculars and looking at his “captured” comrades, Squad Leader Zuo’s face flushed red: “I standardized Xiao Qi’s ambush maneuvers for him. The company commander always said to be flexible and adaptable to the battlefield situation, and today I finally understand.”

It turned out that in daily training, Squad Leader Zuo had been quite strict with his comrades, standardizing every training movement meticulously, from rifle holding posture to advance routes,

demanding uniformity. He also frequently organized correct-and-incorrect comparisons to correct the tactical movements of his squad members. Company Commander Zhou had reminded him that standardized movements were only the foundation; “on the battlefield, you must be flexible.”

“Training and preparing for war certainly require high standards and strict requirements, and standardized tactical movements can indeed maximize combat efficiency. However, if we don’t consider the actual battlefield environment and rigidly adhere to dogma and inflexible movements, we will run counter to the requirements of actual combat,” Company Commander Zhou told everyone during the debriefing.

He recalled that during a previous company tactical assessment, a private first class received an emergency report of a “wounded soldier with a fractured left femur.” After braving artillery fire to check on the wounded, the soldier ran back to the equipment vehicle a few dozen meters away, rummaging for splints, first-aid kits, tourniquets, and other first-aid supplies. The entire process was standardized and orderly, yet it lasted over ten minutes. At the time, he hadn’t considered that the wounded soldier’s inner waistband could be used as a tourniquet, and that scattered branches nearby could serve as makeshift splints. Using readily available materials could significantly shorten first-aid time and greatly reduce battlefield risks.

“Standardized movements help hone basic skills, but we must apply them flexibly,” “Winning is the ultimate standard”... Seeing the soldiers nodding in agreement, the company commander then guided them to examine and reflect on problems in training: inadequate consideration of terrain factors in camouflage and concealment; using fixed measuring tapes instead of body measurements in bunker construction; and rigid, formulaic tactics in equipment use, etc. The soldiers chimed in, and many root causes were unearthed.

“On the battlefield, standardized movements alone are not enough.” Having clarified this understanding, Squad Leader Zuo changed his previous training approach, focusing more on guiding his team to closely align with the actual mission requirements and flexibly respond to various complex situations.

Later, during a day-and-night combat exercise, Squad Leader Zuo led his squad to flank the “enemy” command post. The original route required crossing an open area, but the bright moonlight that night made forcing their way through risky and easily expose them. After assessing the situation, Squad Leader Zuo decisively changed the plan, choosing to bypass the “enemy” through a dry ditch. This not only successfully evaded detection by the “enemy’s” night vision equipment but also allowed them to arrive ahead of schedule, gaining the initiative for subsequent operations.

第 72 集团军某旅某营强化提升自主抓建能力

来源：解放军报 作者：张智泉 责任编辑：王粲 2025-11-06

第 72 集团军某旅某营强化提升自主抓建能力——

晾衣场落户驻训地

■张智泉

深秋时节，寒意渐浓. 第 72 集团军某旅营区，由某营官兵自主设计施工完成的晒衣场及时投入使用，引来官兵围观.

“以前秋冬季节濒海驻训，大家晾衣服要‘抢地盘’. 现在不仅位置多，衣服干得快，还区分了各连队的区域，再也不用担心没位置了. ”某连二级上士王志国坦言，长期在濒海地区驻训，衣物容易发霉，需要经常晾晒，营队原有的晒衣区域设施陈旧、空间较小，官兵周末洗衣后集中晾晒，常会“抢位置”“看天气”，十分不便.

今年第三季度，旅机关在基层开展“致党委的一封信”调研活动中，了解到这一实际困难，将其纳入为基层办实事项目清单，计划由机关业务科室牵头组织招标，实施帮建.

“机关提出帮建，我们心怀感激. 但一味等靠要，容易弱化营连自主建设能力. ”接到机关通知后，营党委并未照单全收. 在营军人大会上，虞教导员提出一个建议，“晒衣场不大，却是一次锤炼基层自主抓建能力的好机会. 咱们许多战士入伍前具备图纸设计、钢管焊接等专业技能，何不利用这个机会发挥特长，由我们自主建设这个晒衣场？”

“这里海风大，自己建能建好吗？”听到有战士提出疑虑，虞教导员告诉大家：“基层官兵是战斗力生成的基石，更是基层建设的主体. 咱们不能只做‘问题提出者’，更要努力成为‘问题解决者’. ”统一官兵思想后，营队向机关提出，这个晒衣场由营队自行设计、自主施工，机关只需进行必要指导和帮助即可.

机关同意后，营队广泛征求官兵意见建议，形成了“安全实用、节约高效、战备兼容”的建设原则.

没有专业施工队，官兵就利用课余时间自己动手. 党员骨干、三级军士长杨洪亮和二级上士王志国主动请缨担任“技术总工”，带领战士利用训练间隙进行焊接、安装；司务长李艳坤精打细算，比价采购材料，将预算大为缩减.

那段时间，官兵们合理统筹时间精力，白天完成训练任务，晚上加班搬运建材、平整地面、安装支架……“军营是咱们的家，为自己家干活有劲！”上等兵小王和战友们虽有些累，却觉得踏实快乐.

为确保质量，机关派出营房助理员现场指导，及时对结构承重、防风设计等关键环节进行安全评估. 很快，一座可容纳全营衣物、具备防风防雨、夜间声控照明、结实可靠的晒衣场顺利落成，完全能满足官兵日常需要.

“小工程”带来了“大效应”. 以这段经历为契机，该营先后收集关于棚顶漏雨、食堂卷帘门电线裸露等问题的处置意见 20 余条，鼓励官兵自主维修，大家以连为家的主人翁意识普遍明显增强.

这天，晒衣场上阳光明媚，迷彩服随风轻扬. 一名在基层开展调研的机关干事感慨：“有些工作我们总担心营连干不了，习惯性包办. 这次大家不等不靠、主动作为，用实际行动证明：只要机关服务不越位，基层主动不缺位，基层建设就能越来越好！”

A Battalion of a Brigade under the 72nd Group Army Enhances Its Independent Construction Capabilities

Source: PLA Daily Author: Zhang Zhiquan Editor: Wang Can 2025-11-06

A Battalion of a Brigade under the 72nd Group Army Enhances its Independent Construction Capabilities—A Clothes Drying Area Set Up at the Training Site

■ Zhang Zhiquan In late autumn, the chill deepens. At the barracks of a brigade under the 72nd Group Army, a clothes drying area designed and constructed independently by the soldiers of a certain battalion was promptly put into use, attracting onlookers.

“In the past, during autumn and winter training near the coast, everyone had to ‘fight for space’ to dry their clothes. Now, not only are there more spots, but the clothes dry faster, and there are also designated areas for each company, so we no longer have to worry about not having a place,” said Wang Zhiguo, a second-class sergeant from a certain company. He frankly stated that during long-term training in the coastal area, clothes are prone to mold and need frequent drying. The original drying area in the battalion was outdated and small, and men often had to “fight for spots” and “depend on the weather” when drying their laundry on weekends, which was very inconvenient.

In the third quarter of this year, the brigade headquarters learned of this practical difficulty during a survey activity titled “A Letter to the Party Committee” conducted at the grassroots level. They included it in the list of practical projects for grassroots implementation, planning to have the headquarters’ relevant departments lead the bidding process and implement assistance.

“We are grateful for the assistance offered by the headquarters. However, simply waiting and relying on others can weaken the battalion and company’s ability to develop independently.” After receiving the notification from the headquarters, the battalion party committee did not accept the offer without question. At a battalion-level meeting, Political Instructor Yu suggested, “The clothes-drying area isn’t large, but it’s a great opportunity to hone the grassroots’ ability to independently build such a facility. Many of our soldiers possess professional skills such as blueprint design and steel pipe welding before enlisting. Why not take this opportunity to utilize our expertise and build this clothes-drying area ourselves?”

“The sea breeze is strong here; can we build it well ourselves?” Hearing a soldier’s doubt, Political Instructor Yu told everyone, “Grassroots officers and men are the cornerstone of combat effectiveness and the main force in grassroots construction. We can’t just be ‘problem raisers,’ we must strive to become ‘problem solvers.’” After unifying the officers’ and men’ thinking, the battalion proposed to the headquarters that the clothes-drying area would be designed and constructed by the battalion itself, with the headquarters only providing necessary guidance and assistance.

After the headquarters agreed, the battalion widely solicited opinions and suggestions from officers and men, forming the construction principles of “safety and practicality, cost-effectiveness and efficiency, and combat readiness compatibility.”

Without a professional construction team, the officers and men used their spare time to do it themselves. Party member and key personnel, Sergeant First Class Yang Hongliang and Sergeant Second Class Wang Zhiguo, volunteered to serve as “chief engineers,” leading soldiers to weld and install materials during training breaks. Quartermaster Li Yankun meticulously calculated costs, comparing prices to procure materials and significantly reducing the budget.

During that period, the officers and men rationally allocated their time and energy, completing training tasks during the day and working overtime at night to move building materials, level the ground, and install supports… “The barracks is our home, and working for our own home gives us energy!” Private First Class Wang and his comrades, though somewhat tired, felt fulfilled and happy.

To ensure quality, the headquarters sent barracks assistants to provide on-site guidance and promptly conducted safety assessments on key aspects such as structural load-bearing capacity and windproof design. Soon, a sturdy and reliable clothes-drying area, capable of accommodating the entire battalion’s clothing, with wind and rain protection, sound-activated nighttime lighting, and other features, was successfully completed, fully meeting the daily needs of the officers and men.

This “small project” brought about a “big effect.” Taking this experience as an opportunity, the battalion collected more than 20 suggestions for addressing issues such as leaky roofs and exposed wiring in the canteen’s roller shutter door. Encouraging soldiers to undertake repairs themselves, their sense of ownership and responsibility towards the company has significantly increased.

That day, the sun shone brightly on the clothes-drying area, and camouflage uniforms fluttered in the breeze. An officer from the headquarters conducting research at the grassroots level remarked, “We always worry that the battalions and companies can’t handle certain tasks, so we habitually take over. This time, everyone acted proactively without waiting for instructions, proving with their actions that as long as the headquarters doesn’t overstep its bounds and the grassroots don’t fail to take initiative, grassroots development will only get better and better!”

榜样为镜映初心！陆军某旅开展“我与标兵面对面”教育活动

来源：解放军报 作者：黄晓林 责任编辑：王粲 2025-11-06

第七十五集团军某旅开展“我与标兵面对面”教育活动

学榜样事迹 当精武标兵

解放军报讯　黄晓林报道：“当时，我们奉命配合海军力量开辟空中通道，同时为陆军兄弟部队提供空中掩护……”深秋时节，第 75 集团军某旅野外驻训场帐篷内座无虚席. 正在执行野外驻训任务的陆军某旅利用训练间隙，组织了一场“我与标兵面对面”教育活动. 该旅邀请空军航空兵某旅飞行员来队，讲述他和战友们传承英雄血脉、苦练打赢本领的经历，现场官兵不时报以热烈掌声.

“邀请兄弟单位的精武标兵、先进典型来队分享奋斗故事，是我们破解教育资源不足、教育形式创新乏力等现实难题的有效举措. ”该旅领导介绍，他们结合野外驻训、重大节日、新兵入伍等时机，探索推出“我与标兵面对面”教育活动，通过组织联合授课、事迹报告、战例研讨等形式，邀请友邻军兵种单位的优秀官兵来队，同忆红色传统、共学奋斗故事，推动思想政治教育走深走实.

笔者翻看该旅年度教育计划发现，今年以来，旅队先后邀请“硬骨头六连”官兵代表、“排雷英雄”杜富国等先进典型来队开展教育活动. “‘我与标兵面对面’活动开展以来，官兵参加教育的积极性明显提高，我们计划将教育活动纳入常态化思想政治教育，邀请更多精武标兵来队分享成长感悟. ”该旅宣传科干事莫斌说，官兵在与标兵们互动交流中，对标先进找不足、明方向，扎根基层、建功军营的使命感、责任感更强了.

前不久，该旅以落实新条令为抓手，创新开展“传承英雄精神”专题教育，特别邀请邱少云生前所在连指导员郭指导员登台授课.

讲台上，郭指导员深情讲述“纪律重于生命”的战斗故事：“邱少云同志牺牲后，战友们在他潜伏的 391 高地草丛中，仅找到一块被烈火烧焦的衣物残片……”现场气氛庄重肃穆，不少官兵眼角湿润. “‘纪律重于生命’是我们必须传承好的红色基因，作为新时代革命军人，我们不仅要严格落实条令规范，更要立足本职强本领，以实际行动践行使命担当. ”讨论交流中，该旅一名战士的发言引发大家共鸣.

榜样为镜映初心，精武强能担使命. 该旅领导介绍，这段时间，阶段性考核渐次展开，官兵自觉以标兵为榜样，在训练场掀起“比学赶帮超”热潮，打破多个课目纪录.

Role Models as a Mirror to Reflect Our Original Aspirations! An Army Brigade Conducts "Face-to-Face with Exemplary Soldiers" Educational Activity

Source: PLA Daily Author: Huang Xiaolin Editor: Wang Can 2025-11-06 A brigade of the 75th Group Army Conducts "Face-to-Face with Exemplary Soldiers" Educational Activity Learning from Role Models' Deeds to Become Elite Soldiers

PLA Daily News – Huang Xiaolin reports: "At that time, we were ordered to cooperate with naval forces to open up air corridors, while providing air cover for our brother army units..." In late autumn, the tents at the field training ground of a brigade of the 75th Group Army were packed. Taking advantage of a training break, the brigade organized a "Face-to-Face with Exemplary Soldiers" educational activity. The brigade invited a pilot from an air force aviation brigade to the unit to share his and his comrades' experiences of inheriting the heroic spirit and diligently honing their combat skills. The officers and men present frequently responded with enthusiastic applause.

"Inviting outstanding soldiers and role models from other units to share their stories of struggle is an effective measure to address the practical problems of insufficient educational resources and a lack of innovation in educational methods," the brigade leadership explained. They have launched the "Face-to-Face with Role Models" educational activity, taking advantage of opportunities such as field training, major holidays, and new recruit enlistment. Through joint lectures, reports on exemplary deeds, and case studies, they invite outstanding officers and men from neighboring military units to their unit to reminisce about revolutionary traditions and learn from each other's stories of struggle, thus deepening and solidifying ideological and political education.

A review of the brigade's annual education plan reveals that this year, the brigade has invited representatives of the "Hard-Bone Sixth Company" and "Mine Clearance Hero" Du Fuguo, among other outstanding role models, to conduct educational activities within the unit. "Since the launch of the 'Face-to-Face with Role Models' activity, the enthusiasm of officers and men for participating in the education has significantly increased. We plan to incorporate this educational activity into our regular ideological and political education, inviting more outstanding soldiers to share their growth experiences," said Mo Bin, an officer from the brigade's publicity department. He added that through interaction and exchange with these role models, officers and men have learned from their experience, identified shortcomings, clarified their direction, and developed a stronger sense of mission and responsibility to serve at the grassroots level and contribute to the military.

Recently, the brigade, using the implementation of new regulations as a starting point, innovatively launched a special education program on "Inheriting the Spirit of Heroes," and specially invited Instructor Guo, the political instructor of the company where Qiu Shaoyun served, to give a lecture.

On the stage, Instructor Guo movingly recounted the battle story of "discipline being more important than life": "After Comrade Qiu Shaoyun's sacrifice, his comrades found only a piece of

clothing charred by fire in the grass of Hill 391 where he was hiding…" The atmosphere was solemn and respectful, and many officers and men had tears in their eyes. "Discipline is more important than life" is a valuable red gene we must inherit. As revolutionary soldiers of the new era, we must not only strictly implement regulations and norms, but also strengthen our skills in our duties and fulfill our mission with practical actions." A soldier's statement during the discussion resonated with everyone.

Role models serve as mirrors to reflect our original aspirations, and honing our skills and capabilities to shoulder our mission. The brigade leadership explained that during this period, phased assessments were gradually implemented, and officers and men consciously took exemplary soldiers as role models, creating a wave of "learning from, catching up with, helping, and surpassing" on the training ground, breaking records in multiple subjects.

误拨电话也能办成事！陆军某旅机关推行"首接负责"工作模式

来源：解放军报 作者：黄涛 刘华山 童祖静 责任编辑：王粲 2025-11-06

陆军某旅机关推行"首接负责"工作模式引出一段佳话——

一次温暖的电话误拨

■黄 涛 刘华山 解放军报特约记者 童祖静

"真没想到，虽然打错了电话，却没耽误办成事！"金秋时节，记者在陆军某旅采访，谈到"机关服务基层"话题时，勤务保障营中士陈嘉豪对前不久的一段经历记忆深刻.

当时，陈嘉豪结束集训刚归队，发现用于报销的高铁票不慎丢失. 由于不熟悉补开票据的手续，他便打电话向该旅财务科咨询. 不料，陈嘉豪拨错了号码，把电话打到了人力资源科徐干事的办公室座机上.

"你好，是财务科吗？我想咨询一下，高铁票丢了还能报销吗？"电话接通后，陈嘉豪说出自己遇到的难题. 徐干事先是一愣，随即反应过来："同志你好，这里是人力资源科，你打错电话了. "

"真不好意思，我打错电话了！"听到这儿，陈嘉豪连忙表达歉意并准备挂断电话. 没想到，徐干事却接着说："现在财务科的同志都随队驻训了，你留个联系方式，我帮你联系财务科相关人员，稍后给你回复. "

徐干事的话，让陈嘉豪倍感温暖. 放下电话，徐干事马上联系财务科负责报销工作的李助理员，说明相关情况，并告知陈嘉豪的联系方式. 李助理员给陈嘉豪打去电话，详细告知票据丢失情况下的报销处理流程. 一周后，陈嘉豪收到了报销的差旅费.

“找错人”不耽误“办成事”，这次温暖的电话误拨是该旅机关强化为基层服务意识的缩影. 该旅领导告诉记者，过去，部分机关工作人员在服务基层方面存在一些问题：有的态度生硬“脸难看”，习惯于应付搪塞，几句话就把基层官兵的诉求挡了回去；有的推诿扯皮“踢皮球”，遇到职责界限模糊的问题，不愿主动担当，导致一些难题迟迟得不到解决. 久而久之，不仅机关在基层官兵心中的形象受到损害，官兵内部关系、部队凝聚力也受到影响.

为了提升机关服务基层质效，该旅秉持“基层至上、士兵第一”理念，探索推行“首接负责”工作模式，基层官兵给机关来电咨询时，无论哪个科室的人员接到电话，必须详细记录官兵部职别、咨询事项和联系方式，并明确要求：归本科室职责范围的，负责落实下一步工作；非本科室职责范围的，必须及时准确对接具体科室工作人员.

不仅如此，该旅常态落实全流程服务评价机制，要求负责回应官兵诉求的科室，无论问题大小、解决难易程度，在事项办结后必须主动向官兵发放满意度评价表，评价结果作为机关科室和干部个人年度评优评先的重要依据.

“首接负责”工作模式推行之初，部分机关干部不太理解. “本职范围内的工作已经很多了，‘首接负责’增加了不少工作量. ”该旅部队管理科王参谋回忆，以往接到官兵咨询不属于本科室职责范围的来电，常常回复“不清楚”“不了解”. “随着‘首接负责’工作模式推行，我发现，记录官兵咨询事项的过程，让我对基层战友遇到的难题有了更全面的了解. ”他说，基层反映的情况不论归属哪个科室，其实都有着千丝万缕的关系.

一次，王参谋连续接到两名战士来电咨询军考的事情，他们不仅关注考试政策、报考流程，还反映了“没有学习场地”这个难题. 记录相关情况后，他及时向作训科廖参谋转告来电情况的同时，还主动联系了人力资源科李干事. 不久后，他们协调场地，供考学战士复习备考.

“服务基层不能止于‘事办了’，更要追求‘事办好’. ”该旅领导告诉记者，“首接负责”工作模式促进机关干部强化为基层服务意识，不仅“推诿扯皮”“敷衍塞责”的现象少了，而且不同科室的人员经常互相请教对方职责领域的相关政策制度，合力解决了不少难题.

陈嘉豪收到报销款没过几天，又收到一张由旅财务科和人力资源科联合发出的电子《机关服务满意度评价表》，邀请他对此次业务办理的响应速度、解答清晰度、服务态度及最终效果进行评价. 陈嘉豪在评价表中勾选了“非常满意”并留言：为服务型机关点赞！

Even A Wrong Number Can Get Things Done! An Army Brigade Implements a “First-Contact Responsibility” Work Model

Source: PLA Daily Author: Huang Tao, Liu Huashan, Tong Zujing Editor: Wang Can 2025-11-06
An Army brigade's implementation of a "first-contact responsibility" work model has led to a heartwarming story—a heartwarming wrong number

■ Huang Tao, Liu Huashan, PLA Daily Special Correspondent Tong Zujing

"I never expected that although I dialed the wrong number, it didn't delay getting things done!" During an interview at an Army brigade in the golden autumn season, when discussing the topic of "headquarters serving grassroots units," Sergeant Chen Jiahao of the Logistics Support Battalion vividly recalled a recent experience.

At the time, Chen Jiahao had just returned to his unit after completing intensive training and discovered that his high-speed rail ticket, intended for reimbursement, had been lost. Unfamiliar with the procedures for reissuing tickets, he called the brigade's finance department for advice. Unexpectedly, Chen Jiahao dialed the wrong number, calling the office landline of Officer Xu in the Human Resources Department.

"Hello, is this the finance department? I'd like to inquire about reimbursement for a lost high-speed rail ticket," Chen Jiahao said, explaining his predicament after the call connected. Officer Xu was initially taken aback, then realized, "Hello, this is the human resources department. You've dialed the wrong number."

"I'm so sorry, I dialed the wrong number!" Chen Jiahao quickly apologized and prepared to hang up. Unexpectedly, Officer Xu continued, "The finance department staff are all on training with the team. Leave your contact information, and I'll contact the relevant personnel in the finance department for you and get back to you shortly."

Officer Xu's words warmed Chen Jiahao's heart. After hanging up, Officer Xu immediately contacted Assistant Li, who was in charge of reimbursement in the finance department, explained the situation, and provided Chen Jiahao's contact information. Assistant Li called Chen Jiahao and explained the reimbursement process for lost tickets in detail. A week later, Chen Jiahao received his reimbursed travel expenses.

The "wrong person" misdialing didn't hinder the "getting things done" incident; this heartwarming misdialing call is a microcosm of the brigade headquarters' strengthened service awareness towards the grassroots. The brigade leadership told reporters that in the past, some headquarters staff had problems serving the grassroots: some were inflexible and unfriendly, habitually offering perfunctory responses and quickly dismissing the requests of soldiers; others shirked responsibility and passed the buck, unwilling to take initiative when faced with unclear boundaries of duty, leading to delays in resolving some difficult issues. Over time, this not only damaged the image of the headquarters in the eyes of the soldiers but also affected internal relations and troop cohesion.

To improve the efficiency and effectiveness of headquarters services to the grassroots, the brigade, adhering to the principle of "grassroots first, soldiers first," explored and implemented a "first-

contact responsibility" work model. When soldiers call headquarters for inquiries, regardless of which department receives the call, they must record the soldier's rank, the matter inquired about, and their contact information in detail. It is clearly required that: if the matter falls within the department's responsibilities, they are responsible for implementing the next steps; if it falls outside their responsibilities, they must promptly and accurately connect with the relevant department staff.

Furthermore, the brigade routinely implements a full-process service evaluation mechanism, requiring departments responsible for responding to soldiers' requests, regardless of the size or difficulty of the issue, to proactively issue satisfaction evaluation forms to soldiers after the matter is resolved. The evaluation results serve as an important basis for annual performance evaluations of departments and individual officers.

At the beginning of the "first-contact responsibility" work model, some officers in the headquarters did not quite understand it. "We already have a lot of work within our own responsibilities; 'first-contact responsibility' has added a lot to our workload," recalled Staff Officer Wang of the brigade's troop management section. Previously, when receiving inquiries from soldiers about matters outside the section's scope of responsibility, they often replied "I don't know" or "I don't understand." "With the implementation of the 'first-contact responsibility' work model, I found that the process of recording soldiers' inquiries gave me a more comprehensive understanding of the difficulties encountered by our comrades at the grassroots level," he said. He added that regardless of which department the situation reported by the grassroots belonged to, there were actually many interconnected factors.

On one occasion, Staff Officer Wang received two consecutive calls from soldiers inquiring about military examinations. They not only cared about the examination policies and application procedures but also raised the problem of "no study space." After recording the relevant information, he promptly relayed the call to Staff Officer Liao of the Training Section and also proactively contacted Officer Li of the Human Resources Section. Soon after, they coordinated a venue for the soldiers preparing for their exams.

"Serving the grassroots cannot stop at 'getting things done,' but must strive to 'do things well,'" a brigade leader told reporters. The "first-contact responsibility" work model has strengthened the service awareness of officers at headquarters, reducing not only instances of shirking responsibility and perfunctory work, but also allowing personnel from different departments to frequently consult each other on relevant policies and regulations within their areas of responsibility, collaboratively solving many problems.

A few days after receiving his reimbursement, Chen Jiahao received an electronic "Office Service Satisfaction Evaluation Form" jointly issued by the brigade's Finance and Human Resources Sections, inviting him to evaluate the response speed, clarity of answers, service attitude, and final outcome of the service. Chen Jiahao checked "Very Satisfied" on the evaluation form and left a message: "Thumbs up for the service-oriented organization!"

在铁列克提边防前哨，每一名官兵都是挺立的脊梁

来源：解放军报 作者：崔冠楠 责任编辑：王粲 2025-11-07

第五届红色故事讲解员大赛

挺立的脊梁

■崔冠楠

我手里的这块石头，来自新疆西北部的铁列克提边防前哨. 铁列克提，哈萨克语的意思是“有杨树的地方”. 然而，这里方圆几公里不见一棵树，有的只是每年超过 200 天的 8 级以上大风，最高风力达到 12 级. 由于常年大风侵蚀，坚硬的岩石被撕成了刀片状，称为“刀锋石”.

我在想，在这个“风口哨所”，一茬茬戍边官兵，靠什么能像钢钉一样牢牢“钉”在国境线上？支撑他们默默坚守的，是一种怎样的力量？带着这样的疑问，我沿着北疆座座边防哨所的历史印记不断追寻，从中找到了曾经让日寇闻风丧胆的部队——八路军冀中军区回民支队的身影.

当年，马本斋率领的这支部队，作战勇猛，威震敌胆，被毛泽东同志称赞为“百战百胜的回民支队”.

1944 年，42 岁的马本斋积劳成疾. 在生命最后时刻，他用颤抖的手教儿子写下“中国”二字，并叮嘱道：“你长大以后要像孝敬父母一样来孝敬我们的祖国. ”那一刻，我仿佛明白了：“中国”二字，是革命先辈的精神脊梁，也是边防官兵扎根边疆的魂和根.

现在的铁列克提边防连，大部分是“00”后的年轻官兵. 大学生士兵、巡逻分队擎旗手李奕昇告诉我，每次出发前，他们都会多带上一面国旗. 我问为什么？他说：“遇上风暴，是习以为常的事，几次巡逻下来，国旗就被大风卷没了边. 在我们心里，国旗和界碑的分量，比天还要重！”

2023 年春节，李奕昇和战友们在巡逻途中突遇暴风雪. 为了防止被大风吹散，班长用攀登绳将大家像串糖葫芦一样串了起来. 他们手挽着手艰难前行，刮倒了爬起来，再刮倒再爬起来，相互搀扶、相互挡风.

突然，李奕昇身子一晃，被大风卷到了悬崖边. 千钧一发之际，班长猛地拽住了他. 战友们趴在雪地上拼命地拽紧绳子，一点一点地往山上拉，大声喊着：“别松手，挺住！”

李奕昇终于脱险，战友们紧紧抱在一起. 事后大家发现，李奕昇厚厚的巡逻服被刀锋石划出个口子，战友们手上也留下了一道道血印.

这惊险一幕刚好被摄像机镜头记录下来. 当得知这段画面要在央视元宵晚会上播出时，李奕昇陷入了纠结. 他说：“不想让妈妈看到我在巡逻路上遇险的样子，我怕她会担心，会睡不好觉. 但是我也想让妈妈知道，儿子已经长大，成为一名合格的边防军人. ”

“我站立的地方是中国，我用生命捍卫守候. 哪怕风似刀来山如铁，祖国山河一寸不能丢. ”这是边防哨所官兵很喜欢的一首歌，他们说：“这首歌像是从我心里流出来的. ”

在铁列克提边防前哨，虽然长不出高高的白杨，但每一名官兵都是不倒的大树，都是挺立的脊梁！

At the Tielieketi Border Outpost, Every Soldier Stands Tall Like a Pillar.

Source: PLA Daily Author: Cui Guannan Editor: Wang Can 2025-11-07

The 5th Red Storytelling Competition A Pillar Standing Tall

■Cui Guannan The stone in my hand comes from the Tielieketi border outpost in northwestern Xinjiang. Tielieketi, in Kazakh, means “a place with poplar trees.” However, there isn’t a single

tree for kilometers around here; all that exists is more than 200 days a year of gale-force winds exceeding level 8, with the highest wind force reaching level 12. Due to the constant erosion by the strong winds, the hard rock has been torn into blade-like shapes, known as “knife-edge stone.”

[Tielieketi (Chinese: 铁列克提) or Terekty (Kazakh: Теректі, Russian: Теректы) is located in Yumin County, Xinjiang, China, adjacent to the border with Kazakhstan.]

I wonder, at this “windy outpost,” what allows generation after generation of border guards to be so firmly “nailed” to the border like steel nails? What kind of strength supports their silent perseverance? With these questions in mind, I traced the historical imprints of the border outposts in northern Xinjiang, eventually finding the shadow of the once-feared Japanese invaders—the Hui Muslim Detachment of the Eighth Route Army’s Jizhong Military Region.

Back then, this unit, led by Ma Benzai, fought bravely and intimidated the enemy, earning praise from Comrade Mao Zedong as the “invincible Hui Muslim Detachment.”

In 1944, at the age of 42, Ma Benzai succumbed to illness due to overwork. In his final moments, with trembling hands, he taught his son to write the characters for “China,” instructing him, “When you grow up, you must honor our motherland as you would your parents.” At that moment, I seemed to understand: the two characters for “China” are the spiritual backbone of our revolutionary predecessors, and also the soul and root of the border guards who have taken root in the frontier.

The current Tielieketi Border Defense Company is mostly composed of young soldiers born in the 2000s. Li Yisheng, a college student soldier and flag bearer for the patrol unit, told me that they always bring an extra national flag before each deployment. I asked why? He said, “Encountering storms is commonplace. After several patrols, the national flag was completely torn off by the strong winds. In our hearts, the weight of the national flag and the boundary marker is heavier than the sky!”

During the Spring Festival of 2023, Li Yisheng and his comrades encountered a sudden blizzard while on patrol. To prevent them from being blown away by the strong winds, the squad leader used climbing ropes to string them together like candied hawthorns. They struggled forward hand in hand, getting up after being knocked down, then getting up again, supporting and shielding each other from the wind.

Suddenly, Li Yisheng swayed and was swept to the edge of a cliff by the strong winds. In the nick of time, the squad leader grabbed him tightly. His comrades lay on the snow, desperately pulling on the rope, inch by inch, up the mountain, shouting, “Don’t let go, hold on!”

Li Yisheng was finally safe, and his comrades hugged each other tightly. Afterwards, they found that Li Yisheng’s thick patrol uniform had been cut by the sharp rocks, and his comrades’ hands were covered in bloody marks. This dramatic scene was captured on camera. When Li Yisheng learned that the footage would be broadcast on CCTV’s Lantern Festival Gala, he was conflicted.

He said, “I didn’t want my mother to see me in danger on patrol; I was afraid she would worry and lose sleep. But I also wanted her to know that her son had grown up and become a qualified border guard.”

“Where I stand is China, I defend and guard it with my life. Even if the wind is like a knife and the mountains are like iron, not an inch of our motherland’s land can be lost.” This is a song that the border guards love. They say, “This song flows from my heart.”

At the Tielieketi border outpost, although tall poplars may not grow, every soldier is an unyielding tree, a steadfast backbone!

(Author’s unit: Unit 66325; 6th Combined Arms Brigade in Changping District, Beijing)

不能只懂拧自己那颗“螺丝钉”！陆军某旅培养通专结合人才

来源：解放军报 作者：邓居正 王杰 武诗韬 责任编辑：王粲 2025-11-07

第七十七集团军某旅瞄准现代战场培养通专结合人才——

不能只懂拧自己那颗“螺丝钉”

■邓居正 王 杰 解放军报记者 武诗韬

该旅两名战士正在吊装导弹. 蒋振梁 摄

“谁告诉你无人机只能从远方天空飞过来？”面对导调组的询问，导弹营刘营长低下了头.

前段时间，第 77 集团军某旅展开一场特别的演训：导调组不按“套路”出牌，趁着导弹营官兵目光被西北方向机群吸引，正兴奋于“首发命中”之时，西南方向一辆离阵地不远的民用卡车突然释放出大量无人机，成功“捣毁”防空系统.

“并非专业能力不足，而是实战意识欠缺. ”该旅一名领导复盘总结时说道，当地面民用车辆突然变成致命武器，防空部队指挥员的视野却局限于头顶的天空，面对此类“杀招”难以作出有效应对.

指挥员战场视野受限的根源何在？如何改变？带着这样的疑问，旅党委组织专人深入营连展开调研. 调研中，他们听到了两种不同的声音：战士们说营长对设备非常熟悉，修理装备比技术员还快. 有的参谋却发出了提醒：“他聚焦某个车组首发命中‘开门红’，却忽视了全连都在等他的指令. ”问题显而易见：指挥员眼里只有局部没有整体，最终导致在复杂战场环境中顾此失彼.

刘营长是由专业尖兵成长起来的指挥员. 从军校开始，他心无旁骛钻研导弹专业，多次在比武场上摘金夺银，逐步从排长走上营长岗位，并凭借对雷达诸元计算、装备故障排除等专业技能的精通，在官兵中树立了威信.

然而，长期的单向用力，也让他形成了某种“惯性”，即习惯通过技术思维来带动部队、完成任务. 随着专业分工日益精细，新装备、新系统层出不穷，客观上要求指挥员必须具备更广的联合视野和更强的融合能力，刘营长原有的专业素质与之并不匹配.

其实，像刘营长这样的“专业型指挥干部”不在少数，他们在担任连排长时，依靠出色的专业能力带领官兵取得了不俗成绩. 然而，当他们走上更高一级指挥岗位，需要统筹多个专业、协调不同力量时，就容易被过去的经验束缚.

一位同样技术精湛的营指挥员坦言：“我和参数、数据打了十几年交道，对各项装备性能了如指掌，但要按照当前指挥员的标准，有效组织多兵种协同攻防，心里真没底. ”

“现代科技飞速发展，各类新域新质作战力量加速涌现. 一个只懂拧自己那颗‘螺丝钉’，对整个‘战场系统’如何运转并不熟悉的指挥员，如何制胜未来战场？”议战议训会上，旅领导的分析切中要害：高素质新型军事人才必须通专结合，在一体化联合作战的大背景下，要警惕年轻干部呈现能力“过早定型”的苗头. 因此，必须转变培养理念，在稳固根基的同时，破除路径依赖，锻造指技合一的复合型指挥人才.

该旅党委树立为战导向，大幅提升指挥协同、跨域资源整合、临机决断等能力要求在干部考评中的权重，将干部参与重大联合演训的经历、在联合作战关键岗位的任职时长及履职表现，记入个人档案，作为选人用人重要参考.

与此同时，他们依据“排级精专业、连级懂协同、营级通联合”的成长路径，在上级的支持下，选派有发展潜力的年轻干部，前往兄弟单位交叉代职.

排长宋德祥是该旅高炮专业的“金牌射手”. 初到某合成旅担任参谋的他，面对步坦协同、战场态势综合研判等全新领域，感到了强烈的“本领恐慌”. 压力催生动力，他如饥似渴地学习新知识，虚心向合成营的战友请教. 经历几个月的“跨界”淬火，他对合成营战术战法有了深刻理解，并结合自身扎实的专业能力，提出数条有价值的建议，被上级机关采纳推广.

某营副营长王强在一次演训中临危受命，担任火力协调官. 面对多项新挑战，他迫使自己跳出熟悉的高炮思维定式，以全局视野来审视和掌控整个战场态势. 最终，他推动构建起覆盖“敌”主要突击方向的立体火力网，成功引导实施多波次精确打击. 硝烟散去，王强深有感触：“把目光从自己的专业领域投向整个战场，视野拓宽了，指挥思路自然就打开了，应对复杂局面的办法也更多了. ”

“能成一招者兴，善驭全局者胜. ”该旅领导告诉记者，随着一系列举措扎实推进，越来越多的年轻指挥员主动走出单一的专业“舒适区”，积极融入面向未来战场的多维战位. 在近期一场高强度实兵对抗演习中，该旅指挥通联更加顺畅、特情处置更加果断、跨军兵种协同更加快捷. 一条锻造通专结合、能谋善战的人才之路，正在这片火热的训练场上不断延伸.

Not Just Knowing How to Tighten Your Own “Screw”! An Army Brigade Cultivates Generalist and Specialist Talents

Source: PLA Daily Author: Deng Juzheng, Wang Jie, Wu Shitao Editor: Wang Can 2025-11-07

A brigade of the 77th Group Army aims to cultivate generalist and specialist talents for the modern battlefield—

Not Just Knowing How to Tighten Your Own “Screw”

■ Deng Juzheng, Wang Jie, PLA Daily Reporter Wu Shitao

Two soldiers of the brigade are hoisting missiles. Photo by Jiang Zhenliang

“Who told you drones can only fly in from afar?” Faced with the question from the directing group, Battalion Commander Liu of the missile battalion lowered his head.

Recently, a brigade of the 77th Group Army conducted a special training exercise: the directing group deviated from the expected pattern. While the missile battalion soldiers were focused on the northwest-facing drone formation and excited about their “first hit,” a civilian truck not far from the position in the southwest suddenly released a large number of drones, successfully “destroying” the air defense system.

“It’s not a lack of professional skills, but a lack of combat awareness,” a leader of the brigade said during a post-battle review. When civilian vehicles suddenly become deadly weapons, the air defense commanders’ vision is limited to the sky above, making it difficult to respond effectively to such “killer attacks.”

What is the root cause of the commanders’ limited battlefield vision? How can this be changed? With these questions in mind, the brigade’s Party Committee organized a special team to conduct in-depth research at the battalion and company levels. During the research, they heard two different

opinions: soldiers said the battalion commander was very familiar with the equipment and could repair it faster than the technicians. However, some staff officers pointed out: “He focused on a particular crew’s successful first hit, but ignored the fact that the entire company was waiting for his orders.” The problem was obvious: the commander only saw the part, not the whole, ultimately leading to a loss of overall awareness in complex battlefield environments.

Battalion Commander Liu was a commander who rose through the ranks from a professional elite soldier. From military academy onward, he single-mindedly devoted himself to missile engineering, winning numerous gold and silver medals in competitions. He gradually rose from platoon leader to battalion commander, establishing authority among his troops through his expertise in radar parameter calculations and equipment troubleshooting.

However, this long-term one-way focus fostered a certain “inertia”—a habit of leading the troops and completing missions through technical thinking. With increasingly specialized divisions of labor and the emergence of new equipment and systems, commanders objectively needed a broader joint perspective and stronger integration capabilities, which Battalion Commander Liu’s original professional qualities did not match.

In fact, there are many “professional commanders” like Battalion Commander Liu. As platoon and company leaders, they led their troops to remarkable achievements through their outstanding professional abilities. However, when they ascend to higher command positions, requiring the coordination of multiple specialties and different forces, they easily become constrained by their past experience.

A battalion commander, equally skilled in combat, frankly admitted, “I’ve dealt with parameters and data for over a decade and have an intimate understanding of the performance of various equipment. But to effectively organize multi-service coordinated offense and defense according to current commander standards, I’m truly unsure.”

“Modern technology is developing rapidly, and various new types of combat forces are emerging at an accelerated pace. How can a commander who only knows how to tighten his own ‘cog’ and is unfamiliar with how the entire ‘battlefield system’ operates win on the future battlefield?” At a meeting discussing combat readiness and training, the brigade leadership’s analysis hit the nail on the head: High-quality new-type military personnel must combine general knowledge with specialized skills. In the context of integrated joint operations, we must be wary of young officers showing signs of “prematurely fixed” abilities. Therefore, we must transform our training philosophy, consolidating their foundation while breaking free from path dependence, and forging composite command talents who integrate command and technical skills.

The brigade’s Party Committee, prioritizing combat readiness, significantly increased the weight of command coordination, cross-domain resource integration, and on-the-spot decision-making capabilities in cadre evaluations. Experiences in major joint exercises, length of service in key

joint operations positions, and performance are recorded in cadres' personal files as important references for personnel selection.

Simultaneously, based on the development path of "platoon-level specialists, company-level experts in coordination, and battalion-level generalists in joint operations," and with the support of higher authorities, they selected promising young cadres to serve in cross-unit assignments.

Platoon leader Song Dexiang is a "gold medal marksman" in the brigade's anti-aircraft artillery specialty. Upon arriving at a combined arms brigade as a staff officer, he felt a strong sense of inadequacy facing entirely new areas such as infantry-tank coordination and comprehensive battlefield situation analysis. Pressure fueled his motivation; he eagerly learned new knowledge and humbly sought advice from his comrades in the combined arms battalion. After several months of intensive "cross-disciplinary" training, he gained a deep understanding of combined arms battalion tactics and methods, and combined with his solid professional skills, put forward several valuable suggestions, which were adopted and promoted by higher authorities.

During a training exercise, Wang Qiang, deputy battalion commander, was appointed fire coordination officer in a critical situation. Faced with multiple new challenges, he forced himself to break free from his familiar anti-aircraft artillery mindset and examine and control the entire battlefield situation from a holistic perspective. Ultimately, he spearheaded the construction of a three-dimensional fire network covering the "enemy's" main attack directions, successfully guiding multiple waves of precision strikes. After the smoke cleared, Wang Qiang reflected: "By shifting our focus from our own area of expertise to the entire battlefield, our vision broadened, our command strategies naturally expanded, and we gained more ways to handle complex situations."

"Those who can execute a single move prosper, but those who can effectively manage the overall situation win." The brigade's leadership told reporters that with the solid implementation of a series of measures, more and more young commanders are proactively stepping out of their single professional "comfort zone" and actively integrating into multi-dimensional combat positions geared towards the future battlefield. In a recent high-intensity live-fire exercise, the brigade's command and communication became smoother, its handling of special situations more decisive, and its cross-service coordination faster. A path for cultivating talent that combines general knowledge with specialized skills, capable of both strategic planning and combat, is continuously extending on this vibrant training ground.

陆军某旅整合优质资源为官兵成长赋能：区域协作燃旺教育炉火

来源：解放军报 作者：缪华斌 周宇鹏 责任编辑：王粲 2025-11-07

区域协作燃旺教育炉火

■缪华斌 解放军报特约记者 周宇鹏

西北戈壁驻训场上，第 75 集团军某旅的学习课堂别开生面——来自军事航天部队的专家手持激光笔，讲述军事航天发展的辉煌历程，从早期探索到现代应用，从技术突破到创新价值，一个个专业知识点随着生动讲解深入人心. 这次打破军种界限的特色授课，正是该旅创新构建“教育区域协作矩阵”，整合优质资源为官兵成长赋能的生动缩影.

“教育不能画地为牢，要‘走出去，请进来’.”该旅领导在教育工作准备会上的一句话，道出了创新教育模式的初衷. 以往，受限于驻训地域偏远、专业力量不足等现实条件，各分队开展思想政治教育有时面临“内容单一、形式固化”的困境：要么是“你讲理论、我记要点”的传统模式，要么是学网课、放视频，缺乏有效互动，官兵的学习热情和教育实效都不理想. 如何打破这一局面？旅党委一班人在调研中发现，无论部队驻地还是驻训场周边，都蕴藏着教育“富矿”. 基于此，“整合区域资源、搭建协作平台”的思路逐渐清晰，一场覆盖多领域、联动多单位的教育创新就此展开.

此次驻训期间，得知附近有军事航天部队和部队体系医院，该旅政治工作部主动对接，很快商定系列教育协作活动. 军事航天部队的专家专程来旅授课，结合现代战争实例，深入讲解前沿军事技术，让官兵们大开眼界.

不仅如此，几周后，一场汇聚三方力量的“先进典型面对面”交流活动在野外训练大棚拉开帷幕——部队体系医院的军医结合多次参加高原卫勤保障的亲身经历，讲述艰苦环境中守护官兵健康、抢救生命的动人细节；该旅女子导弹连指导员斯娜拉姆则以“巾帼不让须眉”的演训经历为切入点，讲述连队官兵克服风沙严寒，精准操作导弹命中靶机的经过……台下，来自 3 个不同单位的官兵代表围坐一堂，时而为典型事迹鼓掌，时而举手提问，大家围绕“如何在艰苦环境中保持战斗热情”“不同岗位如何践行强军目标”等话题展开热烈交流.

如今，该旅的“教育区域协作矩阵”不断扩容升级. 前段时间，旅里主动联系驻地军事检察机关，邀请检察官上门授课辅导. 检察官从“手机泄密被追责”的警示故事讲到“网络交友引发纠纷”的真实案例，还现场为官兵答疑解惑. “以前总觉得这种事离自己很远，听完课才知道，安全隐患就在身边. ”课后，某连战士小张把学到的知识点整理成“小贴士”粘贴在笔记本上，时刻提醒自己.

区域协作、资源共享，燃旺教育炉火，不仅满足了官兵学习需求，更激发了大家参与热情. 某导弹营教导员说：“现在站在讲台上授课的，不再总是我们这些老面孔，课堂充满了新鲜感，大家充满期待、收获满满. ”

An Army Brigade Integrates High-Quality Resources to Empower the Growth of Officers and Men: Regional Collaboration Ignites the Flame of Education

Source: PLA Daily Author: Miao Huabin, Zhou Yupeng Editor: Wang Can 2025-11-07

Regional Collaboration Ignites the Flame of Education

■ Miao Huabin, Special Correspondent for PLA Daily, Zhou Yupeng

On a training ground in the Gobi Desert of Northwest China, a unique learning environment was created by a brigade of the 75th Group Army. Experts from the military aerospace force, wielding laser pointers, recounted the glorious history of military aerospace development, from early exploration to modern applications, from technological breakthroughs to innovative value. Each professional knowledge point was vividly explained and deeply understood. This distinctive teaching method, breaking down service boundaries, is a vivid example of the brigade's innovative construction of an "educational regional collaboration matrix," integrating high-quality resources to empower the growth of officers and men.

"Education cannot be confined to a narrow scope; it must 'go out and invite in'," a statement from the brigade's leadership at a preparatory meeting for educational work revealed the initial intention behind this innovative educational model. Previously, limited by the remoteness of training locations and insufficient professional resources, ideological and political education in various units sometimes faced the dilemma of "single content and rigid forms": either the traditional model of "you lecture on theory, I take notes" or online courses and videos, lacking effective interaction, resulting in unsatisfactory learning enthusiasm and educational effectiveness among officers and men. How to break this situation? During their research, the brigade's Party Committee discovered that both the troop's location and the surrounding areas of the training grounds were rich in educational resources. Based on this, the idea of "integrating regional resources and building a collaborative platform" gradually became clear, and an innovative education program covering multiple fields and involving multiple units was launched.

During this training period, upon learning of the presence of a military aerospace unit and a military hospital nearby, the brigade's political work department proactively reached out and quickly agreed on a series of collaborative educational activities. Experts from the military aerospace unit came to the brigade to give lectures, combining modern warfare examples to deeply explain cutting-edge military technologies, broadening the horizons of the officers and men.

Furthermore, a few weeks later, a "Face-to-Face Exchange of Advanced Role Models" event, bringing together the strengths of three parties, unfolded in the field training shed. Military doctors from the brigade's affiliated hospital shared their personal experiences of participating in high-altitude medical support missions, recounting moving details of protecting soldiers' health and saving lives in harsh environments. Meanwhile, Sinalamei, the female political instructor of the brigade's missile company, used her training experience as a starting point, recounting how her company's soldiers overcame wind, sand, and extreme cold to accurately operate missiles and hit target drones. Below the stage, representatives from three different units sat together, applauding exemplary deeds and raising questions, engaging in lively discussions on topics such as "how to

maintain combat enthusiasm in harsh environments" and "how different positions can implement the goal of building a strong military."

Currently, the brigade's "regional collaborative education matrix" continues to expand and upgrade. Recently, the brigade proactively contacted the local military procuratorate, inviting prosecutors to provide on-site training and guidance. The prosecutor shared cautionary tales about being held accountable for leaked information via mobile phone, followed by real-life cases of disputes arising from online dating. They also answered questions from the soldiers on the spot. "I used to think these kinds of things were far removed from my life, but after this lecture, I realized that safety hazards are all around us," said Xiao Zhang, a soldier from a certain company. After the lecture, he compiled the key points into "tips" and pasted them into his notebook to constantly remind himself.

Regional collaboration and resource sharing have fueled the educational fire, not only meeting the learning needs of the soldiers but also stimulating their enthusiasm for participation. A political instructor from a missile battalion said, "Now, those standing on the podium aren't always the same old faces. The classroom is full of novelty, and everyone is full of anticipation and has gained a lot."

第 81 集团军某旅导弹检测技师毕既涛：铆钉越淬火越坚硬

来源：解放军报 作者：汤伟 于晓涛 责任编辑：王粲 2025-11-07

第 81 集团军某旅导弹检测技师毕既涛——

"铆钉越淬火越坚硬"

■汤 伟 于晓涛

室外训练场，导弹检测技师毕既涛（左二）正在传授某型装备检测要领. 于晓涛 摄

燕山脚下，铁甲轰鸣. 红蓝对抗演练进入关键时刻，某型导弹战车突发故障，操作界面警报频闪. 蓝方战机撕裂长空的轰鸣声由远及近，战车舱内空气几近凝固. 只见随队保障的一级军士长毕既涛一个箭步跃上战车，布满老茧的双手在密布按钮的仪表盘上精准游走，锐利目光穿透纷繁电路——测电压、判代码、换组件，整套动作行云流水. "轰！"导弹拖着尾焰直刺云霄，精准拦截来袭目标.

与时间赛跑，是毕既涛军旅生涯的常态. 入伍 26 年来，从一名导弹射手到“兵专家”，他将一组组“故障代码”化于无形，被官兵称为导弹战车的“定盘星”.

毕既涛并不是一开始就负责导弹检测. 那年，毕既涛所在营换装新装备，一纸命令让他转行走上了导弹检测专业. 刚接触这个专业时，毕既涛发现，每发射一枚导弹，都需要导弹检测技师调试核验数百组指标参数. 面对某新型导弹复杂的内部构造、精密的电路布设，即便有扎实的机械维修技能基础，他还是感到仿佛一座大山压在了肩膀上. 此时，全旅还处于对该型导弹的探索阶段，这意味着毕既涛所进行的导弹检测无异于“在无人区跋涉”.

深夜的装备库里，这位山东大汉对着解剖开的导弹部件喃喃自语：“电路板就是战车的血脉，不通则痛. ”把专业术语、电路图制成巴掌大的随时可背记的“密码本”，倔强的他开始了一场知识的突围. 当 12 本教材被翻出毛边，5 万字笔记浸透晨霜夜露，毕既涛终于在全旅首次导弹检测认证考核中拔得头筹.

“装备保障是战场制胜的二次点火. ”去年演兵场的烈日，至今灼烫着毕既涛的记忆. 面对突发故障，他顶着 40℃高温钻进战车，短时间完成定位故障、更换模块、排除险情整套动作.

这种绝活，源自毕既涛近乎偏执的钻研. 某次新型导弹系统升级，他连续 3 个月吃住在车库，白天逐项验证操作，夜晚破译技术资料，最终梳理出几十项操作难点. 厂家工程师看到那本写满实战注解的手册时连连惊叹：“这些用弹道轨迹写就的经验，比原厂指南更接部队地气！”

走进导弹班宿舍，8 本泛黄的“故障案例集”整齐码放，详细记录着近 10 年来百余次排障经验. 如今，这些案例已录入旅装备管理系统，成为保障人才培养的活教材.

“指头硬不如拳头硬，个人强更要集体强. ”毕既涛深知，现代战争需要体系保障. 他创新“模块化教学法”，把复杂系统分解为“电路解析”“数据判读”等 6 个学习单元，开展跨专业交叉培训. 下士齐贵仝刚接触指控系统时，面对全数字化界面直发怵. 毕既涛手把手教他画出一幅便于理解记忆的“故障树”，如今齐贵仝已能独立排除 30 余种常见故障.

夕阳下的训练场，45 岁的毕既涛正带教新兵们辨识电路板. 工具箱里自制的小扳手磨得锃亮，迷彩服上的汗渍绘成深浅不一的“等高线”. “铆钉越淬火越坚硬，只要战车还需要我，我就永远铆在战位上！”擦去额头的汗水，这位导弹老兵的目光始终望向打赢的方向.

“The more a rivet is tempered, the harder it becomes”

■ Tang Wei, Yu Xiaotao

At the outdoor training ground, missile testing technician Bi Jitao (second from left) is teaching the essentials of testing a certain type of equipment. Photo by Yu Xiaotao

At the foot of the Yanshan Mountains, armored vehicles roared. The red-blue confrontation exercise entered a critical moment. A certain type of missile vehicle suddenly malfunctioned, and the alarm on the operating interface flashed frequently. The roar of the blue force’s fighter jets tearing through the sky grew louder as they approached, and the air inside the vehicle almost solidified. Senior Sergeant Bi Jitao, who was accompanying the team for support, leaped onto the vehicle. His calloused hands moved precisely across the instrument panel filled with buttons, and his sharp eyes pierced through the complex circuitry—measuring voltage, judging codes, replacing components—the whole set of actions was fluid and seamless. “Boom!” The missile, trailing a fiery plume, soared into the sky, precisely intercepting its incoming target.

Racing against time is the norm for Bi Jitao throughout his military career. In his 26 years of service, from missile gunner to “soldier expert,” he has rendered countless “fault codes” invisible, earning him the nickname of the “guiding star” for missile vehicles among his soldiers.

Bi Jitao didn’t initially take on missile testing. That year, his battalion was re-equipped with new gear, and an order led him to switch to missile testing. Upon first encountering this specialty, Bi Jitao discovered that each missile launch required missile testing technicians to adjust and verify hundreds of sets of parameters. Faced with the complex internal structure and intricate circuitry of a new type of missile, even with his solid foundation in mechanical repair skills, he felt as if a mountain was pressing down on his shoulders. At that time, the entire brigade was still in the exploratory phase of this missile type, meaning that Bi Jitao’s missile testing was akin to “trekking through uncharted territory.”

In the depot late at night, this burly Shandong man muttered to himself as he examined dissected missile components: “Circuit boards are the lifeblood of the armored vehicle; if they’re blocked, there’s pain.” He stubbornly created a palm-sized “codebook” of technical terms and circuit diagrams for easy memorization, embarking on a breakthrough in knowledge. When 12 textbooks were worn through and 50,000 words of notes were soaked with morning frost and night dew, Bi Jitao finally emerged victorious in the brigade’s first missile testing and certification assessment.

“Equipment support is the second ignition point for victory on the battlefield.” The scorching sun of last year’s training ground still burns in Bi Jitao’s memory. Faced with a sudden malfunction, he braved 40°C temperatures to crawl into the armored vehicle, quickly locating the fault, replacing the module, and eliminating the danger.

This exceptional skill stems from Bi Jitao's almost obsessive dedication to research. During a recent upgrade of a new missile system, he lived and worked in the depot for three consecutive months, verifying operations item by item during the day and deciphering technical documents at night, ultimately identifying dozens of operational difficulties. When the manufacturer's engineers saw the manual filled with practical annotations, they exclaimed in amazement: "These experiences, written with ballistic trajectories, are more grounded in the realities of the troops than the original manufacturer's guide!" Entering the missile platoon's dormitory, eight yellowed "fault case collections" are neatly stacked, meticulously recording over a hundred troubleshooting experiences from the past decade. These cases have now been entered into the brigade's equipment management system, becoming living teaching materials for support personnel training.

"A strong fist is worse than a strong finger; individual strength is less important than collective strength." Bi Jitao deeply understands that modern warfare requires systemic support. He innovated a "modular teaching method," breaking down complex systems into six learning units, such as "circuit analysis" and "data interpretation," conducting cross-disciplinary training. When Corporal Qi Guitong first encountered the command and control system, he was daunted by the fully digital interface. Bi Jitao personally taught him to draw a "fault tree" for easy understanding and memorization; now, Qi Guitong can independently troubleshoot over 30 common faults.

On the training ground at sunset, 45-year-old Bi Jitao is instructing new recruits on how to identify circuit boards. The homemade wrench in the toolbox was polished to a shine, and the sweat stains on his camouflage uniform formed varying shades of contour lines. "The more a rivet is tempered, the harder it becomes. As long as the tank needs me, I will always be riveted to my post!" Wiping the sweat from his brow, this veteran missile soldier's gaze remained fixed on the direction of victory.

第 12 届陆军国际学员周中外学员参观活动侧记

来源：解放军报 作者：尉寅础 肖力铭 责任编辑：王粲 2025-11-07

感受技术创新的魅力

——第 12 届陆军国际学员周中外学员参观活动侧记

■解放军报记者 尉寅础 特约记者 肖力铭

中外学员参观烽火机器人创新设计俱乐部. 薛飞扬 摄

“启动机器人！”口令下达后，红方机器人迅速自主驶上擂台，随即进入巡逻状态. 它稳健穿梭于擂台之上，多次在边界处精准制动并调整方向. 很快，它锁定蓝方机器人这一移动目标，并立即测算角度，驱动电机全速运转，凭借铲板结构向对手发起猛烈撞击. 最终，蓝方机器人被推下擂台.

11 月 4 日，第 12 届陆军国际学员周组织中外学员参观陆军工程大学烽火机器人创新设计俱乐部，一场精彩的机器人擂台对抗赛吸引了众多学员驻足观看.

本届国际学员周期间，烽火机器人创新设计俱乐部参观活动备受学员们的关注和期待. 据工作人员介绍，该俱乐部秉承“思想的乐园 实践的天地”理念，致力于为学员构建一个融合学习研讨、创意交流和成果展示的综合平台. 在这里，学员们能够运用所学知识激发创意，并通过动手设计、组装和调试，将独特构思转化为风格各异的机器人作品.

“为了灵活感知擂台上的动态，机器人搭载了包括摄像头在内的多种传感器，可以实时反馈擂台边界，精准捕捉对手位置.”对抗赛结束后，陆军工程大学学员张瑞琪向外军学员介绍起这款由俱乐部成员自主设计的机器人，言语间满是自豪.

在观看完精彩纷呈的机器人擂台对抗赛后，学员们移步至俱乐部的装备测试演示区. 水下“探索者”、陆地巡航车、智能搬运机器人……各式各样的机器人相继亮相. 其中，体感格斗机器人前围满了驻足体验的外军学员. 体验者在穿戴体感设备后，动作姿态便被系统实时捕捉，并同步驱动机器人完成挥拳、转向、防御等格斗动作. 来自摩洛哥的学员阿尤布体验后兴奋地说：“操作直观流畅，就像玩体感游戏一样！如果将这款可远程实时操控并能准确完成精细动作的机器人，应用于扫雷排爆等高危场景，相信会给人们带来很大帮助.”

装备测试演示区的旁边是俱乐部集设计与制作为一体的核心区域，配备了 3D 打印机等专业设备，为创意落地提供了坚实硬件支撑. 在这里，中外学员可全程参观体验机器人从结构设计、电路规划、编程调试，到零部件加工与成品制作的完整流程. 参观过程中，学员们还围绕设计理念、三维建模技巧及制作工艺等话题，展开了深入交流.

参观活动结束后，不少外军学员意犹未尽，仍在继续交流俱乐部技术创新成果与经验. 本届陆军国际学员周以“新域新质力量对未来战争影响”为主题，烽火机器人创新设计俱乐部的创新实践正是这一主题的生动缩影. 中外学员们在参观俱乐部的过程中，不仅感受到了技术创新的魅力，还在近距离观摩水下探测、体感格斗等机器人后，深切体会未来智能化后勤保障、无人化作战等新质战斗力的重要性.

A Report on the Visit of Chinese and Foreign Students to the 12th International Army Cadet Week

Source: PLA Daily Author: Wei Yinchu, Xiao Liming Editor: Wang Can 2025-11-07

Experiencing the Charm of Technological Innovation

—A Report on the Visit of Chinese and Foreign Students to the 12th International Army Cadet Week

■ PLA Daily Reporter Wei Yinchu, Special Correspondent Xiao Liming Chinese and foreign students visit the Fenghuo Robotics Innovation Design Club. Photo by Xue Feiyang

"Start the robot!" After the command was given, the red team robot quickly and autonomously drove onto the arena and immediately entered patrol mode. It moved steadily across the arena, braking and adjusting its direction precisely at the boundary multiple times. Soon, it locked onto the blue team robot as its moving target, immediately calculated the angle, drove the motor to full speed, and launched a fierce collision with its opponent using its shovel-like structure. Finally, the blue team robot was pushed off the arena.

On November 4, the 12th International Army Cadet Week organized a visit for Chinese and foreign students to the Fenghuo Robotics Innovation Design Club of the Army Engineering University. A wonderful robot arena competition attracted many students to stop and watch.

During this year's International Student Week, the visit to the Fenghuo Robotics Innovation Design Club attracted much attention and anticipation from the students. According to staff, the club adheres to the philosophy of "a paradise of ideas and a realm of practice," aiming to build a comprehensive platform for students that integrates learning and discussion, creative exchange, and results display. Here, students can apply their knowledge to inspire creativity and transform their unique ideas into diverse robot creations through hands-on design, assembly, and debugging.

"To flexibly perceive the dynamics on the arena, the robot is equipped with multiple sensors, including cameras, which can provide real-time feedback on the arena boundaries and accurately capture the opponent's position," said Zhang Ruiqi, a student from the Army Engineering University, proudly introducing the robot designed by club members to foreign military students after the competition.

After watching the exciting robot arena competition, the students moved to the club's equipment testing and demonstration area. Underwater "explorers," land patrol vehicles, intelligent transport robots… a variety of robots were on display. Among them, the motion-sensing combat robot attracted a large crowd of foreign military students who stopped to experience it. After wearing the motion-sensing device, the user's movements were captured in real time by the system, which simultaneously drove the robot to perform combat actions such as punching, turning, and defending. Ayoub, a student from Morocco, excitedly said after experiencing it, "The operation is

intuitive and smooth, just like playing a motion-sensing game! If this robot, which can be remotely controlled in real time and accurately performs precise movements, were applied to high-risk scenarios such as mine clearance and explosive ordnance disposal, I believe it would be of great help to people." Next to the equipment testing and demonstration area is the club's core area, integrating design and manufacturing, equipped with professional equipment such as 3D printers, providing solid hardware support for the realization of creative ideas. Here, Chinese and foreign students can observe and experience the entire process of robot manufacturing, from structural design, circuit planning, programming and debugging to parts processing and finished product production. During the visit, students also engaged in in-depth exchanges on topics such as design concepts, 3D modeling techniques, and manufacturing processes.

After the visit, many foreign military students lingered, continuing to exchange the club's technological innovation achievements and experiences. This year's International Army Cadet Week, themed "The Impact of New Domains and New Quality Forces on Future Warfare," is vividly reflected in the innovative practices of the Fenghuo Robotics Innovation Design Club. During their visit to the club, Chinese and foreign trainees not only experienced the allure of technological innovation but also gained a deeper understanding of the importance of future intelligent logistics support and unmanned combat capabilities after closely observing robots performing underwater exploration and motion-sensing combat.

北部战区陆军某旅着力打通服务基层“最后一公里”

来源：解放军报 作者：吴安宁 柯青坡 责任编辑：王粲 2025-11-09

北部战区陆军某旅着力打通服务基层“最后一公里”——

“兵情直通车”暖了官兵心

■解放军报记者 吴安宁 特约记者 柯青坡

“申办事项敲敲键盘即可完成，省下的时间精力用在学习训练上！”日前，北部战区陆军某边防旅天池哨所战士小李，登录旅强军网[4]“兵情直通车”服务平台，提交一份补办证件的申请，不到一小时就收到机关反馈. 几天后，小李便收到了直接邮寄到连队的新证件.

该旅防区点多线长面广，不少哨所地处高山密林，交通十分不便. 过去，官兵到机关办理事项，往往需要翻山越岭往返奔波，不仅耗时费力，还容易影响战备训练. 该旅机关围绕

[4] 强军网是 2018 年 3 月 26 日经中央军委批准，依托全军政工网整合军内网站资源创建的军事网站. “强军网上线开通仪式在京举行 张又侠出席并讲话,” 81.cn, 26 March 2018, http://www.81.cn/jwzb/2018-03/26/content_7983893.htm; “Chinese Military Launches New Web Portal,” Xinhua News Agency, 26 March 2018, http://www.xinhuanet.com/english/2018-03/26/c_137067137.htm. Zhang Youxia appears to have been involved in the PLA’s push to improve its information systems, and with the “Strong Army” [强军网] information hub for soldiers was launched during his tenure. [Note: The website does not have an official English name or an English version.]

提升服务质效开展调研时，不少官兵建议，改进各类事项办理方式，彻底解除大家为办事“跑腿”的烦恼.

“只有实实在在为官兵解决急难愁盼问题，才能确保大家心无旁骛戍边守防. ”为此，该旅积极探索“网络+”为兵服务新模式，依托强军网推出“兵情直通车”服务平台，着力打通服务基层“最后一公里”.

记者登录“兵情直通车”服务平台看到，各类专栏分门别类，官兵点击“咨询”栏即可查阅政策法规，咨询法律问题；点击“反馈”键即可提出意见建议，一键直达机关；进入“办理”窗口可提交证件办理、物资申请、营房维修等各类需求，还能实时查看办理进度.

为确保官兵申办事项精准送达相关业务科室，该旅建立平台值班反馈机制，由机关业务部门值班员负责收集梳理，及时转交相关业务科室. 各业务科室设定反馈时限，普通事项原则上 24 小时内办结或给出明确答复，确保官兵申办事项件件有回音、事事有着落.

该旅某巡逻艇中队官兵提交关键装备维修需求后，机关迅速派出技术骨干，携带备件及时赶赴现场，避免了装备“趴窝”；某哨所军士咨询退役安置政策，当日便收到详细答复……该旅领导介绍，“兵情直通车”服务平台推出以来，已成功受理并办结各类事项百余件，平均办理时间较以往大幅缩短.

在此基础上，该旅机关利用后台统计信息，对官兵咨询频率较高的共性需求进行“精准画像”，做到主动预测、靠前服务. “兵情直通车”服务平台汇总的官兵意见建议，也成为该旅机关评价工作质效的“传感器”. 官兵提出的改善伙食保障、丰富文化生活等合理化建议，一经提出就被机关快速采纳.

服务周到贴心，官兵动力十足. “兵情直通车”服务平台推出以来，该 旅官兵普遍反映，没了后顾之忧，大家有了更多时间和精力投身练兵备战，动力更足、热情更高.

A Brigade of the Northern Theater Command Army Strives to Connect the “Last Kilometer” of Services to Grassroots Units

Source: PLA Daily Author: Wu Anning, Ke Qingpo Editor: Wang Can

2025-11-09

A Brigade of the Northern Theater Command Army Strives to Connect the “Last Kilometer” of Services to Grassroots Units—

“Soldier Information Express” Warms the Hearts of Officers and Men

■PLA Daily Reporter Wu Anning, Special Correspondent Ke Qingpo

“Applications can be completed with just a few keystrokes, saving time and energy for study and training!” Recently, Xiao Li, a soldier at the Tianchi outpost of a border defense brigade of the Northern Theater Command Army, logged into the brigade’s “Soldier Information Express” service platform on the Strong Army Network and submitted an application for a replacement certificate. [Note: The website does not have an official English name or an English version.] He received feedback from headquarters in less than an hour. A few days later, Xiao Li received the new certificate mailed directly to his company.

The brigade’s defense area is vast and sprawling, with many outposts located in high mountains and dense forests, making transportation extremely inconvenient. In the past, officers and men often had to travel back and forth over mountains to handle matters at headquarters, which was not only time-consuming and laborious but also easily affected combat readiness training. During a research trip to improve service efficiency, many officers and men suggested refining the procedures for handling various matters to completely eliminate the hassle of running errands.

“Only by genuinely addressing the urgent needs and concerns of our officers and men can we ensure they can focus wholeheartedly on border defense.” To this end, the brigade actively explored a new “network+” service model, launching the “Soldier Information Express” service platform on the Strong Army Network to effectively bridge the “last kilometer” in serving grassroots units.

A reporter logged onto the “Soldier Information Express” platform and found various categorized sections. Officers and men can click the “Consultation” section to access policies and regulations and consult on legal issues; click the “Feedback” button to submit opinions and suggestions, directly reaching the headquarters; and enter the “Processing” window to submit various requests such as document processing, material applications, and barracks repairs, while also checking the processing progress in real time.

To ensure that officers’ and men’s requests are accurately delivered to the relevant departments, the brigade established a platform duty feedback mechanism. Duty officers from the headquarters’ business departments are responsible for collecting and sorting these requests and promptly forwarding them to the relevant departments. Each department sets feedback timelines, ensuring that routine matters are handled or clearly answered within 24 hours, guaranteeing that every request from officers and men receives a response and is resolved.

After officers and men of a patrol boat squadron submitted a critical equipment repair request, the headquarters quickly dispatched technical experts with spare parts to the site, preventing equipment breakdowns. A sergeant at a sentry post inquired about retirement and resettlement policies and received a detailed reply on the same day. The brigade leadership explained that since the launch of the “Officers’ and Men’s Situation Hotline” service platform, it has successfully processed and resolved over a hundred cases, significantly reducing the average processing time.

Based on this, the brigade headquarters utilizes backend statistics to create “precise profiles” of common needs frequently requested by officers and men, enabling proactive prediction and forward-looking service. The opinions and suggestions collected by officers and men through the “Soldiers’ Situation Hotline” service platform also serve as a “sensor” for evaluating the efficiency and effectiveness of the brigade headquarters’ work. Reasonable suggestions from officers and men, such as improving food supplies and enriching cultural life, are quickly adopted by the headquarters.

With such thoughtful and attentive service, officers and men are highly motivated. Since the launch of the “Soldiers’ Situation Express” service platform, officers and men of the brigade have generally reported that without any worries, they have more time and energy to devote to training and combat readiness, and are more motivated and enthusiastic.

中国边关丨江巴斯：山脊线上奔腾的青春

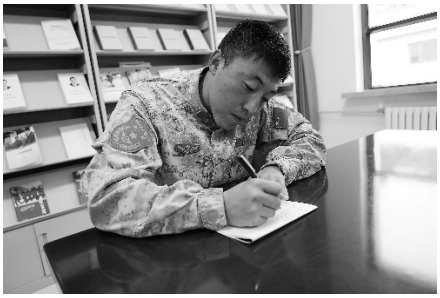
来源：解放军报 作者：田芷齐 李子涵 马乐清 责任编辑：王粲 2025-11-10

向着山口攀登.

这里，是祖国西北的阿拉套山，一条苍劲的山脊线划分出哨兵的两个世界. 在山脊的这头，是新疆军区江巴斯边防连的营盘；在山脊的那头，是日夜通行的阿拉山口口岸.

当一列列国际班列呼啸着通过口岸，连接起中国与远方时，有一群年轻的士兵正站在山脊线上，守卫着口岸和班列的安全. 无论是面向班列还是背朝班列，他们与班列奔赴的，都是同一个“目标”——班列运送的是繁荣与发展，他们守护的是和平与安宁.

在这里，每一个士兵都经历着一场特殊的“成人礼”. 不是在城市霓虹中，而是在风雪巡逻路上；不是在亲人的目光中，而是在国门的注视下. 他们的青春，被山风雕刻，被冰雪淬炼，最终成了山的模样——沉默、坚韧、不可撼动.



今天，让我们走进新疆军区江巴斯边防连，聆听一群驻守口岸一线边防哨兵的故事. 他们的每一天，都是对“守望”最生动的诠释：守望国门，守望班列，守望身后的万家灯火.

他们让世界看见，当青春遇上边关，当个人融入家国，荒凉的山脊也能迸发出蓬勃的力量.他们站在那里，本身就是国门前的风景.

——编 者

江巴斯：山脊线上奔腾的青春

■田芷齐 李子涵 马乐清

顾帅郑重写下留队申请书.

山脊上的坚守.

荒山之中，官兵播种绿色.

黄永升（中）向战友展示新厨艺.

李海（右）与班长在点位执勤.

风雪中的“成人礼”，雕刻出战士坚毅的脸庞

深秋的阿拉套山，褪去最后一片金黄，在素朴清朗中静候寒冬. 新疆军区江巴斯边防连上等兵李海站在哨楼上眺望，视线越过连绵的山脊线，落在那头灯火闪烁的阿拉山口口岸.

恍惚间，他仿佛看见了数千公里外，家乡云南红河河畔的夜色——那座祖国西南边陲的口岸，是他梦想开始的地方.

李海的家，距离国门口岸不远. 打记事起，母亲就经常望着国门下的哨兵对他说：“看那些边防军人，是他们守护着我们的幸福生活. ”母亲的话如春风化雨，将一颗从军报国的种子，悄悄播种在他的心田.

18 岁那年的秋天，李海穿上军装，踏上西行的列车. 从一个边关奔赴另一个边关，他带着母亲的嘱托和年少的热望，走向陌生的西北高原.

当列车缓缓停靠，他第一眼望见的，便是暮色中绵延不绝的雪山，像极了大地的脊梁，横亘在天际线上，沉默而坚定.

李海仍清晰记得，第一次参加巡逻时的情景. 巡逻路沿着陡峭的山脊延伸，冰粒夹杂着沙石漫天飞舞，在大地上肆意展示着自然的力量.

他眯紧双眼，艰难呼吸. 风撕扯着他的作训服，未系紧的帽绳抽打着脸颊，记忆中留下灼热的疼.

狂风中，班长刘金的声音几乎被吞没：“快把背包绳绑在腰上！大家抓紧，队不能散！”李海紧紧握住手中的背包绳，这根平日里普通的绳索，此刻成了他和战友攀登时的共同依靠.

还有一次巡逻返程途中，风雪袭来. 队伍即将抵达山谷，风愈发猛烈. 身边的战友忽然一个踉跄，眼看就要跌倒，李海想也没想就扑上去. 两人都失去平衡，重重地摔在雪地上.

“紧贴地面！”刘金嘶喊着，自己也伏倒在地，双手拽紧连接两人的背包绳. 后面的战友一个个扑上来，更多双手一起拽住背包绳，帮助他们脱离了险境.

每次登顶后，李海都会抬起头远眺——他们守护的不仅是脚下的土地，更是身后的万家灯火和不时从口岸驶过的国际班列. 列车呼啸着连接起中国与远方，而他们，是这和平通道上坚定的守护者.

来自广西的中士韦延资，同样经历了属于自己的“江巴斯成人礼”. 最让他记忆犹新的，是人生中的第一场雪. 这个自幼在广西长大的小伙子，第一次真正触摸到了冰雪的寒彻.

连队接到除雪任务，他毫不犹豫地报了名. 谁知刚踏出营门，便一脚踩空，从山顶径直滑了下去，在雪地里滚成了一个雪人.

待抵达任务点，他才意识到这场“战斗”的艰难. 数米高的雪墙封住沟口，宛如一道被瞬间冻结的“巨浪”. 没有机械支援，他和战友一锹砸向冰层，冰屑炸裂四溅，震得虎口发麻. 汗水浸透里衣，又在寒风中凝结成冰.

韦延资偶尔直起腰，回头望去，那条他们刚用双手劈开的“路”，在雪海之中蜿蜒伸展. 那一刻，某种难以言喻的情绪涌上心头，将他的胸腔填得满满当当. 他俯身抓起一把雪，塞进口中，冰凉在舌尖化开，泛起一丝干净的清甜.

在每一个战位上，守好自己的阵地

连队菜窖里，一束光穿透进来. 炊事班长毛江林正俯身整理着冬菜. 江巴斯即将迎来冬季，这位老兵清楚地知道，这或许是他最后一次亲手为连队储备冬菜.

他将每一棵白菜码放整齐，仿佛正在将自己 16 年的戍边岁月也一并叠放进去，妥帖珍藏.

从山东青州秀美的绿水青山，到江巴斯苍劲的雪山戈壁. 岁月把蔬菜腌渍成冬菜，也让这位老兵“酿”出了成熟的滋味.

“记忆最深的就是冬天，那条唯一的路被风雪阻断，新鲜蔬菜运不进来，就得靠那一窖冬菜过冬. 要是狂风一来，连队的门板说飞就飞，在雪地里打着旋……大家一起雪海‘追门板’的经历，至今记忆犹新. ”每当回忆往事，毛江林总感慨万千.

如今，连队后厨焕然一新，电能集成灶方便高效，食谱也从单调的炖菜变成更加科学营养的多样化菜品. 时代大步向前，可毛江林的眼神一如往昔般坚定：“灶台就是我的战位，炊具就是我的钢枪. 每一道菜，都是不能失守的阵地. ”

中士黄永升是毛江林一手带出来的兵. 3 年前，这位大学生士兵刚进炊事班，做的第一道菜便是家乡风味的白切鸡.

然而开饭时，唯独黄永升那道菜的餐盘前冷冷清清. 那晚，挫败感像一块石头压在心头，让他辗转难眠. 毛江林对他说：“光有热情可不够. 我们做饭，既要懂战友的‘胃’，更要懂他们的‘味’. ”

就是从那时起，黄永升开始下苦功钻研厨艺，同时留意每位战友的口味，谁多吃了一口辣，谁不爱吃香菜，谁总舀汤泡饭吃……他都记在心里.

一晃 3 年过去. 如今的黄永升已经有了好几道连队官兵称道的拿手菜、招牌菜，特别是猪肉炖粉条，他每次都选肥瘦相间的五花肉，文火咕嘟几小时，把肉炖得红亮亮、色香味俱全.

巡逻官兵刚进营门，就能闻出这熟悉的味道，来自东北的上等兵姜正走在队伍前忍不住喊道：“这味道刚蹿出来，我还以为摸到自家灶台边儿了！”

在一次强军故事会上，毛江林这样说：“所谓成长，不过是冷的时候顶住，累的时候挺住. 就像菜窖里的冬菜，一层盐一层菜，压紧了，封实了，时间自会给出答案. ”

二级上士石杰光的家乡在重庆巫山，那里的山峦平缓连绵，而江巴斯的山，却像一柄柄利剑，陡峭而冷峻.

那年，他从陆军军医大学毕业，精通针灸等中医理疗技法. 可令他始料未及的是，连队大多数战友都不愿找他看病，有人说：“这个卫生员一治疗就扎针，针插到肉里呀，想想都怕. ”

石杰光主动为战友普及中医知识，战友训练疲惫，他为大家按摩放松肌肉；有战友扭伤，他为其扎针放血治疗. 渐渐地，从避之不及到一针难求，他的名气传播开来，大家都叫他“妙手飞针”.

石杰光的父母不忍儿子离家在外，希望他能早日归乡. 石杰光向父母表达了内心的一份执着：“比起回乡后的安逸生活，我更希望和战友一起守卫国门. ”

与战友一起巡逻，石杰光站在山顶望去，国际班列的汽笛声不时掠过江巴斯旁的谷地，清脆而悠扬. 这声音穿透戈壁，像是时代的脉搏.

阿拉山口口岸，这个昔日孤独的边防驿站，如今已蜕变为对外开放的重要门户. 石杰光忽然想起家乡也有一座山，童年时他总爱登山望远. 从一座山到另一座山，这是他的选择，也是时代的选择.

“站在山脊上，感觉怎么样？”战友笑着问他，眼里有光.

石杰光望着远方绵延的边防线，深吸一口气，脸上绽放笑容：“我觉得……翻过这山脊，我的青春才算真正开始！”

守望在国门旁，屹立成祖国的一道“风景”

去年夏天，暴雨来得猝不及防. 连续 3 天的大雨冲垮了山体，洪水顺着山脊奔腾而下，直扑山脚下的连队. 翌日清晨，官兵们发现通往外界的道路都已中断，淤泥已经堆到营门口.

没有犹豫，没有迟疑. 接到清淤命令，一级上士顾帅冲到队伍最前方. 10 多年的戍边生涯，让他非常了解这片土地的脾性. 他率先跃入齐膝的泥水中，一锹锹地铲除淤泥.

经过数小时连续奋战，当最后一块沙袋垒成时，乌云渐渐散去，阳光穿透云层，照亮每一张沾满泥浆的脸庞.

在顾帅的心里，比“守住”更重要的，是“创造”——让这片土地也能长出蓬勃的生命.

入伍来到江巴斯后，他有了一个想法：在“连草都难生”的山石间，开辟一片绿色. 没有土，他动员大家从山下一袋袋背来；没有水，就提着山泉一桶桶浇灌. 官兵化身山石上的园丁，在石缝中播种希望.

奇迹，发生在下一个春天. 这十几株树苗，竟真的活了下来，从石缝中长出鲜活的绿意. 站在那片新绿前，顾帅字字铿锵地说：“在这儿都能把树种活，还有什么能难倒我们？”

这些树，就像扎根山石上的哨兵，在贫瘠的山脊上生出了坚韧的根，在凛冽的寒风中挺直了坚硬的脊梁. 每年新兵下连，顾帅总会带他们来看树.

“你看，种在连队的树，风再大，树干也是直的. ”他说，“咱们驻守在山脊上，环境再艰苦脊梁也不能弯. ”

光阴荏苒，曾经青涩的少年成了“老班长”. 服役期将满，顾帅站在了“走与留”的十字路口. 妻子期盼团圆，却更懂得丈夫身穿戎装时的荣光. 她把选择权交给顾帅，在寄来的全家福背面写道：“你守护边关，我守护咱家！”

顾帅将全家福放进口袋，郑重向党支部递交留队申请. 他在申请书中写道：“我喜欢站在山顶听国际班列的鸣笛，看国旗与晚霞的辉映，享受巡逻途中躺在风中的片刻宁静……这里待得越久，越懂得什么是家. ”

边关不是远方，早已是老兵用心守护的地方.

如今，昔日树苗蔓延成“荒原碧玉”，柏油路像丝带系在山间. 物资车定期来营，送来蔬果鲜肉，也送来山外的讯息. 但官兵们知道，这条路通向的，不仅是繁华与便利，更是沉甸甸的责任.

这条路，让官兵的脚步更坚定. 黄昏时分，大家沿路散步，看夕阳将路面染成暖金色，听风从阿拉套山的那边吹来.

有人翻山越岭是为了欣赏风景，这群口岸哨兵，却在这道山脊上把自己屹立成了风景. 他们的青春，在山顶上蓬勃生长，在岁月里澎湃成浪.

China’s Border | Jiangbas: Youth Galloping Along the Ridge

Source: PLA Daily

Authors: Tian Zhiqi, Li Zihan, Ma Leqing

Editor: Wang Can

2025-11-10

Climbing towards the mountain pass.

Here lies the Alatau Mountains in northwest China, a rugged ridgeline dividing the sentries into two worlds. On one side of the ridge is the barracks of the Jiangbas Border Defense Company of the Xinjiang Military Command; on the other side lies the Alatau Pass, a vital transportation hub.

As international freight trains roar through the pass, connecting China with distant lands, a group of young soldiers stand on the ridgeline, guarding the security of the pass and the trains. Whether facing the trains or with their backs to them, they share the same goal—the trains transport prosperity and development, while they safeguard peace and tranquility.

Here, every soldier undergoes a special “rite of passage.” Not amidst the city’s neon lights, but on patrol routes through wind and snow; not under the gaze of loved ones, but under the watchful eyes of the nation’s border. Their youth, sculpted by mountain winds and tempered by ice and snow, ultimately takes on the form of the mountains—silent, resilient, and unshakeable.

Today, let us step into the Jiangbas Border Defense Company of the Xinjiang Military Command and listen to the stories of a group of border sentries stationed on the front lines of the port. Every day of theirs is the most vivid interpretation of “guarding”: guarding the national border, guarding the freight trains, and guarding the lights of countless homes behind them.

They show the world that when youth meets the border, when individuals become part of the nation, even desolate mountain ridges can burst forth with vibrant power. They stand there, themselves a part of the scenery before the national border.

—Editor Jiangbas: Youth Galloping Along the Mountain Ridge

■ Tian Zhiqi, Li Zihan, Ma Leqing

Gu Shuai solemnly writes his application to stay in the army.

The steadfast commitment on the mountain ridge.

In the barren mountains, soldiers sow greenery.

Huang Yongsheng (center) demonstrates his new culinary skills to his comrades.

Li Hai (right) and his squad leader are on duty at their post.

A "coming-of-age ceremony" in the wind and snow sculpts the soldier's resolute face.

In late autumn, the Alatau Mountains shed their last golden hues, quietly awaiting the harsh winter in their simple and clear air. Private Li Hai of the Jiangbas Border Defense Company of the Xinjiang Military Command stands atop the watchtower, his gaze sweeping across the continuous mountain ridges to the twinkling lights of the Alatau Pass.

In a daze, he seems to see the night view of his hometown, the Red River in Yunnan, thousands of kilometers away—that border crossing on the southwestern border of the motherland, the place where his dreams began.

Li Hai's home is not far from the border crossing. From a young age, his mother would often look at the sentries at the border and say to him, "Look at those border guards; they are protecting our happy lives." His mother's words, like a gentle spring rain, quietly planted a seed of serving his country in his heart.

In the autumn of his 18th year, Li Hai donned his military uniform and boarded a train heading west. From one border post to another, he carried his mother's entrustment and youthful aspirations, heading towards the unfamiliar northwestern plateau.

As the train slowly came to a stop, the first thing he saw was the endless snow-capped mountains in the twilight, like the spine of the earth, stretching across the horizon, silent and resolute.

Li Hai still vividly remembers his first patrol. The patrol route stretched along a steep ridge, ice pellets mixed with sand and gravel swirling in the air, displaying the power of nature on the land.

He squinted, breathing heavily. The wind tore at his training uniform, the loosely fastened hat drawstring whipping his cheeks, leaving a burning pain in his memory.

In the gale, squad leader Liu Jin's voice was almost swallowed up: "Quickly tie the backpack rope around your waist! Everyone hold on tight, the team can't fall apart!" Li Hai gripped the backpack rope tightly in his hand; this ordinary rope, in everyday life, had become his and his comrades' shared support as they climbed.

Another time, on the return journey from a patrol, a blizzard struck. As the team approached the valley, the wind grew stronger. A comrade beside him suddenly stumbled, about to fall. Without hesitation, Li Hai rushed to his aid. Both lost their balance and crashed heavily onto the snow.

"Stick to the ground!" Liu Jin shouted, also dropping to the ground and gripping the backpack ropes connecting them. Comrades behind them rushed forward, many hands joining in to pull them back from the brink of danger.

Each time they reached the summit, Li Hai would look up and gaze into the distance—they were protecting not only the land beneath their feet, but also the lights of countless homes behind them and the international freight trains that constantly passed through the border. The trains roared, connecting China with distant lands, and they were the steadfast guardians of this peaceful passage.

Sergeant Wei Yanzi, from Guangxi, also experienced his own "Jiangbas coming-of-age ceremony." What he remembered most vividly was his first snowfall. This young man, who had grown up in Guangxi, truly felt the biting cold of snow for the first time.

When the company received a snow removal assignment, he volunteered without hesitation. No sooner had he stepped out of the camp gate than he slipped and slid straight down the mountainside, rolling into a snowman in the snow.

Upon reaching the mission point, he realized the difficulty of this "battle." A snow wall several meters high blocked the ravine entrance, like a giant wave frozen solid. Without mechanical support, he and his comrades smashed the ice with shovels, ice shards shattering and scattering, numbing their hands. Sweat soaked their undershirts, freezing in the cold wind.

Wei Yanzi occasionally straightened up and looked back at the "path" they had just carved out with their bare hands, winding through the sea of snow. At that moment, an indescribable emotion welled up inside him, filling his chest. He bent down, grabbed a handful of snow, and put it in his mouth; the coolness melted on his tongue, leaving a clean, sweet taste.

At every battle station, guarding their position.

A beam of light pierced through the company's vegetable cellar. Cook Mao Jianglin was bending over, arranging winter vegetables. Jiangbas was about to face winter, and this veteran knew this might be the last time he personally prepared winter vegetables for the company.

He neatly stacked each cabbage, as if carefully treasuring his 16 years of border service.

From the beautiful green hills and clear waters of Qingzhou, Shandong, to the rugged snow-capped mountains and Gobi Desert of Jiangbas, time had preserved the vegetables into winter vegetables, and this veteran had also "brewed" a mature flavor from them.

"My deepest memories are of winter. The only road was blocked by wind and snow, and fresh vegetables couldn't be brought in. We had to rely on that cellar of winter vegetables to get through the winter. When a strong wind came, the company's door panels would fly away, spinning in the snow… The experience of everyone chasing the door panels through the snow is still vivid in my memory." Mao Jianglin was always filled with emotion when recalling the past.

Today, the company's kitchen has been completely renovated. The integrated electric stoves are convenient and efficient, and the menu has evolved from monotonous stews to a more scientifically prepared and nutritious variety of dishes. Times are changing rapidly, but Mao Jianglin's gaze remains as firm as ever: "The stove is my battle station, and the cooking utensils are my rifles. Every dish is a position that cannot be lost." Sergeant Huang Yongsheng is a soldier personally trained by Mao Jianglin. Three years ago, this college graduate soldier joined the mess hall, and the first dish he cooked was a hometown-style poached chicken.

However, at mealtimes, Huang Yongsheng's dish was the only one left untouched. That night, a sense of defeat weighed heavily on his heart, keeping him tossing and turning all night. Mao Jianglin told him, "Enthusiasm alone isn't enough. When we cook, we need to understand not only our comrades' 'stomachs,' but also their 'tastes.'"

From that moment on, Huang Yongsheng began to diligently hone his culinary skills, paying close attention to each comrade's preferences: who ate an extra bite of spice, who didn't like cilantro, who always ate rice soaked in soup… He remembered it all.

Three years passed in a flash. Now, Huang Yongsheng has several signature dishes praised by the soldiers in his company, especially his braised pork with vermicelli. He always selects pork belly with a good balance of fat and lean meat, simmering it over low heat for several hours until the meat is a beautiful reddish-brown color, aroma, and flavor.

As the patrolling soldiers entered the camp, they could immediately smell the familiar aroma. Private Jiang Zheng, from Northeast China, walking at the front of the column, couldn't help but exclaim, "When that smell wafted out, I thought I'd stumbled upon my own kitchen stove!"

At a military story-telling event, Mao Jianglin said, "So-called growth is simply about enduring the cold and persevering through the fatigue. Like winter vegetables in a cellar, layer upon layer of salt and vegetables, pressed tightly, sealed tightly, time will provide the answer." Sergeant Shi Jieguang's hometown is Wushan, Chongqing, where the mountains are gentle and continuous. But the mountains of Jiangbas are like sharp swords, steep and austere.

That year, he graduated from the Army Medical University, proficient in acupuncture and other traditional Chinese medicine therapies. To his surprise, most of his comrades were reluctant to

seek his medical help. Some said, “This medic always uses acupuncture; the needles go into the flesh, it’s terrifying to even think about.” Shi Jieguang proactively shared traditional Chinese medicine knowledge with his comrades. When they were tired from training, he massaged their muscles to relax them; when someone sprained their ankle, he treated them with acupuncture and bloodletting. Gradually, his reputation spread, and everyone called him “Miraculous Needle Master.”

Shi Jieguang’s parents couldn’t bear to see their son away from home and hoped he would return soon. Shi Jieguang expressed his unwavering determination to his parents: “Compared to the comfortable life back home, I’d rather guard the nation’s borders with my comrades.” Patrolling with his comrades, Shi Jieguang stood on the mountaintop and looked out. The whistles of international freight trains occasionally swept across the valley beside the Jiangbas region, clear and melodious. This sound pierced the Gobi Desert, like the pulse of the times.

Alashankou Port, once a lonely border post, has now transformed into an important gateway to the outside world. Shi Jieguang suddenly remembered a mountain in his hometown, a mountain he loved to climb as a child to gaze into the distance. From one mountain to another, this was his choice, and also a choice of the times.

“How does it feel standing on the ridge?” his comrade asked with a smile, his eyes shining.

Shi Jieguang looked at the distant, sprawling border line, took a deep breath, and a smile bloomed on his face: “I feel... only after crossing this ridge will my youth truly begin!” Guarding the national gate, standing tall as a “landscape” of the motherland.

Last summer, a sudden downpour caught everyone off guard. Three consecutive days of heavy rain washed away the mountainside, and floodwaters rushed down the ridge, heading straight for the company at the foot of the mountain. The next morning, the soldiers found that all roads leading to the outside world were cut off, and silt had piled up to the camp gate.

Without hesitation, without delay. Upon receiving the order to clear the silt, First-Class Sergeant Gu Shuai rushed to the front of the team. Over a decade of border defense experience gave him a deep understanding of the land’s character. He was the first to leap into knee-deep mud, shoveling away the silt shovel by shovel.

After hours of continuous work, as the last sandbag was stacked, the dark clouds gradually dispersed, and sunlight pierced through the clouds, illuminating every mud-covered face.

In Commander Gu’s heart, more important than simply “defending” was “creating”—allowing this land to also sprout vibrant life.

After enlisting and arriving in Jiangbas, he had an idea: to cultivate a patch of green among the rocky mountains where “even grass struggles to grow.” Lacking soil, he mobilized everyone to carry bags from the foot of the mountain; lacking water, they carried buckets of mountain spring water. The soldiers became gardeners on the rocks, sowing hope in the crevices.

A miracle occurred the following spring. Those dozen or so saplings actually survived, sprouting vibrant green from the cracks in the rocks. Standing before the newly sprouted greenery, Gu Shuai declared firmly, “If we can grow trees here, what can possibly defeat us?”

These trees, like sentinels rooted in the mountain rocks, have grown resilient roots on the barren ridge, their sturdy spines standing tall against the biting wind. Every year when new recruits joined their units, Gu Shuai would bring them to see the trees.

“Look,” he said, “the trees planted in the company, no matter how strong the wind, their trunks remain straight. We are stationed on the ridge; no matter how harsh the environment, our spines cannot bend.”

Time flies, and the once-naive young man has become a seasoned sergeant. With his service nearing its end, Gu Shuai stood at the crossroads of “staying or leaving.” His wife longed for reunion, but she understood even more the glory her husband exuded in his uniform. She gave the choice to Gu Shuai, writing on the back of a family photo she sent: “You guard the border, I’ll guard our home!”

Gu Shuai put the family photo in his pocket and solemnly submitted his application to stay in the army to the Party branch. In his application, he wrote, “I love standing on the mountaintop listening to the whistles of international freight trains, watching the national flag reflect the sunset, and enjoying the moments of tranquility while lying in the wind during patrols… The longer I stay here, the more I understand what home is.” The border is not a distant place; it has long been a place that veterans have wholeheartedly guarded.

Now, the saplings of yesteryear have sprung into a “jade-like wasteland,” and asphalt roads wind like ribbons through the mountains. Supply trucks regularly visit the camp, bringing vegetables, fruits, and fresh meat, as well as news from outside the mountains. But the soldiers know that this road leads not only to prosperity and convenience, but also to a heavy responsibility.

This road makes the soldiers’ steps more resolute. At dusk, they stroll along the road, watching the sunset paint the road a warm gold, listening to the wind blowing from the other side of the Alatau Mountains.

Some people traverse mountains to admire the scenery, but these border sentries have made themselves a part of the scenery on this mountain ridge. Their youth flourishes on the mountaintop, surging like waves over the years.

战鹰翱翔有了“数据助手”！陆军某旅引导官兵向数据要战斗力

来源：解放军报 作者：雷骁 王蓬旭 韩成 责任编辑：王粲 2025-11-10

第 82 集团军某旅引导官兵向数据要战斗力——

战鹰翱翔有了“数据助手”

■雷 骁 王蓬旭 解放军报记者 韩 成

塞北某演兵场秋风劲吹，随着一发信号弹划过天际，第 82 集团军某旅多架武装直升机腾空而起，展开一场实战条件下的飞行训练.

“动力系统故障！”机长徐俊泽驾驶战机刚抵达预定空域，便收到塔台传来的特情导调指令. 副驾驶何云飞立即点开机载平板电脑上的《特情处置手册》，按故障标准化处理流程，配合徐俊泽快速完成故障排除.

走下训练场，参训官兵立即来到讲评室进行复盘总结. 徐俊泽结合此次空中排障经历，提出两条故障处置改进措施，各参训机长分别围绕数据更新等内容提出多条优化建议. 经上级研究论证，这些意见建议均被采纳. 会后，该旅数据采集负责人朱宏伟第一时间将需要优化的条目生成新的数据包，录入《特情处置手册》. 徐俊泽告诉记者，手册已累计录入百余条飞行特情处置数据，为飞行员应对空中突发情况提供参考.

“数据是感知战场态势的必要手段，更是辅助决策的有力支撑，《特情处置手册》如同飞行机组的‘数据助手’，让机组处置空中特情更为科学高效. ”谈及制订《特情处置手册》的初衷，该旅领导讲起此前一次训练失利.

那次实兵对抗训练，该旅任务机组计划采取超低空隐蔽突防方式先发制人. 然而，战斗刚刚打响，战机便“受损”过半. 最终，任务以失败告终.

问题出在哪里？该旅参训官兵一头雾水. 等对抗双方指挥员坐到复盘席上，官兵才找到折戟沙场的原因. 原来，该旅任务机组由于对任务地域较为熟悉，习惯性地选择借助山谷等地形和障碍物规避对手防空侦察. 然而，战机升空不久，天气骤变，空中飞扬的黄沙降低了能见度，机组驾机飞行过程中，对地形相似的山谷产生了误判，直接将自己暴露在对手防空火力覆盖区. 反之，训练开始前，对手不仅系统收集对抗地域的气象、地形等大量数据，还对这些数据进行综合分析，构建起一张支撑战场决策的精细数据网.

“经验绝非万能钥匙，缺乏数据思维注定要栽跟头. ”该旅作训科一名干部告诉记者，对抗中，对手“用数据说话”的练兵思路，引起旅队党委高度重视. 该旅党委一班人讨论形成共识：要想夯实能力基础，必须建立自己的作战数据库. 随后，该旅机关指导各分队成立攻关小组，全面展开训练数据采集工作，协调统筹飞行、机务、航管等专业力量，合力推进包括《特情处置手册》在内的作战数据库建设. 他们还通过邀请行业专家来队分享前沿理论、选送优秀人才学习数据分析处理知识等方式，夯实官兵向数据要战斗力的能力基础. 不仅如此，该旅充分发挥任务练兵作用，依托野外驻训、大项任务等时机锤炼官兵数据运用能力，培养出一批“会研究数据、懂运用数据”的飞行人才.

前不久，该旅赴某海域参加实战化训练. 任务机组抵达预定地域后，马上收集整理地理、气象等数据，梳理形成的电子数据包被第一时间加载至作战数据库. 训练期间，任务机组与友邻部队开展多场对抗训练，官兵借助数据库灵活运用多种战术战法，出色完成训练任务. 训练一结束，任务机组立即对采集到的训练数据进行梳理，多项关键数据被补充录入作战数据库.

采访即将结束时，该旅突然接到多机型战术协同训练命令. 茫茫夜色中，记者在飞行塔台看到，数据处理人员第一时间将更新后的作战、保障等数据包共享至各机组，一架架战鹰振翅高飞，呈战斗队形向目标空域飞去.

Warplanes Soar with “Data Assistants”! An Army Brigade Guides Soldiers to Leverage Data for Combat Effectiveness

Source: PLA Daily Author: Lei Xiao, Wang Pengxu, Han Cheng Editor: Wang Can 2025-11-10

A brigade of the 82nd Group Army guides soldiers to leverage data for combat effectiveness—Warplanes Soar with “Data Assistants”

■ Lei Xiao, Wang Pengxu, PLA Daily Reporter Han Cheng

A strong autumn wind blew across a training ground in northern China. As a signal flare streaked across the sky, multiple armed helicopters from a brigade of the 82nd Group Army took off for a flight training exercise under realistic combat conditions.

“Power system failure!” Captain Xu Junze received a special situation command from the control tower as soon as his warplane reached the designated airspace. Co-pilot He Yunfei immediately opened the “Special Situation Handling Manual” on the onboard tablet and, following the standardized fault handling procedures, assisted Xu Junze in quickly troubleshooting the problem.

After leaving the training ground, the participating soldiers immediately went to the debriefing room for a review and summary. Based on his experience with in-flight troubleshooting, Xu Junze proposed two improvement measures for handling malfunctions. Each participating captain offered several optimization suggestions, focusing on data updates and other aspects. After review and approval by higher authorities, all these suggestions were adopted. Following the meeting, Zhu Hongwei, the brigade’s data acquisition leader, immediately generated new data packages for the items requiring optimization and entered them into the “Special Situation Handling Manual.” Xu Junze told reporters that the manual has accumulated over a hundred flight special situation handling data entries, providing pilots with a reference for responding to in-flight emergencies.

“Data is a necessary means of perceiving the battlefield situation and a powerful support for decision-making. The ‘Special Situation Handling Manual’ is like a ‘data assistant’ for flight crews, making their handling of in-flight special situations more scientific and efficient,” said a brigade

leader, recalling a previous training failure when discussing the initial motivation for developing the manual.

In that live-fire combat training exercise, the brigade's mission crew planned to launch a preemptive strike using an ultra-low-altitude stealthy penetration method. However, as soon as the battle began, more than half of the aircraft were "damaged." Ultimately, the mission ended in failure.

Where did the problem lie? The participating officers and men of the brigade were completely bewildered. Only after the commanders of both sides sat down for the debriefing did the soldiers discover the reason for their defeat. It turned out that the brigade's mission crews, being familiar with the mission area, habitually chose to use valleys and other terrain features and obstacles to evade enemy air defense reconnaissance. However, shortly after takeoff, the weather changed drastically; swirling sand reduced visibility, and the crews misjudged the similar terrain of the valleys, directly exposing themselves to enemy air defense fire. Conversely, before the training began, the opposing force not only systematically collected a large amount of data on the weather and terrain of the combat area but also comprehensively analyzed this data, constructing a sophisticated data network to support battlefield decision-making.

"Experience is not a panacea; a lack of data-driven thinking is destined to lead to failure," an officer from the brigade's training department told reporters. During the exercise, the opposing force's "data-driven" training approach drew the attention of the brigade's Party Committee. The brigade's Party Committee reached a consensus: to solidify their capabilities, they must establish their own operational database. Subsequently, the brigade headquarters guided each unit to establish task forces to comprehensively conduct training data collection, coordinating and integrating professional forces from flight, maintenance, and air traffic control to jointly promote the construction of the operational database, including the "Special Situation Handling Manual." They also strengthened the foundation of officers and men' ability to leverage data for combat effectiveness by inviting industry experts to share cutting-edge theories and sending outstanding personnel to learn data analysis and processing. Furthermore, the brigade fully utilized mission-based training, honing officers' and men' data application capabilities through field training and major missions, cultivating a group of flight personnel who "can study data and understand how to use data."

Recently, the brigade participated in realistic combat training in a certain sea area. Upon arrival at the designated area, the mission crews immediately collected and organized geographical, meteorological, and other data, and the resulting electronic data packages were immediately loaded into the operational database. During the training, the mission crews conducted multiple combat training exercises with neighboring units, and officers and men flexibly applied various tactics and methods using the database, successfully completing the training mission. Immediately after the training, the mission crews reviewed the collected training data, and many key data points were added to the operational database.

As the interview was drawing to a close, the brigade suddenly received an order for multi-aircraft tactical joint training. In the darkness of the night, the reporter saw from the flight control tower that data processing personnel immediately shared updated combat and support data packages with each aircraft crew, and one after another, warplanes took off in combat formation toward the target airspace.

第 72 集团军某旅“数字化车场”赋能装备管理

来源：解放军报 作者：刘鎔宇 童祖静 责任编辑：王粲 2025-11-10

第 72 集团军某旅

“数字化车场”赋能装备管理

解放军报讯 刘鎔宇、特约记者童祖静报道：秋日子夜，一阵急促的哨音骤然响起，第 72 集团军某旅一场战备训练拉开帷幕.

记者在该旅装备车场值班室监控画面上看到，一辆辆战车有序通过闸机，快速驶出车库. “依托车场智能化管理系统，我们不仅能动态掌握战车出入库信息，还能实时监控车辆运行状态. ”该旅车管站负责人、三级军士长张剑对记者说，近年来，部队训练任务增多，装备出动愈加频繁，对车辆调度、装备保养、故障检修等提出更高要求.

为进一步提升装备管理水平，该旅借助科技手段，区分“管、训、保、修”4 个方面，大力推进装备车场向数字化、智能化转型. 如今，车场已实现“装备智能核查、派单一键完成、数据自动采集、故障实时预警”.

记者走进“数字化车场”管理大厅看到，电子屏幕实时显示车辆运行情况. 车场智能化管理系统内，各分队装备相关数据清晰呈现.

“这些数据，不仅便于分队制订平时训练计划，也为我们日常保养装备提供了可靠依据. ”正在组织装备保养的修理连胡连长说，依托智能化管理系统，他们在装甲车底盘安装了“装备综合保障盒”，自动采集发动机转速、油量等主要参数.

“‘装备综合保障盒’能帮助官兵有效识别人工检查难以发现的潜在故障点. ”胡连长一边与记者交流，一边从系统中调出某型装备电子档案，根据装备近期参与任务情况，系统随即生成相应保养方案.

前不久，一批装备返回车场，系统根据装备行驶里程、火炮射击记录等数据自动生成可视图和预警信息. 修理技师王成举按照系统提示，及时为一辆发动机转速异常的装甲车更换了部件.

“‘数字化车场’有效打通了保障链条的数据壁垒.”该旅领导表示，下一步，他们将持续优化完善“数字化车场”的动态监测、故障预警等功能，为装备管理提供坚实支撑.

A Brigade of the 72nd Group Army Empowers Equipment Management with “Digitalized Vehicle Yard”

Source: PLA Daily Author: Liu Rongyu, Tong Zujing Editor: Wang Can 2025-11-10

A Brigade of the 72nd Group Army

“Digitalized Vehicle Yard” Empowers Equipment Management

PLA Daily News (Liu Rongyu, Special Correspondent Tong Zujing): On an autumn night, a sharp whistle suddenly sounded, signaling the start of a combat readiness training exercise by a brigade of the 72nd Group Army.

On the monitoring screen in the brigade’s equipment yard duty room, reporters saw vehicles orderly passing through the gates and quickly driving out of the garage. “Relying on the intelligent vehicle yard management system, we can not only dynamically grasp the information on vehicles entering and leaving the yard, but also monitor the vehicle’s operating status in real time,” said Zhang Jian, head of the brigade’s vehicle management station and a third-level sergeant. He added that in recent years, the unit’s training missions have increased, and equipment deployments have become more frequent, placing higher demands on vehicle dispatching, equipment maintenance, and fault repair.

To further improve equipment management, the brigade has leveraged technology to vigorously promote the digital and intelligent transformation of its equipment depots, focusing on four aspects: management, training, maintenance, and repair. Currently, the depots achieve “intelligent equipment verification, one-click dispatching, automatic data collection, and real-time fault warnings.”

A reporter visited the “digital depot” management hall and saw electronic screens displaying real-time vehicle operation status. Within the depot’s intelligent management system, equipment-related data for each unit is clearly presented.

“This data not only facilitates the units’ routine training plans but also provides a reliable basis for our daily equipment maintenance,” said Company Commander Hu of the repair company, who was organizing equipment maintenance. He explained that, relying on the intelligent management system, they have installed “integrated equipment support boxes” on the armored vehicle chassis, automatically collecting key parameters such as engine speed and fuel level.

“The ‘integrated equipment support box’ helps soldiers effectively identify potential faults that are difficult to detect manually,” Company Commander Hu explained to the reporter, while retrieving

the electronic file of a certain type of equipment from the system. Based on the equipment's recent mission participation, the system immediately generated a corresponding maintenance plan.

Recently, a batch of equipment returned to the depot. The system automatically generated visual data and early warning information based on equipment mileage, artillery firing records, and other data. Following the system's prompts, repair technician Wang Chengju promptly replaced a component on an armored vehicle with an abnormal engine speed.

"The 'digitalized depot' effectively breaks down data barriers in the support chain," said the brigade's leadership. They added that they will continue to optimize and improve the "digitalized depot's" dynamic monitoring and fault warning functions to provide solid support for equipment management.

军营观察丨无人机操作员的战场视野

来源：中国军网-解放军报 作者：王飞虎 黄建建 卢东方 刘小云 责任编辑：郭妍菲 发布：2025-11-11

专注毫厘，决胜方寸

■解放军报记者 卢东方 特约通讯员 刘小云

差之毫厘，谬以千里.

对无人机操作员而言，专注力就是战斗力. 战场瞬息万变，战机稍纵即逝，他们驾驭无人装备遂行侦察情报、引导打击、运输补给等任务，任何一次手指间细微的操作，都关系着任务的成败.

陆军某旅无人机班训练场上，一个个无人机操作员双眼紧盯屏幕，认真调试着手中的装备.

“起飞！”突然，一声指令打破宁静，数架无人机腾空而起，或盘旋半空，或掠地飞行，或于各障碍物之间灵活穿梭……

无人机班班长、一级上士刘雪松，来回游走于每名无人机操作员身旁，时而提醒他们集中注意力校准飞行方向，时而接过遥控手柄耐心示范. 随着无人机悉数降落至预定区域，刘雪松才抹了把额头上的汗珠，露出满意的笑容.

“只有百分百集中精神，无人机才能飞得又快又稳. ”训练复盘时，刘雪松把这句话说得很严肃.

2017 年，刘雪松从武装侦察员转岗成为无人机操作员. 彼时的他对无人装备的性能参数、操作技能了解不多，只能通过对模型反复拆装、画图推演，才勉强弄清了装备的基本原理.

熟能生巧，勤能补拙. 经过日复一日地训练，刘雪松慢慢掌握了操控无人装备的技巧. 正当一切向好发展时，一次任务失败让刘雪松意识到，自己离成为一名合格的无人机操作员还有很大差距.

那次，刘雪松带队执行侦察任务，在操控无人机确定目标具体位置时注意力有所分散，导致上报的坐标出现偏差. 事后，刘雪松反思，正是因为自己不够专注，才导致任务失败，战场上若出现这样的失误，后果不堪设想.

从那之后，刘雪松把“差之毫厘，谬以千里”当成座右铭，时刻警醒自己不能马虎大意. 这也是他每次在训练中严格要求班里的战士必须保持专注，不能被周围事物干扰的初衷. 如今，刘雪松已成长为战友眼中的“飞控高手”，大家除了钦佩他精湛的操控技巧外，还有他身上这股专注的劲头.

这些年，刘雪松培养出一批批优秀的专业尖子、技术能手. 这些年轻战士就像他当年一样，在方寸荧屏前凝神注视，坚守在这个平凡的岗位上.

专注毫厘，决胜方寸. 面对未来战场，他们明白，制胜密码正来自于这屏幕前的专注与沉着.

无人机操作员的战场视野

■王飞虎 黄建建 解放军报记者 卢东方 特约通讯员 刘小云

陆军某旅战士正在改装无人装备. 周配帆 摄

关键词之一：能力

“在未来战场上，无人机操作员承担的任务愈发多元，需要具备的操作技能也从单一走向复合”

夜幕低垂，四野一片寂静.

在一众新操作员的注视下，陆军某旅一级上士刘雪松轻拨操纵杆，一架无人机快速上升、盘旋半空，尔后又稳稳落地.

“刚才我给大家简单示范了无人机的起降，等会大家轮流上手体验. ”训练中，刘雪松将新操作员集合到一块，传授操控无人机夜间飞行的基本技巧. 看着大家充满好奇的样子，刘雪松不由回忆起自己第一次接触无人装备时的场景.

从武装侦察员转岗为无人机操作员，初次见到无人机时，刘雪松兴奋之余带着几分陌生. 他说：“最开始连无人机的基本构造都弄不清，更别说让它飞起来，可当时全班的眼光都盯在我这个老侦察员身上，我也只能壮着胆子试一试. ”但由于对装备性能了解不深，刘雪松未能将无人机成功放飞.

从哪里跌倒就从哪里爬起来，刘雪松当着全班战友立下“军令状”——两周内让无人机飞起来. 当晚，他便把自己关在器材室里，对着操作手册反复研究.

那段时间，他除了查资料、看视频，就是背参数、拆零件，凭着一点点摸索，终于让无人机飞向了蓝天.

“这些年，无人机操作员的成长周期越来越短，技术要求却越来越高. ”刘雪松告诉记者，无人装备的迭代升级倒逼无人机操作员缩短成长周期. 从“会飞”到“善打”，相比于刘雪松当年扎扎实实的 8 个年头，如今的新操作员训练几个月就必须“出师”.

说话间，刘雪松从背包里掏出几本崭新的册子分发给新兵，作为他们今后提升训练成绩的“工具书”. 刘雪松告诉记者：“起初，这本小册子只是一份简单的专项训练计划，后面根据实践经验不断归纳充实更新. 如今，这份计划已经演变为适用于多种能力生成的通用指南. ”

原来，下士阿支石日刚入伍时掌握技能较慢. 为了帮助他快速成长，刘雪松给他拟制了一份专项训练计划. 除了正常训练时间外，阿支石日对照计划一点一点学习无人装备的基础理论知识、操作技巧以及故障排除方法. 可随着阿支石日的进步，这份计划已经不能满足他的训练需求.

潜藏的目标、越不过的障碍、隐没在水里的“杀机”……刘雪松深知：“在未来战场上，无人机操作员承担的任务愈发多元，需要具备的操作技能也从单一走向复合. ”于是，在这份专项训练计划的基础上，他带着一众操作员，开始摸索多种无人装备在极限条件下的操作技能，将更多的有效数据和实用经验整理出来，编撰成册.

一份专项训练计划由薄变厚，见证着战士们加速成长. 阿支石日更是靠着这份指南顺利通过了无人机初级职业技能鉴定，并在上级组织的比武中，获得无人装备精准识别目标项目的第一名.

关键词之二：创新

“装备要更新，操作员的思维也要不断升级”

再见刘雪松，记者是闻着味道去的.

野外训练场上，一顶野战帐篷里传来一股烧焦的味道. 顺着这股味道，记者看到了正在焊接电路板的刘雪松.

“野外没有专门的操作间，我们就在这里进行加工改装. ”刘雪松放下工具说道.

走进帐篷看到，里面的零件、图纸、操作工具摆放得整整齐齐. 一旁的阿支石日说：“这是我们班的‘创新基地’，也被战友们称为梦开始的地方. ”

“无人装备的零部件就像人的细胞组织一样，也会老化衰退. 只有通过不停地创新改装，给无人装备注入新鲜‘血液’，才能让它永葆活力. ”刘雪松告诉记者，在上级机关的支持下，无人机班的战士常常聚集在这里相互讨论研究一些革新的点子.

几年前，上级将某项无人机试验任务交给该班. 没有现成教案、缺少厂家技术指导，看着那一沓陌生的图纸，刘雪松当即带领几名骨干成立攻关小组，根据任务所需设计，着手改装某型无人机.

焊接、切割、编写程序……每项工作都存在之前未曾接触过的技术难题，他们加班加点自学焊接技术，对着教材写代码、编程序，历经数百次的拆卸、组装、更换材料，最终按期

完成改装. 不仅如此，他们还进一步深化探索，梳理形成了多套训法战法，并在集团军范围内推广.

每一个无人机操作员都要会改装、能创新. 经过这次创新实践，无人机班的战士们更加理解这个岗位的“不平凡”——“装备要更新，操作员的思维也要不断升级. ”

一次任务中，众人根据无人机拍摄的平面图进行地形分析，效果不太理想. 现场的一名指挥员说：“要是有地形的三维模型就更有利于排兵布阵了. ”这句话被刘雪松记在脑海里. 随后，他通过在无人机上加装扫描模块和影像采集装置，并重新编写地面系统中的算法程序，历经半个多月的钻研，最终让地形图实现了立体呈现的效果.

近年来，该无人机班历经 2 次改编、3 次换装，先后完成了 10 余次无人装备技术试验，绘制近百张创新机型图纸，进行了近千次改装试验.

随着探索创新意识的不断增强，无人机班收获了累累硕果：研究改进无人装备战场警戒、应急照明、通信中继等功能运用，实现无人装备三维测绘、无人机精准识别目标等技术，编写《单手段操作手册》《无人装备典型场景战法集》等指导手册.

“如今，我们的头脑里时刻绷着创新这根弦. 训练中遇到的难关，成了倒逼大家迸发智慧的‘触点’，这就是这个岗位最吸引人的地方. ”刘雪松说.

关键词之三：使命

“方寸屏幕连着无垠战场，我们的视野必须瞄向未来”

对于中士徐奕明来说，无人机操作员是一个可以追梦的战位.

去年，作为无人机班的技术骨干，徐奕明凭借过硬的专业能力，被上级表彰为军事训练先进个人. 战友们经常找他请教训练经验和方法.

在众人的瞩目下，他感到一种无形的压力. “无人装备的操作并不容易. ”徐奕明坦言，成绩背后，不仅是千锤百炼的技术，更是对未来战场需求的深刻认识与主动适应.

徐奕明从驾驶员转岗无人机操作员的决定，曾让战友感到意外. 在原岗位干得有声有色的他，突然递交了转岗申请.

大家了解后才知道，徐奕明从小就对天空充满向往，梦想着有一天可以成为一名航模飞手. 入伍后，他心里一直保持着这股热情. 为了不留遗憾，他决定申请到无人机操作员岗位实现梦想.

经组织批准，徐奕明转到了无人机班. 此后，刘雪松一边手把手教徐奕明飞行技巧，一边发动战友对他进行帮带.

那段时间，徐奕明一到训练场就追着经验丰富的战友请教. 每次训练结束后，徐奕明还会观察装备状态，检查易损部件，仔细记录训练相关的各项数据.

功夫不负有心人. 仅半年时间，徐奕明就掌握了多项操作技能，从众多操作员中脱颖而出. 凭借出色的进步表现，他也成功获得了参加上级比武的资格.

比武中，徐奕明的操控技术表现出色，却因未能准确侦察目标与奖牌失之交臂. 复盘时，他认识到，在未来战场上只“飞得稳”而“看不准”，再好的技术也等于零. 这次失利将徐奕明的训练思维引向了更深层次.

于是他开始自我加压，在进行“目标揭伪”训练时，他经常要求战友们把目标设真、设远、设小，以增加训练难度. 每次训练结束，他都会将装备拍回的大量图像进行反复对比，从中分析伪装特征、总结识别规律. 凭借这股韧劲，他成功炼就了一双“火眼金睛”，目标回传的准确率越来越高. 时隔一年，徐奕明再次征战上级比武并一举夺魁.

“方寸屏幕连着无垠战场，我们的视野必须瞄向未来. ”刘雪松告诉记者，在近几年的实战演练、比武集训、专项任务中，无人机班引人瞩目，出色的表现多次获得上级称赞.

这些年，班里有 11 人次参加集团军以上比武集训，荣获 3 枚金牌、2 枚银牌；7 人立功，4 人提干. 每一项成绩，都是他们为适应未来战场需求而不懈努力的见证.

但在采访中，“这个事还没干”是战士们时常挂在嘴边的话. 这种强烈的忧患意识源于他们共同的信念：“无人装备在未来战场中的作用只会越来越突出. 担起这个战位的重要使命，需要时刻保持清醒和谨慎. ”

近期，刚刚完成某专项任务集训的无人机班，正全力备战一项重要数据的检验评估. 尽管方案已经反复演练多次，但夜里大家睡意仍浅，不少人还在加班训练……

锐视点

把岗位当成建功立业的舞台

■杨志民

“干一行爱一行，钻一行专一行，做到敬业勤业精业，努力成为善于干事创业的岗位能手、行家里手. ”习主席的谆谆教诲，为官兵成长成才指明了方向.

在强军兴军的宏伟画卷中，并非只有金戈铁马才显英雄本色. 那些在方寸屏幕前的无人机操作员，同样发挥着举足轻重的作用、肩负着沉甸甸的责任. 每一次看似微小的操作，都与战场态势感知、行动效能乃至任务成败紧密相连. 这份责任，要求从业者必须具备高度的专注、精湛的技艺和一丝不苟的严谨，将追求卓越融入日常点滴.

面对装备技术快速迭代、专业要求持续提升的挑战，“干一行爱一行”是投身事业的基础，“钻一行专一行”是走向卓越的必由之路. 岗位能手、行家里手的炼成，离不开日复一日地深耕细作. 它源于对岗位价值的认同，化为精益求精的执着追求. 这份源于热爱的匠心，是官兵在平凡岗位上创造非凡业绩的内在动力.

战场瞬息万变，技术日新月异，满足于现状终将掉队. 真正的行家里手，必然要具备开放的眼界和持续学习的能力. 在训练中敢于质疑、在难题前主动求解、在合规前提下勇于优化，将每一次装备更新、任务转换都视为提升能力、拓展舞台的机遇. 这种立足岗位的创新锐气，为岗位舞台注入了面向未来的强劲动能.

岗位价值的最终彰显，在于融入集体、贡献战斗力. 个人技艺的精进，是为了在团队协同中发挥关键作用；每一次小小的突破，都是为了提升整个链条的效能. 这种强烈的集体荣誉感和使命感，驱动着官兵自觉将个人奋斗融入强军事业的壮阔征程. 当每一位官兵都能以“敬业勤业精业”的标准自我要求，以“钻一行专一行”的态度精研技能，以主人翁的精神锐意进取，平凡的岗位也能绽放出耀眼的光芒.

Military Camp Observation | The Battlefield Vision of Drone Operators

Source: China Military Network - PLA Daily

Authors: Wang Feihu, Huang Jianjian, Lu Dongfang, Liu Xiaoyun

Editor: Guo Yanfei

Published: 2025-11-11

Focusing on the Smallest Details, Decisive Victory

■ PLA Daily Reporter Lu Dongfang, Special Correspondent Liu Xiaoyun

A small difference can lead to a huge error.

For drone operators, focus is combat effectiveness. The battlefield is ever-changing, and opportunities are fleeting. They pilot unmanned equipment to conduct reconnaissance, intelligence gathering, strike guidance, and supply transport missions. Every subtle operation between their fingers determines the success or failure of the mission.

On the training ground of a drone platoon of an Army brigade, drone operators intently stare at the screen, carefully adjusting the equipment in their hands.

“Take off!” Suddenly, a command shattered the silence, and several drones soared into the air, some hovering, some skimming the ground, and some weaving nimbly between obstacles… Liu Xuesong, the drone squad leader and a first-class sergeant, moved back and forth beside each drone operator, sometimes reminding them to concentrate and correct their flight direction, sometimes

patiently demonstrating with the remote control. Only after all the drones landed in the designated area did Liu Xuesong wipe the sweat from his brow and reveal a satisfied smile.

“Only with 100% concentration can drones fly fast and steadily,” Liu Xuesong said seriously during the training debriefing.

In 2017, Liu Xuesong transitioned from an armed reconnaissance officer to a drone operator. At that time, he didn’t know much about the performance parameters and operating skills of unmanned equipment. He could only barely understand the basic principles of the equipment by repeatedly disassembling and assembling models and drawing diagrams.

Practice makes perfect, and diligence can make up for lack of talent. Through day after day of training, Liu Xuesong gradually mastered the skills of operating unmanned equipment. Just when everything seemed to be going well, a failed mission made Liu Xuesong realize that he was still far from becoming a qualified drone operator.

During that mission, Liu Xuesong led a reconnaissance team. While controlling the drone to pinpoint the target’s exact location, his attention wavered, causing the reported coordinates to be inaccurate. Afterwards, Liu Xuesong reflected that his lack of focus was the reason for the mission’s failure; such a mistake on the battlefield could have unimaginable consequences.

From then on, Liu Xuesong adopted the motto “A small error can lead to a huge mistake” as his guiding principle, constantly reminding himself not to be careless. This is also the reason why he strictly requires his soldiers to maintain focus during training and not be distracted by their surroundings. Now, Liu Xuesong has become a “flight control expert” in the eyes of his comrades. Besides admiring his superb operating skills, they also admire his unwavering focus.

Over the years, Liu Xuesong has trained batches of outstanding professionals and technical experts. These young soldiers, just like he was in his youth, concentrate intently in front of the small screen, steadfastly holding their positions in this ordinary workplace.

Focused on the smallest details, decisive in the smallest moments. Facing the future battlefield, they understand that the key to victory lies in their focused and composed demeanor in front of the screen.

The Battlefield Vision of a Drone Operator

■ Wang Feihu, Huang Jianjian, PLA Daily Reporter Lu Dongfang, Special Correspondent Liu Xiaoyun

Soldiers of an Army brigade are modifying unmanned equipment. Photo by Zhou Peifan

Keyword One: Capability

“On the future battlefield, the tasks undertaken by drone operators are becoming increasingly diverse, and the required operational skills are evolving from single to complex.”

Night falls, and the field is silent.

Under the watchful eyes of a group of new operators, Sergeant Liu Xuesong, a first-class sergeant of an Army brigade, lightly flicks the control stick, and a drone quickly rises, hovers in mid-air, and then lands steadily.

“I just gave you a simple demonstration of drone takeoff and landing. You’ll all take turns trying it out later.” During training, Liu Xuesong gathered the new operators together to teach them the basic techniques for operating drones at night. Seeing their curious expressions, Liu Xuesong couldn’t help but recall his first encounter with unmanned equipment.

Having transitioned from an armed reconnaissance soldier to a drone operator, Liu Xuesong was excited yet somewhat unfamiliar with drones when he first saw one. He said, “At first, I didn’t even understand the basic structure of a drone, let alone how to make it fly. But all eyes in the squad were on me, the veteran reconnaissance soldier, so I could only muster my courage and give it a try.” However, due to his lack of understanding of the equipment’s performance, Liu Xuesong failed to successfully launch the drone.

Undeterred, Liu Xuesong made a solemn vow to his comrades—to get the drone flying within two weeks. That night, he locked himself in the equipment room, studying the operation manual repeatedly.

During that period, besides researching materials and watching videos, he memorized parameters and disassembled parts. Through gradual exploration, he finally got the drone flying.

“In recent years, the training period for drone operators has become shorter, while the technical requirements have become higher,” Liu Xuesong told reporters. The iterative upgrades of unmanned equipment are forcing drone operators to shorten their training period. From “being able to fly” to “being good at fighting,” compared to Liu Xuesong’s eight years of solid training, new operators today are expected to “graduate” after only a few months of training.

As he spoke, Liu Xuesong pulled several brand-new booklets from his backpack and distributed them to the new recruits as “reference books” to improve their training performance. Liu Xuesong told reporters, “Initially, this booklet was just a simple specialized training plan, which was continuously summarized, enriched, and updated based on practical experience. Now, this plan has evolved into a general guide applicable to the development of various capabilities.” It turns out that Corporal Azhi Shiri was slow to master skills when he first enlisted. To help him grow quickly, Liu Xuesong devised a specialized training plan for him. Besides regular training time, Azhi Shiri followed the plan step by step to learn the basic theoretical knowledge, operating skills, and troubleshooting methods of unmanned equipment. However, as Azhi Shiri progressed, this plan could no longer meet his training needs.

Hidden targets, insurmountable obstacles, and lurking dangers in the water… Liu Xuesong knew that “on the future battlefield, drone operators will undertake increasingly diverse tasks, and the

required operational skills will evolve from single to complex." Therefore, based on this specialized training plan, he led a group of operators to explore the operational skills of various unmanned equipment under extreme conditions, compiling more effective data and practical experience into a booklet.

A specialized training plan, growing from thin to thick, witnessed the rapid growth of the soldiers. Azhi Shiri even successfully passed the initial drone professional skills assessment with the help of this guide and won first place in the unmanned equipment target identification event in a competition organized by higher authorities.

Keyword Two: Innovation

"Equipment needs to be updated, and operators' thinking also needs to be constantly upgraded."

The reporter followed the smell to meet Liu Xuesong again.

On the field training ground, a burnt smell emanated from a field tent. Following the smell, the reporter saw Liu Xuesong soldering circuit boards.

"There's no dedicated operating room in the field, so we do the processing and modification here," Liu Xuesong said, putting down his tools.

Stepping into the tent, one sees parts, blueprints, and operating tools neatly arranged. Azhi Shiri, standing nearby, says, "This is our squad's 'innovation base,' also known by our comrades as the place where dreams begin."

"The components of unmanned equipment are like human cells; they age and deteriorate. Only through continuous innovation and modification, injecting fresh 'blood' into the unmanned equipment, can it maintain its vitality," Liu Xuesong tells reporters. With the support of higher authorities, the soldiers in the drone squad often gather here to discuss and research innovative ideas.

Several years ago, the higher authorities assigned a drone testing mission to the squad. Lacking ready-made teaching materials and technical guidance from manufacturers, and facing a stack of unfamiliar blueprints, Liu Xuesong immediately led several key members to form a task force. Based on the mission requirements, they designed and began modifying a certain type of drone.

Welding, cutting, programming… each task presented technical challenges they had never encountered before. They worked overtime to teach themselves welding techniques, wrote code and programs using textbooks, and underwent hundreds of disassemblies, reassemblies, and material replacements, ultimately completing the modification on schedule. Furthermore, they deepened their exploration, developing multiple training methods and tactics, which were then promoted throughout the army group.

Every drone operator must be able to modify and innovate. Through this innovative practice, the drone squad members gained a deeper understanding of the "extraordinary" nature of their

role—"Equipment needs to be updated, and operators' thinking must also be constantly upgraded." During one mission, the team analyzed the terrain based on a 2D map taken by the drone, but the results were not ideal. A commander on site said, "A 3D model of the terrain would be much more helpful for troop deployment." Liu Xuesong kept this in mind. Subsequently, by adding scanning modules and image acquisition devices to the drones and rewriting the algorithm program in the ground system, after more than half a month of dedicated research, he finally achieved a 3D rendering effect for the terrain map.

In recent years, this drone squad has undergone two reorganizations and three equipment upgrades, completing more than ten unmanned equipment technical tests, drawing nearly a hundred innovative aircraft blueprints, and conducting nearly a thousand modification tests.

With a continuously strengthening sense of exploration and innovation, the UAV squad has achieved fruitful results: researching and improving the application of unmanned equipment in battlefield warning, emergency lighting, and communication relay functions; realizing technologies such as 3D mapping of unmanned equipment and precise target identification by UAVs; and compiling guidance manuals such as the "Single-Method Operation Manual" and the "Collection of Typical Scenarios and Tactics for Unmanned Equipment."

"Now, innovation is always on our minds. The difficulties encountered in training have become 'touchpoints' that force everyone to unleash their wisdom, which is the most attractive aspect of this position," said Liu Xuesong.

Keyword Three: Mission

"A small screen connects to an endless battlefield; our vision must be aimed at the future."

For Sergeant Xu Yiming, being a UAV operator is a position where he can pursue his dreams.

Last year, as a technical backbone of the UAV squad, Xu Yiming was recognized by his superiors as an advanced individual in military training for his outstanding professional skills. His comrades often consult him on training experience and methods.

Under the spotlight, he felt an invisible pressure. "Operating unmanned equipment is not easy," Xu Yiming frankly admitted. Behind his achievements lies not only honed skills honed through countless trials, but also a profound understanding and proactive adaptation to the demands of the future battlefield.

Xu Yiming's decision to switch from pilot to drone operator surprised his comrades. He was excelling in his original position when he suddenly submitted his transfer application.

After learning more, everyone discovered that Xu Yiming had always yearned for the sky and dreamed of becoming a model airplane pilot. This passion remained with him after enlisting. To avoid regrets, he decided to apply for a drone operator position to realize his dream.

With organizational approval, Xu Yiming transferred to the drone unit. Afterwards, Liu Xuesong personally taught Xu Yiming flying skills while also mobilizing his comrades to mentor him.

During that time, Xu Yiming would constantly seek advice from experienced comrades whenever he arrived at the training ground. After each training session, Xu Yiming would also observe the equipment's condition, check vulnerable parts, and meticulously record all training-related data.

Hard work pays off. In just six months, Xu Yiming mastered multiple operational skills, standing out from numerous operators. His outstanding progress earned him a spot in a higher-level competition.

During the competition, Xu Yiming's piloting skills were excellent, but he missed out on a medal due to an inaccurate target detection. In the post-competition analysis, he realized that on the future battlefield, simply being able to "fly steadily" without accurate targeting is futile, no matter how good the technique. This setback led Xu Yiming to a deeper level of training reflection.

He began to push himself harder. During "target deception" training, he frequently required his comrades to set realistic, distant, and small targets to increase the difficulty. After each training session, he would repeatedly compare the numerous images captured by the equipment, analyzing camouflage features and summarizing identification patterns. With this tenacity, he developed a keen eye for target detection, and the accuracy of target transmissions steadily increased. A year later, Xu Yiming returned to the higher-level competition and won first place.

"The small screen connects to the boundless battlefield; our vision must be set on the future," Liu Xuesong told reporters. In recent years, the drone squad has attracted attention in live-fire exercises, competitions, and special missions, earning praise from higher authorities for its outstanding performance.

Over the years, 11 members of the squad have participated in competitions and training at the group army level or above, winning 3 gold medals and 2 silver medals; 7 have received merit awards, and 4 have been promoted to officer. Every achievement is a testament to their tireless efforts to adapt to the demands of the future battlefield.

However, during the interview, the soldiers frequently said, "This task hasn't been done yet." This strong sense of urgency stems from their shared belief: "The role of unmanned equipment on the future battlefield will only become more prominent. To shoulder this important mission, we need to remain constantly alert and cautious." Recently, the drone squad, having just completed a special mission training exercise, is now fully preparing for the evaluation and verification of important data. Despite repeated drills, everyone was still lightly asleep at night, with many continuing their training overtime…

Sharp Viewpoint: Treat Your Post as a Stage for Success

■ Yang Zhimin

“Love what you do, master it, and strive to be dedicated, diligent, and skilled. Become a capable and competent expert in your field.” President Xi’s earnest teachings have pointed the way for the growth and development of officers and men.

In the grand blueprint of building a strong military, heroism isn’t only revealed on the battlefield. Drone operators, working behind their small screens, also play a crucial role and bear heavy responsibilities. Every seemingly minor operation is closely linked to battlefield situational awareness, operational effectiveness, and even mission success or failure. This responsibility demands a high degree of focus, superb skills, and meticulous rigor from practitioners, integrating the pursuit of excellence into every aspect of their daily work.

Faced with the challenges of rapid equipment technology iteration and continuously rising professional requirements, “loving what you do” is the foundation for dedication, and “mastering it” is the only way to achieve excellence. The cultivation of skilled workers and experts in their respective fields requires meticulous, day-to-day practice. It stems from a deep understanding of the value of their roles, transforming into a relentless pursuit of excellence. This dedication, born of passion, is the intrinsic motivation that drives soldiers to achieve extraordinary results in ordinary positions.

The battlefield is ever-changing, and technology advances rapidly; complacency will inevitably lead to falling behind. True experts must possess an open mind and the ability to continuously learn. They dare to question during training, proactively seek solutions to difficult problems, and boldly optimize within compliance requirements, viewing every equipment update and mission change as an opportunity to enhance their capabilities and expand their horizons. This innovative spirit rooted in their roles injects powerful momentum for the future into their positions.

The ultimate manifestation of a role’s value lies in integrating into the collective and contributing to combat effectiveness. The refinement of individual skills is for playing a crucial role in team collaboration; every small breakthrough enhances the efficiency of the entire chain. This strong sense of collective honor and mission drives soldiers to consciously integrate their personal efforts into the grand journey of building a strong military. When every officer and soldier can demand of themselves the standards of “dedication, diligence, and excellence,” hone their skills with the attitude of “mastering their profession,” and forge ahead with a sense of ownership, even ordinary positions can shine brightly.

第 73 集团军某旅发挥家属委员会作用，让“前方”无后顾之忧

来源：中国军网-解放军报 作者：司华广 皇甫少阳 责任编辑：郭妍菲

2025-11-12 07:21:31

第 73 集团军某旅注重发挥家属委员会作用——

“后方”无牵挂 “前方”干劲足

■司华广 皇甫少阳

一个周六，第 73 集团军某旅军嫂洪雪娟下班回来后，来到营区里的“军营儿童之家四点钟学校”，看着儿子认真学习书法，满脸欣慰：“孩子现在周末不仅有人管，还能学到东西，真得感谢旅机关和家属委员会. ”

前段时间，洪雪娟被一个问题困扰：她因工作原因每周六都要上班，丈夫所在部队展开野外驻训，到了周末，孩子只能独自在营区玩耍. 恰在此时，该旅家属委员会委员上门走访，洪雪娟道出苦恼. 家属委员会进一步了解发现，在旅营区里，周末因父母忙碌而无人照看的军娃有 20 多个.

“家门连着营门，军娃牵动兵心. 妥善解除官兵后顾之忧，才能让大家心无旁骛投入练兵备战. ”家属委员会将问题反馈给旅机关后，引起旅党委一班人重视. 经过研究，他们决定将原有的“军营儿童之家四点钟学校”从工作日延伸到周末，并开设书法绘画班、篮球兴趣班等.

“军营儿童之家四点钟学校”，就是在家属委员会的推动下建立的. 去年 4 月，他们在走访中发现，部分低年龄段军娃在下午放学后，由于父亲还在训练、母亲还在上班，回到家没人照顾，便将有关情况向旅机关作了专题汇报. 经研究协调，该旅将营区内一处闲置的旧营房进行改造，建起了“军营儿童之家四点钟学校”，让军娃在放学后有了托管和学习的场所.

据了解，该旅家属委员会由多名政治素养高、道德品质好、喜欢助人为乐的官兵家属代表和机关业务科室人员组成. 这些年，他们在官兵家属学习教育、就业互助、生活帮扶等方面建立起长效机制，协助机关了解掌握官兵家庭实际需求，及时开展解难帮困.

“家属委员会是拉近家属与部队距离的‘连心桥’，是倾心服务家属的‘贴心人’，是化解家庭矛盾的‘调解室’，更是助力练兵备战的‘加油站’. ”该旅人力资源科施科长介绍，为了进一步提升服务质效，家属委员会还设立 24 小时服务热线，定期走访官兵家属、组织“办实事、解难题、送爱心”活动，并广泛开展家属间互帮互助，积极营造“一家有难大家帮”的浓厚氛围，齐心协力稳固官兵“大后方”.

一次，怀有身孕的飞行员家属小史在接女儿放学途中不慎摔倒. 彼时，她的丈夫正在外执行飞行任务. 家属委员会得知消息后，迅速向旅机关报告，同时组织其他家属将小史送医救治，安排人员照看她的女儿. 接到家属委员会报告后，旅领导带机关人员第一时间赶到医院进行慰问.

情况稳定后，小史对前来探望的人员致谢道：“幸好有你们，旅队就是我坚实的依靠！”任务结束，这名飞行员得知妻子已无大碍、女儿也被妥善照顾，心怀感恩：“我只有更加刻苦训练，才能不辜负组织的关爱. ”

“‘后方’无牵挂，‘前方’干劲足. ”在该旅领导看来，家属委员会发挥的作用有时堪比“编外指导员”. 今年，家属委员会不仅协助旅机关举办“雏鹰”夏令营、组织家属参加文艺演出，还组织开展了“家庭助廉”活动，发动家属帮助官兵自觉抵制不正之风.

如今，该旅来队官兵家属对部队的归属感不断增强、对军人职业的理解更加深刻.

A brigade of the 73rd Group Army emphasizes the role of its family committee—

No worries at home, high morale at the “front lines”

■ Si Huaguang, Huangfu Shaoyang

One Saturday, Hong Xuejuan, a military spouse of a soldier in a brigade of the 73rd Group Army, returned home from get off work and went to the “4 PM School at the Military Camp Children’s Home” in the barracks. Watching her son diligently studying calligraphy, she was filled with satisfaction: “Now my child not only has someone to take care of him on weekends, but he can also learn something. I really have to thank the brigade headquarters and the family committee.”

Some time ago, Hong Xuejuan was troubled by a problem: because of her work, she had to work every Saturday, and her husband’s unit was engaged in field training. On weekends, her child could only play alone in the barracks. Just then, members of the brigade’s family committee visited her, and Hong Xuejuan expressed her distress. Further investigation by the family committee revealed that over 20 children of military personnel were left unattended on weekends in the brigade’s barracks due to their parents’ busy schedules.

“Homes are connected to barracks gates; the children of military personnel are a source of great concern for soldiers. Properly addressing the concerns of officers and men is crucial for their focused dedication to training and combat readiness.” The family committee reported this issue to the brigade headquarters, which garnered the attention of the brigade’s Party Committee. After

deliberation, they decided to extend the existing “4 PM Military Children’s Home School” from weekdays to weekends and add calligraphy, painting, and basketball classes.

The “4 PM Military Children’s Home School” was established with the support of the family committee. Last April, during a visit, they discovered that some younger children were left unattended after school because their fathers were still training and their mothers were still at work. They reported this situation to the brigade headquarters. After coordination, the brigade renovated an unused old barracks within the camp to create the “4 PM Military Children’s Home School,” providing a place for children to be cared for and learn after school.

It is understood that the brigade’s family committee is composed of several representatives of soldiers’ families with high political awareness, good moral character, and a willingness to help others, as well as staff from the brigade’s administrative departments. Over the years, they have established long-term mechanisms for the education, employment assistance, and livelihood support of soldiers’ families, helping the headquarters understand the actual needs of soldiers’ families and promptly address their difficulties.

“The family committee is a ‘bridge’ that brings families closer to the military, a ‘caring person’ who wholeheartedly serves families, a ‘mediation room’ for resolving family conflicts, and a ‘refueling station’ for supporting training and combat readiness,” explained Section Chief Shi of the brigade’s Human Resources Department. To further improve service quality, the family committee has also established a 24-hour service hotline, regularly visits soldiers’ families, organizes activities to “do practical things, solve problems, and send love,” and widely promotes mutual assistance among families, actively creating a strong atmosphere of “everyone helps when one family is in trouble,” working together to stabilize the “rear area” for soldiers.

Once, Ms. Shi, a pregnant pilot’s family member, accidentally fell while picking up her daughter from school. At the time, her husband was away on a flight mission. Upon learning the news, the family committee quickly reported to the brigade headquarters and organized other family members to take Xiao Shi to the hospital for treatment and arrange for someone to care for her daughter. After receiving the family committee’s report, brigade leaders and staff rushed to the hospital to offer their condolences.

After her condition stabilized, Xiao Shi thanked those who came to visit her, saying, “Fortunately, you are all here; the brigade is my solid support!” After the mission ended, the pilot, upon learning that his wife was out of danger and his daughter was being well taken care of, was filled with gratitude: “I can only train even harder to live up to the organization’s care.”

“With no worries at home, we are full of energy at the front.” In the eyes of the brigade leadership, the role played by the family committee is sometimes comparable to that of an “unofficial instructor.” This year, the family committee not only assisted the brigade headquarters in organizing the “Young Eagle” summer camp and organizing family members to participate in

cultural performances, but also organized a “Family-Assisted Anti-Corruption” activity, mobilizing family members to help officers and men consciously resist unhealthy tendencies.

Now, the sense of belonging to the brigade among the officers and men’ families visiting the brigade is constantly increasing, and their understanding of the military profession is becoming deeper.

陆军某中心为装备价格管理插上“科技之翼”

来源：解放军报 作者：李先祥 钱晓虎 责任编辑：王粲 2025-11-13

陆军某中心依托科技创新提升装备价格管理质效

智能辅助决策 全程透明精准

解放军报讯 李先祥、记者钱晓虎报道：日前，记者在陆军某中心采访时看到，一名军士在智能辅助决策系统中输入装备名称、规格、型号等信息后，系统不仅自动甄别出“同品不同价”的元器件，还发出了“部分元器件价格虚高”的警示.该中心以装备管理“数智化”建设为抓手，依托科技创新提升装备价格管理质效，取得可喜成果.

“以往，装备价格管理分散、资源零散，人工查询效率低，价格比对困难，装备建设常受价格虚高、市场核价保鲜度差等困扰.”该中心领导告诉记者，为此，他们深入军地有关部门广泛调研，引入大数据和人工智能技术，探索形成“三个一”装备价格管理体系：一套历史价格数据库，汇集多源历史采购价格信息，覆盖主要装备品类，构建起完整、权威的价格“档案馆”；一套智能辅助决策系统，深度集成数据分析和智能算法，实现价格合理性自动比对、异常波动智能预警、潜在风险精准识别；一套数据管理规范，制订数据采集存储、管理使用、安全维护等多项管理制度，明确责任主体和维护流程，让数据价值在装备管理的各个环节得到充分体现.

该中心领导介绍，智能辅助决策系统能够自动生成分析报告和可视化图表，让价格管理过程清晰透明、有据可依.系统投入使用后，有效提升了装备参考价格可信度和定价审价支撑度，让每一分钱都花得明明白白、合规合理.

“这套体系为装备价格管理插上了‘科技之翼’.”该中心领导介绍，他们按照“边建边用、迭代完善”的思路持续优化装备价格管理体系.经过一段时间的试运行，数据赋能效果初步显现，装备价格信息从零乱分散走向集中统管、从无人维护走向动态更新，装备价格管理从繁杂的手工作业走向智能化自动处理，审价效率和精准度均显著提高.

An Army Center Empowers Equipment Price Management with Technological Innovation

Source: PLA Daily Author: Li Xianxiang, Qian Xiaohu Editor: Wang Can 2025-11-13 An Army Center Improves Equipment Price Management Efficiency Through Technological Innovation

Intelligent Assisted Decision-Making: Transparent and Precise Throughout

PLA Daily News (Li Xianxiang and reporter Qian Xiaohu): Recently, during an interview at an Army center, reporters witnessed a sergeant inputting equipment name, specifications, and model information into an intelligent assisted decision-making system. The system not only automatically identified components with different prices for the same product but also issued a warning that some components were overpriced. The center has achieved remarkable results by focusing on the "digitalization" of equipment management and relying on technological innovation to improve the efficiency of equipment price management.

"Previously, equipment price management was fragmented and resources were scattered. Manual inquiries were inefficient, price comparisons were difficult, and equipment construction was often plagued by inflated prices and poor market price stability," the center's leader told reporters. To address this, they conducted extensive research with relevant military and civilian departments, introduced big data and artificial intelligence technologies, and explored the formation of a "three-in-one" equipment price management system: a historical price database, aggregating multi-source historical procurement price information covering major equipment categories, creating a complete and authoritative price "archive"; an intelligent decision-making support system, deeply integrating data analysis and intelligent algorithms to achieve automatic comparison of price rationality, intelligent early warning of abnormal fluctuations, and accurate identification of potential risks; and a set of data management standards, formulating multiple management systems for data collection, storage, management, use, and security maintenance, clarifying responsible parties and maintenance processes, ensuring that the value of data is fully reflected in every aspect of equipment management.

The center's leader explained that the intelligent decision-making support system can automatically generate analysis reports and visual charts, making the price management process clear, transparent, and evidence-based. After the system was put into use, it effectively improved the credibility of equipment reference prices and the support for pricing and review, ensuring that every penny is spent transparently, compliantly, and reasonably.

"This system has given wings of technology to equipment price management," the center's leader explained. They have been continuously optimizing the equipment price management system following the principle of "building and using simultaneously, iterating and improving as needed." After a period of trial operation, the data-driven effects are beginning to show. Equipment price information has moved from scattered and disorganized to centralized management, from unattended maintenance to dynamic updates, and equipment price management has shifted from cumbersome manual operations to intelligent and automated processing, significantly improving both the efficiency and accuracy of price reviews.

精准补短！第 83 集团军某旅加强定向培养军士队伍建设

来源：解放军报 作者：李世伟 柴文静 责任编辑：王粲 2025-11-13

第 83 集团军某旅加强定向培养军士队伍建设——

“精准补短让我更有底气了”

■李世伟 柴文静

从杂波信号中快速捕捉目标机踪迹，连贯完成了属性判定、目标校对、火力分配等战斗动作……指挥方舱内，服役满三年的定向培养军士程龙神情专注，连续 18 批目标全部抗击成功.近日一次演习结束，小程因表现出色被评为“优秀班组指挥员”.

“定向培养军士基础实、专业精、起点高，是部队建设的‘种子人才’.”该旅领导告诉笔者，程龙的成长成才得益于旅队推行的个性化培养新举措.

以往，部分定向培养军士存在“专业精、兵味轻”特点，实战能力、组训能力有所欠缺.在原有培养方式下，一些战士虽能成为“考场尖子”，却难在演训场上挑大梁，成长速度较慢.

某连姚连长告诉笔者，程龙在校期间能力素质过硬，多次参加比武并取得佳绩，却在刚下连的实战化训练中频频失误.一次连战术训练，因班长临时休假，程龙暂任代理站长，在“敌”侦察机过境的紧要关头，他突然“卡壳”，下达指挥口令较慢，导致错失战机.

电子对抗专业的小谢处置特情时接连失误，修理专业的小刘抢修装备时未能有效隐蔽伪装……这一现象引起旅党委的高度重视，他们围绕定向培养军士队伍短板弱项展开专题研讨，决定推行更具针对性的培养方式：一方面，指定相同专业的高级军士及专业技术骨干与他们结对，提升管理和组训能力；另一方面，根据他们专业特长安排专攻精练，推荐参与岗位轮训、参加重大演训，为他们充分发挥专业优势提供平台，积累实战经验.

“精准补短让我更有底气了.”工作训练中，程龙与高级军士郑文华结成对子，跟训参加了指挥信息系统操作、班组战术协同演练等重难点课目专攻精练，一步步把课堂知识转化到演训场上.

一次营战术考核，程龙迎来了再次证明自己的机会.转移途中，站长被判“阵亡”，程龙临时接替指挥，带领全站沉着应对、连克险情，以优异成绩通过考核.

临床医学专业的牛庆怡，曾是全连急救包扎速度最快、动作最规范的标兵.下连之初，她担任自救互救课目小教员，常常紧张怯场，难以发挥专长.新的培养模式推行后，连长依据她的专长和个人情况，推荐她参加预提指挥军士集训，参加演讲比赛、独立设置训练场地、讲评每日工作，让她的表达能力和指挥能力得到了全面锻炼.

学成归来，牛庆怡多次担任连队值班员和营连教练员，实现了从“技能尖子”向“组训骨干”的转变.

如今，该旅定向培养军士队伍在急难险重任务中不断崭露头角，逐渐成长为各连队的中坚力量.

Precisely Addressing Weaknesses! A Brigade of the 83rd Group Army Strengthens the Construction of its Targeted Training Sergeant Team

Source: PLA Daily Author: Li Shiwei, Chai Wenjing Editor: Wang Can 2025-11-13

A brigade of the 83rd Group Army strengthens the construction of its targeted training sergeant team—

“Precisely addressing weaknesses gives me more confidence”

■ Li Shiwei, Chai Wenjing

Quickly capturing the target aircraft’s tracks from clutter signals, and seamlessly completing combat maneuvers such as attribute determination, target calibration, and fire allocation… Inside the command center, Cheng Long, a targeted training sergeant who has served for three years, focused intently, successfully engaging 18 consecutive targets. Recently, after an exercise, Cheng was awarded the title of “Excellent Squad Commander” for his outstanding performance.

“Targeted training sergeants have a solid foundation, specialized expertise, and a high starting point; they are the ‘seed talents’ for the army’s development,” a brigade leader told the reporter. Cheng Long’s growth and success are attributed to the brigade’s new personalized training measures.

Previously, some targeted training sergeants were characterized by “specialized expertise but lacking in combat experience,” resulting in deficiencies in combat and training capabilities. Under the existing training methods, some soldiers, while excelling in exams, struggled to take on significant responsibilities in training exercises, resulting in slower development.

Company Commander Yao told the reporter that Cheng Long possessed outstanding abilities and skills during his time at school, achieving excellent results in numerous competitions. However, he made frequent mistakes during the initial combat training after joining the company. In one company tactical training exercise, due to the squad leader’s temporary leave, Cheng Long temporarily served as acting station chief. At a critical moment when an “enemy” reconnaissance aircraft passed through the area, he suddenly faltered, issuing command orders too slowly, leading to a missed opportunity.

Xiao Xie, an electronic warfare specialist, made a series of mistakes while handling emergencies, and Xiao Liu, a repair specialist, failed to effectively conceal himself while repairing equipment…

This phenomenon drew the attention of the brigade's Party Committee. They held a special discussion on addressing the shortcomings and weaknesses of the sergeant training team and decided to implement a more targeted training approach: on the one hand, they paired them with senior sergeants and technical experts of the same specialty to improve their management and training capabilities; on the other hand, they arranged specialized training based on their professional strengths, recommended them for on-the-job rotation training and participation in major exercises, providing them with a platform to fully utilize their professional advantages and accumulate practical experience.

"Precisely addressing my weaknesses gives me more confidence." During work training, Cheng Long was paired with Senior Sergeant Zheng Wenhua, participating in specialized training in key and difficult subjects such as command information system operation and squad tactical coordination exercises, gradually translating classroom knowledge into practical application.

During a battalion tactical assessment, Cheng Long had another opportunity to prove himself. During a transfer, the station commander was declared "killed in action," and Cheng Long temporarily took command, leading the entire station to calmly respond to and overcome dangers, passing the assessment with excellent results.

Niu Qingyi, a clinical medicine major, was once the fastest and most standardized first-aid and bandaging specialist in her company. Initially, she served as a junior instructor for self-rescue and mutual aid, often feeling nervous and unable to utilize her expertise. After the implementation of a new training model, the company commander, based on her expertise and personal circumstances, recommended her to participate in a pre-promotion command sergeant training program. This included participation in speech contests, independently setting up training grounds, and reviewing daily work, comprehensively developing her communication and command abilities.

Upon returning from her training, Niu Qingyi served multiple times as a company duty officer and battalion/company instructor, transforming herself from a "skilled expert" to a "training backbone."

Today, the brigade's specially trained sergeant team continues to distinguish itself in urgent, difficult, and dangerous missions, gradually growing into the backbone of each company.

昼夜连贯砺精兵！陆军某旅火力分队组织实弹射击考核

来源：解放军报 作者：胡广枭 李佳鑫 责任编辑：孙悦 2025-11-13

昼夜连贯砺精兵

——陆军某旅火力分队实弹射击考核掠影

■胡广枭 李佳鑫 摄影报道

炮弹出膛.

射击前装定诸元.

官兵奔向战位.

战车在夜幕下快速机动.

山林腹地，月影婆娑.近日，陆军某旅火力分队在夜幕掩护下迅速向预定地域机动，开展一场实弹射击考核.

据介绍，此次考核着力检验火力分队在复杂环境下快打快撤、自主打击、精准毁伤等实战能力，确保部队关键时刻拉得出、打得赢.

拂晓时分，火力分队到达预定地域，官兵在微光条件下完成射击准备工作.考核指令下达，隆隆炮声响起，目标被全部摧毁.

“向预备阵地转移！”硝烟未散，新指令传来.官兵密切配合，迅速撤收武器装备，转入机动状态.占领预备阵地后，各炮长根据新的目标信息和气象数据，重新计算射击诸元，随即对目标展开打击.

一轮打击结束，指挥所根据炸点情况计算火炮修正量，并利用一体化指挥信息系统下发至各炮位.官兵迅速修正表尺方向，并实施第二轮打击.

夜幕降临，官兵在考核间隙快速进行弹药补给和装备检修，等待新的指令下达……

Continuous Day and Night Training Hone Elite Troops! An Army Brigade’s Firepower Unit Conducts Live-Fire Shooting Assessment

Source: PLA Daily Author: Hu Guangxiao, Li Jiaxin Editor: Sun Yue 2025-11-13

Continuous Day and Night Training Hone Elite Troops

—A Glimpse of an Army Brigade’s Live-Fire Shooting Assessment

■ Photo Report by Hu Guangxiao and Li Jiaxin

A shell leaves the barrel.

Firing data is set before firing.

Soldiers rush to their battle stations.

Tanks move rapidly under the cover of night.

In the heart of the mountains and forests, the moon casts its shadows. Recently, an Army brigade’s firepower unit rapidly moved to its designated area under the cover of night to conduct a live-fire shooting assessment.

According to reports, this assessment focused on testing the firepower unit’s combat capabilities in complex environments, including rapid attack and withdrawal, independent strikes, and precise destruction, ensuring the unit can be deployed and win in critical moments.

At dawn, the firepower unit arrived at its designated area, and men completed firing preparations under low-light conditions. The assessment order was issued, and the thunderous roar of artillery fire erupted; all targets were destroyed.

“Move to the reserve positions!” Before the smoke had even cleared, a new order arrived. The officers and men worked closely together, quickly withdrawing their weapons and equipment and moving into mobile status. After occupying the reserve positions, each gunner recalculated firing data based on the new target information and weather data, and then launched an attack on the targets.

After the first round of fire, the command post calculated the artillery corrections based on the impact points and distributed the information to each gun position using the integrated command information system. The officers and men quickly adjusted their sights and launched a second round of fire.

As night fell, the officers and men quickly replenished ammunition and inspected equipment during breaks in the assessment, awaiting new orders.

徙木立信在军营丨西藏军区某部：平时叫响“看我的” 攻坚敢喊“跟我上”

来源：解放军报 作者：王路奎 杨彪志 郭丰宽 责任编辑：孙悦 2025-11-13

开栏的话

行动是最好的号令，身教是最好的示范.

习主席在中央军委政治工作会议上强调：“坚持实事求是，坚持身教胜于言教，各级特别是高级干部要以身作则、率先垂范，以过硬作风和形象感召带动部队.”全军各级深入贯彻中央军委政治工作会议精神，以整风精神深化政治整训，不断加强革命性锻造，领导干部带头改造思想，带头自我剖析，带头整改落实，以实际行动徙木立信、取信官兵，新风正气在座座军营纷纷呈现、不断上扬.

解放军报即日起开设“徙木立信在军营”专栏，报道各部队领导干部立身为旗，持续推动政治整训走深走实，给部队带来的崭新风貌.

西藏军区某部引导各级领导干部以过硬作风和形象感召带动部队——

平时叫响“看我的” 攻坚敢喊“跟我上”

■王路奎 杨彪志 解放军报记者 郭丰宽

日前，西藏军区某部传出喜讯：在上级组织的实战化训练考核中，该部官兵不畏艰难、顽强拼搏，取得优异成绩.

谈起取得这一佳绩的原因，官兵一致认为：“各级领导干部平时叫响‘看我的’，攻坚敢喊‘跟我上’，用实际行动为我们立起了标杆，大家练兵备战的劲头越来越足.”

“工作方法千万条，领导带头第一条.”该部领导告诉记者，驻地自然环境艰苦，部队练兵备战任务繁重.他们认真学习贯彻习主席在中央军委政治工作会议上的重要讲话精神，进一步认识到，要激发官兵工作训练热情，更好完成肩负使命任务，必须充分发挥领导干部模范带头作用.为此，他们在深化政治整训中，积极引导各级领导干部弘扬我军优良传统，通过以身作则、率先垂范的实际行动，形成一级做给一级看、一级带着一级干的生动局面.

一个先辈故事就是一本鲜活教材，一次参观见学就是一次心灵洗礼.前不久，该部组织各级领导干部在“老西藏”文化长廊中，围绕“弘扬优良传统，树立过硬形象”这一主题展开讨论.

1950 年初，原定接管川南的第 18 军接到进藏命令.誓师大会上，军长张国华背着女儿进入会场，坚定地说：“不但我要进藏，我老婆要进藏，就是我的女儿，也不留在内地，也要跟我们一道进军西藏.”1954 年，开国将军慕生忠受命带领筑路队修建青藏公路.他在自己的镐把上刻下“慕生忠之墓”5 个字，斩钉截铁地说：“如果我死在这条路上，这就是我的墓碑.路修到哪里，就把我埋在哪里，我的头一定要朝着拉萨的方向！”……

“在上面要求人、在后面推动人，都不如在前面带动人管用.”该部一名党委常委深有感触地说，“当年的条件比现在苦得多，为什么先辈能做到一不怕苦、二不怕死，始终保持高昂士气？一个重要原因就是，各级领导干部用自身模范行动感染带动了官兵.虽然现在时代变了，工作方法多了，但领导干部模范带头始终不会过时.”

出操站排头，训练到一线，蹲点住班排，就餐与官兵同吃大锅饭；定期深入官兵中听取意见建议，发现问题及时解决；领导家属来队离队，与基层官兵家属同乘接送站班车……记者在该部采访了解到，随着政治整训持续深化，这些做法在该部各级领导干部中已成为常态.

“正人先正己，严下先严上.”该部领导告诉记者，他们组织各级领导干部深入学习习主席关于领导干部要以身作则、率先垂范的重要论述，认真查找自身存在的问题不足，制订改进措施；依据上级有关规定，制订领导干部行为规范细则，明确要求下级做到的自己首先做到，要求下级不做的自己坚决不做；设立举报邮箱和电话，主动接受官兵监督，对违反规定的人严肃处理.

如何克服高原特殊地理环境影响，发挥新装备最大作战效能，是该部研究探索的现实课题.面对缺少专业力量、没有经验借鉴等困难，该部一名党委常委主动请缨，带领课题组集智攻关、反复摸索，总结出多套新战法训法.

“只有平时严格要求自己，攻坚冲在前面，才能带动更多官兵奋勇争先.”该部领导告诉记者，深化政治整训中，他们认真梳理部队建设急需、备战急用、官兵急盼的深层次问题，

形成多个攻关课题.各级领导干部领衔攻关，带领官兵研究解决办法，一批“老大难”问题得到解决.

上有所率，下有所进；上有所行，下有所仿.该部各级领导干部以身作则、真抓实干，广大官兵深受鼓舞、干劲倍增.大家纷纷把“要我干”变为“我要干”、把“跟着干”变为“比着干”，部队面貌焕然一新.今年以来，该部多次圆满完成上级赋予的大项任务，多名官兵在上级组织的比武竞赛中摘金夺银.

Building Trust Through Actions: A Unit of the Tibet Military Region – Known for the Command “Watch Me!” in Peacetime, and Daring to Shout “Follow Me!” in Attacks

Source: PLA Daily Author: Wang Lukui, Yang Biaozhi, Guo Fengkuan Editor: Sun Yue 2025-11-13 Opening Remarks: Actions speak louder than words, and example is the best demonstration.

At the Central Military Commission Political Work Conference, President Xi Jinping emphasized: “Adhere to seeking truth from facts, and uphold the principle that actions speak louder than words. All levels, especially senior cadres, must lead by example and set a good example, inspiring and motivating the troops with their excellent work style and image.” All levels of the military have thoroughly implemented the spirit of the CMC Political Work Conference, deepening political rectification with the spirit of rectification, continuously strengthening revolutionary forging, and leading cadres have taken the lead in transforming their thinking, conducting self-analysis, and implementing rectification measures. Through practical actions, they have built trust and won the trust of officers and men, and a new atmosphere of righteousness is emerging and rising in every military camp.

Starting today, the PLA Daily launches a special column, “Establishing Trust in the Barracks by Moving a Tree,” to report on how leaders at all levels of the military are setting an example and continuously promoting in-depth and practical political rectification, bringing a new look to the troops.

A unit of the Tibet Military Region guides leaders at all levels to inspire and motivate the troops with their excellent work style and image— “Watch me in peacetime” and “Follow me in battle”

■ Wang Lukui, Yang Biaozhi, and Guo Fengkuan, PLA Daily reporters

Recently, a unit of the Tibet Military Region announced good news: in a realistic combat training assessment organized by higher authorities, the officers and men of this unit, undeterred by difficulties and fighting tenaciously, achieved excellent results.

When asked about the reasons for this achievement, the officers and men unanimously agreed: “Leaders at all levels have set a benchmark for us by ‘Watch me in peacetime’ and ‘Follow me in battle’ in battle, and everyone’s enthusiasm for training and preparing for war is getting stronger and stronger.”

“There are countless ways to work, but leadership is the most important.” The unit’s leader told reporters that the natural environment of the garrison is harsh, and the troops have heavy training and combat preparation tasks. They earnestly studied and implemented the spirit of President Xi Jinping’s important speech at the Central Military Commission’s Political Work Conference, further recognizing that to inspire the enthusiasm of officers and men for work and training and to better fulfill their missions, it is essential to fully leverage the exemplary role of leading cadres. To this end, in deepening political rectification, they actively guided leaders at all levels to carry forward the fine traditions of our army, creating a vibrant atmosphere where each level sets an example for the next.

A story of a predecessor is a vivid teaching material, and a visit and study tour is a spiritual baptism. Not long ago, the unit organized leaders at all levels to discuss the theme of “Carrying Forward Fine Traditions and Establishing a Strong Image” in the “Old Tibet” cultural corridor.

In early 1950, the 18th Army, originally scheduled to take over southern Sichuan, received orders to enter Tibet. At the mobilization rally, Army Commander Zhang Guohua carried his daughter into the venue and firmly declared, “Not only will I go to Tibet, but my wife will go to Tibet, and even my daughter will not stay in the mainland; she will come with us to Tibet.” In 1954, founding general Mu Shengzhong was ordered to lead a road construction team to build the Qinghai-Tibet Highway. He carved the five characters “Tomb of Mu Shengzhong” on the handle of his pickaxe, declaring resolutely, “If I die on this road, this will be my tombstone. Wherever the road is built, bury me there; my head must face Lhasa!”...

“Demanding things from above or pushing people from behind is not as effective as leading by example,” a member of the Party Committee Standing Committee of the unit said with deep feeling. “Conditions were much harsher back then. Why were our predecessors able to endure hardship and death without fear, maintaining high morale all the time? A crucial reason is that leaders at all levels inspired and motivated the soldiers through their exemplary actions. Although times have changed and there are more working methods now, the exemplary leadership of cadres will never be outdated.” Standing at the head of the ranks during morning exercises, training on the front lines, living and working alongside platoons, eating meals with the soldiers; regularly going among the soldiers to listen to their opinions and suggestions, and promptly resolving problems; leaders’ families traveling with the families of grassroots soldiers on shuttle buses... Interviews with the unit revealed that these practices have become the norm among leaders at all levels as political rectification continues to deepen.

“To correct others, one must first correct oneself; to be strict with subordinates, one must first be strict with superiors.” The unit’s leadership told reporters that they organized leaders at all levels to thoroughly study President Xi Jinping’s important remarks on leading cadres setting an example and taking the lead, earnestly identifying their own shortcomings and formulating improvement measures. Based on relevant regulations from higher authorities, they formulated detailed rules for the conduct of leading cadres, clearly requiring them to do what they require of their subordinates

and resolutely refraining from doing what they forbid their subordinates from doing. They established a reporting email address and telephone number to proactively accept supervision from officers and men, and severely punished those who violated the regulations.

How to overcome the impact of the special geographical environment of the plateau and maximize the combat effectiveness of new equipment is a practical issue that the unit is researching and exploring. Faced with difficulties such as a lack of professional personnel and no experience to draw upon, a member of the unit's Party Committee Standing Committee volunteered to lead a research team to pool their wisdom, repeatedly explore, and summarize several new combat tactics and training methods.

"Only by strictly demanding of ourselves in peacetime and taking the lead in tackling tough challenges can we motivate more officers and men to strive for excellence." The unit's leadership told reporters that during the in-depth political rectification, they carefully sorted out the deep-seated problems urgently needed for troop building, combat readiness, and the expectations of officers and men, forming several key research topics. Leaders at all levels spearheaded efforts to tackle key problems, guiding officers and men in researching solutions, and a number of long-standing and difficult issues were resolved.

With superiors setting an example, subordinates followed suit; with superiors setting a precedent, subordinates emulated. The unit's leaders at all levels led by example, working diligently and practically, which greatly inspired the officers and men, boosting their morale and enthusiasm. Everyone transformed from "being told what to do" to "wanting to do it," and from "following others" to "competing to do better," resulting in a completely new look for the unit. Since the beginning of this year, the unit has successfully completed several major tasks assigned by higher authorities, and many officers and men have won gold and silver medals in competitions organized by higher authorities.

西藏军区某团推出"返岗过渡"机制助力官兵调整身体状态——

休假结束，不再直接上高原

■陈玮靖 解放军报记者 裴永桢 邵博康

官兵正在站岗执勤. 方 润摄

秋去冬来，雪域高原，西藏军区某团组织体能考核，休假返岗不久的二级上士周钰粧表现出色，综合成绩评定为"优秀". "这次返岗，我不仅没出现严重高原反应，还在体能考核中正常发挥. "周钰粧高兴地说，之所以能这么快调整好状态，得益于团里推出的"返岗过渡"机制.

以往结束休假归队，周钰粧从温暖湿润的四川成都，直接返回海拔 4000 多米的哨所，较大的海拔差经常会引发高原反应. “每次休假结束归队，虽然心里铆足了劲想马上投入训练，可由于身体状态没有及时调整过来，往往感到力不从心. ”周钰粧说，如今情况大不同，团里推出了新规定：驻高海拔哨所官兵休假结束后，先前往团里海拔相对较低的营区，进行 3 至 7 天的适应性休整与恢复性训练，待身体适应高原环境后再返回战位.

谈及“返岗过渡”机制，该团机关干事刘沛霖向记者讲起背后的故事. 今年初，刘沛霖前往基层蹲连调研，不少官兵反映，休假结束返岗后，经常出现头疼头晕、乏力失眠等高原反应，轻则两三天，重则长达一周，导致训练状态低迷、执勤效率下滑.

记者了解到，该团所属哨所大多位于海拔 4000 米以上的边防线，而官兵休假地点多为低海拔地区. 此前，官兵休假结束返岗后，按规定虽然可以在哨所原地休整，但由于海拔较高，官兵依然要先经历一番高原反应才能逐渐调整身体状态. 了解详细情况后，刘沛霖将此事写入调研报告并上报团党委.

该团党委迅速召开专题会议，集中研究解决方案. “团里所属各点位虽然大多海拔超过4000米，但有几处营区的海拔只有 3000 米左右，何不将这些营区设置为休假官兵返岗过渡点位？”会上，部队管理股一名干部的发言得到大家认可. 随后，该团仔细研究上级相关政策并进行调研论证，决定对原来的休整规定进行优化，推出官兵休假“返岗过渡”机制，对休整地点、时间和休整期间的医疗保障、训练内容进行科学优化.

记者在该团一个返岗过渡点位采访时看到，几名常年驻守高海拔哨所的官兵结束休假返营，正在这里进行恢复性训练. 官兵告诉记者，休整期间，军医每天定时为大家测量血氧饱和度、心率、血压等关键生理指标，训练骨干还根据大家身体情况科学调整训练强度，确保训练、休整两不误.

前不久，某连二级上士陈天义结束休假归队，经过返岗过渡休整，身体逐步适应高原环境，随后他奔赴海拔 4300 多米的高原驻训场，在重火器实弹射击训练中取得首发命中的好成绩；驻海拔 4600 多米的标沙拉错哨所下士罗荣有，休整后重返哨位，不仅在体能考核中表现出色，还在最近一次巡逻任务中首次担负排头兵重任. “组织把我们的困扰放心上，我们更要全身心投入训练！”罗荣有告诉记者，“返岗过渡”机制赢得战友们纷纷点赞，大家扎根边防、建功边防的动力更足了.

从“先上哨后休整”到“先休整后上哨”，折射出该团党委“为兵服务就是为战斗力服务”的理念. 开通“军营超市流动服务车”，让驻高海拔哨所官兵“足不出哨”就能解决生活物资采购难题；协调解决车辆接送及住宿问题，温暖官兵家属高原探亲路……近年来，该团党委带领机关坚持为一线边防官兵真办事、办实事，用真招实策把服务基层、纾困解难的各项工作抓到位、抓出成效，一批困扰基层的现实难题得到及时解决，官兵卫国戍边热情更加高涨，多个创新战法训法通过实战化检验.

No More Going Directly to the Plateau after Leave! A Regiment of the Tibet/Xizang Military Command Launches A "Return-To-Work Transition" Mechanism

Source: PLA Daily Author: Chen Weijing, Pei Yongzhen, Shao Bokang Editor: Liu Shangjing 2025-11-14 A regiment of the Tibet/Xizang Military Command launches a "return-to-work transition" mechanism to help officers and men adjust their physical condition—No more going directly to the plateau after leave

■ Chen Weijing, PLA Daily reporter Pei Yongzhen, Shao Bokang Military doctor adjusts nasal oxygen tubes for officers and men returning from leave. Photo by He Ting Officers and men on guard duty. Photo by Fang Run

As autumn turns to winter, on the snowy plateau, a regiment of the Tibet/Xizang Military Command organized a physical fitness assessment. Sergeant Second-Class Zhou Yuzhuang, who had recently returned from leave, performed excellently, receiving an "excellent" rating. "This time, upon returning to work, I not only didn't experience severe altitude sickness, but I also performed normally in the physical fitness assessment," Zhou Yuzhuang said happily. He attributed his quick adjustment to the regiment's "return-to-work transition" mechanism.

Previously, upon returning to his post after leave, Zhou Yuzhuang would travel directly from the warm and humid climate of Chengdu, Sichuan, to his outpost at an altitude of over 4,000 meters. This significant altitude difference often triggered altitude sickness. "Every time I returned from leave, although I was eager to immediately throw myself into training, I often felt overwhelmed because my body hadn't adjusted in time," Zhou Yuzhuang said. Now, the situation is very different. The regiment has introduced a new regulation: after leave, soldiers stationed at high-altitude outposts must first go to the regiment's lower-altitude barracks for 3 to 7 days of acclimatization and recovery training, returning to their posts only after their bodies have adapted to the high-altitude environment.

Regarding the "return-to-duty transition" mechanism, Liu Peilin, an officer from the regiment's headquarters, told reporters the story behind it. Earlier this year, Liu Peilin conducted research at the grassroots level and many soldiers reported experiencing altitude sickness symptoms such as headaches, dizziness, fatigue, and insomnia after returning to duty. These symptoms ranged from two or three days to as long as a week, leading to decreased training performance and reduced duty efficiency.

Reporters learned that most of the regiment's outposts are located along the border at altitudes above 4,000 meters, while the soldiers' leave locations are mostly in lower-altitude areas. Previously, although soldiers were allowed to rest at their outposts after returning from leave, the high altitude meant they still had to experience altitude sickness before gradually adjusting. After understanding the details, Liu Peilin included this in his research report and submitted it to the regiment's Party Committee.

The regiment's Party Committee quickly convened a special meeting to discuss solutions. "While most of the regiment's outposts are above 4,000 meters, some camps are only around 3,000 meters. Why not designate these camps as transitional points for soldiers returning from leave?" A suggestion from an officer in the troop management section was well-received at the meeting. Subsequently, the regiment carefully studied relevant policies from higher authorities and conducted research and analysis, deciding to optimize the original rest regulations and introduce a "return-to-work transition" mechanism for soldiers' leave, scientifically optimizing rest locations, times, medical support during rest periods, and training content.

During an interview at a transition point for returning to duty, reporters observed several soldiers who had been stationed at high-altitude outposts for many years returning from leave and undergoing restorative training. The soldiers told reporters that during their rest period, military doctors regularly measured key physiological indicators such as blood oxygen saturation, heart rate, and blood pressure. Training instructors also scientifically adjusted the intensity of training based on individual physical conditions to ensure that training and rest were not neglected.

Recently, Sergeant Chen Tianyi of a certain company returned to his unit after leave. After a period of rest and transition, his body gradually adapted to the high-altitude environment. He then went to a high-altitude training ground at an altitude of over 4,300 meters and achieved a first-shot hit in live-fire heavy weapons training. Corporal Luo Rongyou, stationed at the Biao Sha La Cuo outpost at an altitude of over 4,600 meters, returned to his post after rest and not only performed excellently in physical fitness assessments but also took on the role of lead soldier for the first time in a recent patrol mission. "The organization takes our concerns to heart, and we are even more determined to devote ourselves to training!" Luo Rongyou told reporters. The "return-to-work transition" mechanism has won praise from his comrades, and everyone is even more motivated to dedicate themselves to border defense and make contributions.

From "on duty first, then rest" to "rest first, then on duty," this reflects the regiment's Party Committee's philosophy that "serving the soldiers is serving combat effectiveness." The establishment of a "mobile military supermarket service vehicle" allows soldiers stationed at high-altitude outposts to solve their daily necessities procurement problems without leaving their posts; coordinating transportation and accommodation issues has warmed the hearts of soldiers' families on their journeys to visit relatives in the highlands… In recent years, the regiment's Party Committee, leading its organs, has consistently served the frontline border guards, using practical measures to ensure that various tasks related to serving the grassroots and alleviating difficulties are implemented effectively. A number of practical problems plaguing the grassroots have been resolved in a timely manner, the soldiers' enthusiasm for defending the country and the border has increased, and several innovative tactics and training methods have passed combat testing.

西藏军区某旅修理技师王凯——

保持“新兵姿态”的老兵

■罗书铭 解放军报特约通讯员 李松原

王凯正在检修装备. 蔡畅 摄

在西藏军区某旅经验分享会上，一名大学生士兵围绕某专业知识点登台授课. 台下，一级上士、修理技师王凯时而凝神倾听，时而提笔记录，神情专注像是一名新兵. 19 年军旅生涯，正是这种刻苦求学的“新兵姿态”，让他从一名维修领域的“门外汉”，成长为如今享誉全旅的维修专家.

小时候，王凯便想象着长大后能驾驭铁甲战车，在训练场上卷起漫天黄沙的场景. 然而，事与愿违，2006 年 12 月，他虽如愿穿上军装，却被分到修理连.

密密麻麻的电路图、复杂的机械构造、摆满一地的修理工具，让王凯感受到深深的“本领恐慌”. 王凯回忆说，那时候多休息一会儿就感觉会比别人落后一步.

为了提升维修本领，白天，王凯跟着班长如影随形，打下手、看操作、学原理；夜晚，独自在装备前反复练习，直到练成“肌肉记忆”. 凭着这股韧劲，他练就“听音辨故障”的绝活.

一次演习保障，一台新型运输车突发故障，就在大家感到棘手时，王凯仅凭发动机异响准确判断出故障点，第一时间排除故障. 任务结束后，战友们对他的表现赞许有加，他却一头扎进车场，连夜对问题进行复盘，为更快应对此类特情提供预案.

那年，某新型运输车列装部队，这位技术尖兵主动请缨攻坚最难的动力系统修理. 36 岁的王凯，把自己当成新兵，跟着厂家工程师从零学起. 3 个月里，他记满 6 本笔记本，绘制出上百张设备原理图.

一次，为了弄清发动机动力不足问题，他连续工作近 20 个小时，直到问题解决才想起自己还没吃饭. 最终，他不仅成为全旅首个取得新装备上岗资格的技术能手，还带出一支过硬的技术保障分队.

近年来，随着高学历士兵增多，王凯敏锐地察觉到自己的专业知识短板. 一次偶然机会，王凯在厂家看到有人用笔记本电脑就能精准判断出车辆故障，并了解到连队大学生士兵黄旭入伍前学的是相关专业，这让他眼前一亮.

“电脑是怎么实现故障诊断功能的，能教教我吗？”王凯专门找到黄旭向他请教. 从此，学习室里出现这样一幕：老兵虚心求教，新兵倾囊相授. 一次实装操作，黄旭指出王凯的操作失误，他立即改正：“你指教得对！”这一幕，成为连队“新老互学、共同进步”的生动场景.

翻开王凯的笔记本，扉页上“眼看、耳听、手至、嘴问、心到”的工作法格外醒目. 他说：“强军路上，没有永远的‘老师’，只有精进求学的‘学生’. ”如今，在他的带动下，连队形成浓厚的研学氛围，涌现出 30 多名技术骨干. 这些年，王凯取得的成绩有目共睹，但他始终保持那份初心：“为了强军事业，永远做一名虚心求学的‘新兵’. ”

Wang Kai, a Repair Technician at a Brigade of the Tibet/Xizang Military Command—

A Veteran with a “New Recruit’s Attitude”

■ Luo Shuming, Special Correspondent for PLA Daily, Li Songyuan

Wang Kai is inspecting equipment. Photo by Cai Chang

At an experience-sharing meeting of a brigade of the Tibet/Xizang Military Command, a college student soldier gave a lecture on a specific professional knowledge point. Below the stage, Senior Sergeant Wang Kai, a repair technician, sometimes listened attentively, sometimes took notes, his focused expression like that of a new recruit. In his 19 years of military service, it is this diligent “new recruit’s attitude” that has allowed him to grow from a novice in the field of maintenance to a renowned maintenance expert in the entire brigade.

As a child, Wang Kai imagined himself driving armored vehicles, kicking up clouds of yellow sand on the training ground. However, things didn't go as planned. In December 2006, although he finally got his wish and donned the military uniform, he was assigned to the repair company.

The densely packed circuit diagrams, complex mechanical structures, and repair tools scattered everywhere made Wang Kai feel a deep sense of inadequacy. Wang Kai recalled that back then, even a little extra rest made him feel like he would fall behind others.

To improve his repair skills, during the day, Wang Kai followed his squad leader closely, assisting, observing operations, and learning principles; at night, he practiced repeatedly in front of the equipment until he developed "muscle memory." With this tenacity, he developed the unique skill of "identifying faults by sound."

During a support exercise, a new type of transport vehicle suddenly malfunctioned. Just when everyone was struggling to solve the problem, Wang Kai accurately identified the fault location based solely on the abnormal engine noise and resolved it immediately. After the mission, his comrades praised his performance, but he immediately went to the vehicle yard, reviewing the problem overnight to develop contingency plans for responding to similar emergencies more quickly.

That year, a new type of transport vehicle was commissioned into the troops, and this skilled technician volunteered to tackle the most difficult repair task: the power system. 36-year-old Wang Kai treated himself like a new recruit, learning from scratch under the guidance of the manufacturer's engineers. In three months, he filled six notebooks with notes and drew hundreds of equipment schematics.

Once, to solve a problem of insufficient engine power, he worked continuously for nearly 20 hours, only realizing he hadn't eaten when the problem was resolved. Ultimately, he not only became the first technician in the entire brigade to obtain the qualification to operate the new equipment, but also trained a highly capable technical support team.

In recent years, with the increase in highly educated soldiers, Wang Kai keenly realized his own shortcomings in professional knowledge. By chance, Wang Kai saw someone at the manufacturer accurately diagnose vehicle faults using a laptop and learned that Huang Xu, a college graduate soldier in his company, had studied a related major before enlisting. This gave him a new perspective.

"How does a computer perform fault diagnosis? Can you teach me?" Wang Kai specifically sought out Huang Xu to ask him. From then on, a scene like this appeared in the study room: veterans humbly seeking knowledge, and new recruits generously sharing their expertise. During a practical operation, Huang Xu pointed out Wang Kai's operational error, which he immediately corrected: "You're right!" This scene became a vivid example of "mutual learning and common progress between new and experienced personnel" in the company.

Opening Wang Kai's notebook, the work method of "seeing, hearing, doing, asking, and understanding" is prominently displayed on the first page. He said, "On the road to building a strong military, there are no eternal 'teachers,' only 'students' who are constantly striving to learn." Now, under his leadership, the company has developed a strong atmosphere of research and learning, producing more than 30 technical backbones. Wang Kai's achievements over the years are evident to all, but he has always maintained his original aspiration: "For the cause of building a strong military, I will always be a humble 'new recruit' seeking knowledge."

昼夜连贯砺精兵！陆军某旅火力分队组织实弹射击考核

来源：中国军网-解放军报 作者：胡广枭 李佳鑫 责任编辑：孙悦 发布：2025-11-13

昼夜连贯砺精兵

——陆军某旅火力分队实弹射击考核掠影

■胡广枭 李佳鑫 摄影报道

炮弹出膛.

山林腹地，月影婆娑. 近日，陆军某旅火力分队在夜幕掩护下迅速向预定地域机动，开展一场实弹射击考核.

据介绍，此次考核着力检验火力分队在复杂环境下快打快撤、自主打击、精准毁伤等实战能力，确保部队关键时刻拉得出、打得赢.

射击前装定诸元.

拂晓时分，火力分队到达预定地域，官兵在微光条件下完成射击准备工作. 考核指令下达，隆隆炮声响起，目标被全部摧毁.

“向预备阵地转移！”硝烟未散，新指令传来. 官兵密切配合，迅速撤收武器装备，转入机动状态. 占领预备阵地后，各炮长根据新的目标信息和气象数据，重新计算射击诸元，随即对目标展开打击.

官兵奔向战位.

一轮打击结束，指挥所根据炸点情况计算火炮修正量，并利用一体化指挥信息系统下发至各炮位. 官兵迅速修正表尺方向，并实施第二轮打击.

战车在夜幕下快速机动.

夜幕降临，官兵在考核间隙快速进行弹药补给和装备检修，等待新的指令下达……

Continuous Day and Night Training Hone Elite Troops! An Army Brigade's Firepower Unit Conducts Live-Fire Shooting Assessment

Source: China Military Network - PLA Daily Author: Hu Guangxiao, Li Jiaxin Editor: Sun Yue Published: 2025-11-13

Continuous Day and Night Training Hone Elite Troops

—A Glimpse of an Army Brigade's Live-Fire Shooting Assessment

■ Photo Report by Hu Guangxiao and Li Jiaxin A shell leaves the barrel.

In the heart of the mountains, the moon casts its shadow. Recently, an Army brigade's firepower unit rapidly maneuvered to its designated area under the cover of night to conduct a live-fire shooting assessment.

According to reports, this assessment focused on testing the firepower unit's combat capabilities in complex environments, including rapid deployment and withdrawal, independent strikes, and precise destruction, ensuring the unit can be deployed and win in critical moments.

Preparing firing parameters.

At dawn, the firepower unit arrived at its designated area, and the soldiers completed firing preparations under low-light conditions. The assessment command was issued, and the thunderous sound of artillery fire erupted; all targets were destroyed.

"Move to reserve positions!" Before the smoke had even cleared, a new order arrived. Soldiers worked closely together, quickly withdrawing their weapons and equipment and moving into mobile positions. After occupying the reserve positions, each gunner recalculated firing data based on the new target information and weather data, and then launched an attack on the targets.

Soldiers rushed to their battle stations.

After the first round of fire, the command post calculated artillery corrections based on the impact points and distributed the information to each gun position using the integrated command and information system. Soldiers quickly adjusted their sights and launched a second round of fire.

Tanks moved rapidly under the cover of night.

As night fell, soldiers quickly replenished ammunition and inspected equipment during breaks in the assessment, awaiting new orders…

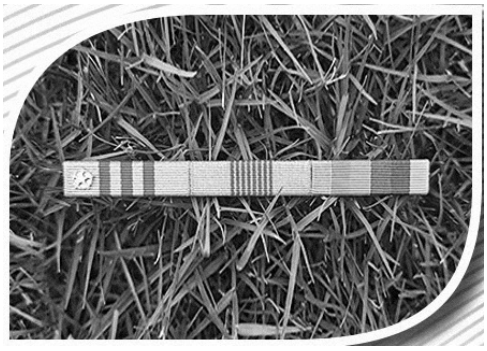
不会洗消的“五小工”不是好驾驶员！他在平凡岗位绽放光芒

来源：解放军报 作者：陈义全 责任编辑：王粲 2025-11-15



我是平凡又自豪的“五小工”

■陆军某旅中士 陈义全

我是一名“五小工”，平时干的多是“幕后”工作，站在单位强军故事会的舞台，心里难免有点紧张. 不过，平凡又紧张就是我们“五小工”的常态，抢通电路、抢修水路，要的就是紧张快干. 这里，我想用 3 组关键词，给大家讲一讲胸前这枚平时个人嘉奖略章背后的故事.

陈义全检修配电箱.

陈义全的勋表.

陈义全（左）和战友维护营区电路.

从“瞧不上”到“放不下”

说实话，最初连队安排我参加“五小工”集训的时候，我心里满满都是不情愿——凭啥都是新兵，其他战友忙着参加侦察洗消训练，而我要去拧螺丝、通水管？参加这样的集训，既感受不到训练场的火热，也体会不到技术岗的“高端”，我真有点“瞧不上”.

一开始，我跟着班长学习，都是“划水磨洋工、摸鱼装样子”. 直到第一次受领任务，参加营区大礼堂周边水管的抢修，我一到现场就傻了眼：水管裂口“滋滋”喷水，溅得满地泥泞，我握着扳手直愣愣站在原地，满脑子都是“咋办、咋办”，甚至都没想起来要先去关总阀. 手忙脚乱间，我还被热熔器烫伤了手指，心里更是委屈：“这活为啥是我干？”

班长看出我的心思，一句批评都没有，而是指着不远处的食堂说：“你看，现在已经下午4点多了，水管一坏，炊事员没办法做饭，要是修不好，拖到了晚上，大家澡也洗不了. 水电这活儿看着不起眼，训练生活中却缺不了，没咱们水电工就是不行！”我盯着满地的水，第一次觉得手里的扳手沉甸甸的——原来我瞧不上的“小事”，这么重要.

从那以后，我收起偏见，认认真真向班长学习. 跟着班长参加抢修时，我不再只顾着递工具，而是仔细盯着他们手中的动作，学习如何查电路、接水管. 遇到不懂的，我就追着问“为啥这段线要这样接”“怎么判断水管漏点”……渐渐地，以前一看就头疼的电路图，我能看出门道；曾经提不起兴趣的水管拆装，我也练出自己的窍门.

一天深夜，抢修完办公楼的电路，我合上总闸，心里的成就感和办公楼的灯一起亮起来. 入伍以来，单位几次营房搬迁，都是我负责水电维修保障. 今天去这里修路灯、明天去那里通水管，这样的生活虽然忙忙碌碌，我却感到很充实、很有意义——原来，每个平凡岗位都有不平凡的价值，只要踏踏实实干好手中的工作，就会收获属于自己的精彩.

“五小工”这个岗位，我还真放不下.

从“想干事”到“干成事”

去年底，营区一些设施翻新升级，不少水电耗材被施工队散落在营区各处，还建了不少临时性的耗材仓库. 有一天，我要找某型号电线，翻了好几个仓库都没找到.

这样像没头苍蝇一样到处找，不是耽误事吗？我想，既然急需整理耗材仓库、分类器材，谁干不是干？那我就去干呗，这样既方便自己，也方便其他“五小工”.

我主动找到营房科科长，汇报了整合仓库的打算. 科长当即给我协调车辆，安排各营水电工和我一起分类回收闲置耗材. 几天下来，分门别类、整齐有序的仓库整理出来了，大大提高了水电维修的工作效率.

整理仓库期间，我们还发现部分可以重复使用的电线电缆被当成一次性用品. 向营房科科长报告后，我们对电线电缆进行安全检测，将合格产品回收利用，初步估算下来节约了不少钱.

经过这件事，我还琢磨出一个道理：想干事，就别嫌麻烦；再麻烦的事只要干起来，就不麻烦了.

从“兼好职”到“强本职”

在营区，很多兄弟连队的战友都认识我，因为我是名“五小工”，哪里线路跳闸、水管漏水、门轴松了，喊一声我准到. 为此，我想“澄清”一下——“不会洗消的‘五小工’不是好驾驶员”. 这并不是一句玩笑话，其实我们连队并没有水电岗位，我的本职岗位是洗消班驾驶员，“五小工”是“兼职”.

虽然我对修理工作有感情，干得也不差，但我明白，本职岗位任何时候都不能丢，下车能洗消、上车能驾驶才是我的“看家本领”，每次机动都能保证安全顺利才是我的“硬核任务”.

这几年，每年我都参加外训机动，也单放执行过安保任务，但前不久参加海训时，我更加真切感受到驾驶员肩负的责任.

我所在营是全旅老旧车辆最多的单位，我开的也是一辆“老东风”. 一直以来，我对它的脾气很熟悉，可那次执行任务，一上高速路我就感觉不对劲：“老东风”的速度上不去了！检查挡位，没问题；观察车辆行驶状态和轮胎，没问题；听发动机声音，也没问题，可转速就是上不去.

我初步判断：可能是油路老化. 结合我对这辆车的了解，以及当时与第一个休息点的距离，为了保证车队行驶安全，我研判首先要把车停到安全位置.

我向梯队长报告情况，按照临机处置要领，把车辆安全停在第一个休息点，第一时间与修理工一起排查，更换了老化油路后，才踏实地继续上路.

驾驶员手握方向盘，担负的就是机动安全顺畅的责任. 只有“人车合一”，了解车辆性能、熟悉车辆状况，才能成为一名优秀的驾驶员.

回顾 6 年的军旅生涯，我给自己总结了一个“36+2+2167+X”的成长之路：连续 36 小时蹲守营区抢修水电，获得中高级两本电工证，累计 2167 公里安全行程. 而“X”，是我对走好未来军旅路的畅想.

千钧重担人人挑，人人心中有目标. 旅队每名官兵都有自己的岗位，我想，只要担好自己的职责、干好自己的工作，平凡岗位也能绽放光芒.

A “Five-Small Worker” Who Can’t Disinfect Isn’t a Good Driver! He Shines in an Ordinary Position

Source: PLA Daily Author: Chen Yiquan Editor: Wang Can 2025-11-15

I am an ordinary yet proud “Five-Small Worker”

■ Sergeant Chen Yiquan, a soldier in an army brigade

I am a “Five-Small Worker,” usually doing “behind-the-scenes” work. Standing on the stage of the unit’s “Strengthening the Army Storytelling Session,” I inevitably feel a little nervous. However, being ordinary yet nervous is the norm for us “Five-Small Workers.” Restoring power lines and repairing waterways requires speed and efficiency. Here, I would like to use three sets of keywords to tell you the story behind the personal commendation badge on my chest.

Chen Yiquan inspecting a distribution box.

Chen Yiquan’s medal.

Chen Yiquan (left) and his comrades maintaining the camp’s electrical circuits.

From “Looking Down” to “Unable to Let Go”

To be honest, when the company initially assigned me to the “Five Small Laborers” training, I was filled with reluctance—why should we, all new recruits, be busy with reconnaissance and decontamination training while I had to tighten screws and unclog pipes? Participating in this kind of training meant neither experiencing the intensity of the training ground nor the “high-end” nature of a technical post; I genuinely looked down on it.

At first, I followed my squad leader’s instructions, but it was all just “going through the motions, pretending to work.” Until my first assignment—to repair the water pipes around the camp’s auditorium—I was dumbfounded when I arrived at the scene: water was gushing from a cracked pipe, splashing mud everywhere. I stood there, wrench in hand, my mind filled with “What to do, what to do?”, not even thinking to turn off the main valve first. In the chaos, I even burned my finger with the hot gluer, and felt even more aggrieved: “Why am I the one doing this?” The squad leader saw my thoughts but didn’t criticize me at all. Instead, he pointed to the canteen not far away and said, “Look, it’s already past 4 pm. If the water pipe breaks, the cooks can’t prepare meals. If it’s not fixed and drags on until tonight, no one can shower. Plumbing and electrical work may seem insignificant, but it’s indispensable in training and daily life. We can’t function without us plumbers!” Staring at the water on the floor, I felt the weight of the wrench in my hand for the first time—the “small thing” I had looked down on was so important.

From then on, I put aside my prejudices and earnestly learned from the squad leader. When assisting him in emergency repairs, I no longer just handed him tools but carefully observed their movements, learning how to check circuits and connect water pipes. When I encountered something I didn't understand, I would persistently ask, "Why is this wire connected like this?" "How do I determine if there's a leak in the water pipe?"... Gradually, I began to understand the intricacies of circuit diagrams that used to give me a headache; I even developed my own tricks for disassembling and assembling water pipes, which I once found uninteresting.

One late night, after repairing the office building's electrical circuits, I switched on the main switch, and a sense of accomplishment shone through me, just like the lights in the office building. Since enlisting, I've been responsible for water and electricity maintenance during several barracks relocations. Today I'm fixing streetlights here, tomorrow I'm unclogging water pipes there—this busy life, though hectic, feels fulfilling and meaningful. I've realized that every ordinary position has extraordinary value; as long as you do your job diligently, you'll reap your own rewards.

I really can't let go of this "small helper" position.

From "Wanting to Do Things" to "Getting Things Done"

At the end of last year, some facilities in the camp were renovated and upgraded, and many water and electricity supplies were scattered throughout the camp by the construction team, requiring the construction of several temporary supply warehouses. One day, I needed to find a certain type of electrical wire, but after searching several warehouses, I couldn't find it.

Wouldn't this aimless searching be a waste of time? I thought, since there's an urgent need to organize the consumables warehouse and categorize equipment, who doesn't care who does it? So I decided to do it myself, which would be convenient for both myself and the other "small helpers."

I proactively approached the head of the barracks department and reported my plan to reorganize the warehouse. The head immediately coordinated vehicles for me and arranged for the electricians from each battalion to work with me to sort and recycle unused consumables. After a few days, the warehouse was neatly organized and categorized, greatly improving the efficiency of electrical and plumbing maintenance.

During the warehouse organization, we also discovered that some reusable wires and cables were being treated as disposable items. After reporting this to the head of the barracks department, we conducted safety tests on the wires and cables, recycling the qualified products, and initially estimated that we saved a considerable amount of money.

Through this experience, I also realized a principle: if you want to get things done, don't be afraid of trouble; even the most troublesome things become less troublesome once you start doing them.

From "Having a Side Job" to "Mastering My Core Duty"

In the barracks, many comrades from other companies know me because I'm a "five-in-one" driver (a term used to describe someone who is skilled in decontamination, electrical, and vehicle maintenance). Wherever there's a power outage, a leaky pipe, or a loose door hinge, just call me and I'm there. Therefore, I want to clarify something—"a 'five-in-one' driver who can't decontaminate isn't a good driver." This isn't a joke. Actually, our company doesn't have dedicated water and electricity positions; my primary job is as a decontamination driver, and being a "five-in-one" driver is a side job.

Although I have a passion for repair work and am quite good at it, I understand that my core duty must never be neglected. Being able to decontaminate after getting out of the vehicle and drive it immediately are my "special skills," and ensuring safe and smooth operations during every maneuver is my "core mission."

In recent years, I've participated in annual external training maneuvers and also performed security missions independently. However, during a recent sea training exercise, I truly felt the responsibility a driver bears.

My battalion has the most old vehicles in the entire brigade, and I drive an old Dongfeng truck. I've always been very familiar with its quirks, but during that particular mission, I sensed something was wrong as soon as we got on the highway: the "old Dongfeng" wouldn't pick up speed! I checked the gears, no problem; observed the vehicle's driving status and tires, no problem; listened to the engine, no problem, but the RPM just wouldn't go up.

My initial assessment was that the fuel system might be worn out. Based on my knowledge of the vehicle and the distance to the first rest stop, to ensure the convoy's safety, I decided to first stop the vehicle in a safe location.

I reported the situation to the squadron leader, and following emergency procedures, safely parked the vehicle at the first rest stop. I immediately worked with the mechanics to troubleshoot and replace the worn fuel system before confidently continuing our journey.

The driver, gripping the steering wheel, bears the responsibility for safe and smooth maneuvering. Only when one is in complete harmony with the vehicle, understanding its performance and familiar with its condition, can one become an excellent driver.

Looking back on my six years of military service, I've summarized my growth path as "36+2+2167+X": 36 consecutive hours of on-site maintenance of water and electricity in the barracks, obtaining two electrician certificates (intermediate and advanced), and accumulating 2167 kilometers of safe driving. The "X" represents my aspirations for a successful future in the military.

Everyone shoulders heavy responsibilities, and everyone has a goal in mind. Every officer and soldier in the brigade has their own position. I believe that as long as we fulfill our duties and do our jobs well, even ordinary positions can shine.

第 78 集团军某旅“云端课堂”重温红色历史

来源：解放军报 作者：孟璠玓 责任编辑：王粲 2025-11-16

第 78 集团军某旅

“云端课堂”重温红色历史

解放军报讯 特约通讯员孟璠玓报道：“我现在所在的地方就是马定夫革命烈士陵园，当年，马定夫同志就是牺牲在这个山头……”秋日，第 78 集团军某旅举行“纪念马定夫烈士牺牲暨‘马定夫爱民模范连’授称 82 周年”活动，他们与山西省晋中市太谷区（原太谷县）马定夫村连线，携手展开一堂“云端”教育课.

屏幕上，马定夫村的红色讲解员动情讲述革命先辈的战斗事迹，将大家的思绪拉回到战火纷飞的年代. 1943 年 7 月 23 日，太谷县枫子岭村，八路军太行二分区 30 团政委马定夫带领官兵与数倍于己的日寇展开殊死搏斗. 为了掩护群众转移，官兵子弹打光后，端起刺刀向敌人冲锋，马定夫和多名官兵壮烈牺牲. 战后，连队被上级授予“马定夫爱民模范连”称号，太谷县人民政府将枫子岭村改名为马定夫村.

该旅领导告诉笔者，旅队前身部队历史厚重、功勋卓著，为了充分发挥红色资源铸魂育人作用，他们积极创新教育方法，利用视频直播等手段精心打造“云端课堂”；广泛开展“学英雄、话传统”等主题活动，邀请旅队抗战老兵等以视频连线方式，为官兵讲述战斗故事；与多个红色场馆建立教育协作机制，利用新兵下连、新干部任职等时机，邀请红色场馆讲解员带领官兵“云端”共学红色历史；组织教育骨干深入挖掘英模连队、英雄人物的战斗事迹，精心制作系列视频微课并上传旅强军网，供官兵学习.

“云端课堂”重温战史，练兵备战动力倍增. 前不久，该旅某连王连长带领官兵，在旅群众性练兵比武中夺得 4 个单项第一、4 个团体第一. “作为英雄传人，唯有奋力拼搏、争取新的荣誉，才能告慰先辈. ”王连长说.

A 78th Group Army Brigade Revisits Revolutionary History Through a “Cloud Classroom”

Source: PLA Daily

Author: Meng Fanyu

Editor: Wang Can

2025-11-16

A brigade of the 78th Group Army

Revisiting revolutionary history through a “cloud classroom”

PLA Daily News (Special Correspondent Meng Fanyu): “I am currently at the Ma Dingfu Revolutionary Martyrs Cemetery. Comrade Ma Dingfu sacrificed his life on this very hill...” In autumn, a brigade of the 78th Group Army held an event commemorating the 82nd anniversary of the sacrifice of Martyr Ma Dingfu and the awarding of the title “Ma Dingfu Model Company for Loving the People.” They connected with Ma Dingfu Village in Taigu District (formerly Taigu County), Jinzhong City, Shanxi Province, to jointly conduct a “cloud” educational lesson.

On the screen, a red guide from Ma Dingfu Village movingly recounted the fighting deeds of revolutionary predecessors, drawing everyone's thoughts back to the era of war. On July 23, 1943, in Fengziling Village, Taigu County, Ma Dingfu, political commissar of the 30th Regiment of the Second Military Sub-district of the Eighth Route Army in Taihang, led his troops in a fierce battle against a Japanese force several times their size. To cover the evacuation of civilians, after running out of ammunition, the soldiers charged the enemy with bayonets, and Ma Dingfu and several other soldiers heroically sacrificed their lives. After the battle, the company was awarded the title of "Ma Dingfu's Model Company for Loving the People," and the Taigu County People's Government renamed Fengziling Village as Ma Dingfu Village.

The brigade leadership told the reporter that the brigade's predecessor unit had a rich history and outstanding achievements. To fully leverage the role of red resources in shaping moral character and educating the troops, they actively innovated educational methods, meticulously creating "cloud classrooms" using video live streaming and other means; widely carrying out themed activities such as "Learning from Heroes and Discussing Traditions," inviting veterans of the War of Resistance Against Japan to share their battle stories with soldiers via video link; establishing educational cooperation mechanisms with multiple red sites, utilizing opportunities such as new recruits joining units and new officers taking office to invite guides from these sites to lead soldiers in learning red history "online"; and organizing educational backbone personnel to deeply explore the combat deeds of model companies and heroic figures, carefully producing a series of video micro-lessons and uploading them to the brigade's military website for soldiers to study.

The "cloud classroom" allows soldiers to revisit war history, greatly boosting their motivation for training and combat readiness. Not long ago, Company Commander Wang of a certain company in the brigade led his soldiers to win four individual first-place awards and four team first-place awards in the brigade's mass training competition. "As successors of heroes, only by striving hard and winning new honors can we comfort our predecessors," said Company Commander Wang.

从"周四等警报"到"随时能出动"，陆军某旅整治虚假备战现象

来源：解放军报 作者：孟立 卢明凯 宋世杰 责任编辑：王粲 2025-11-17

从"周四等警报"到"随时能出动"

——第七十一集团军某旅按照政治整训要求整治虚假备战现象的一段经历

■孟 立 卢明凯 解放军报特约记者 宋世杰

战备拉动命令下达后，该旅官兵快速装载物资. 王伟博 摄

“接上级命令，命你部于 7 时前完成战备等级转进！”一天清晨，第 71 集团军某旅某营值班室电话铃声响起. 官兵们闻令而动，迅速穿戴整齐，奔赴各自战位.

这是一次寻常的训练，却因一个细节与以往不同——日期提前了一天. 中士王晓飞告诉记者：“‘周四等警报’已成过去时. ”

根据有关规定，基层单位要组织战备拉动. 为统一工作节奏、方便检查督导，今年以前，该旅机关通常在周四组织战备拉动. 这样一来，官兵们摸透了规律，很多单位甚至提前一天就开始准备.

政治整训展开后，这个规定引发广泛讨论. “战备拉动时间相对固定，便失去了检验官兵应急应战能力的应有之义. ”该旅作训科胡参谋坦言. “现在官兵们养成了‘周四等警报’的习惯，结果除了周四这一天，很多人的战备弦都是松的. ”不少基层带兵人也颇有意见.

议战议训会上，该旅党委一班人结合政治整训要求，深入分析备战打仗形势，进行自我反思，大家坦承，总是同一天组织战备拉动，确实有走过场之嫌，而且实际效果也不好. 他们以此为突破口，坚持刀口向内检视剖析，起底深挖背离战斗力标准的虚假备战问题.

旅机关首先向自己“开炮”，明确战备拉动不再固定时间，由作战值班员随机确定. 半夜、凌晨、正午，周末、法定节假日，警报声随时可能响起，倒逼全旅官兵真正进入高戒备状态.

然而转变初期并非一帆风顺，一些单位表现出明显的不适应. “无预告拉动打乱了正常的工作节奏”“官兵们神经高度紧张”等抱怨不时传来. 面对这些声音，旅党委不为所动：敌人发动战争不会提前预告，平时不适应，战时咋打赢？

以此为参照，以前一些看似细小的问题，在考验面前被不断放大.

一次，该旅某营计划在晴好天气组织战术训练，没想到当天突降暴雨. 在暂停训练还是照常进行的选择上，机关指导组毫不犹豫地选择了后者，结果令人警醒：尽管预案里有详细的应对方案，实际执行时仍出现官兵行动迟缓、通信联络不畅、装备防护不到位等问题，完成时间也超出了规定.

“长期以来，一些特情只停留在纸面上，官兵们经常在舒适环境中训练，难以真正检验和提升实战能力.”事后复盘，该营李营长的分析一针见血.

这次雨中训练，如同固定日期组织战备拉动一样，给该旅官兵思想带来了很大的冲击. 在机关指导下，他们利用野外驻训时机，在陌生环境展开战术研练. 一次，导调组出动多架无人机，模拟空中特情和敌人袭扰. 某分队指挥员冷静应对，果断处置. 虽然整个过程官兵们急出了一身汗，却直言“找到了打仗的感觉”. 讲评时，导调组的一番话彰显旅党委想要树立的导向：“带着硝烟味的‘缺憾’，远比那些脱离实战的‘完美’更可贵.”

导调组同样收获颇丰. 他们在给官兵设难的同时，也在不断检讨自身. 训练结束，一份导调工作改进方案新鲜出炉. 在这份方案里，道路损毁、桥梁阻断、穿过染毒地带等特情“老三样”升级为电磁压制、网络攻击、弹药供应中断等 10 多种新特情.

随着政治整训不断深入，该旅党委一班人的信念更加坚定：只有真想打仗的事情、真谋打仗的问题、真抓打仗的准备，向一切损害战斗力的和平积弊开刀，才能把影响制约打赢的一切因素排除在“枪响之前”.

这场思想洗礼迅速传导到基层连队，扩展到战斗力建设各方面、全过程.

营区道路不再讲究横平竖直，而是根据部队出动需要，“取捷径”规划；重新设定战备车辆停放地点，确保车辆快速出动、官兵迅速登车……这一项项举措带来的，是全旅战备水平整体提升，是官兵战备意识显著增强. 记者走进某营宿舍看到，内务设置突出战备，更加科学合理，装具、背囊等物品整齐摆放，就连指挥员的笔记本电脑，也在检查之列，电池状态、内部存储资料等均实现了清单化管理.

该营李营长介绍，前段时间，上级组织战备抽查，他们营在规定时间内完成全员全装出动准备，获得高度评价.“为什么会出现虚假备战现象？说到底还是战斗力这个唯一的根本的标准，有时让位于安全标准、领导满意标准、上级检查标准等，没有一以贯之地立起来、一丝不苟地落下去.”李营长说，凡事用战斗力这把尺子去量一量，自然就会主动把错误思想倾向和不符合实战的做法赶出演训场.

正如他所说，如今面对不定期不定时的战备拉动，官兵们已经不像之前那样紧张忙乱，一切都变得井井有条，甚至在拉动结束后，大家经常自发展开讨论，看看哪些地方还有改进提升的空间. 该营一名干部告诉记者，召之即来、来之能战、战之必胜，既是一种能力，也是一种状态，一名合格的军人、一支能打仗的部队，必须具备这种能力、这种状态.

从“周四等警报”到“随时能出动”，该旅领导说，这是向战而行迈出的一小步，却是思想转变跨越的一大步. 有了这段经历，他们对破解部队转型路上的难题充满信心.

From “Waiting for Alarms on Thursdays” to “Ready to Deploy at Any Time”: An Army Brigade Rectifies False Combat Readiness

Source: PLA Daily Author: Meng Li, Lu Mingkai, Song Shijie Editor: Wang Can 2025-11-17

From “Waiting for Alarms on Thursdays” to “Ready to Deploy at Any Time”

—An Experience of a Brigade of the 71st Group Army Rectifying False Combat Readiness in Accordance with Political Rectification Requirements

■ Meng Li, Lu Mingkai, PLA Daily Special Correspondent Song Shijie

After the order for combat readiness mobilization was issued, the officers and men of the brigade quickly loaded supplies. (Photo by Wang Weibao)

“By order of higher command, your unit is ordered to complete the transition to combat readiness level before 7:00 AM!” One morning, the telephone rang in the duty room of a battalion of a brigade of the 71st Group Army. The officers and men responded immediately, quickly donned their uniforms, and rushed to their respective battle stations.

This was a routine training exercise, but one detail made it different from the past—the date was moved forward by one day. Sergeant Wang Xiaofei told reporters, “The days of ‘waiting for alarms on Thursdays’ are over.”

According to relevant regulations, grassroots units are required to organize combat readiness mobilizations. To maintain a consistent work rhythm and facilitate inspection and supervision, the brigade headquarters typically organized combat readiness mobilizations on Thursdays before this year. This allowed soldiers to become familiar with the routine, and many units even began preparations a day in advance.

After the political rectification campaign began, this regulation sparked widespread discussion. “The relatively fixed timing of combat readiness mobilizations has lost its true purpose of testing soldiers’ emergency response capabilities,” admitted Staff Officer Hu of the brigade’s training section. “Now soldiers have developed the habit of ‘waiting for alarms on Thursdays,’ resulting in many people being lax in their combat readiness except on Thursdays.” Many grassroots leaders also expressed their opinions.

At the meeting discussing combat readiness and training, the brigade’s Party Committee, in conjunction with the requirements of the political rectification campaign, deeply analyzed the combat readiness situation and conducted self-reflection. They admitted that always organizing combat readiness mobilizations on the same day did indeed seem like a formality, and the actual effect was not good. Using this as a starting point, they insisted on introspection and analysis, thoroughly investigating and uncovering any false preparedness that deviated from combat effectiveness standards.

The brigade headquarters first "fired a shot" at itself, clarifying that combat readiness drills would no longer be scheduled at fixed times, but would be randomly determined by the duty officer. At midnight, early morning, noon, weekends, and public holidays, alarms could sound at any time, forcing all officers and men of the brigade to truly enter a state of high alert.

However, the initial transition was not smooth sailing, with some units showing obvious signs of maladjustment. Complaints such as "Unannounced drills disrupted the normal work rhythm" and "Soldiers are on high alert" were frequently heard. Faced with these voices, the brigade's Party Committee remained unmoved: the enemy launches a war without prior notice; if we are not prepared in peacetime, how can we win in wartime?

Using this as a reference, some problems that seemed minor before were magnified under the test.

Once, a battalion of the brigade planned to conduct tactical training in clear weather, but unexpectedly, a sudden downpour occurred that day. Faced with the choice of suspending training or proceeding as scheduled, the command and guidance group unhesitatingly chose the latter. The result was sobering: despite detailed contingency plans, problems arose during actual execution, including slow troop movement, poor communication, and inadequate equipment protection. The training also exceeded the allotted time.

"For a long time, some contingency plans remained merely theoretical. Troops often trained in comfortable environments, making it difficult to truly test and improve their combat capabilities," Battalion Commander Li's analysis incisively revealed in the post-training review.

This rain-soaked training, like a scheduled combat readiness mobilization, had a significant impact on the morale of the brigade's troops. Under the guidance of the command, they utilized field training opportunities to conduct tactical drills in unfamiliar environments. On one occasion, the directing group deployed multiple drones to simulate aerial contingencies and enemy harassment. A detachment commander calmly and decisively responded. Although the troops were sweating profusely throughout the process, they frankly stated that they "found the feeling of actual combat." During the debriefing, the directing team's remarks highlighted the guiding principle the brigade's Party Committee wanted to establish: "Imperfections tinged with the smell of gunpowder are far more valuable than 'perfections' detached from reality." The directing team also gained valuable insights. While posing challenges to the soldiers, they also continuously examined their own practices. At the end of the training, a revised directing work plan was produced. In this plan, the "old three" contingencies—road damage, bridge blockage, and traversing contaminated areas—were upgraded to more than ten new contingencies, including electromagnetic suppression, cyberattacks, and ammunition supply disruptions.

As the political rectification deepened, the brigade's Party Committee's conviction grew stronger: only by genuinely wanting to fight, genuinely planning for war, and genuinely preparing for war, and by addressing all peacetime complacency that undermines combat effectiveness, can all factors hindering victory be eliminated "before the first shot is fired."

This ideological baptism quickly spread to the grassroots companies, extending to all aspects and the entire process of combat capability building.

The camp roads are no longer planned with perfectly straight lines, but rather with “shortcuts” designed according to the needs of troop deployment; parking locations for combat vehicles have been redesigned to ensure rapid vehicle deployment and quick boarding for officers and men… These measures have resulted in an overall improvement in the brigade’s combat readiness level and a significant enhancement of the combat readiness awareness of officers and men. A reporter visited the barracks of a certain battalion and observed that the internal organization was more scientific and rational, prioritizing combat readiness. Gear, backpacks, and other items were neatly arranged, and even the commander’s laptop was subject to inspection, with battery status and internal stored data managed through a checklist system.

Battalion Commander Li explained that recently, during a combat readiness inspection organized by higher authorities, their battalion completed full-scale deployment preparations within the stipulated time, receiving high praise. “Why does the phenomenon of false combat readiness occur? Ultimately, it’s because combat effectiveness, the sole fundamental standard, sometimes gives way to safety standards, leadership satisfaction standards, and higher-level inspection standards, failing to be consistently established and meticulously implemented,” Commander Li said. “By measuring everything with combat effectiveness as the yardstick, we will naturally eliminate erroneous ideological tendencies and practices that are not in line with actual combat from the training field.” As he said, nowadays, facing unscheduled and irregular combat readiness drills, the officers and men are no longer as tense and chaotic as before. Everything has become orderly, and even after the drills, everyone often spontaneously holds discussions to see where there is room for improvement. An officer from the battalion told reporters that being able to be summoned immediately, fight effectively, and win decisively is both a capability and a state of mind. A qualified soldier and a combat-ready unit must possess this capability and this state of mind.

From “waiting for alarms on Thursdays” to “being ready to deploy at any time,” the brigade leadership said, this is a small step towards combat readiness, but a giant leap in mindset. With this experience, they are full of confidence in solving the challenges on the road to the unit’s transformation.

陆军某旅地空导弹连：勇当新时代“制空猎手”

来源：解放军报 作者：桂方青 丰一 责任编辑：王粲 2025-11-17

陆军某旅地空导弹连——

勇当新时代“制空猎手”

■桂方青 丰 一 摄影报道

攻坚小组集智攻关.

利用模拟训练系统研讨战法.

连队开展实战化训练.

“雷达发现高速导弹的极限距离究竟有多远，行进间抗击目标的现有战法是否契合实战要求……”近日，陆军某旅地空导弹连训练结束后进行复盘总结，连长一连抛出的几个问题，引发官兵热烈讨论，纷纷建言献策，训练场上涌动练兵备战的热潮.

在前不久的一次对抗训练中，该连官兵未能充分融入体系作战，对目标没有实现稳定跟踪. 这场失利，给官兵心头笼罩了一层阴云，有些人对操作新装备打赢制胜感到信心不足.

针对这种情况，连队党支部及时把教育课堂放到荣誉室，带领官兵一起重温连队光荣历史：1951 年 2 月，该连奉命入朝作战. 在抗美援朝战场上，连队共参战 288 次，击落、击伤敌机 49 架. 1953 年 8 月，中国人民志愿军总部和朝鲜人民军总部联合授予该连队“制空猎手”荣誉称号.

“过去，革命先辈用落后的武器屡建奇功，靠的是坚定信念、顽强作风和过硬本领. 现在，我们利剑在手，只要传承好连队敢打前锋、不畏强敌的光荣传统，就一定能战胜困难，取得胜利！”走出荣誉室，官兵热血沸腾、信心倍增. 随后，连队成立攻坚小组，骨干带头进行课题攻关. 官兵刻苦训练，熟练掌握装备性能和操作流程，战斗力水平得到快速提升.

如今，在先辈精神感召下，该连官兵人人争当新时代“制空猎手”，努力锤炼过硬的打仗能力. 一项项技术瓶颈被突破、一套套战术打法得到验证，新装备加速融入作战体系.

Army Air Missile Company: Striving to be “Air Hunters” in the New Era

Source: PLA Daily Author: Gui Fangqing, Feng Yi Editor: Wang Can 2025-11-17

Army Air Missile Company—Striving to be “Air Hunters” in the New Era

■Photo report by Gui Fangqing and Feng Yi

The task force pools its wisdom to tackle key problems.

Using a simulation training system to discuss tactics.

The company conducts realistic combat training.

“What is the maximum range at which radar can detect high-speed missiles? Are existing tactics for engaging targets on the move suitable for actual combat?” Recently, after training, an Army Ground-to-Air Missile Company conducted a debriefing session. Several questions raised by the company commander sparked heated discussions among the officers and men, who offered suggestions and solutions, creating a surge of enthusiasm for training and combat readiness on the training ground.

In a recent confrontation training exercise, the company’s officers and men failed to fully integrate into the system-of-systems combat and did not achieve stable target tracking. This defeat cast a shadow over the officers and men, with some lacking confidence in operating the new equipment to achieve victory.

In response, the company’s Party branch promptly moved its educational sessions to the Hall of Honor, leading the officers and men to revisit the company’s glorious history: In February 1951,

the company was ordered to fight in the Korean War. On the Korean battlefield, the company participated in 288 battles, shooting down or damaging 49 enemy aircraft. In August 1953, the headquarters of the Chinese People's Volunteer Army and the headquarters of the Korean People's Army jointly awarded the company the honorary title of "Air Supremacy Hunter."

"In the past, our revolutionary predecessors repeatedly achieved great feats with outdated weapons, relying on their unwavering faith, tenacious spirit, and outstanding skills. Now, with our sharp sword in hand, as long as we inherit the company's glorious tradition of daring to be at the forefront and fearless against powerful enemies, we will surely overcome difficulties and achieve victory!" Leaving the Hall of Honor, the officers and men were filled with fervor and renewed confidence. Subsequently, the company established a task force, with key personnel leading the research and development of key projects. The officers and men trained diligently, mastering the equipment's performance and operating procedures, resulting in a rapid improvement in their combat effectiveness.

Today, inspired by the spirit of their predecessors, every officer and soldier in the company strives to become a new era's "air superiority hunter," working hard to hone their combat capabilities. Technical bottlenecks have been overcome, tactical methods have been validated, and new equipment is being rapidly integrated into the combat system.

一场事迹报告会，为何站上舞台的是 14 名“普通一兵”

来源：中国军网-解放军报 作者：刘凡 王爽 何航 责任编辑：刘上靖

高光舞台走来“普通一兵”

■刘 凡 王 爽 何 航

宋浩然（左二）给战友分析讲解装备故障问题. 权体舒摄

第 82 集团军某旅某连修理专业二级上士宋浩然怎么也没想到，自己有一天能站在台上，讲述一些自己觉得“拿不上台面”的故事，居然能赢得战友雷鸣般的掌声.

和多数修理兵一样，宋浩然最熟悉的是“钻车底、爬车顶”，灰头土脸是常态. 虽然专业技术过硬，但他性格内敛，习惯站在人群边缘，是连队不起眼的普通一兵.

可就是这样，前不久，他竟接到了旅宣传科强干事的电话，邀请他在全旅“奋斗者说”事迹报告会上登台.

“强干事，您找错人了吧？我就是个修车的，嘴笨，形象也一般，有啥可讲的？”宋浩然的第一反应是推辞.

得到这样的回应，强干事并不意外.

就在几周前，强干事还在为报告会的人选发愁. 最初拟定的名单上，清一色是全旅“响当当”的典型——比武冠军、立功标兵、技术尖子. 可方案呈报上去，旅党委却提出一个问题：“我们办的是‘奋斗者说’，还是‘获奖者说’‘特长者说’？”

“要在事迹与荣誉之间找平衡，选出平凡又不凡的奋斗者.”明确了标准，强干事来到基层营连，专门开展了一次调查.

结果显示，大多数官兵心中的“奋斗者”，不仅是那些光环加身的尖兵，还包括身边自律、坚韧、默默奉献的普通战友. 很快，鲜活的素材就写满了几页纸.

“就选那些长期坚守一线、却从未被聚光灯照到的普通一兵！”强干事把目光投向了重大任务中始终默默奉献的身影.

思路一变天地宽. 在今年抗洪抢险任务中屡次发挥重要作用的“装备医生”宋浩然，就这样进入名单.

可说服宋浩然，比找到他还难.

“我一年到头都在修车，真不知道有什么可讲的……”宋浩然的犹豫，代表了许多官兵的心态：习惯了默默付出，总觉得自己的事不值一提.

强干事没有放弃. 他和指导员一起，帮宋浩然一点点回顾抗洪抢险期间的经历：抢修车辆燃油管路、高温下拆装机械水箱、巡修装备几十台、提前排查多处隐患……一桩桩、一件件数下来，连宋浩然自己都惊讶：那十几天，自己每天的工作量是平时的两三倍.

“可是，这些不都是我们修理兵该做的吗？”宋浩然还是觉得这些事太过平常.

“正因为这是日常，才更值得讲述.”强干事说，“你代表的不是一个人，而是所有像你一样默默奉献的普通一兵.”

最终，这些看似平凡的日常，被宋浩然带上了讲台.

“站在这个台上，我很紧张. ”宋浩然的开场白朴实无华，“我只是一名普通的修理兵，讲不出什么大事迹，只能说说我们修理兵的日常工作. ”

他讲述抗洪抢险期间，修理分队如何保障每一台装备正常运转；讲述烈日下拆装机械水箱时，汗水如何模糊了视线；讲述深夜抢修后，望着满天星斗时的欣慰.

“默默坚守，不仅是我的状态，也是很多一线战友的常态. ”当宋浩然说出这句话时，台下的二级上士张英健不自觉地挺直了腰背. 作为同样奋战在一线的工兵，他对宋浩然说的感同身受.

“以前总觉得，要有突出成绩才算奋斗. 今天我更加明白，认真完成好每一次检修，保障好每一台装备，这样的平凡坚守，本身就是一种奋斗！”宋浩然的声音微颤. 没有华丽辞藻，没有演讲技巧，他却赢得了雷鸣般的掌声. 许多和他一样常年“隐身”幕后的官兵，听得眼眶发热.

报告会后，一场讨论在全旅上下自发展开. 官兵们你一言我一语：有人说奋斗的意义在于成长过程，太看重结果反而功利；有人认为荣誉是对奋斗最好的肯定；还有人说，功勋虽然不是全部，却是最直接的认可……讨论越来越深入，大家逐渐形成一个共识：只要认真做事，平凡坚守就是不凡，就是在奋斗. 这场大讨论让旅党委更加明确：强军事业需要每一个战位的坚守，每一名普通一兵的付出都值得被看见.

随着讨论深入，各营连积极行动起来. 某营组织“我身边的奋斗者”故事会，让官兵讲述身边人的平凡故事；某连开展岗位建功实践活动，引导官兵在平凡岗位上创造不凡；某科设立“微光汇炬”展板，展示各个岗位上的默默奉献者……

宋浩然在营连“火”了. 有战友专门找他合影时说：“你说的那些，我们都经历过. ”有战友看到他热情地打招呼：“你就是那个讲出我们心声的宋班长！”

和他一同登台的其他 13 名官兵，也成了大家心目中的“星”. 他们中有勇于攻坚克难的机关科长，有带兵多年始终如一的基层班长，还有把搜救犬视为亲人的训导员……他们都不是传统意义上的“军营明星”，却用实实在在的付出，赢得了战友们发自内心的尊敬.

深夜，办公室的灯还亮着. 强干事正在整理材料，14 名“普通一兵”的讲稿已被他汇编成册摆在桌角. 总结这次报告会的心得，他深有感触：“这些身边榜样的故事之所以能引起强烈共鸣，正是因为他们的经历贴近官兵实际. 作为教育者，既要善用重大典型树立标杆，也要用好身边榜样示范引领——点亮每一束奋斗的微光，就是最好的奋斗. ”

采访手记

让每一份付出都被看见

■刘 凡

一场事迹报告会，为何能在基层官兵中引发热烈反响？当我走进班排宿舍、训练场边，听见战士们自发的讨论，看见他们眼中闪烁的“认同”，更加深刻领悟——真正能打动人心的，往往是那些真实可感、贴近生活的故事.

在这次活动中走上讲台的 14 名官兵，他们的可贵之处正是在于“普通”. 宋浩然在台上讲述他如何抢修车辆、排查故障，台下许多战士听得专注——因为这样的工作状态，他们再熟悉不过. 这种“他讲的，就是我们正在做的”的亲近感，让教育自然而然地深入人心. 这让我们更加确信：奋斗的价值，不单单可以用奖牌和成绩来衡量，那些在平凡岗位上的执着坚守、对职责使命的忠诚履行，同样是强军实践中不可或缺的宝贵品质.

在这个信息纷繁复杂的时代，我们把那些自认“没什么惊天动地事迹”的普通官兵请上讲台，并非否定重大典型的示范作用，而是对典型宣传体系的有益补充. 当前，很多单位都在进行诸如此类的教育模式探索，这些探索启示我们，教育需要多层次、立体化——既要有引领方向的时代楷模，也要有可学可做的身边榜样.

当我们既仰望星空，也关注脚下，关于“奋斗”“价值”“荣誉”的思考，就能找到更丰富的内涵. 让每一份付出都被看见，让每一种坚守都受到尊重，这本身就是政治工作应有的温度与深度.

Why Were 14 “Ordinary Soldiers” Chosen to Stand on the Stage at a Report Meeting on Their Deeds?

Source: China Military Network - PLA Daily Author: Liu Fan, Wang Shuang, He Hang Editor: Liu Shangjing

2025-11-17 “Ordinary Soldiers” Step onto the Spotlight

■ Liu Fan, Wang Shuang, He Hang

Song Haoran (second from left) explains equipment malfunctions to his comrades. Photo by Quan Tishu

Song Haoran, a sergeant second class specializing in repair at a company of a brigade of the 82nd Group Army, never imagined that one day he would stand on the stage, telling stories he considered “unworthy of being presented,” and actually win thunderous applause from his comrades.

Like most repair soldiers, Song Haoran is most familiar with “crawling under vehicles and climbing on top of vehicles,” and being covered in dust is the norm. Although his professional

skills are excellent, he is introverted and prefers to stand on the sidelines, an inconspicuous ordinary soldier in the company.

Even so, not long ago, he received a call from Officer Qiang of the brigade's Propaganda Office, inviting him to speak at the brigade-wide "Striver's Storytelling" event.

"Officer Qiang, you've got the wrong person! I'm just a mechanic, not very talkative, and not particularly good-looking. What do I have to say?" Song Haoran's first reaction was to decline.

Officer Qiang wasn't surprised by this response.

Just a few weeks earlier, Officer Qiang was still struggling to find the right people for the event. The initial list consisted entirely of the brigade's most prominent figures—competition champions, meritorious service models, and technical experts. But when the proposal was submitted, the brigade's Party Committee raised a question: "Are we holding a 'Striver's Storytelling' event, or a 'Winner's Storytelling' or 'Specialty Storytelling' event?"

"We need to find a balance between deeds and honors, selecting ordinary yet extraordinary strivers." Having clarified the criteria, Officer Qiang went to the grassroots battalions and companies to conduct a special investigation.

The results showed that the "strivers" in the hearts of most officers and men were not only those elite soldiers with accolades, but also ordinary comrades who were self-disciplined, resilient, and quietly dedicated. Soon, vivid examples filled several pages.

"Let's select those ordinary soldiers who have long been on the front lines but have never been in the spotlight!" The officer focused on those who consistently dedicated themselves silently in major missions.

A change of perspective opened up new possibilities. Song Haoran, the "equipment doctor" who played a crucial role in this year's flood relief efforts, was thus included on the list.

But persuading Song Haoran was harder than finding him.

"I spend all year repairing vehicles, I really don't know what to talk about..." Song Haoran's hesitation represented the mindset of many officers and men: accustomed to silent dedication, they always felt their work was insignificant.

The officer did not give up. Together with his instructor, he helped Song Haoran recount his experiences during the flood relief efforts: repairing vehicle fuel lines, disassembling and assembling mechanical water tanks under high temperatures, inspecting and repairing dozens of pieces of equipment, and proactively identifying potential hazards… Recounting each and every task, even Song Haoran himself was surprised: during those ten days, his daily workload was two to three times his usual amount.

“But isn’t this just what we repair soldiers are supposed to do?” Song Haoran still felt these things were too ordinary.

“Precisely because it’s everyday, it’s all the more worthwhile to tell,” the officer said. “You represent not just one person, but all the ordinary soldiers like you who silently dedicate themselves.” Ultimately, Song Haoran brought these seemingly mundane daily experiences to the stage.

“Standing on this stage, I’m very nervous,” Song Haoran began simply. “I’m just an ordinary repairman; I can’t recount any grand achievements, only the daily work of us repairmen.” He recounted how the repair team ensured the normal operation of every piece of equipment during flood relief efforts; how sweat blurred his vision while disassembling and assembling mechanical water tanks under the scorching sun; and the satisfaction he felt gazing at the starry sky after a late-night repair.

“Silent perseverance is not only my state, but also the norm for many frontline comrades,” said Zhang Yingjian, a second-class sergeant in the audience, who unconsciously straightened his back when Song Haoran said this. As an engineer also fighting on the front lines, he deeply empathized with Song Haoran’s words.

“I used to think that only outstanding achievements counted as hard work. Today, I understand even more clearly that diligently completing every maintenance, ensuring the smooth operation of every piece of equipment—this kind of ordinary perseverance—is itself a form of hard work!” Song Haoran’s voice trembled slightly. Without flowery words or elaborate speaking techniques, he won thunderous applause. Many officers and men, like him, who had long worked behind the scenes, were moved to tears upon hearing the report.

After the report, a discussion spontaneously unfolded throughout the entire brigade. Soldiers and officers shared their thoughts: some said the meaning of struggle lies in the process of growth, and focusing too much on results is utilitarian; some believed that honor is the best affirmation of struggle; others said that while merit is not everything, it is the most direct recognition… The discussion deepened, and everyone gradually reached a consensus: as long as one does things diligently, ordinary perseverance is extraordinary, and that is struggle. This extensive discussion made the brigade’s Party Committee even clearer: the cause of building a strong military requires the perseverance of every position, and the contributions of every ordinary soldier deserve to be seen.

As the discussion deepened, battalions and companies actively took action. One battalion organized a “Striving Individuals Around Me” story-telling session, allowing officers and men to share the ordinary stories of those around them; one company launched a practical activity for building merit in one’s post, guiding officers and men to create extraordinary achievements in ordinary positions; one department set up a “Gathering of Small Lights” display board, showcasing those who silently dedicate themselves in various positions… Song Haoran became a sensation in

his battalion and company. When a comrade specifically asked to take a photo with him, he said, "We've all experienced what you're talking about." Another comrade greeted him warmly, "You're the Squad Leader Song who spoke our minds!"

The other 13 officers and men who took the stage with him also became "stars" in everyone's eyes. Among them were a section chief who bravely tackled difficult challenges, a grassroots squad leader who had remained steadfast in leading troops for many years, and a handler who treated search and rescue dogs like family… They weren't "military stars" in the traditional sense, but they earned the heartfelt respect of their comrades through their genuine dedication.

Late at night, the office light was still on. Officer Qiang was organizing materials; the speeches of 14 "ordinary soldiers" had been compiled into a booklet and placed on the corner of his desk. Summarizing his experience from the report meeting, he remarked with deep feeling: "The reason these stories of role models resonate so strongly is precisely because their experiences are so close to the realities of officers and men. As educators, we must not only make good use of prominent role models to set benchmarks, but also leverage the exemplary guidance of those around us—lighting up every glimmer of struggle is the best form of struggle." Interview Notes: Making Every Effort Seen

■ Liu Fan

Why did a report meeting on exemplary deeds generate such a strong response among grassroots officers and men? When I walked into the barracks and training grounds, hearing the soldiers' spontaneous discussions and seeing the "identification" shining in their eyes, I understood more deeply—what truly touches people's hearts are often those real, relatable stories that are close to their lives.

The 14 officers and men who took to the stage in this event were valuable precisely because of their "ordinariness." Song Haoran recounted how he repaired vehicles and troubleshooted malfunctions, and many soldiers listened attentively—because this kind of work was all too familiar to them. This sense of intimacy, that "what he's talking about is what we're doing," allowed the education to naturally penetrate deep into their hearts. This reinforces our belief that the value of hard work cannot be measured solely by medals and achievements. The unwavering dedication and loyal fulfillment of duties in ordinary positions are equally invaluable qualities indispensable for building a strong military.

In this era of information overload, inviting ordinary soldiers who believe they have "no earth-shattering achievements" to the stage is not to deny the exemplary role of major role models, but rather to provide a valuable supplement to the system of promoting exemplary figures. Currently, many units are exploring similar educational models, which remind us that education needs to be multi-layered and comprehensive—it needs both guiding role models of the times and relatable, achievable examples from our own communities.

When we look to the stars while also keeping our eyes on the ground, our reflections on “struggle,” “value,” and “honor” will find richer meaning. Ensuring that every effort is seen and every act of perseverance is respected is the inherent warmth and depth of political work.

The Army Special Operations Academy Will Host the 2nd International Forum on Special Operations.

Source: Ministry of National Defense Website

Editor: Wang Can

2025-11-18

From November 19-24, the Army Special Operations Academy of the Chinese People’s Liberation Army will host the 2nd International Forum on Special Operations in Guangzhou. Experts in special operations from Cambodia, Egypt, Belarus, and other countries have been invited to attend. Representatives from relevant PLA academies, research institutions, and special operations forces, as well as some foreign military students studying at the Army Special Operations Academy, will participate.

The forum, themed “Technology Empowering, Elite Forces Winning with Intelligence—Unmanned Intelligent Special Operations for the Future,” will focus on discussions and exchanges regarding the development trends, winning mechanisms, and talent cultivation of unmanned intelligent special operations. It aims to build a high-level international exchange platform in the field of special operations, promoting mutual learning and cooperation among participants.

想破解动中抓教难题，来看看“移动课堂”教育模式

来源：中国军网-解放军报 作者：谭公禄 丁凯强 钱晓虎 责任编辑：刘上靖

2025-11-18

陆军某旅统筹资源破解动中抓教难题——

“移动课堂”走活教育一盘棋

■谭公禄 丁凯强 解放军报记者 钱晓虎

深秋时节，陆军某旅野外驻训场上，一场以“砥砺战斗精神、争当训练尖兵”为主题的教育课在某炮兵连驻训点开讲. 炮长潘余结合岗位实践，向战友们分享了所在班组与侦察分队密切协作取得考核“开门红”的经历，赢得阵阵喝彩. 记者注意到，坐在台下听课的，除了炮兵连官兵，还有一起驻训的侦察分队部分官兵.

该旅领导介绍，近年来，随着演训任务不断增多，所属各分队经常处于动态分散、混合编组的状态，教育时间难集中、教育进度难同步、教育效果难保证等问题日渐凸显.

为破解动散条件下的抓教难题，该旅党委在充分调研论证基础上，根据任务分队编组情况，集中统筹旅队教育资源，探索推行“移动课堂”教育模式. 该旅宣传科干事王桐拿出一份教育统筹协调表介绍，针对部分基层单位施教力量较为薄弱的实际，他们统筹协调共同执行任务或者任务地域附近的单位，与这些基层单位结成教育互助组.

“共同备课让我们有机会在面对面交流中，向兄弟单位学习开展教育的经验做法，帮助我们破解动中抓教难题. ”某连指导员告诉记者，今年驻训以来，得益于兄弟单位将管用教育方法倾囊相授，连队教育骨干的施教水平大幅提升，多名骨干已经能独立备课.

前不久，该旅某营和通信分队接到上级指令，共同执行实弹射击任务. 由于平时共同执行任务的机会不多，两个单位的官兵彼此之间较为陌生. 任务开始前，两个单位根据任务实际，集中各自优势教育资源，携手打造了一堂以“团结协作打硬仗”为主题的教育课. 课上，两个单位的教育骨干登台讲述红色故事，用先辈事迹激励官兵团结一心打硬仗. 课后讨论环节，官兵踊跃发言、畅谈体会，在交流互动中加深了彼此了解，增强了团结奋斗的信心决心. 任务开始后，两个单位官兵密切协同，出色完成实弹射击任务.

“‘动中抓教’必须跳出传统思维，积极向资源整合要效益. ”该旅领导告诉记者，为了更好发挥优质教育资源的作用，他们在全旅范围内遴选优秀政治教员组成巡讲团，结合任务进度精心打造多堂“战地思政课”. 采访期间，记者在该旅多个驻训点看到，巡讲团灵活利用训练间隙等时间，在战车旁、阵地上、帐篷内，见缝插针开展“战车故事会”“车厢小讨论”“帐篷微讲堂”等特色教育活动，让“移动课堂”延伸到驻训一线.

统筹资源下好教育一盘棋. “推行‘移动课堂’教育模式以来，我们有效破解了部分基层点位教育力量薄弱等难题. ”该旅领导高兴地说，不仅如此，他们集中全旅优质资源打造的精品教育课，获得官兵普遍好评，有效激发大家投身练兵备战热情动力. 今年驻训以来，该旅官兵始终以昂扬精神状态奋勇拼搏，探索创新多项战法训法.

To Solve the Challenge of Mobile Education, Look at the “Mobile Classroom” Model

Source: China Military Network - PLA Daily Author: Tan Gonglu, Ding Kaiqiang, Qian Xiaohu

Editor: Liu Shangjing

2025-11-18

An Army Brigade Coordinates Resources to Solve the Challenge of Mobile Education—”Mobile Classroom” Makes Education More Dynamic

■ Tan Gonglu, Ding Kaiqiang, PLA Daily Reporter Qian Xiaohu

In late autumn, at a field training ground of an Army brigade, an educational lesson themed "Sharpening Combat Spirit and Striving to Become Training Vanguards" was held at the training site of an artillery company. Artillery Commander Pan Yu shared his experience of achieving a "good start" in the assessment through close cooperation between his squad and the reconnaissance unit, drawing on his practical experience, which won rounds of applause. The reporter noticed that in addition to the artillery company soldiers, some soldiers from the reconnaissance unit who were also training with the brigade were also in the audience.

The brigade leadership explained that in recent years, with the increasing number of training missions, its various units have frequently been in a state of dynamic dispersion and mixed formation, making it increasingly difficult to concentrate educational time, synchronize educational progress, and guarantee educational effectiveness.

To address the challenges of effective education under dispersed conditions, the brigade's Party Committee, based on thorough research and demonstration, and according to the formation of mission units, centrally coordinated the brigade's educational resources and explored and implemented a "mobile classroom" education model. Wang Tong, an officer from the brigade's propaganda office, presented an educational coordination table, explaining that, given the relatively weak teaching capabilities of some grassroots units, they coordinated with units jointly carrying out missions or located near the mission area to form educational mutual assistance groups with these grassroots units.

"Joint lesson preparation allows us to learn from the experiences and practices of other units in conducting education through face-to-face exchanges, helping us solve the challenges of effective education on the move," a company political instructor told reporters. Since the start of this year's training exercises, thanks to the sharing of effective educational methods by other units, the teaching level of the company's key educational personnel has significantly improved, with many now able to prepare lessons independently.

Recently, a battalion and a communications unit of the brigade received orders from higher authorities to jointly conduct live-fire exercises. Because opportunities for joint missions are infrequent, the officers and men of the two units were relatively unfamiliar with each other. Before the mission began, the two units, based on the actual mission requirements, pooled their respective educational resources and jointly created an educational lesson themed "Unity and Cooperation to Fight Tough Battles." During the lesson, educational leaders from both units shared revolutionary stories, using the deeds of their predecessors to inspire the officers and men to unite and fight the tough battle. In the post-lesson discussion, officers and men actively participated, sharing their experiences and deepening their mutual understanding through interaction, strengthening their confidence and determination to fight together. After the mission began, the officers and men of the two units worked closely together and successfully completed the live-fire exercise.

“Education in motion must break out of traditional thinking and actively seek efficiency through resource integration,” the brigade leadership told reporters. To better utilize high-quality educational resources, they selected outstanding political instructors from across the brigade to form a lecture tour team, carefully crafting multiple “battlefield ideological and political education lessons” tailored to the mission’s progress. During the interview, reporters observed at several training sites of the brigade that the lecture team flexibly utilized training breaks to conduct unique educational activities such as “Tank Storytelling Sessions,” “Vehicle Discussions,” and “Tent Mini-Lectures”—conducted beside tanks, on the battlefield, and inside tents—extending the “mobile classroom” to the front lines of training.

Coordinating resources to ensure a unified educational approach. “Since implementing the ‘mobile classroom’ education model, we have effectively addressed the problem of insufficient educational resources at some grassroots sites,” a brigade leader happily stated. Furthermore, the high-quality educational courses they created by pooling the brigade’s best resources have received widespread praise from officers and men, effectively stimulating their enthusiasm and motivation to engage in training and combat readiness. Since the start of this year’s training, the brigade’s officers and men have consistently strived with high morale, exploring and innovating numerous combat and training methods.

陆军某旅探索建立“点餐式”培训机制助力新排长成长

来源：中国军网-解放军报 作者：王梦圆 毛英椿 责任编辑：林诗清 发布：2025-11-19

陆军某旅探索建立“点餐式”培训机制——

助力新排长走好“官之初”

■王梦圆 毛英椿

初冬的闽南，细雨纷飞. 陆军某旅训练场上，一场连战术考核正在紧张进行.

抵近“敌”前沿阵地，多个战术小组迅速展开行动. 向前推进中，“敌”依托坚固火力点和防御工事顽强抗击，担任主攻的某连二排“伤亡”不小. 关键时刻，在该连见习锻炼的新排长张轩鸣主动带领纵深穿插组，迂回突破多道防线，直插“敌”指挥所，一举扭转战局.

面对近似实战的考验，刚毕业的新排长凭什么带队打出漂亮仗？该连所在营郑营长告诉笔者：“这要得益于今年旅里建立的新排长‘点餐式’培训机制. ”

以往，新排长分配到旅队后，往往会被集中到荣誉连队见习锻炼. 如此安排，效果明显，但也有不足之处.

去年，一次建制连比武考核，让某荣誉连队张指导员印象深刻. 当时，经过多课目激烈比拼后，部分见习新排长由于体能素质不过硬，在 5 公里武装越野中拖了连队后腿. 受此挫折，一些原本自信满满的新排长情绪低落.

与此同时，新排长所在的荣誉连队也有苦衷：连队自身工作本就千头万绪，还要连续几个月承担新排长培训任务，有时很难平衡兼顾.

“新排长能力素质、专业岗位各不相同，如果片面追求高起点，不考虑自身情况，就会影响他们的成长. ”为破解现实矛盾困难，该旅经过广泛调研，决定改进以往做法，探索建立“点餐式”培训机制：新排长先以普通一兵身份到荣誉连队感悟传统、培塑作风后，再根据自身需求选择 1 个特色连队，完成后续见习锻炼.

如何让初到基层一线的新排长合理作出选择？该旅机关梳理汇总各连队专业、装备、任务等信息，通过实地参观、现场答疑等方式，进行集中宣介. 在此基础上，鼓励新排长结合自身经历、能力短板和任职规划自主填写“志愿”.

新排长张轩鸣在军校期间喜欢研究步兵战术，听说某装步连即将在连战术检验中接受全面考核，他毫不犹豫选择到这个连队进行第二阶段的加钢淬火.

一次战术训练，该连贺连长安排他以排长身份担任战斗小队指挥员. 张轩鸣本以为自己轻车熟路，可一进入角色却状况频出：“敌情”分析不准、人员编组失当、战场控制混乱……眼看整支战斗小队被判“阵亡”，张轩鸣痛定思痛，立誓苦练，一雪前耻.

在连队支持下，张轩鸣加入驾驶、射击、通信 3 大专业技师所在的“三互小组”，全面学习装备性能. 同时，连队干部还安排他参与训练课题攻关，研究战术战法，练习指挥协同，展开仿真推演. 随着一项项军事技能空白被填补，张轩鸣也加速从“学员”向“指挥员”转变.

与张轩鸣的专业对口培训不同，侦察专业毕业的新排长王坤没有选择侦察连，而是来到装甲步兵连见习锻炼. 他认为，只有深入了解主战连队的运作模式，所学专业才能更好地发挥作用，自己也能更科学地规划今后的发展.

见习锻炼期间，王坤一边快速融入连队、学习装甲步兵专业，一边细心记录连队骨干对信息情报获取应用的经验感悟. 一段时间后，他跟随该连优秀车长张赛，以一名备用车长身份参加营连战术考核，不仅摸清了情报信息的战场流转链路，还提升了装备操作水平.

多样化的选择提供了多元化的成长路径. 装甲专业新排长崔梓轩到综合演练排名第一的坦克连见习锻炼，瞄着成为“专业能手”的目标固强补弱；通信专业新排长刘天昊走进支援保障连，系统学习破障、侦察等专业知识，强化合成思维……

“推行‘点餐式’培训机制后，新排长见习锻炼不再是以前那种‘大呼隆’，变得更有针对性了，质效显著提升. ”该旅“管理教育模范连”蔡指导员介绍，他们为所有见习锻炼的新排长细化了“成长清单”，帮助他们结合岗位实际、个人特长和志向快速成长.

“新排长见习锻炼虽然时间只有几个月，但对他们走好‘官之初’至关重要. ”该旅人力资源科李科长说，“这也是一个筛选和提高的过程，为新排长定岗提供参考. ”

An Army Brigade Explores “On-Demand” Training Mechanism to Assist New Platoon Leaders’ Growth

Source: China Military Network - PLA Daily

An Army Brigade Explores “On-Demand” Training Mechanism—Helping New Platoon Leaders Successfully Navigate Their Early Career

■ Wang Mengyuan, Mao Yingchun

In early winter, a light rain fell in southern Fujian. On the training ground of an Army brigade, a company-level tactical assessment was underway.

Approaching the “enemy’s” forward positions, multiple tactical groups quickly deployed. During the advance, the “enemy,” relying on strong firing points and fortifications, fiercely resisted, and the second platoon of a certain company, responsible for the main attack, suffered considerable “casualties.” At a critical moment, Zhang Xuanming, a newly graduated platoon leader undergoing training in the company, took the initiative to lead a deep penetration group, flanking and breaking through multiple lines of defense, directly attacking the “enemy” command post, and turning the tide of the battle.

Faced with a near-real combat test, how did the newly graduated platoon leader lead his team to such a resounding victory? Battalion Commander Zheng, whose company is located, told the reporter, “This is thanks to the ‘on-demand’ training mechanism for new platoon leaders established by the brigade this year.” Previously, new platoon leaders, after being assigned to the brigade, were often concentrated in honorary companies for probationary training. This arrangement was effective, but it also had shortcomings.

Last year, a skills competition among established companies left a deep impression on Political Instructor Zhang of an honorary company. After intense competition in multiple events, some of the probationary platoon leaders, due to insufficient physical fitness, dragged down the company’s

performance in the 5-kilometer armed cross-country run. This setback dampened the spirits of some previously confident new platoon leaders.

Meanwhile, the honorary companies where the new platoon leaders were stationed also faced their own challenges: the company's own work was already multifaceted, and they also had to undertake the training of new platoon leaders for several consecutive months, sometimes making it difficult to balance everything.

"New platoon leaders have varying abilities and professional backgrounds. If we unilaterally pursue high starting points without considering their own circumstances, it will hinder their growth." To address this practical contradiction, the brigade, after extensive research, decided to improve its previous practices and explore a "menu-style" training mechanism: new platoon leaders first experience tradition and cultivate a work style in honorary companies as ordinary soldiers, and then choose a specialized company based on their needs to complete subsequent apprenticeship training.

How to help new platoon leaders make reasonable choices upon arriving at the grassroots level? The brigade headquarters compiled information on the specialties, equipment, and missions of each company and conducted centralized promotion through site visits and on-site Q&A sessions. Based on this, new platoon leaders were encouraged to independently fill out their "preference" forms based on their own experience, skill gaps, and career plans.

New platoon leader Zhang Xuanming, who enjoyed studying infantry tactics during his military academy years, heard that a certain mechanized infantry company was about to undergo a comprehensive assessment in its company-wide tactical evaluation. He unhesitatingly chose to go to that company for the second phase of intensive training.

During a tactical training exercise, Company Commander He assigned him to serve as a combat squad commander in his capacity as platoon leader. Zhang Xuanming initially thought he was in the zone, but once he got into character, he encountered numerous problems: inaccurate "enemy situation" analysis, improper personnel organization, and chaotic battlefield control… Seeing his entire combat squad declared "dead," Zhang Xuanming, deeply saddened, vowed to train hard and redeem himself.

With the company's support, Zhang Xuanming joined a "three-way mutual assistance group" comprised of driving, shooting, and communications specialists, comprehensively learning equipment performance. Simultaneously, company officers arranged for him to participate in training project development, researching tactics and methods, practicing command coordination, and conducting simulation exercises. As the gaps in his military skills were filled, Zhang Xuanming accelerated his transformation from "trainee" to "commander."

Unlike Zhang Xuanming's specialized training, Wang Kun, a newly graduated platoon leader specializing in reconnaissance, did not choose a reconnaissance company but instead came to an armored infantry company for apprenticeship. He believed that only by deeply understanding the

operational model of a main combat company could his professional skills be better utilized, and he could more scientifically plan his future development.

During his probationary period, Wang Kun quickly integrated into the company, learned armored infantry specialties, and meticulously recorded the experiences and insights of the company's key personnel regarding information gathering and application. After a period of time, he followed Zhang Sai, an outstanding tank commander in the company, and participated in battalion and company tactical assessments as a reserve tank commander. This not only helped him understand the battlefield flow of intelligence information but also improved his equipment operation skills.

Diverse choices provided diverse growth paths. Cui Zixuan, a new platoon leader specializing in armored vehicles, underwent probationary training in the tank company that ranked first in comprehensive exercises, aiming to become a "professional expert" and strengthen his weaknesses. Liu Tianhao, a new platoon leader specializing in communications, joined the support and logistics company, systematically learning professional knowledge such as obstacle breaching and reconnaissance, strengthening his integrated thinking…

"After implementing the 'menu-style' training mechanism, the probationary training for new platoon leaders is no longer the previous 'broad-brush' approach but has become more targeted, significantly improving quality and efficiency," explained Instructor Cai of the brigade's "Model Management and Education Company." They created detailed "growth checklists" for all new platoon leaders undergoing probationary training, helping them to grow rapidly by combining their job responsibilities with their personal strengths and aspirations.

"Although the probationary period for new platoon leaders is only a few months, it is crucial for them to make a good start in their careers," said Section Chief Li of the brigade's human resources department. "It is also a process of screening and improvement, providing a reference for the placement of new platoon leaders."

军营观察丨机场跑道上的"追梦青春"

来源：中国军网-解放军报 作者：王渝杭 李俊杰 郭云峰 责任编辑：孙悦 发布：2025-11-19

我们都在加速奔跑

■王渝杭

2018 年，我从军校毕业分配至陆军航空兵学院某旅场站气象保障室工作. 那时住在机场旁边，经常能在凌晨听见打草机的轰鸣声.

我问室里的老班长："这是哪个单位？怎么这么早就开始工作了？"他向我介绍，起得最早、干得最累、晒得最黑的，肯定是场务四站连的人.

那时，我对场务四站连官兵的第一印象就是——工作辛苦. 他们夏天顶着烈日清理杂草，寒冬迎着寒风扫雪除冰，春秋对抗风沙驱鸟护空.

2022 年底，我来到场务四站连担任政治指导员，在荣誉墙前驻足凝视，一张照片深深吸引了我.

在学院第二届保障系统岗位练兵比武竞赛颁奖典礼上，6 名场务四站连战士高举金牌——他们取得 6 个课目 6 项第一的优异成绩. 我对连队有了第二印象——精武强能. 同年，连队被学院评为“后装保障先进单位”.

担任指导员 3 年来，经常有人打趣道：“怎么又变黑了？”我笑答：“晒不黑不算场务四站连的兵.”

一年四季，最忙碌的阶段恰逢驻地最热的季节，重点要对机场的杂草进行全面清理. 打草机经常因高温天气“罢工”，这时就需要出动大量人力. 长年累月下来，再好的防晒手段也无济于事.

我们守护的机场场区近乎圆形，每逢节假日，连队都会开展“数字跑”传统活动. 今年八一建军节，我们以 8.1 公里的环场跑致敬建军 98 周年.

那天，我问身旁的战友王金征：“每次跑环场路时，你心里会想些什么？”

王金征望着长长的跑道，想了一会说：“我觉得自己就像一架战机，从这里起飞去看广阔的世界，又归巢徐徐降落，在这里茁壮成长，等待再次升空.”

“先到位、后收场、全程用”是我们场务四站连官兵的真实写照. 机场驱鸟、消防铸盾、灯光引航、场道筑基……我们在平凡的岗位上践行“万无一失”的承诺，在机场的跑道上不断开启逐梦新篇章.

今年初，我组织大家列出 2025 年度个人工作目标. 有人说，要学特种车驾驶，成为消防车司机；有人说，要学会操作 3 种以上工程车辆；还有人说，要更加精准掌握机场区域鸟类活动规律，提高驱鸟效果……

连队的每名官兵和文职人员都在自己的战位上不断突破创新、奋斗前行——

驱鸟员郭云峰、鲁明俊每月制作鸟情通报，告知各营近期鸟类活动情况和特点，为飞行安全织就“无形防护网”；灯光班班长高璞带领灯手冯天豪，用新购置的寻线仪绘制机场灯光线路图……

落日余晖下，我和大家尽情奔跑在环场路上，把目光洒在机场各个角落. 我坚信，在这机场跑道的延长线上，只要我们不断加速奔跑，就会书写更多的精彩篇章.

机场跑道上的“追梦青春”

■王渝杭

驾驶驱鸟车完成机场净空工作，整理好保障工具包，陆军航空兵学院某旅场务四站连养场班班长、中士朱浩铭伫立在停机坪上，望着眼前熟悉的机场跑道，几年的军旅时光在脑海中一一回放——为了保证顺利开飞，在狂风暴雪后抢扫出干净的跑道、在雨后初晴时驱赶成片的飞鸟、在烈日炎炎下修补凹凸的道面……

这条长长的机场跑道，不仅记录着他的成长轨迹，更承载着场务四站连官兵的青春与梦想.

陆军航空兵学院某旅场务四站连灯光班战士在灯车内操作. 韩生国摄

踏上跑道，每个人都要找准自己的起飞方向

“你的军旅梦想是什么？”

每当新兵下连时，场务四站连都会组织他们撰写“强军心愿卡”. 曾几何时，土木工程专业毕业的战士高岩松面对这个问题也陷入迷茫.

高岩松原以为能在部队施展专长大展拳脚，可工作一段时间后他发现，每天两点一线的清扫跑道、驱赶飞鸟、修补道面的工作与自己的专业并不对口. 渐渐地，原本热情活泼的高岩松变得沉默寡言，工作中的小差错不断.

高岩松的异常，引起班长朱浩铭注意. 一天飞行保障结束后，朱浩铭带着高岩松走在机场跑道上.

“你观察过战机的起飞方向吗？飞行训练中，无论地面风向如何变化，战机总是逆风起飞. 其实我们也一样，踏上跑道，每个人都有自己的起飞方向. ”班长的一番话，如同一束光照进高岩松的内心.

梦想和现实之间总会存在差距，但无论环境怎么变化，追梦之路就在脚下.

找准了方向，在此后的工作中，高岩松充分发挥特长，开设“软件绘图培训班”，指导感兴趣的战友用软件绘结构、添细节、加标注，并主动承担起机场平面示意图的绘制任务，成了小有名气的“军营制图员”.

之后的飞行保障中，高岩松制作的机场平面示意图成了值班员爱不释手的“法宝”，在好几次突发状况中发挥作用，得到飞行指挥组一致好评. 面对领导和战友的肯定，高岩松慢慢感受到了成就感和被认可感.

“踏上跑道，每个人都要找准自己的起飞方向. ”今年初，连队组织官兵填写年度个人工作目标. 高岩松写道：“我要争取留队，继续在这个岗位上发光发热，实现自我价值. ”

00 后充冷员冷大洋上大学时的两名舍友是退伍兵，时常和他讲述自己的部队生活，那种火热的军营场景深深吸引着他. 于是，大学毕业后，冷大洋果断选择参军入伍.

冷大洋憧憬着与钢枪相伴的军旅生活，却被分配到场务四站连每天与跑道、气瓶朝夕相对. 一开始，冷大洋的心里有不小落差. 随着日复一日地工作，他愈发感受到自己工作岗位的重要性.

一次灌充冷气作业时，制冷充冷车旁突然传来一声巨响，一股气流急速从散热片中喷涌而出. 来不及多想，冷大洋迅速和战友投入故障排查与抢修. 虽然双手在寒风中不停打颤，但他们始终没有停下手中的工具，直到将故障彻底排除，保障航空装备维护工作如期进行.

站在机场跑道旁，冷大洋望着一架架呼啸起飞的战机，他明白，自己的起飞方向找对了.

把汗水当作燃料，梦想的引擎才能发动

至今，消防班班长、中士王筱仍记得那段参加岗位练兵比武竞赛的经历.

“班长，我也想加入集训队！”那时，刚转入消防班不久的王筱，听说连队要选拔专业尖子参加上级组织的比武竞赛，便立即向时任班长张强强提出申请.

“没问题，但你要做好吃苦的准备，名额不多，期待你能通过自己的努力进入正式名单！”张强强的鼓励让王筱倍感振奋，他暗下决心一定要在参赛队伍中占有一席之地.

然而，踌躇满志的王筱在初次集训中就遭遇了“当头一棒”.

平日里只进行过两盘水带连接训练的王筱，面对竞赛要求的 3 盘水带连接课目感到措手不及.

“王筱，16 秒”“王筱，怎么水带还脱手了”……第一次参加集训，王筱频频被点名，训练成绩垫底. 那一刻，他羞愧难当.

“没事的，王筱，我们相信你一定可以！”战友们温暖的鼓励给了王筱直面困难的勇气. 班长也在一旁悉心指导他动作要领. 看着战友们期望的眼神，王筱眼中重燃坚定的光芒：“想要做好事情的第一步，就是不能畏首畏尾. 把汗水当作燃料，梦想的引擎才能发动！”

在近 40℃高温的集训场上，王筱穿着厚重的灭火防护服，反复练习水带连接课目. 从清晨到黄昏，汗水不断从脸颊滑落. 虎口不知被磨破多少次，但王筱始终坚持着.

功夫不负有心人. 在最后一次选拔考核中，王筱成功突围，获得了参加比武的资格.

“摘金夺银才是我的目标！”备赛期间，王筱更加刻苦训练，成绩继续提升，逐渐成长为队伍的“主心骨”.

比赛当天，作为最年轻的参赛选手，王筱顶住压力超常发挥，以优异成绩夺得 3 盘水带连接课目比武第二名.

“提升业务本领，不仅是为了在比武竞赛中脱颖而出，更是为守护跑道增添更多保障. ”王筱说.

前段时间，新场区刚落地建成，排水系统还不完善. 为了防止雨水淹没新修的登机道，下午飞行训练结束后，分队长宋元喜带着工程班的同志们，计划在东机库和停机坪之间的登机道两侧各挖出一条百米长的排水渠.

“接气象通报，今天夜间有短时强对流天气，请各单位加强防控. ”收到消息的宋元喜迅速作出部署安排：“老赵驾驶推土机挖出沟渠，嘉欢、俊杰负责修缮，飞鸿清理废弃土料，开工！”话音刚落，大家立即投入工作.

推土机轰鸣掘进，破开泥土与砂石，扬起滚滚沙尘. 战士们身上的迷彩服早已被汗水湿透，但没有人放慢进度. 随着作业推进，排水渠逐渐成形，渠底和渠壁在工程班的精心打造下变得平滑规整. 当他们完成任务准备离场时，黑云已布满机场上空.

翌日清晨，宋元喜和工程班的同志们来到机场，看着积水顺着排水渠流进下水道，内心充满了成就感.

只要不断奔跑，总能抵达这条“跑道”的终点

夕阳将机场镀上一层金边，落日余晖拉长了停机坪上忙碌的人影.

跑道上，文职人员王金征按照指令驾驶消防车前往停机坪，将大风扬起的沙尘洒水压服. 很快，在他的细致作业下，原本可能被旋翼搅动弥散的沙尘恢复平静.

“不愧是老兵，保障就是得力. ”面对官兵的称赞，王金征红着脸挠了挠头，内心涌动着难以言表的喜悦. 对他来说，这条跑道承载着太多与他相关的回忆.

2021 年初入军营，王金征被分到该连灯光班，成为一名灯手. 尽管夜航训练的保障任务繁重，每次训练都需要布设和回收数百盏助航灯，但他每当看到眼前闪烁的灯光点亮整片机场，指引战机平安起飞和返航，就感到“干劲十足”.

在组织的培养和战友的帮助下，王金征快速成长，入伍第二年就获评“四有”优秀士兵，并于次年顺利选晋下士.

去年 4 月，正当王金征在岗位上奋力奔跑时，一个令他担忧的消息传来：连队场务分队将进行编制调整，近一半的军士岗位转为文职专业技能岗位. 这意味着，包括他在内的部分战士将面临分流或退伍.

同年 9 月，王金征遗憾地退伍了. 退伍前，军队人才网上发布了旅队调整后文职岗位招录的公告，他第一时间报了名.

临走的那天，王金征又去机场看了看那条与自己朝夕相处的跑道，一个念头在他脑中越发清晰且坚定：“机场跑道的延长线，同样是一条追逐梦想的赛道. 我一定要再当一回‘新兵’！”

方向选定，奋力前进. 今年 4 月，王金征通过资格审查、理论考核、体检面试等重重关卡，终于回到了他日夜奋战的机场跑道上. 战友们簇拥着王金征，让他分享归队心得，脸上洋溢着重逢的喜悦，但这名身高近 1 米 9 的山东汉子眼中闪烁着泪花：“离开的时光不是终点，而是积蓄力量的新起点. ”此刻的机场跑道，在落日余晖中延伸成一条永无止境的奋进之路.

坚定梦想的王金征从未停下逐梦的脚步. 场务四站连的其他官兵也在自己的“跑道”上不断蜕变成长，用汗水与坚持浇灌梦想花开——

消防班战士焦鑫凯对电脑设计兴趣浓厚，在业余时间自学修图技术以及粉笔画. 起初，他的作品略显稚嫩，板报的排版也有些杂乱. 但经过钻研与学习，他不仅为连队设计了连徽，还创作出许多精美的板报.

中士卢嘉欢转入工程班后，通过不断训练，熟练掌握了工程机械的驾驶技能，成为连队当之无愧的工程机械操作行家.

灯光班下士冯天豪在日复一日地实践积累中，从一窍不通的“电路小白”成为业务精干的“维修专家”，还顺利考取了职业技能鉴定证书……

梦虽遥，追则能达；愿虽艰，持则可圆. 场务四站连的官兵知道，只要不断奔跑，总能抵达这条“跑道”的终点.

一片兵心

平整地面，通畅内心

■上等兵 李俊杰

刚被分到工程班时，我满心失落，总觉得车辆操作简单，与梦想中保障战机的岗位相差甚远，整个人像泄了气的皮球.

然而，一次飞行保障经历，让我对自己的岗位有了新的认识.

那是一个阴云密布的下午，机场有一片区域土地坑洼、土质疏松，战机经过时，沙尘总会在旋翼的高速搅动下肆意飞扬，遮挡战机的视线，非常危险. 战友们紧急洒水除尘，暂时缓解了危机. 但我深知，只有彻底整治地面，才能为飞行安全筑牢坚实屏障.

飞行结束后，在班长的带领下，我和战友们驾驶着装载机和压路机，对那片区域展开了为期两周的整治. 我们精心平整每一处坑洼，用力压实每一寸虚土，让地面更加紧实. 再次飞行时，沙尘问题迎刃而解，战机在平稳的跑道上顺利起降. 那一刻，我豁然开朗，原来平凡岗位也能成为守护安全的堡垒.

从那以后，我立志做一名工程尖兵，用压实的路面为飞行安全铺就一条坦途，在钢铁与使命的交响中，奏响青春之歌！

理解岗位，赋能使命

■下 士 郭云峰

从小，我喜欢看军旅电视剧，向往成为一名军人. 18 岁时，我终于如愿以偿，光荣入伍.

初到部队，我被分配到养场班，负责驱鸟工作. 当时，我对这个岗位并不重视，觉得“不就是开车驱鸟吗，有什么难的”. 但班长的一番话让我深受触动：这个岗位责任重大，是保障飞行安全的重要环节，关系着每一架战机的起降安全.

一次飞行训练前，我连续对场区进行了长时间的驱鸟作业，直到天空中不见鸟的身影才结束工作. 然而，当战机进入场区时，藏在草丛中的雉鸡突然飞起，险些影响飞行安全. 事后检查发现，场区内许多高耸的草丛中都有鸟蛋，这就是鸟藏匿其中的原因.

理解岗位，也赋能使命. 这次经历让我认识到，驱鸟工作不能只停留在飞行过程中的驱赶，更要注重事前预防. 自此，我开始潜心研究驱鸟设备，每月收集鸟类活动资料制作鸟情通报，帮助保障人员提前采取预防措施.

虽然现在的工作没有想象中的轰轰烈烈，但“守护飞行安全”已成为我坚定的信念. 我愿在平凡的岗位上默默奉献，为飞行安全筑起一道坚实屏障.

Military Camp Observation | “Dream-Chasing Youth” on the Airport Runway

Published: 2025-11-19

We are all running at full speed

■Wang Yuhang

In 2018, after graduating from military academy, I was assigned to work in the Meteorological Support Office of a brigade at the Army Aviation Academy. At that time, I lived next to the airport and could often hear the roar of lawnmowers in the early morning.

I asked the old sergeant in the office, “Which unit is this? Why are they starting work so early?” He told me that those who got up earliest, worked the hardest, and got the darkest tans were definitely from the Fourth Airfield Service Company.

At that time, my first impression of the soldiers of the Fourth Airfield Service Company was—their work was hard. In the summer, they cleared weeds under the scorching sun; in the cold winter, they swept snow and removed ice against the biting wind; in the spring and autumn, they fought against sandstorms and drove away birds to protect the airspace.

At the end of 2022, I came to the Fourth Airfield Service Company as a Political Instructor. Standing in front of the honor wall, a photograph deeply attracted me.

At the awards ceremony of the Second Support System Skills Competition of the Academy, six soldiers from the Fourth Airfield Service Station raised their gold medals—they had achieved first place in all six events. This gave me a second impression of the company—highly skilled and capable. That same year, the company was recognized by the Academy as an “Advanced Unit in Logistics Support.”

In the three years since I became the Political Instructor, people often jokingly ask, “Why are you so tanned again?” I laugh and reply, “If you don’t get tanned, you’re not a soldier of the Fourth Airfield Service Station.” The busiest time of year coincides with the hottest season at our base, focusing on a comprehensive clearing of weeds from the airport. The lawnmowers often break down due to the high temperatures, requiring a large manpower effort. Over the years, even the best sun protection methods are ineffective.

The airport area we guard is almost circular. During holidays, the company holds a traditional "digital run." This year, on Army Day, we paid tribute to the 98th anniversary of the founding of the People's Liberation Army with an 8.1-kilometer run around the airport.

That day, I asked my comrade Wang Jinzheng, "What do you think about every time you run the runway around the airport?" Wang Jinzheng gazed at the long runway, thought for a moment, and said, "I feel like a combat aircraft jet, taking off from here to see the vast world, then returning home to slowly land, growing stronger here, waiting to take off again."

"First to arrive, then to finish, and always ready for use" is a true reflection of the officers and men of our Fourth Airport Operations Company. From bird control at the airport, fire shield construction, lighting navigation, to runway foundation building… we fulfill our promise of "absolute safety" in our ordinary posts, constantly opening new chapters in our pursuit of dreams on the airport runway.

At the beginning of this year, I organized everyone to list their individual work goals for 2025. Some say they want to learn to drive special vehicles and become fire truck drivers; others say they want to learn to operate at least three types of engineering vehicles; still others say they want to have a more precise understanding of bird activity patterns in the airport area to improve bird control effectiveness… Every officer, soldier, and civilian staff member in the company is constantly breaking through, innovating, and striving forward in their respective positions—bird control officers Guo Yunfeng and Lu Mingjun produce monthly bird situation reports, informing each battalion of recent bird activity and characteristics, weaving an "invisible protective net" for flight safety; lighting squad leader Gao Pu leads lighting operator Feng Tianhao to draw airport lighting route maps using newly purchased line finders… Under the afterglow of the setting sun, I and everyone else run freely along the ring road, our eyes sweeping over every corner of the airport. I firmly believe that on this extended line of the airport runway, as long as we keep running faster, we will write more brilliant chapters.

"Chasing Dreams of Youth" on the Airport Runway

■ Wang Yuhang After completing the airport airspace clearance work with a bird-scare vehicle and tidying up his support toolkit, Sergeant Zhu Haoming, the squad leader of the maintenance platoon of the 4th Airfield Service Station Company of a brigade of the Army Aviation Academy, stood on the tarmac, gazing at the familiar airport runway. His years of military service flashed through his mind—clearing the runway after blizzards to ensure smooth takeoffs, driving away flocks of birds after rain, repairing uneven surfaces under the scorching sun…

This long airport runway not only records his growth trajectory but also carries the youth and dreams of the soldiers of the 4th Airfield Service Station Company.

Soldiers of the lighting platoon of the 4th Airfield Service Station Company of a brigade of the Army Aviation Academy operate a lighting vehicle. (Photo by Han Shengguo) Stepping onto the runway, everyone must find their takeoff direction.

“What is your military dream?”

Whenever new recruits are assigned to their units, the 4th Airfield Service Station Company organizes them to write “Strengthening the Army Wish Cards.” Once upon a time, Gao Yansong, a soldier who graduated with a degree in civil engineering, also felt lost when faced with this question.

Gao Yansong initially thought he could utilize his expertise in the military, but after working for a while, he found that the daily routine of cleaning the runway, shooing away birds, and repairing the pavement didn’t align with his major. Gradually, the once enthusiastic and lively Gao Yansong became taciturn, making frequent minor mistakes at work.

Gao Yansong’s unusual behavior caught the attention of his squad leader, Zhu Haoming. After a day of flight support, Zhu Haoming took Gao Yansong for a walk on the airport runway.

“Have you ever observed the takeoff direction of fighter jets? During flight training, regardless of changes in ground wind direction, fighter jets always take off against the wind. Actually, we’re the same; stepping onto the runway, everyone has their own takeoff direction.” The squad leader’s words were like a ray of light shining into Gao Yansong’s heart.

There will always be a gap between dreams and reality, but no matter how the environment changes, the path to pursuing dreams is right under your feet.

Having found his direction, Gao Yansong fully utilized his expertise in his subsequent work. He opened a “Software Drawing Training Class,” guiding interested comrades to use software to draw structures, add details, and add annotations. He also proactively took on the task of drawing airport plan diagrams, becoming a well-known “military draftsman.”

In subsequent flight support operations, the airport plan diagrams created by Gao Yansong became indispensable “tools” for the duty officers, proving crucial in several emergencies and earning unanimous praise from the flight command team. Faced with the affirmation of his superiors and comrades, Gao Yansong gradually felt a sense of accomplishment and recognition.

“Stepping onto the runway, everyone must find their own takeoff direction.” At the beginning of this year, the company organized officers and men to fill out their annual personal work goals. Gao Yansong wrote: “I want to strive to stay in the army, continue to shine in this position, and realize my self-worth.” Leng Dayang, a post-2000s military personnel, had two roommates who were veterans during his university years. They often told him about their military life, and the vibrant scenes of the barracks deeply attracted him. Therefore, after graduating from university, Leng Dayang decisively chose to join the army.

Leng Dayang longed for a military life alongside rifles, but was assigned to the Fourth Airfield Maintenance Company, spending his days facing runways and gas cylinders. Initially, Leng Dayang felt a significant sense of disappointment. However, as the days went by, he increasingly felt the importance of his job.

2014

Once, during a refilling operation, a loud bang suddenly came from beside the refrigeration truck, and a stream of air rapidly gushed out from the radiator. Without hesitation, Leng Dayang and his comrades quickly began troubleshooting and repairing the problem. Although their hands trembled in the cold wind, they never stopped using their tools until the fault was completely resolved, ensuring the timely maintenance of the aviation equipment.

Standing beside the airport runway, watching the fighter jets roar into the sky, Leng Dayang knew he had chosen the right path.

(Photo caption: Soldiers of the company's fire platoon conduct emergency response training. Photo by Guo Geng.) Using sweat as fuel, the engine of dreams can start.

To this day, Sergeant Wang Xiao, the fire platoon leader, still remembers his experience participating in the skills competition.

"Squad leader, I want to join the training team too!" Wang Xiao, who had recently transferred to the fire brigade, immediately applied to his then-squad leader, Zhang Qiangqiang, upon hearing that the company was selecting top performers to participate in a competition organized by higher authorities.

"No problem, but be prepared to work hard. There aren't many spots, and we hope you can make it onto the official list through your own efforts!" Zhang Qiangqiang's encouragement greatly inspired Wang Xiao, and he secretly resolved to secure a place in the competition team.

However, the ambitious Wang Xiao encountered a major setback during his first training session.

Having only practiced connecting two hoses in his daily training, Wang Xiao was caught off guard by the competition's requirement of connecting three hoses.

"Wang Xiao, 16 seconds!" "Wang Xiao, how come the hose slipped from your hands?"... During his first training session, Wang Xiao was frequently called on, and his training results were at the bottom. At that moment, he was filled with shame.

"It's okay, Wang Xiao, we believe in you!" The warm encouragement from his comrades gave Wang Xiao the courage to face the difficulties. His squad leader also patiently guided him through the techniques. Looking at the expectant eyes of his comrades, a determined light rekindled in Wang Xiao's eyes: "The first step to doing things well is not to be timid. Treat sweat as fuel, and the engine of your dreams will start!"

On the training ground in nearly 40°C heat, Wang Xiao, wearing heavy fire-fighting protective clothing, repeatedly practiced hose connection. From dawn till dusk, sweat streamed down his face. His hands were chafed and raw countless times, but Wang Xiao persevered.

Hard work pays off. In the final selection assessment, Wang Xiao successfully broke through and qualified for the competition.

“Winning gold and silver is my goal!” During the preparation period, Wang Xiao trained even harder, his performance continued to improve, and he gradually grew into the “backbone” of the team.

On the day of the competition, Wang Xiao, the youngest participant, withstood the pressure and performed exceptionally well, winning second place in the three-hose connection event.

“Improving our skills is not only about standing out in competitions, but also about providing more protection for the runway,” Wang Xiao said.

Recently, the new airfield had just been completed, and the drainage system was not yet perfect. To prevent rainwater from flooding the newly constructed boarding ramp, after flight training in the afternoon, squadron leader Song Yuanxi, along with his engineering team, planned to dig a 100-meter-long drainage ditch on each side of the boarding ramp between the east hangar and the apron.

“We received a weather report that there will be short-term severe convective weather tonight. Please strengthen prevention and control measures.” Upon receiving the message, Song Yuanxi quickly made arrangements: “Old Zhao, drive the bulldozer to dig the ditch. Jia Huan and Jun Jie will be responsible for repairs. Fei Hong, clear away the waste soil. Let’s get started!” As soon as he finished speaking, everyone immediately began working.

The bulldozer roared as it dug, breaking through the soil and gravel, raising billowing dust. The soldiers’ camouflage uniforms were already soaked with sweat, but no one slowed down. As the work progressed, the drainage ditch gradually took shape, its bottom and walls becoming smooth and regular thanks to the meticulous work of the engineering team. When they finished their task and prepared to leave, dark clouds filled the sky above the airport.

The next morning, Song Yuanxi and his comrades from the engineering team arrived at the airport. Watching the accumulated water flow into the sewers through the drainage ditch, they felt a great sense of accomplishment.

As long as they kept running, they would eventually reach the end of this “runway.” The setting sun gilded the airport, and the afterglow of the sunset lengthened the shadows of the busy people on the tarmac.

On the runway, civilian staff member Wang Jinzheng drove a fire truck to the tarmac as instructed, spraying water to suppress the sand and dust stirred up by the strong winds. Soon, thanks to his meticulous work, the sand and dust that might have been dispersed by the rotor blades returned to calm.

“Truly a veteran, your support is reliable.” Faced with the praise from the officers and men, Wang Jinzheng blushed and scratched his head, his heart overflowing with indescribable joy. For him, this runway holds countless memories.

Entering the army in early 2021, Wang Jinzheng was assigned to the company's lighting squad, becoming a lighting operator. Despite the heavy workload of supporting night flight training—requiring the deployment and retrieval of hundreds of navigation lights for each training session—he felt incredibly motivated whenever he saw the flashing lights illuminating the entire airfield, guiding fighter jets safely to take off and return.

With the organization's guidance and the help of his comrades, Wang Jinzheng quickly matured. In his second year of service, he was recognized as an outstanding soldier with "four qualities" (good character, strong work ethic, and excellent conduct), and the following year, he was successfully promoted to corporal.

Last April, just as Wang Jinzheng was diligently performing his duties, a worrying message arrived: the company's airfield operations unit would undergo organizational restructuring, with nearly half of the sergeant positions being converted to civilian professional and technical positions. This meant that some soldiers, including himself, would face reassignment or discharge.

In September of the same year, Wang Jinzheng regretfully discharged himself. Before his discharge, the military talent website published a recruitment notice for civilian positions following the brigade's restructuring, and he immediately applied.

On the day he left, Wang Jinzheng went to the airport one last time to look at the runway he had spent so much time on. A thought grew clearer and stronger in his mind: "The extension of the airport runway is also a track for pursuing dreams. I must be a 'rookie' again!" With his direction set, he forged ahead. This April, Wang Jinzheng passed numerous hurdles, including qualification review, theoretical examination, physical examination, and interview, and finally returned to the airport runway where he had fought day and night. His comrades surrounded him, asking him to share his feelings about returning to the team. Their faces were filled with the joy of reunion, but tears welled up in the eyes of this nearly 1.9-meter-tall Shandong man: "The time I spent away is not the end, but a new starting point for accumulating strength." At this moment, the airport runway, bathed in the afterglow of the setting sun, stretched into an endless road of striving.

Wang Jinzheng, steadfast in his dream, never stopped pursuing it. The other officers and men of the Fourth Airfield Service Company are also constantly transforming and growing on their own "tracks," watering their dreams with sweat and perseverance— Firefighter Jiao Xinkai has a strong interest in computer design and taught himself image editing and chalk drawing in his spare time. Initially, his work was somewhat immature, and the layout of his bulletin boards was a bit messy. But through study and practice, he not only designed the company emblem but also created many exquisite bulletin boards.

After transferring to the engineering platoon, Sergeant Lu Jiahuan, through continuous training, mastered the driving skills of engineering machinery, becoming the company's undisputed expert in engineering machinery operation.

Corporal Feng Tianhao of the lighting platoon, through day-to-day practice and accumulation, transformed from a complete "circuit novice" into a skilled "maintenance expert," and even successfully obtained a vocational skills assessment certificate… Dreams may be distant, but pursuit will lead to achievement; wishes may be difficult, but perseverance will make them come true. The officers and men of the Fourth Airfield Service Company know that as long as they keep running, they will eventually reach the finish line of this "track."

A Soldier's Heart: Smooth Ground, Clear Mind

■ Private First Class Li Junjie

When I was first assigned to the engineering squad, I was filled with disappointment. I felt that operating vehicles was simple, far removed from my dream of supporting fighter jets. I felt like a deflated balloon.

However, a flight support experience gave me a new understanding of my role.

It was a cloudy afternoon. An area of the airfield had potholes and loose soil. When fighter jets flew over, dust would be stirred up by the high-speed rotors, obstructing the aircraft's vision and posing a great danger. My comrades quickly sprayed water to suppress the dust, temporarily alleviating the crisis. But I knew that only by thoroughly improving the ground could we build a solid barrier for flight safety.

After the flight, under the squad leader's leadership, my comrades and I drove loaders and road rollers to carry out a two-week cleanup of that area. We meticulously leveled every pothole and forcefully compacted every inch of loose soil, making the ground more compact. On the second flight, the sandstorm problem was easily solved, and the fighter jet took off and landed smoothly on the stable runway. At that moment, I had a sudden realization: even an ordinary post can become a bulwark of safety.

From then on, I aspired to be a top-notch engineer, paving a smooth path for flight safety with compacted surfaces, and playing a song of youth in the symphony of steel and mission!

Understanding the Post, Empowering the Mission

■ Corporal Guo Yunfeng

From a young age, I loved watching military dramas and longed to become a soldier. At 18, I finally fulfilled my dream and honorably enlisted.

Upon arriving at the unit, I was assigned to the livestock farm squad, responsible for bird control. At the time, I didn't take this post seriously, thinking, "It's just driving around to scare away birds, what's so difficult about that?" But My squad leader's words deeply moved me: this position carries immense responsibility; it's a crucial link in ensuring flight safety, affecting the safe takeoff and landing of every fighter jet.

Before a flight training exercise, I conducted a long bird-scare operation across the airfield until no birds were visible in the sky. However, as the fighter jets entered the area, pheasants hidden in the grass suddenly took flight, nearly jeopardizing flight safety. Subsequent inspection revealed bird eggs hidden in many tall bushes, explaining the birds' hiding place.

Understanding the role empowers me with a sense of mission. This experience made me realize that bird control work cannot be limited to shooing birds away during flight; prevention is paramount. Since then, I've dedicated myself to studying bird-scare equipment, collecting bird activity data monthly to create bird activity reports, and helping support personnel take preventative measures in advance.

Although my current work isn't as glamorous as I imagined, "protecting flight safety" has become my unwavering belief. I am willing to quietly dedicate myself to this ordinary position, building a solid barrier for flight safety.

五年"磨"一课

——第八十二集团军某旅二级上士吴伟鹏参加优秀教练员比武的经历

■黄建建 解放军报特约通讯员 刘小云

战术训练中，吴伟鹏（左一）指挥战友出击. 郭琦楠摄

前段时间，第 82 集团军某旅组织优秀教练员比武，某连二级上士吴伟鹏围绕"步兵班攻击建筑物"战术展开授课，受到官兵一致好评.

授课中，他紧贴实战设置特情，利用手工兵棋进行分析推演，还借鉴国外无人机战例，讲授无人智能装备战术运用方法，让现场官兵对该课目训练有了新的理解和认识. 因战术指挥有力、教学方法新颖，吴伟鹏在比武中名列前茅，这堂课也被评为精品课.

走下比武场，战友纷纷点赞，吴伟鹏却并不满足：“授课表现还有很大提升空间.”

“比武各个环节的扣分项并不多，提升的空间又在哪里？”

“这堂课我都准备了 5 年之久，每讲一遍都觉得还有不足之处.”面对笔者的疑问，吴伟鹏道出缘由.

5 年前，还是一名中士的吴伟鹏看到身边战友因课讲得好，给连队争了光，不禁心生羡慕. 于是他也选择了一堂战术课，准备参加比武.

机会来了. 孰料，营里首轮筛选，他便因流程出错被判出局. “初战失利，就当是积累经验.” 吴伟鹏认为自己没有准备好，便把希望寄托在下一轮比武中.

次年参加比武，吴伟鹏在授课环节认真准备，精心设置“大场面”，反复练流程、抠跑位，却在旅里这一关被刷了下来.

“同样的内容，为什么别人能得高分？”吴伟鹏很不服气. 现场一名评委告诉他：“一堂课讲得好不好，不能只看场面，战术是否实用管用、指挥是否灵活高效才是重点.”

听到这里，吴伟鹏涨红了脸，开始反思自己的不足.

从那之后，他渐渐沉下心来，训练中主动向经验丰富的官兵请教，课余时间认真观看网络精品课，备课时不再将重心放在制造亮点，而是充分考虑实战背景，扎扎实实练好每个环节.

吴伟鹏的转变，战友们看在眼里. 一些经常被他请过来指导示范的骨干都认为，吴伟鹏对课目重点内容把控精准，战术动作规范，授课技能已十分成熟.

得到大家的肯定，吴伟鹏信心大增，准备再次登台证明自己. 可随后两年，由于上级抽考方式变化和连队其他班长报名参加等原因，吴伟鹏多次与比武机会失之交臂.

“既然不能参加，就在背后托举战友走得更远.”短暂失落后，吴伟鹏迅速调整状态，主动申请到比武场去当示范兵，顺便研究比武规则和战术战法变化，学习借鉴他人长处.

战友备课期间，吴伟鹏忙前忙后准备教案、器材，并毫无保留地传授自己的经验. “能帮助大家取得佳绩，也是给连队争光.”面对战友的感谢，吴伟鹏语气坚定.

通过全程跟进两届比武，吴伟鹏发现，随着部队战斗力建设深入推进，大家对一堂好课的评判标准发生了变化，制订战术是否符合战场实际、方法手段是否灵活多样、讲解是否通俗易懂等，成为能否获得高分的关键. 这让他深刻认识到，参加优秀教练员比武，是为了交流组训施教经验、探索管用实用战法，如果仅仅是为了获得荣誉，无异于本末倒置.

“我们教的战术，上了战场真的管用吗？我们传授的方法，能有效应对真实特情吗？”从比武场归来，一种前所未有的紧迫感涌上吴伟鹏心头. 他大量研究国外实战案例，将执行任务涉及的战术战法重新进行研究论证，不断优化组训施教方案.

利用手工兵棋推演战术动作和步骤的可行性；借鉴外军实战经验，组织无人机协同攻防训练……每次有了新思路，吴伟鹏都会带领大家反复研练.

今年比武的消息传来，吴伟鹏在战友的鼓励下再次报名参加. 但是这一次，他更渴望展示自己最新摸索的“步兵班攻击建筑物”协同战法，让大家批评指正.

就在比武前半个月，上级突然通知：每人上报 3 堂课，随机抽取一堂，授课时长不得超过 20 分钟. 这个消息在一众参赛选手中“炸了锅”，不少人表示“根本来不及准备”“时间太短，讲不出啥”. 吴伟鹏反而内心平静：“不用刻意准备，把平时所思所练讲出来即可，正好检验一下自己的水平. ”

比武当天，吴伟鹏表现出色，以其新颖的战术思路和精准的指挥调度，赢得“满堂彩”.

回到连队，他将多年来的训练心得和授课经验整理成册，与前来取经的战友分享.

不久后，连队组织战术考核，官兵们灵活运用吴伟鹏摸索的新战术，快速占领“敌”工事. 看到这个结果，5 年来备课的一幕幕在吴伟鹏脑海闪过. 他已然明白：“优秀教练员”的比拼不只在课堂，更在未来战场.

The Experience of Sergeant Wu Weipeng, a Second-Class Sergeant from an 82nd Group Army Brigade, in Participating in an Excellent Instructor Competition

Source: PLA Daily Author: Huang Jianjian, Liu Xiaoyun Editor: Lin Shiqing 2025-11-20 Five Years of “Refining” a Lesson

—The Experience of Sergeant Wu Weipeng, a Second-Class Sergeant from a Brigade of the 82nd Group Army, in Participating in an Excellent Instructor Competition

■ Huang Jianjian, Special Correspondent of PLA Daily, Liu Xiaoyun

During tactical training, Wu Weipeng (first from left) directs his comrades in an attack. Photo by Guo Qinan

Recently, a brigade of the 82nd Group Army organized an excellent instructor competition. Sergeant Wu Weipeng from a certain company gave a lecture on the tactics of “infantry platoon attacking buildings,” which was highly praised by the officers and men.

During the lecture, he closely followed actual combat scenarios, used manual war games for analysis and simulation, and also drew on foreign drone warfare examples to teach the tactical

application methods of unmanned intelligent equipment, giving the officers and men present a new understanding and awareness of this training subject. Due to his effective tactical command and innovative teaching methods, Wu Weipeng ranked among the top in the competition, and his lesson was also rated as an excellent lesson.

After leaving the competition field, his comrades praised him, but Wu Weipeng was not satisfied: "There is still a lot of room for improvement in my teaching performance."

"There weren't many points deducted in each stage of the competition, so where is the room for improvement?"

"I've been preparing for this lesson for five years, and every time I teach it, I feel there are still shortcomings." Wu Weipeng explained the reason to the reporter's question.

Five years ago, Wu Weipeng, then a sergeant, saw his comrades bringing honor to their company through their excellent teaching and couldn't help but feel envious. So he also chose to teach a tactical lesson and prepared to participate in the competition.

The opportunity came. Unexpectedly, in the first round of selection at the battalion level, he was disqualified due to a procedural error. "A first defeat is just gaining experience," Wu Weipeng said, believing he wasn't prepared enough, and pinned his hopes on the next round of the competition.

The following year, Wu Weipeng participated in the competition. He prepared diligently for the teaching segment, meticulously designing a "large-scale scenario," repeatedly practicing procedures and refining positioning, but was still eliminated at the brigade level.

"Why did others get high scores on the same content?" Wu Weipeng was indignant. One of the judges told him, "The quality of a lesson can't be judged solely by the scale of the demonstration; the key is whether the tactics are practical and effective, and whether the command is flexible and efficient."

Hearing this, Wu Weipeng blushed and began to reflect on his shortcomings.

From then on, he gradually calmed down, actively seeking advice from experienced soldiers during training, diligently watching online courses in his spare time, and no longer focusing on creating highlights when preparing lessons, but fully considering the actual combat context and solidly practicing each step.

Wu Weipeng's transformation was noticed by his comrades. Some of the key personnel he frequently invited to provide guidance and demonstrations believed that Wu Weipeng had a precise grasp of the key points of the subject matter, standardized tactical movements, and his teaching skills were already very mature.

With everyone's affirmation, Wu Weipeng's confidence soared, and he prepared to take the stage again to prove himself. In the following two years, due to changes in the superior's selection

process and the participation of other squad leaders in the company, Wu Weipeng repeatedly missed opportunities to participate in the competition.

“Since I can’t participate, I’ll support my comrades from behind so they can go further.” After a brief period of disappointment, Wu Weipeng quickly adjusted his mindset, volunteering to serve as a demonstration soldier at the competition, while also studying the competition rules and tactical changes, and learning from the strengths of others.

While his comrades were preparing their lessons, Wu Weipeng busied himself preparing lesson plans and equipment, and shared his experience without reservation. “Helping everyone achieve good results is also bringing honor to the company,” Wu Weipeng said firmly in response to his comrades’ gratitude.

Through following both competitions, Wu Weipeng discovered that as the unit’s combat effectiveness development deepened, the criteria for judging a good lesson had changed. Whether the tactics were appropriate for the battlefield, whether the methods were flexible and diverse, and whether the explanations were easy to understand became key factors in achieving high scores. This experience made him realize that participating in the outstanding instructor competition was for exchanging training and instruction experiences and exploring effective and practical tactics. To do so merely for the sake of winning honors would be putting the cart before the horse.

“Will the tactics we teach really work on the battlefield? Can the methods we impart effectively deal with real emergencies?” Returning from the competition, an unprecedented sense of urgency overwhelmed Wu Weipeng. He extensively studied foreign combat cases, re-examined and validated the tactics and methods involved in missions, and continuously optimized training and instruction plans.

He used manual wargaming to simulate the feasibility of tactical actions and steps; he drew on foreign military combat experience to organize drone-based coordinated attack and defense training… Every time he had a new idea, Wu Weipeng would lead everyone in repeated practice.

When news of this year’s competition came, Wu Weipeng, encouraged by his comrades, signed up again. But this time, he was even more eager to showcase his newly developed “infantry squad attacking building” coordinated tactic and receive feedback and suggestions.

Just two weeks before the competition, a sudden notice came from higher command: each participant had to submit three lessons, one of which would be randomly selected, with a maximum teaching time of 20 minutes. This news caused an uproar among the contestants, many saying they “didn’t have enough time to prepare” and “the time was too short to say anything meaningful.” Wu Weipeng, however, remained calm: “No need for deliberate preparation. Just talk about what I’ve thought and practiced. It’s a good opportunity to test my skills.” On the day of the competition, Wu Weipeng performed exceptionally well, winning thunderous applause with his innovative tactical thinking and precise command.

Back at his company, he compiled his years of training insights and teaching experience into a booklet, sharing it with his comrades who came to learn from him.

Soon after, the company organized a tactical assessment. The soldiers flexibly applied the new tactics Wu Weipeng had developed, quickly capturing “enemy” fortifications. Seeing this result, scenes from his five years of lesson preparation flashed through Wu Weipeng’s mind. He understood that the competition for “excellent instructors” wasn’t just in the classroom, but also on the future battlefield.

从实验室到演兵场，看科研成果如何变身战斗力

来源：中国军网-解放军报 作者：张龙华 朱柏妍 责任编辑：孙悦

2025-11-20

联勤保障部队工程大学某研究所立起科研为战鲜明导向

课题来自一线 成果服务部队

解放军报讯 张龙华、记者朱柏妍报道：前不久，某部组织的一场训练中，联勤保障部队工程大学某研究所研制的某保障平台样机发挥了重要作用. 在科研团队指导下，操作人员精准规范操纵样机，与该部官兵密切配合，圆满完成任务. 同时，科研团队采集大量数据，并广泛收集官兵评价反馈，为下一步改进样机提供有力支撑.

“我们立起科研为战鲜明导向，要求科研成果必须紧密对接一线部队需求，经得起实战检验. ”该所领导告诉记者，如今科研团队深入演训一线已成常态，形成课题来自一线、成果服务部队的良好局面.

近年来，该所党委始终将科研方向瞄准战场、服务打赢. 他们深入了解部队战斗力建设需求，以实战为导向统筹科研资源、拟制攻关计划、加强成果转化；持续开展成果样机进部队活动，组织科研人员跟研跟训，与部队官兵同吃同住，帮助基层解决装备使用中发现的问题.

“推动科研成果向战斗力转化，必须走出实验室、深入演兵场. ”该所科研处领导向记者介绍，许多课题立项之初，他们就组织科研人员深入一线调研，摸清部队现实需求，聚焦练兵备战实际问题确定攻关方向.

该所党委还定期召开科研工作形势分析会，瞄准部队战备训练难点堵点调整科研攻关计划；不定期与部队展开研商，探讨解决科研成果在实践应用中出现的问题；常态组织“强军大讲堂”，邀请知名专家教授辅导授课；组织学术日活动，通过专题研讨、成果展示等形式，持续浓厚创新攻关氛围.

“只有深入一线、了解部队，才能研发出真正好用管用的科研成果. ”前不久参与保障某重大活动的该所王工程师告诉记者，深入演训场跟研跟训，让他进一步坚定了科研为战的决心.

From Lab to Battlefield: How Scientific Research Achievements Transform into Combat Power

Source: China Military Network - PLA Daily Author: Zhang Longhua, Zhu Baiyan Editor: Sun Yue

2025-11-20

A Research Institute of the Joint Logistics Support Force Engineering University Establishes a Clear Orientation of Scientific Research for Combat

Projects Originate from the Front Lines, Results Serve the Troops

PLA Daily News (Zhang Longhua, reporter Zhu Baiyan): Recently, during a training exercise organized by a certain unit, a prototype support platform developed by a research institute of the Joint Logistics Support Force Engineering University played a crucial role. Under the guidance of the research team, operators precisely and systematically manipulated the prototype, closely cooperating with the unit’s officers and men to successfully complete the mission. Simultaneously, the research team collected a large amount of data and widely gathered feedback from officers and men, providing strong support for further improvements to the prototype.

“We have established a clear orientation of scientific research for combat, requiring that research results must closely align with the needs of frontline troops and withstand the test of actual combat,” the institute’s leader told reporters. Now, it has become commonplace for research teams to delve into frontline training exercises, creating a positive situation where projects originate from the front lines and results serve the troops.

In recent years, the institute’s Party Committee has consistently focused its research direction on the battlefield and serving the goal of victory. They gained a deep understanding of the military’s combat capability development needs, coordinating research resources, formulating research plans, and strengthening the transformation of research results with a combat-oriented approach. They continuously conducted activities to bring prototypes of research results into the troops, organizing researchers to participate in research and training alongside soldiers, living and working alongside them to help grassroots units solve problems encountered in equipment use.

“To promote the transformation of research results into combat effectiveness, we must step out of the laboratory and into the training grounds,” a leader from the institute’s research department told reporters. For many projects, from the very beginning, they organized researchers to conduct in-depth field research to understand the actual needs of the troops and determine the direction of research based on practical problems in training and combat readiness.

The institute's Party Committee also regularly holds research work situation analysis meetings, adjusting research plans to address the difficulties and bottlenecks in the troops' combat readiness training; it holds regular consultations with the troops to discuss solutions to problems arising in the practical application of research results; it regularly organizes the "Strengthening the Military Lecture Hall," inviting renowned experts and professors to give lectures; and it organizes academic days, continuously fostering an atmosphere of innovation and breakthroughs through thematic discussions and results presentations.

"Only by going deep into the front lines and understanding the troops can we develop truly useful and effective scientific research results." Engineer Wang from the institute, who recently participated in the support of a major event, told reporters that his in-depth participation in training and research at the training grounds further strengthened his determination to use scientific research for combat.

第 72 集团军：谋战研战当头雁 攻坚克难树标杆

来源：中国军网-解放军报 作者：刘华山 童祖静 责任编辑：孙悦

2025-11-20

第 72 集团军聚焦主责主业提高党委领战水平——

谋战研战当头雁 攻坚克难树标杆

■刘华山 解放军报特约记者 童祖静

日前，一场联合破障训练在某海域展开. 在清除岸滩一线障碍后，第 72 集团军多辆两栖战车从登陆舰坞舱内鱼贯而出、编队发起冲击，在登陆岸段成功撕开突破口，一举夺占岸滩阵地并建立稳固登陆场.

训练场上传捷报，得益于该集团军聚焦主责主业，不断提高党委领导备战打仗水平、持续攻关重难点作战课题. 官兵纷纷表示："党委机关在备战打仗中当先锋、打头阵，以实际行动带头攻坚、谋战研战，大家打赢信心越来越足、训练热情越来越高. "

该集团军党委一班人在深入学习贯彻中央军委政治工作会议精神中感到，随着部队武器装备迭代升级、使命任务持续拓展，他们迫切需要加强重难点作战课题攻坚. 作为集团军首长机关，他们必须带头把深化政治整训成效转化为备战攻坚的实际行动，在破解作战难题中立身为旗、走在前列，以实际行动徙木立信、取信官兵.

"攻克未来战场上的'娄山关''腊子口'，党委机关必须带头攻坚、先闯先试. "该集团军一名领导告诉记者，他们紧盯未来战场需求，紧紧扭住制约联合制胜的重难点问题，建立起"常委挂帅、机关协同、部队参与"课题攻关模式.

记者翻看今年以来该集团军党委常委行程表和机关人员分布图看到，从党委常委到机关干部，均对照“重难点课题攻关清单”，深入演训一线开展调研指导. 按照“常委牵头、多题共担”机制，每名集团军党委常委作为第一责任人，同时负责多个重难点课题；相关业务处室成立专项攻关组，明确负责人，制订项目攻关计划表，推动任务高效落实.

谋战研战当头雁，攻坚克难树标杆. 记者在采访中了解到，一名负责牵头研究某重难点课题的集团军党委常委，常年在演训一线现场办公. 从指挥方舱到战车驾驶舱，从舟艇甲板到战机座舱，他在集团军任职近 3 年，足迹遍布部队各驻训点位. 一名集团军部门领导为攻克复杂环境下多款新型装备运用难题，带领由机关处室骨干组成的专项攻关组，长期蹲在驻训一线和官兵一起攻坚，记录分析上千组数据，探索形成多套战法训法，大幅提升装备作战效能. 而他到集团军工作数年间，仅在营区公寓房累计居住不到半年……记者的采访本上，这样的事例还记了不少.

最难的课题由党委机关认领，最艰巨的任务由党委领导负责. 为打通联合作战信息链路“堵点”，该集团军信息保障处干部骨干连续数月铆在机房、驻训场，打通多个军兵种系统间的数据壁垒，初步构建起紧贴实战需求的战场智能模型和网云支撑平台；机关某处干部骨干聚焦侦察情报高效集成，展开多轮前沿试验，有效提升情报获取、处理与分发的速度和精度；装备管理处牵头攻关某型突击舟艇改造，显著提升部队突击能力……

党委机关率先垂范，是最有力的动员. 持续深化政治整训以来，该集团军持续掀起“向难题开刀、向创新要战斗力”热潮，官兵圆满完成多项重大训练任务，解决了一批制约战斗力建设的难题，部队联合火力精打、有无人探破障等能力大幅提升.

72nd Group Army: Leading the Way in Planning and Researching Warfare, Setting an Example in Overcoming Difficulties

Source: China Military Network - PLA Daily Author: Liu Huashan, Tong Zujing Editor: Sun Yue

2025-11-20

The 72nd Group Army Focuses on Primary Responsibilities and Improves the Party Committee’s Leadership in Combat—Leading the Way in Planning and Researching Warfare, Setting an Example in Overcoming Difficulties

■ Liu Huashan, Special Correspondent for PLA Daily, Tong Zujing

Recently, a joint obstacle-clearing training exercise was conducted in a certain sea area. After clearing obstacles along the beachhead, multiple amphibious assault vehicles from the 72nd Group Army emerged from the dock of the landing ship in succession, launching an assault in formation. They successfully breached the landing site, seizing the beachhead and establishing a stable landing zone.

This victory is attributed to the Group Army's focus on its primary responsibilities and continuously improving the Party Committee's leadership in combat readiness and combat, as well as its sustained efforts to tackle key and difficult combat challenges. Soldiers and officers expressed their confidence and enthusiasm for training, stating, "The Party Committee and its organs are taking the lead in preparing for war, spearheading efforts to overcome challenges and plan for combat. This has boosted our confidence and enthusiasm for training." The Party Committee leadership of the group army, in its in-depth study and implementation of the spirit of the Central Military Commission's Political Work Conference, felt that with the upgrading of weaponry and equipment and the continuous expansion of missions, they urgently needed to strengthen their efforts in tackling key and difficult combat issues. As the group army's command headquarters, they must take the lead in transforming the results of in-depth political training into concrete actions for combat readiness, setting an example and leading the way in solving combat problems, thus establishing credibility and gaining the trust of officers and men through concrete actions.

"To conquer the 'Loushan Pass' and 'Lazikou Pass' of the future battlefield, the Party Committee and its organs must take the lead and be the first to try new things," a leader of the group army told reporters. They are closely monitoring the needs of the future battlefield, focusing on the key and difficult issues that hinder joint victory, and have established a problem-solving model of "Standing Committee members in charge, organs coordinating, and troops participating." A review of the itinerary of the group army's Party Committee Standing Committee members and the distribution map of its staff this year revealed that from the Standing Committee members to the officers, all were conducting in-depth research and guidance at the front lines of training exercises, referring to the "List of Key and Difficult Tasks to be Tackled." Following the mechanism of "Standing Committee members taking the lead and sharing responsibility for multiple tasks," each member of the group army's Party Committee Standing Committee, as the primary responsible person, was simultaneously responsible for multiple key and difficult tasks; relevant departments established special task forces, designated leaders, and formulated project tackling plans to ensure the efficient implementation of tasks.

Taking the lead in planning and researching combat, setting an example in overcoming difficulties. During interviews, reporters learned that one member of the group army's Party Committee Standing Committee, responsible for leading research on a key and difficult task, worked on-site at the front lines of training exercises year-round. From command posts to vehicle driver's cabs, from boat decks to fighter jet cockpits, he has served in the group army for nearly three years, his footprints covering all the troops' training sites. To overcome the challenges of deploying various new types of equipment in complex environments, a leader of an army group department led a special task force composed of key personnel from various departments. They spent extended periods on the front lines of training, working alongside soldiers to tackle the challenges, recording and analyzing thousands of data points, and developing multiple sets of tactics and training methods, significantly improving the combat effectiveness of the equipment. In his several years

working for the army group, he had only lived in the barracks apartment for less than six months in total… The reporter's notebook is filled with similar examples.

The most difficult tasks were taken on by the Party Committee and its organs, and the most arduous missions were undertaken by the Party Committee leadership. To remove bottlenecks in joint operations information links, key personnel from the army group's Information Support Department spent months working in computer rooms and training grounds, breaking down data barriers between multiple service branches' systems, and initially constructing a battlefield intelligent model and cloud support platform closely aligned with actual combat needs; key personnel from a certain department focused on the efficient integration of reconnaissance intelligence, conducting multiple rounds of cutting-edge experiments, effectively improving the speed and accuracy of intelligence acquisition, processing, and distribution; the Equipment Management Department led the effort to upgrade a certain type of assault boat, significantly enhancing the troops' assault capabilities… The Party Committee and its organs taking the lead is the most powerful form of mobilization. Since the deepening of political rectification, the army group has continuously launched a campaign to "tackle difficult problems and seek combat effectiveness through innovation." The officers and men have successfully completed a number of major training tasks, solved a number of problems that restrict the development of combat effectiveness, and greatly improved the troops' joint firepower precision strike, unmanned and manned obstacle breaching and other capabilities.

视频制作：孙悦

在西藏，信仰是一种显象.

那些叩长头的朝圣者三步一匍匐，在砂土砾石间将身体扑展向大地，微尘刻在额间褶皱上，眸光却始终清澈如纳木错的湖水.

雪域高原，还有许多超越个体精神追求的信仰者，他们挺立于雪山，行走在巡逻线上，任凭稀薄的空气考验着生理极限，日复一日用脚步丈量国土的尊严.

"信仰"，这个上高原前曾反复揣摩，却始终无法描摹清楚的词汇，在离天空最近的地方，有了具象的答案.

△官兵们步履坚定踏上风雪巡逻路.

（一）

“跟我脚印走！”西藏军区某团巡逻分队正穿行在悬崖绝壁间，路宽不足 30 厘米，身侧就是万丈深渊，一级上士次罗布一边探路，一边叮嘱身后的战友. 突然，左脚踏空，半个身体眼看着向外侧倒去，他下意识用右手死死抠住岩缝，稳住重心后，脚下还不断有碎石滚落……

这惊心动魄的一幕，只是次罗布戍边的寻常时刻.

△次罗布（左一）与战友在巡逻途中.

陡坡、绝壁、密林……次罗布的 11 年军旅路，山重连着水复，寒风衔着冰雪. 面对艰难困苦，他始终步履不停，偶尔回头，总会穿过时光，看到西藏达孜那条解放军新修的通往希望小学的路上，小小的自己总是等着六一儿童节到来，每年那天，军绿色的身影会送来蓝色帆布书包、课本、六棱边铅笔……年复一年，解放军叔叔不仅送来了文具，更在次罗布心里种下了另一种可能：有一天，他也要成为他们那样的人.

多年后，次罗布的心愿终于与山风同频：2014 年，他推开了山城重庆那座军营的大门；2017 年，递交入藏申请书 3 个月后，他站上了高原哨位.

△次罗布（右一）与战友们互帮互助爬冰卧雪.

次罗布所在连队的巡逻线，是西藏军区边防部队最远最险的路线之一：“阿相比拉”在珞巴语里是“魔鬼都不愿去的地方”，危险路段有 200 多处；“都仁错康”巡逻一趟要 5 天 4 夜，海拔高差达 2300 多米.

前不久，西藏军区某团组织例行巡逻，他又一次主动请缨. “这里崖壁倾斜 70 多度，冬季冰锥易脱落；这里东侧 30 米有硬土层，可绕行避陷……”出发前，次罗布取出随身携带的笔记本，为新兵讲解防区险段特性. 这本泛黄卷边的笔记，页角沾满泥渍，字里行间写满“生死数据”，被战友誉为“巡逻宝典”.

“宝典”诞生于巡逻路上的点滴经验. 每遇险段，次罗布便蹲在雪地里记录地形、测量数据；宿营时别人休息了，他还在整理当天见闻，标注风险点和应对方法. 日积月累，防区危险路段的情况，被他摸得一清二楚，而次罗布也渐渐成了大家心目中问路不用看地图、遇险自有好办法的“边防通”.

△官兵们结合现地判定方位.

这些年每次巡逻，次罗布总是物资背得最多，脚步走得最稳. 背包里装着纱布、碘伏等医疗用品，巡逻路上的每次宿营，他的帐篷就是“临时诊所”；缺水时，他把水壶让给战友；腰部旧伤复发，他照样抢着背最重的物资. “有次罗布在，再险的路也敢走，再难的关也能过. ”战友们的话里，满是信任.

△官兵们进行战术训练.

在累计行程 5000 公里的巡逻路上，次罗布的笔记写了一本又一本. 在他“负重攀崖加 5 公斤”“平衡训练每天加 10 分钟”的字迹里，战友们练出“走‘老虎嘴’不抖腿，过‘沼泽地’不心慌”的硬功.

巡逻路上的每一次出征，都是对少年梦想的再次确认. 无惧风霜雨雪，胸膛里的热血始终为这片土地沸腾.

视频制作：孙悦

（二）

凌晨时分，一阵急促的哨音打破了营区的宁静，西藏军区某团某连官兵快速反应，迅速在夜幕下完成集结待命.

担任连值班员的次罗布用他那表层已经掉皮的秒表读秒计时，踩着最后一名人员到位的脚步按下暂停键. “又取得了 1 秒钟的提升，我们还能快些、再快些！”次罗布将秒表上的数字呈现在大家面前，连队夜间集结速度纪录再次被刷新.

他不只在夜间集结速度上揪着“ 1 秒钟”不放. 每次训练，次罗布都分秒必争. 因为他深深知道，快一秒，就会多一分胜算.

“厄尔布鲁士之环”国际军事比赛全程 116 公里，从海拔 2356 米延伸至 5642 米主峰，70 度倾角的百米冰壁覆盖着万年冰川，60 米垂直断崖下是深不可测的冰缝，30 米单绳吊渡横跨湍急冰融河……

2018年，第一次走上国际赛场的次罗布就拿出“拼命三郎”的劲头，在多个项目中拿下第一. 在抢救伤员课目中不慎崴脚，但他依旧咬牙坚持冲过终点. 比赛结束后，在战友的帮助下，松开全部鞋带，才将战靴从肿胀的脚上脱下.

比赛最后一项是 11 公里的强行军和登顶厄尔布鲁士主峰. 为了不影响比赛，次罗布打着封闭针上阵，他起步就冲锋，和药效赛跑. 最后的冲顶时刻到来了，雨雪交加中，能见度只有五六米，在零下 20 摄氏度的气温下，他和战友顶风迎难而上，成为唯一登顶的队伍.

此后的 2021 年和 2022 年，次罗布又连续两次征战国际赛场. 与 2018 年不同，他作为参赛队中年龄最大的队员，承担起更重的责任，既当参赛队员也当教练员，和战友在山地编组射击等多个课目上打破纪录，并在一些弱势项目上取得突破.

三征国际赛场，次罗布累计获得 10 个单项第一、10 个单项第二、5 个单项第三，1 个团体第二、1 个团体第三，11 次打破赛会纪录.

△次罗布（左一）与战友观察执勤.

从国际赛场载誉归来的次罗布，将自己的经验和技能毫无保留地传授给更多战友. 11 年军旅生涯里，次罗布 70 余次带领战友勇闯雪域“生命禁区”，20 次在比武场上摘金夺银，培养出 30 名训练尖子、20 名班长骨干，所带战士 1 人荣立二等功、10 人荣立三等功.

如今，在次罗布所在的连队，“比学赶帮超”氛围日益浓厚. 巡逻路上，官兵们像雄鹰一样警惕守卫；训练场上，大家以次罗布为榜样刻苦磨砺.

（三）

采访期间，我跟着连队战士们一起踏上了一段巡逻路，每向上一步，胸膛便如风箱般急促起伏，稀薄的空气化作肺腑间真切的重量.

“十一年如一日，值得吗？”我问得突兀.

次罗布答得平静：“能守住身后，当然值.”

身后是什么？是静谧的村庄，是万家灯火，是某个女孩香甜的梦.

次罗布随身带着一张妻子的照片.

这也许是次罗布能想到的，最笨拙又最隆重的仪式感. 因为他知道，自己胸前每一道光芒的背后，都是妻子默默支撑起了整个家庭生活的重量.

△次罗布与家人合影.

妻子眼中，次罗布是一个责任心很强、工作标准很高的人. 虽然丈夫和战士在一起的时间比陪伴家人的时间都长，但二人从相识相恋到结婚，最大的安全感和幸福感就源于他对人对事的忠贞坚守、无私付出.

次罗布每次受到表彰，都会第一时间把好消息告诉妻子. 一同分享的喜悦，让她虽然远隔山水，依然能真切地感知自己在他心中的分量.

次罗布把血脉亲情揉进连队的一草一木，一砖一瓦，一锹一镐. 巡逻路成了回家的巷陌，哨所灯火就是家园的炉火.

刚到高海拔地区驻训时，没水、没电、没路、没网，戍边的艰难渗透在生活的点滴. 每天夜里站岗执勤，穿两件羊皮大衣都难以抵御严寒. 周末给家里打电话，必须爬上山顶才能寻着信号，往返一趟接近 5 个小时.

为了更好地坚守，次罗布和战友们进行了一系列改建. 居住的帐篷，泥泞渗水、潮湿难干，他发动战士就地取材开展施工改进；驻地雨雪连天，换洗的衣物难干，他建议搭建阳光棚，很快便得到团机关的回应，一批批物资运抵山下，次罗布与战友们“蚂蚁搬家”似的，将木方、薄膜、塑料板扛上雪山，按照一个班一顶棚的标准建起阳光棚.

走进现在的连队，大山深处，整齐的板房连片矗立，篮球场、图书室、健身房等一应俱全，互联网、国家电网、供氧管道连通班排. 看着自己参与建设的营区，官兵们成就感满满：条件好了，我们戍边的热情更高、底气更足.

（四）

“信仰”一词，曾在我喉间踌躇了许久，害怕贸然把它说出来触不到边关的沉实，却惊扰了这片土地上最朴素的坚守.

△次罗布与战友们到达巡逻点位后展旗宣誓.

直到那次巡逻到点，战士们展开鲜艳的五星红旗，举起右拳庄严宣誓：“边关有我，请党放心.”没有观众，没有掌声，这 8 个字在这片远离喧嚣的国土尽头振聋发聩，我脱口问出：“信仰是什么？”

班长次罗布说，信仰就是把心交给一个地方.

战士杨明周说，信仰像呼吸一样，无需想起也不会忘记.

军嫂索朗卓嘎说，信仰就是他把军装穿在身上，我把军装穿在心里.

……

返程时，夕阳缓缓下沉. 金红色的余晖像熔化的铁水，泼洒在无垠山峦上，给每一个战士的剪影都镀上了一圈温暖光边.

高原的天气说变就变，刚转过一个山口，乌云就聚了上来. 一阵风卷起雨夹雪，扑面而来越下越大，次罗布和战友的钢枪上，正凝结着这个时代最晶莹的信仰——

它不是一个空洞的词汇，而是他们站立的方式，是让平凡人成为山川脊梁的力量，是让身后万家灯火永远明亮的护甲.

Beneath the Sky, Above the Land

—A Chronicle of Sergeant Tsering Lobsang’s Strong Border Defense Capabilities in a Regiment of the Tibet Military command

■ Reporter: Chen Zhuqing, China Military Network

Video Production: Sun Yue

In Tibet, faith is a manifestation.

Those pilgrims prostrating themselves every three steps, stretching their bodies to the earth amidst the sand and gravel, dust etched on their brows, yet their eyes remain as clear as the waters of Namtso Lake.

On the snowy plateau, there are many believers who transcend individual spiritual pursuits. They stand tall on the snow-capped mountains, walk along patrol lines, enduring the thin air that tests their physical limits, measuring the dignity of the land with their footsteps day after day.

"Faith," a word I had pondered repeatedly before going to the plateau, yet could never quite grasp, found a concrete answer in the place closest to the sky.

△ Soldiers and officers strode resolutely onto the snowy patrol route.

(I)

"Follow my footsteps!" A patrol detachment of a regiment of the Tibet Military command was traversing cliffs and precipices, the path less than 30 centimeters wide, with a sheer drop beside them. Sergeant Tsering Lobsang scouted the way while instructing his comrades behind him. Suddenly, his left foot slipped, and half his body lurched outwards. Instinctively, he gripped a crevice in the rock with his right hand, regaining his balance, while loose rocks continued to tumble down from beneath his feet…

This harrowing scene was just an ordinary moment in Tsering Lobsang's border duty.

△ Tsering Lobsang (first from left) and his comrades on patrol.

Steep slopes, sheer cliffs, dense forests… Tsering Lobsang's 11 years of military service have been a journey through mountains and rivers, with biting winds carrying ice and snow. Faced with hardship and adversity, he never stopped moving forward. Occasionally, looking back, he would see, through time, the newly built road by the People's Liberation Army (PLA) leading to a Hope Primary School in Dazi, Tibet. As a little boy, he would always eagerly await Children's Day. Every year on that day, the soldiers in their green uniforms would deliver blue canvas schoolbags, textbooks, and hexagonal pencils… Year after year, the PLA soldiers not only brought him stationery, but also planted a seed of another possibility in Tsering Lobsang's heart: one day, he too would become like them.

Years later, Tsering Lobsang's wish finally resonated with the mountain winds: in 2014, he pushed open the gates of the military camp in Chongqing; in 2017, three months after submitting his application to enter Tibet, he stood guard on the plateau.

△ Tsering Lobsang (first from right) and his comrades helping each other climb through ice and snow.

The patrol route of Tsering Lobsang's company is one of the longest and most dangerous routes for the border defense forces of the Tibet Military command: "Axiang Bilha" means "a place even devils wouldn't go" in the Lhoba language, with over 200 dangerous sections; a patrol of "Duren Cuokang" takes 5 days and 4 nights, with an altitude difference of over 2,300 meters.

Not long ago, a regiment of the Tibet Military command organized a routine patrol, and he once again volunteered. "The cliff here slopes at over 70 degrees, and icicles are prone to breaking off in winter; there's a layer of hard soil 30 meters to the east, which can be bypassed to avoid traps..." Before setting off, Tsering Lobsang took out his notebook and explained the characteristics of the dangerous sections of the defense zone to the new recruits. This yellowed, curled notebook, with mud-stained pages, is filled with "life-or-death data," and is hailed by his comrades as a "patrol bible."

This "bible" was born from the accumulated experience along the patrol route. Whenever they encountered a dangerous section, Cilubu would squat in the snow to record the terrain and measure data. While others rested at camp, he would still organize his observations, marking risk points and corresponding countermeasures. Over time, he became intimately familiar with the dangerous sections of the defense zone, and Cilubu gradually became known as the "border guard expert"—someone who didn't need a map to ask for directions and had a knack for handling emergencies.

△ Soldiers determining their location based on the terrain.

Over the years, on every patrol, Cilubu always carried the most supplies and walked the most steadily. His backpack contained gauze, iodine, and other medical supplies; his tent served as a makeshift clinic during each patrol en route. When water was scarce, he gave his water bottle to his comrades; even when his old back injury flared up, he still insisted on carrying the heaviest supplies. "With Cilubu around, we dare to walk on even the most dangerous roads, and we can overcome even the most difficult challenges," his comrades said, their words filled with trust.

△ Soldiers conducting tactical training.

Along the 5,000-kilometer patrol route, Tsering filled notebook after notebook. His handwriting, with notes like "Add 5 kilograms for cliff climbing" and "Add 10 minutes of balance training every day," showed how his comrades had honed their skills to the point where they could "walk on the 'tiger's mouth' without shaking their legs and cross the 'swamp' without panicking."

Every patrol expedition was a reaffirmation of their youthful dreams. Undeterred by wind, frost, rain, or snow, the blood in their hearts always boiled for this land.

Video Production: Sun Yue

(II) In the early hours of the morning, a sharp whistle broke the tranquility of the camp. Soldiers of a company in a regiment of the Tibet Military command reacted quickly, rapidly assembling and awaiting orders under the cover of night.

Tsering, serving as the company's duty officer, used his worn-out stopwatch to keep track of the time, pressing the pause button as the last person arrived. "Another second faster! We can be even faster!" Tsering displayed the numbers on his stopwatch, breaking the company's nighttime assembly speed record once again.

He didn't just obsess over every second in nighttime assembly speed. In every training session, Tsering was determined to make the most of every second. He knew that every second saved meant a greater chance of victory.

The "Elbrus Ring" international military competition covered 116 kilometers, stretching from an altitude of 2356 meters to the 5642-meter main peak. It featured 70-degree inclines, 100-meter ice walls covered by millennia-old glaciers, 60-meter vertical cliffs with unfathomable crevasses below, and a 30-meter single-rope crossing of a raging glacial meltwater river…

In 2018, Tsering, competing on the international stage for the first time, displayed incredible tenacity, winning first place in multiple events. He sprained his ankle during the wounded soldier rescue event, but gritted his teeth and persevered to the finish line. After the competition, with the help of his comrades, he loosened all his shoelaces to remove his combat boots from his swollen foot.

The final event of the competition was an 11-kilometer forced march and a summit attempt on the Elbrus main peak. To avoid affecting the competition, Tsering, despite receiving an injection, charged forward from the start, racing against the drug's effects. The final summit attempt arrived; amidst rain and snow, visibility was only five or six meters, and in temperatures of -20 degrees Celsius, he and his comrades braved the wind and difficulties, becoming the only team to reach the top.

In 2021 and 2022, Tsering competed again on the international stage. Unlike 2018, as the oldest member of the team, he shouldered a heavier responsibility, acting as both a competitor and a coach. He and his comrades broke records in several events, including mountain group shooting, and achieved breakthroughs in some previously weaker events.

In his three international competitions, Tsering accumulated 10 first-place finishes, 10 second-place finishes, 5 third-place finishes, 1 second-place team finish, 1 third-place team finish, and broke the competition record 11 times.

△ Tsering (first from left) and his comrades on observation duty.

Tsering, returning triumphant from international competitions, generously shared his experience and skills with his comrades. During his 11-year military career, Tsering led his comrades over 70 times into the snowy "forbidden zone of life," winning gold and silver medals 20 times in

competitions. He cultivated 30 top trainees and 20 squad leaders, with one soldier under his command receiving a second-class merit and ten receiving third-class merits.

Now, in Tsering's company, the atmosphere of "learning from, competing with, helping, and surpassing" is increasingly strong. On patrol, the soldiers are as vigilant as eagles; on the training ground, everyone strives to hone their skills, taking Tsering as a role model.

(III) During the interview, I joined the soldiers on a patrol. With each step, my chest heaved like a bellows, the thin air feeling like a real weight in my lungs.

"Eleven years, day after day, is it worth it?" I asked abruptly.

Tsering answered calmly, "Being able to protect what's behind me, of course it's worth it." What's behind him? It's a tranquil village, a myriad of lights shining from homes, a sweet dream of some girl.

Cirobu always carries a photograph of his wife.

This is perhaps the most clumsy yet most solemn gesture Cirobu can imagine. Because he knows that behind every shining light on his chest is the weight of his wife silently supporting the entire family's life.

△Cirobu with his family.

In his wife's eyes, Cirobu is a highly responsible person with high work standards. Although her husband spends more time with his soldiers than with his family, their greatest sense of security and happiness, from their first meeting to their marriage, stems from his unwavering loyalty and selfless dedication to people and tasks.

Every time Cirobu receives an award, he immediately tells his wife the good news. Sharing the joy allows her, though separated by mountains and rivers, to truly feel her importance in his heart.

Cirobu weaves his blood ties into every blade of grass, every brick, every shovel, and every pickaxe in the company. Patrol routes become the alleyways leading home, and the lights of the sentry post are the hearth fire of their home.

When they first arrived at the high-altitude training camp, there was no water, no electricity, no roads, and no internet. The hardships of border defense permeated every aspect of their lives. Every night, while on guard duty, even two sheepskin coats were insufficient to ward off the bitter cold. Calling home on weekends required climbing to the mountaintop to find a signal, a round trip taking nearly five hours.

To better fulfill their duties, Tsering and his comrades undertook a series of renovations. Their tents were muddy, leaking, and damp, so he mobilized the soldiers to use local materials for improvement. With frequent rain and snow, their clothes were difficult to dry, so he suggested building sunshades. The regimental headquarters quickly responded, and batches of supplies were

transported down the mountain. Tsering and his comrades, like ants carrying grains of sand, carried timber, plastic sheeting, and plastic panels up the snow-covered mountain to build sunshades, one per squad.

Now, deep in the mountains, neat rows of prefabricated houses stand, complete with basketball courts, a library, a gym, and other amenities. Internet access, the national power grid, and oxygen supply pipelines connect the squads and platoons. Looking at the camp they helped build, the officers and men felt a great sense of accomplishment: With better conditions, our enthusiasm for guarding the border is even higher, and our confidence is stronger.

(IV) The word "faith" had lingered in my throat for a long time, afraid that uttering it rashly would fail to capture the solidity of the border, and instead disturb the most simple and steadfast commitment on this land.

△ Tsering Lobsang and his comrades raised the flag and swore an oath upon arriving at their patrol point.

Until that patrol, when the soldiers unfurled the bright five-star red flag, raised their right fists, and solemnly swore: "With me guarding the border, the Party can rest assured." There was no audience, no applause, but these eight words resonated powerfully at the far end of this tranquil land. I blurted out, "What is faith?"

Squad leader Tsering Lobsang said, "Faith is entrusting your heart to a place."

Soldier Yang Mingzhou said, "Faith is like breathing; you don't need to think about it, and you won't forget it."

Military wife Sonam Drolma said, "Faith is him wearing the uniform on his body, and me wearing the uniform in my heart."

…On the return journey, the setting sun slowly sank. The golden-red afterglow, like molten iron, splashed across the boundless mountains, gilding the silhouettes of every soldier with a warm edge.

The weather on the plateau is unpredictable; just rounding a mountain pass, dark clouds gathered. A gust of wind whipped up rain and snow, which poured down harder and harder. On the steel rifles of Tsering and his comrades, the most crystalline faith of this era was embodied—

It is not an empty phrase, but the way they stand, the strength that makes ordinary people the backbone of the mountains, the armor that keeps the lights of countless homes behind them forever bright.

持续深化政治整训·军营新风丨走进第 79 集团军某旅，感受党员干部好作风

来源：解放军报 作者：罗鹏飞 吴安宁 责任编辑：王粲 2025-11-21 06:39:49

记者走进第 79 集团军某旅，感受党员干部好作风——

研战站排头 攻坚冲一线

■罗鹏飞 解放军报记者 吴安宁

前不久，记者走进第 79 集团军某旅采访，处处感受到浓浓“战味”：机关会议室内，旅领导带领机关干部围绕重难点课题研讨攻坚；沙盘前，某营营长带领各连主官，就相关战术战法展开激烈讨论……

“指挥员也是战斗员，必须带头研战、冲锋在前, ”这名营长告诉记者，深化政治整训中，旅里自上而下掀起研战谋战热潮，旅领导率先垂范，立起党员干部好样子；各营主官主动领题研战，带领官兵攻克训练难题，总结出多套战法训法, 记者了解到，在刚结束的全旅比武中，这名营长带领官兵取得好成绩,

“党员干部带头冲锋，就是最有效的政治工作、最有力的动员号令,”谈及旅里如今常态化开展的研战活动，该旅领导向记者介绍，研究作战课题是每名党委班子成员的“必修课”，常委人人有课题、个个有项目,

这得益于该旅聚焦备战打仗、扎实推进政治整训, 前期，旅领导深入基层调研发现，有的党员干部在工作中存在空喊口号、当“甩手掌柜”，甚至推诿扯皮的现象, 对此，旅党委对照政治整训“五个整顿”要求，从整顿思想抓起，组织党员干部进行自我剖析检视，反思党员模范带头作用和政治工作威信威力是否充分发挥, 在此基础上，他们加强作风整顿，引导党员干部弘扬我军政治工作优良传统，在工作训练中干在先、冲在前，争做练兵备战“排头兵”,

“经过整顿，从旅党委机关到基层连队，各级领导干部以身作则，‘头雁’作用日益凸显,”记者在训练场看到的一幕，印证了该旅领导这句话,

当天下午，该旅组织战术训练, 某连李连长主动请缨，担负难度最大的攻坚任务, 他活用战术战法，带领头车展开佯攻的同时，指挥其他战车从侧翼包抄，一举摧毁“敌”多个坚固工事,

训练结束，李连长立即组织干部骨干展开复盘总结, “虽然顺利达成训练目标，但暴露的问题也不少, ”他率先揭短亮丑，针对训练中存在的问题不足进行检视反思, 连队官兵也主动查摆不足，围绕补差强能建言献策,

“如今，旅党委领题攻坚、营主官带头研战已成常态, 连主官也要身先士卒带动官兵，把深化政治整训成果落实到基层末端,”走下训练场，李连长告诉记者，旅党委给党员干部立下了一条铁规：训练成绩必须保持优秀，大项任务必须带头干，用实际行动感召带动身边战友,

研战站排头，攻坚冲一线, 李连长告诉记者，在党员干部带动下，不少战士自发成立攻坚小组，围绕训练中的重难点课目展开专攻精练，并创新推出不少战法训法,

采访结束，训练场传来嘹亮的口号声, 该旅各级主官不约而同提及的一句话，在记者脑海回响：“党员干部，就要先干一步！”

Deepening Political Rectification and Training: A New Spirit in the Military Camp | Visiting a Brigade of the 79th Group Army to Experience the Good Work Style of Party Members and Cadres

Source: PLA Daily Author: Luo Pengfei, Wu Anning Editor: Wang Can 2025-11-21 Reporters visited a brigade of the 79th Group Army to experience the good work style of Party members and cadres— Leading the Way in Research and Combat, Charging to the Front Lines

■ Luo Pengfei, PLA Daily Reporter Wu Anning

Not long ago, a reporter visited a brigade of the 79th Group Army and was immediately struck by the strong "combat atmosphere": in the headquarters meeting room, brigade leaders led officers in discussions and problem-solving sessions on key and difficult issues; in front of the sand table, a battalion commander led company commanders in a heated discussion on relevant tactics and strategies…

"Commanders are also combatants; they must take the lead in studying combat and charging ahead," the battalion commander told the reporter. During the in-depth political rectification campaign, a wave of combat study and planning swept through the brigade from top to bottom. Brigade leaders set an example, establishing a good model for Party members and cadres; battalion commanders actively led research on combat issues, guiding their troops to overcome training difficulties and summarizing multiple sets of tactics and training methods. The reporter learned that in the recently concluded brigade-wide skills competition, this battalion commander led his troops to achieve excellent results.

"The leading role of Party members and cadres is the most effective political work and the most powerful mobilization order." Speaking about the brigade's now routine combat research activities, a brigade leader told reporters that researching combat topics is a "required course" for every member of the Party Committee; every member of the Standing Committee has a research topic and a project.

This is thanks to the brigade's focus on combat readiness and its solid advancement of political rectification. Previously, brigade leaders conducted in-depth research at the grassroots level and found that some Party members and cadres were merely paying lip service, acting as "hands-off managers," or even shirking responsibility. In response, the brigade Party Committee, in accordance with the "five rectifications" requirements of political rectification, started by rectifying ideology, organizing Party members and cadres to conduct self-analysis and reflection on whether the exemplary role of Party members and the prestige and power of political work had been fully utilized. Based on this, they strengthened the rectification of work style, guiding Party members and cadres to carry forward the fine traditions of the PLA's political work, taking the lead in work and training, and striving to be the "vanguard" in training and combat readiness.

"Following the rectification efforts, from the brigade's Party committee headquarters to the grassroots companies, leaders at all levels are setting an example, and their 'leading goose' role is becoming increasingly prominent." A scene witnessed by reporters at the training ground confirmed this statement from the brigade's leadership.

That afternoon, the brigade organized tactical training. Company Commander Li of a certain company volunteered for the most challenging assault mission. He skillfully employed tactics and maneuvers, leading the lead vehicle in a feint attack while simultaneously directing other vehicles to flank and destroy several of the "enemy's" fortified positions.

After the training, Company Commander Li immediately organized a debriefing session with key personnel. “Although the training objectives were successfully achieved, many problems were exposed,” he said, taking the lead in openly addressing shortcomings and reflecting on the deficiencies in the training. The company’s officers and men also proactively identified their own weaknesses and offered suggestions for improvement.

“Nowadays, it’s become the norm for the brigade’s Party Committee to lead the charge in tackling key problems and for battalion commanders to spearhead combat training. Even company commanders must lead by example, ensuring that the results of the in-depth political rectification campaign are implemented at the grassroots level.” Stepping off the training field, Company Commander Li told reporters that the brigade’s Party Committee has established a strict rule for Party members and cadres: excellent training performance must be maintained, and they must take the lead in major tasks, inspiring and motivating their comrades through their actions.

“Leading the way in combat training, charging to the front lines in tackling key problems.” Company Commander Li told reporters that, under the leadership of Party members and cadres, many soldiers have spontaneously formed task forces to specialize in and refine their skills on key and difficult training subjects, and have innovatively developed numerous combat tactics and training methods.

As the interview concluded, resounding slogans echoed from the training field. One phrase that all the brigade’s commanders mentioned simultaneously resonated in the reporter’s mind: “Party members and cadres must take the lead!”

持续深化政治整训·政治干部好样子丨教导员的“口头禅”

来源：解放军报 作者：曹达功 潘吉国 责任编辑：王粲 2025-11-22

教导员的“口头禅”

■陆军某营干部 曹达功

绘图：刘划南

“这哪行？”

新教导员李亮走马上任没几天，他的这句口头禅几乎传遍了营区.

履新伊始，李教导员在营里各个连来回转，了解掌握各连队建设情况. 听着官兵的具体意见，他总是一边记笔记，一边喊一句“这哪行”.

“全旅好几个营，我们编制排最后，但工作得瞄着第一干！”全营大会上，李教导员语气坚定地动员大家.

“喊口号谁不会？”听着他那沙哑的嗓音，几名战士私下嘀咕，“教导员这是‘新官上任三把火’，‘烧’完也就歇了.”

出现这样的声音，其实事出有因. 我们营以保障工作为主，专业岗位虽多，但大部分是“边缘岗位”，在备战打仗中“存在感”不足. 不仅如此，营里几个连队动态分散，人员管理难度大，“冒泡”现象时有发生. 连续几年没评上先进，官兵士气有些低迷.

没多久，旅里计划组织一场专业知识竞赛. 李教导员动员大家积极参与，官兵心里却有自己的“小算盘”：备战比赛要占用大量休息时间，成绩好当然露脸，但成绩不好不光耽误休息还弄得很没面子.

参赛队员名单一公布，大家发现，李教导员居然也报了名. 原来，李亮在各连队转悠的时候，早就给营里各项工作把了脉，他开出的方子是：干部带头.

参赛队成立第一天，李教导员旗帜鲜明表态：“旅里组织的大项活动，大家积极性不高，这哪行？我带头参赛，成绩好是集体荣誉，成绩不好我是第一责任人！”

备赛期间，李教导员与参赛队员们一起加班加点学理论、背要点. 考虑到自己记性不如年轻人，他比其他队员学得更“猛”. 大家看在眼里，心里不禁泛起阵阵涟漪：营里大事小情都得靠他和营长操心，他还得“点灯熬油”备赛，不容易！

竞赛落幕，我们营得了第四名，与预期目标有些差距. 站在全营官兵面前，李教导员主动作了检讨. 一声“对不起”，让不少官兵感觉心里被“扎了一下”，一些参赛队员更是瞬间红了眼眶.

相处久了，官兵发现，李教导员确实喜欢“说在先”，动不动就来一句“这哪行”；但他更注重“干在先”，无论军事训练、技术攻关，还是合唱比赛、授课比武，他总是带着官兵“一块苦、一起干”.

旅军体运动会上，为了给营里多挣积分，李教导员带头报名参加 100 米、400 米、10000 米比赛. 两天时间里，他一个课目接着一个课目拼. 10000 米比赛时，由于连续参赛，他膝

盖意外受伤. 二级军士长吕兵力劝：“教导员，算了吧，一个项目差不了多少分. ”李亮摆摆手，扯着嗓门喊：“这哪行？我不当逃兵！”

看着他贴上膏药继续奔跑，营里官兵都站了起来，拼命为他加油，旗手把营旗挥得哗哗作响. 当李教导员咬牙冲过终点那一刻，他不仅赢得了热烈掌声，也赢得了官兵的心悦诚服.

最近，旅里计划组织文化展演活动. 得知消息，平时很少参加集体活动的二级上士陈超主动要求报名. 李教导员一听，急了：“这哪行？我第一个报名，你排第二吧！”

“干在先”才能“让人服”

■潘吉国

为什么常把“这哪行”挂嘴边的教导员李亮能让官兵心悦诚服？因为他说的是“这哪行”，做的是“干在先”.

战争年代，我军阵地上常常出现这样的情景：打冲锋，指挥员往前一站，把手中的驳壳枪一挥：“跟我冲”；守阵地，指挥员站在最前沿，高喊一声：“看我的”. 正是这平平常常几个字，体现出我军的优良传统和作风，赋予了人民军队无往不胜的锐气.

随着政治整训不断深入，我们愈发感到，政治干部的表率作用本身就是最好的政治工作. 当政治干部喊出“我带头”，以“干在先”的实际行动诠释政治工作的真谛时，官兵眼中看见的就是旗帜和标杆，政治干部的威信便会在无形之中树立，政治工作的威力便会在无声之中彰显.

“干在先”才能“让人服”. 李教导员的故事给我们带来许多启迪，希望优秀的政治干部读了它，更加先进；有差距的政治干部读了它，快步赶上.

Deepening Political Rectification and Training: The Good Example of Political Cadres | The Political director’s “Catchphrase”

Source: PLA Daily Author: Cao Dagong, Pan Jiguo Editor: Wang Can 2025-11-22 The Political director’s “Catchphrase”

■ Cao Dagong, Officer of a Certain Army Battalion

Illustration: Liu Huanan

“This won’t do!” New political director Li Liang had only been in office for a few days when his catchphrase had spread throughout the battalion.

At the beginning of his tenure, Political director Li traveled back and forth between the various companies in the battalion to understand the construction situation of each company. Listening to

the specific opinions of the officers and men, he would always take notes while shouting, “This won’t do!”

“There are several battalions in the whole brigade. Our organization is the last, but we must aim to be the first in our work!” At a battalion-wide meeting, Political director Li firmly mobilized everyone.

“Anyone can shout slogans?” Hearing his hoarse voice, several soldiers muttered privately, “The political director is just making a show of force; he’ll rest after that.”

This sentiment stemmed from a specific reason. Our battalion primarily focused on support work. While there were many specialized positions, most were “marginal,” lacking a strong “presence” in combat readiness. Furthermore, the dispersed nature of the battalion’s various companies made personnel management difficult, leading to frequent instances of “sneaking out” (unauthorized personnel leaving their posts). Having failed to be recognized as an advanced unit for several years, morale was somewhat low.

Soon after, the brigade planned a professional skills competition. Political director Li encouraged everyone to participate, but the soldiers had their own calculations: preparing for the competition would take up a lot of rest time; good results would bring prestige, but poor results would not only waste rest but also be embarrassing.

When the list of participants was announced, everyone discovered that Political director Li had also signed up. It turned out that during his visits to the various companies, Li Liang had already analyzed the battalion’s work and prescribed a solution: leadership by example. On the first day of the competition, Political director Li made a clear statement: “The enthusiasm for major activities organized by the brigade is low, how can this be? I’ll lead the competition. Good results are a collective honor, bad results are my primary responsibility!” During the preparation period, Political director Li worked overtime with the team members to study theory and memorize key points. Knowing his memory wasn’t as good as the younger members, he studied even harder than the others. Everyone saw this and felt a pang of sympathy: he and the battalion commander had to handle everything in the battalion, and he still had to work tirelessly to prepare for the competition—it wasn’t easy!

At the end of the competition, our battalion came in fourth place, falling short of our expectations. Standing before the entire battalion, Political director Li took the initiative to apologize. His simple “I’m sorry” touched many soldiers deeply, and some team members even teared up instantly.

Over time, the officers and men discovered that Political director Li did indeed like to “talk first,” often saying things like “This won’t do!”; but he valued “doing first” even more. Whether it was military training, technical problem-solving, choir competitions, or teaching contests, he always led the officers and men to “share the hardships and work together.”

At the brigade's sports meet, to earn more points for the battalion, Political director Li took the lead in signing up for the 100-meter, 400-meter, and 10,000-meter races. For two days, he competed in one event after another. During the 10,000-meter race, due to consecutive competitions, he unexpectedly injured his knee. Sergeant Major Lü Bing strongly advised, "Political director, forget it, one event won't make a huge difference in points." Li Liang waved his hand, shouting at the top of his lungs, "This won't do! I won't desert!"

Watching him continue running with a bandage on, the officers and men in the battalion all stood up, cheering him on enthusiastically, the flag bearer waving the battalion flag loudly. When Political director Li gritted his teeth and crossed the finish line, he not only won enthusiastic applause but also the heartfelt respect of his officers and men.

Recently, the brigade planned to organize a cultural performance. Upon hearing the news, Sergeant Chen Chao, who rarely participated in group activities, volunteered to sign up. Political director Li, upon hearing this, exclaimed, "How can that be? I'll sign up first, you can be second!"

"Leading by Example" Leads to "Respect"

■ Pan Jiguo

Why does Political director Li Liang, who often says "How can that be?", earn the heartfelt respect of his officers and men? Because while he says "How can that be?", he actually leads by example.

During wartime, such scenes were common on the battlefields of our army: During an assault, the commander would step forward, wave his pistol, and shout, "Follow me!"; while defending a position, the commander would stand at the forefront and yell, "Watch me!" It is these simple words that embody the fine traditions and style of our army, giving the People's Army its invincible spirit.

As political rectification deepens, we increasingly realize that the exemplary role of political cadres is itself the best form of political work. When political cadres shout "I'll take the lead!" and interpret the true meaning of political work through their actions of "being the first to act," what officers and men see are flags and benchmarks. The prestige of political cadres is established imperceptibly, and the power of political work is demonstrated silently.

Only by "being the first to act" can one "earn respect." Political director Li's story offers us much inspiration. We hope that outstanding political cadres will read it and become even more advanced, and that those who are lagging behind will read it and catch up quickly.

陆军某旅端正训风考风立起为战导向

来源：解放军报 作者：向黎鸣 廖晓彬 喻润东 责任编辑：徐占虎 2025-11-22

陆军某旅端正训风考风立起为战导向——

考出真水平 练就硬本领

■解放军报记者 向黎鸣 特约记者 廖晓彬 喻润东

冬日，粤东山地，陆军某旅赴野外陌生地域开展战术训练考核. 某连数辆装甲车刚完成机动伪装，训练督导组便现场指出一系列问题：“左侧行车痕迹未消除”“单兵掩体构筑施工量不达标”……考核结束，该连随即组织官兵展开复盘总结，针对性制订措施.

“找准问题、补齐短板，才能把本领练强！”该旅领导介绍，此次考核，从难从严从实战出发确定评价标准，采取不设预案、不打招呼的方式临机导调多种特情，倒逼官兵锤炼实战硬功.

“考核过关并不等于实战过硬. 深入贯彻政治整训要求，必须端正训风考风、从难从严抓训. ”该旅作训科陈科长说，严查细纠考核中的问题，可能影响纸面成绩，却能反映官兵真实训练水平，及时校准胜战打赢的准星.

陈科长向记者讲述了之前的一次难忘经历. 为迎接上级组织的群众性岗位练兵比武考核，该旅专门成立集训队，针对基础课目常规内容，研究备考思路与取胜技巧. 结果考场上，导调组“不按常理出牌”，让一些备考经验丰富的官兵“马失前蹄”.

“宁可要符合实战标准的‘及格’，也不要有水分的‘优秀’. ”复盘总结会上，该旅党委一班人达成共识：只有端正训风考风，挤干训练考核的水分，才能考出真水平、练就硬本领.

很快，该旅成立专项督导组深入基层营连调研，梳理出“课目设置脱离实战”“专业训练避难就易”“考核标准人为变通”等问题，并拟制了“实战化训练整改清单”. 随后，他们在考核中增设复杂电磁干扰、多特情叠加等实战化条件，倒逼官兵在险难环境中提升实战水平.

训风连着作风，考场对接战场. 在前不久的复训考核中，该旅整改效果明显：手榴弹使用课目考核现场，下士陈喆玮充分考虑“敌”情，利用障碍物隐蔽前进；观察报知课目考核现场，面对临时更换的陌生场地、不熟悉的方位物，中士冯杨凭借过硬本领，快速完成目标判读定位；单兵掩体构筑课目考核现场，上等兵熊毅高标准完成作业……

“只有训练考核不断向实战靠拢、向打仗聚焦，才能训出质量、训出战斗力. ”该旅某连杨连长告诉记者，针对考核中暴露的问题，旅机关督导组记录在册、形成问题台账，连队主动认账领账，并明确整改责任与时限. 如今，连队构建起“训练—复盘—整改—训练”闭环机制.

训风严一分，战斗力就强一分. 该旅领导表示，他们将进一步收集实战化训练数据，动态调整训练课目难度，结合山地密林、城市街巷等不同作战环境特点开展对抗训练，坚持以严格标准、扎实举措狠纠不实之风.

An Army Brigade Upholds a Combat-Oriented Training and Assessment Style

Source: PLA Daily Author: Xiang Liming, Liao Xiaobin, Yu Rundong Editor: Xu Zhanhu 2025-11-22

An Army Brigade Upholds a Combat-Oriented Training and Assessment Style—Testing True Skills and Developing Strong Abilities

■PLA Daily Reporter Xiang Liming, Special Correspondent Liao Xiaobin, Yu Rundong

In winter, in the mountainous region of eastern Guangdong, an Army brigade conducted tactical training assessments in unfamiliar field terrain. Several armored vehicles from a certain company had just completed their camouflage maneuvers when the training supervision team pointed out a series of problems on the spot: “Traces on the left side have not been removed,” “The amount of individual bunker construction work is insufficient,” etc. After the assessment, the company immediately organized its officers and men to conduct a debriefing and develop targeted measures.

“Identifying problems and addressing weaknesses are crucial to honing skills!” The brigade leadership explained that this assessment, based on rigorous standards and realistic combat scenarios, employed unannounced, unprepared methods to simulate various unexpected situations, forcing soldiers to hone their combat prowess.

“Passing the assessment doesn’t equate to being a combat expert. To thoroughly implement the requirements of political rectification, we must rectify training and assessment practices and rigorously enforce training,” said Director Chen of the brigade’s training section. He added that while meticulously investigating and correcting problems in the assessment might affect written scores, it reflects the true training level of soldiers and allows for timely adjustments to ensure victory in combat.

Director Chen recounted a memorable experience. To prepare for a mass skills competition organized by higher authorities, the brigade established a special training team to study preparation strategies and winning techniques for basic subjects. However, during the actual assessment, the directing group acted unpredictably, causing some experienced soldiers to stumble.

“We’d rather have a ‘passing’ grade that meets actual combat standards than an ‘excellent’ grade that’s been artificially inflated.” At the debriefing meeting, the brigade’s Party Committee reached a consensus: only by rectifying training and assessment practices and eliminating any artificial biases can we truly assess capabilities and cultivate solid skills.

Soon, the brigade established a special supervisory team to conduct in-depth research at the grassroots battalion and company levels. They identified problems such as “course settings detached from real combat,” “specialized training avoiding difficult tasks,” and “artificially altered assessment standards,” and drafted a “Rectification List for Realistic Training.” Subsequently, they added realistic combat conditions such as complex electromagnetic interference and multiple overlapping special situations to the assessments, forcing officers and men to improve their combat skills in challenging environments.

Training style is linked to conduct, and the assessment field connects to the battlefield. In a recent refresher training assessment, the brigade demonstrated significant improvement from its rectification efforts: During the grenade handling exercise, Corporal Chen Zhewei skillfully considered the “enemy” situation and used obstacles for concealed advance; in the observation and reporting exercise, Sergeant Feng Yang, facing an unfamiliar and temporarily changed location, quickly identified and located the target using his exceptional skills; and in the individual bunker construction exercise, Private Xiong Yi completed the task to a high standard…

“Only by continuously aligning training and assessments with real combat and focusing on actual warfare can we achieve high-quality training and build combat effectiveness,” Company Commander Yang of a certain company in the brigade told reporters. Regarding the problems exposed during the assessments, the brigade’s supervisory team recorded them, creating a problem log. The company proactively acknowledged and took responsibility for rectification, setting clear responsibilities and deadlines. Now, the company has established a closed-loop mechanism of “training-debriefing-rectification-training.”

The stricter the training discipline, the stronger the combat effectiveness. The brigade leadership stated that they will further collect data on realistic combat training, dynamically adjust the

difficulty of training subjects, and conduct confrontation training in combination with the characteristics of different combat environments such as mountainous forests and urban streets. They will also adhere to strict standards and solid measures to resolutely correct any undesirable practices.

陆军某旅紧贴实战组织综合战术演练：快速机动 精准打击

来源：解放军报 作者：丁凯强 宋世杰 责任编辑：王粲 2025-11-23

陆军某旅紧贴实战组织综合战术演练——

快速机动 精准打击

■丁凯强 解放军报特约记者 宋世杰

炮声轰鸣，火力全开. 前段时间，陆军某旅一场综合战术演练中，炮兵分队刚占领阵地，射击口令随即下达. 炮长潘余沉着应对，带领班组迅速进入战位展开作业.

记者在演练现场看到，潘余依托车载数字化终端，迅速完成诸元解算、自动调炮、弹药装填等动作，做好射击准备. 与以往不同的是，指挥员通过指挥信息平台，将射击口令发送至各火炮终端，信息流转更加高效.

“预备，放！”随着指挥员一声令下，操作手果断击发，炮弹呼啸而出，精准命中目标. 火力打击结束，各炮迅速调整为行军状态，快速向预备阵地转移，继续执行火力打击任务.

“现代战争已经进入‘读秒’时代，战场上谁反应更快，谁就能掌握主动权.”该旅领导介绍，此次演练采取“精准打击、快打快撤”模式，在保证射击精度的前提下，要求炮兵分队迅速完成平战转换，并在限定时间内对临机设置的目标进行火力打击，随后利用火炮高机动性能快速转移阵地.

炮兵分队到达预备阵地后，导调组临机指定打击目标. 面对新任务，地面引导组放飞无人机，快速抵近“敌”阵地进行侦察定位，实时将目标数据传输至火炮终端，引导火炮实施新一轮火力打击.

演练结束，官兵立即围绕演练中暴露的短板弱项展开讨论，通过作战数据回放、装备性能分析、协同流程推演等，细致梳理出协同不够流畅等问题，并制订针对性补差计划.

“数字化条件下快打快撤，不是简单的动作提速，而是作战理念的全面更新.”该旅领导说，他们在训练中借助数字化手段进行战法创新，将情报链、指挥链、打击链深度融合，探索形成多种战法训法，有效缩短火力反应时间，进一步提升打击精度.

An Army Brigade Conducts Comprehensive Tactical Drills Closely Aligned with Real Combat: Rapid Mobility and Precision Strike

Source: PLA Daily Author: Ding Kaiqiang, Song Shijie Editor: Wang Can

2025-11-23

An Army Brigade Conducts Comprehensive Tactical Drills Closely Aligned with Real Combat: Rapid Mobility and Precision Strike

■ Ding Kaiqiang, Special Correspondent for PLA Daily, Song Shijie

The roar of artillery fire filled the air as the artillery units, armed with full force, conducted a comprehensive tactical drill recently. As soon as the artillery detachment occupied its positions, the firing command was issued. Gunner Pan Yu calmly responded, leading his squad to their positions and commencing operations.

At the drill site, reporters observed Pan Yu using a vehicle-mounted digital terminal to quickly complete actions such as calculating firing parameters, automatically adjusting the gun, and loading ammunition, preparing for firing. Unlike previous drills, the commander used a command information platform to send the firing command to each artillery terminal, resulting in more efficient information flow.

“Ready, fire!” With the commander’s order, the operator decisively fired, the shell whistling through the air and accurately hitting the target. After the initial strike, each artillery piece quickly adjusted to marching status and rapidly moved to its reserve positions to continue its fire mission.

“Modern warfare has entered the ‘second countdown’ era; whoever reacts faster on the battlefield gains the initiative,” explained the brigade leadership. This exercise adopted a “precision strike, rapid attack and withdrawal” model. While ensuring firing accuracy, artillery units were required to quickly complete the transition from peacetime to wartime operations and conduct fire strikes on impromptu targets within a limited time, subsequently utilizing the artillery’s high mobility to rapidly relocate.

After the artillery units arrived at their reserve positions, the directing group impromptu designated targets. Faced with this new mission, the ground guidance group launched drones to quickly approach the “enemy” position for reconnaissance and location, transmitting target data in real time to the artillery terminals to guide a new round of fire strikes.

After the exercise concluded, officers and men immediately began discussions on the shortcomings and weaknesses exposed during the drill. Through reviewing combat data, analyzing equipment performance, and rehearsing collaborative processes, they meticulously identified issues such as insufficient coordination and formulated targeted remedial plans.

“Rapid strike and withdrawal under digital conditions is not simply about accelerating actions, but a comprehensive update of operational concepts,” said the brigade’s leadership. They explained that they utilize digital means in training to innovate tactics, deeply integrating the intelligence chain, command chain, and strike chain to explore and develop various tactics and training methods, effectively shortening fire response time and further improving strike accuracy.

比武场升起“第三只眼”！陆军某旅引导官兵练好新增训练课目

来源：解放军报 作者：李仙 孙兴维 责任编辑：王粲 2025-11-23

陆军某旅优化调整比武内容引导官兵练好新增训练课目——

“飞翼”参赛：比武场升起“第三只眼”

■李 仙 解放军报记者 孙兴维

迅捷出动、完成课目、安全返航……日前，陆军某旅组织年度创破纪录比武，在便携式无人机操作课目比拼现场，15 名“飞手”展开激烈角逐.

比武场上空，“飞翼”轻舞，场面看似轻松，其中的较量却异常激烈. 比赛一开始，中士朱俊杰在定点投弹项目中出现失误，暂时排名第四. 在接下来的目标侦察项目中，他奋起直追，凭借娴熟的技能，操纵无人机快速精准侦获全部目标.

比武结果揭晓，朱俊杰以微弱优势险胜，夺得便携式无人机操作课目第一名.

走下比武场，朱俊杰告诉记者，便携式无人机操作是今年印发的新版《陆军基础训练大纲》中的新增训练课目，也是该旅年度创破纪录比武中的新设项目.

以往，该旅组织比武，所设项目一般是官兵熟悉的传统训练内容，为何今年不再墨守成规？

该旅领导告诉记者，此前，他们在一次调研中发现，部分基层单位存在“比武比什么，平时就练什么”的思维定式，有的为了在比武场上摘金夺银，甚至早早遴选训练尖子，针对“米秒环”的传统课目展开强化训练，对训练大纲中的新增课目下功夫不够.

“战场形态日新月异，平时训练和比武竞赛却固守‘舒适区’，用这种刻舟求剑的思维组训施教、比武考核，怎么能打赢未来战争？”议战议训会上，该旅党委一班人讨论认为，比武竞赛的项目设置方式对官兵平时的训练具有引领作用，必须将其训练“风向标”和“指挥棒”的功能发挥好.

经过充分研讨，该旅党委决定调整下一步比武竞赛方案：大幅压缩传统课目数量，将施训时间不长的便携式无人机操作、穿越机操作等大纲新增的 4 个训练课目列为比武竞赛项目，牵引带动新增课目训练扎实展开.

决心已定，为帮助官兵快速提高新增课目训练成绩，该旅机关打出一套“组合拳”：统筹组织新增课目教学法研究和示范观摩，邀请军队院校专业教员走进训练场，为基层培养一批“种子”教练员；针对智能无人领域新课目技术含量普遍较高的特点，成立“无人争锋”俱乐部，广泛遴选专业骨干人才，共同研讨训法战法，营造浓厚研学氛围；选派具有较大发展潜力的官兵前往院校和装备生产厂家跟班学习，同时采取“旅集中统训、营分批轮训”的模式组织专业人才集训，培养一批懂原理、精操作、会教学的专业骨干；积极协调多方力量，为新增课目训练配齐必要的装备器材，开辟专用训练场地，鼓励官兵放开手脚专攻精练.

一系列务实举措落地落实，有效激发了官兵对新增课目的训练热情，在该旅掀起钻研新课目、掌握新技能的热潮.

成立便携式无人机集训队，是该旅推动新增课目训练走深走实的重要措施之一.

“无人机是现代战场上的常用装备，是官兵透视战场的‘第三只眼’. 我们让‘飞翼’走进赛场，既是贯彻新版《陆军基础训练大纲》要求的主动作为，也是应对无人智能作战力量加速走向战场这一趋势的积极行动. ”该旅领导介绍，新调整的比武方案下发后，他们从各营连遴选出 35 名官兵，在专业教员的指导下，围绕空中侦察、障碍竞速、定点投弹等内容展开专攻精练，显著提升了训练质效.

朱俊杰告诉记者，他接触便携式无人机的时间并不长，训练初期还因技能不过关，操作无人机降落时摔坏了机翼和镜头.

“类似情况在集训队并非个例. ”该旅便携式无人机集训队负责人介绍，半年多来，集训队官兵每天在训练场上操作无人机起降上百次，每天训练 10 小时以上是常态. 正是日复一日的刻苦钻研，让朱俊杰快速成为专业尖子. 他的成长经历是集训队全体参训人员勤学苦练、奋力攻坚的缩影.

谈及比武夺冠心得，朱俊杰的一番感言让记者印象深刻：“今天，新的作战样式、新的武器装备不断涌现. 作为新时代革命军人，我们只有主动拥抱变化，把新课目、新技能练熟练精，才能在未来战场上赢得先机. ”

“这次比武，参赛官兵在新增项目比拼中取得良好成绩令人欣喜，但比成绩更重要的是我们通过调整项目设置，校正了部队练兵备战的准星. ”该旅训练部门负责人说.

“仗怎么打，兵就怎么练. 今年比武的新导向给官兵带来的思维之变难能可贵. ”该旅领导告诉记者，下一步，他们将继续优化完善训练考评机制，真正让比武场成为检验实战能力的“试金石”和加速训练创新的“助推器”，推动战备训练向更高水平跃升.

A “Third Eye” Rises on the Competition Field! An Army Brigade Guides Soldiers to Master Newly Added Training Subjects

Source: PLA Daily

Author: Li Xian, Sun Xingwei

Editor: Wang Can

2025-11-23

An Army Brigade Optimizes and Adjusts Competition Content to Guide Soldiers to Master Newly Added Training Subjects—

"Flying Wings" Participate: A "Third Eye" Rises on the Competition Field

■ Li Xian, PLA Daily Reporter Sun Xingwei

Swift deployment, completion of subjects, safe return… Recently, an Army brigade organized its annual record-breaking competition. In the portable drone operation subject competition, 15 "drone pilots" engaged in fierce competition.

Above the competition field, "flying wings" danced lightly. The scene seemed relaxed, but the competition was exceptionally intense. At the beginning of the competition, Sergeant Zhu Junjie made a mistake in the pinpoint bombing event, temporarily ranking fourth. In the subsequent target reconnaissance event, he rallied, using his skillful techniques to quickly and accurately detect all targets.

The competition results were announced, with Zhu Junjie narrowly winning first place in the portable drone operation event.

After leaving the competition field, Zhu Junjie told reporters that portable drone operation is a newly added training subject in the newly issued edition of the "Army Basic Training Outline" this year, and also a new item in the brigade's annual record-breaking competition.

In the past, the brigade's competitions generally featured traditional training content familiar to officers and men. Why did they break with tradition this year?

The brigade's leadership told reporters that during a previous survey, they discovered that some grassroots units had a fixed mindset of "training what is tested in competitions." Some, in order to win gold and silver medals in competitions, even selected top trainees early on and focused on intensive training for traditional subjects like the "meter-second ring" (a type of rapid proficiency test), neglecting to put enough effort into the newly added subjects in the training outline.

"The battlefield is constantly evolving, yet peacetime training and competitions remain stuck in our 'comfort zones.' How can we win future wars with such outdated thinking in training and competitions?" At a meeting to discuss training and combat readiness, the brigade's Party Committee concluded that the way competition events are structured guides the soldiers' peacetime training, and its function as a "weathervane" and "command stick" must be fully utilized.

After thorough discussion, the brigade's Party Committee decided to adjust the next phase of the competition plan: significantly reducing the number of traditional subjects and including four newly added training subjects in the syllabus, such as portable UAV operation and racing drone operation, which have shorter training periods, as competition events, thus driving the solid development of training in these new subjects.

With a firm resolve, the brigade headquarters implemented a comprehensive set of measures to help officers and men quickly improve their training performance in newly added subjects: First, they coordinated research and demonstrations of teaching methods for the new subjects, inviting professional instructors from military academies to the training grounds to cultivate a group of "seed" instructors for the grassroots level. Second, recognizing the generally high technical content of new subjects in the field of intelligent unmanned equipment, they established an "Unmanned Equipment Showdown" club to widely select professional backbone personnel to jointly discuss training methods and tactics, creating a strong learning atmosphere. Third, they selected officers and men with significant development potential to study at military academies and equipment manufacturers, while simultaneously adopting a "brigade-wide centralized training, battalion-level rotational training" model to organize intensive training for professional personnel, cultivating a group of professional backbone personnel who understand the principles, are proficient in operation, and skilled in teaching. Fourth, they actively coordinated with various parties to equip the new subjects with necessary equipment and materials, establish dedicated training grounds, and encourage officers and men to focus on intensive training.

These pragmatic measures effectively stimulated the enthusiasm of officers and men for training in the new subjects, creating a surge of enthusiasm for studying new subjects and mastering new skills within the brigade.

The establishment of a portable drone training team is one of the key measures taken by the brigade to deepen and solidify training in newly added subjects.

"Drones are commonly used equipment on the modern battlefield, serving as the 'third eye' for soldiers to see the battlefield. Bringing 'flying wings' into the competition is both a proactive measure to implement the requirements of the new 'Army Basic Training Outline' and a positive action to address the trend of unmanned intelligent combat forces rapidly entering the battlefield," explained a brigade leader. After the newly revised competition plan was issued, they selected 35 soldiers from various battalions and companies. Under the guidance of professional instructors, they focused on intensive training in aerial reconnaissance, obstacle courses, and precision bombing, significantly improving training effectiveness.

Zhu Junjie told reporters that he hadn't been using portable drones for long, and in the early stages of training, due to insufficient skills, he damaged the wing and lens when landing the drone.

"Similar situations are not uncommon in the training team," said the head of the brigade's portable drone training team. For more than six months, the team's soldiers have been operating drones for

takeoffs and landings hundreds of times a day, with more than 10 hours of training daily being the norm. It was through tireless, day-to-day study that Zhu Junjie quickly became a top professional. His growth is a microcosm of the diligent study and relentless efforts of all participants in the training team.

When discussing his experience of winning the competition, Zhu Junjie's words left a deep impression on the reporter: "Today, new combat styles and new weapons and equipment are constantly emerging. As revolutionary soldiers of the new era, we can only gain the upper hand on the future battlefield by proactively embracing change and mastering new subjects and skills."

"It's gratifying that the participating officers and men achieved good results in the newly added events of this competition, but more important than the results is that we corrected the direction of the troops' training and combat readiness by adjusting the event settings," said the head of the brigade's training department.

"How the battle is fought is how the soldiers train. The new direction of this year's competition has brought about a valuable shift in the thinking of the officers and men," the brigade leader told the reporter. He added that they will continue to optimize and improve the training evaluation mechanism, truly making the competition field a "touchstone" for testing combat capabilities and a "booster" for accelerating training innovation, thus propelling combat readiness training to a higher level.

带兵人手记 | 临近考核，战士为何“饿肚子”

来源：中国军网-解放军报 作者：丁玉龙 责任编辑：刘上靖

2025-11-24

临近考核，战士为何“饿肚子”

■第 73 集团军某旅运输连干部 丁玉龙

前段时间，我注意到，总有几名战士晚饭吃得又快又少. 一连几天，都是如此.

值班员和骨干反映，不少战士食欲不佳，夜训中出现了体力不支、出虚汗的情况. 正当连队研究怎么解决这一问题时，意外发生了：一天点名时，战士小李两眼一黑，差点晕倒. 卫生员检查后发现他血糖值偏低，便迅速为他补充糖水.

事后，我把小李叫到连部了解情况. 几番询问后，他终于道出实情. 原来，担任连队网络维护员后，小李因工作任务重，训练时间被挤占，体能成绩掉到了及格线边缘. 眼看考核临近，他开始刻意节食，试图通过减重来提升成绩.

我听了哭笑不得，先是肯定了他的上进心，随后，拿出他近期的体能测试数据，分析道：“这样做根本没用. 你看，你的体重虽有所下降，但五公里武装越野、400 米障碍这些课目的成绩却未见起色. ”

“想取得好成绩没有错，但训练方法必须科学. ”小李听后坦言，自己心急走了弯路.

事后，我对全连进行摸排，发现确实有少数战士为了迎接考核，走进了训练的误区，很多做法不仅对提升成绩帮助有限，还会影响身体健康.

对此，连队打出了一套“组合拳”：炊事班根据训练强度优化食谱，增加高蛋白、低脂食材，确保营养均衡；训练内容安排更注重循序渐进，根据每个人的体能基础和短板分组施训；我还邀请专家传授健康饮食和科学训练知识，让小李和其他有过类似经历的战士现身说法，帮助大家廓清思想认识.

同时，为防止工作任务影响一些战士的训练，连队专门作出调整：一方面，加强科学统筹，妥善解决工作矛盾；另一方面，安排骨干或同专业的战士作为“备份”，开展“错峰训练”，确保他们都有比较充足的训练时间.

措施落地后，饭堂里再也见不到匆匆扒几口饭就离开的身影了，取而代之的是战士们端着营养均衡的晚饭安心就餐的画面.

就在前两天刚结束的年终考核中，小李如愿拿到总评“优秀”的成绩. 看着成绩单，他感慨地说：“以前总想靠‘饿肚子’突击一下，现在我明白了，科学训练才是硬道理. 只有把功夫下在平时，刻苦训练，才能坦然迎接考核的检验. ”

Commander’s Notes | Why Are Soldiers “Hungry” Near Assessment?

Source: China Military Network - PLA Daily

Author: Ding Yulong

Editor: Liu Shangjing

2025-11-24

Why Are Soldiers “Hungry” Near Assessment?

■ Ding Yulong, Officer of the Transport Company of a Brigade of the 73rd Group Army

Some time ago, I noticed that several soldiers were eating very quickly and in small amounts at dinner. This continued for several days.

The duty officer and key personnel reported that many soldiers had poor appetites and were experiencing fatigue and sweating during night training. Just as the company was discussing how to solve this problem, an unexpected incident occurred: one day during roll call, soldier Xiao Li suddenly felt dizzy and almost fainted. The medic checked him and found that his blood sugar level was low, so he quickly gave him sugar water.

Afterwards, I called Xiao Li to the company headquarters to understand the situation. After several questions, he finally revealed the truth. It turned out that after becoming the company's network maintenance officer, Xiao Li's heavy workload squeezed out his training time, causing his physical fitness scores to plummet to the passing mark. With the assessment approaching, he began deliberately dieting, attempting to improve his scores through weight loss.

I was both amused and exasperated. First, I acknowledged his ambition, then showed him his recent physical fitness test data and analyzed, "This is completely useless. Look, although your weight has decreased, your scores in events like the 5km armed cross-country run and the 400m obstacle course haven't improved."

Wanting good results is not wrong, but training methods must be scientific," Xiao Li admitted, acknowledging that his impatience had led him astray.

Afterwards, I conducted a company-wide investigation and found that a few soldiers had indeed fallen into training pitfalls in their efforts to prepare for the assessment. Many of their practices not only offered limited help in improving scores but also negatively impacted their health.

In response, the company implemented a comprehensive set of measures: the cookhouse optimized the menu based on training intensity, increasing high-protein and low-fat ingredients to ensure nutritional balance; training content was arranged with a more gradual progression, grouping soldiers according to their physical capabilities and weaknesses; experts were invited to share knowledge on healthy eating and scientific training, with Xiao Li and other soldiers with similar experiences providing firsthand accounts to help clarify everyone's understanding.

Meanwhile, to prevent work assignments from interfering with some soldiers' training, the company made specific adjustments: on the one hand, strengthening scientific coordination to properly resolve work conflicts; on the other hand, assigning experienced soldiers or those with the same specialty as "backups" to conduct "staggered training," ensuring they all had sufficient training time.

After these measures were implemented, the mess hall was no longer filled with soldiers hurriedly eating a few bites; instead, soldiers were seen enjoying their nutritionally balanced dinners.

Just two days ago, in the year-end assessment, Xiao Li achieved an overall "Excellent" rating. Looking at his report card, he remarked with emotion, "I used to think that I could cram by 'starving' myself, but now I understand that scientific training is the only way. Only by putting in the effort regularly and training diligently can I confidently face the tests."

打破过往考核模式，这个单位探索建立基层机关“双向互考”机制

来源：解放军报 作者：冯浩 段洁 责任编辑：郭妍菲 2025-11-26

新疆军区某团探索建立“双向互考”机制——

此次考机关，基层当考官

■冯 浩 段 洁

该团一名机关干部（左一）参加野战救护考核. 段 洁 摄

戈壁滩上，风沙裹着硝烟掠过训练场，笔者定睛一看，新疆军区某团火力股刘股长正在参加综合能力考核.

面对接踵而至的“敌情”，刘股长从容研判目标性质、制订打击计划，全程有条不紊、处置果断. 不过，担任考官的战士刘沛指出，刘股长在野战救护课目中未对伤员开展心理疏导，并依规扣除了相应分数. 最终，刘股长只取得“良好”成绩.

“这个细节，平时很容易忽视，我的分扣得不冤. ”走下考场，刘股长从胸前口袋拿出一张纸，其上打着 7 个鲜红的“×”——那是今年初首次进行机关基层“双向互考”时他的成绩单. “我将它带在身上，用来警醒自己. ”刘股长说.

谈及年初时的那场考核，该团不少机关领导干部记忆犹新.

当时，该团前一年的年终考核刚结束不久，机关人员均取得了“全优”成绩. 然而，紧随而来的一场实兵对抗训练让“优秀”看起来名不副实——机关制订的“完美方案”因高原环境频频失灵：行军路线未避开冻土区，导致 2 辆装甲车“抛锚”；忽略高原风向多变，造成射击参数出现偏差；基层急需补给，物资却迟迟没有运到……

“机关考核‘全优’，却经不起实战考验. 制订计划方案不考虑环境条件，导致作战行动受挫！”复盘会上，素来敢说真话的班长蔡高强，把矛头指向了机关，不少人为他捏了把汗. 不料该团团长当场亮明态度：“蔡高强说得对！机关干部自身能力不过硬，如何指导基层？”

为改变这一状况，该团决定以考核为抓手，倒逼机关干部紧贴基层实际与实战需求提升备战打仗能力. 他们打破机关过往“自导自演”的考核模式，推行基层机关“双向互考”机制.

起初，部分机关干部仍然不以为意，因为在以往的考核中，基层总会给大家留些情面.

然而走进考场，看到考官队伍，刘股长顿感不妙：班长胡威虎、“金牌教练员”刘沛等训练尖子表情严肃，根本没有“网开一面”的意思.

10 余个课目连贯实施，很多机关干部频频“卡壳”. 一天下来，刘股长疲惫不堪，来不及喘息，便发现自己只有 40 分的军事训练成绩单已贴在机关大厅的公示栏上. 同样因考核不合格被曝光的，还有其他 10 余名机关干部.

此举在基层引起不少议论，有人心里犯嘀咕，认为得罪了机关，“怕是以后不太好过”. 更多人则表示，虽然这次考出了机关的真实水平，但这种考法很难坚持下去.

然而，团党委接下来的举措，让所有忧虑尽数消散：团领导带头参考，定期组织“双向互考”；部分在首次“双向互考”考核中担任考官的基层官兵，被聘为常设考官；明确互考全程录像，加强监督，严防“作弊”和“放水”行为；参考作风纪律与履职考评直接挂钩，立起按实战要求考、从严从实评的鲜明导向.

此后，机关干部纷纷走出办公室，扎进训练场. 刘股长拜基层教练员为师，跟蔡高强练战术、向刘沛学救护；4 名考核不合格的机关干部自发组建“补差小组”前往基层，了解熟悉兵力部署和战术运用思路方法……

在此过程中，机关干部还注意调研基层训练工作的难点堵点. 他们将官兵们提出的“增加夜间装备抢修考核”“简化非实战类报表填写”等意见建议上报团党委，研究制订改进措施，同时梳理形成分层考核清单，不再将“米秒环”作为唯一标准，让基层训练和考核更加符合实战需求.

基层考机关不讲情面，机关考基层严格标准，如今在该团已成为一种日常. 在最近一次“双向互考”首日，作训股杨参谋精准预判“敌”火力点，获评“优秀”；战勤股刘助理员在完成战场油料输送调度时，因备用点位防护措施不到位被扣分……一天的考核结束，机关人员的整体表现明显好于年初.

次日角色互换，机关考核组依据分层考核清单，将指挥能力考查点嵌入作战想定. 指挥通信连连长定下战斗决心时，因与火力、保障等要素协同不力被扣分；步兵分队虽按规定路线抵达目标区域，却因没有根据地形灵活调整伪装网，被“敌”无人机发现……

该团领导介绍，通过“双向互考”，机关干部不仅有效提升了谋战研战能力，而且在考核基层时，指向更加明确、出题更加精准. 下一步，他们将把这一机制纳入新年度工作筹划，不断细化考核标准、规范考核程序、严肃考风考纪，让“考为战”“练为战”蔚然成风.

Breaking with Past Assessment Models, this Unit Explores the Establishment of a “Two-Way Mutual Assessment” Mechanism for Grassroots Organs

Source: PLA Daily Author: Feng Hao, Duan Jie Editor: Guo Yanfei 2025-11-26 A Regiment of the Xinjiang Military Command Explores the Establishment of a “Two-Way Mutual Assessment” Mechanism— Grassroots Served as Examiners for the Headquarters

■ A cadre from the regiment's headquarters (first from left) participates in a field medical care assessment. Photo by Duan Jie. On the Gobi Desert, wind and sand, carrying smoke, swept across the training ground. Upon closer inspection, I saw Branch Director Liu of the firepower branch of a regiment of the Xinjiang Military Command participating in a comprehensive capability assessment.

Faced with a series of "enemy situations," Branch Director Liu calmly analyzed the nature of the targets and formulated a strike plan, handling the situation methodically and decisively throughout. However, soldier Liu Pei, who served as the examiner, pointed out that Branch Director Liu failed to provide psychological counseling to the wounded during the field medical care exercise, and deducted the corresponding points according to regulations. Ultimately, Branch Director Liu only achieved a "good" score.

"This detail is easily overlooked in normal times, and my points were well-deserved." Stepping out of the examination room, Branch Director Liu pulled a piece of paper from his breast pocket, marked with seven bright red "X"s—his score sheet from the first "two-way mutual assessment" conducted between the headquarters and grassroots units earlier this year. "I carry it with me to remind myself," Branch Director Liu said.

Many leaders and cadres in the regiment still vividly remember that assessment at the beginning of the year.

At that time, the regiment's year-end assessment had just concluded, and all headquarters personnel had achieved "excellent" scores. However, a subsequent live-fire exercise revealed the true extent of their "excellent" rating—the "perfect plan" devised by headquarters repeatedly failed due to the high-altitude environment: the marching route failed to avoid permafrost, causing two armored vehicles to break down; the variable wind direction at high altitudes was ignored, resulting in deviations in firing parameters; and supplies urgently needed by the grassroots units were delayed…

"The headquarters received 'all-around excellent' ratings, yet they couldn't withstand the test of real combat. Their plans and schemes ignored environmental conditions, leading to setbacks in the operation!" At the debriefing meeting, Cai Gaoqiang, a squad leader known for his outspokenness, pointed the finger at headquarters, causing many to worry. Unexpectedly, the regimental commander immediately stated his position: "Cai Gaoqiang is right! How can headquarters officers guide the grassroots if their own capabilities are not up to par?"

To change this situation, the regiment decided to use assessments as a tool to force headquarters officers to improve their combat readiness by closely aligning with the realities of the grassroots and the demands of actual combat. They broke away from the headquarters' previous "self-directed and self-performed" assessment model and implemented a "two-way mutual assessment" mechanism between headquarters and grassroots units.

Initially, some officers from higher levels remained unconcerned, believing that lower-level staff would always show leniency in previous assessments.

However, upon entering the examination room and seeing the examiners, Branch Director Liu sensed trouble: Squad leader Hu Weihu, “gold medal coach” Liu Pei, and other top trainees had serious expressions, showing no intention of making an exception.

With over ten subjects administered consecutively, many officers from higher levels frequently stumbled. At the end of the day, exhausted and without a moment to catch his breath, Branch Director Liu discovered his military training score of only 40 points was posted on the bulletin board in the office lobby. More than ten other officers from higher levels were also publicly shamed for failing the assessment.

This sparked considerable discussion at the lower levels. Some worried that offending higher-ups might make things difficult in the future. Many more expressed that while this assessment revealed the true level of the higher-ups, this method of testing was unlikely to be sustainable.

However, the subsequent measures taken by the regimental Party committee dispelled all concerns: regimental leaders took the lead in taking the exams and regularly organized “two-way mutual examinations”; some of the grassroots officers and men who served as examiners in the first “two-way mutual examination” were appointed as permanent examiners; it was stipulated that the entire mutual examination process would be video-recorded to strengthen supervision and strictly prevent “cheating” and “lenient treatment”; the examination style and discipline were directly linked to performance evaluation, establishing a clear orientation of testing according to actual combat requirements and evaluating strictly and realistically.

Afterwards, officers from the headquarters left their offices and went to the training grounds. Branch Director Liu apprenticed himself to a grassroots instructor, practicing tactics with Cai Gaoqiang and learning first aid from Liu Pei; four officers from the headquarters who failed the assessment spontaneously formed a “remedial group” to go to the grassroots level to understand and familiarize themselves with troop deployment and tactical application methods... In this process, officers from the headquarters also paid attention to investigating the difficulties and obstacles in grassroots training work. They reported the soldiers’ suggestions, such as “adding nighttime equipment repair assessments” and “simplifying the completion of non-combat reports,” to the regimental Party committee, studied and formulated improvement measures, and simultaneously compiled a tiered assessment list, no longer using the “meter-second ring” as the sole standard, making grassroots training and assessments more aligned with actual combat needs.

Grassroots assessing higher-level personnel without favoritism, while higher-level personnel assessing grassroots personnel with strict standards, has now become a routine practice in the regiment. On the first day of the recent “two-way mutual assessment,” Staff Officer Yang of the Training Branch accurately predicted the “enemy’s” firing points and was rated “excellent”; Assistant Officer Liu of the Combat Support Branch was penalized for inadequate backup point

protection measures when completing battlefield fuel delivery scheduling... At the end of the day's assessment, the overall performance of the higher-level personnel was significantly better than at the beginning of the year.

The next day, roles were reversed, and the higher-level assessment team, based on the tiered assessment list, embedded command capability assessment points into combat scenarios. When the command and communications company commander made the battle decision, he was penalized for poor coordination with firepower and support elements; although an infantry unit arrived at the target area according to the prescribed route, it was detected by "enemy" drones because it failed to flexibly adjust its camouflage net according to the terrain…

The regimental leadership explained that through "two-way mutual assessment," officers not only effectively improved their combat planning and research capabilities, but also found that assessing grassroots units was more targeted and the questions more precise. Next, they will incorporate this mechanism into their new year's work plan, continuously refining assessment standards, standardizing assessment procedures, and strictly enforcing assessment discipline, so that "assessment for combat" and "training for combat" become the prevailing practice.

高原天路，“清澈的爱”浸润兵心

来源：解放军报 作者：郑强龙 李杰 伊力亚尔江 责任编辑：郭妍菲 2025-11-26

新疆军区某团组织“车轮微课”破解动散条件下教育难题——

高原天路，“清澈的爱”浸润兵心

■郑强龙 李 杰 伊力亚尔江

顶风冒雪翻山越岭，晓行夜宿连续机动……前不久，新疆军区某团数十辆运输车驰骋在高原天路，执行重要任务.

车队途经康西瓦烈士陵园时，官兵下车集合.

献花、敬礼、鞠躬、默哀……列队祭奠烈士后，该团理论骨干、二级上士李鑫用一面党旗、一块黑板，搭建起一个简易课堂. 纪念碑高耸矗立，陵园内庄严肃穆. 寒风中，李鑫围绕“如何在艰苦环境中保持战斗意志”主题开讲，与战友共同追忆先辈在“生命禁区”的战斗故事.

“不少先烈牺牲时，年纪跟我们差不多. 面对生死考验，他们选择用生命践行使命. 与英雄们相比，我们遇到的困难算得了什么？”讨论交流中，20 年如一日坚守高原运输一线的老兵李军有感而发，讲起自己初上高原时的经历——那年，车辆经过海拔 5000 多米的红土达坂时突发故障. 时间紧、任务重，他的班长拿起工具直接趴在雪地上，争分夺秒展开抢

修作业，李军则用喷灯为班长取暖. 车修好时，班长由于长时间卧地，双腿冻得僵硬，站都站不起来.

李军的讲述引起在场官兵的强烈共鸣和热烈讨论，这一幕正是该团灵活开展教育的生动事例. 该团官兵常年在高原天路执行运输任务，为破解动散条件下教育难题，团里按照“统计划不统安排、统标准不统方法、统内容不统时间”原则，鼓励基层单位结合任务实际开展思想教育，打造形式多样、内容丰富的“车轮微课”.

新藏线上红色资源丰富，该团指导任务分队按照“一处红色资源就是一个教育场所”思路，在康西瓦烈士陵园等红色场所开展现地教育，引导官兵学习先烈精神、争当精武标兵. 行车途中，各任务分队还按照“快、小、细、活、实”要求，利用车载电台开展“我是光荣汽车兵”微故事分享活动，鼓励官兵讲述身边典型的感人事迹.

为了进一步丰富“车轮微课”的内容，该团与任务沿线边防连队、高原兵站、驻训点位共享教育资源，多方携手打造精品教育微课. 官兵在聆听其他单位战友的奋斗故事中，加深了对职责使命的理解认同.

“清澈的爱，只为中国. 这是新时代卫国戍边英雄陈祥榕对祖国最深情的告白，也是我们边防军人誓死守护祖国领土的铮铮誓言. ”前不久，该团某分队官兵利用任务间隙，与陆军某边防连官兵同上思政课，连队红色讲解员陈帅动情讲述陈祥榕烈士事迹，让高原汽车兵们深受触动. 该团战士杜澳说：“作为一名新时代高原汽车兵，我要学习英雄精神，练强打赢本领，扛起戍边使命. ”

“车队行进到哪里，‘车轮微课’就开设到哪里. ”该团领导告诉笔者，从“我讲你听”到“共学共研”，从“被动接受”到“主动参与”，今年以来，全团各分队结合任务实际推出多堂精品微课，有效激发官兵练兵备战动力. 二级上士金玉宝在身边榜样激励下，坚持记录每条运输线路的路况特点、常见险情，为战友遂行任务提供经验参考；二级军士长朱远理带领班组攻克维修难题，显著提高车辆维修效率.

车轮滚滚向前，忠诚融进天路. 年终岁尾，该团多项高原运输任务进入收官阶段，官兵用一次次“胜利抵达”诠释他们的赤胆忠诚.

On the Plateau’s Sky Road, “Clear Love” Nourishes Soldiers’ Hearts

Source: PLA Daily Author: Zheng Qianglong, Li Jie, Iliyarjiang Editor: Guo Yanfei 2025-11-26

A Regiment of the Xinjiang Military Command Organizes “Micro-Lessons on Wheels” to Solve Educational Challenges Under Movable Conditions—

On the Plateau’s Sky Road, “Clear Love” Nourishes Soldiers’ Hearts

■ Zheng Qianglong, Li Jie, Iliyarjiang

Braving wind and snow, traversing mountains and valleys, traveling day and night in continuous maneuvering… Not long ago, dozens of transport vehicles from a regiment of the Xinjiang Military Command sped along the plateau's sky road, carrying out an important mission.

When the convoy passed the Kangxiwa Martyrs' Cemetery, the officers and men disembarked and assembled.

Offering flowers, saluting, bowing, observing a moment of silence… After lining up to pay tribute to the martyrs, Li Xin, a theoretical backbone of the regiment and a second-class sergeant, set up a simple classroom using a Party flag and a blackboard. The monument stood tall, and the cemetery was solemn and dignified. In the biting wind, Li Xin delivered a lecture on "How to Maintain Fighting Will in Harsh Environments," reminiscing with his comrades about the battles fought by their predecessors in the "forbidden zone of life."

"Many of our martyrs were about our age when they sacrificed their lives. Faced with the test of life and death, they chose to fulfill their mission with their lives. Compared to these heroes, what are the difficulties we encounter?" During the discussion, Li Jun, a veteran who has steadfastly served on the front lines of high-altitude transportation for 20 years, spoke with deep emotion, recounting his experience when he first arrived on the plateau—that year, a vehicle broke down at an altitude of over 5,000 meters on the Hongtu Pass. With time of the essence and the task heavy, his squad leader grabbed tools and lay down on the snow, racing against time to begin repairs, while Li Jun used a blowtorch to warm him. When the vehicle was finally repaired, the squad leader's legs were so frozen from lying on the ground for so long that he couldn't even stand up.

Li Jun's story resonated strongly with the officers and men present, sparking a lively discussion. This scene is a vivid example of the regiment's flexible approach to education. The officers and men of this regiment, who regularly perform transport missions on the high-altitude highway, have developed a unique approach to education under dispersed conditions. Adhering to the principles of "unified planning without unified arrangements, unified standards without unified methods, and unified content without unified timing," the regiment encourages grassroots units to conduct ideological education tailored to their specific missions, creating diverse and rich "micro-lessons on wheels."

The Xinjiang-Tibet Highway is rich in revolutionary resources. The regiment guides its mission units to conduct on-site education at sites like the Kangxiwa Martyrs' Cemetery, emphasizing that "each revolutionary site is an educational venue," guiding soldiers to learn from the spirit of martyrs and strive to become exemplary soldiers. During their journeys, mission units also utilize vehicle radios to conduct "I am a Glorious Truck Soldier" micro-story sharing activities, encouraging soldiers to recount inspiring stories of exemplary individuals around them, adhering to the principles of "fast, concise, detailed, flexible, and practical."

To further enrich the content of these "micro-lessons on wheels," the regiment shares educational resources with border defense companies, high-altitude outposts, and training sites along the mission route, collaborating to create high-quality educational micro-lessons. By listening to the stories of their comrades from other units, soldiers have deepened their understanding and identification with their duties and missions. "A pure love, solely for China. This is the deepest declaration of love from Chen Xiangrong, a hero of the new era who defends the border, to his motherland, and it is also the solemn oath of our border guards to protect our country's territory to the death." Not long ago, soldiers from a detachment of the regiment took advantage of a break in their mission to attend a political education class with soldiers from a border defense company of the army. Chen Shuai, the company's red tourism guide, movingly recounted the deeds of martyr Chen Xiangrong, deeply touching the plateau truck drivers. Du Ao, a soldier in the regiment, said, "As a new era plateau truck driver, I must learn from the hero's spirit, hone my combat skills, and shoulder the mission of defending the border."

"Wherever the convoy travels, 'micro-lessons on wheels' follow." The regiment's leadership told the reporter that, from "I speak, you listen" to "co-learning and co-research," from "passive acceptance" to "active participation," since the beginning of this year, all detachments in the regiment have launched numerous high-quality micro-lessons based on their actual missions, effectively stimulating the soldiers' motivation for training and combat readiness. Inspired by the role models around him, Sergeant Jin Yubao diligently recorded the road conditions and common hazards of each transport route, providing valuable experience for his comrades. Sergeant Major Zhu Yuanli led his team to overcome maintenance challenges, significantly improving vehicle repair efficiency.

The wheels roll forward, loyalty woven into the sky. As the year draws to a close, the regiment's numerous plateau transport missions enter their final stages, with officers and men demonstrating their unwavering loyalty through repeated successful arrivals.

"熟悉对手"变成"陌生劲敌"，看这支分队如何创新战术战法

来源：解放军报 作者：郑重语 黄昆仑 廖晓彬 责任编辑：郭妍菲 2025-11-26

第七十三集团军某旅"蓝军分队"集智创新战术战法——

"熟悉对手"变成"陌生劲敌"

■郑重语 解放军报记者 黄昆仑 特约记者 廖晓彬

战车轰鸣，雷达飞旋……近日，第 73 集团军某旅展开一场红蓝对抗. 训练开始不久，蓝方凭借出其不意的战法，快速完成"敌"后渗透，摧毁红方关键节点，让红方瞬间陷入战场被动.

“曾经的‘熟悉对手’变成了‘陌生劲敌’. ”走下训练场，谈起与这支“蓝军分队”的近期历次交手经历，红方指挥员李瑞斌记忆犹新：蓝方伏击得手后，不仅没有撤出战场，反而化整为零再次设下伏击圈，让红方“在同一个地方摔倒两次”；一轮炮击结束，红方正想抓住火力间隙反击，蓝方却快速完成二次火力部署，精准打击红方装甲分队……一场场对抗下来，连吃败仗的李瑞斌感到有些困惑：为啥这支“蓝军分队”总有使不完的新招？

采访期间，记者带着这个问题来到“蓝军分队”一探究竟. 营区内，分队官兵正在组织一场实战化对抗训练任务部署会. 会上，官兵你一言、我一语，围绕战术战法展开激烈讨论. 记者留意到，指挥员肖钦灿手拿一本笔记本，不时写写画画.

“笔记本里记录的都是分队的新战术和新战法. ”肖钦灿告诉记者，这些内容大多是官兵集智贡献的“金点子”.

谈及这本“蓝军笔记”，肖钦灿介绍，曾经一段时间，由于他们与旅队多个单位进行过多轮对抗，自身战术战法被对手逐渐熟悉，导致他们在训练中的行动屡屡被对手提前预判、从容化解.

“如果发挥不出‘磨刀石’作用，‘蓝军’的意义何在？”那段时间，这是肖钦灿思考最多的问题. 一次复盘会上，官兵直言：“伏击点总在那几个山头，太固定了”“电磁干扰启动的时机，早就被对手发现了规律”……听着官兵“吐槽”，肖钦灿感到，破局的“钥匙”，很可能就藏在身边这些战友的心里.

很快，“我为训练献一计”活动在“蓝军分队”展开，小到单兵伪装技巧，大到分队作战方案，一条条蕴含实战智慧的建议不断汇集到“蓝军笔记”中.

一场红蓝对抗中，红方装甲分队沿干涸的河床快速突进. 肖钦灿根据官兵平时研究的战术成果，主动放弃预设阵地诱敌深入. 对手果然中招，蓝方抓住战机就地“围点打援”，伏击过程干脆利落. 最终，蓝方以极小代价取得对抗胜利.

“蓝军笔记”越来越厚，新战法越来越多. 与此同时，肖钦灿带领分队官兵不断扩大“练兵朋友圈”——

向红方学，换个视角看自己. 为了避免闭门造车的狭隘，他们邀请红方指挥员来队参与复盘，围绕对手发现的己方破绽，系统整理改进措施，在精准补差中实现能力提升.

向友邻学，携手并进练协同. 他们利用跨军兵种联合训练等时机，组织官兵以复盘为抓手，逐个课目、逐场训练回顾过程细节，梳理出通信链路抗干扰能力弱、联合机制不成熟等短板. 在此基础上，他们广泛借鉴友邻部队经验，不断优化联合作战预案，提升分队实战能力.

向战例学，拓展视野强本领. 他们紧盯前沿战法，组织官兵围绕“有人+无人”协同等作战课题开展攻关，打牢新质战斗力建设基础；组建前沿战法研究小组，深入学习近期局部战争中的战例，研究剖析最新战术战法，拓展自身认知维度.

采访期间，记者发现，该分队营区内研战谋战氛围十分浓厚. 军人俱乐部里，官兵主动从对手视角审视分队战术战法，在观点碰撞和思想交锋中主动查找自身短板不足；学习室内，官兵共同研讨战史战例，积极分享心得体会；训练间隙，官兵结合训练实际，及时对战法训法进行优化改进……

作为砥砺锋刃的“磨刀石”，这支“蓝军分队”在实战化对抗中新招层出不穷，让对手吃尽了苦头. 某分队与“蓝军分队”多次交手，战场上连续受挫. 直到该分队指挥员应邀参加“蓝军分队”复盘，看到那本“蓝军笔记”时，他心服口服地说：“和你们比确实有差距，下次我们还得跟你们切磋！”

近日，这支“蓝军分队”在一次训练中临时受领夺控某滨海阵地任务. 面对对手依托岸滩构筑的坚固防御工事和密集障碍物，分队指挥员将官兵集智研究的前置火力打击、无人平台破障等战法，首次运用于训练，一举撕开对手前沿防线，高效夺控目标阵地.

短 评

善于用好官兵之智

■肖 斌

知战胜者在卒伍. 一本“蓝军笔记”如同一座蜂巢，其中的“金点子”就是甘甜的蜜. 练兵备战实践中，指挥员如果一味闭门造车，则难以确保作战方案细致周密、实用管用. 要想战胜对手，指挥员既要具备自我判断能力，也要倾听广大官兵意见建议，善于汲取创新战术战法的“源头活水”.

军事民主是我军“三大民主”之一. 第 73 集团军某旅“蓝军分队”集聚官兵智慧实现战斗力跃升的做法启示我们，基层官兵身处一线，无论是完成重大任务、破解训练难题，还是创新战法训法、驾驭武器装备，他们最有发言权. 用好官兵之智，体现了对官兵主体地位和首创精神的尊重，也是提高部队战斗力的重要途径.

千难万难，充分发动官兵就不难. 面对现代战争体系化、智能化的挑战，制胜之钥在于充分发挥广大官兵聪明才智. 各级应畅通官兵建言献策渠道，做好落实官兵“金点子”的“下篇文章”，推动部队战斗力不断提升.

“Familiar Opponent” Turns into “Unfamiliar Formidable Enemy”: How This Unit Innovates Tactics and Combat Methods

Source: PLA Daily Author: Zheng Zhongyu, Huang Kunlun, Liao Xiaobin Editor: Guo Yanfei 2025-11-26 A Brigade of the 73rd Group Army's "Blue Force Unit" Innovates Tactics and Combat Methods Through Collective Intelligence—

"Familiar Opponent" Turns into "Unfamiliar Formidable Enemy"

■ Zheng Zhongyu, PLA Daily Reporter Huang Kunlun, Special Correspondent Liao Xiaobin

Tanks roared, radars whirred… Recently, a brigade of the 73rd GA conducted a red-blue force-on-force exercise. Shortly after the training began, the blue force, relying on unexpected tactics, quickly completed its infiltration behind enemy lines, destroying key red force nodes and instantly putting the red force on the defensive.

"The 'familiar opponent' has become a 'strange and formidable foe.'" Stepping off the training field, Red Force commander Li Ruibin vividly recalled his recent encounters with this "Blue Force" unit: After a successful ambush, the Blue Force not only failed to withdraw from the battlefield but also dispersed and set up another ambush, causing the Red Force to "fall twice in the same place"; after a round of artillery fire, just as the Red Force was about to seize the opportunity to counterattack during a lull in fire, the Blue Force quickly completed a secondary fire deployment, precisely striking the Red Force's armored units… After a series of defeats, Li Ruibin was somewhat puzzled: why did this "Blue Force" unit always seem to have an endless supply of new tactics?

During the interview, the reporter visited the "Blue Force" unit to find out. Inside the camp, the unit's officers and men were organizing a meeting to deploy a realistic combat training mission. At the meeting, the officers and men engaged in a heated discussion about tactics and strategies. The reporter noticed that Commander Xiao Qincan was holding a notebook, occasionally scribbling and drawing.

"The notebook is full of new tactics and strategies from our unit," Xiao Qincan told reporters. These are mostly "golden ideas" contributed by the officers and men collectively.

Regarding this "Blue Force Notebook," Xiao Qincan explained that for a period of time, due to numerous rounds of combat exercises with multiple units of the brigade, their tactics and strategies became increasingly familiar to the enemy, leading to their actions in training being frequently anticipated and easily countered.

"If it can't serve as a 'sharpening stone,' what's the point of the 'Blue Force'?" This was the question Xiao Qincan pondered most during that period. At a debriefing meeting, the officers and men bluntly stated: "The ambush points are always on those same few hilltops, too fixed," and "The timing of our electromagnetic interference activation has long been discovered by the enemy..." Listening to the soldiers' complaints, Xiao Qincan felt that the "key" to breaking the deadlock might very well lie in the hearts of his comrades.

Soon, the “I Contribute a Suggestion for Training” campaign was launched in the “Blue Army Unit.” From individual camouflage techniques to unit-wide combat plans, suggestions brimming with practical wisdom were continuously added to the “Blue Army Notebook.”

In a red-blue confrontation, the red armored unit rapidly advanced along a dry riverbed. Based on the tactical results studied by his soldiers, Xiao Qincan proactively abandoned his pre-set position to lure the enemy deeper. The opponent fell for the trap, and the blue team seized the opportunity to ambush and ambush reinforcements on the spot, the ambush being swift and decisive. Ultimately, the blue team achieved victory with minimal losses.

The “Blue Army Notebook” grew thicker, and new tactics emerged one after another. At the same time, Xiao Qincan led his unit to continuously expand their “training circle of friends”—learning from the red team to gain a different perspective. To avoid the narrow-mindedness of working in isolation, they invited the red team commander to participate in debriefing sessions, systematically organizing improvement measures based on the weaknesses discovered by the opponent, achieving capability enhancement through precise improvement.

Learning from neighboring units to practice coordination hand in hand. Taking advantage of opportunities such as joint training exercises across military branches, they organized officers and men to review the details of each training session and subject, identifying weaknesses such as weak anti-jamming capabilities of communication links and immature joint mechanisms. Based on this, they extensively learned from the experiences of neighboring units, continuously optimizing joint operational plans and improving the combat capabilities of their units.

Learning from combat examples to broaden horizons and enhance skills, they focused on cutting-edge tactics, organizing officers and men to tackle key operational issues such as manned and unmanned coordinated operations, laying a solid foundation for building new combat capabilities. They also established a cutting-edge tactics research group to deeply study recent local war examples, analyze the latest tactics and methods, and expand their cognitive dimensions.

During the interview, the reporter observed a strong atmosphere of combat research and planning within the unit’s barracks. In the soldiers’ club, officers and men proactively examine their unit’s tactics and methods from the opponent’s perspective, actively identifying their own shortcomings and weaknesses through the clash of viewpoints and ideological exchanges; in the study room, officers and men jointly discuss combat history and examples, actively sharing their experiences and insights; during training breaks, officers and men combine practical training situations to optimize and improve tactics and training methods in a timely manner…

As a “sharpening stone” to hone their skills, this “Blue Force unit” has come up with a constant stream of new tactics in realistic combat exercises, causing the opponent considerable trouble. One unit clashed with the “Blue Force unit” multiple times, suffering repeated setbacks on the battlefield. Until the unit’s commander was invited to participate in the “Blue Force unit’s”

debriefing, upon seeing the “Blue Force notebook,” he admitted with conviction, “We are indeed lacking compared to you; we will have to compete with you again next time!”

Recently, this “Blue Force unit” was temporarily assigned the task of seizing and controlling a coastal position during a training exercise. Faced with the opponent’s formidable defensive fortifications and dense obstacles built along the beach, the platoon commander applied tactics developed collectively by officers and men, such as forward-deployed fire strikes and unmanned platform obstacle breaching, to training for the first time. This successfully breached the opponent’s forward defenses and efficiently seized control of the target position.

Short Commentary: Making Good Use of the Wisdom of Officers and men

■ Xiao Bin Victory lies in the ranks. A “Blue Force Notebook” is like a beehive, and its “golden ideas” are the sweet honey. In training and combat readiness, if commanders work in isolation, it’s difficult to ensure that operational plans are detailed, thorough, practical, and effective. To defeat the opponent, commanders must possess both self-judgment ability and the ability to listen to the opinions and suggestions of officers and men, skillfully drawing upon the “source of fresh water” for innovative tactics and methods.

Military democracy is one of the “three major democracies” of our army. The practice of a brigade of the 73rd GA in leveraging the wisdom of its officers and men to achieve a leap in combat effectiveness through its “Blue Force” unit inspires us that grassroots officers and men, being on the front lines, have the most say in completing major missions, solving training problems, innovating tactics and training methods, and mastering weapons and equipment. Making good use of the wisdom of officers and men reflects respect for their principal role and pioneering spirit, and is also an important way to improve the combat effectiveness of the troops.

No matter how difficult, fully mobilizing officers and men makes things easier. Facing the challenges of modern warfare’s systematization and intelligence, the key to victory lies in fully utilizing the wisdom and talents of the vast number of officers and men. All levels should ensure smooth channels for officers and men to offer suggestions and advice, and do a good job in implementing their “golden ideas” to continuously improve the combat effectiveness of the troops.

“邱少云生前所在连”：用铁的纪律锻造铁的队伍

来源：解放军报 作者：孙 晨 王 振 章林峰 等 责任编辑：孙悦 2025-11-27

第 76 集团军某旅“邱少云生前所在连”持之以恒强化纪律教育——

用铁的纪律锻造铁的队伍

■孙 晨 王 振 章林峰

聚 焦

初冬时节，雪域高原朔风如刀.

茫茫夜色中，第 76 集团军某旅组织的一场实战化训练拉开战幕. 担负前出侦察任务的该旅“邱少云生前所在班”班长白晶带领 3 名战士，在寒冷刺骨的戈壁滩上潜伏至深夜，在挑战生理极限中精准摸清“敌”兵力部署，圆满完成任务.

“纪律重于生命”，是深藏在这支英雄连队血脉中的红色基因. 73 年前的抗美援朝战场上，该连前身部队奉命攻占 391 高地. 距敌仅 60 多米的草丛中，面对烈焰焚身，邱少云严守潜伏纪律，在烈火中岿然不动直至壮烈牺牲，以血肉之躯铸就“纪律重于生命”的精神丰碑.

英雄远去，精神永存. 73 年斗转星移，一代代官兵将“纪律重于生命”的忠诚信念融入血脉薪火相传. 连队先后涌现出 46 位英模人物，获得“攻坚模范连”“纪律严明模范连”等荣誉称号，荣立集体大功 6 次.

邱少云烈士牺牲 73 周年纪念日，该连官兵参加缅怀仪式. 齐 翊摄

“邱少云！”“到！”

每天晚点名，“邱少云生前所在连”官兵都要进行呼点. 几十年来，这声响亮的应答从未间断，让忠诚担当的精神和严守纪律的作风赓续传承、历久弥新，成为连队一代代官兵共同坚守的精神高地.

数十年的赓续传承如何不断线？上等兵张博然的成长转变中隐藏着答案.

今年 7 月初，刚来到这支英模连队的大学生士兵张博然干劲十足，但繁重的训练和严格的管理却让他很快出现了思想波动，训练积极性一度低迷.

转变，源于一堂教育课. 那天，指导员王磊带着新兵参观连队荣誉室，给大家分享了一个故事：部队奉命执行战斗任务途中，邱少云负重前行，脊背被磨得血肉模糊，但他只是用布条简单包扎了伤口，便咬牙跟上了队伍……授课时，张博然深受触动，对英雄的敬仰油然而生.

看着荣誉室里摆放的物品，重温先辈感人事迹，张博然感慨万千. 授课结束后，他在笔记本上写道：“邱少云在战场上守纪如铁，正是源于平时纪律严明. 只有把平时当作战时，才能真正将‘守纪’二字刻进骨子里. ”

思想转变催生行动自觉和奋进动力. 从那天起，张博然每天训练结束后都主动加练，训练成绩稳步提高. 他还主动申请加入连史讲解员队伍，为其他官兵讲述邱少云的故事.

“官兵发自内心认同，执行纪律才会更加坚定、更加严格. ”王磊说，为持续激发官兵干事创业的热情动力，他们注重讲好英雄故事，结合担负的使命任务灵活开展教育，引导官兵争当“邱少云传人”，让守纪如铁的红色基因焕发出强大生命力，有效激发了年轻官兵矢志强军、敢打必胜的血性胆魄.

一点一滴强化，一朝一夕养成. 在“邱少云生前所在班”宿舍，一直为老班长邱少云保留着一张床铺：被子叠得棱角分明，床单平整如新. 在怀念老班长、学习老班长、致敬老班长的点点滴滴中，守纪意识如春风化雨，浸润战士心田.

为引导官兵强化思想认同、形成行动自觉，连队常态开展新兵下连第一站参观邱少云烈士纪念馆等仪式教育，深入开展“讲英雄故事，做英雄传人”教育实践活动，将不同形式的教育融入日常管理、战备训练和大项任务，时刻提醒官兵守纪如铁，扎实走好军旅生涯每一步.

“连队持之以恒的教育，如同一把锋利的刻刀，在我们心底刻下了深深的印记. ”第54任“邱少云生前所在班”班长白晶说，“作为英雄的传人，‘纪律重于生命’已融入我们的血脉，刻进了大家的骨子里. ”

有一年，连队参加上级组织的比武，有人提议：“为取得更好的成绩，可考虑挑选精兵强将上阵. ”时任连长李文年态度鲜明：必须全员参考、全课目迎考. 最终，在参赛的 9 支队伍中，该连以战术协同零失误、装备操作零差错的绝对优势夺得第一.

平时纪律严明，战时无往不胜. 战建备一体建设，为全旅作示范；军事体育运动会，获团体总分第一名；武器效能试验，多项训法战法得到验证……近年来，该连官兵用实际行动为“纪律重于生命”写下更多生动注解，打赢了一场又一场攻坚战.

去年夏天，一场战术训练中，连队奉命在荆棘丛生的沙地隐蔽渗透，要求全员静默. 面对突如其来的沙尘暴，全连官兵静静潜伏 3 小时，成功引导炮兵分队摧毁“敌”指挥所.

这样的故事在该连并不少见. 一次高原训练中，下士张超为完成伏击“敌”坦克任务，在结冰水沟中潜伏两小时；跨区演习中，上等兵乔志强遭马蜂蜇伤，面部肿胀导致视线模糊，仍忍痛完成任务……一茬茬官兵将点滴养成的纪律自觉，转化为练兵备战中无往不胜的战斗力.

“军人的天职是服从命令，钢铁的纪律是胜利保证，邱少云是学习榜样……”雪域高原，天寒地冻，训练回营路上，该连官兵军容严整，齐声高唱《邱少云之歌》. 铿锵的旋律响彻云霄、久久回荡……

探 源

战火中淬炼的纪律自觉

纪律是战斗力的基石，更是人民军队融入血脉的信仰.

1952 年 10 月，抗美援朝上甘岭战役前夕，邱少云所在部队担负攻击敌前哨阵地 391 高地的作战任务. 然而，391 高地地势险要，敌防守火力密集，任务难度和危险可想而知.

“必须拿下 391 高地！”为了缩短部队冲锋距离，最大限度减少伤亡，邱少云所在的第 3 营奉命潜伏在 391 高地前的草丛中，配合大部队发起进攻.

深夜，邱少云和战友们悄悄前出，潜伏在 391 高地前方草丛里，全身伪装，纹丝不动. 邱少云潜伏的位置，距离敌阵地只有 60 多米. 第二天，敌人在我军潜伏区扔下大量燃烧弹. 很快，不断蔓延的大火烧毁了邱少云身上的伪装物，衣服很快也燃烧起来.

当时，邱少云身旁就有一条水沟，只要翻身一滚，就能把身上的烈火熄灭. 但这样一来，潜伏突击队就会被敌人发现. 为了不暴露目标，邱少云强忍剧痛，把冲锋枪和手榴弹、子弹小心翼翼地埋压在身体下面. 大火猛烈地燃烧着，邱少云的身体一动不动，直到壮烈牺牲. 邱少云用生命捍卫了战场纪律，换来了战斗的胜利.

为了表彰邱少云的英雄事迹，志愿军领导机关给他追记特等功，追授“一级英雄”称号，朝鲜最高人民会议常任委员会追授邱少云“朝鲜民主主义人民共和国英雄”称号和金星奖章、一级国旗勋章. 这不仅是对英雄个人的褒奖，更是对“纪律重于生命”这一精神的崇高礼赞.

探寻英雄精神的源头，我们从邱少云生前留下的文字中找到了答案. 他曾在写给家人的书信中写道：“到朝鲜后一定要拼命打仗，不怕死. 为了让所有的受苦人都像我们一样过上好日子，我死了又算个啥子么. ”在向组织递交的入党申请书中，他更是立下了“为了战斗的胜利，甘愿献出自己的一切”的铮铮誓言. 朴实而坚定的语言，生动彰显了一名革命战士将个人命运与革命事业紧密相连的崇高境界.

战后，志愿军官兵在邱少云牺牲的 391 高地崖壁上，刻下了一行大字：“为整体、为胜利而自我牺牲的伟大战士邱少云同志永垂不朽！”从革命战争年代到强军兴军新征程，人民军队的纪律意识历经战火淬炼，已深深融入官兵血脉，成为人民军队代代相传的红色基因.

（王磊整理、王瑞泓作图）

视 点

“纪律中有无穷的战斗力”

■张 迪

“一场阅兵，让我们看到了什么？”纪念中国人民抗日战争暨世界反法西斯战争胜利 80 周年阅兵式结束后，一位网友如此发帖追问. 热烈讨论中，一条回复赢得大量点赞：“阅兵阅的是一支军队的魂，是纪律、是作风.”

纪律之于军队，犹如水、空气之于生命. 有着严格的纪律，自觉而坚定地遵守纪律，是由我军性质和所担负的使命决定的. 90 多年来，人民军队不断续写军纪如铁的光辉篇章. 哪怕饥寒交迫，也不拿群众一针一线；哪怕烈火焚身，也岿然不动，直至付出生命；哪怕身陷绝境，也坚守战位，慷慨赴死……那一个个震撼人心的壮烈瞬间，无不体现出广大官兵严守纪律的坚定性、自觉性. 人民军队之所以所向披靡、无往不胜，一个重要原因是我们这支军队有着铁的纪律.

习主席在古田全军政治工作会议上，把“坚持实行自觉的严格的纪律”作为我军政治工作优良传统的一项重要内容加以强调，这是对我们党建军治军规律的深刻揭示. 当前，如期实现建军一百年奋斗目标，高质量推进国防和军队现代化，要求我们不仅要更加重视纪律建设，还要深入研究新形势下面临的新情况新特点新问题，把纪律建设抓得更具针对性、实效性.

“纪律中有我，纪律中有你，纪律中有无穷的战斗力”. 在继承中更好地发展，在发展中更好地继承，始终“坚持实行自觉的严格的纪律”，始终做到令行禁止、步调一致，我们这支军队就一定能“上下同欲”，永远立于不败之地.

The "Company Where Qiu Shaoyun Served Before His Death" of a Brigade of the 76th Group Army Persistently Strengthens Discipline Education—Forging an Iron Team with Iron Discipline

■Sun Chen, Wang Zhen, Zhang Linfeng

Focus

In early winter, the north wind on the snowy plateau is like a knife.

In the vast darkness of night, a realistic combat training exercise organized by a brigade of the 76th Group Army commenced. Bai Jing, the squad leader of the "Squad Where Qiu Shaoyun Served Before His Death," led three soldiers in ambush in the frigid Gobi Desert until late at night, pushing their physical limits to accurately ascertain the "enemy's" troop deployment and successfully complete the mission.

"Discipline is more important than life"—this is the red gene deeply rooted in the blood of this heroic company. Seventy-three years ago, on the battlefield of the Korean War, the predecessor unit of this company was ordered to capture Hill 391. Just over 60 meters from the enemy, in the grass, facing the raging flames, Qiu Shaoyun strictly adhered to the discipline of concealment, remaining motionless in the fire until his heroic sacrifice, forging a spiritual monument of "discipline is more important than life" with his own flesh and blood.

The hero is gone, but his spirit lives on. Seventy-three years have passed, and generations of officers and men have infused the unwavering belief that "discipline is more important than life" into their blood, passing it down like a torch. The company has produced 46 heroic figures, earning honors such as "Model Company for Assault" and "Model Company for Strict Discipline," and has been awarded collective merit six times.

On the 73rd anniversary of Qiu Shaoyun's sacrifice, officers and men of the company participated in a memorial ceremony. (Photo by Qi Yi)

"Qiu Shaoyun!" "Present!" Every evening roll call, the officers and men of the "company where Qiu Shaoyun served" call out his name. For decades, this resounding response has never ceased, ensuring the enduring legacy of loyalty, responsibility, and strict discipline—a spiritual high ground upheld by generations of soldiers in the company.

How has this decades-long tradition remained unbroken? The answer lies in the growth and transformation of Private Zhang Boran.

In early July of this year, Zhang Boran, a college graduate soldier who had just arrived at this model company, was full of enthusiasm. However, the heavy training and strict management quickly caused him to experience a wavering in his thinking, and his training enthusiasm waned.

The transformation stemmed from an educational lesson. That day, Instructor Wang Lei led the new recruits on a tour of the company's honor room, sharing a story: During a combat mission, Qiu Shaoyun carried a heavy load, his back chafed raw and bleeding. He simply bandaged his wounds with a cloth and gritted his teeth to keep up with the troops… Deeply moved by the story, Zhang Boran felt a surge of admiration for the hero.

Looking at the items displayed in the honor room and recalling the moving deeds of his predecessors, Zhang Boran was filled with emotion. After the lecture, he wrote in his notebook: "Qiu Shaoyun's iron discipline on the battlefield stemmed from his strict discipline in peacetime. Only by treating peacetime like combat can one truly ingrain the word 'discipline' into one's bones." This shift in thinking spurred conscious action and a drive to strive forward. From that day on, Zhang Boran voluntarily did extra training after each day's drills, and his training performance steadily improved. He also volunteered to join the company's history interpreter team, telling other officers and men the story of Qiu Shaoyun.

"When officers and men genuinely identify with the story, they will be more determined and stricter in enforcing discipline," said Wang Lei. To continuously inspire the enthusiasm and motivation of officers and men for their work, they focus on telling heroic stories, flexibly combining education with their assigned missions, guiding officers and men to strive to become "successors of Qiu Shaoyun," allowing the iron-willed red gene to radiate powerful vitality, effectively inspiring young officers and men' determination to strengthen the military and their courage to fight and win.

Strengthened little by little, cultivated overnight. In the dormitory of Qiu Shaoyun's former squad, a bed has been preserved for him: the quilt is folded neatly, and the sheets are as smooth as new. In the small acts of remembering, learning from, and paying tribute to their former squad leader, a sense of discipline is subtly instilled in the soldiers' hearts like a gentle spring rain.

To guide officers and men in strengthening their ideological identification and forming conscious actions, the company regularly conducts ceremonial education activities such as visiting the Qiu Shaoyun Martyrs' Memorial Hall as the first stop for new recruits. It also deeply promotes the educational practice activity of "telling heroes' stories and becoming successors of heroes," integrating different forms of education into daily management, combat readiness training, and major tasks, constantly reminding officers and men to uphold iron discipline and take every step of their military careers with utmost care.

"The company's persistent education, like a sharp carving knife, has left a deep imprint on our hearts," said Bai Jing, the 54th squad leader of the squad where Qiu Shaoyun served. "As successors of a hero, 'discipline is more important than life' has been ingrained in our blood and is engraved in our bones." One year, when the company participated in a competition organized by higher authorities, someone suggested, "To achieve better results, we could consider selecting our best soldiers to participate." The then-company commander, Li Wennian, was adamant: all members must participate and be tested on all subjects. Ultimately, among the nine participating teams, the

company won first place with an absolute advantage of zero errors in tactical coordination and zero mistakes in equipment operation.

Strict discipline in peacetime leads to invincibility in wartime. The integrated development of combat readiness and preparedness serves as a model for the entire brigade; in the military sports meet, they won first place in the overall team score; in weapons effectiveness tests, many training methods and tactics have been validated… In recent years, the officers and men of this company have used their actions to write more vivid annotations on "discipline is more important than life," winning one battle after another.

Last summer, during a tactical training exercise, the company was ordered to infiltrate covertly in a thorny, sandy area, requiring complete silence. Faced with a sudden sandstorm, the entire company remained silently in ambush for three hours, successfully guiding an artillery unit to destroy the "enemy" command post.

Such stories are not uncommon in this company. During a high-altitude training exercise, Corporal Zhang Chao lay in ambush for two hours in a frozen ditch to complete a mission to ambush "enemy" tanks; during a cross-regional exercise, Private First Class Qiao Zhiqiang was stung by wasps, his face swollen and his vision blurred, yet he still endured the pain to complete the mission… Generation after generation of soldiers have transformed the discipline they have cultivated into an invincible fighting force in training and combat readiness.

"A soldier's duty is to obey orders, iron discipline is the guarantee of victory, Qiu Shaoyun is a role model to learn from…" On the snowy plateau, in the freezing cold, on the way back to camp from training, the company's soldiers, in impeccable military bearing, sang "The Song of Qiu Shaoyun" in unison. A resounding melody echoed through the sky, lingering for a long time…

Tracing the Origins: Discipline Forged in the Flames of War

Discipline is the cornerstone of combat effectiveness, and even more so, the faith ingrained in the blood of the People's Army.

In October 1952, on the eve of the Battle of Shangganling in the Korean War, Qiu Shaoyun's unit was tasked with attacking the enemy's forward outpost, Hill 391. However, Hill 391 was strategically important, heavily fortified by enemy fire, making the mission extremely difficult and dangerous.

"We must take Hill 391!" To shorten the unit's advance distance and minimize casualties, Qiu Shaoyun's 3rd Battalion was ordered to lie in ambush in the grass in front of Hill 391, coordinating with the main force's attack.

Late at night, Qiu Shaoyun and his comrades quietly advanced, lying in ambush in the grass in front of Hill 391, fully camouflaged and motionless. Qiu Shaoyun's position was only about 60 meters from the enemy's position. The next day, the enemy dropped a large number of incendiary

bombs in the area where our troops had ambush them. Soon, the rapidly spreading fire destroyed Qiu Shaoyun's camouflage, and his clothes quickly caught fire as well.

There was a ditch nearby; a simple roll would have extinguished the flames. However, this would have revealed the infiltrative assault team to the enemy. To avoid detection, Qiu Shaoyun endured excruciating pain and carefully buried his submachine gun, grenades, and ammunition beneath his body. The fire raged fiercely, but Qiu Shaoyun remained motionless until his heroic sacrifice. Qiu Shaoyun upheld battlefield discipline with his life, securing victory in the battle.

To honor Qiu Shaoyun's heroic deeds, the Volunteer Army leadership posthumously awarded him a Special Merit Citation and the title of "First-Class Hero." The Standing Committee of the Supreme People's Assembly of North Korea posthumously awarded him the title of "Hero of the Democratic People's Republic of Korea," the Gold Star Medal, and the First-Class National Flag Medal. This was not only a commendation of the individual hero but also a profound tribute to the spirit of "discipline above life."

To explore the source of heroic spirit, we find the answer in the writings left behind by Qiu Shaoyun. In a letter to his family, he wrote: "After arriving in Korea, I must fight desperately, unafraid of death. What does my death matter if all the suffering people can live a good life like us?" In his application to join the Party, he solemnly vowed, "For the victory of the battle, I am willing to give everything." These simple yet firm words vividly demonstrate the lofty realm of a revolutionary soldier who closely linked his personal fate with the revolutionary cause.

After the war, officers and men of the Chinese People's Volunteer Army carved a line of large characters on the cliff face of Hill 391, where Qiu Shaoyun sacrificed his life: "Eternal Glory to Comrade Qiu Shaoyun, the great soldier who sacrificed himself for the whole and for victory!" From the revolutionary war years to the new journey of building a strong military, the discipline of the People's Army, tempered by the flames of war, has been deeply integrated into the blood of its officers and men, becoming a red gene passed down from generation to generation.

Viewpoint

"Discipline Poses Infinite Fighting Power"

■ Zhang Di

"What did this military parade show us?" After the parade commemorating the 80th anniversary of the victory of the Chinese People's War of Resistance Against Japanese Aggression and the World Anti-Fascist War, a netizen posted this question. In the heated discussion, one reply garnered numerous likes: "The parade showcased the soul of an army—its discipline and its style."

Discipline is to the army what water and air are to life. Strict discipline, and the conscious and unwavering adherence to it, are determined by the nature of our army and the mission it undertakes.

For over 90 years, the People's Army has continuously written glorious chapters of iron discipline. Even in hunger and cold, they would not take a single needle or thread from the masses; even when engulfed in flames, they remained steadfast until their lives were sacrificed; even in dire straits, they held their posts and bravely faced death… Those awe-inspiring and heroic moments all demonstrate the unwavering and conscious adherence to discipline by the officers and men. One crucial reason why the People's Army is invincible and unstoppable is its iron discipline.

At the Gutian All-Army Political Work Conference, President Xi Jinping emphasized "adhering to conscious and strict discipline" as a vital aspect of the PLA's fine tradition of political work. This profoundly reveals the laws governing the Party's leadership and discipline within the military. Currently, achieving the centenary goal of the PLA's founding on schedule and advancing the modernization of national defense and the armed forces with high quality requires us not only to place greater emphasis on discipline building but also to conduct in-depth research into the new situations, characteristics, and problems we face under the new circumstances, making discipline building more targeted and effective.

"Discipline is in me, discipline is in you, and discipline contains boundless fighting power." By inheriting and developing, and by inheriting and developing, by consistently "adhering to conscious and strict discipline," and by always ensuring orders are obeyed and actions are synchronized, our army will surely be united in purpose and forever remain invincible.

作战标图，少一个队标都不行！陆军某旅二营强化“练为战”思维

来源：解放军报 作者：刘家璇 于浩楠 责任编辑：王粲 2025-11-29

陆军某旅二营强化“练为战”思维——

作战标图，少一个队标都不行

■刘家璇　于浩楠

“队标全吗？敌方无人机哪去了？”前不久，陆军某旅二营组织参谋业务训练，该营张排长画完作战标图上交时，该营高营长突然发问.

“无人机这种小队标出现概率小，画上是‘锦上添花’，不标注也‘无伤大雅’.”张排长被问得一时有些发蒙，尴尬地挠了挠头说，“小队标没那么重要，作业时间不充裕就策略性放弃了.”

作战标图是指挥机构作战决心的直观呈现，参训人员根据敌情、我情通报，在地图上标绘出各种队标，进行战法打法研究. 有些参训人员认为：“‘箭头’画得锋利有劲、‘腰子’画得醒目美观就是好图，单个队标数量多、所占分数少，时间紧迫时可以选择性漏几个.”

“这是典型的‘考场思维’！”看着一脸茫然的张排长，高营长接连发问：“你不画上小队标，难道敌人就没有这种作战力量吗？一旦我展开战斗队形，敌人不会派无人机先期侦察吗？我向敌发起进攻，敌无人机不会引导火力打击吗？”

高营长的一番话，不仅点醒了张排长，也让在座的参训人员反思：现代战争参战力量呈井喷式增长，尤其是新域新质作战力量往往发挥着重要作用，作战标图必须充分考虑全局兵力兵器部署和战场态势发展. 随后，大家按照高营长的思路进行标图补画、战术分析，发现“敌”无人机可能深度融入步兵、炮兵等作战行动，为“敌”战法打法提供多种可能，顿感战场危机四伏.

“‘敌’可能在 1 号高地设置伏击阵地，并派出侦察无人机感知我主攻方向兵力配置……‘敌’穿越机可能从林地隐蔽飞行，打击我炮阵地……”补上遗漏的队标后，虽然战术分析的难度陡然增加，训练时间也延长，但大家不仅将单个队标的技战术性能掌握得一清二楚，还把其在作战进程中可能发挥的作用全部考虑在内.

“作战标图，因追求美观而遗漏队标，是‘练为看’的思维所致. 每个队标都代表一种作战力量，如果不能从实战角度看待队标，把它简单等同于‘分数符号’，忽视其对作战进程产生的影响，战时就可能打败仗！”随后复盘总结中，高营长毫不避讳指出问题所在，鼓励官兵深挖战训脱节的惯常做法，逼着大家用打仗思维思考训练、研究作战.

打破了作战标图的惯性套路，参训人员举一反三，主动查找身边脱离实战的问题，逐一研究解决. 训练结束后，张排长深有感触地说：“作战标图，少一个队标都不行！”

The 2nd Battalion of an Army Brigade Strengthens "Training for Combat" Mindset—Operational Maps: Not a Single Unit Marker Can Be Missing

■ Liu Jiaxuan, Yu Haonan

"Are all the unit marks complete? Where are the enemy drones?" Not long ago, the 2nd Battalion of an Army brigade organized staff training. When Platoon Leader Zhang finished drawing the operational map and submitted it, Battalion Commander Gao suddenly asked this question.

"The probability of a small squad marker like a drone appearing is low. Drawing it is 'icing on the cake,' and not marking it is 'harmless.'" Platoon Leader Zhang was momentarily stunned by the question, scratching his head awkwardly as he said, "Small squad markers aren't that important. If there isn't enough time for operations, we strategically skip them." Operational maps are a direct representation of the command organization's operational resolve. Based on enemy and friendly intelligence reports, trainees mark various squad markers on the map to study tactics and strategies. Some trainees believed that "a good map is one where the 'arrows' are drawn sharply and powerfully, and the 'kidneys' are drawn prominently and aesthetically pleasingly. There are many individual unit symbols, but they account for few points, so a few can be selectively omitted when time is tight."

"This is typical 'exam-day thinking'!" Seeing the bewildered Platoon Leader Zhang, Battalion Commander Gao asked repeatedly, "If you don't draw the unit symbols, doesn't the enemy have this kind of combat capability? Once I deploy in combat formation, won't the enemy send drones for advance reconnaissance? When I launch an attack, won't the enemy drones guide the firepower?" Battalion Commander Gao's words not only enlightened Platoon Leader Zhang but also made the trainees reflect: Modern warfare is experiencing an explosive growth in combat forces, especially new-domain and new-type combat forces, which often play a crucial role. Operational map drawing must fully consider the overall deployment of forces and weapons and the development of the battlefield situation. Subsequently, following Battalion Commander Gao's approach, everyone supplemented the map drawing and conducted tactical analysis, discovering that "enemy" drones could be deeply integrated into infantry and artillery operations, providing multiple possibilities for "enemy" tactics and maneuvers, making them acutely aware of the lurking dangers on the battlefield.

"The enemy might have set up an ambush position on Hill 1 and deployed reconnaissance drones to assess our troop deployment in our main attack direction… Enemy flying aircraft might covertly fly through the woodlands to strike our artillery positions…" After adding the missing unit insignia,

although the difficulty of tactical analysis increased sharply and training time was extended, everyone not only mastered the technical and tactical performance of each unit insignia but also considered all the roles they might play in the combat process.

“Omitting unit insignia on operational maps due to the pursuit of aesthetics is a result of a ‘training for show’ mentality. Each unit insignia represents a combat force. If we cannot view unit insignia from a practical combat perspective and simply equate them with ‘fraction symbols,’ ignoring their impact on the combat process, we may suffer defeat in wartime!” In the subsequent debriefing, Battalion Commander Gao pointed out the problem without hesitation, encouraging officers and men to delve into the common practice of disconnecting training and combat, forcing everyone to think about training and combat with a wartime mindset.

Breaking away from conventional operational mapping methods, trainees actively sought out and addressed issues detached from real-world combat scenarios. After the training, Platoon Leader Zhang remarked with deep feeling, “Operational mapping is incomplete without even a single unit marker!”

战鹰掠海 昼夜突击

■熊仲达 解放军报记者 向黎鸣

“起飞！”随着指挥员一声令下，数架满载弹药的战机依次升空，组成战斗编队向目标海域机动. 初冬时节，陆军某旅一场多机型、多课目、跨昼夜海上实弹射击训练火热展开.

记者在指挥塔台一体化指挥平台上看到，面对“敌”海面防空火力网封锁，战机编队到达预定空域后，迅速降低高度，实施超低空突防.

“只有在实战化条件下真打实练，才能锤炼飞行员的打赢本领. ”该旅领导介绍，此次训练，他们设置复杂条件、提高训练难度，战机单次升空要完成多弹种转换攻击，飞行员面对随机目标需自主完成战场态势研判，旨在倒逼官兵从“能飞”向“善战”突破.

在某空域，空中运动目标攻击课目紧张展开. 飞行员紧盯海天之间快速穿梭的靶机，精准锁定目标后，立即转入攻击航线. 当靶机采取规避措施后，机组成员默契配合，重新建立攻击角度，在最佳射击窗口果断发射，精准命中目标. 空域另一边，新飞行员精准控制飞行姿态，科学选择攻击弹种，成功命中浮动靶标，顺利完成首次实弹射击任务.

现场指挥员告诉记者，海上风向风速瞬息万变，运动目标突防性强，攻击难度陡增，要求飞行员必须具备“发现即摧毁”的过硬能力.

夜幕降临，战机经过补给后转入夜间实弹射击训练. 训练现场，编队长机利用机载观瞄设备发现数公里外的浮动靶标后，立即指挥僚机展开攻击. 随后，数枚火箭弹划破夜空，精准击毁目标.

“这次训练，实现了从单一武器运用到多武器协同、从固定目标打击到动态目标摧毁、从单机作战到编队攻防的训练目的. ”复盘会上，该旅领导表示，下一步，他们将利用采集的数据，围绕目标识别、武器运用、协同作战等关键环节制订补训计划，持续研练海上作战新招法，助推部队战斗力提升.

Editor: Wang Can

2025-11-30

An Army Brigade Conducts Live-Fire Maritime Training—Warplanes Skim the Sea, Day and Night Assault

■ Xiong Zhongda, PLA Daily Reporter, Xiang Liming

“Take off!” With a command from the commander, several combat aircraft [helicopters] fully loaded with ammunition took off in succession, forming a combat formation and maneuvering towards the target sea area. In early winter, a live-fire maritime training exercise involving multiple helicopter types, multiple subjects, and spanning day and night was in full swing at an Army brigade.

On the integrated command platform of the control tower, reporters witnessed that, facing the "enemy's" sea-based air defense network, the helicopter formation, after reaching the designated airspace, rapidly descended to low altitude and carried out ultra-low-altitude penetration.

"Only through realistic combat training can pilots hone their combat skills," the brigade leadership explained. This training exercise involved complex conditions and increased difficulty, requiring combat aircraft to perform multiple munition types in a single takeoff. Pilots were also required to independently assess the battlefield situation when facing random targets, aiming to push soldiers from simply "being able to fly" to "being adept at combat."

In a certain airspace, a moving target attack exercise was conducted. Pilots closely monitored target drones rapidly traversing the sea and sky, accurately locking onto targets and immediately transitioning to their attack routes. When the target drones took evasive action, the crew worked in perfect coordination, re-establishing their attack angles and decisively firing at the optimal firing window, accurately hitting the target. On the other side of the airspace, a new pilot precisely controlled his flight attitude, scientifically selected the type of munition, and successfully hit a floating target, completing his first live-fire exercise.

The on-site commander told reporters that wind direction and speed at sea are constantly changing, and moving targets have strong penetration capabilities, significantly increasing the difficulty of the attack and requiring pilots to possess the exceptional ability to "detect and destroy."

As night fell, the combat aircraft, after resupply, transitioned to live-fire nighttime training. At the training site, the lead aircraft, using its onboard observation and targeting equipment, located a floating target several kilometers away and immediately directed its wingmen to attack. Several rockets then streaked across the night sky, accurately destroying the target.

"This training achieved its objectives, progressing from single-weapon application to multi-weapon coordination, from fixed-target engagement to dynamic target destruction, and from single-aircraft combat to formation offense and defense," the brigade leadership stated at the debriefing meeting. They added that their next step will be to utilize the collected data to develop supplementary training plans focusing on key aspects such as target identification, weapon application, and coordinated operations, continuously refining new maritime combat tactics to enhance the unit's combat effectiveness.

第 74 集团军某旅："一装一册"提升装备"健康指数"

来源：解放军报 作者：张百阳 曾庆丰 责任编辑：王粲 2025-11-30

第 74 集团军某旅优化装备维护保养方法——

"一装一册"提升装备"健康指数"

■张百阳 曾庆丰

深秋的一个傍晚，第 74 集团军某旅组织的一场战备拉动训练落下帷幕. 这次训练中，该旅数十辆装甲车全程零故障完成高强度机动，按时抵达目标地域.

“装备关键时刻不掉链子，得益于平时维护保养到位. ”该旅领导表示，数月前的一次教训，让他们对装备日常维保需精细有了更深刻的认识.

那次跨区机动投送，该旅某连一辆装甲车突然“趴窝”，导致梯队行动延误. 官兵后来检查发现，故障竟是由一个不起眼的传动轴密封圈引起的.

“装备维护无小事，任何细节的疏漏在战场上都可能酿成严重后果. ”这名领导表示，经过深入调查，他们发现，各营连存在装备日常维护保养“重主体、轻附件”“重大件、轻小件”的现象. 比如，对发动机与底盘的保养往往认真细致，油路接头、电路保险丝等附件却常被忽视.

为此，该旅决定对装备日常维护保养进行进一步规范. 他们组织官兵系统学习装备技术手册，按照“逐台装备检、逐项性能测”原则，对每台装备进行摸底排查；按照“一装一册”原则，为装备建立技术档案，并将易损耗附件纳入重点监测清单，同时细化维护周期与更换标准；充分发扬军事民主，鼓励官兵围绕不同环境下的装备保养方法集思广益，梳理形成装备保养维护案例库.

笔者在某营车场看到，二级上士柏峰峰正在检查步战车的车长周视镜. “湿热环境下，镜腔内容易积水，如果不及时保养，观察瞄准精度会受影响. ”检查完密封圈后，他随即连接专用设备，缓缓注入氮气排除镜腔内的潮湿空气.

“如今，按照‘一装一册’对装备附件和易忽略部位进行‘特护’，已成为我们的工作常态. ”柏峰峰说.

“一装一册”有效提升装备“健康指数”. 在近期组织的多次拉动训练中，官兵普遍反映装备更可靠. 某连驾驶员苏光杰对此深有体会. 不久前，他接手了一台曾多次出现小故障的装甲车. 根据新的保养规范，苏光杰对每个易损件、关键连接点进行了细致排查和精心维护，让这辆装甲车的性能更加稳定.

“要想确保装备随时保持良好状态，必须持之以恒抓好精细化保养工作. ”该旅领导表示，他们将不断完善装备保养规范，提高装备在不同环境下的适应性、可靠性，为部队遂行任务提供坚实保障.

A 74th Group Army Brigade: “One Equipment, One Manual” Improves Equipment “Health Index”

Source: PLA Daily

Author: Zhang Baiyang, Zeng Qingfeng

Editor: Wang Can

2025-11-30

A Brigade of the 74th Group Army Optimizes Equipment Maintenance Methods—

"One Equipment, One Manual" Improves Equipment "Health Index"

■ Zhang Baiyang, Zeng Qingfeng

One late autumn evening, a combat readiness mobilization exercise organized by a brigade of the 74th Group Army concluded. During this exercise, dozens of armored vehicles from the brigade completed a high-intensity maneuver without any malfunctions and arrived at the target area on time.

"The equipment doesn't fail at critical moments, thanks to thorough routine maintenance," said the brigade's leadership. A lesson learned several months ago gave them a deeper understanding of the need for meticulous daily equipment maintenance.

During that cross-regional maneuver, an armored vehicle from a company of the brigade suddenly broke down, causing a delay in the echelon's movement. The soldiers later discovered that the malfunction was caused by an inconspicuous driveshaft seal.

"Equipment maintenance is no small matter; any oversight in details can have serious consequences on the battlefield," the leader stated. He explained that after in-depth investigation, they discovered a phenomenon in various battalions and companies where daily equipment maintenance focused on "main components but neglected accessories" and "major parts but neglected minor parts." For example, while engines and chassis maintenance was meticulous, accessories such as oil line connectors and electrical fuses were often overlooked.

Therefore, the brigade decided to further standardize daily equipment maintenance. They organized officers and men to systematically study equipment technical manuals, conducting a thorough inspection of each piece of equipment according to the principle of "inspecting each piece of equipment and testing each performance item." Following the principle of "one manual per piece of equipment," they established technical files for each piece of equipment, including easily worn accessories in a key monitoring list, while refining maintenance cycles and replacement standards. They also fully promoted military democracy, encouraging officers and men to brainstorm maintenance methods for different environments, compiling a case study library of equipment maintenance practices.

The author observed Sergeant Bai Fengfeng inspecting the commander's panoramic sight of an infantry fighting vehicle at a battalion's vehicle yard. "In hot and humid environments, water easily accumulates inside the scope cavity. If not maintained promptly, the accuracy of observation and

aiming will be affected." After checking the sealing ring, he immediately connected a special device and slowly injected nitrogen to expel the humid air from the scope cavity.

"Now, providing 'special care' for equipment accessories and easily overlooked parts according to the 'one piece of equipment, one manual' approach has become our routine," said Bai Fengfeng.

"One piece of equipment, one manual" effectively improves the equipment's "health index." In recent mobilization exercises, soldiers generally reported that the equipment was more reliable. Su Guangjie, a driver from a certain company, has a deep understanding of this. Not long ago, he took over an armored vehicle that had experienced several minor malfunctions. According to the new maintenance specifications, Su Guangjie meticulously inspected and carefully maintained every vulnerable part and key connection point, making the armored vehicle's performance more stable.

"To ensure that equipment is always in good condition, we must consistently focus on meticulous maintenance," said the brigade leadership. They will continuously improve equipment maintenance specifications, enhance the adaptability and reliability of equipment in different environments, and provide a solid guarantee for the troops to carry out their missions.

行走的"边防通"：他用 25 年，将千里边防刻进心里

来源：解放军生活 作者：张瑞潇　陈爱兵 申思萌 责任编辑：杜圣智 发布：2025-12-01

从军校学子到南疆卫士，20 余年来，谢亮用脚步丈量千里边防线，将铮铮誓言化作守护祖国南大门的实际行动，在山海之间书写强军兴军的时代答卷.

北部湾的晨雾在海面上铺开细纱，广西军区某部军官谢亮站在哨所前眺望远方. 年复一年的海风在他脸上刻下痕迹，却从未吹散他眼中的光芒. 手中的地图册被岁月磨出了毛边，每一处标记都是一段青春记忆——从青涩的军校学子到两鬓微霜的校官，他把人生最美好的年华，都献给了这片碧海蓝天.

晨光洒在波光粼粼的海面，也照亮了他肩章上那些默默诉说着忠诚与奉献的岁月印记.

行走的“边防通”

2005 年到边防连队后，谢亮坚持用双脚丈量每一寸边界线，将复杂的地形地貌深深刻在脑海里. 战友们都说，谢亮对边境地形的熟悉程度，已经达到了“地图在心中”的境界.

然而，自以为熟悉和真正精通之间，还存在着巨大的差距. 一次到边境现地勘察的任务中，停车休整时，军区领导突然指着不远处一个山头抛出一连串问题：“这里曾发生过什么战斗？敌人为什么把主攻方向选在这个不起眼的山头？民兵迫击炮分队的加入起到哪些决定性作用？”

对这些超出地图标注的深层考问，谢亮一时哑口无言. 他突然意识到：自己记得每条巡逻路的走向，却不知背后隐藏的历史和战略考量.

那晚，他在办公室墙上用力写下“知其然，更要知其所以然”10 个大字. 此后的 3 个月，他为熟记边境地区兵要地志，把常用数据整理成小册子，利用会前零散时间背记；为掌握新配发的标图系统，他每晚加班结束后都要标绘一份才回家，有时为实现一个队标的快捷操作或准确定位，反复揣摩上百次，力求形成“肌肉记忆”.

这份扎实的积累，在关键时刻发挥了决定性作用. 在某次演习中，谢亮负责落区疏散任务. 演习伊始，落区偏移的通知就打破了预定部署，新的警戒范围覆盖了 10 余艘正在作业的渔船.

面对突发特情，谢亮沉着冷静，迅速启动应急避险预案. 他第一时间通知渔政部门进行呼叫，同时编发预警短信，协调海警巡逻艇机动疏散. 在发现一艘老船因通信设备故障而纹丝不动时，他果断下令警戒艇用喊喇叭、吹哨子、敲船舷警示，最终确保所有船只安全撤离. 从接到通知到特情解除，整个过程及时高效.

军事设施的“守护人”

2019 年，谢亮成为广西壮族自治区军事设施保护委员会办公室负责人.

一次调研时，面对某废弃的雷达基座，他的心被刺痛了：长满青苔的观察哨、被藤蔓缠绕的炮兵工事，电缆有 3 处被挖断，导航设备几乎成了废铁.

“这些‘老伙计’还能适应未来战争吗？”抚摸着粗糙的混凝土，他意识到，守护不是简单看管，而是要让国防筋骨与时代同频共振.

检查归来，谢亮开启了推动老旧军事设施焕发新活力的一系列实践：报废了一批低价值的掩体工事，针对备战需求，对边海防一线的部分坑道、涵洞进行修缮和升级.

随着地方经济的快速发展，边海防沿线的土地被广泛开发. 面对地方开发区负责人“保护设施影响地方发展”的想法，谢亮翻开《中华人民共和国军事设施保护法》据理力争：“经济社会发展应和军事设施保护相协调. ”

他连夜起草《军地协同保护实施方案》，提出“补偿机制+联合巡查”的创新模式. 经过 7 轮磋商，终于推动成立跨部门协调小组，打破原先军地各管一摊的工作格局，构建起由地方党委、政府统管，军地有关部门和人民群众广泛参与的群众性防范网络.

而另一场更为艰难的挑战接踵而至. 2019 年冬，空军某部前来求助：某在建商品房突破机场限高区，严重威胁战机起降安全. 谢亮顶着寒风立马召集三级负责人，指着测绘图上的限高线，厉声对开发商说：“必须立即停工！”

开发商却狡辩：“我们有规划局批文！”“但你们未征求军事机关的意见！”谢亮现场调取《中华人民共和国军事设施保护法》，坚定地说：“未取得军方同意擅自施工，可依法拆除. ”经过几番坚持不懈的交涉，最终违规建筑被依法拆除.

在负责军事设施保护的几年里，谢亮推动广西边海防一线完成了一批重要军事设施的数字化改造. 他牵头构建的“军地联动、常态会商、快速响应”机制，实现了“守护旧阵地，赋能新战力”的设想.

致力创新的“冲锋者”

2021 年底调任新单位后，谢亮把目光投向更辽阔的海洋. 面对科技之变、战争之变，他像不停旋转的陀螺，在军事变革的潮头奋力冲锋.

某军分区所辖的某女民兵连曾是电影《海霞》的原型之一，这支创造过“渔船斗大舰，海上拼刺刀”传奇的连队，进入新时代后遇到了发展难题. 谢亮为女民兵连规划了转型蓝图. 为此，他跑遍多家高科技企业，建立专业人才数据库.

在中国电信调研时，负责汇报创新工作室的网络工程师马沁言，以思维严密、条理清晰的表达给他留下深刻印象.

当他邀请马沁言加入民兵队伍时，这位技术骨干最初顾虑重重：研发任务重，休息时间也很紧张. 谢亮多次登门拜访，详细向她解释“聚则为兵，散则为民”的弹性训练模式，耐心说明参与民兵活动对个人能力提升的助益.

“谢亮不仅理解我的顾虑，更让我懂得了履行国防义务的社会意义. ”马沁言这样说. 2025 年 7 月，马沁言正式加入了女民兵连.

8 月的练兵备战会操，谢亮特意点兵，让马沁言负责在指挥所操作她参与研发的信息系统. “要是无人机的画面能实时传回指挥所就好了！”首长无意中的一句话，被马沁言敏锐地捕捉到. 她发挥专业技术优势，现场修改代码. 经过为时两天的技术攻关，完成了程序的升级.

这次的出色表现，使她被评为了参训先进个人. 马沁言感慨地说：“这次的实践锻炼，也对我的技术研发工作产生了积极作用，让我对下一步的工作有了新的灵感. ”

在谢亮的推动下，如今的女民兵连汇聚了一批专业人才，既保持了“海霞”精神的特色优势，又注入了新的发展活力.

夕阳为北部湾的海面铺上一层金辉，结束一天的训练后，谢亮独自走向海堤. 他倚靠着栏杆，听着远处女民兵连的口号随风传来，铿锵有力. 他知道，这片海疆的明天，将由新生力量继续守护. 今日所有的创新与坚守，正汇聚成南中国海边一道无形却无比坚固的钢铁长城.（原文刊发于《解放军生活》杂志 2025 年第 11 期）

A Walking Border Guardian: He Spent 25 Years Etching the Thousand-Mile Border Defense into His Heart

Source: PLA Life

Author: Zhang Ruixiao, Chen Aibing, Shen Simeng

Editor: Du Shengzhi

Published: 2025-12-01

From military academy student to guardian of the southern border, Xie Liang has measured the thousand-mile border with his footsteps for over 20 years, transforming his solemn vows into concrete actions to protect the southern gateway of the motherland, writing a contemporary answer to the question of building a strong military between mountains and sea.

The morning mist of the Beibu Gulf spreads like a fine veil on the sea. Xie Liang, an officer of a unit of the Guangxi Military District, stands in front of his outpost, gazing into the distance. Year after year, the sea wind has etched its marks on his face, but it has never extinguished the light in his eyes. The atlas in his hand is worn rough by time; each mark is a memory of youth—from a green military academy student to a slightly graying officer, he has dedicated the best years of his life to this blue sea and sky.

The morning light spilled onto the shimmering sea, illuminating the silent testaments of loyalty and dedication etched on his epaulets.

A Walking “Border Expert”

After joining the border defense company in 2005, Xie Liang insisted on measuring every inch of the border with his own feet, deeply imprinting the complex terrain in his mind. His comrades said

that Xie Liang's familiarity with the border terrain had reached the point where he "had the map in his heart."

However, there was a huge gap between self-proclaimed familiarity and true mastery. During a border reconnaissance mission, while resting, a military leader suddenly pointed to a hill in the distance and bombarded him with a series of questions: "What battles have taken place here? Why did the enemy choose this inconspicuous hill as their main attack direction? What decisive role did the militia mortar unit play?" Faced with these profound questions that went beyond map markings, Xie Liang was momentarily speechless. He suddenly realized: he remembered the routes of every patrol, but he was unaware of the historical and strategic considerations behind them.

That night, he forcefully wrote the ten characters "Know not only what, but also why" on the office wall. For the next three months, to memorize the military geography of the border region, he compiled commonly used data into a booklet and memorized it during spare moments before meetings. To master the newly issued mapping system, he would map a map every night after working overtime before going home. Sometimes, to achieve quick operation or accurate positioning of a unit marker, he would repeatedly practice hundreds of times, striving to develop "muscle memory."

This solid foundation played a decisive role at a critical moment. In one exercise, Xie Liang was responsible for the evacuation of the landing area. At the beginning of the exercise, a notification of a landing area deviation disrupted the planned deployment, and the new warning area covered more than ten fishing boats that were operating.

Faced with this sudden emergency, Xie Liang remained calm and quickly activated the emergency evacuation plan. He immediately notified the fisheries administration department to make contact, while simultaneously sending out warning text messages and coordinating the evacuation of the coast guard patrol boats. Upon discovering an old ship motionless due to a communication equipment malfunction, he decisively ordered the patrol boats to use loudspeakers, whistles, and tapping on the hull to warn of potential threats, ultimately ensuring the safe evacuation of all vessels. From receiving the notification to the end of the emergency, the entire process was timely and efficient.

The "Guardian" of Military Facilities

In 2019, Xie Liang became the head of the Office of the Military Facilities Protection Committee of Guangxi Zhuang Autonomous Region.

During a survey, his heart ached upon seeing an abandoned radar base: moss-covered observation posts, artillery emplacements entangled in vines, cables severed in three places, and navigation equipment practically scrap metal.

“Can these ‘old buddies’ still adapt to future warfare?” Touching the rough concrete, he realized that protection was not simply about guarding, but about ensuring that the backbone of national defense resonated with the times.

After the inspection, Xie Liang initiated a series of initiatives to revitalize old military facilities: scrapping a number of low-value bunkers and repairing and upgrading some tunnels and culverts along the border and coastlines to meet wartime needs.

With the rapid development of the local economy, land along the border and coastal defense lines has been extensively developed. Faced with the concerns of local development zone officials that “protecting facilities affects local development,” Xie Liang, referring to the “Law of the People’s Republic of China on the Protection of Military Facilities,” argued that “economic and social development should be coordinated with the protection of military facilities.” He drafted the “Implementation Plan for Joint Military-Civilian Protection” overnight, proposing an innovative model of “compensation mechanism + joint patrols.” After seven rounds of consultations, a cross-departmental coordination group was finally established, breaking the previous fragmented approach between the military and local authorities and building a mass prevention network under the unified management of the local Party committee and government, with broad participation from relevant military and civilian departments and the general public.

However, an even more difficult challenge followed. In the winter of 2019, an Air Force unit sought assistance: a residential building under construction had exceeded the airport’s height restriction zone, seriously threatening the safety of fighter jet takeoffs and landings. Braving the cold wind, Xie Liang immediately summoned the three levels of responsible personnel, pointed to the height restriction line on the survey map, and sternly told the developer, “Construction must stop immediately!” The developer, however, argued, “We have approval from the planning bureau!” “But you haven’t consulted the military authorities!” Xie Liang immediately retrieved the “Law of the People’s Republic of China on the Protection of Military Facilities” and firmly stated, “Unauthorized construction without the military’s consent can be demolished according to law.” After several persistent negotiations, the illegal building was finally demolished according to law.

During his years in charge of protecting military facilities, Xie Liang promoted the digital transformation of a number of important military facilities along the Guangxi border and coastline. The “military-civilian linkage, regular consultation, and rapid response” mechanism he spearheaded realized the vision of “protecting old positions and empowering new combat capabilities.”

A “Frontline Vanguard” Dedicated to Innovation

After being transferred to a new unit at the end of 2021, Xie Liang turned his attention to the vast ocean. Facing technological and military changes, he, like a constantly spinning top, charged forward at the forefront of military transformation.

A female militia company under the jurisdiction of a military sub-district was one of the prototypes for the film “Hai Xia.” This company, which had created a legend of “fishing boats fighting large warships and bayonet charges at sea,” encountered development challenges in the new era. Xie Liang planned a transformation blueprint for the female militia company. To this end, he visited numerous high-tech enterprises and established a professional talent database.

During a research visit to China Telecom, Ma Qinyan, a network engineer responsible for reporting on the innovation studio, impressed him deeply with her rigorous thinking and clear expression.

When he invited Ma Qinyan to join the militia, this technical backbone initially had many concerns: the research and development tasks were heavy, and rest time was also very tight. Xie Liang visited her multiple times, explaining in detail the flexible training model of “united as soldiers, dispersed as civilians,” and patiently explaining the benefits of participating in militia activities for personal skill development.

“Xie Liang not only understood my concerns, but also made me understand the social significance of fulfilling national defense obligations,” Ma Qinyan said. In July 2025, Ma Qinyan officially joined the female militia company.

During the August training and preparation drills, Xie Liang specifically selected Ma Qinyan to operate the information system she had helped develop at the command post. “If only the drone footage could be transmitted back to the command post in real time!” A casual remark from the commander was keenly observed by Ma Qinyan. Leveraging her professional skills, she modified the code on-site. After two days of technical work, the program upgrade was completed. Her outstanding performance earned her the title of Advanced Individual in the Training. Ma Qinyan remarked, “This practical experience has also had a positive impact on my technical research and development work, giving me new inspiration for my next steps.”

Under Xie Liang’s leadership, the women’s militia company has now gathered a group of professional talents, maintaining the distinctive advantages of the “Haixia” spirit while injecting new vitality for development.

As the setting sun cast a golden glow over the Beibu Gulf, Xie Liang walked alone towards the seawall after a day of training. Leaning against the railing, he listened to the resounding slogans of the women’s militia company carried on the wind. He knew that the future of this sea frontier would continue to be protected by this new force. All the innovation and perseverance we have achieved today are converging into an invisible yet incredibly strong Great Wall of Steel along the South China Sea coast. 广开言路除弊革新

■李果霖 解放军报特约通讯员 刘志勇 摄影报道

近日，陆军某旅“夜袭阳明堡战斗模范连”围绕训练中暴露的问题，及时召开专题组织生活会. 会上，连队干部和训练骨干不避短、不遮丑，逐一对照问题查摆自身不足，深刻开展批评和自我批评，以刀口向内的姿态带领官兵改进训风.

专题组织生活会上，官兵开展批评和自我批评.

连队举行向党旗宣誓活动，激励官兵建功岗位.

该连注重畅通民主渠道，采取多种方式鼓励官兵说真话、提意见，积极反馈连队训练、管理等方面存在的问题.

不久前，一场训练刚结束，便有官兵提出“火药味”十足的意见，认为夜间战术训练敌情设置单一、缺乏突发情况应对环节，并批评部分干部组训重形式轻实效、战术动作示范不规范.

这一意见引起连队领导关注，连队党支部随即召开专题组织生活会，主动“揭短亮丑”. 连长率先反思：“夜间战术训练存在‘老套路’问题，本质上还是实战意识不强，没有真正按战斗力标准施训……”负责组训的干部诚恳检讨，自己做的示范动作标准不高，今后一定要加强自身训练，给官兵做好表率.

“夜袭阳明堡战斗中，革命先辈们毁伤敌机 24 架，首创我军步兵打飞机的光辉战例. 夜战是我连传统优势，必须要靠扎扎实实的训练传承和弘扬……”会上，官兵们再次重温光荣连史，决心认真整改问题、锤炼过硬本领.

“Model Company of the Night Raid on Yangmingbao” of an Army Brigade—Opening Channels for Feedback, Eliminating Malpractices, and Innovating

■ Li Guolin, Special Correspondent of PLA Daily, Liu Zhiyong, Photo Report

Recently, the “Model Company of the Night Raid on Yangmingbao” of an Army brigade held a special organizational meeting to address problems exposed during training. At the meeting, company officers and training leaders openly discussed their shortcomings and conducted in-depth self-criticism and criticism, leading the troops to improve training practices with a self-critical attitude.

At the special organizational meeting, officers and men conducted self-criticism and criticism.

The company held a swearing-in ceremony to the Party flag to encourage officers and men to make contributions in their posts.

The company emphasizes open democratic channels, employing various methods to encourage officers and men to speak frankly and offer opinions, actively providing feedback on problems in company training and management.

Not long ago, after a training exercise, some officers and men raised highly critical opinions, believing that the enemy scenario scenarios in the nighttime tactical training were too simplistic and lacked contingency response measures. They also criticized some officers for prioritizing form over substance in training and for their non-standard tactical demonstrations.

This feedback drew the attention of the company leadership, and the company's Party branch immediately convened a special organizational meeting to proactively address shortcomings. The company commander took the lead in reflecting: "The nighttime tactical training suffers from 'outdated methods,' which essentially stems from a weak sense of combat readiness and a failure to truly train according to combat effectiveness standards..." The officer in charge of training sincerely apologized, admitting that his demonstrations were not up to standard and promising to strengthen his own training to set a better example for the soldiers.

"During the night raid on Yangmingbao, our revolutionary predecessors destroyed 24 enemy aircraft, setting a glorious example of our army's infantry shooting down aircraft. Night combat is a traditional advantage of our company, and we must inherit and carry it forward through solid training..." At the meeting, officers and men once again reviewed the glorious history of the company and resolved to earnestly rectify problems and hone their skills.

踏访新时代边关丨踏雪送课：从奖台到讲台

来源：解放军报 作者：李小健 龙喜涛 责任编辑：郭妍菲 2025-12-01

踏雪送课：从奖台到讲台

■李小健 龙喜涛

风雪寒冬季，练兵正当时.

初冬的北疆腹地，已是一派银装素裹. 前段时间，北部战区陆军某边防旅举行群众性练兵比武，赛程为期 3 天，来自全旅各基层单位的 60 余名训练尖兵围绕 5 公里武装越野、战斗射击等 10 余个课目展开角逐，10 余名官兵以优异成绩荣获比武"先进个人".

比武结束后，走下奖台的几名官兵代表又站上该旅新兵营的讲台，向即将下连的新战友分享交流比武经历和成长故事.

台下，一名名新兵听得入神. 在训练尖兵的鼓舞下，他们满怀信心，期待着开启崭新的军旅人生.

巡逻队伍行进在茫茫雪野中. 龙喜涛 摄

“这份荣誉，属于连队的每一个人”

随着幕布徐徐拉开，第一个出场的某连代理连长周金来迈着坚定的步伐走上讲台. 此次比武，他凭借总分第一的成绩获“军官个人全能第一名”.

这一成绩来之不易，台上的周金来讲起了其中艰辛. 备战的日子里，他把训练计划安排得满满当当. 每天清晨 4 点半，他准时挎着水壶、背着背囊出现在跑道上；实弹射击训练，他趴在地上一练就是几个小时，手上磨出了厚厚的茧子……

比武那几天，平均气温低于零下 20℃，锋利的冷风最高达到 8 级，整个大地跟冰窖一样. 伴着风雪展开的第一个课目是 5 公里武装越野，大家冒着严寒奔跑在北疆的草原上.

比武中，参赛官兵陆续抵达 5 公里武装越野终点. 李朋儒 摄

起初，身处第一梯队的周金来脚步稳健、节奏平缓. 但 2 公里刚过，他患有旧伤的右膝开始隐隐作痛：“骨头缝里钻心地疼，右脚每一次落地，膝盖就像被铁钎狠狠凿了一下. ”疼痛顺着神经蔓延，像藤蔓一样缠住了周金来的整条右腿，赛道上的他速度慢了下来，与前面的战友渐渐拉开距离.

此时，连里战士组成的啦啦队举着一条红色横幅大喊着：“压倒一切困难，战胜一切敌人！”那是周金来每次带领连队官兵训练时喊出的口号，大家无数次感到筋疲力尽、想要放弃时，是这句话激起了心中斗志.

“不行，倒也要倒在终点线上！”听到呐喊声，周金来咬咬牙，只感到耳畔响起风的声音. 他心里念叨着口号，感受着脚下的律动，重新调整呼吸.

终于只剩最后一百米，冲刺！他的眼睛死死盯着前方的红线，一股激昂之情从心底迸发. 他甩开步子，拼命向前，夺得第一名.

“周连长，我们也想成为和您一样坚强的人，再和大家说一说您这些年的奋斗经历吧. ”一名新兵举手提问. 看着台下一张张青春洋溢的面庞，周金来的思绪回到多年前.

那年，他当兵入伍分到陆军某旅. 作为一名义务兵，第一次参加旅队的群众性练兵比武活动，他便夺得 5 公里武装越野第一名的好成绩，并打破该课目保持多年的纪录，同年荣立三等功. 2 年后，他考入军校. 读书期间，他参加学校各类军体活动 10 余次，取得优异成绩，被评为优秀毕业学员. 2021 年，为了圆心中的戍边梦，他毅然走进了北疆.

今年初，上级调任周金来到某边防连代理连长. 他很快发现挑战远比想象中大：“这里的条件比我之前驻守的连队更加艰苦. ”

“寒风吹冻土，边关冷刺骨. 一条巡逻路，一走一上午. ”这是多年前一位老兵留下的顺口溜. 连队下辖的宝格达山哨所更是该旅最艰苦的哨所之一，全年无霜期仅 80 天，室外最低温度曾接近零下 50℃，风力经常在 8 级以上.

北部战区陆军某边防旅官兵骑马巡逻. 李朋儒 摄

“训练有劲头，守边才有底气. ”周金来根据连队情况拟制训练强化计划，带着大家在训练场上互相鼓劲、比拼赶超. 短短一个月时间，连队官兵进步明显，在上级考核中，成绩优良率显著提升. 讲台上，周金来说：“这份荣誉，属于连队的每一个人. 未来，我会继续带着大家向前奔跑！”

“岁月飞逝，我对边关的热爱始终如初”

“我是一名戍边 15 年的老兵. 明年服役期满后，我就要离开连队，这可能是我最后一次参加比武，我不想军旅生涯留有遗憾……”讲台上，某连一级上士陈坚拿着一封皱巴巴的请战书，念到上面的文字时眼眶红了.

原来，考虑到年龄和身体等状况，连长本想劝陈坚认真考虑后再做是否参赛决定，谁知听到比武消息的陈坚一早就写好了请战书. 经过慎重考虑，连队主官最终同意了陈坚的请求.

战场饮食保障课目比武开始，陈坚面前的战场没有硝烟，却同样令人热血沸腾. 此时，气温已达到零下 20℃，刺骨的寒风吹得人手指发麻. 顾不上许多，陈坚迅速系上围裙. 随着刀刃与砧板接触，一阵细密急促的“哒哒”声在赛场响起. 土豆片从他手下飞出，薄厚均匀，码得整整齐齐. “轰——”火焰猛然蹿起，一道道菜品出锅，被准时送往指定地域. 最终，陈坚在该项课目中获得第二名的好成绩.

“班长，是什么样的信念支撑您戍边这么多年？”从喧嚣都市到茫茫北疆，大学生士兵丁显豹一时难以适应严酷的环境，他很想知道眼前这位老兵是如何坚持下来的.

陈坚讲起自己的故事. 15 年前的冬天，这位南方小伙来到祖国北疆. 在哈尔滨换乘时，他第一次见到厚厚的积雪，想也没想抓起一把就放在嘴里尝味道. 等抵达驻地，他更是被眼前的景象所震撼：室外呵气成霜，樟子松挂满冰晶，军犬的脸上结满冰碴.

“没想到，真正的边防生活循环往复甚至有些单调，要说不受打击那是假话. ”渐渐地，因为干工作没头绪，陈坚将戍守边关的理想抛到脑后，“当时就只有一个想法，熬够日子快点离开. ”那段时间，陈坚在笔记本上计算退伍日期，电话中和父母抱怨日子艰苦，训练时偶尔偷个懒，各项成绩直线下滑.

当兵第 2 年的除夕夜，陈坚和战友们执勤巡逻，深夜才回到哨所. 一直等待着他们的战友看到一行人风尘仆仆归来，赶紧端出来几盘热气腾腾的饺子.

雪夜里，听着牧民家里响起的爆竹声，看着窗外纷纷扬扬的雪花，陈坚仿佛在一瞬间长大了. 他明白：哨所很小，八九个人就组成了一个温暖的“家”；哨所也很大，他们守护的是身后亮起的万家灯火.

一望无际的草原上，除了孤寂和苦涩，更有青春与梦想. 陈坚留下来了，这一守就是整整 15 年. 这些年，他当过炊事员、给养员、炊事班长、司务长等，一直保持着昂扬的状态，多次被评为“四有”优秀士兵，2 次荣立三等功.

“岁月飞逝，我对边关的热爱始终如初. 希望台下的年轻同志不忘初心、坚守理想，你们一定不会后悔今天的选择！”陈坚说.

哨位上的士兵. 李朋儒 摄

“强能先强心，人要战胜的首先是自己”

“宋班长，我在新兵连的几次射击考核成绩都不理想，想听听您的射击秘诀. ”听了某连中士宋诚埔的故事，坐在台下的新兵刘佳胜急切地想从眼前这位“枪王”口中获取一些“真经”.

时间回到比武赛场. 战斗射击课目中，宋诚埔透过瞄准镜紧盯着靶心，强风带来的干扰，对他而言是个不小的考验. 稳定心神、调整呼吸，宋诚埔右手食指缓缓将扳机向后预压，整套动作一气呵成. “砰、砰、砰！”枪声接连响起. “6 号靶位，10 发 95 环. ”场下传来战友们的欢呼，宋诚埔夺得战斗射击课目第一名.

能练就如今的本领，宋诚埔下了很大功夫. 新兵时第一次实弹射击，他的成绩是全连倒数第一，连及格线都够不着. 班长说他眼睛虽然瞄着准星，心却飘到九霄云外.

为了练心态，他常常先跑个 5 公里武装越野，之后在极度疲劳的状态下据枪瞄准. 这些年，他在苦练中战胜了雨雪风霜，更战胜了自己.

“强能先强心，人要战胜的首先是自己. ”宋诚埔对着刘佳胜说，“射手要拥有一颗强大的心脏，放下恐惧，相信自己，我在未来的比武场上等着你. ”

分享会结束后，宋诚埔将自己的训练笔记交给刘佳胜，得到鼓励的刘佳胜慢慢有了信心. 风雪中，他主动给自己加码，战友们据枪 15 分钟，他挺上半个小时；力量不够，他将练习臂力的哑铃从 3 公斤增加到 5 公斤再到 10 公斤；为了让手更稳，他打开针线包，一根一根“穿针引线”……

11 月底的一次考核中，刘佳胜的射击成绩有了不小进步. 他决心下连后更加努力地训练，将来在赛场上和宋班长一较高下.

Visiting the Border in the New Era | Delivering Lessons in the Snow: From the Podium to the Lecture Hall

Author: Li Xiaojian, Long Xitao

Editor: Guo Yanfei

2025-12-01

Delivering Lessons in the Snow: From the Podium to the Lecture Hall

■ Li Xiaojian, Long Xitao In the cold winter, training is in full swing.

The northern border region in early winter is already covered in a blanket of snow. Recently, a border defense brigade of the Northern Theater Command Army held a mass training competition. The three-day competition saw over 60 elite soldiers from various grassroots units across the brigade compete in more than 10 events, including a 5-kilometer armed cross-country run and combat shooting. More than 10 soldiers were awarded the title of "Advanced Individual" for their outstanding performance.

After the competition, several soldiers who had stepped down from the podium stood on the lecture hall of the brigade's new recruit camp to share their competition experiences and growth stories with their new comrades who were about to be assigned to their units.

The new recruits listened attentively. Inspired by the experienced soldiers, they were full of confidence and looked forward to starting a new chapter in their military careers.

The patrol team marched through the vast snow-covered fields. (Photo by Long Xitao)

"This honor belongs to every single person in the company."

As the curtain slowly rose, Zhou Jinlai, the acting company commander of a certain company, strode confidently onto the stage. In this competition, he won first place in the "Officer Individual All-Around Competition" with the highest total score.

This achievement was hard-won, and Zhou Jinlai recounted the hardships he endured. During the preparation days, he filled his training schedule to the brim. Every morning at 4:30, he would be on the track on time, carrying a water bottle and a backpack; in live-fire training, he would practice lying on the ground for hours, developing thick calluses on his hands…

During the competition, the average temperature was below -20°C, and the sharp, cold winds reached up to level 8, making the entire earth feel like an icebox. The first event, carried out amidst the wind and snow, was a 5-kilometer armed cross-country run, with everyone braving the bitter cold to run across the grasslands of northern Xinjiang.

During the competition, participating officers and men successively reached the finish line of the 5-kilometer armed cross-country run. (Photo by Li Pengru) Initially, Zhou Jinlai, in the leading group, walked steadily and at a moderate pace. But just over 2 kilometers, his right knee, which

suffered from an old injury, began to ache: “It hurt like my bones were being pierced; every time my right foot landed, it felt like my knee was being brutally hammered by an iron chisel.” The pain spread along his nerves, wrapping around Zhou Jinlai’s entire right leg like vines. His pace slowed, and he gradually fell behind his comrades.

At this moment, the company’s cheerleading squad held up a red banner and shouted: “Overcome all difficulties, defeat all enemies!” This was the slogan Zhou Jinlai always shouted when leading his company in training. Countless times when they felt exhausted and wanted to give up, it was this phrase that ignited their fighting spirit.

“No, even if I fall, I’ll fall at the finish line!” Hearing the shouts, Zhou Jinlai gritted his teeth, only feeling the wind rushing past his ears. He silently recited the slogan, felt the rhythm of his feet, and readjusted his breathing.

With only one hundred meters left, he sprinted! His eyes were fixed on the red line ahead, a surge of excitement welling up from his heart. He strode forward, pushing himself to the limit, and won first place.

“Company Commander Zhou, we also want to be as strong as you. Tell us about your struggles over the years,” a new recruit raised his hand to ask. Looking at the youthful faces below the stage, Zhou Jinlai’s thoughts drifted back to many years ago.

That year, he enlisted in the army and was assigned to a brigade. As a conscript, in his first brigade-level mass training competition, he won first place in the 5-kilometer armed cross-country race, breaking the long-standing record for that event, and was awarded a third-class merit that same year. Two years later, he entered military academy. During his studies, he participated in more than ten military sports activities, achieving excellent results and being named an outstanding graduate. In 2021, to fulfill his dream of defending the border, he resolutely went to the northern frontier.

Earlier this year, Zhou Jinlai was transferred by his superiors to act as company commander of a border defense company. He quickly discovered the challenges were far greater than he had imagined: “The conditions here are much harsher than in the company I was previously stationed in.”

“The cold wind blows across the frozen earth, the border is bitterly cold. A patrol route takes a whole morning.” This is a rhyme left by an old soldier many years ago. The Baogeda Mountain outpost under the company’s jurisdiction is one of the most arduous outposts in the brigade, with only 80 frost-free days a year, outdoor temperatures reaching nearly -50°C, and winds frequently exceeding force 8.

Soldiers of a border defense brigade of the Northern Theater Command Army patrol on horseback. Photo by Li Pengru.

“With enthusiasm in training, we have confidence in guarding the border.” Zhou Jinlai formulated an intensive training plan based on the company’s situation, leading everyone to encourage each

other and compete on the training ground. In just one month, the company's soldiers made significant progress, and the rate of excellent and good results in the superior's assessment significantly improved. On the podium, Zhou Jinlai said, "This honor belongs to everyone in the company. In the future, I will continue to lead everyone forward!"

"Time flies, but my love for the border remains unchanged."

"I am a veteran who has guarded the border for 15 years. Next year, after my term of service expires, I will leave the company. This may be my last time participating in the competition, and I don't want my military career to have any regrets..." On the podium, Sergeant Chen Jian of a certain company held a crumpled letter of application to participate, his eyes reddening as he read the words.

It turned out that, considering his age and physical condition, the company commander had originally wanted to persuade Chen Jian to seriously consider his decision before participating. However, upon hearing the news of the competition, Chen Jian had already written his application. After careful consideration, the company commander finally agreed to Chen Jian's request.

The battlefield food support competition began. The battlefield before Chen Jian was without gunpowder smoke, yet it was equally exhilarating. At this time, the temperature had reached -20°C, and the biting wind made one's fingers numb. Without thinking, Chen Jian quickly tied on his apron. As the blade struck the cutting board, a rapid, crisp "tap-tap" sound filled the arena. Potato slices flew from his hands, evenly sliced and neatly arranged. "Boom—" Flames leaped up, and dishes were cooked and delivered to their designated areas on time. Ultimately, Chen Jian achieved second place in this event.

"Squad leader, what kind of belief has sustained you in guarding the border for so many years?" From the bustling city to the vast northern frontier, college student soldier Ding Xianbao struggled to adapt to the harsh environment and was eager to know how this veteran had persevered.

Chen Jian began to tell his story. Fifteen years ago, in winter, this young man from the south arrived in the northern border region of his motherland. While transferring trains in Harbin, he saw thick snow for the first time and, without thinking, grabbed a handful and tasted it. Upon arriving at his post, he was even more shocked by the scene before him: breath turned to frost outdoors, pine trees were covered in ice crystals, and even the faces of military dogs were covered in ice.

"I never imagined that real border life would be so repetitive and even monotonous. It would be a lie to say I wasn't discouraged." Gradually, feeling lost and directionless, Chen Jian forgot his ideal of guarding the border. "At that time, I only had one thought: endure it all and leave as soon as possible." During that period, Chen Jian calculated his discharge date in his notebook, complained to his parents on the phone about the hardships, occasionally slacked off during training, and his grades plummeted.

On New Year's Eve of his second year in the army, Chen Jian and his comrades were on patrol, returning to the outpost late at night. Their comrades, who had been waiting for them, quickly brought out several plates of steaming dumplings upon seeing their weary return.

On a snowy night, listening to the firecrackers from the herders' homes and watching the snowflakes fluttering outside the window, Chen Jian felt as if he had grown up in an instant. He understood: the outpost was small, eight or nine people forming a warm "home"; the outpost was also vast, they were guarding the lights of countless homes behind them.

On the boundless grassland, besides loneliness and bitterness, there was also youth and dreams. Chen Jian stayed, and he remained there for a full 15 years. During those years, he served as a cook, supply officer, head cook, and quartermaster, always maintaining a high level of morale. He was repeatedly recognized as an outstanding soldier with "four qualities" (good character, strong work ethic, and excellent discipline), and twice awarded the Third-Class Merit Citation.

"Time flies, but my love for the border remains unchanged. I hope the young comrades below will not forget their original aspirations and uphold their ideals. You will definitely not regret your choice today!" Chen Jian said.

Soldiers on guard post. Photo by Li Pengru

"Strengthening ability begins with strengthening the mind; the first person one must overcome is oneself."

"Sergeant Song, my shooting scores in basic training haven't been ideal. I'd like to hear your shooting secrets." After hearing the story of Sergeant Song Chengpu from a certain company, Liu Jiasheng, a new recruit sitting below the stage, eagerly wanted to learn some "true wisdom" from this "gun king."

Back to the competition field. In the combat shooting exercise, Song Chengpu stared intently at the bullseye through the scope. The interference from the strong wind was a considerable challenge for him. Calming his mind and adjusting his breathing, Song Chengpu slowly pulled the trigger back with his right index finger, the entire movement executed flawlessly. "Bang, bang, bang!" Gunshots rang out in succession. "Target number 6, 95 rings in 10 shots!" Cheers erupted from his comrades below; Song Chengpu had won first place in the combat shooting event.

Song Chengpu has put in tremendous effort to achieve his current skill. During his first live-fire shooting exercise as a recruit, his score was last in the entire company, failing even to reach the passing mark. His squad leader said that although his eyes were on the sights, his mind was elsewhere.

To train his mentality, he often ran a 5-kilometer armed cross-country run before aiming his rifle in a state of extreme fatigue. Over the years, he has overcome rain, snow, wind, and frost through rigorous training, and more importantly, he has conquered himself.

“Strengthening your mind comes before strengthening your skills; the first person you must conquer is yourself,” Song Chengpu told Liu Jiasheng. “A marksman needs a strong heart. Let go of your fear, believe in yourself, and I’ll be waiting for you on the competition field in the future.” After the sharing session, Song Chengpu handed Liu Jiasheng his training notes. Encouraged, Liu Jiasheng gradually gained confidence. In the wind and snow, he proactively pushed himself harder; while his comrades held their guns for 15 minutes, he held them for half an hour. Lacking strength, he increased the weights he used to train his arm strength from 3 kg to 5 kg and then to 10 kg. To make his hands more stable, he opened his sewing kit and threaded needles one by one… In an assessment at the end of November, Liu Jiasheng’s shooting score improved significantly. He resolved to train even harder after joining his unit, hoping to compete against Squad Leader Song on the field in the future.

西藏日喀则军分区“高原戍边模范营”官兵发扬优良传统坚守雪域边关

来源：解放军报 作者：李蕾 左南星 责任编辑：郭妍菲 2025-12-01

西藏日喀则军分区“高原戍边模范营”官兵发扬优良传统坚守雪域边关——

奉献之歌响彻风雪高原

■解放军报记者 李 蕾 特约通讯员 左南星

“高原戍边模范营”官兵在巡逻路上. 作者提供

秋去冬来，喜马拉雅山脉寒风凛冽. 记者乘车前往西藏日喀则军分区“高原戍边模范营”采访. 汽车沿着盘山公路行驶，即使大口吸着氧气，严重的高原反应还是让记者头晕目眩、心跳加速.

岗巴藏语意为“雪山下的村庄”，是“高原戍边模范营”驻地，平均海拔 4800 米，空气含氧量不足平原地区 50%.

记者一行抵达营区时，蒋教导员正在部署巡逻任务. 这次任务目的地是海拔 6000 余米的某冰川腹地，路途艰险. 经过申请，记者随队参加巡逻.

部署完毕，巡逻分队精神抖擞地出发了. 一路碾冰压雪，巡逻车在一处山脚停下. 作为带队干部，蒋教导员站在排头，带领大家向着雪峰深处跋涉.

高原天气说变就变，前一刻还艳阳高照，下一刻就大雪突降，被寒风裹挟的雪片钻进记者的衣袖、脖领，先化成水、又结成冰.

气候恶劣是常态，更大的危险藏在积雪下——这段巡逻路乱石丛生、陡峭难行，一不留神就容易踩空. 果然，行至一处雪坡，上等兵王子健脚下一滑陷进冰缝，下半身瞬间被冰雪吞没. 战友准备去帮忙，蒋教导员却叫住了大家：“别动！小心周围还有雪坑，让我来！”只见他小心翼翼地用脚探路，慢慢接近王子健，然后用手扒开周围积雪，确定安全后才叫人来帮忙，合力将王子健拉了出来.

深不见底的冰缝、水流湍急的暗河、冰凌遍布的冰坡……深一脚浅一脚地艰难向前迈进，过膝积雪下的重重危险，让记者的心时刻悬在嗓子眼. “巡逻一直这么危险吗？还是只有冬天如此？”休息时，记者向班长尚开洛提问. 他没有说话，而是先递过来一本巡逻日志.

日志里，超过八成的巡逻天数标注着雨、雪、冰雹、大雾等天气，泥石流、雪崩等字眼也时常出现，“老虎嘴”“一线天”等地名，看上去就让人心头一紧. “每次巡逻都很艰辛，每走一趟巡逻路，本领也会长一分. ”尚开洛说，在生命禁区卫国戍边，要有艰苦奋斗、牺牲奉献的决心.

那年深冬，该营韩志庚、王明贵两名战士冒着零下 30 多摄氏度的严寒，前往某山口执行任务. 任务途中，突如其来的暴风雪让他们迷失了方向. 失联断炊 3 天，两名战士凭借惊人毅力坚持下来. 然而，由于严重冻伤，他们不得不做手术……术后初愈，两人向前来看望的领导申请：我们想回连队帮大家干点力所能及的工作.

边关虽冷，热血难凉. 一茬茬官兵默默坚守在高原、牺牲奉献在边防，他们的事迹被记录在该营营史，有的官兵还将生命定格在雪域高原……

“边关虽苦甘如饴，愿与雪山共百年. ”一句在“高原戍边模范营”广为流传的诗，道出官兵的如磐信念：忠诚为魂、实干为本、奉献为荣.

建营以来，该营官兵将艰苦奋斗、牺牲奉献的革命精神融入血脉，在雪域高原建功立业：9 次获得全国全军表彰、5 次被授予荣誉称号，涌现出 5 名一等功臣、47 名二等功臣……

蒋教导员告诉记者，虽然该营所属点位平均海拔 5000 米以上，许多点位常年大雪封山，但官兵把上哨留哨当成肯定，把牺牲奉献当成荣誉，每逢哨所轮岗，官兵上哨留哨申请率始终保持在 90%以上.

曾有人感叹：“在岗巴，躺着也是奉献. ”可该营官兵对此并不认同，营门前的“戍边石”上镌刻着他们的誓言：练得硬功夫，守好每寸土.

次仁旦塔是如今全营响当当的训练尖子，曾在国际军事比赛中取得出色成绩. 然而，5 年前初到该营，他是靠着班长的搀扶才完成第一次巡逻.

那天夜里，次仁旦塔听着窗外呼啸的风声辗转难眠. 他知道，腿软的兵，守不好边境线. 次仁旦塔下定决心加强训练，身体刚刚恢复，他便制订了一份强训计划.

俯卧撑、五公里越野、冲山头……日复一日的强化训练让次仁旦塔的体能水平突飞猛进.

“高原的风专挑软骨头吹. ”该营官兵说，他们钟爱这片天然训练场，更要在极端恶劣的自然环境中自我加压，努力把骨头练得比钢枪还硬.

巡逻队员、班长西热尼玛坚守一线点位 10 余年，谈起对“艰苦奋斗、牺牲奉献”的理解，他说起了 5592 观察哨的故事.

“那个观察哨最开始只有一道矮墙，小风挡不住、大风没法挡. ”回忆初次上哨执行任务的情景，西热尼玛记忆犹新. 那年冬天，该营接上级命令设立 5592 观察哨. 由于海拔较高，土木工程作业难以开展，官兵只能从冻土中撬出石块，垒成矮墙. 此后，西热尼玛和战友们便在石窝子中执勤.

那时，气温低至零下 30 摄氏度，刺骨的寒风中，即使戴着厚厚的棉手套，不到几分钟双手也会冻得麻木.

“吃不了苦，就无法在边防扎根. ”说话间，西热尼玛摊开双手，冻疮愈合留下的瘢痕布满他粗糙的手掌. 这是他战风斗雪留下的痕迹，也是该营官兵特有的“勋章”.

巡逻仍在继续. 海拔不断攀升，风雪持续加大.

蒋教导员一直走在最前方为大家开路. 他匍匐在冰坡上，一只手紧握匕首抵住冰面，一只手举起锤子重重砸下. 沿着蒋教导员开出的路线，巡逻队员们一个接一个往冰川上攀爬. 由于体力消耗越来越大，一些战士的嘴唇变得乌青，但巡逻队伍没有一个人掉队. 经过数小时艰难跋涉，巡逻分队终于抵达目标点位. 来不及休息，官兵开始认真观察记录.

完成目标点位的观察任务后，巡逻分队踏上返程. 路上，尚开洛提议大家齐唱营歌《奋进吧，岗巴军人》.

“舍己利人寂苦困难不怕，神圣领土我捍卫，无惧热血洒……”雪域高原上，这首奉献之歌在群山间久久回荡.

战胜艰难险阻的力量源泉

艰苦奋斗、牺牲奉献，是人民军队在长期革命实践中积淀形成的宝贵精神品质. 它伴随着人民军队的创建而萌芽，在艰苦卓绝的斗争环境中逐渐锤炼定型，成为我军战胜一切艰难险阻的力量源泉.

1936 年 12 月，毛泽东同志在《中国革命战争的战略问题》中，首次总结提出“艰苦奋斗”，指出党在过去“艰苦奋斗的经历”所起到的教育人民、挽救新的亡国危险的重要作用. 之后，他多次告诫全党全军，要始终做到艰苦奋斗，并言行一致、一以贯之.

革命战争年代，井冈山的红米饭南瓜汤，催生了革命的星星之火；长征路上的野菜草根，支撑了北上抗日的滚滚铁流；陕北高原的小米饭粗布衣，孕育了新中国的灿烂曙光. 新中国成立后，“一不怕苦、二不怕死”的口号，由进藏筑路大军首先提出，在边境作战中充分彰显；抗美援朝战场上“一把炒面一把雪”，打出了国威军威. 改革开放以来，从坚决捍卫国家主权、安全和领土完整的英勇斗争到维护地区和世界和平的实际行动，从抢险救灾、保卫人民生命财产安全的顽强拼搏到支援国家经济社会建设的无私奉献，无不是人民军队传承发扬艰苦奋斗、牺牲奉献革命精神的生动写照.

回望来时路，无数官兵为了胜利不惜牺牲生命，冒着枪林弹雨强渡大渡河的十七勇士、狼牙山纵身跳崖的五壮士、舍身炸碉堡的董存瑞、奋勇堵枪眼的黄继光……艰苦奋斗、牺牲奉献的革命精神，是人民军队从胜利走向胜利的重要法宝. 展望新征程，这一精神将继续为我们履行好新时代使命任务提供坚实有力的支撑.

（高洁整理、王瑞泓作图）

时刻与优良传统“对标对表”

■刘维姣

“为什么我们大路不走走小路，为什么我们不恋闹市钻山沟，为什么我们脚踏雷火不后退，面对死神不低头……”这一首军旅歌曲，生动刻画出我军官兵艰苦奋斗、牺牲奉献的革命精神.

90 多年来，我们这支军队在艰苦斗争中诞生、在流血牺牲中成长. 艰苦奋斗、牺牲奉献的革命精神，鼓舞着我军敢于压倒一切困难，敢于压倒一切敌人. 进入新时代，习主席把“坚持艰苦奋斗、牺牲奉献的革命精神”作为我军政治工作优良传统的一项重要内容反复强调.

历史和实践充分证明，艰苦奋斗、牺牲奉献等优良传统是我军特有的政治优势和克敌制胜的法宝，是历史长河淘出的“真金”，必须倍加珍惜、长期坚持.

如今，受社会不良思想影响，个别官兵不比“贡献率”，攀比“得与失”；有的单位出现训练避难就易、训练强度点到为止等现象. 这些“怕艰苦”“怕奉献”，恰恰牺牲的是部队战斗力，损害的是人民对子弟兵的信任.

“自古军旅多艰险，从来为武少安闲. ”当前，实现建军一百年奋斗目标到了闯关夺隘的关键期、吃劲奋斗的攻坚期、加油加压的冲刺期，各级更要教育引导官兵时刻与我军优良传统“对标对表”，树立正确的利益观、得失观、生死观，进一步坚定热爱军营、扎根军营、建功军营的信念，为强国强军事业贡献力量.

Soldiers of the “Model Battalion for Border Defense on the Plateau” of the Shigatse Military Sub-district in Tibet/Xizang Uphold Fine Traditions and Guard the Snowy Border—

A Song of Dedication Resounds Across the Snowy Plateau

■PLA Daily Reporter Li Lei, Special Correspondent Zuo Nanxing

Soldiers of the “Model Battalion for Border Defense on the Plateau” on patrol. (Photo provided by the author)

Autumn turns to winter, and the Himalayas are bitterly cold. The reporter traveled by car to the “Model Battalion for Border Defense on the Plateau” of the Shigatse Military Sub-district in Tibet/Xizang for an interview. The car drove along the winding mountain road, and even with heavy oxygen, severe altitude sickness still made the reporter dizzy and had a rapid heartbeat.

Gamba, meaning “village under the snow-capped mountains” in Tibetan, is the garrison of a “model border defense battalion on the plateau,” with an average altitude of 4,800 meters and an oxygen content of less than 50% of that at sea level.

When the reporters arrived at the camp, Political Instructor Jiang was deploying patrol duties. The destination of this mission was the heart of a glacier at an altitude of over 6,000 meters, a treacherous route. After applying, the reporters joined the patrol.

After deployment, the patrol team set off in high spirits. Crushing through ice and snow, the patrol vehicle stopped at the foot of a mountain. As the team leader, Political Instructor Jiang stood at the head, leading everyone trekking deeper into the snow-capped peaks.

The weather on the plateau is unpredictable; one moment it's sunny, the next a sudden blizzard. Snowflakes, carried by the cold wind, seeped into the reporters' sleeves and collars, first melting into water, then freezing again.

Harsh weather is the norm, but a greater danger lurks beneath the snow—this patrol route is riddled with rocks, steep and difficult to traverse, and a single misstep can easily lead to a fall. Sure enough, upon reaching a snow slope, Private Wang Zijian slipped and fell into a crevasse, his lower body instantly swallowed by the ice and snow. His comrades prepared to help, but Political Instructor Jiang stopped them: "Don't move! Be careful, there are snow pits around. Let me handle this!" He carefully probed the path with his feet, slowly approaching Wang Zijian, then used his hands to clear away the surrounding snow. Only after confirming it was safe did he call for help, and together they pulled Wang Zijian out.

The bottomless crevasse, the swiftly flowing underground river, the icy slope covered in icicles… Struggling forward with each step, the numerous dangers beneath knee-deep snow kept the reporter's heart in his throat. "Is patrolling always this dangerous? Or is it only this dangerous in winter?" During a break, the reporter asked Squad Leader Shang Kailuo. He didn't answer, but instead handed over a patrol log.

In the logbook, over 80% of the patrol days were marked with weather conditions such as rain, snow, hail, and dense fog. Terms like mudslides and avalanches also frequently appeared, and place names like "Tiger's Mouth" and "A Line of Sky" immediately sent shivers down one's spine. "Every patrol is arduous, but with each patrol route, our skills improve," said Shang Kailuo. He emphasized that defending the border in this dangerous region requires a resolute determination to endure hardship and make sacrifices.

That winter, two soldiers from the battalion, Han Zhigeng and Wang Minggui, braved temperatures below -30 degrees Celsius to carry out a mission at a mountain pass. During the mission, a sudden blizzard disoriented them. Lost and without food for three days, the two soldiers persevered with astonishing willpower. However, due to severe frostbite, they had to undergo surgery… Upon recovering, the two approached their visiting leaders and requested permission to return to their unit to help with whatever work they could.

Though the border is cold, their passion remains undiminished. Generation after generation of officers and men have silently stood guard on the plateau, sacrificing themselves for the border defense. Their deeds are recorded in the battalion's history, and some have even given their lives on the snowy plateau…

"Though the border is harsh, it is sweet; we are willing to live a hundred years with the snow-capped mountains." A widely circulated poem in the "Model Border Guard Battalion" expresses

the unwavering belief of the officers and men: loyalty as their soul, pragmatism as their foundation, and dedication as their honor.

Since its establishment, the officers and men of this battalion have integrated the revolutionary spirit of hard work and sacrifice into their very being, achieving great success on the snowy plateau: receiving national and military commendations nine times, being awarded honorary titles five times, and producing five first-class merit recipients and 47 second-class merit recipients…

Political Instructor Jiang told reporters that although the average altitude of the posts where the battalion is located is over 5,000 meters, and many posts are snowbound year-round, the officers and men consider being on duty or staying on duty a recognition of their abilities and sacrifice as an honor. During shift changes, the application rate for being on duty or staying on duty consistently remains above 90%.

Some have lamented, “In Gamba, even lying down is a form of dedication.” But the soldiers of this battalion disagree. Their oath, engraved on the “Border Guarding Stone” at the camp gate, reads: “Train hard to defend every inch of this land.”

Tsering Tenzin is now a top trainee in the entire battalion, having achieved outstanding results in international military competitions. However, five years ago, when he first arrived at the battalion, he relied on his squad leader’s support to complete his first patrol.

That night, Tsering Tenzin tossed and turned, unable to sleep, listening to the howling wind outside his window. He knew that soldiers with weak legs couldn’t guard the border well. Tsering Tenzin resolved to intensify his training. As soon as he recovered, he devised an intensive training plan.

Push-ups, five-kilometer cross-country runs, hill climbs… day after day of intensive training led to a rapid improvement in Tsering Tenzin’s physical fitness.

“The winds of the plateau specifically target the weak,” the soldiers of the battalion say. They cherish this natural training ground and strive to push themselves even in the extremely harsh natural environment, working hard to make their bones harder than steel rifles. Patrolman and squad leader Xire Nima has steadfastly maintained his post for over ten years. When discussing his understanding of “hard work, sacrifice, and dedication,” he recounted the story of the 5592 observation post.

“That observation post initially consisted of only a low wall, offering no protection against light winds or strong ones,” Xire Nima recalled vividly, remembering his first mission. That winter, the battalion received orders to establish the 5592 observation post. Due to the high altitude, civil engineering work was difficult, so the soldiers had to pry stones from the frozen ground to build the low wall. From then on, Xire Nima and his comrades performed their duties in this makeshift stone hut.

At that time, temperatures plummeted to -30 degrees Celsius. Even with thick cotton gloves, hands would become numb with cold within minutes in the biting wind.

“If you can’t endure hardship, you can’t take root on the border,” Xire Nima said, spreading his hands to reveal rough palms covered in scars from healed frostbite. These are the marks he left from battling the wind and snow, and also the unique “medals” of the officers and men of this battalion.

The patrol continued. The altitude kept rising, and the wind and snow intensified.

Political Instructor Jiang always led the way, clearing the path for everyone. He crawled on the ice slope, one hand gripping a dagger against the ice, the other wielding a hammer and bringing it down heavily. Following the route cleared by Political Instructor Jiang, the patrol members climbed the glacier one after another. Due to increasing physical exhaustion, some soldiers’ lips turned blue, but no one in the patrol team fell behind. After several hours of arduous trekking, the patrol team finally reached the target point. Without time to rest, the officers and men began to carefully observe and record.

After completing the observation task at the target point, the patrol team began the return journey. On the way, Shang Kailuo suggested that everyone sing the battalion song, “Strive On, Gamba Soldiers!”

“Selfless dedication, benefiting others, unafraid of hardship and difficulty, I defend our sacred territory, fearless of shedding blood...” On the snowy plateau, this song of dedication echoed for a long time among the mountains.

The Source of Strength to Overcome Difficulties and Obstacles

Hard work, struggle, sacrifice, and dedication are precious spiritual qualities accumulated by the People’s Army in its long revolutionary practice. They sprouted with the founding of the People’s Army, gradually forged and solidified in the arduous struggle, becoming the source of strength for our army to overcome all difficulties and obstacles.

In December 1936, Comrade Mao Zedong, in “Strategic Problems of China’s Revolutionary War,” first summarized and proposed the concept of “hard work and struggle,” pointing out the important role played by the Party’s past “experience in hard work and struggle” in educating the people and saving the nation from new dangers of subjugation. Afterwards, he repeatedly admonished the entire Party and army to always uphold hard work and struggle, and to be consistent in word and deed.

During the revolutionary war years, the red rice and pumpkin soup of Jinggang Mountain ignited the spark of revolution; the wild vegetables and roots along the Long March sustained the mighty tide of resistance against Japan; the millet rice and coarse cloth of the Shaanxi Plateau nurtured the brilliant dawn of the new China. After the founding of the People’s Republic of China, the slogan “Fear neither hardship nor death” was first put forward by the army building roads in Tibet/Xizang, and was fully demonstrated in border battles. On the battlefield of the Korean War, the phrase “a handful of fried noodles and a handful of snow” showcased the might and power of

the nation and its army. Since the reform and opening up, from the heroic struggle to resolutely defend national sovereignty, security, and territorial integrity to the practical actions to maintain regional and world peace, from the tenacious struggle to rescue and protect the lives and property of the people to the selfless dedication to supporting national economic and social development, all these vividly portray the People's Army's inheritance and promotion of the revolutionary spirit of hard work, sacrifice, and dedication.

Looking back on the past, countless officers and men sacrificed their lives for victory: the seventeen brave warriors who crossed the Dadu River under heavy fire, the five heroes who jumped off the cliff at Langya Mountain, Dong Cunrui who sacrificed himself to blow up a pillbox, Huang Jiguang who bravely blocked a machine gun emplacement… The revolutionary spirit of hard work, sacrifice, and dedication is a crucial magic weapon for the People's Army to advance from victory to victory. Looking ahead to the new journey, this spirit will continue to provide solid and powerful support for us to fulfill our missions and tasks in the new era.

(Compiled by Gao Jie, Illustrations by Wang Ruihong)

Always Aligning with Fine Traditions

■ Liu Weijiao

"Why do we take the side roads instead of the main roads? Why do we venture into the mountains instead of the bustling city? Why do we stand firm against danger and fire? Why do we not bow our heads to death?" This military song vividly portrays the revolutionary spirit of our officers and men—their arduous struggle and selfless dedication.

For over 90 years, our army has been born in arduous struggle and grown through bloodshed and sacrifice. The revolutionary spirit of arduous struggle and selfless dedication inspires our army to dare to overcome all difficulties and all enemies. Entering the new era, President Xi Jinping has repeatedly emphasized "adhering to the revolutionary spirit of arduous struggle and selfless dedication" as an important part of the fine traditions of our army's political work. History and practice have fully proven that the fine traditions of arduous struggle and selfless dedication are our army's unique political advantage and magic weapon for defeating the enemy; they are "true gold" refined from the long river of history, and must be cherished and upheld for the long term.

Today, influenced by negative societal ideologies, some officers and men prioritize personal gain over contribution rates; some units exhibit phenomena such as avoiding challenging training and limiting training intensity. This fear of hardship and dedication sacrifices the combat effectiveness of the armed forces and damages the people's trust in their soldiers.

"Military service has always been fraught with peril, and those in the military rarely find peace." Currently, achieving the centenary goal of the People's Liberation Army is at a critical juncture, a crucial period of overcoming obstacles and achieving breakthroughs, a period of arduous struggle and intense effort. All levels must educate and guide officers and men to constantly align

themselves with the fine traditions of the People's Liberation Army, establish correct views on interests, gains and losses, and life and death, further strengthen their belief in loving, dedicating themselves to, and contributing to the cause of building a strong nation and a strong military.

陆军某旅：基层指挥员跨军兵种编组力量

来源：解放军报 作者：黄可越 陈典宏 康子湛 责任编辑：孙悦 2025-12-01

联合训练重心下沉带来新景观

基层指挥员跨军兵种编组力量

解放军报讯 黄可越、记者陈典宏报道：日前，一场网上指挥对抗训练在陆军某旅模拟训练室火热展开. 走进指挥方舱，记者发现，连续指挥调动诸要素打出一套凌厉"组合拳"的，竟是该旅的一名合成营营长.

"基层指挥员下联合棋、蹚联合路，如今在旅里已成为常态. "该旅领导介绍，近期他们持续组织旅带营网上指挥对抗训练，交战双方全程自主判断、自主处置、自主对抗，战场海空情实时传递流转，陆航、远火、特战等要素全程参与，着力破解基层指挥员在跨军兵种对抗训练中，联合意识不强、战术素养不够等问题.

前不久，陆军某旅组织实弹射击训练. 解放军报特约通讯员 刘志勇摄

今年以来，该旅将联合作战指挥人才培养范围向营以下拓展，对基层指挥员遂行联合作战任务能力指标进行细化，要求其在精通本单位兵力兵器作战编组和指挥运用基础上，系统掌握其他军兵种在联合作战中的指挥协同、作战保障等相关知识和技能，着力打造联合作战"即插即用"的指挥模块.

夺点控要中未形成合力，机降分队与主攻分队衔接不畅；引导打击中未有效区分火力，对临机目标火力毁伤效果不佳……训练结束，一份问题清单随即“出炉”，里面详细罗列双方在情报侦搜、协同配合、引导打击等环节出现的失误及原因.

“现在我们不仅要会指挥地面力量，还要熟悉如何协调空中、海上等多种作战要素. ”曾多次参加网上指挥对抗训练的该旅干部谢铖深有感触. 记者深入该旅训练场发现，如今，学海图、练引导、绘航线等课目已成为基层指挥员训练的常规动作，有力推动基层指挥员的“末端思维”逐步向联合作战“体系思维”转变.

“过硬的指挥打仗能力，是各级指挥员的看家本领. ”该旅领导介绍，为破解基层指挥员参与联合训练机会少、战场环境构设难等矛盾问题，他们在常态组织模拟对抗训练的同时，还选派营连干部赴兄弟单位实地研学，邀请军队院校专家开展专题授课，为基层指挥员系统讲解联合指挥协同要点.

据统计，今年该旅累计组织网上指挥对抗训练数十场，通过集智攻关、实践检验形成多项战法训法，一批具备联合思维、掌握协同要领的基层指挥员正快速成长.

编 后

努力提升联合素养

■康子湛

感知战场态势、定下战斗决心……纵观近年来全军各大演习演训，一个显著变化就是基层指挥员在联合作战指挥链上的角色越来越重要、地位越来越突出. 随着体系作战成为未来战场的必然趋势，基层指挥员作为作战体系中的“神经末梢”，其联合素养、全局观念、应变能力的高低直接影响作战效能的发挥.

陆军某旅着力提升基层指挥员联合素养的探索启示我们：作战离不开联合，每名基层指挥员只有主动顺应联合训练重心下沉的新要求，不断强化联合思维，努力提升联合素养，才能在联合作战中大有作为、稳操胜券.

Army Brigade: Grassroots Commanders Form Cross-Branch Forces

Source: PLA Daily

Author: Huang Keyue, Chen Dianhong, Kang Zizhan

2025-12-01

Combined-arms Training Focus Shifts Downward, Bringing New Landscape

Grassroots Commanders Form Cross-Branch Forces

PLA Daily News (Huang Keyue, Chen Dianhong): Recently, an online command and control exercise was held in the simulation training room of an Army brigade. Entering the command cabin, the reporter discovered that the one continuously commanding and mobilizing various elements to deliver a powerful "combination punch" was none other than a battalion commander of the brigade's combined-arms battalion.

"Grassroots commanders playing combined-arms chess and exploring combined-arms paths has now become the norm in the brigade," the brigade's leadership explained. Recently, they have been continuously organizing brigade-led online command and control exercises, with both sides independently assessing, handling, and engaging in combat. The battlefield air and sea situation is transmitted and processed in real time, with army aviation, long-range artillery, and special operations forces participating throughout. This aims to address the problems of weak combined-arms awareness and insufficient tactical skills among grassroots commanders in cross-branch combat training.

Not long ago, an army brigade organized live-fire training. (Photo by Liu Zhiyong, special correspondent for the PLA Daily)

Since the beginning of this year, the brigade has expanded the scope of combined-arms operations command training to include personnel below the battalion level, refining the performance indicators for grassroots commanders in combined-arms operations. They are required to not only be proficient in the operational organization and command of their own unit's forces and weapons, but also systematically master the relevant knowledge and skills of other branches in combined-arms operations, including command coordination and operational support. The aim is to create a "plug-and-play" command module for combined-arms operations.

During the capture of key points, a lack of synergy was observed; the air assault unit and the main attack unit had poor coordination; during guided strikes, firepower was not effectively differentiated, resulting in poor damage to impending targets… After the training, a list of problems was immediately compiled, detailing the errors and causes in intelligence gathering, coordination, and guided strikes.

"Now we not only need to be able to command ground forces, but also be familiar with how to coordinate various combat elements such as air and sea operations," said Xie Cheng, an officer from the brigade who has participated in numerous online command and control exercises. Reporters visited the brigade's training grounds and found that nautical chart study, guidance training, and route mapping have become routine exercises for grassroots commanders, effectively promoting a shift from "end-point thinking" to "systematic thinking" in combined-arms operations.

"Strong command and combat capabilities are the essential skills for commanders at all levels," the brigade leadership explained. To address the challenges of limited opportunities for grassroots commanders to participate in combined-arms training and difficulties in constructing battlefield

environments, they regularly organize simulated combat training, send battalion and company officers to other units for on-site study, and invite experts from military academies to conduct specialized lectures, systematically explaining the key points of combined-arms command and coordination to grassroots commanders.

Statistics show that the brigade has organized dozens of online command and control exercises this year. Through collaborative research and practical testing, they have developed numerous tactics and training methods, and a group of grassroots commanders with combined-arms thinking and a grasp of coordination are rapidly developing.

Editor's Note

Striving to Enhance Combined-arms Competence

■ Kang Zizhan

Perceiving the battlefield situation and making combat decisions… Looking at the major military exercises and training sessions in recent years, a significant change is that the role and prominence of grassroots commanders in the combined-arms operations command chain are becoming increasingly important. As system-of-systems warfare becomes the inevitable trend of the future battlefield, the level of combined-arms competence, overall perspective, and adaptability of grassroots commanders, as the "nerve endings" of the combat system, directly affects the effectiveness of combat operations.

The exploration by a certain army brigade in focusing on enhancing the combined-arms competence of grassroots commanders inspires us that combat cannot be separated from combined-arms operations. Only by proactively adapting to the new requirements of the downward shift in the focus of combined-arms training, continuously strengthening combined-arms thinking, and striving to improve combined-arms competence can each grassroots commander achieve great things and secure victory in combined-arms operations.

拒绝“拔高凑数”！这场标兵评选的转变让典型真正立得住

来源：解放军报 作者：严子昌 魏 龙 责任编辑：孙悦 2025-12-02

第 71 集团军某旅某营严格标兵评选标准——

事迹不过硬主动不参评

■严子昌 魏 龙

初冬清晨，第 71 集团军某旅某营支援保障连尹指导员正在整理“十类标兵”推荐人员资料. 笔者翻看资料，发现一个奇怪之处——明明是评选“十类标兵”，可该连只推荐了 7 名官兵，有 3 类标兵人选推荐表中空空如也.

“这 3 类标兵，是放弃参评了吗？”“不是放弃，是确实没有符合条件的人选. ”尹指导员告诉笔者，以“理论学习标兵”为例，日常学习上课大家都很认真，但距离成为标兵仍有差距，“放在以前，可能有人觉得找个差不多的战士报上去就行，但现在各连都严格推荐标准，明确事迹不过硬就不参评. ”

从“能报则报”到“宁缺毋滥”，这一转变还需从头说起.

今年初，为激发官兵创先争优热情动力，该营组织开展标兵评选活动，区分“理论学习”“精武强能”等 10 个类别，由各连推荐人选，再逐级评定，定期举行颁奖仪式.

起初一段时间，各连确实涌现出不少训练尖子和模范标兵，但时间长了，问题开始出现：个别连队即使没有合适人选，也要把表现一般的同志“拔高”成各类尖子进行上报.

结果可想而知——颁奖现场，台下官兵议论纷纷：“他上周体能考核成绩还没我好，怎么就成了‘精武强能标兵’”“公差勤务能躲就躲，居然还能获评‘爱岗敬业标兵’”“标兵事迹不过硬，评选成了走过场”……

这些声音很快传到该营杨教导员耳中，他发现原本为了树立身边榜样、激发官兵斗志的评选活动，似乎正在逐渐沦为“为了评选而评选”的形式主义，不仅没有起到应有作用，反而让一些官兵产生负面情绪，甚至影响了组织威信.

经过一番调研，该营党委意识到，出现此类情况的原因，在于部分连队主官没有正确理解评选活动的真正用意，错误地将其当作争彩头的机会：有人担心上报的少了，显得自己连队不够积极，或者工作做得不到位，所以硬凑推荐人选；也有人觉得，多一个标兵就是多一份成绩，于是能报则报、多多益善.

找准病灶，对症下药. 该营党委一方面强调，开展标兵评选的目的是发挥先进典型辐射带动作用，激励官兵见贤思齐、建功军营，引导连队主官树立正确政绩观；另一方面进一步明确评选标准，不看材料看实绩，要求被推荐者必须在大项任务或比武考核中有实打实的过硬表现，经得起群众评议和实践检验. 而且符合条件的有几个报几个，不必硬凑数.

最近一次跨区机动任务中，某连修理技师王瑞连续 12 小时奋战在装备保障一线. 面对突发故障，他连夜带人抢修，确保全部装备按时抵达. 任务结束后，经过民主评议、支部推荐、营党委审核，王瑞被评为“精武强能标兵”. 不仅他的事迹被制成短视频在电子板报展播，其本人还代表营队参加了上级组织的强军故事会.

夕阳西下，营区宣传栏前，几名战士正驻足观看最新一期“龙虎榜”. 照片中的王瑞，脸上还沾着油污. “选他当标兵，大家都信服！”列兵陶建胜告诉笔者，“对标这样的榜样，我们的努力方向更加明晰. ”

Rejecting “Inflated Quotas”! This Shift in Model Soldier Selection Ensures Truly Recognizable Role Models

Source: PLA Daily

Author: Yan Zichang, Wei Long

Editor: Sun Yue

2025-12-02

A Battalion of a Brigade of the 71st Group Army Strictly Adheres to Model Soldier Selection Standards—Those with Insufficient Deeds Will Not Participate

■ Yan Zichang, Wei Long

On a crisp early winter morning, Political Instructor Yin of the Support and Logistics Company of a Battalion of a Brigade of the 71st Group Army was organizing the materials for recommended candidates for the “Ten Categories of Model Soldiers.” Upon reviewing the materials, the author noticed a strange phenomenon—although it was supposed to be a selection of “Ten Categories of Model Soldiers,” the company had only recommended 7 officers and men, with the recommendation lists for 3 categories of model soldiers completely blank.

“Did these three types of model soldiers give up their chances of being selected?” “No, they didn’t give up; there simply weren’t any qualified candidates.” Political Instructor Yin told the reporter, taking “model of theoretical learning” as an example: everyone studies diligently in class, but there’s still a gap between their current performance and that of a model soldier. “In the past, some might have thought they could just submit any reasonably good soldier, but now each company has strict recommendation standards, clearly stating that those with less impressive achievements won’t be considered.”

From “report if you can” to “better to have none than a bad one,” this shift needs to be explained from the beginning.

At the beginning of this year, to motivate officers and men to strive for excellence, the battalion organized a model soldier selection activity, dividing candidates into 10 categories, including “theoretical learning” and “military skills enhancement.” Each company recommended candidates, who were then evaluated at each level, with regular award ceremonies.

Initially, many training aces and model soldiers did emerge in each company, but over time, problems began to appear: some companies, even without suitable candidates, would “elevate” comrades with average performance to various categories and submit them for evaluation.

The result was predictable—at the awards ceremony, soldiers murmured amongst themselves: “His physical fitness test score last week wasn’t even as good as mine, how did he become a ‘Model

Soldier in Skill and Ability'?" "He avoids official duties whenever possible, yet he still gets a 'Model Soldier in Dedication' award." "The model soldier's deeds aren't solid; the selection process has become a formality..." These comments quickly reached the ears of Political Instructor Yang of the battalion. He realized that the selection activity, originally intended to establish role models and inspire morale, seemed to be gradually degenerating into a formalistic exercise "selection for the sake of selection," not only failing to achieve its intended purpose but also generating negative emotions among some soldiers and even affecting the organization's prestige.

After some investigation, the battalion's Party Committee realized that the reason for this situation was that some company commanders had not correctly understood the true purpose of the selection activity, mistakenly treating it as an opportunity to gain recognition: some worried that submitting too few nominations would make their company appear less proactive or inadequate, so they hastily compiled a list of recommended candidates; others felt that more model soldiers meant more achievements, so they submitted as many as possible.

Identifying the root cause and addressing it accordingly, the battalion's Party Committee emphasized two points. First, the purpose of the model soldier selection was to leverage the radiating and inspiring effect of advanced role models, motivating officers and men to emulate the virtuous and contribute to the military, and guiding company commanders to establish a correct view of performance. Second, it further clarified the selection criteria, focusing on actual achievements rather than written materials, requiring nominees to have solid performance in major tasks or competitions, capable of withstanding public evaluation and practical testing. Moreover, only those who meet the criteria should be nominated; there's no need to artificially inflate the numbers.

In a recent cross-regional maneuver mission, Wang Rui, a repair technician from a certain company, worked continuously for 12 hours on the front line of equipment support. Faced with a sudden malfunction, he led a team through the night to repair it, ensuring all equipment arrived on time. After the mission, following democratic evaluation, branch recommendation, and review by the battalion's Party Committee, Wang Rui was awarded the title of "Model Soldier of Excellent Military Skills and Abilities." Not only was his story made into a short video and displayed on the electronic bulletin board, but he also represented the battalion in a military story-telling event organized by higher authorities.

As the sun sets, several soldiers stand in front of the camp's bulletin board, looking at the latest "Model Soldier" list. Wang Rui, in the photo, still has oil stains on his face. "Everyone agrees with choosing him as a model soldier!" Private Tao Jiansheng told the reporter. "By setting an example like him, our direction for improvement becomes clearer."

从批评到解决问题，晾衣场的“小革新”里藏着带兵大智慧

来源：解放军报 作者：常桂苹 王麒淞 责任编辑：孙悦 2025-12-02

小小塑料夹，巧解战士忧

■常桂苹 解放军报特约通讯员 王麒淞

晨光熹微，第78集团军某旅某连晾衣场内，一排排迷彩服随着微风轻轻晃动. 一眼看去，有几件衣服格外显眼——有的在衣领下方或是臂兜位置，用加粗的黑色记号笔醒目地写着名字，有的在袖口上，歪歪扭扭地缝着彩色小布条.

“这像什么样子！”注意到这个情况，该连国指导员当天下午利用教育时间，告诫大家要爱护军装，维护军人形象，“军装是军人的外在标志，随意涂写和私自缝改，不仅违反条令条例，还反映出个别同志作风纪律松懈. 从今天起，所有军装上的标记，必须清理干净！”

国指导员本以为这件事情到此结束了，没承想很快就有几名战士找上门来. 一级上士代学玉的脸上写满了为难：“指导员，您说的道理我们都懂，我们也绝对没有不尊重军装的意思，但迷彩服真的太容易拿错了.”

这话言之有理. 国指导员没有反驳，而是建议他们把名字写在衣服里面. 闻言，另一名战士挠了挠头：“我以前就是把名字写在衣服里面的，可还是会被战友拿错. 有一次，我3天都没找到自己的迷彩服，最后是在另一个班的战友那里找到的.”

“衣服不合身还能忍忍，但训练起来摸爬滚打，万一把别人的衣服弄坏了，不好交代……”听着几名战士的话，国指导员不由想起自己担任排长时，也曾因拿错迷彩服感到困扰. 他意识到，简单的批评和禁止，确实于事无补. “就这么一件小事，长时间困扰战士，得想办法解决了.”国指导员暗自思忖.

没过几天，该连快递室收到了一批塑料夹子，每个夹子上都有写名字的地方，这是国指导员专门订购的. 他将夹子分发给大家：“以后晾衣服，就把夹子夹在衣领上，上面写上名字，不伤军装、一目了然.”他还建议各个班排使用不同样式的衣架，方便区分. 从那以后，该连晾衣场内，再没有出现拿错衣服的现象.

事后，国指导员借由这件小事，给连队干部骨干上了一堂课：“战士看似出格的举动，背后也许有着不得已的原因. 作为带兵人，不能只看表面现象批评了事，只有找到症结所在，才能把问题彻底解决掉.”

From Criticism to Problem Solving: Small Innovations in the Clothesline Drying Area Reveal Great Wisdom in Military Leadership

2025-12-02

Small Plastic Clips, Cleverly Solving Soldiers' Problems

■ Chang Guiping, Special Correspondent for PLA Daily, Wang Qisong

At dawn, in the clothesline of a company of a brigade of the 78th Group Army, rows of camouflage uniforms swayed gently in the breeze. At first glance, several uniforms stood out—some had names prominently written in bold black marker below the collar or on the arm pockets, while others had small, crookedly sewn colorful strips of cloth on their cuffs.

"What kind of mess is this!" Noticing this, the company's political instructor used the afternoon's training session to warn everyone to cherish their uniforms and uphold the image of soldiers. "Uniforms are the outward symbol of a soldier. Randomly writing on or altering them not only violates regulations but also reflects a lack of discipline among some comrades. From today onwards, all markings on uniforms must be completely removed!"

The political instructor thought the matter was over, but unexpectedly, several soldiers soon came to him. First-Class Sergeant Dai Xueyu's face was full of difficulty: "Political Instructor, we understand what you're saying, and we absolutely didn't mean to disrespect the uniforms, but camouflage uniforms are really too easy to mix up."

This made sense. The political instructor didn't argue but suggested they write their names inside their uniforms. Upon hearing this, another soldier scratched his head: "I used to write my name inside my uniform, but my comrades still took the wrong one. Once, I couldn't find my camouflage uniform for three days, and finally found it at the hands of a comrade from another platoon."

"I can tolerate ill-fitting uniforms, but during training, crawling and rolling around, if I damage someone else's uniform, it's hard to explain..." Listening to the soldiers' words, Political Instructor Guo couldn't help but recall his own experience as a platoon leader, when he was also troubled by taking the wrong uniform. He realized that simple criticism and prohibitions were indeed ineffective. "Such a small matter has been bothering the soldiers for so long; I have to find a solution," Political Instructor Guo thought to himself.

A few days later, the company's delivery room received a batch of plastic clips, each with a place to write a name. These were specially ordered by Political Instructor Guo. He distributed the clips to everyone: "From now on, when hanging clothes to dry, clip them to the collar and write your name on them. It won't damage the uniform, and it's easy to see at a glance." He also suggested that each platoon and squad use different styles of hangers for easier identification. From then on, there were no more instances of mistaken clothes being taken from the company's drying yard.

Afterwards, Political Instructor Guo used this small incident to teach the company's officers and key personnel a lesson: "A soldier's seemingly outrageous behavior may have an unavoidable reason behind it. As leaders, we cannot simply criticize based on superficial phenomena; only by finding the root cause can we completely solve the problem."

"长剑"在转型中砺锋——来自中部战区陆军某旅的观察报告

来源：中国军网-解放军报 作者：程春蕾 王政杰 韩成 责任编辑：郭妍菲 发布：2025-12-02

"长剑"在转型中砺锋

——来自中部战区陆军某旅的观察报告

■程春蕾 王政杰 解放军报记者 韩 成

滨海滩头，涛声阵阵. 前不久，中部战区陆军某旅一场全要素演练紧张展开. 即将进入实弹射击的关键时刻，海上天色突变、云雾漫卷，目标渐渐隐匿于雾色之中.

"打，还是不打？"火炮刚占领发射阵地便遭此特情，该旅某连炮班班长黄佳豪临危不乱，快速分析研判目标数据后，果断定下打击决心. 1 秒、2 秒、3 秒……寻得最佳发射时机，黄佳豪随即下达指令，炮弹呼啸出膛，精准命中目标.

"敢打的自信和底气，来自向战转型跨越、勇于攻坚突破的淬火砺剑. "该旅领导告诉记者，近年来，他们加速推进人员"换脑"强能、武器平台升级、战法打法创新，嵌入体系锤炼新质战斗力，官兵险难环境应变、全域作战能力全面提升.

一轮射击完毕，天空下起大雨，"战场"能见度更低. 黄佳豪带领炮班，迅速转移阵地. 放眼演兵场，多辆战车冒雨疾驰，一道道车辙向远方延伸……

该旅远火分队进行实弹射击（资料照片）. 朱岩 摄

一群官兵的视距拓展，一支部队的视距超越

起飞，搜索，回传……某连侦察班班长蔡勇轻拨操作杆，侦察无人机“依令”升空，向数公里外的目标方向飞去. 很快，一组组目标坐标参数滚动呈现在手持终端屏幕上，蔡勇娴熟整编处理，第一时间将数据流转至火力分队.

不多时，炮弹呼啸过顶的声音在耳畔响起. 感受到科技赋能练兵带来的酣畅，这位有着十多年兵龄的老兵难掩激动.

几个月前，新的无人侦察装备刚刚配发连队，几个月后的实兵演练，旅里便将全部目标设在侦察兵的视距之外，倒逼官兵争分夺秒提升有人无人协同作战能力. 多次经历侦察平台和技术升级的蔡勇感慨：一架无人机的加持，能把侦察时间单位压缩至秒级，身处科技飞速发展的时代，每个人都要给自己能力提升按下“快进键”.

超视距，是目光的超越，也是思维的超越. 在炮兵部队，侦察兵被视作“炮兵之眼”，蔡勇作为旅里侦察骨干深谙其理. 回想过往，只要距离“敌人”和炮火足够近，就可以磨炼出锐利的“眼睛”. 然而，近年来演训场上变化不断，侦察目标越来越远，一次次超出视距限制，让他不断刷新对“眼睛”的认知.

几年前，营里换装新装备不久组织专业比武，官兵都没想到，曾多次摘金夺银的蔡勇，在新型侦察仪器操作环节，竟败在一名大学生新兵手下. 大家更没想到，当天比武结束，蔡勇便捧着教材，找到那位新兵拜师学艺. 在蔡勇看来，这并非不光彩的事，恰恰相反，借助时代“推背感”乘势而上，才是新时代官兵该有的状态.

“头脑的视距决定‘眼睛’的视距，关键靠知识和技术支撑.”这些年，紧跟军队转型步伐，该旅武器装备、作战平台、人员能力加快迭代升级，从人工观测器材到车载侦察系统，再到旅属无人机、连属小型无人机等，侦察设备接续更新；协同侦察、组网建链等能力升级培训教学压茬推进，侦察视界从平面到立体，侦察手段从靠双眼到靠芯片，蔡勇明显感到“推背感”成倍递增.

为此，蔡勇马不停蹄加油加压，跟厂家学装备原理、找院校寻教材案例、到兄弟单位学实战经验，下足苦功夫，不断补齐短板. 去年，在该旅侦察专业比武中，蔡勇带领全班斩获侦察车组第一名，获评侦察“尖刀班”.

“科技创新驱动着每一名官兵奋勇前进.”该旅领导介绍，着眼增强“视距之外”的本领，全旅官兵换装之前抢先“换脑”，前瞻研究新战法、新训法，一次次开启转型创新的加速度：大学生新兵、瞄准手孙韬运用数字电路知识计算瞄准参数，提升了火力打击反应速度，在比武中摘得桂冠；运输班班长张帆研制重装运输车铁路装载定位装置，大幅提高了定位精度、缩短了装载时间；副营长王欢总结出某火力精算法，有效提升打击效能……

一群官兵的视距拓展，折射出一支部队的视距超越. 从武器装备信息化指挥平台升级，到信息模块通用性改装，再到各类战法打法的研练创新，该旅紧盯科技之变，实现了多炮种

一网联动、多级指挥机构信息互通、多维手段辅助战场决策. 这些年，他们一刻不停歇，向立体侦察、精准打击的“新视距”全速攻坚.

“超越视距只是起点，超越对手才是最终目标. ”该旅领导说，“百年行军走到了吃劲的关键期，我们惟有奋力攻坚不松懈、铆足干劲加油冲，才能如期交出合格答卷，不负党和人民的重托. ”

肩负“全域作战”使命，打开全域练兵视野

“那是一个不断破茧的过程. ”这几年辗转多地练兵，远火营火炮技师李显一的心得体会，全部记在他工作电脑中的故障案例集里.

今年盛夏，李显一随队南下到某地驻训. 开训没多久，湿热的天气便给他出了一道难题：一门火炮没有任何征兆就“闹起了脾气”，炮管无法调转方向. 李显一打开电脑里的故障案例集，对照记录的故障现象，对涉及到的零件模块、机械部件逐个筛查，也没找出症结所在.

就在李显一苦寻良方之际，配电箱表面凝结的细密露珠，让他眼前一亮. 他打开箱门，一眼便发现一段发霉烧蚀的连接线.

“与北方干燥气候不同，金属配电箱在潮湿的南方极易受潮. ”返回宿营地，李显一把这次故障收录到故障案例集，之后召集维修骨干连夜摸索出物理干燥除湿、加装防水膜、定期清理积盐等多种对策办法.

近年来，部队训练环境、地域快速切换，是李显一的直观感受. 记者点击鼠标查看李显一的故障案例集，一条条涵盖多地域、多天候的排障经验背后，一幅全域练兵图景徐徐铺展.

“作为一支新质作战力量，肩负‘全域作战’使命向前冲，需要打开全域练兵视野. ”远火营指挥员说，装备列装几年来，他们成为全军各大演兵场的“常客”，从大漠戈壁到塞外草原，从中原山地到东南沿海，部队战斗力随着一次次转战不断提升：装备列装当年快速形成战斗力；武器系统升级当年打出首发精准命中的好成绩……

“切换陌生环境就是在切换练兵对手. ”一次大漠机动，意外的机械故障让火炮技师发现，不起眼的细微沙尘足以让战车“趴窝”；一次沿海练兵，火炮驾驶员在瓢泼大雨中发现，泥泞的滩涂是导致油料急速消耗的重要因素……经历一次次陌生地域磨砺，该旅官兵对战场的感知更清晰：战争不可能发生在理想环境里，缩短战场适应期，就是把握克敌制胜的先机.

“快速转换的战场锤炼快速应变的能力. ”辗转多地练兵这些年，某连连长曲加坡总感觉自己时间不够用，前一阵子还在海上组织航渡训练，没多久又搭上军列奔赴中原某陌生地域组织实弹射击. 如何应对高强度练兵节奏？“想在前、干在先！”曲加坡在机动途中就召集

干部骨干展开筹划，分析演练地域特点、研判特情、集智谋划应对之策. 凭借充足的超前准备，他们在实弹射击考核中反应迅速，打得又准又快，夺得“神炮连”奖牌.

从班长到连长，曲加坡跟随越走越远的练兵足迹快速成长，见证着旅队整体的跨越. 打赢使命催征，全旅官兵不断向极限发起挑战，开展火炮极限距离射击、无人机极限条件实飞等课目探索，一大批新的战法打法不断涌现，牵引部队战斗力建设不断提速.

“棋子”高速联动，“棋盘”体系释能

一名班长的指挥权限有多大？

某连炮班班长刘超底气十足地告诉记者：“战场有多大，权限就有多大. ”起初，记者认为这是刘超理想的“将来时”，深入采访之后发现，这是刘超正在经历的“进行时”.

一次实弹演练，该旅打破常规，首次增设了针对连、排、班等小编组战场指挥决策能力的检验内容，让包括刘超在内的不少末端指挥骨干一时措手不及.

这次“初体验”让刘超印象深刻. 不同以往，演练中他要先从作战想定中分析研判自身的作战任务和面对的“敌情”，之后还要根据作战地域、作战地形等，自主确定射击弹种、选择发射时机、处置各类战术情况. “以前知道打哪里、打得准就行，现在还要弄清楚怎么打、跟谁打. ”刘超一语道出变化.

“放眼近期世界几场局部冲突，体系支撑下的‘小群多路’作战，考验顶层指挥，更考验小编组联动本领. ”随着不断向体系练兵深水区迈进，该旅官兵越发感到夯实体系底盘的重要性，每个“棋子”都高速联动起来，整个“棋盘”体系才会释放出最大能量.

近年来，他们结合使命任务，在实战化练兵中不断加大对单兵单装、小编组作战单元的能力检验，通过不断增加战术协同要素、构设典型作战场景等，最大限度提升战训耦合度；紧盯短板弱项灵活调整内容、升级难度，将每个末端嵌入体系链条，把“硬指头”攥成体系“铁拳头”.

“体系作战指挥人才需要体系环境培养. ”该旅领导告诉记者，他们通过院校送学、跨兵种培训、体系演习实践等方式，全面探索体系作战指挥人才培养路径，助推各级末端指挥骨干不断向体系多能型转变.

转变，刻在班长刘超的能力跃升曲线上——

今年初的一次训练中，刘超以营指挥员参谋助手身份，坐上营火力打击指挥席，参与任务筹划部署、作战课题研究. 刘超提出的“细化小编组、点对点指挥”等建议被采纳. 回顾成长经历，刘超感慨：“体系根基越牢，练兵视野越开阔. ”

转变，写在班长郑宏的任务经历中——

一次多军兵种演习，远火营指控班班长郑宏与火箭军、空军战友携手制订“火力规划”，保障远火营高效嵌入体系打击链条，完成立体攻防研练，探索多项战法. 他说，越来越多的协同任务淬练，让他胜任体系战位的信心越来越足.

信心从何而来？探寻历史，让记者找到了答案——

该旅前身为晋察冀军区组建的首支炮兵部队，向来以善于攻坚、敢打硬仗著称. 穿越历史风云，从骡马化到机械化，再到信息化，他们一路走来始终攻坚打头阵、转型当先锋. “回望烽火来时路，奋楫强军新征程，我们目标信念更笃定、使命责任更强烈、冲锋锐气更充盈. ”该旅领导这样说.

Published: 2025-12-02

“The Long Sword” Sharpens Its Edge During Transformation

—An Observation Report from a Brigade of the Central Theater Command Army

■ Cheng Chunlei, Wang Zhengjie, PLA Daily Reporter Han Cheng

On the beach, the waves crashed. Not long ago, a full-element exercise was being conducted by a brigade of the Central Theater Command Army. Just as they were about to enter the critical moment of live-fire shooting, the sky over the sea suddenly changed, clouds and fog rolled in, and the target gradually disappeared into the fog.

“To fire or not to fire?” The artillery had just occupied its firing position when this unexpected situation occurred. Huang Jiahao, the artillery squad leader of a company in the brigade, remained calm under pressure. After quickly analyzing and judging the target data, he decisively made the decision to strike. 1 second, 2 seconds, 3 seconds… Finding the best time to fire, Huang Jiahao immediately gave the order, and the shell roared out of the barrel, accurately hitting the target. “The confidence and strength to fight come from the tempering and honing of skills through transformation towards combat readiness and daring to overcome challenges,” the brigade’s leadership told reporters. In recent years, they have accelerated personnel “brainstorming” to enhance capabilities, upgraded weapon platforms, and innovated tactics and methods, embedding these into the system to hone new combat capabilities. This has comprehensively improved the

officers' and men' ability to respond to dangerous environments and their all-domain combat capabilities.

After a round of firing, heavy rain began to fall, further reducing visibility on the "battlefield." Huang Jiahao led his artillery squad to quickly relocate. Looking across the training ground, multiple armored vehicles sped through the rain, leaving tracks stretching into the distance…

The brigade's long-range artillery unit conducted live-fire exercises (archival photo). Photo by Zhu Yan. Expanding the visual range of a group of officers and men, surpassing the visual range of an entire unit. Takeoff, search, transmission… Cai Yong, the squad leader of a reconnaissance platoon in a certain company, lightly flicked the control lever, and the reconnaissance drone took off "on command," flying towards a target several kilometers away. Soon, sets of target coordinate parameters scrolled across the handheld terminal screen. Cai Yong skillfully processed and organized the data, immediately transmitting it to the fire support unit. Shortly after, the sound of artillery shells whistling overhead filled his ears. Experiencing the exhilarating feeling of training empowered by technology, this veteran with over ten years of service could not hide his excitement.

Just a few months ago, new unmanned reconnaissance equipment had been issued to the company. A few months later, in a live-fire exercise, the brigade set all targets beyond the reconnaissance soldiers' visual range, forcing officers and men to race against time to improve their manned-unmanned collaborative combat capabilities. Having experienced multiple upgrades to reconnaissance platforms and technologies, Cai Yong remarked: "With the support of a drone, reconnaissance time can be compressed to the second level. In this era of rapid technological development, everyone must press the 'fast forward' button on improving their capabilities."

Beyond visual range is not only about exceeding sight, but also about exceeding thought. In artillery units, reconnaissance soldiers are considered the "eyes of the artillery," a principle Cai Yong, as a reconnaissance backbone of the brigade, deeply understands. Looking back, as long as one was close enough to the "enemy" and artillery fire, one could hone sharp "eyes." However, in recent years, the training grounds have been constantly changing, with reconnaissance targets becoming increasingly distant, repeatedly exceeding visual range limits, constantly refreshing his understanding of what constitutes "eyes." Several years ago, shortly after the battalion received new equipment, a skills competition was held. To the soldiers' surprise, Cai Yong, a multiple gold and silver medalist, was defeated by a college student recruit in the operation of the new reconnaissance equipment. Even more unexpectedly, after the competition, Cai Yong, carrying his textbook, sought out the recruit to learn from him. In Cai Yong's view, this was not a disgrace; on the contrary, seizing the opportunity presented by the times was the proper state for soldiers in the new era.

"The mental range determines the visual range of the eyes, and the key lies in knowledge and technical support." In recent years, keeping pace with the military's transformation, the brigade has rapidly upgraded its weaponry, combat platforms, and personnel capabilities. From manual observation equipment to vehicle-mounted reconnaissance systems, and then to brigade-level and

company-level small drones, reconnaissance equipment has been continuously updated. Training and instruction on collaborative reconnaissance and network building capabilities have been steadily advancing. The reconnaissance perspective has expanded from two-dimensional to three-dimensional, and reconnaissance methods have evolved from relying on sight to relying on chips. Cai Yong has clearly felt the "push" in his reconnaissance capabilities increasing exponentially.

To this end, Cai Yong worked tirelessly, studying equipment principles from manufacturers, seeking textbooks and case studies from universities, and learning practical experience from other units, putting in tremendous effort to continuously address his shortcomings. Last year, in the brigade's reconnaissance skills competition, Cai Yong led his platoon to first place in the reconnaissance vehicle group competition, earning the title of "Sharp Knife Platoon" in reconnaissance.

"Technological innovation drives every officer and soldier to forge ahead," the brigade leadership explained. Focusing on enhancing their "beyond visual range" capabilities, the entire brigade proactively "re-engineered" their strategies before upgrading their equipment, conducting forward-looking research on new tactics and training methods, repeatedly accelerating transformation and innovation: Sun Tao, a college graduate recruit and aiming expert, used digital circuit knowledge to calculate aiming parameters, improving firepower response speed and winning the championship in the competition; Zhang Fan, the transport platoon leader, developed a railway loading and positioning device for heavy-duty transport vehicles, significantly improving positioning accuracy and shortening loading time; Deputy Battalion Commander Wang Huan summarized a precise firepower algorithm, effectively improving strike effectiveness… The expanded visual range of this group of officers and men reflects the extended visual range of the entire unit. From upgrading the information-based command platform for weaponry and equipment to modifying information modules for universality, and then to researching and innovating various tactics and methods, the brigade has kept a close eye on technological changes, achieving multi-type artillery network linkage, information sharing among multi-level command organizations, and multi-dimensional means to assist battlefield decision-making. In recent years, they have relentlessly pursued the "new visual range" of three-dimensional reconnaissance and precision strikes.

"Beyond visual range is just the starting point; surpassing the enemy is the ultimate goal," said the brigade's leadership. "The century-long march has reached a critical stage. Only by striving relentlessly and pushing forward with full force can we deliver a satisfactory answer on schedule and live up to the trust of the Party and the people." Shouldering the mission of "all-domain operations," opening up a comprehensive training perspective

"It's a process of constantly breaking out of the cocoon." Li Xianyi, an artillery technician in the long-range artillery battalion, has recorded all his insights from training in various locations over the past few years in a collection of fault case studies on his work computer.

This summer, Li Xianyi accompanied his team south to a certain location for training. Shortly after training began, the humid weather presented him with a problem: an artillery piece suddenly malfunctioned, its barrel unable to be turned. Li Xianyi opened his computer's troubleshooting case collection, meticulously checking each recorded malfunction, module, and mechanical component, but couldn't find the root cause.

As Li Xianyi struggled to find a solution, the fine dew condensing on the surface of the electrical distribution box gave him a clue. He opened the box and immediately spotted a moldy, burnt section of wiring.

"Unlike the dry climate of the north, metal distribution boxes are extremely susceptible to moisture in the humid south." Back at the campsite, Li Xianyi added this malfunction to his case collection and then gathered key maintenance personnel to work through the night, devising various countermeasures such as physical drying and dehumidification, installing waterproof membranes, and regularly cleaning accumulated salt.

In recent years, the rapid changes in the training environment and terrain have been a direct observation for Li Xianyi. A reporter clicked to view Li Xianyi's case collection; behind each troubleshooting experience spanning multiple regions and weather conditions, a picture of comprehensive training across all terrains gradually unfolds. "As a new type of combat force, shouldering the mission of 'all-domain operations' and charging forward, we need to broaden our training horizons across all domains," said the commander of the long-range artillery battalion. In the years since their equipment was commissioned, they have become "regulars" at major military training grounds across the country, from the Gobi Desert to the grasslands beyond the Great Wall, from the Central Plains mountains to the southeast coast. The unit's combat effectiveness has continuously improved with each relocation: equipment quickly achieved combat readiness in the same year it was commissioned; weapon systems achieved first-shot accuracy hits in the same year they were upgraded…

"Switching to an unfamiliar environment is like switching training opponents." During a desert maneuver, an unexpected mechanical failure led artillery technicians to discover that seemingly insignificant fine dust could cause a vehicle to break down; during a coastal training exercise, artillery drivers discovered in torrential rain that muddy beaches were a major factor in the rapid consumption of fuel… Through repeated tempering in unfamiliar terrains, the officers and men of this brigade have gained a clearer understanding of the battlefield: war cannot occur in an ideal environment; shortening the battlefield adaptation period is key to seizing the initiative in defeating the enemy.

"Rapidly changing battlefields hone the ability to respond quickly." After years of training in various locations, Company Commander Qu Jiapo always feels there's not enough time. Just recently, he was organizing a sea voyage training exercise, and shortly after, he boarded a military train to conduct live-fire exercises in an unfamiliar area of the Central Plains. How to cope with such a high-intensity training pace? "Think ahead and act first!" Qu Jiapo convened officers and

key personnel during the deployment to plan, analyze the characteristics of the training area, assess special situations, and brainstorm countermeasures. Thanks to ample advance preparation, they reacted quickly and accurately in the live-fire assessment, winning the “Divine Artillery Company” medal.

From squad leader to company commander, Qu Jiapo has grown rapidly alongside the ever-expanding training grounds, witnessing the brigade’s overall leap forward. Driven by the mission to win, the entire brigade’s officers and men continuously challenge their limits, exploring subjects such as artillery extreme-range firing and UAV extreme-condition flight training. A large number of new tactics and methods are constantly emerging, accelerating the construction of the unit’s combat effectiveness.

High-speed coordination among “chess pieces,” unleashing the power of the “chessboard” system

How much command authority does a squad leader have?

Liu Chao, a squad leader in a certain artillery company, confidently told reporters, “The bigger the battlefield, the bigger my authority.” Initially, the reporter thought this was Liu Chao’s ideal “future tense,” but after in-depth interviews, it became clear that this was Liu Chao’s current reality.

In a live-fire exercise, the brigade broke with convention, adding for the first time a test of the battlefield command and decision-making capabilities of small groups such as companies, platoons, and squads, catching many frontline command personnel, including Liu Chao, off guard.

This “first experience” left a deep impression on Liu Chao. Unlike before, in the exercise, he first had to analyze and assess his own combat mission and the “enemy situation” from the operational scenario, and then, based on the operational area and terrain, independently determine the type of ammunition to fire, choose the timing of firing, and handle various tactical situations. “Before, knowing where to hit and how accurately was enough; now, I also need to figure out how to hit and who to hit,” Liu Chao succinctly described the change.

“Looking at recent local conflicts around the world, ‘small-group, multi-path’ operations supported by a system test top-level command, but even more so, they test the coordination capabilities of small units.” As they continue to delve deeper into system-based training, the officers and men of this brigade increasingly feel the importance of solidifying the system’s foundation. Only when every “piece” is highly coordinated can the entire “chessboard” system unleash its maximum potential.

In recent years, combining their missions and tasks, they have continuously increased the testing of individual soldier and equipment capabilities, as well as small-unit combat capabilities, in realistic combat training. By continuously adding tactical coordination elements and constructing typical combat scenarios, they have maximized the coupling between combat and training. They have also focused on weaknesses and shortcomings, flexibly adjusting content and upgrading

difficulty, embedding each end point into the system chain, and turning “hard fingers” into a system “iron fist.”

“System-based combat command talent needs to be cultivated within a system environment,” the brigade’s leadership told reporters. They have comprehensively explored pathways for cultivating system-based combat command talent through methods such as sending personnel to military academies, cross-service training, and system-based exercises, helping key command personnel at all levels to continuously transform into multi-skilled system-based commanders.

The transformation is etched on the capability leap of squad leader Liu Chao—In a training exercise earlier this year, Liu Chao, as a staff assistant to the battalion commander, took to the battalion’s fire strike command seat, participating in mission planning and deployment, and research on operational topics. His suggestions, such as “refining small groups and point-to-point command,” were adopted. Reflecting on his growth, Liu Chao remarked, “The stronger the foundation of the system, the broader the training vision.”

The transformation is also reflected in the mission experience of squad leader Zheng Hong—In a multi-service exercise, Zheng Hong, the command and control squad leader of the long-range artillery battalion, collaborated with his comrades from the Rocket Force and Air Force to develop a “firepower plan,” ensuring the long-range artillery battalion’s efficient integration into the system strike chain, completing three-dimensional offensive and defensive drills, and exploring multiple tactics. He said that the increasing number of collaborative missions has boosted his confidence in fulfilling his system-wide combat position.

Where does this confidence come from? Exploring history provided the answer—The brigade’s predecessor was the first artillery unit established by the Jin-Cha-Ji Military Region, and it has always been known for its ability to overcome difficulties and fight tough battles. Through the vicissitudes of history, from horse-drawn transport to mechanization, and then to informatization, they have always been at the forefront of tackling tough challenges and pioneering transformations. “Looking back on the path we’ve traversed amidst the flames of war, and forging ahead on the new journey of building a strong military, our goals and beliefs are more resolute, our sense of mission and responsibility is stronger, and our fighting spirit is even more vigorous,” said the brigade’s leadership.

军营观察丨骑兵故事：二十年的讲述和聆听

来源：中国军网-解放军报 作者：刘含 崔冠楠 责任编辑：郭妍菲 发布：2025-12-02

旅史馆走出全国“金牌志愿讲解员”

■刘 含

今年 7 月，一则喜讯从第五届全国红色故事讲解员大赛决赛现场，传回第 82 集团军某旅——

该旅旅史馆志愿讲解员崔冠楠从 175 名优秀选手中脱颖而出，夺得志愿讲解员组第一名，获评全国“金牌志愿讲解员”.

一段仿佛早已注定的缘分，让这场决赛格外动人心弦：崔冠楠抽到的讲解主题，正是关于她所在部队的老师长——彭雪枫.

“能讲老师长的故事，我感到既幸运又惶恐. ”崔冠楠说，老师长和骑兵团的故事她已经讲了 20 年，这是她头一次将这些故事带到全国讲台上来；惶恐的是，她怕讲不好先辈的故事，讲不到听众的心坎里.

抽到题目后的每个环节，都要与时间赛跑. 崔冠楠和战友们一起查阅资料、打磨讲稿，试图用一种全新的视角讲述、解读英雄的形象与情感. 然而，不知道因为太紧张还是太兴奋，崔冠楠一度无法沉下心来熟悉讲稿，这让她内心有点焦急.

比赛前一晚，崔冠楠路过演讲大厅时，一张彭雪枫横刀立马的照片映入眼帘，她迎着照片上那灼灼目光，时光仿佛回到了 20 年前.

那是她第一次站在史馆里，与历史对望、与革命先烈对话. 通过展板上的一段段记录，崔冠楠沉浸在先辈的故事里，眼泪不自觉地簌簌流下.

“我们部队的前身，就是彭雪枫师长率领的新四军第四师骑兵团……”第二天决赛现场，站上讲台，灯光牵着崔冠楠的目光跨越时光，一个个动情的故事娓娓道来.

“老师长，您听到了吗？”演讲最后，崔冠楠望向远方，轻轻问道. 短短一句话，让历史的回响与当下的传承在此刻交汇. 台下观众掌声如雷，经久不息. 最终，崔冠楠以优异成绩夺得志愿讲解员组第一名.

载誉归来，征尘未洗. 崔冠楠马不停蹄地带着从大赛中汲取的鲜活养分和滚烫感悟，奔赴野外训练场. 她说：“这些精彩的故事，必须第一时间送回‘家’，讲给战友们听. ”

“金牌”的光环下，是根植于部队厚重历史的长期积淀与一份难得的清醒. 在旅史馆讲解的 20 年间，崔冠楠经常对大家说：“不是我讲得好，是革命先辈的故事本身就充满力量. ”这些年，她始终感受到一种沉甸甸的使命：必须把先辈的故事讲好，讲给更多人听，让英雄的精神薪火相传.

近年来，她与战友们录制了 10 余堂精品微课，参与编写、演绎了许多红色情景剧.

一个好故事，胜过一打道理. 崔冠楠和战友们用 20 年时间的讲述所唤醒的赤诚、担当与信仰，已如种子般在广大官兵心中落地生根，化为前行路上深沉而持久的力量. “我愿永远做一名英雄故事的守护者和传播者，把咱们部队的英雄故事，一直讲下去. ”崔冠楠说.

骑兵故事：二十年的讲述和聆听

■刘 含

“只要还有人被这些故事打动，光荣与梦想就会传承下去”

旅史馆里，崔冠楠常常在一面庄严肃穆的英烈墙前驻足.

灯光下，墙壁上镌刻的一个个金色的名字熠熠生辉. 讲述这面墙上英烈的故事时，崔冠楠都会放慢脚步，让参观者在这面墙前多停留片刻.

然而，第一次面对这面墙壁时，崔冠楠似懂非懂.

2005 年，刚刚当兵入伍不久的崔冠楠，被选为旅史馆第一批志愿讲解员. 工作一段时间后，她觉得讲解任务很“简单”：将每件征集到的文物放进展柜，再背记好这个文物的解说词，等有人来参观，她就一边背诵解说词，一边带着大家参观. “至于为什么要讲述这些故事，以及这些故事背后真正承载着什么，那时的理解还很浅. ”崔冠楠说.

第一次感觉讲解任务并不“简单”，要从她第一次为战斗英雄的后人讲解说起.

2005 年 10 月，部队邀请一等功臣、战斗英雄王广华的儿子王林来史馆参观.

讲解前一晚，她和战友们一起细心擦拭每个展柜，翻来覆去地推敲解说词，对着镜子一遍遍调整语气和神态，希望以最好的状态迎接这位英雄后人.

见到王林时，崔冠楠内心被震撼了. 她很难想象，眼前这位鬓发微白的老人，在 4 岁时就失去了父亲.

王广华牺牲时，没有留下一张照片. 当时的王林对父亲的印象也是模糊的.

史馆内挂着一张王广华的画像，那是战友凭记忆精心绘制而成，是目前留存复原王广华烈士容貌的唯一珍贵物件. 崔冠楠将王林引导到这幅画像前，讲述王广华的战斗故事.

崔冠楠看着眼前和画像上英烈相似的容貌，仿佛跨越时空，感到一阵恍惚.

“王广华，1939 年参加新四军，多次在战斗中立功，在淮海战役中与战友一起骑着战马，连续 12 个小时追击敌坦克 100 余里，炸毁敌坦克 6 辆，活捉 43 名敌人，创下了‘骑兵俘坦克’的军事奇观，为掩护战友撤退，身中 7 枪不幸壮烈牺牲，年仅 26 岁……”

“谢谢你们！这是我第一次看到父亲的画像，脑海中又有了父亲的样子. ”王林像孩子一样将脸贴到画像上，转过头时已经泪流满面.

那一刻，关于为什么讲这些红色故事，又如何讲好这些故事，在崔冠楠心中有了新的答案.

从第一次讲解到现在，已经过去了 20 年. 站在史馆里，崔冠楠和战友们为一拨又一拨的参观者讲述骑兵故事. 这些参观者身份不同，有的是刚刚踏入军营的新兵，有的是即将退伍的老兵，还有的是前来参观学习的大学生. 然而相同的是，当大家站在这面英烈墙前时，他们总会驻足很久，流泪、仰望、默哀……

骑兵故事背后，是一段段沉甸甸的思念和一代代人传承的信念. 这些故事，连接着过去与现在. “只要还有人被这些故事打动，光荣与梦想就会传承下去. ”崔冠楠说.

“通过更丰富的情感表现，让骑兵故事更加具象化，也更贴近官兵的内心”

在一次次讲解中，崔冠楠也从参观者那里，不断获得新的启发.

一次，原骑兵团大队长孟昭贤之女孟秀玲受邀参观旅史馆，与官兵分享她记忆中的骑兵故事.

刚踏入馆内，孟秀玲的目光就被那柄珍藏多年的“雪枫刀”牢牢吸引. 透过玻璃展柜，刀身上斑驳的铸痕清晰可见，岁月的纹理纵横交错，无声地诉说着往昔的烽火.

“你们看，我们的马刀比日军的马刀要长出一截. ”看着展柜里形制不一的马刀，孟秀玲向大家指出了这个细节.

这不是偶然，多出来的几厘米背后，是一个让人动容的故事.

1941 年，彭雪枫带领的部队在一次战斗中遭到重创. 反思过后，部队决定成立骑兵团. 骑兵团成立之初，使用的马刀五花八门，自制统一的、能用于实战的马刀成为当务之急.

当时敌人封锁严密，制造马刀的材料奇缺. 最终，他们在洪泽湖旁的一个大塘中，找到了一批原地方政府撤退时沉下的钢材.

正值寒冬腊月，湖水冰冷刺骨. 当地群众闻讯后，自发赶来，冒着严寒一次次潜入水底，摸索着用绳子绑住钢材，再由岸上的官兵和群众合力拉上来. 就这样，一件件冰冷的钢材被打捞出水，送进了兵工厂.

骑兵团官兵收集了各式马刀，反复比对，最终设计出一款比日军马刀长出 5 厘米的新式马刀. 当新刀发到手中，骑兵们爱不释手，激动地在刀把上刻下“雪枫”二字，亲切地称之为“雪枫刀”.

“这 5 厘米，为的是把‘一寸长，一寸强’的长度优势，转化为骑兵对冲时先敌出手、克敌制胜的战术胜势！”孟秀玲的讲解，让这段历史瞬间变得立体而滚烫.

循着孟秀玲的目光望去，“雪枫刀”刀身颀长，静静地陈列在展柜里，寄托着骑兵团的魂，带着官兵重回那段铁血岁月.

崔冠楠和战友们的心情，随着故事的展开而跌宕起伏. “我们讲了这么多年的故事，原来还有如此生动的细节被忽略了. ”崔冠楠有些惭愧.

她开始反思：是否还有更多这样的细节沉睡在历史中？

这次触动，让崔冠楠和战友们不再满足于只做一个被动的讲解者. 他们主动查阅厚厚的旅史资料和理论书籍，沉浸到历史深处，去挖掘故事背后更深层的精神内涵.

他们决定用多样化的视角重新发现这段历史，用灵活的讲述方式，重新解读这段故事.

前不久，情景剧《烈火中的骑兵》在旅里倾情上演. 该剧演绎的是该旅另一个传奇战例——“机枪打飞机”.

1940 年 11 月 18 日，这个旅前身部队的战士李洪立将转盘机枪架在弹药手陈金富的肩膀上，硬生生将一架日军 98 式轻型轰炸机击落，创下我军历史上首次用机枪击落敌机的纪录.

“他们炸毁咱们的房子，但炸不断咱们的脊梁！”中士李波在剧中扮演弹药手陈金富. 此前，他只知道“机枪打飞机”是旅史中的一个传奇战例，对其前因后果了解不深. 当他真正去演绎这个角色，了解到陈金富在击落敌机后，将一片飞机残骸珍藏起来，放在父母坟前告慰的情景时，他对先辈的内心世界有了全新的认识和共鸣.

“与传统讲解相比，情景剧通过更丰富的情感表现，让骑兵故事更加具象化，也更贴近官兵的内心. ”参与创演的另一位旅史馆志愿讲解员张文轩深有体会地说.

“每一个故事细节，每一种内涵精神，都值得被深入挖掘，被精彩演绎. ”崔冠楠告诉记者，这些年，她与战友们一起组成创作团队，结合骑兵故事和身边人身边事，创作了一系列情景剧，让跨越时空的骑兵精神，在今天的舞台上绽放出不一样的风采.

“听着先辈的故事，想通自己的心事，努力成为新时代骑兵传人”

多年的讲解经历，让崔冠楠对史馆产生了一种依恋，也养成了一个习惯.

“每次到外面讲骑兵故事、参加授课比武或者参加大项任务前，我都会先来史馆里坐一会儿.”崔冠楠说，这里的故事和物件可以让心静下来，给人一股强大的精神力量.

年年岁岁，崔冠楠在这座史馆里，见证了一批又一批被骑兵故事激励成长的官兵.

“听着先辈的故事，想通自己的心事，努力成为新时代骑兵传人.”上等兵赛吉拉呼来自内蒙古，自幼热爱骑马. 第一次参观旅史馆时，他被一件弹痕累累的马鞍深深触动. 儿时学习骑马的经历，让他对先辈的故事有了更深的感受.

该旅每年举办“骑兵传人”系列军营文化艺术节，官兵们用笔墨将心中的骑兵精神绘制出来，每个人都在这个过程中获得了别样的体悟.

前不久的军营文化艺术节，赛吉拉呼利用业余时间，创作《骏马飞奔》《骑兵冲锋》等漆画，表达对先辈的崇敬之情. 军旅梦、家国情，化成斑斓的彩漆，见证着他对骑兵精神的传承，激发着他的训练热情.

在军营文化艺术节上，崔冠楠一边采访官兵，一边驻足观看. 一张彭雪枫的画像再次出现在她的眼前，就像比赛前的那晚一样.

这张画像的作者是某连战士刘青山，他向崔冠楠讲述起创作时的感动——如何查阅史料，如何被英雄纵马冲锋的身影震撼，如何在每一笔勾勒中体会当年先辈们的血性. 画到最后，他仿佛也成了举着马刀冲向敌阵的骑兵. 那一刻，他终于明白了“传人”二字的重量.

听到刘青山的讲述，崔冠楠会心一笑. 那一刻，她和其他讲解员也化身成一名聆听者，听官兵为他们讲述新时代骑兵传人的故事. 那段峥嵘岁月从未远去，而是在每一个奋楫前行的身影里，获得了永恒的生命力.

把先辈的传奇一直讲下去

■崔冠楠

今年，是我穿军装的第 20 年，也是我担任旅史馆讲解员的第 20 年.

20 年，我从一名青涩的新兵，成长为一名军官. 我与英雄故事朝夕相伴，时光仿佛在一次次抬起右手、指向展柜的那一刻静止，又仿佛在年轻官兵清澈的目光中不断延伸.

有人说，讲解是一份重复的工作. 的确，这些故事我讲了成百上千遍，有的甚至能倒背如流. 我也曾问自己：这些发生在几十年前的故事，还能不能打动今天这些在数字时代成长起来的年轻人？他们捧着手机、看着短视频，还会为一段遥远的历史驻足吗？

于是，我和战友们开始重新走进历史深处，挖掘那些被岁月掩盖的细节. 我们尝试用更贴近官兵的语言、更新颖生动的表达方式，让英雄的形象从历史中走出来，走进每个人的心里.

一次讲解结束，一名年轻战士小声问我：“如果生在战争年代，我会不会也像他们那样勇敢？”我看着他略带忐忑却真挚的眼神，轻轻地说：“勇敢，从来与时代无关，只与选择有关. 你今天选择穿上这身军装，认真对待每一次训练，就是在传承他们的精神. ”

他用力地点了点头. 那一刻，我知道，英雄的种子已经悄悄种下. 20 年里，我见证过太多这样的场景：即将退伍的老兵，在旅史馆英烈墙前久久伫立，敬一个标准的军礼；刚刚入伍的新兵，紧握拳头站在台下，眼神从迷茫逐渐变得坚定；几年前听讲解的战士，再见面时会兴奋地讲出，有一个故事，在他最难的时候，给了他力量……

这些瞬间，是我 20 年讲解生涯中珍贵的财富. 最让我触动的，是讲解员这个身份赋予我的“双重角色”. 大多数时候，我是讲述者；有时，我也会成为聆听者.

记得一次出发参加授课比武的前夜，我独自一人走在空荡的旅史馆展厅里，柔和的灯光洒在那些熟悉的展品上——锈迹斑斑的马刀、弹孔密布的战旗、磨烂的马鞍……望着这些朝夕相伴的文物，我忽然明白了什么是传承. 传承，不是单向的讲述，而是双向的奔赴；不是我把故事讲给你听，而是我们共同走进故事里，成为它延续的一部分.

这几年，我渐渐从旅史馆里走出，走向更加广阔的讲台，把英雄的故事讲给更多人听，我也不再仅仅是一名讲解员. 我想做一座桥，连接烽火岁月与和平年代；我想做一束光，照亮脚下的路. 每一个故事，都是一粒种子，它会在某个不经意的时刻，在某个年轻的心灵中，悄然发芽.

有时，新加入的年轻讲解员会问我：“怎样才能讲好这些故事？”我总会告诉他们：“先不要急着去讲，先要让这些故事，住进你心里. ”只有当一个故事先打动了自己，它才有可能去打动更多的人.

20 年过去了，我依然会认真准备每一次讲解，就像我刚开始站在旅史馆里那样. 不同的是，如今的我更加清楚地知道：我守护的，不仅是几段历史、几个故事，更是一种精神的传承、一种力量的传递.

这条路，我会一直走下去，我会把部队的英雄故事一直讲下去. 英雄的故事永远不会老去，它们就像天上的星辰，始终在那里，照亮一代又一代官兵前行的路.

Brigade History Museum Produces National “Gold Medal Volunteer Guide”

■ Liu Han

In July of this year, good news came from the finals of the 5th National Red Storytelling Competition to a brigade of the 82nd Group Army—

Cui Guannan, a volunteer guide at the brigade’s history museum, stood out from 175 outstanding contestants, winning first place in the volunteer guide group and being awarded the title of National “Gold Medal Volunteer Guide.”

A seemingly preordained fate made this final particularly moving: the topic Cui Guannan drew was about her unit’s division commander—Peng Xuefeng.

“I feel both lucky and apprehensive to be able to tell the story of the Commander-in-Chief,” said Cui Guannan. She has been telling the stories of the Commander-in-Chief and the Cavalry Regiment for 20 years, and this is the first time she has brought these stories to a national stage. Her apprehension stems from the fear of not telling the stories of her predecessors well, of failing to resonate with the audience.

Every step after drawing the topic was a race against time. Cui Guannan and her comrades researched materials and polished their speeches, attempting to tell and interpret the heroes’ images and emotions from a completely new perspective. However, whether due to nervousness or excitement, Cui Guannan was unable to calmly familiarize herself with the speech, which made her somewhat anxious.

The night before the competition, as Cui Guannan passed by the lecture hall, a photo of Peng Xuefeng, sword drawn, caught her eye. Meeting the burning gaze in the photo, she felt as if time had turned back 20 years.

That was the first time she stood in the history museum, gazing at history, conversing with revolutionary martyrs. Through the records on the display panels, Cui Guannan was immersed in the stories of her predecessors, tears streaming down her face.

“Our unit’s predecessor was the cavalry regiment of the 4th Division of the New Fourth Army, led by Commander Peng Xuefeng...” On the second day of the finals, standing on the stage, the lights drew Cui Guannan’s gaze across time, as she recounted moving stories.

“Commander, did you hear that?” At the end of her speech, Cui Guannan looked into the distance and softly asked. This short sentence allowed the echoes of history and the legacy of the present to converge. The audience erupted in thunderous applause, which lasted for a long time. Ultimately, Cui Guannan won first place in the volunteer guide group with outstanding results.

Returning home with honors, the dust of the competition still lingered. Cui Guannan, carrying the fresh insights and profound lessons learned from the competition, rushed to the field training ground. She said, “These wonderful stories must be sent ‘home’ as soon as possible, to be told to my comrades.”

Behind the halo of the “gold medal” lies a long-term accumulation rooted in the profound history of the unit and a rare clarity of mind. During her 20 years of guiding tours at the brigade’s history museum, Cui Guannan often told her colleagues, “It’s not that I tell stories well, it’s that the stories of our revolutionary predecessors are inherently powerful.” Over the years, she has always felt a heavy responsibility: to tell the stories of our predecessors well, to tell them to more people, and to ensure that the spirit of heroes is passed down.

In recent years, she and her comrades have recorded more than 10 high-quality micro-lessons and participated in the writing and performance of many red-themed dramas.

A good story is worth more than a dozen 道理 (moral principles). The sincerity, responsibility, and faith awakened by Cui Guannan and her comrades’ 20 years of storytelling have taken root in the hearts of officers and men like seeds, transforming into a profound and enduring force on their path forward. “I am willing to always be a guardian and disseminator of heroic stories, and to continue telling the heroic stories of our unit,” Cui Guannan said.

Cavalry Stories: Twenty Years of Telling and Listening

“As long as there are still people moved by these stories, the glory and dreams will be passed down.”

In the museum’s history hall, Cui Guannan often pauses before a solemn and respectful wall of martyrs.

Under the lights, the golden names engraved on the wall gleam. When recounting the stories of the martyrs on this wall, Cui Guannan slows her pace, allowing visitors to linger a little longer.

However, the first time she faced this wall, Cui Guannan only vaguely understood it.

In 2005, shortly after enlisting in the army, Cui Guannan was selected as one of the first volunteer guides for the museum’s history hall. After working for a while, she felt the guiding task was “simple”: place each collected artifact in the display case, memorize the description for each artifact, and then, when visitors came, she would recite the description while leading them on a tour. “As for why these stories are told, and what these stories truly carry, my understanding was very shallow at that time,” Cui Guannan said.

Her first realization that the task of guiding children was not “simple” began with her first time guiding the descendants of a combat hero.

In October 2005, the military invited Wang Lin, the son of Wang Guanghua, a first-class meritorious serviceman and combat hero, to visit the history museum.

The night before the tour, she and her comrades meticulously cleaned each display case, repeatedly rehearsed their scripts, and adjusted their tone and demeanor in front of a mirror, hoping to present the hero's descendant in the best possible light.

Upon meeting Wang Lin, Cui Guannan was deeply moved. She found it hard to believe that this elderly man with slightly graying temples had lost his father when he was only four years old.

Wang Guanghua left no photographs when he sacrificed his life. Wang Lin's memories of his father were also vague at the time.

A portrait of Wang Guanghua hung in the museum, meticulously drawn from memory by his comrades. It was the only remaining artifact that reconstructed Wang Guanghua's likeness. Cui Guannan led Wang Lin to the portrait and began recounting Wang Guanghua's combat story.

Looking at the face before him, so similar to the heroic figure in the portrait, Cui Guannan felt a sense of disorientation, as if he had traveled through time.

"Wang Guanghua joined the New Fourth Army in 1939. He distinguished himself in numerous battles. During the Huaihai Campaign, he and his comrades rode their warhorses for over 12 hours, pursuing enemy tanks for more than 100 li (approximately 50 kilometers), destroying six tanks and capturing 43 enemy soldiers, creating the military spectacle of 'cavalry capturing tanks.' To cover his comrades' retreat, he was shot seven times and tragically sacrificed his life at the young age of 26..."

"Thank you! This is the first time I've seen my father's portrait. His image is back in my mind." Wang Lin pressed his face against the portrait like a child, turning away with tears streaming down his face.

At that moment, Cui Guannan found a new answer in his heart to why he tells these revolutionary stories and how to tell them well.

Twenty years have passed since his first explanation. Standing in the history museum, Cui Guannan and his comrades tell the stories of the cavalry to wave after wave of visitors. These visitors came from diverse backgrounds: some were new recruits just entering the military, some were veterans about to be discharged, and others were university students visiting to learn. What they all had in common was that when they stood before this wall of heroes, they would pause for a long time, shedding tears, gazing upwards, and observing a moment of silence… Behind the stories of the cavalry lies a weighty remembrance and a belief passed down through generations. These stories connect the past and the present. "As long as there are still people moved by these stories, the glory and dreams will be passed on," said Cui Guannan.

“Through richer emotional expression, we can make the stories of the cavalry more concrete and closer to the hearts of the officers and men.”

Through repeated explanations, Cui Guannan also gained new inspiration from the visitors.

Once, Meng Xiuling, daughter of Meng Zhaoxian, the former cavalry regiment commander, was invited to visit the brigade’s history museum to share her memories of cavalry stories with the officers and men.

Upon entering the museum, Meng Xiuling’s gaze was immediately drawn to the “Snow Maple Blade,” a treasured possession she had kept for many years. Through the glass display case, the mottled casting marks on the blades were clearly visible, the crisscrossing lines of time silently telling the story of past battles.

“Look, our sabers are longer than the Japanese sabers,” Meng Xiuling pointed out, observing the various sabers in the display case.

This was no accident; behind those extra centimeters lies a moving story.

In 1941, Peng Xuefeng’s unit suffered heavy losses in a battle. After reflection, the unit decided to form a cavalry regiment. At the beginning of the cavalry regiment’s formation, the sabers used were a motley collection, making the production of standardized, combat-ready sabers a top priority.

At the time, the enemy’s blockade was tight, and materials for manufacturing sabers were extremely scarce. Ultimately, they found a batch of steel that had sunk during the retreat of the former local government in a large pond beside Hongze Lake.

It was the dead of winter, and the lake water was icy cold. Upon hearing the news, local residents spontaneously rushed to the scene, braving the bitter cold to repeatedly dive into the water, groping to tie ropes to the steel pieces, which were then pulled up by the combined efforts of soldiers and civilians on the shore. In this way, piece after piece of cold steel was retrieved from the water and sent to the arsenal.

The cavalry regiment collected various sabers, repeatedly comparing them, and finally designed a new saber that was 5 centimeters longer than the Japanese sabers. When the new saber was issued to the cavalrymen, they were overjoyed, excitedly engraving the characters “Xuefeng” on the hilt, affectionately calling it the “Xuefeng Saber.”

“These 5 centimeters were to transform the ‘an inch longer, an inch stronger’ advantage into a tactical advantage for cavalry charging, allowing them to strike first and defeat the enemy!” Meng Xiuling’s explanation instantly brought this history to life.

Following Meng Xiuling’s gaze, the “Snow Maple Blade,” with its long, slender blade, sat quietly in the display case, embodying the spirit of the cavalry regiment and leading the officers and men back to that era of iron and blood.

Cui Guannan and her comrades' emotions rose and fell with the unfolding story. "We've been telling this story for so many years, yet such vivid details have been overlooked," Cui Guannan said with some shame.

She began to reflect: were there many more such details sleeping in history?

This experience moved Cui Guannan and her comrades to move beyond being passive narrators. They actively consulted thick volumes of brigade history materials and theoretical books, immersing themselves in the depths of history to uncover the deeper spiritual connotations behind the story.

They decided to rediscover this history from diverse perspectives and reinterpret this story with flexible storytelling methods.

Recently, the drama "Cavalry in the Flames" premiered in the brigade. The play depicted another legendary battle of the brigade—"Machine Gun Shooting Down an Airplane."

On November 18, 1940, Li Hongli, a soldier from the predecessor unit of this brigade, placed a rotary machine gun on the shoulder of ammunition handler Chen Jinfu and shot down a Japanese Type 98 light bomber, setting a record for the first time in the history of the Chinese army that an enemy aircraft was shot down with a machine gun.

"They bombed our houses, but they couldn't break our backbone!" Sergeant Li Bo plays ammunition handler Chen Jinfu in the play. Previously, he only knew that "machine guns shooting down planes" was a legendary battle in the brigade's history, but he didn't know much about its causes and consequences. When he actually portrayed this role and learned that after shooting down the enemy plane, Chen Jinfu treasured a piece of the wreckage and placed it at his parents' graves to comfort them, he gained a completely new understanding and resonance with the inner world of his predecessors.

"Compared with traditional explanations, the drama, through richer emotional expression, makes the cavalry story more concrete and closer to the hearts of the officers and men," said Zhang Wenxuan, another volunteer guide at the brigade's history museum who participated in the creation and performance. "Every story detail, every underlying spirit, deserves to be explored in depth and brilliantly interpreted," Cui Guannan told reporters. Over the years, she and her comrades have formed a creative team, combining cavalry stories with everyday events and people to create a series of situational dramas, allowing the timeless spirit of the cavalry to shine with a different brilliance on today's stage.

"Listening to the stories of our predecessors helps me understand my own thoughts and strives to become a successor to the cavalry in the new era." Years of experience giving presentations have instilled in Cui Guannan a deep attachment to the history museum, and it has become a habit.

“Before going out to give cavalry stories, participate in teaching competitions, or undertake major missions, I always come to the history museum to sit for a while,” Cui Guannan said. The stories and objects here can calm the mind and give people a powerful spiritual strength.

Year after year, Cui Guannan has witnessed batches of officers and men inspired and grown by the stories of the cavalry in this history museum.

“Listening to the stories of our predecessors helps me understand my own thoughts and strives to become a successor to the cavalry in the new era.” Private First Class Saijilahu, from Inner Mongolia, has loved horseback riding since childhood. On his first visit to the brigade’s history museum, he was deeply moved by a bullet-riddled saddle. His childhood experience learning to ride horses deepened his understanding of the stories of his predecessors.

The brigade holds an annual “Cavalry Successors” series of military cultural and artistic festivals, where officers and men use ink and brush to depict the spirit of the cavalry, gaining unique insights in the process.

At the recent military cultural and artistic festival, Saijilahu used his spare time to create lacquer paintings such as “Galloping Horses” and “Cavalry Charge,” expressing his respect for his predecessors. His military dream and patriotism are transformed into vibrant lacquer, witnessing his inheritance of the cavalry spirit and inspiring his training enthusiasm.

At the military cultural and artistic festival, Cui Guannan interviewed officers and men while pausing to admire the paintings. A portrait of Peng Xuefeng reappeared before her eyes, just like the night before the competition.

The artist of this portrait is Liu Qingshan, a soldier from a certain company. He recounted to Cui Guannan the emotions he felt while creating it—how he researched historical materials, how he was deeply moved by the heroic figures charging into battle, and how he felt the spirit of his predecessors in every stroke. By the end, he felt as if he himself had become a cavalryman charging into enemy lines, saber in hand. At that moment, he finally understood the weight of the words “successor.”

Hearing Liu Qingshan’s story, Cui Guannan smiled knowingly. At that moment, she and the other guides became listeners, listening to the soldiers tell them the stories of the successors of the cavalry in the new era. That glorious era has never faded away; rather, it has gained eternal vitality in every figure striving forward.

Continuing to tell the legend of our predecessors

■ Cui Guannan This year marks my 20th year in uniform and my 20th year as a guide at the brigade history museum.

In these 20 years, I have grown from a green recruit into an officer. I spent my days surrounded by heroic tales. Time seemed to stand still each time I raised my right hand to point to the display case, yet it also seemed to stretch on endlessly in the clear eyes of the young soldiers.

Some say that giving presentations is a repetitive task. Indeed, I've told these stories hundreds, even thousands of times; some I can even recite backwards. I've also asked myself: can these stories from decades ago still move today's young people who have grown up in the digital age? With their phones in hand, watching short videos, will they still pause to revisit a distant piece of history?

So, my comrades and I began to delve deeper into history, uncovering details obscured by time. We tried to use language more relatable to the soldiers, and more innovative and vivid expressions, to bring the heroes out of history and into everyone's hearts.

After a guided tour, a young soldier quietly asked me, "If I were born in a time of war, would I be as brave as them?" Looking into his slightly hesitant yet sincere eyes, I gently said, "Courage has nothing to do with the times, only with choices. Your choice to wear this uniform today and take every training session seriously is to carry on their spirit."

He nodded vigorously. At that moment, I knew the seed of heroism had been quietly planted. Over the past 20 years, I've witnessed countless scenes like this: veterans about to retire standing for a long time before the martyrs' wall in the brigade's history museum, giving a perfect military salute; new recruits standing below the stage, clenching their fists, their eyes gradually shifting from confusion to determination; soldiers who listened to my tour years ago, excitedly recounting stories that gave them strength during their most difficult times…

These moments are precious treasures in my 20-year career as a guide. What touches me most is the "dual role" that the role of a guide gives me. Most of the time, I am the storyteller; sometimes, I am also a listener.

I remember once…

The night before I set off for a teaching competition, I walked alone through the empty exhibition hall of the history museum. Soft lighting bathed the familiar exhibits—rusty sabers, bullet-riddled battle flags, worn-out saddles… Gazing at these artifacts I'd spent so much time with, I suddenly understood the meaning of inheritance. Inheritance is not a one-way storytelling, but a two-way journey; it's not about me telling you the story, but about us both stepping into the story and becoming a part of its continuation.

In recent years, I've gradually stepped out of the history museum and onto a broader stage, telling the stories of heroes to more people. I'm no longer just a guide. I want to be a bridge, connecting the years of war with the times of peace; I want to be a ray of light, illuminating the path ahead. Every story is a seed, which will quietly sprout in some unexpected moment, in some young heart.

Sometimes, newly joined young guides would ask me, “How can I tell these stories well?” I would always tell them, “Don’t rush to tell them; first, let these stories reside in your heart.” Only when a story touches you can it touch others.

Twenty years have passed, and I still prepare each tour meticulously, just as I did when I first stood in the brigade history museum. The difference is that now I understand more clearly: what I’m protecting is not just a few historical events or stories, but the inheritance of a spirit, the transmission of a force.

I will continue down this path, and I will continue to tell the heroic stories of the military. The stories of heroes never grow old; they are like stars in the sky, always there, illuminating the path for generations of soldiers.

陆军某旅鼓励官兵立足本职岗位谋战研训——

好机制催开“创新花”

■余 聪 卓应超

近日，在陆军某旅直升机机务保障训练现场，某连军械技师曾从维研制的直升机航炮拆装升降小车大显身手：航炮拆装用时缩短 15 分钟，所需人手减少至 1 人，大幅提高了作业效率.

创新的火花，往往迸发于工作实践的痛点. 曾从维的革新灵感，就源于一次“手忙脚乱”的考核. 他和战友合作，2 人托举航炮，1 人俯身拆装，忙得满头大汗才勉强完成任务. 整个过程耗时费力不说，还存在一定的安全风险.

“维护时哪儿不顺手，创新就从哪儿入手. ”发现问题后，该连根据旅创新机制，在连队战训难题攻关会上公开发榜，曾从维主动揭榜，带着“用机械替代人力”的思路展开攻关.

查资料、画草图，请教专家、反复试验……历时 3 个多月，曾从维成功研制出直升机航炮拆装升降小车. 经过多次实践检验、反馈优化，这一创新成果正式投入应用.

几年前，该旅官兵开展创新面临不少困境. 二级军士长江龙刚回忆说，当时旅里鼓励官兵搞小发明、小创造、小革新，但因缺乏完善的创新应用机制，大家的一些“金点子”要么卡在攻关环节，要么完成后无法推广，最终不了了之.

“创新需要建立健全相关机制，为基层官兵铺路搭桥. ”旅党委一班人深入调研，广泛听取官兵意见建议，经过反复讨论研究，决定探索建立“发现问题—揭榜攻关—应用转化—反馈优化”的创新机制.

“让基层盛开‘创新之花’. ”他们鼓励基层单位定期举办军事民主建议日，收集战训难题；张榜征集攻关者，支持基层官兵揭榜领题. 同时，旅机关对基层的创新课题进行把关备案，并提供技术、经费等支持，组织革新成果试用验证和推广应用. 投入应用后，攻关团队还要继续跟踪应用效果、收集反馈意见、进行优化升级，形成“从实践中来，到实践中去”的良性循环.

新机制鼓励官兵立足本职岗位谋战研训，像曾从维一样的“基层创客”纷纷将设想变成现实，近年来该旅已有数十项小革新小发明在飞行保障一线转化为战斗力.

三级军士长董东，以前都是用一字螺丝刀拆卸某型战机主、尾助力器油滤. 这几年，该旅飞行训练频率高了，维护保障任务也随之增加，董东发现传统方法不仅花费的时间长、效率低，稍有不慎还容易损坏机件. 今年，在旅创新机制激励下，董东主动领题，牵头研发出助力器油滤拆卸专用工具，将拆卸时间明显压缩，且机件损坏率大幅降低，有效解决了这一保障难题.

“好机制需要好土壤，‘创新之花’才能越开越艳. ”除了建立完善的创新机制，该旅还推出一系列配套措施：建立“工匠室”“无人智能室”“修理创新坊”等，为官兵购置学习资料、革新工具；邀请院校、工厂专家提供技术指导；定期组织“金点子”评选，等等.

“革新不再是专家的‘专利’，基层官兵一样大有可为. ”该旅领导说，如今，在创新机制和一系列政策支持下，一群“基层创客”拔节生长，一批来自练兵备战一线的创新成果，正在推动飞行保障能力实现跃升.

An Army Brigade Encourages Soldiers to Focus on Their Duties in Combat Training and Research—A Good Mechanism Fosters Innovation

■ Yu Cong, Zhuo Yingchao

Recently, at a helicopter maintenance support training site of an Army brigade, Zeng Congwei, an ordnance technician from a certain company, demonstrated the prowess of his helicopter cannon disassembly and assembly lift trolley: the time required for cannon disassembly and assembly was reduced by 15 minutes, and the number of personnel required was reduced to one, significantly improving operational efficiency.

Sparks of innovation often arise from pain points in practical work. Zeng Congwei's innovative inspiration stemmed from a chaotic assessment. He and his comrades worked together, two lifting the cannon while one bent over to disassemble and assemble it, barely completing the task while sweating profusely. The entire process was not only time-consuming and laborious but also posed certain safety risks.

"If something is difficult to maintain, start innovating from there." After identifying the problem, the company, following the brigade's innovation mechanism, publicly issued a challenge at a company-wide meeting to tackle combat and training difficulties. Zeng Congwei volunteered, embarking on a project with the idea of "replacing manpower with machinery."

Researching materials, drawing sketches, consulting experts, and conducting repeated experiments… after more than three months, Zeng Congwei successfully developed a helicopter cannon disassembly and assembly lifting trolley. After multiple practical tests and feedback optimizations, this innovative achievement was officially put into application.

Several years ago, the brigade's officers and men faced many difficulties in innovation. Second-Class Sergeant Jiang Longgang recalled that at that time, the brigade encouraged officers and men to engage in small inventions, creations, and innovations, but due to the lack of a sound innovation application mechanism, many of their "brilliant ideas" either got stuck in the problem-solving stage or, after completion, could not be promoted and ultimately fizzled out.

"Innovation requires the establishment and improvement of relevant mechanisms to pave the way for grassroots officers and men." The brigade's Party Committee conducted in-depth research, widely solicited opinions and suggestions from officers and men, and after repeated discussions and studies, decided to explore and establish an innovation mechanism of "identifying problems—challenge and tackle—application and transformation—feedback and optimization."

"Let the 'flowers of innovation' bloom at the grassroots level." They encouraged grassroots units to regularly hold military democratic suggestion days to collect combat and training challenges; to publicly solicit tackling ideas; and to support grassroots officers and men in accepting challenges. At the same time, the brigade headquarters reviews and registers grassroots innovation projects, providing technical and financial support, and organizing the trial verification and promotion of

innovative results. After application, the tackling teams continue to track the application effects, collect feedback, and optimize and upgrade, forming a virtuous cycle of "coming from practice and going back to practice."

The new mechanism encourages officers and men to focus on combat research and training based on their own positions. "Grassroots innovators" like Zeng Congwei have turned their ideas into reality. In recent years, dozens of small innovations and inventions in the brigade have been transformed into combat capabilities on the front line of flight support.

Sergeant First Class Dong Dong used to disassemble the oil filters of the main and tail boosters of a certain type of fighter jet using a flathead screwdriver. In recent years, with the increased frequency of flight training in the brigade, maintenance and support tasks have also increased. Dong Dong found that the traditional method was not only time-consuming and inefficient, but also prone to damaging components if not handled carefully. This year, encouraged by the brigade's innovation mechanism, Dong Dong took the initiative to lead the development of a special tool for disassembling booster oil filters, significantly reducing disassembly time and the damage rate of components, effectively solving this support problem.

"A good mechanism needs fertile ground for innovation to flourish." In addition to establishing a comprehensive innovation mechanism, the brigade has also introduced a series of supporting measures: establishing "Craftsman's Rooms," "Unmanned Intelligent Rooms," and "Repair Innovation Workshops," providing soldiers with learning materials and innovative tools; inviting experts from universities and factories to provide technical guidance; and regularly organizing "Golden Ideas" selections, etc.

"Innovation is no longer the 'patent' of experts; grassroots officers and men can also make a difference." The brigade leader said that now, with the support of innovation mechanisms and a series of policies, a group of "grassroots innovators" are growing rapidly, and a number of innovative achievements from the front line of training and combat readiness are driving a leap in flight support capabilities.

第 72 集团军某旅合成营锤炼部队战场自主研判决策能力

来源：中国军网-解放军报 作者：简蕾 何飞 责任编辑：尚晓敏 发布：2025-12-03

"战前预案"作废 营连自主应对

——第 72 集团军某旅合成营进攻训练见闻

■简 蕾 解放军报特约通讯员 何 飞

初冬时节，浙中某训练场，第 72 集团军某旅一场合成营进攻训练打响前，导调组突然宣布：“情况有变，原方案作废，红方即刻进攻蓝方高地！”这条指令，彻底打乱了参训某合成营的“战前部署”.

“部队停止集结，立即转入进攻！”面对进攻时间提前、打击目标更改、蓝方火力配置升级等一系列新情况，作为红方的该营官兵没有手足无措，而是见招拆招、自主应对.

向目标地域机动途中，该营突然遭到蓝方实施的强电磁压制，通信几乎瘫痪. “立即疏散，隐蔽伪装！”指挥员朱营长果断下达处置指令. 与此同时，营参谋利用纸质地图与简易器材，在信息受限的条件下研判“敌情”、分析地形，快速规划出一条迂回路线. 全营摆脱强电磁压制、抵近目标地域后，通信设备中传来急促的呼叫：“确认‘敌’前沿火力点坐标，请求火力覆盖！”

“批准请求！侦察分队建立观察所，火力分队进行打击准备！”朱营长依据实时传回的态势信息，迅速定下战斗决心. 很快，前方步兵分队脱离载具，依托有利地形展开战斗部署；后方火力单元完成弹药装填，只待一声令下……

“现代战争中战场态势瞬息万变，能否沉着应变、抓住稍纵即逝的战机是取得胜利的关键.”该旅领导介绍，过去组织训练，他们往往提前下发行动预案，这种做法虽然便于部队协同，却容易固化官兵思维. 为适应实战要求，近年来他们主动打破“机关包办”的组训思路，以不设预案或临机调整等方式，向营连两级放权，引导一线作战单元自主研判态势、自主拟制计划、自主协同攻防，锤炼复杂条件下的应急应战能力.

练兵场上，该营某连执行侧翼穿插任务时，遭到蓝方小分队袭扰，前进通路被阻断. 同时，他们还侦测到强电磁干扰源逼近. 紧急关头，杨连长带领官兵积极应对战场形势变化：侦察排前出确认干扰源位置并实施监视；主力分队启用备用通信预案，规划替代路线……他们采取的有力应对措施，确保了连队在通信受限、通路受阻的不利条件下，按时机动至指定地域，为后续顺利发起进攻奠定了基础.

“以往训练，预案详尽周全，基层精力多耗费在熟记流程、卡控节点上. 如今，旅里赋予我们临机决策权限，这既是信任更是考验.”杨连长说，指挥权的下放，要求他们争分夺秒研战法、练战术、强技能.

训练持续至深夜，导调组最终裁定：红方成功突破蓝方防线. 复盘评估数据显示：该营在预案作废的情况下，临机调整战术行动数十次，关键信息流转效率明显提升，战场自主研判决策能力得到有效锤炼.

A Combined-Arms Battalion of a Brigade under the 72nd Group Army Hone its Battlefield Self-Assessment and Decision-Making Capabilities

Source: China Military Network - PLA Daily

Author: Jian Lei, He Fei

“Pre-battle Plan” Obsolete, Battalion and Company Respond Independently

—Observations from an Offensive Training Exercise of a Combined-Arms Battalion of a Brigade under the 72nd Group Army

■ Jian Lei, Special Correspondent for PLA Daily, He Fei

In early winter, at a training ground in central Zhejiang, before an offensive training exercise of a combined arms battalion of a brigade under the 72nd Group Army began, the directing group suddenly announced: “The situation has changed; the original plan is invalid. The Red Force will immediately attack the Blue Force’s high ground!” This order completely disrupted the “pre-battle deployment” of the participating combined-arms battalion.

“The troops cease assembly and immediately begin the offensive!” Faced with a series of new situations, including an earlier attack time, a change in the target, and an upgraded Blue Force firepower configuration, the officers and men of the battalion, as the Red Force, were not at a loss but instead responded independently and countered each move.

During their maneuver towards the target area, the battalion was suddenly subjected to strong electromagnetic suppression by the Blue Force, virtually paralyzing communications. “Immediately evacuate and take cover!” Battalion Commander Zhu decisively issued the order. Simultaneously, the battalion staff, using paper maps and rudimentary equipment, assessed the “enemy situation” and analyzed the terrain under limited information, quickly planning a flanking route. After the entire battalion escaped the strong electromagnetic suppression and approached the target area, an urgent call came through the communications equipment: “Confirmed coordinates of the ‘enemy’ forward firing positions, requesting fire coverage!”

“Request approved! Reconnaissance units establish observation posts, fire units prepare for attack!” Based on the real-time situational information transmitted back, Battalion Commander Zhu quickly made the battle decision. Soon, the forward infantry units disembarked from their vehicles and deployed for combat, utilizing the advantageous terrain; the rear fire units completed ammunition loading, awaiting only the order…

“In modern warfare, the battlefield situation changes rapidly. The ability to calmly adapt and seize fleeting opportunities is key to victory,” the brigade leadership explained. In the past, when organizing training, they often issued action plans in advance. While this facilitated troop coordination, it easily solidified the thinking of officers and men. To adapt to the demands of actual combat, in recent years they have proactively broken away from the “headquarters-only” training

approach, delegating authority to battalion and company levels by not setting pre-planned procedures or making on-the-spot adjustments. This guides frontline combat units to independently assess the situation, formulate plans, and coordinate offensive and defensive operations, honing their emergency response capabilities under complex conditions.

On the training ground, a company of this battalion, while carrying out a flanking maneuver, was harassed by a small Blue Force unit, blocking their advance. Simultaneously, they also detected a strong electromagnetic interference source approaching. In a critical moment, Company Commander Yang led his troops in actively responding to changes in the battlefield situation: the reconnaissance platoon advanced to confirm the location of the interference source and implemented surveillance; the main force activated its backup communication plan and planned alternative routes… Their effective countermeasures ensured that the company, despite limited communication and blocked routes, could maneuver to the designated area on time, laying the foundation for a successful subsequent attack.

“In the past, training plans were detailed and comprehensive, and the grassroots level spent a lot of energy memorizing procedures and controlling key points. Now, the brigade has given us the authority to make decisions on the spot, which is both a trust and a test,” said Company Commander Yang. The decentralization of command requires them to seize every minute to study tactics, practice strategies, and strengthen skills.

The training continued until late at night, and the directing group ultimately ruled that the Red Force had successfully broken through the Blue Force’s defenses. Post-training evaluation data showed that the battalion adjusted its tactical actions dozens of times on the spot when the original plan became obsolete, significantly improving the efficiency of key information flow and effectively honing its battlefield independent judgment and decision-making capabilities.

敢打必胜、夜战如虎，磨砺新时代夜老虎利刃

来源：雪山战鹰公众号 作者：刘洋 袁笑 责任编辑：李佳琦

2025-12-03

夜老虎连

陆军第 76 集团军某旅摩步 6 连

夜老虎连诞生于 1934 年，隶属鄂东北独立团，1947 年 2 月改编为华东野战军第二纵队四师 11 团 6 连. 作为一支能征善战、有着光荣传统的红军连队，先后经历了土地革命战争、抗日战争、解放战争、抗美援朝等战火洗礼.

1948年，因在淮海战役初期的一次夜战中勇猛顽强、战绩突出，上级授予该连“夜老虎”荣誉称号. 九十一年光辉历程中，经过无数次战火洗礼和考验，锻造出了勇猛顽强、敢打必胜的“夜老虎”精神，并在益林战斗、激战桃花岛、血战登步岛等战斗中，涌现出“华东三级人民英雄”秦玉芝，一等功臣张守存、王翁基、王耀希等英模人物.

抗日战争时期，该连随团从七里坪出发，高举抗日救国大旗挺进皖东. 期间，先后与日伪军游击作战十余次，不同程度打击了“日军不可战胜”的神话. 先后参加蒋家口伏击战、棋盘岭伏击战、运漕镇奇袭战、大桥战斗等大小百余次战斗，剿灭了大批汉奸、土匪及反动武装.

解放战争时期，该连先后参加了朝阳、宿北、白塔埠、孟良崮、南麻、胶东等战斗和淮海大决战、渡江作战等著名战役，为解放事业做出了重要贡献.

新时期风采

面对新时代历史使命，该连官兵始终铭记革命先辈的英雄事迹与铿锵誓言，在党的坚强领导下聚焦备战打仗.

敢打必胜的责任担当源于对使命的忠诚坚守、源于对人民的深情厚爱、源于对胜利的执着追求. 它是在血与火的考验中淬炼而成的品格，是在苦与乐的磨砺中铸就的信念. 这种担当不是空洞的口号，而是融入血脉的基因.

实战实训中，全连官兵始终保持冲锋姿态，勇于战法创新，深入钻研新型战术战法，在战场上能够快速歼灭“敌”有生力量，构建严密的阵地防空体系，为战役胜利奠定坚实基础. 面对新装备训练中的高难度课目，该连第一时间成立党员攻关组，昼夜奋战研究战法训法，将成功经验推广至全旅各个连队.

近年来，连队多次赴高原执行驻训任务. 在极端恶劣的环境下，全连官兵发扬“一不怕苦、二不怕死”的战斗精神，锤炼过硬胜战本领，用实际行动诠释了新时代军人的使命担当.

从淮海战役的夜袭战壕到新时代的电子荧屏，“夜老虎连”的胜战基因从未褪色. 当新型作战的号角吹响，这支浸染着战火荣光的红军连队，将继续锤炼胜战本领，以自强不息的势头朝着新时代强军目标奋勇前行.

Daring to Fight and Win, Fierce in Night Battles: Sharpening the New Era’s Night Tiger Blade

Source: Snow Mountain War Eagle Official Account

Author: Liu Yang, Yuan Xiao

Editor: Li Jiaqi

2025-12-03

Night Tiger Company

6th Motorized Infantry Company, a brigade of the 76th Group Army of the PLA

The Night Tiger Company was founded in 1934, belonging to the Northeast Hubei Independent Regiment. In February 1947, it was reorganized into the 6th Company of the 11th Regiment, 4th Division, 2nd Column of the East China Field Army. As a Red Army company with a glorious tradition of fighting and combat prowess, it has experienced the baptism of fire in the Land Revolution War, the War of Resistance Against Japan, the War of Liberation, and the War to Resist US Aggression and Aid Korea.

In 1948, due to its bravery and tenacity in a night battle during the early stages of the Huaihai Campaign, and its outstanding achievements, the company was awarded the honorary title of “Night Tiger” by its superiors. Throughout its 91-year glorious history, the company has undergone countless baptisms and trials in battle, forging the fierce, tenacious, and invincible spirit of the “Night Tigers.” In battles such as the Yilin Battle, the fierce battle of Taohua Island, and the bloody battle of Dengbu Island, it produced exemplary figures such as Qin Yuzhi, a “Third-Class People’s

Hero of East China," and Zhang Shoucun, Wang Wengji, and Wang Yaoxi, all recipients of the First-Class Merit Citation.

During the War of Resistance Against Japan, the company, along with its regiment, departed from Qiliping, advancing into eastern Anhui under the banner of resistance against Japan and national salvation. During this period, it engaged in more than ten guerrilla battles against the Japanese and puppet troops, shattering the myth of the "invincibility of the Japanese army" to varying degrees. It participated in over a hundred battles, large and small, including the Jiangjiakou Ambush, the Qipanling Ambush, the Yuncao Town Surprise Attack, and the Daqiao Battle, eliminating a large number of traitors, bandits, and reactionary armed forces.

During the Liberation War, the company participated in battles such as Chaoyang, Subei, Baitabu, Menglianggu, Nanma, and Jiaodong, as well as famous campaigns like the Huaihai Campaign and the Crossing the Yangtze River Campaign, making significant contributions to the liberation cause.

New Era Spirit: Facing the historical mission of the new era, the officers and men of the company always remember the heroic deeds and resounding oaths of their revolutionary predecessors, focusing on combat readiness under the strong leadership of the Party.

The sense of responsibility to fight and win stems from unwavering loyalty to their mission, deep love for the people, and a persistent pursuit of victory. It is a character forged in the crucible of blood and fire, a belief forged in the trials of hardship and joy. This responsibility is not an empty slogan, but a gene ingrained in their very being.

In actual combat training, the entire company maintains a charging posture, dares to innovate tactics, and deeply studies new tactics and methods. On the battlefield, they are able to quickly annihilate enemy forces and build a tight air defense system, laying a solid foundation for victory in battles. Faced with the highly challenging training subjects using new equipment, the company immediately established a Party member task force, working day and night to research tactics and training methods, and then disseminating successful experiences to all companies throughout the brigade.

In recent years, the company has repeatedly undertaken training missions on the plateau. In extremely harsh environments, all officers and men displayed the fighting spirit of "not fearing hardship or death," honing their combat skills to achieve victory, and demonstrating the mission and responsibility of soldiers in the new era through their actions.

From the night raids on trenches during the Huaihai Campaign to the electronic screens of the new era, the winning genes of the "Night Tiger Company" have never faded. As the call for new types of warfare sounds, this Red Army company, steeped in the glory of war, will continue to hone its combat skills and forge ahead with unyielding momentum towards the goal of building a strong military in the new era.

立体突击山林间！第 75 集团军某旅开展空地协同训练

来源：解放军报 作者：付鑫鹏 刘维礼 责任编辑：郭妍菲 2025-12-04

立体突击山林间

——第 75 集团军某旅开展空地协同训练见闻

■付鑫鹏 刘维礼

空中，战机编队凌空呼啸，直扑目标地域；机舱内，突击队员全副武装，随时做好战斗准备……近日，第 75 集团军某旅在某山林地展开一场空地协同训练.

“进入‘敌’雷达搜索区域！”飞行途中，上级通报突然传来. 编队长机机长命令各机组关闭电台，保持无线电静默. 随后，编队战机依托山地等有利地形实施超低空突防，各机组飞行员驾驶战机不断调整飞行速度与飞行高度，成功规避“敌”雷达搜索. 意外进入“敌”防空火力网、遭“敌”电磁干扰……向目标地域机动途中，上级通报不时传来，各机组密切配合，连续处置多个特情，多种协同战法得到实战化检验.

“刀不磨不快，兵不练不强. ”该旅领导介绍，为了全面检验前期空地融合训练成果，此次协同训练，他们紧贴实战要求，结合典型作战场景临机导调多种特情，重点围绕立体突击、敌后破袭等实战化课目组织连贯训练，部队真打实备能力得到进一步锤炼.

经过一路奔袭，编队顺利抵达目标地域上空. 战机低空悬停，突击队长率先索降着陆，突击队员紧随其后依次索降. 安全着陆后，突击队按预案展开战斗队形，迅速向“敌”目标悄然抵近.

“‘敌’前沿防御工事坚固，火力猛烈！”抵近途中，侦察兵实时回传情报信息. 突击队长冷静研判形势后，指挥突击队员兵分两路，一组向“敌”前沿发起佯攻，全力吸引“敌”火力，另一组利用复杂地形迂回渗透至“敌”后方，做好战术夹击准备. 密林间，突击队员闻令而动，采取小群多路方式向“敌”纵深发起多方位、多批次冲击，成功打击“敌”重要目标.

“发现‘敌’武装直升机！”正当官兵清扫“敌”残余兵力时，“敌”机发起突袭. 紧急关头，突击队长立即指挥通信兵将“敌”机坐标等信息回传至后方指挥部，请求战机空中支援. 不多时，战机编队呼啸而至，协同突击队对“敌”机展开立体火力打击……

完成任务后，突击队快速撤离战场，前往预定地域集结. 引擎轰鸣声中，战机搭载突击队员返航.

任务归来，复盘展开. 参训的该旅空中、地面分队官兵对此次协同训练进行总结梳理，一些平时训练中难以发现的深层次问题逐一浮出水面. 该旅作训科一名参谋表示，他们将拉单列表制订改进措施，针对性调整训练方案，力争打一仗、进一步.

Three-Dimensional Assault in the Mountains! A Brigade of the 75th Group Army Conducts Air-Ground Coordination Training

Source: PLA Daily

Author: Fu Xinpeng, Liu Weili

Editor: Guo Yanfei

2025-12-04

Three-Dimensional Assault in the Mountains

—Observations on Air-Ground Coordination Training Conducted by a Brigade of the 75th Group Army

■ Fu Xinpeng, Liu Weili

In the air, combat aircraft [helicopter] formations roared through the sky, heading straight for the target area; inside the cockpits, assault team members were fully armed, ready for combat at any moment… Recently, a brigade of the 75th Group Army conducted an air-ground coordination training exercise in a mountainous forest area.

“Entering the enemy’s radar search area!” During the flight, a report suddenly came from higher command. The squadron leader ordered all crews to shut down their radios and maintain radio silence. Subsequently, the formation combat aircraft used the advantageous terrain, such as mountains, to conduct ultra-low-altitude penetration. Each crew pilot continuously adjusted their speed and altitude, successfully evading the enemy’s radar search. Unexpectedly entering the “enemy’s” air defense network and encountering “enemy” electromagnetic interference... During the maneuver to the target area, reports from higher command came frequently. The various crews cooperated closely, handling multiple contingencies in succession, and various collaborative tactics were put to realistic combat testing.

“A knife that isn’t sharpened won’t be sharp, and men that aren’t trained won’t be strong.” The brigade leadership explained that, in order to comprehensively test the results of previous air-ground integrated training, this joint training exercise closely adhered to actual combat requirements, combining typical combat scenarios with impromptu simulations of various contingencies. The focus was on organizing continuous training around realistic combat subjects such as three-dimensional assault and raids behind enemy lines, further honing the unit’s real-world combat readiness capabilities.

After a rapid advance, the formation successfully arrived over the target area. The combat aircraft hovered at low altitude, and the assault team leader rappelled down first, followed by the assault team members. After a safe landing, the assault team deployed into combat formation according to the plan and quickly and quietly approached the “enemy” target.

“The ‘enemy’ forward defensive fortifications are strong, and their firepower is fierce!” During the approach, reconnaissance soldiers transmitted intelligence information in real time. After calmly assessing the situation, the assault team leader ordered his men to split into two groups. One group launched a feint attack on the “enemy’s” front lines to draw enemy fire, while the other group used the complex terrain to infiltrate behind enemy lines and prepare for a pincer attack. In the dense forest, the assault team moved swiftly, launching multiple attacks from various directions and waves deep into the “enemy’s” territory, successfully striking key “enemy” targets.

“Enemy armed helicopters spotted!” Just as the troops were clearing out the remaining “enemy” forces, enemy aircraft launched a surprise attack. In this critical moment, the assault team leader immediately instructed the communications officer to transmit the coordinates and other information of the “enemy” aircraft back to the rear command post, requesting air support. Soon after, a formation of combat aircraft roared in, coordinating with the assault team to launch a three-dimensional firepower attack on the “enemy” aircraft…

After completing their mission, the assault team quickly withdrew from the battlefield and headed to the designated regrouping area. With the roar of engines, the combat aircraft carrying the assault team returned to base.

After returning from the mission, a debriefing was conducted. The air and ground troops participating in the training summarized and reviewed the joint exercise, revealing some deep-seated problems that were difficult to detect during routine training. A staff officer from the brigade’s training department stated that they will compile a list of improvement measures and adjust training programs accordingly, striving to make further progress with each battle.

军营观察丨雪线之上，情系“士兵的呼吸”

来源：解放军报 作者：严贵旺 郭丰宽 刘大辉 等 责任编辑：孙悦 2025-12-04

在高原，氧气到底有多重要，可能只有经历过才有深刻体会. 曾几何时，一代代高原官兵靠着“三分靠氧气、七分靠精神”的顽强意志在“生命禁区”坚守.

氧气是维护高原官兵身心健康、保障部队战斗力的必备条件. 近年来，在中央军委的决策部署下，一场“吸氧之变”正在雪域高原发生——军委机关统筹规划，从政策支持、标准制定到资源配置进行系统布局，联勤保障部队所属单位聚力攻坚，打造立体供氧格局，驻高原各部队保障部门协同发力，确保制供氧落实到一线、连通到班排.

从战略规划到工程实施，再到边防部队的末端落实，一个以固定站点制氧机组为支撑、小型制氧机为补充的氧气供应保障体系基本形成. “床头氧”“哨位氧”“训练氧”成为常态，单兵增氧呼吸器、供氧方舱等逐步列装，3D 打印维修配件、远程故障诊断等持续升级……高原氧气保障实现了从“救命氧”到“保健氧”“战斗氧”的跨越式发展，为钢铁长城筑起坚实的生命支撑.

冬季，是高原较为缺氧的季节. 日前，本报记者深入高原部队采访，近距离感受“吸氧之变”催生的高原戍边新图景.

某高原哨所，官兵正在执勤.

雪线之上，情系“士兵的呼吸”

■严贵旺 解放军报记者 郭丰宽 特约记者 刘大辉

记者调查

过去吸氧是“奢侈品”，现在氧气是触手可及的“日用品”

“驻守高原缺的是氧气，不缺的是精神！”西藏军区某旅一级上士侯敏在高原服役 10 多年，对“缺氧”有着刻骨铭心的记忆.

某次边防巡逻途中，巡逻小队在海拔 5000 多米的山口突遇暴风雪，官兵们躲进山坳等待风雪停歇. 高原反应加剧时，那个简陋的蓝色氧气袋在官兵手中传递，每人只能吸氧几十秒. “过去氧气很宝贵，氧气袋是重要巡逻物资和‘生命补给’. ”侯敏说.

“缺氧的时候，高原戍边凭的是意志力. ”某团二级上士王兵回忆，在含氧量较低的冬季，巡逻归来会头痛胸闷，真是“三分靠氧气，七分靠精神”！

这些记忆，是高原一线官兵与缺氧环境艰苦抗争的缩影. 多年前，某哨所官兵在冰崖上凿出“天梯”，依靠牦牛驮运上百斤重的氧气瓶；受制氧技术制约，基层连队军医发明“30 分钟间歇吸氧法”，将氧气留给最需要的战友.

解决高原官兵吸氧难题，是新时代高原部队建设的必然要求. 近年来，西藏军区保障部将制供氧保障列为重要工程，在上级机关支持下，投入大量资源构建起点面结合、阶梯辐射的供氧保障体系.

“过去氧气瓶只能放在卫生室，如今氧气直接通到床头. ”某旅三级军士长古晓完成训练后，回到宿舍开启吸氧机，氧气从固定制氧站传输而来，训练的疲惫在输氧管的气流声中慢慢缓解. 该旅新建的固定制氧站点，能保障数千名官兵同时吸氧.

“过去吸氧是‘奢侈品’，现在氧气是触手可及的‘日用品’. ”西藏军区保障部卫生处领导介绍，这样的固定氧站点，全区部队已建成 164 座，氧气直通班排.

针对西藏边防哨点多、驻勤分队散的特点，他们拟制“氧气孤岛”攻坚清单，采取“上级配发+本级采购”形式，为不同需求单位配备制氧方舱、便携制氧机等设备，形成立体供氧新格局.

在查果拉哨所，小型落地式制氧机配发执勤点哨，将氧气源源不断输送至雪山战位. “在这伸手把天抓的地方，官兵基本实现了‘吸氧自由’！”在某执勤哨，上等兵余迅兴奋地向记者展示床头摆放的吸氧终端，“吸氧时长、浓度都能智能调节，太给力了”.

巡逻间隙，西藏军区某部巡逻官兵使用便捷制氧装备吸氧.

“吸氧之变”背后的保障新机制，正成为戍边常态

某团二级上士赵宝生即将服役期满，面对进退走留的抉择时，他写下留队申请，开启了新一段高原戍边征程. 在他看来，随着高原吸氧保障能力的提升，官兵的健康情况正在逐年改善.

“新一代营房中安装多种制氧设备，弥散式制氧让室内氧气充足. ”该团军医陈明介绍，“吸氧之变”背后的保障新机制，正成为戍边常态.

赵宝生的血氧饱和度常年稳定在 90%以上，心肺功能显著增强. “制供氧条件改善，让我们健康有保障，坚守哨位更有底气！”他说，“如今身体状态稳定，我还能在这儿多干几年，把青春献给这片热土. ”

三级军士长王峰在海拔 5000 多米的某哨所坚守 16 年. 前不久，上级为海拔 5000 米以上哨所每名官兵配发一台小型智能制氧机，如今执勤归来，王峰和战友可以随时吸上“床头氧”，大家的守哨信心更足了.

不仅如此，西藏军区保障部还为海拔 5000 米以上哨所建立官兵健康档案，每个月上报数据信息，针对性开展健康巡诊.

“官兵健康有保障，反映的是上级为基层解难帮困的态度，增强的是官兵的归属感，提振的是扎根高原的精气神. ”日喀则军分区保障部门一位领导说.

在日喀则军分区卫生站，张站长正在查阅每月上报的官兵健康档案：“急性高原病发病率从 5 年前的 20%降至 5%，官兵血氧饱和度平均提升 8 个百分点，睡眠质量优良率也有所提升. ”他告诉记者，现在巡诊时官兵脸上的“高原红”常能看到，但“乌紫唇”明显减少.

新兵石明曾听老兵说，海拔越高，适应期越长. 石明被分配到海拔 5000 米以上某哨所，多元化的氧气保障消除了他的顾虑.

“有了制供氧保障这个坚实后盾，新兵高原适应期明显缩短. ”一份数据显示，近年来新兵申请上高海拔哨所服役的比例逐年提升.

在驻地海拔 4500 米的某营，中士樊浩的女儿正和小伙伴在营院中玩耍. 军嫂明璐回忆，3 年前她来探亲，曾因缺氧等原因而高烧，如今来队家属房中安装了弥散式供氧设备，来队探亲的军属也安心多了.

如今，执勤有“哨楼氧”，图书室有“阅读氧”，文化中心配备了“K 歌氧”. 下士杨帆打趣道：“以前吼首歌经常‘眼前一黑’，现在能连唱好几首呢！”

新疆军区某部高压氧舱内，官兵在吸氧休息.

有力保障，让训练作战实现“带氧冲锋”

晨曦刺破云层，将海拔 4300 多米的综合训练场染成金色. 一场对抗训练激战正酣.

红方指挥员黄营长面前的指挥信息系统亮起预警：“蓝方正在包抄某高地. ”

“突击分队抢占阵地！”命令下达后，红方指战员从迷彩背囊取出单兵增氧设备，含住呼吸阀冲向雪线.

他们连续突破海拔差达 800 米的 3 个高地，抢在蓝方之前抵达目标地域.

“过去冲一次山头后，我们要预留‘喘气时间’缓一缓，现在能无缝衔接打穿插！”走下演训场，黄营长松了一口气说，“带氧冲锋”有力提高了作战效率.

在边防线上，氧气保障让巡逻效能更高. 某团曹连长说，连队巡逻点位需要翻越雪山，那条路极为艰险，缺氧环境让战士消耗大量体力. 曾有战士因缺氧晕倒，巡逻队走了十几小时才返营.

如今，巡逻队配有便携制氧装备，方便途中补充氧气. 曹连长带队巡守这条路线，官兵身体状态得到保障，巡逻效率得以提升.

让官兵振奋的是，新型高原机动供氧方舱已逐步配发一线——方舱拆卸方便，能伴随部队快速部署，有效保障野战宿营地帐篷含氧量，被官兵称为“氧气堡垒”.

在海拔 4700 米某驻训地，机器轰鸣声中，制氧方舱正常运转. 军医陈云举着血氧仪穿梭在野营帐篷间：“官兵的高海拔驻训适应期缩短，靠的就是高效的‘制氧流程’. ”

“吸氧之变”带来的效应正在显现：某部官兵佩戴单兵增氧呼吸器攀登山崖，心率指标平稳；机动演练中，某分队官兵身体机能平稳，比预定时间提前抵达集结地域……

“有力保障，让训练作战实现‘带氧冲锋’. ”西藏军区保障部卫生处领导表示，“当官兵高原练兵时呼吸畅快，他们就能把全部力量灌注进使命任务. ”

编辑连线

军营观察版编辑对话西宁联勤保障中心卫勤处处长闫保华——

让“供氧力”赋能战斗力

（素材提供：王圣尧、张延斌；视频剪辑：刘洋）

习主席强调，各级要满腔热忱关心关爱官兵，主动为官兵解决实际困难，把官兵练兵备战积极性、主动性、创造性充分发挥出来，齐心协力把强军事业推向前进. 西宁联勤保障中心聚焦保健康、强战力需求，构建“集中供氧、智能监测、移动补给”三位一体高原供氧体系，实现从“基础覆盖”到“智能精送”的跨越. 吸氧保障如何服务战斗力？围绕这一话题，军营观察版编辑与西宁联勤保障中心卫勤处处长闫保华进行连线交流.

编辑：近年来，高原制供氧站点不断增多、手段不断升级，请介绍一下相关情况.

闫保华：高原含氧量不足内地 60%，直接威胁战斗力与官兵生命安全. 中心自 2016 年起在多个点位试点集中供氧，将“救命氧”转为“日常氧”. 我们探索推行“集中供氧+移动补给”双轨模式——固定哨所配备制氧站，驻训期间使用机动制氧方舱，巡逻途中配备便携制氧机，实现点线结合、全程供氧. 引入高原制供氧装备态势感知系统，构建供氧“数智大脑”，实时采集设备数据，依托智能分析技术快速判断故障，实现站点组网管理. 系统可远程控制停机，实现装备 24 小时无人值守，保障能力实现质的飞跃.

编辑：高原供氧主要面临哪些难点，部队采取了哪些办法？

闫保华：西部高原制氧站点分布广、线路长，部分哨所交通物流不便，维修配件难以及时送达；一线官兵维修能力不足，故障频发导致供氧持续性难以保证；高能耗、高成本的运行模式，也对战斗力生成形成制约.

自 2018 年以来，我们在 4000 米以上地域部署了高原制供氧装备态势感知系统终端，有力保障“高纯氧”稳定供应. 系统对制氧站点实施组网管理，实时监测供氧能力分布，实现精准调度输送. 数据显示，集中供氧后官兵高原反应发生率下降 30%，血氧饱和度达标率提升，官兵士气高涨，部队战斗力不断提高.

编辑：请谈一下未来高原供氧保障的发展方向.

闫保华：下一步，我们将推进供氧体系向智能化、精准化、全域化升级，构建高原供氧“云平台”，实现按需供氧；打造“前伸后送、平战一体”网络，借助 3D 打印实现备件快速生成；加强人才队伍建设，真正实现“任务在哪，氧气到哪”.

第一现场

高原制氧员

从“氧烦恼”到“氧自由”

■张军辉 解放军报特约通讯员 孟 钊

“听老班长说，多年前上高原执行任务时，只有高反严重的病号才能吸上氧气. 现在不光床头有氧气，好多点位建了吸氧方舱，连驾驶室都能随时吸氧. ”驻守在海拔 4300 多米的陆军某部制氧员尹浩臣感慨道.

2018 年，尹浩臣第一次赴高原驻训时，每次都要开车到几十公里外灌装氧气，来回耗时几小时，才能保障官兵每天吸一小时氧. 如今，各单位配备制氧方舱，可同时灌装多瓶高浓度氧气，配套安装床头供氧设备，还建起富氧室内训练场和微压氧舱.

“制氧供氧常态化后，官兵高原反应能及时缓解，身体机能快速恢复，完成训练、巡逻任务的劲头更足了. ”尹浩臣说.

前不久，驻守海拔 4800 多米的西藏某兵站制氧员李钰，接到西宁联勤保障中心药品仪器监督检验站的电话：“制氧机空气压缩机高温报警，已远程停机，请做好检修准备. ”不到半小时，在技术骨干远程指导下，故障排除，制氧机重新启动.

“现在制氧机有了信息化保障手段，我们不用三更半夜去巡查值守了！”李钰欣喜地说.

这一变化得益于药品仪器监督检验站建成的大型制供氧设备态势感知控制系统，能 24 小时实时监测高原点位制供氧设备的运行状态，对工作数据进行分析，并远程指导维修骨干排除故障.

“报告！制氧机故障，申请检修……”驻守海拔 4000 多米的某团制氧机发出警报后，值班工程师立即远程停机处置，紧急指导该单位制氧员郝志杰检修. 检查发现零件损坏后，郝志杰取出检验站配送的 3D 打印零件，更换后制氧机顺利启动.

“用 3D 打印技术制作制氧机零件，是我在联勤保障中心组织的维修骨干培训班上学到的. ”郝志杰打开工具包，展示着里面各式各样的 3D 打印配件.

该检验站信息科李主任介绍，用 3D 打印技术制作制氧机零件，突破了传统后勤维修模式的限制，为战场提供了更高效、精准的维修支持.

从“氧烦恼”到“氧自由”，科技正为高原官兵筑起一道坚实的“生命氧线”.

高原守哨兵

氧气“护航”高原巡逻

■马卫生

11 月的那场巡逻，让我印象深刻. 暴风雪突然封山，能见度骤降. 我和战友们戴着新型供氧面罩，在海拔 4600 多米的雪线上艰难前行.

面罩下的氧气源源不断，顺着鼻腔钻进肺部. 顶风冒雪攀登跋涉，充足的氧气供应让我们保持头脑清醒. 沿着既定路线，我们一鼓作气攀上目标点位，全程无一人掉队.

这在过去不可想象. 还记得作为新兵的我第一次参加巡逻，在海拔近 5000 米的山脊负重徒步，风裹着雪粒迎面吹来，每一次呼吸都很艰难. 我感到头部胀痛，腿脚发软，一个踉跄坐在地上. 随队军医递来便捷氧气包，我渐渐恢复了意识. 那时连队没有制氧设备，氧气是“救命氧”，只能留给最需要的战士……

在上级支持下，詹娘舍这个“雪山孤哨”，如今供氧保障发生了翻天覆地的变化. 宿舍里，输氧线接通到床头，吸氧时间、氧气浓度一键调节；健身房内，氧气实现弥散式供应，官兵训练状态持续“在线”；巡逻路上，便携制氧装备统一配发，突击车上也安装了制氧装置. 连队组织训练，我们手腕佩戴智能血氧仪，身体指标一目了然.

除掉“缺氧”这个拦路虎，高原练兵如火如荼. 作为守哨老兵，我见证了练兵之变. 室内组训灵活多样，官兵参训放开手脚；新兵更快适应高原环境，基本实现“满一周能参加低强度训练、满一月能参加短距离巡逻”.

保障条件改善，让哨所练兵备战成绩一路上升. 今年年终考核，哨所训练成绩有了新的进步. 大家纷纷表示：如今驻守哨所，战友们甩开膀子加紧练. 充足的氧气保障，让我们在高原训练的道路上跑出了加速度.

Military Camp Observation | Above the Snowline, the Concern for “Soldiers’ Breath”

Source: PLA Daily

Authors: Yan Guiwang, Guo Fengkuan, Liu Dahui, et al.

Editor: Sun Yue

2025-12-04

On the plateau, the true importance of oxygen can only be fully appreciated through experience. For generations, plateau soldiers have persevered in this “forbidden zone of life” with an indomitable will, relying on “three parts oxygen and seven parts spirit.”

Oxygen is essential for maintaining the physical and mental health of plateau soldiers and ensuring the combat effectiveness of the troops. In recent years, under the decision-making and deployment of the Central Military Commission, a “transformation in oxygen supply” is taking place on the snowy plateau—the Central Military Commission has made overall plans, systematically arranging from policy support and standard setting to resource allocation; units under the Joint Logistics Support Force have focused their efforts on building a three-dimensional oxygen supply system; and support departments of various troops stationed on the plateau have worked together to ensure that oxygen production and supply reach the front line and connect to platoons and squads.

From strategic planning to engineering implementation, and then to the grassroots deployment by border troops, a basic oxygen supply guarantee system has been formed, supported by fixed-site oxygen generators and supplemented by small oxygen generators. “Bedside oxygen,” “sentinel oxygen,” and “training oxygen” have become the norm. Individual oxygen-enhancing respirators and oxygen supply cabins are gradually being deployed, and upgrades such as 3D-printed repair parts and remote fault diagnosis are continuously being implemented… The oxygen supply guarantee for the plateau has achieved a leapfrog development from “life-saving oxygen” to “health-preserving oxygen” and “combat oxygen,” building a solid life support for the Great Wall of Steel.

Winter is a season of relatively low oxygen levels on the plateau. Recently, our reporter went deep into the plateau troops for interviews, experiencing firsthand the new landscape of plateau border defense brought about by the “transformation of oxygen intake.”

Soldiers are on duty at a plateau outpost.

Above the Snowline, a Concern for Soldiers’ Breathing

■ Yan Guiwang, PLA Daily Reporter; Guo Fengkuan, Special Correspondent; Liu Dahui

Reporter Investigation: In the past, oxygen was a “luxury,” now it’s an readily available “daily necessity.”

“What we lack while stationed on the plateau is oxygen, not spirit!” Hou Min, a first-class sergeant in a brigade of the Tibet/Xizang Military Command, has served on the plateau for over 10 years and has a deeply etched memory of “oxygen deficiency.”

During a border patrol, the patrol team encountered a blizzard at a mountain pass at an altitude of over 5,000 meters. The soldiers took shelter in a ravine, waiting for the blizzard to subside. As altitude sickness worsened, the simple blue oxygen bag was passed from hand to hand, each person

only able to breathe for a few dozen seconds. “Oxygen was very precious in the past; oxygen bags were important patrol supplies and ‘life-saving supplies,’” Hou Min said.

“When oxygen is scarce, guarding the plateau relies on willpower,” recalled Wang Bing, a second-class sergeant in a certain regiment. In the winter, when oxygen levels are low, returning from patrols would result in headaches and chest tightness; truly, “three parts depend on oxygen, seven parts on spirit!” These memories are a microcosm of the arduous struggle of soldiers on the front lines of the plateau against the oxygen-deficient environment. Years ago, soldiers at a certain outpost carved a “ladder” into an ice cliff, relying on yaks to transport oxygen cylinders weighing hundreds of kilograms. Limited by oxygen production technology, medics at the grassroots level invented a “30-minute intermittent oxygen inhalation method,” reserving oxygen for their comrades who needed it most.

Solving the oxygen problem for soldiers on the plateau is an inevitable requirement for the construction of plateau troops in the new era. In recent years, the Logistics Department of the Tibet/Xizang Military Command has listed oxygen production and supply as a key project, investing significant resources, with the support of higher authorities, to build a comprehensive oxygen supply system that combines basic and general needs, and radiates outwards in a tiered manner.

“In the past, oxygen cylinders could only be placed in the medical room; now, oxygen is delivered directly to the bedside,” said Gu Xiao, a third-level sergeant major in a certain brigade, as he returned to his dormitory after training and turned on his oxygen concentrator. Oxygen was transmitted from a fixed oxygen production station, and the fatigue from training gradually eased with the sound of the airflow from the oxygen tube. The brigade’s newly built fixed oxygen production station can ensure that thousands of soldiers can inhale oxygen simultaneously.

“Oxygen was once a luxury, but now it’s a readily available daily necessity,” said a leader from the Health Department of the Logistics Support Department of the Tibet/Xizang Military Command. He explained that 164 such fixed oxygen stations have been built across the region, providing oxygen directly to platoon and squad levels.

Addressing the challenges posed by the numerous border outposts and scattered deployment units in Tibet/Xizang, they developed a “comprehensive oxygen supply list” and adopted a “superior allocation + local procurement” approach, equipping units with oxygen-generating cabins, portable oxygen generators, and other equipment to create a new, multi-dimensional oxygen supply system.

At the Chagola outpost, small, floor-standing oxygen generators have been distributed to the outposts, continuously supplying oxygen to the snow-capped mountain positions. “In this place where the sky seems to touch your hand, the soldiers have basically achieved ‘oxygen freedom’!” At a certain outpost, Private Yu Xun excitedly showed reporters the oxygen terminal placed beside his bed. “The oxygen duration and concentration can be intelligently adjusted; it’s amazing!”

During patrol breaks, soldiers from a unit of the Tibet/Xizang Military Command use convenient oxygen-generating equipment to breathe oxygen.

The new support mechanism behind the “transformation of oxygen supply” is becoming the norm for border defense. Sergeant Zhao Baosheng of a certain regiment is about to complete his service. Faced with the choice of staying or leaving, he wrote an application to remain in the army, embarking on a new chapter in his high-altitude border defense journey. In his view, with the improvement of oxygen supply capabilities at high altitudes, the health of officers and men is improving year by year.

“The new generation of barracks is equipped with various oxygen-generating devices, and the diffused oxygen generation ensures sufficient oxygen indoors,” explained Chen Ming, the regiment’s military doctor. The new support mechanism behind the “transformation of oxygen supply” is becoming the norm for border defense.

Zhao Baosheng’s blood oxygen saturation has remained stable above 90% for many years, and his cardiopulmonary function has significantly improved. “The improved oxygen supply conditions ensure our health, giving us more confidence to stand guard!” he said. “Now that my physical condition is stable, I can stay here for a few more years and dedicate my youth to this land.” Sergeant Wang Feng has been stationed at a border post at an altitude of over 5,000 meters for 16 years. Not long ago, higher authorities equipped each soldier at outposts above 5,000 meters altitude with a small, intelligent oxygen generator. Now, upon returning from duty, Wang Feng and his comrades can enjoy “bedside oxygen” anytime, boosting their confidence in their postings.

Furthermore, the Logistics Department of the Tibet/Xizang Military Command has established health records for soldiers at outposts above 5,000 meters, submitting data monthly and conducting targeted health checkups.

“Ensuring the health of soldiers reflects the higher authorities’ attitude of helping and supporting grassroots units, enhances soldiers’ sense of belonging, and inspires their spirit of dedication to the plateau,” said a leader from the logistics department of the Shigatse Military Sub-district.

At the Shigatse Military Sub-district Health Station, Station Chief Zhang was reviewing the monthly health records of soldiers: “The incidence of acute altitude sickness has dropped from 20% five years ago to 5%, soldiers’ blood oxygen saturation has increased by an average of 8 percentage points, and the rate of excellent sleep quality has also improved.” He told reporters that now, during checkups, the “plateau red” complexion of soldiers is often seen, but the “purple lips” have significantly decreased.

New recruit Shi Ming had heard from veterans that the higher the altitude, the longer the acclimatization period. Assigned to a post above 5000 meters, Shi Ming’s concerns were alleviated by the diversified oxygen supply system.

“With this solid support of oxygen supply, the acclimatization period for new recruits has been significantly shortened,” data shows. In recent years, the proportion of new recruits applying to serve at high-altitude posts has been increasing annually.

At a battalion stationed at an altitude of 4500 meters, Sergeant Fan Hao’s daughter was playing with her friends in the camp. Military spouse Ming Lu recalled that three years ago, when she visited, she had a high fever due to oxygen deficiency. Now, diffused oxygen supply equipment has been installed in the family quarters, making visiting military families much more reassured.

Now, there’s “sentry tower oxygen” for duty, “reading oxygen” in the library, and “karaoke oxygen” in the cultural center. Corporal Yang Fan joked, “Before, I’d often faint after belting out a song, but now I can sing several in a row!” Soldiers rest and inhale oxygen in a hyperbaric oxygen chamber of a unit in the Xinjiang Military Command.

Strong support enables “oxygen-fueled assaults” in training and combat. The morning sun pierced the clouds, turning the comprehensive training ground at an altitude of over 4,300 meters golden. A fierce combat training exercise was underway.

The command information system in front of Battalion Commander Huang, the commander of the Red Force, lit up with an alarm: “The Blue Force is encircling a certain high ground.”

“Assault teams, seize the position!” After the order was given, the Red Force soldiers took out their individual oxygen supply devices from their camouflage backpacks, held the breathing valves in their mouths, and rushed towards the snow line.

They successively broke through three high grounds with an altitude difference of 800 meters, reaching the target area before the Blue Force.

“In the past, after charging a hill, we had to allow time to catch our breath. Now we can seamlessly connect and carry out infiltration!” Stepping off the training ground, Battalion Commander Huang breathed a sigh of relief, saying, “Oxygen-fueled assaults” have significantly improved combat efficiency.

On the border defense line, oxygen support makes patrols more effective. Company Commander Cao of a certain regiment said that the company’s patrol points required traversing snow-capped mountains, a route that was extremely treacherous, and the oxygen-deficient environment caused soldiers to expend a great deal of energy. One soldier even fainted due to lack of oxygen, and the patrol team took more than ten hours to return to camp.

Now, the patrol team is equipped with portable oxygen-generating equipment, making it convenient to replenish oxygen along the way. With Company Commander Cao leading the patrol along this route, the soldiers’ physical condition is ensured, and patrol efficiency is improved.

What excites the soldiers is that new high-altitude mobile oxygen supply cabins have been gradually deployed to the front lines—the cabins are easy to disassemble and can be quickly

deployed with the troops, effectively ensuring the oxygen content of tents in field camps, earning them the nickname “oxygen fortresses” from the soldiers.

At a training site at an altitude of 4,700 meters, the oxygen-generating cabins are operating normally amidst the roar of machinery. Military doctor Chen Yun, carrying a pulse oximeter, moved between the camping tents: “The shortened acclimatization period for soldiers during high-altitude training is thanks to the efficient ‘oxygen production process.’“

The effects of this “transformation in oxygen intake” are becoming apparent: soldiers in one unit, wearing individual oxygen-enhancing respirators, climbed cliffs with stable heart rates; during a mobile exercise, soldiers in another detachment maintained stable physical functions and arrived at the assembly area ahead of schedule…

“Powerful support allows training and combat to achieve ‘oxygen-fueled assault’,” said a leader from the Health Department of the Logistics Support Department of the Tibet/Xizang Military Command. “When soldiers can breathe freely during high-altitude training, they can dedicate all their energy to their mission.” An oxygen generator operator from a unit of the Xining Joint Logistics Support Center is inspecting the oxygen production and supply equipment.

Editor’s Note: A Conversation Between the Military Camp Observation Edition Editor and Yan Baohua, Director of the Medical Services Department of the Xining Joint Logistics Support Center—

Empowering Combat Effectiveness with “Oxygen Supply”

(Materials provided by: Wang Shengyao, Zhang Yanbin; Video editing: Liu Yang)

President Xi Jinping emphasized that all levels should wholeheartedly care for and support officers and men, proactively solve their practical difficulties, and fully unleash their enthusiasm, initiative, and creativity in training and combat readiness, working together to advance the cause of building a strong military. The Xining Joint Logistics Support Center, focusing on the needs of health and combat effectiveness, has constructed a three-in-one plateau oxygen supply system integrating “centralized oxygen supply, intelligent monitoring, and mobile replenishment,” achieving a leap from “basic coverage” to “intelligent and precise delivery.” How does oxygen supply support serve combat effectiveness? The Military Camp Observation Edition editor conducted a video conference with Yan Baohua, Director of the Medical Services Department of the Xining Joint Logistics Support Center, to discuss this topic.

Editor: In recent years, the number of plateau oxygen supply stations has been increasing, and the methods have been continuously upgraded. Please introduce the relevant situation.

Yan Baohua: The oxygen content on the plateau is less than 60% of that in inland areas, directly threatening combat effectiveness and the lives of soldiers. Since 2016, the center has piloted

centralized oxygen supply at multiple locations, transforming “lifesaving oxygen” into “daily oxygen.” We have explored and implemented a dual-track model of “centralized oxygen supply + mobile resupply”—fixed outposts are equipped with oxygen-generating stations, mobile oxygen-generating cabins are used during training exercises, and portable oxygen generators are deployed during patrols, achieving point-to-line and continuous oxygen supply. We have introduced a situational awareness system for plateau oxygen supply equipment, constructing a “digital intelligence brain” for oxygen supply, collecting equipment data in real time, and relying on intelligent analysis technology to quickly diagnose faults and achieve networked management of stations. The system can remotely control shutdown, enabling 24-hour unattended operation of equipment, resulting in a qualitative leap in support capabilities.

Editor: What are the main difficulties in plateau oxygen supply, and what methods have the troops adopted?

Yan Baohua: Oxygen production stations on the western plateau are widely distributed and have long routes. Some outposts face inconvenient transportation and logistics, making it difficult to deliver maintenance parts in a timely manner. Frontline soldiers lack sufficient maintenance capabilities, leading to frequent malfunctions and making it difficult to guarantee the continuity of oxygen supply. The high-energy-consumption and high-cost operating model also restricts combat effectiveness.

Since 2018, we have deployed a situational awareness system terminal for plateau oxygen production and supply equipment at altitudes above 4,000 meters, effectively ensuring a stable supply of “high-purity oxygen.” The system implements network management of oxygen production stations, monitors the distribution of oxygen supply capacity in real time, and achieves precise dispatch and delivery. Data shows that after centralized oxygen supply, the incidence of altitude sickness among soldiers has decreased by 30%, the rate of achieving the target blood oxygen saturation level has increased, soldier morale has risen, and the combat effectiveness of the troops has continuously improved.

Editor: Please discuss the future development direction of plateau oxygen supply support.

Yan Baohua: Next, we will upgrade the oxygen supply system to be more intelligent, precise, and comprehensive, building a “cloud platform” for plateau oxygen supply to achieve on-demand oxygen supply; creating a “front-end and rear-end delivery, peacetime-wartime integrated” network, utilizing 3D printing to rapidly generate spare parts; and strengthening the talent pool to truly achieve “oxygen wherever the mission is.”

First Scene: Plateau Oxygen Generator From “Oxygen Worries” to “Oxygen Freedom”

■ Zhang Junhui, Special Correspondent for the PLA Daily, Meng Zhao

“My old squad leader told me that many years ago, when we went to the plateau for missions, only those suffering from severe altitude sickness could breathe oxygen. Now, not only is there oxygen

at the bedside, but many locations have built oxygen-breathing cabins, and even the driver's cab can breathe oxygen at any time," said Yin Haochen, an oxygen generator stationed at an altitude of over 4,300 meters in an army unit.

In 2018, when Yin Haochen first went to the plateau for training, he had to drive dozens of kilometers away each time to fill up oxygen, taking several hours round trip, just to ensure that the soldiers could breathe oxygen for one hour each day. Now, each unit is equipped with oxygen-generating cabins, capable of simultaneously filling multiple bottles of high-concentration oxygen, along with bedside oxygen supply equipment. Oxygen-enriched indoor training grounds and micro-pressure oxygen chambers have also been built.

"With oxygen production and supply becoming routine, soldiers' altitude sickness is alleviated promptly, their physical functions recover quickly, and they have more energy to complete training and patrol missions," said Yin Haochen.

Not long ago, Li Yu, an oxygen generator operator stationed at a military post in Tibet/Xizang at an altitude of over 4,800 meters, received a call from the Xining Joint Logistics Support Center's Medicine and Instrument Supervision and Inspection Station: "The oxygen generator's air compressor has a high-temperature alarm and has been remotely shut down. Please prepare for maintenance." In less than half an hour, with remote guidance from technical experts, the fault was resolved, and the oxygen generator restarted.

"Now that the oxygen generator has information technology support, we don't have to patrol and stand guard in the middle of the night anymore!" Li Yu said happily.

This improvement is thanks to the large-scale oxygen production and supply equipment situational awareness and control system built at the pharmaceutical and instrument supervision and inspection station. This system can monitor the operational status of oxygen production and supply equipment at high-altitude locations 24/7, analyze operational data, and remotely guide maintenance personnel to troubleshoot faults.

"Report! Oxygen generator malfunction, requesting repair…" After an oxygen generator at a regiment stationed at an altitude of over 4,000 meters issued an alarm, the on-duty engineer immediately remotely shut it down and urgently guided the unit's oxygen generator operator, Hao Zhijie, to repair it. After discovering a damaged part, Hao Zhijie used 3D-printed parts supplied by the inspection station to replace it, and the oxygen generator started successfully.

"I learned how to use 3D printing technology to make oxygen generator parts in a maintenance personnel training course organized by the Joint Logistics Support Center," Hao Zhijie said, opening his toolkit to show off the various 3D-printed accessories inside.

Director Li of the inspection station's information department explained that using 3D printing technology to make oxygen generator parts breaks through the limitations of traditional logistics maintenance models, providing more efficient and precise maintenance support for the battlefield.

From “Oxygen Worries” to “Oxygen Freedom,” technology is building a solid “lifeline” for soldiers stationed on the plateau.

Plateau Guards: Oxygen “Escorts” Plateau Patrols

■ Ma Weisheng

The patrol in November left a deep impression on me. A sudden blizzard blocked the mountain, drastically reducing visibility. My comrades and I, wearing new oxygen masks, struggled to advance along the snow line at an altitude of over 4,600 meters.

The oxygen under the masks flowed continuously, entering our lungs through our nasal passages. Climbing and trekking against the wind and snow, the ample oxygen supply kept us alert. Following the predetermined route, we climbed to our target point in one go, with no one falling behind.

This was unimaginable in the past. I still remember my first patrol as a new recruit, hiking with heavy loads on a mountain ridge at an altitude of nearly 5,000 meters.

The wind, carrying snowflakes, blew against my face, making each breath difficult. My head throbbed, my legs went weak, and I stumbled and sat down on the ground. The accompanying medic handed me a portable oxygen tank, and I gradually regained consciousness. At that time, the company had no oxygen-generating equipment; oxygen was “lifesaving oxygen,” reserved only for the soldiers who needed it most…

With the support of higher command, the oxygen supply to Zhan Niangshe, this “isolated outpost in the snow-capped mountains,” has undergone a dramatic transformation. In the dormitories, oxygen lines are connected to the bedsides, and the oxygen inhalation time and concentration can be adjusted with a single button; in the gym, oxygen is diffused, keeping soldiers constantly “online” during training; on patrol routes, portable oxygen generators are uniformly distributed, and even assault vehicles are equipped with oxygen-generating devices. When the company organizes training, we wear smart pulse oximeters on our wrists, making our physical indicators clear at a glance.

With the obstacle of “oxygen deficiency” removed, high-altitude training is in full swing. As a veteran of the outpost, I have witnessed this transformation in training. Indoor training is flexible and diverse, allowing officers and men to participate with greater freedom; new recruits adapt to the high-altitude environment more quickly, generally achieving the goal of “being able to participate in low-intensity training after one week and short-distance patrols after one month.”

Improved logistical support has led to a continuous rise in the outpost’s training and combat readiness performance. This year’s year-end assessment showed further progress in the outpost’s training results. Everyone expressed that now, stationed at the outpost, comrades are training with renewed vigor. Sufficient oxygen supply has allowed us to accelerate our training on the high-altitude frontier.

砺刃山野！陆军某部炮兵分队开展实弹射击考核

来源：解放军报 作者：刘延源 李建骄 刘东敏 责任编辑：孙悦 2025-12-04

砺刃山野

——陆军某部炮兵分队实弹射击考核掠影

■刘延源 李建骄 刘东敏 摄影报道

射击前装定诸元.

快速机动、抢占阵地、标定目标……近日，陆军某部将炮兵分队拉到野外陌生地域开展实弹射击考核，检验官兵快速机动、火力压制、快打快撤等实战能力.

考核命令下达，官兵迅速登车向目标地域开进. 途中，导调组临机设置“无人机侦察”“通过炮火封锁区”等特情. 官兵沉着应对处置，顺利化解一个个险情.

官兵奔向战位.

对目标实施火力打击.

占领阵地后，官兵随即展开射击前准备工作. 不久，随着指挥员一声令下，数枚炮弹呼啸出膛，直扑目标.

经过数轮打击，目标被悉数摧毁. 指挥所增设新的打击目标，分队官兵立即进行机动转移. 途中，分队指挥员与侦察小组、气象小组等作战单元保持密切沟通，缩短了新阵地开设和武器参数装定时间.

战车编队快速机动.

夜色渐暗，隆隆炮声再次响起，目标点腾起阵阵烟尘……

Sharpening Blades in the Field! An Artillery Unit of the Army Conducts Live-Fire Firing Assessment

Source: PLA Daily

Author: Liu Yanyuan, Li Jianjiao, Liu Dongmin

Editor: Sun Yue

2025-12-04

Sharpening Blades in the Field

—A Glimpse into the Live-Fire Firing Assessment of an Artillery Unit of the Army

■ Photo report by Liu Yanyuan, Li Jianjiao, and Liu Dongmin Setting firing parameters before firing.

Rapid maneuver, seizing positions, target marking… Recently, an army unit deployed its artillery unit to an unfamiliar field area for a live-fire assessment to test the soldiers' rapid maneuverability, fire suppression, and rapid strike-and-retreat capabilities.

Upon receiving the assessment order, the soldiers quickly boarded vehicles and advanced towards the target area. En route, the directing group improvised scenarios such as "drone reconnaissance" and "passing through an artillery fire blockade zone." The soldiers calmly responded and successfully resolved each emergency.

Soldiers rushed to their battle stations.

Firing strikes on the target.

After occupying their positions, the officers and men immediately began pre-firing preparations. Soon, at the commander's order, several shells roared from the barrels, heading straight for the target.

After several rounds of fire, the target was completely destroyed. The command post identified new targets, and the platoon immediately began its maneuver. En route, the platoon commander maintained close communication with reconnaissance and weather teams, shortening the time required to establish new positions and set weapon parameters.

The tank formation moved rapidly.

As night fell, the rumble of artillery fire resumed, and plumes of dust rose from the target area…

“制度刚性”与“管理温度”如何平衡?陆军某旅的探索给人启发

来源：解放军报 作者：咎金光 王书扬 责任编辑：王一亘 2025-12-05

“制度刚性”与“管理温度”如何平衡？陆军某旅的探索给人启发——

“温情一刻钟”温暖官兵心

■咎金光 王书扬

绘图：唐建平

点击“视频通话”，看着儿子的笑脸出现在手机屏幕上，陆军某旅某连一级上士朱凯不自觉地把脸凑近了些，嘴角微微上扬.

晚上 8 点半，朱凯一天中最期待的“温情一刻钟”开始了.

短短 15 分钟，朱凯把白天抽空从儿童故事书上记下来的故事，从头到尾给儿子讲了一遍.挂断电话前，儿子充满期待地问：“爸爸，明天还有新故事吗？”

“有啊，爸爸有一肚子故事要讲给你听呢！”

看着朱凯难得露出的笑脸，班里战士笑称：“朱班长讲故事可比喊口令温柔多了.”

温柔也有无用武之地的时候. 连队领导说，以往，按照旅机关制订的手机管理规定，连里一般分两个时段放开手机使用：晚上 6 点半至 7 点，9 点半至 10 点. 这一规定对单身官兵影响不大，却让不少已婚官兵犯了愁——他们大多与爱人、孩子长期两地分居，白天自己参加学习训练，爱人上班、孩子上学；晚饭后打电话，不是爱人没忙完家务，就是孩子没做完作业，等到 9 点半后拿到手机，孩子大多已经入睡. 接通视频电话，只能从屏幕里看一眼孩子熟睡的小脸蛋，是不少已婚官兵都有过的共同经历.

该旅探索推行“温情一刻钟”机制，解决这一现实难题，源于一次“意外”.

一天晚上，该旅政治工作部高主任到基层单位巡查. 走到指挥通信连时，高主任无意中听到一名军士正在打电话.

原来，刚刚结束岗哨值勤任务的军士小周回到宿舍就领取手机，到指定区域与妻子视频通话. 电话那头，只有妻子努力压低的声音.

“这么晚才打电话，女儿早就睡着了.”

“对不起，刚才在站岗. 明天争取早一点.”

挂断电话，小周立在原地，怅然若失，连高主任走到自己身后都没察觉.

“这种情况常有吗？”高主任轻声问道.

小周猛然一惊，不好意思地把手机藏在身后：“小孩子睡觉早，时间对不上，正常.”

高主任拍拍小周的肩膀，没多说什么，走了.

几天后，该连召开连务会，高主任来了. 会上，高主任以小周的情况为例，围绕“如何消除‘亲情时差’”谈了自己的体会：“部队外训时，我发现很多官兵都把手机桌面和聊天背景设置成家庭合影，有的还随身带着爱人、孩子的照片，一有空就拿出来看两眼.”

有的官兵与恋爱对象“相见时难别亦难”，平时交流的时间又很少；有的军嫂生病卧床，却因丈夫不在身边只能“独力支撑”……高主任细数官兵面临的种种难题，声音不大却很有力：“为祖国站岗，为人民扛枪，既靠在座的各位，也靠你们背后的家人.”一席话，听得在场官兵频频点头，一些常年不能陪伴爱人和孩子的老兵忍不住红了眼眶.

“制度有刚性，但管理要有温度. 官兵与家人之间的情感联结，就隔着一个合理的通话时间，如果连这点事情都解决不好，还谈什么服务基层、服务官兵？”高主任要求连队干部骨干，在遵守管理规定前提下，拿出符合连队实际、满足官兵需求的务实举措，真正把为官兵解难题、办实事落实落细.

经过讨论研究，该连制订出一套科学化、精细化的解决方案：在保证正常值勤、训练和夜间休息的前提下，每晚 7 点至 9 点间灵活设置“温情一刻钟”，方便官兵根据自身担负任务情况和家人时间安排，轮流错峰与家人进行视频通话.

这个看似不起眼的调整，没有影响正常作息秩序，却大大方便了官兵与家人的亲情沟通. 新的制度规定施行后，每到“温情一刻钟”时间，都能看到官兵在指定区域与家人视频通话的情景——

“爸爸，这道题我不会，你能教教我吗？”

“彤彤，给爸爸分享一下今天在幼儿园的开心事.”

“下个周末，我准备带孩子去公园转转.”

……

谈及新机制给官兵带来的变化，朱凯深有感触地说，每次挂断电话，大家脸上都带着微笑，一天工作训练的疲惫仿佛瞬间消失了.

该旅领导介绍，经过一段时间的探索和优化，他们将“温情一刻钟”机制在旅队各基层单位推广，受到官兵欢迎. 一名军士说：“组织连打电话这种小事都想在心头、办到实处，让我们感受到了实实在在的温暖，我们还有什么理由不安心工作、干好工作呢！”

How to Balance “Institutional Rigidity” and “Management Warmth”? An Army Brigade’s Exploration Offers Inspiration

Source: PLA Daily

Author: Zan Jinguang, Wang Shuyang

Editor: Wang Yigeng

2025-12-05

How to Balance “Institutional Rigidity” and “Management Warmth”? An Army Brigade’s Exploration Offers Inspiration—

“A Fifteen-Minute Warm Hour” Touches the Hearts of Officers and men

■ Zan Jinguang, Wang Shuyang

Illustration: Tang Jianping

Clicking “Video Call,” seeing his son’s smiling face appear on the phone screen, Sergeant Zhu Kai, a first-class sergeant from a company of an Army brigade, unconsciously moved his face closer, a slight smile playing on his lips.

At 8:30 pm, Zhu Kai's most anticipated "fifteen-minute warm hour" began.

In just 15 minutes, Zhu Kai told his son a story he had memorized from a children's storybook during the day, from beginning to end. Before hanging up, the son asked expectantly, "Dad, will there be any new stories tomorrow?"

"Yes, Dad has a ton of stories to tell you!"

Seeing Zhu Kai's rare smile, the soldiers in his platoon joked, "Squad Leader Zhu's storytelling is much gentler than his commanding shouts."

Gentleness, however, has its limitations. The company leadership explained that previously, according to the brigade headquarters' regulations on mobile phone management, the company generally allowed mobile phone use during two time slots: 6:30-7:00 PM and 9:30-10:00 PM. This regulation didn't significantly affect single soldiers, but it caused considerable distress for many married soldiers—most of them lived apart from their spouses and children for extended periods. During the day, they participated in training while their spouses went to work and their children to school; when they called after dinner, either their spouses hadn't finished housework or their children hadn't finished homework, and by the time they got their phones back at 9:30 PM, their children were mostly asleep. Making a video call and only being able to glimpse their child's sleeping face on the screen was a common experience for many married soldiers.

The brigade's exploration and implementation of a "15-minute warm-hearted moment" mechanism to solve this practical problem stemmed from an unexpected event.

One evening, Director Gao of the brigade's Political Work Department was inspecting grassroots units. When he reached the command and communications company, Director Gao overheard a sergeant making a phone call.

It turned out that Sergeant Zhou, who had just finished his sentry duty, went back to his barracks to retrieve his phone and went to a designated area to video call his wife. On the other end of the line, only his wife's voice, strained to be heard, could be heard.

"Calling so late? Our daughter is already asleep."

"Sorry, I was on guard duty. I'll try to go earlier tomorrow." Hanging up, Zhou stood there, lost in thought, not even noticing Director Gao approaching from behind.

"Does this happen often?" Director Gao asked softly.

Zhou was startled and embarrassedly hid his phone behind his back: "Children go to bed early, so the timing doesn't match up, it's normal." Director Gao patted Zhou on the shoulder, said nothing more, and left.

A few days later, the company held a meeting, and Director Gao attended. At the meeting, Director Gao used Xiao Zhou's case as an example to share his experiences on "how to eliminate the 'time

lag in family relationships'": "During military training, I noticed that many soldiers set their phone wallpapers and chat backgrounds to family photos, and some even carried photos of their spouses and children with them, looking at them whenever they had a spare moment." Some soldiers find it difficult to see their partners and part, yet they have very little time to communicate; some military wives are bedridden with illnesses, but because their husbands are not by their side, they have to "support themselves alone"... Director Gao recounted the various difficulties faced by the soldiers, his voice soft but powerful: "To stand guard for the motherland and carry guns for the people, we rely not only on those of you here, but also on your families." His words resonated with the soldiers present, who nodded frequently, and some veterans who have been unable to spend much time with their spouses and children couldn't help but tear up.

"Rules have rigidity, but management must have warmth. The emotional connection between soldiers and their families is separated by a reasonable amount of time for a phone call. If even this is not handled well, how can we talk about serving the grassroots and serving the soldiers?" Director Gao demanded that the company's officers and key personnel, while adhering to management regulations, come up with practical measures that suit the company's actual situation and meet the needs of the soldiers, truly implementing solutions to their problems and doing practical things for them.

After discussion and research, the company developed a scientific and meticulous solution: while ensuring normal duty, training, and nighttime rest, a "warm-hearted 15-minute" time is flexibly set between 7 pm and 9 pm every night, allowing soldiers to take turns making video calls with their families according to their own duties and their families' schedules.

This seemingly insignificant adjustment, without disrupting normal routines, greatly facilitates communication between soldiers and their families. After the new system was implemented, every "15-minute heartwarming moment" could be seen soldiers video chatting with their families in designated areas—

"Dad, I don't know how to do this problem, can you teach me?"

"Tongtong, share with Dad what happened at kindergarten today."

"Next weekend, I'm planning to take the kids to the park."

... Speaking of the changes the new mechanism has brought to the soldiers, Zhu Kai said with deep feeling that every time they hang up the phone, everyone has a smile on their face, and the fatigue of a day's work and training seems to disappear instantly.

The brigade leadership explained that after a period of exploration and optimization, they have promoted the "15-minute heartwarming moment" mechanism in all grassroots units of the brigade, which has been welcomed by the soldiers. One sergeant said, "The organization even thinks about such a small thing as making phone calls and takes it seriously, making us feel real warmth. What reason do we have not to work diligently and do our jobs well!"

第八十集团军某旅按实战要求组训的一段经历

来源：解放军报 作者：宋超 王宏阳 责任编辑：王一亘 2025-12-05

训练教案不再“炒剩饭”

——第八十集团军某旅按实战要求组训的一段经历

■宋 超 解放军报特约通讯员 王宏阳

冬日，胶东某野外训练场，第 80 集团军某旅教学法现场观摩活动正在火热进行. “进出路构筑”课目教学示范中，该旅首席教练员陈豪借助 10 余组数据展开建模分析，引入 5 类兵种要素进行体系作战推演. 与以往相比，他这次采用的训练教案紧贴实战需求、处置特情得当，得到大家一致认可.

陈豪介绍，他的转变源于一次教学法考核. 当时，教练员陈松带着曾经获奖的教案“重型支援桥的架设与撤收”参加考核，却遭到一名基层指挥员质疑：“你讲的这套操作流程本身没有问题，但在夜间作业时可能来不及展开，上次实兵对抗我们连就吃了大亏！建议编写教案时，尽可能考虑战场的复杂环境. ”

这引起考核组成员、该旅教导队队长赵树祥的关注. 他深入调研发现，有的教练员编写教案“炒剩饭”，沿用旧教案，但旧教案涉及的战场环境多为开阔地，缺乏对复杂电磁干扰、城市巷战、山地丛林作战等特殊场景的考量，明显脱离实战；有的教练员把重点放在教案的表现形式上，管用实用的招法并不多；还有的教案看似预想充分，但未做到具体问题具体分析，特情处置方案比较笼统……

“编写教案出现问题，说到底还是向战为战导向没有牢固立起来！”对此，旅领导牵头组织 6 名教练员标兵、10 余名基层训练骨干成立教案研究小组，对教练员进行指导帮带. 他们分头采集山地、丘陵、平原等不同地形条件下的装备实操参数，增加特情处置环节，强化教案的实战性；建立官兵基础技能清单，实行分层分类施训，增强教案的针对性；梳理各单位道路抢通、防化应急洗消、渡河工程保障等任务场景的训练需求，增强教案贴近性.

在研究小组指导下，经过不断打磨，教练员们的教案不再是“熟悉的配方”，而是充盈着“打仗的味道”. 前不久，教练员朱静鹏带着新编写的教案，深入训练场进行修改完善. 为了验证战术动作实用性，他翻出近 3 年的演训复盘视频，与班长骨干一起对比分析 12 种特情处置场景，找到最优方案. 现在，像这样“带着问题找答案、盯着实战写教案”的做法，已成为该旅教练员的共识.

此外，旅教导队还专门建立了“教案孵化库”，收集各单位演训难题、官兵训练反馈、装备升级要点，定期组织战术、装备、教学专家集中“会诊”，确保每一份教案严格对标实战.

“教案活起来，训练实起来，战斗力才能强起来. ”该旅领导介绍，下一步他们将建立教案动态更新机制，把参加上级演训和考核的新经验、新战法等及时转化为教学内容，努力做到课堂无缝对接战场.

An Experience of a Brigade of the 80th Group Army Conducting Training According to Real Combat Requirements

Source: PLA Daily

Author: Song Chao, Wang Hongyang

Editor: Wang Yigeng

2025-12-05

Training Lessons Are No Longer “Rehashed”

—An Experience of a Brigade of the 80th Group Army Conducting Training According to Real Combat Requirements

■ Song Chao, Special Correspondent for PLA Daily, Wang Hongyang

On a winter’s day, at a field training ground in Jiaodong [Shandong Province near Qingdao], a teaching method demonstration activity of a brigade of the 80th Group Army was in full swing. In the demonstration of the “Construction of Access Routes” subject, the brigade’s chief instructor, Chen Hao, used more than 10 sets of data to conduct modeling analysis and introduced five types of military elements to conduct system combat simulations. Compared with the past, the training lesson plan he used this time closely followed the needs of actual combat and handled special situations appropriately, receiving unanimous approval.

Chen Hao explained that his transformation stemmed from a teaching method assessment. At the time, instructor Chen Song brought his award-winning lesson plan, “Erection and Removal of Heavy Support Bridges,” to the assessment. However, it was questioned by a grassroots commander: “The operational procedures you described are not problematic in themselves, but there might not be enough time to implement them during nighttime operations. Our company suffered a great loss in the last live-fire exercise! I suggest that when writing the lesson plan, the complex environment of the battlefield should be considered as much as possible.” This caught the attention of Zhao Shuxiang, the brigade’s training team leader and a member of the assessment team. His in-depth research revealed that some instructors were simply rehashing old lesson plans, which often focused on open battlefields and lacked consideration for complex electromagnetic interference, urban warfare, and mountain/jungle combat, making them clearly detached from real combat. Some instructors prioritized the presentation of the lesson plans, offering few practical and effective methods. Others, while seemingly well-planned, failed to analyze specific problems in detail, and their contingency plans were rather vague.

“The problems with lesson plan writing ultimately stem from a failure to firmly establish a combat-oriented approach!” In response, the brigade leadership organized a lesson plan research group comprised of six exemplary instructors and over ten grassroots training personnel to provide guidance and support to the instructors. They separately collected equipment operation parameters under different terrain conditions, including mountains, hills, and plains, adding emergency response procedures to enhance the practicality of the training plans; they established a list of basic skills for officers and men, implementing tiered and categorized training to enhance the relevance of the training plans; and they analyzed the training needs of various units for mission scenarios such as road clearing, chemical emergency decontamination, and river crossing support to enhance the relevance of the training plans.

Under the guidance of the research team, and through continuous refinement, the instructors’ training plans are no longer “familiar formulas” but are imbued with the “flavor of combat.” Not long ago, instructor Zhu Jingpeng took newly written training plans to the training ground for revision and improvement. To verify the practicality of tactical maneuvers, he reviewed training debriefing videos from the past three years, comparing and analyzing 12 emergency response scenarios with squad leaders and key personnel to find the optimal solution. Now, this approach of “finding answers by addressing problems and writing training plans with a focus on real combat” has become a consensus among the brigade’s instructors.

In addition, the brigade’s training unit has established a dedicated “lesson plan incubation database” to collect training challenges from various units, feedback from soldiers, and key points for equipment upgrades. It regularly organizes tactical, equipment, and teaching experts for centralized “consultations” to ensure that every lesson plan is strictly aligned with actual combat.

“Only when lesson plans are dynamic and training is practical can combat effectiveness be enhanced,” the brigade’s leadership explained. They added that their next step is to establish a dynamic lesson plan update mechanism, promptly transforming new experiences and tactics from higher-level exercises and assessments into teaching content, striving for seamless integration between the classroom and the battlefield.

从“苦练”向“精练”转型，“智能靶场”为训练注入科技动能

来源：解放军报 作者：张亚楠 曾存军 责任编辑：郭妍菲 2025-12-06

陆军某团借助科技手段提升高原环境训练质效——

“智能靶场”让实弹射击更精准

■张亚楠 曾存军

初冬，喀喇昆仑高原某射击场上，陆军某团某分队一场多课目连贯实弹射击训练紧张进行. 与以往不同的是，此次训练依托“智能靶场”系统，为“米秒环”的传统课目训练注入了科技动能.

训练现场，中士葛裴迅速卧倒，据枪、瞄准、击发，动作一气呵成. 枪声响过，他轻触身旁的终端屏幕，弹着点分布、弹道轨迹、偏差分析等数据随即呈现. 系统显示，在当前海拔、气温、风速等条件下，他的弹着点普遍向右上方偏离约 3 厘米.

“过去我们只知道‘打高了’‘偏右了’，但不知道究竟高多少、偏多少. 有了这套系统，我们就能准确地知道偏了多少. ”葛裴欣喜地说，他根据系统提示的修正量，在后续射击中调整了瞄准点. 经过几轮验证与微调，他最终打出“优秀”成绩.

“高原环境高寒缺氧、风沙肆虐，弹道轨迹与平原地区有何差别？过去往往凭经验概略估算，现在有了精确依据. ”该分队领导介绍，“智能靶场”系统实现了“射击—评估—修正”的闭环，通过特制的感应靶标和高精度传感器，能及时采集每一发子弹的弹着点，并同步记录射击瞬间的风速、气温、气压等关键环境参数，为分析偏差原因、提出改进建议提供数据参考.

一次俯仰角射击训练中，下士刘楠楠仍按平原训练习惯瞄准，导致弹道偏高，连续 3 发子弹脱靶. 正当他感到困惑时，记录员调出了他的射击数据：系统显示，他的瞄准点比平地射击偏高. 经过调整，他的射击命中率大幅提高. 刘楠楠说：“系统提供的数据把抽象的‘感觉’变成了具体的‘修正量’，学得快、记得牢，训练质效比以往高了不少. ”

该团领导介绍，引入“智能靶场”系统以来，官兵掌握高原环境射击技能的速度明显加快，实弹射击考核优秀率和大风等恶劣天气条件下的射击稳定性都有大幅提升. 一次训练中，某分队受命在陌生峡谷地带快速构设射击阵地，官兵凭借这套系统积累的大量数据，迅速判明情况并调整瞄准点，首轮射击便取得优异成绩.

该团作训股股长介绍，这套系统还能为每名官兵建立动态训练档案，记录并分析每名射手的各项数据指标，精准掌握个人技术短板和阶段性考核成绩，实现“一人一策”的组训教学. 随着训练重心从“苦练”向“巧练”“精练”转型，该团人才培养效率显著提升、周期明显缩短.

该团领导表示，下一步，他们将继续加大极限距离射击、恶劣气候适应性训练等方面探索，推动高原环境射击训练向体系化、精准化、智能化方向迈进.

From “Hard Training” to “Refined Training”: “Intelligent Firing Range” Injects Technological Power into Training.

Source: PLA Daily

Author: Zhang Yanan, Zeng Cunjun

Editor: Guo Yanfei

2025-12-06

An Army Regiment Improves Training Efficiency in High-Altitude Environments with Technological Means—.

“Intelligent Firing Range” Makes Live-Fire Shooting More Precise.

■ Zhang Yanan, Zeng Cunjun

In early winter, at a firing range on the Karakoram Plateau [a major mountain range spanning the borders between China, India, and Pakistan], a detachment of an Army regiment was conducting a multi-subject continuous live-fire shooting training exercise. Unlike previous exercises, this training relied on an “intelligent firing range” system, injecting technological power into the traditional “meter-second ring” training..

At the training site, Sergeant Ge Pei quickly lay down, took up his rifle, aimed, and fired—all in one fluid motion. After the gunshot, he lightly touched the terminal screen beside him, and data such as bullet impact distribution, trajectory, and deviation analysis were immediately displayed. The system showed that under the current altitude, temperature, and wind speed conditions, his bullet impact point generally deviated about 3 centimeters to the upper right..

“In the past, we only knew ‘too high’ or ‘too far to the right,’ but we didn’t know exactly how much higher or more far. With this system, we can accurately know how much we’ve missed,” Ge Pei said happily. He adjusted his aiming point in subsequent shots based on the corrections suggested by the system. After several rounds of verification and fine-tuning, he finally achieved an “excellent” score..

“How does the trajectory of a bullet differ from that in the plains, given the high altitude, cold, oxygen deficiency, and rampant sandstorms? In the past, we often relied on rough estimates based on experience; now we have precise data,” the unit leader explained. The “intelligent firing range” system achieves a closed loop of “shooting-evaluation-correction.” Through specially designed induction targets and high-precision sensors, it can collect the impact point of each bullet in real time and simultaneously record key environmental parameters such as wind speed, temperature, and air pressure at the moment of firing, providing data reference for analyzing the causes of deviations and proposing improvement suggestions..

During an elevation angle shooting training exercise, Corporal Liu Nannan still aimed according to his plains training habits, resulting in a trajectory that was too high, causing three consecutive bullets to miss the target. Just as he was feeling confused, the recorder pulled up his shooting data: the system showed that his aiming point was too high compared to shooting on flat ground. After adjustment, his shooting accuracy improved significantly. Liu Nannan said, “The data provided by

the system transforms the abstract ‘feeling’ into concrete ‘correction amounts,’ making learning faster, remembering more firmly, and significantly improving training efficiency compared to the past.”.

The regiment’s leadership explained that since the introduction of the “intelligent firing range” system, soldiers have mastered high-altitude shooting skills much faster, and the pass rate in live-fire assessments and shooting stability under adverse weather conditions such as strong winds have both greatly improved. In one training exercise, a detachment was ordered to quickly construct a firing position in an unfamiliar canyon area. Relying on the large amount of data accumulated by this system, the soldiers quickly assessed the situation and adjusted their aiming points, achieving excellent results in the first round of shooting..

The regiment’s training section chief explained that this system can also create dynamic training files for each soldier, recording and analyzing various data indicators for each shooter, accurately identifying individual technical weaknesses and stage assessment results, and achieving “one-person-one-policy” training. As the training focus shifts from “hard work” to “skillful training” and “refined training,” the regiment’s talent development efficiency has significantly improved and the training cycle has been noticeably shortened..

The regiment’s leadership stated that, going forward, they will continue to explore areas such as extreme-range shooting and adaptation training to harsh weather conditions, pushing high-altitude environment shooting training towards a more systematic, precise, and intelligent approach.

铁甲焕新颜！某部官兵义务修缮黄继光故居陈设的退役装备

来源：解放军报 作者：徐健飞 王亚萍 责任编辑：孙悦 2025-12-06

英雄故里 铁甲新颜

■徐健飞 王亚萍

西部战区陆军某装备保障队文职人员为退役坦克轮毂补色. 舒羽泉摄

“铁甲柔情展身手，英雄故里护丰碑；无私支援显担当，军民同心筑真情. ”11 月 26 日，黄继光纪念馆为西部战区陆军某装备保障队送去一面锦旗，感谢保障队官兵义务维护修缮黄继光故居陈设的退役装备.

为纪念中国人民志愿军抗美援朝出国作战 75 周年，该保障队与黄继光纪念馆签订联教共育协议. 保障队组织官兵前往黄继光纪念馆参观时，了解到黄继光故居陈列的坦克、大炮等退役装备因岁月侵蚀，出现锈蚀、褪色情况.

“这些曾经的‘战友’，应该以威武的面貌展现在公众面前. ”保障队官兵主动请缨，抽调技术骨干组成修缮小组，携带专业工具来到黄继光故居，对展陈装备进行全面“体检”，并制订科学精细的修缮方案.

修缮过程中，官兵按照装备维护标准，对涂装工艺精益求精. 一丝不苟除锈打磨，反复比对、精准调配漆料，对坦克轮毂螺丝进行规范补色……“用专长为英雄故乡做点力所能及的事，让更多参观者欣赏到状态良好的装备展陈，我们感到很光荣. 英雄的精神同样激励着我们，在装备维修保障任务中更加细致严谨，确保每一件装备都处于最佳状态. ”该保障队一级上士雷英豪说.

经过数日连续奋战，原本锈迹斑驳的坦克、大炮铁甲锃亮，焕然一新.

近日，黄继光侄子、黄继光纪念馆副馆长黄拥军受邀走进军营，以“传承英雄志、奋进强军路”为主题，动情讲述英雄的成长轨迹与壮烈瞬间.

保障队领导表示，此次装备修缮与系列联教活动，不仅使承载着厚重历史的退役装备得到了科学专业的维护，更让抗美援朝精神、黄继光英雄事迹在军民互动中植根于心，转化为官兵练兵备战、担当强军重任的磅礴动力.

Armored Vehicles Get a New Look! Soldiers of a Certain Unit Voluntarily Repair Decommissioned Equipment Displayed at Huang Jiguang’s Former Residence.

Source: PLA Daily

Author: Xu Jianfei, Wang Yaping

Editor: Sun Yue

2025-12-06

Hometown of Heroes, Armored Vehicles Get a New Look.

■Xu Jianfei, Wang Yaping

Civilian personnel of an equipment support team of the Western Theater Command Army touch up the paint on the wheel hubs of decommissioned tanks. Photo by Shu Yuquan.

“Armored vehicles display their tenderness, protecting the monument in the hometown of heroes; selfless support shows their responsibility, the military and civilians work together to build true friendship.” On November 26, the Huang Jiguang Memorial Hall presented a banner to an equipment support team of the Western Theater Command Army, thanking the team’s officers and men for their voluntary maintenance and repair of the decommissioned equipment displayed at Huang Jiguang’s former residence..

To commemorate the 75th anniversary of the Chinese People’s Volunteers’ participation in the War to Resist US Aggression and Aid Korea, the support team signed a joint education agreement with the Huang Jiguang Memorial Hall. When the support team organized a visit to the Huang Jiguang Memorial Hall, they learned that the retired equipment displayed at Huang Jiguang’s former residence, including tanks and artillery, had rusted and faded due to the passage of time..

“These former comrades-in-arms should be presented to the public in their majestic form,” said a member of the support team. The team volunteered to form a restoration group, comprised of technical experts, and brought specialized tools to Huang Jiguang’s former residence to conduct a comprehensive “check-up” of the exhibited equipment and develop a scientific and meticulous restoration plan..

During the restoration process, the soldiers adhered to equipment maintenance standards, paying meticulous attention to the painting process. They meticulously removed rust and sanded the surface, repeatedly compared and precisely mixed paints, and standardized the color touch-ups on the tank wheel hub bolts. “We feel honored to use our expertise to do what we can for the hometown of a hero, allowing more visitors to appreciate the well-maintained equipment. The spirit of the hero also inspires us to be more meticulous and rigorous in equipment maintenance and support tasks, ensuring that every piece of equipment is in optimal condition,” said Lei Yinghao, a first-class sergeant in the support team..

After several days of continuous work, the previously rusty tanks and artillery armor were gleaming and looked brand new..

Recently, Huang Yongjun, nephew of Huang Jiguang and deputy curator of the Huang Jiguang Memorial Hall, was invited to the military camp to give a moving speech on the theme of “Inheriting the Hero’s Spirit and Striving for a Strong Military,” recounting the hero’s growth trajectory and heroic moments..

The support team leaders stated that this equipment repair and series of joint training activities not only ensured the scientific and professional maintenance of the retired equipment carrying a heavy historical weight, but also allowed the spirit of the War to Resist US Aggression and Aid Korea and the heroic deeds of Huang Jiguang to take root in the hearts of soldiers and civilians through

military-civilian interaction, transforming into a powerful driving force for officers and men to train for combat and shoulder the heavy responsibility of building a strong military.

打破建制壁垒！陆军某旅临机编组训练打出战场“组合拳”

来源：解放军报 作者：许生军 李由之 责任编辑：孙悦 2025-12-06

陆军某旅紧贴任务需求配置作战模块——

临机编组练协同

■许生军 解放军报记者 李由之

“‘敌’前沿部署突变，前出侦察！”近日，陆军某旅一场临机编组连贯训练紧张展开. 接到指令，该旅侦察分队迅速前出. 面对低空盘旋的“敌”无人机，官兵迅速展开隐蔽伪装.

通过“染毒地带”、遭遇小股“敌”袭扰……一路前行，一路特情. 侦察分队连续处置多个特情后，新指令传来，要求他们抽调 2 名战士，协助障碍清除组完成任务. 这 2 名分队战士闻令而动，迅速携带专业器材加入障碍清除组，协同执行任务.

“战场瞬息万变，以往的固定编组模式，难以有效应对战场复杂情况. ”该旅领导介绍，此次训练，他们打破建制壁垒，根据任务需求和人员专长，临机编组配置作战模块，确保每个环节都有最优力量处置，有效破解特情叠加下兵力分散、协同不畅等问题，全面锤炼官兵快速反应和临机应变能力.

记者看到，面对训练中临机导调的多种特情，临机模块化编组成为破局关键. 原本按建制行动的分队，根据战场态势和任务属性迅速进行重组：侦察分队和火力分队组成处突组，直扑袭扰之“敌”；通信分队携带抗干扰设备，在电子对抗分队掩护下前出恢复通信；工兵分队从火力单元抽组人员，加入抢修组抢通“被毁”道路……官兵紧密配合、通力合作，圆满完成各项任务.

训练结束，各模块官兵还围绕临机编组存在的问题现场复盘总结，并针对性制订改进措施，为下一步训练找准方向.

“只有平时在复杂条件、极端环境下反复锤炼，战时才更有胜算. ”该旅机关一名参谋向记者介绍了部队后续转场训练计划，战场环境涵盖多种复杂地域，他们将采取优化人员编组数据库、强化模块间接口训练等措施，进一步提升临机编组训练质效.

Breaking Down Organizational Barriers! An Army Brigade’s Impromptu Formation Training Demonstrates Battlefield “Combination Punch”.

Source: PLA Daily

Author: Xu Shengjun, Li Youzhi

Editor: Sun Yue

2025-12-06

An Army Brigade Deploys Combat Modules Closely to Mission Requirements—Impromptu Formation Training for Coordination.

■Xu Shengjun, PLA Daily Reporter, Li Youzhi.

“The enemy’s forward deployment has suddenly changed; advance reconnaissance!” Recently, an army brigade conducted a series of impromptu formation training exercises. Upon receiving the order, the brigade’s reconnaissance unit quickly moved forward. Facing low-flying “enemy” drones, the soldiers quickly deployed concealment and camouflage..

Passing through “contaminated areas,” encountering small groups of “enemy” harassment... Special situations arose along the way. After handling multiple special situations, a new order came in, requiring them to send two soldiers to assist the obstacle clearing team in completing the mission. These two soldiers responded immediately, quickly joining the obstacle clearing team with specialized equipment to carry out the mission collaboratively..

“The battlefield is ever-changing, and the traditional fixed formation model is insufficient to effectively cope with complex battlefield situations,” the brigade leadership explained. In this training exercise, they broke down organizational barriers, improvising combat modules based on mission requirements and personnel expertise. This ensured optimal force for each stage, effectively addressing issues such as troop dispersion and poor coordination under overlapping contingencies, and comprehensively honing the rapid response and adaptability of officers and men..

Reporters observed that improvised modular formations proved crucial in breaking through various contingencies presented during the training. Units originally operating according to their established formations were rapidly reorganized based on the battlefield situation and mission attributes: reconnaissance and firepower units formed emergency response teams to directly attack the harassing “enemy”; communications units, carrying anti-jamming equipment, advanced under the cover of electronic warfare units to restore communications; and engineering units drew personnel from firepower units to join repair teams to clear “damaged” roads… Officers and men cooperated closely and worked together to successfully complete all tasks..

After the training concluded, officers and men from each module reviewed and summarized the problems encountered in the impromptu grouping, and formulated targeted improvement measures to identify the direction for the next stage of training..

“Only by repeatedly honing our skills under complex conditions and extreme environments in peacetime can we have a better chance of victory in wartime,” a staff officer from the brigade headquarters told reporters, introducing the unit’s subsequent relocation training plan. The battlefield environment covers a variety of complex terrains, and they will take measures such as optimizing the personnel grouping database and strengthening interface training between modules to further improve the quality and effectiveness of impromptu grouping training.

第 82 集团军某旅党委坚持以上率下领战务战

来源：解放军报 作者：刘含 王轶 责任编辑：郭妍菲 2025-12-08

第 82 集团军某旅党委坚持以上率下领战务战——

议战议训的“质效之变”

■刘 含 解放军报特约通讯员 王 轶

入冬时节，第 82 集团军某旅一位领导办公桌上，摆着一份针对部队战备训练问题的情况报告. 前段时间，他带领研究小组成员，多次沉到练兵备战一线调研. 他说：“问题根源找得准、挖得深，才能对症下药. ”

就在此前的第三季度旅党委议战议训会上，这名领导对当时战备训练整体情况与存在的矛盾问题作了汇报发言. 他用具体案例和数据说明，将症结精准定位到几个关键环节.

这些汇报内容，多数得到大家认可，不过还是有旅党委委员指出，他对某些问题的剖析不够透彻. 比如，“分队训练基础还需巩固，主要表现为车组协同训练不扎实”问题被简单带过时，一名委员立即提出：“必须深挖. 不能光看车组之间协同训练质效低，还要深入查纠指挥员指挥筹划念脚本、背台词现象. ”

另一名班子成员则提出补充意见：“通过检查发现，部分单位训练秩序需要进一步正规，尤其是第二教练地的训练组织，缺乏针对性预习和复盘，这也是导致训练效益低的重要原因. ”

围绕问题的讨论直指积弊，“火药味”十足. 这位旅领导告诉笔者，小小细节，折射变化. 此前有段时间，类似问题上会研究时，有些同志把以前的“经验总结”稍加修改当作发言材料，讲成绩浓墨重彩，谈问题常用模糊字眼带过，分析原因大而化之. 有些问题看似讨论过了，实则很难落地解决.

有一次，他调研后发现合成训练中存在两个协同问题，大家虽表示认同，但由于研究不深、思考不足，都没能提出有效的解决办法，问题暂时被搁置下来. 结果，后来一次合成训练中，类似问题又出现了.

“党委的核心职能就是领战务战，如果做不好，那便是政治上的不合格. ”这位旅领导感言，现在想想，如果党委班子都不能带头领战务战，又怎能指望基层官兵练兵备战取得实效？

深化政治整训过程中，该旅党委坚持刀刃向内，深刻剖析检视自身，查摆出多个问题：满足于把方向、作指示、提要求，对具体作战问题钻研不深；研战谋战精力被事务性工作牵扯，对中心工作投入不足；存在“过关心态”，组织筹划过度依赖业务部门，甚至有时“只挂帅、不出征”……

“议战议训，事关备战打仗，决不能流于形式、走了过场. ”基于这样的认识，党委班子成员走出办公室，走上训练场，提高深入基层调研频次，依据掌握的实际情况分析问题，确保每次议战议训都能切中要害.

第三季度旅党委议战议训会前，这名领导带着课题攻关小组深入训练一线，采集训练数据，征询各级指挥员意见建议. “仅靠几个人研究，总有考虑不周的地方，多听听大家意见，才能更好解决问题. ”他说.

最终，在第三季度党委议战议训会上，经过集思广益，旅党委决定组织专项攻关，限期解决讨论中提到的几个重难点问题.

“这种依托集体智慧破解关键难题的实践，是党委议战议训制度优势的集中体现. ”负责会议记录的组织科张干事，对旅党委议战议训会的“质效之变”感受尤为直观，“会前调研更深入了，脑子里装满了思考；会议内容更充实了，不再泛泛而谈，代之以针对性极强的剖析与对策……”

翻阅该旅近段时间党委议战议训会议发言内容，关于具体作战问题的深刻反思，涵盖指挥、协同、保障等方方面面.

领导干部不仅能“带头”，还要会“带动”. 这种表率作用不仅体现在议战议训的“言”上，更体现在带兵打仗的“行”上.

前不久，在该旅作战室，一场关于“典型行动规范”的研讨持续到深夜. 一名旅领导带着自己整理的厚厚一沓资料，直接加入由几名参谋组成的课题攻关小组. 他告诉大家：“从今天起，我全程参与，咱们一起把这块硬骨头‘啃’下来. ”

“这样编组的战术依据是什么？在不同敌情背景下能否保持灵活性？与最新作战条令的契合度如何……”作训科赵参谋和同事明显感受到，旅领导加入后，问题研究更具体深入，他们的压力更大了，但动力也更足了.

“以往领导主要是听汇报、作指示，现在却是实打实地和我们一起研究. ”赵参谋坦言，领导带头钻研，他和同事也自发学起来，案头上摆放着各类作战理论专著和条令汇编，笔记本上则密密麻麻记录着待解决的问题.

领导干部领战研训的一言一行，也潜移默化影响着基层. 某营技师孙德振一直想研发一套高炮瞄准跟踪可视化系统，提升车组协同效率. 过去担心人微言轻、想法不被重视，目睹旅党委领战研训的坚定行动后，他鼓起勇气“揭榜”攻关.

孙德振不仅得到各级党委大力支持，还有领导干部主动加入他的攻关小组，一起研究方案、解决难题. 系统研发进入关键阶段，急需一批专用元器件，上级党委开辟“绿色通道”，确保了研发进度. 如今，这套系统进入测试阶段，经受了实弹射击检验.

“过去是‘要我研’，现在是‘我要研’. ”孙德振道出许多基层官兵心声，“领导干部身先士卒，树立了好榜样，我们也不能落后，必须紧紧跟上. ”

The Party Committee of a Brigade of the 82nd Group Army Adheres to Leading by Example in Combat Readiness and Training—A “Quality and Efficiency Change” in Combat Readiness and Training Discussions

■ Liu Han, Special Correspondent of PLA Daily, Wang Yi

As winter approaches, a report on the combat readiness and training issues of the troops sits on the desk of a leader of a brigade of the 82nd Group Army. Some time ago, he led a research team to conduct multiple field investigations at the front lines of training and combat readiness. He said, “Only by accurately identifying and deeply investigating the root causes of problems can we prescribe the right remedy.”

At the brigade’s third-quarter meeting on combat readiness and training, this leader reported on the overall situation of combat readiness and training and the existing contradictions and problems. He used specific cases and data to illustrate that the crux of the problem was precisely located in several key areas.

Most of the report’s content was well-received, but some members of the brigade’s Party Committee pointed out that his analysis of certain issues was not thorough enough. For example, when the issue of “the basic training of the squads still needs to be consolidated, mainly manifested in the lack of solid crew coordination training” was simply glossed over, one committee member immediately pointed out: “We must investigate further. We can’t just look at the low quality and

efficiency of crew coordination training; we also need to thoroughly investigate and correct the phenomenon of commanders reciting scripts and memorizing lines during command and planning."

Another member of the leadership team added: "Through inspection, we found that the training order in some units needs to be further standardized, especially the training organization at the second training location. The lack of targeted pre-training and debriefing is also a significant reason for the low training efficiency." The discussion surrounding the issues directly addressed deep-seated problems, and was quite heated. This brigade leader told the author that small details reflect changes. Previously, when similar issues were discussed in meetings, some comrades would slightly modify previous "experience summaries" as their speaking material, emphasizing achievements while using vague terms to gloss over problems and offering generalized analyses of causes. Some issues seemed to have been discussed, but in reality, they were difficult to resolve in practice.

On one occasion, after conducting research, he discovered two coordination issues in combined arms training. While everyone agreed, due to insufficient research and reflection, no effective solutions were proposed, and the problems were temporarily shelved. However, similar problems resurfaced in a later combined arms training exercise.

"The core function of the Party Committee is to lead and execute combat operations. If this is not done well, it is a political incompetence," the brigade leader remarked. "Looking back now, if the Party Committee itself cannot take the lead in leading and executing combat operations, how can we expect the grassroots officers and men to achieve effective training and combat readiness?" During the in-depth political rectification process, the brigade's Party Committee adhered to self-examination and introspection, identifying several problems: complacency in setting direction, issuing instructions, and making demands, with insufficient in-depth research into specific operational issues; the energy devoted to combat planning and research was diverted to administrative tasks, resulting in insufficient investment in core tasks; there was an "over-concern mentality," with organizational planning relying excessively on operational departments, sometimes even resulting in "only giving orders but not actually participating"...

"Discussions on combat and training are crucial to preparing for war and must not be merely formalities or perfunctory." Based on this understanding, members of the Party Committee left their offices and went to the training grounds, increasing the frequency of in-depth investigations at the grassroots level, analyzing problems based on the actual situation they grasped, and ensuring that each discussion on combat and training was to the point.

Before the brigade's Party Committee's third-quarter meeting on combat and training, this leader led a research team to the front lines of training, collecting training data and soliciting opinions and suggestions from commanders at all levels. "Relying on just a few people to study will always leave some things unconsidered; listening to everyone's opinions is the best way to solve problems," he said.

Ultimately, at the third-quarter Party Committee meeting on combat readiness and training, after brainstorming, the brigade's Party Committee decided to organize a special task force to resolve several key and difficult issues raised in the discussions within a specified timeframe.

"This practice of relying on collective wisdom to solve key problems is a concentrated manifestation of the advantages of the Party Committee's system for combat readiness and training," said Officer Zhang from the Organization Section, who was responsible for taking meeting minutes. He felt the "change in quality and efficiency" of the brigade's Party Committee's meetings on combat readiness and training particularly keenly. "The pre-meeting research is more in-depth, and our minds are full of thought; the meeting content is more substantial, no longer just general discussions, but replaced by highly targeted analysis and countermeasures..." Reviewing the speeches at the brigade's recent Party Committee meetings on combat readiness and training, the profound reflections on specific operational issues cover all aspects of command, coordination, and support.

Leading cadres must not only be able to "take the lead," but also be able to "drive" others. This exemplary role is reflected not only in the "words" of combat readiness and training discussions, but also in the "actions" of leading troops into battle.

Not long ago, in the brigade's operations room, a discussion on "typical action norms" continued until late at night. A brigade leader, carrying a thick stack of compiled materials, joined a research team composed of several staff officers. He told them, "From today onwards, I'll be involved from start to finish. Let's tackle this tough challenge together."

"What is the tactical basis for this team composition? Can it maintain flexibility under different enemy situations? How well does it align with the latest operational regulations?" Staff Officer Zhao from the training section and his colleagues clearly felt that with the brigade leader's involvement, the research became more specific and in-depth. Their pressure increased, but so did their motivation.

"In the past, the leaders mainly listened to reports and gave instructions; now they are genuinely researching alongside us," Staff Officer Zhao frankly stated. With the leader taking the lead in research, he and his colleagues spontaneously began studying as well. Their desks were piled high with various operational theory monographs and regulations compilations, and their notebooks were filled with notes on the problems to be solved.

The words and actions of the leading cadres in guiding combat research and training subtly influenced the grassroots. Sun Dezhen, a technician from a certain battalion, had been wanting to develop a visual system for anti-aircraft gun aiming and tracking to improve the efficiency of vehicle crew coordination. Previously, he worried that his voice was too weak to be heard and his ideas too easily ignored. However, witnessing the brigade's Party committee's resolute actions in leading combat research and training, he mustered the courage to take on the challenge.

Sun Dezhen not only received strong support from Party committees at all levels, but also had leading cadres actively join his research team to study solutions and solve problems together. When the system development entered a critical stage, a batch of specialized components was urgently needed. The higher-level Party committee opened a “green channel” to ensure the development progress. Now, the system has entered the testing phase and has undergone live-fire testing.

“In the past, it was ‘I had to develop it,’ now it’s ‘I want to develop it,’“ Sun Dezhen expressed the sentiments of many grassroots officers and men. “Leading cadres have taken the lead and set a good example; we cannot fall behind and must keep up.”

新疆军区某团开展昼夜连贯野外抢修训练锤炼应急保障能力

来源：解放军报 作者：李小龙 杨 龙 责任编辑：郭妍菲 2025-12-08

大山腹地，马达再次响起

——新疆军区某团昼夜连贯野外抢修训练见闻

■李小龙 杨 龙

“3 台车辆受损，上级命我部前出抢修！”朔风渐起，喀喇昆仑腹地，新疆军区某团一场野外抢修训练拉开帷幕.

接到指令，该团修理连张连长综合研判态势，快速定下决心. 随后，官兵清点排故所需工具器材，集结登车向目标地域进发.

“遭‘敌’炮火袭击！”车队刚出发不久，特情突至. 张连长立即下令：“全体下车，隐蔽警戒！”官兵闻令而动，警戒组率先抢占制高点组织掩护，侦察组操控无人机前出侦察，其余人员对车辆进行伪装隐蔽. 特情处置完毕后，车队再次出发.

抵达目标地域，各组官兵按照任务分工展开抢修作业. 抢救组使用滑轮组增大牵引力，首先对淤陷车辆展开救援；抢修组兵分两路，分别对水箱破损和管路破裂的车辆进行检修. 金属碰撞声中，官兵争分夺秒、密切协作，将故障车辆全部修复.

“战场抢修快一秒，打赢胜算就能多一分. ”该团领导介绍，此次野外抢修训练，他们聚焦任务实际和保障需求，坚持把环境设险、把课目设难、把敌情设真，连贯组织保障分队围绕快速检测、应急修理等课目展开专攻精练. 训练中，导调组根据任务进度临机导调多种特情，锤炼官兵复杂环境下的应急保障能力.

昼夜连贯练精“真把式”. 夜幕降临，警报声骤然响起，夜间抢修训练随即展开. “弹药车遭‘敌’破坏，无法启动！”导调指令传来，张连长立即下令展开抢修. 大漠戈壁夜色如墨，官兵密切配合，在微光条件下紧锣密鼓对受损车辆进行抢修.

“东南方向发现‘可疑人员’！”特情传来，张连长命令警戒组迅速占领有利地形，进行排查阻击. 与此同时，他紧盯热成像设备显示屏，一边观察作业现场情况，一边指挥抢修组加快抢修作业. 随着最后一颗螺丝被拧紧，发动机再次发出轰鸣声，受损车辆恢复正常.

训练结束，张连长带领专业骨干和抢修组成员进行复盘. 官兵围绕抢修作业、战术协同等方面展开讨论交流，梳理出“敌情意识不强”“协同作业能力不够”等短板弱项，并逐个环节剖析原因. “针对这次训练暴露的问题，我们将尽快制订改进措施，组织官兵开展补差训练，确保随时拉得出、上得去、修得好. ”张连长说.

A Regiment of the Xinjiang Military Command Conducts Continuous Day-and-Night Field Repair Training to Hone Its Emergency Support Capabilities.

Source: PLA Daily

Author: Li Xiaolong, Yang Long

Editor: Guo Yanfei

2025-12-08

Deep in the mountains, engines roar again

—A glimpse into a regiment of the Xinjiang Military Command’s continuous day-and-night field repair training

■ Li Xiaolong, Yang Long

“Three vehicles damaged. Orders have been issued for our unit to proceed with repairs!” As the north wind picks up, a field repair training exercise begins in the heart of the Karakoram Mountains, conducted by a regiment of the Xinjiang Military Command.

Upon receiving the order, Company Commander Zhang of the regiment’s repair company comprehensively assessed the situation and quickly made a decision. Subsequently, the officers and men inventoried the necessary tools and equipment for troubleshooting, assembled, boarded the vehicles, and headed towards the target area.

“Attacked by ‘enemy’ artillery fire!” The convoy had barely set off when an emergency occurred. Company Commander Zhang immediately ordered, “All dismount and take cover!” The soldiers moved swiftly. The guard group seized high ground to provide cover, the reconnaissance group deployed drones for reconnaissance, and the remaining personnel camouflaged and concealed the vehicles. After handling the emergency, the convoy set off again.

Upon arriving at the target area, each group of soldiers began repair work according to their assigned tasks. The rescue group used pulley systems to increase traction, first rescuing vehicles stuck in the mud; the repair group split into two groups, respectively inspecting and repairing

vehicles with damaged water tanks and ruptured pipes. Amidst the clanging of metal, the soldiers worked against the clock, cooperating closely to repair all the faulty vehicles.

“Every second faster in battlefield repairs increases the chances of victory,” the regiment’s leadership explained. In this field repair training, they focused on the actual mission and support needs, insisting on creating challenging environments, difficult scenarios, and realistic enemy situations. The support units were organized to conduct specialized training in rapid detection and emergency repair. During the training, the directing group simulated various contingencies based on the mission progress, honing the soldiers’ emergency support capabilities in complex environments.

Day and night, they honed their skills to perfection. As night fell, the alarm suddenly sounded, and nighttime repair training commenced. “The ammunition vehicle has been damaged by the ‘enemy’ and cannot start!” Upon receiving the directing order, Company Commander Zhang immediately ordered repairs to begin. In the pitch-black Gobi Desert, the soldiers worked closely together, diligently repairing the damaged vehicle under low-light conditions.

“Suspicious personnel spotted to the southeast!” Upon receiving this emergency, Company Commander Zhang ordered the guard team to quickly occupy advantageous terrain for investigation and interception. Simultaneously, he kept a close eye on the thermal imaging equipment display, observing the situation at the work site while directing the repair team to expedite the repair work. With the last screw tightened, the engine roared back to life, and the damaged vehicle was restored to normal operation.

After the training, Company Commander Zhang led the specialized personnel and repair team members in a debriefing session. The officers and men discussed and exchanged ideas on emergency repair operations and tactical coordination, identifying weaknesses such as “weak awareness of the enemy situation” and “insufficient ability to coordinate operations,” and analyzing the reasons for each aspect. “In response to the problems exposed in this training, we will formulate improvement measures as soon as possible, organize officers and men to carry out remedial training, and ensure that we can be deployed at any time, reach the scene, and repair problems effectively,” said Company Commander Zhang.

从沱沱河兵站那盏灯中，我读懂了天路保障的意义

来源：解放军报 作者：李松原 责任编辑：孙悦 2025-12-08

风雪兵站的寻常一天

■李松原

清晨 6 点，海拔 4500 米的沱沱河兵站，气温降至零下 30 摄氏度. 新兵程晓健完成智能供氧系统与锅炉房的巡检，在记录本逐项打钩. 他的班长、三级军士长杨鑫宇站在指挥室窗前，目光透过结满冰霜的玻璃，望向公路延伸的方向. 这天，有一支运输边防物资的车队将在这里短暂休息.

兵站一天的工作在井然有序中开始. 医务室里，应对急性高原反应的药品和氧气设备摆在最顺手的位置；维修班将防滑链和应急启动电源装上了保障车；厨房的灶台上，第一锅驱寒的姜汤已经沸腾. 杨鑫宇像过去 12 年许多个清晨一样，沿着这条走了无数遍的路线巡查. 在走廊的照片墙前，他停下脚步，那里记录着兵站从帐篷、砖房到如今现代化营房的变迁. 他什么也没说，但跟在一旁的程晓健还不太懂班长坚守在这里的意义.

上午 10 时，风雪骤然加大. 对讲机里传来观察哨的报告：“车队已过风火山口，预计一小时后抵达. ”随即，兵站像一台精密的机器，各个部位开始运转起来.

11 时 20 分，引擎的低吼穿透风雪. 一辆辆运输车依次驶入营区，车身覆盖着厚厚的“冰甲”. 头车驾驶室的门打开，二级军士长岳国峰跳了下来. 他与上前迎接的杨鑫宇用力握了握手：“老杨，这是今年最后一趟了. ”岳国峰的声音有些沙哑. 杨鑫宇点点头，没有过多寒暄，转身走向医疗点——那里已经排起了队，几名面色不佳的新驾驶员正在接受检查.

这样的场景，杨鑫宇经历过太多次. 他熟悉每一个环节：引导新驾驶员去吸氧休息，提醒维修班重点检查头车的制动系统，安排炊事班将预留的热饭热菜快速分发. 他也熟悉像岳国峰这样的老汽车兵，知道他们需要什么——往往不是过多的关照，而是一个能让他们彻底放松的温馨环境. 程晓健注意到，岳国峰在嘈杂声中接过一杯热水，慢慢走到窗边，安静地喝着，眼睛却盯着室外漫天的飞雪.

午餐在食堂进行. 两个老兵坐在靠墙的位置. 岳国峰夹了一筷子炖菜：“今年的雪，唐古拉山口那边积得特别厚. ”

“预报已经收到，你们接下来的行程要多加注意. ”杨鑫宇一边叮嘱，一边给岳国峰盛了一碗汤.

对话简短，信息量不少. 程晓健听了逐渐明白，这种交流背后，是经年累月形成的经验和对这条天路深刻的了解. 原来，保障不只在热水和饭菜里，也在这些表达彼此关心的只言片语中.

午后，风雪稍歇. 车队补充完燃油和给养，准备再次出发. 岳国峰临上车前，回头看了一眼兵站主楼，向站在门口的杨鑫宇挥了挥手. 没有告别的话语，引擎相继启动，车队缓缓驶出院门，碾过积雪，驶向下一个目的地.

杨鑫宇没有马上回屋，望着车队红色的尾灯在灰白的天幕下逐渐连成细线，最终消失在远方. 此时，风雪渐大，兵站里，很快安静下来，但医务室的灯还亮着，锅炉持续发出低沉的嗡鸣，厨房里正在准备晚餐的食材……他们，在等候下一批官兵的到来.

入夜后，程晓健站完最后一班岗. 他穿过安静的走廊，看见杨鑫宇还在值班室，台灯的光晕勾勒出他伏案的侧影. 程晓健没有打扰，轻轻走向宿舍大门.

推开厚重的防寒门帘，凛冽的风卷着雪粒瞬间扑在脸上. 兵站屋顶那盏灯穿透黑夜，让人在很远的地方就能看见.

程晓健忽然理解了这盏灯的意义. 它亮着，就说明这条漫长的天路上有一个节点是通畅的、是温暖的、是随时可以停靠的. 杨鑫宇在这里的 12 年，就是确保这盏灯在黑夜里长亮. 他像一枚牢固的铆钉，铆在海拔 4500 米的高原上，迎接每一支南来北往的车队和每一名行色匆匆的战友.

程晓健知道，此刻岳国峰所在的车队正在风雪中疾驰. 而几百公里外，另一个兵站的灯光同样亮着，那里的战友也正和他们一样，做着同样的准备. 整条青藏线上，这些点点灯光连绵不断，共同守护着天路的畅通.

这一年，沱沱河兵站累计完成了 300 余次车队保障任务. 这一天，只不过是他们度过的寻常一天. 凝视着眼前的灯光，程晓健觉得自己越发成熟了，这是风雪兵站给予他最珍贵的历练和馈赠.

From the Lamp at Tuotuohe Military Post, I Understood the Significance of Ensuring the Safety of the “Sky Road.”

Source: PLA Daily

Author: Li Songyuan

Editor: Sun Yue

2025-12-08

A typical day at a snow-covered military post

■ Li Songyuan At 6 a.m., at the Tuotuohe Military Post, at an altitude of 4,500 meters, the temperature dropped to -30 degrees Celsius. [The Tuotuo River is located in Tanggula Mountain Town, in the southern part of Golmud City, Qinghai Province, south of the Kekexili Mountains.] New recruit Cheng Xiaojian completed his inspection of the intelligent oxygen supply system and boiler room, checking off each item in his logbook. His squad leader, Sergeant Yang Xinyu, stood by the window of the command room, his gaze piercing through the frost-covered glass towards

the direction of the road. That day, a convoy transporting border defense supplies would take a short break here.

The day's work at the military post began in an orderly fashion. In the medical room, medicines and oxygen equipment for dealing with acute altitude sickness were placed in the most convenient positions; the maintenance team installed anti-skid chains and emergency start-up power supplies on the support vehicles; on the stove in the kitchen, the first pot of ginger soup to ward off the cold was already boiling. Like countless mornings over the past 12 years, Yang Xinyu patrolled the route he had walked countless times. He stopped before the photo wall in the corridor, which documented the transformation of the outpost from tents and brick houses to the modern barracks it was today. He said nothing, but Cheng Xiaojian, walking beside him, didn't quite understand the significance of his squad leader's steadfast presence here.

At 10:00 AM, the wind and snow intensified suddenly. A report came over the walkie-talkie from the observation post: "The convoy has passed the Fenghuo Pass and is expected to arrive in an hour." Immediately, the outpost, like a precise machine, began to operate.

At 11:20 AM, the low roar of engines pierced the wind and snow. One transport vehicle after another drove into the camp, their bodies covered in a thick layer of ice. The door to the driver's cab of the lead vehicle opened, and Sergeant Yue Guofeng jumped out. He shook hands firmly with Yang Xinyu, who came forward to greet him: "Old Yang, this is the last trip this year." Yue Guofeng's voice was a little hoarse. Yang Xinyu nodded, offering no further pleasantries, and turned to walk towards the medical station—where a line had already formed, and several new drivers, looking unwell, were undergoing checks.

Yang Xinyu had witnessed this scene countless times. He was familiar with every step: guiding new drivers to rest and inhale oxygen, reminding the maintenance team to focus on checking the lead vehicle's braking system, and arranging for the cooks to quickly distribute the reserved hot meals. He also knew veteran drivers like Yue Guofeng, knowing what they needed—often not excessive care, but a warm and relaxing environment. Cheng Xiaojian noticed that Yue Guofeng, amidst the noise, took a cup of hot water, slowly walked to the window, and quietly drank it, his eyes fixed on the swirling snow outside.

The meal was served in the mess hall. Two veterans sat against the wall. Yue Guofeng picked up a piece of stew: "This year's snow is particularly thick over the Tanggula Pass."

"The forecast has been received. You need to be extra careful on your upcoming journey," Yang Xinyu instructed, while serving Yue Guofeng a bowl of soup.

The conversation was brief, but packed with information. Cheng Xiaojian gradually understood that behind this exchange lay years of accumulated experience and a profound understanding of this "sky road." He realized that support wasn't just in hot water and meals, but also in these small expressions of mutual care.

In the afternoon, the snowstorm subsided slightly. The convoy replenished its fuel and supplies and prepared to set off again. Before getting into the vehicle, Yue Guofeng glanced back at the main building of the outpost and waved to Yang Xinyu, who was standing at the door. Without a word of farewell, the engines started one after another, and the convoy slowly drove out of the gate, crunching through the snow, heading towards its next destination.

Yang Xinyu didn't immediately return to his room, watching the convoy's red taillights gradually merge into thin lines against the gray sky, finally disappearing into the distance. At this time, the snowstorm intensified, and the outpost quickly quieted down, but the light in the infirmary remained on, the boiler continued its low hum, and ingredients for dinner were being prepared in the kitchen… They were waiting for the next batch of soldiers to arrive.

After nightfall, Cheng Xiaojian finished his last shift. He walked through the quiet corridor and saw Yang Xinyu still in the duty room, the lamplight outlining his profile as he hunched over his desk. Cheng Xiaojian didn't disturb him, and quietly walked towards the dormitory door.

Pushing aside the heavy, cold-proof curtain, a biting wind whipped up snowflakes and instantly stung his face. The light on the roof of the outpost pierced the darkness, visible from afar.

Cheng Xiaojian suddenly understood the significance of that light. Its illumination meant that there was a point on this long, arduous journey that was open, warm, and a place to stop at any time. Yang Xinyu's twelve years here had been about ensuring that this light remained lit in the darkness. He was like a sturdy rivet, anchored at an altitude of 4,500 meters on the plateau, welcoming every convoy traveling north and south, and every comrade hurrying along.

Cheng Xiaojian knew that at this moment, Yue Guofeng's convoy was speeding through the snowstorm. And hundreds of kilometers away, the lights of another outpost were also on, and the comrades there were making the same preparations. Along the entire Qinghai-Tibet Railway, these twinkling lights stretch endlessly, collectively safeguarding the smooth flow of this vital transportation route.

This year, the Tuotuohe military post completed over 300 convoy support missions. This day was just another ordinary one for them. Gazing at the lights before him, Cheng Xiaojian felt he had matured considerably; this was the most precious experience and gift the snow-covered military post had given him.

第 82 集团军某旅活用红色资源深化教育实践活动

来源：解放军报 作者：郭杰峰 陶磊 责任编辑：孙悦 2025-12-08

第 82 集团军某旅活用红色资源深化教育实践活动——

坚定强军信念 提高打赢能力

■郭杰峰 解放军报特约记者 陶 磊

在中国人民抗日战争纪念馆，重温中华儿女抗击侵略者的烽火岁月；在中国人民革命军事博物馆，感受波澜壮阔的革命历史……今年以来，第 82 集团军某旅组织官兵，分批走进驻地周边革命旧址和红色场馆开展现地教学. 一堂堂沉浸式授课直击官兵心灵，引导官兵传承红色基因.

该旅领导介绍，作为专业防化力量，他们常年担负应急救援任务. 与各类毒剂打交道犹如在刀尖上起舞，官兵不仅要练强专业技能，还要具备临危不乱的心理素质.

为进一步激发官兵血性胆气和练兵备战热情，该旅在聚焦“铸牢政治忠诚、打好攻坚之战”深化教育实践活动中，注重将驻地周边红色资源作为铸魂育人的鲜活教材，精心设计主题鲜明的红色教育路线，组织官兵开展“追寻红色足迹、赓续红色血脉”系列活动，不断提升教育质效. “我们把教育课堂搬到革命旧址和红色场馆，旨在引导官兵校准奋斗目标，进一步坚定强军信念. ”该旅领导说.

在中国人民抗日战争纪念馆，一件件经历战火洗礼的文物、一幅幅定格历史瞬间的图片，吸引官兵驻足观看. “历史是最好的教科书，也是最好的清醒剂. 我们要牢记历史，练强专业本领，提高打赢能力. ”参观结束后组织的微讨论中，大家热烈交流，纷纷表示要将学习成效转化为投身强军实践的具体行动.

此外，该旅着眼青年官兵认知特点，围绕“先辈打赢靠什么，我们备战怎么干”组织讨论辨析，引导官兵立足岗位开展自我检视剖析，不断强化向战冲锋、敢于胜利的使命感责任感；组建“防化薪火”宣讲团，遴选优秀政治教员和理论骨干，深入班排和演训一线，讲解部队光辉历史，教育官兵在感悟先辈战斗精神中永葆忠诚本色、凝聚奋进力量.

随着深化教育实践活动持续推进，该旅官兵精武强能、矢志打赢的信念愈发坚定，敢打必胜的血性胆气不断充盈，大家以更加昂扬的士气投入各项训练，推动部队战斗力提升.

Editor: Sun Yue

2025-12-08

A brigade of the 82nd Group Army utilizes revolutionary resources to deepen educational and practical activities—Strengthening the belief in building a strong military and improving combat capabilities

■ Guo Jiefeng, Special Correspondent for PLA Daily, Tao Lei

At the Memorial Hall of the War of Chinese People's Resistance Against Japanese Aggression, soldiers relive the fiery years of the Chinese people's resistance against invaders; at the Military Museum of the Chinese People's Revolution, they experience the magnificent revolutionary history… Since the beginning of this year, a brigade of the 82nd Group Army has organized its officers and men to visit revolutionary sites and museums near their garrison for on-site learning. These immersive lessons resonate deeply with the soldiers, guiding them to inherit the revolutionary spirit.

The brigade's leadership explained that as a professional chemical defense force, they are responsible for emergency rescue missions year-round. Dealing with various toxic agents is like dancing on a knife's edge; soldiers must not only hone their professional skills but also possess the psychological qualities to remain calm in the face of danger.

To further inspire the officers and men' fighting spirit and enthusiasm for training and combat readiness, the brigade, in its in-depth education and practice activities focused on "forging political loyalty and winning the battle of decisive victory," emphasized using the surrounding revolutionary sites as vivid teaching materials for moral education. They meticulously designed themed red education routes and organized a series of activities for officers and men under the theme of "Following the Red Footprints and Continuing the Red Bloodline," continuously improving the effectiveness of education. "We moved the classroom to revolutionary sites and red museums to guide officers and men to calibrate their goals and further strengthen their belief in building a strong military," said a brigade leader.

At the Memorial Hall of the War of Chinese People's Resistance Against Japanese Aggression, the artifacts that had withstood the baptism of war and the photographs capturing historical moments attracted the officers and men to stop and admire them. "History is the best textbook and the best sobering agent. We must remember history, hone our professional skills, and improve our ability to win battles," said a member during a micro-discussion after the visit. Everyone enthusiastically exchanged ideas and expressed their determination to transform the learning outcomes into concrete actions in the practice of building a strong military.

Furthermore, the brigade, focusing on the cognitive characteristics of its young officers and men, organized discussions and analyses around the theme of "What did our predecessors rely on to win, and how should we prepare for war?" This guided officers and men to conduct self-examination and analysis based on their positions, continuously strengthening their sense of mission and responsibility to charge into battle and dare to win. A "Chemical Defense Torch" propaganda team was established, selecting outstanding political instructors and theoretical backbones to go deep

into platoons and training grounds to explain the glorious history of the unit, educating officers and men to maintain their loyalty and gather strength for progress by understanding the fighting spirit of their predecessors.

As the in-depth education and practice activities continued to advance, the brigade's officers and men' belief in honing their skills and striving for victory became increasingly firm, and their courage and determination to fight and win continued to grow. Everyone devoted themselves to various training exercises with even higher morale, promoting the improvement of the unit's combat effectiveness.

多维战场砺尖兵——来自陆军工程大学研究生院的观察报告

来源：解放军报 作者：王晓红 朱桁冈 责任编辑：孙悦 2025-12-08

多维战场砺尖兵

——来自陆军工程大学研究生院的观察报告

■王晓红 解放军报特约记者 朱桁冈

密林腹地，学员刘继滕潜心研究通信与干扰一体化课题，探寻战场上无声较量的制胜机理.

大洋之上，学员刘承霖开展海战场环境研究，流速、风向等数据转化为研究记录中的观点和例证.

戈壁荒漠，面对多重考验，学员张登科深入地下巷道，在国防工程安全防护前沿领域深耕.

白昼与黑夜、严寒与酷暑、高原与海岛、山地与平原……陆军工程大学研究生院师生向战而行，深入研究陆海空天电多维战场，一项项课题瞄准前沿.

强军号角催征，多维战场砺兵. 在习近平强军思想指引下，该院瞄准打赢需求，深入推进学科专业调整，提升导师队伍水平，完善人才培养体系，加快培养国家和军队急需的高层次人才.

陆军工程大学研究生院学员昂首阔步行进在校园大道上. 解放军报特约记者 朱桁冈摄

从“课程教授”到“课研耦合”——

课堂改革聚焦部队需求

某海域，前一刻还风平浪静，转眼间就乌云密布. 海面上浪花翻涌，狠狠砸向船舷.

海风呼啸，能见度只有十几米，试验平台前甲板已没入水中 1 米多. 此时此刻，由教员邵飞负责的研究生课程《军桥设计理论与方法》，正伴着这场海上试验同步开讲.

“不用担心，我站在最前面. ”邵飞一边高声呼喊，一边带领团队在风浪中运用智能信息系统采集数据. 而刚刚喊出的这句话，在邵飞心里回响了 28 年.

28 年前，邵飞初当教员，他跟着教授王景全研究的第一个项目是某船艇上部结构改装设计. 当时资料有限，他和王教授时常因此困扰.

“不用担心，我站在最前面. ”当年，王教授带着邵飞在试验船上战风斗浪，采集数据时总是站在最前沿. “前辈不顾个人安危，年轻人还怕什么？”邵飞说，从王教授身上学到的向战攻坚的拼劲儿，是他最想传给学员的东西.

28年后，邵飞成为首席专家，带领团队进行课题攻坚.“时代变了，部队作战保障需求也变了，现在我手头的课题是‘高海况跨海机动保障’. ”邵飞说，“以前站上讲台，讲的多是土木工程、军用桥梁方面的理论知识. 现在讲的多是世界级难题，也是部队急需破解的实战课题. ”

“科研一线摸爬滚打多年的经验告诉我，授课不能局限于空泛的理论，学员的课堂应该在试验平台上，在装备研制的全链路里. ”为此，邵飞把“高海况跨海机动保障”科研课题直接嵌进《军桥设计理论与方法》课堂. 课题里“恶劣环境下装备稳定转载”的需求，给课程里“军桥环境适应性”“结构承载合理性”等概念，配上了鲜活的军事应用场景；课堂上讲的桥体设计、载荷计算，又成了科研里“优化转载结构”的关键支撑.

“以前这门课，只有土木工程和军用桥梁两个方向；现在，材料、船舶、地质、车辆工程全融进来了. ”邵飞翻着新教案，向记者介绍，“部队需要什么样的人才，我们就培养什么人才，课程围绕打仗需求设计，才能确保学生到了部队能够胜任岗位. ”

教学和科研一耦合，课堂和战场就通了.

邵飞带领团队运用工程装备研究成果，研发出某一体化新型装备系统，成功解决了高海况下“靠泊”“过驳”等难题. 这次试验的每一组数据，都成了《军桥设计理论与方法》鲜活的教案，被搬进课堂.

“学员跟着我上试验船，看风浪里装备怎么运行，比他们在教室里听 10 遍‘环境适应性’课程都管用. ”邵飞说，他们探索建立“理论—科研—实践—创新”链条，让科研给课程提供实战方向、课程给科研培养攻坚人才.

邵飞的课堂，是该院课程改革的一个缩影.

记者翻开学校《研究生教育改革方案》，处处都是向战为战的痕迹：盯着部队演训需求，升级传统学科；围绕智能化、无人化，改革课程内容；融合多学科，破解作战训练难题. 近 5 年来，该院 20 门精品课程、30 项军事案例，都是这样“生长”出来的.

如今，邵飞牵头的某重大装备体系研制任务即将完成. 站在试验船的甲板上，风还是那么大，浪还是那么高，可他心里清楚，比风浪更急迫的，是肩上转型攻坚、为战育人的使命.

从“知识传授”到“技战讲解”——

教学方向锚定战场打赢

教员张中威的《材料力学》课堂上战味浓郁. “某新型机动防护技术，上周已在部队落地. ”张中威说.

这战味，藏在课堂外的脚印里. 今年夏天，张中威冒着酷暑，带领教研团队，3 次深入某工兵旅. 他们跟着官兵跑了 4 天，笔记本记满训练“堵点”. 部队的“问题清单”，最终转化为教案里标红的“课题方向”.

“部队在零下 30 摄氏度的环境里攻关，咱们的科研不能在恒温房里慢半拍！”那年，张中威带领团队扎进实验室，围绕“工事快速构筑与抢修”立项. 秋天，演训场传来消息——团队研制的应急抢修材料与施工工艺，在某部演训中发挥了重要作用.

现在张中威的课，公式旁贴着演训照，案例里带着部队官兵的反馈. 学员说：“听张教员的课，像跟着部队执行任务，每个知识点都有战场坐标. ”

“以前只琢磨如何讲透知识，现在先问部队打仗缺啥. ”课间，张中威攥着刚传来的新“问题清单”说，“教学的方向，就得锚定战场打赢！”

另一间教室里，教员丁国如正在授课. “现代战争，电磁频谱是无形命脉！”他的语气铿锵.

黑板上“电磁频谱”旁，放着一张演训照——装备天线直指天空，仿佛下一秒就有信号杂音.

这堂课的战味，早有铺垫. 课前，课程组给出任务：收集最新电磁对抗案例. 上课号响，教室变“战场”——红蓝频谱图在动画里闪烁，进攻方要“毁”信号，防御方得实时“控”资源.

“别死盯数据！”丁国如站在争论的学员中间，指尖轻点屏幕，“这就是昨天某部演训的‘卡脖子’问题！真到了战场上，慢一秒就会丢失阵地！”

“要的就是对抗感！”一旁听课的教员谷江春凑过来，翻出读博士时的笔记本，上面满是来自训练一线的记录.

当年，谷江春跟着导师跑了多个部队. 站在装备旁，他常听官兵吐槽：“复杂环境下，频谱一干扰，装备就容易失灵！”他见过凌晨 3 点的试验场，见过官兵急红的眼，也记着导师的话：“到一线才能找到教学科研的根！”

近 5 年来，谷江春经常带着空本子去演训场，装满“问题”才返回. 讲电磁频谱，他列出 10 多个部队案例. 学员说：“课本理论突然有了‘战斗气息’！”

这样的研究生课堂，在该院并不鲜见：《高级数学模型》设置作战场景，模拟全流程实践；《防护结构》以任务为驱动，把战场作业贯穿教学；《作战指挥概论》用三维沙盘复盘，打造沉浸式战场环境……

“以前研究生课程讲工程技术多，军事场景较少. ”招生培养处负责人说，“现在，教学科研紧盯未来战场，吸纳新理论、新装备，就是要培养出懂战、能战的人才. ”

从张中威的“冻土课题”，到丁国如的“电磁对抗”；从谷江春的演训笔记，到一堂堂充满实战味的课——这群军校教员认准一个道理：只有把战场“搬”进课堂，才能教会学员打赢本领.

从“课堂研学”到“沙场攻关”——

研究重心瞄准实战靶心

9 月 3 日，铁流滚滚，盛大阅兵式上装备方队米秒不差驶过长安街.

人群中，东部战区空军某部参谋罗宏川和武警部队某部高级工程师贺伟雄的目光，紧紧锁定战车方阵，内心平静而激动.

平静，是数据赋予的底气；激动，源于肩负使命的荣光.

这两位从陆军工程大学毕业的博士，在教员苏正炼带领下，成为今年纪念抗战胜利 80 周年阅兵式装备保障的骨干.

“以前靠老师傅眼睛看，现在靠大模型计算. ”苏正炼的话，道破了时代之变. 大数据、大模型涌进演训场，部队要的不仅是“修得好”，更是“预判准”“保得巧”.

从“课堂研学”到“沙场攻关”，该院学员在更多维的战场快速成长.

学员孙佳琛的战场在实验室屏幕上. “战争不给准备时间”，她牢记这句话，跟随王金龙院士团队向新一代短波通信冲锋. 深夜代码闪烁，参数反复调试，他们在编织“永不消逝的电波网”.

学员刘建邦的脚步从江河迈向深蓝. 王景全院士团队怀着“征服江海为打赢”的信念，在狂风骤雨里试装备，在巨浪滔天中找答案：如何让天堑变通途？如何让跨海保障更高效？

钱七虎院士团队的实验室里，爆炸冲击波掀飞记录纸. 学员刘一鸣亲眼见证了新型防护装置填补战场空白的一幕幕.

刘尚合院士团队的实验室里，学员谢喜宁在跟“隐形敌人”——静电较量. 实战化环境里，数据记了一组又一组. 精确到小数点后几位的数字，是驯服“静电幽灵”的缰绳，是新时代武器装备的安全屏障.

“敢闯科学‘无人区’，敢当开拓者、领跑者. ”这是该院师生的共同信条. 他们常常计算两道“时代算术题”：

从 0 到 1：在空白处画起跑线，让科研扎根战场；

从 1 到 0：把奖章锁进抽屉，向新战场出发.

东至海防前哨，南到密林腹地，西抵雪域高原，北达大漠戈壁……该院师生带着课题走出去，与一线部队拧成“一股绳”：课题共研，让实验室对接训练场；资源共用，让设备服务实战；人才共育，让智慧融入建设；成果共享，让创新点亮实践.

每一次算法迭代，都是向实战靶心的靠近；每一项成果落地，都是“科研为战”的生动注脚. 他们从课堂出发，向战而行，书写着新一代军校师生的答卷.

Sharpening Elite Soldiers on Multidimensional Battlefields—An Observation Report from the Graduate School of the Army Engineering University

Source: PLA Daily

Author: Wang Xiaohong, Zhu Henggang

Editor: Sun Yue

2025-12-08

Sharpening Elite Soldiers on Multidimensional Battlefields

—An Observation Report from the Graduate School of the Army Engineering University

■ Wang Xiaohong, Special Correspondent for PLA Daily, Zhu Henggang

In the heart of the dense forest, cadet Liu Jiteng dedicates himself to researching the integration of communications and jamming, exploring the winning mechanisms of silent warfare on the battlefield.

On the open ocean, cadet Liu Chenglin conducts research on the maritime battlefield environment, transforming data such as current speed and wind direction into viewpoints and examples in his research records.

In the Gobi Desert, facing multiple challenges, cadet Zhang Dengke delves into underground tunnels, cultivating expertise in the cutting-edge field of national defense engineering safety protection.

Day and night, bitter cold and scorching heat, plateaus and islands, mountains and plains… Faculty and students of the Graduate School of the Army Engineering University march towards battle, conducting in-depth research on the multidimensional battlefield of land, sea, air, space, and cyberspace, with each research project targeting the forefront.

The clarion call for a strong military urges us on; sharpening soldiers on multidimensional battlefields. Guided by Xi Jinping's thought on strengthening the military, the academy, aiming at the needs of winning wars, has deepened the adjustment of its disciplines and majors, improved the level of its mentor team, perfected its talent training system, and accelerated the cultivation of high-level talents urgently needed by the country and the military.

Students of the Graduate School of the Army Engineering University march confidently along the campus avenue. (Photo by Zhu Henggang, Special Correspondent of the PLA Daily) From "Course Teaching" to "Course-Research Coupling"—Classroom Reform Focuses on the Needs of the Troops

In a certain sea area, the sea was calm one moment, and then dark clouds gathered in the next. Waves surged and crashed against the ship's hull.

The sea wind howled, visibility was only a dozen meters, and the foredeck of the test platform was already more than one meter submerged. At this moment, the graduate course "Theory and Methods of Military Bridge Design," taught by instructor Shao Fei, was being taught simultaneously with this sea test.

"Don't worry, I'm at the front," Shao Fei shouted as he led his team to collect data using an intelligent information system amidst the wind and waves. These words had echoed in Shao Fei's heart for 28 years.

Twenty-eight years ago, Shao Fei, a new instructor, worked on his first project with Professor Wang Jingquan: the redesign of the superstructure of a ship. Limited resources at the time often troubled him and Professor Wang.

"Don't worry, I'll be at the forefront." Back then, Professor Wang led Shao Fei on the experimental vessel, braving the wind and waves, always standing at the forefront when collecting data. "Our predecessors disregarded their personal safety; what should we, the young, fear?" Shao Fei said. The tenacity and determination he learned from Professor Wang is what he most wants to pass on to his students.

Twenty-eight years later, Shao Fei has become a chief expert, leading a team to tackle challenging research projects. "Times have changed, and so have the needs of the military's operational support. My current research topic is 'High Sea State Cross-Sea Mobility Support,'" said Shao Fei. "Before,

when I stood on the podium, I mostly talked about theoretical knowledge in civil engineering and military bridges. Now, I talk about world-class problems, which are also practical issues that the military urgently needs to solve."

"Years of experience working on the front lines of scientific research have taught me that teaching cannot be limited to abstract theory. Students' classrooms should be on experimental platforms, within the entire chain of equipment development." To this end, Shao Fei directly embedded the research topic of "High Sea State Cross-Sea Mobility Support" into his course, *Military Bridge Design Theory and Methods*. The requirement for "stable equipment transfer in harsh environments" in the research topic provided vivid military application scenarios for concepts such as "military bridge environmental adaptability" and "structural load-bearing rationality" in the course; the bridge design and load calculations discussed in class became key support for "optimizing the transfer structure" in the research.

"Previously, this course only had two directions: civil engineering and military bridges; now, materials science, shipbuilding, geology, and vehicle engineering are all integrated," Shao Fei explained to the reporter, flipping through the new teaching materials. "We train the kind of talent the military needs, designing the curriculum around combat requirements to ensure students can competently fulfill their roles in the military." This coupling of teaching and research bridges the gap between the classroom and the battlefield.

Shao Fei led his team to develop a new integrated equipment system using research findings on engineering equipment, successfully solving challenges such as berthing and transshipment in high sea states. Every set of data from this experiment became a vivid teaching material for the course "Military Bridge Design Theory and Methods," brought into the classroom.

"Students coming aboard the test vessel with me to see how the equipment operates in wind and waves is more effective than them listening to ten lectures on 'environmental adaptability' in the classroom," Shao Fei said. They are exploring the establishment of a "theory-research-practice-innovation" chain, allowing research to provide practical direction for the curriculum, and the curriculum to cultivate talent for tackling key challenges in research.

Shao Fei's class is a microcosm of the college's curriculum reform.

A reporter flipped through the school's "Graduate Education Reform Plan," and everywhere there were traces of a focus on combat readiness: upgrading traditional disciplines by focusing on the needs of troop training; reforming curriculum content around intelligent and unmanned systems; and integrating multiple disciplines to solve combat training problems. In the past five years, the college's 20 high-quality courses and 30 military case studies have all "grown" in this way.

Now, the development of a major equipment system led by Shao Fei is nearing completion. Standing on the deck of the test ship, the wind is still strong, the waves are still high, but he knows that what is more urgent than the wind and waves is the mission on his shoulders to transform and tackle key challenges, and to cultivate talent for combat.

From “knowledge transmission” to “technical and tactical explanation”—Teaching direction anchored to battlefield victory. The “Materials Mechanics” class taught by instructor Zhang Zhongwei is imbued with a strong sense of combat readiness. “A certain new mobile protection technology was deployed to the troops last week,” Zhang Zhongwei said.

This sense of combat readiness is hidden in the footprints outside the classroom. This summer, Zhang Zhongwei braved the scorching heat, leading his teaching and research team to conduct three in-depth visits to an engineering brigade. They spent four days following the soldiers, their notebooks filled with notes on training bottlenecks. The troops’ “problem list” ultimately transformed into “research directions” highlighted in red in their lesson plans.

“The troops are tackling challenges in -30 degrees Celsius environments; our research can’t lag behind in a temperature-controlled environment!” That year, Zhang Zhongwei led his team into the laboratory, focusing on a project on “rapid construction and repair of fortifications.” In the autumn, news came from the training grounds—the emergency repair materials and construction techniques developed by the team played a crucial role in a certain unit’s training exercise.

Now, in Zhang Zhongwei’s classes, training photos are pasted next to formulas, and case studies include feedback from troops. Students say, “Listening to Instructor Zhang’s lectures is like following the troops on a mission; every knowledge point has a battlefield coordinate.”

“Before, I only thought about how to thoroughly explain the knowledge; now I first ask what the troops lack for combat,” Zhang Zhongwei said during a break, clutching a newly received “problem list.” “The direction of teaching must be anchored to winning on the battlefield!”

In another classroom, Instructor Ding Guoru is giving a lecture. “In modern warfare, the electromagnetic spectrum is an invisible lifeline!” His tone was firm.

Next to the word “electromagnetic spectrum” on the blackboard was a training exercise photo—equipment antennas pointed directly at the sky, as if signal noise would erupt at any moment.

The combat-oriented atmosphere of this lesson had been carefully prepared. Before class, the course team assigned the task of collecting the latest electromagnetic countermeasures cases. When the class started, the classroom transformed into a “battlefield”—red and blue spectrum diagrams flashed in animation, the attacking side had to “destroy” the signal, and the defending side had to “control” resources in real time.

“Don’t fixate on the data!” Ding Guoru stood among the arguing students, lightly tapping the screen. “This is the ‘bottleneck’ problem from yesterday’s training exercise! In real combat, a second’s delay will mean losing ground!”

“That’s the feeling of confrontation we need!” Instructor Gu Jiangchun, who was observing the class, leaned over and pulled out his doctoral notebook, filled with notes from the front lines of training.

Back then, Gu Jiangchun had followed his mentor to several military units. Standing beside the equipment, he often heard soldiers complain: “In complex environments, interference with the spectrum can easily cause equipment to malfunction!” He had seen the test range at 3 a.m., the soldiers’ red-eyed frustration, and remembered his mentor’s words: “Only by going to the front line can you find the roots of teaching and research!” For the past five years, Gu Jiangchun has often gone to the training ground with an empty notebook, returning only after filling it with “problems.” When discussing the electromagnetic spectrum, he listed more than ten cases from the military. “The textbook theory suddenly has a ‘combat feel’!” said a student. Such graduate-level classes are not uncommon at this academy: “Advanced Mathematical Modeling” sets up combat scenarios, simulating the entire process of practice; “Protective Structures” is task-driven, integrating battlefield operations throughout the teaching; “Introduction to Combat Command” uses a 3D sand table to create an immersive battlefield environment…

“Previously, graduate courses focused more on engineering technology and less on military scenarios,” said the head of the admissions and training department. “Now, teaching and research are focused on the future battlefield, absorbing new theories and equipment, all to cultivate talent who understand and can fight.” From Zhang Zhongwei’s “permafrost project” to Ding Guoru’s “electromagnetic countermeasures”; from Gu Jiangchun’s training notes to classes full of combat realism—these military academy instructors believe in one principle: only by bringing the battlefield into the classroom can they teach students the skills to win.

From “classroom learning” to “battlefield challenges”—Research Focus Targets Real Combat On September 3rd, a massive military parade saw equipment formations march past Chang’an Avenue with perfect precision. Among the crowd, Luo Hongchuan, a staff officer from an air force unit of the Eastern Theater Command, and He Weixiong, a senior engineer from an armed police unit, stared intently at the armored vehicle formation, their hearts calm yet filled with excitement.

The calm stemmed from the confidence provided by data; the excitement from the glory of shouldering a mission.

These two PhD graduates from the Army Engineering University, under the guidance of instructor Su Zhenglian, became the backbone of equipment support for this year’s parade commemorating the 80th anniversary of the victory against Japan.

“Before, we relied on the eyes of experienced technicians; now we rely on large-scale model calculations,” Su Zhenglian’s words revealed the changing times. Big data and large-scale models are flooding the training grounds; the troops need not only “good repairs,” but also “accurate predictions” and “skillful maintenance.”

From “classroom learning” to “battlefield challenges,” the academy’s students are rapidly growing in a more multidimensional battlefield.

Student Sun Jiachen’s battlefield is on the laboratory screen. “War doesn’t give time for preparation,” she firmly believes, following Academician Wang Jinlong’s team in their charge

towards next-generation shortwave communication. Late at night, code flashes, parameters are repeatedly adjusted—they are weaving an “everlasting network of radio waves.”

Student Liu Jianbang’s footsteps have journeyed from rivers to the deep blue sea. Academician Wang Jingquan’s team, with the belief of “conquering rivers and seas to win battles,” tests equipment in torrential rain and searches for answers amidst towering waves: How to turn natural barriers into thoroughfares? How to make cross-sea support more efficient?

In Academician Qian Qihu’s team’s laboratory, the shockwave of an explosion ripples through the recording paper. Student Liu Yiming witnesses firsthand how new protective devices fill gaps in battlefield capabilities.

In Academician Liu Shanghe’s team’s laboratory, student Xie Xining battles the “invisible enemy”—static electricity. In a realistic combat environment, data is recorded in batches. Numbers accurate to several decimal places are the reins to tame the “static ghost,” the safety barrier for new-era weaponry.

“Dare to venture into the ‘no man’s land’ of science, dare to be pioneers and leaders.” This is the shared motto of the academy’s faculty and students. They often solve two “arithmetic problems of our time”: From 0 to 1: drawing the starting line on a blank canvas, allowing scientific research to take root on the battlefield; From 1 to 0: locking medals away and setting off for new battlefields.

From the eastern coastal defense outposts to the southern heart of dense forests, from the western snow-capped plateaus to the northern Gobi Desert… the faculty and students of this academy take their research projects out into the world, working hand-in-hand with frontline troops: collaborative research connects laboratories to training grounds; resource sharing ensures equipment serves actual combat; joint talent cultivation integrates wisdom into development; and shared results illuminate practice with innovation.

Every algorithm iteration brings them closer to the bullseye of actual combat; every achievement is a vivid testament to “scientific research for war.” Starting from the classroom and marching towards war, they are writing the answer sheet for a new generation of military academy faculty and students.

中新“合作-2025”陆军联合训练中方参训部队抵新

来源：新华社 作者：王涵　罗可 责任编辑：杜圣智 2025-12-08

新华社新加坡 12 月 8 日电（王涵、罗可）一架搭载中国和新加坡 “合作-2025”陆军联合训练中方参训人员和装备的运-20 飞机 8 日抵达新加坡樟宜空军基地.

据了解，此次联训不仅是中新两国陆军第 7 次举办“合作”系列联合训练，也是继 2023 年确定”以三年为一个课题周期”后的第三年. 在”联合城市反恐作战”课题基础上，前两年分

别侧重于营指挥所演习、营实兵综合演练，今年则突出旅级推演和营级实兵演练，旨在深化提高两军在联合反恐行动中的协同配合能力.

参加此次联训的中方部队由第 74 集团军某旅抽组. 此后的十余天时间，中新双方将通过混合编组、联合指挥、协同行动等方式，在城市反恐作战指挥、战术运用、后勤保障等方面进行全方位交流，携手探索现代城市反恐作战的新战法、新思路，共同提升应对非传统安全威胁的能力水平.

Chinese Troops Participating in China-Singapore “Cooperation-2025” Joint Army Training Arrive in Singapore

Source: Xinhua News Agency

Author: Wang Han, Luo Ke

Editor: Du Shengzhi

2025-12-08

Singapore, December 8 (Xinhua) -- A Y-20 transport aircraft carrying Chinese personnel and equipment participating in the China-Singapore “Cooperation-2025” joint army training arrived at Changi Air Force Base in Singapore on December 8.

It is understood that this joint training is not only the 7th time the armies of China and Singapore have held the “Cooperation” series of joint training exercises, but also the third year since the “three-year cycle” was established in 2023. Based on the topic of “joint urban counter-terrorism operations,” the previous two years focused on battalion command post exercises and battalion-level comprehensive drills, respectively. This year, the focus is on brigade-level simulations and battalion-level live-fire exercises, aiming to deepen and improve the coordination and cooperation capabilities of the two militaries in joint counter-terrorism operations.

The Chinese troops participating in this joint training are drawn from a brigade of the 74th Group Army. Over the next ten days, China and Singapore will conduct comprehensive exchanges on urban counter-terrorism command, tactics, and logistical support through mixed formations, joint command, and coordinated actions. They will work together to explore new tactics and ideas for modern urban counter-terrorism operations and jointly improve their ability to respond to non-traditional security threats.

第 82 集团军某旅依法依规组织年度军事训练考核见闻

来源：解放军报 作者：张宇鹏 盖 楠 闫麒兆 责任编辑：孙悦 2025-12-09

细到微末处 严在分秒间

——第 82 集团军某旅依法依规组织年度军事训练考核见闻

■张宇鹏 盖 楠 解放军报特约通讯员 闫麒兆

第 82 集团军某旅官兵在 400 米障碍课目考核现场. 张子毅摄

一

冀北腹地，初冬的寒风掠过演训场，第 82 集团军某旅年度军事训练考核正紧张进行.

“前进！”手榴弹使用课目考场上，口令发出的瞬间，某连上等兵黄皓頔快速起身，跃进、隐蔽、投掷、再跃进……当两枚手榴弹精准命中目标地环靶“一内一外”时，计时器定格在 39 秒.

比平时最好成绩还快上一些！小黄正要咧嘴一笑，考官的判定却让他表情凝滞：“《军事体育训练大纲》明确规定，手榴弹出手后隐蔽时间须达 3 秒，你的隐蔽时间不够，成绩加 5 秒. ”现场的多角度监控录像画面清晰显示，手榴弹投出后尚未“爆炸”，小黄就提前跃出掩体.

这种对实战细节严格把控的场景，在战术基础动作考场同样上演. 某连中士小吴以一套干净利落的匍匐前进刷新连队纪录，喘息未定，就被监考人员通知，他因匍匐转换时枪口触地，成绩降低一等.

“有的连队在组训时尚能严抠大纲细则，但一到考场，片面追求速度和完成度的惯性思维就容易抬头，看似纸面成绩有所提升，却与考核规范和实战要求渐行渐远. ”该旅考核领导小组组长告诉笔者，为了避免考核“凭习惯”“差不多”，他们将大纲中每一个课目的考核要点拆解成可量化、可测量、可评判的细则，定下多秒表精确计时、激光测距仪测量、多角度录像备查、争议成绩三方复核等组合措施，既查违规也纠偏差，确保成绩评定精准到秒、规范到物，真正考出战斗力底数.

二

“越是不引人注意的细节，越容易成为盲区. ”对此，工兵连桥梁班徐班长有亲身感受. 前期一次考核中，他带领班组熟练展开“正向撤收”作业，按以往进程，再有几分钟就能完成考核.

可导调组特情突至：“大部队前方桥梁被毁，命你组迅速前出架桥！”突如其来的命令让全班有些措手不及，从正向撤收状态转为紧急架设，再反向撤收追赶部队，时间根本来不及. 手忙脚乱中，该班因严重超时被判定为不合格.

复盘会上，徐班长的反思深刻沉重：“大纲早已明确正向、反向撤收的不同应用场景，咱们练惯了‘一套动作’，就忽视了其它细节，导致面对突发情况‘掉链子’. ”这场败仗给他们打了一剂“清醒针”.

在营党委统一部署下，徐班长带领大家重新研读大纲，将平时“不常考”“没注意”的偏训弱训课目拎出来，列为重点攻关对象，重新制订补短计划. 徐班长仔细研究近年作战案例，分析了各种复杂战场环境下桥梁作业的特点，不仅带领大家研究无人机干扰、电磁压制、临机转场等增设内容，还模拟泥泞、陡坡等多种复杂地形，在不同环境下反复练协同、练应变、练处置，有效增强了应对战场各类突发情况的能力.

此次年终考核中，面对导调组临机设置的各种复杂情况，全班依据考核标准沉着果断高效处置. 这次，接到“预定作业点遭‘敌’火力覆盖，立即转换至备用作业点”的特情后，徐班长带领班组快速转移，提前完成任务.

三

大纲对细节的要求，不仅重塑了参考官兵的认识，更检验着风气监督员的履职能力.

跑道上，风气监督员程佳辉任职后第一次担负监督任务，心情既激动又忐忑. 随着 3000 米跑进入最后冲刺阶段，某连王副连长进入弯道时，脚步偏向操场内侧，有意无意“抄近道”，小程立即上前制止，“大纲规定，未按规定路线跑直接评定不及格，请立刻退回跑道！”

“考场执纪的公平公正，就体现在一处处容易被忽视的细节中. ”该旅一名领导介绍，此次考核前，他们组织监考人员逐条学习大纲规定及细则，明确考核中易被忽略的违规行为，从源头上确保考核的权威性与公正性.

“引体时下颌低于杠面，该次动作不计数……”引体向上考核中，观察到一名营部参谋下颌未过杠就被计数时，程佳辉对照考核细则提出扣分建议，被指出的参谋仔细核对后，边签字确认边服气表示：“依照标准严抓细节，考出来才是真水平. ”

所有课目全程多角度录像备查，争议判罚由考核组“双盲”复核，考核领导小组对临界成绩和争议环节进行重点抽查复核；扣分当场出示具体条款依据……新的监督机制落地后，官兵们发现，“下不为例”的空间消失了，每个判罚都经得起条文对照和视频回溯的双重检验.

暮色降临练兵场，该旅年度军事训练考核告一段落，但围绕落实落细大纲的思考与实践却未停歇. 加练补训的身影依旧活跃，研读大纲、研讨细则更加深入……官兵们渐渐懂得，考场从无可以被忽略的“小事”，每一处被认真对待的细节，都是通往未来战场的一块坚固基石.

感 悟

从严治考必较真

■孙德生

带兵时间长了，常会思考一个问题：平时在训练场上反复打磨的那些细节，到底为了什么？

依法治训、从严治考，从来不是一句空话套话，它就藏在手榴弹投出后必须等待的那 3 秒里，藏在战术基础动作中枪口不能触碰地面的那几厘米里，藏在跑道上不能抄近道的那几步里. 这些考场上的“斤斤计较”，恰恰是对战场法则的敬畏与遵从. 大纲中这些看似不起眼的“条条框框”，恰恰是连接训练场与战场最坚实的桥梁.

我们常说“战场上敌人不会给你第二次机会”，考场上的每一次迁就照顾、每一个“差不多”，或许在平时无足轻重，但上了战场，就可能意味着暴露，意味着失败甚至牺牲. 依法治训，首先就要敬畏这些写进大纲的细节，把它们当作不可逾越的“法”，因为对细节的每一次迁就，都是在实战的堤坝上掘开一道裂隙.

然而，知易行难. 我们有时会不自觉地被一些“惯性”牵着走. 去年是这么考的，今年还这么练；这个课目一直是这个流程，便以为天经地义. 这种“惯性思维”是依法治训的大敌，它让我们忽视了至关重要的细节，用经验习惯代替了科学标准.

如何牢牢把握住这些决定战场成败的细节呢？我想，无非是回归“认真”二字. 认真“读法”，带着敌情和实战设想，把大纲条文读细、读透，搞清楚每一个数据、每一个步骤背后的“为什么”；认真“普法”，把这些细节的重要性讲清讲透，让战士们不仅知其然，更知其所以然，变“要我守规”为“我要守规”；认真“执法”，善于运用科技手段辅助考核工作，多用数据说话，多用录像佐证，同时完善交叉监督、回避复核等机制，让执纪过程本身经得起检验，让公平公正成为每名官兵看得见、摸得着的规则.

说到底，在考场上较真细节，就是在为未来的胜利投下最坚实的砝码. 我们今天所坚持的每一秒、每一厘，都是在压缩与实战的差距，都是在为官兵的生命负责. 当法治精神真正融入部队血脉，当按纲施训、从严治考从外部要求变为内心自觉，一支部队的精气神和战斗力，便会在这些“细节”磨砺中，变得更加昂扬坚实.

Meticulous Details, Strict Discipline in Every Second

—A Glimpse into the Annual Military Training Assessment Organized by a Brigade of the 82nd Group Army in Accordance with Laws and Regulations

■ Zhang Yupeng, Gai Nan, Special Correspondent for PLA Daily, Yan Qizhao

Soldiers of a brigade of the 82nd Group Army at the 400-meter obstacle course assessment site. Photo by Zhang Ziyi

I. In the heart of northern Hebei, the early winter wind swept across the training ground as the annual military training assessment of a brigade of the 82nd Group Army was in full swing.

"Forward!" At the grenade handling test site, the moment the command was given, Private Huang Haodi of a certain company quickly stood up, leaped forward, concealed himself, threw the grenade, and leaped forward again… When two grenades accurately hit the target ring "one inside and one outside," the timer stopped at 39 seconds.

Even faster than his best performance! Xiao Huang was about to grin when the examiner's judgment froze his expression: "The Military Physical Training Outline clearly stipulates that the concealment time after throwing a grenade must be at least 3 seconds. Your concealment time is insufficient; add 5 seconds to your score." Multi-angle surveillance footage clearly showed that Xiao Huang jumped out of cover before the grenade even "exploded."

This scene of strict control over combat details also played out in the tactical basic movements test. Sergeant Wu of a certain company broke the company record with a clean and efficient crawling movement. Before he could catch his breath, the examiner informed him that his score had been lowered by one grade because his rifle muzzle touched the ground during a crawling transition.

"Some companies are meticulous in adhering to the syllabus during training, but once in the examination room, the ingrained mindset of prioritizing speed and completion easily resurfaces. While their paper scores may seem improved, they stray further and further from the assessment standards and actual combat requirements," the head of the brigade's assessment leadership group told the reporter. To avoid assessments based on habit or a "good enough" approach, they broke

down the assessment points for each subject in the syllabus into quantifiable, measurable, and evaluable details. They implemented a combination of measures, including precise timing with multiple stopwatches, laser rangefinder measurements, multi-angle video recording for review, and tripartite verification of disputed scores. This approach both checks for violations and corrects deviations, ensuring that assessments are accurate to the second and standardized to the item, truly revealing the true level of combat effectiveness.

Secondly, “The more inconspicuous the detail, the easier it is to become a blind spot.” Squad leader Xu of the engineering company’s bridge platoon has firsthand experience with this. In a previous assessment, he led his squad to skillfully conduct a “forward withdrawal” operation. According to the usual process, they would have completed the assessment in just a few minutes.

Suddenly, an emergency call came from the directing group: “The bridge ahead of the main force has been destroyed. Your group is ordered to move forward immediately to rebuild the bridge!” This sudden order caught the entire squad off guard. They had to switch from a forward retreat to emergency bridge construction, and then retreat in the opposite direction to catch up with the main force—there simply wasn’t enough time. In the chaos, the squad was deemed unqualified due to severely exceeding the time limit.

At the debriefing meeting, Squad Leader Xu’s reflection was profound and sobering: “The syllabus clearly outlined the different application scenarios for forward and reverse retreats. We were so used to practicing ‘one set of actions’ that we neglected other details, causing us to ‘drop the ball’ in the face of an emergency.” This defeat served as a wake-up call.

Under the unified deployment of the battalion’s Party committee, Squad Leader Xu led everyone to reread the syllabus, identifying the less frequently tested and neglected training subjects as key areas for improvement, and developing a new plan to address these shortcomings. Squad Leader Xu meticulously studied recent combat cases, analyzing the characteristics of bridge operations under various complex battlefield environments. He led his team in studying added scenarios such as drone interference, electromagnetic suppression, and impromptu relocation, and simulated various complex terrains including mud and steep slopes. They repeatedly practiced coordination, adaptability, and handling in different environments, effectively enhancing their ability to respond to various battlefield emergencies.

During this year-end assessment, facing various complex situations impromptu set by the directing group, the entire squad calmly, decisively, and efficiently handled the situations according to the assessment standards. This time, upon receiving the emergency message that “the designated work site is under enemy fire, immediately switch to the backup work site,” Squad Leader Xu led his team to quickly relocate and complete the mission ahead of schedule.

The detailed requirements of the syllabus not only reshaped the understanding of the participating officers and men but also tested the performance capabilities of the discipline supervisors.

On the runway, discipline supervisor Cheng Jiahui, undertaking his first supervisory task since taking office, felt both excited and apprehensive. As the 3000-meter race entered its final sprint, Deputy Company Commander Wang of a certain company, entering the bend, veered his feet towards the inside of the track, intentionally or unintentionally "taking a shortcut." Xiao Cheng immediately stepped forward to stop him, stating, "The syllabus stipulates that running outside the designated route results in an immediate failure. Please return to the track immediately!"

"The fairness and impartiality of the examination discipline are reflected in the details that are easily overlooked," explained a leader from the brigade. Before this assessment, they organized invigilators to study the syllabus regulations and details item by item, clarifying easily overlooked violations and ensuring the authority and fairness of the assessment from the outset. "If the chin is below the bar during a pull-up, the movement will not be counted..." During the pull-up assessment, when Cheng Jiahui observed that a battalion staff officer's chin was not above the bar but was still counted, he suggested a deduction based on the assessment rules. The staff officer carefully checked the suggestion, signed to confirm, and said with satisfaction, "Following the standards and paying attention to details is how we truly demonstrate our abilities." All subjects are recorded from multiple angles for review. Disputed judgments are reviewed by the assessment team using a "double-blind" process, and the assessment leadership group conducts focused spot checks on borderline scores and controversial points. Specific clauses and justifications for deductions are presented on the spot... After the new supervision mechanism was implemented, the officers and men found that the room for "no exceptions" had disappeared, and every judgment could withstand the dual scrutiny of clause comparison and video review.

As dusk fell on the training ground, the brigade's annual military training assessment came to an end, but the reflection and practice surrounding the detailed implementation of the syllabus continued. The extra training sessions continue, with soldiers studying the syllabus and discussing details in greater depth… They are gradually understanding that there are no "small things" that can be ignored in the examination; every detail that is taken seriously is a solid foundation for the future battlefield.

Reflections: Strict Examination Discipline Requires Serious Attention

■Sun Desheng After leading troops for a long time, I often ponder this question: What is the purpose of those details that are repeatedly refined on the training ground?

Training according to law and strict examination discipline are never just empty words. They are hidden in the three seconds that must be waited after a grenade is thrown, in the few centimeters in basic tactical maneuvers where the muzzle of the gun cannot touch the ground, and in the few steps on the track where shortcuts cannot be taken. These meticulous attentions on the examination field are precisely a respect for and adherence to the laws of the battlefield. These seemingly insignificant "rules and regulations" in the syllabus are precisely the most solid bridge connecting the training ground and the battlefield.

We often say, “On the battlefield, the enemy won’t give you a second chance.” Every concession or “good enough” in the examination room may seem insignificant in peacetime, but on the battlefield, it could mean exposure, failure, or even sacrifice. Training according to law begins with respecting these details written in the syllabus, treating them as inviolable “laws,” because every concession to detail is like digging a crack in the dam of actual combat.

However, knowing is easier than doing. Sometimes we are unconsciously led astray by certain “habits.” Last year’s exam was conducted this way, so this year’s training will be the same; this subject has always followed this procedure, so we take it for granted. This kind of “habitual thinking” is the greatest enemy of training according to law; it makes us ignore crucial details and replace scientific standards with experience and habits.

How can we firmly grasp these details that determine success or failure on the battlefield? I think it simply comes down to returning to the word “seriousness.” Carefully “reading the law,” with the enemy situation and realistic combat scenarios in mind, involves meticulously studying the outline and articles, understanding the “why” behind every piece of data and every step; diligently “educating the public,” explaining the importance of these details clearly and thoroughly, ensuring soldiers not only know what to do, but also why, transforming “being told to follow the rules” into “wanting to follow the rules”; and diligently “enforcing the law,” skillfully utilizing technology to assist in assessments, relying more on data and video evidence, while improving mechanisms such as cross-supervision and recusal review, ensuring the disciplinary process itself can withstand scrutiny, and making fairness and justice visible and tangible rules for every officer and soldier.

Ultimately, paying attention to details in the examination room is laying the most solid foundation for future victory. Every second and every millisecond we persist in today is narrowing the gap with actual combat, and is taking responsibility for the lives of our officers and men. When the spirit of the rule of law truly permeates the blood of the armed forces, when training according to the outline and strict examination become an internalized consciousness from external requirements, the morale and combat effectiveness of an army will become more vigorous and solid through the tempering of these “details.”

指导员的“激将法”，如何让失意战士重回“巅峰”？

来源：解放军报 作者：冉中尧 宋梦磊 责任编辑：孙悦 2025-12-09

一道“战书”，“激”出一个好兵

■冉中尧 宋梦磊

近日，第 79 集团军某旅军体运动会暨创破纪录比武落下帷幕，某连中士小吴在多个中长跑项目中取得优异成绩.

“指导员，谢谢你让我重新找回信心. ”走下领奖台，小吴迫不及待冲到连队沈指导员身边，紧紧抱住了他.

谁能想到，这名闪耀赛场的训练骨干，5 个多月前，还一心想着退伍.

那时，沈指导员刚到连队任职不久. 一次连队组织长跑训练，队伍整体节奏平稳，唯独小吴起跑不久就开始掉队.

起初，沈指导员以为小吴身体不舒服，便上前询问. 可小吴低着头，一直说自己没事.

那天以后，沈指导员开始留心观察小吴. 果然，小吴不仅训练时提不起精神，休息时也经常一个人独处，很少与战友交流.

通过与小吴班长的沟通，沈指导员才得知实情. 原来，小吴以前是连队的训练骨干，他性格要强，积极要求上进，当上等兵时就拿过旅军体运动会 3000 米季军. 选晋下士后，又在营里组织的基础体能比武中夺得冠军.

去年，一次训练中，小吴左脚踝不慎扭伤. 军医叮嘱他痊愈后再训练，可小吴不想耽误整体进度，休息了几天，就偷偷加练，结果拉伤了膝部韧带.

这一次，小吴只能按医生建议卧床养伤，但心中总有一种不甘. 考虑到小吴平时表现优异，班排骨干并没有过多关注他受伤后的失落情绪，每次训练回来，除了问候一下，其他时间多是和班里其他战士交流.

渐渐地，小吴感到被冷落，失去了之前那股拼劲. 身体恢复后，他的训练热情不断消退，甚至产生了退伍的想法.

摸清真相后，沈指导员找到小吴谈心. 本想关心一下他的恢复情况，不料一开口就被顶了回来：“指导员，您不用再费心了，我准备今年退伍. ”

“你若想走，没人留你！这点困难就把你打倒了，将来还怎么面对人生的风雨坎坷？”沈指导员突然变得严肃起来，看着小吴脸上复杂的表情，他随即话锋一转，下了一道“战书”——“听说你体能不错，敢不敢跟我比比单杠？”

“比就比！”沈指导员的器械训练成绩在连队数一数二，但小吴心里那股不服输的劲儿，瞬间被点燃了.

两人来到器械训练场. 沈指导员先上杠，一口气做到单杠 5 练习. 轮到小吴时，他刚完成单杠 3 练习就开始手臂发抖、身体摇晃，只能作罢.

小吴本以为自己会受到批评，但让他没想到的是，沈指导员心平气和地拍了拍他的肩膀：“单杠练的不只是臂力，更是不服输的韧劲. 你以前能拿冠军，现在身体恢复了，只要坚持科学训练，一定能再创佳绩. ”说着，他再次上杠，为小吴示范分解动作.

看着眼前这一幕，再想想指导员之前说过的“狠话”，小吴顿时明白指导员使用了“激将法”，良苦用心可见一斑.

接下来的日子，沈指导员为小吴制订了“阶梯式”训练计划，避免旧伤复发的同时，还能提升训练质效. 小吴也没辜负指导员的期望，清晨的训练场上、周末的健身房里，总能看到他加练的身影. 很快，他的 3000 米跑重回“巅峰”，其他各项训练成绩也“水涨船高”.

“指导员，我想留队，争创新的荣誉！”一天晚饭后，小吴敲开沈指导员的房门，语气坚定地递交了留队申请书.

今年 9 月，小吴顺利晋升中士. 考虑到他综合素质过硬，比赛经验丰富，连队安排他担任体能训练骨干.

训练场上，小吴毫无保留分享自己的技巧和心得. 当战友遇到困难或挫折时，他都会像沈指导员那样，巧妙引导、悉心帮教.

How Did the Instructor’s “Motivational Tactics” Help a Disheartened Soldier Return to His “Peak”?

Source: PLA Daily

Author: Ran Zhongyao, Song Menglei

Editor: Sun Yue

2025-12-09

A “challenge” “motivates” a good soldier

■ Ran Zhongyao, Song Menglei

Recently, the military sports meet and record-breaking competition of a brigade of the 79th Group Army concluded. Sergeant Xiao Wu of a certain company achieved excellent results in several middle- and long-distance running events.

“Instructor, thank you for helping me regain my confidence.” Stepping off the podium, Xiao Wu rushed to Instructor Shen of the company and hugged him tightly.

Who would have thought that this shining training backbone on the field was thinking about retiring from the army just over five months ago?

At that time, Instructor Shen had only recently taken up his post in the company. During a long-distance running training session, the overall pace of the team was steady, but Xiao Wu started to fall behind shortly after the start.

Initially, Instructor Shen thought Xiao Wu was feeling unwell, so he went to inquire. Xiao Wu kept his head down, insisting he was fine.

After that day, Instructor Shen began to observe Xiao Wu closely. Sure enough, Xiao Wu not only lacked enthusiasm during training but also often spent his rest time alone, rarely interacting with his comrades.

Through communication with Xiao Wu's squad leader, Instructor Shen learned the truth. It turned out that Xiao Wu had previously been a training backbone member of the company. He was strong-willed and ambitious, having won third place in the 3000-meter race at the brigade's sports meet when he was a private first class. After being promoted to corporal, he won the championship in the battalion's basic physical fitness competition.

Last year, during training, Xiao Wu sprained his left ankle. The military doctor advised him to fully recover before training, but Xiao Wu, not wanting to delay the overall progress, secretly added extra training after a few days of rest, resulting in a strained knee ligament.

This time, Xiao Wu could only follow the doctor's advice to rest in bed, but he felt a deep sense of resentment. Considering Xiao Wu's excellent performance, the platoon leaders didn't pay much attention to his dejected mood after his injury. After each training session, they would only offer a greeting and spend most of their time chatting with other soldiers in the platoon.

Gradually, Xiao Wu felt neglected and lost his previous fighting spirit. After recovering, his enthusiasm for training steadily declined, and he even considered leaving the army.

After figuring out the truth, Instructor Shen talked to Xiao Wu. He wanted to inquire about his recovery, but was immediately met with a sharp retort: "Instructor, you don't need to worry anymore. I plan to leave this year."

"If you want to leave, no one will stop you! If this little difficulty defeats you, how will you face the storms and hardships of life in the future?" Instructor Shen suddenly became serious. Looking at the complex expression on Xiao Wu's face, he immediately changed the subject and issued a challenge—"I heard you're in good physical condition. Do you dare to compete with me on the horizontal bar?"

"Sure!" Instructor Shen's performance in equipment training was among the best in the company, but Xiao Wu's competitive spirit was instantly ignited.

The two arrived at the equipment training area. Instructor Shen went first, completing five repetitions on the horizontal bar in one go. When it was Xiao Wu's turn, he only managed three repetitions before his arms began to tremble and his body swayed, forcing him to give up.

Xiao Wu expected criticism, but to his surprise, Instructor Shen calmly patted him on the shoulder: "The horizontal bar trains more than just arm strength; it trains an indomitable spirit. You used to win championships, and now that you've recovered, as long as you stick to scientific training, you'll definitely achieve even greater success." With that, he went back up on the bar and demonstrated the movements to Xiao Wu.

Seeing this, and recalling the instructor's earlier "stern words," Xiao Wu immediately understood that the instructor had used reverse psychology, revealing his good intentions.

In the following days, Instructor Shen developed a "step-by-step" training plan for Xiao Wu, aiming to prevent the old injury from recurring while improving training efficiency. Xiao Wu didn't disappoint his instructor; he could always be seen training extra in the mornings and at the gym on weekends. Soon, his 3000-meter run returned to its peak, and his other training results also improved significantly.

"Instructor, I want to stay in the team and strive for new honors!" One evening after dinner, Xiao Wu knocked on Instructor Shen's door and firmly submitted his application to stay.

This September, Xiao Wu was successfully promoted to sergeant. Considering his excellent overall qualities and rich competition experience, the company assigned him to be a key member of physical training.

On the training field, Xiao Wu shared his skills and insights without reservation. When his comrades encountered difficulties or setbacks, he would, like Instructor Shen, skillfully guide and carefully help them.

陆军某旅打造射击"毁伤数据库"火力打击效果有了"金标准"

来源：中国军网-解放军报 作者：向黎鸣 喻润东 责任编辑：林诗清 发布：2025-12-10

陆军某旅打造射击"毁伤数据库"——火力打击效果有了"金标准"

■解放军报记者 向黎鸣 特约记者 喻润东

前不久，陆军某旅一场实弹射击考核在野外驻训场展开. "核心结构未摧毁，毁伤效果不达标！"该旅某火力分队首轮打击结束后，尽管侦测设备显示"敌"目标被命中，但考核组却给出了"不达标"的判定结果.

这是为何？该旅火力科黄参谋向记者展示了无人机回传的画面：目标工事虽遭到打击，但内部支撑结构尚好. “命中目标只是基本要求，实现有效毁伤才是关键. ”谈及这一评判标准，他向记者讲起此前一次演训经历.

当时，火力分队炮弹虽然命中“敌”工事，但由于弹种选择不当，导致目标核心结构未被摧毁. “敌”工事内残余兵力负隅顽抗，导致后续跟进的突击分队行动受阻.

议战议训会上，该旅党委研究感到：“未来战场分秒必争，必须打通‘感知—决策—打击—评估’链条，确保火力打击实现最大毁伤效果. ”

立起“金标准”，打出“组合拳”. 该旅领导告诉记者，在“有效毁伤”这条“金标准”牵引下，他们全面优化火力打击效果评价体系，对部分不符合实战要求的评价标准进行修订，推动官兵从片面追求“精准命中”向更加注重“有效毁伤”进阶. 不仅如此，该旅党委还研究决定，以作战数据链建设为抓手，核算梳理历年实弹射击数据，利用信息化平台对多种训练数据进行系统聚合，精心打造射击“毁伤数据库”，及时测算评估毁伤效果，为指挥员调整部署提供数据支撑.

今年野外驻训，他们探索建立作战数据采集流转机制，利用无人机、装甲侦察车、雷达探测设备等，多维度收集目标数据，完成火力打击后，空中与地面设备立即捕捉目标毁伤实况，实时回传毁伤数据，不断丰富射击“毁伤数据库”的数据类型，辅助指挥员精准研判打击效果.

考核现场，指挥车内，该火力分队指挥员利用射击“毁伤数据库”得出的结论，与考核组给出的判定结果几乎完全一致. 判明首轮射击毁伤不足后，他果断下令更换弹种并实施二次火力打击，最终将“敌”目标彻底摧毁.

走下考核场，这名分队指挥员介绍，依托射击“毁伤数据库”，他们在平时训练中紧贴实战构设“刁钻”目标，区分破坏、压制、歼灭等多种打击效果，组织官兵以数据为支撑，深挖装备潜能、研练战法训法，火力打击能力不断提升.

An Army Brigade Develops a “Damage Database” for Shooting, Achieving a “Gold Standard” for Firepower Strike Effectiveness

Recently, an Army brigade conducted a live-fire assessment at a field training ground. “The core structure was not destroyed, and the damage effect did not meet the standard!” After the first round of strikes by a firepower unit of the brigade, although the detection equipment showed that the “enemy” target was hit, the assessment team gave a “failure to meet the standard” judgment.

Why is this? Staff Officer Huang of the brigade’s firepower section showed reporters images transmitted by a drone: although the target fortifications were hit, the internal support structure was still intact. “Hitting the target is only the basic requirement; achieving effective damage is the key.” He recounted a previous training exercise to the reporter when discussing this evaluation standard.

At that time, although the artillery shells from the fire support unit hit the “enemy” fortifications, the core structure of the target was not destroyed due to the inappropriate selection of ammunition. The remaining forces inside the “enemy” fortifications put up a stubborn resistance, hindering the subsequent assault team’s operation.

At a meeting to discuss combat and training, the brigade’s Party Committee concluded: “In the future battlefield, every second counts. We must streamline the ‘perception-decision-strike-assessment’ chain to ensure that firepower strikes achieve maximum damage.” Establishing a “gold standard” and launching a “combination punch,” the brigade’s leadership told reporters that, guided by this “gold standard” of “effective damage,” they comprehensively optimized the firepower strike effectiveness evaluation system, revised some evaluation standards that did not meet the requirements of actual combat, and promoted the officers and men to move from a one-sided pursuit of “precise hits” to a greater emphasis on “effective damage.” Furthermore, the brigade’s Party Committee decided to focus on building an operational data link, analyzing and compiling historical live-fire data, and using an information platform to systematically aggregate various training data to create a meticulously crafted “damage database.” This database allows for timely calculation and evaluation of damage effects, providing data support for commanders to adjust deployments.

During this year’s field training exercise, they explored and established an operational data collection and transfer mechanism. Utilizing drones, armored reconnaissance vehicles, and radar detection equipment, they collected target data from multiple dimensions. After completing a fire strike, air and ground equipment immediately captured the target damage situation and transmitted damage data back in real time, continuously enriching the data types in the “damage database” and assisting commanders in accurately assessing the strike effect.

At the assessment site, inside the command vehicle, the conclusions drawn by the fire unit commander using the “damage database” were almost identical to the assessment team’s judgment. After determining that the initial round of firing damage was insufficient, he decisively ordered a change of ammunition and a second fire strike, ultimately completely destroying the “enemy” target.

Stepping off the assessment field, the squad commander explained that, relying on the shooting “damage database,” they closely simulated real combat scenarios during routine training, constructing “tricky” targets, distinguishing between various strike effects such as destruction, suppression, and annihilation, and organizing officers and men to use data as support to deeply explore the potential of equipment and study tactics and training methods, thereby continuously improving their firepower strike capabilities.

第 74 集团军某旅聚合人才优势加快发展新质战斗力

来源：解放军报 作者：陈典宏 许浩杰 责任编辑：林诗清 2025-12-11

编者按习主席强调，要更新思想观念，大胆创新探索新型作战力量建设和运用模式，充分解放和发展新质战斗力. 近年来，随着我军实战化训练不断走向深入，摆在部队面前的实战化训练课题越来越多，各领域技术应用越来越广泛，对部队发展新质战斗力提出了新的挑战. 着眼这一变化，第 74 集团军某旅积极改革创新实战课题攻关模式，选拔高素质新型军事人才组建“飞行专家组”，领衔实战课题攻关，飞行训练取得新成效.

第 74 集团军某旅聚合人才优势加快发展新质战斗力

“飞行专家组”领衔课题攻关

解放军报讯 记者陈典宏、特约通讯员许浩杰报道：天高云阔，鹰击长空. 前不久，第 74 集团军某旅组织飞行训练，面对被“敌”雷达追踪的特情，该旅飞行员不拘泥于实施干扰的常规操作，灵活调整飞行航线和打法，成功摆脱追踪. 鏖战结束，飞行员走下战机，向旅“飞行专家组”成员竖起大拇指.

“这些灵活打法，是旅‘飞行专家组’带领我们集智攻关的成果. ”一名飞行员介绍，“飞行专家组”以“科技+”“智能+”等手段，助力战法训法创新，解决了不少制约战斗力提升的瓶颈问题.

“以往实战课题攻关都是按建制展开，随着实战化训练走深走实，课题数量越来越多、难度越来越高，这一传统攻关模式出现了弊端. ”该旅领导告诉记者，有的飞行员因跨专业知识储备不够、能力素质不足，导致负责的课题论证不充分、研究方法不科学；有的飞行员因研训精力分配不科学，导致训练成绩下滑.

为此，旅队打破建制界限、聚合人才优势，组建训法创新、战法创新、科研创新等 7 个“飞行专家组”，领衔实战课题顶层设计、训练重难点问题攻关、大项演训活动筹划等工作.

谢飞行员曾担任旅侦察科长、作训科长、营长，擅长训练统筹规划和多机型训法运用，成为训法创新专家组成员后，为改进训法提出多条行之有效的意见建议；梁飞行员精通软件设计和算法应用，被选拔进入科研创新专家组后，牵头进行某训练系统的设计研发，运用大数据和新算法提升飞行训练质效……

课题攻关实践中，“飞行专家组”成员采取“分组研究+集中会商”“分组确定课题+相互衔接验证”等模式，开展自研性课题和指导性课题攻关，进一步完善“分析短板、理论攻研、战法创新、训练实践、成果固化”的创新成果转化链路，给实战课题攻关带来新气象.

“头雁”领路，带动“群雁”高飞. 在实战课题攻关实践中，该旅还要求“飞行专家组”成员深入一线调查研究，指导各营连开展自研性课题攻关，为各营连培养研究型、创新型人才. 在“飞行专家组”的指导帮带下，一批具备组训和科研能力的基层骨干逐步成长起来，成为“飞行专家组”的后备人才.

“唯改革者进，唯创新者强. ”该旅领导说，随着“飞行专家组”在实战课题攻关领域发挥出越来越明显的作用，许多新技术应用到新装备训练中，取得了一批战法训法成果.

A 74th Group Army Brigade Leverages Its Talent Pool to Accelerate the Development of New Combat Capabilities.

Source: PLA Daily

Author: Chen Dianhong, Xu Haojie

Editor: Lin Shiqing

2025-12-11

Editor’s Note: President Xi Jinping emphasized the need to update thinking and boldly innovate and explore new models for the construction and application of combat forces, fully liberating and developing new combat capabilities. In recent years, as the PLA’s combat-oriented training has deepened, the number of combat-oriented training topics facing the troops has increased, and the application of technologies in various fields has become more widespread, posing new challenges to the development of new combat capabilities. In view of this change, a brigade of the 74th Group Army actively reformed and innovated its combat-oriented training model, selecting high-quality new-type military personnel to form a “flight expert group” to lead the research on combat-oriented topics, achieving new results in flight training.

A brigade of the 74th Group Army leverages its talent pool to accelerate the development of new combat capabilities.

“Flight Expert Group” Leads Research on Topics

PLA Daily News (Reporter Chen Dianhong, Special Correspondent Xu Haojie):

The sky is high and the clouds are vast; eagles [helicopters] soar through the sky. Not long ago, a brigade of the 74th Group Army organized flight training. Faced with the special situation of being tracked by “enemy” radar, the brigade’s pilots did not adhere to the conventional operation of jamming, but flexibly adjusted their flight paths and tactics, successfully shaking off the pursuers. After the fierce battle, the pilots disembarked from their combat aircraft and gave a thumbs-up to the members of the brigade’s “flight expert group.”

“These flexible tactics are the result of the collective wisdom and efforts of the brigade’s ‘flight expert group’ in leading us to overcome challenges,” a pilot explained. The “flight expert group” used “technology+” and “intelligent+” methods to assist in the innovation of combat tactics and training methods, solving many bottleneck problems that hindered the improvement of combat effectiveness.

“In the past, combat-related research projects were carried out according to the established organizational structure. As combat-oriented training has deepened and become more practical, the number and difficulty of projects have increased, and this traditional research model has revealed its drawbacks,” a brigade leader told reporters. Some pilots, due to insufficient cross-disciplinary knowledge and inadequate capabilities, led to insufficient argumentation and unscientific research methods for the projects they were responsible for; others, due to unscientific allocation of research and training energy, experienced a decline in training performance.

To this end, the brigade broke down organizational barriers and pooled its talent advantages, forming seven “Flight Expert Groups” focusing on training method innovation, combat method innovation, and scientific research innovation. These groups led the top-level design of practical training projects, tackled key and difficult training issues, and planned major training exercises.

Pilot Xie, who previously served as the brigade’s reconnaissance section chief, operations and training section chief, and battalion commander, is skilled in training coordination and planning, as well as the application of multi-aircraft training methods. After becoming a member of the training method innovation expert group, he offered numerous effective suggestions for improving training methods. Pilot Liang, proficient in software design and algorithm application, was selected to join the scientific research innovation expert group, where he led the design and development of a training system, using big data and new algorithms to improve the quality and efficiency of flight training. In the practice of tackling key problems, members of the “Flight Expert Groups” adopted models such as “group research + centralized consultation” and “group-based topic determination + mutual verification” to conduct self-developed and guiding research projects. This further improved the innovation achievement transformation chain of “analyzing shortcomings, theoretical research, combat method innovation, training practice, and solidifying results,” bringing a new atmosphere to the tackling of practical training projects.

Leading the way, the “flock” soars high. In tackling practical combat challenges, the brigade also requires members of the “Flight Expert Group” to conduct in-depth investigations and research at the front lines, guiding battalions and companies in carrying out self-developed research projects and cultivating research-oriented and innovative personnel for each unit. Under the guidance and assistance of the “Flight Expert Group,” a group of grassroots backbone personnel with training and research capabilities have gradually grown, becoming reserve talents for the “Flight Expert Group.”

“Only reformers advance, only innovators are strong,” said the brigade’s leadership. As the “Flight Expert Group” plays an increasingly significant role in tackling practical combat challenges, many

new technologies have been applied to training with new equipment, resulting in a number of successful combat tactics and training methods.

军营观察丨炮兵营专业训练有“新解”

来源：解放军报 作者：王康泰 陈典宏 黄 海 责任编辑：孙悦 2025-12-12

新闻样本

“有了专修室，训练更加得心应手”

■汪义翔 解放军报记者 陈典宏

大漠戈壁，朔风渐起，第 74 集团军某旅某炮兵营实弹射击考核如期举行. 第一次随营参加某新型火炮实弹射击，瞄准手小熊全神贯注，瞪大双眼.

“首发命中，目标被摧毁！”现场，随着炮长一声令下，炮弹呼啸出膛、直扑目标，打出“开门红”.

“装填！”炮长洪亮的声音再次响起. 小熊立即瞄准目标，复查瞄准情况，炮口指向目标……

戈壁滩上，炮声阵阵. 考核组通报，全营单目标命中率超出预期. 新型火炮首次实弹射击打出这样的成绩，让刘营长感到欣慰.

今年，该营列装某新型火炮. 官兵兴奋之余，压力随之而来，新装备带来新要求，倒逼着他们学习新装备、苦练新技能、研究新战法.

半年前调整到瞄准手岗位的小熊坦言，起初面对新装备、新专业，他一度感到本领恐慌. 他说，从当时的手足无措到如今实弹射击的沉稳自信，得益于旅队开展的新装备前置训练.

“将专修室内专攻精练和野外训练场上的练兵实践相结合，加速了战斗力生成. ”该旅机关陈参谋向记者介绍，旅队综合利用现有训练场地和闲置区域，根据专业特点组建若干专业训练专修室用于理论讲解、模拟训练和难题攻关，为新装备前置训练提供平台.

“有了专修室，训练更加得心应手. ”负责教学的教练员说，“利用模拟器材，可以完成瞄准手的大部分操作训练. ”

半年前，小熊在骨干的带领下，从瞄准原理、操作手法开始学起，从最初的经常“脱靶”，到如今炸点已经能够稳稳地落在靶心.

“每周 3 次集中授课、2 次模拟操作考核，每月 1 次连贯训练. ”新装备前置训练计划表上的时间线格外醒目. 友邻单位的优秀教练员成为专修室的“常客”，从基础原理到操作细节，他们分岗位分专业，把知识融会贯通讲；全营官兵利用模拟器材反复练，练出高质效.

实弹射击考核这天，小熊凭借反复训练形成的肌肉记忆，快速转动手轮，精确装定诸元；弹药手小夏快速装填炮弹，动作娴熟利落；炮长小闫指挥全班人员默契配合，沉着处置……

一发发炮弹呼啸出膛，在天空划出一道道壮美的轨迹.

记者调查

炮兵营专业训练有“新解”

■王康泰 解放军报记者 陈典宏 特约通讯员 黄 海

第 74 集团军某旅组织实弹射击考核. 黄 林摄

跨建制共享教学力量，让“一家练”汇聚“众家长”

一场寒潮席卷而至，茫茫戈壁，气温骤降.

刚刚在这里完成实兵训练的第 74 集团军某旅某炮兵营，针对暴露出的短板问题开展研究.

简易车炮库里，肖炮长一边指挥示范班操作装备，一边向战友们讲解相关细节.

任职 15 年来，肖炮长一直担负营里的专业教学任务，像这样的示范教学，已是家常便饭. 尽管如此，讲台上的他丝毫不敢马虎. 他从底层逻辑、基础原理讲起，官兵听得格外认真.

“送弹的动作要领是什么”“不同弹种推弹入膛的手法有何区别”“半自动装填机如果出现故障，人工装弹如何提高速度”……授课结束，战士们围在肖炮长身边请教.

与以往不同的是，今天听课的对象不仅有本营战友，还出现了许多新面孔——他们是来自全旅各单位同一专业的官兵. 只要有需求，大家就可以申请来听课.

“讲台”面向全旅，在这里已不新鲜. 肖炮长坦言，这是旅队对专长化任教实践探索的有益举措.

“充分运用优秀教练员资源，激活组训任教的源头活水，才能提升训练质效. ”刘营长告诉记者，部队换装转型遇到的第一个难题是“缺好老师”.

在开展基础训练前，该旅以个人自荐与营连推荐相结合的方式，选拔出一批训练尖子作为教学“种子选手”. 如何发挥出“酵母作用”？得益于专长化任教推行，他们在全旅打破建制共享教学力量，开展互学互教活动.

“共享教学力量，让我们有了追赶兄弟单位的底气. ”新任炮长小闫对于专长化任教感触很深. 白天操课，他努力把“他山之玉”转变为“自家之长”，每次训练遇到什么难题，他总会拨通肖炮长的电话请教. 两人交流，有时只有三言两语，有时也会为了一个问题讨论很久.

一次夜训，小闫操作的火炮突发故障，连队骨干轮番上阵排除故障均以失败告终. 就在这时，他拨通了肖炮长的电话. 电话那头，肖炮长结合经验一步步指导：“先检查电气面板有无显示故障，如果没有故障，可使用降级操作……”小闫按照肖炮长的指导，终于排除故障.

“战友结对帮带，不仅有利于年轻骨干成长进步，更增进了战友之间并肩作战的情谊. ”该旅作训科赵参谋说，这些年，连与连之间、营与营之间，跨单位结对子已成为常态，像肖炮长这样的优秀教练员，已带出多名“高徒”.

巧制计划表统筹练兵资源，大小专业分类施训

随着阵阵口令声传来，数十名战士根据指令同时开展参数装定.

大漠戈壁，放眼望去，由近及远，数十个训练场地有序排开，各场地整齐摆放着不同种类的训练器材.

刘营长指着训练场感慨地说：“戈壁滩上条件尽管简陋一些，但该训的课目都训到了. ”

早在今年初，上级就通知：新装备一时难以全部到位. 不仅如此，与新装备配套的文件资料、训练器材都十分紧缺.

专业训练即将展开，紧缺的训练器材和局促的训练场地，却要保障多个炮班开展专业训练，如何分配训练资源让刘营长犯了难.

面对训练资源紧缺难题，该旅党委一班人多次讨论研究解决对策. “装备配发有先后，但战斗力建设不能存在‘空档期’，不能等到上级配齐装备和器材才开展训练”“硬件设施短时间内难以到位是现实，但可以用科学的训练方法弥补不足”……越讨论，大家越有信心，一致认为，随着集约化组训的深化运用，资源不足的困局能够迎刃而解.

时间紧迫，未雨绸缪，该旅一方面通过采购、自建、申领等多种方式补充训练器材、完善训练设施，另一方面转变训练理念、优化训练方案. 不久后，全新的训练计划“新鲜出炉”.

“这张计划表的巧妙之处在于，既统筹时间和内容，还统筹人员与资源. ”该旅作训科赵参谋介绍，前期他们对全旅的训练器材、训练场地、武器装备等训练资源进行盘点，通过训练月计划，统一调度全旅训练资源，计划表上各单位什么时间训、训什么内容、场地在哪里以及相关保障等信息一目了然. 训练月计划下发后，各营再根据自身实际，进一步细化完善，制作成各连队的训练周表.

记者观察发现，在拟制训练月计划和训练周表时，他们总体遵循了“大专业小集中，小专业大集中”的原则——

比如火炮操作员，各营人员基数大，相关训练资源较为充足，专业训练通常由各营连组织. 而雷达、气象等小特专业则相反，人员基数小、训练资源少，各分队自行组织专业训练效果不佳，则由旅队统一组织集训，确保训练质效.

“直到现在，营里的训练资源依旧不足，但通过集约化组训，大纲规定的专业课目我们都能训到. ”刘营长说，“谁先占场地谁先训、谁没器材谁后训、一人训多人看”等问题，目前得到有效解决.

丰富模拟仿真手段，训练更加“有的放矢”

“目标距离和方位确定……”某新型火炮训练专修室内，3 台仿真火炮整齐排列，数名炮手听到指令后迅速行动，转动手轮、瞄准目标、按下发射按钮，一套动作干脆利落.

“一炮，未命中；二炮，误差 1 米；三炮，误差 3 米……”操作完成后，射击结果立即呈现在大屏幕上，射击精度、弹着点分布等情况一目了然，模拟系统根据每名官兵的训练成绩曲线，给出不同的改进建议.

“这种模拟化训练，可以克服场地限制、装备限制. ”瞄准手小熊赞不绝口，“对于直瞄射击而言，在不同操作方式下，即使瞄准景况完全一致，射点也可能有较大差别. 以往训练中缺少检查射点的手段，怎样的操作手法才是最佳、最适合自己的，瞄准手只能在长时间的实弹射击中寻找感觉. ”

如今，训练专修室配备了数据采集、考核评估等功能设施，可以进行全流程数据采集、辅助分析、质效评估，大幅降低了装备和弹药消耗，训练效费比明显提升.

“3、2、1，放！”某专修室内，官兵坐在操作台前，紧盯屏幕，运指如飞，一场实战背景下模拟射击训练进入关键阶段. 闫炮长带领炮班协同操作，炮弹直扑“敌”阵地. 片刻，“目标摧毁”的字样出现在屏幕上，考核系统给出“优”的评价.

考核结束，闫炮长感慨地说：“模拟训练和考评系统，不但解决了实装操作受限的问题，还能模拟各种复杂的战斗情景，训练更加‘有的放矢’. ”

“模拟训练仿真度越高，官兵训练质效也越高.”闫炮长告诉记者，掀起这间用帐篷搭建起来的专修室门帘，火炮就停在门外，从模拟训练到实装操作只有一扇“门”的距离.

规范细化考核标准，挤掉脱离实战的“水分”

“炮手注意！”弹药使用与勤务专修室内，一场专业考核正在展开，参考官兵闻令而动，按照流程完成一系列操作.

专修室内，一张考核标准细则十分醒目，上面不仅对操作动作、时间、精度等指标有详细要求，还对口令表述、操作时机、手法要领等进行标准化设定.

“一号炮手，动作不标准，存在安全隐患，扣10分；三号炮手，流程不顺畅，扣5分……”考核结束，考核员小黄依次通报成绩，参考官兵的操作过程与标准流程同时投放在前方大屏幕上.

“对于炮手而言，考核中需要关注的不仅是米、秒、环等指标，为炮车构筑掩体、临机处置特情等方面更需要关注.”小黄说，在日常考核中，米、秒、环等指标比较好把握，而其他实战化训练的核心能力指标由于缺乏详细的量化，往往受考核员主观因素的影响较大.

小黄讲述了亲身经历的例子——同样一个考核课目，换了考核员，成绩会有差别，特别是考察官兵综合能力的课目，研判“敌”情是否准确、处置措施是否符合实战要求、战法运用是否得当，不同考核员由于训练理念不同，往往会有不同的评判.

今年 4 月，该旅党委征集官兵意见建议时，小黄将他的看法如实上报. 不到一周，旅队召集各专业骨干，对以往考核中易出现的问题进行梳理分类，依据大纲规范细化考核方案，确保不管谁组织考核，都能按实战化标准考，最大限度减少人为因素和个人经验的干扰，挤掉脱离实战的“水分”. 对重点操作细节，采取架设相机录制、大屏幕实时显示等方式，确保考核有迹可循.

专修室内，一号炮手小陈率先完成训练考核，经考核员小黄评定优秀后，迅速赶到下一个场地. 短暂休息后，他开始装填弹药课目训练……每个场地的考核结束后，考核成绩优良的官兵继续参加下一个课目的训练考核，未通过考核的则留在原地继续训练.

“采取这种过关升级的办法，人员、时间、内容、质量可以更精准地跟踪问效.”小黄说.

孵化先训、接装培训、专班研训、交叉跟训……今年以来，该旅党委积极运用“四化”组训法，统筹训练资源，蹚出了新装备形成战斗力的新路子. 在不久前旅队组织的考核中，刘营长所在营队参考炮班优良率大幅提升.

亲历者说

这个“首发命中”来之不易

■第 74 集团军某旅班长 闫海洋

结束数月的野外驻训任务，我们旅从戈壁大漠回到位于岭南的部队营区. 回来休整没几天，旅队就开展装备维修保养、复训补训.

这一年，工作“连轴转”是常态. 今年旅队列装新型火炮，专业训练需要从零学起. 一开始，我信心满满. 毕竟，我与火炮打交道多年，摸清了火炮的各种“脾气”，掌握新型火炮操作技能应该用不了多久时间. 接触新型火炮后，我发现并没有想象中那么容易. 虽然都是火炮，可结构原理、操作流程、战法运用完全不同，自己一下子成了新手.

“自己都是新手，又怎么带着班里战友学好新专业？”那段时间，我十分焦急. 当时，全营仅有一门从兄弟单位“借”来的新型火炮，大家只能轮流实操训练，训练时间根本不够.

机关领导在蹲点调研时，我们反映了这个问题. 不久后，某新型火炮训练专修室成立，我和战友们欣喜不已. 依托模拟仿真设备提前熟悉新型火炮，降低了训练风险，提高了训练质效.

待转入实装训练后，我们很快进入状态，熟练掌握新装备的操作要领. 今年野外驻训期间，第一次参加实弹射击，我们班打出“首发命中”的好成绩. 这个成绩，来之不易！

编辑连线

编辑对话第七十四集团军某旅旅长——

加快基础训练转型升级

基础训练是战斗力生成的基石. 随着“四化”组训法全面推开，部队如何结合具体实践，加快基础训练转型升级？围绕这一话题，本版编辑与第 74 集团军某旅旅长进行连线交流.

编辑：我们注意到，旅队今年换装，这对全旅基础训练产生哪些影响？解决了哪些突出问题？

旅长：影响是全方位的. 比如拟定各项训练计划、培养教练员队伍、建设训练设施等，这些都要根据新装备、新编制做出全面调整. 在探索实践过程中，通过各方努力，硬件设施建设和人才队伍培养已取得长足进步，而转变各级指挥员的训练理念难度不小. 各级指挥员“穿新鞋走老路”的现象时有发生，比如保障资源难共享，有的单位把好资源藏着掖着；有的单位没有遵循战斗力生成规律，盲目求快求全，随意拔高训练目标；还有的组训施教惯用老一套，让官兵死记硬背，同样的训练课目反复练、练反复，导致没多久出现训练瓶颈；个别营连主官组训能力偏弱，拟定计划凭经验“照猫画虎”，导致出现偏训漏训弱训问题……这些都是今年开展训练解决的突出问题.

编辑：你认为加快基础训练转型升级的关键是什么？

旅长：关键是要按纲施训. 新的军事训练大纲对训练的方方面面做了系统科学的规范，是部队开展训练的基本遵循. 新的军事训练大纲明确指出，基础训练在按建制、按专业训练的基础上，贯彻集约专修理念，突出岗位核心能力，推行质量调控，实施专长化任教、集约化组训、模拟化训练、标准化考核. 可以说，落实法规制度、按照新的军事训练大纲开展训练，是提高训练质效的根本保证.

编辑：谈谈你对按纲施训的看法？

旅长：如何把新的军事训练大纲落到实处、见到实效，是我们各级党委的重要职责. 各级不仅要认真学习军事训练法规，通晓训练规律、明确训练思路、掌握训练方法，做到严之有据、严在法内、严得科学，还要做按纲施训的“明白人”，这样才能更好地统一训练思想，提高训练水平.

Editor: Sun Yue

2025-12-12

News Sample

“With a specialized training room, training is much easier”

■ Wang Yixiang, PLA Daily Reporter Chen Dianhong

In the vast Gobi Desert, as the north wind rises, a live-fire assessment of an artillery battalion of a brigade under the 74th Group Army is held as scheduled. Xiao Xiong, a gunner participating in a live-fire exercise of a new type of artillery for the first time, is fully focused, his eyes wide open.

“First shot hit, target destroyed!” At the scene, with the gunner’s order, the shell roared out of the barrel, heading straight for the target, achieving a “good start.”

“Load!” The gunner’s booming voice rang out again. Xiao Xiong immediately aimed at the target, checked the aiming, and pointed the gun at the target…

On the Gobi Desert, the sound of artillery fire echoed. The assessment team reported that the battalion’s single-target hit rate exceeded expectations. The successful live-fire exercise of the new artillery brought satisfaction to Battalion Commander Liu.

This year, the battalion received a new type of artillery. While the officers and men were excited, the pressure also increased. The new equipment brought new requirements, forcing them to learn the new equipment, hone new skills, and research new tactics.

Xiao Xiong, who was transferred to the gunner position six months ago, admitted that he initially felt insecure about his abilities in the face of the new equipment and new specialty. He said that his transformation from initial helplessness to his current composure and confidence in live-fire exercises was thanks to the brigade's pre-training for the new equipment.

"Combining specialized indoor training with practical training on the field has accelerated the generation of combat effectiveness," Staff Officer Chen from the brigade headquarters told reporters. The brigade comprehensively utilizes existing training grounds and unused areas, establishing several specialized training rooms based on professional characteristics for theoretical explanations, simulation training, and tackling challenging problems, providing a platform for pre-training for the new equipment.

"With the specialized training room, training has become much easier," said the instructor in charge of teaching. "Using the simulators, we can complete most of the aiming operator's operational training." Six months ago, under the guidance of experienced instructors, Xiao Xiong started learning from aiming principles and operating techniques. From frequently missing the target initially, he can now consistently land the bomb in the bullseye.

"Three intensive lectures per week, two simulated operation assessments, and one continuous training session per month." The timeline on the pre-training plan for the new equipment is particularly striking. Excellent instructors from neighboring units have become "regulars" in the training room, explaining everything from basic principles to operational details, tailored to different positions and specialties, integrating knowledge comprehensively. All officers and men in the battalion practice repeatedly using the simulators, achieving high-quality and efficient training.

On the day of the live-fire assessment, Xiao Xiong, relying on muscle memory developed through repeated training, quickly turned the handwheel and accurately set the firing data; ammunition handler Xia swiftly loaded shells with skillful and efficient movements; gunner Yan commanded his entire squad in seamless coordination, calmly handling the situation… Shell after shell whistled from the barrel, tracing magnificent trajectories across the sky.

Reporter Investigation: Artillery Battalion's Professional Training Has a "New Interpretation"

■ Wang Kangtai, PLA Daily Reporter Chen Dianhong, Special Correspondent Huang Hai

A brigade of the 74th Group Army organized a live-fire assessment. Photo by Huang Lin.

Sharing Teaching Resources Across Organizations: "One Training Unit" Gathers "Many Parents"

A cold wave swept in, and the temperature plummeted across the vast Gobi Desert.

An artillery battalion of a brigade of the 74th Group Army, having just completed live-fire training here, is conducting research on the shortcomings that have been exposed.

In a makeshift vehicle-mounted artillery depot, Gunner Xiao directed the demonstration squad in operating the equipment while explaining relevant details to his comrades.

For 15 years, Artillery Commander Xiao has been responsible for professional instruction within his battalion, and demonstrations like this are commonplace. Despite this, he remains meticulous on the platform. He explains from the ground up the logic and fundamental principles, drawing the soldiers' keen attention.

"What are the key points of the ammunition feeding action?" "What are the differences in the methods of pushing different types of ammunition into the chamber?" "If the semi-automatic loading machine malfunctions, how can manual loading be accelerated?"… After the lecture, the soldiers surrounded Artillery Commander Xiao, asking questions.

Unlike in the past, today's audience included not only his own battalion's comrades but also many new faces—soldiers from various units across the brigade specializing in the same field. Anyone with a need can apply to attend.

The "lecture platform" is open to the entire brigade; it's nothing new here. Artillery Commander Xiao frankly admits that this is a beneficial measure for the brigade to explore specialized teaching practices.

"Making full use of excellent instructors and activating the source of training and instruction is essential to improving training effectiveness," Battalion Commander Liu told reporters. He added that the first challenge encountered in the unit's equipment transformation was the "lack of good teachers."

Before conducting basic training, the brigade selected a group of top trainees as "seed players" for instruction through a combination of self-nomination and battalion/company recommendations. How to leverage this "catalytic effect"? Thanks to the implementation of specialized instruction, they broke down organizational barriers and shared teaching resources across the brigade, conducting mutual learning and teaching activities.

"Sharing teaching resources gives us the confidence to catch up with our brother units," said Xiao Yan, the newly appointed artillery commander, deeply impressed by specialized instruction. During daytime training, he strives to transform "others' strengths" into "his own." Whenever he encounters a problem during training, he always calls Artillery Commander Xiao for advice. Their exchanges sometimes consist of only a few words, and sometimes they discuss a single issue at length.

One night during training, the artillery Xiao Yan was operating suddenly malfunctioned. Several key personnel from the company took turns troubleshooting, but all attempts failed. Just then, he called Artillery Commander Xiao. On the other end of the line, Artillery Commander Xiao,

drawing on his experience, guided him step by step: “First, check if there’s a fault display on the electrical panel. If there isn’t, you can use a downgraded operation...” Following Artillery Commander Xiao’s guidance, Xiao Yan finally resolved the problem.

“The comrade-in-arms mentoring program not only benefits the growth and progress of young backbone personnel but also enhances the camaraderie among comrades-in-arms,” said Staff Officer Zhao of the brigade’s training section. He added that in recent years, cross-unit pairing between companies and battalions has become commonplace, and outstanding instructors like Artillery Commander Xiao have trained numerous outstanding apprentices.

Skillful planning and resource allocation for training, categorizing training by specialty

As commands rang out, dozens of soldiers simultaneously began setting parameters.

Across the vast Gobi Desert, dozens of training grounds stretched out in an orderly fashion, each displaying various types of training equipment.

Battalion Commander Liu pointed to the training grounds and remarked, “Although conditions on the Gobi Desert are somewhat rudimentary, we’ve managed to train on all the necessary subjects.”

As early as the beginning of this year, higher authorities notified that the new equipment would not be fully available immediately. Furthermore, supporting documentation and training equipment were in short supply.

Specialized training was about to begin, but the shortage of training equipment and cramped training grounds, coupled with the need to ensure that multiple artillery squads could conduct specialized training, presented a challenge for Battalion Commander Liu.

Faced with this shortage of training resources, the brigade’s Party Committee held numerous discussions to develop solutions. “Equipment distribution has a sequence, but combat capability building cannot have a ‘gap period.’ We can’t wait until higher authorities have provided all the equipment and materials before starting training.” “It’s a reality that hardware facilities cannot be in place in a short time, but we can make up for the deficiencies with scientific training methods.”... The more they discussed, the more confident they became, unanimously agreeing that with the deepening application of intensive training, the resource shortage predicament could be resolved.

With time running out, the brigade proactively supplemented training equipment and improved training facilities through various means, including procurement, self-construction, and application. Simultaneously, they transformed their training philosophy and optimized training programs. Soon after, a brand-new training plan was unveiled.

“The ingenuity of this training plan lies in its comprehensive coordination of time and content, as well as personnel and resources,” explained Staff Officer Zhao of the brigade’s training section. He explained that they conducted a preliminary inventory of the brigade’s training equipment, training grounds, and weaponry. Through the monthly training plan, they unified the allocation of

training resources across the brigade. The plan clearly outlines when each unit will train, what the training content will be, the location of the training grounds, and related support information. After the monthly training plan is issued, each battalion further refines and improves it based on its own circumstances, creating weekly training schedules for each company.

Reporters observed that in drafting the monthly and weekly training plans, they generally followed the principle of "centralizing large specialties in smaller areas and concentrating small specialties in larger areas"—for example, artillery operators, with a large number of personnel and relatively abundant training resources in each battalion, typically have their specialized training organized by the individual battalions and companies. Conversely, specialized specialties such as radar and meteorology have smaller personnel and fewer training resources; individual unit training is less effective, so the brigade organizes centralized training to ensure training quality and efficiency.

"Even now, the battalion's training resources are still insufficient, but through intensive training, we can train all the professional subjects stipulated in the syllabus," said Battalion Commander Liu. "Problems such as 'whoever occupies the space first trains first, whoever lacks equipment trains later,' and 'one person trains while others watch' have been effectively resolved."

Enriching simulation methods makes training more "targeted."

"Target distance and bearing confirmed..." In the training room of a new type of artillery, three simulated artillery pieces are neatly arranged. Several gunners act swiftly upon hearing the command, turning handwheels, aiming at the target, and pressing the fire button—a series of crisp and clean movements.

"First shot, miss; second shot, error 1 meter; third shot, error 3 meters..." After the operation, the firing results are immediately displayed on the large screen. The firing accuracy, bullet impact distribution, and other information are clearly visible. The simulation system provides different improvement suggestions based on each soldier's training performance curve.

"This simulated training overcomes limitations in terms of both location and equipment," praised aimer Xiao Xiong. "For direct-fire shooting, even with identical aiming conditions, the firing point can vary significantly depending on the operating method. Previously, training lacked means to check the firing point; aimers could only find the optimal and most suitable operating method through prolonged live-fire exercises." Now, the training workshop is equipped with data acquisition and assessment facilities, enabling full-process data collection, auxiliary analysis, and quality and efficiency evaluation, significantly reducing equipment and ammunition consumption and noticeably improving the cost-effectiveness of training.

"3, 2, 1, fire!" In a certain workshop, soldiers sat at their workstations, intently watching the screens, their fingers flying across the keyboard. A simulated shooting training exercise under realistic combat conditions entered a crucial stage. Artillery Commander Yan led his team in coordinated operations, firing shells directly at the "enemy" position. Moments later, the words "Target Destroyed" appeared on the screen, and the assessment system gave an "Excellent" rating.

After the assessment, Artillery Commander Yan remarked, “The simulation training and assessment system not only solves the problem of limited real-world operation but also simulates various complex combat scenarios, making training more targeted.”

“The higher the fidelity of the simulation training, the higher the quality and efficiency of the soldiers’ training,” Commander Yan told reporters. Lifting the curtain of this specialized training room, constructed of tents, reveals the artillery pieces parked outside; the distance from simulation training to real-world operation is just a “door.”

Standardized and detailed assessment criteria eliminate “water” that is detached from real combat.

“Gunners, attention!” In the ammunition use and service specialized training room, a professional assessment is underway. The participating soldiers act upon the command, completing a series of operations according to the procedures.

Inside the specialized training room, a detailed set of assessment standards is prominently displayed. It not only details the requirements for operational actions, time, and accuracy but also standardizes the expression of commands, timing of operations, and key techniques.

“Gunner No. 1, your movements are not standard, posing a safety hazard, deduct 10 points; Gunner No. 3, your procedure is not smooth, deduct 5 points...” After the assessment, examiner Xiao Huang announced the scores one by one, displaying the soldiers’ operational processes and standard procedures simultaneously on the large screen in front.

“For gunners, the assessment requires attention not only to indicators like meters, seconds, and rings, but also to aspects like constructing cover for the artillery vehicle and handling unexpected situations,” Xiao Huang said. He explained that in routine assessments, indicators like meters, seconds, and rings are relatively easy to grasp, while other core competency indicators in combat training, due to a lack of detailed quantification, are often significantly influenced by the examiner’s subjective factors.

Xiao Huang recounted a personal example—the same assessment subject, with different examiners, would yield different results, especially for subjects assessing soldiers’ comprehensive abilities. Whether the assessment of the “enemy” situation was accurate, whether the response measures met combat requirements, and whether the tactics were applied appropriately—different examiners often have different judgments due to differing training philosophies.

In April of this year, when the brigade’s Party Committee solicited opinions and suggestions from soldiers, Xiao Huang truthfully reported his views. Within a week, the brigade convened key personnel from various specialties to review and categorize common problems encountered in previous assessments. Based on the syllabus, they refined the assessment plan to ensure that regardless of who organizes the assessment, it adheres to realistic combat standards, minimizing interference from human factors and personal experience, and eliminating any “watered-down”

aspects unrelated to actual combat. For key operational details, methods such as camera recording and real-time display on large screens were employed to ensure the assessment was traceable.

In the specialized training room, gunner Xiao Chen was the first to complete the training assessment. After being rated excellent by assessor Xiao Huang, he quickly moved to the next training area. After a short rest, he began training in ammunition loading… After each assessment, soldiers with excellent results continued to the next training exercise, while those who failed remained in their current location to continue training.

“This pass-and-advancement method allows for more precise tracking and evaluation of personnel, time, content, and quality,” said Xiao Huang.

Incubation training, equipment acceptance training, specialized training teams, cross-training… Since the beginning of this year, the brigade’s Party Committee has actively utilized the “four-pronged” training method, coordinating training resources and forging a new path for the formation of combat capability from new equipment. In a recent brigade-organized assessment, the excellent rate of the artillery squad in Battalion Commander Liu’s battalion significantly improved.

A firsthand account: This “first-shot hit” was hard-won

■ Yan Haiyang, Squad Leader of a Brigade of the 74th Group Army: After several months of field training, our brigade returned from the Gobi Desert to our barracks in Lingnan. After only a few days of rest, the brigade began equipment maintenance, repair, and retraining.

This year, continuous work has been the norm. This year, the brigade was equipped with new artillery, requiring us to learn specialized training from scratch. Initially, I was full of confidence. After all, I had dealt with artillery for many years, understood its various “tempers,” and thought mastering the operation skills of the new artillery wouldn’t take long. However, after handling the new artillery, I found it wasn’t as easy as I had imagined. Although they were all artillery pieces, their structural principles, operating procedures, and tactical applications were completely different, making me feel like a complete novice.

“How can I, a novice myself, lead my comrades in learning this new specialty?” I was extremely anxious during that time. At that time, the entire battalion only had one new artillery piece “borrowed” from a brother unit, and everyone had to take turns practicing, with simply not enough training time.

When the leadership conducted on-site research, we raised this issue. Soon after, a specialized training workshop for a new type of artillery was established, and my comrades and I were overjoyed. Using simulation equipment to familiarize ourselves with the new artillery in advance reduced training risks and improved training efficiency.

After transitioning to live-fire training, we quickly got into the swing of things and mastered the operating procedures of the new equipment. During our field training this year, in our first live-fire exercise, our squad achieved a “first-shot hit” result. This achievement was hard-won!

Editor's Note: An interview with the brigade commander of a brigade in the 74th Group Army—Accelerating the Transformation and Upgrading of Basic Training. Basic training is the cornerstone of combat effectiveness. With the full implementation of the "Four Modernizations" training method, how can the military combine it with specific practices to accelerate the transformation and upgrading of basic training? To explore this topic, our editors conducted a video conference with the brigade commander of a brigade under the 74th Group Army.

Editor: We noticed that the brigade underwent equipment re-equipment this year. What impact has this had on the brigade's basic training? What prominent issues have been resolved?

Brigade Commander: The impact is comprehensive. For example, formulating various training plans, cultivating instructors, and constructing training facilities all require comprehensive adjustments based on the new equipment and organizational structure. In the process of exploration and practice, through the efforts of all parties, significant progress has been made in hardware construction and personnel training. However, transforming the training concepts of commanders at all levels is quite challenging. The phenomenon of commanders "wearing new shoes but walking the old path" still occurs frequently. For example, resource sharing is difficult, with some units hoarding good resources; some units do not follow the laws of combat effectiveness generation, blindly pursuing speed and comprehensiveness, arbitrarily raising training goals; some units habitually use outdated methods in training organization and instruction, forcing officers and men to memorize by rote, repeatedly practicing the same training subjects, leading to training bottlenecks in a short time; some battalion and company commanders have weak training organization capabilities, formulating plans based on experience, resulting in biased, incomplete, and weak training… These are all prominent problems that have been addressed in this year's training.

Editor: What do you think is the key to accelerating the transformation and upgrading of basic training?

Brigade Commander: The key is to train according to the syllabus. The new military training syllabus provides a systematic and scientific framework for all aspects of training, serving as the fundamental guideline for troop training. The syllabus clearly states that basic training, based on organizational structure and professional specialization, should implement the concept of intensive and specialized training, emphasizing core competencies for each position, promoting quality control, and implementing specialized instruction, intensive training organization, simulation-based training, and standardized assessment. In short, implementing regulations and conducting training according to the new military training syllabus is the fundamental guarantee for improving training quality and effectiveness.

Editor: What are your views on training according to the syllabus?

Brigade Commander: Ensuring the new military training syllabus is effectively implemented and yields tangible results is a crucial responsibility of Party committees at all levels. All levels must

not only diligently study military training regulations, understand training principles, clarify training approaches, and master training methods, ensuring strictness is based on evidence, within the law, and scientifically sound, but also become “enlightened” individuals who understand how to conduct training according to the syllabus. Only in this way can we better unify training thinking and improve training levels.

第 76 集团军结合深化政治整训学习贯彻习近平强军思想

来源：解放军报 作者：张磊峰 张石水 责任编辑：孙悦 2025-12-12

第 76 集团军结合深化政治整训学习贯彻习近平强军思想——

赓续优良传统 激发胜战之气

■解放军报记者 张磊峰 特约记者 张石水

“作为新时代红军传人，我们要赓续优良传统，研战谋战务战，努力锤炼能打仗、打胜仗的过硬本领. ”冬日，第 76 集团军一名党委常委来到某高原驻训地，结合学习《习近平论强军兴军（四）》，与“拥政爱民模范连”官兵分享感悟体会，引导大家深刻领会习近平强军思想中蕴含的军事观和方法论.

“政治上的坚定源于理论上的清醒. 要坚持用习近平强军思想武装头脑，不断夯实信仰信念根基，提振奋斗攻坚的精气神. ”该集团军领导告诉记者，《习近平论强军兴军（四）》印发部队后，集团军党委一班人结合深化政治整训，认真读原著、学原文、悟原理，全面学习领会习近平强军思想的重大意义、科学内涵、精髓要义、实践要求，进一步加强政治锻造、思想改造，引导官兵坚定强军信念、投身强军实践.

实践中，该集团军通过“领导讲大课、基层讲小课、官兵讲微课”方式，帮助官兵加深理解领悟；充分发挥部队红色资源优势，把光荣战史教育融入理论学习，引导官兵在感悟先辈精神力量中赓续优良传统、争当红色传人；坚持学思用贯通、知信行统一，引导官兵立足岗位实际把自己摆进去、把职责摆进去、把工作摆进去，进一步强化使命担当，切实将学习感悟转化为干事创业的热情动力.

“当年，先辈们在鄂豫皖地区坚持游击战，枪支弹药不足，就用大刀长矛与敌人搏斗；粮食短缺，就以树皮野菜充饥……”前不久，该集团军组织开展“讲好荣誉战旗故事”活动，“最美新时代革命军人”、某旅营长张灿灿结合《习近平论强军兴军（四）》中关于弘扬优良传统的重要论述，讲述部队光荣战史，教育引导官兵擦亮忠诚底色、矢志奋斗强军. 大家纷纷表示，要沿着先辈们的足迹奋勇前进，以更高标准、更严要求完成好各项任务.

赓续优良传统，激发胜战之气. 该集团军领导告诉记者，他们大力弘扬理论联系实际的学风，立牢以实际成效检验学习成果的导向，不断激发官兵练兵备战热情. 连日来，该集团军官兵持续展开重难点课目专攻精练，多项战法训法创新成果得到检验.

The 76th Group Army Combines In-Depth Political Rectification with Studying and Implementing Xi Jinping's Thought on Strengthening the Military

Source: PLA Daily

Author: Zhang Leifeng, Zhang Shishui

Editor: Sun Yue

2025-12-12

The 76th Group Army Combines In-Depth Political Rectification with Studying and Implementing Xi Jinping's Thought on Strengthening the Military—

Continuing Fine Traditions and Inspiring the Spirit of Victory

■PLA Daily Reporter Zhang Leifeng, Special Correspondent Zhang Shishui

"As successors of the Red Army in the new era, we must continue fine traditions, study, plan, and implement warfare, and strive to hone our skills to fight and win battles." In winter, a member of the Standing Committee of the Party Committee of the 76th Group Army visited a high-altitude training site. Combining his study of "Xi Jinping on Strengthening the Military (IV)," he shared his insights with the officers and men of the "Model Company for Supporting the Government and Cherishing the People," guiding them to deeply understand the military perspectives and methodologies contained in Xi Jinping's thought on strengthening the military.

"Political steadfastness stems from theoretical clarity. We must persist in arming our minds with Xi Jinping's thought on strengthening the military, continuously solidify the foundation of our faith and beliefs, and boost our morale for hard work and overcoming challenges." A leader of the group army told reporters that after the distribution of *Xi Jinping on Strengthening the Military (IV)* to the troops, the group army's Party Committee, in conjunction with intensifying political rectification, diligently read the original text, studied the original words, and grasped the underlying principles. They comprehensively studied and understood the significant meaning, scientific connotation, essence, and practical requirements of Xi Jinping's thought on strengthening the military, further strengthening political forging and ideological transformation, and guiding officers and men to firmly uphold their belief in strengthening the military and dedicate themselves to its practice.

In practice, the group army has helped its officers and men deepen their understanding and comprehension through a system of "leaders giving large lectures, grassroots soldiers giving small

lectures, and officers and men giving micro-lectures." It has fully leveraged the unit's red resources, integrating the education of glorious war history into theoretical learning, guiding officers and men to carry on fine traditions and strive to become successors of the red spirit by appreciating the spiritual strength of their predecessors. It has adhered to the integration of learning, thinking, and application, and the unity of knowledge, belief, and action, guiding officers and men to integrate themselves, their responsibilities, and their work into their own lives, further strengthening their sense of mission and responsibility, and effectively transforming their learning and understanding into enthusiasm and motivation for undertaking their duties.

"Back then, our predecessors persisted in guerrilla warfare in the Hubei-Henan-Anhui region. When guns and ammunition were insufficient, they fought the enemy with broadswords and spears; when food was scarce, they ate tree bark and wild vegetables to stave off hunger..." Not long ago, the army group organized an activity to "tell the story of the honorary battle flag." Zhang Cancan, a battalion commander of a certain brigade and "the most beautiful revolutionary soldier of the new era," combined the important expositions on carrying forward fine traditions in "Xi Jinping on Strengthening the Army (IV)" to tell the glorious war history of the unit, educating and guiding officers and men to polish their loyalty and strive to strengthen the army. Everyone expressed their determination to follow in the footsteps of their predecessors and forge ahead, completing all tasks with higher standards and stricter requirements.

Continuing the fine traditions and inspiring a spirit of victory. The army group's leadership told reporters that they vigorously promote a learning style that integrates theory with practice, firmly establishing the orientation of testing learning outcomes with practical results, and continuously stimulating the enthusiasm of officers and men for training and combat readiness. In recent days, officers and men of the army group have continued to conduct intensive training on key and difficult subjects, and many innovative combat tactics and training methods have been tested.

中新"合作-2025"陆军联合训练展开混编联训

来源：新华社 作者：王涵 罗可 责任编辑：王韵 2025-12-12

新华社新加坡 12 月 12 日电（王涵 罗可）近日，参加中新"合作-2025"陆军联合训练的双方队员展开混编联训，围绕联合城市反恐行动中最经典的室内近距离战斗课目开展经验交流、技能训练，在联训中进一步增进互信和友谊.

室内近距离战斗战术也称"CQB 战术"，是一种专为建筑物、小巷等狭小作战空间设计的战斗技巧，强调隐蔽突然、协作默契、快速精准，突出短时作战，与传统野战模式差异显著.

训练过程中，双方以战术小队的形式，对移动技巧、多维搜索、房屋突入、救护等内容进行交流探讨和强化训练，深入研究实践如何利用角度搜索，在减少自身暴露的情况下进行

快速射击. 中方参训队员窦水超说：“如果不能熟悉室内空间不同角度和方向可能存在的威胁，不懂得相互掩护，不知道警戒位置和方法，就很难把握突入时机，实现最终的作战意图. ”

“准备！”训练现场，随着小队长简短的口令和手势指挥，队员迅速突入房屋，交替搜索前进、隐蔽接近目标区域，占据有利位置后，猛然对目标实施模拟打击. 其间，参训官兵结合武器装备性能和任务实际，围绕联训中发现的不足进行复盘讨论、训练检验，逐步优化力量分布和行动指挥，使训练效果得到了提升.

从装备使用技巧到战术动作要领，每个内容战术小队都要反复磨合，一步一个脚印合练. 队员们纷纷表示，他们不仅掌握了实战技能，更培养了紧急时刻一个眼神就能会意并有效行动的默契感.

据了解，中新两军官兵通过技能训练充分熟悉双方人员装备、打牢战术配合基础后，将共同转入实弹射击、旅级推演和营级实兵演练阶段.

China-Singapore “Cooperation-2025” Joint Army Training Begins Mixed-Unit Training

Source: Xinhua News Agency

Author: Wang Han, Luo Ke

Editor: Wang Yun

2025-12-12

Singapore, December 12 (Xinhua) -- Recently, participants in the China-Singapore “Cooperation-2025” joint army training exercise conducted mixed-unit training, exchanging experiences and training skills on indoor close-quarters combat, a classic element of joint urban counter-terrorism operations. The training further enhanced mutual trust and friendship.

Indoor close-quarters combat tactics, also known as “CQB tactics,” are combat techniques specifically designed for confined combat spaces such as buildings and alleyways. They emphasize concealment, surprise, seamless cooperation, speed, and precision, highlighting short-duration operations, and differ significantly from traditional field combat models.

During the training, both sides, in tactical squads, exchanged and discussed and reinforced training on movement techniques, multi-dimensional search, building entry, and first aid, deeply exploring and practicing how to utilize angled searches to conduct rapid firing while minimizing self-exposure. Dou Shuichao, a Chinese participant in the training, said, “If you’re not familiar with the potential threats from different angles and directions within an indoor space, don’t know how to provide mutual cover, and are unaware of warning positions and methods, it’s difficult to seize the opportunity to penetrate and achieve the ultimate operational objective.”

“Ready!” At the training site, with the squad leader’s brief command and hand gestures, the team members quickly stormed into the building, alternately searching and advancing, covertly approaching the target area, and after occupying advantageous positions, suddenly launching a simulated attack on the target. During the training, the participating officers and men, combining the performance of weapons and equipment with the actual mission, reviewed and discussed the shortcomings discovered during the joint training, and conducted training tests, gradually optimizing force distribution and command, thus improving the training effectiveness.

From equipment usage skills to tactical maneuvers, each tactical element required repeated practice by the squad, step by step. The team members expressed that they not only mastered practical combat skills but also cultivated a tacit understanding where a single glance was enough to convey meaning and enable effective action in an emergency.

It is understood that after the officers and men of the Chinese and Singaporean armies have become fully familiar with each other’s personnel and equipment through skills training and have laid a solid foundation for tactical cooperation, they will jointly move into the stage of live-fire shooting, brigade-level simulations, and battalion-level live-fire exercises.

从老兵故事到战友心声：“礼赞老兵”栏目藏着最真的军旅情

来源：中国军网-解放军报 作者：刘含 陈梓彧 王轶 责任编辑：孙悦

2025-12-15

第八十二集团军某旅利用军营广播开设“礼赞老兵”栏目——

战友，有许多心里话想对你说

■刘 含 陈梓彧 解放军报特约通讯员 王 轶

深冬时节，白杨叶落. 退伍季过后，第 82 集团军某旅的营区内，口号声与装备轰鸣声依旧，只是在一些班排，几张收拾得格外整洁的空床铺和已被轻轻撕去标签的储物柜，无声地诉说着离别.

这几天，笔者与几名年轻战士闲聊，话题不时提及旅里军营广播播出的“礼赞老兵”特别栏目. 那些故事，像营房旁的老树根，在官兵心中越扎越深.

这是一个什么样的栏目，能让官兵们念念不忘？

时间拨回到一个月前，旅宣传科考虑到今冬退伍士兵中有不少人是兵龄较长的带兵人和骨干. 于是，他们便计划退伍季期间，在军营广播开设“老兵故事”专栏，宣扬他们的先进事迹.

征稿活动启动后，各营上报的老兵材料事迹突出、数据详实，符合典型宣传的要求. 然而，广播站负责人、宣传科张干事在某营上报的材料中，发现了一份特殊附件——某连军士唐丰写给班长、一级上士乔成成的一封信. 通篇没有褒奖与功绩，只有朴素的真情：

“班长，你总说带兵要‘眼里有活’. 我以前不懂，现在慢慢明白了. ”信中唐丰回忆了新兵训练受伤时，班长为他仔细包扎；想起了班长带着大家训练，年年考核全优，教会他们的不仅是军事技能，更是责任与不放弃的韧劲……“这些小事，班长你大概早忘了. 可对我来说，这就是军营的样子. ”

这封信让大家既感意外又受触动. 整理发现，各营连上报的材料中，也有不少类似的纸条信件：有同年兵之间的深情祝福，有年轻骨干对引路班长的真挚感谢. 纸张不一，字迹各异，情感却同样炽热.

“本来只是想通过播发老兵事迹，褒扬典型、树立标杆. ”张干事坦言，“但基层传递给我们的，是兵与兵之间的情感联结和深厚情谊，或许，这才是他们最想听到和表达的内容. ”

分析这一现象，该旅领导感到，官兵彼此朝夕相处、甘苦与共，对于老兵的引领与关照，很多年轻战士点滴在心，面对面时却难以付诸言语. 如何给这些深沉的情感提供表达平台，成了机关考虑的关键.

于是，宣传科决定对栏目进行调整，从“老兵故事”改为“礼赞老兵”，并明确新的播发原则：事迹报道需精炼，同时开辟专门时段，原文播发这些来自基层战友想对彼此说的心里话，不求雕饰，唯重真诚.

征稿通知下达，一批带着温度的稿件很快汇聚而来.

某连战士米旭东对班长李建勇说：“建勇班长是我敬重的老大哥. 生活中无论谁遇到困难，他总是第一时间伸出援手，耐心开导. 我相信，班长到了地方，也一定能干出一番事业！”

而老兵们发出的声音，则更加深沉内敛. 一份未署名的稿件来自勤务营，作者没提立功受奖，只平实地讲述了维护装备十几年的点点滴滴：“它们就像我的老伙计，脾气早已被我摸得门儿清. 最后一次车炮场日，我把所有关键部位检查了一遍，螺丝也都紧了一遍，还跟接手的战友反复交代，不是不放心，只是舍不得……”

某侦察连一位老兵的投稿，是写给自己班的战士的：“铁打的营盘流水的兵，带兵这么多年，总觉得自己足够坚强了. 可轮到自己收拾行李，想起和战友一起钻丛林、赴戈壁的日子，鼻子还是禁不住发酸. 以前总觉得是你们离不开我，现在才知道，是我离不开你们……”对部队和战友的留恋，通过广播传递，让听到的每个人对军旅人生有了更深的理解.

没有华丽的辞藻，朴素的话语像冬日暖阳，照进每个人心里. 栏目播出期间，不少官兵会不自觉静下来倾听，常有人因一段故事而会心一笑或眼眶湿润. 有战士说：“听着广播，好像一下子读懂了身边的老兵. ”也有连队干部反馈，官兵之间的交流更主动了，年轻军士开始更自觉地请教业务、承担责任.

“‘礼赞老兵’栏目受到欢迎，给我们开展工作提供了宝贵经验. ”张干事说，“政治工作要真正走进官兵心中，就必须主动贴近官兵最真实的情感脉动，尊重并珍视每一份朴素的心声. 当我们提供的平台能够承载并升华这些日常积淀的情谊时，激发出的认同感、归属感和使命感就构成了坚实的思想根基. 这就是在感人心中悄然强固信念. ”

如今，“礼赞老兵”栏目的一些精品节目被机关精心刻录成光盘，作为特殊礼物送给每一名退伍老兵. 许多连队将广播稿打印出来，供官兵阅读品味.

驼铃声落不久，新兵又将入营. 相信他们会从那些广播稿、从班长讲述的故事里，触摸到这支队伍的情感温度，理解“老兵”二字的分量，在岗位上绽放出属于自己的光彩.

From Veteran Stories to Comrades' Heartfelt Words: The "Salute to Veterans" Column Reveals the Truest Military Sentiments

Source: China Military Network - PLA Daily

Author: Liu Han, Chen Ziyu, Wang Yi

Editor: Sun Yue

2025-12-15

A brigade of the 82nd Group Army launched the "Salute to Veterans" column via military broadcast system—Comrades, there are many things we want to say to you

■ Liu Han, Chen Ziyu, Special Correspondent for PLA Daily, Wang Yi

In the depths of winter, poplar leaves fall. After the demobilization season, the sounds of slogans and equipment still echo in the barracks of a brigade of the 82nd Group Army. Only in some platoons and squads, a few neatly arranged empty beds and storage lockers with labels gently removed silently tell of farewell.

These past few days, I chatted with several young soldiers, and the topic frequently came up with the "Salute to Veterans" special column broadcast on the brigade's military broadcast system. Those stories, like the old tree roots beside the barracks, have taken deeper and deeper root in the hearts of the officers and men.

What kind of column is this that the officers and men remember so fondly?

Rewinding to a month ago, the brigade's propaganda department considered that many of the soldiers retiring this winter were long-serving leaders and key personnel. Therefore, they planned to launch a "Veteran Stories" column on the barracks radio during the demobilization season to publicize their exemplary deeds.

After the call for submissions was launched, the materials submitted by each battalion featured outstanding deeds and detailed data, meeting the requirements for exemplary publicity. However, Zhang, the propaganda officer in charge of the broadcasting station, discovered a special attachment in the materials submitted by one battalion—a letter from Sergeant Tang Feng of a certain company to his squad leader, First-Class Sergeant Qiao Chengcheng. The letter contained no praise or praise, only simple, heartfelt emotions:

"Squad Leader, you always said that leading soldiers requires 'being observant.' I didn't understand before, but now I'm slowly coming to understand." In the letter, Tang Feng recalled how his squad leader carefully bandaged his wound during basic training; he remembered how his squad leader led everyone in training, achieving top marks in assessments year after year, teaching them not only military skills but also responsibility and unwavering perseverance… "These little

things, Squad Leader, you've probably long forgotten. But for me, this is what military life is all about."

This letter surprised and moved everyone. Upon reviewing the materials submitted by various battalions and companies, it was discovered that many similar notes and letters were also found: heartfelt blessings between comrades, and sincere gratitude from young leaders to their mentor squad leaders. The paper varied, the handwriting differed, but the emotions were equally fervent.

"Originally, we just wanted to commend role models and set examples by broadcasting the stories of veterans," Officer Zhang frankly admitted. "But what the grassroots conveyed to us was the emotional connection and deep friendship between soldiers. Perhaps this is what they most wanted to hear and express."

Analyzing this phenomenon, the brigade leadership felt that officers and men lived and worked together day and night, sharing joys and sorrows. Many young soldiers deeply appreciated the guidance and care of the veterans, but found it difficult to express it in person. How to provide a platform for these profound emotions to be expressed became a key consideration for the headquarters.

Therefore, the publicity department decided to adjust the program, changing it from "Veteran Stories" to "Celebrating Veterans," and clarifying new broadcasting principles: the reports of deeds should be concise, and a dedicated time slot should be allocated to broadcast the heartfelt words these comrades from the grassroots wanted to say to each other, without embellishment, emphasizing sincerity.

After the call for submissions was issued, a batch of heartfelt articles quickly gathered.

Soldier Mi Xudong said to his squad leader Li Jianyong, "Squad Leader Jianyong is a respected elder brother to me. Whenever anyone encounters difficulties in life, he's always the first to lend a helping hand and patiently offer guidance. I believe that when you get to your post, you'll definitely achieve great things!"

The veterans' voices, however, were even deeper and more reserved. An unsigned manuscript from the service battalion, where the author made no mention of merits or awards, simply recounting over a decade of maintaining equipment: "They're like my old buddies, I know their temperaments inside and out. On the last day at the vehicle and artillery range, I checked all the critical parts, tightened all the screws, and repeatedly explained everything to the comrade taking over. It wasn't that I didn't trust them, it's just that I couldn't bear to part with them..." A veteran from a reconnaissance company submitted a piece to his platoon: "The barracks remain, but the soldiers come and go. After leading troops for so many years, I always thought I was strong enough. But when it's my turn to pack my bags, thinking of the days I spent with my comrades traversing jungles and Gobi Deserts, my nose still can't help but tingle. I used to think it was you who couldn't live without me, but now I realize it's me who can't live without you..." This deep affection for the

unit and comrades, conveyed through the broadcast, gave everyone who heard it a deeper understanding of military life.

Without flowery language, these simple words, like the warm winter sun, shone into everyone's hearts. During the program's broadcast, many officers and men would unconsciously quiet down to listen, often smiling knowingly or their eyes welling up with tears at a single story. One soldier said, "Listening to the broadcast, it's like suddenly understanding the veterans around me." Company officers also reported that communication among officers and men had become more proactive, with younger soldiers more willing to seek advice and take on responsibilities.

"The popularity of the 'Salute to Veterans' program has provided us with valuable experience in our work," said Officer Zhang. "For political work to truly resonate with officers and men, it must proactively connect with their most genuine emotional pulse, respecting and cherishing every simple voice. When the platform we provide can carry and elevate these accumulated sentiments, the resulting sense of identity, belonging, and mission forms a solid ideological foundation. This is how we quietly strengthen our beliefs through touching moments."

Now, some of the best episodes from the "Salute to Veterans" program have been carefully recorded onto CDs by the headquarters and given as special gifts to every retiring veteran. Many companies have printed out the broadcast scripts for officers and men to read and appreciate.

The camel bells have barely faded when new recruits will arrive. I believe that they will feel the emotional warmth of this team from those broadcast scripts and the stories told by the squad leader, understand the weight of the word "veteran", and shine in their own way in their posts.

第 82 集团军某旅着力提升政治工作对备战打仗的贡献率

来源：中国军网-解放军报 作者：刘小云 卢东方 责任编辑：郭妍菲

2025-12-15

第 82 集团军某旅着力提升政治工作对备战打仗的贡献率——

"生命线"加速向战场延伸

■刘小云 解放军报记者 卢东方

中原腹地，密林深处，第 82 集团军某旅一场装备试验以红蓝对抗形式进行. 某营官兵分成两路，展开对抗，测试装备性能，检验战法训法.

作为蓝方，郭教导员指挥官兵灵活应变，倒逼红方使出浑身解数. 硝烟散尽，机关参谋和院校专家分析一组组数据，给予蓝方高度评价："红方攻得狠，蓝方守得好，都充分发挥出了装备性能. "

这不是郭教导员第一次担任演训指挥员. 多年的任职经历让他感到，政治干部只有争当“两个行家里手”，才能树立威信、让人信服.

深化政治整训中，该旅党委也充分认识到了这一点. 近年来，他们紧紧围绕能打仗、打胜仗这个中心任务，着力提升政治干部能力素质、发挥政治工作服务保证作用，筹划开展政治工作，取得了一批创新成果，同时暴露出一些问题和不足. 作为见证者，郭教导员向记者讲述了此前的经历.

一次，该旅组织实兵对抗训练，某连上任不久的指导员根据自己拟定的政治工作预案进行战场鼓动，但因与战斗时机扣得不紧、空话套话较多，不仅没有激发官兵士气，反而让大家产生了抵触心理.

“做好作战中政治工作，政治干部首先要懂军事训练，具备战场指挥能力. ”复盘总结时，该旅领导一针见血指出问题所在，“军队因战而生，军队政治工作也必然因战生威. 政治干部如果对打仗知之不深，一味念稿子、背台词、走流程，就扛不起指挥员的职责，严重损害政治工作的威信威力. ”

在随后进行的讨论中，有的官兵反映，个别政治干部平时这里站站、那里看看，讲道理头头是道，却对战场情况若明若暗、思考不够，一遇到实操考核、演训任务等，就习惯性退居“二线”、甘当“配角”；有的官兵坦言，一些作战政治工作方案，内容很丰富、手段很先进，但与实战贴得不紧；有的干部骨干甚至直接说出了自己的困扰：开展思想政治教育，有时与训练抢资源、抢时间、抢人头，却苦无解决之法……

“必须把政治工作从自我设计、自我循环、自我检验的怪圈中摆脱出来，提升政治工作对备战打仗的贡献率. ”结合深化政治整训，该旅举一反三，把问题整改作为整训重点，一方面梳理形成政治工作问题清单，组织政治干部对照检视反思，树立政治干部好样子，一方面组织课题攻关，探索政治工作服务保证战斗力建设的作用机理.

整改效果如何？

采访中，记者翻阅该旅多份文件，里面既有政治工作拥抱新时代、适应新体制、担当新使命的总体部署，也有政治工作嵌入重大演训活动服务备战打仗的实施意见，目标任务明确、计划步骤清晰. 这背后，是该旅推出的一系列举措.

“未来仗怎么打，政治工作就怎么做. ”他们利用实兵对抗、指挥所演练等时机，把政治工作与军事行动一体筹划部署、一体组织实施、一体总结评估，紧跟军事行动进程，研练开展政治工作的内容、形式和方法；通过“跨界”学习，登门请教和结对帮带等方式，组织政治干部与军事干部一起研讨战例、分析态势、处置特情；安排政治干部到作战分队、战斗岗位跟学跟训，学习掌握新装备操作技能……

如何发挥党组织战斗功能作用？如何因势利导开展作战动员？如何嵌入式开展思想政治教育同时不干扰演训？在此过程中，该旅政治干部们坚持用战斗力标准的尺子量长短，着眼推动“生命线”加速向战场延伸，探寻一个个问题的“更优解”.

“插不上手、说不上话、使不上劲”，曾经是该旅一些政治干部在练兵备战中经常遭遇的尴尬. 经过整训整改，这种现象得到明显改观.

有一次，该旅组织战术训练. 战斗攻坚阶段，某连连长被判“负伤”，要求指导员接替指挥. 快速研判战场态势后，该连指导员发现了对手软肋，立即调整兵力部署，带领官兵最终扭转了不利局面.

危急关头的出色表现，得益于平时的精武强能. 记者了解到，这名指导员所在营党委大抓军事素质基础、典型行动分析和先进装备技能考核，将其作为衡量个人成长进步的重要指标. 受此激励，政治干部参训组训研训热情高涨，其中不少人在军事比武中摘金夺银.

“这名指导员，果然有两把‘刷子’！”透过望远镜看到这一幕，一名旅领导说道. 在他看来，政治干部敢于叫响“跟我上”并不够，还要努力做到“能打赢”.

心中装着责任，目光紧盯战场. 经过政治整训的洗礼，该旅政治干部展现出新的面貌、政治工作持续焕发新的活力.

前段时间，该旅组织战场救护、通信装备操作、战术动作等多课目比拼，政治干部踊跃参与、个个争先，多人登上“龙虎榜”. 紧接着，这些政治干部又受命带队参加上级组织的演训活动，他们一手抓军事工作、一手抓政治工作，以其在指挥岗位上的出色表现，立起了政治干部好样子.

An 82nd Group Army Brigade Focuses on Enhancing the Contribution of Political Work to Combat Readiness.

Source: China Military Network - PLA Daily

Author: Liu Xiaoyun, Lu Dongfang

Editor: Guo Yanfei

2025-12-15

A brigade of the 82nd Group Army focuses on enhancing the contribution of political work to combat readiness—

“Lifeline” accelerates its extension to the battlefield

■ Liu Xiaoyun, PLA Daily reporter Lu Dongfang

In the heart of the Central Plains, deep in the forest, a brigade of the 82nd Group Army conducted an equipment test in a red-blue confrontation format. Soldiers of a certain battalion were divided into two groups to conduct confrontations, testing equipment performance and verifying tactics and training methods.

As the blue force, Political Instructor Guo commanded his troops to adapt flexibly, forcing the red force to use all its strength. After the smoke cleared, staff officers and experts from military academies analyzed the data and gave the blue force high praise: “The red force attacked fiercely, and the blue force defended well; both fully utilized the equipment’s performance.”

This was not the first time Political Instructor Guo had served as a training commander. Years of experience have taught him that political cadres can only establish authority and gain the trust of others by becoming “experts in two areas” (political skills and political awareness).

During the in-depth political rectification campaign, the brigade’s Party Committee fully recognized this point. In recent years, they have focused on the central task of being able to fight and win battles, striving to improve the capabilities and qualities of political cadres, leveraging the service and guarantee role of political work, and planning and carrying out political work. They have achieved a number of innovative results, while also exposing some problems and shortcomings. As a witness, Political Instructor Guo recounted a previous experience to the reporter.

Once, during a live-fire combat training exercise organized by the brigade, a newly appointed political instructor of a certain company conducted battlefield mobilization based on his own draft political work plan. However, because it was not closely aligned with the timing of the battle and contained too much empty rhetoric, it not only failed to boost the morale of the officers and men but also created resistance among them.

“To effectively conduct political work in combat, political officers must first understand military training and possess battlefield command capabilities.” During the debriefing, the brigade leadership pointed out the core issue: “The army was born for war, and military political work must also gain strength through war. If political officers lack in-depth knowledge of combat and merely read from prepared scripts, memorize lines, and follow procedures, they cannot shoulder the responsibilities of a commander, severely damaging the credibility and effectiveness of political work.”

In the subsequent discussion, some officers and men reported that certain political officers, while seemingly adept at reasoning and argumentation, lacked a clear understanding of the battlefield situation and failed to think critically enough. When faced with practical assessments and training exercises, they habitually retreated to the “second line” and became mere “supporting actors.” Some officers and men frankly admitted that some... The operational political work plan was rich in content and advanced in methods, but it wasn’t closely aligned with actual combat. Some officers and key personnel even directly expressed their frustration: conducting ideological and

political education sometimes competed with training for resources, time, and manpower, yet they struggled to find a solution…

"We must break political work out of the vicious cycle of self-design, self-circulation, and self-examination, and increase its contribution to combat readiness." In conjunction with deepening political rectification, the brigade drew inferences from one instance to others, making problem rectification a key focus of the rectification. On the one hand, they compiled a list of political work problems, organized political cadres to examine and reflect on them, and established good examples for political cadres. On the other hand, they organized research projects to explore the mechanism by which political work serves and guarantees combat effectiveness.

What were the results of the rectification?

During the interview, the reporter reviewed several documents from the brigade, which included overall plans for political work to embrace the new era, adapt to the new system, and assume new missions, as well as implementation opinions on embedding political work into major exercises and training activities to serve combat readiness. The goals and tasks were clear, and the plans and steps were well-defined. Behind this is a series of measures launched by the brigade.

"How future battles are fought determines how political work is conducted." They utilized opportunities such as live-fire exercises and command post drills to plan, deploy, organize, and evaluate political work in conjunction with military operations. They closely followed the progress of military operations, refining the content, forms, and methods of conducting political work. Through "cross-sector" learning, visiting experts, and pairing up for mentorship, they organized political cadres to discuss battle cases, analyze situations, and handle contingencies with military cadres. They arranged for political cadres to learn and train alongside combat units and combat posts, mastering the operation skills of new equipment…

How to leverage the combat function of the Party organization? How to guide combat mobilization in a timely manner? How to embed ideological and political education without interfering with exercises and training? In this process, the brigade's political cadres adhered to the standards of combat effectiveness, focusing on accelerating the extension of the "lifeline" to the battlefield, and exploring "optimal solutions" to each problem.

"Unable to participate, unable to speak, and unable to exert influence" was a common predicament faced by some political cadres in the brigade during training and preparation for war. After rectification and reform, this situation has significantly improved.

On one occasion, the brigade organized tactical training. During the assault phase, a company commander was declared "wounded," and the political instructor was ordered to take over command. After quickly assessing the battlefield situation, the political instructor identified the enemy's weakness, immediately adjusted troop deployment, and led his troops to ultimately reverse the unfavorable situation.

This outstanding performance in a critical moment was attributed to their rigorous training and skill development. Reporters learned that the Party Committee of the battalion to which this political instructor belonged emphasized basic military skills, analysis of typical actions, and assessment of advanced equipment skills, using these as important indicators for measuring individual growth and progress. Inspired by this, political officers showed great enthusiasm for training and research, with many winning gold and silver medals in military competitions.

“This political instructor is truly skilled!” a brigade leader remarked, observing this scene through binoculars. In his view, it’s not enough for political officers to simply shout “Follow me!”; they must also strive to “win.”

With responsibility in their hearts and eyes fixed on the battlefield, the brigade’s political officers, after undergoing political rectification training, have shown a new look, and political work continues to radiate new vitality.

Some time ago, the brigade organized a competition in multiple subjects, including battlefield first aid, communication equipment operation, and tactical maneuvers. Political officers actively participated and competed fiercely, with many making it onto the “Top Performers” list. Following this, these political officers were tasked with leading teams to participate in training exercises organized by higher authorities. They simultaneously focused on military and political work, setting a good example for other political officers through their outstanding performance in command positions.

那个新教导员的笔记本里，记的是官兵的冷暖事

来源：中国军网-解放军报 作者：蒋圣硕 田哲 责任编辑：郭妍菲

2025-12-15

营里来了新教导员

■陆军某旅战士 蒋圣硕

插图：方 汉

听说机关宣传科长要来营里当教导员，连队不少官兵第一反应是：少数宣传口出身的干部嘴皮子溜，以后会不会要经常听教导员的“长篇大论”.

然而，第一次全营集合，教导员的话言简意赅：“我是咱们营的新教导员，有啥事欢迎大家随时找我聊.”

更出乎意料的是，接下来一段时间，除了平时谈心交心、下达任务时的必要口令，大家很少听到教导员讲“长篇大论”.

慢慢地，大家发现教导员有个雷打不动的习惯——每周必到一个连队参加班务会. 每次参会，他总拿着一个封皮被磨得发白的笔记本. 战士们一边发言，他一边埋头记. 大家都感到纳闷：教导员一直在记笔记，他到底在记啥？

答案很快揭晓. 教导员参加我们班班务会的第二天，机关保障部陈助理员来连队调研，调研的主题正是大家在班务会上反映的问题. 一周后，连队在障碍训练场组织训练，官兵们惊喜地发现，不仅有崭新的攀登绳、加固过的云梯，还有增加了防滑纹的攀登墙.

原来，那天班务会上，新兵小王发言时一直低着头，右手不自觉地缩在袖子里. 李班长发现了他的异常，关切地问：“小王，你的手怎么了？”小王支支吾吾地说：“没事，训练时不小心受了点伤……”

李班长性子比较急，闻言忍不住打断小王的话：“什么不小心？攀登墙的防滑纹都快磨平了，训练时一不留神就容易受伤.”

一直埋头记录的教导员突然抬起头，目光从小王的袖子移到李班长脸上：“具体哪个位置？磨损到什么程度？”简短的两句话，是他参加班务会以来为数不多的主动发言.

我们后来听说，那天班务会结束后，教导员和李班长去了障碍训练场. 他把训练器材仔细检查了一遍，一边看一边在笔记本上标注问题特征和细节.

连队西头宽敞明亮的新晾衣房、学习室里焕然一新的电脑键盘……战友们发现，教导员是个喜欢“多动手少动口”的干部，自打他到任以后，营里几个连队都有了不少新变化.

前不久的一天夜里，教导员查铺时，推门发出的“吱呀”声惊醒了靠门口睡的战士小刘. 他立即停下脚步，借着走廊的灯光查看那扇发出声响的门，发现门轴有些松动.

没过两天，排房里响起了“叮叮当当”的敲打声. 供应保障队陈班长带着人，挨个宿舍给门加装静音条、更换合页，还细心地将所有松动的床架加固了一遍.

又是一次班务会，教导员依然听得多、说得少，时不时埋头记笔记. 大家心里都清楚，教导员的笔记本里，记的是官兵的冷暖事.

（刘华山整理）

“说与做”的辩证法

■田 哲

刚来营队，不爱说话，参加班务会时听得多、说得少；时间久了，行动在先，人人点赞“多动手少动口”的作风. 官兵对新教导员印象的转变，蕴含着政治工作“说与做”的辩证法.

政治干部的主要职责是做思想政治工作. “说得好”，把道理讲正确讲透彻，只解决了对客观事物的认识问题. “做得好”，把正确的认识付诸行动，才能在改造客观事物的实践中取得实际成效，并检验和完善认识成果. 这位新教导员平时没有多讲为兵服务的大道理，笔记本里却记着官兵的冷暖事，积极用行动解决大家的急难愁盼，因此立起了威信、赢得了兵心，这刚好印证了那句老话：政治工作三分靠说、七分靠做.

政治工作是做人的工作，因人而始、为人而施. 其成效如何，在很大程度上取决于能否处理好“说”与“做”的关系. 脱离“做”的“说”，难免流于形式、失之空泛；缺乏“说”的引领和总结的“做”，则可能意图不清、方向不明、效果有限. 政治干部唯有以“说”讲清道理、明晰方向，以“做”现示范、见担当，才能让政治工作如盐在水，达到春风化雨、润物无声之效.

The New Political Director’s Notebook Was Filled with The Joys and Sorrows of the Soldiers.

Source: China Military Network - PLA Daily

Author: Jiang Shengshuo, Tian Zhe

Editor: Guo Yanfei

2025-12-15

A new political director arrived at the battalion

■ Soldier Jiang Shengshuo from a certain army brigade

Illustration: Fang Han

Upon hearing that the head of the propaganda office of the headquarters was coming to the battalion as political director, many soldiers in the company’s first reaction was: These are some officers from the propaganda department, known for their smooth talk; will we have to listen to the political director’s “long-winded speeches” all the time?

However, at the first battalion-wide assembly, the political director’s words were concise: “I am the new political director of our battalion. Feel free to come to me anytime if you have any questions.”

Even more unexpectedly, for the next period of time, apart from regular heart-to-heart talks and necessary commands when issuing tasks, everyone rarely heard the political director give long speeches.

Gradually, everyone discovered that the political director had an unwavering habit—attending a squad meeting at one company every week. Each time he attended, he always carried a notebook with a worn-out cover. As the soldiers spoke, he diligently took notes. Everyone was puzzled: the political director was constantly taking notes, but what was he actually writing down?

The answer was soon revealed. The day after the political director attended our platoon's meeting, Assistant Chen from the brigade's Support Department came to the company for a survey. The topic of the survey was precisely the issues raised at the platoon meeting. A week later, the company organized training at the obstacle course, and the soldiers were pleasantly surprised to find not only brand-new climbing ropes and reinforced ladders, but also climbing walls with added anti-slip textures.

It turned out that during the platoon meeting that day, new recruit Xiao Wang had kept his head down while speaking, his right hand unconsciously tucked into his sleeve. Squad Leader Li noticed his unusual behavior and asked with concern, "Xiao Wang, what happened to your hand?" Xiao Wang stammered, "It's nothing, I accidentally injured it during training..." Squad Leader Li, being rather impatient, couldn't help but interrupt, "What do you mean, 'accidentally'? The anti-slip texture on the climbing wall is almost worn smooth; it's easy to get injured during training if you're not careful." The instructor, who had been engrossed in taking notes, suddenly looked up, his gaze shifting from Xiao Wang's sleeve to Squad Leader Li's face: "Which spot exactly? How badly is it worn?" These two short sentences were one of the few times he had spoken voluntarily since joining the squad meeting.

We later heard that after the squad meeting that day, the instructor and Squad Leader Li went to the obstacle course. He carefully inspected the training equipment, marking problems and details in his notebook as he went.

The spacious and bright new drying room at the west end of the company, the brand-new computer keyboard in the study room… the comrades discovered that the instructor was an officer who preferred to "do more and talk less," and since his arrival, several companies in the battalion had seen many changes.

One night not long ago, the instructor woke up a soldier named Xiao Liu, who was sleeping near the door, when he pushed open the bunk door during his rounds. He immediately stopped and, using the corridor light, checked the door and found the hinges were loose.

Two days later, a series of knocking sounds echoed through the barracks. Squad Leader Chen from the supply support team led his men to each dormitory, installing soundproofing strips on the doors, replacing hinges, and carefully reinforcing all the loose bed frames.

At another squad meeting, the instructor, as always, listened more and spoke less, frequently taking notes. Everyone knew that the instructor's notebook contained records of the soldiers' joys and sorrows.

(Compiled by Liu Huashan)

The Dialectic of "Speaking and Doing"

■ Tian Zhe When he first arrived at the camp, he was quiet and listened more than he spoke at squad meetings; over time, he took action first, earning praise from everyone for his "more hands, less words" approach. The change in the soldiers' impression of the new political director embodies the dialectic of "saying and doing" in political work.

The primary responsibility of political cadres is to conduct ideological and political work. "Speaking well," explaining principles correctly and thoroughly, only addresses the issue of understanding objective things. "Doing well," putting correct understanding into action, is what achieves practical results in transforming objective things and tests and refines the results of understanding. This new political director didn't often preach grand principles of serving the soldiers, but his notebook recorded the soldiers' needs and concerns, actively addressing their urgent needs and anxieties. Therefore, he established authority and won the soldiers' hearts, perfectly illustrating the old saying: political work is 30% talk and 70% action.

Political work is about working with people; it begins with people and is implemented for people. Its effectiveness largely depends on whether the relationship between "saying" and "doing" is handled well. "Speaking" without "doing" inevitably becomes formalistic and empty; "doing" without the guidance and summary of "speaking" may have unclear intentions, ambiguous direction, and limited effects. Only by speaking clearly about principles and directions, and by setting an example and demonstrating responsibility, can political cadres ensure that political work is like salt in water, achieving a subtle and pervasive effect.

韶华留在高原 记忆留给雪山

■李金朝 解放军报特约记者 刘晓东

退伍老兵合影留念. 刘晓东 摄

当阿里高原的雪打在脸上时，新疆军区某团一级上士王世强，总会想起 19 岁那年的冬天. 那是王世强戍守高原的第一年，强烈高原反应让他彻夜难眠. 躺在床上，听着窗外呼啸的风声，他问自己：“我能坚持下来吗？”

16 年后，答案写在王世强黝黑的脸庞和布满老茧的手上. 就在十几天前，这位一级上士脱下了军装，向雪山告别.

铁门被推开，发电机房的轰鸣声响彻耳畔. 那天，王世强蹲在一台设备旁，正在抓紧时间向下士韩仲林传授自己的检修经验. “接口要磨亮，密封胶得捂热. 高原的低温不饶人，一点都马虎不得. ”他的声音沙哑，每个字都被“铆”进轰鸣声中.

敞开的工具箱中，有一把缠着胶带的旧钳子，钳口有个醒目的缺口.

“这把钳子跟着我 10 多年了. ”王世强拿起钳子，眼中满是珍惜. “班长，这缺口怎么来的？”韩仲林问. 王世强停下动作，摩挲着钳身，眼神像望见了很远的地方.

那年大雪封山，发电机半夜趴窝. 零件短缺，王世强和战友仅凭几把工具“硬修”. 他用这把钳子拧开冻住的接头、剥电线皮，手指冻得没知觉，全凭感觉拧. 翌日凌晨，机器重新轰鸣，他和战友累得瘫坐在地上，相视而笑.

钳口的缺口，就是那时留下的.

放下钳子，王世强掏出一本笔记本，递给韩仲林：“设备有啥脾气，故障怎么排，都写在这里了. ”韩仲林郑重接过这个笔记本.

王世强拍了拍韩仲林的肩，看向轰鸣的机组：“我走了. 你们要静下心来守好它们. ”

第二天清晨，巡逻队伍顶风出发. 风雪刮得人睁不开眼，王世强走在前面，跋涉雪海. 这条往返几十公里的路，他走了 16 年.

在一片碎石滩，王世强停下，拂开积雪，露出一块褐色石头. “这是‘路标石’，以后走到这儿，要格外小心. ”他向战友们示范如何踩稳石块通过，来来回回示范了好几遍.

来到中途的观察点板房，推门迎来阵阵暖意. 王世强摸了摸取暖设备，仔细查看接口，提醒战友随时检修. “过去这里是‘漏风房’，战士歇脚，连口热水都没有. ”后来，王世强和战友们一镐镐刨开冻土，扛来材料，建起这个“温暖驿站”.

下午，巡逻队抵达界碑，“中国”二字在阳光下分外耀眼. 王世强站在界碑前，缓缓举手敬礼，16 年的风雪在那一刻凝成他眼中炽热的光.

告别的日子到了，王世强天不亮就起床，默默清扫营区的积雪. 他钻进大棚，为绿油油的白菜、挂果的西红柿再浇一次水.

欢送会在食堂举行，战友们默默围着王世强，红了眼圈. 宣读命令，念到“王世强”时，他迈步出列，庄严敬礼，缓缓卸下肩章、领花.

紧接着，王世强转身，面向战友，面向雪山，面向飘扬的五星红旗，举起右手，敬上最后一个军礼. 风雪落向他卸掉军衔的肩膀，眼泪滑落面颊.

那把有缺口的钳子，留在了工具箱；那块“路标石”，守在巡逻路旁；一棚“扎根菜”，在大棚中拔节生长……老兵把 16 年韶华留在高原，记忆留给雪山.

Veteran Leaves 16 Years of His Youth on the Plateau, Memories Remain on the Snow-capped Mountains

Youth Left on the Plateau, Memories Remain on the Snow-capped Mountains

■ Li Jinchao, Special Correspondent for PLA Daily Liu Xiaodong Veterans pose for a group photo. Photo by Liu Xiaodong

When the snow of the Ali Plateau hits his face, Wang Shiqiang, a first-class sergeant in a regiment of the Xinjiang Military Command, always thinks of the winter when he was 19. That was Wang Shiqiang’s first year guarding the plateau, and severe altitude sickness kept him awake all night. Lying in bed, listening to the howling wind outside the window, he asked himself, “Can I persevere?”

16 years later, the answer is written on Wang Shiqiang’s dark face and calloused hands. Just over ten days ago, this first-class sergeant took off his uniform and bid farewell to the snow-capped mountains.

The iron gate was pushed open, and the roar of the generator room echoed in his ears. That day, Wang Shiqiang squatted beside a piece of equipment, diligently passing on his maintenance experience to Corporal Han Zhonglin. “The joints need to be polished smooth, the sealant needs to be warmed up. The low temperatures at high altitudes are unforgiving; you can’t be careless at all.” His voice was hoarse, each word riveted into the roar of the machine.

In the open toolbox lay an old pair of pliers wrapped in tape, with a conspicuous notch in the jaws.

“These pliers have been with me for over ten years,” Wang Shiqiang said, picking them up with eyes full of appreciation. “Squad leader, how did you get this notch?” Han Zhonglin asked. Wang Shiqiang stopped, stroking the pliers, his gaze seeming to look into the distance.

That year, heavy snow blocked the mountain passes, and the generator broke down in the middle of the night. With spare parts scarce, Wang Shiqiang and his comrades “repaired” the equipment with only a few tools. He used these pliers to unscrew frozen joints and strip wire insulation, his fingers numb with cold, relying entirely on feel. The next morning, the machines roared to life again. Exhausted, he and his comrades collapsed to the ground, exchanging smiles.

The notch in the jaws was a remnant of that encounter.

Setting down the pliers, Wang Shiqiang pulled out a notebook and handed it to Han Zhonglin: “Whatever the equipment’s quirks are, how to troubleshoot them, it’s all written here.” Han Zhonglin solemnly accepted the notebook.

Wang Shiqiang patted Han Zhonglin on the shoulder, looking at the roaring machinery: “I’m leaving. You all need to stay focused and protect them.”

The following morning, the patrol team set off against the wind. The wind and snow were so intense they could barely open their eyes. Wang Shiqiang walked ahead, trudging through the snow. He had walked this round trip of dozens of kilometers for 16 years.

At a gravel beach, Wang Shiqiang stopped, brushed away the snow, revealing a brown stone. “This is a ‘marker stone.’ Be extra careful when you come here in the future.” He demonstrated to his comrades how to step firmly on the stone, showing them several times.

Arriving at the observation post’s prefabricated houses midway through the journey, Wang Shiqiang was greeted by a wave of warmth as he pushed open the door. He touched the heating equipment, carefully inspected the connections, and reminded his comrades to check it regularly. “This used to be a drafty place; soldiers couldn’t even get a hot drink when they rested here,” he explained. Later, Wang Shiqiang and his comrades painstakingly dug through the frozen ground, carrying materials to build this “warm rest stop.”

In the afternoon, the patrol reached the boundary marker. The words “China” shone brightly in the sunlight. Wang Shiqiang stood before the marker, slowly raising his hand in salute. Sixteen years of wind and snow seemed to solidify into a burning light in his eyes at that moment.

The day of farewell arrived. Wang Shiqiang rose before dawn, silently clearing the snow from the camp. He went into the greenhouse to water the lush green cabbages and the tomatoes one last time.

A farewell ceremony was held in the mess hall. His comrades silently surrounded Wang Shiqiang, their eyes reddening. When the order was read, and his name was called “Wang Shiqiang,” he stepped forward, solemnly saluted, and slowly removed his epaulets and collar insignia. Immediately afterward, Wang Shiqiang turned to face his comrades, the snow-capped mountains, and the fluttering five-starred red flag, raising his right hand in a final salute. Snowflakes fell on his shoulders, now bare of his rank insignia, and tears streamed down his face.

The chipped pair of pliers remained in the toolbox; the “road marker” stood guard by the patrol route; a greenhouse of “rooted vegetables” thrived… The veteran left 16 years of his youth on the plateau, his memories etched in the snow-capped mountains.

第 71 集团军某旅某营依法依规走实年度表彰奖励每一步

来源：解放军报 作者：王润鑫 杜天耀 宋世杰 李永涛 责任编辑：孙悦 2025-12-16

年终岁尾，第 71 集团军某旅某营依法依规走实年度表彰奖励每一步——

军功章里“战味”浓

■王润鑫 杜天耀 解放军报特约记者 宋世杰

初冬的苏北大地，寒风凛冽. 第 71 集团军某旅某营会议室内，气氛格外热烈. 墙上，一张《年度表彰奖励工作流程图》写明了从基层推荐到党委审定的各个步骤；桌面上，官兵日常表现记录整齐摆放，每一页都翔实记录着训练成绩、任务表现、作风纪律、群众评议等情况，这些都是官兵奋力拼搏留下的足迹.

“年度表彰奖励是对官兵一年来辛勤付出与取得成绩的褒奖与肯定，事关每一个人的切身利益，绝不能年底‘拍脑袋’，而是要全年‘看实绩’. ”该营陈教导员一边翻阅材料，一边对记者说，他们以《军队功勋荣誉表彰条例》和“双争”活动实施细则等法规为依据，鲜明立起创先争优、向战为战风向标，真正让荣誉回归战斗力本位.

落实法规不走样、顺应兵心不脱节，法治精神才能一步步落实为看得见、摸得着、信得过的实践路径.

某连“四有”优秀士兵分享收获的喜悦. 余 杰摄

第一步

标准怎么定 法规说了算

今年年度表彰奖励工作刚启动，围绕“是不是该给他一个‘四有’”的讨论就引起营党委的注意.

这个“他”，是一名已服役多年的老兵. 这名老兵年底即将退役，有人觉得他人缘好、资历老，“应该给他评一个‘四有’优秀士兵，让他体面离队”，但也有人说，老兵今年因为身体原因从未参与任何大项任务，训练成绩也处于中下游，“评上了大家也不会服气”.

“过去每到评功评奖时都能听到‘新兵让老兵’‘排排坐、吃果果’的声音，看似讲风格、顾情面，实则背离了法规初衷. ”陈教导员翻开相关法规，语气坚定地说：“今年,营党委开始表彰奖励工作的第一件事，就是组织全体官兵原原本本学法规、明底线、立规矩. ”

相关法规开宗明义强调，实施奖励必须坚持服务中心、聚焦备战打仗，注重实际贡献，做到实事求是、客观公正，“坚决防止和克服平均主义、迁就照顾、论资排辈等错误做法”的要求更是直指积弊. 这些不是软性倡导，而是刚性约束；不是可商量的“建议”，而是必须执行的“铁律”.

尤其有一条硬杠杠，让全营官兵印象深刻：年度表彰奖励指标70%以上用于参与中心工作和执行重大任务的官兵. 这条规定，立起了向战打赢的硬标准，这意味着，若没在演训一线、任务前沿留下实绩，就难以跻身表彰奖励名单.

标准怎么定？法规说了算. 营党委态度鲜明：制度设计的初衷，从来不是为了照顾平衡，而是为了激励打赢，“给退役老兵一次机会”“按连队人数比例分配名额”等想法被叫停.

前不久的一次军人大会上，那名老兵也主动表态：“荣誉要给那些真正在战位上拼搏的人. ”

“并不是哪个单位人数多，表彰奖励名额就多. ”陈教导员介绍，营党委还根据各连队年度任务强度、完成质效等情况，对表彰奖励名额进行了科学调配. 榴炮一连全年参加 3 次跨区演训，指挥保障连连续 6 个月在外执行高强度保障任务，这两个连队都因成绩过硬而在评功评奖中得到倾斜. 连队官兵得知此消息，干劲也更足.

“荣誉不是‘分’出来的，而是‘干’出来的”，这成为营队上下的共识.

第二步

推荐凭实绩 全程公开化

这天，榴炮二连公示栏前，一份表彰奖励推荐人选公示名单引来战士们围观——某班战士小李在红蓝对抗中成功伪装阵地，躲过“敌”无人机侦察，被推荐为嘉奖人选；炮一班班长带领班组在夜间演练中零失误完成火力打击任务，被推荐为“四有”优秀士兵人选……每个被推荐人选都附有详细的公示材料，这些介绍内容均来自训练记录和任务日志，确保被推荐人员的各项成绩有据可依、真实可查.

“小李还在外面集训呢，没想到这次的‘四有’优秀士兵推荐人选中也有他！”几名战士看见战友榜上有名，很是高兴.

记者与他们交谈了解到，过去评功评奖时，曾有少数在外人员因暂时不在单位而失去评功评奖机会. 除个别官兵存在“不在单位就不算为单位做贡献”的错误认识外，机制不够完善也是重要因素.

“官兵对在外执行任务人员的具体表现不了解，会直接影响对他们的评价，有时即使被推荐，也可能会遭受质疑. ”该连张指导员介绍，今年，营队将在外执行任务人员表现情况纳入统一管理，建立专项档案，对其日常表现、阶段评定、任务完成质效等进行动态记录.

他指着小李的公示材料告诉记者，他们与小李集训所在单位保持联系，了解到他在担任助教、协助组训等方面表现优异，且考核成绩排名靠前. 得到集训单位提供的证明材料后，连队梳理汇总并在公示栏公示.

上等兵小王被列入嘉奖公示名单，同样引起了在场官兵的讨论. 原来，小王去年多项考核成绩不及格，曾被列为重点帮带对象. 今年以来，他凭着不服输的劲头认真训练，不仅成绩全部达标，还在旅战术基础课目比武中夺得第三名. 张指导员告诉大家，法规明确个人进步幅度明显应优先考虑表彰，“进步就是实绩，法规支持就该奖”.

阳光之下，自有公信. 今年，该营首先召开民主评议，再由党支部结合全年履职情况提出初步人选并全连公示，同步公布营纪委监督电话. 当推荐过程看得见、说得清、经得起问，官兵的心气就顺了，争先的劲头更足了.

第三步

审核须严格 规矩要守牢

“旅里下发的表彰奖励工作计划划出了红线、明确了标尺，我们的任务就是一条条对、一项项核，确保每一份荣誉都经得起检验. ”

该营陈教导员介绍，各连党支部上报的推荐名单，并不意味着“板上钉钉”. 营党委敢较真、能兜底、守底线，才能真正让表彰奖励结果拥有公信力.

具体应该怎么走实这一步？前不久，收到各连推荐材料后，营党委成立由干部骨干组成的审核组，对照法规要求严格把好“三关”：把牢数据核验关，逐人调阅军事训练信息系统记录、考核成绩单、值班日志、任务命令等原始凭证，凡事迹模糊、数据缺失、贡献无法溯源的，一律退回补充或取消资格；严格程序合规关，逐一核查是否经过民主评议、支部集体研究、全连公示、无异议反馈等规定流程，对“先定人后补程序”“以个别意见代替民主推荐”等做法坚决纠正；严肃纪律审查关，营纪委牵头对近一年内有存疑的人员进行重点复核，凡在重大演训、战备值班中履职不力被通报的，严格执行“一票否决”.

某连一名战士拟被推荐为嘉奖人选. 审核组在审核过程中发现，这名战士在今年的驻训任务中曾出现问题被上级通报. 尽管后续表现积极，但考虑到他曾在重大任务中出现责任问题，营队没有将其列入上报名单. “法规不是软约束，程序不是走过场. 营党委必须当好把关人. ”陈教导员说.

新任排长小林是否能被列入“四有”优秀军官人选，营党委在审核时也经过了一番慎重考虑.

此前，小林在第一次参加实装模拟训练时因经验不足险些导致装备损坏，被全营通报. 经过短暂的意志消沉后，他迅速调整状态，在随后的一次演训中主动请缨担任前沿观察组长，带领全排全天候值守，准确上报敌情，助力营火力单元精准摧毁目标，综合表现获导调组表扬.

连队党支部综合小林的全年表现，将其推荐为“四有”优秀军官人选. 面对个别人的议论，营党委没有简单“一刀切”，而是调取其全年履职档案、演训评估报告和群众评议记录，召开专题会议审议，经过全面、客观、公正评价，最终一致同意将其上报.

夜训场上，上等兵刘浩正跟随班组进行夜间火力协同演练. 今年，他因在实兵对抗中成功处置通信中断特情、保障关键节点畅通而被推荐为“四有”优秀士兵人选. 面对荣誉，他没有松懈，反而加码训练. 刘浩说：“只有把本领练到极致，才配得上这份荣誉和认可. ”

当表彰奖励牢牢聚焦战斗力，当程序规则彰显法治精神，荣誉就真正成为引导官兵向战而行的“灯塔”. 正如该营周营长所言：“一次公正评奖，胜过十次动员. ”

感 言

让荣誉回归本色

■李永涛

这些年，每每看到基层上报的推荐表彰奖励人选名单，我都会多问一句：这个推荐，经得起问吗？

问什么？问官兵服不服，问实绩硬不硬，问程序走得实不实. 因为我们深知，一旦荣誉掺了水分，受损的是整个队伍的士气.

导向正，则人人思战；导向偏，则个个失望.

曾经，个别单位习惯用“平衡”代替标准：老同志快退了，得照顾一下；有同志没得过奖，轮也该轮上了；先进连队今年评得多，明年就得让一让……这些做法，看似讲风格、顾情面，实则模糊了法规界限. 久而久之，官兵心里就打鼓：组织到底看重什么？是干得多，还是待得久？是冲在前，还是会来事？这些疑虑，比训练场上的一次失利更伤士气. 因为训练出错可以反思重来，可信任一旦流失，重建却需漫长时日.

真正的公平，从来不是“人人有份”，而是“干者有得”. 做好表彰奖励工作，首先要立起严格依法的风向标，树立备战打仗鲜明导向. 荣誉必须向表现最优的个人聚焦，向任务最重的地方倾斜，那些在战位上扛重任、在任务中出实绩，还有常年在外执行各项重要任务并取得优异成绩的官兵，理应成为表彰的主体.

开展表彰奖励工作，各级党委机关首先要立场鲜明、树好导向、把住关口. 在指标分配上不搞平均摊派，在审核过程中不搞变通照顾，坚决杜绝“看人情”“打招呼”等现象，真正把资源向中心任务聚焦. 基层则要走实程序，民主评议讲实话、支部研究看实绩、公示内容列实事，不写“表现良好”这类空话，而是让大家清晰看到干了什么、考得怎样、贡献在哪儿. 表彰奖励工作阳光透明，必须经得起监督. 基层风气监督员要学透法规、大胆履职，对不良风气坚决说“不”. 只有过程真、数据实、监督严，结果才能立得住，官兵才真服气.

“一次公正评奖，胜过十次动员. ”它告诉每一名官兵，在这支军队里，真干的不吃亏，真拼的有回报. 唯有如此，才能激发出“人人思战、个个争先”的强大动能，为如期实现建军一百年奋斗目标凝聚磅礴力量.

A Battalion of a Brigade under the 71st Group Army Implements Annual Commendation and Award Procedures in Accordance with Laws and Regulations

Source: PLA Daily

Authors: Wang Runxin, Du Tianyao, Song Shijie, Li Yongtao

Editor: Sun Yue

2025-12-16

At the end of the year, a battalion of a brigade under the 71st Group Army implemented annual commendation and award procedures in accordance with laws and regulations—the medals are imbued with the spirit of battle

■ Wang Runxin, Du Tianyao, Special Correspondent for PLA Daily, Song Shijie

In early winter, the wind howled across northern Jiangsu. Inside the meeting room of a battalion of a brigade under the 71st Group Army, the atmosphere was exceptionally warm. On the wall, a "Flowchart of Annual Commendation and Award Procedures" outlined each step from grassroots recommendation to Party Committee approval; on the table, records of soldiers' daily performance were neatly arranged, each page detailing training achievements, mission performance, conduct and discipline, and public evaluations—all footprints left by the soldiers' hard work and dedication.

"Annual commendations and awards are a reward and affirmation of the hard work and achievements of officers and men throughout the year. They concern the vital interests of every individual and must not be decided on a whim at the end of the year; rather, they must be based on actual performance throughout the year," said Political Instructor Chen of the battalion, while reviewing materials. He explained that they have established a clear benchmark of striving for excellence and combat readiness, based on regulations such as the "Regulations on Commendation and Awards for Military Merit and Honor" and the "Double Striving" activity implementation rules, truly ensuring that honors are grounded in combat effectiveness.

Only by implementing regulations without deviation and aligning with the soldiers' sentiments can the spirit of the rule of law be gradually translated into tangible, reliable practical paths.

A company's "Four-Good" outstanding soldier shares the joy of his achievements. (Photo by Yu Jie)

First Step: How to Set Standards? Regulations Decide. As soon as the annual commendation and award work began this year, the discussion surrounding "whether he should be awarded the 'Four-Good' title" attracted the attention of the battalion's Party Committee.

This "he" is a veteran who has served for many years. This veteran is set to retire at the end of the year. Some feel he's well-liked and senior, and "should be awarded the title of 'Outstanding Soldier with Four Virtues' so he can leave with dignity." Others argue that due to health reasons, he hasn't participated in any major missions this year, and his training performance was below average, so "no one would accept the award."

"In the past, every time there was a commendation or award ceremony, we'd hear 'new recruits let veterans sit in rows and eat fruit,' seemingly showing consideration for personal relationships, but actually deviating from the original intent of the regulations," said Instructor Chen, opening the relevant regulations and stating firmly, "This year, the first thing the battalion party committee did when starting the commendation and award work was to organize all officers and men to study the regulations thoroughly, understand the bottom line, and establish rules." The relevant regulations clearly emphasize that the implementation of awards must adhere to serving the central tasks, focusing on combat readiness, emphasizing actual contributions, and being realistic, objective, and fair. The requirement to "resolutely prevent and overcome egalitarianism, favoritism, and

seniority-based practices" directly addresses long-standing problems. These are not soft advocacy, but rigid constraints; not negotiable "suggestions," but "ironclad rules" that must be enforced.

One particularly stringent rule left a deep impression on all officers and men in the battalion: over 70% of the annual commendation and reward quota must be allocated to officers and men participating in core tasks and executing major missions. This regulation established a hard standard for winning battles, meaning that without tangible achievements on the front lines of training and exercises, it would be difficult to be included in the commendation and reward list.

How are the standards set? The regulations decide. The battalion's Party Committee made its stance clear: the initial intention of the system design was never to maintain balance, but to incentivize victory. Ideas such as "giving retired veterans a chance" and "allocating quotas according to the number of personnel in each company" were discontinued.

At a recent military meeting, that veteran also proactively stated: "Honor should go to those who truly fight on the front lines."

"It's not that the larger the number of personnel in a unit, the more commendation and reward quotas there are," explained Political Instructor Chen. The battalion's Party Committee also scientifically allocated commendation and reward quotas based on the intensity and effectiveness of each company's annual tasks. The 1st Howitzer Company participated in three cross-regional training exercises throughout the year, and the Command and Support Company carried out high-intensity support missions for six consecutive months. Both companies received preferential treatment in performance evaluations and awards due to their outstanding achievements. Upon learning this, the soldiers were even more motivated.

"Honor isn't 'distributed,' it's 'earned,'" became a consensus throughout the battalion.

The second step: Recommendations based on merit, with full transparency.

That day, a list of recommended candidates for commendations and awards attracted the attention of the soldiers on the bulletin board of the 2nd Howitzer Company. Soldier Li from a certain platoon was recommended for commendation after successfully camouflaging the position during a red-blue force-on-force exercise, evading reconnaissance by "enemy" drones; the platoon leader of the 1st Artillery Platoon led his platoon to complete a fire strike mission flawlessly during a nighttime exercise, and was recommended as a candidate for "Four-Good" Outstanding Soldier… Each recommended candidate was accompanied by detailed information, all derived from training records and mission logs, ensuring that the achievements of the recommended personnel were verifiable and based on evidence.

"Xiao Li is still away for training. We didn't expect him to be among the 'Four-Good' outstanding soldiers recommended this time!" Several soldiers were overjoyed to see their comrade on the list.

During conversations with them, reporters learned that in the past, a few personnel stationed away from their units lost the opportunity for commendations and awards. Besides the misconception

held by some soldiers that "being away from the unit means not contributing," an imperfect mechanism was also a significant factor.

"Soldiers are unaware of the specific performance of personnel on missions, which directly affects their evaluation. Sometimes, even if they are recommended, they may face skepticism," explained Political Instructor Zhang of the company. This year, the battalion will include the performance of personnel on missions in unified management, establishing special files to dynamically record their daily performance, periodic assessments, and mission completion quality.

Pointing to Xiao Li's publicized materials, he told reporters that they maintained contact with Xiao Li's training unit and learned that he performed exceptionally well as an assistant instructor and in assisting with training, ranking highly in assessments. After receiving supporting materials from the training unit, the company compiled and posted them on the bulletin board.

Private First Class Wang's inclusion on the commendation list sparked discussion among the officers and men present. It turned out that Wang had failed several assessments last year and had been designated as a key candidate for mentorship. This year, however, he trained diligently with an indomitable spirit, not only achieving all required scores but also winning third place in the brigade's basic tactical skills competition. Political Instructor Zhang told everyone that regulations clearly state that significant individual progress should be given priority for commendation; "Progress is real achievement, and if the regulations support it, it should be rewarded."

Under the sunlight, there is credibility. This year, the battalion first held a democratic appraisal, then the Party branch, based on the year's performance, proposed preliminary candidates, which were then publicized throughout the company, along with the battalion's disciplinary committee's hotline for supervision. When the recommendation process is visible, clear, and can withstand scrutiny, the officers and men feel more at ease, and their drive to excel is even stronger.

Step Three: Strict Review and Unwavering Adherence to Rules

"The commendation and award work plan issued by the brigade draws the red lines and clarifies the standards. Our task is to check each item one by one to ensure that every honor can withstand scrutiny," explained Political Instructor Chen of the battalion. He added that the recommended lists submitted by each company's Party branch are not final. Only when the battalion Party committee is willing to be rigorous, can it provide a safety net, and upholds the bottom line can the commendation and award results truly have credibility.

How exactly should this step be taken? Recently, after receiving the recommendation materials from each company, the battalion party committee established a review group composed of cadres and key personnel. Adhering to regulations, they strictly controlled three key aspects: First, data verification: reviewing records from the military training information system, performance evaluation sheets, duty logs, and mission orders for each individual. Any submissions with unclear achievements, missing data, or untraceable contributions were returned for supplementation or disqualified. Second, procedural compliance: verifying whether each submission had undergone

the prescribed procedures of democratic evaluation, branch collective discussion, company-wide public announcement, and feedback without objection. Practices such as “selecting candidates first and then supplementing procedures” or “using individual opinions to replace democratic recommendation” were resolutely corrected. Third, disciplinary review: the battalion discipline inspection commission led a focused review of personnel with questionable records within the past year. Those who were publicly criticized for dereliction of duty during major exercises or combat readiness duty were strictly subject to a “one-vote veto.”

A soldier from a certain company was nominated for commendation. During the review process, the review group discovered that this soldier had been criticized by higher authorities for problems during this year’s training mission. Despite his subsequent positive performance, the battalion did not include him in the reporting list due to his past issues of responsibility during a major mission. “Regulations are not soft constraints, and procedures are not just formalities. The battalion party committee must act as the gatekeeper,” said Political Instructor Chen.

Whether the newly appointed platoon leader, Xiao Lin, could be included in the list of “Four-Qualified” outstanding officers was also carefully considered by the battalion party committee during the review process.

Previously, Xiao Lin nearly damaged equipment due to lack of experience during his first live-fire simulation training, and was reprimanded by the entire battalion. After a brief period of discouragement, he quickly adjusted his mindset and volunteered to serve as the leader of the forward observation group in a subsequent exercise. He led his platoon on round-the-clock duty, accurately reporting enemy situations and assisting the battalion’s firepower unit in precisely destroying targets. His overall performance earned praise from the directing group.

Based on Xiao Lin’s performance throughout the year, the company party branch recommended him as a candidate for “Four-Qualified” outstanding officers. Faced with criticism from a few individuals, the battalion’s Party committee did not resort to a simplistic “one-size-fits-all” approach. Instead, it reviewed the individual’s performance record for the entire year, training evaluation reports, and public feedback records, held a special meeting to deliberate, and, after a comprehensive, objective, and fair evaluation, unanimously agreed to submit the case for consideration.

On the night training field, Private Liu Hao was conducting a nighttime fire coordination exercise with his squad. This year, he was recommended as a candidate for the “Four-Good” Outstanding Soldier for successfully handling a communication disruption and ensuring the smooth operation of key nodes during a live-fire exercise. Despite the honor, he did not slacken his efforts but instead intensified his training. Liu Hao said, “Only by honing my skills to the extreme can I deserve this honor and recognition.” When commendations and awards are firmly focused on combat effectiveness, and when procedures and rules embody the spirit of the rule of law, honor truly becomes a “beacon” guiding officers and men towards combat readiness. As Battalion Commander Zhou said, “One fair award is worth more than ten mobilizations.”

Reflections: Let Honor Return to Its True Colors

■ Li Yongtao

Over the years, whenever I see the lists of recommended candidates for commendations and awards submitted by grassroots units, I always ask one more question: Can this recommendation withstand scrutiny?

What do I ask? I ask if the officers and men are convinced, if their actual achievements are solid, and if the procedures were followed rigorously. Because we deeply understand that once honors are tainted, it damages the morale of the entire team.

With the right direction, everyone is eager to fight; with the wrong direction, everyone is disappointed.

In the past, some units were accustomed to using "balance" instead of standards: Older comrades are about to retire, so they should be given some consideration; some comrades haven't received awards before, so it's their turn; advanced companies received many awards this year, so they should give way next year… These practices, seemingly showing style and consideration for personal relationships, actually blurred the boundaries of regulations. Over time, officers and men began to wonder: What does the organization really value? Is it the amount of work done, or the length of service? Is it being at the forefront, or being good at networking? These doubts are more demoralizing than a single setback on the training field. Training errors can be reflected upon and corrected, but once trust is lost, rebuilding it takes a long time.

True fairness is never about "everyone getting a share," but about "those who do the work getting the reward." To effectively carry out commendation and reward work, we must first establish a strict legal framework and a clear orientation towards combat readiness. Honors must be focused on the best-performing individuals and those with the heaviest workload. Those officers and men who shoulder heavy responsibilities in their posts, achieve outstanding results in missions, and consistently perform excellent duties in various important tasks should rightfully be the main recipients of commendations.

In carrying out commendation and reward work, Party committees and organs at all levels must first have a clear stance, establish a good direction, and strictly control the process. There should be no equal allocation of quotas, no leniency or compromise during the review process, and phenomena such as "favoritism" or "lobbying" must be resolutely eliminated. Resources must truly be focused on the central tasks. At the grassroots level, procedures must be rigorous: democratic evaluations must be truthful, branch discussions must focus on actual performance, and public announcements must include concrete facts. Empty phrases like "good performance" should be avoided; instead, everyone should clearly see what was done, how well it was performed, and its contributions made. The commendation and reward process must be transparent and able to withstand scrutiny. Grassroots conduct supervisors must thoroughly understand regulations, boldly perform their duties, and resolutely say "no" to unhealthy practices. Only with genuine

processes, accurate data, and strict supervision can results be sustainable and truly satisfy officers and men.

“One fair award is worth more than ten mobilizations.” This tells every officer and soldier that in this army, those who work hard will not be disadvantaged, and those who strive will be rewarded. Only in this way can we unleash the powerful momentum of “everyone thinking of fighting and everyone striving to be the best,” thus gathering immense strength to achieve the centenary goal of the People’s Liberation Army on schedule.

不再“扬长避短”！这个连用“较真”让官兵收获成长

来源：解放军报 作者：孙润乾 刘小云 责任编辑：孙悦 2025-12-16

第 82 集团军某旅某连年终总结工作敢于较真碰硬——

12 份个人总结报告被退回重写

■孙润乾 解放军报特约通讯员 刘小云

这些天，做事一向沉稳细心的第 82 集团军某旅某连二级上士吴伟鹏，遭遇了一次难忘的“返工”——重写个人年终总结报告.

看着两天前自己写得满满当当的 4 页纸，吴伟鹏有些想不通. 可听完赵连长一席话，他紧皱的眉头渐渐舒展开来：“年终总结就该这样，讲成绩要大大方方，查问题要深刻具体. ”

在这个连，和吴伟鹏有相同经历的还有 11 名官兵，他们的个人总结被退回重写.

一份个人年终总结，为何这么较真，还要重新“回炉”？这事还得从头说起.

前段时间，按照机关下发的工作计划，该连对年终总结工作作了周密安排，不仅要求官兵撰写个人总结报告，还特意强调讲成绩要注意总结经验做法，查问题要有具体整改措施. 连队官兵立即行动，用心梳理一年的成绩得失，甚至有人打足了“提前量”，通知下发当晚就把总结报告交了上来.

逐一翻看收上来的一大摞个人总结，赵连长心中喜忧参半. 喜的是大家行动迅速，忧的是一些官兵的总结与本人实际表现出入很大.

是差不多就行了，还是坚持原则、深挖原因？思来想去，赵连长决定找当事人聊聊.

今年，吴伟鹏两次参加集团军比武，取得了优异成绩，可在总结中，成绩背后的经验和思考毫无踪影，反倒是一些“鸡毛蒜皮”的琐事写了不少.

“晒成绩、讲经验害怕被战友认为是在炫耀，还是着眼当好班长说说如何抓好日常教育管理保险. ”面对赵连长的询问，吴伟鹏实话实说.

赵连长又与中士叶海鹏聊了聊. 叶海鹏担任连队文书兼军械员认真负责，创新规范武器领取和保养流程，多次受到上级表扬. 不过，他的体能成绩一直处在下游，总结中，他对短板不足一笔带过.

“总结是为了‘打一仗、进一步’，如果这时还‘扬长避短’，怎么能得到提升？”赵连长的话语重心长，叶海鹏听完心服口服.

几场谈心下来，赵连长发现大家对待个人总结都有自己的小心思：有的顾忌战友看法，不好意思讲经验；有的害怕影响个人形象或评功评奖，谈问题含含糊糊、避重就轻；还有的反思原因过于笼统，一说就是理论学习不深、作风养成不够……

“总结不是简单给年度工作划句号，而是通过提炼经验、查找不足抓好整改，推动工作改进提升，不能就这样敷衍了事. ”赵连长与指导员商议后，决定将 12 份内容不符合规定要求的总结报告退回本人重写.

随后召开的连队军人大会上，赵连长专门讲评了前期总结情况，教育引导官兵转变作风，找准自身定位，实事求是讲成绩、查问题，知行合一改进工作，自我提高. 连队还督促各班排扎实搞好年终总结，综合个人全年表现，客观公正推荐评功评奖人选.

会后没两天，赵连长就看到了一些新变化. 吴伟鹏把两次参加比武的经验做法梳理成方便背记的顺口溜，主动帮带年轻军士编写教案，手把手传授技巧方法；叶海鹏则找到连队训练骨干“拜师”，为他制订专项训练计划……

几天过后，连队值班员谢四江收齐 12 份“回炉”后的个人总结报告，赵连长一边翻看一边说：“他们最近的扎实作风表现足以说明，这一稿写得不会差. ”事实确实如此，连队支委会重新审看这些材料，给出高度评价.

No More “Playing to Your Strengths and Avoiding Your Weaknesses”! This Company’s “Strictness” Helps Soldiers Grow

Source: PLA Daily

Author: Sun Runqian, Liu Xiaoyun

Editor: Sun Yue

2025-12-16

A Company of a Brigade of the 82nd Group Army Dares to Be Strict and Tough in its Year-End Summary Work—

12 Personal Summary Reports Returned for Rewriting

■Sun Runqian, Special Correspondent of PLA Daily, Liu Xiaoyun

These days, Wu Weipeng, a sergeant second class of a company of a brigade of the 82nd Group Army, who is always calm and meticulous in his work, encountered an unforgettable "rework"—rewriting his personal year-end summary report.

Looking at the four pages he had filled two days ago, Wu Weipeng was somewhat puzzled. But after listening to Company Commander Zhao's words, his furrowed brows gradually relaxed: "Year-end summaries should be like this; achievements should be presented openly and honestly, and problems should be identified in depth and specific."

In this company, 11 other soldiers had the same experience as Wu Weipeng; their personal summaries were returned for rewriting.

Why take a personal year-end summary so seriously, even requiring a re-evaluation? The story begins in the beginning.

A while ago, following a work plan issued by headquarters, the company meticulously arranged its year-end summary work. This included requiring officers and men to write personal summary reports, and specifically emphasizing that achievements should be based on summarizing experiences and practices, while problems should be addressed with concrete rectification measures. The company's officers and men immediately sprang into action, carefully reviewing the year's gains and losses. Some even submitted their reports the very night the notice was issued.

Reviewing the large stack of personal summaries, Company Commander Zhao felt a mix of joy and worry. He was pleased that everyone acted quickly, but worried that some soldiers' summaries differed significantly from their actual performance.

Should "good enough" suffice, or should he adhere to principles and delve deeper into the reasons? After much thought, Company Commander Zhao decided to speak with the individuals involved.

This year, Wu Weipeng participated in the group army's skills competition twice, achieving excellent results. However, his summary lacked any mention of the experiences and reflections behind his achievements; instead, it was filled with trivial matters. "Showing off achievements and sharing experiences might be seen as boasting by my comrades. Let's focus on being a good squad leader and talking about how to effectively manage daily education and safety," Wu Weipeng honestly told Company Commander Zhao.

Company Commander Zhao then spoke with Sergeant Ye Haipeng. Ye Haipeng, serving as the company clerk and armorer, was diligent and responsible, innovating and standardizing weapon requisition and maintenance procedures, earning him numerous commendations from superiors. However, his physical fitness scores were consistently low, and in his summaries, he glossed over his shortcomings.

“The purpose of a summary is to ‘fight a battle and move forward.’ If you’re still ‘playing to your strengths and avoiding your weaknesses’ at this point, how can you improve?” Company Commander Zhao’s words were earnest, and Ye Haipeng was convinced.

After several heart-to-heart talks, Company Commander Zhao discovered that everyone had their own concerns about their personal summaries: some were hesitant to share their experiences due to concerns about their comrades’ opinions; some were afraid of affecting their personal image or receiving awards and commendations, so they spoke vaguely and avoided the main issues; others’ reflections were too general, simply stating that their theoretical study was insufficient or their work style was not well-developed…

“A summary is not simply putting a period to the year’s work; it’s about extracting experiences, identifying shortcomings, and making improvements to drive work progress. It can’t be done so perfunctorily,” Company Commander Zhao said. After discussing with the political instructor, he decided to return the 12 summary reports that did not meet the requirements to the individuals who submitted them for rewriting.

At the subsequent company-wide meeting, Company Commander Zhao specifically reviewed the previous summaries, educating and guiding officers and men to change their work style, accurately identify their own roles, realistically discuss achievements and identify problems, and improve their work by integrating theory with practice. The company also urged each squad and platoon to conduct thorough year-end summaries, comprehensively considering individual performance throughout the year, and objectively and fairly recommending candidates for awards and commendations.

Within two days of the meeting, Company Commander Zhao noticed some new changes. Wu Weipeng summarized his experiences from two competitions into easy-to-remember rhymes, proactively helping younger soldiers write lesson plans and personally teaching them techniques and methods; Ye Haipeng, on the other hand, sought out a training leader in the company to “apprentice” him, and developed a specialized training plan for him... A few days later, Xie Sijiang, the company’s duty officer, collected 12 revised personal summary reports. Company Commander Zhao, while reviewing them, said, “Their recent solid work style is enough to prove that this draft is well-written.” Indeed, the company’s branch committee re-examined the materials and gave them high praise.

第 71 集团军某旅推行集约化年终检查让基层轻装上阵

来源：解放军报 作者：施海波 吴安宁 责任编辑：孙悦 2025-12-16

第 71 集团军某旅推行集约化年终检查——

“一站式”会诊 “点对点”把脉

■施海波 解放军报记者 吴安宁

作训科参谋检查训练计划落实情况，组织科干事了解主题教育开展情况，装管科助理员核查武器装备维护状况……年终岁尾，第 71 集团军某旅机关联合检查组前往某连开展年终检查，检查组成员按照分工密切配合，检查过程集约高效.

“往年年终迎检时，我们忙得像陀螺，这个检查组刚走那个检查组又来. 今年年终检查，基本上一两场检查就能覆盖全部内容，我们也能把更多精力集中在年底其他重要工作上. ”谈及机关年终检查的新变化，该连张指导员竖起大拇指.

该旅领导告诉记者，他们要求机关在年终检查中改进工作作风，推行集约化检查机制，改变以往各科室分头组织、轮番检查的做法，尽量做到能合并的合并、能集中的集中，避免给基层带来迎检负担. 今年年终检查开始前，他们专门组织协调会，统筹机关各业务科室组建联合检查组，并要求检查组在实事求是查摆问题的基础上，从各自专业角度分析问题、出谋划策，提供切实可行的解决办法，坚决杜绝“多头检查、来回折腾”“光说问题、不提建议”等现象.

“一站式”会诊，“点对点”把脉. “针对这个问题，建议从战备方案和政治教育两方面协同推进解决……”近日，该旅机关联合检查组赴某点位开展年终检查，针对检查中发现的“少数官兵战备意识不强”问题，同为检查组成员的作训科李参谋和宣传科王干事，分别从各自角度提出整改意见，并梳理形成一份反馈报告，供该点位官兵参考借鉴.

采访期间，该旅纪检科田科长向记者展示了一份《机关基层双向测评表》. “这份测评表，让我们兼具‘考官’与‘考生’身份，我们在给基层打分的同时，基层官兵也会对联合检查组的工作作风、检查方法、指导效果等打分. ”田科长介绍.

“这一难点课目的训练方式，我建议这样调整……”某连训练场，该旅机关联合检查组成员、作训科孙参谋针对他在检查中摸排发现的问题，为该连官兵提供改进思路，他一边画示意图，一边征求官兵意见建议. 孙参谋坦言：“以前年终检查，我们习惯于‘挑毛病’，把脉开方不够. 如今双向测评像一面镜子，我们在基层检查时首先会考虑，指出的问题，基层认不认可？提出的改进方案，有没有可行性？”

“作战示范课目能否增加夜训环节指导，我与战友们开展无人机夜训时，热成像镜头容易被露水打湿……”训练场上，检查组成员认真记录该旅某连一名班长的建议，检查结束后将相关问题反馈至旅作训科. 日前，该旅作训科专题研究了无人设备的夜训问题，并计划在新年度训练中增加该课目的比重.

A brigade of the 71st Group Army Implements Streamlined Year-End Inspections, Lightening the Burden on Grassroots Units

Source: PLA Daily

Author: Shi Haibo, Wu Anning

Editor: Sun Yue

2025-12-16

A brigade of the 71st Group Army Implements Streamlined Year-End Inspections—"One-Stop" Consultation, "Point-to-Point" Diagnosis

■ Shi Haibo, PLA Daily Reporter Wu Anning

Training office staff inspected the implementation of training plans, organization office officers learned about the progress of thematic education, and equipment management office assistants checked the maintenance status of weapons and equipment… At the end of the year, a joint inspection team from the headquarters of a brigade of the 71st Group Army conducted a year-end inspection at a company. The team members cooperated closely according to their assigned tasks, making the inspection process efficient and streamlined.

"In previous years, we were spinning like tops during the year-end inspections. One inspection team had barely left before another arrived. This year, the year-end inspections can basically cover everything in one or two sessions, allowing us to focus more on other important tasks at the end of the year," said Political Instructor Zhang of the company, giving a thumbs-up when discussing the new changes in the headquarters' year-end inspections.

The brigade leadership told reporters that they required the headquarters to improve its work style during the year-end inspection, implementing a centralized inspection mechanism. This changed the previous practice of separate, rotating inspections by different departments, aiming to merge or centralize inspections wherever possible to avoid burdening the grassroots with inspections. Before the year-end inspection began this year, they specifically organized a coordination meeting to form joint inspection teams from various departments. The teams were required to realistically identify problems, analyze them from their respective professional perspectives, offer suggestions, and provide practical solutions, resolutely preventing phenomena such as "multiple inspections and back-and-forth trips" and "only pointing out problems without offering suggestions."

"One-stop" consultation, "point-to-point" diagnosis. "Regarding this issue, it is recommended to address it through a coordinated approach involving both combat readiness plans and political education..." Recently, a joint inspection team from the brigade headquarters conducted a year-end inspection at a certain location. Addressing the issue of "a few soldiers lacking strong combat readiness awareness" discovered during the inspection, Staff Officer Li from the Training Office and Officer Wang from the Publicity Office, both members of the inspection team, offered rectification suggestions from their respective perspectives and compiled them into a feedback report for the soldiers at that location to refer to.

During the interview, Office Chief Tian from the brigade's Discipline Inspection Office showed the reporter a "Two-Way Evaluation Form for Headquarters and Grassroots Units." "This evaluation form allows us to act as both 'examiners' and 'examinees.' While we score the grassroots units, the grassroots soldiers will also score the joint inspection team's work style, inspection methods, and guidance effectiveness," Office Chief Tian explained.

"For this difficult subject's training method, I suggest adjusting it as follows..." At a company training ground, Staff Officer Sun from the Training Office, a member of the brigade headquarters' joint inspection team, provided improvement ideas for the company's soldiers based on the problems he discovered during the inspection. He drew a diagram while soliciting opinions and suggestions from the soldiers. Staff Officer Sun frankly admitted, "In the past, during year-end inspections, we were used to 'finding faults,' but we didn't offer enough solutions. Now, the two-way evaluation is like a mirror. When we inspect the grassroots level, we first consider whether the grassroots accept the problems we point out, and whether the proposed improvement plans are feasible."

"Could we add night training guidance to the combat demonstration subjects? When my comrades and I conduct night training with drones, the thermal imaging lenses easily get wet from the dew..." On the training field, members of the inspection team carefully recorded the suggestion from a squad leader of a company in the brigade. After the inspection, they reported the relevant issues to the brigade's training department. Recently, the brigade's training department conducted a special study on the night training of unmanned equipment and plans to increase the proportion of this subject in the new year's training.

中新"合作-2025"陆军联合训练进行实兵综合演练

来源：新华社 作者：王涵　罗可 责任编辑：杜圣智 2025-12-16

新华社新加坡 12 月 16 日电（王涵　罗可）近日，中新"合作-2025"陆军联合训练进入实兵综合演练阶段. 中新双方围绕联合城市反恐行动，区分旅级指挥推演、营级实兵行动，展开分段训练、连贯训练和综合演练，进一步提高双方联合训练水平.

训练阶段转进后，训练场地也从第 3 师裕廊营区转移至新加坡武装部队军训城. 据了解，军训城于今年 3 月建成启用，是新加坡首个高楼城市训练设施，全方位布设了智能仪器与实时反馈系统，中新两国陆军也是首度在此举办"合作"系列联合训练.

在指挥作业室内，中新双方旅级指挥员成立联训指挥机构，结合实体模型和影像图，按照情况介绍、混编研讨、模拟推演等步骤展开指挥所演练，探索城市反恐战法，优化联合行动方案，有效提升了联合指挥能力.

实兵演练中，中新混编分队充分发挥有人无人协同作战效能，利用侦察机器狗、机器球、无人机辅助侦察，根据多维侦察情报，更加精准实施包围封锁、狙击控局、快速突入、火力打击、解救人质等作战行动. 从分段到连贯，中新双方参训队员边讨论边实践，促进训练向实战靠拢，展现了双方高度的专业素养和协同水平.

“城市反恐就像在刀尖上跳舞，每一个动作都要精准到位. ”中方参训指挥人员刘寿桃在训练结束后表示，在高楼林立的复杂环境中，中新双方协同行动能力经历了高强度检验与淬炼，有效提升了混编小队临机处置、默契配合及精准打击的实战能力，积累了遂行城市反恐作战任务的宝贵经验.

随着演练不断深入，中新双方官兵联合指挥、战术协同和综合保障等各方面能力进一步巩固，中新两国陆军在实战化训练中积累的经验与信任，正逐步转化为未来应对真实反恐挑战的底气与信心.

China-Singapore “Cooperation-2025” Joint Army Training Enters Live-Fire Comprehensive Exercise Phase

Source: Xinhua News Agency

Author: Wang Han, Luo Ke

Editor: Du Shengzhi

2025-12-16

Singapore, December 16 (Xinhua) -- The China-Singapore “Cooperation-2025” joint army training program recently entered the live-fire comprehensive exercise phase. The two sides, focusing on joint urban counter-terrorism operations, conducted segmented training, continuous training, and comprehensive exercises, including brigade-level command simulations and battalion-level live-fire operations, further improving their joint training capabilities.

Following the shift to the training phase, the training ground has been moved from the 3rd Division’s Jurong Camp to the Singapore Armed Forces Training City. It is understood that the Training City, completed and put into operation in March this year, is Singapore’s first high-rise urban training facility, equipped with intelligent instruments and real-time feedback systems. This is also the first time the Chinese and Singaporean armies have held a series of joint “Cooperation” training exercises here.

In the command center, brigade-level commanders from both China and New Zealand established a joint training command structure. Using physical models and visual aids, they conducted command post exercises following steps including situation briefings, mixed-unit discussions, and simulations. This explored urban counter-terrorism tactics, optimized joint action plans, and effectively enhanced joint command capabilities.

During the live-fire exercise, the mixed Chinese-New Zealand units fully utilized the effectiveness of manned and unmanned collaborative operations. Employing reconnaissance robots, robotic spheres, and drones for reconnaissance assistance, and based on multi-dimensional intelligence, they more precisely implemented encirclement and blockade, sniping and control, rapid infiltration, fire strikes, and hostage rescue operations. From segmented to continuous drills, the Chinese and New Zealand trainees discussed and practiced simultaneously, promoting the training's alignment with real combat and demonstrating a high level of professionalism and coordination between the two sides.

"Urban counter-terrorism is like dancing on a knife's edge; every movement must be precise and accurate," said Liu Shoutao, the Chinese commander participating in the training, after the exercise. He added that in the complex environment of towering buildings, the joint operational capabilities of China and New Zealand underwent a high-intensity test and refinement, effectively improving the combat capabilities of mixed teams in impromptu response, seamless cooperation, and precision strikes, and accumulating valuable experience in carrying out urban counter-terrorism operations.

As the exercises deepened, the joint command, tactical coordination, and comprehensive support capabilities of the Chinese and New Zealand troops were further consolidated. The experience and trust accumulated by the two armies in realistic combat training are gradually transforming into the confidence and strength to meet future real counter-terrorism challenges.

陆军某团结合高原驻训任务培育官兵战斗精神

来源：解放军报 作者：张亚楠 曾存军 责任编辑：林诗清 2025-12-18

陆军某团结合高原驻训任务培育官兵战斗精神——

高原风雪急 练兵热潮涌

■张亚楠 曾存军

“条件越艰苦，越能练筋骨. 我们要利用好高原高寒缺氧的天然练兵场，练强战斗本领、练硬战斗作风. ”日前，正在高原驻训的陆军某团防化分队在上级组织的专业考核中取得总评优秀的好成绩. 走下考核场，该分队领导对笔者说.

今年上半年，该团部分专业分队赴高原驻训. 一段时间后，机关围绕驻训官兵面临的突出难题开展问卷调查，尽管机关已经在后勤保障方面投入了大量人力物力，仍有部分官兵在“意见建议”栏填了“休假难”“条件苦”等意见.

“是机关工作没做到位，还是官兵确有急难愁盼？”带着疑问，该团机关工作组沉到驻训一线，扎进班排蹲点调研，摸清官兵思想状况，找到问题根源：从条件便利的营区到环境艰苦的高原驻训场，不少年轻官兵感到不适应，出现了思想波动.

随后召开的党委会上，该团党委一班人围绕这一现象深入剖析感到，随着物质条件不断改善，年轻官兵初次接触高原艰苦环境难免不适应，必须引导官兵传承革命先辈艰苦奋斗红色基因，结合驻训任务锤炼一不怕苦、二不怕死的战斗精神.

经过一番深入讨论，他们最终决定，在驻训分队中广泛开展“横向比找差距，纵向比看变化”群众性讨论，引导官兵与兄弟单位比奉献意识、与先进典型比吃苦精神、与身边战友比干事劲头，检视反思自己在思想认识、作战本领、专业技能等方面存在的差距不足，激励大家扎根高原战位、磨砺战斗精神.

一次强军故事分享会上，他们邀请兄弟单位官兵代表走上讲台，畅谈自己坚守高原、矢志强军的感悟体会. 现场聆听兄弟单位官兵不惧艰苦环境、士气高昂投入练兵备战的先进事迹，该团不少原本对驻训环境不太适应的官兵不由得感到惭愧.

分享会结束后，该团组织官兵展开讨论交流. 多次参加高原驻训的一级上士高飞深有感触地说：“以前驻训住帐篷，睡到半夜被窝都不太暖和，手机信号也时有时无. 如今驻训，住的是保温板房，24 小时有热水保障，还用上了高速畅通的网络. 上级想方设法改善驻训保障条件，我们还有什么理由不履行好自己的职责使命？”

随着战斗精神培育活动不断深入，该团驻训分队官兵进一步坚定精武强能、建功高原的决心. 分享会后的一次五公里武装越野训练，列兵小张不仅严格按要求全副武装，还主动在腿上绑了沙袋. 面对班长的点赞，他说：“友邻部队一名战友作战靴磨破了还坚持训练，我要向他学习，争当高原精武标兵！”

时值深冬，高原已是寒风凛冽，该团驻训场上却热潮涌动：防化专业训练，官兵主动要求增加毒剂侦检难度；战术训练，官兵顶着严寒，针对高原环境改进单兵战斗动作.

An Army Regiment Cultivates Combat Spirit Among Soldiers Through Plateau Training Missions

Source: PLA Daily

Author: Zhang Yanan, Zeng Cunjun

Editor: Lin Shiqing

2025-12-18

An Army Regiment Cultivates Combat Spirit Among Soldiers Through Plateau Training Missions— Heavy Snowstorms on the Plateau, Training Surge

■ Zhang Yanan, Zeng Cunjun

“The harsher the conditions, the better we can train our bodies. We must make good use of the natural training ground of the high-altitude, cold, and oxygen-deficient plateau to strengthen our combat skills and cultivate a tough fighting spirit.” Recently, the chemical defense unit of an Army regiment currently undergoing plateau training achieved excellent results in a professional assessment organized by higher authorities. After leaving the assessment site, the unit’s leader told the reporter.

In the first half of this year, some specialized units of the regiment went to the plateau for training. After a period of time, the headquarters conducted a questionnaire survey on the prominent problems faced by the soldiers during the training. Although the headquarters had already invested a lot of manpower and resources in logistical support, some soldiers still filled in opinions such as “difficulty in taking leave” and “harsh conditions” in the “opinions and suggestions” column.

“Is it a failure of the headquarters’ work, or are the officers and men genuinely facing urgent difficulties and anxieties?” With these questions in mind, the regiment’s headquarters working group went deep into the front lines of training, conducting in-depth investigations at the platoon

and squad levels to understand the soldiers' thoughts and identify the root cause of the problem: many young officers and men felt unaccustomed to the harsh environment of the high-altitude training grounds, experiencing fluctuations in their morale.

At the subsequent Party Committee meeting, the regiment's Party Committee leadership deeply analyzed this phenomenon and concluded that with continuously improving material conditions, it was inevitable that young officers and men would experience initial difficulties adapting to the harsh high-altitude environment. They felt it was essential to guide the soldiers to inherit the revolutionary spirit of hard work and struggle from their predecessors, and to cultivate a fighting spirit of fearlessness in the face of hardship and death in conjunction with the training missions.

After in-depth discussions, they ultimately decided to widely launch a mass discussion within the training units, using horizontal comparisons to identify gaps and vertical comparisons to observe changes. This would guide officers and men to compare their dedication with that of other units, their willingness to endure hardship with advanced role models, and their enthusiasm for action with their comrades, examining and reflecting on their own shortcomings in ideological understanding, combat skills, and professional abilities, and encouraging everyone to take root in their high-altitude positions and hone their fighting spirit.

At a story-sharing session on strengthening the military, they invited representatives from other units to the stage to share their experiences and insights on their dedication to the plateau and their commitment to building a strong military. Listening to the advanced deeds of soldiers from other units who, undeterred by the harsh environment and with high morale, devoted themselves to training and combat readiness, many soldiers in the regiment who had previously struggled to adapt to the training environment felt ashamed.

After the sharing session, the regiment organized a discussion among its soldiers. Senior Sergeant Gao Fei, who had participated in plateau training multiple times, remarked with deep feeling: "Before, during training, we lived in tents, and even at midnight, the blankets weren't very warm, and cell phone signal was intermittent. Now, we live in insulated prefabricated houses, have 24-hour hot water, and high-speed internet. The higher-ups are doing everything they can to improve training conditions; what reason do we have not to fulfill our duties and missions?"

As the combat spirit cultivation activities deepened, the soldiers of the regiment's training detachment further strengthened their determination to hone their skills and contribute to the plateau. During a five-kilometer armed cross-country training exercise after the sharing session, Private Zhang not only strictly followed the requirements for full gear but also voluntarily strapped sandbags to his legs. Faced with his squad leader's praise, he said, "A comrade from a neighboring unit continued training even with his combat boots worn out. I want to learn from him and strive to become a model soldier in the high-altitude region!" In the depths of winter, when the high-altitude region was bitterly cold, the training grounds of this regiment were brimming with enthusiasm: during chemical defense training, officers and men proactively requested to increase

the difficulty of detecting toxic agents; during tactical training, officers and men braved the severe cold to improve individual combat maneuvers for the high-altitude environment.

战术训练在凌晨打响，看看这场夜训与以往有何不同？

来源：解放军报 作者：卢运国 马铮 责任编辑：郭妍菲 2025-12-19

第八十一集团军某旅提升夜间作战能力——

战术训练在凌晨打响

■卢运国 马 铮

初冬子夜，万籁俱寂. 某野外驻训场上空，红色信号弹划破夜空，第 81 集团军某旅某连官兵从掩体中迅疾跃出，一场后半夜战术突击训练骤然打响.

“目标高地西侧发现‘敌’警戒哨，迅速完成渗透清剿！”接到指令，中士李浩然带领战斗小组穿过铁丝网，利用红外夜视仪锁定“敌”警戒哨位置，果断射击将哨兵“歼灭”. 此时，腕表显示：1 时 18 分.

“过去组织夜训，时间多在 20 时至次日 0 时，官兵精力充沛，训练成绩亮眼，但也让不少人练出了‘时间惯性’. ”该旅作训科干部宋振华坦言，战争不会按部队作息时间表打响，去年跨区训练中遭遇的那记 “闷棍”，至今仍警醒着该旅官兵.

“发现‘敌’红外侦察！”那次战斗一改惯例，在后半夜打响，李浩然接到上级通报，立即指挥战斗小组关闭热源，利用植被阴影构建伪装带. 当“敌”无人机掠过树梢时，他果断发射照明弹制造强光干扰，本打算利用“敌”无人机传感器重置间隙完成战术转移，但组里成员却因夜深困倦、反应迟钝，被“敌”无人机发现，导致侦察行动失败.

吃一堑，长一智. 该旅党委围绕提升夜间作战能力展开专题研究，决定打破传统夜训时间安排习惯，将部分战术课目训练调整至凌晨 1 时至 5 时实施，每个课目均嵌入复杂特情，全程模拟真实战场环境. 他们还通过精细打磨训练计划、科学制订夜间安全预案，着力破解后半夜训练可能面临的种种难题.

“起初，不少官兵难以适应后半夜训练节奏. ”宋振华告诉笔者，为帮助官兵科学“倒时差”，该旅根据卫生科提供的科学指导，采取白天分段作息，训练前补充高能量食品，训练后按摩穴位、补给热饮等方式，帮助官兵快速恢复体能.

经过一段时间的适应性训练，官兵渐渐练出了全时段作战的过硬本领，通过技战术升级助推部队全天候作战能力提升.

“左翼攻击群与指挥所通信中断，立即排查抢修！”一次后半夜训练中，通信连马连长突然接到指令. 此时恰逢凌晨“大气波导”现象高发期，无线电信号在低空形成异常折射，导致原本通畅的信道突然出现多个虚假信号源. 马连长迅速调动无人机升空建立临时链路，同时指挥便携式雷达车捕捉真实信号特征，圆满完成后续任务.

“过去训练总挑信号稳定的时段，哪知道电磁波也会‘捉迷藏’.”马连长说，如今，他们通过紧贴实战的夜间训练，摸索出多种跨兵种通信协同模式，梳理形成“后半夜复杂电磁环境应对手册”，夜间抗干扰能力显著提升.

天边泛起鱼肚白，一阵尖锐的警报声刺破晨雾，该旅参训官兵随即转入装甲突击训练. 数架无人机呼啸升空，步战车展开队形，向目标地域开进……

Tactical Training Commenced in the Early Morning; How Did This Night Training Differ from Previous Ones?

Source: PLA Daily

Editor: Guo Yanfei

2025-12-19

A brigade of the 81st Group Army enhances its night combat capabilities—Tactical training commences in the early morning

■Lu Yunguo, Ma Zheng

In the early winter night, all was quiet. Above a field training ground, a red signal flare pierced the night sky. Soldiers of a company of a brigade of the 81st Group Army swiftly leaped from their bunkers, and a late-night tactical assault training exercise suddenly began.

“Enemy sentry post spotted on the west side of the target hill. Quickly complete the infiltration and elimination!” Upon receiving the order, Sergeant Li Haoran led his combat team through the barbed wire, used infrared night vision devices to lock onto the “enemy” sentry post’s location, and decisively fired, “annihilating” the sentry. At this moment, his wristwatch showed: 1:18 AM.

“In the past, night training was mostly conducted from 8 PM to midnight. Soldiers were full of energy and achieved excellent training results, but this also led many to develop a ‘time inertia,’” admitted Song Zhenhua, an officer in the brigade’s training department. He added that war doesn’t follow a fixed schedule, and the unexpected setback they experienced during last year’s cross-regional training still serves as a stark reminder to the brigade’s soldiers.

“Enemy infrared reconnaissance detected!” That battle deviated from the norm, taking place in the latter half of the night. Upon receiving the report, Li Haoran immediately directed his combat team to shut down heat sources and create camouflage using the shadows of vegetation. When the “enemy” drone swept past the treetops, he decisively launched flares to create strong light interference, intending to use the gaps in the drone’s sensor reset to complete a tactical relocation. However, due to the late hour and drowsiness, his team members were slow to react and were detected by the “enemy” drone, resulting in the failure of the reconnaissance operation.

Once bitten, twice shy. The brigade’s Party Committee conducted a special study on improving nighttime combat capabilities, deciding to break with traditional nighttime training schedules and adjust some tactical training exercises to be conducted between 1:00 AM and 5:00 AM. Each exercise incorporates complex contingency plans, simulating a real battlefield environment throughout. They also meticulously refined training plans and scientifically formulated nighttime safety contingency plans to address potential challenges of late-night training.

“Initially, many soldiers struggled to adapt to the late-night training pace,” Song Zhenhua told the reporter. To help soldiers adjust to the time difference, the brigade, based on scientific guidance from the medical department, adopted methods such as staggered daytime rest, high-energy food supplements before training, and acupressure massage and hot drinks after training to help soldiers quickly recover their energy.

After a period of adaptive training, the soldiers gradually developed excellent all-weather combat skills, and the upgrade of tactics and techniques boosted the unit’s all-weather combat capabilities.

“The left-wing attack group has lost communication with the command post. Investigate and repair immediately!” During a late-night training session, Company Commander Ma of the communications company suddenly received this order. This occurred during the peak of the “atmospheric ducting” phenomenon in the early morning, causing abnormal refraction of radio signals at low altitudes, resulting in multiple false signal sources suddenly appearing in previously clear channels. Company Commander Ma quickly deployed drones to establish temporary links, while simultaneously directing portable radar vehicles to capture the true signal characteristics, successfully completing the subsequent mission.

“In the past, we always chose times with stable signals for training, but who knew electromagnetic waves could ‘play hide-and-seek’?” Company Commander Ma said. Now, through nighttime training closely aligned with actual combat, they have developed various cross-service communication coordination models and compiled a “Handbook for Responding to Complex Electromagnetic Environments in the Second Half of the Night,” significantly improving their nighttime anti-jamming capabilities.

As dawn broke, a sharp alarm pierced the morning mist, and the brigade’s participating soldiers immediately transitioned to armored assault training. Several drones roared into the sky, and infantry fighting vehicles deployed in formation, advancing towards the target area…

聚焦练兵备战，这个单位让军功章的成色在硝烟里见真章

来源：解放军报 作者：杨健江 责任编辑：郭妍菲 2025-12-19

东部战区陆军某旅评功评奖聚焦练兵备战——

实绩摆上桌面 荣誉实至名归

■杨健江

冬日清晨，东部战区陆军某旅一场实战化考核刚结束，指挥保障连官兵纷纷围在连队公示栏前，目光齐刷刷落在刚刚贴出的立功受奖人员名单上. 该连驾驶员桑郎罗布的名字，赫然列在首位.

“真没想到，一名驾驶员能在评功评奖中脱颖而出！”看到名单，大家由衷感慨.

其实，当初连里推荐桑郎罗布立三等功时，曾在官兵中引起争议：“开车也能立功”“方向盘难道比枪炮更重要”……身边战友的私下议论，像碎玻璃一样扎在桑郎罗布的心上. 思来想去，他主动找到指导员：“把立功机会让给别的同志吧. ”

指导员没接茬，只是递给他一瓶水：“不着急，明天再说. ”

第二天，连队召开军人大会，指导员亮出一张表格：全年任务、比武竞赛、考核成绩、民主测评，具体到人，一目了然.

“桑郎罗布全年安全行驶万余公里，零违章、零失误；在装备换季保养中，他带领全连驾驶员攻克 8 台老旧车辆维修保养技术难题，实现装备零故障；全要素演练期间，一台运输车突发故障堵住车库门，他冒着暴雨仅用 5 分钟排除故障，确保演练顺利进行……”面对全连官兵，指导员的话掷地有声，“这些算不算战斗力？是不是硬邦邦的成绩？”

指导员接着说：“表彰奖励不是‘分蛋糕’，必须凭实绩说话. ”官兵听完心服口服：荣誉就要经得起实绩检验、群众评议，让干得好的站 C 位、当主角.

“只有把荣誉授予实绩突出的官兵，才能真正立起‘靠素质立身、凭实绩进步’的鲜明导向，真正做到受奖者硬气、落选者服气. ”该旅领导介绍，以往组织评功评奖，存在论资排辈、平衡照顾的情况，“评奖”变成了“平奖”，看似皆大欢喜，实际上挫伤了官兵创先争优的积极性.

今年评功评奖工作展开后，该旅杜绝“人情席位”，不排“辈分座次”，要求基层开展工作公平公正，凭实绩说话. 他们严格依据《军队功勋荣誉表彰实施办法》等相关规定，坚持以战领建、以绩定奖，构建“任务清单+成绩榜单+贡献排位”三维评定模型，拉单列表形成

“实绩明白账”，并严格落实群众评议、机关联审、党委裁定等关键环节，以“实绩榜”立起评功评奖的硬标尺.

某连副班长胡子涵去年曾获奖项，今年又被推荐受表彰. 班里有新兵想提干，需要“四有”优秀士兵荣誉. 有人劝胡子涵“发扬风格”. 连队支委会上，党支部书记陶成龙将两人一年来的表现一并摆出：班长不在位，胡子涵主动补位，带领班组完成多项急难险重任务；这名新兵的单杠、3000 米跑课目勉强及格，专业技能也不够熟练. “荣誉不是‘让’出来的，而是实实在在干出来的！”最终，连队党支部推荐胡子涵为“四有”优秀士兵.

“犯过错的战士，还能戴红花？”义务兵陈植坤曾因夜里站岗时打盹在全连作检查，但他没有因此消沉，而是把教训转化为动力：午休练冲刺，夜里练深蹲. 年底军体运动会上，他以优异成绩刷新旅 400 米跑纪录. “功是功，过是过，必须一把尺子量到底. ”连队党支部经过充分酝酿，一致同意为陈植坤报请奖励.

“要让军功章的成色在战场上‘称斤两’，在硝烟里见真章. ”该旅领导表示，他们还把新质新域研训研战表现纳入奖励范畴，激励官兵战位立功、岗位建功，推动部队全面建设迈上新台阶、焕发新活力.

Focusing on Military Training and Combat Readiness, This Unit Demonstrates the True Value of Military Medals Amidst the Smoke of Battle

Source: PLA Daily

Author: Yang Jianjiang

Editor: Guo Yanfei

2025-12-19

A Brigade of the Eastern Theater Command Army Focuses on Military Training and Combat Readiness in its Merit Evaluation and Awards—Achievements on the Table, Honors Well-Deserved

■Yang Jianjiang

On a winter morning, a combat-oriented assessment of a brigade of the Eastern Theater Command Army had just concluded. Soldiers of the command support company gathered around the company’s bulletin board, their eyes fixed on the newly posted list of award recipients. The name of the company’s driver, Sanglang Luobu, was prominently displayed at the top.

“I never expected a driver to stand out in the merit evaluation and awards!” Everyone exclaimed sincerely upon seeing the list.

In fact, when the company initially recommended Sanglang Luobu for a third-class merit award, it caused controversy among the soldiers: “Can driving earn merit?” “Is the steering wheel more important than guns and cannons?”... The private discussions among his comrades pierced Sanglang Luobu’s heart like shards of glass. After much deliberation, he approached the political instructor: “Let’s give this opportunity for merit to another comrade.” The instructor didn’t respond, but simply handed him a bottle of water: “No rush, we’ll talk about it tomorrow.” The next day, the company held a general meeting of soldiers. The instructor displayed a table: annual tasks, competition results, assessment scores, and democratic evaluations—all clearly listed down to the individual.

“Sanglang Luobu drove over 10,000 kilometers safely throughout the year, with zero violations and zero errors; during the seasonal equipment maintenance, he led the company’s drivers to overcome the technical difficulties of repairing and maintaining eight old vehicles, achieving zero equipment malfunctions; during a full-element exercise, a transport vehicle suddenly broke down, blocking the garage door. He braved the torrential rain and resolved the problem in just five minutes, ensuring the exercise proceeded smoothly...” Addressing the entire company, the instructor’s words resonated deeply. “Don’t these count as combat effectiveness? Aren’t they solid achievements?”

The instructor continued: “Recognition and awards aren’t about ‘dividing the cake,’ they must be based on actual performance.” The soldiers were convinced: honors must withstand the test of performance and public evaluation, allowing those who perform well to take center stage. “Only by awarding honors to officers and men with outstanding achievements can we truly establish a clear orientation of ‘establishing oneself through competence and advancing based on performance,’ ensuring that award recipients feel confident and those who are not selected are convinced of their merits,” the brigade’s leadership explained. In the past, the evaluation and award process was plagued by seniority-based systems and favoritism, turning “awards” into “equal awards,” which, while seemingly pleasing to everyone, actually dampened the enthusiasm of officers and men to strive for excellence.

This year, after the evaluation and award process began, the brigade eliminated “favoritism” and “seniority-based ranking,” requiring grassroots units to conduct the work fairly and impartially, based on actual performance. They strictly adhered to relevant regulations such as the “Implementation Measures for Military Merit and Honor Commendation,” insisting on combat-oriented development and performance-based awards. They constructed a three-dimensional evaluation model of “task list + performance list + contribution ranking,” creating a clear record of performance. They also strictly implemented key processes such as public evaluation, joint review by the organization, and decision-making by the Party Committee, establishing a “performance list” as the hard standard for evaluation and awards.

Hu Zihan, a deputy squad leader in a certain company, had won an award last year and was recommended for commendation again this year. A new recruit in his squad wanted to be promoted

to officer and needed the “Four-Good” Outstanding Soldier honor. Some advised Hu Zihan to “show his style.” At the company’s Party branch committee meeting, Party branch secretary Tao Chenglong presented the performances of both men over the past year: when the squad leader was absent, Hu Zihan proactively filled in, leading his squad to complete several urgent, difficult, and dangerous tasks; the new recruit barely passed the horizontal bar and 3000-meter run, and his professional skills were not yet proficient. “Honor isn’t ‘given,’ it’s earned through hard work!” Ultimately, the company’s Party branch recommended Hu Zihan as a “Four-Good” Outstanding Soldier.

“Can a soldier who has made mistakes still receive a red flower?” Conscript Chen Zhikun was once reprimanded by the entire company for dozing off while on night duty, but he didn’t become discouraged. Instead, he turned the lesson into motivation: practicing sprints during lunch breaks and squats at night. At the end-of-year military sports meet, he broke the brigade’s 400-meter record with excellent results. “Merit is merit, and demerit is demerit; we must apply the same standard to all.” After thorough deliberation, the company’s Party branch unanimously agreed to nominate Chen Zhikun for an award.

“The true value of military medals must be judged on the battlefield, revealed in the smoke of war,” the brigade leadership stated. They also include performance in new-type training and combat in the award criteria to encourage officers and men to achieve merit in their positions and posts, thus propelling the unit’s overall development to a new level and revitalizing it.

第 75 集团军某旅强化兵种协同破解复训补训难题

来源：解放军报 作者：任芋亭 闵 宁 张忠博 责任编辑：孙悦 2025-12-20

第 75 集团军某旅强化兵种协同破解复训补训难题——

融入“体系棋盘”补短板

■任芋亭 闵 宁

初冬时节，滇西某地，第 75 集团军某旅一场综合演练激战正酣. 硝烟弥漫中，爆破手冲向障碍区，电抗分队同步释放干扰信号，切断“敌”通信链路. 与此同时，防空分队构筑对空拦截网，炮兵群实施火力压制，各兵种力量在指挥所一体化指挥下高效协同，演练现场战味十足.

“此次复训补训，我们牢固立起‘体系练兵’鲜明导向，核心就是破解以往‘单骑突进’与体系实战脱节的问题. ”该旅领导介绍，过去复训补训，各营常常存在“各自为战”现象，虽然单课目补弱成绩提升明显，但一到驻训阶段的协同演练，各兵种之间配合生疏、反应迟缓，看似已经攻克的短板再次凸显，导致“单项冒尖”难以汇聚“体系铁拳”，协同作战效果不佳.

今年，该旅将复训补训纳入“体系棋盘”统筹推进，通过跨兵种协同训练打通能力梗阻，实现短板互补、合力制胜.

演练现场，工兵连爆破班取代以往步兵营工兵班的人工破障，改用新型火箭爆破器无人爆破，有力支援步兵分队完成突击，破障效率大幅提升；电抗分队嵌入火力协同通信指挥链，通过自设复杂电磁环境，倒逼通信抗干扰能力提升……各兵种在互补中强化协同、在协同中找准短板，形成“训—演—改”闭合回路.

为提升复训补训质效，该旅改变以往各营“自训、自补、自考”模式，由机关梳理汇总年度演练暴露的短板，制订纠偏清单，按照“短板互补、优势并用、体系检验”方式，解决过去短板课目“头痛医头、脚痛医脚”的问题，以兵种协同演练达到“合中练、练中补”的目标.

在此基础上，他们还组织“跨营施教”，打破建制壁垒，选派 30 余名专业骨干交叉教学，通过“共同课目示范学、重点难点突出训、小特专业专攻练”等方式，盘活教学资源，推动训练质效提升.

如今，复训补训不再是该旅各营关起门来“修修补补”，而是融入“体系棋盘”共补短板，以往“训得好却考不好”“考得好却融不好”等难题得到有效破解，部队实战能力稳步提升.

用好练兵“黄金期”

■张忠博

眼下，部队已经结束年度军事训练考核，转入复训补训阶段. 这是查缺补漏、固强补弱的关键环节，轻视不得、马虎不得.

然而，有的单位缺少精准性，组训没有重点、不作区分，所有人“一套题”；有的把复训补训当作例行公事，简单组织就算完成任务……战斗力建设是一个系统工程，要求每一个节点都过硬、每一个课目都达标，复训补训不到位，就会形成“短板效应”，不仅影响战斗力建设成效，还会影响实战化军事训练深入推进. 各级应充分利用好这一练兵“黄金期”，瞄准梳理出的问题，选强配强训练骨干，制订科学有效的训练措施，展开针对性专攻精练，切实把漏项补上、短板固牢，推动战斗力水平全面提升.

A Brigade of the 75th Group Army Strengthens Intra-Service Coordination to Solve the Challenges of Retraining and Supplementary Training

Source: PLA Daily

Author: Ren Yuting, Min Ning, Zhang Zhongbo

Editor: Sun Yue

2025-12-20

A brigade of the 75th Group Army strengthens intra-service coordination to solve the challenges of retraining and supplementary training—Integrating into the "system chessboard" to address weaknesses

■Ren Yuting, Min Ning

In early winter, in a certain area of western Yunnan, a comprehensive exercise of a brigade of the 75th Group Army was in full swing. Amidst the smoke, demolition experts rushed towards the obstacle course, while the electronic warfare unit simultaneously released jamming signals to cut off the "enemy's" communication links. At the same time, the air defense unit constructed an air interception network, and the artillery group implemented fire suppression. All branches of the PLAA coordinated efficiently under the integrated command of the command post, making the exercise highly realistic.

"In this refresher and supplementary training, we firmly established a clear orientation towards 'systematic training,' the core of which was to address the disconnect between previous 'individual advances' and systemic combat realism," the brigade leadership explained. In the past, refresher and supplementary training often resulted in each battalion operating independently. While improvements in individual subjects were significant, during joint exercises at the field training phase, coordination between different branches of service became rusty, and responses were slow. The seemingly overcome weaknesses resurfaced, making it difficult for individual excelling to coalesce into a comprehensive "systematic force," leading to poor collaborative combat effectiveness.

This year, the brigade integrated refresher and supplementary training into a unified "systematic chessboard," using cross-branch collaborative training to overcome capability bottlenecks, achieve complementary weaknesses, and secure victory through combined efforts.

At the drill site, the demolition squad of the engineer company replaced the manual obstacle breaching previously performed by the infantry battalion engineer squads, using a new type of rocket-propelled demolition device for unmanned breaching. This effectively supported infantry units in completing their assaults, significantly improving obstacle breaching efficiency. The electronic warfare unit was integrated into the fire coordination communication command chain, creating a complex electromagnetic environment to force improvements in communication anti-jamming capabilities… Various branches of the armed forces strengthened coordination through complementarity and identified weaknesses through coordination, forming a closed loop of "training-exercise-improvement."

To improve the quality and effectiveness of retraining and supplementary training, the brigade changed the previous "self-training, self-supplementation, and self-examination" model of each battalion. The headquarters compiled and summarized the shortcomings exposed in the annual exercises, formulated a correction list, and addressed the past problem of "treating symptoms

rather than the root cause" in weak areas through a "complementary weaknesses, combined strengths, and systemic testing" approach. This achieved the goal of "training in conjunction with other branches and supplementing weaknesses through training" through inter-branch collaborative exercises.

Building on this foundation, they also organized "cross-battalion teaching," breaking down organizational barriers and selecting over 30 professional backbone personnel for cross-teaching. Through methods such as "demonstration learning of common subjects, focused training on key and difficult points, and specialized training in specific areas," they revitalized teaching resources and promoted improved training quality and efficiency.

Now, retraining and supplementary training are no longer isolated "patching and repairing" efforts by each battalion within the brigade; instead, they are integrated into a "systematic chessboard" to jointly address shortcomings. Previous problems such as "good training but poor performance in assessments" and "good performance in assessments but poor integration" have been effectively solved, and the unit's combat capabilities have steadily improved.

Making Good Use of the "Golden Period" for Training

■ Zhang Zhongbo

Currently, the unit has completed its annual military training assessment and entered the retraining and supplementary training phase. This is a crucial stage for identifying and addressing deficiencies, strengthening strengths and addressing weaknesses, and cannot be taken lightly or carelessly.

However, some units lack precision, failing to focus on key points or differentiate between subjects during training, with everyone receiving the same set of questions; others treat refresher and supplementary training as routine tasks, considering simple organization sufficient… Combat capability building is a systematic project, requiring every stage to be robust and every subject to meet standards. Inadequate refresher and supplementary training will create a "weak link effect," not only affecting the effectiveness of combat capability building but also hindering the in-depth advancement of realistic military training. All levels should fully utilize this "golden period" for training, targeting the identified problems, selecting and assigning strong training personnel, formulating scientific and effective training measures, and conducting targeted intensive training to effectively address omissions and strengthen weaknesses, thereby promoting a comprehensive improvement in combat capability.

第 78 集团军某旅借助信息技术提升复训补训质效

来源：解放军报 作者：张光轩 王麒淞 责任编辑：孙悦 2025-12-20

第 78 集团军某旅借助信息技术提升复训补训质效——

搭乘“智能快车”上台阶

■张光轩 王麒淞

仲冬北疆，呵气成霜，第 78 集团军某旅模拟训练中心内一派火热景象. 正在参加补差训练的下士郭涛端坐在防化侦察车模拟器前，仔细观察系统记录反馈的操作数据.

就在不久前的实装考核中，郭涛暴露出对某型试剂辨识能力不足的问题. 他将个人训练短板输入模拟训练系统后，随即获得一张内容详尽的“训练档案卡”，并被量身定制补差计划.

“过去，受场地、人员等限制，训练计划难以精准匹配个体差异. ”某营王营长坦言，选择在复训补训阶段吃“大锅饭”，基层确有苦衷. 一个连队每天要拆分多个组，虽然教练员对装备和流程非常熟悉，却难以精准掌握每个人的短板弱项，训练计划多依赖经验判断，导致“吃不饱”“吃不下”的现象时有发生，整体训练质效难有突破.

如何才能在补短板的同时不耽误提专长？经过集思广益，该旅决定引进覆盖各主战专业的模拟训练平台，利用平台还原防化侦察、工程机械、舟桥架设等专业装备的实操条件，系统记录参训官兵的训练数据.

然而，一次挖掘冻土作业时，中士董睿龙在模拟器上练就的技巧未能派上用场，险些耽误任务完成时效. “手上感觉不一样，真实的机械反馈和模拟器存在差异. ”他感慨道.

为解决“虚拟”与“现实”衔接中存在的问题，该旅组织技术骨干研究论证，完善“模拟+实装”衔接模式. 官兵首先在模拟器上熟悉流程，而后到装备上找感觉，再针对暴露的问题，回到模拟器上强化. 这种模式，能够帮助官兵走好从“虚拟”到“现实”的最后一步.

作为爆破专业“大拿”，过去每逢复训补训，陆荣壮就铆在教练员岗位，既要编写教案，又要组织示教，忙得连轴转. 今年，他得以抽出身来投入自己的补差训练. 笔者看到，陆荣壮利用模拟训练器材，有条不紊展开水下排爆等险难课目处置.

防化专修训练室内，VR 仿真器材营造真实战场环境；射击模拟系统上，弹着点分布和击发时机清晰可见……据了解，该旅围绕多个课目，借助信息技术手段探索形成组训机制，优良率较往年提升明显.

A Brigade of the 78th Group Army Enhances the Effectiveness of Retraining and Supplementary Training Through Information Technology.

Source: PLA Daily

Author: Zhang Guangxuan, Wang Qisong

Editor: Sun Yue

2025-12-20

A brigade of the 78th Group Army enhances the effectiveness of retraining and supplementary training through information technology—Taking the "Smart Express" to a new level

■ Zhang Guangxuan, Wang Qisong

In the midwinter of northern Xinjiang, breath turns to frost, but inside the simulation training center of a brigade of the 78th Group Army, a scene of bustling activity unfolds. Corporal Guo Tao, participating in supplementary training, sits attentively in front of a chemical reconnaissance vehicle simulator, carefully observing the operational data recorded and fed back by the system.

Just recently, during a live-fire assessment, Guo Tao revealed a deficiency in his ability to identify a certain type of reagent. After inputting his personal training weaknesses into the simulation training system, he immediately received a detailed "training file card" and a customized supplementary training plan.

"In the past, due to limitations in venue and personnel, training plans were difficult to accurately match individual differences," admitted Battalion Commander Wang of a certain battalion. He acknowledged that the grassroots level had its own difficulties in choosing to maintain a "common approach" during retraining and supplementary training. A company is often divided into multiple groups daily. While instructors are very familiar with the equipment and procedures, they struggle to accurately identify each individual's weaknesses and shortcomings. Training plans rely heavily on experience, leading to frequent instances of insufficient or inadequate training, hindering overall training effectiveness.

How can we address weaknesses while simultaneously developing specialized skills? After brainstorming, the brigade decided to introduce a simulation training platform covering all main combat specialties. This platform recreates the practical conditions of specialized equipment used in chemical defense reconnaissance, engineering machinery, and pontoon bridge construction, systematically recording training data from participating soldiers.

However, during a permafrost excavation operation, Sergeant Dong Ruilong's skills honed on the simulator were rendered useless, nearly delaying the mission's completion. "The feel is different in real hands; there's a difference between the feedback from real machinery and the simulator," he remarked.

To resolve the issues in bridging the "virtual" and "real" environments, the brigade organized technical experts to research and refine the "simulation + real equipment" integration model. Soldiers first familiarize themselves with the procedures on simulators, then get a feel for the equipment, and finally return to the simulator to reinforce any problems that arise. This model helps soldiers successfully take the final step from "virtual" to "real."

As a top expert in explosives, Lu Rongzhuang used to be constantly on the job as an instructor during refresher and retraining sessions, writing lesson plans and organizing demonstrations. This

year, he was able to dedicate time to his own remedial training. The author observed Lu Rongzhuang using simulation training equipment to methodically conduct underwater explosive ordnance disposal and other challenging tasks.

In the chemical defense training room, VR simulation equipment creates a realistic battlefield environment; on the shooting simulation system, the distribution of bullet impact points and firing timing are clearly visible… It is understood that the brigade has explored and formed a training mechanism around multiple subjects using information technology, resulting in a significant improvement in the pass rate compared to previous years.

2025 驻训观察·胜负闻思录丨顺藤摸瓜？请君入瓮！这场战术博弈藏着战场生存法则

来源：解放军报 作者：严子昌 魏 龙 蒋雨铖 责任编辑：孙悦 2025-12-20

侦察未设防，遭遇“顺藤摸瓜”

打破老套路，上演“请君入瓮”

■严子昌 魏 龙 解放军报特约通讯员 蒋雨铖

该旅官兵进行侦察搜索训练. 胡庆峰摄

沙场见闻

皖东密林，朔风渐起. 陆军某旅一场对抗训练激战正酣. 面对“敌”前沿工事，红方无人机操作手王和彬熟练操控无人机升空侦察.

“侦察结束，是否返回，请指示. ”不多时，王和彬报告.

“按预定方案返回. ”红方侦察分队指挥员况江庭的声音透着几分轻松，在他看来，这次侦察任务进展顺利.

一切似乎井然有序. 然而，致命的隐患正埋藏在这“井然有序”之中.

“是否需要扩大对无人机返程路径的监控范围？或者派出一支小队前出警戒？”二级上士粟积玉提醒道. 有着丰富侦察经验的他，深知蓝方的狡黠.

“你也太谨慎了. ”况江庭不以为意地摆摆手说，“无人机巡航高度不低，速度也不慢，蓝方地面部队想跟踪？难！还是按原计划操作，尽快回收，避免节外生枝. ”

正是这种盲目“自信”，给接下来的败局埋下伏笔：从指挥员到操作手，他们潜意识里认为，与侦察兵相比，无人机侦察体积小、速度快、隐蔽性强，蓝方发现尚且困难，更别提实施跟踪了.

空中，无人机飞向预定降落点；地面，王和彬正准备接应. 此刻，谁也没有想到，几公里外，精心伪装的几名蓝方官兵正悄然跟进.

原来，蓝方指挥员尹朝阳提前埋伏在阵地前沿，本想趁机搞“奇袭”，结果“歪打正着”撞见红方无人机回撤，更让他们意外的是，无人机居然毫无防备，径直飞向阵地. 尹朝阳当即决定抓住时机，迅速带人跟了上去.

无人机缓缓降落，红方还沉浸在完成任务的喜悦中，浑然不觉已成为蓝方瞄准镜里的“猎物”.

“行动！”随着尹朝阳一声令下，刹那间，枪声响起. 红方侦察分队根本来不及反应，便连同刚刚降落的无人机被“一锅端”.

导演部判定传来，况江庭有些难以置信. 尹朝阳走到无人机旁，笑道：“况连长，多谢‘天眼’带路，给我们的行动当了回好向导. ”

次日，双方易地再战，训练进入新阶段.

“同志们，昨天的跟头，栽得狠，但也栽得值！”首轮对抗训练的惨痛教训，像一盆冷水浇醒了红方侦察分队指挥员况江庭，“蓝方给我们上了一课，叫作‘螳螂捕蝉，黄雀在后’. 今天，咱们就演一出‘将计就计’！”

红方再次出动无人机对蓝方进行侦察，任务完成，无人机返航. 但这一次，情况截然不同.

无人机并未径直飞往降落点，而是在接近降落区域上空时，开始不规则机动，在空中划出几个“S”弯. 这一反常举动，同样被埋伏的蓝方捕捉.

“红方无人机轨迹异常，像是在兜圈子. ”蓝方侦察兵报告.

“对手这是学聪明了，想靠这种伎俩迷惑我们，但无人机总要降落，只要耐心跟上，一定能找到降落点. ”蓝方指挥员尹朝阳研判态势后，命令各组保持距离、持续跟踪.

无人机盘旋几周后，似乎确认安全，逐渐开始降落. 尹朝阳立即下令潜伏小组向该区域集结，准备故技重施.

然而，他们不知道的是，红方已布设“天罗地网”——侦察任务开始前，况江庭便召集骨干反复推演蓝方可能采取的手段，并制订了一套“双保险”应对方案.

一方面，他命令无人机返航时故意增加航迹复杂度，在预定区域上空多次盘旋、变向、悬停，最大限度干扰和摆脱潜在跟踪；另一方面，即便蓝方识破意图仍尾随而至，红方也早已在降落点周边设下伏兵，只要蓝方靠近，便可将其一举歼灭.

“报告，发现两组‘敌人’，分别从东北和东南方向靠近.”红方观测手的报告声在况江庭的耳机中响起，他嘴角微扬：“好！等他们全部进入包围圈.”

蓝方侦察小组小心翼翼地跟踪红方无人机，殊不知，他们正一步步落入对手设下的陷阱.

“砰！”随着手雷在不远处炸响，四面八方响起的枪声和包抄上来的红方，让蓝方侦察小组瞬间明白——中计了！

没过多久，导演部判定：蓝方侦察小组全员被俘.

事后，况江庭与尹朝阳再次相遇. 况江庭主动上前说：“放松警惕的教训犹如当头一棒，把我们打醒了. 战场上，没有一刻是安全的.”

尹朝阳向况江庭竖起大拇指：“你们用无人机当诱饵，这招‘回马枪’厉害.”

指挥员之思——

首战遇挫，根本原因是敌情观念不强，我们以为无人机飞得高、速度快，蓝方就“看不见、追不上、打不着”. 殊不知，战场上没有一刻是安全的，只有站在“假如我是蓝方”的角度审视战场态势，才能时刻保持警惕，掌握战场主动.

——陆军某旅连长 况江庭

兵无常势，水无常形. 首战，我利用对手麻痹心态，“顺藤摸瓜”取得胜利；再战，对手调整战术，摒弃“老套路”，而我们企图故技重施，即便发现无人机轨迹异常，却未引起足够警觉. 教训告诉我：只有做到因时因地因势制宜，依据局势和对手变化调整战术战法，才能占据主动、制胜战场.

——陆军某旅连长 尹朝阳

编辑观澜

忘战必危，怠战必败

■康子湛

忘战必危，怠战必败. 眼睛里永远有敌情，才会有打仗的标准、打仗的作风；脑海里永远有敌人，才会有能打仗的努力、打胜仗的动力.

文中两场训练一胜一负，恰如一枚硬币的两面，告诉我们一个道理——战场上，危险无处不在，但最大的危险是对危险的视而不见. 当一支部队习惯于熟悉的“套路”，当一名军人失去了对危险的警觉，失败便悄然埋下伏笔.

纵观全军演训场，敌情意识犹如一面明镜，既映照指挥员在复杂态势下的决策水平，又检验部队在极限条件下的作战效能，也丈量着训练场与战场之间的真实距离.

这一年，敌情预判催生新思维. 陆军某旅着眼智能化战争新特点，在考核中精心构设“指挥节点毁瘫”“遭‘敌’无人机群突袭”等新特情，让训练场成为未来战场的“镜像场”. 空军某部建立“电磁频谱特情库”，通过动态追踪、智能分析干扰规律，实现对“敌”战术企图的精准洞察、提前预判. 从“临机应对”到“前瞻设计”，敌情预判意识已经成为战斗力生成的先导力量，牵引部队训练向未来战争靠拢、向打赢标准聚焦.

这一年，体系应对展现新能力. 陆军某旅构设高难度飞行靶机、高频次“敌”机袭扰、对抗性模拟攻击等复合型“敌”情，检验部队快速研判、高效协同和精准打击的体系能力. 火箭军某旅在强电磁压制“黑障区”内，快速启用备用通信链路，实现火力协同“不断链”. 从单点应对到体系联动，从被动防御到主动反制，敌情应对能力在体系化训练中实现整体跃升.

这一年，精准构设确立新标准. 海军航空兵某部鲜明立起“每个架次都是实战”的训练导向，通过构设复杂“电磁迷雾”，让飞行员在极限对抗条件下锤炼“快敌一秒、胜敌一招”的过硬本领. 陆军某旅将装备完好性检查纳入战备拉动必检内容，从防毒面具气密性到通信器材抗干扰性，实施全装备战备普查，确保敌情意识落实到“最后一毫米”. 敌情构设从粗放式向精准化转变，从概略化向实战化跃升，为打赢未来战争奠定坚实基础.

唯有牢记“眼睛里永远有敌情、脑海里永远有敌人”，把每一个“意外”视为战场上的必然，把每一个细节当作决定胜负的关键，才能不断缩小训练场与战场之间的差距；只有把敌情意识转化为官兵的内心警觉和练兵场上的条件反射，才能让今天的训练对明天的胜利负责.

Unprepared Reconnaissance Leads to “Following the Clues”

Breaking the Mold, a “Trap to Catch” Segment is Staged

■ Yan Zichang, Wei Long, PLA Daily Special Correspondent Jiang Yucheng

Soldiers of the brigade conduct reconnaissance and search training. Photo by Hu Qingfeng

Battlefield Observations

In the dense forests of eastern Anhui, a north wind begins to blow. A fierce confrontation training exercise is underway at an army brigade. Facing the “enemy’s” forward fortifications, Wang Hebin, a drone operator from the Red Army, skillfully maneuvers the drone for reconnaissance.

“Reconnaissance complete. Should we return? Please give instructions.” Shortly after, Wang Hebin reports.

“Return according to the predetermined plan.” The voice of Kuang Jiangting, commander of the Red Army reconnaissance unit, is somewhat relaxed. In his view, this reconnaissance mission is progressing smoothly.

Everything seemed orderly. However, a fatal hidden danger lurked within this “orderly” facade.

“Should we expand the monitoring range of the drone’s return path? Or send a small team forward for reconnaissance?” Sergeant Su Jiyu suggested. With extensive reconnaissance experience, he knew the Blue Force’s cunning.

“You’re being too cautious,” Kuang Jiangting waved his hand dismissively. “The drone’s cruising altitude isn’t low, and its speed isn’t slow. Blue Force ground troops want to track it? Difficult! Let’s stick to the original plan, recover it as soon as possible, and avoid any unforeseen complications.”

It was this blind “confidence” that sowed the seeds of their subsequent defeat: from commanders to operators, they subconsciously believed that compared to reconnaissance soldiers, drones were smaller, faster, and more stealthy; the Blue Force would have difficulty even detecting them, let alone tracking them.

In the air, the drone flew towards its designated landing point; on the ground, Wang Hebin prepared to receive it. At that moment, no one suspected that several kilometers away, several carefully camouflaged Blue Force soldiers were quietly following.

It turned out that Blue Force commander Yin Chaoyang had been lying in ambush at the front lines, intending to launch a surprise attack. However, he inadvertently stumbled upon the Red Force drone retreating. Even more surprisingly, the drone was completely unprepared and flew straight

towards the position. Yin Chaoyang immediately decided to seize the opportunity and quickly led his men to follow.

The drone slowly landed. The Red Force, still basking in the joy of completing their mission, was completely unaware that they had become “prey” in the Blue Force’s sights.

“Action!” With Yin Chaoyang’s order, gunfire erupted instantly. The Red Force reconnaissance team had no time to react and was wiped out along with the drone that had just landed.

The directorate’s assessment came through, leaving Kuang Jiangting somewhat incredulous. Yin Chaoyang walked to the drone and smiled, “Company Commander Kuang, thank you ‘Sky Eye’ for guiding our operation.”

The next day, the two sides switched locations and resumed training, entering a new phase.

“Comrades, yesterday’s setback was devastating, but worthwhile!” The painful lesson of the first round of combat training was like a bucket of cold water poured over Kuang Jiangting, commander of the Red Team’s reconnaissance unit. “The Blue Team taught us a lesson called ‘The mantis stalks the cicada, unaware of the oriole behind.’ Today, we’ll put on a ‘turn the tables’ play!” The Red Team once again deployed drones to reconnoiter the Blue Team. The mission was accomplished, and the drones returned. But this time, the situation was completely different.

The drones didn’t fly directly to the landing point. Instead, as they approached the landing area, they began to maneuver erratically, drawing several “S” curves in the air. This unusual behavior was also detected by the ambushing Blue Team.

“The Red Team’s drone trajectory is abnormal; it’s like it’s circling,” reported a Blue Team reconnaissance soldier.

“The enemy has learned their lesson and is trying to mislead us with this tactic, but the drones will eventually land. As long as we patiently follow, we’ll definitely find the landing point,” Blue Team commander Yin Chaoyang assessed the situation and ordered each group to maintain distance and continue tracking. After circling for several weeks, seemingly confirming safety, the drone gradually began to land. Yin Chaoyang immediately ordered the infiltration team to assemble in the area, preparing to repeat the same tactic.

However, unbeknownst to them, the Red Team had already laid a “net of traps”—before the reconnaissance mission began, Kuang Jiangting had convened key personnel to repeatedly simulate the Blue Team’s possible tactics and devised a “double-insurance” response plan.

On one hand, he ordered the drone to deliberately increase the complexity of its flight path upon return, circling, changing direction, and hovering multiple times over the designated area to maximize interference and evade potential tracking; on the other hand, even if the Blue Team discerned their intentions and followed, the Red Team had already laid an ambush around the landing point, ready to annihilate the Blue Team as soon as they approached.

“Report, two groups of ‘enemy’ detected, approaching from the northeast and southeast respectively.” The Red Team observer’s report rang in Kuang Jiangting’s earpiece. A slight smile played on his lips: “Good! Wait until they’re all within the encirclement.” The Blue Team reconnaissance team cautiously tracked the Red Team drone, unaware that they were falling into a trap set by their opponents.

“Bang!” A grenade exploded nearby, followed by gunfire from all directions and the encircling Red Team, instantly making the Blue Team reconnaissance team realize—they’d been tricked!

Shortly afterward, the command determined: the entire Blue Team reconnaissance team had been captured.

Afterward, Kuang Jiangting and Yin Chaoyang met again. Kuang Jiangting stepped forward and said, “The lesson of letting our guard down was like a wake-up call, waking us up. There is never a safe moment on the battlefield.” Yin Chaoyang gave Kuang Jiangting a thumbs up: “Your use of drones as bait was a brilliant ‘counter-attack’ tactic.” The Commander’s Reflection—The initial setback was fundamentally due to a weak understanding of the enemy situation. We assumed that because the drones flew high and fast, the Blue Force couldn’t see them, catch up with them, or hit them. Little did we know that there is never a safe moment on the battlefield. Only by examining the battlefield situation from the perspective of “if I were the Blue Force” can we maintain constant vigilance and seize the initiative.

—Kuang Jiangting, Company Commander of an Army Brigade Military tactics are ever-changing, like water without a fixed shape. In the first battle, we took advantage of the opponent’s complacency and achieved victory by “following the clues.” In the second battle, the opponent adjusted their tactics, abandoning their “old routines,” while we attempted to repeat the same trick. Even when we discovered the abnormal drone trajectory, we failed to raise sufficient alarm. The lesson I learned is that only by adapting to the times, places, and circumstances, and adjusting tactics and strategies according to changes in the situation and the opponent, can we seize the initiative and win on the battlefield.

—Yin Chaoyang, Company Commander of an Army Brigade

Edited by Guan Lan

Forgetting war is dangerous; complacency in war is sure to lead to defeat

■Kang Zizhan

Forgetting war is dangerous; complacency in war is sure to lead to defeat. Only by always keeping the enemy situation in mind can we have the standards and style for fighting; only by always keeping the enemy in mind can we have the effort to fight and the motivation to win.

The two training exercises in the article, one win and one loss, are like two sides of the same coin, telling us a truth—on the battlefield, danger is everywhere, but the greatest danger is ignoring it.

When a unit becomes accustomed to familiar "routines," and when a soldier loses his awareness of danger, defeat is quietly sown.

Looking across the entire army's training grounds, enemy situation awareness is like a clear mirror, reflecting the commander's decision-making level in complex situations, testing the unit's combat effectiveness under extreme conditions, and measuring the true distance between the training ground and the battlefield.

This year, enemy situation prediction has spurred new thinking. An army brigade, focusing on the new characteristics of intelligent warfare, meticulously constructed new scenarios during assessments, such as "command node destruction and paralysis" and "surprise attack by enemy drone swarms," turning the training ground into a "mirror image" of the future battlefield. An air force unit established an "electromagnetic spectrum special situation database," achieving precise insight and early prediction of enemy tactical intentions through dynamic tracking and intelligent analysis of interference patterns. From "immediate response" to "forward-looking design," enemy situation prediction awareness has become a leading force in combat capability generation, guiding troop training towards future warfare and focusing on the standards of victory.

This year, system-wide response has demonstrated new capabilities. An army brigade constructed complex enemy situations, including high-difficulty target drones, high-frequency enemy aircraft harassment, and adversarial simulated attacks, testing the unit's system-wide capabilities for rapid analysis, efficient coordination, and precise strikes. A rocket force brigade, within a strong electromagnetic suppression "blackout zone," rapidly activated backup communication links, ensuring uninterrupted fire coordination. From single-point responses to systemic coordination, from passive defense to proactive countermeasures, the ability to respond to enemy situations has achieved a comprehensive leap forward through systematic training.

This year, precise situation assessment has established new standards. A naval aviation unit has clearly established a training orientation of "every sortie is real combat," using complex "electromagnetic fog" to hone pilots' skills to "beat the enemy by a second and defeat them by a single move" under extreme combat conditions. An army brigade has incorporated equipment integrity checks into mandatory inspections during combat readiness mobilizations, conducting comprehensive combat readiness checks on all equipment, from the airtightness of gas masks to the anti-jamming capabilities of communication equipment, ensuring that enemy situation awareness is implemented down to the "last millimeter." Enemy situation assessment has shifted from extensive to precise, and from generalized to combat-oriented, laying a solid foundation for winning future wars.

Only by keeping in mind that "there is always an enemy in our eyes and an enemy in our minds," treating every "unexpected event" as inevitable on the battlefield, and every detail as the key to victory or defeat, can we continuously narrow the gap between the training ground and the battlefield. Only by transforming the awareness of the enemy into the inner vigilance of officers

and men and the conditioned reflex on the training ground can we ensure that today's training is responsible for tomorrow's victory.

训练场呈现崭新练兵图景，复补训模式之变驱动官兵能力跃升

来源：解放军报 作者：倪鑫磊 朱君 廖晓彬 责任编辑：郭妍菲 2025-12-22

陆军某旅改进复补训工作——

各专业分队一起“练协同”

■倪鑫磊 朱 君 解放军报特约记者 廖晓彬

寒冬时节，陆军某旅综合训练场呈现一幅崭新的练兵图景：多支专业分队打破建制，在同一地域穿插展开复补训，彼此互为条件、查缺补漏. 这一幕，正是该旅聚焦多兵种协同改进复补训工作的一个缩影.

正在现场组织训练的干部邹家宝介绍，以往旅里都是按照“按营集约、按类编组”模式组织复补训，虽然人员分层组训，但各分队往往“各自为战”，侧重于个人基础课目补差，忽视了多兵种专业协同训练. 如今，复补训工作改进后，既能补齐官兵个人能力短板，又可以有效提升协同作战效能.

这一思路，源于此前一次演练的失败经历.

那次，该旅组织营战术综合演练. 舟桥分队快速完成浮桥架设后，突遭“敌”炮火袭击特情，因伪装分队发烟掩护不及时，导致行动迟滞、“战损”严重. 这两个分队官兵专业素质都很过硬，为何“战场”配合不力？原来，舟桥分队呼叫掩护请求后，未给伪装分队留出足够机动时间；伪装分队接到指令后，未与舟桥分队沟通，导致制订的方案出现偏差.

这种情况并非个例. 日常蹲点跟训中，该旅党委一班人发现，其他分队在演训中也一定程度存在专业能力强、协同能力弱等问题，根本原因还是各兵种分队合练机会少，协同配合生疏. “组织开展复补训，不能只注重提高单兵能力素质，还必须夯实战术协同基础. ”该旅领导态度坚决.

为此，他们果断转换思路，推动复补训工作从“各自补差”向“协同补训”转型，打破专业与建制壁垒，统筹训练场地资源，组织各专业分队在多兵种协同模式下展开强化训练，并围绕同一实战背景制订计划，设置具体内容.

在该旅渡河训练场，记者看到，舟桥分队与道路分队“合兵一处”. 舟桥分队中士黄立盼是一名门桥指挥员，由于专业基础扎实，个人补差训练阶段，他很快通过考核检验，随即被编入由道路分队二级上士费亚权所带领的小组进行合练.

码头边，费亚权根据黄立盼的指令，熟练操控机械设备平整道路，黄立盼则依据费亚权实时通报的工作进度，快速指挥门桥装卸载作业. 小组其他成员各司其职、有序操作. 整个过程，两个分队人员配合默契，衔接流畅，作业效率显著提升.

为了增进各专业之间的互联互通，此次复补训中，各分队训练骨干在完成个人补差的同时，还被派往其他专业分队担任教员，既传授本专业知识技能，又向兄弟单位学习战术战法，真正使复补训成为各专业分队能力融合的催化剂.

伪装与侦察两个专业，平时训练中互为对手，上了“战场”又需要密切配合. 复补训中，伪装分队训练骨干、三级军士长刘盟来到侦察分队，系统讲解战场伪装的要领，并请侦察分队的战友挑毛病、找破绽. 在此过程中，他也学习掌握了最新的反侦察技能.

前不久，旅里组织复补训阶段性成效检验考核. 在侦察分队和伪装分队协同作业的一个课目中，侦察分队骨干吴彤运用刘盟所教的专业知识，敏锐识别出以往易被忽略的伪装痕迹. “以前看到异常也说不出门道，经过刘班长的点拨，一眼就能看透虚实. ”吴彤坦言，这种双向嵌入式的“互教互学”模式，破除了各专业间的认知障碍，熟悉了彼此装备的性能边界.

复补训模式之变，驱动旅队整体能力跃升. 近期考核数据显示，该旅官兵在基础课目合格率、专业课目优良率稳步提高的同时，跨专业协同课目成绩也有明显提升. 官兵普遍反映，如今的复补训，让每个人都能在“体系棋盘”上精准发力、固强补弱.

“从单项能力的‘修修补补’到战术协同的‘加钢淬火’，复补训工作还有很大的改进空间. ”该旅领导介绍，他们正在探索建立有关常态化机制，为实战化训练奠定更加坚实的基础.

A New Training Landscape Emerges on the Training Ground: Changes in Remedial Training Model Drive a Leap in Officers’ and Soldiers’ Capabilities

Source: PLA Daily

Authors: Ni Xinlei, Zhu Jun, Liao Xiaobin

Editor: Guo Yanfei

An Army Brigade Improves Remedial Training—Specialized Units Practice Coordination Together

■ Ni Xinlei, Zhu Jun, PLA Daily Special Correspondent Liao Xiaobin

In the depths of winter, a new training landscape unfolds on the comprehensive training ground of an Army brigade: multiple specialized units, breaking down organizational structures, conduct remedial training in the same area, mutually supporting each other and addressing weaknesses.

This scene is a microcosm of the brigade's focus on improving remedial training through multi-service coordination.

Zou Jiabao, an officer organizing training on-site, explained that previously, the brigade organized remedial training according to a "battalion-based, category-based" model. Although personnel were trained at different levels, each unit often operated independently, focusing on improving individual basic skills while neglecting multi-service professional coordination training. Now, with improved retraining, not only can individual soldier skill deficiencies be addressed, but coordinated combat effectiveness can also be significantly enhanced.

This approach stems from a previous failed exercise.

In that exercise, the brigade organized a battalion-level tactical drill. After the pontoon bridge unit quickly completed the pontoon bridge erection, it was suddenly attacked by "enemy" artillery fire. Due to the camouflage unit's delayed smoke cover, the operation was slowed and "traumatized." Both units had highly skilled personnel; why was their "battlefield" coordination so poor? It turned out that after the pontoon bridge unit called for cover, it did not allow the camouflage unit sufficient time to maneuver; and after receiving the order, the camouflage unit failed to communicate with the pontoon bridge unit, leading to deviations in the planned strategy.

This situation is not an isolated case. During routine on-site training, the brigade's leadership discovered that other units also exhibited problems to some extent in training, such as strong professional skills but weak coordination. The root cause was the lack of opportunities for joint training among different branches of the armed forces, resulting in unfamiliarity with coordination and cooperation. "Organizing retraining should not only focus on improving individual soldier capabilities, but also on strengthening the foundation of tactical coordination," the brigade leadership firmly stated.

To this end, they decisively shifted their approach, transforming retraining from "individual improvement" to "collaborative improvement," breaking down professional and organizational barriers, coordinating training ground resources, and organizing various specialized units to conduct intensive training under a multi-service collaborative model. They also developed plans and set specific content around the same combat scenario.

At the brigade's river-crossing training ground, reporters observed the pontoon bridge unit and the road unit working together. Sergeant Huang Lipan of the pontoon bridge unit, a pontoon bridge commander, quickly passed the assessment during his individual improvement training due to his solid professional foundation and was subsequently assigned to a group led by Sergeant Fei Yaquan of the road unit for joint training.

At the dock, Fei Yaquan skillfully operated machinery to level the road according to Huang Lipan's instructions, while Huang Lipan quickly directed the loading and unloading operations of the pontoon bridge based on Fei Yaquan's real-time progress reports. Other members of the group

performed their duties in an orderly manner. Throughout the entire process, the two detachments cooperated seamlessly, resulting in significantly improved operational efficiency.

To enhance interdisciplinary collaboration, during this refresher training, training leaders from each detachment, while completing their individual remedial training, were also assigned to other specialized detachments as instructors. They not only imparted their professional knowledge and skills but also learned tactics and strategies from other units, truly making the refresher training a catalyst for the integration of capabilities among the various specialized detachments.

The camouflage and reconnaissance specialties are adversaries in peacetime, but require close cooperation on the "battlefield." During the refresher training, Sergeant First Class Liu Meng, a training leader from the camouflage detachment, visited the reconnaissance detachment, systematically explaining the essentials of battlefield camouflage and asking his comrades to point out flaws and weaknesses. In the process, he also learned and mastered the latest counter-reconnaissance skills.

Recently, the brigade organized a phase-one assessment of the refresher training's effectiveness. In a collaborative exercise between the reconnaissance and camouflage detachments, Wu Tong, a key member of the reconnaissance detachment, used the professional knowledge taught by Liu Meng to keenly identify camouflage traces that were previously easily overlooked. "Before, even when I saw something unusual, I couldn't articulate why. But after Squad Leader Liu's guidance, I can see right through it," Wu Tong frankly admitted. This two-way, embedded "mutual teaching and learning" model has broken down cognitive barriers between different specialties, allowing them to become familiar with the performance boundaries of each other's equipment.

This shift in the retraining model has driven a leap in the overall capabilities of the brigade. Recent assessment data shows that while the pass rate for basic subjects and the excellent rate for specialized subjects have steadily increased, the performance in cross-specialty collaborative subjects has also significantly improved. Soldiers generally report that the current retraining allows everyone to precisely exert their strengths and address weaknesses within the "system chessboard."

"From 'patching up' individual capabilities to 'forging and tempering' tactical coordination, there is still much room for improvement in retraining," the brigade leadership explained. They are exploring the establishment of a regular mechanism to lay a more solid foundation for combat-oriented training.

军政兼优！陆军某旅瞄准战场需求重塑政治干部好样子

来源：解放军报 作者：丁凯强 石 宇 宋世杰 责任编辑：孙悦 2025-12-22

陆军某旅引导政治干部锻造综合能力素质——

"两个行家里手"活跃在演兵场

■丁凯强 解放军报记者 石 宇 特约记者 宋世杰

炮声轰鸣，硝烟弥漫. 初冬时节，陆军某旅一场实战化对抗训练激战正酣. “我方炮兵阵地遭‘敌’火力打击，出现人员伤亡……”对抗进入白热化阶段，上级突然下达导调指令. 与此同时，对手采取无人机喊话等手段展开猛烈心理攻势，企图夸大“战损”以动摇炮兵分队军心士气.

紧急关头，某连刘指导员按照作战方案，立即展开战场鼓动. 他深入一线阵地，一边阐明实际战斗情况，一边号召官兵坚守阵地、顽强战斗. 不仅如此，他还带领突击组果断前出，操纵反无人装备干扰“敌”无人机信号，利用便携式喊话系统对“敌”展开诱导劝降，有效遏制对手心理攻势，为赢得对抗最终胜利奠定了基础.

“无论军事干部还是政治干部，上了战场都要带兵打仗，只有平时练就军政兼优的过硬本领，才能更好地适应战场需求. ”该旅领导介绍，为深入学习贯彻《关于大力弘扬优良传统、全面肃清流毒影响 重塑政治干部形象威信的若干规定》，他们积极教育引导政治干部弘扬我军政治工作优良传统，增强补短板的紧迫感、强素质的危机感，争当上台能讲课、上装能操作、上场能组训、上阵能指挥的“两个行家里手”.

为了加速政治干部能力升级，该旅按照“追寻本源、讨论辨析、画像立样”思路，组织政治干部围绕“共和国勋章”获得者李延年等优秀政治干部的先进事迹开展集体讨论辨析，对照政治工作“十一个坚持”优良传统、“军队好干部五条标准”查找自身存在的问题不足，明确努力方向；常态开展“政治干部学军事”活动，邀请旅队训练骨干、精武尖子为政治干部授课，帮助政治干部深学军事理论、熟悉装备操作. 该旅还以大项任务为牵引，让政治干部参与任务筹划、动员部署、火力计划制订、实弹射击指挥等环节，全方位淬炼政治干部军事素质.

该旅干部孟子阳从旅机关调整到连队担任指导员后，给自己立下一条“铁规矩”：练兵备战冲在前，险难任务带头干. 持续深化政治整训以来，孟子阳积极参加“政治干部学军事”活动，军事素质提升明显，争当“两个行家里手”的底气更足. 前不久，孟子阳所在连组织某新型火炮实弹射击检验训练. 训练展开在即，连长因临时受领另一项紧急任务无法参加，带队组训的担子落到了孟子阳身上. 虽是临阵受命，孟子阳毫不慌张，主动挑起大梁，带领连队按原定计划机动至陌生地域，组织官兵按时展开训练. 训练展开后，面对专业教学力量不足、没有成熟经验借鉴等实际困难，孟子阳带头查资料、做笔记，逐条梳理装备操作技巧，带领连队骨干总结出多种校炮操炮方法，最终圆满完成任务.

“指导员冲锋的身影，就是最有力的战场动员. ”回忆这次任务经历，该连军士孙浩楠感触颇深：“任务期间，指导员以身作则、冲锋在前，以实际行动带动大家奋勇争先，立起了政治干部的好样子. ”

采访期间，记者踏访该旅多个演兵场，政治干部身先士卒、模范带头的身影随处可见. 旅指挥所内，指挥席上的政治干部反应迅速，提出的多条建议被指挥员采纳；营指挥车里，教导员与营长共同坐镇指挥，熟练参与战场决策；火炮阵地上，指导员带领官兵完成装备展开作业后，适时跟进展开战场鼓动……

“战斗力标准是军队建设唯一的根本的标准，政治工作的‘准星’必须始终瞄准能打胜仗‘靶心’. ”该旅领导介绍，政治干部弘扬优良传统，练兵备战当先锋、站排头，有效激发了官兵精武强能热情，今年以来，部队多次完成上级赋予的重大任务. “我们将引导政治干部持续加强革命性锻造，进一步归正政治品质、思想作风和工作指导，以过硬作风和形象感召部队、取信官兵，推动单位全面建设迈上新台阶. ”该旅领导说.

Excellent in Both Military and Political Affairs! An Army Brigade Aims to Reshape the Image of Political Cadres to Meet Battlefield Needs

Source: PLA Daily

Editor: Sun Yue

2025-12-22

An Army brigade guides political cadres to forge comprehensive capabilities and qualities—“Two experts” active on the training ground

■ Ding Kaiqiang, PLA Daily reporter; Shi Yu, special correspondent; Song Shijie

The roar of artillery fire and the smoke of battle filled the air. In early winter, realistic combat training was in full swing at an Army brigade. “Our artillery positions have been attacked by ‘enemy’ fire, resulting in casualties...” As the confrontation reached its climax, a directive from higher command was suddenly issued. At the same time, the opposing force launched a fierce psychological offensive using methods such as drone broadcasts, attempting to exaggerate “trauma” to undermine the morale of the artillery units.

In this critical moment, Political Instructor Liu of a certain company, following the operational plan, immediately launched a battlefield mobilization. He went deep into the front-line positions, explaining the actual combat situation while calling on officers and men to hold their positions and fight tenaciously. Furthermore, he led his assault team forward decisively, manipulating anti-drone equipment to jam the signals of “enemy” drones and using a portable loudspeaker system to induce and persuade the “enemy” to surrender, effectively curbing the opponent’s psychological offensive and laying the foundation for winning the final victory.

“Whether military or political officers, they must lead troops into battle. Only by honing their military and political skills in peacetime can they better adapt to the demands of the battlefield,” the brigade leadership explained. To thoroughly study and implement the “Several Provisions on Vigorously Promoting Fine Traditions, Comprehensively Eliminating the Poisonous Influence, and Reshaping the Image and Prestige of Political Cadres,” they actively educate and guide political cadres to carry forward the fine traditions of our army’s political work, enhance their sense of urgency in addressing shortcomings and their sense of crisis in improving their skills, striving to become “two experts”: capable of lecturing, operating equipment, organizing training, and commanding in battle.

To accelerate the upgrading of political cadres’ capabilities, the brigade, following the approach of “tracing the origins, discussing and analyzing, and creating role models,” organized political cadres to conduct collective discussions and analyses on the advanced deeds of outstanding political cadres such as Li Yannian, recipient of the “Medal of the Republic.” They compared their own shortcomings against the “eleven principles of political work” and the “five standards for good military cadres,” clarifying their direction for improvement. The brigade also regularly conducts “political cadres learning military skills” activities, inviting brigade training backbone personnel and elite soldiers to give lectures to political cadres, helping them to deeply study military theory and become familiar with equipment operation. Furthermore, the brigade uses major missions as a driving force, involving political cadres in mission planning, mobilization and deployment, firepower planning, and live-fire command, comprehensively honing their military qualities.

After being transferred from the brigade headquarters to serve as a political instructor in a company, Meng Ziyang, an officer in the brigade, set a strict rule for himself: to be at the forefront of training and combat readiness, and to take the lead in undertaking dangerous and difficult tasks. Since the ongoing political rectification campaign, Meng Ziyang has actively participated in the “Political Cadres Learn Military Skills” activity, resulting in a significant improvement in his military proficiency and giving him greater confidence in becoming an expert in both military and civilian fields. Not long ago, Meng Ziyang’s company organized live-fire testing training for a new type of artillery. With the training about to begin, the company commander was unable to participate due to an urgent assignment, leaving Meng Ziyang to lead the training. Despite being assigned this task at the last minute, Meng Ziyang remained calm and proactively took on the responsibility, leading his company to move to an unfamiliar area according to plan and organizing the troops to begin training on schedule. After the training commenced, facing practical difficulties such as insufficient professional teaching resources and a lack of mature experience to draw upon, Meng Ziyang took the lead in researching materials and taking notes, meticulously reviewing equipment operation techniques, and leading the company’s key personnel to summarize various methods for calibrating and operating the artillery, ultimately successfully completing the mission.

“The political instructor’s charging figure is the most powerful battlefield mobilization.” Recalling this mission experience, Sergeant Sun Haonan of the company was deeply moved: “During the

mission, the political instructor set an example by charging ahead, inspiring everyone to strive for excellence with his actions, setting a good example for political cadres." During the interview, the reporter visited several training grounds of the brigade, where the exemplary figures of political cadres leading by example were everywhere. Inside the brigade command post, political cadres on the command seat reacted quickly, and many of their suggestions were adopted by the commander; in the battalion command vehicle, the political instructor and battalion commander jointly commanded, skillfully participating in battlefield decision-making; on the artillery positions, after leading the soldiers to complete equipment deployment operations, the political instructor followed up with timely battlefield mobilization…

"Combat effectiveness is the sole fundamental standard for military construction, and the 'aisle' of political work must always be aimed at the 'bullseye' of winning battles." The brigade leadership explained that political cadres, carrying forward fine traditions, took the lead in training and preparing for war, effectively stimulating the enthusiasm of officers and men for honing their skills and abilities. Since the beginning of this year, the unit has successfully completed several major tasks assigned by higher authorities. "We will guide political cadres to continuously strengthen their revolutionary spirit, further rectify their political qualities, ideological style, and work guidance, and inspire the troops and gain the trust of officers and men with their excellent work style and image, so as to promote the overall development of the unit to a new level," said the brigade leader.

新疆军区某红军团"师带徒"模式激活军士培养新动能

来源：解放军报 作者：李会翔 滕宇飞 高 群 责任编辑：孙悦 2025-12-22

新疆军区某红军团不拘一格探索军士培养模式——

中士的"师傅"是下士

■李会翔 滕宇飞 解放军报特约通讯员 高 群

日前，笔者走进新疆军区某红军团综合训练场，恰好碰见中士胡好文正向他的带教师傅、下士刘洪涛汇报当天的组训情况.

"徒弟比师傅军衔高？"乍一听他俩的"师徒"关系，笔者以为自己听错了. 察觉到笔者的疑惑，胡好文打开了话匣子.

今年 3 月，大学生士兵胡好文从义务兵套改为中士，成功实现军衔"跳级". 然而，他没高兴多久，烦恼接踵而至——专业基础薄弱、组训能力不足、训练经验缺乏……"挂着中士的军衔，只能干义务兵的活. "面对个别战友的议论，胡好文心里很不是滋味.

胡好文的境遇引起该团党委的关注. 他们组织机关人员围绕军士选晋后的使用培养情况深入班排展开专题调研. 调研结果显示，不仅大学生士兵套改军士普遍存在“军衔高、能力弱”的问题，其他新晋升的年轻军士也一定程度存在“军衔与能力不匹配”的问题.

“年轻军士是基层建设的重要力量，必须想方设法帮助他们在岗位实践中尽快提升本领. ”在广泛调研论证的基础上，该团党委一班人决定，针对这类“军衔与能力倒挂”现象，探索推行“师带徒”军士培养模式，并将这一模式纳入团队人才建设总体规划.

他们依据《军士暂行条例》《军士职业发展管理暂行规定》等法规科学制订实施细则，构建“机关统筹指导、基层单位主抓”的工作链路，明确各级职责分工，倾力为年轻军士成长成才创造条件.

不久后，素质过硬、兵龄更长的下士刘洪涛，成为了中士胡好文的师傅. 在刘洪涛指导帮带下，胡好文刻苦训练，成长进步明显. 笔者在采访中了解到，“师带徒”军士培养模式推行以来，“徒弟军衔比师傅高”的例子在该团还有多个.

随着“师带徒”军士培养模式落地落实，该团区分不同军士的成长需求，对这一模式进行持续优化. 针对大学生士兵套改军士“军衔高、能力弱、兵龄短”的特点，他们确定“以能力强弱定师徒”原则，为这部分军士遴选能力突出、责任心强的军士作为带教老师，有针对性地帮助他们固强补弱；对按正常流程晋升的军士群体，则由经验丰富、素质全面的高级军士依托平时训练、大项任务等时机进行手把手帮带，助推他们拓展能力、升级本领；建立“过程考核+结果评估”的考核体系，定期量化评价帮带成效，并据此调整帮带计划. 此外，该团还设立“师徒进步奖”，表彰优秀师徒组合，激励他们再接再厉.

“为了充分发挥高级军士的人才酵母作用，团队在‘一位师傅带一位徒弟’的基础上，探索推开‘一位师傅带多位徒弟’的‘师带徒’新模式. ”该团干部鲁博介绍，团队依托高级军士专业特长成立工作室，由经验丰富的高级军士担任负责人兼带教师傅，采取“技能传授+项目攻坚”形式，加快年轻军士成长速度.

夜深人静，笔者在该团“国庆工作室”看到，房间里依然灯火通明. 一级军士长王国庆正带领几名年轻军士研讨某装备离合器快速拆装技术. 此前，团队配发新装备时，一度面临“有人开、无人修”的难题. 为此，王国庆主动请教装备厂家技术人员，带领几位徒弟边学边干，最终摸索出一套有效的维护保养方法. “跟着王班长不仅学到了技术，更学到了敢于攻坚克难的精神，我对走好今后的军旅路更有信心了. ”下士安涛说.

如今，该团越来越多年轻军士在“师带徒”活动中成长蜕变. 近日，在上级组织的考核中，不少年轻军士崭露头角，光荣登上领奖台.

A Red Army Regiment of the Xinjiang Military Command Activates New Momentum in Sergeant Training Through Its "Mentor-Apprentice" Model.

Source: PLA Daily

Author: Li Huixiang, Teng Yufei, Gao Qun

Editor: Sun Yue

2025-12-22

A Red Army regiment of the Xinjiang Military Command explores an unconventional sergeant training model—A sergeant's "mentor" is a corporal.

■ Li Huixiang, Teng Yufei, PLA Daily Special Correspondent Gao Qun

Recently, this reporter visited the comprehensive training ground of a Red Army regiment of the Xinjiang Military Command and happened to meet Sergeant Hu Haowen reporting the day's training situation to his mentor, Corporal Liu Hongtao.

"The apprentice has a higher rank than the mentor?" At first glance, I thought I misheard their "mentor-apprentice" relationship. Sensing my confusion, Hu Haowen began to explain.

In March of this year, college student soldier Hu Haowen was promoted from conscript to sergeant, successfully achieving a rank "skip." However, his joy was short-lived, as troubles soon followed—weak professional foundation, insufficient training ability, lack of training experience… "With the rank of sergeant, I can only do the work of a conscript." Faced with the comments of some comrades, Hu Haowen felt deeply resentful.

Hu Haowen's situation attracted the attention of the regiment's Party Committee. They organized staff to conduct a special investigation into the utilization and training of sergeants after promotion. The investigation revealed that not only did college graduate soldiers generally face the problem of "high rank but weak ability" when converted to sergeants, but other newly promoted young sergeants also experienced a degree of "mismatch between rank and ability."

"Young sergeants are an important force in grassroots development, and we must find ways to help them improve their skills as quickly as possible through practical experience." Based on extensive research and discussion, the regiment's Party Committee decided to explore and implement a "mentor-apprentice" sergeant training model to address this "rank-ability mismatch" phenomenon, and incorporated this model into the regiment's overall talent development plan.

Based on regulations such as the "Provisional Regulations on Sergeants" and the "Provisional Regulations on the Management of Sergeant Career Development," they scientifically formulated implementation rules, constructed a work chain of "overall guidance from headquarters and

primary responsibility from grassroots units," clarified the division of responsibilities at all levels, and devoted themselves to creating conditions for the growth and development of young sergeants.

Soon afterward, Corporal Liu Hongtao, with excellent qualities and longer service, became the mentor of Sergeant Hu Haowen. Under Liu Hongtao's guidance and assistance, Hu Haowen trained diligently and made significant progress. During the interview, the author learned that since the implementation of the "mentor-apprentice" sergeant training model, there have been several examples in the regiment of "apprentices having higher ranks than their mentors."

As the "mentor-apprentice" sergeant training model has been implemented, the regiment has continuously optimized this model based on the different growth needs of various sergeants. In response to the characteristics of college student soldiers being promoted to sergeant—"high rank, weak ability, and short service time"—they established the principle of "assigning mentors based on ability." This involves selecting highly capable and responsible sergeants as mentors for these sergeants to provide targeted support in strengthening their strengths and addressing their weaknesses. For sergeants promoted through the normal process, experienced and well-rounded senior sergeants provide hands-on guidance during routine training and major missions, helping them expand their abilities and upgrade their skills. An assessment system combining "process evaluation" and "outcome evaluation" has been established to regularly quantify the effectiveness of mentorship and adjust the mentorship plan accordingly. Furthermore, the regiment has established a "Mentor-Mentor Progress Award" to recognize outstanding mentor-mentee pairs and encourage them to continue their efforts.

"To fully leverage the talent-generating role of senior sergeants, the team, building upon the existing 'one master mentoring one apprentice' model, has explored and expanded to a new 'master-apprentice' model where 'one master mentors multiple apprentices'," explained Lu Bo, an officer in the regiment. The team established workshops based on the professional expertise of senior sergeants, with experienced senior sergeants serving as both leaders and mentors. This "skills transfer + project-based learning" approach accelerates the growth of young sergeants.

Late at night, in the regiment's "National Day Workshop," the lights were still on. First-Class Sergeant Wang Guoqing was leading several young sergeants in discussing the quick disassembly and assembly technique for a certain equipment's clutch. Previously, when the team received new equipment, they faced the problem of "someone to operate it, but no one to repair it." To address this, Wang Guoqing proactively consulted with the equipment manufacturer's technicians, leading his apprentices in a learning-by-doing process, ultimately developing an effective maintenance method. "Following Sergeant Wang, I not only learned the technology, but also the spirit of daring to overcome difficulties. I have more confidence in my future military career," said Corporal An Tao.

Today, more and more young soldiers in the regiment are growing and transforming through the "mentor-apprentice" program. Recently, in an assessment organized by higher authorities, many young soldiers distinguished themselves and proudly stood on the podium.

第 74 集团军某旅加强党员党性锻炼，聚焦“三份报告”背后的故事

来源：中国军网-解放军报 作者：黄可越 陈典宏 责任编辑：郭妍菲 发布：2025-12-23

“红蓝对抗中，我因惯性思维，未采纳一项合理化建议，导致航渡超时……”前不久，第 74 集团军某旅一场实战化训练硝烟未散，党委常委随即开展复盘总结. 全程下来，成绩亮点只作简要汇报，查找短板、反思不足成为主要内容.

组织入党一生一次，思想入党一生一世. 党性需要不断锤炼，一刻也不能放松. 该旅党委聚焦党员党性锻炼常态化、实效化，探索以现实思想报告、形势分析报告、党委践诺报告等“三份报告”为抓手，在剖析问题中检视党性，引导党员干部在“晒成绩、找差距、明方向”中提纯党性、强化担当，为战斗力建设注入持久动力.

“三份报告”背后的故事

——第 74 集团军某旅加强党员党性锻炼的见闻与思考

■黄可越 解放军报记者 陈典宏

第七十四集团军某旅“硬骨头六连”组织党员开展践诺活动. 李彬 摄

一名党员的现实思想报告——

“评价自己表现是‘一般’”

“我给自己一年来的工作自评为‘一般’. ”前不久，谈起年终述职，第 74 集团军某旅“硬骨头六连”下士、党员小田坦言道.

这一年，小田工作虽无大错，却也出现一些小问题. 此前，在党支部组织的党员民主测评中，连队有多名战友给他打了“基本合格”，这让小田深受触动.

连队党支部没有简单批评了事，而是专门为有类似情况的党员骨干组织了一场会议. 会上，从新兵到骨干，大家开诚布公指出他们的不足.

“受领任务有时拈轻怕重”“喜欢待在‘舒适区’”“信任是在小事中积累的，不然容易让人觉得‘不靠谱’”……面对面思想交锋，大家的批评直指小田问题所在，让他彻底清醒. 他当场制订整改计划，请全体战友监督.

从那以后，他坚持改正缺点，训练工作样样争先，在最近一次民主测评中赢得了战友们的认可.

“评价自己表现‘一般’，就是为了时刻督促自己，不能再掉队.”小田说，之所以对自己有如此清醒的认识，是上级层层作出的表率.

比如，某连党支部书记刘书良，在连队获评“四铁”先进单位后，依然在向营党委的报告中主动揭短：“突击式抓建的老想法还没完全根除，工作标准时高时低”“抓训练有时重尖子、轻全员”……“述职不是表功，而是一次‘思想体检’.”刘书良说，“只有把真实想法摆出来，问题才能找准，党性锻炼才有方向.”

记者了解到，为了让“活思想”真正成为锤炼党性的抓手，该旅党委打破年终述职“一锤定音”的传统，结合大项任务、岗位变动等节点，每季度组织阶段性思想汇报，要求党员汇报内容不搞“空对空”，必须联系实际工作，触及思想灵魂.

“党支部告诉我们，党员有真实想法很正常，关键是要创造机会，让这些‘活思想’定期见见面、透透气.”小田向记者讲述了一段他目睹的战友经历.

今年夏季，某连担负了一项试训任务. 上级要求航渡保障完全靠自主完成，这样一来难度陡增. 当时一听任务要求，少数骨干产生了畏难情绪.

党支部在部署任务时察觉到这一问题，就利用训练间隙组织开展思想汇报，重点围绕“党员该怎么带头攻坚”谈想法、找对策. “我在汇报思想时，与连队一些身边典型在执行急难险重任务时的表现做了对照，越对照越惭愧.”一名骨干说，坦诚交流思路越聊越清，最终，数十条实用建议被汇总起来，大家一下有了信心斗志.

旅领导经常提醒各级，要着力推动党内政治生活具体化、常态化，尤其在执行大项任务、处理敏感事项时，各级党组织不仅增加思想汇报频次，更把场合从会议室延伸到驻训场、行军途中，在任务一线谈心交心，实现从“面对面”到“心贴心”的转变.

一次次坦诚的“思想见面”，擦亮了党性底色，也为练兵备战注入了坚实的思想动力. 现在，小田与身边战友聊起这些，大家不约而同都有一样的感觉.

一名营党委书记的形势分析报告——

“应该把‘紧箍咒’念在平时”

“党员小何带教新兵时，多次打断战士提问，还用‘这么简单的事都做不好’等言语，这样情绪化的表达不合适.”前不久，在炮兵营按纲抓建形势分析会上，营党委书记范永山拿着刚梳理完的报告，专门聊起这件事.

记者翻阅这份报告看到，里面没有空话套话，只有一个个具体事例、一条条责任链路：“某连个别党员对新装备操作不熟练，影响指控效率，由副营长负责帮带，组织‘逐人过’考核”“炊事班党员老邵节约意识不强，食材浪费现象时有发生，由专人做好谈心交心工作，拿出整改措施”……

范永山告诉记者，他对形势分析制度的重视，源于以往的一次“教训”. 当时，他刚担任营党委书记不久，某连就因训风不实被上级通报. 在全营军人大会上，该连党支部副书记检讨时的一句话，让范永山至今记忆犹新：“平时组织不常念‘紧箍咒’，关键时刻思想就容易松懈，党性也跟着打折扣.”

“党性锻炼就像拧紧‘螺丝’，必须抓在平时、严在经常.”那之后，范永山把定期整理完善形势分析报告当成抓工作的一个重要抓手. 他给自己定下规矩：定期参加各连形势分析会，对报告亲自审核，问题不具体、分析不深刻、措施不实在的一律重新“回炉”.

如今，在范永山的推动下，该营的形势分析报告越来越实. 党员小何带教新兵缺乏耐心的问题在被指出后，范永山多次找他谈心交心：“党员的先进性，不仅体现在训练成绩上，更体现在对战友的耐心帮带上.”他还帮小何制订带教计划表，每周对照检查一次成效. 数月后，小何带教的新兵全部取得考核良好以上成绩，他本人也在年底的党支部党员民主测评中获评“优秀”.

制度的生命力，在关键时刻尤为凸显. 今年汛期，驻地连遭暴雨，某营通过形势分析会发现问题苗头：“部分党员对抢险救灾应急预案不够熟悉，应急处置能力不足，一旦发生险情可能掉链子.”

明确及时补短方向后，该营党委副书记邹军立即牵头抓预案修订、器材检修、出动模拟. 不久后，一场特大暴雨突袭，营区附近村庄被洪水围困. 邹军带着党员突击队第一时间赶赴现场，按照演练过的预案分工协作，连续奋战数小时，加固堤坝百余米、转移多名受困群众，践行了党员的责任担当.

“熔炉不热，党性难纯.”翻看近期的形势分析报告，范永山告诉记者，本月的问题又比上月少了两条. 他深有感触地说：“落实形势分析制度就是要把‘紧箍咒’念在平时，让党员在一次次找问题、改不足中，把党性锤炼得更纯粹、更过硬，确保关键时刻站得出来、顶得上去.”

一名旅党委常委的践诺报告——

“时刻记得自己肩上有担子”

“侦察专业综合训练场 3 个月内开工建设，年底前投入使用！”年初党委扩大会上，该旅党委常委、汪参谋长盯着承诺清单，向全体官兵郑重作出承诺.

公开承诺，是该旅党委多年坚持的惯例. 每年年初，他们结合部队建设实际和官兵急难愁盼问题，梳理形成承诺践诺清单，明确事项、责任和时限，通过强军网等渠道公示，接受全体官兵监督. 到了年底，党委班子成员督导机关相关业务科室，完成一项、销号一项.

“承诺不是喊口号，关键在落地. ”汪参谋长清楚，承诺兑现起来并不容易. 就拿训练场建设来说，涉及选址设计、施工协调、交付验收等多个环节，且营区地质条件不理想，施工难度较大.

一句承诺，就是一份责任. 他多次组织召开现场会，带着机关参谋和设计人员，反复实地勘察测量，对比多个方案确定最优，紧锣密鼓推进建设进度.

工作遇到阻力，他多方奔波协调，把官兵的迫切需求和对战斗力的提升，一条条摆出来、讲清楚. “践诺不能打折扣，要么不承诺，承诺了就要兑现到底. ”

有段时间，有人担心雨季影响工期，想简化部分设施建设，向他汇报时立刻被否决：“攀登架的承重标准、障碍的保护措施，都是关系官兵训练安全的大事，一丝一毫不能含糊. ”经过优化施工方案，工期最终没有受到影响.

记者看到，除练兵备战外，践诺报告还关注着官兵的急难愁盼. 针对部分官兵家属临时来队住房紧张的情况，报告中有这样一项承诺：“国庆中秋‘双节’前完成家属区改造，让临时来队家属拎包入住. ”为了推动这项工作，一名旅党委常委经常到家属区现场办公，协调解决施工中的难题，最终让这项“暖心”工程比原计划提前近一个月完成.

长假期间，当看到临时来队家属们高高兴兴地搬进崭新的住房，官兵们纷纷感叹：“旅党委说到做到，大家心里都暖暖的. ”

“党委的承诺能不能兑现，检验的是党组织的威信，更是对党员领导干部党性的考验. ”一位旅党委常委告诉记者，结合深化政治整训，他们在全体党员中广泛开展“拉承诺践诺清单、看教育整改成效”实践活动，引导大家把承诺落到实处.

如今，侦察专业综合训练场已正式投入使用，官兵可同时开展攀登、索降、越障等训练. 看着官兵们在训练场上挥汗如雨的身影，汪参谋长翻开笔记本，郑重在已完成工作那栏做了标红.

从承诺到践诺，从党委到党员，一级做给一级看，一级带着一级干，践行承诺就这样成为锤炼党性、树立形象的具体行动.

延伸思考

炉旺才能出好钢

■王 鹏

共产党员的党性不是与生俱来、一蹴而就的，也不会因组织上入党就一劳永逸、永远合格. 它如同精钢的锻造，需在持续不断的高温炉火中淬炼提纯.

倘若理想信念的“炉膛”长期不生火，或者温度不够高，就失去了淬炼提纯的功能，如同未烧透的钢坯，轻则质地疏松，重则不堪一击.

三份报告、三种载体，正像炼钢炉中的炉火——温度高不高，决定着作用发挥好不好，直接影响最终出炉的钢材质量. 加强党员党性锻炼，一要主动“亮丑”，让党员在直面问题中净化思想、提升境界；二要注重“常态”，把监督管理抓在平时、严在经常，防止小问题变成大隐患；三要突出“引领”，党员干部带头示范，以自身行动影响和带动全体官兵，形成“一级带一级、全员齐跟进”的良好局面.

有什么样的党内政治生活，就有什么样的党员和党风. 第 74 集团军某旅以三份报告为载体构建起的党性锻炼体系启示我们：锤炼党性是一个由量变到质变、不断强化的过程，必须久久为功、常抓不懈. 只有真正严肃党内政治生活，才能让党员在持续的教育和思想淬炼中，始终牢记第一身份是党员、第一职责是为党工作，真正把爱党、忧党、护党、兴党落实到工作的每个环节.

A 74th Group Army Brigade Strengthens Party Spirit Training for Its Members, Focusing on the Stories Behind the “Three Reports.”

Source: China Military Network - PLA Daily

Author: Huang Keyue, Chen Dianhong

Editor: Guo Yanfei

Published: 2025-12-23

“During the red-blue confrontation, due to habitual thinking, I failed to adopt a reasonable suggestion, resulting in a delay in transit...” Not long ago, after a recent realistic combat training exercise, the Party Committee Standing Committee of a brigade of the 74th Group Army immediately conducted a debriefing and summary. Throughout the exercise, achievements and highlights were only briefly reported; identifying shortcomings and reflecting on deficiencies became the main focus.

Joining the Party organizationally is a once-in-a-lifetime event, but joining the Party ideologically is a lifelong commitment. Party spirit needs constant tempering and cannot be relaxed for a moment. The brigade’s Party Committee focuses on the normalization and effectiveness of Party

spirit training for its members, exploring the use of "three reports"—a report on current thoughts, a report on situation analysis, and a report on fulfilling Party commitments—as a tool to examine Party spirit through problem analysis. This guides Party members and cadres to purify their Party spirit and strengthen their sense of responsibility by "showing off achievements, identifying gaps, and clarifying directions," injecting lasting momentum into combat capability building. The Story Behind the "Three Reports"

—Observations and Reflections on Strengthening Party Spirit Training for Members of a Brigade of the 74th Group Army

■ Huang Keyue, PLA Daily Reporter Chen Dianhong

A Party Member's Realistic Thought Report—

"My performance is 'average'"

"I would rate my work over the past year as 'average'." Not long ago, when talking about his year-end performance review, Corporal Xiao Tian, a Party member of the "Hard-Bone Sixth Company" of a brigade of the 74th Group Army, frankly admitted.

This year, while Xiao Tian's work did not involve any major mistakes, some minor issues arose. Previously, in a democratic evaluation of Party members organized by the Party branch, several comrades in the company gave him a "basically qualified" rating, which deeply affected Xiao Tian.

The company's Party branch did not simply criticize him; instead, it organized a special meeting for key Party members with similar issues. At the meeting, from new recruits to key personnel, everyone frankly pointed out their shortcomings.

"Sometimes he shirks his responsibilities when given tasks," "He likes to stay in his comfort zone," "Trust is built up through small things; otherwise, he's easily seen as unreliable"... In a face-to-face exchange of ideas, everyone's criticisms directly addressed Xiao Tian's problems, bringing him to a complete awakening. He immediately formulated a rectification plan and asked all his comrades to supervise him.

From then on, he persisted in correcting his shortcomings, striving to excel in all training activities, and recently won the approval of his comrades in the democratic evaluation.

"Evaluating my performance as 'average' is to constantly remind myself not to fall behind again," Xiao Tian said. He explained that his clear self-awareness stemmed from the exemplary conduct set by his superiors at all levels.

For example, Liu Shuliang, the Party branch secretary of a certain company, still proactively pointed out shortcomings in his report to the battalion Party committee after his company was

awarded the title of “Four Irons” advanced unit: “The old idea of ’crash course’ in building up the company hasn’t been completely eradicated, and work standards fluctuate,” and “Sometimes training focuses on the elite while neglecting the entire workforce.” “Reporting on duties isn’t about boasting, but a ‘thought check-up’,” Liu Shuliang said. “Only by presenting our true thoughts can we accurately identify problems and give direction to Party spirit training.”

The reporter learned that, in order to truly make “living thoughts” a tool for tempering Party spirit, the brigade Party committee broke with the tradition of “one-shot” year-end performance reviews. In conjunction with major tasks and job changes, they organize quarterly periodic thought reports, requiring Party members to avoid empty rhetoric and to connect their reports to practical work, touching upon their core thoughts.

“The Party branch told us that it’s normal for Party members to have real thoughts; the key is to create opportunities for these ‘living thoughts’ to meet and breathe regularly,” Xiao Tian told the reporter, recounting an experience he witnessed from a comrade.

This summer, a certain company undertook a trial training mission. The higher command required that all navigation support be completed independently, which significantly increased the difficulty. Upon hearing the mission requirements, a few key personnel felt daunted.

The Party branch noticed this problem when deploying the mission and organized thought-provoking sessions during training breaks, focusing on how Party members should take the lead in tackling difficult tasks. “When I reported my thoughts, I compared myself to the performance of some exemplary members in the company during urgent, difficult, and dangerous missions. The more I compared myself, the more ashamed I felt,” said one key member. The more frankly they discussed their ideas, the clearer their thinking became. Ultimately, dozens of practical suggestions were compiled, and everyone gained confidence and morale.

The brigade leadership frequently reminded all levels to focus on making intra-Party political life more concrete and regular, especially when carrying out major tasks and handling sensitive matters. Party organizations at all levels not only increased the frequency of thought-provoking sessions but also extended the occasions from meeting rooms to training grounds and marches, engaging in heart-to-heart talks on the front lines of missions, achieving a shift from “face-to-face” to “heart-to-heart.”

These repeated frank “thought meetings” have polished the Party spirit and injected solid ideological motivation into training and combat readiness. Now, when Xiao Tian talks about these things with his comrades, they all share the same feeling.

A Situation Analysis Report from a Battalion Party Committee Secretary—

“We should keep the ‘tight rein’ in mind in daily life”

“When Party member Xiao He was training new recruits, he repeatedly interrupted the soldiers’ questions and used phrases like ‘You can’t even do such a simple thing well.’ Such emotional

expressions are inappropriate." Not long ago, at a situation analysis meeting on the artillery battalion's implementation of the syllabus, Battalion Party Committee Secretary Fan Yongshan, holding a newly completed report, specifically discussed this matter.

The reporter reviewed the report and saw that it contained no empty rhetoric, only concrete examples and a chain of responsibilities: "In a certain company, some Party members were not familiar with the operation of new equipment, affecting command and control efficiency. The deputy battalion commander was responsible for providing guidance and organizing 'one-on-one' assessments." "Old Shao, a Party member in the cookhouse, lacked a strong sense of thrift, and food waste occurred frequently. A designated person was assigned to conduct heart-to-heart talks and develop rectification measures..."

Fan Yongshan told the reporter that his emphasis on the situation analysis system stemmed from a previous "lesson." At the time, he had only recently become the battalion's Party Committee Secretary when a certain company was reprimanded by higher authorities for its poor training practices. A remark made by the company's deputy Party Branch Secretary during his self-criticism at a battalion-wide meeting remains vivid in Fan Yongshan's memory: "If the organization doesn't regularly remind us to be disciplined, our thinking will easily slacken at critical moments, and our Party spirit will suffer."

"Party spirit training is like tightening a screw; it must be done regularly and rigorously." After that, Fan Yongshan made regularly compiling and improving situation analysis reports a key aspect of his work. He set a rule for himself: regularly attend the situation analysis meetings of each company, personally review the reports, and rework any reports that lacked specific details, depth of analysis, or practical measures.

Now, under Fan Yongshan's guidance, the battalion's situation analysis reports are becoming increasingly practical. After pointing out that Party member Xiao He lacked patience in mentoring new recruits, Fan Yongshan repeatedly talked to him, saying, "A Party member's advanced nature is not only reflected in training results, but also in patiently helping and guiding comrades." He also helped Xiao He develop a mentoring plan, checking its effectiveness weekly. Months later, all the new recruits trained by Xiao He achieved good or above scores in their assessments, and he himself was rated "Excellent" in the year-end democratic evaluation of Party members.

The vitality of a system is particularly evident in critical moments. During this year's flood season, the area was hit by torrential rains. A battalion, through a situation analysis meeting, discovered early signs of problems: "Some Party members are not familiar enough with the emergency response plan for disaster relief and their emergency response capabilities are insufficient; they might falter in the event of an emergency." After clarifying the direction for timely improvement, Zou Jun, the deputy secretary of the battalion's Party committee, immediately took the lead in revising the plan, inspecting equipment, and conducting simulations. Shortly afterward, a massive rainstorm struck, and villages near the camp were surrounded by floodwaters. Zou Jun led a Party member commando team to the scene immediately. Following the rehearsed plan, they worked

continuously for several hours, reinforcing over 100 meters of dikes and evacuating many trapped residents, demonstrating the responsibility and commitment of Party members.

“If the furnace isn’t hot, Party spirit won’t be pure.” Reviewing recent situation analysis reports, Fan Yongshan told reporters that there were two fewer problems this month than last month. He remarked with deep feeling, “Implementing the situation analysis system means keeping the ‘tight rein’ in mind at all times, allowing Party members to forge a purer and stronger Party spirit through repeated problem identification and improvement, ensuring they can stand up and take charge at critical moments.” A report on fulfilling a promise by a member of the brigade’s Party Committee Standing Committee—

“Always remember the responsibilities on my shoulders”

“The comprehensive training ground for reconnaissance professionals will begin construction within three months and be operational by the end of the year!” At the beginning of the year, at the expanded Party Committee meeting, Chief of Staff Wang, a member of the brigade’s Party Committee Standing Committee, solemnly made this promise to all officers and men while looking at the list of commitments.

Public commitments have been a long-standing practice of the brigade’s Party Committee. Every year at the beginning, they compile a list of commitments based on the actual situation of the unit’s development and the urgent needs and concerns of the officers and men, clarifying the items, responsibilities, and deadlines. This list is then publicized through channels such as the Strong Army Network for the supervision of all officers and men. At the end of the year, members of the Party Committee supervise the relevant departments of the headquarters to ensure that each item is completed and removed from the list.

“A promise is not just a slogan; the key is implementation.” Chief of Staff Wang understands that fulfilling a promise is not easy. Take the construction of the training ground as an example. It involves multiple stages, including site selection and design, construction coordination, and delivery and acceptance. Furthermore, the geological conditions of the camp area were not ideal, making construction quite difficult.

A promise is a responsibility. He organized numerous on-site meetings, leading staff officers and designers to repeatedly conduct on-site surveys and measurements, comparing multiple plans to determine the optimal one, and pushing forward the construction schedule at a rapid pace.

When encountering obstacles, he tirelessly coordinated with various parties, clearly outlining and explaining the urgent needs of the officers and men and their desire to improve combat effectiveness. “Promises cannot be compromised; either don’t make a promise, or fulfill it to the end.” For a time, some people worried that the rainy season would affect the construction period and wanted to simplify the construction of some facilities. When they reported this to him, it was immediately rejected: “The load-bearing standards of the climbing frames and the protective measures for the obstacles are all major issues related to the safety of the officers and men during

training; there can be no ambiguity in any aspect." After optimizing the construction plan, the construction period was ultimately not affected.

The reporter observed that, in addition to training and combat readiness, the promise fulfillment report also addressed the urgent needs and concerns of the officers and men. In response to the housing shortage faced by some officers and men' families temporarily staying at the unit, the report included the following promise: "Complete the renovation of the family quarters before the National Day and Mid-Autumn Festival holidays, allowing temporarily staying families to move in immediately." To advance this work, a member of the brigade's Party Committee Standing Committee frequently visited the family quarters to work on-site, coordinating and resolving construction difficulties, ultimately completing this heartwarming project nearly a month ahead of schedule.

During the long holiday, seeing the temporarily staying families happily moving into their brand-new homes, the officers and men exclaimed, "The brigade's Party Committee keeps its word; it warms our hearts."

"Whether the Party Committee's promises can be fulfilled tests the Party organization's prestige and, more importantly, the Party spirit of its leading cadres," a member of the brigade's Party Committee Standing Committee told reporters. In conjunction with deepening political rectification, they widely carried out the "List of Promises and Fulfillments, and the Effectiveness of Education and Rectification" practical activity among all Party members, guiding everyone to put their promises into practice.

Now, the reconnaissance professional comprehensive training ground is officially in use, allowing officers and men to conduct climbing, rappelling, and obstacle course training simultaneously. Watching the officers and men sweating profusely on the training field, Chief of Staff Wang opened his notebook and solemnly marked the completed tasks in red.

From promises to fulfilling them, from the Party Committee to Party members, each level sets an example for the next, leading by example. Fulfilling promises thus becomes a concrete action for tempering Party spirit and establishing a positive image.

Further Reflection: A Strong Furnace Produces Good Steel

■ Wang Peng

The Party spirit of a Communist Party member is not innate or achieved overnight, nor is it a guarantee of permanent qualification simply by joining the Party. It is like the forging of fine steel, requiring continuous tempering and purification in a high-temperature furnace.

If the "furnace" of ideals and beliefs remains stagnant or the temperature is insufficient, it loses its tempering and purification function, becoming like an under-scorched steel billet—at best, porous; at worst, easily broken.

The three reports and three carriers are like the furnace fire in a steelmaking furnace—the temperature determines the effectiveness of their function and directly affects the quality of the final steel produced. Strengthening the Party spirit of Party members requires three key steps: First, proactively "exposing shortcomings," allowing Party members to purify their thoughts and elevate their moral character by facing problems head-on. Second, emphasizing "routine," ensuring supervision and management are implemented consistently and rigorously to prevent small problems from escalating into major hidden dangers. Third, highlighting "leadership," with Party members and cadres setting an example, influencing and motivating all officers and men through their actions, creating a positive environment of "each level leading the next, with everyone following suit."

The quality of intra-Party political life determines the quality of Party members and the Party's style. The Party spirit training system constructed by a brigade of the 74th Group Army, based on three reports, teaches us that cultivating Party spirit is a process of gradual transformation from quantitative to qualitative change, requiring sustained and persistent effort. Only by truly and rigorously conducting intra-Party political life can Party members, through continuous education and ideological tempering, always remember that their primary identity is that of a Party member and their primary responsibility is to work for the Party, truly implementing love for the Party, concern for the Party, protection of the Party, and commitment to the Party in every aspect of their work.

第 80 集团军某旅构筑部队与家庭齐抓共管"护栏"守好廉政防线

来源：中国军网-解放军报 作者：苑森伟 杨泽南 责任编辑：郭妍菲

2025-12-23

第 80 集团军某旅健全廉政建设工作机制纯正部队风气

齐抓共管筑牢廉政防线

解放军报讯 苑森伟、杨泽南报道：临近年终，第 80 集团军某旅结合高级军士选晋、年终总结等重点工作，扎实开展一系列廉政教育活动，并将教育触角向官兵家庭延伸，通过家属委员会等多种渠道，鼓励引导官兵家属携手共筑廉政防线. 这是该旅不断健全廉政建设工作机制，聚力夯实官兵思想根基、纯正部队风气的一个缩影.

"家庭是倡廉助廉的重要阵地. 将廉政教育从工作圈延伸至生活圈，是我们推动风气建设往深里走、往实里落的一个举措. "该旅领导介绍，为推动各类监管协调贯通，他们在强化纪委监管、群众监督基础上，把官兵家属纳入廉政建设体系，强化对官兵"八小时以外"的监督管理，构筑起部队与家庭齐抓共管的"护栏".

与此同时，该旅持续加强廉政建设，推动反腐倡廉融入日常、抓在经常. 他们全面打造“营院有展板、广播有声音、视窗有解读”的三位一体廉政环境，不断浓厚“可见、可听、可学”的廉政文化氛围；广泛组织“典型案例大家谈”“法纪知识大闯关”等群众性讨论辨析活动，引导官兵深学细悟、践诺倡廉；常态开展廉政风气督查，对军士选晋考核、物资招标采购等事项实行全过程监督，从源头上确保公正透明.

不久前，该旅组织基础课目训练考核. 考核展开前，他们组织官兵集中学习相关法纪规定，进一步强化法纪意识、规矩意识；考核过程中，纪检监察部门全程参与监督，风气监督员全程巡考巡查，确保考出真水平、摸清真底数，以良好风气促进战斗力稳步提升.

风清气正润兵心，常抓不懈见成效. 近期，上级组织一次训练抽考，该旅官兵闻令而动、积极应考，展现出过硬综合素质和良好精神风貌，取得优异成绩.

An 80th Group Army Brigade Builds a “Protective Fence” Through Joint Efforts Between the Troops and Their Families to Safeguard the Anti-Corruption Line.

Source: China Military Network - PLA Daily

Author: Yuan Senwei, Yang Zenan

Editor: Guo Yanfei

2025-12-23

A brigade of the 80th Group Army improves its anti-corruption work mechanism and purifies the military atmosphere. Joint efforts build a solid anti-corruption line.

PLA Daily News (Yuan Senwei and Yang Zenan)

As the year draws to a close, a brigade of the 80th Group Army, in conjunction with key tasks such as the selection and promotion of senior sergeants and year-end summaries, has carried out a series of anti-corruption education activities, extending the reach of education to the families of officers and men. Through family committees and other channels, the brigade encourages and guides officers and men’ families to work together to build an anti-corruption line. This is a microcosm of the brigade’s continuous efforts to improve its anti-corruption work mechanism, focusing on strengthening the ideological foundation of officers and men and purifying the military atmosphere.

“The family is an important front for promoting integrity and combating corruption. Extending anti-corruption education from the workplace to the home is a measure we are taking to deepen and solidify our efforts in building a positive work environment,” the brigade leadership explained. To promote coordinated oversight across various sectors, they have incorporated the families of officers and men into the anti-corruption system, strengthening supervision and management of

officers and men outside of working hours, thus constructing a “protective barrier” of joint management by the military and their families.

Meanwhile, the brigade continues to strengthen anti-corruption efforts, integrating anti-corruption into daily life and making it a regular practice. They have comprehensively created a three-pronged anti-corruption environment: display boards in the barracks, broadcasts, and interpretive materials on screens, constantly fostering a “visible, audible, and learnable” anti-corruption culture. They widely organize mass discussion and analysis activities such as “Discussions on Typical Cases” and “Law and Discipline Knowledge Quizzes” to guide officers and men to deeply study and understand, and to practice integrity. They regularly conduct anti-corruption inspections, implementing full-process supervision of matters such as the selection and promotion of sergeants and the procurement of supplies, ensuring fairness and transparency from the source.

Not long ago, the brigade organized a basic subject training assessment. Before the assessment, they organized officers and men to study relevant laws and regulations, further strengthening their awareness of laws and regulations. During the assessment, the discipline inspection and supervision department participated in the entire process, and discipline supervisors patrolled and inspected the entire process to ensure that the true level of performance was demonstrated and the soldiers’ true abilities were ascertained, thus promoting a positive atmosphere and steadily improving combat effectiveness.

A clean and upright atmosphere nourishes the soldiers’ hearts, and persistent efforts yield results. Recently, the higher authorities organized a training spot check. The officers and men of the brigade responded swiftly and actively participated in the test, demonstrating excellent comprehensive qualities and a good mental outlook, achieving outstanding results.

军营观察丨新排长下连之后

来源：解放军报 作者：杨茂生 张文哲 戚辰飞 责任编辑：徐占虎 2025-12-24

向下扎根，向上生长

■刘双喜

初任排长，是从“一道杠”到“官之初”的关键跨越. 新排长要想走得稳、走得远，必须以过硬的能力素质为根基，向下扎根，向上生长，把个人理想抱负融入强军实践，奋力跑好历史的接力棒.

把准方向不偏航. 提升第一任职能力，首要是政治能力. 新排长须深学细悟习近平强军思想，在大是大非前保持清醒，在任务考验中站稳立场，确保带兵育人不迷向、练兵备战不偏向. 尤其面对年轻士兵的活思想，更要善于用理论武装校正航向，用红色基因浸润兵心.

练硬打仗真本事. 排长的职责是带出能打仗的兵. 若自身武艺不精、战术不熟，何以服众、何以带兵？新排长须以“归零心态”补短板，主动务战研战：既要精通手中装备性能，成为专业领域的“明白人”；也要掌握组训施训规律，创新方法激发士兵训练热情；更要在急难险重任务中冲锋在前，立起“打仗型”干部的标杆.

厚植爱兵大情怀. 新排长常面临“年龄相近、资历尚浅”的现实挑战，更需放下架子、扑下身子. 通过各种方式摸清士兵的脾气秉性、家庭困难，把思想工作做到心坎上. 坚持严管与厚爱结合，对存在问题“唱黑脸”，给士兵成长“搭梯子”，用真心换真情，把“散沙”聚成“铁拳”.

扎根基层接地气. 官之初最忌“镀金”心态、“漂浮”做派. 新排长须从整理内务、站岗执勤等小事做起，杜绝“纸上谈兵”. 发扬“钉钉子精神”，对定下的目标一抓到底，在基层沃土中扎深根、长才干，如此方能在基层舞台书写无愧于时代的答卷.

新排长下连之后

■杨茂生 张文哲 解放军报记者 戚辰飞

近日，记者来到陆军某旅采访，恰逢该旅一批新排长刚刚结束集训回到连队.

与这些朝气蓬勃的新排长对话，感到他们心中既有想要在岗位上干出一番成绩的愿望，也有对如何走好第一步的担忧.

新排长是部队战斗力建设的“新鲜血液”，是基层建设的重要一环. 能否培养好、使用好新排长，使其快速融入战位、适应岗位、发挥能力，事关部队长远建设. 由此，下连之后的新排长如何打开局面、带好队伍成了记者关注的课题.

记者随即走访该旅多个连队，接触了许多已能独当一面的排长，倾听他们当初的困惑和烦恼，解读他们如何一步步加钢淬火，走出了自己的“破局之路”. 希望他们的故事能为今天的新排长带来启示，带来动力.

放下架子，沉下身子

正所谓“新官上任三把火”，2 年前，看着同期毕业的军校同学有的在各类集训中拿到名次，有的刚下连就参加大项任务荣立三等功，来到陆军某旅某连担任新排长的彭林迫不及待烧起了“第一把火”.

“任务交给我，保证能拿下！”一次实战化训练，彭林主动请缨，带着全排官兵在密林里迂回穿插. 在快要接近“敌”方阵地的时候，原计划的道路“被毁”，他规划了一条自认为是“捷径”的路线.

“这条路距离虽短，但途中有一段地形低洼，前些天下过雨，路面情况可能会严重影响行军速度. ”一名老班长指着地图提出了不同意见. 自信满满的彭林压根没把老班长的话放在心上，自顾自地带着队伍继续进发.

不出所料，出发没多久，路面变得泥泞、湿滑，行进途中几名战士还不慎摔倒，影响了行军时间，任务以失败告终.

得知情况的指导员找到彭林：“有干事热情是好的，但急于求成不可取，盲目自信更不可取. ”懊悔不已的彭林意识到，处处是课堂，事事有学问，行稳才能致远.

调整好心态的彭林把自己当成一名“新兵”，主动找班长骨干学习专业经验、讨论训练安排. 一次，连里下发了新装备，他跟着“技术大拿”勤学苦练. 后来的专业比武中，彭林带领全排取得全旅第 2 名的好成绩.

他还向连队主官请教带兵方法和管理经验，利用闲暇时间，把兵情录翻了好几遍，将班排情况牢记在心. 得知战士小张担心考学复习时间不够，他与连队协调开设“夜间自习室”；发现战士小刘因家庭变故分心，他主动谈心，帮助申请困难补助金……如今的彭林是官兵眼中自信而沉稳的排长，也是大家心中亲如兄弟的战友.

和彭林类似，某连排长陈杰下连之后也靠“撸起袖子、甩开膀子”跨过沟沟坎坎、赢得官兵信任.

第一次参加海训，陈杰自认为游泳水平过硬，没必要再去晒太阳、呛海水，便留在室内游泳馆帮带初次参加海训的新兵.

正午，排里的战士们个个脸颊通红、满身泥沙地来到餐厅.

“上午游得怎么样？”陈杰端着餐盘来到战士小王身边，谁知小王把凳子往旁边挪了挪说：“排长，我身上全是沙子，别弄脏了你的衣服……”听到这话，陈杰的脸瞬间涨得通红.

事后，连长找到陈杰谈心：“作为全排的主心骨，你不带头参训，大家的精气神从哪来？”

从那以后，陈杰放下架子，沉下身子，带头往前冲. 海训场上，构筑工事，他第一个拿起铁锹；装备维护保养，他钻到车底和战士一起排除故障……陈杰冲锋在前，全排众志成城，最终在建制比武中取得好成绩.

直面挑战，加速奔跑

“学识不等于本领，文凭更不等于水平. ”说起自己的“官之初”，排长李皓楠仍记得当时的窘境.

军校读书期间，李皓楠是妥妥的“学霸”，兵棋推演、战术作业样样在行，还担任过定向越野俱乐部的骨干.

谁能想到，这位优秀毕业学员下连后并不顺利. 旅里组织军体运动会，李皓楠负责组训连队的参赛官兵. 运动会中，好几名队员出现伤病情况不得已中途退赛，最终连队成绩位于全旅中下游.

原来，备赛之前，连队官兵刚刚经历过大项任务，较大强度的训练让大家的身体状态有些疲惫，但是为了在运动会上取得好成绩，大家咬牙坚持. 忽略了现实情况的李皓楠没有适时调整训练计划，导致连队官兵比赛成绩不理想，一些人还出现了伤病.

那天晚上，李皓楠度过了下连后的第一个难眠之夜.

为了更好地组织体能训练，提升官兵成绩，李皓楠主动报名参加教导队“军体骨干集训”，学习科学的训练理论和方法. 同时，他还养成了写训练总结的习惯，无论演训任务、比武竞赛还是体能考核，他都会认真复盘、思考得失，并拟制下一阶段的目标和计划. 渐渐地，李皓楠身上的书卷气少了，多了些带兵人的踏实劲儿，工作也打开了新局面.

该旅一份调查显示，超过七成新排长曾在军校获得各类表彰，但超过半数的新排长都表达了“难以快速适应千头万绪的基层工作”“能力水平和现实要求有差距”等困惑.

“当一名好排长，绝对不是轻轻松松就能实现的. ”杜意尧的新排长之路同样走得不太顺利. 3 年前，刚到连队不久的杜意尧赶上驻训任务，连长安排他清点物资. 由于此前没干过类似工作，他认真翻阅战备物资规范，和骨干一起梳理需要携带的各类物资，并提前进行了任务分工.

本以为万无一失，执行起来却出现了混乱. 清点战备物资的人员数量不够，工作进展缓慢. 负责装车的官兵又因为经验不足，导致车辆配重不均衡，只得把物资卸下重装. 最终，全营出发时间晚了 1 小时，领导对杜意尧所在连队提出了批评.

这让杜意尧深受打击，本就内向的他开始怀疑自己的能力，干工作畏首畏尾.

“失败并不可怕，可怕的是一次干不好就给自己打上不合格的标签. ”注意到杜意尧的气馁，指导员时常找他谈心，“准备充分了就放手去干，成长进步来自于大胆实践. ”

受到鼓舞的杜意尧开始“毛遂自荐”，主动承担任务. 从牵头设置实弹射击场地到筹划全营驾驶员复训，在各项工作的淬炼下，杜意尧开展工作越来越得心应手. 年终岁尾，杜意尧在换季保养、年终总结等任务交织的情况下，还利用点滴时间导演了老兵退伍晚会，赢得大家称赞.

抓住契机，弯道超车

下连后小半年的时间，杨桢的脸上常常阴云密布.

初到该旅某营支援保障连任排长，为了尽快补齐短板，杨桢虚心求教、刻苦训练. 但新技能的掌握并不容易，第一次专业比武，他使出浑身解数却表现平平. 眼见自己的“官之初”没什么起色，杨桢感觉“电量越来越低”，干什么都提不起劲，训练成绩一直不上不下.

转变发生于一次实战化训练. 由于“敌”情突变，红方指挥车中传来的信息通报数量剧增. 为了帮助指挥员快速决策，杨桢和几名通信技师进行排查后，有了“破题之法”. 只见他在设备前埋头攻关，数分钟后，便利用自编代码完成了情报的整合分析，为己方赢得了宝贵的作战时间.

任务结束后，连长请杨桢分享经验，他谦虚地说自己是碰运气. 一旁的老班长为他加油打气：“战场上，管用的就是金点子！”

战友们的认可让杨桢“电量越来越足”，年底的一次演训任务中，重拾信心的他带领全排出色完成通信保障任务，被评为“保障先进个人”.

这些年，杨桢利用专业所长成功解决了不少工作难题：为了缩减指挥员的决策时间，他将大模型技术融入指挥信息系统；为了方便连队主官快速掌握人员信息，他制作出电子兵情录，还将其进一步迭代为功能多样的“可视化辅助知兵系统”，该系统在全旅推广使用；为了帮助连队官兵提升训练成绩，他开发出能够进行数据分析的“军事训练管理系统”……

该旅人力资源科一名干事告诉记者，像杨桢这样跨军兵种分配、专业不对口的排长在基层仍然存在. 下连之后，学习新专业的新鲜劲一旦过了，再碰上些沟沟坎坎，他们很容易就没了干劲.

“新排长可以主动抓住工作中的契机，寻找各个专业之间的交汇点，从而发挥特长优势进而实现弯道超车. ”几年前，欧阳腾从陆军工程大学装备保障专业毕业后，被分配到该旅某营榴弹炮兵连担任排长. 作为这个专业的“门外汉”，欧阳腾经历了一段艰难的“补课”时光.

一次实弹射击任务开始前，连队一门火炮的自动装填系统突发故障. 修理技师此时正奔忙于其他阵地，在院校学习维修保障的欧阳腾主动上前检查装备，迅速找到故障原因. 在他和几名炮手的努力下，火炮状态恢复正常.

得到赞许的欧阳腾备受鼓舞. 从那之后，他白天扎在训练场强能补差、缠着班长骨干刨根问底，晚上在学习室啃专业书籍、常常最后一个离开.

后来，欧阳腾被任命为连队炮手专业的教练员. 他充分发挥自己的专长，和火炮技师一起编撰了“火炮常见故障维修手册”，进一步提升了大家的装备维修技能. 去年，该旅某项试点攻关任务中，欧阳腾带领全排高标准完成火力打击任务，命中率位于全营第一.

我眼中的新排长

■陆军某旅一级军士长 雷 鹏

不知不觉，在部队走过了 28 个春秋的我，和不少年轻的排长打过交道.

说实话，我曾对这些“学生官”有些成见. 要是有人问我眼中的新排长啥样，我那时肯定会说他们手上没“老茧”，身上没“兵味”.

然而，随着接触的新排长越来越多，我的想法渐渐发生了转变——

一次练习闩体分解结合课目，刚刚下连的排长张帅提出建议：“安装拨动子这个部件时，翻转一下闩体，让拨动子的方形插孔‘内接’于圆形凹槽，或许会让操作流程快上十几秒. ”我有些惊讶，凭借经验操作了十几年，从未想过优化这个细节. 按照他的想法，整个流程确实快了不少，我不禁对他竖起大拇指.

类似的故事还有不少，我眼中的新排长也悄然变了模样. 他们虽然基层经验不足，但思维灵活、勇于创新，为部队的建设和发展注入了新动力.

前些年，毕业于某院校信息工程专业的吴叙霆来到连队任排长. 一次夜训，他盯着战车的指挥系统说：“这套系统使用的数据链协议已经过时了，无法让硬件发挥出应有潜力……”那晚，我们从车库聊到学习室，他讲着全新理念，我说着实践案例，一来二去，最终琢磨出了新路子. 由于更加便捷高效，这套做法在全旅推广.

这让我意识到，作为一名老班长，不仅要把自己的经验和心得传递给新排长，还要主动向他们学习.

前段时间，战车加装了新系统，大家操作起来有些吃力. 我想到刚刚下连的排长赵卫东学习过相关课程，便找他要资料.

第二天，赵卫东就抱着厚厚一摞册子来到车场. 看着密密麻麻的图表和字母，大家直皱眉头，但他耐心地为我们讲解这个界面代表什么、那段代码起什么作用，晦涩的资料从他口中变成了能够上手操作的指令.

看着大家快速上手新装备，我很高兴，也更加意识到，新排长和老班长的“双向奔赴”让大家彼此成就、共同成长.

“军营观察”版编辑对话陆军某旅政治工作部领导——

度过适应期，走好第一步

新排长下连之后，各级如何帮助他们书写好“下篇文章”，完成从军校学员到基层干部的成长与蜕变？围绕这一话题，本版编辑与陆军某旅政治工作部王副主任进行连线交流.

编辑：从校门进入营门，从操场走向战场，新排长下连之初常常遇到哪些难题？

王副主任：新排长下连后遇到的挑战是方方面面的. 例如角色转换的压力，从被管理者变为管理者，融入集体的同时更要快速建立威信、带起队伍；带兵本领的差距，院校成绩优异不能与基层表现出色完全画等号；还有环境变化的不适，基层事务千头万绪，考验工作方法和干事劲头.

编辑：部队各级如何帮助新排长开好局、起好步？

王副主任：解决之道在于“系统集训”与“跟踪帮带”相结合. 岗前集训针对性地搭起“预实践”平台，帮助新排长提前适应、强能补差. 当然，集训只是起点. 新排长下连后，各级要通过名师带徒、规划目标等方式，帮助新排长平稳度过适应期，扎实迈好第一步.

编辑：作为新排长集训队的负责人，您对最近刚刚下连的新排长们有什么建议？

王副主任：送给大家 3 句话. 一是保持归零心态，基层是真正的课堂，官兵是最好的老师，希望你们谦逊好学，在实践沃土中深扎根系；二是坚持实干为本，带兵贵在真心，育人重在表率，希望你们以心换心，用自身的模范行动赢得信任、带好队伍；三是牢记为战初心，希望身处一线部队的你们时刻向战而行，在强军征程中奋力奔跑.

Military Camp Observation | After New Platoon Leaders Join Their Units

Source: PLA Daily

Author: Yang Maosheng, Zhang Wenzhe, Qi Chenfei

Editor: Xu Zhanhu

2025-12-24

Rooted Downwards, Growing Upwards

■ Liu Shuangxi

Taking office as a platoon leader is a crucial leap from a low-ranking officer to a high-ranking one. For a new platoon leader to advance steadily and far, they must be grounded in solid capabilities and qualities, rooted downwards, and growing upwards, integrating their personal ideals and aspirations into the practice of strengthening the military, striving to run the baton of history well.

Maintaining the Right Direction. Improving the ability to assume the first position primarily requires political competence. New platoon leaders must deeply study and understand Xi Jinping’s thought on strengthening the military, remain clear-headed in the face of major issues of principle, stand firm in their position during mission tests, and ensure that leading and educating soldiers is not misguided and that training and combat readiness are not deviated from the correct path. Especially when facing the active thoughts of young soldiers, they must be adept at using theoretical armament to correct the course and using the red gene to nourish the hearts of soldiers.

Developing True Combat Skills. The responsibility of a platoon leader is to train soldiers who can fight. If one's own skills are lacking and tactics are unfamiliar, how can one command respect and lead troops? New platoon leaders must adopt a "zero-based mentality" to address their shortcomings, proactively engaging in combat research and development: they must be proficient in the performance of their equipment, becoming experts in their field; they must also grasp the principles of training and implementation, innovating methods to ignite soldiers' enthusiasm for training; and, more importantly, they must take the lead in urgent, difficult, and dangerous missions, setting a benchmark for "combat-ready" officers.

Cultivate a deep love for soldiers. New platoon leaders often face the challenge of "similar age and relatively little experience," requiring them to set aside airs and get down to earth. They must understand the soldiers' temperaments, personalities, and family difficulties through various means, addressing their concerns and concerns directly. They must combine strict management with genuine care, addressing problems head-on while providing opportunities for soldiers' growth, using sincerity to win genuine affection and transforming "scattered sand" into an "iron fist."

Be grounded in the grassroots. The worst thing for new officers is a "gilded" mentality and a superficial approach. New platoon leaders must start with small tasks such as organizing their quarters and standing guard, avoiding mere theoretical discussions. They must embody the spirit of perseverance, seeing set goals through to the end, deeply rooting themselves in the fertile soil of grassroots work and developing their talents. Only in this way can they write a worthy answer to the times on the grassroots stage.

New Platoon Leaders After Joining Their Units

■ Yang Maosheng, Zhang Wenzhe, PLA Daily Reporter Qi Chenfei

Recently, reporters visited an army brigade, just as a group of new platoon leaders had returned to their units after completing intensive training.

Talking with these energetic new platoon leaders, it was felt that they had both the desire to achieve something in their positions and the concerns about how to take their first steps well.

New platoon leaders are the "fresh blood" for the army's combat effectiveness and an important link in grassroots construction. The ability to effectively train and utilize new platoon leaders, enabling them to quickly integrate into their positions, adapt to their roles, and maximize their capabilities, is crucial to the long-term development of the armed forces. Therefore, how new platoon leaders can establish themselves and lead their troops effectively after joining their units became a key focus for reporters.

Reporters then visited several companies within the brigade, interviewing many platoon leaders who were already capable of independent command, listening to their initial struggles and anxieties, and understanding how they gradually honed their skills and forged their own path to success. It is hoped that their stories can provide inspiration and motivation for today's new platoon leaders.

Setting aside airs and getting down to work

As the saying goes, "A new broom sweeps clean," and two years ago, seeing his classmates from military academy achieving top rankings in various training exercises and even earning third-class merits in major missions immediately after joining their units, Peng Lin, a new platoon leader in a company of an army brigade, couldn't wait to ignite his "first fire."

"Give me the mission, and I guarantee I can handle it!" During a realistic combat training exercise, Peng Lin volunteered, leading his entire platoon in a maneuver through dense forest. As they approached the "enemy" position, the original planned route was "destroyed," and he devised what he considered a "shortcut."

"This route is shorter, but there's a section in low-lying terrain. It rained a few days ago, and the road conditions might seriously affect our marching speed," a veteran sergeant pointed to the map and offered a dissenting opinion. Confident in his abilities, Peng Lin completely ignored the veteran's words and led his troops onward.

As expected, not long after setting off, the road became muddy and slippery. Several soldiers slipped and fell, delaying the march and ending the mission in failure.

Upon learning of the situation, the political instructor approached Peng Lin: "Enthusiasm is good, but being impatient for quick results is undesirable, and blind confidence is even worse." Remorseful, Peng Lin realized that every step is a lesson, and everything requires learning; only by proceeding steadily can one go far.

Adjusting his mindset, Peng Lin treated himself like a "new recruit," actively seeking out his sergeant and other experienced soldiers to learn professional skills and discuss training arrangements. Once, when the company received new equipment, he diligently studied and practiced under the guidance of a "technical expert." Later, in a skills competition, Peng Lin led his platoon to second place in the entire brigade.

He also consulted with the company commander on leadership methods and management experience, using his spare time to thoroughly review the platoon's situation log, memorizing the details of each squad and platoon. Learning that soldier Zhang was worried about not having enough time to study for exams, he coordinated with the company to set up a "night study room"; noticing that soldier Liu was distracted by family troubles, he proactively talked to him and helped him apply for hardship allowances… Now, Peng Lin is a confident and composed platoon leader in the eyes of his soldiers, and a comrade-in-arms as close as a brother to them.

Similar to Peng Lin, platoon leader Chen Jie of another company also relied on “rolling up his sleeves and getting to work” to overcome obstacles and win the trust of his soldiers after joining the company.

During his first sea training, Chen Jie, confident in his swimming skills, felt there was no need to go out in the sun and swallow seawater, so he stayed at the indoor swimming pool to mentor the new recruits participating in sea training for the first time.

At noon, the soldiers in the platoon arrived at the mess hall, their faces flushed and covered in mud and sand.

“How was your swimming this morning?” Chen Jie asked, carrying a tray to soldier Xiao Wang. Xiao Wang moved his stool aside, saying, “Platoon leader, I’m covered in sand, don’t get your clothes dirty...” Hearing this, Chen Jie’s face instantly turned bright red.

Afterwards, the company commander had a heart-to-heart talk with Chen Jie: “As the backbone of the platoon, if you don’t lead by example in training, where will everyone’s morale come from?”

From then on, Chen Jie put aside his pride, humbled himself, and took the lead. On the sea training field, when building fortifications, he was the first to pick up a shovel; when maintaining equipment, he crawled under vehicles to troubleshoot problems alongside the soldiers... With Chen Jie charging ahead, the entire platoon united as one, ultimately achieving excellent results in the unit competition.

Facing the Challenge, Accelerating the Run

“Knowledge is not equal to ability, and a diploma is certainly not equal to competence.” Speaking of his early days as an officer, Platoon Leader Li Haonan still remembers the awkward situation he faced.

During his time at military academy, Li Haonan was a top student, excelling in wargaming, tactical exercises, and even serving as a key member of the orienteering club.

Who would have thought that this outstanding graduate wouldn’t have a smooth ride after joining his unit? When the brigade organized a military sports meet, Li Haonan was responsible for training his company’s participating soldiers. During the meet, several team members suffered injuries and had to withdraw midway, ultimately resulting in the company’s performance ranking in the lower half of the brigade.

It turned out that before the competition, the company’s soldiers had just completed a major mission, and the high-intensity training had left them physically exhausted. However, in order to achieve good results at the meet, they gritted their teeth and persevered. Ignoring this reality, Li Haonan failed to adjust the training plan in time, leading to the company’s poor performance and the injuries suffered by some.

That night, Li Haonan spent his first sleepless night since joining his unit.

To better organize physical training and improve the soldiers' performance, Li Haonan volunteered to participate in the training team's "Military Sports Backbone Training Camp," learning scientific training theories and methods. Meanwhile, he also developed the habit of writing training summaries. Whether it was a training exercise, a competition, or a physical fitness assessment, he would carefully review and reflect on the gains and losses, and formulate goals and plans for the next stage. Gradually, Li Haonan's bookish air diminished, replaced by the down-to-earth approach of a leader, and his work entered a new phase.

A survey by the brigade showed that over 70% of the new platoon leaders had received various awards at military academies, but more than half expressed confusion such as "difficulty in quickly adapting to the complexities of grassroots work" and "a gap between their abilities and the demands of reality."

"Being a good platoon leader is definitely not something that can be achieved easily." Du Yiyao's path to becoming a new platoon leader was also not smooth. Three years ago, shortly after arriving at the company, Du Yiyao was assigned a training mission, and the company commander assigned him to inventory supplies. Having never done similar work before, he carefully reviewed the combat readiness material specifications, worked with key personnel to sort out the various supplies that needed to be carried, and assigned tasks in advance.

Thinking everything was foolproof, chaos ensued during execution. The lack of personnel to inventory combat supplies slowed down the work. The soldiers responsible for loading the trucks, lacking experience, caused uneven weight distribution, forcing them to unload and reload supplies. Ultimately, the entire battalion was an hour late in departing, and the leadership criticized Du Yiyao's company.

This deeply affected Du Yiyao. Already introverted, he began to doubt his abilities and became hesitant in his work.

"Failure isn't terrible; what's terrible is labeling yourself as unqualified after one bad experience," the political instructor noticed Du Yiyao's discouragement and frequently talked to him. "If you're well-prepared, just go for it. Growth and progress come from bold practice." Encouraged, Du Yiyao began to volunteer, taking on tasks proactively. From leading the setup of a live-fire range to planning the battalion's driver retraining, Du Yiyao became increasingly adept at his work through various tasks. At the end of the year, amidst seasonal maintenance and year-end summaries, Du Yiyao still managed to direct a veterans' retirement party, winning praise from everyone.

Seizing the Opportunity, Overtaking on a Curve

For nearly half a year after joining the company, Yang Zhen's face was often clouded with worry.

Upon arriving at a support company in a battalion of the brigade as a platoon leader, Yang Zhen humbly sought guidance and trained diligently to quickly address his shortcomings. However, mastering new skills was not easy. In his first professional skills competition, he gave it his all but

performed only moderately. Seeing his initial performance as an officer stagnant, Yang Zhen felt his "energy level dwindling," lacking motivation for anything, and his training results remained stagnant.

The turning point came during a realistic combat training exercise. Due to a sudden change in the "enemy" situation, the number of information reports transmitted from the Red Force command vehicle increased dramatically. To help the commander make quick decisions, Yang Zhen and several communications technicians investigated and came up with a solution. He focused intently on the equipment, and within minutes, he used self-written code to complete the intelligence integration and analysis, buying valuable combat time for his side.

After the mission, the company commander asked Yang Zhen to share his experience. He humbly said that he had just gotten lucky. His veteran sergeant encouraged him, saying, "On the battlefield, brilliant ideas are what truly matter!" The recognition from his comrades fueled Yang Zhen's enthusiasm. During a training exercise at the end of the year, regaining his confidence, he led his platoon to an outstanding performance in communication support, earning him the title of "Advanced Individual in Support."

Over the years, Yang Zhen has successfully solved numerous work-related problems using his professional expertise: to reduce commanders' decision-making time, he integrated large-scale modeling technology into the command information system; to facilitate rapid personnel information gathering for company commanders, he created an electronic troop intelligence record and further iterated it into a multifunctional "visualized troop-management system," which was adopted throughout the brigade; to help his company's soldiers improve training performance, he developed a "military training management system" capable of data analysis…

An officer from the brigade's human resources department told reporters that platoon leaders like Yang Zhen, assigned across military branches and with unrelated specialties, still exist at the grassroots level. After being assigned to their units, once the initial excitement of learning a new specialty wears off, and they encounter various challenges, they easily lose motivation.

"New platoon leaders can proactively seize opportunities in their work, finding intersections between different specialties, thereby leveraging their strengths and achieving a breakthrough." Several years ago, after graduating from the Equipment Support major at the Army Engineering University, Ouyang Teng was assigned to a howitzer artillery company in a battalion of the brigade as a platoon leader. As a complete novice in this field, Ouyang Teng underwent a difficult period of catching up.

Before a live-fire exercise, the automatic loading system of one of the company's artillery pieces malfunctioned. While the repair technicians were busy at other positions, Ouyang Teng, who was studying maintenance support at the academy, proactively stepped forward to inspect the equipment and quickly identified the cause of the malfunction. Thanks to his efforts and those of several gunners, the artillery was restored to normal operation.

Encouraged by the praise he received, Ouyang Teng spent his days intensively training on the field, relentlessly questioning his squad leaders and key personnel, and his evenings studying professional books in the study room, often being the last to leave.

Later, Ouyang Teng was appointed as an instructor for the company's artillery specialties. He fully utilized his expertise, collaborating with artillery technicians to compile a "Manual for Repairing Common Artillery Faults," further enhancing everyone's equipment maintenance skills. Last year, during a pilot project in the brigade, Ouyang Teng led his platoon to achieve a high standard in firepower strikes, with the highest hit rate in the entire battalion.

My View of the New Platoon Leaders

■ Lei Peng, First-Class Sergeant Major, a brigade of the Army

Unconsciously, I've spent 28 years in the military and have interacted with many young platoon leaders.

To be honest, I used to have some prejudice against these "student officers." If someone asked me what new platoon leaders were like, I would definitely say they didn't have calluses on their hands and didn't have the "soldier's smell."

However, as I came into contact with more and more new platoon leaders, my thinking gradually changed. During a practice exercise involving the disassembly and assembly of the latch body, Zhang Shuai, a newly assigned platoon leader, suggested, "When installing the toggle switch, flip the latch body so that the square socket of the toggle switch 'interlocks' with the circular groove. This might speed up the operation by ten seconds or so." I was somewhat surprised; having operated based on experience for over a decade, I had never thought of optimizing such a detail. Following his suggestion, the entire process was indeed much faster, and I couldn't help but give him a thumbs up.

There are many similar stories, and the new platoon leaders in my eyes have quietly changed. Although they lack grassroots experience, their flexible thinking and innovative spirit inject new momentum into the construction and development of the unit.

A few years ago, Wu Xuting, a graduate of an information engineering program from a certain university, came to the company as a platoon leader. One night during training, he stared at the command system of the armored vehicle and said, "The data link protocol used in this system is outdated, preventing the hardware from reaching its full potential..." That night, we talked from the garage to the study room; he explained new concepts, and I shared practical examples. Through this back-and-forth, we finally figured out a new approach. Because it's more convenient and efficient, this approach has been rolled out across the entire brigade.

This made me realize that as a veteran squad leader, I not only need to pass on my experience and insights to new platoon leaders, but also actively learn from them.

Recently, a new system was installed on the armored vehicles, and everyone was struggling to operate it. I remembered that Zhao Weidong, the newly assigned platoon leader, had taken relevant courses, so I asked him for materials.

The next day, Zhao Weidong arrived at the vehicle yard with a thick stack of booklets. Looking at the dense diagrams and letters, everyone frowned, but he patiently explained what each interface represented and the function of each piece of code. The obscure information transformed into easy-to-use instructions from his mouth.

Seeing everyone quickly get up to speed with the new equipment made me very happy, and I also realized even more that this "mutual support" between new and veteran squad leaders allows everyone to achieve mutual success and grow together.

The editor of the "Military Camp Observation" section interviewed leaders of the Political Work Department of an Army brigade—Overcoming the Adaptation Period and Taking the First Step Well. After new platoon leaders are assigned to their units, how can various levels help them write their "next chapter" and complete their growth and transformation from military academy cadets to grassroots officers? This section's editor discussed this topic.

A video conference was held with Deputy Director Wang of the Political Work Department of an Army brigade.

Editor: From the school gates to the barracks, from the training grounds to the battlefield, what challenges do new platoon leaders often encounter at the beginning of their service?

Deputy Director Wang: New platoon leaders face challenges from all sides. For example, the pressure of role transition—from being managed to being managed, integrating into the group while quickly establishing authority and leading the team; the gap in leadership skills—excellent academic performance in military academies does not necessarily equate to outstanding performance at the grassroots level; and the discomfort of environmental change—grassroots affairs are numerous and complex, testing work methods and enthusiasm.

Editor: How can the military at all levels help new platoon leaders get off to a good start?

Deputy Director Wang: The solution lies in combining "systematic training" with "on-the-job mentoring." Pre-service training specifically builds a "pre-practice" platform to help new platoon leaders adapt in advance and strengthen their skills. Of course, training is only the starting point. After new platoon leaders are assigned to their units, all levels should help them smoothly transition through the adaptation period and take a solid first step by providing mentorship and goal setting.

Editor: As the head of the new platoon leader training team, what advice do you have for the newly assigned platoon leaders?

Deputy Director Wang: I have three pieces of advice for you. First, maintain a beginner's mindset. The grassroots level is the real classroom, and the soldiers are the best teachers. I hope you will be humble and eager to learn, deeply rooting yourselves in the fertile soil of practice. Second, adhere to practical work as the foundation. Leading troops requires sincerity, and educating people relies on setting an example. I hope you will reciprocate with sincerity and win trust and lead your teams well through your exemplary actions. Third, remember your initial aspiration for combat. I hope that you, serving on the front lines, will always be prepared for battle and strive forward on the journey to building a strong military.

第 82 集团军某旅立起向日常训练要战斗力风向标

来源：解放军报 作者：郭在兴 王飞虎 刘小云 责任编辑：林诗清 2025-12-25

第八十二集团军某旅立起向日常训练要战斗力风向标——

年终考核不再“一锤定音”

■郭在兴 王飞虎 解放军报特约通讯员 刘小云

该旅组织干部进行指挥技能考核. 徐超 摄

前段时间，第 82 集团军某旅的年终军事训练考核紧张进行，笔者发现，以往个别营连集中冲刺、轰轰烈烈“突击式”备考的场景不见了，取而代之的是各项收尾工作有条不紊地推进.

演训场上，旅作训科汪科长正督导刚执行完任务、从驻训地归队的几个分队官兵，结合全年训练实际，按部就班开展强化补差训练.

汪科长告诉笔者，年终考核也是一次阶段性考核，其目的是帮助官兵找准差距，固强补弱. 今年年终考核成绩，作为各单位年度综合成绩评定的组成部分，不再是评判工作质效的决定性因素.

“以往年终考核‘一锤定音’，不少连队为考而练，全员突击.”谈起变化，汪科长深有感触，“新军事训练大纲实行后，我们仔细研究变化、特点，决定将基础训练、战术演练和阶段

性考核等不同阶段的成绩，分别按一定比例计入各单位年度成绩，引导官兵把功夫下在平时. ”

完成一天的强化补差训练，某连下士杨子俊与战友一同有说有笑返回. 大家都感到，把功夫下在平时，远比下在“评时”更有质效.

“以前部队驻训返回后，不少有‘先见之明’的连队会拿出大把时间突击训练，最终是谁准备充分、会‘抱佛脚’，谁就能取得好成绩”“少则十几天，多则个把月，官兵们白天黑夜连轴转，其他训练和工作的正常节奏难免被打乱”……战友的议论，让杨子俊想起此前一段经历.

那年底，杨子俊受领某重要课目教学备课任务后，准备全身心钻研课目. 可临近年终考核，班里几名新兵还没完全适应负重训练，为了不拖连队后腿，身为班长的杨子俊只能先搁置手头任务，投入精力帮新兵补短板. 最终，年终考核虽顺利过关，但他的教学备课任务却因此迟滞，拖了很久才完成.

“那段时间心力交瘁，根本没顾上带全班复盘总结过去一年的经验不足，思考新的一年怎样更进一步. ”杨子俊坦言，年终考核不再“一锤定音”，他们也就没必要突击备考，从“为考而练”变为“为战而练”，自然练得更扎实、更稳定.

基层各项日常工作按部就班，官兵们也就有了更多时间精力查漏补缺. 近段时间，针对义务兵军事体能上的薄弱点，各连制订专攻精练计划，指导战士们固强补弱，有效提升部队战斗力；军士队伍则围绕明年的授课计划，着手编写教案、试讲试教……

走出备课室，某连一级上士铁英杰告诉笔者，今年年终考核还有一大亮点，那就是干部普考与军士抽考相结合.

过去一年，旅队大项任务多，人员动散，点多面广. 有的连队留守营区，有的仍在外驻训或执行专项任务，有的刚参加完实弹检验任务返回，还有不少后续工作亟待完成. 由于精力有限，面对考核时，连队常常要作出取舍.

旅队综合衡量后，决定由机关统筹把关，重点考察指挥员和带兵人能力素质，灵活确定考核内容，避免因刚性落实“全员上阵”、课目设置“一刀切”等，导致官兵仓促应考.

考核没有覆盖全员. 对基层分队干部的普考，侧重考察法规理论、专业技能、基础体能 3 个方面. 同时，面向中高级军士进行基础体能的抽考. 其余官兵，则由各营连根据本单位情况自行组织考核.

“就像参加一次普通的阶段性考核，回归了年终考核的本质. ”铁英杰说，往年的“米、秒、环”老几样被替换，取而代之的是支撑高效指挥的必备技能与带兵打仗所需的基本能力.

这立起了向日常训练要战斗力的风向标. “只要大家把功夫下在平时，扎扎实实掌握，不必刻意抽时间突击准备，也能考出好成绩. ”考核中，某连二级上士龙子恒被抽考后，从容上阵，取得不错的成绩.

该连赵连长对笔者说，干部骨干现在学习劲头很足，连队每周都开展军事训练法规理论研学. 组织训练时，干部骨干主动站到排头；每月一次的体能考核，干部与战士一同排名. 这次，尽管刚返回营区就迎来年终考核，但大家平时有底，心里不慌.

笔者注意到，年终考核当天，各部队照常组织训练，专业技能考核是利用训练间隙完成的. 引体向上、3 公里跑等课目的考核，放在下午体能训练时间进行，不再专门设置时间和场地. 这样的安排，获得基层官兵普遍欢迎.

年终考核落下帷幕，背后折射出部队训练理念的转变. 该旅官兵表示：“像训练一样考核，才会像训练一样打仗，锤炼出随时能战的过硬本领！”

An 82nd Group Army Brigade Sets a Benchmark for Improving Combat Effectiveness Through Routine Training—Year-End Assessments No Longer a “One-Shot Wonder”

■ Guo Zaixing, Wang Feihu, Special Correspondent of PLA Daily, Liu Xiaoyun

The brigade organized officers to conduct command skills assessments. (Photo by Xu Chao)

Recently, the year-end military training assessment of a brigade of the 82nd Group Army was underway. The author observed that the previous scenes of individual battalions and companies intensively preparing for the assessment were gone; instead, various finishing tasks were being carried out in an orderly manner.

On the training field, Section Chief Wang of the brigade’s training section was supervising several detachments that had just completed their missions and returned from their training base, conducting intensive remedial training step by step, based on the actual training throughout the year.

Section Chief Wang told the reporter that the year-end assessment is also a phased assessment, its purpose being to help officers and men identify gaps and strengthen their strengths. This year, the

year-end assessment results, as a component of each unit's overall annual performance evaluation, are no longer the decisive factor in judging work quality.

"In the past, the year-end assessment was a 'one-shot deal,' and many companies trained only for the exam, with everyone cramming," Section Chief Wang said, reflecting on the changes. "After the implementation of the new military training syllabus, we carefully studied the changes and characteristics, and decided to include the results of different stages, such as basic training, tactical drills, and phased assessments, in each unit's annual performance evaluation according to a certain proportion, guiding officers and men to put in the effort regularly." After a day of intensive remedial training, Corporal Yang Zijun and his comrades returned home chatting and laughing. Everyone felt that putting in the effort regularly was far more effective than focusing on the "assessment."

"In the past, after returning from field training, many far-sighted companies would dedicate a significant amount of time to intensive training. Ultimately, whoever was best prepared and crammed at the last minute achieved the best results." "For anywhere from ten days to a month, soldiers worked day and night, inevitably disrupting the normal rhythm of other training and work..." These comments from his comrades reminded Yang Zijun of a previous experience.

At the end of that year, Yang Zijun received the task of preparing lessons for an important subject and was ready to devote himself entirely to mastering it. However, with the year-end assessment approaching, several new recruits in his squad hadn't fully adapted to weight training. To avoid holding the company back, Yang Zijun, as the squad leader, had to put aside his current tasks and focus his energy on helping the new recruits overcome their weaknesses. Ultimately, although they passed the year-end assessment smoothly, his lesson preparation was delayed and took a long time to complete.

"I was exhausted during that period and didn't have time to lead the whole class in reviewing and summarizing the shortcomings of the past year, or thinking about how to improve in the new year," Yang Zijun admitted. He explained that since the year-end assessment was no longer a "one-shot deal," they no longer needed to cram for it. The focus shifted from "training for the exam" to "training for combat," naturally leading to more solid and consistent training.

With routine work proceeding smoothly at the grassroots level, officers and men had more time and energy to identify and address any gaps in their skills. Recently, each company has developed specialized training plans to address the weaknesses in the military physical fitness of conscripts, guiding soldiers to strengthen their strengths and address their weaknesses, effectively improving the unit's combat effectiveness. Meanwhile, the sergeant corps is working on lesson plans and conducting trial lectures for next year's teaching schedule…

Leaving the preparation room, Sergeant Tie Yingjie, a first-class sergeant from a certain company, told the reporter that another highlight of this year's year-end assessment was the combination of general assessments for officers and random assessments for sergeants.

In the past year, the brigade had many major tasks, personnel were scattered, and the locations were numerous and widespread. Some companies remained at the barracks, while others were still stationed elsewhere for training or special missions. Some had just returned from live-fire exercises, leaving much follow-up work to be done. Due to limited resources, companies often had to make choices when facing assessments.

After comprehensive consideration, the brigade decided that the headquarters would coordinate and oversee the assessments, focusing on the capabilities and qualities of commanders and troop leaders. The assessment content would be flexibly determined to avoid hasty testing for officers and men due to rigid implementation of "all personnel involved" or "one-size-fits-all" subject settings.

The assessments did not cover all personnel. The general examination for officers at the grassroots level focused on three aspects: legal theory, professional skills, and basic physical fitness. Simultaneously, random checks on basic physical fitness were conducted for mid- to senior-level sergeants. The remaining officers and men were assessed by their respective battalions and companies based on their unit's specific circumstances.

"It's like participating in a regular periodic assessment, returning to the essence of the year-end assessment," said Tie Yingjie. The old "meter, second, ring" tests have been replaced by essential skills supporting efficient command and basic abilities required for leading troops in combat.

This sets a benchmark for improving combat effectiveness through routine training. "As long as everyone puts in the effort regularly and masters the material thoroughly, there's no need for cramming; good results are achievable without it," said Sergeant Long Ziheng of a certain company, who calmly took the test and achieved a good score.

Company Commander Zhao told the reporter that officers and key personnel are now highly motivated to learn, and the company conducts weekly study sessions on military training regulations and theories. During training sessions, officers and key personnel take the lead; in the monthly physical fitness assessment, officers and men are ranked together. This time, although the year-end assessment came immediately after returning to the barracks, everyone was confident and calm.

The reporter noted that on the day of the year-end assessment, all units conducted training as usual, with professional skills assessments completed during training breaks. Assessments of subjects like pull-ups and the 3-kilometer run were conducted during the afternoon physical fitness training session, without dedicated time or location. This arrangement was widely welcomed by the grassroots officers and men.

The year-end assessment has concluded, reflecting a shift in the military's training philosophy. The officers and men of the brigade said, "Only by assessing us like we are training can we fight like we are training, and hone our skills to be ready to fight at any time!"

军营观察丨筑城连的“能力突围”

来源：解放军报 作者：王爱虎 和力 赵文环 责任编辑：徐占虎 2025-12-25

“我们的战斗，在枪响之前”

■和力　赵文环

夕阳的余晖，洒落在新构筑的工事上. 陆军某旅二级上士花建华，伫立在掩体旁，目送参演分队的车辆隆隆驶入阵地.

引擎轰鸣，他的目光平静而坚定. 时光倒回 8 年前，同样的场景下，他眼中却满是不甘.

那年，还是新兵的花建华首次参加实兵演习. 他所在的筑城连鏖战数日，筑起坚固的防御工事. 演习即将打响，移交工事后，他们收拾工具撤离.

眼见兄弟连队战友全副武装冲向阵地，花建华忍不住问班长：“当兵不就为打仗？咱们怎么连枪响都听不到就得走？”

班长轻拍他的肩：“我们的战斗，在枪响之前.”

这句话，说出了筑城兵的使命：他们的战场，不在硝烟弥漫的冲锋陷阵中，而在战前的紧张施工作业中.

掘战壕、修掩体、设障碍……当其他战友奋勇向前时，筑城兵已完成任务. 他们如同战场的“布景师”，用铁锹和机械构筑防线，只为战友少流血、胜利更牢靠. 恰似舞台剧的幕后工作人员，大幕拉开、灯光亮起，正是他们悄然退场之时.

这样的角色定位，注定了筑城兵远离聚光灯. 花建华曾目睹精心构筑的工事在演习中被摧毁. 连队许多战友直到退伍，也未曾在演习中“消灭”过一个“敌人”. 筑城兵的价值何在？他一度陷入迷茫.

思想的转折，发生在几年前的一次联合演习. 花建华带领班组构筑的反坦克壕，成功迟滞了对手装甲部队的突击. 那一刻，花建华看清楚了筑城兵的价值所在：自己手中的每一锹土，都实实在在影响着战局.

“我们不是局外人，而是作战体系中不可或缺的一环！”这场演习，成为连队许多官兵思想转变的契机. 他们不再纠结于“为何冲锋的不是我”，而是专注于如何成为出色的“战场建筑师”.

“保障节点也要具备抗毁伤能力，一个节点被毁，其他节点必须能立即补位！”花建华所在连队大力推行“一专多能”训练，一级上士茶君能熟练操作 3 种工程机械，下士罗潇更掌握

了工事构筑与机械操作双项技能. 在近期一次演练中，暴雨冲毁通路，这些“多面手”迅速开辟新通道，保障了部队机动畅通.

当演练官兵向筑城兵竖起大拇指时，花建华更加理解了班长当年那句话的含义.

在波澜壮阔的强军征程上，无数像花建华这样的士兵默默耕耘在战位上. 战幕拉开前，他们用汗水浇筑胜利的根基；当冲锋号角吹响，他们选择无声退场，将舞台留给冲锋的战友.

筑城连的“能力突围”

■王爱虎　和力　赵文环

会开车的不懂机械，懂机械的不会维修

演训中，陆军某旅官兵在烟雾掩护下破除障碍物. 赵文环 摄

晨雾未散，海拔 2000 多米的演训场上，集结哨声刺破寒风. 陆军某旅筑城连官兵迎着风沙列队待发，为即将开始的对抗演习构筑工事.

杨连长的目光扫过队列——排头是几名骨干军士，他们身后则是一张张年轻的面孔. 这支常年处于“兵分多路”状态的连队，此刻可投入演训的兵力明显不足.

这些年，该连任务愈加繁重，部分官兵远赴海外维和，机动兵力不足成为常态. 人才结构单一等问题，也在实战化训练中暴露无遗.

杨连长对几年前那次任务记忆犹新：连队前出数百公里构筑工事体系. 预案虽周密，现实却严峻——装载机操作手仅 2 人在位，车辆驾驶员缺编，骨干力量捉襟见肘.

无奈之下，他们只得向友邻单位求援. 即便得到支援，驾驶员和操作手数量仍无法满足装备一次性投送需求，官兵只能分段倒运装备.

“一个筑城连，竟难以完成基本的力量投送任务！”看着官兵疲惫的身影，杨连长心中不由感慨.

演兵场上，挫折一个接着一个. 一级上士茶君难忘那个深夜：他驾驶运输车第三次往返途中，车突然熄火. 他急得满头大汗，但唯一懂维修的军士正在别处抢修，分身乏术.

因关键岗位操作手缺席，工程进度严重滞后. “构筑交通壕，挖掘机操作手被调走，我们十几人抡铁锹挖了一整天，进度不到机械作业的三分之一. ”二级上士花建华的回忆透着无奈.

现代战场上，一个掩体角度偏差、一条壕沟深度不足，都可能让战友付出生命代价. 实战要求筑城兵不仅要快速构建传统工事，更要掌握新型障碍设置、预制工事装配等多种技能.

然而，当时的连队里“会开车的不懂机械，懂机械的不会维修”，多数人仅精通单一专业，战场适应性不足；关键技能掌握在少数骨干手中，而骨干们固守着自己的“责任田”，班组如同“孤岛”，人才培养模式明显滞后.

打破专业间的“孤岛”，只是第一步

深刻的教训，让连队党支部认识到：大家必须成为“多面手”.

会议室内，杨连长与班长骨干们共商重新分班计划，提出要打破专业壁垒，实施“换岗轮训”，挖掘机操作手须兼学其他工程机械与车辆驾驶，驾驶员也要掌握工程机械操作，中士以上军士必须精通 2 种以上装备操作.

方案一提出，会场顿时议论纷纷，讨论一直持续到熄灯号响起. 虽然部分骨干有畏难情绪，但大家一致同意，先试行一段时间.

一次演习前，连队挖掘机操作骨干被临时抽调去执行其他任务. 演习中，眼看构筑反坦克壕的任务就要延误，关键时刻，刚通过“换岗轮训”掌握挖掘机操作的一名骨干主动请缨“补位”，带领几名同样新学机械操作的战友，齐心协力完成了任务.

实践的验证，让“换岗轮训”的齿轮加速转动. 官兵不再固守单一岗位，而是积极主动地在不同专业领域轮换学习.

专业间的“孤岛”被打破，方能纵横更广阔的战场. 训练场上，这样的场景渐渐成为常态：几名驾驶员在挖掘机旁排着队，等待练习机械操作；而机械操作手则围着运输车，学习钻研车辆驾驶与基础维修.

随着“换岗轮训”深入推进，新的问题随之浮出水面：部分战士换岗的新专业课目合格率不高，主专业课目的成绩也有所下降.

问题到底出在哪里？杨连长深入调研后发现，在组训方法上，骨干们大多习惯“手把手教动作”，却疏于讲解原理；同时，新增课目挤占了主专业的训练时间，导致部分官兵主专业水平下滑.

对症下药，一场聚焦教学法的比武随之展开. 下士陈艳川带领的教学组创新组训方式，既练操作又学原理. 过了一段时间，官兵相关课目考核成绩明显提升.

连队及时总结经验，推出“专长任教”新举措：打破兵龄限制，有专长的官兵通过相关考核，即可担任专业教练员；摒弃经验主义，组织编写标准化教案；跨越专业壁垒，鼓励教学方法“移植”.

经过不懈探索，连队总结出一套行之有效的能力生成路径：“换岗轮训”消除专业盲区，“专长任教”提升教学质效，“周期管控”实现动态调整.

陆军某旅筑城连官兵操纵机械构筑工事. 赵文环 摄

陆军某旅筑城连装载机操作手修整通行道路. 赵文环 摄

训练场上，一派热火朝天的景象. 推土机轰鸣作响，茶君紧握操纵杆，额上沁出细密汗珠. 这位拥有 12 年驾龄的老兵，正全神贯注地操纵着推土机，在凹凸不平的地面上作业. 操作室外，几名年轻士兵望着老班长，低声交流着.

不远处，骨干李富国正悉心指导新兵周朝阳操作挖掘机；工程测量员陈浩龙为大家细致讲解着车辆伪装要领；文书陈杰投入地练习着北斗手持机操作……

据统计，该连 60%的军士骨干能熟练操作 2 种以上装备，具备顶岗能力的官兵大幅增加，教学骨干队伍持续壮大.

能力的延伸重塑了思维

暴雨如注，夜色如墨. 一场夜间工程构筑演练，在极端条件下打响.

几道强光手电刺破雨幕，映照出一座新开挖的露天工事：十几名浑身泥浆的筑城兵，正与时间和暴雨赛跑.

杨连长深一脚浅一脚地踩在泥泞中，目光紧锁各组进度.

“左板抬高 2 厘米！”茶君嘶哑的指令穿透雨声. 他抹去脸上的泥水，与战友合力精准打入连接销钉，将沉重的预制件拼接成半地下掩蔽部.

“左侧，再收半斗！”不远处，花建华的指令通过电台直达挖掘机，操作手、一级上士岳亮立即微调挖斗. 另一边，下士罗潇正沉稳地操纵装载机，修整车辆掩体坡度.

雨声、人声、机械轰鸣声交织. 这些官兵的任务，是在规定时间内构筑起包含多个车辆掩体、地下掩蔽部及交通壕的工事体系.

若按传统作业模式，这一任务需要一个满编筑城连协同完成. 此刻，连队部分官兵远在海外维和，部分官兵留守营区. “人少，战位不能空，标准不能降！”杨连长语气坚决.

破题的关键，蕴藏在连队转型催生的全新组织模式与认知模式之中.

以往，连队驾驶员、操作手、构工员界限分明. 如今，茶君既是驾驶员，又是掩蔽部搭建骨干，还能操作装载机；花建华指挥挖掘机的同时，可以随时准备顶替疲惫的操作手……人员“流动”起来，为创新作业流程奠定了基础.

连队探索出“循环交叉作业法”，官兵被编为 3 组：一组专注工事开挖，二组同步铺设掩蔽部构件，三组接力修整交通壕，循环作业、交叉操作，工序无缝衔接.

杨连长提供了一组对比数据：同样的任务、同样的时限，采用新作业法后，所需人员降至原来的三分之一. 这不仅是官兵个人综合技能叠加的效应，更是系统化编组、集约化用兵思维的成功实践.

能力的延伸，深刻重塑了官兵在战场上的“角色认知”. 驾驶员刘日晨的经历便是一个生动例证：战友的运输车在雨中熄火，他迅速排除了故障. “过去，驾驶员的职责是开好车；现在，驾驶员还必须懂维修、能应急. ”刘日晨说，“战场上不分你的任务、我的任务，只有我们的胜利. ”

从“我是一名驾驶员、我是一名操作手”到“我是保障链上能修复断点的一环”，筑城兵从“能操作、会施工”向“懂原理、善应变”进化，真正成为战场上的问题解决者和体系维护者.

这种思维重塑的深层逻辑，被杨连长概括为：“多能不是追求万能，而是为了在战场‘断链’时，确保我们拥有可靠的‘保底’手段. ”

思维的跃升，在关键时刻迸发出惊人能量. 前不久一次演习，连队面临近 20 名骨干临时缺位的考验. 结果令人振奋——参演官兵“上车能驾驶，下车能作业，操机可施工，进壕能挖掘”，凭借扎实的复合技能，按时高标准完成任务.

“以前，遇到这种情况，我们下意识的反应是‘等’——等待配属、等待增援；现在，我们第一时间思考的是如何‘融’——如何重组现有的人员与技能，重构任务流程. ”杨连长感慨道.

能力的延伸仍在继续. 目前，除筑城专业外，连队许多官兵掌握了电台操作、北斗通信、车辆伪装等技能.

比“技能清单”更长的，是思维的延伸. 夕阳下，茶君指导年轻战士练习机械驾驶. 他传授的不仅是操作技巧，还有“何时介入作业流程效率最高”的时机判断. 远处，练习伪装技能的官兵研讨着如何将单项伪装融入整个工事体系……从这群年轻筑城兵眼中，笔者看到的已非“掌握一门技能”的满足，而是“理解整个战场、融入作战体系”的强烈渴望.

他们深知，多拓展一寸能力的边界，思维便多一分穿透战场迷雾的锐利光芒. 他们更坚信，胜利永远青睐那些率先完成思维蜕变、具备体系作战能力的军人. 新时代强军征程上，筑城连的能力“突围”，永远在路上.

“军营观察”版编辑对话陆军某旅作训科科长——

做新时代的“战场设计师”

从冷兵器时代的城墙壕沟，到现代战争中的复合防御体系，背后都有筑城兵的影子. 在战争形态不断演变的今天，这支古老的兵种正经历怎样的转型、面临何种挑战？围绕这一话题，本版编辑与陆军某旅作训科科长进行了连线交流.

编辑：对普通读者而言，筑城兵的概念相对陌生，请您解读一下其核心使命.

科长：筑城兵的核心使命可凝练为 8 个字：保存自己，迟滞敌人. 他们的战斗不同于冲锋陷阵的步兵或火力覆盖的炮兵，他们的决胜时刻在战前已经展开：通过精密构筑工事、科学设置障碍，为作战体系创造更有利的战场态势. 现代筑城兵又被称为“战场设计师”，他们不仅要精通土木工程，为战友构筑生存屏障、提升防御效能，更需深研战术战法，通过预设障碍体系，诱导、迟滞、分割敌方进攻队形，为友军创造火力歼敌的有利窗口.

编辑：近年来，无人机、精确制导武器等新型装备深刻重塑战争形态. 在此背景下，筑城兵的价值体现在哪里？

科长：随着战争形态的改变，筑城兵的价值更加凸显. 他们是现代战场上的“成本控制大师”和“节奏设计师”. 比如，一枚精确制导导弹价值不菲，而筑城兵用专业技能和普通材料构筑的假目标工事，成本却低得多. 通过系统规划，筑城兵构建起真假结合的防御体系，迫使对手每前进一步，都要在时间、装备和人员上付出巨大代价，有效扰乱其作战节奏. 以低成本的战场工程作业，牵制对手的高价值装备，形成“非对称消耗”效应，这就是筑城兵在高科技战争中不可替代的价值.

编辑：展望未来，筑城兵的角色将如何演进？

科长：过去，筑城兵输出的是体力与土方；未来，筑城兵输出的将是决策依据和战术选项. 比如，通过模拟计算，筑城兵可以为指挥员提供“在哪里设置障碍性价比高”“如何伪装能诱骗敌方侦察”等方案. 这意味着，筑城兵将用工程智慧为体系防护增加一层“思维铠甲”.

编辑：对新时代筑城兵而言，核心能力要求有哪些？

科长：可以概括为 3 点：一是具备体系思维，要深刻理解每一处工事、每一道障碍在战场全局中的节点作用；二是增强抗毁韧性，要具备在复杂战场环境下快速修复、补充、重构防御体系的能力，确保关键节点功能不中断；三是要甘当幕后英雄，以坚韧不拔的意志和精湛的专业技能，默默构筑起坚固的防御工事.

Military Camp Observation | The “Breakthrough” of the Fortification Company

Source: PLA Daily

Author: Wang Aihu, He Li, Zhao Wenhuan

Editor: Xu Zhanhu

2025-12-25

“Our battle begins before the gunfire”

■ He Li, Zhao Wenhuan

The afterglow of the setting sun falls on the newly constructed fortifications. Sergeant Hua Jianhua, a second-class sergeant from an army brigade, stands beside his bunker, watching the vehicles of the participating units rumble into the position.

The engines roar, but his gaze is calm and resolute. Rewind eight years, to a similar scene, but his eyes are filled with resentment.

That year, Hua Jianhua, then a new recruit, participated in his first live-fire exercise. His fortification company fought for several days, building solid defensive fortifications. As the exercise was about to begin, after handing over the fortifications, they packed up their tools and withdrew.

Seeing his comrades from the same company, fully armed, rushing towards the position, Hua Jianhua couldn’t help but ask his squad leader, “Isn’t the point of being a soldier to fight? Why are we being forced to leave before we even hear the gunfire?”

The squad leader gently patted his shoulder: “Our battle begins before the gunfire.”

This statement encapsulates the mission of the fortification builders: their battlefield isn't in the smoke-filled charge, but in the intense pre-battle construction work.

Digging trenches, repairing fortifications, setting up obstacles… while other comrades bravely advance, the fortification builders have already completed their tasks. They are like the "scene set designers" of the battlefield, using shovels and machinery to construct defensive lines, all to minimize the bloodshed of their comrades and ensure a more secure victory. Like the backstage crew of a stage play, when the curtain rises and the lights come on, it's time for them to quietly exit.

This role destined the fortification builders to stay away from the spotlight. Hua Jianhua witnessed meticulously constructed fortifications being destroyed in exercises. Many of his comrades, until their discharge, never "eliminated" a single "enemy" in an exercise. What is the value of fortification builders? He was once confused.

The turning point came a few years ago during a joint exercise. Hua Jianhua led his squad in constructing an anti-tank ditch, successfully delaying the enemy's armored assault. At that moment, Hua Jianhua clearly saw the value of fortification builders: every shovelful of earth he wielded had a real impact on the battle.

"We are not outsiders, but an indispensable link in the combat system!" This exercise became a turning point in the thinking of many officers and men in the company. They no longer agonized over "why I wasn't the one charging," but focused on how to become excellent "battlefield architects."

"Support nodes must also have the ability to withstand damage. If one node is destroyed, others must be able to immediately fill the gap!" Hua Jianhua's company vigorously promoted "multi-skilled" training. First-Class Sergeant Cha Jun is proficient in operating three types of engineering machinery, while Corporal Luo Xiao has mastered both fortification construction and machinery operation skills. In a recent exercise, torrential rain washed away roads, and these "all-rounders" quickly opened new passages, ensuring the smooth movement of the troops.

When the soldiers in the drill gave the fortification-building company a thumbs-up, Hua Jianhua understood even more deeply the meaning of his squad leader's words from years ago.

On the magnificent journey of building a strong military, countless soldiers like Hua Jianhua silently toil at their posts. Before the battle begins, they water the foundation of victory with their sweat; when the bugle call sounds, they choose to silently retreat, leaving the stage to their comrades charging forward.

The Fortification-Building Company's "Breakthrough in Capabilities"

■ Wang Aihu, He Li, Zhao Wenhuan Those who can drive don't understand machinery, and those who understand machinery can't repair it.

During the drill, soldiers of an army brigade cleared obstacles under the cover of smoke. (Photo by Zhao Wenhuan) Before the morning mist had dissipated, on the training ground at an altitude of over 2,000 meters, the assembly whistle pierced the cold wind. Soldiers of the fortification-building company of an army brigade lined up against the wind and sand, ready to construct fortifications for the upcoming confrontation exercise.

Company Commander Yang's gaze swept across the ranks—at the head were several core soldiers, followed by rows of young faces. This company, perpetually in a state of "multi-pronged deployment," clearly lacked sufficient manpower for training exercises.

In recent years, the company's missions had become increasingly demanding, with some soldiers deployed overseas for peacekeeping operations, making insufficient mobile forces a common occurrence. Problems such as a homogeneous personnel structure were also starkly exposed during realistic combat training.

Company Commander Yang vividly remembered a mission from several years ago: the company advanced hundreds of kilometers to construct a fortification system. Despite meticulous planning, reality proved harsh—only two loader operators were available, vehicle drivers were insufficient, and core personnel were stretched thin.

In desperation, they had to request assistance from neighboring units. Even with support, the number of drivers and operators was still insufficient for a single equipment delivery, forcing the soldiers to transport equipment in sections.

"A fortification company, struggling to complete even a basic force deployment mission!" Looking at the exhausted figures of his soldiers, Company Commander Yang couldn't help but sigh.

On the training ground, setbacks came one after another. Sergeant First Class Cha Jun vividly remembers that late night: on his third round trip driving a transport vehicle, the engine suddenly stalled. He was sweating profusely with anxiety, but the only sergeant skilled in repairs was elsewhere, leaving him unable to help.

Due to the absence of operators in key positions, the project was severely delayed. "To build the trenches, the excavator operators were transferred, and a dozen of us dug with shovels all day, achieving less than a third of the progress of mechanized work," recalled Sergeant Second Class Hua Jianhua, his voice filled with helplessness.

On the modern battlefield, a slight deviation in the angle of a bunker or an insufficient depth in a trench can cost a comrade's life. Real combat demands that fortification soldiers not only quickly construct traditional fortifications but also master various skills such as setting up new obstacles and assembling prefabricated fortifications.

However, at that time, the company was characterized by "those who could drive didn't understand machinery, and those who understood machinery couldn't maintain it." Most people were only proficient in a single specialty, lacking battlefield adaptability. Key skills were held by a few key

personnel, who remained confined to their own “responsibility areas,” making their squads like “islands,” and the talent development model was clearly lagging behind.

Breaking down these professional “islands” was only the first step. The profound lessons made the company’s Party branch realize that everyone must become “versatile.”

In the meeting room, Company Commander Yang discussed a plan to reorganize squads with the squad leaders and key personnel. He proposed breaking down professional barriers and implementing “rotational training.” Excavator operators would be required to learn to drive other construction machinery and vehicles, drivers would also need to master construction machinery operation, and sergeants and above would be proficient in operating at least two types of equipment.

The plan immediately sparked heated discussion, which continued until lights out. Although some key personnel were hesitant, everyone agreed to try it out for a period of time.

Before an exercise, the company’s key excavator operators were temporarily reassigned to other tasks. During the exercise, when the task of constructing the anti-tank ditch was about to be delayed, a key soldier who had just mastered excavator operation through “rotational training” volunteered to “fill in,” leading several comrades who were also newly learning machine operation to complete the task together.

Practical experience accelerated the “rotational training” process. Soldiers no longer remained confined to single positions but actively rotated through different professional fields for learning.

Breaking down the “islands” between specialties allowed them to navigate a broader battlefield. On the training ground, this scene gradually became the norm: several drivers lined up beside the excavator, waiting to practice machine operation; while machine operators surrounded transport vehicles, learning and studying vehicle driving and basic maintenance.

As “rotational training” progressed further, new problems emerged: some soldiers had low pass rates in their new professional skills, and their scores in their primary professional skills also declined.

Where exactly did the problem lie? After in-depth research, Company Commander Yang discovered that in terms of training methods, key personnel were mostly accustomed to “teaching the movements step by step,” but neglected to explain the underlying principles. At the same time, newly added subjects encroached on training time for core specialties, leading to a decline in the professional skills of some soldiers.

To address this problem, a competition focusing on teaching methods was launched. Corporal Chen Yanchuan led a teaching group that innovated its training methods, combining operational training with theoretical instruction. After a period of time, the soldiers’ performance in relevant subject assessments significantly improved.

The company promptly summarized its experience and introduced a new measure: “specialty-based instruction.” This broke down the age-based restrictions, allowing soldiers with special skills to serve as professional instructors after passing relevant assessments; it abandoned empiricism and organized the compilation of standardized lesson plans; and it transcended professional barriers, encouraging the “transfer” of teaching methods.

Through persistent exploration, the company summarized an effective capability development path: “rotational training” to eliminate professional blind spots, “specialty-based instruction” to improve teaching quality and efficiency, and “periodic management” to achieve dynamic adjustment.

Soldiers of a fortification company of an army brigade operate machinery to construct fortifications. (Photo by Zhao Wenhuan) A loader operator in the fortification company of an army brigade repairs a road. (Photo by Zhao Wenhuan) On the training ground, a scene of bustling activity unfolds. Bulldozers roar, and Cha Jun grips the control lever tightly, beads of sweat forming on his forehead. This veteran with 12 years of driving experience is intently operating the bulldozer, working on the uneven ground. Outside the control room, several young soldiers watch their veteran sergeant, exchanging hushed conversations.

Not far away, backbone soldier Li Fuguo is carefully instructing new recruit Zhou Chaoyang on operating an excavator; engineering surveyor Chen Haolong is meticulously explaining vehicle camouflage techniques; clerk Chen Jie is diligently practicing operating a Beidou handheld device…

According to statistics, 60% of the company’s sergeant backbone personnel are proficient in operating two or more types of equipment, the number of officers and men capable of taking on additional duties has increased significantly, and the teaching backbone team continues to grow.

The extension of capabilities reshapes thinking. Torrential rain pours down, the night is as dark as ink. A nighttime engineering construction exercise is launched under extreme conditions. Several beams of strong flashlight pierced the rain, illuminating a newly excavated open-air fortification: a dozen soldiers, covered in mud, were racing against time and the downpour.

Company Commander Yang trudged through the mud, his eyes fixed on the progress of each group.

“Raise the left platform by 2 centimeters!” Cha Jun’s hoarse command cut through the rain. He wiped the mud from his face and, together with his comrades, precisely drove in the connecting pins, assembling the heavy prefabricated components into a semi-underground shelter.

“Left side, reduce the bucket by half again!” Not far away, Hua Jianhua’s command was transmitted directly to the excavator via radio. The operator, First Sergeant Yue Liang, immediately made minor adjustments to the bucket. On the other side, Corporal Luo Xiao steadily operated the loader, adjusting the slope of the vehicle shelter.

The sounds of rain, voices, and the roar of machinery mingled. These soldiers' task was to construct a fortification system containing multiple vehicle shelters, underground bunkers, and communication trenches within the allotted time.

Under traditional operational methods, this task would require a full-strength fortification company to complete. Currently, some soldiers are on peacekeeping missions overseas, while others remain at the camp. "We're short-staffed, but our positions can't be empty, and our standards can't be lowered!" Company Commander Yang stated firmly.

The key to solving this problem lies in the new organizational and cognitive models fostered by the company's transformation.

Previously, the roles of driver, operator, and construction worker were clearly defined. Now, Cha Jun is not only a driver and a key member of the shelter construction team but also operates a loader; Hua Jianhua, while directing the excavator, can be ready to replace a tired operator at any time… This personnel "mobility" has laid the foundation for innovative operational processes.

The company has developed a "cyclical cross-operation method," dividing soldiers into three groups: one group focuses on excavation, the second group simultaneously lays shelter components, and the third group takes turns repairing communication trenches. This cyclical, cross-operation ensures seamless workflow.

Company Commander Yang provided comparative data: for the same task and timeframe, the required personnel were reduced to one-third of the original number after adopting the new method. This is not only the combined effect of the soldiers' individual comprehensive skills, but also a successful practice of systematic organization and intensive troop deployment thinking.

This extension of capabilities has profoundly reshaped the soldiers' "role perception" on the battlefield. The experience of driver Liu Richen is a vivid example: when his comrade's transport vehicle stalled in the rain, he quickly resolved the problem. "In the past, a driver's responsibility was to drive well; now, a driver must also know how to maintain the vehicle and be able to respond to emergencies," Liu Richen said. "On the battlefield, there is no distinction between your task and mine; there is only our victory."

From "I am a driver, I am an operator" to "I am a link in the support chain that can repair broken points," the fortification soldiers have evolved from "being able to operate and construct" to "understanding principles and being good at responding," truly becoming problem solvers and system maintainers on the battlefield.

The deep logic behind this reshaping of thinking was summarized by Company Commander Yang as: "Being versatile is not about pursuing omnipotence, but about ensuring that we have reliable 'safety net' measures when the 'chain' breaks on the battlefield." This leap in thinking unleashes astonishing energy at critical moments. In a recent exercise, the company faced the challenge of having nearly 20 key personnel temporarily absent. The result was exhilarating—the participating

soldiers were able to drive in vehicles, operate machinery, and dig trenches, demonstrating solid multi-skilled abilities and completing the mission on time and to a high standard.

“Previously, in such situations, our instinctive reaction was to ‘wait’—waiting for reinforcements; now, our first thought is how to ‘integrate’—how to reorganize existing personnel and skills, and restructure the mission flow,” Company Commander Yang remarked.

The expansion of capabilities continues. Currently, in addition to fortification expertise, many soldiers in the company have mastered skills such as radio operation, BeiDou communication, and vehicle camouflage.

Even longer than the “skills list” is the extension of thinking. Under the setting sun, Cha Jun instructs young soldiers on how to operate machinery. He teaches not only operational techniques but also the timing for intervention in the operational process to maximize efficiency. In the distance, soldiers practicing camouflage skills discussed how to integrate individual camouflage techniques into the entire fortification system… From the eyes of these young fortification builders, what I saw was no longer the satisfaction of “mastering a skill,” but a strong desire to “understand the entire battlefield and integrate into the combat system.”

They deeply understand that expanding the boundaries of their capabilities by even an inch increases the sharpness of their thinking as they pierce the fog of battle. They firmly believe that victory always favors those soldiers who first complete the transformation of their thinking and possess system-wide combat capabilities. On the journey to build a strong military in the new era, the “breakthrough” of the fortification company’s capabilities is a never-ending process.

“Military Camp Observation” editor interviews the head of the training section of an army brigade—Being a “Battlefield Designer” in the New Era

From the city walls and trenches of the cold weapon era to the composite defense systems of modern warfare, the shadow of fortification builders can be seen behind them. In today’s ever-evolving warfare, what kind of transformation is this ancient branch of the military undergoing, and what challenges does it face? Around this topic, the editor of this section conducted a video conference with the head of the training section of an army brigade.

Editor: The concept of fortification soldiers is relatively unfamiliar to the average reader. Could you please explain their core mission?

Section Chief: The core mission of fortification soldiers can be summarized in eight words: preserve themselves, delay the enemy. Their combat differs from that of infantry charging into battle or artillery providing heavy fire. Their decisive moment begins before the battle: through meticulously constructing fortifications and scientifically setting obstacles, they create a more favorable battlefield situation for the combat system. Modern fortification soldiers are also known as “battlefield designers.” They not only need to be proficient in civil engineering to build survival barriers and improve defensive effectiveness for their comrades, but also need to deeply study

tactics and methods. By pre-setting obstacle systems, they can induce, delay, and divide the enemy's attack formation, creating favorable windows for friendly forces to annihilate the enemy with firepower.

Editor: In recent years, new equipment such as drones and precision-guided weapons have profoundly reshaped the nature of warfare. In this context, where does the value of fortification soldiers lie?

Section Chief: With the changing nature of warfare, the value of fortification soldiers has become even more prominent. They are the "cost control masters" and "rhythm designers" of the modern battlefield. For example, a precision-guided missile is extremely valuable, while the decoy fortifications built by fortification troops using specialized skills and ordinary materials are much cheaper. Through systematic planning, the fortification troops construct a defense system that combines real and decoy targets, forcing the enemy to pay a heavy price in time, equipment, and personnel for every step forward, effectively disrupting their operational rhythm. By using low-cost battlefield engineering operations to tie down the enemy's high-value equipment and creating an "asymmetric attrition" effect, this is fortification. The irreplaceable value of fortification soldiers in high-tech warfare.

Editor: Looking to the future, how will the role of fortification soldiers evolve?

Section Chief: In the past, fortification soldiers provided physical labor and earthmoving; in the future, they will provide decision-making support and tactical options. For example, through simulation calculations, fortification soldiers can provide commanders with solutions such as "where to set up obstacles cost-effectively" and "how to camouflage to deceive enemy reconnaissance." This means that fortification soldiers will use engineering wisdom to add a layer of "mental armor" to system defense.

Editor: What are the core capability requirements for fortification soldiers in the new era?

Section Chief: These can be summarized in three points: First, possessing systemic thinking, deeply understanding the key role of each fortification and obstacle in the overall battlefield; second, enhancing resilience, possessing the ability to quickly repair, replenish, and reconstruct the defense system in complex battlefield environments, ensuring the uninterrupted function of key nodes; and third, being willing to be unsung heroes, silently building solid defensive fortifications with unwavering will and superb professional skills.

军营观察丨让"每一公里"都向胜战延伸

来源：中国军网-解放军报 作者：范恩达 责任编辑：郭妍菲 发布：2025-12-26

策划人语

“里程”和“速率”，对于军人而言，有着特殊含义.

这一年，战舰犁波耕浪，把深蓝梦想铺展到远海大洋；战鹰仗剑长空，将忠诚航迹铭刻于云霄之上；铁甲驰骋纵横，在大江南北的淬火之地碾出胜战之路.

八千里路云和月，这些战车、战舰、战机的“里程表”“速率值”“坐标点”，共同构成了一份“年度报告”. 这份“报告”，记录着部队实战化训练的强度与广度，见证着官兵思战谋战、向战而行的日夜不辍. 这一公里一公里的延伸，是一个个任务圆满完成的基础；这一次次抵达的坐标，是一支军队能力边界拓展的证明.

年终岁尾，让我们透过一车、一舰、一机的年度“里程”，从微观触摸强军实践的加速度. 这段征程，是全军官兵向着如期实现建军一百年奋斗目标攻坚奋战的缩影；这些足迹，点点滴滴汇聚成不可阻挡的奔涌浪潮.

镌刻在“里程”中的成长

■解放军报记者　范恩达

一份年终总结，或在口头汇报，或在纸面书写. 在陆军某旅“模范火箭炮兵连”，属于一辆战车的“总结”以另一种方式呈现——

从“0”到“4396”，一组里程表中持续增长的数字，便是这辆战车最真实、最朴素的“年终总结”.

今年初，车组成员进行了一个不成文的仪式——将小计里程表归零. 这不只是简单的机械复位，而是一种独特的计时方式——新的一年，从零开始，用车轮丈量一年的征程.

里程表归零之际，连队官兵早已整装待发. 在该连荣誉室内，记者见到了一摞请战书，上面的红手印格外鲜亮. 指导员陶诚隆告诉记者，这些请战书是今年第一次执行任务前收到的，“全连一人不落”.

请战书中，这辆战车的操作员潘朝写道：“我将冲在最前方. ”炮长、二级上士利匆的笔迹力透纸背：“对党忠诚、听党指挥，刺刀见红、血洒疆场……”这些笔迹承载的，正是一种急切的渴望：用自己的努力，在这段新的里程，留下朝向战场、通往胜利的履痕.

“里程可以累计，战斗力更要一步一步夯实. ”在该连，里程数的增加从不意味着数字的简单叠加，每一次紧急拉动、每一次夜间机动，都被赋予了超越物理位移的意义.

车轮滚滚向前，如何在一段段里程的增长中培育出胜战能力，才是官兵们关心的练兵要旨. 利匆的训练笔记中，记录着每次拉动的路线与里程，标记着每一段行程所锤炼的专业能力和暴露的短板弱项. “唯有让发动机每一次轰鸣都与实战同频，每一段里程才算真正有了价值. ”利匆说.

岁末年终，山风再次拂过车场，万籁俱寂. 战车里程表上的数字，记录下这一年的风雨征程. 那些走过的路，也已化作官兵眼中的坚定、化作人与战车之间的默契、化作整个连队官兵对“胜战”二字更加深刻的理解.

新的一年即将开始，这辆战车里程表上的数字也将再度更新. 对于“模范火箭炮兵连”的官兵而言，他们的战车只有一个不变的方向——让行驶过的每一公里，都坚实有力地向胜战延伸.

观看视频 感受震撼瞬间

让“每一公里”都向胜战延伸

■解放军报记者　范恩达

1 年，4000 余公里，两个数字交汇出一辆远程箱式火箭炮车的年度征程. 这不仅是地理位置上的跨度，更是一种能力半径的延伸.

“一直在路上. ”陆军某旅“模范火箭炮兵连”某车炮长、二级上士利匆用这句话概括了这辆战车的一年. 站在战车前，利匆胸膛里鼓荡着难以名状的自豪之情. 此刻，这辆战车静静蛰伏在车场内，小计里程表上的数字定格在“4396 公里”.

在这段征程中，利匆记录下了 3 个特殊的里程数与目的地——东南沿海、长安街上、西北戈壁. 它们像 3 个醒目的注脚，标记着这个车组能力迭代升级的关键节点.

前不久，记者来到该旅，聆听属于这辆战车的年度故事.

里程：736 公里

东南沿海亮剑，探寻未来战场深度的崭新“蓝海”

时至今日，谈及“海峡雷霆-2025A”任务，利匆仍记忆犹新.

今年初春，东南沿海某地，这辆远程箱式火箭炮车内，气氛凝重. “流程天天走，但打实弹和模拟射击，感受天差地别. ”利匆回忆，那一刻他感受到的压力，远超物理意义上的后坐力，那是对实战能力的直接拷问.

这次任务，考题苛刻：必须按序依次命中目标点. 这不仅是为了摧毁目标，更是要检验“指哪打哪”的实战能力.

最初的模拟训练，结果并不理想，火力能覆盖，按序依次打击的效果却没有显现. “必须研究清楚！”连长的话砸在地上. 深夜，这辆战车与指挥车的灯光依然亮着. 荧幕蓝光映着一张张紧绷的脸，一遍遍修改计划，调整参数，模拟对比……数据如潮水般涌来又被筛去.

“当时就像在解一道很难的数学题. ”参与攻关的二级上士席渊说. 从子夜到拂晓，超过 30 轮的测试、比对，新的模拟结果终于显示成功. 此时，天边泛起鱼肚白. “那是找到答案的曙光. ”席渊说.

克劳塞维茨在《战争论》中写道：“战争是充满偶然性的领域. ”真正的考验，往往以意外的方式降临.

战前最后一夜，这辆被确定为主炮的战车即将完成最后一遍检测，一滴雨水猝然砸在利匆的脸上.

“雨！”利匆心头一颤. 没有片刻犹豫，他立刻和两名操作手拖着厚重的防雨布冲向战车.

海边的雨说来就来，转眼间风助雨势，防雨布在狂风中被扯得呼呼作响，刚盖住车尾，车头就被吹开. 情急之下，利匆大喊一声：“压住！”3 人直接翻身，用身体扑在了数米长的冰冷炮管上，死死压住防雨布.

暴雨如注，他们浑身湿透，但他们身下的炮管安然无恙.

发射前最后的流程演练中，利匆上报诸元，指挥所回复：“表尺误差 0.3. ”

“0.3”，这个数字在误差允许范围内，却让车内空气瞬间凝固. “不行. 0.3 也是误差，差 0.1 都不行！”利匆的声音斩钉截铁.

弹种、药温、坐标……所有输入项被反复核准，全部正确，问题藏在何处？利匆带领车组乘员开始了一场事无巨细的排查. 时间流逝，压力如山. 最终，症结被锁定在一个极易被忽略的细节：导航系统的自动更新.

“切换手动输入固定坐标！”指令下达. 当修正后的诸元再次上报，电台里终于传来“误差为零”的消息.

那一刻终于来临. 大地微颤，火箭弹依次刺向长空. 远方传回的画面与数据，让所有艰辛凝结为捷报：首发精确命中. 随后，所有火箭弹按序依次炸响.

此次任务，是攻关新型战术打法的一个高光注脚，但并非唯一. 在该连，打法创新已成为常态. 他们持续开展“克敌制胜金点子”活动，成果清单不断延长：11 项战法从研讨走向演训场，6 类装备器材的革新，让“人装结合”更为顺畅. 每一次改进，都让这把“剑”更锋利，也让“执剑人”的思维不断升级.

一次平台对抗演练，规则突然改变：“不规定发射时间，只明确成爆时刻. ”这等于淘汰了按部就班的“时间表”. 目标距离各异、不同弹种飞行时间不同、各车准备速度不一，如何让全连像一门炮那样协同？

连队官兵迅速掀起“头脑风暴”. 正向思维碰壁，他们便逆向而行. 他们创造出“时间倒推法”——从统一的“成爆时刻”倒推出每一辆车“出发时刻”与“发射时间”.

那两天，炮长们反复背诵不同射距的弹道时间表，协同演练了无数次. 考核当日，所有火箭弹在不同时刻出膛，在同一瞬间覆盖目标区域.

从大项任务的攻坚，到演训规则的升级，那片象征未来战场复杂性与未知性的“蓝海深度”被一次次勘测. 在这里，这辆战车和它的乘员们，完成的是一次次深刻的进化：从被动适应考场，到主动定义战场；从追求火力覆盖，到掌控战场节奏.

里程：2103 公里

长安街受阅，感受置身体系作战的能力要求

当驾驶着战车，驶过天安门接受检阅时，除了激动，还能感受到什么？

2025 年 9 月 3 日，纪念中国人民抗日战争暨世界反法西斯战争胜利 80 周年阅兵式上，该连驾驶员、一级上士刘洋驾驶着这辆火箭炮车驶过天安门. 那一刻，他胸中的热血与钢铁洪流一同澎湃.

“当整个方阵以同一个节奏前进时，我们感受到的是一种体系的脉动. ”刘洋这样描述受阅时的感受，阅兵场上的训练让他对于精准定位有了新的理解——

它不仅仅是车速与间距的控制，而是“在正确的时间、地点，做出正确的动作”.

这种体会，始于刚刚进驻阅兵集训地的一个傍晚. 那天训练后，刘洋独自走向装备停放区. 暮色中，来自各军兵种的新锐装备沉默列阵.

过去，他为自己驾驭的这门火箭炮车自豪. 但在那片融合了各军兵种诸多力量的钢铁方阵前，一个更清晰的图景呈现在他眼前：现代战场上，没有孤立的“撒手锏”，只有环环相扣的“体系链”. 他的战车，是其中必须准时激活、分毫不差的关键一环.

这份感悟，也回荡在连队的荣誉室里. 那里，并置着两张相隔 70 年的照片：

一张是 1953 年，战斗英雄焦玉喜. 在抗美援朝战场，他为掩护“喀秋莎”火箭炮阵地，毅然以身引开敌机，用生命守护了全连“开火”的战机.

另一张是 2023 年，二级上士陈红兴的请战书，笔迹如铁：“绝不有愧于国. ”如今，这封信已被军事博物馆收藏.

“焦玉喜先辈用生命守护的，是火炮能够准时‘打得出去’的战机；陈红兴写下的，是新型装备‘顶得上去’的决心. ”该连李连长在训练中常常说起，“而我们要保证的，是装备在联合体系中永不掉队. ”

阅兵结束后，刘洋对“定位”的理解变得更加具体.

一次常规的弹药装填训练，让刘洋记忆犹新. 按照训练大纲，装填车与发射车需保持“安全距离”完成作业，以往大家总是凭经验停车. 但刘洋心里总惦记着阅兵场上那种“分毫不差”的感觉.

“未来战场上，如果每次装填都能快一些，那我们的火力真空期就会短一些，整个火力体系的战斗节奏会大有不同. ”他在复盘会上提出这个想法，“这点时间，可能就决定了谁掌握下一波火力的主动权. ”

于是，一场关于“停车距离”的试验开始了. 训练场上，刘洋和战友们拿着卷尺、对讲机，反复测试不同停车距离对装填速度的影响. 一米五、一米四、一米三……卷尺拉出精确距离，秒表记录最短用时，数据在反复验证中不断积累.

经过数十次测试，规律渐渐浮现，装填作业动作链一气呵成，毫无迟滞. 平均单次作业时间，较大纲标准缩短了近 10 秒.

对于刘洋和战友们来说，融入这段里程中的，是一辆战车从“火力覆盖”到“体系破击”的理念跃升，更是未来联合战场上，一个现代化火力节点在体系画卷中的能力坐标.

里程：3835 公里

西北戈壁砺兵，解答战斗力加速升级的时代考卷

对远程火箭炮兵来说，最重要的是什么？

“时间. ”炮长利匆的回答毫不犹豫，“从确认目标到炮弹落地，每一秒都在为胜利倒计时. ”

这个答案，早在连队首次开进西北戈壁时，就已刻进利匆心里. 那年，列装新装备不到百天，全连便在漫天风沙中完成了首次试射.

许多个夜晚，板房里的灯光亮至凌晨，他们反复计算、验证，戈壁的壮美星河他们无暇仰望. 当试射任务圆满完成，他们验证的不仅是装备性能，更是一种能力生成的“初始速度”.

不同的时间，同一片戈壁，记录着这辆战车升级的“加速度”.

今年，当该型战车再次碾过熟悉的砂砾，它面对的是一份全新的考卷. 答案不再关于“能否打响”，而是在逼近实战的极限条件下，能否“打得快、打得准”.

此次驻训中的一项任务，是某新型系统的试训论证. 面对这套底层数据、安全边界、组训模式全是空白的全新系统，负责任务的连队干部，带头攻坚克难. 那段时间，他们往返于战车与技术室之间，翻阅的资料摞起来近 1 米高.

汗水，最终凝结为一组关键数据：从捕获目标到火箭弹离膛，火力反应时间缩短了三分之二. 在分秒必争的现代战场，这段时间差，往往意味着主动与被动之分.

戈壁上的淬炼，不仅在于能力的验证，更在于发现问题. 实弹射击任务中，战车表现优异. 但复盘会上，一个问题被摆上桌面：受限于装备设计，某型弹药全车装填仍耗时过长.

“我们的‘拳’已经很快，但‘收拳再打’的间隔长了”“靠原来的办法练，很难再有质的突破”……复盘会上，讨论声此起彼伏. 但战斗力生成不等人，战备形势更不等人.

讨论声中，火炮技师陈非的一句话点燃了全场：“我们能不能自己造一个适配这辆战车的固弹架？”

创新的火花，在从大漠归建后猛烈迸发. 没有图纸，就自己画；没有经验，就反复试. 连队干部、技师和几名炮长组成了攻关小组. 连续 4 天，他们泡在修理间，草图画了又改，材

料选了又换，焊接的火花日夜闪烁. 一个可快速拆卸安装的简易固弹架，从构想变成了实物.

“试验那天，我们都很紧张，目光在计时器与装填手之间来回切换. ”作为炮长的利匆屏气凝神. 功夫不负有心人，结果令人振奋：改装后，某型弹药装填耗时比大纲规定的时间还要少.

这份源于战场的“小发明”，后来被原厂设计专家高度肯定. 他们专程索要了连队整理的可行性报告，并将其正式列入了后续装备的升级改进计划.

“从当年的‘喀秋莎’，到今天的新型战车，不变的是那股非找到‘最优解’不可的劲头. ”利匆感慨地说.

如今，新一年的训练即将开始. 等待这辆战车的，或许是更远的征程、更复杂的考题. 但无论下一个坐标点在哪里，它和驾驭它的官兵们都已准备就绪.

Military Camp Observation | Extending Every Kilometer Towards Victory

Source: China Military Network - PLA Daily

Author: Fan Enda

Editor: Guo Yanfei

Published: 2025-12-26

Editor’s Note: “Mileage” and “speed” hold special meaning for soldiers.

This year, warships plowed through the waves, spreading their deep-blue dreams to the distant oceans; warplanes soared through the skies, etching their loyal tracks into the clouds; armored vehicles raced across the land, forging a path to victory in the crucible of war across the north and south of China.

Eight thousand miles of road under the clouds and moon—the “mileage,” “speed values,” and “coordinates” of these vehicles, warships, and aircraft together constitute an “annual report.” This “report” records the intensity and breadth of the troops’ combat-oriented training, witnessing the tireless efforts of officers and men in thinking about, planning for, and marching towards war. Each kilometer of extension is the foundation for the successful completion of each mission; each reached coordinate is proof of the expansion of an army’s capabilities.

As the year draws to a close, let us examine the annual "mileage" of a vehicle, a ship, and an aircraft to witness the accelerating pace of building a strong military. This journey is a microcosm of the entire army's officers and men' arduous struggle towards the centenary goal of building the army on schedule; these footprints, bit by bit, converge into an unstoppable surging tide.

Growth Engraved in the "Mileage"

■ PLA Daily Reporter Fan Enda

A year-end summary may be oral or written. In the "Model Rocket Artillery Company" of a certain army brigade, the "summary" of a combat vehicle is presented in a different way—from "0" to "4396," a series of continuously increasing numbers on the odometer is the most authentic and simple "year-end summary" of this combat vehicle.

At the beginning of this year, the crew members conducted an unwritten ceremony—resetting the trip odometer to zero. This is not just a simple mechanical reset, but a unique way of keeping track of time—starting a new year from zero, measuring the journey of the past year with the wheels.

As the odometer was reset to zero, the company's officers and men were already fully prepared. In the company's honor room, reporters saw a stack of letters of application for combat duty, their red handprints particularly bright. Political Instructor Tao Chenglong told reporters that these letters were received before the company's first mission this year, and "not a single person in the company was left out."

In one letter, Pan Chao, the operator of this armored vehicle, wrote: "I will be at the forefront." The handwriting of the gunner, Sergeant Second Class Li Cong, was powerful and penetrating: "Loyal to the Party, obeying the Party's command, bayonet to bayonet, blood shed on the battlefield..." These handwritings carried an urgent desire: to leave their mark on this new journey, towards the battlefield and towards victory.

"Mileage can be accumulated, but combat effectiveness must be solidified step by step." In this company, increasing mileage is never just a simple accumulation of numbers; every emergency mobilization, every night maneuver, is given a meaning that transcends physical displacement.

As the wheels roll forward, how to cultivate the ability to win battles through increasing mileage is the key training principle that officers and men care about. Li Cong's training notes meticulously record the routes and mileage of each troop deployment, marking the professional skills honed and the weaknesses exposed during each journey. "Only when every roar of the engine resonates with actual combat does every mileage truly have value," Li Cong says.

As the year draws to a close, the mountain winds once again sweep across the vehicle depot, silencing all sounds. The numbers on the vehicle's odometer record the year's arduous journey. Those traversed roads have transformed into the unwavering resolve in the eyes of the officers and men, into the tacit understanding between man and vehicle, and into a deeper understanding of "victory" for the entire company.

A new year is about to begin, and the numbers on this vehicle's odometer will be updated again. For the officers and men of the "Model Rocket Artillery Company," their vehicles have only one unchanging direction—to ensure that every kilometer traveled extends firmly and powerfully towards victory.

Watch the video and experience the awe-inspiring moments.

Let "every kilometer" extend towards victory.

■ PLA Daily reporter Fan Enda

One year, over 4,000 kilometers—these two numbers converge to encapsulate the annual journey of a long-range box-type rocket launcher vehicle. This is not merely a geographical span, but an extension of its capability radius.

"Always on the road." Li Cong, a second-class sergeant and gunner of a vehicle in a "Model Rocket Artillery Company" of an Army brigade, summarized this vehicle's year with these words. Standing before the vehicle, Li Cong's chest swelled with indescribable pride. At this moment, the vehicle lies quietly in the vehicle yard, the odometer reading frozen at "4,396 kilometers."

During this journey, Li Cong recorded three special mileages and destinations—the southeast coast, Chang'an Avenue, and the northwestern Gobi Desert. These serve as three striking footnotes, marking key milestones in the iterative upgrade of this vehicle's capabilities.

Recently, a reporter visited the brigade to hear the annual story of this vehicle.

Training scene of an artillery unit of an Army brigade. Organizing live-fire exercises. Photo by Li Chenxi. Training scene of an artillery unit of an army brigade. Soldiers quickly deploy to their battle positions. Photo by Li Chenxi. Training scene of an artillery unit of an army brigade. Mobilization before training. Photo by Li Chenxi. Mileage: 736 kilometers. Showing its strength on the southeast coast, exploring a new "blue ocean" of future battlefield depth.

Even today, Li Cong still vividly remembers the "Strait Thunder-2025A" mission.

In early spring this year, in a certain location on the southeast coast, the atmosphere inside this long-range box-type rocket launcher was heavy. "We went through the procedures every day, but the feeling of firing live ammunition and simulated firing was completely different," Li Cong recalled. The pressure he felt at that moment far exceeded the physical recoil; it was a direct test of combat capability.

This mission had a demanding test: targets had to be hit sequentially. This was not only to destroy targets but also to test the "point-and-shoot" combat capability.

The initial simulation training was less than ideal; while the firepower covered the area, the sequential strikes failed to achieve their intended effect. "We must figure this out!" the company commander's words rang out. Late at night, the lights of the tank and command vehicle remained

on. The blue light of the screen reflected tense faces as plans were revised, parameters adjusted, and simulations compared repeatedly… data flooded in and was sifted through.

“It was like solving a very difficult math problem,” said Sergeant Xi Yuan, one of the team members involved in the project. From midnight to dawn, over 30 rounds of testing and comparisons were conducted, and finally, the new simulation results showed success. At this moment, the sky began to lighten. “That was the dawn of finding the answer,” Xi Yuan said.

Clausewitz wrote in *On War*: “War is a realm full of chance.” The real test often arrives unexpectedly.

On the last night before the battle, this tank, designated as the main gun, was about to undergo its final inspection when a drop of rain suddenly hit Li Cong’s face.

“Rain!” Li Cong’s heart skipped a beat. Without a moment’s hesitation, he and two operators immediately dragged the heavy tarpaulin towards the tank.

The rain at the seaside came suddenly, and in the blink of an eye, the wind fanned the storm, tearing the tarpaulin with a whooshing sound. Just as it covered the rear of the vehicle, the front was blown away. In a moment of urgency, Li Cong shouted, “Hold it down!” The three men immediately rolled over, throwing themselves onto the several-meter-long, cold gun barrel, pressing the tarpaulin down firmly.

The rain poured down, soaking them to the bone, but the gun barrel beneath them remained intact.

During the final pre-launch rehearsal, Li Cong reported the data. Command replied, “Diameter error 0.3.”

“0.3”—this number was within the acceptable error range, yet it made the air inside the vehicle freeze instantly. “No. 0.3 is still an error; even 0.1 is unacceptable!” Li Cong’s voice was resolute.

Ammunition type, propellant temperature, coordinates… all inputs were repeatedly verified, all correct. Where was the problem? Li Cong led his crew in a meticulous investigation. Time ticked by, and the pressure mounted. Ultimately, the crux of the problem was pinpointed to a detail easily overlooked: the navigation system’s automatic update.

“Switch to manual input of fixed coordinates!” the command was given. When the corrected data was reported again, the radio finally crackled with the message, “Error zero!”

That moment finally arrived. The earth trembled slightly, and rockets soared into the sky in succession. The images and data transmitted from afar condensed all the hard work into a victory report: the first shot hit its target precisely. Subsequently, all the rockets detonated in sequence.

This mission was a shining example of tactical innovation, but not the only one. In this company, tactical innovation has become the norm. They continuously conduct “Golden Ideas for Victory,” and the list of achievements continues to grow: 11 tactics have moved from discussion to training

exercises, and the innovation of 6 types of equipment has made the “personnel-equipment integration” smoother. Every improvement makes the “sword” sharper and also upgrades the thinking of the “sword wielder.” During a platform-based combat exercise, the rules suddenly changed: “No launch time is specified, only the detonation time.” This effectively eliminated the rigid “timetable.” With varying target distances, different types of ammunition having different flight times, and different vehicle preparation speeds, how could the entire company coordinate like a single cannon?

The company’s officers and men quickly launched a brainstorming session. When forward thinking failed, they went against the grain. They created a “time-reverse calculation method”—deriving the “departure time” and “launch time” of each vehicle from the unified “detonation time.”

For two days, the gunners repeatedly memorized the ballistic timetables for different firing ranges and practiced coordinated maneuvers countless times. On the day of the assessment, all rockets were launched at different times, covering the target area simultaneously.

From tackling major tasks to upgrading training rules, the “blue ocean depth” symbolizing the complexity and unknowns of the future battlefield was repeatedly explored. Here, this armored vehicle and its crew have undergone profound evolution: from passively adapting to the testing ground to actively defining the battlefield; from pursuing firepower coverage to controlling the rhythm of the battlefield.

Distance: 2103 kilometers Participating in the parade on Chang’an Avenue, experiencing the capability requirements of system-of-systems warfare

When driving the armored vehicle past Tiananmen Square for inspection, what else can you feel besides excitement?

On September 3, 2025, at the military parade commemorating the 80th anniversary of the victory of the Chinese People’s War of Resistance Against Japanese Aggression and the World Anti-Fascist War, Liu Yang, a first-class sergeant and driver of this company, drove this rocket artillery vehicle past Tiananmen Square. At that moment, his blood surged with the steel torrent.

“When the entire formation advances at the same rhythm, we feel a systemic pulse,” Liu Yang described his feelings during the parade. The training on the parade ground gave him a new understanding of precise positioning—it’s not just about controlling speed and spacing, but “making the right move at the right time and place.”

This understanding began one evening shortly after arriving at the parade training site. After training that day, Liu Yang walked alone to the equipment storage area. In the twilight, the newest equipment from various branches of the armed forces stood silently in formation.

In the past, he was proud of the rocket launcher he drove. But before that steel formation, a fusion of forces from various branches of the armed forces, a clearer picture unfolded before him: on the

modern battlefield, there are no isolated “trump cards,” only interconnected “system chains.” His vehicle was a crucial link that had to be activated precisely on time.

This realization also resonated in the company’s hall of honor. There, two photos, separated by 70 years, were placed side by side: one of combat hero Jiao Yuxi in 1953. On the Korean War battlefield, to cover the “Katyusha” rocket launcher position, he resolutely drew enemy aircraft away with his own body, protecting the entire company’s “firing” aircraft with his life.

Another letter, dated 2023, is a letter of application to join the fight by Sergeant Chen Hongxing, written in resolute handwriting: “I will never let my country down.” This letter is now in the collection of the Military Museum.

“What our predecessor Jiao Yuxi protected with his life was the opportunity for artillery to ‘fire’ on time; what Chen Hongxing wrote was the determination for new equipment to ‘stand up to the challenge,’“ Company Commander Li often said during training. “And what we must ensure is that our equipment never falls behind in the joint system.” After the parade, Liu Yang’s understanding of “positioning” became more concrete.

A routine ammunition loading training exercise remains vivid in Liu Yang’s memory. According to the training syllabus, the loading vehicle and the launching vehicle must maintain a “safe distance” to complete the operation. In the past, everyone always relied on experience to stop. But Liu Yang always remembered the feeling of “perfect precision” he experienced on the parade ground.

“On the future battlefield, if we can reload faster each time, our firepower vacuum will be shorter, and the combat rhythm of the entire firepower system will be significantly different,” he proposed at the debriefing meeting. “That short time difference could determine who controls the initiative for the next wave of firepower.”

Thus, an experiment on “stopping distance” began. On the training ground, Liu Yang and his comrades, armed with measuring tapes and walkie-talkies, repeatedly tested the impact of different stopping distances on reloading speed. 1.5 meters, 1.4 meters, 1.3 meters… the measuring tape measured precise distances, the stopwatch recorded the shortest time, and the data accumulated through repeated verification.

After dozens of tests, the pattern gradually emerged, and the reloading operation chain was completed seamlessly, without any delays. The average time per operation was reduced by nearly 10 seconds compared to the standard syllabus.

For Liu Yang and his comrades, what is integrated into this journey is not only a leap in the concept of a combat vehicle from “firepower coverage” to “system disruption,” but also, more importantly, the capability coordinates of a modern firepower node in the system landscape of future joint battlefields.

Mileage: 3835 km

Sharpening Skills in the Northwest Gobi Desert: Answering the Era's Test of Accelerated Combat Capability Upgrades

What is most important for long-range rocket artillery?

"Time," Gunner Li Cong answered without hesitation, "From target confirmation to shell landing, every second is a countdown to victory."

This answer was etched into Li Cong's mind when the company first entered the Northwest Gobi Desert. That year, less than 100 days after being equipped with the new equipment, the entire company completed its first test firing amidst swirling sandstorms.

Many nights, the lights in the prefab houses burned until dawn as they repeatedly calculated and verified, oblivious to the magnificent starry sky of the Gobi. When the test firing mission was successfully completed, they verified not only the equipment's performance but also the "initial speed" of capability generation.

Different times, the same Gobi Desert, recording the "acceleration" of this vehicle's upgrade.

This year, as the same vehicle once again traverses the familiar gravel, it faces a completely new test. The answer is no longer about "whether it can fire," but rather, under near-real combat conditions, whether it can "fire quickly and accurately."

One of the tasks during this training exercise was the trial and demonstration of a new system. Faced with this entirely new system—with no prior knowledge of underlying data, security boundaries, or training models—the company officers in charge of the mission led the charge, overcoming numerous difficulties. During that period, they shuttled between the armored vehicles and the technical room, the stack of documents they reviewed nearly a meter high.

Their hard work ultimately culminated in a set of crucial data: the fire response time from target acquisition to rocket launcher release was reduced by two-thirds. In the fast-paced modern battlefield, this time difference often determines whether an attack is proactive or reactive.

The training in the Gobi Desert was not only about verifying capabilities but also about identifying problems. During live-fire exercises, the armored vehicles performed exceptionally well. However, during the debriefing meeting, one issue surfaced: due to equipment design limitations, the full loading time for a certain type of ammunition was still too long.

"Our punches are already fast, but the interval between 'retracting the punch and striking again' is too long," "Relying on the old methods of training makes it difficult to achieve a qualitative breakthrough"… Discussions arose frequently during the debriefing meeting. But combat capability development waits for no one, and the state of combat readiness waits for no one either.

Amidst the discussion, a question from artillery technician Chen Fei ignited the entire room: "Could we build our own ammunition rack to fit this vehicle?" The sparks of innovation ignited fiercely after their return from the desert. Without blueprints They drew it themselves; lacking

experience, they experimented repeatedly. A task force comprised of company officers, technicians, and several gunners formed to tackle the problem. For four consecutive days, they immersed themselves in the repair shop, revising sketches and selecting and changing materials, the sparks of welding flashing day and night. A simple ammunition rack that could be quickly disassembled and installed transformed from a concept into a reality.

“On the day of the test, we were all very nervous, our eyes constantly shifting between the timer and the loader,” said Li Cong, the gunner, holding his breath. Hard work pays off, and the result was exhilarating: after modification, the loading time for a certain type of ammunition was even less than the time specified in the syllabus.

This “small invention” originating from the battlefield was later highly praised by the original design experts. They specifically requested the feasibility report compiled by the company and officially included it in the subsequent equipment upgrade and improvement plan.

“From the ‘Katyusha’ of yesteryear to today’s new armored vehicles, what remains unchanged is that drive to find the ‘optimal solution’,” Li Cong remarked.

Now, the new year’s training is about to begin. What awaits this vehicle may be a longer journey and more complex challenges. But wherever the next destination may be, it and the officers and men who will command it are ready.

(At the request of the interviewees, some names in this article have been changed.)

(Special thanks to Wang Shuangfeng, Yin Jiayu, Gao Zhengbo, Wang Linsheng, and Hu Zekun for their great assistance during the interviews.)

从质疑到敬佩：一场比武，让我读懂“姜还是老的辣”

来源：解放军报 作者：陈祥宇 责任编辑：孙悦 2025-12-26

姜还是老的辣

■第 72 集团军某旅某连上等兵 陈祥宇

前段时间，我和一名同年兵搭档参加旅通信装备操作比武，取得了好名次. 连长点名表扬了我们，还号召大家向我们学习. 战友们送上热烈掌声，我则看向身旁的班长朱子汉，心里很是感慨.

我是大学毕业生士兵，学的是计算机专业，下连不到一个月，我就凭借“先天优势”，成为同年兵的“小教员”.

专业训练顺风顺水，我渐渐地有些飘了，开始嫌朱班长教的方法老套，思维理念落后，还总强调细枝末节. 一次训练间隙，我跟同年兵嘀咕：“按班长教的这套方法操作，速度太慢了，效率不高. ”

1 个多月前，连干部通知旅里即将举办旅通信装备操作比武，连里要组织摸底考核. 我跃跃欲试，一心想要证明自己，于是和一位同年兵组成搭档. 那几天，只要有空闲，我们就泡在装备室突击训练，朱班长经常过来指导.

一天晚上，训练效果一直不理想，我开始急躁起来. 原本在一旁安静观看的朱班长，突然开口：“停一下. 如果强干扰和频谱贴合情况同时出现，你们怎么处置？我以前遇到过……”

不知哪来的火气，我猛地打断他：“班长，让我自己练，行吗？操作手册，我都能背下来了！”

朱班长脸一红，但一贯好脾气的他只是沉默了几秒，点点头说：“好，你们先练. ”说完，他转身走出装备室，还轻轻带上了门.

不久后，连队组织摸底考核. 实战应用部分，考官连续抛出几种特情叠加的复杂情况，我一时间手足无措——操作手册里没有写应该如何处置这些情况. 直到考核结束，我和搭档也没能正确操作. 毫无意外地，我们成绩垫底.

那天下午，我一个人坐着发呆. 搭档走过来，小声说道：“后来了解到，其实班长那天晚上想讲的，好像就是类似的情况……”

我心里一阵懊恼. 晚饭后，我们找到正在保养器材的朱班长，我鼓起勇气，就之前的不当言行诚恳道歉：“班长，对不起. 您能再教教我们吗？”

朱班长擦了擦手上的油渍，顿时来了兴趣：“我现在就有时间. ”他说完就带我们来到装备室，复盘考核情况，讲解正确的操作要点、故障预判方法和处置流程.

听他这么一讲，我这才知道，他那些我曾经看不上眼的“老办法”，都是在十几年的任务实践中总结提炼出来的.

我虚心求教，朱班长倾囊相授. 如何通过声音判断设备状态、如何在极限条件下保持通联、如何排除复杂情况叠加的突发故障……短短几天时间，我获益匪浅，学到了不少实用方法.

在朱班长的帮带下，我和搭档顺利通过连里组织的第 2 次摸底考核和营里的选拔，取得参加旅比武的资格.

“姜还是老的辣. ”比武时，果不其然出现了朱班长讲过的特情. 我们冷静回忆朱班长教授的处置方法，按步骤有条不紊操作. 通联恢复的提示音响起，我和搭档成功处置特情，顺利完成比武，站上了领奖台.

载誉归来，回到班里，我向朱班长表达谢意，心里有了打算：今后，一定戒骄戒躁，跟着朱班长好好学专业，早日把自己锻造成一名通信尖兵.

From Doubt to Admiration: A Competition Made Me Understand “Experience Matters”

Source: PLA Daily

Author: Chen Xiangyu

Editor: Sun Yue

2025-12-26

Experience Matters

■ Chen Xiangyu, Private First Class, Company, Brigade, 72nd Group Army

A while ago, I partnered with a fellow soldier to participate in the brigade’s communications equipment operation competition and achieved good results. The company commander specifically praised us and called on everyone to learn from us. My comrades gave us a warm round of applause, and I looked at my squad leader, Zhu Zihan, beside me, feeling quite moved.

I am a college graduate soldier, majoring in computer science. Less than a month after joining the company, I became a “junior instructor” for my fellow soldiers, thanks to my “natural advantage.”

As my professional training went smoothly, I gradually became a little arrogant. I started to think that Squad Leader Zhu’s teaching methods were outdated, his thinking was backward, and he always emphasized trivial details. During a training break, I grumbled to a fellow soldier, “Operating like this, following the squad leader’s method, is too slow and inefficient.”

A little over a month ago, the company officers notified us that the brigade was about to hold a communications equipment operation competition, and the company would be organizing a preliminary assessment. Eager to prove myself, I partnered with a fellow soldier. For the next few days, whenever we had free time, we spent intensive training in the equipment room, with Squad Leader Zhu frequently coming to guide us.

One evening, the training wasn’t going well, and I started to get impatient. Squad Leader Zhu, who had been quietly watching, suddenly spoke up: “Stop. What do you do if strong interference and spectrum overlap occur simultaneously? I’ve encountered this before...”

I don’t know where the anger came from, but I abruptly interrupted him: “Squad Leader, let me practice by myself, okay? I can recite the operation manual by heart!”

Squad Leader Zhu blushed, but his usual good temper only lasted a few seconds before he nodded and said, “Okay, you guys practice first.” Then he turned and left the equipment room, gently closing the door behind him.

Shortly after, the company organized a preliminary assessment. In the practical application section, the examiner presented several complex situations with overlapping contingencies, leaving me completely at a loss—the operation manual didn’t explain how to handle these situations. Even by the end of the assessment, my partner and I hadn’t been able to operate correctly. Unsurprisingly, we came in last place.

That afternoon, I sat alone, lost in thought. My partner came over and whispered, “Later I learned that what the squad leader wanted to talk about that night was actually a similar situation...”

I felt a pang of regret. After dinner, we found Squad Leader Zhu, who was maintaining equipment. I mustered my courage and sincerely apologized for my previous inappropriate words and actions: “Squad Leader, I’m sorry. Could you teach us again?”

Squad Leader Zhu wiped the grease from his hands and immediately became interested: “I have time right now.” He then led us to the equipment room, reviewed the assessment, and explained the correct operating points, fault prediction methods, and handling procedures.

Hearing him explain, I realized that those “old methods” I had previously looked down upon were all distilled and refined from over a decade of mission experience. I humbly sought his guidance, and Squad Leader Zhu generously shared his knowledge. How to judge equipment status by sound, how to maintain communication under extreme conditions, how to troubleshoot sudden malfunctions involving complex situations… In just a few days, I benefited immensely and learned many practical methods.

With Squad Leader Zhu’s help, my partner and I successfully passed the company’s second preliminary assessment and the battalion’s selection, qualifying to participate in the brigade’s skills competition.

“Experience is the best teacher.” During the competition, sure enough, the emergency situation that Squad Leader Zhu had described occurred. We calmly recalled the handling methods he taught us and operated methodically step by step. The communication restoration prompt sounded, and my partner and I successfully handled the emergency, completed the competition smoothly, and stood on the podium.

Returning home with honors, I expressed my gratitude to Squad Leader Zhu and made a decision: from now on, I will definitely avoid arrogance and impetuosity, learn my profession diligently under Squad Leader Zhu’s guidance, and forge myself into a top-notch communications soldier as soon as possible.

拒绝“本末倒置”！看这个连队如何以革新破题，向战斗力聚焦

来源：解放军报 作者：李言平 冯要博 责任编辑：孙悦 2025-12-26

革新到底为了啥

■李言平 冯要博

“我们通过改进操舟机启动装置，实现了一键操作，提高了启动成功率，降低了机械故障率.”这天，新疆军区某团举办第一届装备器材革新展评会，某连冲锋舟分队负责人于万超，介绍他负责革新的成果.

对该连来说，这个革新成果是不小的突破. 过去，在该连，无论干部骨干还是普通一兵，工作训练习惯了按部就班. 直到几个月前，该连杨连长受到启发，开始鼓励官兵开展装备器材革新.

当时，团里传来一个大新闻：某连官兵的革新成果获得国家实用新型专利，还被上级推广应用. 带着好奇，杨连长来到这个连队一探究竟.

原来，该连官兵在一些特殊天气条件下训练时，采用传统办法捆包直列装药遇到了难题. 为此，他们研制了一个快速转换装置. 整个装置并不复杂，但大幅提高了直列装药捆包效率.

“革新不一定‘高大上’，简单的小巧思，也可以解决训练难题.”杨连长回到连队后，和指导员一拍即合，决定开展装备器材革新活动.

开展思想教育，召开筹备会议，成立研究小组……一段时间过去，杨连长却不见官兵有什么行动. 就在这时，他无意间听到了大家的心里话：“人家都拿到国家专利了，咱们再怎么革新也难得到领导表扬……”

杨连长恍然大悟：原来，一些战士觉得连队鼓励革新是为了领导表扬. “这不是本末倒置吗？”杨连长认为亟需开展一次专题教育，纠正错误认识，讲明开展革新活动的目的.

教育课上，杨连长介绍了自己的参观见闻，并告诉大家，那个连队开展革新并取得令人瞩目的成果，出发点是为了解决训练难题，获得专利、受到表扬均属意外之喜.

“我们鼓励革新，同样是为了解决制约战斗力提升的训练难题.”杨连长郑重亮明态度. 接着，他让冲锋舟分队负责人于万超讲述去年一次综合演练中发生的意外.

那次演练中，冲锋舟分队需前出配合警卫分队行动. 然而就在人员登舟完毕准备出发时，操作手拉拽启动绳，操舟机却没反应，反复操作均是如此. 情急之下，于万超只得组织人员转移至备用舟，才没有耽误任务进度.

类似情况，以往训练中也出现过. 究其原因，是因为操舟机启动方式单一，且启动装置稳定性较差，非常考验操作手的能力. 但除了这个问题，操舟机其他性能都很不错.

“有人埋怨装备有缺陷，也有人建议更换新型装备，但有没有人想过，其实可以通过改进启动装置来解决问题？”杨连长鼓励大家说，连队官兵藏龙卧虎，经验同样丰富，有些问题不用等靠，完全能够自主解决，“这就是开展革新活动的意义”.

在教育课最后，杨连长再次强调“不能盯着领导的表扬干工作”，让官兵“把目标放在提高战斗力上”，并动员大家发挥聪明才智，围绕制约战斗力提升的训练难题开展革新创造. 官兵们听得眼睛发亮，若有所思.

“我觉得可以给操舟机增加一个电启动装置，提高启动成功率. ”几天后，于万超带着设计草图，主动找到杨连长，提出操舟机启动装置改进思路. 深入讨论过后，杨连长决定将这个课题交给于万超负责.

经过一个多月的攻关、调试，于万超和战友将设想变成现实. 这一革新成果，解决了长期困扰该连的训练难题.

于万超的成功经历鼓舞了很多战士，不少人就改进现有装备器材，纷纷提出颇具创意的想法. 经过连队筛选，一些好点子陆续付诸实践.

“不为名，不为利，只为提升战斗力. ”杨连长说，这个道理看似简单，但不是每个人都懂，只有想明白革新到底为了啥，官兵的积极性创造性才能得到充分释放，连队战斗力建设才会水涨船高.

Rejecting “Putting the Cart Before the Horse”! See How This Company Breaks Through Innovation and Focuses on Combat Effectiveness

Source: PLA Daily

Author: Li Yanping, Feng Yaobo

Editor: Sun Yue

2025-12-26

What is the Purpose of Innovation?

■ Li Yanping, Feng Yaobo

“By improving the boat handling machine’s starting device, we achieved one-button operation, increasing the success rate of starting and reducing the mechanical failure rate.” On this day, at the first equipment and materials innovation exhibition and evaluation meeting held by a regiment of

the Xinjiang Military Command, Yu Wanchao, the head of the assault boat detachment of a certain company, introduced the results of his innovation.

For this company, this innovation is a significant breakthrough. In the past, in this company, whether officers, key personnel, or ordinary soldiers, work and training were accustomed to following a set routine. Until a few months ago, Company Commander Yang was inspired and began to encourage officers and men to carry out equipment and materials innovation.

At that time, big news came from the regiment: the innovation results of the officers and men of a certain company obtained a national utility model patent and were promoted and applied by higher authorities. Curious, Company Commander Yang came to this company to find out. It turned out that the soldiers in the company had encountered difficulties using traditional methods to bundle linear explosive charges during training in certain weather conditions. To address this, they developed a quick conversion device. The device itself wasn't complex, but it significantly improved the efficiency of bundling linear explosive charges.

"Innovation doesn't have to be 'high-tech'; simple, clever ideas can solve training problems." After returning to the company, Company Commander Yang and the political instructor immediately agreed to launch an equipment innovation campaign.

Ideological education was conducted, preparatory meetings were held, and a research group was established… Some time passed, but Company Commander Yang didn't see any action from the soldiers. Just then, he overheard their thoughts: "Others have already obtained national patents; no matter how much we innovate, it's hard to get praise from the leadership…"

Company Commander Yang suddenly realized: some soldiers felt that the company encouraged innovation for the sake of leadership praise. "Isn't this putting the cart before the horse?" Company Commander Yang believed that a special education session was urgently needed to correct this misconception and explain the purpose of the innovation campaign.

During the training session, Company Commander Yang shared his observations from his visit, explaining that the company's remarkable achievements in innovation stemmed from a desire to solve training challenges; the patents and praise were merely unexpected bonuses.

"We encourage innovation, also to address training challenges hindering combat effectiveness," Company Commander Yang solemnly stated. He then asked Yu Wanchao, the leader of the assault boat unit, to recount an incident that occurred during a comprehensive exercise last year.

In that exercise, the assault boat unit was tasked with coordinating with the guard unit. However, just as the personnel were boarding and preparing to depart, the operator pulled the start rope, but the boat control mechanism failed to respond, despite repeated attempts. In a moment of urgency, Yu Wanchao had to organize a transfer to a spare boat to avoid delaying the mission.

Similar situations had occurred in previous training exercises. The reason was that the boat control mechanism had a single starting method and poor stability, heavily relying on the operator's skill. Aside from this problem, the boat control mechanism performed well in all other aspects.

"Some complain about equipment defects, and others suggest replacing them with new equipment, but has anyone considered that the problem could actually be solved by improving the starting device?" Company Commander Yang encouraged everyone, saying that the company's officers and men were full of hidden talents and experienced individuals, and that some problems didn't need to wait for help; they could solve them independently. "That's the significance of carrying out innovation activities."

At the end of the training session, Company Commander Yang reiterated, "We can't just focus on getting praise from leaders," urging the officers and men to "focus on improving combat effectiveness," and mobilized everyone to use their ingenuity to innovate and create solutions to the training problems hindering combat effectiveness. The officers and men listened with bright eyes, deep in thought.

"I think we can add an electric starting device to the boat handling machine to improve the starting success rate," Yu Wanchao said a few days later, bringing design sketches to Company Commander Yang, proposing an improvement to the boat handling machine's starting device. After in-depth discussion, Company Commander Yang decided to assign this project to Yu Wanchao.

After more than a month of hard work and debugging, Yu Wanchao and his comrades turned their idea into reality. This innovative achievement solved a long-standing training problem that had plagued the company.

Yu Wanchao's success inspired many soldiers, and many offered creative ideas for improving existing equipment. After screening by the company, some of these good ideas were put into practice.

"Not for fame, not for profit, but only to improve combat effectiveness," said Company Commander Yang. He explained that this principle seems simple, but not everyone understands it. Only by understanding the true purpose of innovation can the enthusiasm and creativity of officers and men be fully unleashed, and only then can the company's combat effectiveness truly improve.

"黄草岭英雄连"迎回荣誉战旗，续写使命担当

来源：解放军报 作者：任泽滔 童祖静 责任编辑：孙悦 2025-12-26

阔别六十余载，第 72 集团军某旅"黄草岭英雄连"迎回荣誉战旗——

战旗"回家"记

■任泽滔 解放军报特约记者 童祖静

“黄草岭英雄连”指导员苗墅为刚下连的新兵讲述战旗的故事. 章铖 摄

日前，第 72 集团军某旅“黄草岭英雄连”官兵迎回一位既熟悉又陌生的“战友”.

说熟悉，是因为连队官兵对这位“战友”的故事耳熟能详，一代代官兵在它的激励下接续奋斗，创造诸多荣誉；说陌生，是因为连队官兵大多只在连史照片中见过它的样子.

这位“战友”是谁？带着疑惑，记者来到该连采访. 连队荣誉室内，一面精心装裱的“黄草岭英雄连”战旗，摆放在展厅正中央. “在中国人民革命军事博物馆的帮助下，我们按原件等比例复制了这面战旗. ”该连指导员苗墅告诉记者，官兵口中的“战友”就是它.

抗美援朝战场上，该连前身部队、志愿军第 42 军 370 团 4 连奉命坚守黄草岭 796.5 高地，打响了抗美援朝东线战场第一枪. 数个昼夜里，连队击退敌人数十次进攻，牢牢守住阵地. 战后，4连被授予“黄草岭英雄连”荣誉战旗. 1953 年，这面战旗参加志愿军战地展览，1959 年被正式移交中国人民革命军事博物馆收藏.

提起荣誉战旗“回家”之路，苗墅颇为感慨. 多年来，“黄草岭英雄连”战旗就像一位老战友，始终是大家心中的牵挂. 连队官兵只要去北京，“进军博看战旗”就成了固定行程安排，不少已经退伍的连队老兵，还抽时间专程前往中国人民革命军事博物馆，凝望这面写满铁血荣光的荣誉战旗.

去年，该连战士罗德红休假期间前往中国人民革命军事博物馆，拍摄了一张战旗照片并分享在朋友圈，引得连队战友点赞评论. “要是这面战旗在我们荣誉室该多好. ”连史讲解员董岩松的评论得到官兵跟帖点赞，也被苗墅记在了心里.

今年，该旅开展恢复和弘扬政治工作优良传统系列活动，为了进一步完善连史，讲好连队政治工作优良传统故事，苗墅带领“寻根小组”前往多个省市，拜访连队前辈及其后代，面对面收集连队先辈的战斗事迹.

一次寻根过程中，“寻根小组”与一位抗美援朝老兵交流时意外得知，他当年参与了“黄草岭英雄连”荣誉战旗的制作. 苗墅拿出手机向他展示战旗照片，老兵盯着照片看了又看，一边回忆当年战斗场景，一边介绍战旗制作过程. 看着前辈炽热而激动的眼神，苗墅又想起了董岩松的期盼：要是这面战旗在我们荣誉室该多好！

“荣誉战旗是先辈光荣事迹的最好见证，也是连队开展铸魂育人工作的重要载体. ”苗墅向记者介绍，回到连队后，他与支部一班人商议决定，与中国人民革命军事博物馆联系，争取复制一面荣誉战旗. 得知连队想法，中国人民革命军事博物馆有关负责人十分重视，指定专人向他们介绍了复制战旗的审批手续及相关程序. 在军旅两级机关大力支持下，该连复制战旗的申请很快得到批准.

由于演训任务繁重，苗墅作为连队主官没有时间前往中国人民革命军事博物馆，最后决定选派董岩松作为官兵代表前往北京对接. 受领这个特殊的任务，董岩松倍感惊喜. “没想到，自己的想法能被连队采纳. 作为一名‘黄草岭传人’，我一定全力以赴把战旗复制任务完成好. ”出发前，董岩松向连队党支部立下“军令状”.

抵达北京后，董岩松在博物馆工作人员帮助下，详细记录战旗的大小、材质等细节. 字间距离、字体颜色，甚至旗面的褶皱，董岩松都一一记在笔记本里并拍摄大量细节照片，仅整理出来的数据就有整整 3 页纸. 在这期间，得知连队准备复制战旗，“黄草岭英雄连”首任指导员李兆勤的儿子李京学多次给连队打来电话，根据李兆勤生前对战旗的描述，帮助官兵准确把握战旗布料、印染技术等细节. 一切准备就绪后，连队联系专业团队复制了一面与原战旗基本一致的战旗.

接过“黄草岭英雄连”战旗，扛起“黄草岭传人”责任. 如今，这面复制的战旗已成为该连铸魂育人的新载体. 训练间隙开展“战旗故事会”，党员骨干轮流讲述黄草岭阻击战中的战斗故事，带领官兵感悟先辈英勇杀敌的战斗精神；组织“战旗下比打赢”群众性练兵活动，引导大家自觉把战旗精神融入日常、化作行动，以练兵备战的实际成效传承英雄精神.

前不久，该连参加上级组织的实兵对抗演训. 出发前，全连官兵面向战旗庄严宣誓，叫响“困难前面有三连，三连面前无困难”战斗口号，随后直接奔赴演训场. 对抗中，连队各战斗班组在强电磁环境下密切配合，灵活运用“有人+无人”战术，成功摧毁对手多个碉堡，凭借出色表现赢得对抗最终胜利.

“Huang Caoling Heroic Company” Welcomes Back its Honored Battle Flag, Continuing its Mission and Responsibility

Source: PLA Daily

Author: Ren Zetao, Tong Zujing

Editor: Sun Yue

2025-12-26

After more than sixty years, the “Huang Caoling Heroic Company” of a brigade under the 72nd Group Army welcomed back its honored battle flag—A Record of the Battle Flag’s “Homecoming”

■ Ren Zetao, Special Correspondent for PLA Daily, Tong Zujing

“Huang Caoling Heroic Company” Political Instructor Miao Shu tells the story of the battle flag to newly recruited soldiers. (Photo by Zhang Cheng)

Recently, the officers and men of the “Huang Caoling Heroic Company” of a brigade under the 72nd Group Army welcomed back a “comrade-in-arms” who was both familiar and unfamiliar.

Familiar because the officers and men of the company were very familiar with the story of this “comrade-in-arms,” and generations of officers and men had continued to fight under its inspiration, creating many honors; unfamiliar because most of the officers and men of the company had only seen its image in the company’s historical photos.

Who is this “comrade-in-arms”? With this question in mind, the reporter went to the company for an interview. In the company’s honor room, a meticulously framed battle flag bearing the inscription “Huang Caoling Heroic Company” sits prominently in the center of the exhibition hall. “With the help of the Military Museum of the Chinese People’s Revolution, we replicated this battle flag to scale,” the company’s political instructor, Miao Shu, told reporters. This is the “comrade-in-arms” the soldiers refer to.

On the Korean War battlefield, the company’s predecessor, the 4th Company of the 370th Regiment of the 42nd Army of the Chinese People’s Volunteer Army, was ordered to defend Hill 796.5 of Huang Caoling, firing the first shot on the eastern front of the war. For several days and nights, the company repelled dozens of enemy attacks, firmly holding its position. After the war, the 4th Company was awarded the “Huang Caoling Heroic Company” honorary battle flag. In 1953, this battle flag was exhibited at a Volunteer Army battlefield exhibition, and in 1959, it was officially transferred to the Military Museum of the Chinese People’s Revolution for its collection.

Recalling the journey of the honorary battle flag “home,” Miao Shu was deeply moved. Over the years, the “Huang Caoling Heroic Company” battle flag has been like an old comrade-in-arms, always a cherished memory for everyone. Whenever the company’s soldiers go to Beijing, “visiting the battle flag at the Military Museum” becomes a fixed part of their itinerary. Many retired veterans even take time to make a special trip to the Military Museum of the Chinese People’s Revolution to gaze upon this honorary battle flag, inscribed with the glory of iron and blood.

Last year, soldier Luo Dehong visited the Military Museum of the Chinese People’s Revolution during his leave, took a photo of the battle flag, and shared it on his WeChat Moments, attracting likes and comments from his comrades. “How wonderful it would be if this battle flag were in our honor room,” commented Dong Yansong, the company’s history guide, receiving likes and comments from soldiers, a sentiment that Miao Shu also kept in mind.

This year, the brigade launched a series of activities to restore and promote the fine traditions of political work. To further enrich the company’s history and tell the stories of the company’s fine

traditions of political work, Miao Shu led a "roots-seeking team" to several provinces and cities to visit company veterans and their descendants, collecting firsthand accounts of the company's ancestors' combat deeds.

During one such root-seeking trip, the "roots-seeking team" unexpectedly learned from a veteran of the Korean War that he had participated in the production of the "Huang Caoling Heroic Company" honorary battle flag. Miao Shu showed the veteran a photo of the battle flag on his phone. The veteran stared at the photo, recalling the battle scenes of yesteryear while explaining the flag's production process. Seeing the veteran's fervent and excited eyes, Miao Shu recalled Dong Yansong's wish: "How wonderful it would be if this battle flag were in our honor room!"

"The honorary battle flag is the best testament to the glorious deeds of our predecessors and an important vehicle for the company's work in cultivating moral character and inspiring future generations," Miao Shu explained to the reporter. Upon returning to the company, he and his branch decided to contact the Military Museum of the Chinese People's Revolution to try and replicate the honorary battle flag. Upon learning of the company's idea, the relevant officials at the Military Museum of the Chinese People's Revolution attached great importance to it, assigning a specific person to explain the approval procedures and related processes for replicating the battle flag. With the strong support of both the military and brigade levels, the company's application to replicate the battle flag was quickly approved.

Due to the heavy workload of training exercises, Miao Shu, as the company commander, did not have time to go to the Military Museum of the Chinese People's Revolution. Ultimately, it was decided to send Dong Yansong as a representative of the officers and men to Beijing for the liaison. Dong Yansong was overjoyed to receive this special mission. "I never expected my idea to be adopted by the company. As a 'successor of Huang Caoling,' I will do my utmost to complete the task of replicating the battle flag." Before setting off, Dong Yansong made a solemn pledge to the company's Party branch.

Upon arriving in Beijing, with the help of museum staff, Dong Yansong meticulously recorded details such as the size and material of the battle flag. He noted down the spacing between characters, the font color, and even the folds of the flag, taking numerous detailed photos in his notebook. The compiled data alone filled three pages. During this time, upon learning that the company was preparing to replicate the battle flag, Li Jingxue, the son of Li Zhaoqin, the first political instructor of the "Huang Caoling Heroic Company," called the company multiple times. Based on Li Zhaoqin's descriptions of the battle flag, he helped the soldiers accurately grasp the details of the fabric and dyeing techniques. Once everything was ready, the company contacted a professional team to replicate a battle flag that was essentially identical to the original.

Taking over the "Huang Caoling Heroic Company" battle flag, he shouldered the responsibility of being a "successor of Huang Caoling." Today, this replicated battle flag has become a new vehicle for the company's moral and ethical development. During training breaks, "Battle Flag Storytelling Sessions" are held, where Party members and key personnel take turns recounting battle stories

from the Huang Caoling Blockade Battle, leading soldiers to appreciate the heroic fighting spirit of their predecessors. Mass training activities, such as “Competing to Win Under the Battle Flag,” are organized to guide everyone to consciously integrate the spirit of the battle flag into their daily lives and translate it into action, passing on the heroic spirit through the practical results of training and combat readiness.

Recently, the company participated in a live-fire exercise organized by higher authorities. Before departure, all soldiers solemnly swore an oath facing the battle flag, shouting the battle cry, “Difficulties lie ahead of the Third Company, and no difficulty is in the face of the Third Company!” They then went directly to the training ground. During the exercise, the company’s combat squads cooperated closely in a strong electromagnetic environment, flexibly employing “manned + unmanned” tactics, successfully destroying multiple enemy bunkers and winning the final victory with their outstanding performance.

写满铁血荣光的《连队光荣史册》，激励“红一连”官兵奋勇前行

来源：中国军网-解放军报 作者：童 康 覃肇朋 责任编辑：郭妍菲 发布：2025-12-29

永不褪色的精神图谱

■童 康 覃肇朋 摄影报道

第 83 集团军某旅“红一连”连史馆里，陈列着一本封面斑驳、纸张卷了边的《连队光荣史册》（图①）.这本册子中，记录着该连自创建以来参加过的 300 余场战役战斗及解放后执行有关重大任务的情况，描绘出一支英雄连队的精神图谱.

战争年代，“红一连”先后参加黄洋界保卫战、平型关战役、辽西会战等重要战役战斗，被上级授予“英勇连”“百战百胜连”等荣誉称号. 1951 年，连队当时所在的第 43 军政治部制作下发《连队光荣史册》. 此后多年间，该连数任指导员接力传承，对连队解放前参加的战役战斗、取得的战绩战果，以及解放后执行重大任务所获荣誉，做了认真梳理和记录.

这本写满铁血荣光的《连队光荣史册》，成为“红一连”铸魂育人的“传家宝”. 新兵下连、新干部到任参观连史馆时，都会在这本册子前驻足参观，学习连队光荣历史，把红色基因、荣誉观念融入血脉. 作为一种传承方式，连队制作了新的《官兵荣誉档案》（图②），每当官兵参加重大演训等任务取得荣誉时，都会在第一时间记入其中.

薪火相传，砥砺奋进. 进入新时代，连队出色完成国际维和、抢险救灾、新装备试训等重大任务. 从烽火岁月浴血征战，到改革转型时期敢为人先，“红一连”官兵用实际行动证明，那些记录在纸上的荣誉，绝不是简单的文字，而是汹涌澎湃的力量，激励着英雄传人永不懈怠、奋勇前行.

An Everlasting Spiritual Chart

■Photo Report by Tong Kang and Qin Zhaopeng

In the history museum of the “Red First Company” of a brigade of the 83rd Group Army, there is a book with a faded cover and curled edges, titled “A Glorious History of the Company” (Figure ①). This book records the more than 300 battles and campaigns the company participated in since its establishment, as well as its major missions after liberation, depicting the spiritual chart of a heroic company.

During the war years, the “Red First Company” participated in important battles and campaigns such as the Battle of Huangyangjie, the Battle of Pingxingguan, and the Liaoxi Campaign, and was awarded honorary titles such as “Heroic Company” and “Hundred-Battle-Winning Company” by

its superiors. In 1951, the Political Department of the 43rd Army, to which the company belonged at the time, produced and distributed the "Glorious History of the Company." Over the years, successive political instructors of the company carried on this tradition, meticulously reviewing and recording the battles and campaigns the company participated in before liberation, its achievements, and the honors it received during major missions after liberation.

This "Glorious History of the Company," filled with heroic deeds and glorious achievements, became a cherished heirloom for the "Red First Company," a testament to its spirit and character. New recruits and officers visiting the company history museum always stop to read this booklet, learning about the company's glorious history and internalizing the red gene and sense of honor. As a form of inheritance, the company created a new "Army and Soldier Honor Archives" (Figure ②), which records every honor earned by officers and men during major exercises and training missions.

Passing on the torch, forging ahead with determination. Entering the new era, the company has successfully completed major missions such as international peacekeeping, disaster relief, and new equipment trials. From the bloody battles fought during the years of war to the pioneering spirit during the reform and transformation period, the officers and men of the "Red First Company" have proven with their actions that the honors recorded on paper are not just simple words, but a surging force that inspires the successors of heroes to never slacken and to forge ahead bravely.

细微的暖意汇聚成磅礴的力量，温暖着戍边人的心

来源：中国军网-解放军报 作者：李蕾 陈武斌 杨舒 刘拙杨 责任编辑：郭妍菲 发布：2025-12-29

岁末边关暖意浓

■陈小菁

岁末的寒风，掠过喀喇昆仑的雪山，拂过北疆的林海，绕过东南海岛的礁石，又在戈壁雷达天线上回旋. 又是一年将尽时，走进边防线上的座座哨所，扑面而来的不是严寒，而是一股直抵人心的暖意.

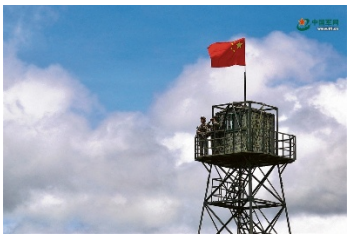
阳光照耀雪山.

官兵林间巡逻.

这暖，是点亮“生命禁区”的时代之光. 海拔 4900 米的雪线之上，在“鲜花盛开的天堂”——西藏昆木加哨所，美好的名字与严酷的环境形成了巨大反差.

然而，在风雪呼啸的清晨，总有一面五星红旗，在战士的守护下，准时在哨楼顶端升起. 在哨所里，战士们精心培育象征着希望的花种，让“冰玫瑰”“蜡烛花”“石头花”四季常开，战士更用日复一日的坚守，让哨所盛开永不凋谢的“鲜花”.

更暖的改变正在发生. 如今，配送车定期驶上雪山寒哨，新鲜的蔬菜、水果，活鱼、活虾被送入新型菜窖. 科技赋能带来保障能力的飞跃，也让昔日“生命禁区”变成一个足以抵御风雪的“温暖港湾”. 这暖，是国家强盛投射在边关哨所的温度，是各级关爱送抵战士心头的温暖.



这暖，更是血脉相承、永不褪色的精神薪火. 在北疆某临江哨所，寒风刺骨，却有一种“新老交接”仪式，比炉火更能驱散严寒——那就是为界碑描红.

去年冬天，一名老兵拂去碑上的积雪，完成了退伍前的最后一次描红. 他将带着体温的毛笔郑重交给哨长：“这界碑，这抹红，今后就交给你们了. ”今年，一名新兵从哨长手中接过那支毛笔，俯身专注地描绘，让“中国”二字在冰雪中更加鲜亮.

从雪山寒哨到临江哨塔，从西南边陲到北疆林海，“温暖”的内涵被不断丰富和诠释. 它既是保障有力的物理温暖，更是精神充盈、信念坚定的心灵暖流. 它藏在家人寄来的爱心包裹里，藏在夜半执勤下哨后的一碗热粥中，更藏在风雪巡逻路上，老兵对新兵的关怀与鼓励中.

细微的暖意，汇聚成磅礴的力量，足以融化厚重的冰层，抵御猛烈的寒风. 每一种温暖的注脚，都在告诉我们，今日戍边人的生活，并非只有艰苦与寂寞，还有被祖国人民牵挂的幸福、被使命点燃的激情，以及被战友深情包裹的温暖.

旧岁将辞，新年即至. 当我们享受团圆时，请不要忘记，在遥远的风雪边关，正有“温暖”在静静生发、默默传递. 军人以奉献与坚守，连缀成一条无形而又坚固的“边防线”，守护着山河无恙，岁月安然.

昆木加哨所

雪线之上有春天

■解放军报记者 李 蕾 特约记者 陈武斌

云南曲靖的冬夜，寂静得能听见时光流淌的声音. 凌晨 3 时，杨林又一次醒来——不是在西藏军区昆木加哨所那熟悉的铁皮床上，而是在曾经朝思暮想、如今充满团圆气氛的家里.

离开雪域高原已半个多月，每当夜深人静，老兵杨林的耳畔依然有风声呼啸，那是 10 多年戍边岁月刻进他生命中的节律.

杨林起身走向书桌，打开台灯. 昏黄的光线下，几个透明分装袋依次排开，里面装着不同品种的花籽：波斯菊、格桑、高山杜鹃……他给每一包都附上一张纸条，用工整的字迹写下栽培说明："波斯菊，耐寒，需充足日照，高原地区宜春末播种，土壤需疏松，忌积水……"

写到这里时，杨林停顿片刻. 雪线之上的昆木加，哪儿有什么积水？在海拔 4900 米的雪山上，土地常年封冻，夏季冻土融化的厚度也不过 20 厘米. 但他还是提笔写下这句话，因为在心里，这是一份期待，更承载着他的牵挂.

2026 年元旦将至，杨林购买了多种花籽，作为新年礼物寄给雪山上的战友. 他带着刚满 6 岁的小女儿，用镊子一颗颗地筛选出饱满圆润的种子.

这不是必要的工序，采购的花种已经过专业筛选. 但在老兵的心里，他需要这种"仪式感"——以一种近乎虔诚的专注，来填补内心突然塌陷的角落.

哨所"花"常开

10 多年前的画面，时常在杨林的脑海浮现.

那年冬天，军用卡车载着新兵们在青藏线上一路颠簸. 杨林裹着配发的厚重棉衣，依然冻得牙齿打颤.

带兵干部说："昆木加哨所有着'鲜花盛开的天堂'之称……"18 岁的杨林，脑海中浮现出一幅画：雪山环抱的营房前，盛开着格桑花海.

现实却是另一番景象. 车轮碾过最后一道冰坎，他的视野中只剩蓝色的天、白色的雪、灰色的哨楼. 不见草木，没有鲜花，连飞鸟都不曾出现.

"花呢？"不知哪个新兵小声问出了大家的疑惑.

时任李哨长热情地和新兵握手. 随后，他端出一个铁盒，盒盖打开时，所有人都屏住了呼吸——十几朵用冰雪制作的"冰玫瑰"静静躺在盒中，每朵都有掌心大小，在阳光下闪光. 李哨长给他们每人分了一朵："这就是昆木加的'花'. 哨所到处盛开'鲜花'，需要你们用心去寻找. "

那朵"花"在杨林掌心融化，寒意透过手套渗进皮肤，他第一次理解了雪山上的"花"为何那么美——那是一种在严酷环境中诞生的坚守之美.

后来杨林才知道，那天李哨长天不亮就去背阴处取来坚冰，戴着手套用磨具为新兵们准备了这份“迎新礼物”. 一朵“冰玫瑰”如果放在室内，寿命往往只有几小时. 但正是这种转瞬即逝的“美”，让昆木加的“花”有了别样的意义.

高原战士精心呵护哨所植物.

坚守的日子里，杨林渐渐发现，哨所四季“花”常开.

开春巡逻，官兵把对春天的期待写进歌词：“格桑盼春归，战士守国门. ”夏天到了，大家在捡回的戍边石上画出牡丹、月季，将戍边石点缀在哨楼上，战友们笑着说，“昆木加的石头会开花”. 冰封时节，战士用磨具做出朵朵“冰玫瑰”，再涂上颜料，让哨所的冬天春意盎然.

分拣完种子，杨林取出信纸，写下心里话：“云南是花的海洋，我心里却空落落的. 寄去象征希望的花种，天寒地冻，你们试着种一种. 失败了不怕，就当给高原的冻土添点肥. 保重身体，替我守好‘家’. ”落款“老杨”两个字，他写得很用力.

翌日一大早，市中心的快递站刚开门，杨林已经抱着包裹站在门口. 返乡以来，这不是他第一次往西藏寄包裹. 每次看着快递箱被胶带缠绕密实，像一颗等待萌芽的花苞，杨林的心中都充满期待.

这一刻，望着包裹被送上运输带，想到战友收到包裹时喜悦的表情，杨林的心感到无比踏实.

从南陲云南到雪域高原，从亚热带到永久冻土带，辗转数千公里，海拔爬升数千米——这是一包包花种跨越的时空，也承载着一名老兵对另一个“家”的思念.

风雪中的“斗花赛”

哨所官兵开展“斗花赛”.

临近岁末的一个周末，哨长扎西次仁把大家召集在一起，请大家为办好今冬“斗花赛”献计献策.

冬至那天的清晨，天亮得很晚，只有哨楼顶端的国旗在探照灯下显出一抹飘动的红. 中士徐进在哨位上执勤，他的视线不时地投向那条通向山外的路.

就在前一天晚上，徐进接到杨林打来的电话，得知一份特殊礼物已在寄往雪山的路上. 徐进的手机上随后收到物流信息：包裹抵达日喀则，此刻正在送往哨所的路上.

“徐班长，别急！”四班班长、二级上士王思诚从哨楼的楼梯口探出头，“杨班长刚才打来电话说，邮车上午才到呢！”

“万一早到了呢？”徐进在心里想：杨班长寄来的花种，他要在今天的“斗花赛”中当奖品用.

往年“斗花赛”的奖品，有时是一包战友家乡寄来的特产，有时是战友外出集训带回的纪念品. 但是这一次，他提议把杨班长寄来的花种作为“头奖”，鼓励大家为哨所增添更多的色彩.

上午 9 时，哨所活动室已经布置妥当：4 张长桌拼成展示台，上面铺着崭新的绿色桌布. 各班陆续搬来精心准备的“作品”，室内顿时热闹起来.

一班准备了一盆蟹爪兰，红色花苞静静绽放，用炮弹壳装饰的花盆十分别致. “绿植很难养活，开花更是非常罕见. ”上等兵李光手捧着这盆花，脸上写满自豪，“晚上怕它受冻，我们几个轮流起来调整保温灯. ”

三班的展示令人赞叹——那是一棵几十厘米高的腊梅，枝头挂着鹅黄色的花骨朵. 更难得的是，它被种在木桶里，土壤是中士程品从几十公里外的山谷中背回来的.

最常见的还是属于昆木加的“花”. 五班将蜡烛熔化、重塑成“蜡烛梅”，花瓣薄如蝉翼. 六班展示的是“石头花”——战士们从河谷中精选鹅卵石，在上面描绘各种哨所的“花”，从“冰玫瑰”到“铁丝绣球”，犹如一部视觉化的哨所花卉史.

最特别的是下士加措的“作品”. 他没有搬来任何实物，而是在白板上用磁贴固定 7 张照片：每张照片上都是一朵“冰玫瑰”，拍摄于同一个地点：哨楼东侧的岩石旁. 这些照片拍摄时间跨度为 3 年.

“这是我整理的哨所记忆. ”加措有些略带羞涩地说，“这些‘冰玫瑰’都是班长们精心制作的，凝聚着对哨所的热爱，还有他们对新兵的帮带……‘冰玫瑰’会融化，但守哨精神不褪色. ”

加措的话音未落，活动室里响起热烈的掌声.

守着守着就爱了

昆木加哨所，战士在雪山上瞭望.

上午 11 时，汽车的引擎声由远及近. 所有人都涌向门口，看着驾驶员搬下那个纸箱. 扎西次仁打开纸箱，一个个分装的花种袋露出来，每一包上都有杨班长熟悉的字迹.

活动室里安静下来. 大家传递着这些花种袋子，动作轻柔. 花种在塑料袋里发出轻微的沙沙声，像一声声远方的问候.

扎西次仁拨通了杨林的电话. 电话那头，老班长熟悉的声音传开，电话这头的问候声响彻房间.

“老班长，你好”“杨班长，想你了”……扎西次仁向杨林介绍这次“斗花赛”的趣闻. 杨林一边听一边回应：“嚯，蟹爪兰、腊梅都种活了？‘蜡烛梅’，这个创意好！加措，你搞了个照片展，真是有心人啊！”

电话开着免提，每个班派代表讲述参赛作品背后的故事：有人为了捡一块形状完美的鹅卵石，在河滩上寻觅许久；哨所种活的植物中，每一株都要经历数次试种，每次看到植物枯死，那感觉别提多难受了；看到花开枝头，那种幸福感简直爆棚……

最终经全体投票，一等奖颁给了一班的蟹爪兰和三班的腊梅；二等奖颁给了加措的照片展. 一等奖胜在官兵用勤劳与智慧创造了“奇迹”——在“生命禁区”让鲜花盛开；二等奖胜在为大家留下了“记忆”——把老兵的热爱、老兵精神永远留在哨所，让守哨精神赓续传承.

颁奖时，扎西次仁把杨林寄来的花种分成 3 份，分给获奖的班级与个人.

“这不是终点，而是起点. ”扎西次仁说，“明年春天，我们要把这些种子种下去. 到时候，咱们要用行动告诉杨班长，他寄来的花种，开出又一个花季. ”

加措握紧那包波斯菊种子，感到一种前所未有的重量. 这不是花的重量，是时间的重量，是承诺的重量.

电话热线接近尾声，新兵们争相向杨林报告自己的新成绩：单杠又能多拉两个，即将参加新年度巡逻……

电话热线中，不时传出杨林爽朗的笑声. 加措最后一个接过电话，轻声说：“班长，您曾叮嘱我的话，我懂了. ”这一刻，加措的眼神中有了一种光彩，那是只有经历过昆木加冬天的人才有的眼神——是风雪淬炼过的清澈与坚定.

“懂了就好. ”杨林在电话中意味深长地说，“守着守着就懂了，守着守着就爱了，爱上了就离不开了！”挂断电话，活动室里很久没人说话. 窗外的风雪依旧，温暖在室内的空气中流动.

界碑前的誓言

巡逻任务如期而至. 这次的目的地是 20 号界碑，需要穿越昆木加最复杂的地形.

队伍在清晨出发，官兵头灯的光柱在黑暗中切开通道，能见度仅几米. 当他们进入冰蚀谷时，真正的考验开始了：冰层下是暗河，表面看着坚实，踩上去才知道脆弱.

上次巡逻，加措曾一不小心掉入冰缝，他本能地伸手乱抓，被前面的战友一把拽住背包带. 但右腿已经卡进冰缝，刺骨的冷水灌满靴子.

这次巡逻，加措走得更慢，但更稳. 每一步都深思熟虑，每一次落脚都感受地面的“反馈”. 他不再对抗这片土地，而是学习与它共处——冰缝在哪里，暗流在哪里，哪里的冰层更厚实.

队伍抵达 20 号界碑. 界碑上的“中国”二字清晰而鲜艳. 就在他们抵达的瞬间，风雪突然停歇，云层裂开一道缝隙，阳光如瀑布倾泻，照亮了雪线.

加措第一次“看见”他守护的土地. 不是地图上的线条，不是沙盘上的模型，而是阳光下的山河. 他内心的迷茫，在这一刻找到了答案——那是他读懂老兵的坚守，与这片土地建立连接的方式.

“对着界碑，每个人都说一说自己的新年愿望. ”扎西次仁说，这是昆木加的传统.

轮到加措时，他沉默了很久. 风吹起界碑上的雪沫，在阳光下像金色的尘. “我愿……”他的声音坚定，“成为昆木加的花. 不是开一季就谢的花，是那种把种子埋进冻土，来年还能发芽的花. 我愿在这里扎根，扎得很深很深，深到风雪刮不走. ”

巡逻归来，加措走到温室. 他照顾的那株蟹爪兰在保温灯下静静生长. 他打开杨林寄来的花种袋，倒出几颗放在掌心，这些花种，承载一个关于春天的承诺.

窗外，风雪又起. 但加措知道，有些东西比风雪更持久——那些在石头上开出的花，在冰雪中绽放的玫瑰，还有让人扎根的信念.

冻土会记住每一颗种子的努力，当春天再来，那些深埋的等待，都会在阳光下找到绽放的方式. 就像驻守昆木加哨所的官兵，在雪线之上，用青春浇灌永不凋零的春天.

临江哨所

风雪中为界碑描红

■杨 舒 刘拙杨

官兵在国门前巡逻. 朱明鹤 摄

彤云密布，北疆初雪. 寒风如冰针，刺向北部战区陆军某部临江哨所.

新兵张琛航望着窗外一片苍茫，眼神里有新奇，也有紧张. 他的身旁，哨长许则义也在凝望着风雪，喃喃道：“该去给界碑描红了. ”

一阵寒风呼啸而过，许则义恍然回神——那个曾经带他描红的老班长毛嘉乐，已于去年退伍. 如今已成长为哨长的他，肩负着带新兵的责任.

记忆随雪花飘回几年前. 也是一个雪天，许则义初到哨所，酷寒、孤寂的环境让他心中怅然若失. 老兵毛嘉乐将他带到界碑前. 碑石被风雪覆盖，隐约可见红色的“中国”二字.

“这是镌刻在战士心中的颜色. ”毛嘉乐一边说，一边从怀中掏出一个油布盒——里面是一支毛笔，一罐用体温呵护着的油漆. 他俯身拂去积雪，为界碑描红，白雪皑皑中，那抹红骤然鲜活，如被点燃的火焰.

“界碑是国家的印记，这抹红是军人的底色，也是心中的信念. ”这话语，从此烙在许则义心上.

呼啸的风声将许则义拉回现实. 他转身，语气坚定地对张琛航说：“准备一下，我们去描红. ”他取出那个熟悉的油布盒，贴身揣好，踏入风雪.

路上，许则义讲起毛嘉乐退伍那天的情景. 那也是一个雪天，老兵特地来到界碑前，为界碑最后一次描红，与界碑最后一次合影. “这界碑，这抹红，今后就交给你们了！”这是老班长离开哨所前留给许则义的最后一句话.

终于，他们抵达界碑. 风雪依旧，界碑静默. “张琛航. ”许则义转过身，郑重地将带着体温的油布盒递过去，“今天，你来描红. ”

张琛航愣了一下，随即挺直胸膛，接过这份“重托”. 他俯身，饱蘸鲜红，专注地将颜料描进碑刻中. 那一刻，新兵稚嫩的侧脸，与当年老兵们的一张张面庞重叠.

许则义静静看着这一幕，一股暖流在心中流淌. 风雪未有停歇之意. 但界碑上那抹刚刚描绘过的红，却倔强地鲜亮着，仿佛拥有了抵御严寒的温度.

Subtle Warmth Converges into a Powerful Force, Warming the Hearts of Border Guards.

Warmth at the Border at Year's End

■ Chen Xiaojing

The year-end wind sweeps across the snow-capped Karakoram Mountains, brushes the forests of northern Xinjiang, circles the reefs of southeastern islands, and swirls around radar antennas in the Gobi Desert. As another year draws to a close, stepping into the border outposts, one is not met with bitter cold, but with a warmth that touches the heart.

Sunlight shines on the snow-capped mountains.

Soldiers patrol in the forest.

This warmth is the light of our times illuminating the "forbidden zone of life." Above the snow line at an altitude of 4,900 meters, at the "paradise of blooming flowers"—the Kunmujia outpost in Tibet—the beautiful name contrasts sharply with the harsh environment.

However, on snowy mornings, a five-star red flag is always raised on time atop the watchtower, guarded by soldiers. Inside the outpost, soldiers meticulously cultivate flowers symbolizing hope, ensuring that "ice roses," "candle flowers," and "stone flowers" bloom year-round. Through their daily steadfastness, the soldiers ensure that the outpost is a place where "flowers" never fade.

Warmer changes are taking place. Now, delivery trucks regularly travel to the snow-covered, frigid outposts, bringing fresh vegetables, fruits, live fish, and shrimp to new-style cellars. Technological advancements have brought a leap in support capabilities, transforming what was once a "forbidden zone" into a "warm harbor" strong enough to withstand wind and snow. This warmth is the weight of national strength projected onto the border outposts, the warmth of care delivered to the hearts of soldiers at all levels.

This warmth is also the enduring spirit passed down through generations. At a riverside outpost in northern Xinjiang, where the wind is biting cold, a "handover" ceremony dispels the chill more effectively than a fireplace—that is, repainting the boundary marker.

Last winter, a veteran brushed the snow off the boundary marker, completing his final stroke of red ink before his discharge. He solemnly handed the still-warm brush to the sentry commander: "This boundary marker, this touch of red, is now yours." This year, a new recruit took that brush

from the sentry commander, bending down to meticulously trace the characters for “China,” making them shine even brighter against the snow and ice.

From snow-capped mountain outposts to riverside watchtowers, from the southwestern border to the northern forests, the meaning of “warmth” has been continuously enriched and interpreted. It is not only the physical warmth of strong support, but also the spiritual warmth that fills the heart and strengthens resolve. It is hidden in the loving packages sent by family, in a bowl of hot porridge after a night’s duty, and even more so in the care and encouragement veterans offer to new recruits on snowy patrols.

Subtle warmth, gathered together, becomes a powerful force, enough to melt thick ice and withstand fierce winds. Every heartwarming story tells us that the lives of border guards today are not only filled with hardship and loneliness, but also with the happiness of being cared for by the people of the motherland, the passion ignited by their mission, and the warmth of being enveloped by the deep affection of their comrades.

As the old year draws to a close and the new year approaches, while we enjoy family reunions, let us not forget that in the distant, snow-covered borderlands, warmth is quietly emerging and being silently transmitted. Soldiers, through dedication and perseverance, form an invisible yet solid “border defense line,” protecting the safety of the land and the peace of the years.

On the southwestern border, the five-star red flag flutters atop a sentry post.

Soldiers patrol the plateau at the Heiwotan Border Defense Company in Xinjiang.

At the Sanjiaoshan outpost, a military wife reunites with her husband.

Kunmujia Outpost: Spring Above the Snow Line

■ PLA Daily Reporter Li Lei, Special Correspondent Chen Wubin

A winter night in Qujing, Yunnan, is so quiet you can hear the flow of time. At 3 a.m., Yang Lin woke up again—not on his familiar tin bed at the Kunmujia outpost in the Tibet Military Region, but in his home, a place he had longed for day and night, now filled with the warmth of family reunion.

More than half a month had passed since he left the snowy plateau, but every time the night grew quiet, the veteran Yang Lin could still hear the whistling wind in his ears—a rhythm etched into his life by more than a decade of border service.

Yang Lin got up and went to his desk, turning on the lamp. In the dim light, several transparent bags were lined up, containing different varieties of flower seeds: cosmos, Tibetan daisies, rhododendrons… He attached a note to each bag, with neat handwriting explaining the cultivation instructions: “Cosmos, cold-hardy, requires ample sunlight, best sown in late spring in high-

altitude areas, loose soil, avoid waterlogging…" Yang Lin paused for a moment at this point. Above the snow line in Kunmujia, where could there be any waterlogging? At an altitude of 4900 meters, the ground is frozen year-round, and even in summer, the thawed permafrost is only about 20 centimeters thick. But he still picked up his pen and wrote those words, because in his heart, it was an expectation, and even more so, a burden of his longing.

As New Year's Day 2026 approached, Yang Lin bought various flower seeds as New Year's gifts to send to his comrades-in-arms on the snow-capped mountains. He and his six-year-old daughter carefully selected the plump, round seeds one by one with tweezers.

This wasn't a necessary step; the purchased seeds had already undergone professional selection. But in the veteran's heart, he needed this "sense of ritual"—a near-reverent focus to fill the suddenly collapsed corner of his heart.

Flowers Bloom Perpetually at the Outpost

Scenes from over ten years ago often surface in Yang Lin's mind.

That winter, military trucks carried new recruits, bumping along the Qinghai-Tibet Highway. Yang Lin, wrapped in his issued thick cotton coat, still chattered from the cold.

The officer in charge said, "Kunmujia outpost is known as a 'paradise in full bloom'..." Eighteen-year-old Yang Lin envisioned a scene: a sea of Gesang flowers blooming in front of the barracks surrounded by snow-capped mountains.

Reality, however, was quite different. As the wheels rolled over the last icy embankment, all he could see was a blue sky, white snow, and a gray watchtower. No grass, no flowers, not even a bird in sight.

"Where are the flowers?" a new recruit whispered, voicing everyone's question.

The then-outpost commander, Li, warmly shook hands with the new recruits. Then, he brought out an iron box. When the lid was opened, everyone held their breath—a dozen or so "ice roses" made of ice and snow lay quietly inside, each the size of a palm, shimmering in the sunlight. Commander Li gave each of them a flower: "This is the 'flower' of Kunmujia. 'Flowers' bloom everywhere at the outpost; you just need to look carefully." The flower melted in Yang Lin's palm; the chill seeped into his skin through his gloves. For the first time, he understood why the "flowers" on the snow-capped mountains were so beautiful—it was a beauty of perseverance born in harsh conditions.

Later, Yang Lin learned that Commander Li had gone to a shady spot before dawn that day to fetch solid ice, and, wearing gloves, used a mold to prepare this "welcome gift" for the new recruits. An "ice rose," if kept indoors, would often only last a few hours. But it was precisely this fleeting "beauty" that gave the "flowers" of Kunmujia a special meaning.

The plateau soldiers carefully nurtured the plants at the outpost.

During his days of steadfast duty, Yang Lin gradually discovered that the “flowers” at the outpost bloomed year-round.

At the start of spring, the soldiers, on patrol, expressed their longing for spring in song lyrics: “Gesang longs for spring’s return, soldiers guard the nation’s gate.” Summer arrived, and they painted peonies and roses on the salvaged border stones, adorning the watchtowers. Comrades laughed, saying, “The stones of Kunmujia will bloom.” During the frozen season, the soldiers used molds to create “ice roses,” then painted them, bringing a touch of spring to the winter at the outpost.

After sorting the seeds, Yang Lin took out a letter and wrote his heartfelt words: “Yunnan is a sea of flowers, but my heart feels empty. I’m sending you flower seeds symbolizing hope. In this freezing weather, try planting one. Don’t worry if you fail; consider it adding fertilizer to the frozen soil of the plateau. Take care of yourselves and guard our ‘home’ for me.” He signed “Old Yang” with great effort.

The next morning, as soon as the downtown express station opened, Yang Lin was already standing at the door with a package. This wasn’t the first time he had sent a package to Tibet since returning home. Every time Yang Lin saw the express delivery box tightly wrapped with tape, like a flower bud waiting to sprout, his heart was filled with anticipation.

At this moment, watching the package being sent onto the conveyor belt, imagining the joyful expressions on his comrades’ faces when they received it, Yang Lin felt incredibly at ease.

From Yunnan in the south to the snowy plateau, from the subtropics to the permafrost zone, traversing thousands of kilometers and climbing thousands of meters in altitude—these were packets of flower seeds crossing time and space, carrying a veteran’s longing for another “home.”

A “Flower Competition” in the Snowstorm Soldiers at the outpost hold a “flower competition.”

One weekend near the end of the year, Outpost Commander Zaxi Ciren gathered everyone together, asking for suggestions on how to organize this winter’s “flower competition.”

On the morning of the winter solstice, it was still dark, only the national flag atop the watchtower showed a fluttering red under the searchlight. Sergeant Xu Jin was on duty at his post, his gaze frequently drifting towards the road leading out of the mountains.

The night before, Xu Jin received a call from Yang Lin, informing him that a special gift was en route to the snow-capped mountains. Xu Jin’s phone then received a tracking notification: the package had arrived in Shigatse and was currently being delivered to the outpost.

“Squad Leader Xu, don’t worry!” Wang Sicheng, the squad leader of the fourth squad and a second-class sergeant, poked his head out from the stairwell of the watchtower. “Squad Leader Yang just called to say the mail truck won’t arrive until this morning!”

“What if it arrives earlier?” Xu Jin thought to himself. He wanted to use the flower seeds Squad Leader Yang had sent as a prize in today’s “flower competition.”

In previous years, the prizes for the “flower competition” were sometimes a package of local specialties sent from a comrade’s hometown, and sometimes souvenirs brought back from training camps. But this time, he suggested that the flower seeds sent by Squad Leader Yang be the “grand prize,” encouraging everyone to add more color to the outpost.

At 9:00 AM, the outpost’s activity room was already set up: four long tables were joined together to form a display stand, covered with a brand-new green tablecloth. One by one, the platoons brought in their carefully prepared “works,” instantly enlivening the room.

The first platoon presented a potted Christmas cactus, its red buds quietly unfurling. The pot, decorated with artillery shell casings, was quite unique. “Green plants are hard to keep alive, and flowering is even rarer,” said Private First Class Li Guang, holding the potted plant with pride. “We took turns adjusting the heat lamps at night to prevent it from freezing.” The third platoon’s display was breathtaking—a wintersweet several tens of centimeters tall, its branches adorned with pale yellow buds. Even more remarkable was that it was planted in a wooden barrel, the soil carried back by Sergeant Cheng Pin from a valley dozens of kilometers away.

The most common flowers were those from Kunmujia. The fifth platoon melted and reshaped candles into “candle plum blossoms,” their petals as thin as cicada wings. The sixth platoon showcased “stone flowers”—soldiers carefully selected pebbles from the valley and painted various “flowers” of the outposts on them, from “ice roses” to “barbed wire hydrangeas,” creating a visual history of outpost flora.

The most special piece was Corporal Jiacuo’s “work.” He didn’t bring any physical objects, but instead used magnets to attach seven photos to a whiteboard: each photo depicting an “ice rose,” taken at the same location: beside a rock on the east side of the sentry post. These photos spanned three years.

“This is a compilation of memories from the outpost,” Jiacuo said somewhat shyly. “These ‘ice roses’ were carefully made by the squad leaders, embodying their love for the outpost and their guidance of the new recruits… The ‘ice roses’ may melt, but the spirit of guarding the outpost will never fade.” Before Jiacuo finished speaking, enthusiastic applause erupted in the activity room.

Love Blossoms from Guarding the Outpost

Kunmujia Outpost, soldiers on the snow-capped mountain.

At 11:00 AM, the sound of a car engine grew louder. Everyone rushed to the door, watching the driver unload a cardboard box. Zaxi Ciren opened the box, revealing individual packets of flower seeds, each bearing the familiar handwriting of Squad Leader Yang.

The activity room fell silent. The bags of flower seeds were passed around gently. The seeds rustled softly inside the plastic bags, like distant greetings.

Zaxi Ciren dialed Yang Lin's number. The familiar voice of the old squad leader came through the phone, and greetings filled the room.

"Hello, old squad leader," "Squad leader Yang, I missed you..." Zaxi Ciren told Yang Lin about the interesting stories from the recent "flower competition." Yang Lin listened and responded, "Wow, the Christmas cactus and wintersweet survived? 'Candle Plum,' that's a great idea! Jiacuo, you put together a photo exhibition, you're so thoughtful!" The phone was on speakerphone, and representatives from each squad shared the stories behind their entries: someone searched the riverbank for a long time to find a perfectly shaped pebble; each plant that survived at the outpost underwent several trial plantings, and seeing them wither and die each time was incredibly painful; seeing the flowers bloom brought an overwhelming sense of happiness… Ultimately, after a vote, first prize was awarded to the Christmas cactus from Squad One and the wintersweet from Squad Three; second prize went to Jiacuo's photo exhibition. The first prize was awarded because the soldiers' diligence and wisdom created a "miracle"—bringing flowers to bloom in the "forbidden zone of life"; the second prize was awarded because it left a "memory"—keeping the veterans' love and spirit forever at the outpost, ensuring the continuation and inheritance of the spirit of guarding the outpost.

During the awards ceremony, Tashi Tsering divided the flower seeds sent by Yang Lin into three portions, distributing them to the winning classes and individuals.

"This is not the end, but the beginning," Tashi Tsering said. "Next spring, we will plant these seeds. Then, we will show Squad Leader Yang with our actions that the seeds he sent will bloom again." Gyatso clutched the packet of cosmos seeds, feeling an unprecedented weight. It wasn't the weight of the flowers, but the weight of time, the weight of a promise.

The phone hotline was nearing its end, with new recruits eagerly reporting their new achievements to Yang Lin: two more pull-ups on the horizontal bar, soon to participate in the new year's patrol… Yang Lin's hearty laughter occasionally drifted through the phone. Gyatso was the last to answer, whispering, "Squad Leader, I understand what you told me." At that moment, a light shone in Gyatso's eyes, a light only those who have experienced the winters of Kunmujia possess—a clarity and determination tempered by wind and snow.

"Good that you understand," Yang Lin said meaningfully on the phone. "You'll understand as you keep watching, you'll love as you keep watching, and once you love, you can't leave!" After hanging up, silence filled the activity room for a long time. The snow continued to fall outside, but warmth flowed through the air inside.

The Oath Before the Boundary Marker

The patrol mission began as scheduled. This time, the destination was Boundary Marker No. 20, requiring them to traverse the most complex terrain of Kunmujia.

The team set off at dawn. The beams of the soldiers' headlamps cut through the darkness, visibility was only a few meters. When they entered the glacial valley, the real test began: beneath the ice was an underground river, seemingly solid on the surface, but fragile underfoot.

On the last patrol, Jiacuo had accidentally fallen into a crevasse. He instinctively reached out and grabbed wildly, but a comrade in front grabbed his backpack strap. However, his right leg was already stuck in the crevasse, and the icy water filled his boots.

This time, Jiacuo walked slower, but more steadily. Every step was carefully considered, every footstep felt like a response from the ground. He no longer fought against this land, but learned to live with it—where the crevasses were, where the undercurrents were, where the ice was thickest.

The team reached boundary marker number 20. The two characters for "China" on the marker were clear and vibrant. The instant they arrived, the wind and snow suddenly stopped, a crack appeared in the clouds, and sunlight poured down like a waterfall, illuminating the snow line.

For the first time, Gyaltsen "saw" the land he protected. Not the lines on a map, not the model on a sand table, but the mountains and rivers under the sunlight. His inner confusion found its answer in that moment—it was how he understood the veterans' perseverance and established a connection with this land.

"Everyone tells their New Year's wishes to the boundary marker," said Tashi Tsering, explaining that this is a tradition in Kunmujia.

When it was Gyaltsen's turn, he remained silent for a long time. The wind blew the snow off the boundary marker.

The foam, like golden dust in the sunlight, shimmered. "I wish..." his voice was firm, "to become a flower of Kunmujia. Not a flower that blooms for a season and then fades, but the kind that buries its seeds in the frozen soil and sprouts again the following year. I wish to take root here, deep, very deep, so deep that the wind and snow cannot blow it away."

Returning from patrol, Jiacuo went to the greenhouse. The Christmas cactus he cared for was quietly growing under the heat lamp. He opened the seed bag Yang Lin had sent, poured out a few seeds, and placed them in his palm. These seeds carried a promise about spring.

Outside the window, the wind and snow rose again. But Jiacuo knew that some things were more enduring than wind and snow—the flowers that bloomed on stones, the roses that blossomed in the ice and snow, and the belief that allowed one to take root.

The frozen soil would remember the efforts of every seed. When spring returned, those deeply buried waits would find a way to bloom in the sunlight. Just like the soldiers stationed at the Kunmujia outpost, above the snow line, watering an everlasting spring with their youth.

■ Yang Shu, Liu Zhuoyang

Soldiers patrol at the border. Photo by Zhu Minghe

Dark clouds gather, the first snow falls in northern Xinjiang. The cold wind, like icy needles, pierces the Linjiang outpost of a unit of the Northern Theater Command Army.

New recruit Zhang Chenhang gazes at the vast expanse outside the window, his eyes filled with both curiosity and nervousness. Beside him, outpost commander Xu Zeyi is also staring at the snow, murmuring, “Time to paint the boundary marker red.” A gust of cold wind howls past, and Xu Zeyi suddenly snaps back to reality—his old sergeant Mao Jiale, who once guided him in painting the boundary marker, had retired last year. Now a outpost commander himself, he shoulders the responsibility of leading new recruits.

Memories drift back with the snowflakes to several years ago. It was also a snowy day when Xu Zeyi first arrived at the outpost; the harsh cold and desolate environment filled him with a sense of loss. Veteran Mao Jiale led him to the boundary marker. The boundary marker was covered in snow, but the red characters for “China” were faintly visible.

“This is the color etched in the hearts of soldiers,” Mao Jiale said, pulling an oilcloth box from his pocket—inside were a calligraphy brush and a can of paint warmed by his body heat. He bent down to brush away the snow and began to paint the boundary marker red. Against the white snow, the red suddenly came alive, like a flame being ignited.

“The boundary marker is the mark of the nation; this red is the soldier’s fundamental color, and also the belief in his heart.” These words were forever etched into Xu Zeyi’s heart.

The howling wind pulled Xu Zeyi back to reality. He turned and said firmly to Zhang Chenhang, “Get ready, we’re going to paint it.” He took out the familiar oilcloth box, tucked it close to his body, and stepped into the snowstorm.

On the way, Xu Zeyi recounted the scene on the day Mao Jiale was discharged from the army. It was also a snowy day; the veteran specially came to the boundary marker to paint it red one last time and take one last photo with it. “This boundary marker, this touch of red, is now yours!” These were the last words the old sergeant left for Xu Zeyi before leaving the outpost.

Finally, they arrived at the boundary marker. The wind and snow continued, the boundary marker silent. “Zhang Chenhang,” Xu Zeyi turned around, solemnly handing over the oilcloth box, still warm from his touch, “Today, you’ll be painting the red.”

Zhang Chenhang hesitated for a moment, then straightened his back and accepted this important responsibility. He bent down, dipped his brush in the bright red ink, and focused intently on

painting the inscription on the marker. At that moment, the recruit's youthful profile overlapped with the faces of the veterans from years past.

Xu Zeyi watched this scene quietly, a warm current flowing through his heart. The wind and snow showed no sign of stopping. But the newly painted red on the boundary marker stubbornly shone brightly, as if possessing the warmth to withstand the bitter cold.
