为进一步做好暖心惠兵工作

增强官兵幸福感、获得感

近日

陆军第 82 集团军某旅组织“新兵家长进军营”活动

邀请 200 余名官兵家属相约军营

零距离感受孩子的成长蜕变

共享温馨时光

“我是中国人民解放军军人，我宣誓……”

“我会像爱护生命一样爱护武器装备”

仪式现场

新兵们昂首挺胸

目光坚毅、庄严宣誓

迎接期待已久的荣誉时刻

家属走向会场中间

为新战友们佩戴列兵军衔

温馨画面让全场官兵深深动容

中国军号
习强军思想

中国军号

中国军号
生活保障中心
全力以赴打好实现建军一百年奋斗目标攻坚战
2024年度秋季新兵授枪仪式

中国军号

中国军号

欢迎仪式上

一张张全家福将幸福瞬间定格

他们脸上洋溢着团聚的喜悦

看到官兵精心准备的训练课目展示

家属们全力为他们喝彩助威

来到装备展示区

整齐摆放的各类武器装备

让军属们大饱眼福

在认真倾听官兵讲解的同时

感受军人的职责使命

参观结束后

新兵们迎来了与亲人的温情时刻

久别重逢、倍感激动的同时

也早已抑制不住泪水

官兵为家属献上惊喜礼物

表达浓浓感恩之情

新兵马钰欣家属说道

“很荣幸能够参加这样的活动

看到孩子在部队的变化、取得的成绩

让我很放心，感谢部队的培养

家里一切都好，无需牵挂。”

为了让来队家属吃上可口的饭菜

炊事班使出“十八般武艺”

清蒸鲈鱼、红烧肉、奥尔良鸡腿、手工水饺……

色香味俱全的军营美食让人垂涎欲滴

军属们纷纷为军营大厨竖起了大拇指

“爸妈，您看我包的饺子好不好。”

一张桌、同举杯、共婵娟的幸福时刻

让每一名官兵和军属的心头都涌起阵阵暖流

此次“家属进军营”活动

让家长们见证了孩子的成长蜕变

也加强了军属之间的纽带

为新兵军旅奋进注入温暖力量

看着父母离去的背影

新兵们在心底暗暗下定决心

要加倍努力，一定不给父母丢脸

让自己的青春绽放不一样的光彩

To further improve the work of warming soldiers

Enhance the happiness and sense of gain of officers and soldiers

Recently

A brigade of the 82nd Army Group of the Army organized the "Parents of New Soldiers Entering the Barracks" activity

Invited more than 200 family members of officers and soldiers to meet in the barracks

Feel the growth and transformation of children at close range

Share warm moments

"I am a soldier of the Chinese People's Liberation Army, I swear..."

"I will protect weapons and equipment as much as I protect my life"

Ceremony site

The new recruits held their heads high

With firm eyes and solemn oaths

Welcome the long-awaited moment of honor

Family members walked to the center of the venue

For new comrades They wore the rank of private

The warm scene deeply moved all the officers and soldiers

At the welcome ceremony

Family photos captured the happy moments

Their faces were filled with the joy of reunion

Seeing the training courses carefully prepared by the officers and soldiers

The family members cheered for them with all their strength

Coming to the equipment display area

All kinds of weapons and equipment were neatly arranged

The military families were feasting their eyes

While listening carefully to the officers and soldiers' explanations

Feeling the responsibilities and missions of the soldiers

After the visit

The recruits welcomed the warm moments with their loved ones

Long While reuniting and feeling excited, they could not hold back their tears. The soldiers presented surprise gifts to their families and expressed their deep gratitude. The family of recruit Ma Yuxin said, "It is an honor to participate in such an event. Seeing the changes and achievements of my child in the army makes me feel relieved. I am grateful for the training of the army. Everything is fine at home, no need to worry." In order to let the family members of the team eat delicious meals, the cooking team used "eighteen martial arts". Steamed sea bass, braised pork, Orleans chicken legs, handmade dumplings... The delicious military camp food is mouth-watering.

The military families gave thumbs up to the chefs in the military camp

"Mom and Dad, do you think the dumplings I made are good?"

A happy moment of sharing a table, toasting and watching the moon

The hearts of every soldier and military family are filled with warmth

This "Family Members Entering the Military Camp" activity

Allowed parents to witness the growth and transformation of their children

Also strengthened the bond between military families

Injecting warm power into the military career of the new recruits

Watching their parents leave

The new recruits secretly made up their minds

To work harder and never embarrass their parents

Let their youth shine with a different brilliance

第 75 集团军某旅深入学习贯彻中央军委政治工作会议精神——融入战位，以学促干谋打赢

来源：解放军报 作者：黄远利 陈典宏 责任编辑：林诗清 2025-01-04 13:10:41

第 75 集团军某旅深入学习贯彻中央军委政治工作会议精神——

融入战位，以学促干谋打赢

■黄远利 解放军报记者 陈典宏

兵车辚辚，铁甲奔流。前不久，野外训练场上，第 75 集团军某旅一场全要素综合训练落下帷幕，多个战法训法得到实战检验。

征尘未洗，该旅立即组织参训官兵深入学习习主席在中央军委政治工作会议上的重要讲话。“我们要立足岗位，苦练精训，担负起制胜未来战场的使命任务……”官兵结合岗位实际谈体会、话感受，奋进新征程、建功新时代的信念更加坚定。

“学习贯彻中央军委政治工作会议精神，要注重学用结合、以学促干，在深化认识、推动工作、融入战位上下功夫，切实将会议精神融入练兵备战实践。”该旅领导介绍，他们采取“论述+解读”“观点+事例”“笔记+要点”等学习方式，引导官兵结合部队使命任务吃透精神实质、把握实践要求。

采访中记者了解到，他们注重聚焦实战靶标，采取个人查、支部议、党委统的方式，把影响和制约战斗力提升的深层次矛盾查找出来，列出问题清单、制订整改措施、明确整改时间，在聚力破解难题中检验学习成效。前不久年终总结时，该旅党委一班人围绕思想认识、工作指导、战备训练、作风纪律等方面认真盘点总结，梳理出指挥信息化战争能力不足、思战谋战意识树得不够牢固等多个与实战要求不符的问题，并逐一制订补差措施，针对性开展训练。

任务进行到哪里，学习贯彻就跟进到哪里。针对部队战训任务繁重、动态分散等实际，该旅常态抓好点滴灌输，利用训练间隙组织“战地微课”，鼓励人人登台分享感悟、共话担当，通过以学促训推动学习成果向任务聚焦、向战位延伸，官兵研练新装备、探索新战法的热情高涨。

学之愈深，知之愈明，行之愈笃。近日，该旅组织了一场全员全装战备拉动。训练中，他们临机设置道路被毁、通信网络中断、遭“敌”无人机侦察等多个特情，检验部队应急处置能力。任务刚结束，复盘会随即展开。从机关参谋到基层战士，官兵拿出抛开面子、揭短亮丑的勇气，针对训练中暴露的短板不足深挖根源，逐项研究制订整改措施。“学习贯彻中央军委政治工作会议精神，必须要用能打仗打胜仗的‘硬杠杠’来检验成效。”该旅一名参加复盘会的干部说。

融入战位，以学促干谋打赢。连日来，随着学习贯彻中央军委政治工作会议精神不断深入，该旅坚持从难从严组织新年度军事训练，在真抓实备、真打实练、真考实训中破除和平积弊，立起备战打仗鲜明导向。

A brigade of the 75th Group Army thoroughly studied and implemented the spirit of the Central Military Commission's Political Work Conference-Integrate into the battle position, learn to promote work and win

Source: PLA Daily Author: Huang Yuanli Chen Dianhong Editor: Lin Shiqing 2025-01-04 13:10:41

A brigade of the 75th Group Army thoroughly studied and implemented the spirit of the Central Military Commission's Political Work Conference-

[75th GA: Southern TC Army, Kunming, Yunnan Province]

Integrate into the battle position, learn to promote work and win

■Huang Yuanli PLA Daily reporter Chen Dianhong

The soldiers are rumbling and the armor is running. Not long ago, a full-element comprehensive training of a brigade of the 75th Group Army came to an end on the field training ground, and many tactics and training methods were tested in actual combat.

Before the dust of the expedition was washed away, the brigade immediately organized the participating officers and soldiers to deeply study Chairman Xi's important speech at the Central Military Commission's Political Work Conference. "We must stand on our posts, work hard and train hard, and take on the mission of winning the future battlefield..." The officers and soldiers talked about their experiences and feelings based on the actual positions, and their belief in forging ahead on the new journey and making contributions to the new era became more firm.

"Studying and implementing the spirit of the Central Military Commission's political work conference, we must focus on combining learning with practice, learning to promote work, and working hard to deepen understanding, promote work, and integrate into combat positions, and truly integrate the spirit of the conference into the practice of training and preparation for war." The brigade leaders introduced that they adopted learning methods such as "discussion + interpretation", "viewpoints + examples", and "notes + key points" to guide officers and soldiers to understand the essence of the spirit and grasp the practical requirements in combination with the mission and tasks of the troops.

During the interview, the reporter learned that they focused on actual combat targets, adopted the methods of personal investigation, branch discussion, and party committee coordination to find out the deep-seated contradictions that affect and restrict the improvement of combat effectiveness, list the problem list, formulate rectification measures, and clarify the rectification time, and test the learning results in focusing on solving problems. Not long ago, during the year-end summary, a group of people from the brigade's party committee carefully reviewed and summarized ideological understanding, work guidance, combat readiness training, style and discipline, and

sorted out a number of problems that did not meet the actual combat requirements, such as insufficient ability to command informationized warfare and insufficient awareness of thinking and planning for war, and formulated compensation measures one by one to carry out targeted training.

Wherever the task is carried out, learning and implementation will follow up. In view of the heavy combat and training tasks and dynamic dispersion of the troops, the brigade has been doing a good job of drip-feeding on a regular basis, organizing "battlefield micro-classes" during training breaks, encouraging everyone to share their feelings and talk about their responsibilities on stage, and promoting learning results to focus on tasks and extend to combat positions through learning and training. The enthusiasm of officers and soldiers to study new equipment and explore new tactics is high.

The deeper you learn, the clearer you know, and the more you practice. Recently, the brigade organized a full-staff combat readiness pull. During the training, they set up multiple special situations such as road destruction, communication network interruption, and "enemy" drone reconnaissance to test the emergency response capabilities of the troops. As soon as the mission was over, the review meeting was held. From the staff of the agency to the grassroots soldiers, the officers and soldiers took out the courage to put aside their faces and expose their shortcomings. They dug deep into the root causes of the shortcomings exposed in the training and studied and formulated rectification measures item by item. "To study and implement the spirit of the Central Military Commission's Political Work Conference, we must use the "hard lever" that can fight and win to test the effectiveness." A cadre of the brigade who participated in the review meeting said.

Integrate into the combat position, promote work through learning and win. In recent days, with the deepening of learning and implementing the spirit of the Central Military Commission's Political Work Conference, the brigade has insisted on organizing the new year's military training in a difficult and strict manner, breaking the accumulated problems of peacetime in real preparation, real practice, real testing and real training, and establishing a clear orientation for preparing for war.

陆军某合成旅

攥指成拳一体联动

解放军报讯 吴思哲、卜启庚报道：寒冬时节，急促的哨音打破清晨的寂静，陆军某合成旅闻令迅速集结，按照作战编组兵分多路机动至作战地域，一场近似实战的多兵种协同训练打响。

“前方发现‘敌’火力点！”收到侦察组传回的坐标信息，突击车组乘员密切配合，迅速进行测距、瞄准、击发，随着一声炮响，“敌”火力点被拔除。随后，在突击车组和火力分队的掩护下，工兵分队前出破障，爆破小组采取交替爆破方式对“敌”多型障碍实施爆破，为后续分队开辟通路。

“‘敌’突增多个反装甲火力点，对我装甲目标实施打击，部队进攻受阻。”接到前方传回的信息，指挥员冷静研判形势，指挥卫勤力量和抢修分队展开抢救抢修，同时派出侦察小组抵近侦察。确定目标信息后，火力分队迅速对“敌”目标展开多轮火力覆盖，拔除“敌”反装甲火力点。

“多兵种、多要素协同配合优势互补，是制胜未来战场的关键。”该旅领导介绍，他们注重加强各要素之间的协同配合，锤炼指挥员复杂条件下临机指挥处置能力，着力实现攥指成拳一体联动。

演兵场上，步战车不断向“敌”纵深发起冲击，战斗班组成功歼灭“敌”袭扰分队。经过多个波次的火力打击后，“敌”防御阵线被逐一攻破。

训练结束，复盘研讨随即展开。官兵将火力运用、兵力协同等方面发现的问题拉单列表，逐一分析，并提出针对性改进措施，持续完善战法训法。

A certain army composite brigade clenched its fingers into a fist and linked them together

Source: China Military Network-People's Liberation Army Daily Author: Wu Sizhe Bu Qigeng Editor: Lin Shiqing Release: 2025-01-06 06:21:57

View and share on mobile

A certain army composite brigade

Clamped its fingers into a fist and linked them together

People's Liberation Army Daily Wu Sizhe and Bu Qigeng reported: In the cold winter, the rapid whistle broke the silence of the early morning. A certain army composite brigade quickly assembled upon hearing the order, and moved to the combat area in multiple routes according to the combat formation. A multi-service coordinated training similar to actual combat began.

"An 'enemy' firepower point was found ahead!" After receiving the coordinate information sent back by the reconnaissance team, the assault vehicle crew worked closely together to quickly

measure the distance, aim, and fire. With a gunshot, the "enemy" firepower point was removed. Subsequently, under the cover of the assault vehicle group and the firepower team, the engineering team went forward to clear the obstacles, and the blasting team used alternating blasting to blast the "enemy" multi-type obstacles, opening up a path for the follow-up teams.

"The 'enemy' suddenly increased multiple anti-armor firepower points and attacked our armored targets, and the troops' attack was blocked." After receiving the information sent back from the front, the commander calmly analyzed the situation, commanded the medical forces and the repair team to carry out rescue and repair, and sent a reconnaissance team to conduct close reconnaissance. After determining the target information, the firepower team quickly launched multiple rounds of firepower coverage on the "enemy" target and removed the "enemy" anti-armor firepower points.

"The coordination and complementary advantages of multiple arms and multiple elements are the key to winning the future battlefield." The leaders of the brigade introduced that they focus on strengthening the coordination between various elements, tempering the commander's ability to command and deal with emergencies under complex conditions, and striving to achieve integrated linkage.

On the military exercise field, infantry fighting vehicles continuously launched attacks into the depth of the "enemy", and the combat team successfully annihilated the "enemy" harassment team. After multiple waves of firepower strikes, the "enemy" defense lines were broken one by one.

After the training, the review and discussion began immediately. The officers and soldiers listed the problems found in the use of firepower and coordination of forces, analyzed them one by one, and proposed targeted improvement measures to continuously improve the tactics and training methods.

供氧模式改变，让海拔 **5380** 米的边防连官兵安心戍边守防

来源：中国军网-解放军报 作者：赵金石 孙兴维 李伟欣 责任编辑：刘上靖

2025-01-06 06:35:01 0

新疆和田军分区某团持续改善高海拔连队氧气保障条件——

体系供氧助力官兵戍边守防

■赵金石 解放军报记者 孙兴维 李伟欣

“如今，高海拔连队哨所已实现多元供氧、体系供氧，供氧模式发生了巨大变化。”日前，记者来到新疆和田军分区某边防团海拔 5380 米的神仙湾边防连采访，连长刘昊告诉记者，军分区探索建立“20 公里制供氧圈”供氧模式，让官兵吸氧用氧更方便、更快捷。

该团戍守在平均海拔 5000 米以上的喀喇昆仑腹地，这里空气平均含氧量不到平原的 40%。近年来，为助力高原官兵科学守防、安全守防，各级不断加大吸氧工程建设力度，先后为高原哨所配备制氧方舱、微压氧舱及单兵便携式制氧机，安装床头供氧系统，建设富氧室内训练场，官兵吸氧经历了“救命氧—保健氧—常态氧—战斗氧”的转变。

“听老班长说，多年前，他初上哨所时，氧气供应量不足，只有危重病号才能吸上钢瓶灌装的氧气。如今，连队氧气供应充足便捷。”一级上士郭翔翔告诉记者，他见证了边防用氧的变迁——

2010 年，郭翔翔下连后来到神仙湾哨所，那时的第五代营房已配套安装了床头供氧设备，官兵每天午休或熄灯后至少可吸一小时的氧气，有助于在静态环境下提升血液中的含氧量。

2016 年，富氧室内训练场在该连投入使用。富氧室内训练场采用气膜结构建造，配备暖气、加湿器、制氧机等设备，具备增氧、加压、调温、加湿等功能。富氧室内训练场还配备跑步机、动感单车等健身器材，设有训练健身场地，有利于官兵在运动中增加体内含氧量。

“距离的缩短，是用氧条件改善的一个缩影。”郭翔翔回忆，一开始，罐装氧气得从遥远的喀什市区拉上山；再后来，需在距离近一些的叶城进行氧气灌装；前几年，百余公里外的某医疗站具备了灌装氧气的条件。2020 年，制氧方舱落户神仙湾边防连，可同时灌装多瓶高浓度氧气，官兵再也不用跑到百余公里外灌装了，氧气保障水平明显提升。

“相比官兵自行吸氧，微压氧舱更具可控性和科学性，有利于降低高原疾病发生率。” 采访中，军医刘伟带着记者来到一座米黄色的方舱式建筑前。记者一抬头，“高原氧力蓄能舱”7 个大字映入眼帘。跨进大门，记者看到，里面整齐排列着 8 个座椅。

刘伟告诉记者，连队微压氧舱于 2021 年建成，可模拟海拔 3000 米、2000 米、500 米等多种不同海拔条件下的氧气浓度和气压、温度等条件，具有一定的治疗和保健作用。新兵首次到哨所、官兵巡逻归来或剧烈运动后进入微压氧舱治疗，能有效缓解缺氧症状。

“如今，高海拔连队哨所均已形成了以制氧方舱、制氧设备为基点，富氧室内训练场和微压氧舱等为辅助，车载式制氧机为节点，单兵制供氧器材为终端的高原制供氧体系。”刘伟告诉记者，全覆盖、成体系的制供氧保障，助力官兵执勤、巡逻、训练，促进了驻高原部队战斗力提升。

记者感言

心系边关冷暖 倾力为兵解难

■孙兴维

生命有“禁区”，但守防不能有“空白”。多年来，戍守在雪域高原的边防官兵，以“缺氧不缺精神、缺氧不缺战斗力”的顽强斗志，以“宁可生命透支、绝不让使命欠账”的奉献精神，高标准完成了党和人民赋予的各项任务，用青春、热血甚至生命为祖国守边固防，交出优秀答卷。

官兵赤诚奉献，组织倾心解难。边防卫士的冷暖疾苦，各级一直放在心上。多年来，在各级机关持续努力下，高原氧气供应保障条件不断改善，逐步实现“从平时到战时、从营区到野外、从固定到机动”的转变，海拔 3000 米以上哨所官兵用氧条件今非昔比。从过去的“救命氧”到现在的“保健氧”“常态氧”“战斗氧”，各级机关从预防、保健、救治 3 个层面系统施策，为高原官兵筑起一道健康屏障。

制供氧建设事关高原官兵平时保健用氧、战时医疗用氧，其建设质量直接关系部队战斗力生成。用氧条件的改善，有利于部队战斗力提升，助力官兵以更加昂扬的状态戍守“生命禁区”。各级要以高原官兵用氧保障条件不断提升为契机，牢固树立科学训练理念，遵循科学规律、采取科学手段，倾心呵护官兵身体健康，更好地服务部队战斗力建设、服务练兵备战，为铸牢边关钢铁防线提供坚强有力的后勤保障。

一线保障·军营在行动

新疆和田军分区某团持续改善高海拔连队氧气保障条件——

体系供氧助力官兵成边守防

■赵金石 本报记者 孙进雄 李伟欣

“如今，高海拔连队哨所已实现多元供氧、体系供氧，供氧模式发生了巨大变化。”日前，记者来到新疆和田军分区某边防团麻扎 6300 米的神仙湾边防连采访，连长刘昊告诉记者，军分区探索建立“20 公里制供氧圈”供氧模式，让官兵吸氧更方便、更快捷。

该团戍守在平均海拔 4000 米以上的哨哨是仓库地，这里空气平均含氧量不到平原的 40%。近年来，为助力高原官兵科学守防、安全守防，各级不断加大吸氧工程建设力度，先后为高原哨所配备制氧方舱、微压氧舱及单兵便携式制氧机，安装采头供氧系统，建设富氧室内训练场，官兵吸氧经历了“就命第一保健第一完全第一战斗氧”的转变。

“时老哥头说，多年前，他初上哨所时，氧气供应量不足，只有危重病号才能吸上制瓶灌装的氧气。如今，连队氧气供应无足够惠。”一级上士郭翔翔告诉记者，他见证了边防哨所的变迁——

2010 年，郭翔翔下连后采到神仙湾哨所，那时的第五代营房已配套安装了两头供氧设备，官兵每天午休或熄灯后至少可吸一小时的氧气，有助于在静卧环境下提升血液中的含氧量。

2016 年，富氧室内训练场正式投入使用。富氧室内训练场采用气膜结构建造，配备暖气、加湿器、制氧机等设备，具备增氧、加压、调温、加湿等功能。富氧室内训练场还配备跑步机、动感单车等健身器材，设有训练健身场地，有利于官兵在运动中增强体内含氧量。

“耐高的缩短，是附氧条件改善的一个缩影。”郭翔翔回忆，一开始，戴鼓氧气得从遥远的喀什军区拉上山，再后来，国庆时真正一些的对抽进行氧气灌装，前几年，百余公里外的某医疗站具备了灌装氧气的条件。2020 年，制氧方舱落户神仙湾边防连，可同时灌装多瓶高浓度氧气，官兵再也不用跑到百余公里外灌装了，氧气保障水平明显提升。

“相比官兵自行吸氧，微压氧舱更具可控性和科学性，有利于降低高原疾病发生率。”采访中，军医对伟带着记者来到一座米黄色的方舱式建筑前。记者一抬头，“高原氧力要舱舱”个个大字映入眼帘。跨进大门，记者看到，里面整齐排列着 8 个舱室。

对伟告诉记者，连队微压氧舱于 2021 年建成，可模拟海拔 3000 米、2000 米、600 米等多种不同海拔条件下的氧气浓度和气压、温度等条件，具有一定的治疗和保健作用。原来百次到哨所，官兵适应只来或调原运动后进入微压氧舱治疗，能有效缓解缺氧症状。

“如今，高海拔连队哨所均已形成了以制氧方舱、制氧设备为基点，富氧室内训练场和微压氧舱等为辅助，不断式制氧机为节点，单兵制供氧器材为终端的高原制供氧体系。”对伟告诉记者，全覆盖、成体系的制供氧保障，助力官兵执勤、巡逻、训练，促进了驻高原部队战斗力提升。

记者感言

心系边关冷暖 倾力为兵解难

■孙进雄

生命有“禁区”，但守防不能有“空白”。多年来，高守在雪域高原的边防官兵，以“缺氧不缺精神、缺氧不缺战斗力”的顽强斗志，以“守好生命禁区，绝不让使命大幅”的英雄精神，为祖国完成了党和人民赋予的各项任务，用青春、热血甚至生命为祖国守边固防，定叙世有容易。

官兵走边备战，组织核心群体，边防卫士的身躯或容，各级一直在关心上。多年来，在各级机关持续努力下，高原氧气供应保障条件不断改善，逐步实现“从平时到战时，从常规到野外，从固定到机动”的转变，海拔 3000 米以上哨所官兵用装备作个边者也，从过去的“缺命氧”到现在的“保健氧”“营养氧”“战斗氧”，各级机关从预防、保健、救治三个层面系统施策，为高原官兵成长一道强固屏障。

制供氧建设落实高原官兵平时保健用氧、战时医疗用氧，系建设高原官兵缺氧高原疾病预防和治疗体系的重要举措。用氧条件的改善，有利于部队战斗力提升，助力官兵以更加高昂的状态为守“生命禁区”、各级要以高原官兵用氧保障条件不断提升为契机，牢固树立科学训练理念，遵循科学规律，采取科学手段，细心呵护官兵身体健康，更好地服务部队战斗力建设、服务练兵备战，为祖军在高原铜铁防线固体官兵有力的边防保障。

西部战区空军某旅改进评功评奖办法激发官兵干事创业热情——

评出堂堂正气 奖出融融暖气

■张 凯 本报记者 张磊峰 特约记者 李再华

冬日，高原军营，西部战区空军某旅某连一场支委会正会议室内召开，支部一名人针对即将展开的评功评奖工作各抒己见。

“这几年，部队在评功评奖工作中，注重将军事训练、练兵比武、日常表现、工作实绩等方面纳入综合考察内容，既注重官兵考核成绩，也关注平时工作表现，切实发挥评功评奖的激励引导作用，有效激发官兵干事创业的热情动力，‘演连干部练少模混。

“无论时代如何变化，‘向战为战、备战打战’的鲜明导向不会变，评功评奖工作必须把备战斗为标尺，立起鲜明导向，评出军心士气，激发官兵向战为战热情干劲，‘演旅领导告诉记者，‘要能力不看资历，重贡献不重年限，才能评出战斗力，奖出凝聚力，让获奖者有底气，感动者满福气，本奖者受激励。”

“我营团军旨不符合要求被批评过，本以为此次评功评奖与先进无缘，没想到喜奖的预选名单上也有我的名字，”下士小王告诉记者，“党支部没有因为一次过错而‘一票否决’，而是综合衡量整体表现，让我更有动力扎根岗位，建功军营。”

该旅领导介绍，评功评奖工作只有真正立起“能者上、优者奖、庸者下、劣者汰”的“风向标”，教育引导官兵凭能力立身、事实晋进步，才能真正营造出比学赶超的崭厚氛围。

为此，他们采取一系列务实措施，确保评功评奖工作落实落细：建立军事训练档案，将平时训练成绩作为“耳争”的重要参考依据；建立量化评比制度，制订量化评比细则，综合考量日常表现、军事训练成绩、理论考核成绩、执行任务情况等多方面情况，让个人实绩量化具体明确，用活用好政策法规，在重大演训任务结束后，及时制订评功评奖实施方案，分配专项奖励指标，第一时间给予官兵奖励，让表彰奖励冒热气、接地气，对大项比武中表现突出的个人和单位，在评功评奖方面优先考虑，给予倾斜，“有功者优先”的导向更加清晰明确——

此外，该旅军团立起向战为战“指挥棒”，制订下发“四优先四不评”表彰奖励办法——在大项任务中积极作为、表现出色、贡献重担的，优先考虑；在创新战术战法、武器装备使用方面有突出突破，助力战斗力提升的，优先考虑——通过这些举措，营造出“为战者优先，有为者有位，吃苦者吃香”的良好氛围，激发官兵建功立业、头击打赢的昂扬斗志。

“评功评奖和步推荐入选个个关键节点，一般表现出色、实干有为的官兵成为受表彰主体，为有理想、想作为、有追求的年轻官兵指明了奋进方向，”演旅领导介绍，他们标明树立向战为战鲜明导向，引导官兵争干时不争“评”时，凝聚起“见贤思齐，人心思进”的蓬勃正能量。

坚持稳中求进、以进促稳

■何立峰

党中央进工作总基调是我们治国理政的重要原则。近个大百产的中央经济工作会议强调，要坚持稳中求进，以进促稳，守正创新，先立后破，系统集成，协同配合，充分发挥各项工具箱、国务宏观调控的前瞻性、针对性、有效性，国际和军队建设同样要辩证看待“稳”和“进”的关系，做到以稳求进、以进促稳。

党中央进行为工作总基调，要求各个领域的发展都要以“稳”为基础和底线，“稳”和“进”，相辅相成，相互促进，体现事物发展动态平衡中的运动变化基的规律，行稳方能致远。其中，“稳”是主调，是大局，是发展的基础和前提，指的是决定事物发展的主要方面处于相对平衡状态，但非事物绝对出为下大幅合者运动的趋势，而运动趋势又有着相不同方向变化的可能。没有“稳”，就不可能实现“进”，“进”是方向，是目标，没有“进”，就不会有真正的“稳”。

“稳”，就是要保持战略定力和对定心，知止而后有定，定而后能静，静而后能安，而后能虑，虑而后能得。“稳中求进，以进促进的”稳”，不是不动，不定，而是要进中求稳，在发展中保稳。主是当下形势，准确识定，基本国是，要遵守发有利的战略态势，力求大方向不错，方针政策不变，战略部署稳固。在守住底基、稳住基的基础上积极进取，加好主动仗。善于危中寻机，化危为机，力争主动，力避被动，在稳当可靠基础上争取胜利。

“进”，就是要主动作为，平视积重，以乐观行动为部队建设和改革发展营造氛，“进度制不进，是心到制之事不成，“稳中求进，以稳促进的”进”不是急进，冒进，不计成效地蛮干，而是要以满足的重标准，坚战略，以科学的方法，稳扎稳打，落实每一步发展措施，一抓抓着一抓加，一锤锤着一锤敲，一步一个脚印向前迈进，干一事成一事，能快则快，争步当前，积小胜为大胜，确保各项工作扎实推进，高质量完成。

加管好事务北京，本质保证稳取稳务，我们应加强对“稳”和“进”的辩证关系，重问题，想对策，抓落实，加强学对度情，深思熟虑，事业前进，改变不对当的应行，不思进取，又急于对冲动蛮干，急于求成，加强的各项任务，加进的各进取，正确处理好速度和质量的关系，坚持向深化改革要红利，向科技创新要红利，向战略管理要红利，确立各个国军加速度，赢得军事竞争新优势。坚持动不步，边备战，边建设，加实持发展理念，创新发展模式，增强发展动能，实现更高质量、更高效益、更可持续的发展。

国防大学联合作战学院用好外部优质资源培养人才

现地教学深化研战谋战

本报讯 张成利、高德报道：日前，国防大学联合作战学院组织学生赴南部战区一线部队，开展现地教学实践活动。该院与一线部队建立长期教研协作机制，着眼“直指战场、贴近部队、服务未来”目标定位，在与多军兵种部队互学互鉴中，大力提升教学针对性和合成素。

“登上舰艇参观新型装备，聆听一线官兵讲述任务经历，为我们推动备战打仗工作走深走实提供了思路借鉴。”在海军某基地现场学习后，学员王书红兴奋地说。在驻军某部指挥所，官兵开展一场作战行动全流程训练，旅部的战斗氛围让现场观摩的学员深受感染。在某军工企业科技产业园，随行教员引导学员围绕“高新技术装备的作战运用”展开深入研讨……

“用好用足外部优质教育资源，是我们加快人才培养模式转变的一个有益探索，”该院领导介绍，他们着眼实战抓教学，围绕打赢育人才，将教学课堂向一线部队延伸，利用战区联合指挥机构、驻军各型部队、高新技术军工企业和红色纪念场馆等载体，定期组织学员开展现地教学，帮助大家熟悉掌握新质部队作战力量建设现状和高新技术装备发展运用，不断拓宽战略视野，提升战略思维。

现地教学结束后，该院学员教员组织全体学员共同等现课习设计，拟制行动方案，开展兵棋推演，推动教学成果及时转化。该院领导介绍，他们在“走出去”开展现地教学的同时，还进一步拓宽教学路子，邀请不同学科和名专家、经验丰富的部队指挥员进行专题授课，推动形成集课堂教学、现地见学、讲坛研学于一体的院校育人新格局。

The change in oxygen supply mode allows officers and soldiers of the border defense company at an altitude of 5,380 meters to guard the border with peace of mind

Source: China Military Network-People's Liberation Army Daily Author: Zhao Jinshi Sun Xingwei Li Weixin Editor: Liu Shangjing

2025-01-06 06:35:01 0

A regiment of the Hotan Military Sub-district in Xinjiang continues to improve the oxygen support conditions of the high-altitude company-

System oxygen supply helps officers and soldiers guard the border

■ Zhao Jinshi People's Liberation Army Daily reporter Sun Xingwei Li Weixin

"Nowadays, the high-altitude company outposts have achieved diversified oxygen supply and system oxygen supply, and the oxygen supply mode has undergone tremendous changes." Recently, the reporter came to the Shenxianwan Border Defense Company at an altitude of 5,380 meters of a border defense regiment of the Hotan Military Sub-district in Xinjiang for an interview. The company commander Liu Hao told reporters that the military sub-district explored the establishment of a "20-kilometer oxygen supply circle" oxygen supply mode to make it more convenient and faster for officers and soldiers to breathe oxygen.

The regiment is stationed in the heart of the Karakoram Mountains, with an average altitude of more than 5,000 meters. The average oxygen content in the air here is less than 40% of that in the plains. In recent years, in order to help soldiers on the plateau defend scientifically and safely, all levels have continuously increased the construction of oxygen inhalation projects, equipped plateau outposts with oxygen-making cabins, micro-pressure oxygen cabins and single-soldier portable oxygen generators, installed bedside oxygen supply systems, and built oxygen-rich indoor training grounds. Soldiers' oxygen inhalation has undergone a transformation from "life-saving oxygen-health oxygen-normal oxygen-combat oxygen".

"I heard from the old squad leader that many years ago, when he first arrived at the outpost, the oxygen supply was insufficient and only critically ill patients could breathe oxygen in cylinders. Now, the company's oxygen supply is sufficient and convenient." First Class Sergeant Guo Xiangxiang told reporters that he witnessed the changes in the use of oxygen in border defense-

In 2010, Guo Xiangxiang came to the Shenxianwan outpost after being assigned to the company. At that time, the fifth-generation barracks had been equipped with bedside oxygen supply equipment. Soldiers could breathe oxygen for at least one hour every day during lunch break or after turning off the lights, which helped to increase the oxygen content in the blood in a static environment.

In 2016, the oxygen-enriched indoor training ground was put into use in the company. The oxygen-enriched indoor training ground is built with an air membrane structure and is equipped with equipment such as heaters, humidifiers, and oxygen generators. It has functions such as oxygenation, pressurization, temperature regulation, and humidification. The oxygen-enriched indoor training ground is also equipped with fitness equipment such as treadmills and spinning bikes, and has training and fitness venues, which is conducive to soldiers increasing the oxygen content in their bodies during exercise.

"The shortening of distance is a microcosm of the improvement of oxygen conditions." Guo Xiangxiang recalled that at the beginning, canned oxygen had to be pulled up the mountain from the distant Kashgar city; later, oxygen filling had to be carried out in Yecheng, which was closer; a few years ago, a medical station more than 100 kilometers away had the conditions for filling oxygen. In 2020, the oxygen production cabin settled in the Shenxianwan Border Defense Company, which can fill multiple bottles of high-concentration oxygen at the same time. Soldiers no longer have to run more than 100 kilometers away to fill, and the oxygen guarantee level has been significantly improved.

"Compared with soldiers breathing oxygen on their own, the micro-pressure oxygen cabin is more controllable and scientific, which is conducive to reducing the incidence of plateau diseases." During the interview, military doctor Liu Wei took the reporter to a beige cabin-style building. When the reporter looked up, the seven big characters "Highland Oxygen Energy Storage Cabin" came into view. Stepping into the door, the reporter saw that there were 8 seats neatly arranged inside.

Liu Wei told reporters that the company's micro-pressure oxygen chamber was built in 2021. It can simulate oxygen concentration, air pressure, temperature and other conditions at different altitudes such as 3,000 meters, 2,000 meters and 500 meters above sea level, and has certain therapeutic and health-care effects. New recruits enter the micro-pressure oxygen chamber for treatment when they first arrive at the outpost, officers and soldiers return from patrol or after strenuous exercise, which can effectively relieve the symptoms of hypoxia.

"Nowadays, the high-altitude company outposts have formed a plateau oxygen supply system with oxygen-making cabins and oxygen-making equipment as the base, oxygen-enriched indoor training grounds and micro-pressure oxygen chambers as auxiliary, vehicle-mounted oxygen generators as nodes, and individual oxygen supply equipment as terminals." Liu Wei told reporters that the full coverage and systematic oxygen supply guarantee helps officers and soldiers on duty, patrol and train, and promotes the improvement of the combat effectiveness of the troops stationed in the plateau.

Reporter's remarks

Caring about the warmth and coldness of the border and devoting all efforts to solving problems for soldiers

■ Sun Xingwei

There are "forbidden areas" in life, but there can be no "blanks" in defense. Over the years, the border guards stationed on the snowy plateau have completed the tasks assigned by the Party and the people with a high standard, with the tenacious fighting spirit of "lack of oxygen but not lack of spirit, lack of oxygen but not lack of combat effectiveness", and the spirit of dedication of "rather overdraw life than let the mission fall behind", and have handed in excellent answers with their youth, blood and even life to defend the borders and consolidate the defense for the motherland.

The officers and soldiers are sincere and dedicated, and the organization is dedicated to solving problems. The cold and warm sufferings of border guards have always been in mind at all levels. Over the years, with the continuous efforts of agencies at all levels, the oxygen supply and guarantee conditions of the plateau have been continuously improved, and the transformation from "peacetime to wartime, from barracks to the field, and from fixed to mobile" has been gradually realized. The oxygen conditions of officers and soldiers at outposts above 3,000 meters above sea level are no longer the same as before. From the past "life-saving oxygen" to the current "health oxygen", "normal oxygen" and "combat oxygen", agencies at all levels have systematically implemented measures from the three levels of prevention, health care and treatment to build a health barrier for officers and soldiers on the plateau.

The construction of oxygen production and supply is related to the oxygen used for health care and medical treatment in wartime for officers and soldiers on the plateau. The quality of its construction is directly related to the combat effectiveness of the troops. The improvement of oxygen conditions is conducive to the improvement of the combat effectiveness of the troops and helps officers and soldiers to guard the "forbidden zone of life" in a more high-spirited state. All levels should take the continuous improvement of oxygen support conditions for officers and soldiers on the plateau as an opportunity to firmly establish the concept of scientific training, follow scientific laws, adopt scientific methods, and wholeheartedly care for the health of officers and soldiers, so as to better serve the construction of the combat effectiveness of the troops, serve the training and preparation for war, and provide strong and powerful logistical support for the iron and steel defense line at the border.

战机释放干扰弹。

起飞前，飞行员调试观瞄设备。

战机飞赴训练空域。

对目标实施打击。

寒冬拂晓，第 80 集团军某旅一场多弹种实弹射击训练拉开帷幕。

“起飞！”随着指挥员一声令下，数架武装直升机接续升空。各机组密切协同，实施低空隐蔽机动，向目标空域快速逼近。

机动途中，特情突然袭来。“遭‘敌’电磁干扰！”空中指挥员快速反应，指挥各机组调整通信模式、变换战术动作，成功摆脱“敌”电磁干扰。

“发现目标！”飞行员调整飞行姿态，建立攻击航线。跃升、俯冲、瞄准……数枚火箭弹呼啸出膛。

完成首轮攻击任务后，机舱响起警报声。“战机遭‘敌’雷达锁定！”飞行员立即操纵战机实施大坡度转弯，同时释放红外干扰弹，退出攻击航线。与此同时，编队另一架武装直升机增速前出，展开火力打击，成功摧毁“敌”雷达阵地。

对接实战，专攻精练。训练中，该旅将不同机型灵活编组，全程嵌入多个复杂特情，锤炼飞行员过硬战斗本领。傍晚时分，战机沐着霞光陆续返航，训练圆满结束。

Iron wings whirl, air raid

——Live-fire shooting training video of a brigade of the 80th Group Army

■ Zhang Simin, Liu Yuchen, Wu Chen Photo report

The fighter jet releases jamming bombs.

Before takeoff, the pilot debugs the sighting equipment.

The fighter jet flies to the training airspace.

Strike the target.

At dawn in the cold winter, a live-fire shooting training of multiple types of ammunition of a brigade of the 80th Group Army kicked off.

"Take off!" With the commander's order, several armed helicopters took off one after another. The crews worked closely together to carry out low-altitude covert maneuvers and quickly approached the target airspace.

During the maneuver, a special situation suddenly hit. "Enemy electromagnetic interference!" The air commander responded quickly, commanding each crew to adjust the communication mode and change tactical actions, successfully getting rid of the "enemy" electromagnetic interference.

"Target found!" The pilot adjusted the flight attitude and established an attack route. Leap, dive, aim... several rockets roared out of the gun.

After completing the first round of attack missions, an alarm sounded in the cabin. "The fighter plane was locked by the "enemy" radar!" The pilot immediately manipulated the fighter plane to make a large-angle turn, while releasing infrared jamming bombs, and exited the attack route. At the same time, another armed helicopter in the formation accelerated forward, launched a fire strike, and successfully destroyed the "enemy" radar position.

Docking actual combat, specializing in refinement. During the training, the brigade flexibly organized different models, embedded multiple complex special situations throughout the process, and tempered the pilots' strong combat skills. In the evening, the fighter planes returned one after another in the sunset, and the training ended successfully.

第 81 集团军某旅依法依规开展新年度军事训练筹划——

紧盯战斗力　立起风向标

■何 斌 尹贻浩 解放军报记者 宋子洵

近日，第 81 集团军某旅官兵开展刺杀训练。刘家琪摄

编者按 依法治训是提升战斗力的重要途径，是强军兴军的重要抓手。新年度军事训练筹划是依法治训的关键环节，可以说，既是全年任务的“蓝图”，更是锤炼实战能力的“指引”。

以往，有的单位在开展新年度军事训练筹划时，存在聚焦实战不够、目标定位不准、部署计划不细等问题。第 81 集团军某旅紧抓新年度训练开局，坚持以战领训、依法治训，严格依照军事训练条例、军事训练大纲等法规要求，以提升实战化水平为核心，精细筹划各项任务，科学分解阶段目标，统筹安排训练内容，确保军事训练与战斗力生成同频共振。通过强化按纲施训，全面夯实打赢根基，为新年度军事训练开好局、起好步树立鲜明导向。

着力提升基础训练质效——

精细筹划夯实能力根基

前不久，第 81 集团军某旅某连孙连长拿到新年度军事训练计划，感到眼前一亮。认真浏览后，他说，相比往年，这份计划内容更加详尽，重点更为突出，时间安排更加科学规范，实战化导向更加鲜明。

“这份计划较好回应了训练暴露出的一些问题。”谈到连队训练情况，孙连长有些感慨，此前，连队在落实按纲施训过程中，每个课目都没有落下，但一些课目的年终考核成绩还是不尽如人意。

问题出在哪里？总结经验时，有骨干直言不讳，从表面上看，一年的训练任务全部完成了，可实际上有的基础训练课目并不牢固，导致考核中时常有“意外”出现，影响了整体训练成绩。

对此，战士小刘深有体会。“就拿去年来说，有段时间，比武、演示、集训扎堆组织开展，连队官兵只能全员上阵，分散投身在各个任务中。”他坦言，虽然任务最终都顺利完成了，但基础训练时间被压缩，他们只得插缝补训，“因为时间零碎、内容分散，训练效果不免打了折扣”。

机关在调研时还了解到一些情况。比如，训练大纲明确规定夜间按图行进训练必须在夜间进行，但出于安全考虑，个别营连将考核安排在天刚转黑的傍晚，虽降低了风险，但与实战要求存在较大差距。

“基础训练是部队形成实战能力、完成作战任务的重要保证。提升体系作战能力，抓好基础训练是基本，而抓好基础训练的关键在于按纲施训、按纲组考。”参谋部一名领导介绍，筹划新年度训练计划时，旅队认真梳理基础训练存在的问题，强调要按照训练法规要求，以“精准筹划、实战导向、体系推进、严格标准”为原则，着力统筹优化年度训练任务的时间安排和课目设计。

他们明确要求，严格落实大纲规定的训练内容和考核标准，在满足训练时间的基础上，将基础训练作为重点贯穿全年始终，针对各个专业、不同层级官兵的作战技能特点水平，精

细化制订训练方案，重点培养单兵体能、技能、心理和战术意识，打牢综合能力基础。计划初步制订后，他们画出计划推进图，依据训练法规细化时间节点、科学编排任务，避免多项任务冲突影响训练进度，确保“人员、内容、时间、质量”四落实。

前不久，在制订新年度夜训计划时，他们将法规要求进一步细化，更加精准指明在组训中容易忽视和违反的细节要求，并作出整改调整。比如，优化训练场地条件，加强安全保障，强调必须将训练时间严格安排在暗夜等等，确保按照法规要求施训，还原真实战场环境，提升实战化水平。

年度军事训练计划从源头上防止了时间碎片化、训练不科学、考核标准低的问题，让基层有了更清晰的训练思路，可以按部就班抓好落实。孙连长对新年度训练更有底数，他说，这份计划让基层官兵能够“看得懂、抓得住、照着练”。

推动重难点课目训实训到位——

重点攻关保证依规施训

去年底一次官兵恳谈会上，重难点课目训练成为官兵讨论的焦点之一，这让正在制订新年度军事训练计划的作训科王参谋陷入了深思。

会上，有官兵反映了个别课目在训练中难以实现预期效果的问题。一名侦察兵举例说，相关法规对侦察兵水上操舟训练的操作技能和场地标准要求较高，过去受一些任务影响，部分训练课目时常出现训练时长不够、训练效果不佳的现象，野外驻训返营后因为没有水上训练的条件，结果无法补训，导致个别战士基本操作还不够熟练。

还有战士反映，大纲虽然明确了重难点课目的训练内容与考核标准，但在教练员水平不一、参训人员能力参差、训练难度较大的情况下，日常训练有时会一带而过、浅尝辄止。结果，在实战化训练或考核中，有时只能靠官兵自己的理解去摸索，心里没底。

梳理总结发现，一些重难点课目技术复杂，实际训练中部分课目的训练指导不到位、训练场地保障力量相对不足，容易导致训练质效得不到保证。一名旅领导指出，重难点课目是影响和制约训练质量提高的瓶颈，这些课目训不好，部队执行作战任务的能力水平就上不去，实战化训练就难以深入。

“抓好重难点课目攻关，才能抓住训练的关键和战斗力的核心。新的一年必须将相关课目训实训到位，把精力放在有效破解难题上。”据此，旅党委提出“难点优先、重点攻关”的工作思路，明确提出从计划制订阶段开始，就要确保严格按纲施训、内容重点突出、资源优先配置，重点把“硬骨头”啃下来。

对基层无法独立解决的训练难题，旅队明确由机关业务科室牵头，依照训练相关法规对重难点课目进行系统全面梳理，将问题归类细化，逐项对照法规标准明确整改措施。比如，为解决训练场地保障问题，他们积极请示上级机关，与兄弟单位沟通协调，通过错峰借用的方式组织训练，让训练在依法合规的条件下进行。在提升组训水平上，他们计划在今年加大“请进来、走出去”力度，定期邀请外单位专家前来辅导授课，并增加送学培训机会，强化教练员队伍对法规的理解掌握，提升依法组训水平。

在具体计划制订中，旅机关指导基层根据法规对训练内容进行细化分解，采取“分步攻关、逐级验收”的方式推进课目实施。记者看到，今年水上操舟训练被分解为基础操舟、复杂航线操作和快速转移三个阶段，官兵在每个阶段结束后接受考核评价，达标后再进入下一阶段训练。那名侦察兵看到新的训练计划后很有信心地表示：“新的组训方式既保证了训练质量，又有效避免了‘一刀切’和‘走过场’等现象，我们对于攻克重难点课目训练‘拦路虎’更有信心了。”

聚力破解协同训练难题——

提高认识强化融会贯通

去年的一次多兵种合成训练，让该旅参谋部领导至今印象深刻。

那次训练中，尽管各单兵种课目完成得不错，但在合成协同时却暴露出一些问题。尤其是在攻防训练中，装甲集群火力的毁伤指标未达预期，直接导致战斗进程受阻。

“指挥员未能有效调用上级配属的火力打击力量，其他兵种的协同计划不够细化，导致关键时刻火力支援不到位。这类问题说明个别指挥员和参训官兵法治意识欠缺，对合成训练的认识不深入、能力不精通。”事后复盘时，大家认真总结分析，查摆出深层次原因。

一名机关参谋感慨，合成训练是在完成专业训练和战术训练基础上，基于作战编组展开的高级应用训练。合成训练顺应实战化要求，其核心在于“合”，强调的是军兵种之间的联合和协同，指挥员如果不能将各方力量运用到位，就难以达到作战目的。

随后调研时，他们还发现少数官兵对训练大纲中多兵种合成要求的理解仅仅停留在理论层面，缺乏将其转化为实际训练行动的意识和能力。“对法规要求没有深层次体会与理解，就难以将其学以致用、融会贯通，导致训练出现‘形合神散’现象。”参谋部一名领导剖析指出。

进行新年度筹划之前，该旅广泛开展调研，将官兵反映集中的装备性能、场地条件、火力资源等方面的问题“摊开”剖析，对照法规要求逐一研究，展开一场深度“问诊”。制订训练

计划时，围绕“依法依规、合成协同、精准施训”的目标，突出问题导向，优化训练计划，推动合成训练真正实现体系化、法治化、实战化。

记者留意到，他们充分发挥法规考核的“指挥棒”作用，依据大纲要求，在新年度计划中增加合成训练的考核频次及在年度考核中的比重，倒逼官兵提升协同思维。为了强化指挥员依规进行作战指挥的意识和能力，他们还增加了定期组织研讨等安排，加强对训练相关法规条款的研究，引导各级养成对标法规要求思战研战的习惯。为提升火力打击协同效能，他们在今年首次将上级配属的陆航、空军航空兵力量纳入训练计划编制的全流程……

新年伊始，某营率先依据新的军事训练计划开展了一场基于实战化背景的攻防训练。炮兵分队精准覆盖目标后，装甲分队随即接续实施机动火力打击，步兵分队则在火力掩护下同步推进至敌方纵深。“场地一场多用，资源整合到位，火力打击紧密协同。”该营李营长认为，这种模块化训练模式能够更好摔打锤炼部队尤其是指挥员的能力素质。他说，训练是体系作战能力提升的关键，而依法筹划是训练成功的基础和前提。新的一年，他会带领全营官兵努力实现多兵种协同的优化升级。

讲好法治故事 传播法治声音

岁月不居，时节如流。不知不觉间，2025年的日历已经翻开，新一年的“法治军营”版又与读者见面了。

过去的一年，全军和武警部队深入贯彻习近平法治思想，贯彻落实法治军队建设新要求，深入推进依法治军、从严治军，聚焦备战打仗主责主业，全面加强军事法治建设，为实现党在新时代新征程的强军目标任务提供了有力法治保障。

“军营话‘法’”：将学习宣传贯彻党的二十届三中全会精神作为重点，组织官兵学习领会全会《决定》，深刻把握全面深化改革的重大意义、指导思想、总体目标、重大举措，引导官兵增强改革意识，提高改革本领，为推进国防和军队现代化提供强大动力。

“法治故事”：围绕全面从严治军、备战打仗、练兵备战、军事斗争准备、军事训练、依法管理、军队改革、军事力量运用等重点任务，深入宣传军队和武警部队贯彻落实习近平法治思想和党中央军委、中央军委主席命令的生动实践，展现了广大官兵不断坚定法治信仰、强化法治思维的责任风貌。

过去的一年，我们坚持内容和形式相统一，注重用喜闻乐见、接地气的方式讲好法治故事，传播法治声音。

编辑老师 法治思维是提升战斗力的重要途径，是强军兴军的重要抓手。新年度军事训练筹划是依法治军的关键环节，可以说，制定全年任务的“蓝图”，更是落实依法治军的“密钥”。以往，有的单位在制定新年度军事训练筹划时，存在要么实战不够、目标定位不准，要么计划不细等问题。第81集团军某旅紧紧围绕新年度训练开局，坚持以战为训、依法治训，严格按照军事训练条例、军事训练大纲等法规要求，以提升实战化水平为核心，组织等级作战任务，科学分解阶段目标，统筹安排训练内容，高标军事训练，与战斗力生成转换衔接，通过强化法制地训，全面有序有效组织，为新年度军事训练开好局、起好步树立规矩。

去年底，前进军区某团组织开展复杂电磁环境下复合战术训练。 门城摄

筑牢个人信息安全防线

■张江文

军营话“法”

伴随科学技术的迅猛发展，我国步入数字时代已经到来。无数新鲜事物层出不穷，各种便利生活的手段不断涌现，也带来新的安全隐患。如今，通过日常的点点滴滴的痕迹，无数别有用心者对个人资产、隐私、名誉等方面的侵害已经屡见不鲜。

不断提升法治素养，学会保护个人信息，网络安全人人有责。网络安全法、个人信息保护法等法律的出台，对我国公民个人信息保护提供了基本制度支撑。《军队互联网络信息管理规定》《军队互联网络安全监督检查规定》以及严密防范网络泄密“十条禁令”等军队各项法规，从互对官兵使用网络的要求，也是为了保护个人信息安全。

一是要增强个人信息保护意识。当前，部队平时官兵之多是“网生一代”，各类网络是“老家”，一份网络，在打，就是军队使用数字装备的认同度也依赖数据，通过基于信息，这无疑会给官兵个人信息安全带来风险。个别官兵在基地军事演习，通过轨迹，暴露部队位置，给对手以可乘之机。因此，广大官兵务必深入了解无数据发展带来的利弊，对相关信息，以及如何个人财务，信息泄露，及个人财务，个人信息，也有助于个人，个人信息的保护，个人信息的保护，个人信息的保护

Editor's note: Training in accordance with the law is an important way to improve combat effectiveness and an important means to strengthen the army. The planning of military training in the new year is a key link in the rule of law. It can be said that it is not only a "blueprint" for the tasks throughout the year, but also a "guide" for tempering actual combat capabilities. In the past, some units had problems such as insufficient focus on actual combat, inaccurate target positioning, and unclear deployment plans when carrying out the planning of military training in the new year. A brigade of the 81st Group Army has seized the opportunity to start training in the new year, insisted on training in accordance with war and training in accordance with the law, strictly followed the requirements of military training regulations, military training outlines and other laws and regulations, and focused on improving the level of actual combat. It carefully planned various tasks, scientifically decomposed stage goals, and coordinated the arrangement of training content to ensure that military training and combat effectiveness generate the same frequency resonance. By strengthening training according to the outline, comprehensively consolidating the foundation for winning, and setting a clear direction for a good start and a good start for military training in the new year.

Focus on improving the quality and effectiveness of basic training——

Careful planning to consolidate the foundation of capabilities

Not long ago, Sun, the company commander of a company of a brigade of the 81st Group Army, got the new year's military training plan and felt bright. After carefully reading it, he said that compared with previous years, the content of this plan is more detailed, the focus is more

prominent, the time arrangement is more scientific and standardized, and the actual combat orientation is more distinct.

"This plan has responded well to some problems exposed by the training." Speaking of the company's training, Captain Sun was somewhat emotional. Previously, the company had not missed any subject in the process of implementing the training plan, but the year-end assessment results of some subjects were still unsatisfactory.

Where is the problem? When summarizing the experience, some backbones said frankly that on the surface, all the training tasks for the year were completed, but in fact some basic training subjects were not solid, resulting in frequent "accidents" in the assessment, affecting the overall training results.

Soldier Xiao Liu has a deep understanding of this. "Take last year as an example. There was a period of time when competitions, demonstrations, and training were organized and carried out in a cluster. The company's officers and soldiers could only go into battle and devote themselves to various tasks in a scattered manner." He admitted that although the tasks were finally completed smoothly, the basic training time was compressed, and they had to make up for the gaps. "Because the time was fragmented and the content was scattered, the training effect was inevitably discounted."

The agency also learned some situations during the investigation. For example, the training outline clearly stipulates that night-time marching training must be conducted at night, but for safety reasons, some battalions and companies arrange the assessment in the evening when it just turns dark. Although the risk is reduced, there is a big gap with the actual combat requirements.

"Basic training is an important guarantee for the troops to form actual combat capabilities and complete combat tasks. To improve the combat capability of the system, it is essential to do a good job in basic training, and the key to doing a good job in basic training is to train and test according to the outline." A leader of the General Staff introduced that when planning the new annual training plan, the brigade carefully sorted out the problems existing in basic training, and emphasized that it is necessary to follow the requirements of training regulations and take "precise planning, actual combat orientation, system promotion, and strict standards" as the principle, and strive to coordinate and optimize the time arrangement and course design of annual training tasks.

They clearly require that the training content and assessment standards stipulated in the outline be strictly implemented. On the basis of meeting the training time, basic training should be focused throughout the year. According to the combat skill characteristics and levels of officers and soldiers of various professions and different levels, training plans should be formulated in a refined manner, focusing on cultivating individual physical fitness, skills, psychology and tactical awareness, and laying a solid foundation for comprehensive capabilities. After the initial plan was formulated, they drew a plan advancement chart, refined the time nodes according to the training regulations,

scientifically arranged the tasks, avoided the impact of multiple task conflicts on the training progress, and ensured the implementation of "personnel, content, time, and quality".

Not long ago, when formulating the new year's night training plan, they further refined the requirements of the regulations, more accurately pointed out the details that are easy to ignore and violate in the training, and made rectifications and adjustments. For example, optimize the conditions of the training site, strengthen security, emphasize that the training time must be strictly arranged in the dark night, etc., to ensure that the training is carried out in accordance with the requirements of the regulations, restore the real battlefield environment, and improve the level of actual combat.

The annual military training plan prevents the problems of time fragmentation, unscientific training, and low assessment standards from the source, so that the grassroots have a clearer training idea and can implement it step by step. Captain Sun has a better understanding of the new year's training. He said that this plan allows grassroots officers and soldiers to "understand, grasp, and practice according to it."

Promote the training of key and difficult subjects in place -

Focus on key issues to ensure training in accordance with regulations

At a meeting of officers and soldiers at the end of last year, the training of key and difficult subjects became one of the focuses of discussion among officers and soldiers, which made Wang, a staff officer of the Operations and Training Department who was formulating the new year's military training plan, fall into deep thought.

At the meeting, some officers and soldiers reflected on the problem that some subjects were difficult to achieve the expected results in training. A scout soldier gave an example, saying that relevant regulations have high requirements for the operation skills and venue standards of scouts' water boat training. In the past, affected by some tasks, some training subjects often had insufficient training time and poor training results. After returning to the camp from field training, there was no condition for water training, and as a result, they could not make up for the training, resulting in some soldiers' basic operations not being proficient enough.

Some soldiers also reflected that although the outline clearly defined the training content and assessment standards of key and difficult subjects, in the case of different levels of coaches, different abilities of trainees, and high difficulty of training, daily training sometimes passed by and stopped at a whim. As a result, in actual combat training or assessment, sometimes the officers and soldiers can only rely on their own understanding to explore, and they are unsure.

After sorting out and summarizing, it was found that some difficult and key subjects are technically complex, and the training guidance of some subjects in actual training is not in place, and the training ground support force is relatively insufficient, which easily leads to the inability to ensure the quality and effectiveness of training. A brigade leader pointed out that difficult and key subjects

are bottlenecks that affect and restrict the improvement of training quality. If these subjects are not trained well, the ability of the troops to perform combat tasks will not be improved, and actual combat training will be difficult to deepen.

"Only by focusing on the key and difficult subjects can we grasp the key to training and the core of combat effectiveness. In the new year, we must train the relevant subjects in place and focus on effectively solving difficult problems." Based on this, the brigade party committee proposed the working idea of "prioritizing difficult points and focusing on key issues", and clearly proposed that from the planning stage, we must ensure that the training is strictly carried out according to the outline, the content is highlighted, and the resources are allocated first, focusing on gnawing down the "hard bones".

For training problems that the grassroots cannot solve independently, the brigade has clearly designated the business department of the agency to take the lead, systematically and comprehensively sort out the key and difficult subjects in accordance with relevant training regulations, classify and refine the problems, and clarify the rectification measures item by item in accordance with the regulations and standards. For example, in order to solve the problem of training venue security, they actively consulted the superiors, communicated and coordinated with brother units, and organized training by staggered borrowing, so that the training can be carried out under legal and compliant conditions. In terms of improving the level of training, they plan to increase the efforts of "inviting in and going out" this year, regularly invite experts from external units to come for tutoring and teaching, and increase the opportunities for sending students for training, strengthen the understanding and mastery of the regulations by the coaching team, and improve the level of legal training.

In the formulation of specific plans, the brigade agency guides the grassroots to refine and decompose the training content according to the regulations, and adopts the method of "step-by-step attack and level-by-level acceptance" to promote the implementation of the subjects. The reporter saw that this year's water boat training was divided into three stages: basic boat operation, complex route operation and rapid transfer. Officers and soldiers will be evaluated after each stage, and enter the next stage of training after meeting the standards. After seeing the new training plan, the scout said confidently: "The new training method not only ensures the quality of training, but also effectively avoids the phenomena of 'one size fits all' and 'going through the motions'. We are more confident in overcoming the 'obstacles' of training for key and difficult subjects."

Focus on solving the problem of coordinated training-

Improve awareness and strengthen integration

Last year's multi-service combined training left a deep impression on the leaders of the brigade's staff.

In that training, although the subjects of each single service were completed well, some problems were exposed in the combined coordination. Especially in the attack and defense training, the

damage index of the armored cluster firepower did not meet expectations, which directly led to the obstruction of the battle process.

"The commander failed to effectively call on the firepower strike force assigned by the superior, and the coordination plan of other arms was not detailed enough, resulting in insufficient firepower support at critical moments. Such problems show that individual commanders and participating officers and soldiers lack legal awareness, do not have a deep understanding of combined training, and are not proficient in their abilities." When reviewing the situation afterwards, everyone carefully summarized and analyzed and found out the deep-seated reasons.

A staff officer said that synthetic training is an advanced application training based on the completion of professional training and tactical training and carried out based on combat formation. Synthetic training conforms to the requirements of actual combat, and its core lies in "synthesis", emphasizing the combination and coordination between the military services. If the commander cannot use the forces of all parties in place, it will be difficult to achieve the combat objectives.

In the subsequent investigation, they also found that a few officers and soldiers only understood the requirements of multi-service synthesis in the training outline at the theoretical level, lacking the awareness and ability to transform it into actual training actions. "Without a deep understanding and understanding of the requirements of the regulations, it is difficult to apply them and integrate them, resulting in the phenomenon of 'form unity and spirit dispersion' in training." A leader of the staff department analyzed and pointed out.

Before planning for the new year, the brigade conducted extensive investigations, "spread out" and analyzed the problems reflected by the officers and soldiers in terms of equipment performance, site conditions, firepower resources, etc., and compared them with the requirements of the regulations one by one, and carried out an in-depth "diagnosis". When formulating training plans, we will focus on the goal of "following laws and regulations, synthesizing and coordinating, and accurately implementing training", highlight problem orientation, optimize training plans, and promote the real systematization, legalization, and actual combat of synthetic training.

The reporter noticed that they gave full play to the "baton" role of legal assessment, and according to the requirements of the outline, increased the assessment frequency of synthetic training and the proportion of annual assessment in the new annual plan, forcing officers and soldiers to improve their collaborative thinking. In order to strengthen the awareness and ability of commanders to conduct combat command in accordance with regulations, they also increased arrangements such as regular seminars, strengthened the research on training-related regulations, and guided all levels to develop the habit of thinking about war and studying war in accordance with regulatory requirements. In order to improve the effectiveness of firepower strike coordination, this year they included the aviation forces of the Army and Air Force assigned by their superiors into the whole process of training plan compilation for the first time...

At the beginning of the new year, a battalion took the lead in carrying out an offensive and defensive training based on a practical combat background according to the new military training plan. After the artillery unit accurately covered the target, the armored unit immediately followed up with a mobile fire strike, and the infantry unit simultaneously advanced to the depth of the enemy under the cover of firepower. "One site can be used for multiple purposes, resources are integrated, and firepower strikes are closely coordinated." Li, the battalion commander, believes that this modular training model can better hone the capabilities and qualities of the troops, especially the commanders. He said that training is the key to improving the combat capability of the system, and planning in accordance with the law is the basis and prerequisite for successful training. In the new year, he will lead the officers and soldiers of the entire battalion to strive to achieve the optimization and upgrading of multi-service coordination.

近日

中部战区陆军第 82 集团军某旅

举行“忠诚尖兵”年度颁奖晚会

邀请获奖官兵家属代表走上领奖台

共享荣耀时刻

晚会在开场舞

《战鼓催征》中拉开序幕

年度全面建设汇报片

《砥砺忠诚砺尖兵》

将现场气氛彻底点燃

一帧帧听从号令

拼搏进取的画面

一幕幕亮剑沙场

敢于突破的动人场景

引发官兵强烈共鸣

歌伴舞

《五公里》《战斗宣言》

《战友还记得吗》

源于官兵日常训练的原创节目

展现出该旅建设发展风貌

官兵练兵备战风采

把现场观众带入了火热的练兵场

武术《武动青春》

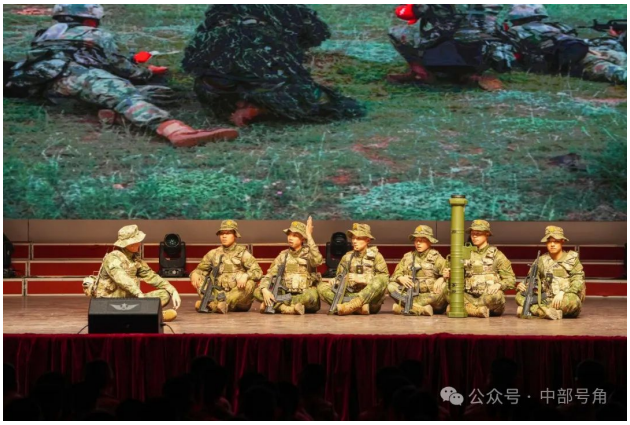
健身秀《阳刚男儿》

将官兵纵横疆场

敢于亮剑的勇气

淋漓尽致地展现出来

音乐剧《我和标兵班长的故事》



快板《神枪五连美名传》

紧贴官兵生活

强化官兵的责任担当

独唱《追溯》

舞蹈《望海峡》

轻快的音乐、优美的舞姿

使官兵身心得到了放松

台下掌声久久不息

证书映光辉、奖杯励前行

获奖官兵登台领奖

将晚会氛围推向高潮

“成绩属于过去、前行仍须努力

把荣誉化作动力

不辜负组织的信任和期盼

努力带出过硬连队”

“忠诚尖兵”张贺激动地说道

先进事迹催人奋进

强军脚步更加坚定

官兵纷纷表示

要以标兵为榜样

阔步强军新征程

勇当“忠诚尖兵”

Recently

A brigade of the 82nd Army Group of the Central Theater Command held the annual "Loyalty Vanguard" awards ceremony

Invited representatives of the family members of the award-winning officers and soldiers to the podium

Shared the moment of glory

The evening party kicked off with the opening dance

"War Drums Urge the March"

Annual comprehensive construction report film

"Sharpening Loyalty and Sharpening Vanguard"

The atmosphere on the scene was completely ignited

Frame by frame obeying orders

Pictures of striving for progress

Scenes of swords on the battlefield

Moving scenes of daring to break through

Aroused strong resonance among officers and soldiers

Song and dance

"Five kilometers" and "Battle Declaration"

"Do Comrades Remember?"

Original programs derived from the daily training of officers and soldiers

Show the construction and development style of the brigade

Officers and soldiers' training and preparation style

Bringing the audience into the hot training ground

Martial arts "Wudong Youth"

Fitness show "Masculine Man"

The courage of officers and soldiers to brave the battlefield

is vividly displayed

Musical "My Story with the Model Squad Leader"

Quick Talk "The Fame of the Fifth Company of the Divine Gun"

Close to the lives of officers and soldiers

Strengthen the responsibility of officers and soldiers

Solo "Tracing Back"

Dance "Looking at the Strait"

Brisk music and graceful dance

Relaxed the officers and soldiers physically and mentally

The applause from the audience lasted for a long time

Certificates reflect glory, trophies encourage progress

Award-winning officers and soldiers took the stage to receive awards

Pushed the atmosphere of the party to a climax

"Achievements belong to the past Go, still need to work hard to move forward

Turn honor into motivation

Live up to the trust and expectations of the organization

Strive to lead a strong company"

"Loyal pioneer" Zhang He said excitedly

Advanced deeds inspire people to move forward

Strengthen the pace of strengthening the army

Officers and soldiers said

Take the model as an example

Stride forward on the new journey of strengthening the army

Be a "loyal pioneer"

新疆和田军分区加强基层通信网络建设“信息高速”通到哨所

来源：解放军报 作者：赵金石 孙兴维 责任编辑：李庆桐 2025-01-07 09:35:16

解放军报讯 赵金石、记者孙兴维报道：冬日的一个周末，新疆和田军分区神仙湾边防连宿舍里，一级上士郭翔翔与远在家乡的女儿视频通话，脸上洋溢着笑容。据了解，该军分区协调军地相关部门加强基层通信网络建设，极大方便了官兵工作生活。

“如今，我部所属边防连队基本实现无线网络信号覆盖。”该军分区领导介绍，单位所属边防连队和哨所大多驻守在高寒地区，自然环境恶劣，社会依托条件差，通信网络建设始终未得到有效解决。近年来，他们积极协调军地相关部门，严格按照互联网进军营和部队保密相关规定要求，加强边防连队通信网络建设，取得良好效果。如今，随着 5G 网络覆盖边防哨所，官兵参加线上学习、进行远程就诊、与家人联系等再也不是难事。

二级上士祁龙对视频剪辑有着浓厚兴趣，课余时间他网购了相关书籍认真学习，成为连队的视频制作能手；二级上士王东借助网络视频学习特色菜肴烹饪技术，每次会餐都为战友奉上丰盛的菜肴；上等兵关彦旭报名学习网络课程《无土栽培技术》后，已开始尝试进行高原蔬菜种植……“信息高速”通到雪域哨所，为官兵提供了极大便利。“目前，仅我们连就有一半以上官兵通过线上渠道学习新技能。”神仙湾边防连二级上士李齐对记者说。

同时，该军分区借助建设完善的通信网络开展线上教育，实现优质资源共享。前不久，他们邀请老战士姚彦芳为大家上教育课。其间，军分区多个点位官兵借助网络视频同步聆听、交流互动，取得良好效果。

据介绍，该军分区在引导官兵用好网的同时，定期组织官兵开展“安全用网、文明用网”专题教育，将网络安全教育融入日常点滴；采取安全防范和技术手段加强网络管理、规范官兵上网行为，确保官兵安全高效享受网络带来的便利。

Xinjiang Hotan Military Sub-district strengthens grassroots communication network construction, "information highway" reaches outposts

Source: PLA Daily Author: Zhao Jinshi Sun Xingwei Editor: Li Qingtong 2025-01-07 09:35:16

PLA Daily News Zhao Jinshi, reporter Sun Xingwei reported: On a winter weekend, in the dormitory of Shenxianwan Border Defense Company of Xinjiang Hotan Military Sub-district, First Sergeant Guo Xiangxiang had a video call with his daughter far away in his hometown, with a smile on his face. It is understood that the military sub-district coordinated with relevant military and local departments to strengthen the construction of grassroots communication networks, which greatly facilitated the work and life of officers and soldiers.

"Nowadays, the border defense companies under our department have basically achieved wireless network signal coverage." The leaders of the military sub-district introduced that most of the border defense companies and outposts under the unit are stationed in high-altitude and cold areas, with harsh natural environments and poor social support conditions, and the construction of

communication networks has never been effectively solved. In recent years, they have actively coordinated with relevant military and local departments, strictly followed the relevant regulations on the Internet entering the barracks and the confidentiality of the troops, and strengthened the construction of communication networks for border defense companies, achieving good results. Nowadays, with the 5G network covering the border outposts, it is no longer difficult for officers and soldiers to participate in online learning, remote medical treatment, and contact with their families.

Second Sergeant Qi Long has a strong interest in video editing. In his spare time, he bought relevant books online and studied them seriously, becoming a video production expert in the company; Second Sergeant Wang Dong used online videos to learn the cooking techniques of special dishes, and served rich dishes to his comrades at every dinner; Private Guan Yanxu signed up for the online course "Soilless Cultivation Technology" and began to try to grow plateau vegetables... "Information Highway" leads to the snowy outpost, providing great convenience for officers and soldiers. "At present, more than half of the officers and soldiers in our company alone have learned new skills through online channels." Second Sergeant Li Qi of the Shenxianwan Border Defense Company told reporters.

At the same time, the military sub-district has carried out online education with the help of a well-built communication network to achieve high-quality resource sharing. Not long ago, they invited veteran soldier Yao Yanfang to give everyone an education class. During this period, officers and soldiers at multiple points in the military sub-district listened, communicated and interacted synchronously with the help of online videos, achieving good results.

It is reported that while guiding officers and soldiers to make good use of the Internet, the military sub-district regularly organizes officers and soldiers to carry out special education on "safe and civilized use of the Internet", integrating network security education into daily life; it adopts security precautions and technical means to strengthen network management and standardize officers and soldiers' online behavior, ensuring that officers and soldiers can safely and efficiently enjoy the convenience brought by the Internet.

西藏日喀则军分区拓展服务保障内容“暖心套餐”送到一线

来源：解放军报 作者：邬军 郭丰宽 责任编辑：李庆桐 2025-01-07 09:35:16

西藏日喀则军分区拓展服务保障内容

“暖心套餐”送到一线

解放军报讯 邬军、记者郭丰宽报道：“太阳能手电筒、发热鞋垫、防寒艾灸贴……这些都是我们执勤时可随身携带的物资用品。”冬日高原，寒风凛冽，位于海拔 4600 多米的詹娘舍哨所内却暖意融融。当天，由西藏日喀则军分区机关抽组的服务小分队顶风冒雪，为官

兵送来药品食品、蓄电设备和生活用品等。据了解，该军分区紧贴高原官兵训练生活实际，在前期发放冬储物资的基础上主动靠前服务，扎实将为兵服务举措落实落细落位，受到官兵欢迎。

“军分区防区点多线长面广，有的点位大雪封山期较长。我们在帮助基层做好物资冬储冬囤冬备的基础上，精准对接官兵需求拓展服务保障内容，尽最大努力保障官兵温暖过冬。”该军分区领导介绍，工作中，他们指定相关部门抽组人员成立服务小分队，深入基层单位、偏远点位听取官兵意见建议，尤其是了解大家训练生活中尚未完全解决的现实难题，并据此针对性推出“暖心套餐”，最大限度做到按需保障。

位于海拔 5500 多米的巴弄卓康哨所，受降雪天气影响手机信号很差。该军分区机关专门为这个哨所配送了信号增强器等专业设备，并对接协调驻地电信公司指定专人开展定期检修；詹娘舍哨所海拔高、风雪大，大雪封山期较长，每到冬季官兵训练生活会因电力供应不稳定受到影响。为此，该军分区专门为他们购置了一台发电机，以备不时之需……件件暖心事，激励官兵心。大家表示，将铆定战位履行使命职责，用实际行动守好祖国边防。

“我们还将通过热线电话、强军网、远程视频系统等，跟进了解基层官兵需求，定期围绕取暖、制氧、用电等常见问题听取建议，随时就可能出现的具体情况展开应急处置，全力为基层官兵提供服务保障。”该军分区干部左南星说。

Tibet Shigatse Military Sub-district expands service support content "heartwarming package" sent to the front line

Source: PLA Daily Author: Wu Jun Guo Fengkuan Editor: Li Qingtong 2025-01-07 09:35:16

Tibet Shigatse Military Sub-district expands service support content

"Heartwarming package" sent to the front line

PLA Daily News Wu Jun, reporter Guo Fengkuan reported: "Solar flashlights, heating insoles, cold-proof moxibustion patches... These are all supplies we can carry with us when on duty." In the winter plateau, the wind is cold, but the Zhanniangshe outpost at an altitude of more than 4,600 meters is warm. On that day, the service team drawn by the Tibet Shigatse Military Sub-district Office braved the wind and snow to deliver medicines, food, power storage equipment and daily necessities to the officers and soldiers. It is understood that the military sub-district closely follows the actual training and life of officers and soldiers on the plateau. On the basis of the early distribution of winter storage materials, it actively provides services and solidly implements the service measures for soldiers in detail, which is welcomed by officers and soldiers.

"The military sub-district has many points, long lines and wide areas, and some points are closed for a long time due to heavy snow. On the basis of helping the grassroots to store materials for

winter, we accurately match the needs of officers and soldiers to expand service support content, and do our best to ensure that officers and soldiers spend a warm winter." The leaders of the military sub-district introduced that during work, they designated relevant departments to draw personnel to form a service team, go deep into grassroots units and remote points to listen to the opinions and suggestions of officers and soldiers, especially to understand the practical problems that have not been completely solved in everyone's training and life, and launch "heartwarming packages" based on this, to maximize on-demand support.

Located at an altitude of more than 5,500 meters, the Banong Zhuokang outpost has poor mobile phone signals due to snowy weather. The military sub-district agency specially distributed professional equipment such as signal boosters to this outpost, and coordinated with the local telecommunications company to designate special personnel to carry out regular maintenance; the Zhan Niangshe outpost is at a high altitude, with strong winds and snow, and the mountain is closed for a long time due to heavy snow. Every winter, the training and life of officers and soldiers will be affected by unstable power supply. For this reason, the military sub-district specially purchased a generator for them to prepare for emergencies... Every heartwarming thing inspires the hearts of officers and soldiers. Everyone said that they would stay in their positions to fulfill their mission and responsibilities, and guard the border of the motherland with practical actions.

"We will also follow up and understand the needs of grassroots officers and soldiers through hotlines, the Strong Army Network, remote video systems, etc., regularly listen to suggestions on common problems such as heating, oxygen production, and electricity use, and carry out emergency response to specific situations that may arise at any time, and do our best to provide service guarantees for grassroots officers and soldiers." Zuo Nanxing, a cadre of the military sub-district, said.

陆军某旅“钢甲列车连”开展“以连为家二三事”活动

来源：中国军网-解放军报 作者：李 健 廖晓彬 责任编辑：赵镭饷 发布：2025-01-08 07:15:24

东部战区陆军某旅“钢甲列车连”开展“以连为家二三事”活动——

调动积极性 增强凝聚力

■李 健 解放军报特约记者 廖晓彬

钟富广绘

“三班战士李衍庆，利用休息时间维修双杠，排除了训练安全隐患”“二班班长白剑锋，周末带领全班整修宿舍楼前训练场”……连务会上，讨论完下一周工作训练安排，东部战区陆军某旅“钢甲列车连”的干部骨干开始汇报本周战士的良好表现。连主官王鹏边听边记，并不时插话点评。

从 3 年前开始，该连连务会增加了一个固定环节，由干部骨干汇报本周各班排的“好人好事”。“我们连人数较多，每次都能记满几页纸。”王鹏介绍，这是他们开展“以连为家二三事”活动的一部分，目的是鼓励官兵从力所能及的点滴小事做起，参与连队建设，加强情感投入，牢固树立“以连为家”意识。

开展这项活动的初衷，还得从王鹏刚到连队任职时说起。一天，他发现连队食堂一个水龙头坏了，水细细流着，路过的战士见状没有一个上前处理，最后还是他找来工具修好了。事后，王鹏找到那几名战士，询问“视而不见”的原因。

“那不是我们班的卫生区”“这是连队水电工的事，不归我管”……战士们“事不关己”的态度让王鹏陷入沉思。不仅如此，他还发现，“长明灯”“乱丢垃圾”等问题并不鲜见；平时出公差，个别官兵常有抱怨；就连参加比武竞赛，训练尖子也会互相推托……

“这些事看似微不足道，却暴露出部分官兵主人翁意识不强，没有把连队当成家来建设。”找到了症结，王鹏竟一时没有好办法。因为他反复强调，大家却没什么触动，问题依旧存在。

一筹莫展之际，王鹏注意到，一名即将退伍的老兵有时在宿舍楼后的树下独坐很久。不解其意，王鹏赶忙靠上去关心。

“这棵树是我当新兵时栽下的，这些石凳石椅是我当班长时，带着全班战士搬过来的……”老兵深情回忆当年的事，那如数家珍的神情，让正在发愁的王鹏找到了解决问题的突破口。

“老兵之所以对连队充满不舍，是因为他为连队建设发展付出了心血和努力。一个好的集体需要大家共同建设和维护，官兵参与感增强了，对连队才会更有感情，连队才会更有凝聚力……”一次党支部开会时，王鹏的发言得到委员们认同。经过讨论，他们决定开展“以连为家二三事”活动。

起初，战士们参与热情并不高，有的认为自身能力有限，执行大项任务的机会轮不到自己，同时对一些日常小事又不屑一顾。为了改变这种状况，王鹏和干部骨干商量，决定每周连务会增加一项内容，由各位排长、班长汇报当周所属人员做的好事，再由连主官利用集合、点名等时机当众表扬。

一开始，哪怕只是随手拾起垃圾这样的小事，王鹏也会予以肯定，并将其与推动连队建设联系起来。官兵们从一些看似不起眼的小事中感受到了价值感、认同感，慢慢地，为连队做好事的行动自觉开始形成，“以连为家”意识也在大家的头脑中强固起来。

有一件事，令王鹏印象深刻。一次，旅里组织乘员驾驶专业比武，连队资深驾驶员、中士黄林桂考虑到年轻战友经验不足，主动放弃休假，申请担任集训教练员。得知黄林桂的决定，有战友劝他不必如此。黄林桂却很坚持：“假可以改日再休，但连队现在有需要，我不能在这个时候离开！”

“为连队建设作贡献，不一定要做轰轰烈烈的大事，只要把连队和战友放在心上，并付诸行动，哪怕只是拧紧了一颗螺丝钉，也很有意义。”王鹏说，“以连为家二三事”活动不仅推动了连队建设，还密切了内部关系，让年轻战士对连队更有认同感、归属感。

义务兵张孙文艺，此前因不适应部队生活，产生过提前退役的想法，一度让王鹏头疼不已。然而前不久，张孙文艺竟主动找到王鹏作检讨，表示想要长期服役。这突如其来的转变让王鹏有些惊讶，张孙文艺解释说：“在连队，大家就像一家人。我遇到困难，立马会有战友围过来提供帮助。我感到很幸福，也很惭愧。现在的我，就想努力为连队做些什么！”

与张孙文艺不同，战士胡南通过“以连为家二三事”活动找到了实现个人价值的方式。胡南训练成绩并不突出，再加上性格内向，一直觉得自己在连队没什么存在感。去年 2 月，听到一些即将退伍的老兵感慨军旅生涯没能留下什么记录后，他萌生想法：根据老兵各自的经历，为每个人画一幅画。

收到胡南的“礼物”后，老兵们爱不释手。胡南说，看到大家开心的样子，他突然觉得自己的双手仿佛在发光。从此，用画笔记录战友军旅难忘场景成了胡南引以为豪的“分内事”。

如今的“钢甲列车连”，“以连为家”4 个字不仅贴墙上、挂在嘴上，更刻进了官兵头脑中。王鹏说，从大家的行动表现中，能感受到他们对连队建设的关心、对身边战友的关爱。这几年，在“以连为家二三事”活动的推动下，该连凝聚力明显提升，全面建设稳步提升，多次被上级评为“四铁”先进连队。

The "Steel Armor Train Company" of a certain army brigade in the Eastern Theater Command carried out the "Two or Three Things to Do with the Company as Home" activity——

Mobilize enthusiasm and enhance cohesion

■ Li Jian People's Liberation Army Daily special correspondent Liao Xiaobin

Zhong Fuguang drew

"Li Yanqing, a soldier in the third squad, used his rest time to repair the parallel bars and eliminated the hidden dangers of training safety" "Bai Jianfeng, the squad leader of the second squad, led the whole class to renovate the training ground in front of the dormitory building on the weekend"... At the company meeting, after discussing the work and training arrangements for the next week, the cadres and backbones of the "Steel Armor Train Company" of a certain army brigade in the Eastern Theater Command began to report the good performance of the soldiers this week. Company commander Wang Peng listened and took notes, and occasionally interrupted and commented.

Three years ago, the company affairs have added a fixed link, in which the cadres and backbones report the "good deeds" of each class and platoon this week. "We have a large number of people in our company, and we can fill several pages every time." Wang Peng introduced that this is part of their "two or three things to do with the company as home" activity, the purpose of which is to encourage officers and soldiers to start from the little things they can do, participate in the construction of the company, strengthen emotional investment, and firmly establish the awareness of "taking the company as home".

The original intention of carrying out this activity has to be said when Wang Peng just took office in the company. One day, he found that a faucet in the company cafeteria was broken, and the water was flowing slowly. No soldier passing by saw this and stepped forward to deal with it. In

the end, he found tools to repair it. Afterwards, Wang Peng found those soldiers and asked why they "turned a blind eye".

"That's not the sanitation area of our class" "This is the company's plumber's business, it's not my business"... The soldiers' attitude of "it's none of my business" made Wang Peng fall into contemplation. Not only that, he also found that problems such as "ever-burning lights" and "littering" were not uncommon; some officers and soldiers often complained when they were on business trips; even when participating in competitions, top trainees would shirk their responsibilities...

"These things seem insignificant, but they reveal that some officers and soldiers do not have a strong sense of ownership and do not regard the company as their home." After finding the crux, Wang Peng had no good solution for a while. Because he repeatedly emphasized it, everyone was not touched, and the problem still existed.

When he was at a loss, Wang Peng noticed that an old soldier who was about to retire sometimes sat alone under the tree behind the dormitory building for a long time. Unable to understand what he meant, Wang Peng hurried over to show concern.

"I planted this tree when I was a new recruit, and these stone benches and chairs were moved here by me when I was a squad leader with the whole class..." The old soldier recalled the past affectionately, and his expression of knowing everything made Wang Peng, who was worried, find a breakthrough to solve the problem.

"The reason why the veteran is reluctant to leave the company is because he has devoted his heart and soul to the development of the company. A good collective needs to be built and maintained by everyone. When the officers and soldiers have a stronger sense of participation, they will have more feelings for the company and the company will be more cohesive..." At a party branch meeting, Wang Peng's speech was recognized by the committee members. After discussion, they decided to carry out the "Two or Three Things to Do with the Company as Home" activity.

At first, the soldiers were not very enthusiastic about participating. Some thought that their abilities were limited and they would not have the opportunity to perform major tasks. At the same time, they were dismissive of some daily trivial matters. In order to change this situation, Wang Peng discussed with the cadres and backbones and decided to add an item to the company affairs every week. The platoon leaders and squad leaders would report the good things done by their subordinates that week, and then the company commander would praise them in public during the gathering and roll call.

At the beginning, even if it was just a small thing like picking up garbage, Wang Peng would affirm it and link it with promoting the construction of the company. The officers and soldiers felt a sense of value and identity from some seemingly insignificant little things. Gradually, the conscious action of doing good things for the company began to take shape, and the awareness of "taking the company as home" was also strengthened in everyone's mind.

There was one thing that impressed Wang Peng. Once, the brigade organized a professional driving competition for crew members. Huang Linggui, a senior driver and sergeant of the company, took into account the lack of experience of young comrades and took the initiative to give up his leave and applied to be a training instructor. After learning of Huang Linggui's decision, some comrades advised him not to do so. Huang Linggui insisted: "I can take a leave another day, but the company needs it now, and I can't leave at this time!"

"To contribute to the construction of the company, you don't have to do a grand event. As long as you keep the company and comrades in mind and take action, even if you just tighten a screw, it is very meaningful." Wang Peng said that the "Two or Three Things to Take the Company as Home" activity not only promoted the construction of the company, but also strengthened internal relations, allowing young soldiers to have a greater sense of identity and belonging to the company.

Zhang Sunwenyi, a conscript, had previously thought of retiring early because he was not used to the military life, which once gave Wang Peng a headache. However, not long ago, Zhang Sunwenyi took the initiative to find Wang Peng to review and expressed his desire to serve for a long time. This sudden change surprised Wang Peng a little. Zhang Sunwenyi explained: "In the company, everyone is like a family. When I encounter difficulties, my comrades will immediately come to help. I feel very happy and ashamed. Now I want to work hard to do something for the company!"

Unlike Zhang Sunwenyi, soldier Hu Nan found a way to realize his personal value through the "Two or Three Things to Do with the Company as Home" activity. Hu Nan's training results are not outstanding, and coupled with his introverted personality, he always feels that he has no sense of existence in the company. In February last year, after hearing some veterans who were about to retire lament that they had not left any records of their military careers, he came up with an idea: to draw a picture for each veteran based on their respective experiences.

After receiving Hu Nan's "gift", the veterans loved it. Hu Nan said that seeing everyone happy, he suddenly felt that his hands seemed to be glowing. From then on, using a brush to record the unforgettable scenes of his comrades in the military became Hu Nan's proud "job".

Today's "Steel Armored Train Company", the four words "Take the company as home" are not only posted on the wall and on the lips, but also engraved in the minds of officers and soldiers. Wang Peng said that from everyone's actions, he could feel their concern for the company's construction and their love for their comrades around them. In recent years, driven by the "Take the company as home" activity, the company's cohesion has been significantly improved, and its overall construction has been steadily improved. It has been rated as an advanced "four iron" company by superiors many times.

编者按 习主席在二〇二五年新年贺词中强调，中国式现代化的新征程上，每一个人都是主角，每一份付出都弥足珍贵，每一束光芒都熠熠生辉。作为国家安全的捍卫者、人民幸福的守护者，广大官兵不负重托、牢记使命，赤诚奉献踩实奋斗足迹，精武强能擦亮忠诚底色，交出了优异的强军答卷。

夏练三伏、冬练三九。2024 年三伏时节，解放军报曾推出“三伏探哨”专栏，讲述新时代官兵的强军故事，触摸昂扬奋进的时代脉搏，感受普通一兵的家国情怀。三九时节，解放军报记者再次探视哨所、走进哨位、访问哨兵，见证他们在严寒天气下的无畏坚守，感受他们在艰苦环境中的忠诚奉献，分享他们在强军征程上的感悟体会。即日起，解放军报推出“三九探哨”专栏，敬请关注。

隆冬北国，清晨的天色仍有些灰暗。南下的西伯利亚冷空气砸在黑龙江的冰面上，激起浓浓雾气。茫茫雪原万籁俱寂，水天交接处，一抹玫红色带着喷涌的力量，在天地间蔓延开来。

当暖橘色的霞光染上鼻尖，二级上士、哨兵姜鑫雨知道，自己即将把朝阳迎进祖国大地。

姜鑫雨所在的北部战区陆军某边防连东极哨所，被誉为“东方第一哨”。哨所位于祖国陆地版图最东端的黑瞎子岛上，是祖国最早迎接太阳的地方。

日出给小岛染上亮色，却未能驱散浓浓的寒意。零下 30 摄氏度的寒气如冰水漫过肌肤沁入骨髓，让人仿佛置身于一个巨大的冷冻室中。道路两旁，冰花悄悄爬满了营区的玻璃展板，光秃秃的枝丫上挂满了雾凇。在寒冷的天气里，连呼吸都要小心翼翼——猛吸的冷气似乎能让肺腑结冰，呼出的哈气在面罩上凝成白霜。

2008 年 10 月 14 日，中俄两国在黑瞎子岛上举行两国国界东段界桩揭幕仪式。从那一天起，东极哨兵们正式登岛接防，担负起卫国戍边的神圣使命。

“当年，官兵们战天斗地、不畏艰辛，在冰天雪地里用手提肩扛的方式搬运建材，一砖一瓦建起一座营盘。”记者跟随指导员李政轩爬上哨楼 171 级台阶，李政轩告诉记者，如今，在上级关怀下，官兵已入住宽敞温暖的新一代营房，配发了先进的防寒装备，管边控边信息化手段升级，“智慧边防”让哨所边境管控质效倍增。

2016 年 5 月 24 日，习主席来到哨所看望官兵，登上哨楼察看执勤设施，询问执勤情况，在观察情况综合登记本上签下自己的名字。听取连队建设和执行任务情况介绍后，习主席叮嘱大家发扬以岛为家、艰苦创业精神，忠诚履行戍边职责。

“牢记统帅嘱托、传承艰苦创业精神，就是要在一个有意义的地方，当一个好兵。”李政轩告诉记者，连队戍守祖国“东大门”，使命光荣、责任重大，这是全连官兵的共识。

戍守“东方第一哨”，怎样当一个好兵？

“迎第一缕朝阳、升第一面国旗、筑第一道屏障、创第一流成绩”，这就是连队官兵的回答。在这座每天为祖国迎进朝阳的哨所，官兵时刻都保持着“勇争第一”的紧迫感。

姜鑫雨曾多次在上级组织的比武竞赛中摘金夺银，获评先进个人，荣立三等功。谈及秘诀，他说：“一个优秀集体可以改变一个人。”

2017 年，姜鑫雨从其他单位转隶至该连。上岛之初，他不适应新环境，一度萌生了提前退伍的念头。然而，第一次站上“东方第一哨”，看着火红的朝阳喷薄而出，面向只有优秀官兵才有资格亲手升起的国旗敬礼，他感到自己全身的血液瞬间被“点燃”。自那以后，姜鑫雨积极向老班长请教，加上勤学苦练，他的军事训练成绩突飞猛进。

在东极哨所，激励官兵前行的，还有连队荣誉和老兵故事。

中士李博展是姜鑫雨带出来的兵，综合素质过硬，至今仍保持着双杠课目旅队纪录。去年，李博展与连长、班长一起参加上级组织的比武。武装越野课目中，李博展因体力不支放慢

了脚步，班长看到后鼓励他：“东极哨所的兵，就得争第一！”一句话，让李博展再次咬紧牙关甩开步子。

那次比武，该连 12 名官兵无一人掉队。参赛官兵奋勇争先，最终夺得第一名的好成绩。连队官兵告诉记者，他们已连续多年在旅队组织的群众性比武竞赛中蝉联第一。

“我们被称为‘东方第一哨’，不仅源自地理位置，更来自官兵过硬的本领和作风。”该连所属某营干部张欣鹏，曾任该连主官。谈及连队官兵见红旗就扛、见第一就争的拼搏精神，张欣鹏深有感触地说：“如果当不了最优秀的一个，那就做最拼的一个。”

北方的冬夜，在这座边陲哨所降临得格外早。下午 4 点，墨色笼罩大地，寒霜爬上台阶，但哨所地下训练室里，却是一派火热景象。二级上士邹英杰告诉记者，受地理环境和气候条件的限制，连队采取室内室外相结合的训练模式，全连官兵不用监督，自觉加练是常态。他说：“每个人都生怕努力的脚步稍慢一点，就落在别人身后了。”

在东极哨所，“勇争第一”的精神已深入每个战位——

从零起步完成指挥室改造到连队“智慧边防”建设取得新成果，一级上士、通信技师刘相生始终觉得自己被“追着跑”。“装备更新换代太快了，能力素质必须跟上。”尽管已是战友眼中的业务“大拿”，但刘相生仍有一种本领恐慌。

近年来，哨所信息化装备不断更新完善：鹰眼全景系统让辖区无死角，多媒体背负式终端将一线画面实时回传，无人机、微波通信车、卫星电话数据直通各级作战室……“无论后勤班还是战斗班，我们争的每一个第一，都是为了让管边控边能力变得更强。”刘相生告诉记者。

在东极哨所，荣誉感责任感已融入官兵血脉——

在连队采访，无论新兵老兵，谈及“荣誉”，关键词都绕不过“东方第一哨”。

从艰难困苦战天斗地到昂首阔步争创一流，一级上士孙洪亮和自己的连队，共同沐浴着朝阳成长。那一年，孙洪亮的父亲来到儿子常夸的“好单位”探亲，却对眼前的场景大失所望。向来话少的父亲，探亲结束后破天荒地给他打了一个多小时的电话，劝他“服役期满就回家”。

如今，几次服役期满都选择留下的孙洪亮，已在边防线上坚守了 14 年。温暖祖国的朝阳，最早从这个一年里有 8 个月在过冬的哨所升起；见证官兵成长的一砖一瓦、一草一木，都倾注着他火热的青春和汗水。在这里，孙洪亮和战友们意气风发、书写连史，用实际行动践行统帅嘱托，用如火热情建设过硬连队。忠诚刻印在心，哪怕狂风肆虐、大雪没膝，哨

所的国旗总能准时升起，官兵巡逻的脚步必到界碑。年复一年，官兵始终叫响“只有争光的义务，没有抹黑的权利”，将连队打造成东部边陲一张闪亮的“名片”。

在东极哨所，过硬的连队有过硬的担当——

深夜，握住冰凉的门把手推开楼门，记者发现 3 个“雪人”迎面走来：虽是晴天，刚站完岗下哨的战士，从帽子到作训大衣，从眉毛到睫毛，全都覆盖着一层白霜。

严寒，在这里司空见惯。官兵在严寒天气里爬冰卧雪、刻苦训练，战风斗雪、执勤巡逻，用过硬的本领、过硬的作风、过硬的担当，捍卫祖国领土安全，以实际行动唱响《我把太阳迎进祖国》。近年来，连队先后被评为“全军先进基层单位”、陆军“四铁”先进单位、北部战区“海空边防工作先进单位”，荣立集体一等功 2 次、二等功 7 次、三等功 9 次。

“一代人有一代人的担当，我们要做的不是‘前人栽树后人乘凉’，而是担起我们这一代人的使命，把连队这棵‘树’浇灌得更加茁壮。”该连干部于成成说。在该连，每名官兵都有一个属于自己的“东极卫士”编号。这份独有的荣誉，激励着一个个“东极卫士”在朝阳下、在战位上，以时不我待的使命感履行职责，以舍我其谁的责任感擦亮荣誉。

当“东极卫士”将第一缕阳光迎进祖国，这阳光便带着边防官兵的光与热，从雄鸡版图的“金喙”徐徐向着心脏地带挪移。等到天安门广场上军乐响起、国旗飘扬，在祖国最东边，官兵们已迎着金色阳光，用脚步丈量着国土，昂首行进在皑皑界江边、强军征程上……

编者按 习主席在二〇二五年新年贺词中强调，中国式现代化的新征程上，每一个人都是主角，每一份付出都弥足珍贵，每一束光芒都值得呵护。作为国家安全的捍卫者、人民幸福的守护者，广大官兵不负重托、牢记使命，本报即日起开设“三九问哨”专栏，邀请部队基层官兵讲述戍边故事，展现新时代官兵的强军誓言。

寒练三伏，冬练三九。2024年三伏时节，本报曾推出“三伏探哨”专栏，讲述新时代官兵的强军故事，触摸场场奋进的时代脉搏，感受普通一兵的家国情怀。三九时节，本报记者再次探视哨所，走进哨位、访问哨兵，笔录他们在严寒天气下的无畏坚守，感受他们在艰苦环境中的忠诚奉献，分享他们在强军征程上的感悟体会。即日起，本报推出“三九探哨”专栏，敬请关注。

东极哨所：我为祖国迎朝阳

——探访北部战区陆军某边防连

■杜建春 本报记者 许 敏

随冬北国，酒意的天色仍有些笑意。南下的西伯利亚冷空气碰在黑龙江的冰面上，激起滚滚雾气。还正值早万籁俱寂，东天又擦处，一抹妖红色带着喷薄的力量，在天地间蔓延开来。

当睡桃色的霞光映上鼻尖，二级上士、哨兵姜鑫闻知道，自己即将把朝阳迎进祖国大地。

姜鑫闻所在的北部战区陆军某边防连东极哨所，被誉为“东方第一哨”，哨所位于祖国陆地版图最东端的黑瞎子岛上，是祖国最早迎接太阳的地方。

日出恰小马驹上视色，却未能驱散凉凉的寒意。零下30摄氏度的寒气如冰冷魔法抓挠此人骨髓，让人协调置身于一个巨大的冷冻室中。温暖阔房、冰花饰物阔满了窗区的玻璃展板，无先光的校了上挂满了军装。在寒冷的天气里，连呼吸都要小心翼翼——猫哦的马气似乎能让眼睛结冰，呼出的哈气在面罩上凝成白霜。

2008年10月16日，中俄两国在黑瞎子岛上举行两国国界东段界桩揭幕仪式。从那一天起，东极哨岛们正式驻岛接防，担负起卫国戍边的神圣使命。

“当年，官兵们拔天斗地，不畏艰辛，在冰天雪地里用手搬砌石的方式搬运建材，一砖一瓦建起一座营盘。”记者跟随参导员李政环爬上哨楼171级台阶，李政环告诉记者，如今，在上级关怀下，官兵已入住宽敞温暖的新一代营房，配发了先进的防寒装备，营边经边信息化手段升级，“智慧边防”让哨所边境管控填地铝增。

2016年4月24日，习主席来到哨所看望官兵，登上哨楼察看执勤设施，询问执勤情况，在观察镜旁给合登记本上签下自己的名字。听取连队建设和执行任务情况介绍后，习主席对驻守这处特殊岗位为军，等百创业精神，忠诚履行戍边职责。

“军记统帅嘱托，师率军百创业精神，就是要在一个有意义的地方，当一个好兵，“京政环告诉记者，连队成守似国“东大门”，使命光荣，责任重大，这是全连官兵的共识。

戍守“东方第一哨”，怎样当一个好兵？

“连第一使朝阳，齐第一面旗帜，筑第一道国防，创第一流戍哨”，这就是连队官兵的创言。在这座每天为祖国迎送朝阳的哨所，官兵时时都保持着“勇争第一”的紧迫感。

姜鑫闻带多次在上级组织的比武竞赛中摘金夺银，获评先进个人，荣立三等功。谈及秘诀，他说：“一个优秀集体可以改变一个人。”

2017年，姜鑫闻从其他单位转来兰连连。上岛之初，他不适应那环境，一度病生了根前退后的念头。然而，第一次站上“东方第一哨”，看着火红的朝阳喷薄而出，面向只有优秀官兵才有资格亲手升起的国旗敬礼，他感到自己全身的血液瞬间被“点燃”。日复以后，姜鑫闻积极向老班长请教，加上勤学苦练，他的军事训练成绩突飞猛进。

在东极哨所，激励官兵前行的，还有连队荣誉和老兵的故事。

中士李博展是姜鑫闻带出来的兵，综合素质过硬，怎今仍保持着军校课目据队纪录。去年，李博展与连长、班长一起参加上级组织的比武，武装越野课目中，李博展团体力不支险些了脚步，班长看到后鼓励他：“东极哨所的兵，就得争第一！”一句话，让李博展再次吃紧牙关甩开步子。

那次比武，该连12名官兵无一人掉队，参赛官兵奋勇争先，最终夺得第一名的好成绩。连队官兵告诉记者，他们已连续多年在部队组织的群众性比武竞赛中蝉联第一。

“我们被称为‘东方第一哨’，不仅是自地理位置，更来自官兵过硬的本领和作风。”该连所属某营干部张晓鹏，曾任该连士官，谈及连队官兵见证旗展红，见第一就争的拼搏精神，张晓鹏深有感触地说：“如果当不了最优秀的一个，那就做最拼的一个。”

北方的冬夜，在这座边陲哨所降临得格外早。下午4点，墨色笼罩大地，寒霜爬上台阶，铝照明地下训练室里，却是一派火热景象。二级上士等来杰告诉记者，受地理环境和气候条件的限制，连队平常室内室外相结合的训练模式，全连官兵不同监督，自觉加练是常态。他说：“每个人都生拍势力的脚步朝着一点，就离东照人身边了。”

在东极哨所，“勇争第一”的精神已深入每个战位——

从军校步完成指挥室改造到连队“智慧边防”建设取得新成果，一级上士、通信技师邓相生始终觉得自己被“追着跑”。“装备更新换代太快了，能力素质必须跟上。”邓哥已是战友眼中的业务“大拿”，但对新生仍有一种本领恐慌。

近年来，哨所信息化装备不断更新完善，南眼全景系统让辖区无死角，多模地带负式终端将一线画面实时回传，无人机、微波通信车、卫星电话数据直通各级作战室——“无论切断都还是战斗疏，我们争的每一个第一，都是为了让指边把边能力变得更强。”对邓生告诉记者。

在东极哨所，责任感使任感已融入官兵血脉——

在连队采访，无论新兵老兵，谈及“荣誉”，关键词都绕不过“东方第一哨”。

从军海图后放天斗地到异百同步争创一流，一级上士孙英亮和自己的连队，共同体验着砸同成长。那一年，孙英亮的父亲来到儿子驻守的“标举位”探亲，却对眼前的场景大失所望。向来话少的父亲，探亲结束后破天荒地给他打了一个多小时的电话，动他“服役期满就回家”。

如今，几次服役期满都选择留下的孙英亮，已在边防线上坚守了14年，踏碎祖国的朝阳，最早从这个一年里有8个月在这个的哨所开始，见证官兵成长的一砖一瓦，一草一木，都倾注着他大热的青春和汗水。在这里，孙英亮和战友们坚气风发，书写着义，用实际行动践行统加幅民，用加火热情建设边疆连队。忠诚部队在心，哪怕狂风肆虐、大雪没膝，哨所的国旗总能准时升起，国旗飘扬，在祖国最东边，官兵们已经看全色阳光，照耀步丈量着国土，昂首行进在祖祖界江边，强军征程上……

坚持系统集成、协同配合

■陆军红

强军论坛 中国新闻名专栏

近不久召开的中央经济工作会议，对做好2025年经济工作提出要求，强调要保持系统集成、协同配合，做到“五个必须统筹”。国军治军是一项复杂的系统工程，哈军队各级领导干部应当坚持系统论同辩证必不可少的思维方式和工作方法。

唯物辩证法认为，万事万物是相互联系、相互依存的，系统观念是马克思主义哲学重要的认识论和方法论，是贯穿习近平新时代中国特色社会主义思想的五项观点方法之一。系统论理，系统工程，系统思维——进入新时代，以习近平同志为核心的党中央坚持系统谋划、统筹推进党和国军各项事业，统揭新的实践需要，形成一系列新布局和新方略，带领全党全国各族人民取得了历史性成就、实现了历证明，只有坚持系统集成、协同配合，贯彻统筹兼顾、体系建设，才不会走顾增就哨害，顾此失彼，各行其是，相互掣肘等问题。

军事实践充满各种复杂矛盾运动，加强系统论、整体协同性是推动军事发展的基本要求。当前，全军正全力以赴打赢建军一百年奋斗目标攻坚战，深化国防和军队建设各个方面、各个领域、各个层级，不但关联因素多，涉及范围广，而且任务性质复杂，能力标准高，只有用系统集成、全局系统、发展变化的观点观察分析问题，才能更好地加强军事实践的基础建设，走好从推动国防和军队建设发展。

抓紧抢修，打通生命救援通道

强震来袭，当地部分水、电、交通、通信等基础设施受损。相关部门立即组织专业力量打通救援生命通道。

交通运输部紧急部署抗震救灾工作。西藏自治区交通运输厅启动二级应急响应，定日县境界今G219线经紧急抢修已恢复平幅通行。国家区域性公路交通应急装备物资经萨储备中心已进入待命状态。

受地震影响，经日铁路停运1月7日日吃哨至拉萨C3806次旅客列车，加开1月7日日吃哨至拉萨C7624次旅客列车。中国铁路青藏集团公司对有震感的7个车站和区间，展开地毯式排查，全面检查铁路线路、桥梁等设备设施，按应急处置要求处置到位。

日喀则交警支队启动全线交通管制，管制区域内的客运车辆根据实际情况调整运营线路或暂停运营。

通信是抗震救灾首不见的“生命通道”，保障畅通十分关键。

日喀则市定日县共有761个基站，截至7日13时，近限96个，近限率12.76%，影响用户680余户。目前，西藏移动他各乡光缆中断，西藏电信他当当今1地本地网重点，西藏联通县闭今，结果今2处本地网断点，暂未出现通信全部乡镇。

工业和信息化部第一时间派出工作组携带卫星通信设备赴西藏指挥协调应急通信保障工作，紧急调拨临近省份应急通信装备支援西藏。信息通信行业出动应急人员156人次，应急车辆87台次，开展通信保障抢修和应急通信保障。当地通信服务基本正常，受灾区域暂未出现乡镇级通信全断。

再赴日喀则！国务院国资委督促指导中央企业迅速查处力，通信等基础保障设施受损情况，指导企业积极参与抗震救灾。中国安能集团调派196人的专业救援力量，携带装备80台（套）参与抗震救援行动，国家煤监局应急救援中国中铁二局西藏队已分4批次投入25名救援人员，30余台（套）专业救援设备……

地震发生后，国网西藏电力有限公司累计派出4支应急队伍共141人，40辆检修车，17辆应急保电装备赴现场，截至17时20分，定日县县城及协格尔镇、岗嘎镇、加措乡、城镇等乡、定玛乡已恢复供电。

截至1月7日下午，航天科技集团资源卫星中心安排卫星成像8次，及时提供灾情核探处总，持续为震后检险救灾、灾害评估等工作提供遥感卫星数据保障和分析服务。

妥善安置，确保群众温暖过冬

时值寒冬，千方百计保障灾区群众基本生活和温暖过冬至关重要。

在定日县，记者在现场看到，震中所在的扬果乡和受灾最严重的长所乡，部分民房已经损毁，大量群众搬离到开阔地带避险。在险查县、扬城部分建筑物出现损坏，一些建筑物墙体脱落，车辆受损，当地在中小学操场等开阔地带安置群众。

在日喀则市，得知当地医院用血需求，西藏军区某团数百名官兵在献血点前排起长队献血。23岁的运输分队驾驶员刘志勇主动献血400毫升，顾不上休息，他和战友们又投入到搬运物资、救助伤员、清理道路的任务中。

国家发展改革委紧急下达5亿元中央预算内投资，重点用于灾区受损道路桥梁、学校医院等基础设施和公共服务设施应急恢复建设，推动尽快恢复正常生产生活秩序。

财政部、应急管理部紧急预拨1亿元中央自然灾害救灾资金，重点做好受救转移安置受灾人员、排危除险等应急处置，次生灾害隐患排查和应急整治、倒损民房恢复等工作。

物资是保障灾区群众生活的关键环节。国家防灾减灾救灾委员会办公室、应急管理部会同国家粮食和物资储备局、紧急向灾区调拨棉帐篷、棉大衣、棉被等2.2万件中央救灾物资，以及高寒高原疾地区特殊救灾物资。

中国红十字会总会已启动应急响应，派驻工作组及救援队员赶赴震区，现场开展灾情需求评估及救援救助工作，紧急调拨棉帐篷、棉被等救灾物资4660件（套），用于支持灾区做好群众转移安置和生活保障工作。

住房城乡建设部已动地震应急二级响应，并派出工作组赴灾区，指导开展震后房屋建筑和市政设施安全应急评估、险险检测，以及活动板房建设等工作。

水利部启动水利抗震救灾响应应急响应，对震区水利工程和可能引发的堰塞湖等次生灾害开展险情成排查和风险研判，落实险险区群众转警和转移措施。西藏自治区水利厅已在日喀则市灵定日县、定结县、萨迦县、仲克县等开展排查监测，实现重大险情。

中国气象局提升地震灾害气象服务三级应急响应为二级，西藏自治区气象局增派现场震中的定日、定结等6县开展专项服务。气象部门根据，灾害三灾震区及周边有6至8级风度的降温过程，要防范大风和降温的不利影响。

夜幕降临，震区依然彻松。据达定日县震区的一支救援官兵已累开快事作业，预计可保障300余名灾区群众晚餐。

寒冬的深夜，高原上的救援仍在持续进行中。

（据华社北京1月7日电 新华社记者）

学会“十个结合种种联系”、坚持和运用系统观点观察形势，分析问题，推动工作，贯彻总书记要求全面、统筹抓好建设和运用建设，统筹军事斗争和军队建设各环节，统筹建设要素全方位各，科学加强战场与军事、战略与战略、官国与国家、各战与上级等重大关系，统筹推进战略建军、依事国军、科技强军、人才强军、依法治军，始终站在维护国家安全的战略高度思考谋划国防和军队建设，加强加军事斗争这个抓总牛战略对键。

着眼全局谋划工作，国防和军队现代化建设是系统性强，必须用全面的观点统建设，坚持全局统筹，着眼实现国防和军队现代化“三步走”战略，加强顶层军事建设，军队编制形态，军事人员，武器装备现代化，加强建设军队现代化与国民经济发展、各个全面安定、国家和军队长期发展问题，着用最新全面的系统工程手段，广泛运用现代一流手此，使作为高效对。

Dongji Post: I Welcome the Sunrise for the Motherland

——Visiting a Border Defense Company of the Northern Theater Army

■Du Yingchun People's Liberation Army Daily reporter Xu Min

Officers and soldiers of a border defense company of the Northern Theater Army held a flag-raising ceremony facing the sunrise. Photographed by Tao Chengfeng

Editor's note In his New Year's message for 2025, President Xi Jinping emphasized that on the new journey of Chinese-style modernization, everyone is the protagonist, every contribution is precious, and every beam of light is shining. As defenders of national security and guardians of people's happiness, the majority of officers and soldiers have lived up to their trust, kept their mission in mind, devoted themselves to the struggle, refined their martial arts and strengthened their abilities to polish their loyalty, and handed in an excellent answer sheet for strengthening the army.

Summer training in the dog days and winter training in the coldest days. During the dog days of summer in 2024, the PLA Daily launched a column called "The Dog Days Exploration" to tell the stories of the new era's officers and soldiers, touch the pulse of the era, and feel the patriotism of ordinary soldiers. During the 39th day of summer, PLA Daily reporters once again visited the sentry posts, walked into the sentry posts, and interviewed the sentries to witness their fearless perseverance in the severe cold weather, feel their loyalty and dedication in the difficult environment, and share their feelings and experiences on the journey of strengthening the army. Starting today, the PLA Daily will launch the "39th Days Exploration" column, please pay attention.

In the dead of winter in the north, the sky is still a little gray in the early morning. The Siberian cold air from the south hits the ice surface of the Heilongjiang River, stirring up thick fog. The vast snowfield is silent, and at the junction of water and sky, a touch of rose red spreads between heaven and earth with gushing power.

When the warm orange glow dyed the tip of his nose, the second-class sergeant and sentry Jiang Xinyu knew that he was about to welcome the sunrise into the land of the motherland.

The Dongji outpost of a border defense company of the Northern Theater Army where Jiang Xinyu is located is known as the "First Outpost in the East". The outpost is located on Heixiazi Island, the easternmost island in the motherland's land territory, and is the first place in the motherland to welcome the sun.

The sunrise dyed the island bright, but failed to dispel the deep chill. The cold air of minus 30 degrees Celsius was like ice water flowing over the skin and penetrating into the bone marrow, making people feel as if they were in a huge freezer. On both sides of the road, ice flowers quietly climbed all over the glass display boards of the camp, and the bare branches were covered with rime. In cold weather, even breathing has to be cautious - the cold air you inhale seems to freeze your lungs, and the exhaled breath condenses into white frost on the mask.

On October 14, 2008, China and Russia held a ceremony to unveil the boundary stakes of the eastern section of the border between the two countries on Heixiazi Island. From that day on, the Dongji sentinels officially landed on the island to take over the defense and shoulder the sacred mission of defending the country and guarding the border.

"Back then, the officers and soldiers fought against the sky and the earth, and were not afraid of hardships. They carried building materials by hand and on their shoulders in the ice and snow, and built a camp brick by brick." The reporter followed the instructor Li Zhengxuan to climb the 171 steps of the sentry tower. Li Zhengxuan told reporters that now, under the care of the superiors, the officers and soldiers have moved into the spacious and warm new generation barracks, equipped with advanced cold-proof equipment, and upgraded the information technology of border control. The "smart border defense" has doubled the quality and efficiency of the border control of the sentry post.

On May 24, 2016, President Xi came to the sentry post to visit the officers and soldiers, climbed the sentry tower to inspect the duty facilities, inquired about the duty situation, and signed his name in the comprehensive registration book of the observation situation. After listening to the introduction of the company's construction and execution of tasks, President Xi urged everyone to carry forward the spirit of taking the island as home and hard work, and faithfully perform the border defense duties.

"To bear in mind the commander's instructions and inherit the spirit of hard work and entrepreneurship is to be a good soldier in a meaningful place." Li Zhengxuan told reporters that the company guards the "Eastern Gate" of the motherland, with a glorious mission and heavy responsibilities, which is the consensus of all officers and soldiers in the company.

Guarding the "First Post in the East", how to be a good soldier?

"Welcome the first ray of sunrise, raise the first national flag, build the first barrier, and create first-class results", this is the answer of the company's officers and soldiers. In this post that welcomes the sunrise for the motherland every day, the officers and soldiers always maintain a sense of urgency to "fight for the first place".

Jiang Xinyu has won gold and silver medals in competitions organized by superiors many times, was rated as an advanced individual, and won the third-class merit. Talking about the secret, he said: "An excellent collective can change a person."

In 2017, Jiang Xinyu transferred from other units to the company. At the beginning of the island, he was not adapted to the new environment and once had the idea of retiring early. However, when he stood on the "First Post of the East" for the first time, watching the flaming morning sun burst out and saluting the national flag that only outstanding officers and soldiers were qualified to raise by themselves, he felt that his blood was instantly "ignited". Since then, Jiang Xinyu has actively consulted the old squad leader, and with hard work and practice, his military training results have improved by leaps and bounds.

At the Dongji Post, the officers and soldiers are motivated to move forward by the company's honor and the stories of veterans.

Sergeant Li Bozhan is a soldier trained by Jiang Xinyu. He has excellent comprehensive qualities and still holds the brigade record for the parallel bars course. Last year, Li Bozhan participated in the competition organized by the superiors with the company commander and squad leader. In the armed cross-country course, Li Bozhan slowed down due to physical exhaustion. The squad leader saw it and encouraged him: "Soldiers at the Dongji Post must strive for the first place!" This sentence made Li Bozhan grit his teeth and shake off his pace again.

In that competition, none of the 12 officers and soldiers of the company fell behind. The participating officers and soldiers fought bravely and finally won the first place. The company's officers and soldiers told reporters that they have won the first place in the mass competitions organized by the brigade for many consecutive years.

"We are called the 'First Post in the East', not only because of the geographical location, but also because of the excellent skills and style of the officers and soldiers." Zhang Xinpeng, a cadre of a battalion under the company, was once the chief of the company. Talking about the fighting spirit of the company's officers and soldiers who took up the red flag and fought for the first place, Zhang Xinpeng said with deep feeling: "If you can't be the best, then be the hardest one."

The winter night in the north came especially early in this border post. At 4 o'clock in the afternoon, the earth was covered with ink and frost climbed up the steps, but the underground training room of the post was a scene of enthusiasm. Second Sergeant Zou Yingjie told reporters that due to the limitations of the geographical environment and climatic conditions, the company adopted a training mode that combines indoors and outdoors. All officers and soldiers in the company do not need supervision, and it is normal for them to practice more consciously. He said: "Everyone is afraid that if they work a little slower, they will fall behind others."

At the Dongji outpost, the spirit of "bravely striving for the first place" has penetrated into every combat position-

From starting from scratch to completing the transformation of the command room to achieving new results in the company's "smart border defense" construction, Sergeant First Class and communications technician Liu Xiangsheng always feels that he is "chased". "The equipment is

updated too fast, and the ability and quality must keep up." Although he is already a "master" in the eyes of his comrades, Liu Xiangsheng still has a fear of incompetence.

In recent years, the outpost's information equipment has been continuously updated and improved: the Eagle Eye panoramic system allows the jurisdiction to have no dead ends, the multimedia backpack terminal transmits the front-line images back in real time, and the drones, microwave communication vehicles, and satellite phone data are directly connected to the operations rooms at all levels... "Whether it is the logistics squad or the combat squad, every first place we strive for is to make the ability to manage and control the border stronger." Liu Xiangsheng told reporters.

At the Dongji outpost, the sense of honor and responsibility has been integrated into the blood of officers and soldiers-

In the company interview, whether it is a new recruit or a veteran, when talking about "honor", the key word cannot be avoided by "the first outpost in the East".

From fighting against hardships to striving for excellence, Sergeant First Class Sun Hongliang and his company have grown up together in the sunshine. That year, Sun Hongliang's father came to visit his son's "good unit" which he often praised, but was disappointed with the scene in front of him. After the visit, his father, who was always quiet, called him for more than an hour for the first time and advised him to "go home after the service period is over."

Now, Sun Hongliang, who chose to stay after several service periods, has been on the border for 14 years. The morning sun that warms the motherland first rises from this outpost that spends 8 months of the year in winter; every brick and tile, every blade of grass and every tree that witnesses the growth of officers and soldiers are filled with his fiery youth and sweat. Here, Sun Hongliang and his comrades are full of vigor and write the company history, implement the commander's instructions with practical actions, and build a strong company with fiery enthusiasm. Loyalty is engraved in the heart. Even if the wind is raging and the snow is knee-deep, the national flag of the post can always be raised on time, and the patrolling footsteps of the officers and soldiers must reach the boundary marker. Year after year, the officers and soldiers have always shouted "only the obligation to win glory, not the right to smear", making the company a shining "business card" on the eastern border.

At the Dongji Post, the excellent company has an excellent responsibility-

Late at night, holding the cold door handle and pushing open the door, the reporter found three "snowmen" coming towards him: Although it was a sunny day, the soldiers who had just finished their post were covered with a layer of white frost from their hats to their training coats, from their eyebrows to their eyelashes.

Severe cold is commonplace here. In severe cold weather, the officers and soldiers climbed ice and snow, trained hard, fought against the wind and snow, and patrolled on duty. They defended the territorial security of the motherland with excellent skills, excellent style, and excellent

responsibility, and sang "I Welcome the Sun into the Motherland" with practical actions. In recent years, the company has been rated as "the advanced grassroots unit of the whole army", the advanced unit of "Four Irons" of the Army, and the "advanced unit of sea, air and border defense work" of the Northern Theater Command, and has won the first-class collective merit twice, the second-class merit seven times, and the third-class merit nine times.

"Each generation has its own responsibilities. What we need to do is not to 'plant trees for the future generations to enjoy the shade', but to take on the mission of our generation and water the 'tree' of the company to make it stronger." Yu Chengcheng, a cadre of the company, said. In the company, every officer and soldier has his own "Dongji Guard" number. This unique honor inspires each "Dongji Guard" to perform their duties under the rising sun and at their positions with a sense of mission that time is running out, and to polish their honor with a sense of responsibility that no one else can do.

When the "Dongji Guard" welcomes the first ray of sunshine into the motherland, the sunshine will slowly move from the "golden beak" of the rooster's territory to the heartland with the light and heat of the border guards. When the military music sounded and the national flag fluttered in Tiananmen Square, at the easternmost part of the motherland, the officers and soldiers had already greeted the golden sunshine, measured the land with their footsteps, and marched with their heads held high on the snowy river bank, on the journey to strengthen the army...

新疆军区某团提升新射手遂行任务能力

实弹射击砺炼“嫩肩膀”

解放军报讯　李博、牛昱森报道：元旦刚过，新疆军区某团训练场，官兵快速登车，向目标地域进发，一场实弹射击训练就此拉开帷幕。与以往不同的是，此次参训的射手大多是下连不久的新兵。据了解，新年度各项工作展开后，该团着眼夯实训练基础狠抓新射手能力提升，通过科学编组、以老带新助力新同志快速成长。

“新射手打实弹，‘嫩肩膀’得砺炼，这一做法与之前的一次调研分不开。”该团领导说，去年底，他们结合年度训练情况调研发现，有的新射手受训练场景单一、组训思路固化等因素影响，能力素质提升较慢，在复杂环境条件下遂行任务时打击效果不太理想。为此，他

们结合营连实际情况，在完善现有训练设施的同时，引进新设备建成模拟训练室，根据训练需求、任务性质等针对性构建相关模块，模拟构设特殊天候、复杂环境及常见特情，帮助新射手快速成长。

同时，该团还结合新射手训练进程、能力生成规律等，定期组织实操演示，围绕操作规范、流程细节等纠正痼癖动作、传授操作技巧，进一步优化改进组训施训方案；每次开展实弹射击前，组织训练骨干借助模拟训练系统汇总数据、分析研讨，针对每名新射手的不同情况提出针对性改进建议。

训练现场，新射手曹翔量因过于紧张，首发射击效果不佳。为此，班长张震一边帮他疏导不良情绪、缓解紧张心理，一边耐心为他讲解操作要领与技巧。“完善射表信息，准备打击！”再次收到指令，曹翔量校准射击诸元，锁定目标后果断按下发射按钮。只见导弹呼啸而出，精准命中目标。

“此次训练前，我们专门结合去年训练考核复盘情况，区分新射手素质基础和具体课目内容组织了强化训练，引导大家就可能遇到的情况预想处置办法。”该团干部鲁琪说，下一步，他们将在复盘总结的基础上，针对存在的不足组织新射手集训补差强能；着眼提升复杂环境条件下遂行任务能力，开展夜间实弹射击、火力突袭等课目训练，循序渐进提升作战本领。

A regiment of the Xinjiang Military Region improves the ability of new shooters to perform tasks

Live-fire shooting tempers "young shoulders"

People's Liberation Army Daily News Li Bo and Niu Yusen reported: Just after New Year's Day, at the training ground of a regiment of the Xinjiang Military Region, officers and soldiers quickly boarded the car and headed towards the target area, and a live-fire shooting training kicked off. Unlike in the past, most of the shooters participating in this training are new recruits who have just joined the company. It is understood that after the various tasks of the new year were launched, the regiment focused on consolidating the training foundation and focusing on improving the ability of new shooters, and helped new comrades grow rapidly through scientific grouping and old-to-new training.

"New shooters have to hone their 'tender shoulders' when firing live ammunition, and this practice is inseparable from a previous survey." The leader of the regiment said that at the end of last year, they combined the annual training situation survey and found that some new shooters were affected by factors such as the single training scene and the rigid training ideas, and their ability and quality improved slowly, and the strike effect was not ideal when performing tasks under complex environmental conditions. To this end, they combined the actual situation of the battalion and company, while improving the existing training facilities, introduced new equipment to build a simulation training room, and built relevant modules in a targeted manner according to training needs, task nature, etc., simulated special weather, complex environment and common special situations, and helped new shooters grow quickly.

At the same time, the regiment also combined the training process of new shooters, the law of ability generation, etc., regularly organized practical demonstrations, corrected bad habits around operation specifications, process details, etc., taught operation skills, and further optimized and improved the training plan; before each live-fire shooting, the training backbones were organized to summarize data, analyze and discuss with the help of the simulation training system, and put forward targeted improvement suggestions for the different situations of each new shooter.

At the training site, the new shooter Cao Xiangliang was too nervous and the first shooting effect was not good. To this end, squad leader Zhang Zhen helped him to relieve his negative emotions and relieve his nervousness, while patiently explaining the essentials and techniques of operation to him. "Complete the shooting table information and prepare to strike!" After receiving the order again, Cao Xiang calibrated the shooting parameters and decisively pressed the launch button after locking the target. The missile whizzed out and hit the target accurately.

"Before this training, we specially combined the review of last year's training assessment, distinguished the quality foundation of new shooters and the specific content of the subjects, and organized intensive training to guide everyone to anticipate and deal with the situations they may encounter." Lu Qi, a cadre of the regiment, said that in the next step, they will organize intensive training for new shooters to make up for the shortcomings and strengthen their abilities based on the review and summary; focus on improving the ability to perform tasks under complex environmental conditions, carry out night live-fire shooting, fire raids and other subjects training, and gradually improve combat skills.

战斗车组依令扑向"敌"阵地……一场实战化对抗训练紧张进行

来源：中国军网-解放军报 作者：喻润东 胡立轩 责任编辑：刘上靖

2025-01-12 07:41:35 0

陆军某旅组织实战化对抗训练

新年硬碰硬 较量实打实

解放军报讯 喻润东、记者胡立轩报道：寒冬时节，陆军某旅某营刚进驻预定阵地，警报骤然响起。各作战单元迅速进入战斗状态，指挥模块依托一体化信息系统展开战场布势，战斗车组依令扑向“敌”阵地……一场实战化对抗训练紧张进行。

“只有平时千锤百炼，战时才能克敌制胜。”该旅领导表示，新年伊始，他们在实战化训练中设置险难特情，引导官兵强化实战意识，练强战斗本领。

记者在现场看到，数公里纵深内，遭遇“敌”反坦克火力点阻击、小股“敌”侧翼袭扰等特情接踵而至。某营战斗车组刚成功用火力压制正面之“敌”，“敌”装甲车就从防御阵地侧方赶来增援。当指挥员准备呼叫火力支援时，后方火力分队突遭“敌”炮火袭击，无法提供火力支援。

“战场上，战斗进程不会按我们的设想展开，指挥员要面临各种复杂情况考验。”该旅领导告诉记者，设置无法提供火力支援特情，目的是在难局危局中锤炼指挥员战场应变能力和车组自主决策能力。

“战场态势瞬息万变，如果此时撤退，很可能导致全局被动。”指挥员当即决定充分发挥车组火力优势，调动战车包围“敌”增援力量。接到指令，各车组精准实施火力打击，成功歼灭“敌”装甲车。

“新年度第一场军事训练，就是硬碰硬、实打实的较量！”走下训练场，该营指挥员感慨，只有瞄准实战，才能真正淬炼过硬战斗本领。下一步，他们将组织复盘总结，针对训练中的不足展开专攻精练。

The combat vehicle crew rushed to the "enemy" position according to the order... A practical confrontation training was carried out intensively

Source: China Military Network-People's Liberation Army Daily Author: Yu Rundong Hu Lixuan Editor: Liu Shangjing

2025-01-12 07:41:35 0

A certain army brigade organized a practical confrontation training

New Year's hard-hitting competition is real

People's Liberation Army Daily News Yu Rundong and reporter Hu Lixuan reported: In the cold winter, a certain battalion of a certain army brigade had just entered the designated position when the alarm suddenly sounded. Each combat unit quickly entered the combat state, the command module relied on the integrated information system to deploy the battlefield, and the combat

vehicle crew rushed to the "enemy" position according to the order... A practical confrontation training was carried out intensively.

"Only by tempering in peacetime can we defeat the enemy in wartime." The brigade leaders said that at the beginning of the new year, they set up dangerous and difficult special situations in practical training to guide officers and soldiers to strengthen their awareness of actual combat and strengthen their combat skills.

The reporter saw at the scene that within a few kilometers of depth, special situations such as "enemy" anti-tank firepower point blocking and small-scale "enemy" flank harassment followed one after another. Just as a battalion's combat vehicle crew successfully suppressed the "enemy" in front with firepower, "enemy" armored vehicles rushed to reinforce from the side of the defensive position. When the commander was about to call for firepower support, the rear firepower unit was suddenly attacked by "enemy" artillery fire and could not provide firepower support.

"On the battlefield, the battle process will not unfold as we imagined, and commanders will face various complex situations." The brigade leader told reporters that the purpose of setting up special situations where firepower support cannot be provided is to temper the commander's battlefield response ability and the crew's independent decision-making ability in difficult and dangerous situations.

"The battlefield situation changes rapidly. If you retreat at this time, it is likely to lead to a passive overall situation." The commander immediately decided to give full play to the firepower advantage of the crew and mobilize the tanks to surround the "enemy" reinforcements. After receiving the order, each crew carried out precise firepower strikes and successfully annihilated the "enemy" armored vehicles.

"The first military training of the new year is a hard-hitting, real-life contest!" After leaving the training ground, the battalion commander said with emotion that only by focusing on actual combat can we truly hone our combat skills. In the next step, they will organize a review and summary, and focus on the deficiencies in the training.

第七十七集团军某旅扎实开展互为对手训练

来源：解放军报 作者：杞卫东 责任编辑：刘上靖 2025-01-12 08:48:30

第七十七集团军某旅扎实开展互为对手训练——

真打实抗锻造“防空坚盾”

隆冬时节，第 77 集团军某旅一场全时域、全要素对抗训练，在大漠戈壁火热展开。

“‘敌’机释放电磁干扰。”雷达方舱车内，显示屏上一片“雪花”，雷达操作手立即采取抗干扰措施。然而，还没来得及捕获，目标便迅速“消失”。

“‘蓝军’电磁干扰手段多、范围广、强度大，我们必须进一步提升抗干扰能力。”一轮对抗结束，该旅某连雷达号手臧庆达总结道。

第二轮对抗展开，“蓝军”战机发挥装备性能优势，灵活规避地面雷达搜捕，向目标地域快速逼近。

另一边，雷达操作手王能刚发现目标，雷达再次遭到强电磁干扰。王能全神贯注紧盯屏幕，一边快速展开抗干扰操作，一边请求支援。接到求援信息后，该旅电子防空力量迅速采取反制措施，与其他作战分队联手协作搜捕目标。

无形战场你来我往，对抗过招异常激烈。很快，地面雷达成功捕获目标。随着一声令下，操作手果断按下发射按钮，导弹成功命中目标。

“要想练就过硬本领，必须多与强敌对手过招。”该旅领导介绍，此次训练，他们加大干扰强度、提升训练难度，在真打实抗中验证组训思路、改进演训方案，有效提升防空分队复杂电磁环境下的整体作战能力。

为更好发挥对抗训练的“磨刀石”作用，他们抽组骨干成立战法训法研究小组，与厂家技术人员共同研讨挖掘雷达装备潜能的方法路子；常态组织官兵学习“蓝军”的先进作战模式，组织红蓝双方指挥员共同开展重大课题研究，定期开展互为对手训练，锤炼提升部队打赢能力。

训练结束，该旅防空分队与“蓝军”官兵齐聚一堂复盘检讨，剖析问题短板，研讨改进措施。

“瞄准强敌练，紧盯对手训，才能锻造‘防空坚盾’。”该旅某营魏营长表示，通过与“蓝军”硬碰硬展开较量，部队整体作战能力得到有效提升。

该旅领导介绍，下一步，他们将认真梳理近年来积累的演训数据，在总结经验基础上不断优化改进战法训法，推动实战化训练进一步走深落实。

A brigade of the 77th Group Army carried out solid training as opponents

Source: PLA Daily Author: Qi Weidong Editor: Liu Shangjing 2025-01-12 08:48:30

A brigade of the 77th Group Army carried out solid training as opponents——

[77th GA: Western TC Army, Chongzhou, Chengdu, Sichuan Province]

Realistic resistance to forge an "air defense shield"

In the middle of winter, a brigade of the 77th Group Army carried out a full-time and full-element confrontation training in the desert Gobi.

"The 'enemy' aircraft released electromagnetic interference." Inside the radar cabin, there was a "snowflake" on the display screen, and the radar operator immediately took anti-interference measures. However, before it could be captured, the target quickly "disappeared".

"The 'Blue Army' has many electromagnetic interference methods, a wide range, and high intensity. We must further improve our anti-interference capabilities." After a round of confrontation, Zang Qingda, a radar bugler of a company of the brigade, concluded.

The second round of confrontation began, and the "Blue Army" fighter took advantage of the performance of its equipment, flexibly avoided ground radar searches, and quickly approached the target area.

On the other side, radar operator Wang Neng had just found the target when the radar was again subjected to strong electromagnetic interference. Wang Neng focused on the screen, quickly carried out anti-interference operations, and requested support. After receiving the request for help, the brigade's electronic air defense force quickly took countermeasures and cooperated with other combat units to search for the target.

The invisible battlefield was fierce. Soon, the ground radar successfully captured the target. With an order, the operator decisively pressed the launch button, and the missile successfully hit the target.

"If you want to develop strong skills, you must fight more with strong enemies." The brigade leaders introduced that in this training, they increased the intensity of interference and the difficulty of training, verified the training ideas and improved the training plan in real combat, and effectively improved the overall combat capability of the air defense unit in a complex electromagnetic environment.

In order to better play the role of "sharpening stone" of confrontation training, they selected key personnel to form a combat method and training method research group, and discussed with the manufacturer's technical personnel the methods and ways to tap the potential of radar equipment; they regularly organized officers and soldiers to learn the advanced combat mode of the "Blue Army", organized the commanders of the Red and Blue sides to jointly carry out major research projects, and regularly carried out training with each other as opponents to hone and improve the troops' ability to win.

After the training, the air defense unit of the brigade and the officers and soldiers of the "Blue Army" gathered together to review and analyze the problems and shortcomings, and discuss improvement measures.

"Only by training against strong enemies and keeping a close eye on opponents can we forge an 'air defense shield'." Battalion Commander Wei of a battalion of the brigade said that by competing

head-on with the "Blue Army", the overall combat capability of the troops has been effectively improved.

The leaders of the brigade introduced that in the next step, they will carefully sort out the training data accumulated in recent years, continuously optimize and improve the combat methods and training methods based on summarizing experience, and promote the further implementation of actual combat training.

第七十九集团军某旅坚持体系练兵：跨专业训练 强体系对抗

来源：解放军报 作者：王立军 张东盼 王钟卫 责任编辑：林诗清 2025-01-14 08:25:12

第七十九集团军某旅坚持体系练兵——

跨专业训练 强体系对抗

■王立军 解放军报记者 张东盼 特约通讯员 王钟卫

战机凌空对“敌”实施火力压制、直升机空降“敌后”展开突袭、战车疾驰向“敌”前沿突进……日前，第 79 集团军某旅组织一场实兵对抗训练，某营与配属支援的陆航、空军等友邻部队密切配合，兵分多路立体突击，精准破“敌”。

“未来战场是体系与体系的对抗，只有强体系才能打胜仗。”该旅作训科王科长介绍，以往组织对抗训练，不少专业分队习惯单打独斗，对其他军兵种部队装备性能、作战方式及火力运用等情况了解不够，一定程度上影响了训练质效。

为破解这一难题，该旅在深入调研基础上，树牢集约化组训理念，走开专业训练跨界交互的路子：各专业分队结合训练实际，分赴多地挂靠跟训、联战联训，在博采众长中助推战斗力建设转型升级；组织官兵与陆航、特战、空军等军兵种力量开展联合训练，在真打实抗中摸清装备性能、提高技战术水平；围绕联合侦察、火力打击、陆空协同等展开专攻精练，在不同作战地域、不同作战环境中加钢淬火。

近年来，该旅电子对抗分队上海岛、闯戈壁，多次参加集团军组织的电子对抗专业集训，与信息支援部队某部开展互为对手训练，锤炼提升部队打赢能力。

“电子对抗专业技术复杂、组训难度较高，大家都有一种本领恐慌。”该分队负责人介绍，他们利用野外驻训等时机，设置逼真战场环境，围绕协同战术展开研练，不断强化官兵战场思维，提高应急应战能力。

这几年，该旅炮兵分队与多支军兵种力量共同开展体系编组融合训练，锤炼复杂战场环境下火力协同、机动打击等作战能力；防空分队与多军兵种防空力量进行联合编组，在实战实训中不断提升导弹命中率……该旅领导告诉记者，通过跨军兵种、跨专业开展体系训练，各分队作战能力得到有效提升。

记者在训练现场看到，侦察分队拓展情报信息共享范围，为电抗、火力等本级任务分队和配属支援力量提供信息支撑；炮兵分队与空军战机密切配合，对“敌”实施火力压制……各作战要素“攥指成拳”，实现了“1+1 > 2”的作战效能。

“从单打独斗到跨界融合，从各自为战到体系作战，瞄准战场需求才能打赢未来战争。”该旅领导介绍，下一步，他们将结合训练成果，梳理问题短板、制订改进措施，力争实现“打一仗进一步”。

A brigade of the 79th Group Army insists on system training: cross-professional training and strong system confrontation

[79th GA: Northern TC Army, Liaoyang, Liaoning Province]

Source: PLA Daily Author: Wang Lijun Zhang Dongpan Wang Zhongwei Editor: Lin Shiqing 2025-01-14 08:25:12

A brigade of the 79th Group Army insists on system training——

Cross-professional training and strong system confrontation

■ Wang Lijun PLA Daily reporter Zhang Dongpan Special correspondent Wang Zhongwei

Fighter planes suppress the "enemy" with firepower in the air, helicopters land behind the "enemy" to launch a surprise attack, and tanks rush to the "enemy" front... Recently, a brigade of the 79th Group Army organized a real-life confrontation training. A battalion cooperated closely with the supporting army aviation, air force and other friendly neighboring forces, and divided into multiple routes for three-dimensional assault to accurately defeat the "enemy".

"The future battlefield is a confrontation between systems, and only a strong system can win the battle." Wang, the chief of the brigade's training section, introduced that in the past, when organizing confrontation training, many professional teams were used to fighting alone, and they did not have enough understanding of the equipment performance, combat methods and firepower application of other military services, which affected the quality and effectiveness of training to a certain extent.

In order to solve this problem, the brigade, based on in-depth research, established a firm concept of intensive training and took the path of cross-border interaction of professional training: each

professional team, based on the actual training, went to many places for training and joint combat training, and promoted the transformation and upgrading of combat effectiveness by learning from others; organized officers and soldiers to carry out joint training with the army aviation, special operations, air force and other military services, and found out the equipment performance and improved the technical and tactical level in real combat; carried out specialized training around joint reconnaissance, firepower strikes, land and air coordination, and strengthened the steel in different combat areas and different combat environments.

In recent years, the brigade's electronic warfare unit has been to the islands of Shanghai and the Gobi Desert, and has participated in the electronic warfare professional training organized by the group army many times. It has carried out mutual training with a certain unit of the information support force to hone and improve the unit's ability to win.

"The professional technology of electronic warfare is complex and the training is difficult. Everyone has a kind of skill panic." The person in charge of the unit introduced that they took advantage of opportunities such as field training to set up a realistic battlefield environment, conduct research and training around coordinated tactics, and continuously strengthen the battlefield thinking of officers and soldiers and improve emergency response capabilities.

In recent years, the brigade's artillery unit has carried out system formation integration training with multiple military forces to hone combat capabilities such as firepower coordination and mobile strikes in complex battlefield environments; the air defense unit has been jointly organized with multiple military air defense forces to continuously improve the missile hit rate in actual combat training... The brigade leader told reporters that through cross-service and cross-professional system training, the combat capabilities of each unit have been effectively improved.

The reporter saw at the training site that the reconnaissance team expanded the scope of intelligence information sharing and provided information support for the task teams and supporting forces at the same level such as reactance and firepower; the artillery team worked closely with the air force fighters to suppress the "enemy" with firepower... All combat elements "clenched their fingers into a fist" and achieved the combat effectiveness of "1+1>2".

"From fighting alone to cross-border integration, from fighting alone to system combat, only by targeting battlefield needs can we win future wars." The brigade leaders introduced that in the next step, they will combine the training results, sort out the problems and shortcomings, formulate improvement measures, and strive to achieve "one battle and one step forward".

新春走军营丨“智能演兵场”实现一网同训

来源：解放军报 作者：郑烨 陈典宏 责任编辑：乌铭琪 2025-01-15 08:23:45

记者深入第 74 集团军某旅感受模拟训练系统升级带来的新变化——

“智能演兵场”实现一网同训

■郑 烨 解放军报记者 陈典宏

官兵紧急出动。刘延安摄

新春将至，记者来到第 74 集团军某旅模拟训练中心，恰逢一场实战背景下红蓝对抗训练在虚拟战场火热展开。

“战斗”一触即发，蓝方率先出击。参谋人员轻点鼠标，数架战机迅疾出动，向红方阵地突进。

“发现多批目标超低空临近。”记者在某雷达专业模拟训练室看到，雷达操作手、三级军士长罗金勇紧盯屏幕，及时将空情信息传送至各火力平台。

链路畅通，高效协同。记者走进某营模拟训练室，只见各型模拟训练装备一应俱全，作战口令声此起彼伏，各号手密切配合，快速精准锁定“敌”机。

战况紧急，蓝方调整战术，出动直升机在密林深处穿梭飞行。殊不知，直升机行踪已被隐蔽在一旁的红方观察哨捕获……

“瞄准！击发！”某便携式地空导弹模拟训练室内，新射手林霍云头戴 VR 眼镜，快速锁定目标，“敌”机应声坠落。

身处训练现场，激烈的对抗气氛让记者眼界大开——

向科技要战斗力，科技不仅改变了军事训练形式和方法，也深刻影响着战争胜负。官兵足不出户，便可驰骋“智能演兵场”——导弹昂首、雷达飞旋，各专业官兵实现一网同训，仿真对抗让人如临战场。

“这是我们对模拟训练系统升级改造后带来的新变化。”该旅领导介绍，近年来，他们大力发展模拟仿真、网络对抗等练兵手段，集智攻关打造一网联通的“智能演兵场”，在一网同训中提升模拟对抗训练的针对性和实效性。

该旅精心设置训练课题，将不同专业官兵置于同一背景、同一战场态势、同一作战想定下的虚拟战场，异地同步展开体系训练。

“模拟训练仿真度越高，官兵训练质效就会越高。”现场跟训的该旅一名助理工程师表示，他们打通模拟训练指挥、情报和打击链路，实现全旅一网同训，推动模拟对抗训练向体系练兵转型。

该旅作训科黄参谋告诉记者，随着智能化训练设施体系初步形成，新年度军事训练展开以来，他们破解了多个训练重难点问题，多项新战法训法得到验证，助推部队战斗力稳步提升。

Visiting the military camp during the Spring Festival | "Smart military training ground" realizes one network and one training

Source: PLA Daily Author: Zheng Ye Chen Dianhong Editor: Wu Mingqi 2025-01-15 08:23:45

Reporters went deep into a brigade of the 74th Group Army to experience the new changes brought about by the upgrade of the simulation training system——

[74th GA: Southern TC Army, Huizhou, Guangdong Province]

"Smart military training ground" realizes one network and one training

■ Zheng Ye PLA Daily reporter Chen Dianhong

Officers and soldiers were dispatched urgently. Photo by Liu Yan'an

As the Spring Festival is approaching, reporters came to the simulation training center of a brigade of the 74th Group Army, and it happened that a red-blue confrontation training under the background of actual combat was carried out in the virtual battlefield.

"Battle" was about to start, and the blue side took the lead. The staff clicked the mouse, and several fighters quickly dispatched and rushed towards the red side's position.

"We found multiple groups of targets approaching at ultra-low altitude." The reporter saw in a radar professional simulation training room that the radar operator, third-class sergeant Luo Jinyong, stared at the screen and transmitted the air situation information to various firepower platforms in a timely manner.

The link is smooth and efficient. The reporter walked into a simulation training room of a certain battalion and saw that all types of simulation training equipment were available. The sound of combat commands came one after another, and the buglers worked closely together to quickly and accurately lock the "enemy" aircraft.

The battle situation was urgent, and the blue side adjusted its tactics and sent helicopters to fly through the deep forest. Little did they know that the helicopter's whereabouts had been captured by the red side's observation post hidden nearby...

"Aim! Fire!" In a portable surface-to-air missile simulation training room, the new shooter Lin Huoyun wore VR glasses and quickly locked the target, and the "enemy" aircraft fell.

At the training site, the fierce confrontation atmosphere opened the reporter's eyes-

Asking technology for combat effectiveness, technology has not only changed the form and method of military training, but also profoundly affected the outcome of the war. Without leaving home, officers and soldiers can gallop on the "smart military training ground" - missiles are raised, radars are flying, officers and soldiers of various professions can achieve the same training on one network, and the simulated confrontation makes people feel like they are on the battlefield.

"This is a new change brought about by our upgrade and transformation of the simulation training system." The leaders of the brigade introduced that in recent years, they have vigorously developed training methods such as simulation and network confrontation, and have worked together to create a "smart military training ground" connected by one network, and improve the pertinence and effectiveness of simulated confrontation training in the same network training.

The brigade carefully set up training topics, placed officers and soldiers of different professions in a virtual battlefield with the same background, the same battlefield situation, and the same combat assumptions, and carried out system training in different places simultaneously.

"The higher the simulation degree of simulation training, the higher the quality and efficiency of officers and soldiers' training will be." An assistant engineer of the brigade who followed the training on site said that they opened up the command, intelligence and strike links of simulation training, realized the same training of the whole brigade on one network, and promoted the transformation of simulation confrontation training to system training.

Staff Officer Huang from the brigade's training and operations department told reporters that with the initial formation of an intelligent training facility system, since the start of the new year's military training, they have solved a number of difficult and key training problems, and a number of new tactics and training methods have been verified, helping to steadily improve the combat effectiveness of the troops.

“点赞·谏言”公示栏让官兵的“满意指数”越来越高

来源：中国军网-解放军报 作者：韩 帅 张文哲 童祖静 责任编辑：赵镭饷

2025-01-16 06:36:06 0

第 72 集团军某旅机关收集工作评价反馈接受官兵监督——

以基层意见为镜正服务作风

■韩 帅 张文哲 解放军报特约记者 童祖静

“谢谢，我尽快过来办理手续。”近日，第 72 集团军某旅某连干部蔡春晓在同机关某科干事的通话中，得知家属的工作调动问题得到顺利解决，心中十分激动。当天下午，他便将对该科的服务评价写在一张“点赞卡”上，贴在机关楼大厅的“点赞·谏言”公示栏。

“机关服务质量怎么样，基层官兵最有发言权。”去年以来，该旅将基层满意度作为评价机关服务的重要指标，广泛开展“我为机关点个赞，谏言献策提质效”活动，基层官兵既可将“点赞卡”投给服务质效较高的科室，也可通过“谏言卡”反映机关服务的不足之处。一名旅领导告诉记者，开设“点赞·谏言”公示栏，就是为了表扬激励服务好的科室和个人，督促引导服务较差的提升服务质效，切实解决官兵急难愁盼。

记者在旅机关办事大厅看到，所有“点赞卡”和“谏言卡”都被张贴在公示栏上，各科室能够清楚看到自己获得的卡片数量。

“‘点赞卡’多的科室要表扬，‘谏言卡’多的科室则要及时总结反思。”该旅领导说，他们每周将获得“点赞卡”最多的科室评为本周“服务基层先进科室”，被提意见最多的科室，则会在旅交班会上被通报。

“是不是由于前段时间检查督导较真碰硬，导致个别官兵心存不满才给了差评？”前段时间，看着公示栏里自己科室收到一些“谏言卡”，部队管理科王科长如坐针毡。可翻阅“谏言卡”，他发现并非如此。官兵们对机关严格检查并无异议，反映更多的是个别机关人员只顾着查纠问题、登记通报，与基层沟通不够深入，没有及时跟进指导帮带等问题。

“对查出问题的单位或个人，依规依纪‘打板子’并无不妥，但发现问题不是最终目的，我们更应该做的是沉下心来帮基层分析问题、研究措施，而不是简单通报批评了之……”组织召开科务会时，王科长教育引导大家树立既抓检查、也强指导，既精准问责、也指导帮带的工作态度和理念，积极改进工作方式和作风。科室成员随后对“谏言卡”上的意见建议进行逐条剖析反思，决定一方面完善帮建基层机制，及时做好法规宣讲和教育，另一方面对被问责单位跟进回访，帮助他们重拾信心，抓好问题整改。

很快，部队管理科依托旅强军网“士兵心声”板块设置问题整改清单，明确划分责任人和整改时限，自觉接受官兵监督。随着这些措施的落地生效，该科室收到的“点赞卡”也越来越多。

有一次，某营中士小肖因违规使用手机受到行政处分后，心情低落，一度影响了日常工作训练。了解情况后，负责检查督导工作的一名部队管理科参谋主动与基层对接，及时联系心理服务队到基层开展服务，帮小肖解开了“心理疙瘩”，帮他重新找到奋斗方向。后来，小肖尽职尽责投入工作，得到了战友认可。

近段时间的公示栏显示，该科排名上升明显，收到的“点赞卡”连续多次排名前列，成为“服务基层先进科室”的有力竞争者。王科长感言：“点赞和谏言就像一面镜子，让我们能更客观发现优缺点，有针对性地固强补弱。”

记者了解到，该旅党委正进一步拓宽民主渠道，广泛征求“点赞·谏言”活动的改进措施；综合考虑机关科室业务具体情况以及各营连担负任务的差异，按照实际情况下发不同数量的“点赞卡”和“谏言卡”；加强风气监督和交替巡查机制，确保活动公开透明、公平公正。

“点赞卡”肯定工作，“谏言卡”鞭策改进。该旅领导介绍，去年底，获得“点赞卡”较多的机关科室和干部，绝大多数都获评先进。今年，他们会继续为基层官兵解决通过“谏言卡”反映的训练设施改造、福利待遇落实等方面急难愁盼问题，确保官兵心声件件有回音、事事有着落。

微议录

服务基层要注重结果导向

■张 愈

机关服务基层，话题虽不新鲜，但基层官兵始终关心，各单位为此研究推出了不少办法，如热线电话、留言墙、意见箱等。但说到底，一些方法之所以受到基层官兵欢迎，并不是因为方式方法多么新颖、名头多么响亮，而是机关敢于接受监督、善于听取意见，切实将官兵挠头事当作心头事，及时有效做好了纾困解难的“下篇文章”。反之，如果基层反馈的意见建议没有得到回应和解决，那么再好的形式最终也只是摆设，久而久之就会无人问津。

服务基层，归根结底要以实际成效为导向，最终要落实到为官兵排忧解难上，切实解决好大家的操心事、烦心事、揪心事。现实中，个别单位机关在服务基层过程中，不同程度存在一些问题和不足。比如，有的只重形式不重实效，把服务措施搞成“形象工程”，只是体现在纸面上、口号中，基层一些老大难问题却久拖不决。如此，不仅会阻碍战斗力提升和基层建设发展，还会严重损害机关在基层官兵心中的形象威信。

服务基层，机关首先要转变作风、端正态度，秉持“基层至上、士兵第一”的理念，改变仅是讲评督导、通报批评的方式，自觉问计于兵、问需于兵，不断完善建议反馈和双向讲评的机制，及时听取官兵真实呼声。同时，要牢固树立责任意识，严格落实责任制度，真正让“暖心举措”暖心，让“放心工程”放心，把基层的“困难指数”转化为官兵的“满意指数”，最大限度凝聚兵心、提振士气，为基层官兵全身心投身练兵备战创造良好条件。

The "Likes and Advices" notice board makes the "satisfaction index" of officers and soldiers higher and higher

Source: China Military Network-People's Liberation Army Daily Author: Han Shuai Zhang Wenzhe Tong Zujing Editor: Zhao Leixiang

2025-01-16 06:36:06 0

The headquarters of a brigade of the 72nd Group Army collects work evaluation feedback and accepts supervision from officers and soldiers——

[72nd GA: Eastern TC Army, Hangzhou, Zhejiang Province]

Use grassroots opinions as a mirror to correct service style

■ Han Shuai Zhang Wenzhe People's Liberation Army Daily Special Correspondent Tong Zujing

"Thank you, I will come to handle the procedures as soon as possible." Recently, Cai Chunxiao, a cadre of a company of a brigade of the 72nd Group Army, was very excited when he learned from a call with a department officer of a department that the work transfer problem of his family members had been successfully resolved. That afternoon, he wrote his service evaluation of the department on a "like card" and posted it on the "Likes and Advices" notice board in the lobby of the headquarters building.

"The grass-roots officers and soldiers have the most say in the quality of the agency's services." Since last year, the brigade has used grass-roots satisfaction as an important indicator for evaluating agency services, and has widely carried out the "I give a thumbs up to the agency, give advice and suggestions to improve quality and efficiency" activity. Grassroots officers and soldiers can vote for departments with higher service quality and efficiency through "thumbs-up cards", and can also reflect the shortcomings of the agency's services through "thumbs-up cards". A brigade leader told reporters that the "thumbs-up and advice" notice board is set up to praise and encourage departments and individuals with good services, urge and guide those with poor services to improve service quality and efficiency, and effectively solve the urgent needs of officers and soldiers.

The reporter saw in the brigade office hall that all "thumbs-up cards" and "thumbs-up cards" were posted on the notice board, and each department could clearly see the number of cards they received.

"Departments with more 'like cards' should be praised, and departments with more 'advice cards' should summarize and reflect in time." The brigade leader said that they will evaluate the department with the most "like cards" as the "advanced department serving the grassroots" every week, and the department with the most suggestions will be reported at the brigade handover meeting.

"Is it because the inspection and supervision were too serious some time ago, which led to dissatisfaction among some officers and soldiers and gave bad reviews?" Some time ago, Wang, the chief of the military management department, was on pins and needles when he saw some "advice cards" received by his department in the public notice board. But after reading the "advice cards", he found that this was not the case. The officers and soldiers had no objection to the strict inspection of the organs, and reflected more that some personnel in the organs were only concerned with checking and correcting problems, registering and reporting, and not communicating deeply with the grassroots, and not following up on guidance and assistance in time.

"There is nothing wrong with 'punishing' units or individuals with problems in accordance with regulations and disciplines, but finding problems is not the ultimate goal. What we should do more is to calm down and help the grassroots analyze problems and study measures, rather than simply reporting and criticizing them..." When organizing a department meeting, Section Chief Wang educated and guided everyone to establish a work attitude and concept of both inspection and guidance, precise accountability and guidance, and actively improve work methods and work styles. The members of the department then analyzed and reflected on the opinions and suggestions on the "Admonition Card" one by one, and decided to improve the grassroots mechanism on the one hand, and do a good job in law enforcement and education in a timely manner, and follow up with the accountable units on the other hand to help them regain confidence and rectify problems.

Soon, the Force Management Section set up a problem rectification list based on the "Soldiers' Voice" section of the Brigade Strengthening Army Network, clearly divided the responsible

persons and rectification time limits, and consciously accepted the supervision of officers and soldiers. As these measures took effect, the department received more and more "like cards".

Once, Xiao Xiao, a sergeant in a battalion, was administratively punished for using a mobile phone in violation of regulations. He was depressed and affected his daily work training for a time. After understanding the situation, a staff officer of the troop management department in charge of inspection and supervision took the initiative to connect with the grassroots, contacted the psychological service team in time to provide services at the grassroots, helped Xiao Xiao to solve his "psychological problems", and helped him find the direction of struggle again. Later, Xiao Xiao devoted himself to his work with due diligence and was recognized by his comrades.

The recent bulletin board shows that the ranking of the department has risen significantly, and the number of "like cards" received has been ranked at the top for many consecutive times, making it a strong competitor for "advanced department serving the grassroots". Section Chief Wang said: "Likes and advice are like a mirror, allowing us to more objectively discover advantages and disadvantages, and strengthen the strengths and strengthen the weaknesses in a targeted manner."

The reporter learned that the brigade party committee is further broadening democratic channels and widely soliciting improvement measures for the "Likes and Advice" activities; comprehensively considering the specific business conditions of the department and the differences in the tasks of each battalion and company, different numbers of "Like Cards" and "Advice Cards" are issued according to the actual situation; strengthen the supervision of the atmosphere and the alternating inspection mechanism to ensure that the activities are open, transparent, fair and just.

"Like Cards" affirm work, and "Advice Cards" spur improvement. The brigade leaders introduced that at the end of last year, most of the departments and cadres who received more "like cards" were rated as advanced. This year, they will continue to solve the urgent problems reflected by the "advice cards" for the grassroots officers and soldiers in the transformation of training facilities and the implementation of welfare benefits, and ensure that the officers and soldiers' voices are echoed and everything is settled.

Micro-discussion

Serving the grassroots should focus on results-oriented

■ Zhang Yu

Although the topic of agencies serving the grassroots is not new, grassroots officers and soldiers have always been concerned about it. Various units have studied and launched many methods for this, such as hotlines, message walls, suggestion boxes, etc. But in the final analysis, the reason why some methods are welcomed by grassroots officers and soldiers is not because of how novel the methods are or how loud the names are, but because the agencies dare to accept supervision and are good at listening to opinions, and truly regard the officers and soldiers' headaches as their

own concerns, and promptly and effectively do a good job of alleviating difficulties. "Next article". On the contrary, if the opinions and suggestions fed back by the grassroots are not responded to and resolved, then no matter how good the form is, it will eventually be just a decoration, and no one will care about it over time.

Serving the grassroots, in the final analysis, should be guided by practical results, and ultimately implemented to solve the worries, troubles and worries of officers and soldiers, and effectively solve everyone's worries, troubles and worries. In reality, some units and agencies have some problems and shortcomings to varying degrees in the process of serving the grassroots. For example, some only pay attention to form rather than effectiveness, and turn service measures into "image projects", which are only reflected on paper and slogans, while some long-standing and difficult problems at the grassroots level are delayed for a long time. In this way, it will not only hinder the improvement of combat effectiveness and the development of grassroots construction, but also seriously damage the image and prestige of the agency in the hearts of grassroots officers and soldiers.

To serve the grassroots, the agency must first change its style and correct its attitude, adhere to the concept of "grassroots first, soldiers first", change the way of only commenting and supervising, reporting and criticizing, consciously ask the soldiers for advice and needs, and continuously improve the mechanism of feedback and two-way commenting, and listen to the real voices of officers and soldiers in a timely manner. At the same time, we must firmly establish a sense of responsibility, strictly implement the responsibility system, truly make the "heartwarming measures" heartwarming, make the "rest assured projects" reassuring, transform the "difficulty index" at the grassroots level into the "satisfaction index" of officers and soldiers, maximize the cohesion of soldiers' hearts and boost morale, and create good conditions for grassroots officers and soldiers to devote themselves to training and preparation for war.

新疆军区某红军团注重发挥营党委军士委员作用

来源：中国军网-解放军报 作者：王 俊 高 群 责任编辑：赵镭饷

2025-01-16 06:39:18 0

新疆军区某红军团注重发挥营党委军士委员作用——

组织搭台 尽展其才

■王 俊 解放军报特约记者 高 群

“一营营党委委员潘飞同志提出的训练措施建议，经检验有利于提升训练质效，建议各营学习推广。”前不久，在新疆军区某红军团交班会上，团领导对军士委员、一级上士潘飞提出的建议予以肯定。

“感谢营党委的信任，考察增选我为党委委员，让我在履职尽责中，为单位建设贡献力量。”会后，谈及自己作为该团第一位营党委军士委员的经历，潘飞内心很是感慨。

去年以来，因各项任务交织叠加，潘飞所在营干部流动性大，在位干部少、代职人员多，有些基层官兵反映的问题处理不及时、不到位。对此，该营党委想了不少办法，但效果依然不理想。

结合剖析反思开展调研时，营党委蔡副书记留意到，潘飞与战友关系融洽，还主动为战友解决了不少难题。

“《中国共产党军队委员会（支部）工作规定》明确，根据需要或确有必要时，可以把专业技术干部党员、军士（警士）党员、文职人员党员纳入基层党委委员的吸收范围。”在一次营党委会上，大家研究感到：军士是军队建设和军事斗争准备的基础骨干力量，相比干部而言流动性小、稳定性强，他们身在兵中，不论是察兵情、听兵声，还是组训施训，都有着自身优势。将优秀军士增选为营党委委员，既能够发挥他们的带兵特长，还能够推动营党委各项决策落地落实。

进一步考察后，营党委发现，潘飞入伍以来兢兢业业，在班长、战勤参谋、助理员等岗位表现出色。去年服役期满后，他选择了延期服役，无论是组训任教，还是日常管理，都有着丰富经验。将他增补为军士委员，不仅有利于营党委把准官兵思想脉搏，还有利于充分发扬基层民主，推动单位全面建设。

成为营党委委员后，潘飞充分发挥与官兵们住一起、训一块的优势，同大家坦诚交流，解决了许多急难愁盼问题，在营党委和基层战士间架起一座沟通桥梁。有的年轻班长缺乏管理经验，他向营党委提议成立“随营军校”，开展新任职班长骨干集训，帮助他们尽快胜任岗位。某连新任党支部副书记上任后进入状态慢，潘飞就主动与他结成对子，讲连史、话传承，规划连队发展路线，帮他更快胜任工作……

潘飞的成长经历，让该营军士深受鼓舞，大家感到努力有方向、成长有平台，干事创业热情持续增强。下一步，该营将持续优化人才培养措施，通过建立人才库、开办“成长夜校”、开展“五小活动”等方式，为军士人才搭建岗位建功平台，推动形成“人人努力成才、人人尽展其才”的生动局面。

A Red Army Corps of the Xinjiang Military Region pays attention to the role of the sergeant committee members of the battalion party committee

Source: China Military Network-People's Liberation Army Daily Author: Wang Jun Gao Qun Editor: Zhao Leixiang

2025-01-16 06:39:18 0

A Red Army Corps of the Xinjiang Military Region pays attention to the role of the sergeant committee members of the battalion party committee——

Organization sets the stage to show their talents

■ Wang Jun People's Liberation Army Daily Special Correspondent Gao Qun

"The training measures and suggestions put forward by Comrade Pan Fei, a member of the battalion party committee of the first battalion, have been tested to be beneficial to improving the quality and effectiveness of training. It is recommended that all battalions learn and promote them." Not long ago, at the handover meeting of a Red Army Corps of the Xinjiang Military Region, the regiment leaders affirmed the suggestions put forward by the sergeant committee member and first-class sergeant Pan Fei.

"Thank you for the trust of the battalion party committee and the inspection and election of me as a member of the party committee, so that I can contribute to the construction of the unit while fulfilling my duties." After the meeting, talking about his experience as the first sergeant committee member of the battalion party committee of the regiment, Pan Fei was very emotional.

Since last year, due to the overlapping of various tasks, the cadres in Pan Fei's battalion have a high turnover rate, with few in-service cadres and many interim personnel. Some problems reflected by grassroots officers and soldiers have not been handled in a timely and adequate manner. In this regard, the battalion party committee has come up with many solutions, but the results are still not ideal.

When conducting research in combination with analysis and reflection, Deputy Secretary Cai of the battalion party committee noticed that Pan Fei had a good relationship with his comrades and took the initiative to solve many problems for his comrades.

"The Regulations on the Work of the Military Committee (Branch) of the Communist Party of China clearly state that, according to needs or when it is really necessary, professional and technical cadres, sergeants (policemen), and civilian party members can be included in the scope of absorption of grassroots party committee members." At a battalion party committee meeting, everyone studied and felt that sergeants are the basic backbone of military construction and military struggle preparation. Compared with cadres, they have low mobility and strong stability. They are among the soldiers, whether it is observing the soldiers' situation, listening to the soldiers'

voices, or organizing and conducting training, they have their own advantages. Electing outstanding sergeants as members of the battalion party committee can not only give play to their expertise in leading soldiers, but also promote the implementation of various decisions of the battalion party committee.

After further investigation, the battalion party committee found that Pan Fei had been working diligently since joining the army, and had performed well in positions such as squad leader, combat staff, and assistant. After his service term expired last year, he chose to extend his service. He has rich experience in both training and teaching, as well as daily management. Adding him as a sergeant committee member will not only help the battalion party committee to grasp the ideological pulse of officers and soldiers, but also help to fully promote grassroots democracy and promote the overall construction of the unit.

After becoming a member of the battalion party committee, Pan Fei fully utilized the advantages of living and training with officers and soldiers, communicated with everyone frankly, solved many urgent and difficult problems, and built a bridge of communication between the battalion party committee and grassroots soldiers. Some young squad leaders lack management experience. He proposed to the battalion party committee to set up a "camp military school" to carry out training for newly appointed squad leaders to help them take up their posts as soon as possible. The new deputy secretary of a company's party branch was slow to get into the state after taking office, so Pan Fei took the initiative to pair him up, talk about the company's history, talk about inheritance, plan the company's development route, and help him become competent for work faster...

Pan Fei's growth experience inspired the sergeants of the battalion. Everyone felt that there was a direction for hard work and a platform for growth, and their enthusiasm for doing things and starting businesses continued to increase. In the next step, the battalion will continue to optimize talent training measures, build a platform for sergeant talents to make contributions in their posts by establishing a talent pool, opening a "growth night school", and carrying out "five small activities", and promote the formation of a vivid situation of "everyone strives to become a talent and everyone can show their talents".

善用“谈心公式”开心门

■卢锦涛　解放军报记者　陈典宏

“没想到，连队的一封信打消了父母的顾虑……”新年伊始，第 74 集团军某旅指挥保障连强军故事分享会现场，下士刘锐鹏向连队表达感谢。

原来，去年夏天，刘锐鹏训练时不慎受伤。休假期间，父母发现他的伤病后，对他能否选改军士感到担忧。连队了解情况后，及时寄出一封慰问信，信中详细介绍了他近年来的成长变化和取得的优秀成绩，刘锐鹏父母看后打消了心中的顾虑。

这件事的妥善处理，得益于连队思想工作骨干、下士谢逸帅的作用发挥。谢逸帅在发现刘锐鹏的情绪变化后，主动找他谈心交心，并将情况汇报给连队党支部，才有了连队寄慰问信的一幕。

“像谢逸帅这样的思想工作骨干，在基层很受欢迎。”该旅政治工作部领导介绍，为解决官兵的烦心事，他们积极探索密切新时代官兵关系的方法路径，通过建强思想工作骨干队伍，持续开展“官兵友爱、兵兵互助”等活动，融洽内部关系，进一步提升了部队向心力、凝聚力、战斗力。

思想工作骨干推开战友“心门”并非一蹴而就——油料管理员、二级上士陈浩因一次工作失误被调离岗位，之后他变得有些孤僻，常常叹息“以后的军旅之路没希望了”。列兵李天乐性格内向，下连后时常失眠。班长与他交流过好几次，但很难走进他的内心世界。

“有的是‘犯了错不敢说’，有的是‘闷在心里不想说’。”该旅党委分析后认为，这既与新时代官兵“屏中世界”“云端交流”的生活习惯有关，也与思想工作骨干谈心不深入、方法不得当有关。

“一些传统办法不是不管用，而是没用好。”该旅领导说，他们对思想工作骨干存在的“流水线式谈心”、填鸭式说教等问题进行反思，着眼解决不愿谈、不会谈、谈不深、谈不真等问题，鼓励思想工作骨干改变方式方法，充分发挥主观能动性，灵活大胆地开展工作，提升思想政治工作质效。

“我不问+你不说=误会，我问了+你不说=隔阂，我问了+你说了=尊重，我想问+你想说=默契，我不问+你说了=信任……这是旅队每名思想工作骨干都熟知的‘谈心公式’。”思想工作骨干、二级上士丁俊德说，“关键是怎么掌握这把密切内部关系、打开官兵心锁的‘金钥匙’。”

“别灰心，这点失误不算什么，我以前也有过，振作起来你依然是最棒的。”一次球赛休息间隙，思想工作骨干、油料管理员金森涛把自身经历分享给同场竞技的陈浩，帮助他分析

失误原因。沉默许久的陈浩终于敞开心扉，重新振奋信心。和陈浩一样，在思想工作骨干的帮助下，李天乐也主动说出心事，逐渐乐观开朗起来。

河岸的连接靠桥梁，心灵的连通靠交流。随着思想工作骨干活跃在一线，该旅广大官兵积极向党组织靠拢，向党员干部看齐，携手共进，同心协力，官兵关系呈现出和谐友爱、互帮互助的新景象。

打动兵心，从读懂内心开始

——对第 74 集团军某旅思想工作骨干队伍建设的调查

■陈晓鹏 黄池敬 解放军报记者 陈典宏

第 74 集团军某旅导弹分队组织实弹训练。刘延安摄

直面新生代官兵，做好经常性思想工作面临挑战

第 74 集团军某旅二级上士覃运赏自担任思想工作骨干后，一直有种强烈的“本领恐慌”。

这种恐慌源于现实经历。一段时间，覃运赏所在的警卫勤务连各项任务接二连三，不少战士疲于应对，思想出现波动。

一次，覃运赏在训练场上无意间听到上等兵小张向同年兵“吐槽”：“每天工作和生活三点一线，太枯燥了。”

覃运赏当场反驳，简单地讲了几句使命光荣、军人奉献的大道理。这些话到底能不能讲到小张的心里，他也没有多少把握。

“这种情况折射出思想工作骨干开展工作的能力不足。”该旅政治工作部领导介绍，他们在对近两年新战士进行摸底调查发现，超过 80%的新战士是大专以上学历，不少人入伍前有过工作经历。与之相对的是，思想工作骨干的学历、阅历、视野出现“倒挂”现象。

不管跟谁谈，大都是“一个调”；不管谈什么，大都是“老一套”；不管你听不听，大都要“来一通”。调查发现，部分基层思想工作骨干由于经验不足，给官兵解决思想问题时，空泛讲大道理多、提供解难办法少，导致效果并不理想。这也让不少基层带兵人和思想工作骨干不免感慨：“现在的兵不好管、不好教，思想工作不好做。”

从某种意义上讲，思想工作骨干必须是“更强的兵”——内心更强大，认知有深度，沟通讲技巧。从士兵提干的排长李德铭直言：“行胜于言。一名合格的思想工作骨干，要学会用真理说服人、用真情感染人、用真实打动人。”

某连三级军士长吴新才心中有一大憾事。几年前，班里的上等兵小刘在选改军士前，因违规外出受到处分。

事实上，小刘的日常表现“可圈可点”：军事训练成绩靠前，理论学习积极，在战友中有良好口碑。然而，小刘的问题早有苗头。他不止一次向战友“吐槽”：老家在山沟沟，想到大城市见见世面，没想到部队管得严，当兵两年，让人向往的城市生活都没有好好体验……

当时，连队正在全力抓演习任务准备，作为思想工作骨干的吴新才也是训练骨干，一直忙于推敲训练方案，对班里成员思想波动没有太在意。当时没有被及时拉直的“问号”，最终变成“惊叹号”，这件事给吴新才带来很大冲击。

“思想工作骨干‘身兼多职’并不是啥新鲜事。”警卫勤务连张指导员说，大部分基层连队的思想工作骨干都由管理骨干兼任，管理骨干日常工作繁忙，各项工作很难兼顾。部分非管理岗位的思想工作骨干也常常由能力素质较强的军士担任，但他们多是专业能手，训练任务繁重。采访中，某连二级上士李冲给记者介绍了他的众多“头衔”：军士支委、思想工作骨干、基层风气监督员……

部分思想工作骨干身兼数职，分身乏术，关注战士思想不够，导致个别战士出现问题后才想到从思想上找原因。

基层思想工作骨干遇到的这些尴尬事，引起许多带兵人对思想工作骨干队伍建设的反思：随着社会发展、信息网络发达，战士呈现出思想多元、个性独立等特点，给思想工作骨干做好经常性思想工作带来不小挑战。

把准思想脉搏，学会用“同理心”化解“玻璃心”

某连思想工作骨干李明明想不到，新战士小邓那么快就“变脸”了。

该连官兵常年担负战备值班任务，压力比较大。不少战士分到该连后，不同程度出现了“水土不服”。

谈心交心是我军经常性思想工作的一个重要法宝，也是思想工作骨干一项必备的基本功。面对问题，连队思想工作骨干积极靠上去谈心疏导，做了不少工作。

在李明明眼中，小邓在新战士里算是省心的：文化水平高，军事素质好，心理承受能力强。闲暇时，李明明找小邓谈心，没想到他反过来宽慰李明明：“班长，你放心吧，我当兵就是为了锻炼自己，部队工作和生活我能适应，也觉得很有意义。”

然而，没过多久，小邓仿佛变了个人。训练场上无精打采，时常一个人发呆，脾气也变大了。他的同年兵悄悄告诉李明明，小邓不止一次向他吐槽：“这地方真是没法待了。”

思想工作已经做通，怎么突然会这样？李明明多方“打探”，始终没有找到问题症结。

过了一段时间，再次聊到此事，已经选改下士的小邓苦笑着告诉李明明：当时，谈了 3 年多的女朋友正在闹分手，小邓虽极力挽回，但没办法回到女朋友身边，所以才心急如焚。

该连的另一名思想工作骨干、二级上士林兴珠也有过类似经历。他们班的一名战士日常思想稳定、训练刻苦，有段时间因一点小事就和战友闹翻。后来他得知，这名战士家里遇到变故，心情低落，不知情的战友拿他开玩笑，这才引发冲突。

“有的战士今天工作积极、干劲十足，明天就可能心事重重、无精打采。”李明明感慨地说，如今，迈入军营的战士社会阅历丰富，思想更活跃、个性更鲜明，要找准思想情况的隐性“症结”并不容易。

实际工作中，有的战士思想藏而不露，遇到敏感问题嘴上说的和真实想法不一致；有的更多宁愿向女朋友、家里人、同年兵倾诉，不愿找班长、思想工作骨干等谈心；有的选择把心事默默放在心里，自我消化。

“当好一名合格的思想工作骨干，并不是一件容易的事。”该旅领导告诉记者，年轻战士思想变化和情绪波动背后的原因，单靠带兵人或思想工作骨干的简单几句话是找不到的，想捕捉战士的“心灵电波”，需要一群人的共同努力。

“把准思想脉搏，学会用‘同理心’化解‘玻璃心’。”在该旅领导看来，思想工作骨干要做战友成长进步的“领路人”，用自己的认识和行动带动身边战友；做密切官兵关系的“黏合剂”，善于发挥桥梁作用，及时消除官兵间的误解矛盾；做转化训练成绩落后战士的“助推器”，主动与他们结成互助对子，帮助他们成长进步。

强能减负，让思想工作骨干“轻装前行”

作为思想工作骨干，林兴珠有一本“独门秘籍”，上面记录了班里成员的生日、籍贯、婚姻状况、社会关系等。

当兵10年，林兴珠一直将老班长传授下来的经验，作为开展经常性思想工作的“法宝”。这让他开展思想工作游刃有余，赢得战士们好评。

然而，林兴珠还是遇到棘手问题——新兵小李体能较弱，性格内向。他尝试了能想到的所有办法，换来的却是小李的不领情。

“心理学的一个观点认为，人们在确定自我的意见和判断是否恰当时，往往倾向于同自我在一般特性上相类似的他人进行比较，这说明同一层次的人员思想感情比较接近，心理差距较小。”在该旅组织的思想工作骨干集训上，旅政治工作部领导的授课，让林兴珠看到了问题解决的希望——让年龄相近的同年兵去做思想工作。

和同年兵王二宁聊过几次后，小李敞开了心扉。他告诉王二宁：“觉得身边的战友都很优秀，自己在这个集体中没什么存在感。”

了解小李的真实想法后，林兴珠宣布由小李担任全班内务负责人，负责检查每天的内务。

欣喜的变化开始出现。自从被赋予了任务，小李参加集体活动更加积极，内务水平也显著提升。

“类似王二宁这样的义务兵思想工作骨干，全旅共有 27 名。在思想工作骨干选配上要注重广泛性。不仅要有干部骨干，也要有思想进步、工作优秀的战士；不仅要有党团员骨干，还要有具备一定工作经验的普通年轻战士。”某营苑教导员介绍，在思想工作骨干选配问题上，他们通盘考虑性格特点、兵龄结构、学历情况等因素，合理选配思想工作骨干。这一举措出台后，愿意找思想工作骨干谈心的人渐渐增加。

“越是担子重，越要爱护挑担人。”针对思想工作骨干“身兼多职”、精力分散等实际问题，该旅党委依照相关规定，出台《基层思想工作骨干工作细则》，为思想工作骨干树立威信，减少不必要的工作，尽量让他们“轻装前行”。

令中士陆向兆印象深刻的是，以前总感觉当思想工作骨干，一个重要任务是做好记录。但现在对于谈心本、在外人员联系本等，除了有思想波动或者心理问题的官兵要记录外，其他官兵的情况都不做硬性要求记录，切实把他从记录工作中解脱出来，让他有更多时间用在谈心疏导上。

“思想工作不能取代实际问题的解决，很多思想问题和实际问题往往是联系在一起的。”采访中，不少基层主官提到，如果不能及时解决官兵实际问题，做再多思想工作只是空谈。

“做思想工作既要跟上，又要切实解决实际困难。只有这样，才能增强思想引导的效果。”这是许多思想工作骨干的共识。

战士小钟父亲干农活时被蛇咬伤住院，不仅行动不便且医保迟迟未得到报销，家庭负担很重。小钟主动敲开了指导员的房门汇报此事。指导员了解情况后，马上向旅机关报告，保卫科与卫生连携手，一边了解小钟父亲病情提出治疗意见、一边协调地方医保部门进行报销，很快问题得到解决。在该旅“帮战友”活动中，旅党委专门对他家进行帮扶，小钟的脸上露出久违的笑容。

锐视点

把话说到一起 把心贴在一起

■朱 埠

当下，社会思想文化的多元碰撞与快速传播，对个体思想观念产生前所未有的影响。新时代青年官兵拥有强烈的时代烙印、独特的成长密码、崭新的价值诉求。如何直面变化，做好经常性思想工作，凝聚军心士气，是各级带兵人和思想工作骨干需要思考和解决的问题。

作为思想工作骨干，只有真正倾听兵声、走进兵心、读懂兵情，才能掌握思想动态、消除官兵隔阂、化解心理矛盾、预防倾向性问题，换来大家信任。

实践中，部分思想工作骨干在开展工作时常不得其法。有的凭经验办事，缺乏有效招法；有的对情况掌握浮于表面，聊不到心里；有的做思想工作简单粗暴，缺乏耐心，找不到解决问题的突破口；有的看不懂“网生代”的“新世界”、看不惯他们的“新行为”、看不清他们的“新表情”……

恩格斯说，人们酷肖他的时代，远胜于酷肖他们的生身父母。时代在变，经常性思想工作也需要与时俱进。面对新时代青年官兵，需要了解他们的表达习惯和接受心理，用他们喜闻乐见的语态跟他们交流，这样才能把话说到一起，把心贴在一起，产生共鸣和共情，让教育引导入脑入心。

作为思想工作骨干，如果只讲简单的大道理，现实问题不解决，思想工作就成了“无根之木、无源之水”。主动推倒阻隔官兵情感沟通的“心墙”，积极回应官兵的诉求，需要设身处地为官兵着想，为他们排忧解难，把思想工作做到官兵心坎上，真正筑牢“一条心”“一盘棋”“一条船”的思想根基。

Military Camp Observation ｜ To impress the soldiers, start from understanding their hearts

Make good use of the "heart-to-heart formula" to open the door

■ Lu Jintao People's Liberation Army Daily reporter Chen Dianhong

"Unexpectedly, a letter from the company dispelled my parents' concerns..." At the beginning of the new year, at the sharing meeting of the story of strengthening the army of the command and support company of a certain brigade of the 74th Group Army, Corporal Liu Ruipeng expressed his gratitude to the company.

[74th GA: Southern TC Army, Huizhou, Guangdong Province]

It turned out that last summer, Liu Ruipeng was accidentally injured during training. During the vacation, his parents found out about his injury and worried about whether he could be selected as a sergeant. After the company learned about the situation, it sent a letter of condolences in time, which detailed his growth and changes in recent years and the excellent results he had achieved. After reading it, Liu Ruipeng's parents dispelled their concerns.

The proper handling of this matter was due to the role played by Xie Yishuai, a key figure in the company's ideological work. After discovering Liu Ruipeng's emotional changes, Xie Yishuai took the initiative to talk to him and reported the situation to the company's party branch, which led to the scene of the company sending a letter of condolence.

"Key figures in ideological work like Xie Yishuai are very popular at the grassroots level." The leader of the brigade's political work department introduced that in order to solve the worries of officers and soldiers, they actively explored ways and paths to strengthen the relationship between officers and soldiers in the new era, and by strengthening the team of key figures in ideological work, they continued to carry out activities such as "friendship between officers and soldiers, mutual assistance between soldiers", harmonious internal relations, and further enhanced the centripetal force, cohesion, and combat effectiveness of the troops.

It was not easy for the key figures in ideological work to open the "heart door" of their comrades-in-arms - Chen Hao, a second-class sergeant and oil manager, was transferred from his post due to a work mistake. After that, he became a little withdrawn and often sighed, "There is no hope for the future military journey." Private Li Tianle is introverted and often suffers from insomnia after joining the company. The squad leader has communicated with him several times, but it is difficult to get into his inner world.

"Some people are 'daring not to speak out after making mistakes', and some people 'keep it in their hearts and don't want to speak'." After analysis, the brigade party committee believes that this is related to the living habits of the officers and soldiers in the new era of "screen world" and "cloud communication", and also to the fact that the ideological work backbones do not talk deeply and use improper methods.

"Some traditional methods are not useless, but they are not used well." The leaders of the brigade said that they reflected on the problems of "assembly line-style heart-to-heart talks" and cramming-style preaching among the ideological work backbones, focusing on solving problems such as unwillingness to talk, inability to talk, insufficiency of talk, and insufficiency of talk, and encouraged the ideological work backbones to change their methods and methods, give full play to their subjective initiative, carry out their work flexibly and boldly, and improve the quality and effectiveness of ideological and political work.

"I don't ask + you don't say = misunderstanding, I asked + you don't say = estrangement, I asked + you said = respect, I want to ask + you want to say = tacit understanding, I don't ask + you said = trust... This is the 'heart-to-heart formula' that every ideological work backbone of the brigade is familiar with." Ding Junde, a backbone of ideological work and a second-class sergeant, said, "The key is how to master this 'golden key' to close internal relations and unlock the hearts of officers and soldiers."

"Don't be discouraged, this mistake is nothing, I have had it before, cheer up and you are still the best." During a break in a game, Jin Sentao, a backbone of ideological work and a fuel manager, shared his own experience with Chen Hao, who was competing in the same game, to help him analyze the reasons for the mistakes. Chen Hao, who had been silent for a long time, finally opened his heart and regained his confidence. Like Chen Hao, with the help of the backbone of ideological work, Li Tianle also took the initiative to speak out his thoughts and gradually became optimistic and cheerful.

The connection of the river bank depends on bridges, and the connection of hearts depends on communication. With the active ideological work backbones on the front line, the officers and soldiers of the brigade actively approached the party organization, followed the party members and cadres, worked together and made concerted efforts, and the relationship between officers and soldiers showed a new scene of harmony, friendship and mutual help.

Touching the hearts of soldiers, starting from understanding their hearts

——Investigation on the construction of the ideological work backbone team of a brigade of the 74th Group Army

■ Chen Xiaopeng Huang Chijing PLA Daily reporter Chen Dianhong

The missile unit of a brigade of the 74th Group Army organized live-fire training. Photo by Liu Yan'an

Facing the new generation of officers and soldiers, doing a good job in regular ideological work faces challenges

Since serving as the ideological work backbone, Qin Yunshang, a second-class sergeant of a brigade of the 74th Group Army, has always had a strong "skill panic".

This panic stems from real experience. For a period of time, the guard service company where Qin Yunshang was located had various tasks one after another, and many soldiers were tired of coping and their thoughts fluctuated.

Once, Qin Yunshang accidentally heard Corporal Xiao Zhang "complain" to a fellow soldier on the training ground: "It's too boring to work and live in a straight line every day."

Qin Yunshang refuted on the spot and simply said a few words about the glorious mission and the dedication of soldiers. He was not sure whether these words could really reach Xiao Zhang's heart.

"This situation reflects the lack of ability of ideological work backbones to carry out their work." The leader of the political work department of the brigade introduced that they conducted a survey of new soldiers in the past two years and found that more than 80% of the new soldiers had college education or above, and many of them had work experience before joining the army. In contrast, the education, experience and vision of ideological work backbones have an "inverted" phenomenon.

No matter who you talk to, most of them are "the same tune"; no matter what you talk about, most of them are "the same old things"; no matter whether you listen or not, most of them have to "come". The investigation found that some grassroots ideological work backbones, due to lack of experience, talked more about empty principles and provided fewer solutions to problems when solving ideological problems for officers and soldiers, resulting in unsatisfactory results. This also makes many grassroots leaders and ideological work backbones sigh: "Nowadays, soldiers are difficult to manage and teach, and ideological work is difficult to do."

In a sense, ideological work backbones must be "stronger soldiers" - stronger in heart, deeper in cognition, and skillful in communication. Li Deming, a platoon leader who was promoted from a soldier, said bluntly: "Actions speak louder than words. A qualified ideological work backbone must learn to persuade people with truth, infect people with true feelings, and move people with reality."

Wu Xincai, a third-class sergeant major in a certain company, has a big regret in his heart. A few years ago, Xiao Liu, a senior private in the class, was punished for going out in violation of regulations before being selected as a sergeant.

In fact, Xiao Liu's daily performance is "remarkable": military training results are at the forefront, theoretical learning is active, and he has a good reputation among his comrades. However, Xiao Liu's problems have long been in the making. He complained to his comrades more than once: his hometown is in the mountains, and he wanted to see the world in the big city, but he didn't expect the army to be so strict. After two years of military service, he didn't experience the city life that people yearn for...

At that time, the company was making every effort to prepare for the exercise mission. Wu Xincai, as a backbone of ideological work and also a backbone of training, was busy thinking about the

training plan and didn't pay much attention to the ideological fluctuations of the team members. The "question mark" that was not straightened out in time at that time eventually turned into an "exclamation mark", which brought a great shock to Wu Xincai.

"It is not new for ideological work backbones to 'hold multiple positions'." Instructor Zhang of the Guard Service Company said that most of the ideological work backbones of grassroots companies are concurrently held by management backbones. Management backbones are busy with daily work and it is difficult to take care of various tasks. Some ideological work backbones in non-management positions are often held by sergeants with strong abilities and qualities, but most of them are professional experts with heavy training tasks. During the interview, Li Chong, a second-class sergeant of a certain company, introduced his many "titles" to the reporter: sergeant branch committee member, ideological work backbone, grassroots atmosphere supervisor...

Some ideological work backbones have multiple positions and are unable to do everything. They do not pay enough attention to the soldiers' thoughts, which leads to the fact that some soldiers only think of looking for the reasons from the ideological perspective after they have problems.

These embarrassing things encountered by grassroots ideological work backbones have caused many soldiers to reflect on the construction of ideological work backbone teams: with the development of society and the development of information networks, soldiers have shown characteristics such as diverse thoughts and independent personalities, which brings considerable challenges to ideological work backbones in doing regular ideological work.

Grasp the pulse of thought and learn to use "empathy" to resolve "glass hearts"

Li Mingming, a backbone of ideological work in a certain company, could not have imagined that the new soldier Xiao Deng would "change his face" so quickly.

The officers and soldiers of the company are on duty for combat readiness all year round, and the pressure is relatively high. After many soldiers were assigned to the company, they suffered from "water and soil incompatibility" to varying degrees.

Heart-to-heart talks are an important magic weapon for our army's regular ideological work, and it is also a necessary basic skill for the backbone of ideological work. Faced with problems, the backbone of the company's ideological work actively approached to talk and counsel, and did a lot of work.

In Li Mingming's eyes, Xiao Deng is a worry-free new soldier: he has a high cultural level, good military quality, and strong psychological endurance. In his spare time, Li Mingming talked to Xiao Deng, but he didn't expect that he would comfort Li Mingming in return: "Squad leader, don't worry, I joined the army just to train myself, I can adapt to the work and life in the army, and I think it is very meaningful."

However, not long after, Xiao Deng seemed to have changed. He was listless on the training ground, often in a daze alone, and his temper became worse. His fellow soldiers quietly told Li Mingming that Xiao Deng had complained to him more than once: "This place is really unbearable."

The ideological work has been done, why did it suddenly become like this? Li Mingming "inquired" from many parties, but he never found the crux of the problem.

After a while, when talking about this again, Xiao Deng, who had been promoted to corporal, told Li Mingming with a wry smile: At that time, his girlfriend, who he had been dating for more than three years, was breaking up. Although Xiao Deng tried his best to win her back, he couldn't get back to her, so he was very anxious.

Lin Xingzhu, another ideological work backbone of the company, a second-class sergeant, also had a similar experience. A soldier in their class had a stable mind and trained hard in daily life. For a period of time, he had a falling out with his comrades over a trivial matter. Later, he learned that the soldier had encountered an accident at home and was in a low mood. The comrades who were unaware of the situation made fun of him, which led to the conflict.

"Some soldiers are active and energetic at work today, but they may be worried and listless tomorrow." Li Mingming said with emotion that nowadays, the soldiers who enter the barracks have rich social experience, more active thoughts, and more distinct personalities. It is not easy to find the hidden "crux" of the ideological situation.

In actual work, some soldiers hide their thoughts and do not reveal them. When encountering sensitive issues, what they say is inconsistent with their real thoughts; some prefer to confide in their girlfriends, family members, and soldiers of the same year, rather than talk to squad leaders, ideological work backbones, etc.; some choose to keep their worries in their hearts and digest them by themselves.

"It is not easy to be a qualified ideological work backbone." The brigade leader told reporters that the reasons behind the ideological changes and emotional fluctuations of young soldiers cannot be found by a few simple words from the leaders or ideological work backbones. It takes the joint efforts of a group of people to capture the "spiritual waves" of soldiers.

"Take the pulse of thought accurately and learn to resolve the "glass heart" with "empathy." In the view of the brigade leaders, ideological work backbones should be "leaders" for the growth and progress of comrades, and use their own understanding and actions to drive their comrades around them; be "glue" to close the relationship between officers and soldiers, be good at playing a bridging role, and promptly eliminate misunderstandings and contradictions between officers and soldiers; be "boosters" for transforming soldiers with poor training results, and take the initiative to form mutual assistance pairs with them to help them grow and progress.

Strengthening the ability to reduce the burden, so that the backbone of ideological work can "move forward lightly"

As a backbone of ideological work, Lin Xingzhu has a "unique secret book" that records the birthdays, native places, marital status, social relations, etc. of the squad members.

After 10 years of military service, Lin Xingzhu has always used the experience passed down by the old squad leader as a "magic weapon" for carrying out regular ideological work. This allows him to carry out ideological work with ease and win praise from the soldiers.

However, Lin Xingzhu still encountered a thorny problem-the new recruit Xiao Li was physically weak and introverted. He tried all the methods he could think of, but in return he was not grateful from Xiao Li.

"A psychological point of view is that when people determine whether their opinions and judgments are appropriate, they tend to compare themselves with others who are similar to themselves in general characteristics. This shows that people at the same level have similar thoughts and feelings and smaller psychological gaps." At the ideological work backbone training organized by the brigade, the lectures given by the leaders of the brigade's political work department gave Lin Xingzhu hope of solving the problem-letting soldiers of the same age do ideological work.

After chatting with Wang Erning, a soldier of the same year, Xiao Li opened his heart. He told Wang Erning: "I feel that my comrades around me are very good, and I don't have much sense of existence in this group."

After understanding Xiao Li's true thoughts, Lin Xingzhu announced that Xiao Li would be the head of the class's housekeeping, responsible for checking the daily housekeeping.

Wonderful changes began to appear. Since being assigned the task, Xiao Li has participated more actively in group activities and his housekeeping level has also improved significantly.

"There are 27 ideological work backbones of conscripts like Wang Erning in the whole brigade. In the selection of ideological work backbones, we must pay attention to breadth. Not only cadres, but also soldiers with progressive ideas and excellent work; not only party and league members, but also ordinary young soldiers with certain work experience." The instructor of a camp garden introduced that in the selection of ideological work backbones, they comprehensively considered factors such as personality characteristics, military age structure, and educational background, and reasonably selected ideological work backbones. After the introduction of this measure, the number of people willing to talk to ideological work backbones gradually increased.

"The heavier the burden, the more we need to care for the bearer." In response to the practical problems of ideological work backbones "holding multiple positions" and distracting their energy, the brigade party committee issued the "Detailed Rules for Grassroots Ideological Work Backbones" in accordance with relevant regulations to establish prestige for ideological work backbones, reduce unnecessary work, and try to let them "move forward with light luggage".

What impressed Sergeant Lu Xiangzhao was that he always felt that an important task of being an ideological work backbone was to keep good records. But now, for the heart-to-heart talk book and the contact book for personnel outside, except for the officers and soldiers with ideological fluctuations or psychological problems, there is no rigid requirement to record the situation of other officers and soldiers, which effectively frees him from the record work and allows him to spend more time on heart-to-heart talk.

"Ideological work cannot replace the solution of practical problems. Many ideological problems and practical problems are often linked together." During the interview, many grassroots officers mentioned that if the actual problems of officers and soldiers cannot be solved in time, doing more ideological work is just empty talk.

"To do ideological work, we must keep up and solve practical difficulties. Only in this way can the effect of ideological guidance be enhanced." This is the consensus of many ideological work backbones.

The father of soldier Xiao Zhong was hospitalized after being bitten by a snake while doing farm work. Not only was he unable to move, but his medical insurance had not been reimbursed for a long time, which put a heavy burden on his family. Xiao Zhong took the initiative to knock on the instructor's door to report the matter. After the instructor learned about the situation, he immediately reported to the brigade headquarters. The security department and the health company worked together to understand Xiao Zhong's father's condition and put forward treatment suggestions, while coordinating with the local medical insurance department for reimbursement. The problem was soon solved. In the brigade's "Helping Comrades" activity, the brigade party committee specifically helped his family, and Xiao Zhong showed a long-lost smile on his face.

Sharp Viewpoint

Talk together and stick together

■ Zhu Bu

At present, the diverse collision and rapid spread of social thoughts and cultures have an unprecedented impact on individual ideas. Young officers and soldiers in the new era have a strong imprint of the times, unique growth codes, and new value demands. How to face changes, do a good job in regular ideological work, and gather military morale are issues that leaders and ideological work backbones at all levels need to think about and solve.

As the backbone of ideological work, only by truly listening to the voices of soldiers, getting into their hearts, and understanding their feelings can we grasp the ideological dynamics, eliminate the gap between officers and soldiers, resolve psychological contradictions, prevent tendency problems, and gain everyone's trust.

In practice, some backbones of ideological work often fail to do their work properly. Some rely on experience and lack effective methods; some have a superficial understanding of the situation and cannot talk to the heart; some do ideological work simply and crudely, lack patience, and find

基层传真丨一名中士何以夺得全军军事建模竞赛一等奖

来源：中国军网-解放军报 作者：马永生 胡瑞智 张翔龙 责任编辑：刘上靖 发布：2025-01-17 07:35:54

手机看分享到

“聂凯旋，真了不起”“聂凯旋，祝贺你再获殊荣”……

室外寒气逼人，室内温暖如春。近日，在大家的祝贺声中，第 83 集团军某旅中士聂凯旋接过旅领导送来的获奖证书，脸上洋溢着灿烂的笑容。

这份沉甸甸的荣誉，让聂凯旋走进大家的视线——连队战士，全军军事建模竞赛一等奖，看似相距遥远的两件事，在他身上发生了奇妙的交集。

聂凯旋何许人也？该旅勤务保障营一名战士。高中毕业后，他参军入伍。2021 年 9 月，考入陆军装甲兵学院。第一次参观荣誉室时，学院师生参加全国各种竞赛获得的座座奖杯让他深受震撼，他梦想有一天，自己也能站在领奖台上。

梦想的种子一旦种下，便会快速生根发芽。入学不久，聂凯旋开始对数学建模着了迷。他一有空就钻进图书馆，如饥似渴地读书学习。面对陌生深奥的线性代数、微积分、数学规划等课程，以及相关软件操作，聂凯旋一点点攻关，一步步突破。

日复一日，辛勤的耕耘终有所获。第一次参加全国大学生数学建模竞赛，聂凯旋就夺得吉林赛区三等奖，让他信心倍增。接着参加第四届中国智能机器人大赛，再获深度学习智能车项目一等奖。在随后的两年里，他又接连获得 2 个一等奖、4 个二等奖和 1 个优胜奖。

一连串的荣誉，没有让聂凯旋迷失自我。2023 年，聂凯旋回到旅队，他把目光瞄向被誉为“作战筹划数字标尺”的军事建模，决心用所学知识为战斗力建设贡献力量。

理想很美好，现实却很骨感，他面临不少实际困难：日常训练任务重，用于学习研究的时间严重不足；连队里没有像样的配套资源可以利用……

每一座高山，在坚韧不拔的攀登者面前，都能被征服。面对一缺时间、二无条件的难题，聂凯旋没有放弃，他白天在演训场苦练军事技能，晚上学习编程、算法和建模写作，每天虽很劳累，但向上攀登的甘甜让他乐此不疲。

一次，旅领导来营里蹲点调研，被聂凯旋的故事深深打动。随后，在讨论如何鼓励基层官兵学习成才时，旅党委态度一致：提升部队战斗力，离不开基层官兵的创新创造，机关和营连必须给予支持，积极创造良好条件，让大家有时间、有平台、有资源学习成才、集智攻关。

让聂凯旋感动的是，旅党委说到做到，很快建起了科技工作站，专业技术骨干依托这一平台组建革新团队，进行攻关。同时，机关积极给予各类支持，鼓励基层官兵投身革新实践。有了这些利好条件和扶持，聂凯旋热情高涨，第一时间牵头成立军事建模攻关小组。

去年 5 月，收到全军军事建模竞赛通知后，聂凯旋和战友李豪组队参赛。选择题目时，他们主动弃易就难，选择了更有实战价值的“无人车运输路径规划与物资保障优化研究”。

军事建模没有标准答案，只有更优的解决方案。为此，聂凯旋仿真搭设了地形环境，充分考虑无人车行驶的安全性、稳定性和实效性；构建模型时，结合多次参加演习任务实际，梳理后装保障存在的难点堵点，科学制订前沿阵地保障方案，最终获得全军军事建模竞赛一等奖。

采访中，谈及聂凯旋，很多官兵说大家早就不把他当新闻人物了，因为在旅党委的关心支持下，基层已有更多的“聂凯旋”冒了出来。据介绍，单是近几年，该旅涌现 60 余名基层革新骨干，他们的成果获得多项国家发明专利。

“创新无止境，奋进不止步。”在新的成绩和荣誉面前，聂凯旋头脑十分清醒。作为科技工作站的骨干力量，聂凯旋的下一个目标是无人智能设备研究使用，他立志把军事建模转化为实实在在的战斗力。

编辑感言

不是新闻的新闻

■张 良

几天前，在某部队微信公众号上读到第 83 集团军某旅军士聂凯旋的故事后，编者立即联系集团军的新闻干事，请他第一时间采写报道——一个普通军士勇夺全军军事建模竞赛一等奖，难道不是一条“硬邦邦”的好新闻吗？

但他的解释让我沉默了半晌。他说：聂凯旋在集团军里早已不是新闻人物了，在此次获奖之前，早已拿下多个国家级竞赛奖项……

这名干事的回答让我感慨不已。一名来自基层一线的战士竟然站上了全军竞赛最高领奖台，这多么难得。但更难得的是，在该部队这已不是什么新闻。

细细品味，聂凯旋能取得如此多的成绩，固然与他的天赋和努力有关，但也必然离不开带兵人理念的转变、基层学习成才氛围的营造和部队建设水平的提升。

获奖不是终点，而是将成果转化成战斗力的起点。我们欣喜地看到，聂凯旋和战友牢记学用结合，努力将成果向部队战斗力转化，他们的做法值得点赞。

聂凯旋的战友们早已不把他当作新闻人物，恰恰是这篇报道最大的新闻点，也是我们这个伟大时代人人能成才、人人皆可成才、人人尽展其才良好局面的生动注脚。

Grassroots Fax | How did a sergeant win the first prize in the military modeling competition of the whole army?

Source: China Military Network-People's Liberation Army Daily Author: Ma Yongsheng Hu Ruizhi Zhang Xianglong Editor: Liu Shangjing Release: 2025-01-17 07:35:54

View and share on mobile phone

"Nie Kaixuan, it's amazing" "Nie Kaixuan, congratulations on winning the award again"...

It's cold outside, but warm inside. Recently, with everyone's congratulations, Sergeant Nie Kaixuan of a brigade of the 83rd Group Army took the award certificate sent by the brigade leader with a bright smile on his face.

[83rd GA: Central TC Army, Xinxiang, Hebei Province]

This heavy honor brought Nie Kaixuan into everyone's sight-a company soldier, the first prize of the military modeling competition of the whole army, two seemingly distant things, had a wonderful intersection in him.

Who is Nie Kaixuan? A soldier in the service support battalion of the brigade. After graduating from high school, he joined the army. In September 2021, he was admitted to the Army Armored Forces Academy. When he first visited the Honor Room, he was deeply shocked by the trophies won by teachers and students of the college in various national competitions. He dreamed that one day he would be able to stand on the podium.

Once the seeds of dreams are planted, they will quickly take root and sprout. Soon after entering school, Nie Kaixuan became fascinated with mathematical modeling. Whenever he had free time, he would go to the library and study eagerly. Faced with unfamiliar and profound courses such as linear algebra, calculus, mathematical programming, and related software operations, Nie Kaixuan tackled the problems bit by bit and made breakthroughs step by step.

Day after day, hard work finally paid off. In his first participation in the National College Students Mathematical Modeling Competition, Nie Kaixuan won the third prize in the Jilin Division, which gave him more confidence. Then he participated in the Fourth China Intelligent Robot Competition

and won the first prize in the Deep Learning Intelligent Car Project. In the following two years, he won 2 first prizes, 4 second prizes and 1 winning prize in succession.

A series of honors did not make Nie Kaixuan lose himself. In 2023, Nie Kaixuan returned to the brigade. He set his sights on military modeling, which is known as the "digital ruler of combat planning", and was determined to contribute to the construction of combat effectiveness with the knowledge he learned.

Ideals are beautiful, but reality is very skinny. He faces many practical difficulties: daily training tasks are heavy, and there is a serious lack of time for study and research; there are no decent supporting resources in the company...

Every mountain can be conquered by a tenacious climber. Faced with the difficulties of lack of time and no conditions, Nie Kaixuan did not give up. He practiced military skills in the training ground during the day and studied programming, algorithms and modeling writing at night. Although he was very tired every day, the sweetness of climbing up made him never tired.

Once, the brigade leader came to the camp for a field investigation and was deeply moved by Nie Kaixuan's story. Later, when discussing how to encourage grassroots officers and soldiers to learn and become talents, the brigade party committee had a consistent attitude: Improving the combat effectiveness of the troops is inseparable from the innovation and creation of grassroots officers and soldiers. The organs and battalions must provide support and actively create good conditions so that everyone has time, platforms, and resources to learn and become talents and to work together to solve problems.

What moved Nie Kaixuan was that the brigade party committee did what it said and quickly built a science and technology workstation. Professional and technical backbones relied on this platform to form an innovation team to solve problems. At the same time, the organs actively provided various support to encourage grassroots officers and soldiers to engage in innovation practice. With these favorable conditions and support, Nie Kaixuan was enthusiastic and took the lead in establishing a military modeling research group at the first time.

In May last year, after receiving the notice of the military modeling competition of the whole army, Nie Kaixuan and his comrade Li Hao formed a team to participate in the competition. When choosing the topic, they took the initiative to abandon the easy and difficult, and chose the more practical "unmanned vehicle transportation path planning and material support optimization research".

There is no standard answer to military modeling, only a better solution. To this end, Nie Kaixuan simulated the terrain environment, fully considering the safety, stability and effectiveness of the unmanned vehicle; when building the model, combined with the actual practice of participating in multiple exercises, sorted out the difficulties and bottlenecks in the rear-end support, and scientifically formulated a front-line support plan, and finally won the first prize in the military modeling competition of the whole army.

In the interview, when talking about Nie Kaixuan, many officers and soldiers said that they no longer regarded him as a news figure, because with the care and support of the brigade party committee, more "Nie Kaixuan" have emerged at the grassroots level. It is reported that in recent years alone, more than 60 grassroots innovation backbones have emerged in the brigade, and their achievements have won many national invention patents.

"Innovation is endless, and progress will not stop." In the face of new achievements and honors, Nie Kaixuan is very clear-headed. As a backbone of the science and technology workstation, Nie Kaixuan's next goal is to research and use unmanned intelligent equipment. He is determined to transform military modeling into real combat effectiveness.

Editor's Notes

News that is not news

■ Zhang Liang

A few days ago, after reading the story of Nie Kaixuan, a sergeant of a brigade of the 83rd Group Army on a certain unit's WeChat public account, the editor immediately contacted the news officer of the group army and asked him to write a report as soon as possible - an ordinary sergeant won the first prize in the military modeling competition of the whole army. Isn't it a "hard" good news?

But his explanation made me silent for a long time. He said: Nie Kaixuan is no longer a news figure in the group army. Before winning this award, he had already won many national competition awards...

The officer's answer made me feel deeply. It is so rare that a soldier from the grassroots front line actually stood on the highest podium of the whole army competition. But what is even more rare is that this is no longer news in the unit.

If you think about it carefully, Nie Kaixuan's ability to achieve so many achievements is certainly related to his talent and hard work, but it is also inseparable from the transformation of the concept of leaders, the creation of a learning and talent atmosphere at the grassroots level, and the improvement of the level of unit construction.

Winning is not the end, but the starting point for transforming achievements into combat effectiveness. We are delighted to see that Nie Kaixuan and his comrades keep in mind the combination of learning and practice, and strive to transform the results into the combat effectiveness of the troops. Their approach deserves praise.

Nie Kaixuan's comrades no longer regard him as a news figure, which is precisely the biggest news point of this report, and a vivid footnote to the good situation in our great era where everyone can become talented, everyone can become talented, and everyone can show their talents.

一个连队的“胜战之约”

来源：中国军网-解放军报 作者：廖晓彬 向黎鸣 责任编辑：刘上靖

2025-01-17 07:01:12 0

陆军某旅以任务牵引激发官兵“双争”热情——

鼓足干劲再赴“胜战之约”

■解放军报特约记者 廖晓彬 记者 向黎鸣

“去年，我们连队打了‘翻身仗’，履行了‘胜战之约’。新的一年，我们要守住荣誉、再创佳绩，实现人人突破、整体提升……”1 月初，陆军某旅道路二连干部楚国梁在新年度工作展开之际，再次与官兵定下新的“胜战之约”。

回顾去年的“履约之路”，楚国梁感慨万千。过去的一年，该连官兵拼搏奋斗、成绩斐然，连队被评为“四铁”先进单位。“我刚到道路二连时，连队各项建设亮点不多，‘一般’‘平常’是大家评价连队整体建设时的常用词。”楚国梁坦言。

后来，该旅领导到连队挂钩帮带，对此情况展开思想摸排和深入调研发现，不少官兵创先争优劲头不足，工作中存在得过且过思想。比如，有的同志认为，单位承担的多是保障任务，练好专业技能、做好日常保障就可以了，没必要严抠细训；有的认为，连队很少参加大项任务和上级组织的比武竞赛，展示自己的机会不多、舞台有限，干多干少区别不大。

“官兵心气不足，就要通过任务牵引的方式，倒逼大家思进取、谋进步、争荣誉。”了解这一情况后，该旅领导与连队干部骨干一起分析形势、出谋划策，明晰工作用力方向。制订补差计划、完善强训方案、明确阶段时限……连队干部骨干在军人大会上与官兵一起定下“胜战之约”：“到年底，坚决打个‘翻身仗’！”

一场关乎荣誉的战斗就此打响：连队党支部充分发挥战斗堡垒作用，干部骨干以身作则、率先垂范，白天铆在训练场练技能，晚上自我加压研究新大纲、拓展学理论；官兵结成帮带对子、组成互助小组，紧盯短板弱项开展专攻精练，强短板、补弱项。后来，他们总结形成“四化”组训法，不仅助推连队军事训练成绩不断提升，还在全旅得到推广。

“只有敢交任务、多压担子，让官兵在摔打中经风雨、见世面、长才干、壮筋骨，才能促进其能力升级，提升基层建设整体水平。”总结这个连的变化，该旅领导深有体会地说。

一次，上级组织建制连比武考核，旅领导全面分析各连建设情况后，最终推荐道路二连参加。受领任务后，连队官兵精神振奋，誓言在比武中为集体争荣誉。为此，连队专门成立攻关小组，聚焦难点课目细化训练方案，通过专长带训、集中组训等方式反复研练，最终在比武考核中以出色表现受到表彰。

付出终有收获！该连官兵士气更加高涨，在群众性练兵比武、野外驻训、演习演训保障等任务中屡创佳绩。去年底，他们在旅队组织的建制连比武考核中斩获第一名。

应急保障能力有待提升，骨干队伍建设还需加强，新兵帮带培养要加快步伐……看着去年年终总结梳理的差距不足，楚国梁盘算着召集干部骨干研商对策。不远处的训练场上，连队官兵精神饱满、干劲十足，向着新的“胜战之约”发起冲锋。

A company's "promise of victory"

Source: China Military Network-People's Liberation Army Daily Author: Liao Xiaobin Xiang Liming Editor: Liu Shangjing

2025-01-17 07:01:12 0

A certain army brigade uses tasks to stimulate the "double competition" enthusiasm of officers and soldiers-

Work hard to meet the "promise of victory" again

■People's Liberation Army Daily Special Correspondent Liao Xiaobin Reporter Xiang Liming

"Last year, our company fought a "turnaround" and fulfilled the "promise of victory". In the new year, we must keep our honor, create more achievements, achieve breakthroughs for everyone, and improve overall..." In early January, Chu Guoliang, a cadre of the Second Road Company of a certain army brigade, once again made a new "promise of victory" with officers and soldiers at the beginning of the new year's work.

Looking back on last year's "road to fulfillment", Chu Guoliang was filled with emotion. In the past year, the officers and soldiers of the company worked hard and made remarkable achievements, and the company was rated as an advanced unit of "four irons". "When I first arrived at the Second Road Company, there were not many highlights in the company's construction. 'General' and 'normal' were common words used by everyone to evaluate the company's overall construction." Chu Guoliang said frankly.

Later, the leaders of the brigade went to the company to help and guide, and conducted ideological investigations and in-depth research on this situation. They found that many officers and soldiers were not motivated enough to be the first and the best, and they had a muddle-through mentality in their work. For example, some comrades believed that the unit was mostly responsible for

support tasks, and it was enough to practice professional skills and do daily support, and there was no need for strict and detailed training; some believed that the company rarely participated in major tasks and competitions organized by superiors, and there were not many opportunities to show themselves, and the stage was limited, so there was not much difference between doing more and doing less.

"If the officers and soldiers are not motivated enough, we must force everyone to think about progress, seek progress, and strive for honor through task-driven methods." After understanding this situation, the leaders of the brigade and the backbone cadres of the company analyzed the situation, made suggestions, and clarified the direction of work efforts. Formulate a plan to make up for the shortfall, improve the training plan, and clarify the time limit for each stage... The company cadres and backbones made a "victory agreement" with the officers and soldiers at the military meeting: "By the end of the year, we will resolutely fight a 'turnaround battle'!"

A battle of honor has begun: the company party branch fully plays the role of a fighting fortress, the cadres and backbones set an example, practice skills in the training ground during the day, and study the new outline and expand the theory at night; the officers and soldiers form pairs and mutual assistance groups, focus on the shortcomings and weaknesses, carry out specialized training, strengthen the shortcomings and make up for the weaknesses. Later, they summarized and formed the "four modernizations" training method, which not only helped the company's military training results to continue to improve, but also was promoted throughout the brigade.

"Only by daring to assign tasks and putting more pressure on the burden, so that the officers and soldiers can experience the wind and rain, see the world, grow their talents, and strengthen their muscles in the fight, can their ability upgrade be promoted and the overall level of grassroots construction be improved." Summarizing the changes in this company, the leaders of the brigade said with deep experience.

Once, the superior organized a competition for the company. After a comprehensive analysis of the construction of each company, the brigade leaders finally recommended the Road Company No. 2 to participate. After receiving the task, the company's officers and soldiers were in high spirits and vowed to win honor for the collective in the competition. To this end, the company set up a special research group to focus on difficult subjects and refine the training plan. Through training with expertise and centralized training, the company was repeatedly trained and finally commended for its outstanding performance in the competition.

There is always a reward for hard work! The morale of the company's officers and soldiers is even higher, and they have repeatedly achieved good results in mass training competitions, field training, exercises and training support. At the end of last year, they won the first place in the competition for the company organized by the brigade.

The emergency support capability needs to be improved, the construction of the backbone team needs to be strengthened, and the training of new recruits needs to be accelerated... Looking at the

gaps in the summary at the end of last year, Chu Guoliang planned to convene cadres and backbones to discuss countermeasures. On the training ground not far away, the company's officers and soldiers were full of energy and enthusiasm, charging towards a new "promise of victory".

军营观察丨一个蓝军班组的输赢观

来源：解放军报 作者：司长靖 魏允干 鲁桦等 责任编辑：林诗清 2025-01-17 13:23:31

二级上士担纲蓝军班组负责人

■司长靖 魏允干

“什么才是一支真正的蓝军，这支队伍该如何发挥作用？”在陆军某旅，一个常态参与对抗训练的蓝军班组成立，二级上士梁东升被任命为这支新队伍的负责人。作为一名老兵，他迎来一项全新课题。

“到实战化训练中去寻找答案！”很快，一场红蓝对抗被列入训练计划。梁东升明白，对抗是成为一支合格蓝军的最佳途径和最快方式。

红蓝双方严阵以待，对抗正式拉开帷幕。梁东升带领班组按照预定方案展开行动。

“看来红方也不过如此，这次我们肯定能速战速决！”梁东升带领的班组凭借着武器装备的优势果断进攻，迅速突破了红方的第一道防线。察觉红方并未拿出有效的反制措施，蓝方的防备心理逐渐放下，进攻招法更加大胆。

然而，他们不知道的是，这看似一边倒的局势，其实是红方精心布置的“陷阱”。

战场上，硝烟弥漫。红方虽然处于被动，但他们并没有乱了阵脚，而是密切关注着蓝方的一举一动。

梁东升和队友们在不断推进的过程中，逐渐暴露了自己的战术打法和兵力部署。红方抓住时机，开始反击，原本看似混乱和被动的红方，突然变得有条不紊，并迅速重新部署作战单元。

梁东升被红方突如其来的反击打得晕头转向，原本以为胜券在握，却没想到局势瞬间逆转。

“怎么回事？”梁东升还未来得及调整战术，班组便陷入了被动挨打的局面。

随着战斗的进行，红方逐渐掌握了主动权，在红方的猛烈攻击下，蓝方的防线逐渐崩溃。最终，红方成功逆袭，赢得这场对抗的胜利。

“这和我们之前的筹划完全不一样”“我们的武器装备更有优势，这样的结果不该出现”……训练总结会上，梁东升和队友们面对对抗结果，感到困惑和焦虑。

接下来的日子里，梁东升经常带领班组人员泡在会议室学习研讨。“作战方法和手段要有蓝军的样子”“要从实兵演习中体会战术战法精髓”……大家你一言我一语，谈论着自己对蓝军的理解。

经过讨论，梁东升和战友们的训练思路慢慢变得清晰：加强理论学习，调整组员编成、训练计划、武器配备等，学习各种经典战例，重新设计战术战法，逐步探索出一套符合蓝军作战特点的组训方式。他们深知，只有在逼真的实战环境中，不断突破自我，才能真正扮演好“磨刀石”角色，才能让部队锻造出更加过硬的战斗力。

一场“磨刀石”自我淬炼的头脑风暴，在这个班组上演……

Military Camp Observation ｜ A Blue Army Team's View on Winning and Losing

Source: PLA Daily Author: Si Changjing, Wei Yungan, Lu Hua, etc. Editor: Lin Shiqing 2025-01-17 13:23:31

Second Sergeant Takes Charge of Blue Army Team

■ Si Changjing, Wei Yungan

"What is a real blue army, and how should this team play a role?" In a certain army brigade, a blue army team that normally participates in confrontation training was established, and Second Sergeant Liang Dongsheng was appointed as the head of this new team. As a veteran, he ushered in a brand new topic.

"Go to actual combat training to find the answer!" Soon, a red-blue confrontation was included in the training plan. Liang Dongsheng understood that confrontation is the best way and fastest way to become a qualified blue army.

The red and blue sides were ready, and the confrontation officially kicked off. Liang Dongsheng led the team to act according to the predetermined plan.

"It seems that the Red side is just so-so. We will definitely be able to win this time!" The team led by Liang Dongsheng attacked decisively with the advantage of weapons and equipment, and quickly broke through the first line of defense of the Red side. Realizing that the Red side did not take effective countermeasures, the Blue side gradually let down its defensive psychology and became more bold in its offensive tactics.

However, what they didn't know was that this seemingly one-sided situation was actually a "trap" carefully arranged by the Red side.

The battlefield was filled with smoke. Although the Red side was in a passive position, they did not lose their footing, but paid close attention to the Blue side's every move.

Liang Dongsheng and his teammates gradually exposed their own tactics and troop deployment in the process of continuous advancement. The Red side seized the opportunity and began to counterattack. The Red side, which seemed chaotic and passive, suddenly became orderly and quickly redeployed combat units.

Liang Dongsheng was dizzy by the sudden counterattack of the Red side. He thought he had a sure win, but he didn't expect the situation to reverse in an instant.

"What's going on?" Before Liang Dongsheng had time to adjust his tactics, the team fell into a passive situation.

As the battle progressed, the Red Army gradually took the initiative. Under the fierce attack of the Red Army, the Blue Army's defense line gradually collapsed. In the end, the Red Army successfully counterattacked and won the battle.

"This is completely different from our previous plan" "Our weapons and equipment are more advantageous, and such a result should not have occurred"... At the training summary meeting, Liang Dongsheng and his teammates were confused and anxious about the results of the confrontation.

In the following days, Liang Dongsheng often led the team members to study and discuss in the conference room. "Combat methods and means should look like the Blue Army" "We should understand the essence of tactics and methods from actual military exercises"... Everyone talked about their understanding of the Blue Army.

After discussion, Liang Dongsheng and his comrades' training ideas gradually became clear: strengthen theoretical learning, adjust team composition, training plans, weapons and equipment, learn various classic battle examples, redesign tactics and methods, and gradually explore a set of training methods that meet the combat characteristics of the Blue Army. They know that only by constantly breaking through themselves in a realistic combat environment can they truly play the role of "grindstone" and enable the troops to forge a stronger combat effectiveness.

A brainstorming session of "grindstone" self-tempering took place in this team...

“跑步时要调整好呼吸节奏，以防岔气”“匍匐训练时注意身体姿势，避免受伤”……隆冬时节，陆军某旅训练场，新兵易湘鹏完成当天的课目内容后，与战友分享自己的训练心得。

易湘鹏从小酷爱竞技体育，入伍前还学过武术，身体素质、体能基础都不错。去年底新训结束后，他被分配到该旅侦察连，在训练中很快脱颖而出，成为连队军事训练小教员。

“我能短时间内快速适应新岗位，并不断取得新进步，与旅队推行的新兵精细分配定岗举措分不开。”谈起下连后的成长经历，易湘鹏深有感触。

原来，新兵入营集训期间，该旅机关相关部门就结合新兵思想反映，围绕“正确对待分配定岗”开展专题教育，引导大家廓清模糊认识、摆正自身定位，尽快以良好精神状态融入新集体；对新兵的教育背景、专业特长、成长经历、个人意愿等进行全面摸底，统计梳理每名同志入伍前参加行业竞赛、取得等级证书、实习就业经历等情况，并区分不同类别建立“新兵信息库”。

在此基础上，他们专门组织新兵召开座谈会，介绍旅队专业岗位、职能任务、人才队伍建设等方面情况，引导新兵结合自身情况确定岗位意向。同时，把了解到的新兵基本情况提供给基层单位，让各营连结合单位建设、专业岗位等方面实际提出人力需求。

“结合工作实际，我们统筹考虑旅队全面建设、基层单位需要和新兵个人意愿，秉持结合专业编配初分、考虑特长意愿细分、根据具体情况精分的原则，逐一为新兵进行精细分配定岗，最大限度做到量才使用、人岗相宜。”该旅机关干部付梁对记者说，他们此前调研了解到，以往新兵定岗很多时候都是“按缺分配”，方式单一、操作粗放，以至于有的基层单位感觉接收的新兵“不合胃口”，而一些新兵也对分配的岗位“心有落差”，不但不利于新兵成长，而且影响基层整体建设。

为此，该旅在广泛征求意见建议的基础上，着眼人力资源的优化配置，探索开展新兵精细分配定岗，通过“人岗双向选”提升岗位适配度；跟进新兵岗位表现动态进行“二次选岗”，结合用人单位和新兵本人意见视情调整岗位，最大限度做到人岗适配。同时，他们还遴选骨干对新兵开展帮带培养，逐人制订“成长进步路线图”，通过明确目标、榜样引领、激发担当等助力新兵成长成才。

在校读书时，新兵孔令辉已考取计算机网络管理工程师技术水平等级证书。机关部门同志了解他的能力专长后，将其分配到通信分队，并指派专业骨干与其进行结对帮带。如今，孔令辉在岗位工作中发挥特长、优势愈显，进一步坚定了努力的方向。

入伍前，新兵廖绮虹学习过医学专业。该旅卫生连干部了解这一情况后，主动靠上去跟他交流谈心，介绍卫生连岗位设置、职能任务、人员配备等情况。被分配到卫生连后，廖绮虹在岗位上干得如鱼得水，还学习掌握了应急救护等专业技能。

新兵张钊郡是二次入伍，具有一定的驾驶专业基础。结合他的意愿，旅队将其分配到运输连。他铆定岗位精练驾驶技能，很快赢得连队干部骨干认可。“旅队给我提供专业对口的岗位，我一定倍加珍惜、刻苦训练，争取早日取得好成绩为集体增光添彩。”在该旅组织的新兵交流会上，张钊郡如是说。

“育人如种树，带兵人就是种树人。新兵们如同稚嫩的幼苗，能否成长为枝繁叶茂的参天大树，需要每名带兵骨干认真思考和研究。”该旅领导说，在实践探索的基础上，他们指定机关干部跟进新兵岗位成长过程，结合新兵训练生活、教育管理等方面遇到的具体问题，与基层干部骨干一起调整改进工作方法，同步开展心理调适、组织谈心交心和教育引导，帮助新兵坚定信念，在火热军营淬炼成长。

据了解，该旅下一步将总结实践经验、完善工作机制，结合新兵岗位表现遴选人才苗子，针对性提供能力锻造平台，助力他们尽快成长成才；根据旅队人才建设需要，选拔专业技能过硬的列兵担纲训练小教员，为培养骨干队伍储备力量。同时，着眼练用新装备需要积极发挥大学生士兵作用，对有相关专业学习工作经历、基础较好的大学生新兵进行重点培养，通过送学培训、厂家跟训、换岗轮训等缩短成长周期，真正把兵员素质优势转化为军事训练优势，不断为部队战斗力建设注入新动能。

New recruits are growing up | A certain army brigade is exploring the fine allocation and posting of new recruits

Source: PLA Daily Author: Deng Honghui Wei Qiaoqiao Editor: Lin Shiqing 2025-01-19 13:52:27

A certain army brigade is exploring the fine allocation and posting of new recruits——

Two-way selection of people and positions, fertile soil for seedlings

■ Deng Honghui PLA Daily reporter Wei Qiaoqiao

cd212a37acbc20f9d0213fa40b266f1b.jpg

The brigade organized new recruits to carry out red education in the brigade history corridor. Photo by Xie Ruifeng

"Adjust your breathing rhythm when running to prevent side stitches" "Pay attention to your body posture during crawling training to avoid injuries"... In the middle of winter, at the training ground of a certain army brigade, new recruit Yi Xiangpeng shared his training experience with his comrades after completing the content of the day's course.

Yi Xiangpeng has loved competitive sports since he was a child. He also learned martial arts before joining the army. He has good physical fitness and physical fitness. After the new training ended at the end of last year, he was assigned to the reconnaissance company of the brigade. He quickly stood out in the training and became a military training instructor of the company.

"I can quickly adapt to the new position in a short period of time and make new progress continuously, which is inseparable from the fine allocation and posting measures implemented by the brigade." Talking about his growth experience after joining the company, Yi Xiangpeng was deeply touched.

It turned out that during the training of new recruits, the relevant departments of the brigade carried out special education around "correctly treating the allocation and posting" in combination with the ideological reflection of the new recruits, guiding everyone to clarify vague understandings, correct their own positioning, and integrate into the new collective as soon as possible with a good mental state; conduct a comprehensive survey of the new recruits' educational background, professional expertise, growth experience, personal wishes, etc., and statistically sort out the situation of each comrade's participation in industry competitions, obtaining grade certificates, internship and employment experience before joining the army, and distinguish different categories to establish a "new recruit information database".

On this basis, they specially organized a symposium for new recruits to introduce the professional positions, functional tasks, and talent team building of the brigade, and guide the new recruits to determine their job intentions based on their own situation. At the same time, the basic situation of the new recruits was provided to the grassroots units, so that each battalion and company could put forward human resource needs based on the actual unit construction and professional positions.

"In combination with the actual work, we comprehensively consider the overall construction of the brigade, the needs of grassroots units and the personal wishes of the new recruits. We adhere to the principle of combining the initial division of professional allocation, considering the subdivision of specialties and wishes, and fine division according to specific circumstances. We

will finely allocate and assign positions for the new recruits one by one, and maximize the use of talents and the matching of people and positions." Fu Liang, a cadre of the brigade, told reporters that they had previously investigated and learned that in the past, the new recruits were often assigned positions "according to vacancies", with a single method and extensive operation, so that some grassroots units felt that the new recruits they received were "not to their taste", and some new recruits also "felt disappointed" with the assigned positions, which was not only not conducive to the growth of new recruits, but also affected the overall construction of the grassroots.

To this end, the brigade, based on extensive solicitation of opinions and suggestions, focused on the optimal allocation of human resources, explored the fine allocation and posting of new recruits, and improved the job adaptability through "two-way selection of people and jobs"; followed up the dynamics of new recruits' job performance to conduct "secondary job selection", and adjusted the job according to the opinions of the employer and the new recruits themselves, so as to maximize the fit of people and jobs. At the same time, they also selected backbones to help and train new recruits, and formulated a "growth and progress roadmap" for each person, helping new recruits grow and become talents by clarifying goals, leading by example, and inspiring responsibility.

When studying at school, recruit Kong Linghui had obtained the technical level certificate of computer network management engineer. After understanding his abilities and expertise, the comrades in the department assigned him to the communication team and assigned professional backbones to pair him up with him. Now, Kong Linghui has played his strengths and advantages in his job, which has further strengthened the direction of his efforts.

Before joining the army, recruit Liao Qihong studied medicine. After the cadres of the brigade's health company learned about this situation, they took the initiative to approach him to communicate and talk with him, introducing the job setting, functional tasks, and staffing of the health company. After being assigned to the medical company, Liao Qihong worked very well in the position and also learned professional skills such as emergency rescue.

Zhang Zhaojun, a new recruit, was enlisted for the second time and had a certain professional driving foundation. According to his wishes, the brigade assigned him to the transport company. He focused on his position and refined his driving skills, and soon won the recognition of the company's cadres and backbones. "The brigade provided me with a professional position, I will cherish it, train hard, and strive to achieve good results as soon as possible to add luster to the collective." Zhang Zhaojun said at the recruit exchange meeting organized by the brigade.

"Educating people is like planting trees, and the leaders are the tree planters. The recruits are like tender seedlings. Whether they can grow into towering trees with luxuriant branches and leaves requires serious thinking and research by each leading cadre." The brigade leader said that based on practical exploration, they designated cadres to follow up the growth process of recruits in their posts, combined with the specific problems encountered in the training life, education management and other aspects of recruits, and adjusted and improved the working methods with the grassroots

cadres and backbones, and simultaneously carried out psychological adjustment, organized heart-to-heart talks and education guidance to help recruits strengthen their beliefs and grow in the hot military camp.

It is understood that the brigade will summarize practical experience and improve the working mechanism in the next step, select talents based on the performance of recruits in their posts, provide targeted ability-building platforms, and help them grow and become talents as soon as possible; according to the needs of the brigade's talent construction, select privates with strong professional skills to train young instructors to reserve strength for the cultivation of backbone teams. At the same time, with a view to training and using new equipment, we need to actively play the role of college student soldiers, focus on training college student recruits who have relevant professional learning and work experience and a good foundation, shorten the growth cycle by sending them to study and train, training them with manufacturers, and rotation training, truly transform the advantages of soldier quality into military training advantages, and continuously inject new impetus into the construction of the unit's combat effectiveness.

新疆军区某团组织多专业实战化联合训练

来源：解放军报 作者：刘金福 师恩泽 责任编辑：林诗清 2025-01-19 13:53:58

新疆军区某团组织多专业实战化联合训练——

复杂环境练体系

■刘金福 师恩泽

“前方道路被毁，迅速前出开辟通路！”冬日，新疆军区某团一场实战化训练在茫茫雪野拉开帷幕。面对突然而至的特情，指挥员李金龙果断下达处置命令。

工兵分队闻令行动，操作手熟练操控机械、开辟应急通道；侦察分队借助无人机对周边情况展开侦察，实时回传战场信息……训练中，冷风裹挟着雪粒，打在官兵脸庞，大家依然精神饱满、士气高昂，在广袤雪野奋勇冲锋，培育战斗精神、锻造过硬本领。

“打仗不分天气好坏。越是天气恶劣、环境复杂，越能锤炼官兵战斗意志、检验装备战斗性能。”该团领导说，近段时间，驻地气温骤降、连降大雪，他们结合新年度训练计划，组织多个兵种专业，围绕战场侦察、战术协同、火力打击等课目组织了此次训练。其间，机关部门结合现地情况，随机导调多种特情，构设难局危局险局，让官兵在近似实战环境中接受磨砺，检验提升部队应急应战能力。

工兵分队作业完毕，步兵分队快速穿过通路。途中，他们遭遇“敌”火力打击。李金龙快速研判态势后果断调整战术，并呼叫炮兵火力支援。刹那间，炮弹呼啸而出，直扑目标地域。与此同时，步兵分队趁机发起冲锋，交替掩护向“敌”纵深突进。

“遭强电磁干扰！”一波未平，一波又起。接到情况通报，通信分队官兵立即按照应对预案切换备用通信信道，快速恢复通信链路。电子对抗分队官兵同步展开搜索，精准定位干扰源，并对“敌”实施干扰压制，确保指挥信息顺畅传递。

恰在此时，侦察分队回传新的情报信息：“发现‘敌’炮阵地！”计算射击诸元、调整射向、装填炮弹……按照分队指挥员指令，炮兵分队官兵展开一系列娴熟操作，对“敌”目标展开火力打击。

“通过此次训练，我看到了自己在使用新装备方面存在的差距。”训练结束，步兵分队中士田鹏录说，下一步，他将针对存在的不足开展专攻精练，在连队专业骨干帮带下，切实打牢基础、逐步补差强能，力争在新年度训练中让成绩更进一步。

A regiment of the Xinjiang Military Region organized a multi-professional practical joint training

Source: PLA Daily Author: Liu Jinfu Shi Enze Editor: Lin Shiqing 2025-01-19 13:53:58

A regiment of the Xinjiang Military Region organized a multi-professional practical joint training——

Complex environment training system

■Liu Jinfu Shi Enze

"The road ahead is destroyed, quickly move forward to open up a passage!" In winter, a practical training of a regiment of the Xinjiang Military Region kicked off in the vast snowy wilderness. Faced with the sudden special situation, Commander Li Jinlong decisively issued a disposal order.

The engineering detachment acted upon hearing the order, and the operators skillfully operated the machinery and opened up emergency passages; the reconnaissance detachment used drones to conduct reconnaissance of the surrounding situation and sent back battlefield information in real time... During the training, the cold wind wrapped in snow particles hit the faces of officers and soldiers, but everyone was still full of energy and high morale, bravely charging in the vast snowy wilderness, cultivating fighting spirit and forging strong skills.

"Fighting does not distinguish between good and bad weather. The worse the weather and the more complex the environment, the more it can temper the officers and soldiers' fighting will and test the combat performance of equipment." The leader of the regiment said that in recent times, the temperature in the garrison has dropped sharply and heavy snow has fallen. They have organized

multiple arms and specialties in accordance with the new annual training plan, and organized this training around battlefield reconnaissance, tactical coordination, firepower strike and other subjects. During this period, the organs and departments combined the local situation, randomly guided and adjusted various special situations, and set up difficult and dangerous situations, so that officers and soldiers could be tempered in an environment close to actual combat, and test and improve the emergency response capabilities of the troops.

After the engineering unit completed the work, the infantry unit quickly crossed the passage. On the way, they encountered "enemy" firepower. Li Jinlong quickly judged the situation and decisively adjusted the tactics, and called for artillery fire support. In an instant, the shells whistled out and rushed straight to the target area. At the same time, the infantry unit took the opportunity to launch a charge, alternating to cover the advance into the depth of the "enemy".

"Strong electromagnetic interference!" One wave has not settled, another wave rises. After receiving the situation report, the officers and soldiers of the communication unit immediately switched to the backup communication channel according to the response plan and quickly restored the communication link. The officers and soldiers of the electronic countermeasure unit simultaneously launched a search, accurately located the interference source, and implemented interference suppression on the "enemy" to ensure the smooth transmission of command information.

Just at this time, the reconnaissance unit sent back new intelligence information: "Found the 'enemy' artillery position!" Calculate the firing parameters, adjust the firing direction, load the shells... According to the instructions of the unit commander, the officers and soldiers of the artillery unit carried out a series of skilled operations and launched firepower strikes on the "enemy" target.

"Through this training, I saw the gap in my use of new equipment." At the end of the training, Tian Penglu, a sergeant of the infantry unit, said that in the next step, he will focus on the existing deficiencies and carry out specialized training. Under the help of the professional backbone of the company, he will lay a solid foundation, gradually make up for the gap and strengthen the ability, and strive to make further progress in the new year's training.

三中全会精神在军营丨按纲抓建破解制约战斗力生成的短板弱项

来源：解放军报 作者：曹春波 赵文彦 责任编辑：刘上靖 2025-01-19 14:10:28

陆军某旅深入学习贯彻党的二十届三中全会精神——

深学笃行，按纲抓建强动力

■曹春波 赵文彦

“下达命令要素不齐全”“防护装具穿戴不规范”……日前，陆军某旅“政治工作成绩优异连”组织一场实战化训练，训练结束后，督导组结合训练情况现场讲评，帮助官兵梳理出多个制约战斗力生成的短板弱项。

“《中共中央关于进一步全面深化改革、推进中国式现代化的决定》提出，健全依法治军工作机制。依法治军是实现党在新时代的强军目标的必然要求，基层建设落实依法治军要求，最基本的就是贯彻条令条例，坚持按纲抓建。”该旅领导介绍，党的二十届三中全会召开后，他们要求各级进一步立起严的标准，依法依规按纲抓建，建立健全长效机制，推进部队各项工作在法治轨道上行稳致远。

某营部分连队任务点位多、人员较分散，且各点位情况不尽相同，“大水漫灌式”抓建指导难以发挥有效作用。为此，该营党委结合学习贯彻三中全会精神，组织召开按纲抓建形势分析会，针对各点位特点和任务实际，明确抓建具体内容和目标任务，让基层决策有依据、抓建有参考。“营队抓建指导更有针对性，连里布置任务更加灵活高效，人员安排更加科学合理，官兵工作劲头更足了。”该营某连一名干部说。

据了解，该旅结合学习贯彻三中全会精神，严格落实条令条例和规章制度。他们大力锻造打仗型党委班子，提升把关定向、议事决策、解决问题等能力，严格按照法定程序、标准、权限开展工作，要求机关筹划部署工作、指导检查工作要以法规制度为依据，持续纠治“四风”特别是形式主义、官僚主义，切实解决“五多”问题为基层减负，增强基层建设管理的内生动力。同时，他们深入开展法治宣传教育，引导官兵树立办事依法、遇事找法、解决问题用法、化解矛盾靠法的意识，筑牢依法抓建基层的思想基础，不断提高基层建设正规化、法治化水平。

某连组织的一次学习讨论中，该连一名干部表示，文电经统一汇总、合并处理后，数量较以往明显减少，不少工作通过电话沟通就能及时处理，办公效率大幅提高。“部队调整改革以来，治军理念、治军方式发生深刻转变，各级依法治军工作力度明显增强。”对此，在该连蹲点的一名机关干部介绍，为进一步提升部队正规化建设水平，旅党委要求机关各部门必须根据任务实际、基层实情加强动态统筹，检查指导不得打乱基层正常工作秩序。

深学笃行，按纲抓建强动力。连日来，随着学习贯彻党的二十届三中全会精神不断深入，该旅官兵练兵备战热情更加高涨。训练场上，官兵围绕新装备战斗力生成，集智攻关难点问题、专攻精练重点课题、聚力创新战法训法，不断推动部队战斗力提质升级。

The spirit of the Third Plenary Session of the 18th CPC Central Committee in the military camp ｜ Build according to the outline to solve the shortcomings and weaknesses that restrict the generation of combat effectiveness

Source: PLA Daily Author: Cao Chunbo Zhao Wenyan Editor: Liu Shangjing 2025-01-19 14:10:28

A certain army brigade thoroughly studied and implemented the spirit of the Third Plenary Session of the 20th CPC Central Committee——

Learn deeply and practice diligently, build according to the outline to strengthen motivation

■Cao Chunbo Zhao Wenyan

"Incomplete elements of issuing orders" and "Irregular wearing of protective equipment"... Recently, the "Excellent Political Work Company" of a certain army brigade organized a practical training. After the training, the supervision team combined the training situation on the spot to comment on it and help officers and soldiers sort out multiple shortcomings and weaknesses that restrict the generation of combat effectiveness.

"The Decision of the CPC Central Committee on Further Deepening Reform and Promoting Chinese-style Modernization" proposes to improve the working mechanism of governing the army according to law. Governing the army according to law is an inevitable requirement for realizing the party's goal of strengthening the army in the new era. The most basic thing for grassroots construction to implement the requirements of governing the army according to law is to implement the regulations and insist on building according to the outline." The leaders of the brigade introduced that after the Third Plenary Session of the 20th CPC Central Committee, they required all levels to further establish strict standards, build according to the law and regulations, establish and improve long-term mechanisms, and promote the steady and long-term development of all work of the troops on the track of the rule of law.

Some companies of a certain battalion have many task points, scattered personnel, and different situations at each point. It is difficult for the "flooding" construction guidance to play an effective role. To this end, the battalion party committee combined the study and implementation of the spirit of the Third Plenary Session of the CPC Central Committee to organize a situation analysis meeting on building according to the outline, and clarified the specific content and target tasks of building according to the characteristics of each point and the actual tasks, so that grassroots decision-making has a basis and construction has a reference. "The battalion's construction guidance is more targeted, the company's task arrangement is more flexible and efficient, the personnel arrangement is more scientific and reasonable, and the officers and soldiers are more motivated to work." A cadre from a company of the battalion said.

It is understood that the brigade has combined the study and implementation of the spirit of the Third Plenary Session of the 18th CPC Central Committee with strict implementation of regulations and rules and regulations. They have vigorously forged a combat-oriented party committee team, improved their ability to set standards, make decisions, and solve problems, and carried out their work in strict accordance with legal procedures, standards, and authority. They require the organs to plan and deploy work, guide and inspect work based on laws and regulations,

continue to correct the "four winds", especially formalism and bureaucracy, and effectively solve the "five more" problems to reduce the burden on the grassroots and enhance the endogenous driving force of grassroots construction and management. At the same time, they have carried out in-depth legal publicity and education, guiding officers and soldiers to establish the awareness of doing things according to the law, looking for the law when encountering problems, using the law to solve problems, and relying on the law to resolve contradictions, and to build a solid ideological foundation for building the grassroots according to the law, and continuously improve the level of formalization and legalization of grassroots construction.

In a study and discussion organized by a certain company, a cadre of the company said that after the unified summary and merging of documents and telegrams, the number has been significantly reduced compared with the past. Many tasks can be handled in time through telephone communication, and office efficiency has been greatly improved. "Since the adjustment and reform of the troops, the concept and method of military governance have undergone profound changes, and the efforts of all levels to govern the army according to law have been significantly strengthened." In this regard, a cadre of the agency who was stationed in the company introduced that in order to further improve the level of regular construction of the troops, the brigade party committee requires all departments of the agency to strengthen dynamic coordination according to the actual tasks and the actual situation at the grassroots level, and the inspection and guidance must not disrupt the normal work order at the grassroots level.

Deeply study and practice, and build strong motivation according to the outline. In recent days, with the deepening of learning and implementing the spirit of the Third Plenary Session of the 20th CPC Central Committee, the enthusiasm of the officers and soldiers of the brigade for training and preparation has become higher. On the training ground, officers and soldiers focused on the generation of combat effectiveness of new equipment, gathered wisdom to solve difficult problems, specialized in refining key topics, and focused on innovating tactics and training methods, and continuously promoted the quality and upgrading of the combat effectiveness of the troops.

陆军某旅装甲突击车连引导官兵齐心合力谋建设促发展

来源：解放军报 作者：于云之 宋世杰 刘仁浩 责任编辑：林诗清 2025-01-21 09:00:31

陆军某旅装甲突击车连引导官兵齐心合力谋建设促发展——

人人当主角 个个争创先

■于云之 解放军报特约通讯员 宋世杰 刘仁浩

该连官兵驾驶战车发起冲击。张修铭 摄

寒冬腊月，北风劲吹。陆军某旅综合训练场上，一场战术训练拉开帷幕。硝烟中，某新型装备伴随突击车，以锐不可当之势向目标发起冲锋。空中旋翼轰鸣，多架无人机超低空疾飞，掩护地面分队夺控预定目标。

前方，突击车驾驶员、二级上士谢烈平驾驶战车，向“敌”防线发起冲击；后方，无人装备操纵员、二级上士冯子茂通过监视屏幕密切观察战场情况。

“发现‘敌’火力点！”冯子茂立即启动烟幕发射装置，谢烈平利用“敌”火力间隙灵活机动，找准攻击位置，一举突破“敌”防线。

让人想不到的是，这两名配合默契的战友，过去在训练中一度“颇不对付”。

那年，伴随着改革强军的步伐，该旅两个坦克连经过合编调整，组建起装甲突击车连。

“两个连队都有着厚重历史，官兵技术过硬、作风扎实，演训经验丰富，如今强强联合，必定如虎添翼、相得益彰。”组建之初，时任连长胡忠俊对新连队的建设发展底气十足。

没想到，合编后的一次实弹射击训练，连队成绩并不理想。复盘会上，来自两个单位、被编入同一车组的冯子茂和谢烈平险些吵起来。

“按惯例，炮手应在车辆短停时进行瞄准射击。但我刚瞄准，驾驶员就发动车辆，导致射击出现偏差。”冯子茂愤愤不平地说。

“以前我们连搞射击训练，我就是这么开的，成绩照样不错！”听了他的话，谢烈平不服气地说。

合编后的工作千头万绪，磨合期出现不适应的情况在所难免。但随着工作推进，胡忠俊发现，两个连队官兵虽然能够履职完成各项任务，但很难攥指成拳形成合力，而且，一些同志对此不以为然。

合力的关键在于合心。只有摸清大家的能力底数，尽快统一思想，才能提振干事创业精神状态，应对装备升级、编制重组的挑战。那段时间，胡忠俊和时任指导员蔡宇星随身携带

一个小本，穿梭于多个点位，见缝插针找官兵谈心谈话了解情况，逐人解心结、激动力，树目标、鼓干劲。

“在原来的连队我是技术骨干，合编后工作方式变得不熟悉了，也担心个人发展会受影响”“以前积累的经验现在不太适用，工作节奏和思路也有所变化”“新装备专业技术要求高，想快速上手还是有些吃力”……根据官兵反馈的情况，连队党支部一班人仔细分析官兵工作方式、专业技术水平和作风习惯，想方设法统一官兵思想认识、磨合工作方式，引导大家聚焦新的使命任务当先锋、挑大梁，凝心聚力锻造突击利刃。

基于合编前两支连队同年在浙江平湖组建的历史渊源，他们开设“平湖讲坛”，让官兵登台讲述老连队光荣传统，在互学互赞中增进情感认同；制作“平湖利刃”连史册，记录大家的成长和收获；围绕建连目标开展大讨论，一起擘画新连队建设蓝图，强化主人翁意识，不断增强官兵的归属感、责任感。针对转岗人员专业不对口、组训力量薄弱的情况，他们优化骨干力量配备，遴选专业尖子开展交叉任教，倡导官兵通过结对互助实现专长互学；发挥榜样示范引领作用，大力营造见贤思齐、创先争优的浓厚氛围。

教练员张伟和特级射手岳学杰合编前分属不同连队。张伟组训经验较为丰富，岳学杰专业技术扎实过硬。两人结成互助对子后，仔细分析新装备特点和战友能力基础，结合以往组训经验，探索出新老装备对比组训法。“我们综合考虑官兵能力基础，用渐进对比的教学方式，帮助大家熟悉掌握新装备。”张伟说。他们还将一些复杂的操作流程编写成图文并茂、便携易用的“口袋书”，有效提升训练质效，相关经验做法在全旅推广。

目标明确，所以思想坚定；路径清晰，因此干劲十足。向着推动连队全面建设的共同目标努力，全连官兵在互学互教中不断加深了解，在循序渐进提升能力中“拧成一股绳”。

上级遴选人员参加装备效能检验任务，有的同志建议，效能检验任务对人员专业技术要求高，连队新组建没多久，派一名兵龄长的骨干更为稳妥。连队党支部讨论认为，新装备面前不论兵龄长短，只看能力高低。上等兵黄浩斌虽然兵龄不长，但专业技能过硬，完成任务没问题。

受领任务后，黄浩斌加班加点钻研装备、精练技能，并主动向专业骨干请教经验技巧。最终，他靠着平时扎实的训练，在任务中成功排除了弹药未成功击发的险情，还为装备改进收集了宝贵数据，事迹被写进“平湖利刃”连史册。如今，黄浩斌已成长为一名射击技师。

翻开“平湖利刃”连史册，连队官兵的奋斗足迹清晰呈现：谢烈平主动拓展学习数字化终端操作，顺利通过车长等级认证；冯子茂大胆改进某型装备信息接口，使空地信息流转更加顺畅；下士阎建豪设计的辅助蹬车钩，方便官兵快速进入加装防护棚的装甲车；中士蔡智

龙用手柄代替触控操作，解决触屏设备在移动条件下不易操纵的难题；下士林豪学习动手能力强，善于总结窍门妙招，革新制作的教具帮助官兵养成良好操作习惯……

“系列务实举措有效激发官兵内生动力，大家在建设实践中积极贡献智慧力量。”该连干部邬迪介绍，去年，连队参加新型无人装备作战能力检验，全连官兵上下齐心，白天冒着酷暑钻舱室，在操作维护装备中查找问题，晚上汇总复盘商讨对策。在厂家技术人员指导帮助下，大家以主人翁姿态积极谋战研战练战，经过一段时间努力，解决多个制约战斗力生成的难点问题。随着一项项小发明小创造投入实际应用，某新型无人装备也顺利融入作战体系。

被评为“基层建设先进连”，被表彰为“军事训练一级连”，荣立集体二等功……连队组建以来，全连官兵“拧成一股绳”，推动连队全面建设不断进步。“今天，我光荣地成为连队的一块‘新钢’，我将牢记‘敢打硬拼、勇当先锋’的连训，为突击利刃更加锋利作出自己的贡献！”去年底新兵下连时，连队在荣誉室组织新兵欢迎仪式。入连仪式结束后，新兵李浩楠看着一块块奖牌心潮起伏。他表示，自己将铆定岗位努力训练，锤炼过硬本领，以扎实的战斗作风、顽强的拼搏精神，在连史册上书写属于自己的奋斗篇章。

短　评

以主人翁精神开新图强

■赵晓伟

习主席在二〇二五年新年贺词中指出：“中国式现代化的新征程上，每一个人都是主角，每一份付出都弥足珍贵，每一束光芒都熠熠生辉。”党的十八大以来，国防和军队建设取得的历史性成就，凝聚着每一名官兵的青春与汗水，离不开每一名官兵的挺膺担当和辛勤付出。

改革强军浪潮中，新调整组建单位的使命任务发生了新的变化。变革孕育机遇，唯有打破旧观念、走出舒适区，以奋发作为、实干担当的行动应对新变化，才能不断打开新局面、干出新气象。对于新调整组建连队官兵来说，无论是从无到有白手起家，还是带着原单位的传统转隶改编，都不可避免地面临一个又一个挑战，接下一张又一张战书。开新图强不会一蹴而就，需要每名官兵继续奋发努力，铆定战位当主角、打头阵，埋头苦干、久久为功。

恩格斯说：“许多力量融合为一个总的力量，就造成一个新的力量。”基层官兵的动力越充足，强军兴军的力量就越强大。打好实现建军一百年奋斗目标攻坚战，需要广大官兵如涓涓细流汇入江海般，把个人奋斗融入强军事业，以主人翁精神不断开新图强，做永远奔腾的浪花。奋斗强军新征程，必然还会面临艰巨繁重的任务、应对各种风险挑战。我们唯有

以时不我待、只争朝夕的姿态，铆定岗位、当好主角，凝聚每一份力量、汇聚每一缕光芒，才能积小胜为大胜、积跬步至千里，不断创造新的荣光。

The officers and soldiers of the company drove the tank to attack. Photo by Zhang Xiuming

In the cold winter, the north wind blew. A tactical training kicked off at the comprehensive training ground of a certain army brigade. In the smoke, a new type of equipment accompanied the assault vehicle and charged towards the target with an unstoppable momentum. Rotors roared in the air, and several drones flew at ultra-low altitudes to cover the ground team to seize the predetermined target.

In front, the assault vehicle driver, Second Sergeant Xie Lieping, drove the tank to attack the "enemy" defense line; in the back, the unmanned equipment operator, Second Sergeant Feng Zimao closely observed the battlefield situation through the monitoring screen.

"Found the "enemy" firepower point!" Feng Zimao immediately activated the smoke screen launcher, and Xie Lieping took advantage of the gap between the "enemy" firepower to flexibly maneuver, find the attack position, and break through the "enemy" defense line in one fell swoop.

What is unexpected is that these two comrades who cooperated tacitly used to "not get along" in training in the past.

That year, along with the pace of reform and strengthening the army, the two tank companies of the brigade were combined and adjusted to form an armored assault vehicle company.

"Both companies have a long history, the officers and soldiers have strong skills, solid style, and rich training experience. Now the strong combination will surely be more powerful and complement each other." At the beginning of the formation, the then company commander Hu Zhongjun was full of confidence in the construction and development of the new company.

Unexpectedly, the company did not perform well in a live-fire shooting training after the merger. At the review meeting, Feng Zimao and Xie Lieping, who were from two units and were assigned to the same vehicle group, almost quarreled.

"According to convention, the gunner should aim and shoot when the vehicle stops for a short time. But as soon as I aimed, the driver started the vehicle, resulting in a deviation in the shooting." Feng Zimao said indignantly.

"I drove like this when we did shooting training in the company before, and the results were still good!" Xie Lieping said unconvinced after hearing his words.

There are so many things to do after the merger, and it is inevitable that there will be some discomfort during the running-in period. But as the work progressed, Hu Zhongjun found that although the officers and soldiers of the two companies were able to perform their duties and complete various tasks, it was difficult to form a joint force, and some comrades did not agree with this.

The key to joint force lies in unity of heart. Only by finding out the bottom line of everyone's ability and unifying thoughts as soon as possible can we boost the spirit of doing things and entrepreneurship and meet the challenges of equipment upgrading and organizational reorganization. During that time, Hu Zhongjun and the then instructor Cai Yuxing carried a small notebook with them, shuttled between multiple locations, and found opportunities to talk with officers and soldiers to understand the situation, to relieve their worries, inspire their motivation, set goals, and encourage their enthusiasm.

"I was a technical backbone in the original company. After the merger, I became unfamiliar with the working methods, and I was also worried that my personal development would be affected." "The experience accumulated in the past is not very applicable now, and the work rhythm and ideas have also changed." "The new equipment has high professional and technical requirements, and it is still a bit difficult to get started quickly."... Based on the feedback from officers and soldiers, a group of people in the company's party branch carefully analyzed the working methods, professional and technical levels, and work styles of officers and soldiers, and tried every means to unify the officers and soldiers' ideological understanding and running-in working methods, and guide everyone to focus on the new mission and tasks to be pioneers and take the lead, and unite their hearts and minds to forge a sharp assault blade.

Based on the historical origin that the two companies were established in Pinghu, Zhejiang in the same year before the merger, they opened the "Pinghu Forum" to let officers and soldiers take the stage to tell the glorious traditions of the old company, and enhance emotional identification in mutual learning and mutual praise; make the "Pinghu Blade" company history to record everyone's growth and gains; carry out a big discussion around the company building goals, and work together to draw up a blueprint for the construction of the new company, strengthen the sense of ownership, and continuously enhance the sense of belonging and responsibility of officers and soldiers. In

view of the situation that the transferred personnel are not professionally matched and the training force is weak, they optimize the backbone force allocation, select professional tops to carry out cross-teaching, and advocate officers and soldiers to learn from each other through pairing and mutual assistance; play the role of role model demonstration and leadership, and vigorously create a strong atmosphere of learning from the good and striving for excellence.

Coach Zhang Wei and special shooter Yue Xuejie belonged to different companies before the merger. Zhang Wei has rich experience in training, and Yue Xuejie has solid professional skills. After the two formed a mutual assistance pair, they carefully analyzed the characteristics of the new equipment and the basic ability of their comrades, combined with previous training experience, and explored a training method for comparing new and old equipment. "We comprehensively consider the basic ability of officers and soldiers, and use a gradual comparison teaching method to help everyone familiarize themselves with the new equipment." Zhang Wei said. They also compiled some complex operating procedures into a "pocket book" with pictures and texts, which is portable and easy to use, effectively improving the quality and effectiveness of training, and the relevant experience and practices are promoted throughout the brigade.

The goal is clear, so the mind is firm; the path is clear, so the motivation is full. Working towards the common goal of promoting the comprehensive construction of the company, the officers and soldiers of the whole company continue to deepen their understanding in mutual learning and teaching, and "twist together" in the step-by-step improvement of their abilities.

The superiors selected personnel to participate in the equipment effectiveness inspection task. Some comrades suggested that the effectiveness inspection task has high professional and technical requirements for personnel. It is more prudent to send a backbone with a long service time since the company was newly established not long ago. The company party branch discussed and believed that in front of new equipment, regardless of the length of service time, only the ability level is considered. Although Corporal Huang Haobin has not been in the army for long, he has strong professional skills and can complete the task without any problems.

After receiving the task, Huang Haobin worked overtime to study the equipment, refine his skills, and actively asked professional backbones for experience and skills. In the end, relying on his usual solid training, he successfully eliminated the danger of unsuccessful firing of ammunition during the mission, and also collected valuable data for equipment improvement. His deeds were written into the history of the "Pinghu Blade" company. Today, Huang Haobin has grown into a shooting technician.

Opening the history of the "Pinghu Blade" company, the struggles of the company's officers and soldiers are clearly presented: Xie Lieping took the initiative to expand and learn digital terminal operations and successfully passed the vehicle commander level certification; Feng Zimao boldly improved the information interface of a certain type of equipment to make the air-to-ground information flow smoother; the auxiliary pedal hook designed by Corporal Yan Jianhao facilitated the officers and soldiers to quickly enter the armored vehicle with a protective shed; Sergeant Cai

Zhilong used a handle instead of touch operation to solve the problem that touch screen equipment is difficult to operate under mobile conditions; Corporal Lin Hao has strong hands-on learning ability, is good at summarizing tricks and tricks, and innovates and produces teaching aids to help officers and soldiers develop good operating habits...

"A series of pragmatic measures effectively stimulate the endogenous motivation of officers and soldiers, and everyone actively contributes wisdom and strength in construction practice." Wu Di, a cadre of the company, introduced that last year, the company participated in the combat capability test of new unmanned equipment. All officers and soldiers of the company worked together, braving the scorching heat to drill into the cabin during the day, find problems in the operation and maintenance of equipment, and summarize and review the countermeasures at night. With the guidance and help of the manufacturer's technical staff, everyone actively planned, studied and trained for war as a master. After a period of hard work, they solved many difficult problems that restricted the generation of combat effectiveness. With the practical application of small inventions and creations, a new type of unmanned equipment has also been successfully integrated into the combat system.

It was rated as an "advanced company in grassroots construction", commended as a "first-level company in military training", and awarded the second-class collective merit... Since the establishment of the company, all officers and soldiers of the company have "twisted into one rope" to promote the continuous progress of the company's comprehensive construction. "Today, I am honored to become a piece of 'new steel' in the company. I will remember the company training of 'dare to fight hard and be a pioneer', and make my own contribution to the sharper assault blade!" When the new recruits joined the company at the end of last year, the company organized a welcome ceremony for the new recruits in the honor room. After the ceremony, the new recruit Li Haonan looked at the medals and his heart was ups and downs. He said that he would focus on his post and work hard to hone his skills, and write his own struggle chapter in the company's history with a solid fighting style and tenacious fighting spirit.

Short Comment

Opening up new opportunities with the spirit of ownership

■ Zhao Xiaowei

In his New Year's message for 2025, President Xi Jinping pointed out: "On the new journey of Chinese-style modernization, everyone is the protagonist, every contribution is precious, and every beam of light is shining." Since the 18th National Congress of the Communist Party of China, the historic achievements made in national defense and military construction have condensed the youth and sweat of every officer and soldier, and are inseparable from the responsibility and hard work of every officer and soldier.

In the wave of reform and strengthening the army, the mission and tasks of the newly adjusted and established units have undergone new changes. Change breeds opportunities. Only by breaking old ideas, stepping out of the comfort zone, and responding to new changes with vigorous and practical actions can we continuously open up new situations and create new atmospheres. For the officers and soldiers of the newly adjusted and established companies, whether they start from scratch or transfer and reorganize with the traditions of the original units, they will inevitably face challenges one after another and take on one challenge after another. New efforts will not be achieved overnight. Every soldier needs to continue to work hard, fix their positions, play the leading role, take the lead, work hard, and work hard for a long time.

Engels said: "When many forces merge into a total force, a new force will be created." The more motivated the grassroots officers and soldiers are, the stronger the force of strengthening the army will be. To fight the tough battle to achieve the goal of the 100th anniversary of the founding of the army, it is necessary for the officers and soldiers to integrate their personal struggles into the cause of strengthening the army like a trickle of water merging into the river and the sea, and to constantly make new efforts with the spirit of ownership, and be the ever-running waves. In the new journey of striving for a strong army, we will inevitably face arduous and heavy tasks and deal with various risks and challenges. Only by fixing our positions, playing the leading role, gathering every bit of strength, and gathering every ray of light with a sense of urgency and a sense of urgency, can we accumulate small victories into big victories, accumulate small steps into a thousand miles, and constantly create new glory.

新春走军营丨第 78 集团军某旅开展低温条件下保障训练

来源：解放军报 作者：李 刚 奉云鹤 责任编辑：赵镭钩 2025-01-23 08:00:09

春节前夕，记者目睹第 78 集团军某旅开展低温条件下保障训练——

助力战鹰斗严寒

■李 刚 解放军报记者 奉云鹤

临近春节的一天，天色未亮，寒气袭人，第 78 集团军某旅机场已是一派忙碌景象。

记者走进该旅机库看到，机务官兵正紧张有序地进行新列装直升机飞行前准备。“冬季训练，要做的准备工作很多，其中一项就是给直升机重点机件加温，确保装备能够快速启动。这个加温设备是我们联合院校、厂家共同研制的。”旅领导告诉记者。

该旅地处高纬度地区，冬季漫长，要提升部队战斗力水平，官兵必须过好严寒关。为缩短低温条件下飞行准备时间，他们探索机体覆盖保温等多类保障方法。这些方法中，既凝聚了专家教授的智慧，也有基层官兵的主动作为。

该旅机务官兵对时间格外敏感，好像每个人心中都装着一块“秒表”。机械员王珂说：“只有精确掌握飞行安全的基础值，才能合理利用时间资源，提升部队低温条件下快速保障能力。”

记者看到，机库内，机务官兵分秒必争投入工作。该旅领导介绍，新装备电子设备高度集成，操作系统更加灵敏精准，对官兵操作精度提出了更高要求。

“直升机机件变小了，我们要学习的内容却更多了。”王珂说。

为尽快掌握新装备性能，该旅机务官兵白天开展实操训练，晚上学习理论知识；为充分论证低温条件对装备效能的影响，他们顶风雪、冒严寒，连续数昼夜坚守在装备阵地上，成功采集上百项装备保障数据……

晨光熹微，一切准备就绪，飞行训练随即展开。

“低气象条件下飞行，飞行员要克服能见度低等不利因素影响，非常考验心理素质和技战术水平。”该旅领导介绍，他们将低气象条件下飞行训练作为战斗力生成的增长点，瞄准短板弱项开展编队飞行、模拟特情处置等训练，锤炼飞行员作战本领。

铁翼飞旋，一架架直升机快速抵达目标空域，这让记者感受到该旅官兵对时间的精准把控。旅作训科科长说：“协同作战首先要在时间上做好协同，快速抵达是形成联合打击能力的基础。”

前不久，该旅新列装直升机首次参加上级组织的冬季实战化演训。官兵高标准完成低温条件下要点夺控、低空突防、定点投送等课目，多项战术战法得到检验。

Visiting the military camp during the Spring Festival | A brigade of the 78th Group Army conducts support training under low temperature conditions

[78th GA: Northern TC Army, Harbin, Heilongjiang Province]

Source: PLA Daily Author: Li Gang Feng Yunhe Editor: Zhao Leixiang 2025-01-23 08:00:09

On the eve of the Spring Festival, the reporter witnessed a brigade of the 78th Group Army conducting support training under low temperature conditions——

Helping the war eagles fight the severe cold

■ Li Gang PLA Daily reporter Feng Yunhe

One day near the Spring Festival, the sky was still dark and the cold was biting. The airport of a brigade of the 78th Group Army was already busy.

The reporter walked into the hangar of the brigade and saw that the maintenance officers and soldiers were nervously and orderly preparing for the flight of the newly equipped helicopters. "There are many preparations to be done for winter training, one of which is to heat up the key parts of the helicopter to ensure that the equipment can start quickly. This heating equipment was developed jointly by us, colleges and manufacturers." The brigade leader told reporters.

The brigade is located in a high-latitude area with a long winter. To improve the combat effectiveness of the troops, the officers and soldiers must survive the severe cold. In order to shorten the flight preparation time under low temperature conditions, they explored various support methods such as covering the fuselage for insulation. These methods not only embody the wisdom of experts and professors, but also the initiative of grassroots officers and soldiers.

The maintenance officers and soldiers of the brigade are extremely sensitive to time, as if everyone has a "stopwatch" in their hearts. Mechanic Wang Ke said: "Only by accurately grasping the basic value of flight safety can we make rational use of time resources and improve the rapid support capabilities of the troops under low temperature conditions."

The reporter saw that in the hangar, maintenance officers and soldiers were racing against time to work. The brigade leaders introduced that the electronic equipment of the new equipment is highly integrated, and the operating system is more sensitive and accurate, which puts higher requirements on the operation accuracy of officers and soldiers.

"The helicopter parts have become smaller, but we have more to learn." Wang Ke said.

In order to master the performance of new equipment as soon as possible, the maintenance officers and soldiers of the brigade carried out practical training during the day and studied theoretical knowledge at night; in order to fully demonstrate the impact of low temperature conditions on equipment effectiveness, they braved the wind and snow and the severe cold, and stayed on the equipment position for several days and nights, successfully collecting hundreds of equipment support data...

In the early morning, everything was ready, and flight training began immediately.

"When flying under low weather conditions, pilots must overcome the adverse factors such as low visibility, which is a great test of psychological quality and technical and tactical level." The leaders of the brigade introduced that they regard flight training under low weather conditions as a growth point for combat effectiveness generation, aiming at shortcomings and weaknesses to carry out formation flying, simulated special situation handling and other training to hone pilots' combat skills.

The iron wings are spinning, and helicopters quickly arrive at the target airspace, which makes reporters feel the precise control of time by the officers and soldiers of the brigade. The chief of the brigade's training department said: "Coordinated operations must first be coordinated in time, and rapid arrival is the basis for forming joint strike capabilities."

Not long ago, the brigade's newly equipped helicopters participated in the winter combat training organized by the superior for the first time. The officers and soldiers completed tasks such as seizing key points under low temperature conditions, low-altitude penetration, and targeted delivery with high standards, and a number of tactics and strategies were tested.

比学赶超氛围拉满！演训场上战友争着为战车加颗星

来源：中国军网-解放军报 作者：牛昱森 叶玉伯 肖凡 责任编辑：刘上靖 发布：2025-01-23 06:51:47

手机看分享到

新疆军区某团通过荣誉激励浓厚比学赶超氛围——

“我为战车加颗星”

■牛昱森 叶玉伯 肖 凡

新年伊始，高原腹地。新疆军区某团演训场战车列阵，一场特殊而庄重的荣誉仪式——“我为战车加颗星”活动正在进行。一声令下，官兵快速在战车旁整齐列队，静候荣耀时刻的到来。

现场，编号“战 3 车”的战车车身上，3 颗红星格外引人注目。随着一阵激昂的乐曲响起，在全团官兵注视下，该团一名领导大步上前，将一颗红星郑重地交到“战 3 车”车长、二级上士张震手上。

阳光照射，红星闪耀，现场掌声雷动。

“这是‘战 3 车’获得的第 4 颗红星。”张震与战友将红星贴上车身，整齐排列的 4 颗红星熠熠生辉。“红星承载着车组全体成员的奋斗与汗水，既是对大家艰辛付出的肯定，也是对干好新年度工作的激励。”张震说。

“为取得优秀成绩的战车举行授星仪式，是我们团通过荣誉激励浓厚比学赶超氛围的有益尝试。”该团领导介绍，他们在工作中定期开展战车评级加星活动，每当官兵参加比武考

核、遂行重大任务、攻克训练难题等取得优异成绩，所在车组就会被表彰增加一颗红星，以此动态反映官兵练兵备战实绩，形成良好示范带动效应。

之前的几次演训任务中，张震驾驶战车和战友凭借出色表现取得优异成绩。去年底，他又驾战车参加某型靶弹实射任务，跟踪目标时某终端突发故障，经验丰富的车组成员迅速排除故障，最终圆满完成任务。在新年度训练展开之际，该团在训练场再次为他们组织授星仪式。

“这项活动开展后的第一颗红星，就授予了‘战 3 车’。”该团领导提及“战 3 车”刚列装地空导弹连时的往事。那段时间，连队官兵看着陌生的“新战友”，内心既高兴又忐忑：新装备性能更优，战斗力更强，列装连队无疑是件大喜事。但演训在即，面对刚入列的全新装备，能否在任务中好好驾驭它，大家心里一时没底。连队党支部一班人研究后决定，将这一任务交给经验丰富的张震所在车组。

起初，面对众多操作按钮和复杂的电子系统，张震倍感压力。但作为车长，他更知责任重大，与战友展开艰苦攻关。他们从研究说明书开始，一边加班加点学习理论知识，一边围绕部件结构、制造原理、性能特点等深究细研。请教骨干、查阅资料、联系厂家……张震和战友凭着不服输的劲头，誓言“拿下”新装备。功夫不负有心人。经过一段时间合力攻关，他们不但熟悉了战车基本操作，而且对一些小故障也能自主判断和排除。

那次任务展开后，面对陌生地域复杂环境，“战 3 车”车组成员沉着冷静，按照指令逐一完成各项任务。孰料，就在他们即将锁定目标时，信号却突然从终端显示屏上消失。张震与战友快速分析情况，果断切换搜索模式、调整发射参数，发现并锁定目标后依令实施打击，成功命中目标。

“这次任务结束后，机关部门在调研论证的基础上，结合官兵意见建议，制订完善为战车评级加星活动方案，并将团队第一颗红星授予了‘战 3 车’。”该团领导说。

战车授星，催人奋进。该团不断总结完善相关做法，结合年度工作常态开展“我为战车加颗星”岗位实践活动，引导官兵平时铆定岗位练强专业技能；跟进野外驻训、演习演训等，开展战地表彰暨授星仪式，激励大家在岗位任务中担重任、当先锋。

荣誉激发内动力，榜样引领创佳绩。勤务保障营通过某型装备小修能力认证，运输连结合远距离高海拔机动存在的不足总结梳理 10 条改进措施，团“创客工作室”集智攻关有效提升某型火炮射击精度……在“战 3 车”车组示范带动下，该团官兵日常训练你追我赶，任务面前主动请缨，多课目训练成绩屡创新纪录，多项练兵备战难题得到解决。

前不久，一批新兵下连走上专业岗位。他们除了学习部队光荣历史和优良传统外，“战 3 车”列装后的成绩也成为大家“入营第一课”重要内容。

授星仪式现场，来自广西桂林的新兵毛仁鹏，听着官兵砺兵高原的故事，看着战车光荣授星的场面，心中涌起学习直追的劲头。活动结束后，该团随即展开训练，毛仁鹏所在车组突遇通信故障。关键时刻，他发挥大学所学专业优势，在班长指导下很快排除故障，保障车组顺利完成训练。

The atmosphere of learning from each other and catching up is full! Comrades on the training ground compete to add a star to the tank

Source: China Military Network-People's Liberation Army Daily Author: Niu Yusen Ye Yubo Xiao Fan Editor: Liu Shangjing Release: 2025-01-23 06:51:47

View and share on mobile

A regiment of the Xinjiang Military Region has created a strong atmosphere of learning from each other and catching up through honor incentives-

"I add a star to the tank"

■Niu Yusen Ye Yubo Xiao Fan

At the beginning of the new year, in the heart of the plateau. The tanks of a regiment of the Xinjiang Military Region are lined up on the training ground, and a special and solemn honor ceremony-"I add a star to the tank" activity is in progress. At the command, the officers and soldiers quickly lined up neatly beside the tank, waiting for the arrival of the glorious moment.

At the scene, the three red stars on the body of the tank numbered "Zhan 3" were particularly eye-catching. As a burst of exciting music sounded, under the gaze of all the officers and soldiers of the regiment, a leader of the regiment strode forward and solemnly handed a red star to the commander of the "Zhan 3 vehicle", 2nd Sergeant Zhang Zhen.

The sun shone, the red star shone, and the applause on the scene was thunderous.

"This is the fourth red star won by the 'Zhan 3 vehicle'." Zhang Zhen and his comrades pasted the red star on the body of the vehicle, and the four neatly arranged red stars shone brightly. "The red star carries the struggle and sweat of all members of the crew. It is not only an affirmation of everyone's hard work, but also an incentive for doing a good job in the new year." Zhang Zhen said.

"Holding a star-awarding ceremony for the tanks that have achieved excellent results is a beneficial attempt by our regiment to create a strong atmosphere of learning and surpassing through honor incentives." The leaders of the regiment introduced that they regularly carry out tank rating and star-adding activities at work. Whenever officers and soldiers participate in competitions and assessments, carry out major tasks, and overcome training difficulties and achieve excellent results, their crews will be commended and given an additional red star, so as to dynamically reflect the

actual performance of officers and soldiers in training and preparation for war, and form a good demonstration and driving effect.

In several previous training missions, Zhang Zhen drove the tank and his comrades to achieve excellent results with their outstanding performance. At the end of last year, he drove the tank to participate in a certain type of target missile live-fire mission. When tracking the target, a terminal suddenly malfunctioned. The experienced crew members quickly eliminated the fault and finally completed the mission successfully. At the beginning of the new year's training, the regiment organized a star-awarding ceremony for them again at the training ground.

"The first red star after the launch of this activity was awarded to the 'Zhan 3 vehicle'." The leader of the regiment mentioned the past when the "Zhan 3 vehicle" was just equipped with the surface-to-air missile company. During that time, the company's officers and soldiers looked at the unfamiliar "new comrades" and felt happy and uneasy: the new equipment has better performance and stronger combat effectiveness, and it is undoubtedly a great joy to be equipped with the company. But the training is imminent, and facing the new equipment that has just been put into service, whether it can be well controlled in the mission, everyone is unsure for a while. After research, a group of people from the company's party branch decided to give this task to the experienced Zhang Zhen's crew.

At first, facing many operating buttons and complex electronic systems, Zhang Zhen felt pressured. But as a commander, he knew that he had a heavy responsibility and started hard work with his comrades. They started by studying the manual, working overtime to learn theoretical knowledge, and studying the structure of components, manufacturing principles, performance characteristics, etc. Consulting backbones, consulting materials, contacting manufacturers... Zhang Zhen and his comrades vowed to "take down" the new equipment with their unyielding spirit. Hard work pays off. After a period of joint efforts, they not only became familiar with the basic operation of the tank, but also independently judged and eliminated some minor faults.

After the mission was launched, facing the complex environment of unfamiliar areas, the crew members of the "Zhan 3 Vehicle" were calm and calm, and completed each task one by one according to instructions. Unexpectedly, just when they were about to lock the target, the signal suddenly disappeared from the terminal display. Zhang Zhen and his comrades quickly analyzed the situation, decisively switched the search mode, adjusted the launch parameters, found and locked the target, and carried out the strike according to the order, and successfully hit the target.

"After the mission was completed, the headquarters department, based on the research and demonstration, combined with the opinions and suggestions of the officers and soldiers, formulated and improved the activity plan for rating and adding stars to the tanks, and awarded the team's first red star to the 'Zhan 3 tank'." The leader of the regiment said.

The star awarding of tanks is inspiring. The regiment constantly summarizes and improves relevant practices, and carries out the "I add a star for the tank" job practice activities in combination with

the annual work routine, guiding officers and soldiers to strengthen their professional skills in their posts at ordinary times; follow up on field training, exercises and training, and carry out battlefield commendation and star awarding ceremonies to encourage everyone to take on important responsibilities and be pioneers in their job tasks.

Honor inspires internal motivation, and role models lead to outstanding achievements. The service support battalion passed the minor repair capability certification of a certain type of equipment. The transport company summarized and sorted out 10 improvement measures based on the shortcomings of long-distance and high-altitude mobility. The regiment's "Maker Studio" collectively tackled problems and effectively improved the shooting accuracy of a certain type of artillery... Driven by the demonstration of the "Zhan 3 vehicle" crew, the officers and soldiers of the regiment chased each other in daily training, took the initiative to volunteer in front of the mission, and repeatedly set new records in the training results of multiple subjects. Many training and preparation problems have been solved.

Not long ago, a group of recruits went to the company to take up professional positions. In addition to learning the glorious history and fine traditions of the troops, the achievements of the "Zhan 3 vehicle" after being equipped have also become an important part of everyone's "first lesson in the camp".

At the star awarding ceremony, Mao Renpeng, a new recruit from Guilin, Guangxi, listened to the stories of officers and soldiers training on the plateau and watched the scene of the glorious star awarding of the tank, and the enthusiasm for learning and catching up surged in his heart. After the event, the regiment immediately started training, and Mao Renpeng's crew suddenly encountered a communication failure. At the critical moment, he took advantage of his major learned in college and quickly eliminated the fault under the guidance of the squad leader to ensure that the crew completed the training smoothly.

新春走军营丨”冰窟哨所”的暖心年

来源：中国军网-解放军报 作者：王雁翔 李 岩 责任编辑：于雅倩 发布：2025-02-01

“冰窟哨所”的暖心年

■解放军报记者 王雁翔 李 岩

中国最冷的地方在哪里？许多人的第一印象是”神州北极”漠河。其实，地处阿尔泰山南麓的新疆可可托海，寒冷一点不逊于漠河。它另一个鲜为人知的名字是”中国第二寒极”。

除夕，记者来到被誉为”冰窟哨所”的可可托海边防连，与官兵一起过年。室外的温度计显示：零下 43 摄氏度。指导员胡明敏告诉记者：”去年，这里的最低气温达到零下 52.3 摄氏度。”

走进营区新建的家属来队住房，不时传来家属和孩子们的欢声笑语，为连队增添了几分热闹。”以前连队生活条件简陋，官兵家属春节很少来队。”胡明敏说，去年 8 月，家属来队住房建成投入使用。今年春节，有 4 名家属带孩子来队过年。房间里生活设施一应俱全，家属来队可”拎包入住”。

在连队干部吕政的”团圆房”，记者看到，他正陪 5 岁的女儿做游戏，妻子张苏萌满脸幸福地坐在一旁。春节前，吕政想让家人来队过年，张苏萌一开始有些犹豫，来队后发现房间布置得温馨雅致，生活条件比以前大为改善，悬着的心才放了下来。

“说实话，以往有点怕过年，除夕夜从哨位上看到远处村庄的烟花，让人更想家。”中士邱泉鑫说，这次新婚妻子胡晓丽来边关过年，让他十分高兴。去年结婚前，胡晓丽从河南老家来队，对边防官兵的戍边生活多了几分了解。此后，在战友们的祝福中，她与邱泉鑫领了结婚证。

“家是最小国，国是千万家。边防哨所连着万家灯火，正是因为有边防官兵的守护，才有我们的幸福生活。”胡晓丽说。

走进连队体能训练馆，各种训练器材很齐全。与记者聊起连队新变化，官兵争相打开话匣子：”现在哨所建有通信基站，还安装了锅炉，随时能洗热水澡……”

这时，胡明敏告诉大家一个好消息：”今年年夜饭，家属们不仅各自做几道拿手菜，还准备了几个小节目。”顿时，连队官兵乐开了花。

夜里，新年的钟声响起，连队哨位上，几名哨兵高度警惕地观察着周边情况。”守护万家团圆，是我们的神圣职责。边关有我们在，请祖国和人民放心！”一名哨兵坚定地说。

Visiting the military camp during the Spring Festival | A heartwarming year at the “Ice Cave Outpost”

Source: China Military Network-People’s Liberation Army Daily Author: Wang Yanxiang Li Yan Editor: Yu Yaqian Published: 2025-02-01

A heartwarming year at the “Ice Cave Outpost”

■People’s Liberation Army Daily reporter Wang Yanxiang Li Yan

Where is the coldest place in China? Many people's first impression is Mohe, the "North Pole of China". In fact, Keketuohai in Xinjiang, located at the southern foot of the Altai Mountains, is no less cold than Mohe. Its other little-known name is "China's second coldest pole".

On New Year's Eve, the reporter came to the Keketuohai Sea Defense Company, known as the "Ice Cave Outpost", and celebrated the New Year with the officers and soldiers. The outdoor thermometer showed: minus 43 degrees Celsius. Instructor Hu Mingmin told reporters: "Last year, the lowest temperature here reached minus 52.3 degrees Celsius."

Walking into the newly built family housing in the camp, the laughter of family members and children came from time to time, adding a bit of liveliness to the company. "In the past, the company's living conditions were simple, and the families of officers and soldiers rarely came to the team during the Spring Festival." Hu Mingmin said that in August last year, the family housing for the team was completed and put into use. This Spring Festival, four family members brought their children to the team to celebrate the New Year. The room is fully equipped with living facilities, and family members can "move in with their bags" when they come to the team.

In the "reunion room" of company cadre Lv Zheng, the reporter saw that he was playing games with his 5-year-old daughter, and his wife Zhang Sumeng sat beside him with a happy face. Before the Spring Festival, Lv Zheng wanted his family to come to the team to celebrate the New Year. Zhang Sumeng was a little hesitant at first, but after coming to the team, he found that the room was decorated warmly and elegantly, and the living conditions were greatly improved than before, so he put down his heart.

"To be honest, I used to be a little afraid of the New Year. Seeing the fireworks in the distant village from the sentry post on New Year's Eve makes people miss home even more." Sergeant Qiu Quanxin said that he was very happy that his newlywed wife Hu Xiaoli came to the border to celebrate the New Year. Before getting married last year, Hu Xiaoli came to the team from her hometown in Henan and had a better understanding of the border guards' life. After that, with the blessings of her comrades, she and Qiu Quanxin got their marriage certificate.

"Home is the smallest country, and the country is made up of millions of families. The border post is connected to the lights of thousands of families. It is because of the protection of border guards that we have a happy life." Hu Xiaoli said.

Entering the company's physical training hall, all kinds of training equipment are very complete. Talking to reporters about the new changes in the company, the officers and soldiers rushed to open the conversation: "Now the post has a communication base station and a boiler installed, so you can take a hot bath at any time..."

At this time, Hu Mingmin told everyone a good news: "For this year's New Year's Eve dinner, the family members not only made a few specialties, but also prepared a few small programs." Suddenly, the company's officers and soldiers were very happy.

At night, the New Year's bell rang, and several sentinels at the company's sentry post observed the surrounding situation with high vigilance. "It is our sacred duty to protect the reunion of thousands of families. We are here at the border, please rest assured, the motherland and the people!" said a sentry firmly.

新春走军营丨节俭过年,倡导一种更加务实、有内涵的过节方式

来源：中国军网-解放军报 作者：马军 郭丰宽 责任编辑：于雅倩 2025-02-03

春节前夕，记者走进西藏军区某边防团，感受官兵勤俭务实作风——

节俭过年 清风扑面

■马 军 解放军报记者 郭丰宽

"正好顺路，记得带上两个连队的过节物资。"春节前夕，记者从西藏军区某边防团出发，到所属某边防连采访，途中要路过某连队。审批车辆时，机关业务股经办人员特意嘱咐带车干部并告诉记者："这是团里的规定，根据行车路线统筹规划，尽量合并用车。"

集中用车、合并用车，这是该团近年来坚持的一个做法。"少派一辆车，不仅节约油料，还降低了安全风险。"途中，带车干部对记者说。

中午，记者到达某边防连，走进连队食堂，一眼看到公示栏上的节日食谱。

"今年年夜饭，我们将会根据官兵的体能消耗情况进行荤素搭配、科学调剂，让大家吃得营养健康。"连队干部介绍。

记者在后厨仓库看到，肉蛋果蔬等食材分门别类放在数个柜子里。"买什么菜、做什么主食，我们会根据每天训练情况和执勤任务提前计量下单。"同行的该团领导介绍，他们使用上级开发的配送软件，在食材采购、库存管理、菜品制作等环节逐步实现科学化管理。

"节俭过年，不是要削减节日欢乐，而是倡导一种更加务实、有内涵的过节方式。"连队干部告诉记者，这段时间，他们组织了各类文化活动，邀请有特长、爱好的官兵现场书写春联、传授剪纸技巧，既营造了节日氛围，又厉行节约，广受好评。

下午，记者回到团机关，一进营区就看到官兵在即将竣工的射击场馆外进行节日装饰。

"今年悬挂的彩旗、灯笼都是往年用过的。"该团领导介绍，"热情不等于铺张，俭朴不等于简单。等过完年，我们还会将这些装饰品好好保存起来，下次再用。"

华灯初上，官兵在礼堂排练自己的"春节联欢晚会"。晚会负责人说："战友们为节俭办晚会出谋划策，晚会成本降了，年味儿更浓了，大家的节目一个比一个精彩。"

Visiting the military camp during the Spring Festival | Frugal New Year, advocating a more pragmatic and meaningful way of celebrating the festival

Source: China Military Network-People's Liberation Army Daily Author: Ma Jun Guo Fengkuan Editor: Yu Yaqian 2025-02-03

On the eve of the Spring Festival, the reporter walked into a border defense regiment of the Tibet Military Region to feel the frugal and pragmatic style of the officers and soldiers——

Frugal New Year, fresh breeze blowing

■Ma Jun People's Liberation Army Daily reporter Guo Fengkuan

"It's just on the way, remember to bring the holiday supplies of the two companies." On the eve of the Spring Festival, the reporter set out from a border defense regiment of the Tibet Military Region to interview a border defense company under it, and passed by a company on the way. When approving the vehicle, the staff of the agency business section specifically instructed the cadres with the car and told the reporter: "This is the regulation of the regiment. According to the overall planning of the driving route, try to merge the vehicles."

Centralized and merged vehicles are a practice that the regiment has insisted on in recent years. "Sending one less car not only saves fuel, but also reduces safety risks." On the way, the cadre with the car said to the reporter

At noon, the reporter arrived at a border defense company, walked into the company cafeteria, and saw the holiday menu on the notice board at a glance.

"For this year's New Year's Eve dinner, we will match meat and vegetables according to the physical consumption of officers and soldiers, and adjust scientifically so that everyone can eat nutritiously and healthily." The company cadre introduced.

The reporter saw in the back kitchen warehouse that meat, eggs, fruits and vegetables and other ingredients were placed in several cabinets in different categories. "What vegetables to buy and what staple food to make, we will measure and order in advance according to the daily training situation and duty tasks." The leader of the regiment who was traveling with them introduced that they used the distribution software developed by their superiors to gradually realize scientific management in the procurement of ingredients, inventory management, and dish preparation.

"Frugal New Year is not to reduce the joy of the festival, but to advocate a more pragmatic and meaningful way of celebrating the festival." The company cadre told reporters that during this period, they organized various cultural activities and invited officers and soldiers with specialties and hobbies to write Spring Festival couplets and teach paper-cutting skills on the spot, which not only created a festive atmosphere, but also practiced frugality and was widely praised.

In the afternoon, the reporter returned to the regiment headquarters. As soon as he entered the camp, he saw soldiers making holiday decorations outside the shooting range that was about to be completed.

“The colorful flags and lanterns hung this year were used in previous years.” The leader of the regiment introduced, “Enthusiasm does not mean extravagance, and frugality does not mean simplicity. After the New Year, we will keep these decorations well and use them next time.”

As the lights came on, soldiers rehearsed their “Spring Festival Gala” in the auditorium. The person in charge of the gala said: “Comrades-in-arms made suggestions for frugality in holding the gala. The cost of the gala has been reduced, the New Year atmosphere has become stronger, and everyone’s programs are more exciting than each other.”

新春走军营丨雪裹山谷，镌刻青春誓言

来源：中国军网-解放军报 作者：刘 丹 责任编辑：赵镭饷 2025-02-04

春节期间，记者随新疆军区某边防连官兵巡逻——

雪裹山谷，镌刻青春誓言

■解放军报记者 刘 丹

喀喇昆仑山脉深处，马达轰鸣声打破高原的宁静。天尚未全亮，记者跟随新疆军区某边防连官兵，前往海拔 5500 米的某巡逻点位。

春节期间，受冷空气影响，连队驻地刮起大风，气温降至-40℃。刚登上巡逻车，记者就注意到，氧气罐湿化瓶里的水已经冻结成冰。

二级上士、驾驶员任创业熟练地打开一台小巧的车载制氧机。他告诉记者：”我们这里一年中有八九个月气温在 0℃以下。以前，湿化瓶里的水冻住后，要等小半天才能吸上氧。现在，车载制氧机的制氧浓度达到 90%以上，可充分满足车内用氧需求。”

晨光熹微，巡逻车在茫茫雪原疾驰。记者身旁坐着两名新战士，他们是第一次参加连队武装巡逻任务。

记者和两名新战士不停向车窗外张望。带队的邹排长笑着说：”以前出来巡逻，我们可顾不上看风景。”为啥？他回答：”早些年一下雪，我们就知道肯定要刨雪窝救车。”

任创业接过话茬说：”我第一次巡逻的时候半路开始下大雪，车陷进雪里不知道多少次。连长带领我们用铲子挖、靠人力推，回来都是后半夜了。现在，巡逻路修得平平整整，再也不用刨雪窝了。”

说话间，巡逻车停在一个碎石坡附近。记者放眼望去，脚下一处山谷内，河流冻结形成的冰带在阳光下闪耀。

虽然柏油公路已经连通大部分巡逻点位，但仍有个别地方，官兵需徒步抵达。邹排长特意将两名新兵和记者安排在巡逻队伍中间，反复叮嘱注意事项：”一定要跟紧队伍。一会下去时，宁走雪上、不走冰上……”

官兵手拉着手，小心翼翼走下陡坡。高原氧气稀薄，常人徒手行走相当于负重七八公斤。官兵全身装具将近 20 公斤重，脚下却比记者轻快。

巡逻官兵走出山谷，一边在落满积雪的山石上艰难跋涉，一边观察周围情况。1 个多小时后，终于到达巡逻点位。

“无人机飞行状态正常，视频拍摄器正常……”短暂休息后，下士卯升波放飞某型无人机，巡查目标区域情况。随着无人机等装备陆续投入使用，连队执勤效率不断提升，管边控边能力稳步增强。

驻守高原 5 年，卯升波的每个春节都在战位上度过。他说：”哪怕我只是一颗小石子，也要做边防线上最坚硬的那一颗。”

“边防有我，请祖国和人民放心！”猎猎风中，两名新兵展开五星红旗，官兵整齐列队，郑重敬礼。

巡逻结束回到连队，已是中午。大家一进屋，饭菜香扑鼻而来。红烧带鱼、葱爆羊肉、蒜蓉菠菜……记者和官兵一起享用热气腾腾的饭菜。连队李指导员介绍，现在连队补给物资及时，大家再也不用担心物资短缺了。

看着官兵脸上的笑容，记者切身感受到，这些年，边关建设日新月异，哨所面貌焕然一新，官兵扎根边防、建功边防的信念也愈加坚定。

“我站立的地方是中国，我用生命捍卫守候，哪怕风似刀来山如铁，祖国山河一寸不能丢……”喀喇昆仑上空，官兵嘹亮的歌声久久回荡。

Visiting the military camp during the Spring Festival ｜ The snow-covered valley engraved with the oath of youth

Source: China Military Network-People’s Liberation Army Daily Author: Liu Dan Editor: Zhao Leixiang 2025-02-04

During the Spring Festival, the reporter patrolled with the officers and soldiers of a border defense company of the Xinjiang Military Region——

Snow-wrapped valleys, engraved with the oath of youth

■People's Liberation Army Daily reporter Liu Dan

Deep in the Karakoram Mountains, the roar of the motor broke the tranquility of the plateau. Before the sun rose, the reporter followed the officers and soldiers of a border defense company of the Xinjiang Military Region to a patrol point at an altitude of 5,500 meters.

During the Spring Festival, affected by the cold air, the company's station was windy and the temperature dropped to -40℃. As soon as I got on the patrol car, I noticed that the water in the oxygen tank humidifier bottle had frozen into ice.

Second Sergeant and driver Ren Chuangye skillfully turned on a small car-mounted oxygen concentrator. He told the reporter: "The temperature here is below 0℃ for eight or nine months a year. In the past, after the water in the humidifier bottle froze, it took half a day to breathe oxygen. Now, the oxygen concentration of the on-board oxygen generator reaches more than 90%, which can fully meet the oxygen demand in the car."

In the dim morning light, the patrol car sped across the vast snowfield. Next to the reporter sat two new soldiers, who were participating in the company's armed patrol mission for the first time.

The reporter and the two new soldiers kept looking out the window. The platoon leader Zou, who led the team, smiled and said: "We didn't have time to see the scenery when we went out on patrol before." Why? He replied: "In the early years, as soon as it snowed, we knew we had to dig snow holes to save the car."

Ren Chuangye took over the conversation and said: "When I first patrolled, it started snowing heavily halfway, and I don't know how many times the car got stuck in the snow. The company commander led us to dig with shovels and push with manpower, and we came back in the middle of the night. Now, the patrol road is smooth and there is no need to dig snow holes anymore."

As he spoke, the patrol car stopped near a gravel slope. The reporter looked around and saw that in a valley under his feet, the ice belt formed by the frozen river was shining in the sun.

Although the asphalt road has connected most of the patrol points, there are still some places where officers and soldiers need to walk to. Platoon leader Zou deliberately arranged two recruits and reporters in the middle of the patrol team, and repeatedly reminded them of the precautions: "Be sure to follow the team closely. When you go down later, it is better to walk on the snow than on the ice..."

The officers and soldiers walked down the steep slope hand in hand carefully. The oxygen on the plateau is thin, and ordinary people walking barehanded is equivalent to carrying seven or eight kilograms. The officers and soldiers' full body equipment weighs nearly 20 kilograms, but their feet are lighter than reporters.

The patrol officers and soldiers walked out of the valley, trudging on the snow-covered rocks while observing the surrounding situation. After more than an hour, they finally arrived at the patrol point.

“The drone is in normal flight status, and the video camera is normal...” After a short rest, Corporal Mao Shengbo released a certain type of drone to patrol the target area. With the gradual commissioning of drones and other equipment, the company’s duty efficiency has been continuously improved, and its ability to manage and control the border has been steadily enhanced.

After five years of stationing on the plateau, Mao Shengbo spent every Spring Festival at his post. He said: “Even if I am just a small stone, I will be the hardest one on the border.”

“The border is with me, please rest assured, the motherland and the people!” In the whistling wind, two recruits unfolded the five-star red flag, and the officers and soldiers lined up neatly and saluted solemnly.

It was noon when we returned to the company after the patrol. As soon as everyone entered the house, the smell of food came to our noses. Braised hairtail, stir-fried lamb with green onions, garlic spinach... The reporter and the officers and soldiers enjoyed the steaming hot meals together. The company instructor Li introduced that now the company is supplied with materials in time, and everyone no longer has to worry about the shortage of materials.

Looking at the smiles on the faces of the officers and soldiers, the reporter felt personally that in recent years, the construction of the border has changed with each passing day, the appearance of the outpost has been completely renewed, and the officers and soldiers have become more determined to take root in the border and make contributions to the border.

“Where I stand is China. I will defend it with my life. Even if the wind is as strong as a knife and the mountains are as hard as iron, not an inch of the motherland’s mountains and rivers can be lost...” Above the Karakoram Mountains, the officers and soldiers’ loud singing echoed for a long time.

听说”金汤桥连”的班长有些不一样，不一样在哪？

来源：中国军网-解放军报 作者：张科进 付 语 刘维姣 等 责任编辑：于雅倩 2025-02-04

代理排长的临机决断

■解放军报记者 付 语 特约记者 李晓辉

晨曦中，某综合训练场上，一场红蓝对抗即将全面展开。

远程机动到此地的第 81 集团军某旅，派出”金汤桥连”一排作为先头部队打开通道。

这是整场对抗中的一个关键环节，关系到红方部队能否顺利进入预定地域并展开部署。

蓝方派出战车拦截，战斗瞬间打响。一阵激战后，蓝方战车被判”损毁”，”金汤桥连”一排也出现人员”伤亡”。

按照以前训练中的惯例，被判”损毁”的战车会立即驶离战场。但这一次，指挥红方首车的班长阮建勇发现，蓝方被判”损毁”的几辆战车还停留在原地，恰好挡住红方车队前行的道路。

眼看蓝方战车没有驶离的迹象，阮建勇一下子没了主意。

最好的选择当然是清理路面的”损毁”车辆，畅通道路让红方车队快速通行。阮建勇紧急呼叫向排长请示。然而，通信设备里，没传来排长的回答。

这片区域不时有蓝方的炮弹落下，若先头部队再不前进，就极可能让后续部队行动陷入被动局面。这时，阮建勇得知，排长已在这次接战中”牺牲”。

情况紧急，阮建勇临时被指定接替排长指挥行动。

避开蓝方”损毁”战车重新开辟通道显然不可行，按照战时情况处置则可能使装备受损。怎么办？

“红蓝对抗，就是实战的预演。”想到这里，代理排长阮建勇大胆发出了指令：”用战车推顶蓝方’损毁’战车到两旁，迅速开辟出一条通道。”

随着红方战车的渐渐逼近，蓝方的”损毁”战车也模拟被推顶状态下的速度慢慢后退，离开了路面。终于，路面被清空，红方车队顺利穿过这片区域。

后来，阮建勇和战友们才知道，为了让对抗更加贴近实战，导演部对不少对抗环节进行调整。其中，就包括让”损毁”车辆停留在原地，以考验指挥员的实战意识和应变招法。

红蓝对抗结束后，阮建勇因此受到上级表扬。面对表扬，阮建勇显得很坦然：”如果当时让其他班长指挥，他们也会这样做！”

当时，从望远镜中目睹这一过程，连长对阮建勇的决断大加赞赏：”关键时刻，咱连的班长骨干个个过硬，这就是证明！

I heard that the squad leader of the “Jintangqiao Company” is a little different. What’s the difference?

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Kejin, Fu Yu, Liu Weijiao, etc. Editor: Yu Yaqian 2025-02-04

Acting platoon leader’s impromptu decision

■People's Liberation Army Daily reporter Fu Yu Special reporter Li Xiaohui

In the morning light, a red-blue confrontation is about to unfold on a comprehensive training ground.

A brigade of the 81st Group Army, which has long-distance maneuvers to this place, sent a row of "Jintangqiao Company" as a vanguard to open the passage.

This is a key link in the entire confrontation, which is related to whether the red troops can successfully enter the designated area and deploy.

The blue side sent a tank to intercept, and the battle started instantly. After a fierce battle, the blue tank was judged to be "damaged", and the "Jintangqiao Company" row also suffered "casualties".

According to the practice in previous training, the tank that was judged to be "damaged" will leave the battlefield immediately. But this time, Ruan Jianyong, the squad leader commanding the first vehicle of the Red Army, found that several tanks of the Blue Army that were judged to be "damaged" were still in place, just blocking the way for the Red Army's convoy.

Seeing that the Blue Army's tanks showed no signs of leaving, Ruan Jianyong was at a loss.

The best option is of course to clear the "damaged" vehicles on the road and clear the road for the Red Army's convoy to pass quickly. Ruan Jianyong urgently called the platoon leader for instructions. However, there was no reply from the platoon leader in the communication equipment.

There were shells from the Blue Army falling in this area from time to time. If the vanguard did not move forward, it would be very likely that the follow-up troops would fall into a passive situation. At this time, Ruan Jianyong learned that the platoon leader had been "sacrificed" in this engagement.

The situation was urgent, and Ruan Jianyong was temporarily designated to take over the command of the platoon leader.

It is obviously not feasible to avoid the Blue Army's "damaged" tanks and reopen the passage. If it is handled according to the wartime situation, the equipment may be damaged. What to do?

"The red-blue confrontation is a rehearsal for actual combat." Thinking of this, the acting platoon leader Ruan Jianyong boldly issued an order: "Use the tank to push the blue side's 'damaged' tank to the sides and quickly open up a passage."

As the red side's tank gradually approached, the blue side's "damaged" tank also simulated the speed of being pushed and slowly retreated, leaving the road. Finally, the road was cleared and the red side's convoy successfully passed through this area.

Later, Ruan Jianyong and his comrades learned that in order to make the confrontation closer to actual combat, the director's office adjusted many confrontation links. Among them, it included

letting the “damaged” vehicles stay in place to test the commander’s actual combat awareness and contingency strategies.

After the red-blue confrontation ended, Ruan Jianyong was praised by his superiors for this. Faced with the praise, Ruan Jianyong seemed very calm: “If other squad leaders were in command at the time, they would do the same!”

At that time, witnessing this process through a telescope, the company commander praised Ruan Jianyong’s decision: “At the critical moment, the squad leaders and backbones of our company were all strong, and this is the proof!

红河前哨戍边人，站上哨楼守卫祖国边关口岸

来源：中国军网-解放军报 作者：龙文志 曹继可 责任编辑：刘上靖

2025-02-05

南国冬日，红河远上。云南省红河哈尼族彝族自治州河口瑶族自治县既是闻名遐迩的百年商埠，也是璀璨夺目的口岸明珠。这里白天车水马龙、人流如织，夜晚霓虹闪烁、热闹非凡，有着”滇南不夜城”之称。南部战区陆军某边防旅”红河前哨钢二连”官兵就驻扎在这座口岸小城里的一座山顶上。站在山顶望去，山下景象尽收眼底。

一

“同志，这里是军事管理区，请不要在此逗留。”正在哨楼执勤的战士漆人瑜发现有游客在哨所附近徘徊，赶忙上前劝离。县城常住人口不多，但流动人口相对较多，不法分子时常混迹其中。

在连队，只有表现优秀的官兵，才能参与哨所执勤。站上哨楼，守卫祖国边关口岸，是”红河前哨钢二连”每名官兵追求的目标。

从军报国的种子，很早便在漆人瑜的心里播下。爷爷当兵时训练执勤的照片、父亲一身戎装的模样，是他儿时深刻的记忆。

2023 年，大学毕业的漆人瑜怀着对军营的热爱报名参军。最终，他如愿穿上军装，来到祖国西南边陲，成为一名边防军人。

尽管来到连队时间不长，但漆人瑜对连队官兵忠诚戍边的故事和连队”拒腐蚀永不沾，坚如钢永不垮”的优良传统，非常熟悉。

多年前的一天傍晚，时任副连长卢占强发现一名可疑男子在哨所附近拍照。卢占强上前询问时，该男子拿出一沓钱就朝卢占强的衣袋里塞。卢占强严词拒绝，并将该人控制。经相关部门查实，该男子确系不法分子。

10 多年前的一个冬日，官兵获知有不法分子正在活动，便火速集合、赶赴现场。不法分子提前设置的石堆、捕兽夹等，挡住了官兵的去路。战士孙希栋为了争取时间，只身前往排障，右脚不慎踩上捕兽夹。当战友用铁棍撬开捕兽夹时，孙希栋的裤管已被鲜血染红……

这些故事深深印在漆人瑜脑海里，让他对自己的战位有了初步的认识。此后不久，他亲身经历的一件事，让他对自己的职责使命有了更清晰的认识。

那天巡逻分队在界河边上，发现有人正在界河我方一侧用抽沙机采沙，连长赶紧带队上前制止。采沙的老板试图用金钱贿赂官兵，让他们”睁只眼闭只眼”。连长严词拒绝道：”在界河采沙，会使我方河床降低、河堤被冲刷侵蚀，导致界河中心线向我方移动，损害国家主权和利益。作为边防军人，绝不允许这种事情发生！”

这次经历让漆人瑜更懂得身为边防军人的责任和使命。在漆人瑜看来，捍卫国家利益，体现在一件件具体的事上：巡逻执勤、站岗上哨……当兵的日子，肩上扛着的是责任。

身在繁华口岸，考验常常相伴。连队党支部把提高官兵的”免疫力”作为重要方面，教育引导官兵传承弘扬连队优良传统，提高拒腐防变的能力，始终做”耐得住寂寞、守得住清贫、扛得住腐蚀、经得起诱惑”的国门卫士和口岸标兵。

二

“边关有我在，祖国请放心……”去年国庆节，连队巡逻官兵紧握右拳，在界碑前面向国旗庄严宣誓。豪迈激昂的誓言声，响彻红河岸边。队伍中，第一次参加巡逻的列兵吴柏剑眼神格外坚定。

吴柏剑是去年二次入伍的新兵。下连时，远远看到巍峨耸立的国门，吴柏剑十分激动，”能够在国门口岸巡逻执勤，是多么让人骄傲的事情！”

“边境口岸形势复杂多变，而执勤考验的就是观察识别能力，需要哨兵练就’火眼金睛’。”第一次进行观察训练时，吴柏剑听完班长的话，暗下决心，一定要练好本领，早日成为一名合格的国门卫士。

为了早日参加巡逻执勤，吴柏剑苦练军事技能。那天，通过全部考核的他，迎来第一次巡逻。

清晨，吴柏剑仔细整理装具，等待集合出发的命令。”我们每个人都是边防的一扇窗口，也代表着中国军人的形象。”集合前，服役十几年的老班长明亮对新兵们说。

第一次参与巡逻，吴柏剑有些激动。点名时，他双手紧握钢枪，答”到”的声音格外响亮。队伍行至半途，班长明亮下达口令，组织队员面向界河敬礼。礼毕，明亮转过身，对新兵

们说起王家国烈士的事迹。”当年王家国烈士就是在这里执行任务时落水牺牲的，年仅 19 岁……”

望着眼前流淌的河水，吴柏剑真切感受到身为军人的职责。那一刻，他对边防有了更深的理解，更加懂得了戍守边关的意义，不由得握紧手中的钢枪。

几个小时后，巡逻分队到达最后一个点位。远处，界碑上鲜红的”中国”二字出现在眼前。

神往已久的界碑就在眼前，吴柏剑只觉一路的疲惫顿时烟消云散。描红时，吴柏剑难掩自己激动的心情，”看到界碑威严矗立在国门一侧时，我觉得，再苦再累都值了！”

“走完巡逻路，我更加懂得了边防的含义。驻守在国门口岸，我们就是祖国的钢铁卫士！”吴柏剑巡逻归队后，在自己的笔记本上写下这样一段话。

三

戍边 10 余载，一级上士周余鑫执勤时，依然不敢有一丝懈怠。多年前，来到这里不久的周余鑫，感到哨位上日复一日的工作有些枯燥。时任副指导员赵林望着山下灯火璀璨的县城对周余鑫说：”哨位虽小，责任重大。岗位平凡，意义深远。小哨位连着大国门，守望万家灯火，守在国门口岸，我们是这片繁华的见证者，更是守护者。”这番话点亮了周余鑫。

再一次走上哨位，周余鑫的内心平静了。他决心当好国门卫士，守护不远处的繁华与安宁。从那之后，周余鑫训练更加刻苦，各项执勤技能取得很大进步。

那年，战友王家国的牺牲，让周余鑫很受触动。当时，上等兵王家国在一次边境执勤任务中不幸落水牺牲。消息传回连队，周余鑫呆住了。两人是同年兵，入伍后来到同一个新兵营，下连后被分到一个班。他们在摸爬滚打中建立了深厚的战友情谊，两人还相约要一起走上哨所。

面对王家国烈士生前获得的荣誉证书，周余鑫说：”守卫好祖国边疆，是边防军人神圣的使命，也是我坚定的承诺。”之后，周余鑫训练更加刻苦，每次上哨执勤更加用心。他知道，坚守战位也是对战友的缅怀和纪念。

深夜，城市渐渐安静，霓虹仍在闪烁，陪伴着执勤的官兵。”怀抱红河波上月，枕戈待旦四连山。”这是哨所官兵书写的一副对联，也是对他们迷彩青春的真实写照。一茬茬官兵，坚守在边境口岸、驻扎在高山上，以青春和热血守护着眼前的繁荣和可爱的山河。

The Frontier Guards of The Red River Stand on The Sentry Tower To Guard The Border Ports of The Motherland

Source: China Military Network-People's Liberation Army Daily Author: Long Wenzhi Cao Jike Editor: Liu Shangjing

2025-02-05

In the winter of the southern country, the Red River rises far away. Hekou Yao Autonomous County, Honghe Hani and Yi Autonomous Prefecture, Yunnan Province is not only a well-known century-old commercial port, but also a dazzling pearl of the port. There are busy cars and people here during the day, and neon lights flashing and bustling at night. It is known as the "City That Never Sleeps in Southern Yunnan". The officers and soldiers of the "Red River Frontier Steel Second Company" of a border defense brigade of the Southern Theater Army are stationed on the top of a mountain in this small port city. Standing on the top of the mountain, you can see the scenery below.

"Comrade, this is a military management area, please do not stay here." Qi Renyu, a soldier on duty in the sentry tower, found that there were tourists wandering near the sentry post and hurried forward to persuade them to leave. The county town has a small permanent population, but a relatively large floating population, and lawless elements often mingle among them.

In the company, only officers and soldiers with outstanding performance can participate in the outpost duty. Standing on the sentry tower and guarding the border ports of the motherland is the goal pursued by every officer and soldier of the "Red River Frontier Steel Second Company".

The seeds of joining the army to serve the country were sown in Qi Renyu's heart very early. The photos of his grandfather training and duty when he was a soldier and the appearance of his father in military uniform are his deep childhood memories.

In 2023, Qi Renyu, who graduated from university, signed up for the army with his love for the barracks. In the end, he put on a military uniform as he wished, came to the southwestern border of the motherland, and became a border guard.

Although he has not been in the company for a long time, Qi Renyu is very familiar with the stories of the company's officers and soldiers loyal to the border and the company's fine tradition of "resisting corruption and never getting involved, as strong as steel and never collapsing".

One evening many years ago, Lu Zhanqiang, then deputy company commander, found a suspicious man taking pictures near the outpost. When Lu Zhanqiang approached to ask, the man took out a wad of money and stuffed it into Lu Zhanqiang's pocket. Lu Zhanqiang sternly refused and controlled the man. After investigation by relevant departments, the man was indeed an outlaw.

One winter day more than 10 years ago, the officers and soldiers learned that there were outlaws in action, so they quickly gathered and rushed to the scene. The stone piles and traps set up by the outlaws blocked the officers and soldiers' way. In order to buy time, soldier Sun Xidong went alone to clear the obstacles and accidentally stepped on the trap with his right foot. When his comrades pried open the trap with an iron rod, Sun Xidong's trouser legs were stained with blood...

These stories were deeply imprinted in Qi Renyu's mind, giving him a preliminary understanding of his position. Shortly thereafter, an incident he personally experienced gave him a clearer understanding of his duties and mission.

That day, the patrol team was on the edge of the boundary river and found that someone was using a sand pump to extract sand on our side of the boundary river. The company commander quickly led the team to stop it. The boss of the sand mining company tried to bribe the officers and soldiers with money to let them "turn a blind eye". The company commander sternly refused: "Mining sand in the boundary river will lower our riverbed, erode the riverbank, and cause the center line of the boundary river to move toward us, damaging national sovereignty and interests. As a border guard, we will never allow this to happen!"

This experience made Qi Renyu more aware of the responsibility and mission of being a border guard. In Qi Renyu's view, defending national interests is reflected in specific things: patrolling, standing guard... When serving in the army, the responsibility is on the shoulders.

Being in a prosperous port, tests often accompany. The company party branch regards improving the "immunity" of officers and soldiers as an important aspect, educating and guiding officers and soldiers to inherit and carry forward the fine traditions of the company, improve their ability to resist corruption and prevent change, and always be the national gate guards and port model soldiers who "can endure loneliness, keep poverty, withstand corruption, and withstand temptation".

"I am here at the border, please rest assured, motherland..." Last year on National Day, patrol officers and soldiers of the company clenched their right fists and solemnly swore to the national flag in front of the boundary marker. The heroic and passionate oath resounded on the banks of the Red River. In the team, Private Wu Baijian, who participated in the patrol for the first time, had a particularly firm look in his eyes.

Wu Baijian was a new recruit who joined the army for the second time last year. When he was assigned to the company, he saw the towering national gate from afar, and Wu Baijian was very excited, "It is such a proud thing to be able to patrol and work at the national gate!"

"The situation at the border is complex and changeable, and the duty test is the observation and identification ability, which requires the sentinel to develop a 'fiery eye'." During the first observation training, Wu Baijian listened to the squad leader's words and secretly made up his mind to practice his skills and become a qualified national gate guard as soon as possible.

In order to participate in patrol duty as soon as possible, Wu Baijian practiced military skills hard. That day, he passed all the assessments and ushered in his first patrol.

In the morning, Wu Baijian carefully sorted out his equipment and waited for the order to assemble and set off. "Each of us is a window to the border defense, and also represents the image of Chinese

soldiers." Before the assembly, Mingliang, an old squad leader who has served for more than ten years, said to the recruits.

Wu Baijian was a little excited for his first patrol. When he was called, he held the steel gun tightly with both hands, and the sound of "here" was particularly loud. When the team was halfway, squad leader Mingliang gave a command and organized the team members to salute the boundary river. After the ceremony, Mingliang turned around and told the recruits about the deeds of martyr Wang Jiaguo. "That year, martyr Wang Jiaguo fell into the water and died while performing a mission here. He was only 19 years old..."

Looking at the flowing river in front of him, Wu Baijian truly felt his duty as a soldier. At that moment, he had a deeper understanding of the border defense, and understood the significance of guarding the border, and couldn't help but hold the steel gun in his hand tightly.

A few hours later, the patrol team arrived at the last point. In the distance, the bright red word "China" on the boundary monument appeared in front of him.

The long-awaited boundary monument was right in front of him, and Wu Baijian felt that his fatigue along the way suddenly disappeared. When tracing in red, Wu Baijian could not hide his excitement, "When I saw the boundary monument standing majestically on the side of the national gate, I felt that no matter how hard or tired I was, it was worth it!" "After completing the patrol route, I have a better understanding of the meaning of border defense. Guarding the national gate, we are the iron guards of the motherland!" After Wu Baijian returned from patrol, he wrote this in his notebook.

After guarding the border for more than 10 years, Zhou Yuxin, a first-class sergeant, still dared not slack off when on duty. Many years ago, Zhou Yuxin, who had just arrived here, felt that the day-to-day work at the sentry post was a bit boring. Zhao Lin, the then deputy instructor, looked at the brightly lit county town at the foot of the mountain and said to Zhou Yuxin: "Although the sentry post is small, the responsibility is heavy. The post is ordinary, but the significance is far-reaching. The small sentry post is connected to the national gate, watching the lights of thousands of homes, guarding the national gate, we are witnesses of this prosperity, and even more guardians." These words lit up Zhou Yuxin.

Once again on the sentry post, Zhou Yuxin's heart was calm. He was determined to be a good guard of the country's gate and guard the prosperity and tranquility not far away. Since then, Zhou Yuxin has trained harder and made great progress in various duty skills.

That year, Zhou Yuxin was deeply touched by the sacrifice of his comrade-in-arms Wang Jiaguo. At that time, Corporal Wang Jiaguo unfortunately fell into the water and died during a border duty mission. When the news was passed back to the company, Zhou Yuxin was stunned. The two were soldiers of the same year. After joining the army, they came to the same recruit camp and were assigned to the same class after joining the company. They established a deep comradeship in the struggle, and the two also agreed to go to the sentry post together.

Facing the honorary certificate that martyr Wang Jiaguo received during his lifetime, Zhou Yuxin said: “Guarding the border of the motherland is the sacred mission of border guards and my firm commitment.” After that, Zhou Yuxin trained harder and was more attentive every time he went on duty. He knew that sticking to his position was also a remembrance and commemoration of his comrades-in-arms.

Late at night, the city gradually quieted down, but the neon lights were still flashing, accompanying the soldiers on duty. “Holding the moon on the waves of the Red River, keeping our weapons ready at Silian Mountain.” This is a couplet written by the soldiers at the outpost, and it is also a true portrayal of their camouflage youth. One batch of soldiers after another, sticking to the border ports and stationed on the mountains, guarded the prosperity and lovely mountains and rivers in front of them with their youth and passion.

一个新调整组建连队，如何书写新连史？

来源：解放军报 作者：余睿喆 宋世杰 责任编辑：刘上靖 2025-02-05

陆军某旅某炮兵连奋勇拼搏争创新荣誉——

“崭新的连史，由我们来书写”

■余睿喆 解放军报特约通讯员 宋世杰

该连组织实弹射击。万智奇摄

寒冬深夜，战车轰鸣。

经过一夜战斗，陆军某旅某炮兵连圆满完成阵地防御任务，击退”敌”轮番进攻。

“我们赢了！”官兵激动呐喊。征尘未洗，连队干部黎龙带领骨干展开复盘研讨，从弹药准备、技术检查、占领阵地等方面逐项梳理，为下一场战斗提早做准备。

硬仗接连不断，奋斗步履铿锵。作为新组建连队，调整改革之初，他们面临缺装备、缺人才等困难，加之来自不同单位的官兵专业领域、训管标准各不相同，如何引导大家合心合力凝聚成一个钢铁集体，成为连队急需解决的首要问题。

连队党支部第一次支委会上，支部委员们经过深入讨论达成共识——每名官兵都是连队的主力，把每个人的干劲凝聚起来，就能形成一股强大力量。

然而，连队初建，连史簿、荣誉史还是一片空白，怎么办？

“崭新的连史，由我们来书写！”经过反复研究，连队推出一系列激励措施：官兵原单位精神特质契合连队建设需求的，纳入连训内容；在军以上单位组织的比武竞赛中获得奖项的，名字写入连史……在荣誉感召激励下，官兵在训练场上挥汗如雨、在比武场上奋勇争先，连队荣誉墙上的锦旗、奖牌渐渐多了起来。

那年底，连队列装某新型火炮，骨干们受命转岗。接装仪式一结束，大家便迫不及待地钻进车舱体验。看着眼前的”新战友”，官兵满脸都是兴奋与激动。

没想到，挑战接踵而至。面对全新的理论知识和操作要求，连专业技术过硬的”金牌”炮长李东阳都犯了难。

同样感到焦虑的，还有刚从其他专业转岗过来的火炮技师罗旭波。新装备训练展开后，李东阳与罗旭波负责配合校炮。看着复杂的操作面板，两人一时不知从何下手。

“新装备磨合期，故障率高，请厂家人员维修不仅费时费力，还影响训练进度。”作为承担全连装备维修保障任务的火炮技师，罗旭波决心探索一条快速高效排除故障的路子。此后遇到装备故障，他便把其他战车的零件一个个更换到故障车上，观察记录哪个零件、哪些部位最容易出问题。

然而，个人的力量毕竟有限。就在罗旭波为如何提高保障效率而发愁的时候，上级组织的一场比武提供了机会。当时，旅里明确要求各单位在备赛期间”边改装、边训练、边执行任务”。由于新装备训练没有经验可供借鉴、没有专业教练员授课，官兵对参加比武心里没底，更担心万一”掉链子”给连队抹黑，报名参赛者寥寥无几。

“书写连史的机会，只留给有准备的人。”动员大会上，黎龙的发言斩钉截铁，”就算倒下，也要倒在冲锋的路上！”铿锵有力的话语，将官兵的热情点燃，现场爆发出雷鸣般的掌声。

从那天起，连队悄然发生着变化：训练场上，相互”较劲”的人多了；比武竞赛，主动报名的人多了；休息时间，自觉加练的人多了……

那段时间，从操作火控计算机到人工操瞄，从穿脱炮衣到吊装弹箱，李东阳白天对着装备熟悉流程、苦练技能，晚上学教材、看视频、悟原理，理论功底和实操技能突飞猛进。

高强度的学习训练，不仅迅速提升了官兵的实战能力，也不断刷新着罗旭波维修保障新装备的”经验值”。

功夫不负有心人。比武结束，听到自己的名字与”优秀车组”一起宣布的一瞬间，李东阳与罗旭波击掌欢呼。

前行的动力，来自内心深处的认同和自觉。李东阳和罗旭波的成功，让大家清晰认识到，只要奋勇拼搏，平凡连队也能锻造出不平凡的兵，普通岗位也能创造出耀眼的成绩。

没有荣誉就创造荣誉，不是标兵就争当标兵。掩体构筑、武装越野、军事地形学……连队连续掀起一波波练兵热潮，官兵在一次次”自讨苦吃”中，不断探索完善新装备训练模式、训练标准、训练内容，凝心聚力形成砥砺奋进的”能量矩阵”和”精神磁场”。

每一颗汗珠都值得铭记，每一份努力都终有回报。组建以来，该连官兵转战大江南北，在寒风呼啸的深夜保养装备、在遮天蔽日的黄沙中开设阵地、在风高浪急的大海上勇立潮头，先后被评为全旅先进基层单位、”四铁”先进单位……

荣誉越来越多，劲头越来越足。去年初，上级组织一场建制连比武，该连与众多兄弟单位同台竞技。长途奔袭时，新兵小高的脚后跟被磨掉一层皮，血水混合着汗水黏在袜子上。班长劝小高休息一下，他却摆摆手：”我不能给连队丢脸！”

最后一个比武课目开始时，小高又站到了起跑线上。随着一声哨响，小高咬紧牙关，向终点冲去。

一次次示范任务、一场场训练演习……从组建之初的普通连队到上下认可的先进单位，在一次次向战而行中，该连官兵奋勇向前、无畏冲锋，走过一段艰辛的”逆袭”之路，在强军兴军新征程上交出一份优异答卷。

短 评

向难而进 奋勇冲锋

■冯启迪

一位军事家说过：”冲锋是一种外化的精神标识，折射着一支军队的士气、豪气、虎气。”对军人来说，冲锋是必须具备的精神状态、奋斗姿态，反映出超越自我、精益求精的目标追求和向险而行、向难而进的血性胆气。

一个新调整组建连队，如何书写新连史？答案就是冲锋、冲锋、再冲锋！面对陌生的专业领域、全新的体制编制、严苛的训练标准，陆军某旅某炮兵连官兵始终以冲锋的劲头担重任、打头阵：试装改装，他们与时间赛跑，推动战斗力快速提升；谋战研战，他们跟自己

较劲，为制胜战场积蓄打赢底气。他们把困难当作”垫脚石”、把挑战当作”登云梯”，在奋勇冲锋、攻坚克难中书写属于自己的新连史。

路虽远，行则将至；事虽难，做则必成。新时代新征程，我们都应像该连官兵一样，在一次次摔打磨炼中砥砺”尖刀利刃”，在一次次战胜困难中淬炼”钢筋铁骨”，始终保持勇站排头、只争第一的冲锋姿态，跑好转型”接力棒”，跑出强军加速度，担负起新时代革命军人的职责使命。

How does a newly adjusted company write a new company history?

Source: PLA Daily Author: Yu Ruizhe Song Shijie Editor: Liu Shangjing 2025-02-05

An artillery company of a certain brigade of the army fought bravely to create new honors-

“A brand-new company history will be written by us”

■ Yu Ruizhe, special correspondent of the PLA Daily Song Shijie

The company organized live-fire shooting. Photographed by Wan Zhiqi

In the dead of winter, the tanks roared.

After a night of fighting, an artillery company of a certain brigade of the army successfully completed the position defense task and repelled the “enemy” attacks in turns.

“We won!” The officers and soldiers shouted excitedly. Before the dust of the expedition was washed off, the company cadre Li Long led the backbone to conduct a review and discussion, sorting out the ammunition preparation, technical inspection, occupation of positions and other aspects one by one, to prepare for the next battle in advance.

Tough battles continued, and the struggle was sonorous. As a newly formed company, at the beginning of the adjustment and reform, they faced difficulties such as lack of equipment and talents. In addition, the professional fields and training and management standards of officers and soldiers from different units were different. How to guide everyone to work together to form a steel collective has become the primary problem that the company urgently needs to solve.

At the first branch committee meeting of the company party branch, the branch members reached a consensus after in-depth discussion-every officer and soldier is the main force of the company. By gathering everyone’s enthusiasm, a powerful force can be formed.

However, the company was just established, and the company history book and honor history were still blank. What should we do?

“The new company history will be written by us!” After repeated research, the company launched a series of incentive measures: officers and soldiers whose original unit spiritual characteristics

meet the needs of company construction will be included in the company training content; those who won awards in competitions organized by military units and above will have their names written into the company history... Inspired by the call of honor, officers and soldiers sweated profusely on the training ground and fought bravely on the competition field. The number of silk banners and medals on the company's honor wall gradually increased.

At the end of that year, the company was equipped with a new type of artillery, and the backbones were ordered to transfer. As soon as the receiving ceremony was over, everyone couldn't wait to get into the cabin to experience it. Looking at the "new comrades" in front of them, the officers and soldiers were full of excitement and excitement.

Unexpectedly, challenges came one after another. Faced with new theoretical knowledge and operating requirements, even the "gold medal" gunner Li Dongyang, who has strong professional skills, was in trouble.

Also feeling anxious was Luo Xubo, an artillery technician who had just transferred from other majors. After the new equipment training started, Li Dongyang and Luo Xubo were responsible for coordinating the artillery. Looking at the complex operating panel, the two didn't know where to start for a while.

"During the running-in period of new equipment, the failure rate is high. Asking the manufacturer's personnel to repair it is not only time-consuming and laborious, but also affects the progress of training." As an artillery technician who undertakes the maintenance and support tasks of the entire company's equipment, Luo Xubo is determined to explore a way to quickly and efficiently troubleshoot. After that, when he encountered equipment failures, he replaced the parts of other tanks one by one on the faulty vehicle, observing and recording which parts and parts were most likely to have problems.

However, personal power is limited after all. Just when Luo Xubo was worried about how to improve the efficiency of support, a competition organized by the superiors provided an opportunity. At that time, the brigade clearly required all units to "modify, train, and perform tasks" during the preparation period. Since there was no experience to learn from in training new equipment and no professional coaches to teach, the officers and soldiers were unsure about participating in the competition, and they were even more worried that they would "fall off the chain" and discredit the company, so there were very few participants.

"The opportunity to write the company's history is only for those who are prepared." At the mobilization meeting, Li Long's speech was firm, "Even if we fall, we must fall on the way to charge!" The sonorous and powerful words ignited the enthusiasm of the officers and soldiers, and thunderous applause broke out at the scene.

From that day on, the company quietly changed: more people "competed" with each other on the training ground; more people actively signed up for the competition; more people practiced more during the break... During that time, from operating the fire control computer to manual aiming,

from putting on and taking off the gun cover to hoisting the ammunition box, Li Dongyang familiarized himself with the equipment during the day and practiced hard, and studied textbooks, watched videos, and understood the principles at night. His theoretical foundation and practical skills improved by leaps and bounds. High-intensity learning and training not only quickly improved the actual combat capabilities of officers and soldiers, but also constantly refreshed Luo Xubo's "experience value" in maintaining and supporting new equipment. Hard work pays off. At the end of the competition, when Li Dongyang and Luo Xubo heard their names announced together with the "excellent crew", they high-fived and cheered. The motivation to move forward comes from deep recognition and consciousness. The success of Li Dongyang and Luo Xubo made everyone clearly realize that as long as they fight bravely, ordinary companies can also forge extraordinary soldiers, and ordinary positions can also create dazzling results. If there is no honor, create it. If you are not a model soldier, strive to be one. Bunker construction, armed cross-country, military topography... The company has set off a wave of training crazes. The officers and soldiers have been "asking for trouble" time and time again, constantly exploring and improving the new equipment training mode, training standards, and training content, and have gathered their hearts and minds to form an "energy matrix" and "spiritual magnetic field" for forging ahead.

Every drop of sweat is worth remembering, and every effort will eventually pay off. Since its establishment, the officers and soldiers of the company have fought all over the country, maintaining equipment in the middle of the night when the cold wind is howling, setting up positions in the yellow sand that covers the sky, and standing at the forefront of the sea with high winds and waves. They have been successively rated as the advanced grassroots unit of the whole brigade and the "four iron" advanced unit...

More and more honors, more and more vigor. At the beginning of last year, the superior organized a competition for the established companies, and the company competed on the same stage with many brother units. During the long-distance raid, the heel of the new recruit Xiao Gao was worn off a layer of skin, and the blood mixed with sweat stuck to the socks. The squad leader advised Xiao Gao to take a break, but he waved his hand: "I can't embarrass the company!"

When the last competition course began, Xiao Gao stood at the starting line again. With a whistle, Xiao Gao gritted his teeth and rushed to the finish line.

One demonstration task after another, one training exercise after another... From an ordinary company at the beginning of its establishment to an advanced unit recognized by the upper and lower levels, in the battles again and again, the officers and soldiers of the company bravely moved forward and charged fearlessly, walked through a difficult "counterattack" road, and handed in an excellent answer sheet on the new journey of strengthening the army.

■Feng Qidi

A military strategist once said: "Charge is an externalized spiritual symbol, reflecting the morale, heroism, and tiger spirit of an army." For soldiers, charging is a necessary mental state and fighting

attitude, reflecting the goal pursuit of surpassing oneself and striving for excellence and the bloody courage to go to danger and advance to difficulties.

How does a newly adjusted company write a new company history? The answer is charge, charge, and charge again! Faced with unfamiliar professional fields, brand-new institutional organization, and strict training standards, the officers and soldiers of an artillery company of a certain brigade of the army have always taken on heavy responsibilities and taken the lead with the spirit of charge: in trial installation and modification, they raced against time to promote the rapid improvement of combat effectiveness; in war planning and research, they competed with themselves to accumulate confidence to win the battlefield. They regard difficulties as “steppingstones” and challenges as “ladders”, and write their own new company history in bravely charging and overcoming difficulties.

Although the road is long, it will be reached if you walk; although the task is difficult, it will be accomplished if you do it. In the new era and new journey, we should all be like the officers and soldiers of the company, sharpen the “sharp knife” in repeated falls and tempering, temper the “steel bones” in repeated overcoming difficulties, always maintain the attitude of bravely standing in the front and striving for the first place, run the “baton” of transformation well, run out of the acceleration of strengthening the army, and shoulder the responsibilities and missions of revolutionary soldiers in the new era.

将难题清单转化为”成效榜单”，陆军某部提升服务基层质效

来源：中国军网-解放军报 作者：胡家南 韩伟斌 责任编辑：尚晓敏

2025-02-06

陆军某部改进作风提升服务基层质效

将难题清单转化为”成效榜单”

解放军报讯 胡家南、韩伟斌报道：”通勤难题上报没多久，机关就下发通知明确，所属人员可以根据实际情况申请就近住用集体宿舍。”近日，陆军某部文职人员黄涛向家人打电话分享好消息。他按照要求提供相关材料后，已接到机关”申请通过”的通知。

“对于官兵反映的急难愁盼问题，必须用心用情解决，做到马上就办、办实办好。”该部领导介绍，他们召开新年度基层建设形势分析会时，要求机关开新局不忘理”旧账”，以拉单列表方式梳理出 10 余项服务基层未办理完毕的事项，并逐一分析原因、完善举措，分解任务后指定具体责任人。会上，他们还聚焦基层提报的新年度建设需求研办法、商实招，初步确定了第一季度需重点解决的问题。

黄涛家距离单位较远，加之交通拥堵，通勤极为不便。去年底，该部机关一名同志蹲点帮建时了解到，类似情况还不少。为此，该部将此事纳入基层难题清单，调研论证后决定将空余营房改造为临时集体宿舍，缓解文职人员通勤难题。”下一步，我们将跟进了解相关情况，积极与上级部门对接协调，聚焦这一问题研究制订长效举措。”该部领导说，他们结合解难实效开展动态讲评和满意度测评，将难题清单逐步转化为”成效榜单”。

通过分层分类集训等方法，帮助基层培养专业骨干；建立”三帮一”机制，帮带文职人员强化军政素质；统筹调控公寓房资源，为来队探亲家属提供暖心服务保障……该部将务实举措纳入年度工作统筹部署、一体推进，相关工作有条不紊展开，解难举措陆续在基层落地。

Transforming The List Of Problems Into a “Performance List”, a Certain Army Unit Improves The Quality and Efficiency of Serving The Grassroots

Source: China Military Network-Liberation Army Daily Author: Hu Jianan Han Weibin Editor: Shang Xiaomin

2025-02-06

A certain army unit improves its work style and improves the quality and efficiency of serving the grassroots

Transforming the list of problems into a “performance list”

Liberation Army Daily News Hu Jianan and Han Weibin reported: “Not long after the commuting problem was reported, the agency issued a notice to clarify that the personnel can apply for nearby collective dormitories according to actual conditions.” Recently, Huang Tao, a civilian staff member of a certain army unit, called his family to share the good news. After he provided the relevant materials as required, he received a notice from the agency that his “application was approved.”

“For the urgent, difficult and anxious problems reported by officers and soldiers, we must solve them with care and affection, and do it immediately and do it well.” The leaders of the department introduced that when they held a new year’s grassroots construction situation analysis meeting, they required the organs to open a new bureau without forgetting to deal with “old accounts”, and sorted out more than 10 matters that had not been completed in serving the grassroots in a list-drawing manner, and analyzed the reasons one by one, improved the measures, and designated specific responsible persons after decomposing the tasks. At the meeting, they also focused on the new year’s construction needs reported by the grassroots to study methods and discuss practical measures, and preliminarily determined the problems that need to be solved in the first quarter.

Huang Tao’s home is far away from the unit, and the traffic congestion makes commuting extremely inconvenient. At the end of last year, a comrade from the department learned that there

were many similar situations when he was squatting to help with construction. For this reason, the department included this matter in the list of grassroots problems, and after investigation and demonstration, it decided to transform the vacant barracks into temporary collective dormitories to alleviate the commuting problems of civilian personnel. “In the next step, we will follow up to understand the relevant situation, actively connect and coordinate with higher-level departments, focus on this issue to study and formulate long-term measures.” The department leader said that they will carry out dynamic reviews and satisfaction evaluations in combination with the effectiveness of problem solving, and gradually transform the problem list into a “performance list”.

Through methods such as stratified and classified training, help grassroots to cultivate professional backbones; establish a “three-help-one” mechanism to help civilian personnel strengthen their military and political qualities; coordinate and control apartment resources to provide warm service guarantees for family members who come to visit the team... The department will incorporate practical measures into the annual work planning and promotion, and relevant work will be carried out in an orderly manner, and problem-solving measures will be implemented at the grassroots level one after another.

第 81 集团军某旅提升教练员队伍组训施教水平

集中会商解疑难 帮带指导强能力

解放军报讯 赵志宇、李芊逸报道：”组织战术基础动作训练时，应根据障碍物形状、高度等情况特点，引导参训人员灵活采用不同战术动作快速通过……”日前，第 81 集团军某旅训练中心，各课目教练员围坐一起，聚焦训练中常见问题和组训施教难题，开展集中会商、研讨解决对策。据了解，该旅结合阶段训练任务建立教练员集中会商机制，有效提升了训练水平。

“新大纲紧盯实战需要，调整了相关课目的训练方式和标准要求，这对教练员组训施教能力提出更高要求。”该旅领导说，为此，他们在组织教练员深入学习新大纲的基础上，建立完善集中会商机制，跟进阶段训练任务定期组织教练员围绕训练中存在的不足、遇到的问题集智攻关；邀请经验丰富的教练员、训练标兵和机关部门同志，聚焦重难点课目组训交流经验做法，提升组训水平。同时，大家还结合训练复盘剖析，围绕训练内容设置、组训施教方式等研究改进方案。

笔者在该旅刺杀课目训练场看到，首席教练员汤光鹤正结合某任务经历，逐一讲解组合练习中的动作细节。”集中会商时，我与其他教练员结合前期经验，围绕精细化组训提出建议，得到机关部门认可。”汤光鹤介绍，训练中，他们把相关课目分解为若干模块，先细化内容组织分训，然后开展整体合训，由易到难、循序渐进，不但激发了官兵训练热情，而且提升了训练质效。

“组织教练员集中会商，既利于及时发现解决训练中存在的普遍性问题，又为教练员集智攻关、分享经验提供了平台。”该旅干部段小虎说，他们将逐步扩大集中会商人员范围，定期收集汇总训练中遇到的疑难问题，邀请训练专家或相关研究人员等参与会商，在解决训练难题的同时，进一步提升旅队教练员队伍组训施教水平。

A Brigade of The 81st Group Army Improves The Training and Teaching Level of The Instructor Team

Source: China Military Network-People’s Liberation Army Daily Author: Zhao Zhiyu Li Qianyi Editor: Shang Xiaomin

2025-02-06 06:27:03 0

A brigade of the 81st Group Army improves the training and teaching level of the instructor team

Concentrated consultation to solve problems and help guide and strengthen capabilities

People’s Liberation Army Daily News Zhao Zhiyu and Li Qianyi reported: “When organizing tactical basic action training, the trainees should be guided to flexibly adopt different tactical actions to quickly pass through according to the characteristics of the obstacle shape, height, etc....” Recently, at the training center of a brigade of the 81st Group Army, instructors of various subjects sat together, focusing on common problems in training and difficulties in training and teaching, and conducted centralized consultations and discussed solutions. It is understood that the brigade has established a centralized consultation mechanism for instructors in combination with the stage training tasks, which has effectively improved the training level.

“The new syllabus closely follows the actual combat needs and adjusts the training methods and standard requirements of relevant subjects, which puts higher demands on the training and teaching ability of instructors.” The brigade leader said that for this reason, they organized instructors to study the new syllabus in depth, established and improved the centralized consultation mechanism, followed up the stage training tasks, and regularly organized instructors to focus on the deficiencies and problems encountered in training; invited experienced instructors, training models and comrades from the organs and departments to focus on the training of difficult subjects to exchange experiences and practices and improve the level of training. At the same time, everyone also combined the training review and analysis to study improvement plans around the training content setting, training and teaching methods.

The author saw at the brigade's assassination training ground that the chief instructor Tang Guanghe was explaining the details of the movements in the combined exercises one by one based on a certain mission experience. "During the centralized consultation, I and other instructors combined previous experience and put forward suggestions on refined training, which were recognized by the organs and departments." Tang Guanghe introduced that during the training, they broke down the relevant subjects into several modules, first refined the content and organized separate training, and then carried out overall joint training, from easy to difficult, step by step, which not only stimulated the training enthusiasm of officers and soldiers, but also improved the quality and effectiveness of training.

"Organizing centralized consultations for instructors is conducive to timely discovering and solving common problems in training, and provides a platform for instructors to pool their wisdom and share experiences." Duan Xiaohu, a cadre of the brigade, said that they will gradually expand the scope of centralized consultation personnel, regularly collect and summarize difficult problems encountered in training, and invite training experts or relevant researchers to participate in the consultation. While solving training problems, they will further improve the training and teaching level of the brigade instructor team.

市电点亮高原军营，驻地官兵实现"用电自由"

来源：中国军网-解放军报 作者：赵金石 孙兴维 李伟欣 责任编辑：赵镭饷

2025-02-07

记者探访新疆和田军分区某部营区感受用能保障新变化——

市电点亮高原军营

■赵金石 解放军报记者 孙兴维 李伟欣

"接通市电，不用担心跳闸了，装备用电更加安全可靠！"

"有了市电，文娱活动再也不担心'限电'了！"

……

寒冬时节，记者来到驻守雪域高原的新疆和田军分区某部采访。谈及营区接入市电带来的新变化，官兵喜悦之情溢于言表。

该部营区地处高原腹地，远离城镇骨干电网，实现"用电自由"曾是一代代官兵的梦想。聊起这一话题，已在该部工作 12 年的干部宋飞感慨地说，接通市电前，营区日常用电主要依靠驻地附近的风能发电、光伏发电厂输电和部队的油机发电。随着时代发展，部队信息化装备越来越多，加之官兵日益增长的物质文化需求，对电能的需求量越来越大。

然而，由于供电总量有限，该部营区长期实行”计划用电”模式。大功率用电设备启动时，生活用电就得为工作用电让路。为保障部分特殊大型用电设备正常运转，需专门配置油机发电。有的设备还得配备不间断电源，以确保跳闸断电后能继续使用。

负责信息保障的干部臧茂枝说，突然断电极易损坏视频会议系统、网络服务器等设备，没有长明电时，必须为其配备不间断电源，以确保信息不中断、设备不受损。

2023 年底，在军地各级的关心关怀下，官兵期盼已久的市电，终于从 300 多公里外接入该部营区，官兵工作生活由此发生了喜人变化。

夜色渐浓，记者漫步营区，明亮的灯光为冬夜增添了几分暖意。同行的该部干部李光灿告诉记者，以前，由于晚间用电量大，道路两旁的灯箱基本不会点亮，一到晚上营区里就黑黢黢的。如今有了长明电，道路两旁安装了市电路灯，官兵不用摸黑走夜路了。

以前供电不足时，一到周末，团部读书吧、俱乐部、电影院等用电量大的场所同时开放，需要机关值班室提前通知其他部门关掉功率较大的用电设备，才能确保正常运行。有一年除夕，正当官兵欢欢喜喜收看春节联欢晚会时，突然停电了，大家只能摸黑回宿舍。如今，有了长明电，官兵可以踏踏实实看电视、放电影了。

“接入市电后，我们不用半夜起来检查油机了！”该部司炉班班长、一级上士刘威乐呵呵地说，由于锅炉鼓风系统、水系统等用电负荷大，过去只能通过专门的油机一对一”专属”供电。一到冬天，锅炉需全时连续运行，油机就得全时发电，司炉班需要 24 小时值班，很是辛苦。接入市电后，该部对营区供暖系统进行了升级改造，还安装了换热设备和软化水处理系统，供热效率大大提升，系统故障率显著降低，不仅有效节约了供暖成本和维修经费，还更加环保高效。

“医疗保健设备，也正在更新扩建。”该部制氧站负责人、一级上士韩亚军接过话茬，”有了长明电，设备安全系数大幅提高，我们对制氧方舱进行了升级改造。以前一次只能同时灌装 4 个钢瓶，现在可同时为 16 个钢瓶灌装高浓度氧气，工作效率大幅提升。”

开饭时间临近，记者走进炊事班。轰鸣声中，只见大功率的蒸箱、烤箱等设备都在满负荷运转。炊事班班长、一级上士么子轩感慨地说：”以前，功率稍大的电器都不敢同时工作，怕引起跳闸断电。有时会餐吃个火锅，都得协调其他单位’让’电。如今电力供应有了保障，不用担心跳闸。不过，长明电也是有限资源，我们还要像以前一样节约用电、科学用电。”

从油机发电到清洁能源，从光伏发电到长明市电，高原军营用能保障的喜人变化，不仅是国家经济发展惠及高原边防的见证，也是多年来高原基础设施建设发展变化的一个缩影。

该部领导告诉记者，可靠稳定的市电，不仅为官兵生活提供了有力保障，让官兵能将更多时间精力投入练兵备战，而且确保装备器材可以全天候工作，有效提升部队管边控边能力。

记者感言

营房增”光” 官兵心”亮”

■孙兴维

多年前，记者到高原边防部队采访时，大部分哨所靠油机发电，每天只能供电几个小时，而且电压不稳是常态；没有电力供应时，通信基站无法工作，打个电话得跑到很远的山头上”找”信号。

电力是现代生活的必需品，也是推动社会繁荣进步的重要基础。尤其在经济社会发展不断加速的今天，电力变得越来越不可或缺。在我军边海空防建设中，电力发挥的作用也越来越突出。过去，由于地理位置、交通条件、建设成本等因素制约，我军少数哨所或执勤点位长期不通长明电，给官兵工作训练和学习生活带来诸多不便，”白天兵看兵、晚上数星星”一度是不少边防哨所的真实写照。

营房增”光”，官兵心”亮”。随着高原边防部队接入长明市电，稳定的供电为边防生活增添了色彩。边防部队的装备器材、照明设施可以全天候工作，科技管边控边能力更强了；官兵执勤效率大大提升，守边固防热情更高、动力更足。采访中，官兵说得最多的一句话是：营区有了长明电，我们更要把祖国的大好河山守护好！

The City Electricity Lights Up The Plateau Military Camp, and The Stationed Officers and Soldiers Achieve “Freedom of Electricity Use”

Source: China Military Network-People’s Liberation Army Daily Author: Zhao Jinshi Sun Xingwei Li Weixin Editor: Zhao Leixiang

2025-02-07

Reporters visit the camp of a certain unit of the Hotan Military Sub-district in Xinjiang to experience the new changes in energy guarantee——

City electricity lights up the plateau military camp

■ Zhao Jinshi People’s Liberation Army Daily reporter Sun Xingwei Li Weixin

“Connect to the city electricity, don’t worry about tripping, equipment power use is safer and more reliable!”

“With the city electricity, cultural and entertainment activities no longer worry about “power restrictions”!”

...

In the cold winter, the reporter came to interview a certain unit of the Hotan Military Sub-district in Xinjiang stationed on the snowy plateau. Talking about the new changes brought about by the camp's access to the city electricity, the officers and soldiers were overjoyed.

The camp of the unit is located in the hinterland of the plateau, far away from the backbone power grid in the city. Realizing "freedom of electricity use" has been the dream of generations of officers and soldiers. Talking about this topic, Song Fei, a cadre who has worked in the department for 12 years, said with emotion that before the connection to the city power supply, the daily electricity consumption of the camp mainly relied on wind power generation near the station, photovoltaic power plant transmission and oil generator power generation of the troops. With the development of the times, the troops have more and more information equipment, and the officers and soldiers have growing material and cultural needs, and the demand for electricity is increasing.

However, due to the limited total power supply, the camp of the department has long implemented the "planned power consumption" mode. When high-power electrical equipment is started, the electricity for life must give way to the electricity for work. In order to ensure the normal operation of some special large-scale electrical equipment, oil generators need to be specially configured for power generation. Some equipment must also be equipped with an uninterruptible power supply to ensure that it can continue to be used after the power is cut off.

Zang Maozhi, a cadre in charge of information security, said that sudden power outages are very likely to damage video conferencing systems, network servers and other equipment. When there is no permanent power supply, they must be equipped with an uninterruptible power supply to ensure that information is not interrupted and equipment is not damaged.

At the end of 2023, with the care and concern of the military and local governments at all levels, the long-awaited city electricity was finally connected to the camp of the unit from more than 300 kilometers away, which brought about gratifying changes in the work and life of the officers and soldiers.

As the night deepened, the reporter strolled in the camp, and the bright lights added a bit of warmth to the winter night. Li Guangcan, a cadre of the unit who was traveling with the reporter, told reporters that in the past, due to the high power consumption at night, the light boxes on both sides of the road were basically not lit, and the camp was dark at night. Now there is a long-lasting electricity, and the city electric lights are installed on both sides of the road, so the officers and soldiers don't have to walk in the dark at night.

In the past, when the power supply was insufficient, on weekends, the regiment's reading bar, club, cinema and other places with high power consumption were opened at the same time, and the duty room of the agency needed to notify other departments in advance to turn off the high-power electrical equipment to ensure normal operation. One New Year's Eve, when the officers and soldiers were happily watching the Spring Festival Gala, there was a sudden power outage, and

everyone had to go back to the dormitory in the dark. Now, with long-lasting electricity, the officers and soldiers can watch TV and play movies steadily.

“After connecting to the mains, we don’t have to get up in the middle of the night to check the oil engine!” Liu Wei, the squad leader of the unit’s boiler team and a first-class sergeant, said happily that due to the large power load of the boiler blast system and water system, in the past, only a special oil engine could be used for “exclusive” power supply. In winter, the boiler needs to run continuously all the time, and the oil engine has to generate electricity all the time. The boiler team needs to be on duty 24 hours a day, which is very hard. After connecting to the mains, the unit upgraded the camp’s heating system and installed heat exchange equipment and softening water treatment systems. The heating efficiency was greatly improved and the system failure rate was significantly reduced. It not only effectively saved heating costs and maintenance expenses, but also became more environmentally friendly and efficient.

“Medical and health care equipment is also being updated and expanded.” Han Yajun, the head of the oxygen station of the unit and a first-class sergeant, took over the conversation, “With the long-term electricity, the safety factor of the equipment has been greatly improved. We have upgraded the oxygen cabin. In the past, only 4 cylinders could be filled at the same time. Now 16 cylinders can be filled with high-concentration oxygen at the same time, which greatly improves work efficiency.”

As the mealtime approached, the reporter walked into the cooking class. Amid the roar, high-power steamers, ovens and other equipment were running at full capacity. The squad leader of the cooking squad, Sergeant First Class Mo Zixuan, said with emotion: “In the past, we dared not work with slightly larger power appliances at the same time, for fear of causing a power outage. Sometimes we had to coordinate with other units to “give up” electricity when we had a hot pot. Now the power supply is guaranteed, and there is no need to worry about power outages. However, long-term electricity is also a limited resource, and we must save electricity and use it scientifically as before.” From oil-powered power generation to clean energy, from photovoltaic power generation to long-term city electricity, the gratifying changes in energy security in plateau military camps are not only a testimony to the national economic development benefiting the plateau border defense, but also a microcosm of the development and changes in plateau infrastructure construction over the years. The leaders of the department told reporters that reliable and stable city electricity not only provides a strong guarantee for the lives of officers and soldiers, allowing them to devote more time and energy to training and preparation for war, but also ensures that equipment can work around the clock, effectively improving the troops’ ability to manage and control the border. Reporter’s comments

Barracks are brighter and soldiers’ hearts are brighter

■Sun Xingwei

Many years ago, when reporters went to the plateau border defense forces for an interview, most of the outposts relied on oil generators to generate electricity, which could only provide electricity for a few hours a day, and unstable voltage was the norm; without electricity supply, communication base stations could not work, and you had to go to a distant mountain to “find” a signal to make a phone call.

Electricity is a necessity in modern life and an important foundation for promoting social prosperity and progress. Especially today, when economic and social development is accelerating, electricity is becoming more and more indispensable. In the construction of our army’s border, sea and air defense, the role of electricity is becoming more and more prominent. In the past, due to factors such as geographical location, traffic conditions, and construction costs, a few of our army’s outposts or duty points had no long-term electricity for a long time, which brought many inconveniences to the officers and soldiers’ work, training, study and life. “Soldiers watch soldiers during the day and count stars at night” was once a true portrayal of many border outposts.

Barracks are brighter and soldiers’ hearts are brighter. With the access of the plateau border defense forces to the long-term city electricity, the stable power supply has added color to the border life. The equipment and lighting facilities of the border defense forces can work around the clock, and the ability to manage and control the border with science and technology has been enhanced; the officers and soldiers’ duty efficiency has been greatly improved, and they are more enthusiastic and motivated to defend the border. During the interview, the most common phrase said by the officers and soldiers was: With the permanent electricity in the barracks, we must protect the beautiful mountains and rivers of our motherland!

让”聆听者”变身”主讲人”，官兵自我教育的激情被点燃

来源：中国军网-解放军报 作者：张百阳 李润杰 责任编辑：赵镭饷

2025-02-07

第 74 集团军某旅为官兵搭建自我教育平台——

让”聆听者”成为”主讲人”

■张百阳 解放军报特约通讯员 李润杰

日前，第 74 集团军某旅一堂内容丰富的教育微课在强军网推出，广受官兵好评。点开视频，该旅军史长廊里，授课主讲人、战士陈玉婷动情讲述军史故事，真挚的语言搭配生动的动漫，吸引不少官兵打卡留言。当月底，陈玉婷被评为”最佳主播”。

“我的成长进步，离不开旅队搭建的成长平台。”谈及自己从普通一兵转变为”最佳主播”的经历，陈玉婷感慨良多。

入伍之初，一个偶然的机会，陈玉婷得知旅队计划开设”白台山广播站”，性格内向的她想报名却又犹豫不决。班长看出了她眼里的渴望和胆怯，积极鼓励她”大胆试一试”。

凭借扎实的播音基础和出色的临场发挥，陈玉婷最终通过选拔成为”白台山广播站”广播员。此后，陈玉婷不仅尽心尽力完成好广播站的各项任务，还发挥播音特长录制了不少教育微课，上传到强军网供官兵学习。

搭建成长平台，燃旺教育炉火。受此启发，该旅决定趁热打铁，持续创新教育方式，扩大群众性自我教育的辐射效应。他们按照”实践调研、效果论证、持续深化”的思路，明确”内容要精、形式要活、效果要好”的要求，紧贴新时代官兵思维方式活、参与意识强等特点，打造”战士大讲堂”“强军故事会”等群众性自我教育平台，营造”人人参与教育、个个接受教育”的良好氛围。

在该旅某营组织的一堂教育课上，三级军士长马树军与官兵分享自己参加上级比武获得第一名的经历。讲到动情处，马树军忍不住热泪盈眶，台下官兵也深受感染，报以热烈掌声。该营陶教导员感慨地说：”把讲台交给官兵，本身就是一种教育。”

现场聆听马树军的强军故事，某连大学生士兵曾维佳深受触动。入伍前，曾维佳自信满满，期待在部队大展身手。没想到，因体能基础薄弱，他在训练考核中屡屡受挫，一度丧失信心。马树军的拼搏精神，让曾维佳暗下决心，一定要发挥自己的长处，找到属于自己的奋斗目标。

此后，在连队组织的一次读书分享会上，喜欢读书的曾维佳为战友介绍最近阅读的一本书，分享自己的思考和感悟。深入浅出的讲解，让战友们对这本书产生了浓厚兴趣，这让曾维佳很有成就感。

在曾维佳的带动下，越来越多官兵爱上了阅读。训练场上，找到自信的曾维佳加班加点专攻精练，不断突破自我。经过一段时间的刻苦训练，曾维佳的体能成绩有了明显进步。

军营朗读者、热点辨析会、学习讨论会……随着一系列群众性自我教育活动蓬勃开展，该旅不少官兵登上讲台，从”聆听者”变身”主讲人”。”官兵自我教育的激情被点燃，有效增强了思想政治教育的针对性、贴近性、实效性。”谈及这一变化，该旅领导欣喜地说，他们将继续拓展丰富群众性自我教育的方法手段，让官兵都能成长为”更好的自己”。

Let The “Listeners” Become “Speakers”, and The Passion for Self-Education of Officers and Soldiers Is Ignited

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Baiyang Li Runjie Editor: Zhao Leixiang

2025-02-07

A brigade of the 74th Group Army built a self-education platform for officers and soldiers-

Let the “listeners” become “speakers”

■ Zhang Baiyang Li Runjie, special correspondent of the People’s Liberation Army Daily

A few days ago, a rich educational micro-class of a brigade of the 74th Group Army was launched on the Strong Army Network, which was widely praised by officers and soldiers. Click on the video, in the military history corridor of the brigade, the lecturer and soldier Chen Yuting emotionally tells the military history story, and the sincere language is matched with vivid animation, which attracts many officers and soldiers to check in and leave messages. At the end of the month, Chen Yuting was named “Best Anchor”.

“My growth and progress are inseparable from the growth platform built by the brigade.” Talking about her experience of transforming from an ordinary soldier to a “best anchor”, Chen Yuting was full of emotion.

At the beginning of her enlistment, by chance, Chen Yuting learned that the brigade planned to open the “Baitaishan Radio Station”. As an introvert, she wanted to sign up but was hesitant. The squad leader saw the desire and timidity in her eyes and actively encouraged her to “give it a try”.

With a solid broadcasting foundation and excellent on-the-spot performance, Chen Yuting finally passed the selection and became a broadcaster of the “Baitaishan Radio Station”. Since then, Chen Yuting has not only done her best to complete the tasks of the radio station, but also used her broadcasting expertise to record a lot of educational micro-classes and uploaded them to the Strong Army Network for officers and soldiers to learn.

Build a growth platform and ignite the fire of education. Inspired by this, the brigade decided to strike while the iron is hot, continue to innovate education methods, and expand the radiation effect of mass self-education. They follow the idea of ”practical research, effect demonstration, and continuous deepening”, clarify the requirements of “fine content, lively form, and good effect”, closely follow the characteristics of the new era of active thinking and strong participation awareness of officers and soldiers, create mass self-education platforms such as “Soldier Lecture Hall” and “Strengthening Army Story Club”, and create a good atmosphere of “everyone participates in education and everyone receives education”.

In an education class organized by a battalion of the brigade, Sergeant Ma Shujun shared with officers and soldiers his experience of winning the first place in the superior competition. When he was moved, Ma Shujun couldn’t help but burst into tears, and the officers and soldiers under the stage were also deeply moved and gave warm applause. The battalion instructor Tao said with emotion: “Giving the podium to officers and soldiers is itself a kind of education.”

Zeng Weijia, a college student soldier of a company, was deeply touched by listening to Ma Shujun’s story of strengthening the army. Before joining the army, Zeng Weijia was full of confidence and looked forward to showing his talents in the army. Unexpectedly, due to his weak

physical foundation, he was repeatedly frustrated in the training assessment and lost confidence for a time. Ma Shujun's fighting spirit made Zeng Weijia secretly determined to give full play to his strengths and find his own goals.

After that, at a book sharing meeting organized by the company, Zeng Weijia, who likes reading, introduced a book he had read recently to his comrades and shared his thoughts and feelings. The in-depth and easy-to-understand explanation made his comrades have a strong interest in the book, which made Zeng Weijia feel very accomplished.

Driven by Zeng Weijia, more and more officers and soldiers fell in love with reading. On the training ground, Zeng Weijia, who found confidence, worked overtime to focus on refining and constantly broke through himself. After a period of hard training, Zeng Weijia's physical fitness has improved significantly.

Barracks readers, hot spot analysis meetings, study and discussion meetings... With the vigorous development of a series of mass self-education activities, many officers and soldiers of the brigade took to the podium and transformed from "listeners" to "speakers". "The passion of officers and soldiers for self-education has been ignited, effectively enhancing the pertinence, closeness and effectiveness of ideological and political education." Talking about this change, the leaders of the brigade said happily that they will continue to expand and enrich the methods and means of mass self-education so that officers and soldiers can grow into "better selves."

新疆军区某团"红四连"官兵云端对话老前辈田都来

来源：中国军网-解放军报 作者：滕宇飞 高 群 责任编辑：乌铭琪

2025-02-08

新疆军区某团"红四连"官兵对话老前辈田都来——

"云端"激荡英雄气

■滕宇飞 解放军报特约通讯员 高 群

田都来（右）与新疆军区某团”红四连”官兵视频连线。受访者供图

近日，新疆军区某团”红四连”指导员谢涛，专程来到陕西省渭南市富平县，代表连队官兵看望该连老前辈田都来。

“老班长，我是’田都来班’班长李嘉俊，祝您身体健康……”从视频连线中看到老部队的年轻官兵，田都来面露笑容：”好！好！谢谢大家。”

在”红四连”，田都来是深受官兵崇敬的英雄。1959年，在围歼纳木湖叛匪的战斗中，身为机枪手的田都来，在子弹打光、战友牺牲、援军尚未赶到的险恶情况下，只身与敌人展开肉搏战。激战中，他的头皮被削掉一块，左大腿被砍伤，全身负伤 13 处，取得歼敌 11 人的战果。战斗结束后，田都来被西藏军区授予”孤胆英雄”称号。

“我的战友强志文、班长苟祥荣，就牺牲在我眼前。他们牺牲后，阵地上只剩我一个人。眼瞅着敌人又冲了上来，我来不及多想，抄起大刀就向他们砍去……”面对镜头，田都来动情地回忆当年的战斗情景。即使是通过视频聆听田都来的讲述，官兵们仍能感到一股英雄气扑面而来。

“老英雄，这是大家给您准备的礼物。”谢涛拿出一块写有”孤胆英雄”字样的高原戍边石，送到田都来手中，”这块石头，是我们在高原执行驻训任务时带回来的。连队不少战友喜欢收集戍边石，有的还在石头上写字，比如’我为祖国守边防’’祖国请放心’等。”田都来细细摩挲着被高原劲风打磨光滑的戍边石，不时点着头。

跟随镜头，视频画面中出现”田都来班”宿舍内部的情景。”老班长，前不久我被评为’四有’优秀士兵！”站在”英模班排荣誉柜”前，列兵樊勇向老前辈汇报自己的成长和收获。樊勇入伍后因体能基础弱，成绩在新兵连”吊车尾”。下连来到全团的模范班”田都来班”后，他压力倍增。为了不给班里抹黑，他憋着一口气加训加练，成绩渐渐追了上来。学习训练之余，樊勇还积极参加各类文体活动，在演讲比赛中荣获奖项。

“太好了！太好了！”听完樊勇的汇报，田都来对着镜头比出大拇指，脸上露出由衷的笑容。

通过提前录制好的一段视频，官兵向田都来报告工作训练情况，展现官兵参加演训任务时的冲锋姿态和温馨的生活日常。配以讲解员的详细解说，田都来看得十分专注。他寄语官兵：”要练好本领，争取更大光荣”。

对话交流中，”红四连”官兵齐唱连歌向老英雄致敬。”勇猛顽强永当先锋，这是我们的连魂。严格精细务实快速，这是我们的连风……”嘹亮高亢的歌声奔涌而出，一股昂扬的英雄气在”云端”激荡。

The Officers and Soldiers of The “Red Fourth Company” of a Regiment in The Xinjiang Military District Had a Dialogue with The Veteran Tian Dulai in The Cloud

Source: China Military Network-People’s Liberation Army Daily Author: Teng Yufei Gao Qun Editor: Wu Mingqi

2025-02-08

The officers and soldiers of the “Red Fourth Company” of a regiment in the Xinjiang Military Region had a dialogue with the veteran Tian Dulai——

The “cloud” stirred up the heroic spirit

■Teng Yufei, special correspondent of the People’s Liberation Army Daily Gao Qun

Tian Dulai (right) had a video connection with the officers and soldiers of the “Red Fourth Company” of a regiment in the Xinjiang Military Region. Photo provided by the interviewee

Recently, Xie Tao, the Political Director of the “Red Fourth Company” of a regiment in the Xinjiang Military Region, made a special trip to Fuping County, Weinan City, Shaanxi Province, to visit the veteran Tian Dulai of the company on behalf of the company officers and soldiers.

“Old squad leader, I am Li Jiajun, the squad leader of the ‘Tian Dulai Squad’. I wish you good health...” Seeing the young officers and soldiers of the old unit through the video link, Tian Dulai smiled: “Good! Good! Thank you all.”

In the “Red Fourth Company”, Tian Dulai is a hero deeply respected by officers and soldiers. In 1959, in the battle to encircle and annihilate the rebels in Nam Lake, Tian Dulai, a machine gunner, fought hand-to-hand with the enemy alone under the dangerous circumstances of running out of bullets, comrades sacrificed, and reinforcements not yet arriving. In the fierce battle, a piece of his scalp was cut off, his left thigh was cut, and he was wounded in 13 places all over his body, and he achieved the result of annihilating 11 enemies. After the battle, Tian Dulai was awarded the title of “Lone Hero” by the Tibet Military Region.

“My comrades Qiang Zhiwen and squad leader Gou Xiangrong died in front of me. After they died, I was the only one left on the battlefield. Seeing the enemy rushing up again, I didn’t have time to think, so I picked up a big knife and chopped them...” Facing the camera, Tian Dulai recalled the battle scene of that year with emotion. Even listening to Tian Dulai’s story through the video, the officers and soldiers can still feel a heroic spirit coming. “Old hero, this is a gift prepared for you.” Xie Tao took out a plateau border stone with the words “Lone Hero” written on it and handed it to Tian Dulai. “This stone was brought back when we were performing training missions on the plateau. Many comrades in the company like to collect border stones, and some even write on the stones, such as “I guard the border for the motherland” and “Please rest assured, the motherland.” Tian Dulai carefully stroked the border stone polished smoothly by the strong wind on the plateau,

and nodded from time to time. Following the camera, the video screen showed the scene inside the dormitory of "Tian Dulai Class". "Old squad leader, I was recently named an excellent soldier with 'four qualities'!" Standing in front of the "Heroic Model Class Honor Cabinet", Private Fan Yong reported his growth and gains to his senior. After joining the army, Fan Yong was weak in physical fitness and his grades were at the bottom of the recruit company. After joining the regiment's model class, "Tian Dulai Class", his pressure doubled. In order not to discredit the class, he held his breath and trained more, and his grades gradually caught up. In addition to learning and training, Fan Yong also actively participated in various cultural and sports activities and won awards in speech competitions.

"Great! Great!" After listening to Fan Yong's report, Tian Dulai gave a thumbs up to the camera with a sincere smile on his face.

Through a pre-recorded video, officers and soldiers reported their work and training to Tian Dulai, showing their charging posture and warm daily life when participating in training missions. With the detailed explanation of the narrator, Tian Dulai looked very focused. He sent a message to officers and soldiers: "Practice your skills well and strive for greater glory."

During the dialogue, the officers and soldiers of the "Red Fourth Company" sang the company song to pay tribute to the old hero. "Being brave and tenacious and always being a pioneer is the soul of our company. Being strict, meticulous, pragmatic and fast is the style of our company..." The loud and high-pitched singing voices rushed out, and a high-spirited heroic spirit surged in the "cloud".

第 80 集团军某旅某连：强化打仗思想 促进新兵快速成长

来源：中国军网-解放军报 作者：黄玉叶 责任编辑：乌铭琪

2025-02-10

第 80 集团军某旅某连注重加强激发新兵主观能动性——

强化打仗思想 促进快速成长

■黄玉叶

"发现目标！"寂静的深山密林中，列兵邓广哲眼睛密切注视着前方。经过抵近侦察，他终于发现"敌"前沿指挥所，随即将坐标方位回传。

这是前段时间发生在第 80 集团军某旅侦察对抗训练中的一幕，某连入伍不到 5 个月的新兵邓广哲顺利完成组织交给的任务。

事后复盘，该连指导员张皓翔肯定了官兵们的表现，重点表扬了邓广哲等几名新兵。

笔者了解到，从下连开始，邓广哲就展现出较好的军事和心理素质。去年底，上级组织跨昼夜实兵侦察训练。考虑到此次训练在复杂陌生地域展开，安全风险相对较高，张皓翔在部署任务时，起初打算把新兵安排在后方学习观摩。但思来想去，他认为这是一次难得的锻炼机会，便与连长商议，决定适当调整侦察小组人员构成，将新兵编入其中，通过以老带新的方式，帮助他们增长见识。

训练展开当天，天气骤变，张皓翔立即组织安全风险评估、开展安全教育，对新兵反复叮嘱，要求他们遇到问题，及时向干部骨干汇报，生怕他们因缺少经验发生意外。

刚开始时，一切都进行得很顺利。然而，在第 2 次侦察行动中，邓广哲所在的小组报告：队伍遭”敌人”发现和反击，在疏散转移过程中，邓广哲不见了踪影！

天黑林密，张皓翔心急如焚，立即组织人员寻找邓广哲。就在大家苦寻无果、不知所措之时，邓广哲突然现身，还带回了关键”敌情”信息，这让虚惊一场的战友对他刮目相看。

原来，邓广哲发现自己掉队后，并没有害怕和惊慌，而是躲藏起来冷静回想各种方法预案和应急措施，很快有了对策。

他掏出指北针和地图，确定好方向和路线，在黑暗中摸索行进，最终找到了”大本营”，还沿途记下了几个”敌”哨所的坐标。

“没想到，这次新兵给我们老兵上了一课”“邓广哲好样的，这要是我，别说侦察’敌情’，能安全返回就不错了”“现在的新兵不容小觑，第一次参加这样的训练就表现不俗，未来可期”……

听着大家的议论，张皓翔陷入了沉思，对如何带兵有了新的思考——

现在的新兵，具有文化水平高、经历丰富、思维活跃等特点，但对部队训练生活有一个适应期，也正因如此，不少带兵人对他们缺乏应有的信任，总觉得他们不够成熟，需要事无巨细手把手地教。这些举动，看似是关心，实则不放心，无形中限制了新兵的成长。

以邓广哲为例，他入伍前当过消防员，体能素质在新兵里名列前茅，是营连干部重点关注的好苗子。可下连后，遇到一些重要任务，班长骨干总是习惯性地大包大揽，把邓广哲”护”在身后。对此，一些连队干部也是睁一只眼闭一只眼。

这次训练让张皓翔意识到，对新兵进行过度保护和关爱，对他们的成长反而是一种束缚。当兵就是准备上战场，不经过千锤百炼，钢铁战士从何而来？

打定主意后，张皓翔组织班长骨干逐班摸排情况，并召开连务会研究解决方案。”新兵的成长，需要成功的激励，也需要挫折的磨砺，不能因为害怕他们出错就束手束脚。我们要积极搭建平台，帮助他们强化打仗思想，促进快速成长。”

大家达成共识，改变随之发生。组织体能训练，该连克服”操场化”倾向，将队伍拉到山林地带连贯实施；开展专业训练，教练员合理设置”敌情”和战术背景，提高官兵的应急应变能力；形势战备教育，引入战例分析，让新兵走上讲台，分享切身感悟……

走出”舒适区”，摆脱”保护圈”。新兵们在训练工作中表现得更加积极踊跃、干劲十足，没有人喊苦叫累，反而觉得自己接受的历练越多成长越快。该连老兵也深受感染，主动担当作为，充分发挥模范带头作用，全连上下”比学赶帮超”的氛围日益浓厚。

A Company of a Brigade of The 80th Group Army: Strengthen The Idea of Fighting and Promote The Rapid Growth of Recruits

Source: China Military Network-People’s Liberation Army Daily Author: Huang Yuye Editor: Wu Mingqi

2025-02-10

A company of a brigade of the 80th Group Army focuses on strengthening the subjective initiative of recruits-

Strengthen the idea of fighting and promote rapid growth

■Huang Yuye

“Found the target!” In the quiet deep mountains and dense forests, Private Deng Guangzhe’s eyes were closely watching the front. After close reconnaissance, he finally found the “enemy” front command post and then sent back the coordinates and azimuth.

This was a scene that took place in the reconnaissance confrontation training of a brigade of the 80th Group Army some time ago. Deng Guangzhe, a recruit who had been in the army for less than 5 months, successfully completed the task assigned by the organization.

After reviewing the situation, the company instructor Zhang Haoxiang affirmed the performance of the officers and soldiers, and praised Deng Guangzhe and several other recruits.

The author learned that Deng Guangzhe has shown good military and psychological qualities since he joined the company. At the end of last year, the superiors organized a day-and-night live-fire reconnaissance training. Considering that this training was carried out in a complex and unfamiliar area, the security risk was relatively high. When deploying the task, Zhang Haoxiang initially planned to arrange the recruits to study and observe in the rear. But after thinking about it, he thought this was a rare training opportunity, so he discussed it with the company commander and decided to appropriately adjust the composition of the reconnaissance team and incorporate the recruits into it, helping them to increase their knowledge by bringing the old with the new.

On the day of the training, the weather changed suddenly. Zhang Haoxiang immediately organized a safety risk assessment and carried out safety education. He repeatedly reminded the recruits and asked them to report to the cadres and backbones in time when they encountered problems, fearing that they would have accidents due to lack of experience.

At the beginning, everything went smoothly. However, in the second reconnaissance operation, Deng Guangzhe's team reported that the team was discovered and counterattacked by the "enemy". During the evacuation and transfer, Deng Guangzhe disappeared!

It was dark and the forest was dense. Zhang Haoxiang was anxious and immediately organized people to look for Deng Guangzhe. Just when everyone was searching in vain and at a loss, Deng Guangzhe suddenly appeared and brought back key "enemy" information, which made his comrades who had been alarmed look at him with new eyes.

It turned out that after Deng Guangzhe found that he had fallen behind, he was not afraid or panicked, but hid and calmly recalled various methods, plans and emergency measures, and soon came up with a countermeasure.

He took out a compass and a map, determined the direction and route, groped in the dark, and finally found the "base camp", and also wrote down the coordinates of several "enemy" outposts along the way.

"I didn't expect that this time the new recruits taught us veterans a lesson." "Deng Guangzhe is great. If it were me, I would be lucky to return safely, not to mention scouting the 'enemy situation'." "The new recruits should not be underestimated. They performed well in their first training and have a promising future." Listening to everyone's discussion, Zhang Haoxiang fell into deep thought and had new thoughts on how to lead soldiers. Today's new recruits have the characteristics of high cultural level, rich experience, and active thinking, but they have an adaptation period to the training life of the army. Because of this, many leaders lack the trust they deserve in them, always feeling that they are not mature enough and need to be taught in detail. These actions seem to be caring, but in fact they are not at ease, which invisibly restricts the growth of new recruits. Take Deng Guangzhe as an example. He worked as a firefighter before joining the army. His physical fitness ranks among the best among the new recruits. He is a good seedling that the battalion and company cadres focus on. But after joining the company, when encountering some important tasks, the squad leader always habitually takes on a lot of responsibilities and "protects" Deng Guangzhe behind him. Some company cadres also turned a blind eye to this.

This training made Zhang Haoxiang realize that overprotection and care for recruits is a constraint on their growth. Being a soldier means preparing for the battlefield. Without tempering, where can steel soldiers come from?

After making up his mind, Zhang Haoxiang organized the squad leaders to investigate the situation class by class and held a company meeting to study solutions. "The growth of recruits requires the motivation of success and the tempering of setbacks. We cannot be restrained because we are afraid

that they will make mistakes. We must actively build a platform to help them strengthen their fighting ideas and promote rapid growth."

Everyone reached a consensus, and changes followed. Organizing physical training, the company overcame the tendency of "playgroundization" and pulled the team to the mountainous forest area for continuous implementation; carrying out professional training, the instructors reasonably set the "enemy situation" and tactical background to improve the emergency response capabilities of officers and soldiers; situation and combat readiness education, introducing battle case analysis, let the recruits go to the podium and share their personal insights...

Get out of the "comfort zone" and get rid of the "protection circle". The new soldiers were more active and enthusiastic in the training. No one complained about the hardship or tiredness. Instead, they felt that the more experience they received, the faster they grew. The veterans of the company were also deeply moved and took the initiative to take responsibility and give full play to their exemplary role. The atmosphere of "learning from each other, catching up with each other, helping each other and surpassing each other" became increasingly strong throughout the company.

第 76 集团军某旅深入学习贯彻中央军委政治工作会议精神

来源：中国军网-解放军报 作者：孙 晨 靳钰龙 责任编辑：赵镭饷

2025-02-11

第 76 集团军某旅深入学习贯彻中央军委政治工作会议精神——

提振精神，凝心聚力谋打赢

■孙 晨 靳钰龙

初春时节，戈壁腹地，第 76 集团军某旅组织一场实弹战术训练。硝烟弥漫中，数辆战车轰鸣驰骋，多个险难课目轮番展开。官兵密切配合，出色完成训练任务。

走下训练场，官兵围坐在战车旁，围绕"转型重塑路上，应当以怎样的精神状态攻坚克难"主题展开讨论。"改革强军，我们既是见证者，更是参与者。"讨论中，先后经历 3 次转岗，在每个岗位都干得出色的某连火炮技师、三级军士长李文煦，结合自身经历分享心得体会，战友们不时报以热烈掌声。

该旅领导介绍，中央军委政治工作会议召开后，他们组织官兵认真学习习主席重要讲话精神，深刻领会"提振干事创业精神状态"等内容的内涵要义、精神实质和实践要求。针对部队装备更新换代、许多官兵转型转岗实际，该旅灵活利用训练间隙、党团活动等时机，适时组织官兵结合工作实际和自身思考展开讨论，帮助大家提振精神状态、坚定奋斗决心。

任务进行到哪里，会议精神学习贯彻就延伸到哪里。采访中笔者了解到，从大漠戈壁到雪域高原、从驻训帐篷到坑道工事，该旅官兵在一次次学习讨论、交流互动中找准奋斗目标、明晰奋斗方向。

戈壁深处，一场训练如期展开。关键时刻，维修技师、一级军士长杨立立凭借过硬本领，快速排除火炮故障。”主战装备升级换代，火炮快速机动能力、精确打击能力不断提升……”训练结束后，杨立立细数近年来部队发展变化，与战友分享成长经历。从军 28 年来，杨立立始终与火炮打交道，先后 6 次经历装备更新，见证了旅队主战装备从近距离火力覆盖向远程火力打击的升级。”作为基层官兵，我们必须扎根本职岗位，练精手中武器、练强打赢本领，在转型重塑之路上奋力冲锋。”他说。

学习越深入，行动越坚定。该旅坚持把学习贯彻会议精神和主责主业相结合。针对单位调整组建后人员重组等实际，他们紧盯制约部队战斗力建设的矛盾问题，查原因、谋对策，出色完成新装备战斗力生成试点、新大纲课目示范等大项任务，在练兵备战实践中推动会议精神落地落实。

提振精神，凝心聚力谋打赢。随着学习贯彻中央军委政治工作会议精神不断深入，该旅官兵工作训练热情持续高涨，全旅广泛开展群众性练兵比武，多套作战方案得到论证检验，部队实战化训练水平稳步提升。

A Brigade of The 76th Group Army Thoroughly Studied and Implemented The Spirit of The Central Military Commission’s Political Work Conference [held in Yan’an in June 2024]

Source: China Military Network-Liberation Army Daily Author: Sun Chen Jin Yulong Editor: Zhao Leixiang

2025-02-11

A brigade of the 76th Group Army thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference——

Boosting spirits, focusing on winning

■Sun Chen Jin Yulong

In early spring, in the heart of the Gobi Desert, a brigade of the 76th Group Army organized a live-fire tactical training. In the smoke, several tanks roared and galloped, and many dangerous and difficult subjects were carried out in turn. The officers and soldiers worked closely together and completed the training tasks excellently.

Walking off the training ground, the officers and soldiers sat around the tanks and discussed the theme of “What kind of mental state should be used to overcome difficulties on the road of

transformation and reconstruction." "We are not only witnesses but also participants in the reform and strengthening of the army." During the discussion, Li Wenxu, a company artillery technician and third-class sergeant major who had experienced three job transfers and performed well in each position, shared his experience based on his own experience, and his comrades-in-arms gave him warm applause from time to time.

The leaders of the brigade introduced that after the Central Military Commission's political work conference was held, they organized officers and soldiers to carefully study the spirit of Chairman Xi's important speech and deeply understand the connotation, spiritual essence and practical requirements of "boosting the spirit of doing things and entrepreneurship". In view of the equipment renewal of the troops and the transformation and transfer of many officers and soldiers, the brigade flexibly used training intervals, party and league activities and other opportunities to organize officers and soldiers to discuss in a timely manner based on the actual work and their own thinking, helping everyone to boost their spirits and strengthen their determination to fight.

Wherever the task is carried out, the study and implementation of the spirit of the meeting will extend to that place. During the interview, the author learned that from the desert Gobi to the snowy plateau, from the training tents to the tunnel fortifications, the officers and soldiers of the brigade found the goal of struggle and clarified the direction of struggle through repeated learning, discussion, communication and interaction.

Deep in the Gobi Desert, a training exercise was carried out as scheduled. At the critical moment, maintenance technician and first-class sergeant Yang Lili quickly eliminated the artillery failure with his excellent skills. "The main battle equipment has been upgraded, and the rapid mobility and precision strike capabilities of the artillery have been continuously improved..." After the training, Yang Lili counted the development and changes of the troops in recent years and shared his growth experience with his comrades. In the 28 years since he joined the army, Yang Lili has always been dealing with artillery, and has experienced equipment updates 6 times, witnessing the upgrade of the brigade's main battle equipment from close-range firepower coverage to long-range firepower strikes. "As grassroots officers and soldiers, we must take root in our posts, refine our weapons, strengthen our ability to win, and charge hard on the road of transformation and reshaping." He said. The deeper the study, the more determined the action. The brigade insists on combining the study and implementation of the spirit of the meeting with its main responsibilities and main business. In view of the actual situation of personnel reorganization after the adjustment and establishment of the unit, they focused on the contradictions that restricted the construction of the combat effectiveness of the troops, investigated the causes, sought countermeasures, and excellently completed major tasks such as the pilot of the combat effectiveness of new equipment and the demonstration of new syllabus courses, and promoted the implementation of the spirit of the meeting in the practice of training and preparation.

Boosting the spirit, focusing on winning. With the deepening of learning and implementing the spirit of the Central Military Commission's political work conference, the enthusiasm of the

officers and soldiers of the brigade for work and training continued to rise, the brigade widely carried out mass training competitions, and many sets of combat plans were verified and tested, and the level of actual combat training of the troops was steadily improved.

第 75 集团军某旅弘扬优良传统激励官兵精武强能

来源：解放军报 作者：刘维礼 李春国 陈典宏 责任编辑：李庆桐 2025-02-12

第 75 集团军某旅弘扬优良传统激励官兵精武强能——

用英雄精神铸魂育人

■刘维礼 李春国 解放军报记者 陈典宏

“塔山阻击战中，革命先辈用鲜血和生命阻击疯狂进攻的敌人，誓死守住阵地……”新年伊始，第 75 集团军某旅在旅史长廊组织群众性自我教育活动，”红色宣讲员”刘晓玲结合先辈战斗故事进行的精彩分享，赢得阵阵掌声。

“以’顾全大局、严守纪律、勇于牺牲、敢打必胜’为内涵的塔山精神，是永不熄灭的精神火炬。”该旅干部覃章维告诉记者，他们始终把塔山精神作为旅队建设的强大精神动力，教育引导官兵大力弘扬先辈优良传统，铆定岗位精武强能，以”善于打大仗、打硬仗、打恶仗”的战斗作风投身练兵实践，在强军兴军征程上不断创造新业绩。

不远处的机降训练场上，三级军士长张洋正为几名年轻战士讲解高空课目训练技巧，并就大家提出的具体问题进行动作示范。很少有人知道，这名对高空课目训练要领熟稔于心的”兵教员”，刚入伍时因恐高一度自我怀疑，甚至有点自暴自弃。

“刚到部队那会儿，机降训练曾是我心里难以逾越的一道坎。”谈起自己的成长经历，张洋颇为感慨。后来，旅队教育课堂上的一幕情景短剧，让他深受触动并下决心改变自己。

那次，该旅以”传承先辈精神、岗位奋斗强军”为主题组织大课教育。其间，官兵根据先辈战斗故事自编自导自演的情景短剧——《塔山英雄》被搬上课堂。剧中，由官兵扮演的革命先辈一次又一次打退敌人，身边的战友接连倒下，他们凭着”誓与阵地共存亡”的无畏气概，始终坚守阵地……

情景短剧结束，背景幕布缓缓移动，大屏幕上呈现的是 DV 短片——《英雄战士李向群》。入党当晚，李向群在救生衣上一笔一画写下”全力以赴”4 个大字；高烧未退，李向群连续奋战，多次晕倒在大堤上……一幕幕场景，让官兵深受感动。

“面对强敌，革命先辈不惜流血牺牲坚守阵地；面对洪魔，李向群以生命不息战斗不止的拼搏精神，擦亮共产党员的光荣称号。”授课结束后，张洋登台发言谈体会时说，”遇到一点点困难就胆怯退缩，还算什么革命军人？还谈什么责任担当？”

从那之后，张洋立足本职埋头实干，在连队干部骨干指导下开展抗眩晕训练，终于克服了恐高心理。后来，在上级组织的训练中，他与战友乘机抵达机降点位后，面对恶劣天气等不利因素，第一个抓起索降绳带头跳下，并按前期制订的战术策略完成相关任务。

“教育者先受教育、铸魂者先铸其魂，是激发官兵战斗精神的关键。”该旅领导说，他们还抽派教育骨干组成”寻根小组”，分批次前往旅队发源地、纪念场馆以及战斗遗址搜集整理史料，沿着旅队先辈战斗足迹追寻、体悟、思考先辈战斗精神；完成素材整理、视频剪辑、文物复刻等工作，梳理形成访谈音频资料库、文字实录集，并制作文物史料图册和专题纪录片，引导官兵在感悟英雄精神中砺志铸魂，在传承优良传统中续写荣光。

一次，”寻根小组”组长曹开程在结束寻根之旅返程路上，将整理的战斗故事写进教育提纲，回到营区便走进教育课堂与战友分享寻根感悟。”作为英雄传人，工作中不管遇到多大困难，我们都要赓续优良传统、砥砺战斗精神，克服困难完成任务！”曹开程分享完毕，突击步兵连干部刘裕臣趁热打铁，为接下来的演训任务进行思想动员，激励大家在任务中打头阵、当先锋。

此前，刘裕臣是一名飞行参谋。因旅队建设需要，他怀揣着对融合制胜的思考，申请到突击步兵连任职。

转变的是角色，不变的是担当。来到连队后，刘裕臣一方面以突击队员身份与官兵一起学习飞行原理、战机构造等知识，一方面从飞行指挥员角度研练突击步兵战法战术。遇到瓶颈问题时，他总把那句”累不累想想革命老前辈”挂在嘴边，以此激励大家鼓起干劲、合力解难。如今，在他的示范带动下，连队涌现出一批专业尖子、组训骨干，围绕机降作战总结的多条经验在旅队推广。

同时，针对部队执勤点位多、人员分散的实际，该旅还因地制宜开展”铁心向党”故事会、先进事迹报告会等活动，鼓励官兵主动登台结合任务经历谈使命、话担当；开展”训练之星”评选活动，用身边榜样教育人、激励人，并将身边典型的先进事迹编印成册、下发基层，引导大家对标学习、奋力赶超。如今，一个个在塔山精神滋养下成长起来的典型，成为激励官兵精武强能、奋斗强军的生动教材。

一次训练中，面对多变特情、复杂环境和强劲对手，该旅官兵士气高昂、敢打硬拼，快速突入”敌”阵地；在上级组织的专业比武中，三级军士长刘恒严抠细节分毫不差，驾驶战车突破路障阻隔，从众多选手中脱颖而出……

过去，革命先辈冲锋陷阵，将艰苦奋斗、牺牲奉献精神展现得淋漓尽致；新时代强军兴军实践中，该旅官兵铆在岗位专攻精练，齐心协力研究空地协同训练难点、卡点问题，一条条战训经验在思想碰撞中新鲜出炉。

采访结束，记者漫步营区。不远处，完成训练任务的官兵整齐列队，步履铿锵、口号嘹亮。”抓好铸魂育人工作，还须常长学习英雄精神。只有平时注重用先辈精神培塑官兵，战时才能做到勇往直前、敢打必胜。”覃章维指着整齐的队伍对记者说，在塔山精神激励下，官兵坚定扛起革命先辈的光辉战旗，在战位上书写着不平凡的青春华章。

传承先辈志 续写新荣光

■舒达生

艰苦奋斗、牺牲奉献的革命精神，是先辈们血性胆魄的生动写照，也是我军政治优势的外化显现。回首往昔，无数革命先辈矢志不渝听党话、高举旗帜跟党走，在硝烟弥漫、枪林弹雨的血火战场上愈战愈勇，以视死如归、勇于牺牲、血战到底的战斗精神，锻造出一支英雄的人民军队，为新时代官兵铺就底色、树立榜样。

实践证明，发扬艰苦奋斗、牺牲奉献的革命精神，学习革命先辈自强不息的奋斗精神，知难而进、迎难而上，方可练就克敌制胜的过硬本领。红色资源是我党我军艰辛而辉煌奋斗历程的见证。基层部队的实践说明，只有大力营造官兵”时时受熏陶、处处受感染”的浓厚氛围，讲好军队光辉历史，发扬英雄献身精神，才能不断激荡新时代官兵临危不惧的勇气、所向披靡的虎气、赴汤蹈火的胆气、舍我其谁的豪气。

传承先辈志，续写新荣光。我们应充分利用红色资源优势，总结部队能战善战、克敌制胜的宝贵精神财富，结合任务实际开展”血脉传承、岗位建功”实践活动，激励广大官兵在弘扬先辈精神中砥砺血性胆气，激发强军动力，想打仗之事、谋打仗之策、练打仗之功。

A brigade of the 75th Group Army carries forward fine traditions to encourage officers and soldiers to be strong in martial arts

Source: PLA Daily Author: Liu Weili Li Chunguo Chen Dianhong Editor: Li Qingtong 2025-02-12

A brigade of the 75th Group Army carries forward fine traditions to encourage officers and soldiers to be strong in martial arts——

Use heroic spirit to cultivate souls and educate people

■ Liu Weili Li Chunguo PLA Daily reporter Chen Dianhong

“In the Tashan blocking battle, the revolutionary predecessors used blood and lives to block the crazy attack of the enemy and vowed to defend the position to the death...” At the beginning of the new year, a brigade of the 75th Group Army organized a mass self-education activity in the brigade history corridor. The “red propagandist” Liu Xiaoling combined the wonderful sharing of the predecessors’ battle stories and won applause.

“The Tashan spirit, which is characterized by ‘taking the overall situation into consideration, strictly observing discipline, being brave to sacrifice, and daring to fight and win’, is a spiritual torch that will never go out.” Qin Zhangwei, a cadre of the brigade, told reporters that they have always taken the Tashan spirit as a powerful spiritual driving force for the construction of the brigade, educating and guiding officers and soldiers to vigorously carry forward the fine traditions of their predecessors, fix their positions to improve their martial arts and strengthen their abilities, and devote themselves to training practice with the fighting style of “being good at fighting big battles, hard battles, and tough battles”, and constantly create new achievements in the journey of strengthening the army.

On the airdrop training ground not far away, Sergeant Major Zhang Yang was explaining the training skills of high-altitude subjects to several young soldiers, and demonstrated the actions on the specific questions raised by everyone. Few people know that this “soldier instructor” who is familiar with the training essentials of high-altitude subjects once doubted himself because of his fear of heights when he first joined the army, and even gave up a little.

“When I first arrived at the army, airdrop training was an insurmountable hurdle in my heart.” Talking about his growth experience, Zhang Yang was quite emotional. Later, a short play in the brigade’s education class deeply touched him and made him determined to change himself.

That time, the brigade organized a large class education with the theme of “Inheriting the spirit of the predecessors, working hard to strengthen the army”. During this period, the short play “Heroes of Tashan” written, directed and performed by officers and soldiers based on the battle stories of their predecessors was brought to the classroom. In the play, the revolutionary predecessors played by officers and soldiers beat back the enemy again and again, and their comrades fell one after another. They always stood firm with the fearless spirit of “swearing to live and die with the position”...

The short play ended, the background curtain slowly moved, and the DV short film “Heroic Soldier Li Xiangqun” was presented on the big screen. On the night of joining the party, Li Xiangqun wrote the four characters “Go all out” on his life jacket; Li Xiangqun continued to fight with a high fever and fainted on the levee many times... The scenes moved the officers and soldiers deeply.

“Faced with powerful enemies, revolutionary predecessors held their positions at the cost of blood and sacrifice; faced with floods, Li Xiangqun fought with a spirit of fighting until his life was up, and polished the glorious title of a Communist Party member.” After the lecture, Zhang Yang took

the stage to talk about his experience and said, “If you retreat when you encounter a little difficulty, what kind of revolutionary soldier are you? What kind of responsibility are you talking about?”

Since then, Zhang Yang has been working hard based on his job, and under the guidance of the company’s cadres and backbones, he has carried out anti-vertigo training and finally overcome his fear of heights. Later, during the training organized by the superiors, he and his comrades arrived at the landing point by plane. Faced with adverse factors such as bad weather, he was the first to grab the rappelling rope and take the lead in jumping down, and completed the relevant tasks according to the tactics and strategies formulated in the early stage.

“Educators should be educated first, and soul builders should build their souls first, which is the key to inspiring the fighting spirit of officers and soldiers.” The leaders of the brigade said that they also selected educational backbones to form a “root-seeking group” to go to the birthplace of the brigade, memorial venues and battle sites in batches to collect and organize historical materials, follow the battle footprints of the brigade’s predecessors to trace, understand and think about the fighting spirit of the predecessors; complete the work of material sorting, video editing, and cultural relics reproduction, sort out the interview audio database, text records, and produce cultural relics and historical materials albums and special documentaries, to guide officers and soldiers to sharpen their will and forge their souls in the perception of heroic spirit, and continue to write glory in the inheritance of fine traditions.

Once, Cao Kaicheng, the leader of the “root-seeking group”, wrote the sorted battle stories into the education outline on the way back from the root-seeking trip, and went into the education classroom to share his root-seeking feelings with his comrades after returning to the camp. “As the descendants of heroes, no matter how difficult the work is, we must continue the fine traditions, sharpen the fighting spirit, overcome difficulties and complete the task!” After Cao Kaicheng finished sharing, Liu Yuchen, a cadre of the assault infantry company, struck while the iron was hot, mobilized the thoughts for the next training task, and encouraged everyone to take the lead and be the pioneer in the task.

Previously, Liu Yuchen was a flight staff officer. Due to the needs of brigade construction, he applied for a position in the assault infantry company with his thoughts on integration and victory.

What changed is the role, and what remains unchanged is the responsibility. After arriving at the company, Liu Yuchen, on the one hand, studied the principles of flight and the structure of combat vehicles with officers and soldiers as a commando, and on the other hand, studied the tactics and tactics of assault infantry from the perspective of a flight commander. When encountering bottleneck problems, he always kept the phrase “If you are tired, think about the old revolutionary predecessors” on his lips to encourage everyone to work hard and work together to solve problems. Now, under his demonstration and drive, a group of professional tops and training backbones have emerged in the company, and many experiences summarized around airdrop operations have been promoted in the brigade.

At the same time, in view of the fact that the troops have many duty points and scattered personnel, the brigade also carried out activities such as “Iron Heart to the Party” storytelling and advanced deeds report meetings according to local conditions, encouraging officers and soldiers to take the initiative to talk about their mission and responsibility based on their mission experience; carrying out the “Training Star” selection activities, educating and motivating people with examples around them, and compiling and printing typical advanced deeds around them into books and distributing them to the grassroots, guiding everyone to learn from the benchmarks and strive to catch up. Today, the models who have grown up under the nourishment of the Tashan spirit have become vivid teaching materials to motivate officers and soldiers to improve their martial arts and strengthen their abilities and strive to strengthen the army.

In a training session, facing the ever-changing special situations, complex environment and strong opponents, the officers and soldiers of the brigade were in high spirits, dared to fight hard, and quickly broke into the “enemy” position; in the professional competition organized by the superiors, Sergeant Major Liu Hengyan was meticulous in details, drove the tank to break through the roadblocks, and stood out from many players...

In the past, the revolutionary predecessors charged forward and demonstrated the spirit of hard work, sacrifice and dedication to the fullest; in the practice of strengthening the army in the new era, the officers and soldiers of the brigade focused on their posts and worked together to study the difficulties and bottlenecks of air-ground coordinated training, and a series of combat training experiences were freshly produced in the collision of ideas.

After the interview, the reporter strolled around the camp. Not far away, the officers and soldiers who completed the training task lined up neatly, with sonorous steps and loud slogans. “To do a good job in cultivating souls and educating people, we must also constantly learn the spirit of heroes. Only by focusing on cultivating officers and soldiers with the spirit of our predecessors in peacetime can we be brave and win in wartime.” Qin Zhangwei pointed to the neat team and told reporters that under the inspiration of the Tashan spirit, officers and soldiers firmly carried the glorious battle flag of revolutionary predecessors and wrote an extraordinary chapter of youth at their positions.

Inheriting the aspirations of our predecessors and continuing to write new glory

■ Shu Dasheng

The revolutionary spirit of hard work, sacrifice and dedication is a vivid portrayal of the blood and courage of our predecessors, and it is also the external manifestation of our army’s political advantages. Looking back on the past, countless revolutionary predecessors have been determined to listen to the party, hold high the banner and follow the party, and fight more and more bravely on the battlefield filled with smoke and gunfire, with the fighting spirit of seeing death as home, being brave to sacrifice, and fighting to the end, forging a heroic people’s army, laying the foundation and setting an example for officers and soldiers in the new era.

Practice has proved that only by carrying forward the revolutionary spirit of hard work, sacrifice and dedication, learning the revolutionary predecessors' spirit of self-improvement and struggle, and advancing despite difficulties, can we develop the strong ability to defeat the enemy. Red resources are a witness to the arduous and glorious struggle of our party and army. The practice of grassroots troops shows that only by vigorously creating a strong atmosphere where officers and soldiers are "influenced at all times and infected everywhere", telling the glorious history of the army well, and carrying forward the spirit of heroic dedication, can we constantly inspire the courage of officers and soldiers in the new era to face danger without fear, the invincible tiger spirit, the courage to go through fire and water, and the heroic spirit of who else but me.

Inherit the aspirations of our predecessors and continue to write new glory. We should make full use of the advantages of red resources, summarize the precious spiritual wealth of the troops' ability to fight well and defeat the enemy, and carry out the practical activities of "bloodline inheritance and post achievement" in combination with the actual tasks, so as to encourage the majority of officers and soldiers to hone their blood and courage in carrying forward the spirit of their predecessors, stimulate the motivation to strengthen the army, think about war, plan for war, and practice war.

陆军某综合训练基地探索研教训一体融合承训模式

来源：解放军报 作者：丁雷 李蕾 责任编辑：李庆桐 2025-02-12

陆军某综合训练基地探索研教训一体融合承训模式

赴一线跟学跟训 聚合力研战研教

编者按 习主席强调，要把握现代战争特点规律，把握陆军转型建设要求，做到打仗需要什么就教什么、部队需要什么就练什么，使人才培养供给侧同未来战场需求侧精准对接。陆军某综合训练基地聚焦部队需求重点、组训任教难点，探索研教训一体融合承训模式，不断提升训练质效。

解放军报讯 丁雷、记者李蕾报道：重塑56门专业课程结构，更新50余套专业教材，申报6项新域新质方面课题……前不久，陆军某综合训练基地梳理去年以来的融合承训实践，沉甸甸的成果让基地领导倍感欣慰。成绩的背后，是该基地探索研教训一体融合承训模式，不断提升训练质效迈出的坚实步伐。

"战场需求就是攻关方向，部队需要就是承训指向。"该基地领导介绍，他们常年担负新疆军区多个兵种专业骨干升级培训和技能鉴定任务。近年来，随着武器装备不断迭代升级、送训单位担负任务日渐多元，加强新兴领域专业人才培养和组训方式创新的需求愈加迫切。为此，他们聚焦部队需求重点、组训任教难点，出台一系列务实举措，确保教学内容与部队需求相契合，研教模式与战斗力生成规律相匹配。

“以前，我们教什么，学兵学什么；现在，部队战斗力建设需要什么，我们就教什么。”该基地领导告诉记者，为精准对接未来战场需要，缩短从课堂到战场的距离，他们定期遴选教员赴送训单位跟学跟训，编入指挥一线、战斗一线，切实掌握部队练兵备战最新动态、兵员能力底数及需要。

如今，该基地教员投身练兵一线跟学跟训已成常态。几个月前，陆军某旅刚刚结束某新型装备试训任务。该基地某教研室李教员得知这一消息后，在学兵承训的”空档期”赶赴该旅。一个多月的时间里，李教员与部队训练骨干共同复盘总结、梳理练兵经验，不仅吸收了10 多种创新训法，还明确了该专业学兵下阶段培训的重难点。

着眼学兵成长急需、岗位所需、实战必需，该基地同步重塑研战研教模式。为切实把战场急需内容讲好教透，他们携手部队、院校、厂家等多方共同研究探讨，构建”平台共建、资源共享、人才共育、成果共用”模式，聚合各方在实践探索、理论研究、装备支撑等方面优势资源，对学兵专业方向、课程体系、教学方式等改造升级，不断提升课堂教学内容与部队需求的适配度。

前不久，了解到部队无人作战领域专业骨干较为紧缺，该基地第一时间将此专业内容列为学兵拓展课程，与厂家、院校等多家单位成立联合教学攻关组，共同探索课程设置、承训模式。同时，他们依托仿真建模技术，构设虚拟仿真战场环境，增设无人装备侦察、打击、评估、保障等训练内容。首批试训学兵结业返回部队后，直接走上相关战位，岗位适配率大幅提升。

对接需求精准训，面向实战融合训，着眼未来抢先训。据了解，该基地研教训一体融合承训模式推行以来，教学质效稳步提升。7 个课题攻关组的联研联教成果直达练兵一线，20 余种创新教学法在教学课堂推广应用，最新一批承训学兵军事训练成绩优良率达 80%以上，六成以上学兵结业返回部队后被任命为专业教练员。

去年初，陆军某部上等兵马明超从基地培训结束返岗后，恰逢新装备列装，他凭借所学很快成为业务骨干。去年底，因工作成绩突出，马明超荣立三等功。”培训内容精准对接岗位需求，让我学有所获、学有所成。”马明超说。

A comprehensive training base of the Army explores a training model that integrates research, lessons and lessons

Source: PLA Daily Author: Ding Lei Li Lei Editor: Li Qingtong 2025-02-12

A comprehensive training base of the Army explores a training model that integrates research, lessons and lessons

Go to the front line to learn and train, and gather strength to study, fight and teach

Editor's note President Xi Jinping emphasized that we must grasp the characteristics and laws of modern warfare, grasp the requirements of the Army's transformation and construction, and teach what is needed for war and practice what the troops need, so that the supply side of talent training can be accurately connected with the demand side of the future battlefield. A comprehensive training base of the Army focuses on the key needs of the troops and the difficulties in organizing training and teaching, explores a training model that integrates research, lessons and lessons, and continuously improves the quality and effectiveness of training.

PLA Daily News Ding Lei and reporter Li Lei reported: Reshaping the structure of 56 professional courses, updating more than 50 sets of professional textbooks, and applying for 6 new domains and new quality topics... Not long ago, a comprehensive training base of the Army sorted out the practice of integrated training since last year, and the heavy results made the base leaders feel very gratified. Behind the achievements is the solid steps taken by the base to explore the training model of integrating research, teaching and training, and continuously improve the quality and efficiency of training.

"The battlefield needs are the direction of tackling key problems, and the needs of the troops are the direction of training." The leaders of the base introduced that they have been responsible for the upgrading training and skill appraisal of professional backbones of multiple arms of the Xinjiang Military Region all year round. In recent years, with the continuous iteration and upgrading of weapons and equipment and the increasingly diversified tasks undertaken by the training units, the need to strengthen the training of professional talents in emerging fields and the innovation of training methods has become more urgent. To this end, they focused on the key needs of the troops and the difficulties in training and teaching, and introduced a series of practical measures to ensure that the teaching content is consistent with the needs of the troops, and the research and teaching model is matched with the laws of combat effectiveness generation.

"In the past, we taught what the soldiers learned; now, we teach what the troops need to build combat effectiveness." The leaders of the base told reporters that in order to accurately meet the needs of the future battlefield and shorten the distance from the classroom to the battlefield, they regularly select instructors to go to the training units to learn and train, and put them in the command and combat front lines to truly grasp the latest dynamics of the troops' training and preparation, the basic number of soldiers' capabilities and needs.

Nowadays, it has become a normal practice for the instructors of the base to join the training and study. A few months ago, a certain army brigade just finished the test training task of a new type of equipment. After learning the news, Instructor Li from a teaching and research department of the base rushed to the brigade during the "gap period" of the training of the students. In more than a month, Instructor Li and the backbone of the training of the troops reviewed and summarized the training experience, not only absorbed more than 10 innovative training methods, but also clarified the key points and difficulties of the next stage of training for the students of this major.

Focusing on the urgent needs of the growth of the students, the needs of the positions, and the actual combat necessities, the base simultaneously reshaped the research and teaching model. In order to truly teach the urgent content of the battlefield, they joined hands with the troops, colleges, manufacturers and other parties to jointly study and discuss, and build a "platform co-construction, resource sharing, talent co-education, and achievement sharing" model, aggregating the advantages of all parties in practical exploration, theoretical research, equipment support and other aspects. Resources, transform and upgrade the professional direction, curriculum system, and teaching methods of the students, and continuously improve the adaptability of classroom teaching content to the needs of the troops.

Not long ago, it was learned that the army was short of professional backbones in the field of unmanned combat. The base immediately listed this professional content as an expansion course for students, and established a joint teaching research group with manufacturers, colleges and other units to jointly explore the course setting and training mode. At the same time, they relied on simulation modeling technology to construct a virtual simulation battlefield environment and added unmanned equipment reconnaissance, strike, evaluation, and support training content. After the first batch of trial trainees returned to the army after graduation, they went directly to the relevant combat positions, and the job adaptation rate was greatly improved.

Precise training for matching needs, integrated training for actual combat, and preemptive training for the future. It is understood that since the implementation of the integrated training model of research, teaching and training at the base, the quality and efficiency of teaching have been steadily improved. The joint research and teaching results of the 7 research groups have reached the front line of training, and more than 20 innovative teaching methods have been promoted and applied in teaching classrooms. The latest batch of trainees have achieved more than 80% excellent military training results, and more than 60% of the trainees have been appointed as professional coaches after graduation and returning to the army.

At the beginning of last year, Ma Mingchao, a soldier in a certain army unit, returned to work after completing training at the base. It coincided with the installation of new equipment. He quickly became a business backbone with what he had learned. At the end of last year, Ma Mingchao was awarded the third-class merit for his outstanding work performance. "The training content is precisely matched to the job requirements, which has enabled me to learn and achieve something." Ma Mingchao said.

作战救护—体训，陆军某旅组织实战化卫勤保障训练

来源：解放军报 作者：韩帅 杨茂生 责任编辑：乌铭琪 2025-02-13

陆军某旅组织实战化卫勤保障训练

作战救护一体训 体能技能融合练

解放军报讯 韩帅、杨茂生报道：”发现’伤员’，迅速前出救援！”寒冬时节，密林深处，陆军某旅野外训练场上，一场实战化卫勤保障训练拉开战幕。

硝烟弥漫中，侦察组放飞无人机侦察”敌情”，指挥员根据情报信息研判战场态势、确定行进路线。穿越”染毒”地带、遭”敌”强电磁干扰……救护组官兵突破重重阻碍，抵达目标地域，火速展开救援。

“只有以实战需求为牵引，构设逼真战场环境，才能真正摸清战场卫勤保障需求，确保随时拉得出、上得去、救得下。”该旅领导介绍，近年来，他们紧盯战场需求制订卫勤保障训练计划，着重围绕战场搜救、开放性伤口处置等重难点课目，以训考结合的方式倒逼官兵找准能力短板，展开专攻精练，提升战场卫勤保障能力。

此次训练，该旅通过在复杂战场环境下临机设置多种特情，推动官兵将作战救护一体训、体能技能融合练，有效检验提升实战背景下卫勤分队保障水平。

“‘伤员’中弹，大面积出血……”训练现场，判明”伤情”后，救护组官兵立即为”伤员”包扎止血，随后将其转运至装甲救护车上。

“‘伤员’右大腿骨折，相关救护器材受损。”后送途中，导调组临机给出新特情。与此同时，警戒组成员李占国发现有小股”敌”快速逼近。救护组官兵立即利用简易工具对”伤员”骨折部位进行固定，并借助烟幕掩护有序撤退。

训练结束，官兵就地展开复盘研讨。该旅领导告诉笔者，下一步，他们将根据训练中暴露的短板弱项，针对性制订改进措施，不断提升战场救护能力。

Combat and rescue integrated training, a certain army brigade organized practical medical support training

Source: PLA Daily Author: Han Shuai Yang Maosheng Editor: Wu Mingqi 2025-02-13

A certain army brigade organized practical medical support training

Combat and rescue integrated training Physical skills integration training

PLA Daily News Han Shuai and Yang Maosheng reported: “Found the ‘wounded’, quickly go forward to rescue!” In the cold winter, deep in the dense forest, a certain army brigade’s field training ground, a practical medical support training kicked off.

In the smoke, the reconnaissance team released drones to scout the “enemy situation”, and the commander judged the battlefield situation and determined the route based on intelligence information. Crossing the “contaminated” area and encountering strong electromagnetic interference from the “enemy”... The rescue team officers and soldiers broke through many obstacles, arrived at the target area, and quickly launched rescue.

“Only by taking actual combat needs as the guide and constructing a realistic battlefield environment can we truly understand the battlefield medical support needs and ensure that we can pull out, go up and rescue at any time.” The leaders of the brigade introduced that in recent years, they have closely followed the battlefield needs to formulate medical support training plans, focusing on difficult and key subjects such as battlefield search and rescue and open wound treatment, and forcing officers and soldiers to find their shortcomings in ability through a combination of training and examination, and carry out specialized training to improve battlefield medical support capabilities.

In this training, the brigade set up a variety of special situations on the spot in a complex battlefield environment, and promoted officers and soldiers to integrate combat rescue and physical skills training, effectively testing and improving the support level of the medical team under the actual combat background.

“The ‘wounded’ was shot and bleeding extensively...” At the training site, after determining the “injury”, the rescue team immediately bandaged the “wounded” to stop bleeding, and then transferred him to the armored ambulance.

“The ‘wounded’ had a fracture in his right thigh and related rescue equipment was damaged.” During the evacuation, the guidance and coordination team gave a new special situation on the spot. At the same time, Li Zhanguo, a member of the alert team, discovered that a small group of “enemies” were approaching quickly. The rescue team immediately used simple tools to fix the fractured parts of the “wounded” and retreated in an orderly manner under the cover of smoke screen.

After the training, the officers and soldiers conducted a review and discussion on the spot. The brigade leader told the author that in the next step, they will formulate targeted improvement measures based on the shortcomings exposed in the training, and continuously improve the battlefield rescue capabilities.

第 83 集团军某旅：红蓝对抗 斗智斗勇

来源：解放军报 作者：鲁渊博 胡瑞智 责任编辑：乌铭琪 2025-02-14

第 83 集团军某旅

红蓝对抗 斗智斗勇

解放军报讯 鲁渊博、特约通讯员胡瑞智报道：”侦察分队前出抵近侦察，火力分队做好打击准备。”前不久，某野外地域，第 83 集团军某旅一场红蓝对抗训练激烈展开。

遭”敌”电磁干扰，指挥枢纽突然”断联”；”敌”无人机抵近侦察，防护伪装被识破……训练中，面对接踵而至的特情，红方指挥员见招拆招，带领官兵沉着应对。

“我们采取红蓝对抗方式，将战场环境设险设难，着力锤炼官兵复杂条件下应急应战本领。”该旅领导介绍，此次训练，旅里只明确战场区域和基本对抗规则，方案制订和指挥协同由营级单位自主筹划实施，切实提升指挥员战场指挥能力。

训练现场，激战正酣。红方遭蓝方突袭，造成人员”伤亡”。红方指挥员快速研判战场态势，指挥步战车车队疏散隐蔽。随后，红方某班组在火炮掩护下发起冲击，蓝方迅速利用地形优势组织防御，并采用多种战术战法展开反击……对抗双方你来我往、攻守交替，现场弥漫浓浓的硝烟味。

“刀在石上磨，兵在险中练。只有不断提升对抗难度强度，才能练就克敌制胜的过硬本领。”该旅领导表示，他们将持续推进战训深度耦合，让官兵在真打实抗中摔打磨砺，进一步提升部队实战水平。

A brigade of the 83rd Group Army: Red and blue confrontation, fighting wits and courage

Source: PLA Daily Author: Lu Yuanbo Hu Ruizhi Editor: Wu Mingqi 2025-02-14

A brigade of the 83rd Group Army

Red and blue confrontation, fighting wits and courage

PLA Daily News Lu Yuanbo and special correspondent Hu Ruizhi reported: “The reconnaissance team went forward for close reconnaissance, and the firepower team was ready to strike.” Not long ago, a red-blue confrontation training of a brigade of the 83rd Group Army was fiercely carried out in a field area.

Suffering from electromagnetic interference from the “enemy”, the command hub was suddenly “disconnected”; the “enemy” drone approached for reconnaissance, and the protective camouflage was discovered... During the training, facing the special situations that came one after another, the red commander responded to the moves and led the officers and soldiers to respond calmly.

“We adopt the red-blue confrontation method, set up dangerous and difficult battlefield environments, and strive to hone the emergency response capabilities of officers and soldiers under complex conditions.” The brigade leader introduced that in this training, the brigade only clarified the battlefield area and basic confrontation rules, and the plan formulation and command coordination were independently planned and implemented by the battalion-level units to effectively improve the commander’s battlefield command capabilities.

At the training site, the fierce battle was in full swing. The red side was attacked by the blue side, resulting in “casualties”. The red side commander quickly judged the battlefield situation and commanded the infantry fighting vehicle convoy to evacuate and hide. Subsequently, a certain team of the red side launched an attack under the cover of artillery, and the blue side quickly used the terrain advantage to organize defense and used a variety of tactics to launch a counterattack...

The two sides of the confrontation went back and forth, alternating between offense and defense, and the scene was filled with a strong smell of gunpowder.

“A knife is sharpened on a stone, and a soldier is trained in danger. Only by continuously increasing the difficulty and intensity of the confrontation can we develop a strong ability to defeat the enemy.” The brigade leaders said that they will continue to promote the deep coupling of combat and training, so that officers and soldiers can be tempered in real combat and further improve the actual combat level of the troops.

第 74 集团军某旅：共研管用招法 建强”头雁队伍”

来源：解放军报 作者：张百阳 曾庆丰 责任编辑：乌铭琪 2025-02-14

第 74 集团军某旅组织基层党组织书记集训

共研管用招法 建强”头雁队伍”

解放军报讯 张百阳、曾庆丰报道：”党建工作与业务工作如何统筹推进”“怎样落实好组织生活制度”……冬日，第 74 集团军某旅组织基层党组织书记集训。其间，参训人员围绕基层党建工作遇到的具体问题进行研讨交流，共享经验做法，探寻解题对策。这是该旅着眼增强基层建设质效，提升基层党组织书记能力素质的缩影。

“只有建强’头雁队伍’，才能凝聚官兵士气、形成攻坚合力，提升基层建设整体水平。”该旅领导说，他们前期调研发现，有的基层党组织书记存在抓工作缺少招法、建队伍经验不足等问题。为此，他们专门组织基层党组织书记集训，按照”综合+专项”“理论+实践”的思路，围绕议事决策、党员发展、人才培养等方面具体问题，制订集训计划，设计教学内容，通过理论解读、授课辅导、视频教学等方式，帮助大家理思路、谋对策、强能力。

集训开展前，该旅机关部门围绕基层党组织建设重点难点，梳理形成问题清单下发基层，明确要求参训人员聚焦问题深入思考。集训期间，他们邀请经验丰富的领导干部、业务骨干等，围绕基层抓建存在的问题开展专题授课，并通过情景模拟、案例演示为大家传授实用招法。

笔者在集训队看到，”生死在一起连”党支部书记王高升与部分参训人员组成临时党支部，围绕”动散条件下议事决策”进行示范教学。他结合野外驻训不同阶段任务特点，细致地讲解工作开展方法与问题解决办法，赢得阵阵掌声。”下一步，我们将把参训人员的研讨交流成果汇编成册并下发基层，为基层党组织书记提升抓建能力提供参考。”该旅领导说。

A Certain Brigade of the 74th Group Army: Jointly Researching Effective Tactics and Building A Strong “Leading Goose Team”

Source: PLA Daily Author: Zhang Baiyang Zeng Qingfeng Editor: Wu Mingqi 2025-02-14

A certain brigade of the 74th Group Army organized a training session for grassroots party organization secretaries

Jointly researching effective tactics and building a strong “leading goose team”

PLA Daily News Zhang Baiyang and Zeng Qingfeng reported: “How to coordinate the promotion of party building work and business work” and “How to implement the organizational life system”... In winter, a certain brigade of the 74th Group Army organized a training session for grassroots party organization secretaries. During the period, the trainees discussed and exchanged ideas on specific problems encountered in grassroots party building work, shared experiences and practices, and explored solutions to problems. This is a microcosm of the brigade’s focus on enhancing the quality and efficiency of grassroots construction and improving the ability and quality of grassroots party organization secretaries.

“Only by building a strong ‘leading team’ can we gather the morale of officers and soldiers, form a joint force to tackle tough problems, and improve the overall level of grassroots construction.” The leaders of the brigade said that they found in their previous research that some grassroots party organization secretaries lacked methods to grasp work and lacked experience in team building. To this end, they specially organized a training camp for grassroots party organization secretaries. According to the ideas of “comprehensive + special” and “theory + practice”, they formulated a training plan and designed teaching content around specific issues such as deliberation and decision-making, party member development, and talent training. Through theoretical interpretation, teaching guidance, video teaching and other methods, they helped everyone to sort out ideas, seek countermeasures, and strengthen their capabilities.

Before the training camp, the brigade’s organs sorted out the problem list around the key difficulties in the construction of grassroots party organizations and sent it to the grassroots, and clearly required the trainees to focus on the problems and think deeply. During the training camp, they invited experienced leading cadres, business backbones, etc. to conduct special lectures on the problems existing in grassroots construction, and taught practical methods to everyone through scenario simulation and case demonstration.

The author saw in the training team that Wang Gaosheng, secretary of the “Life and Death Together Company” Party Branch, and some trainees formed a temporary Party branch to conduct demonstration teaching on “deliberation and decision-making under mobile conditions”. He combined the characteristics of tasks at different stages of field training and explained in detail the methods of carrying out work and solving problems, winning rounds of applause. “In the next step, we will compile the results of the participants’ discussions and exchanges into a book and distribute it to the grassroots level to provide reference for grassroots party organization secretaries to improve their ability to build.” The brigade leader said.

第七十一集团军某旅专业骨干工作室赋能练兵备战

来源：解放军报 作者：于云之 向沛茁 刘仁浩 责任编辑：乌铭琪 2025-02-14 07:06:04

第七十一集团军某旅专业骨干工作室赋能练兵备战——

集聚官兵”金点子” 打造解题”金钥匙”

■于云之 向沛茁 解放军报特约通讯员 刘仁浩

冬日皖东，寒气逼人。按照年度军事训练计划，第 71 集团军某旅组织带有作战背景的多课目训练。依照作战指令，突击小队隐蔽接”敌”后迅速展开设备，放飞无人机。其间，该旅中士万里革新研制的无人机携行器发挥了重要作用：该装置不仅缩短了无人机部署放飞用时，还降低了携带无人机快速机动途中因挤压可能带来的风险隐患。

“我的革新设想能够实现，离不开旅里专业骨干工作室的帮助。”万里说，无人机携行器本来是他结合训练需要自制的简易辅助工具。后来，旅队将这一设想纳入专业骨干工作室”重点项目清单”，经过进一步研讨论证、优化改进后在基层推广应用。

“基层官兵的小革新小发明解决了训练中的很多难点问题，助推战斗力加速生成。”该旅干部陈龙介绍，他们广泛开展群众性革新创新活动，遴选专业骨干成立工作室，定期聚焦训练难题献计谋策；旅队相关部门针对官兵提出的设想，邀请专家进行研究论证后，统筹资源、集智攻关，将大家的”金点子”转化为一把把解题”金钥匙”。

谈及专业骨干工作室的由来，陈龙讲起之前的一段经历。有一次，上级围绕练用新装备组织比武竞赛，陈龙带领官兵苦练精研，在比武中取得优异成绩。比武结束后，这支临时组建的团队却陷入”尴尬”——官兵虽复盘分析梳理了经验做法，但比武成果转化运用尚待进一步攻关。”团队成员来自全旅多个单位，比武结束不得不返回原单位。”陈龙感慨道，大家觉得，经过比武竞赛的摔打磨砺，团队成员已攥指成拳，不得已解散有些可惜。

官兵有呼声，机关有回应。该旅人力资源科戴科长介绍，在上级”创新人才储育工程”示范引导下，他们深研相关政策，成立专业骨干工作室，帮助团队成员协调专门场地，将他们列为旅队教学创新团队。后来，陈龙与团队成员利用丰富的实践经验，在机关部门的指导下，分批次展开装备操作骨干集训。借助工作室的硬件条件和专业骨干的指导帮带，越来越多的同志参与进来，聚焦练兵备战中存在的问题不足提出”金点子”，团队研战谋战氛围越来越浓厚。

上等兵梁鹤琦大学期间学习过模具设计制作。一次专业训练中，他发现某型装备零件不易拆卸，每次对照实物教学都需要手动拆装，影响组训效率。这时，他的脑海中浮现一个念头：”能不能利用大学期间所学，设计一组模具来替代教具？”抱着试一试的态度，梁鹤琦

向工作室骨干史晓宇讲了自己的想法。二人一拍即合，后来经过反复试验设计出替代教具。看到自己的革新成果在训练中得到应用，梁鹤琦心中充满自豪。

某连樊指导员革新制作”屏幕遮光罩”，避免某装备在夜间操作时因光亮暴露行动轨迹；史晓宇引入”模拟训练软件”，提升装备操作手的方向感和抗眩晕能力……目前，该旅官兵多个革新设想被纳入专业骨干工作室”重点项目清单”。

笔者走进专业骨干工作室看到，装步连教练员刘宏宇和陈龙正围绕某型装置的改进展开研讨。”我们紧贴任务调整攻关方向，确保革新成果始终瞄准实战靶心。”陈龙介绍，工作室常态化举办”创客沙龙”、开展座谈会，及时收集基层官兵的革新想法和意见建议，共同研讨训练难题的解决之策。

“专业骨干工作室既是人才培养的孵化器，也是挖掘基层革新潜力、积蓄革新动能的蓄水池。”该旅领导说，工作室已逐步建设成为集”学、研、训、修”多功能于一体的群众性革新创新平台，示范带动一批人才苗子参与其中。下一步他们将整合资源，邀请院校专家和厂家技术人员担任官兵的”革新导师”，开展针对性帮带指导。同时，做好成果转化，推动更多革新成果运用到练兵备战一线。

短评

聚拢基层智慧星火

■张智坤

当前，随着部队实战化训练深入推进，装备更新迭代速度加快，加速培养更多专业人才成为重中之重。基层官兵是武器装备的使用者、战法训法的实践者，鼓励引导他们围绕练用装备中遇到的具体问题开展革新活动，并采取务实举措确保相关成果运用于练兵实践，能有效激发官兵积极性、创造性。

“积力之所举，则无不胜也；众智之所为，则无不成也。”基层智慧犹如星星之火，需进一步聚拢、助燃。实践启示我们，各级只有加强创新革新平台建设，引导官兵将创新动力汇聚于实战靶心，才能形成人人为强军献计、个个为打赢谋策的局面。

当然，革新不是一朝一夕之事。我们还要积极做好革新”下篇文章”和”幕后工作”，以务实之举做好人才培育、抓好成果转化，不断为战斗力建设注入新动能。

The Professional Backbone Group of a Brigade of the 71st Group Army Empowers Training and Preparation for War

Source: PLA Daily Author: Yu Yunzhi Xiang Peizhuo Liu Renhao Editor: Wu Mingqi 2025-02-14

The professional backbone studio of a brigade of the 71st Group Army empowers training and preparation for war——

Gathering the “golden ideas” of officers and soldiers to create the “golden key” to solve problems

■Yu Yunzhi Xiang Peizhuo PLA Daily Special Correspondent Liu Renhao

In the winter, the cold is pressing in eastern Anhui. According to the annual military training plan, a brigade of the 71st Group Army organized multi-course training with a combat background. According to the combat order, the assault team quickly deployed the equipment and released the drone after secretly contacting the “enemy”. During this period, the drone carrier innovatively developed by Sergeant Wan Li of the brigade played an important role: the device not only shortened the time for the deployment and release of drones, but also reduced the risk of squeezing during the rapid maneuvering of carrying drones.

“My innovative ideas can be realized only with the help of the professional backbone studio in the brigade.” Wan Li said that the drone carrier was originally a simple auxiliary tool he made according to the needs of training. Later, the brigade included this idea in the “key project list” of the professional backbone studio, and promoted it at the grassroots level after further discussion, demonstration, optimization and improvement.

“The small innovations and inventions of grassroots officers and soldiers have solved many difficult problems in training and helped accelerate the generation of combat effectiveness.” Chen Long, a cadre of the brigade, introduced that they have widely carried out mass innovation and innovation activities, selected professional backbones to set up studios, and regularly focused on training problems to offer advice and suggestions; the relevant departments of the brigade invited experts to conduct research and demonstration on the ideas proposed by officers and soldiers, and then coordinated resources and pooled wisdom to solve problems, turning everyone’s “golden ideas” into “golden keys” to solve problems.

Talking about the origin of the professional backbone studio, Chen Long talked about a previous experience. Once, the superiors organized a competition around the training and use of new equipment. Chen Long led the officers and soldiers to practice hard and achieved excellent results in the competition. After the competition, this temporarily formed team fell into an “embarrassment” - although the officers and soldiers reviewed and analyzed the experience and practices, the transformation and application of the results of the competition still needs further research. “The team members come from multiple units of the brigade, and they have to return to their original units after the competition.” Chen Long sighed. Everyone felt that after the competition, the team members had clenched their fingers into fists, and it was a pity to disband.

The officers and soldiers have voices, and the organs have responded. Chief Dai of the brigade’s human resources department introduced that under the demonstration and guidance of the superior’s “Innovative Talent Reserve Project”, they deeply studied relevant policies, established a professional backbone studio, helped team members coordinate special venues, and listed them

as the brigade's teaching innovation team. Later, Chen Long and team members used their rich practical experience and carried out equipment operation backbone training in batches under the guidance of the organs. With the help of the studio's hardware conditions and the guidance of professional backbones, more and more comrades participated in it, focusing on the problems and deficiencies in training and preparation for war and putting forward "golden ideas", and the team's atmosphere of war research and planning became more and more intense.

Corporal Liang Heqi studied mold design and production during college. During a professional training, he found that the parts of a certain type of equipment were not easy to disassemble, and each time he compared the actual teaching, he had to manually disassemble and assemble it, which affected the efficiency of the training. At this time, an idea emerged in his mind: "Can I use what I learned during college to design a set of molds to replace teaching aids?" With a try-it attitude, Liang Heqi told his idea to Shi Xiaoyu, a backbone of the studio. The two hit it off, and later designed a replacement teaching aid after repeated experiments. Seeing his innovative results being applied in training, Liang Heqi was full of pride.

Instructor Fan of a certain company innovated and produced a "screen hood" to prevent a certain equipment from exposing its movement trajectory due to light when operating at night; Shi Xiaoyu introduced "simulation training software" to improve the sense of direction and anti-dizziness ability of equipment operators... At present, many innovative ideas of the officers and soldiers of the brigade have been included in the "key project list" of the professional backbone studio.

The author walked into the professional backbone studio and saw that Liu Hongyu and Chen Long, coaches of the armored infantry company, were discussing the improvement of a certain type of device. "We adjust the direction of research and development in line with the tasks to ensure that the results of innovation are always aimed at the actual combat target." Chen Long introduced that the studio regularly holds "Maker Salons" and seminars to collect the innovative ideas and suggestions of grassroots officers and soldiers in a timely manner, and jointly discuss solutions to training problems.

"The professional backbone studio is not only an incubator for talent training, but also a reservoir for tapping the potential of grassroots innovation and accumulating innovation momentum." The leader of the brigade said that the studio has gradually been built into a mass innovation and innovation platform integrating "learning, research, training, and repair", and has demonstrated and led a group of talent seedlings to participate in it. In the next step, they will integrate resources and invite college experts and factory technicians to serve as "innovation mentors" for officers and soldiers to carry out targeted assistance and guidance. At the same time, do a good job in the transformation of results and promote the application of more innovative results to the front line of training and preparation.

■ Zhang Zhikun

At present, with the deepening of the actual combat training of the troops and the acceleration of equipment update and iteration, accelerating the training of more professional talents has become a top priority. Grassroots officers and soldiers are users of weapons and equipment and practitioners of tactics and training methods. Encouraging and guiding them to carry out innovation activities around specific problems encountered in training and using equipment, and taking practical measures to ensure that relevant results are applied to training practice, can effectively stimulate the enthusiasm and creativity of officers and soldiers.

“Where there is a collective effort, there is no failure; where there is collective wisdom, there is success.” Grassroots wisdom is like a spark, which needs to be further gathered and fueled. Practice has taught us that only by strengthening the construction of innovation and innovation platforms at all levels and guiding officers and soldiers to focus their innovation power on the actual combat target can we form a situation where everyone contributes to strengthening the army and everyone plans to win.

Of course, innovation is not a matter of one day or one night. We must also actively do a good job in the “next article” and “behind-the-scenes work” of innovation, cultivate talents with pragmatic measures, and grasp the transformation of results, and continuously inject new momentum into combat effectiveness construction.

深沉夜色中，陆军某旅开展夜间侦察考核磨砺制胜尖兵

来源：解放军报 作者：江吴靖文 任泽滔 责任编辑：乌铭琪 2025-02-15

陆军某旅

星夜鏖战砺尖兵

解放军报讯 江吴靖文、任泽滔报道：新春时节，夜色深沉，陆军某旅一场夜间侦察考核在密林深处进行。”前方发现’敌’巡逻哨兵……”面对突发情况，指挥员一声令下，参考队员利用环境就地伪装，隐入茫茫夜色。待”敌”巡逻哨兵远离后，队员继续向目标地域渗透。

“对侦察兵来说，夜色既是保护，更是挑战。”该旅领导介绍，此次考核，对手配备了性能较好的夜视装备，参考队员如果没有一击制胜的把握就贸然行动，很可能暴露位置，招来对手的打击。

“前方发现可疑目标！”夜色中，队员操纵无人机升空，展开抵近侦察。然而，刚确认”敌”观察哨位置，无人机就遭到强电磁干扰，目标影像从屏幕上消失。指挥员研判现场态势后，决定化整为零，组织队员从两侧迂回渗透至”敌”后，展开进一步侦察。

一路前行，一路特情。指挥员沉着指挥，队员密切配合，最终成功抵达目标地域，并锁定”敌”指挥所位置。确定无误后，他们迅速将坐标信息上报后方指挥所。随后，”敌”阵地被成功”摧毁”，考评组宣布行动结束。

“面对’敌’夜视装备，怎样更好隐蔽……”考核结束，复盘随即展开，官兵围绕考核中遇到的难点问题展开讨论。该旅侦察科科长介绍，下一步他们将针对考核中暴露的短板不足展开专攻精练，进一步锤炼官兵实战能力。

In The Deep Night, A Certain Army Brigade Carried Out Night Reconnaissance Assessment To Sharpen The Vanguard of Victory

Source: PLA Daily Author: Jiang Wu Jingwen Ren Zetao Editor: Wu Mingqi 2025-02-15

A certain army brigade

Fighting in the starry night to sharpen the vanguard

PLA Daily News Jiang Wu Jingwen and Ren Zetao reported: During the Spring Festival, the night was deep, and a night reconnaissance assessment of a certain army brigade was carried out in the depths of the dense forest. “An ‘enemy’ patrol sentry was found ahead...” Faced with an emergency, the commander gave an order, and the reference team members used the environment to camouflage on the spot and hide in the vast night. After the “enemy” patrol sentry was far away, the team members continued to infiltrate the target area.

“For scouts, the night is both protection and a challenge.” The brigade leader introduced that in this assessment, the opponent was equipped with night vision equipment with better performance. If the reference team members acted rashly without the confidence of winning with one strike, they might expose their position and attract the opponent’s attack.

“A suspicious target is found ahead!” In the night, the team members operated the drone to take off and conduct close reconnaissance. However, as soon as the location of the “enemy” observation post was confirmed, the drone was subjected to strong electromagnetic interference and the target image disappeared from the screen. After analyzing the situation on the scene, the commander decided to split the whole into parts and organize the team members to infiltrate the “enemy” from both sides to conduct further reconnaissance.

All the way forward, all the way. The commander commanded calmly, and the team members cooperated closely, and finally successfully arrived at the target area and locked the location of the “enemy” command post. After confirming that it was correct, they quickly reported the coordinate information to the rear command post. Subsequently, the “enemy” position was successfully “destroyed”, and the assessment team announced the end of the operation.

“Facing the ‘enemy’ night vision equipment, how to better conceal...” After the assessment was over, the review was immediately launched, and the officers and soldiers discussed the difficult problems encountered in the assessment. The head of the reconnaissance department of the brigade introduced that in the next step, they will focus on the shortcomings exposed in the assessment and further hone the actual combat capabilities of the officers and soldiers.

军士选晋，火热展开!

来源：忠诚号 作者：李天文 于文旗 赵静怡 责任编辑：李佳琦

2025-02-15

近日，中部战区陆军第 82 集团军某旅

春季士兵选晋工作火热展开

200 余名锐意进取的战士

齐聚考场、蓄势待发

吹响向更高层次迈进的号角

为把素质过硬的人才保留下来

该旅成立选晋工作专业领导小组

按照”严格程序、优中选优

统一组织”原则

精心规划考核流程

考核内容涵盖理论知识

基础体能以及专业技能等多个维度

全面客观评估选晋人员综合素质

同时

通过公开量化排名的方式

确保整个选拔过程公正透明

在理论考核环节

考生们身着笔挺的军装

端坐于考桌前

全神贯注投入到答题中

风气监督员全程严格监督

确保考场纪律严明

体能考核现场更是激情四溢

三公里跑、引体向上、仰卧卷腹

30x2 蛇形跑等课目逐一展开

参考人员奋勇争先、全力拼搏

只为在这场较量中脱颖而出

与此同时

技术比拼同样精彩纷呈

线路架设、电台报文

卫星箱式站开设

卫生救护等专业课目

考核现场秩序井然

参考人员凭借精湛技能和高效操作

展现了专业素养和实战能力

战士张自豪满怀信心地表示

“选晋考核标准高

虽然压力山大

但更激发了我向前冲锋的斗志”

他们都在用实际行动

证明自己的实力和价值

军士选晋

不仅意味着身份的转变

更承载着强军兴军的责任和使命

衷心祝愿

所有战友们都能顺利晋级

在未来的军旅征程中

扎根战位、建功军营

The Promotion of Non-commissioned Officers Is in Full Swing!

Source: Loyalty Author: Li Tianwen Yu Wenqi Zhao Jingyi Editor: Li Jiaqi

2025-02-15

Recently, a brigade of the 82nd Army Group of the Central Theater Army

The spring non-commissioned officer selection work is in full swing

More than 200 enterprising soldiers

Gathered in the examination room, ready to go

Blow the horn to move to a higher level

In order to retain high-quality talent

The brigade set up a professional leadership group for selection work

According to the principle of “strict procedures, selecting the best from the best

Unified organization”

The assessment process is carefully planned

The assessment content covers theoretical knowledge

Basic physical fitness and professional skills and other dimensions

Comprehensively and objectively evaluate the comprehensive quality of the selected personnel

At the same time

Through the public quantitative ranking method

Ensure that the entire selection process is fair and transparent

In the theoretical assessment stage

The candidates wore neat military uniforms

Sit at the examination table

Concentrate on answering questions

The atmosphere supervisor strictly supervised the whole process

Ensure strict discipline in the examination room

The physical fitness assessment site is even more passionate

Three-kilometer run, pull-ups, supine crunches

Courses such as 30x2 serpentine run were launched one by one. The candidates fought bravely and fought hard just to stand out in this competition. At the same time, the technical competition was also exciting. Line erection, radio message, satellite box station opening, health rescue and other professional courses were in good order at the assessment site. The candidates demonstrated their professional quality and practical ability with their superb skills and efficient operation. Soldier Zhang Zihao said confidently, “The selection and promotion standards are high. Although the pressure is great, it has inspired me to charge forward.” They are all using practical actions to prove their strength and value. The selection and promotion of sergeants not only means a change of identity, but also carries the responsibility and mission of strengthening the army. I sincerely wish that all comrades can be promoted smoothly. In the future military journey, take root in the battle position and make contributions to the military camp. 西藏军区某旅组织跨昼夜战术机动训练，锤炼部队实战能力

来源：中国军网-解放军报 作者：李松原 责任编辑：赵镭饷

2025-02-16

西藏军区某旅

昼夜出击 专攻精练

解放军报讯 李松原报道：”前方遭’敌’炮火拦阻！”初春时节，西藏军区某旅一场跨昼夜战术机动训练激烈展开。接到”敌情”通报后，指挥员迅速指挥部队调整行军路线，官兵继续奔赴目标地域。

“战争不分昼夜，我们组织跨昼夜战术机动训练，就是要引导官兵时刻保持’弓满弦、带甲眠’的状态。”该旅领导介绍，训练中，他们围绕敌后侦察、隐蔽接敌、夜间破袭等课目展开专攻精练，从难从严设置临机特情，既考验指挥员快速反应能力，又检验战术编队的编成要素是否齐全完备，有效锤炼部队实战能力。

“前方道路被毁！”特情传来，侦察分队迅速前出探明情况。指挥员根据他们回传的情报信息，立即派出保障分队抢修道路。微光条件下，官兵有序展开作业，快速架起可供车队通行的简易桥梁。

晨曦初露，训练结束。参训官兵来不及休整，趁热打铁展开复盘总结。他们认真梳理训练中暴露出的短板弱项，逐项研讨制订解决方案。据悉，下一步，该旅将针对战法训法运用、复杂环境构设等方面存在的不足展开强化训练。

A Brigade of The Tibet Military District Organized a Day-and-Night Tactical Maneuver Training to Hone The Troops’ Combat Capabilities

Source: China Military Network-People’s Liberation Army Daily Author: Li Songyuan Editor: Zhao Leixiang

2025-02-16

A brigade of the Tibet Military District

Attack day and night, specialize in training

People’s Liberation Army Daily News Li Songyuan reported: “The front was blocked by ‘enemy’ artillery fire!” In early spring, a brigade of the Tibet Military Region carried out a fierce day-and-night tactical maneuver training. After receiving the “enemy situation” report, the commander quickly commanded the troops to adjust the marching route, and the officers and soldiers continued to rush to the target area.

“War is not divided by day or night. We organize cross-day and night tactical maneuver training to guide officers and soldiers to always maintain the state of ‘bow full string, armored sleep’.” The brigade leader introduced that during the training, they focused on reconnaissance behind enemy lines, covert contact with the enemy, night raids and other subjects to carry out special training, and set up special situations from difficult and strict conditions, which not only tested the commander’s ability to respond quickly, but also tested whether the elements of the tactical formation were complete and effective in tempering the troops’ actual combat capabilities.

“The road ahead is destroyed!” The special situation came, and the reconnaissance team quickly went forward to find out the situation. Based on the intelligence information they sent back, the commander immediately sent a support team to repair the road. Under dim light conditions, officers and soldiers carried out operations in an orderly manner and quickly built a simple bridge for the convoy to pass.

The training ended at dawn. The participating officers and soldiers had no time to rest and regroup, and they started a review and summary while the iron was hot. They carefully sorted out the shortcomings exposed in the training, and discussed and formulated solutions one by one. It is reported that in the next step, the brigade will carry out intensive training on the deficiencies in the application of tactics and training methods, and the construction of complex environments.

基层传真丨”战场多面手”这样炼成

来源：中国军网-解放军报 作者：刘佳奇 王利纲 李润科 责任编辑：乌铭琪

2025-02-17 06:44:58 0

“战场多面手”这样炼成

■刘佳奇 王利纲 李润科

谢 岩绘

折叠伞包、安装弹射架、组装飞行器……

几天前，在第 81 集团军某旅训练场上，某连二级上士宋帅康与战友密切配合，打破了该旅”固定翼飞行器起飞”课目最短用时纪录。

“宋帅康是我们连的装甲侦察车射手兼侦察员，能力素质很全面。”该连干部宋先峻介绍，从去年起，旅里加大一专多能军士培养力度，助力他们在各自岗位上历练成长，实绩斐然：卫生员兼防化员刘玉清在上级组织的骨干集训中，与防化专业的战友同台竞技，成绩名列

前茅；卫生员兼驾驶员王承勇既是卫生专业教练员，又当驾驶专业教练员，培养出多名优秀骨干……

“新兵定岗时，由于素质突出，宋帅康被分配到如今的岗位上。” 宋先峻给笔者讲起这名老兵的故事：入伍以来，宋帅康多次在装甲侦察车射手比武中取得优异成绩。然而他的侦察专业成绩却并不出众，部分课目甚至存在明显短板。

起初，宋帅康不以为意：”我平时主要担任射手职责，侦察技能派上用场的机会屈指可数。更何况，有那么多战友专门执行侦察任务，我再花精力训练岂不是多此一举？”

原来，在实际训练中，尽管这些军士个人能力素质过硬，但面对专业人才储备多、训练压力大等实际，他们对多专业训练常常顾此失彼。在精力有限的情况下，他们往往侧重主专业能力提升，这意味着另一专业常常训不到位，很多人只是”入了门”。

然而，按照 2022 年出台的《军士暂行条例》规定，军士晋升必须具备相应的职业技能鉴定证书。宋帅康不禁担心起来：自己的侦察专业职业技能鉴定证书能否顺利取得？是否会影响未来晋升？多专业训练如何防止顾此失彼？

旅作训科同样注意到了这个问题。一次训练中，导调组判定某车驾驶员”阵亡”，而班组中的兼职驾驶员却没能顶上去，导致任务失败。

“通向未来战场的路上，每个岗位都是为打赢而设，不能出现偏训漏训现象！”旅领导一针见血地指出问题，专门组织”兼职”军士开展专业强化训练，帮助他们制订能力提升计划，实现固强补弱、一专多能。

经过强化训练，宋帅康的侦察专业水平明显提高。不久后，他顺利考取侦察专业中级职业技能鉴定证书。

完成双专业技能鉴定后，该旅将宋帅康纳入全旅一专多能人才库，为他建立成长档案，根据专业特长、培训经历、训练成绩等进行细分和标注，为其量身定制培养计划，提供院校送学、厂家跟研的机会。

刚刚晋升一级上士的胡哲魁，也是受益者。担任狙击手兼驾驶员的他，射击专业技能过硬，但由于训练时间交叉重合，他的驾驶技能仅停留在基础水平，难以应对复杂路况。

旅作训科发现这一不足后，专门为他制订训练计划，安排驾驶专业教练员侯钦峰挂钩帮带，帮他缩短成长周期。

几个月下来，经过各方努力，胡哲魁驾驶技术进步显著，还学会了修车。去年演习期间，胡哲魁驾车转移时突遇车辆故障，他沉着冷静地”望闻问切”，自行修好车辆，并在规定时间内抵达任务地域。将车辆隐蔽后，他随即进入射击点位，顺利完成狙击任务。

“并非所有军士都能像宋帅康、胡哲魁一样完成能力拓展升级。” 宋先峻说，”旅里建立了较为灵活的岗位人员出入机制，既让综合能力素质突出的战士，以最快速度适应岗位，也会及时为暂时不适配兼职岗位的战士，调整培养计划。”

中士陈立清原本是所在连队数一数二的装甲车驾驶员，后来他主动请缨兼职担任炮手。可事与愿违，他几次参加全营考核和上级组织的职业技能鉴定，均未通过。

连主官主动靠上去找他谈心，帮他分析情况。认识到自身不足后，陈立清主动申请暂时把炮手专业放一放，但没有因此丧失信心：”兼职所需的能力素质比我预想中更加全面，待我储备充分后，再重新挑战！”

“锻造’战场多面手’不是一朝一夕就能完成的，必须科学施策、久久为功。”该旅领导介绍，现在旅里已建成一批集驾驶、防化、火力等 10 余个专业于一体的”士兵训练室”。相信战士们在这里加钢淬火，一定能涌现出越来越多的”多面手”。

Grassroots Fax | “Battlefield All-rounder” Is Made in This Way

Source: China Military Network-Liberation Army Daily Author: Liu Jiaqi Wang Ligang Li Runke Editor: Wu Mingqi

2025-02-17

“Battlefield All-rounder” is made in this way

■Liu Jiaqi Wang Ligang Li Runke

Xie Yanhui

Folding parachute bag, installing ejection rack, assembling aircraft...

A few days ago, at the training ground of a brigade of the 81st Group Army, a company’s second-class sergeant Song Shuaikang worked closely with his comrades to break the brigade’s “fixed-wing aircraft takeoff” course’s shortest time record.

“Song Shuaikang is our company’s armored reconnaissance vehicle shooter and scout, with comprehensive abilities and qualities.” Song Xianjun, a cadre of the company, introduced that since last year, the brigade has increased the training of multi-talented sergeants to help them grow in their respective positions, with remarkable achievements: Liu Yuqing, a medic and chemical defense officer, competed with his comrades in chemical defense in the backbone training organized by the superiors, and his results were among the best; Wang Chengyong, a medic and driver, is both a medic and a driving instructor, and has trained many outstanding backbones...

“When the new recruits were assigned to their posts, Song Shuaikang was assigned to his current post because of his outstanding qualities.” Song Xianjun told the author the story of this veteran:

Since joining the army, Song Shuaikang has achieved excellent results in armored reconnaissance vehicle shooter competitions many times. However, his reconnaissance professional results are not outstanding, and some subjects even have obvious shortcomings.

At first, Song Shuaikang didn't care: "I usually mainly serve as a shooter, and there are only a few opportunities for reconnaissance skills to come in handy. What's more, there are so many comrades who specialize in reconnaissance missions. Isn't it redundant for me to spend energy on training?"

It turned out that in actual training, although these sergeants have strong personal abilities and qualities, they often lose sight of multi-professional training in the face of a large reserve of professional talents and high training pressure. With limited energy, they often focus on improving their main professional abilities, which means that another profession is often not trained in place, and many people just "get started".

However, according to the "Interim Regulations on Sergeants" issued in 2022, sergeants must have corresponding professional skills certification for promotion. Song Shuaikang couldn't help but worry: Can he successfully obtain his professional skills certification for reconnaissance? Will it affect future promotion? How can multi-professional training prevent losing sight of one thing?

The brigade training department also noticed this problem. In a training session, the guidance and dispatching group determined that the driver of a certain vehicle was "killed in action", but the part-time driver in the team failed to take over, resulting in the failure of the mission.

"On the road to the future battlefield, every position is designed to win, and there must be no partial training or missed training!" The brigade leaders pointed out the problem incisively, and specially organized "part-time" sergeants to carry out professional intensive training to help them formulate capacity improvement plans to achieve strengthening strengths and making up for weaknesses, and one specialty and multiple skills.

After intensive training, Song Shuaikang's reconnaissance professional level has improved significantly. Soon after, he successfully passed the intermediate professional skills certification certificate for reconnaissance.

After completing the dual professional skills certification, the brigade included Song Shuaikang in the brigade's one specialty and multiple skills talent pool, established a growth file for him, subdivided and marked according to professional expertise, training experience, training results, etc., tailored a training plan for him, and provided him with opportunities to study in colleges and universities and follow up with manufacturers.

Hu Zhekui, who has just been promoted to the first sergeant, is also a beneficiary. As a sniper and driver, he has excellent shooting professional skills, but due to the overlap of training time, his driving skills are only at the basic level, and it is difficult to cope with complex road conditions.

After the brigade training department discovered this shortcoming, it specially formulated a training plan for him and arranged for driving professional coach Hou Qinfeng to help him shorten his growth cycle.

After a few months, through the efforts of all parties, Hu Zhekui's driving skills have improved significantly, and he has also learned to repair cars. During the exercise last year, Hu Zhekui encountered a vehicle failure while driving to transfer. He calmly "looked, smelled, asked and felt", repaired the vehicle by himself, and arrived at the mission area within the specified time. After hiding the vehicle, he immediately entered the shooting point and successfully completed the sniper mission.

"Not all sergeants can complete the ability expansion and upgrade like Song Shuaikang and Hu Zhekui." Song Xianjun said, "The brigade has established a more flexible mechanism for personnel entry and exit, which not only allows soldiers with outstanding comprehensive ability and quality to adapt to their positions as quickly as possible, but also adjusts the training plan in time for soldiers who are temporarily unsuitable for part-time positions."

Sergeant Chen Liqing was originally one of the best armored vehicle drivers in his company. Later, he took the initiative to volunteer to work part-time as a gunner. But things did not go as he wished. He participated in the battalion-wide assessment and the professional skills appraisal organized by the superior several times, but failed.

The company commander took the initiative to approach him to talk and help him analyze the situation. After realizing his own shortcomings, Chen Liqing took the initiative to apply to temporarily put aside the gunner profession, but did not lose confidence: "The ability and quality required for part-time work is more comprehensive than I expected. I will challenge it again after I have sufficient reserves!" "Forging a 'battlefield all-rounder' is not something that can be accomplished overnight. It must be scientifically implemented and long-term." The brigade leader introduced that the brigade has now built a number of "soldier training rooms" that integrate more than 10 professions such as driving, chemical defense, and firepower. I believe that the soldiers will temper their steel here, and more and more "all-rounders" will surely emerge.

第 82 集团军某旅推动双向讲评制度走深落实

来源：中国军网-解放军报 作者：姚欣彤 武一平 责任编辑：乌铭琪

2025-02-17

第 82 集团军某旅推动双向讲评制度走深落实——

跟踪问效促真评实改

■姚欣彤 武一平

“机关经常抽调人员组织培训，给基层训练管理带来不小压力”“机关各部门沟通协调不畅，基层重复统计信息时有发生”……前段时间，第 82 集团军某旅召开机关基层双向讲评会，基层官兵代表直言不讳，直指问题。机关工作人员认真倾听、详细记录，当场提出整改措施。

“落实双向讲评制度的关键，在于真评实改。”该旅一名机关干部说，在过去，双向讲评有时流于形式，问题反馈了不少，跟进整改却迟迟不见动静。今年初，他们建立完善全程跟踪问效机制，机关将整改计划按季度上报旅党委，旅党委依照责任分工，指定有关部门成立整改小组，拟制整改任务清单，实现自上而下监督落实。

笔者看到，这名干部手中展示的整改任务清单中，针对基层干部提出的”机关检查通报批评多，帮带解决问题少”的意见，机关相关业务部门领导给予明确回应，承诺机关今后检查发现问题后，能够帮助基层现场整改的，不予通报批评。对于倾向性问题，机关与基层共同剖析原因，研究解决办法，不能只查不帮、帮而无果。

管中窥豹，可见一斑。翻看后续落实报告，一项项整改措施详尽具体：助力官兵学历提升、为营连提供便携充电设备及小电器维修服务、优化网络信息服务、帮助解决军人子女入学入园等事项均已办结。

除了服务保障方面的问题，笔者注意到基层官兵还对训练工作提出不少意见建议，其中”提高模拟训练中心使用质效”的建议被机关采纳。很快，机关不仅优化了模拟训练中心的课程安排并加强设备维护，还加设了专业教员进行指导，让官兵在模拟训练中提升能力素质。

“有了全程跟踪问效机制，机关与基层双向奔赴的方向更明确、措施更得力，不仅提升了抓建部队质效，而且密切了内部关系。”该旅领导说，机关有作为，基层才会更积极。下一步，他们将探索更多服务基层、帮建基层的方法路子，更好地发挥双向讲评”上下联动、共谋发展”的作用，为部队全面建设持续注入动力。

A Brigade of The 82nd Group Army Promotes The Implementation of The Two-Way Review System

Source: China Military Network-People’s Liberation Army Daily Author: Yao Xintong Wu Yiping Editor: Wu Mingqi

2025-02-17

A brigade of the 82nd Group Army promotes the implementation of the two-way review system-

Follow up and ask for results to promote real review and real change

■Yao Xintong Wu Yiping

“The agency often draws personnel to organize training, which brings considerable pressure to grassroots training management” “Communication and coordination between departments of the agency are not smooth, and repeated statistical information at the grassroots level occurs from time to time”... Some time ago, a brigade of the 82nd Group Army held a two-way review meeting at the grassroots level of the agency. The grassroots officers and soldiers spoke frankly and pointed out the problems. The agency staff listened carefully, recorded in detail, and proposed rectification measures on the spot.

“The key to implementing the two-way review system lies in real review and real change.” A cadre of the brigade said that in the past, the two-way review sometimes became a formality, and a lot of problems were reported, but there was no follow-up rectification. At the beginning of this year, they established and improved a full-process tracking and performance evaluation mechanism. The agency reported the rectification plan to the brigade party committee on a quarterly basis. The brigade party committee, in accordance with the division of responsibilities, designated relevant departments to set up rectification teams and draft rectification task lists to achieve top-down supervision and implementation.

The author saw that in the rectification task list displayed by this cadre, the leaders of the relevant business departments of the agency gave a clear response to the opinions raised by grassroots cadres that “the agency inspections and reports are more critical, but there are few problems to help solve them”, and promised that the agency will not report and criticize if it can help the grassroots to rectify problems on the spot after the agency finds problems in the future. For tendency problems, the agency and the grassroots will jointly analyze the causes and study solutions. They cannot only investigate without helping, or help without results.

A glimpse of the leopard in the tube can reveal a glimpse of the leopard. Looking through the follow-up implementation report, each rectification measure is detailed and specific: helping officers and soldiers improve their academic qualifications, providing portable charging equipment and small electrical appliance maintenance services for battalions and companies, optimizing network information services, and helping to solve the problems of military children entering school and kindergartens have all been completed.

In addition to service support issues, the author noticed that grassroots officers and soldiers also put forward many opinions and suggestions on training work, among which the suggestion of “improving the quality and efficiency of the use of simulation training centers” was adopted by the agency. Soon, the headquarters not only optimized the course arrangement of the simulation training center and strengthened equipment maintenance, but also added professional instructors for guidance, so that officers and soldiers can improve their ability and quality in simulation training.

“With the full-process tracking and performance evaluation mechanism, the direction of the headquarters and the grassroots is clearer and the measures are more effective, which not only improves the quality and efficiency of building the troops, but also strengthens the internal relationship.” The brigade leader said that only when the headquarters is active can the grassroots be more active. In the next step, they will explore more ways to serve and help build the grassroots, better play the role of two-way evaluation of “linking up and down and seeking common development”, and continue to inject momentum into the comprehensive construction of the troops.

“手绘战术地图”的启示：”土办法”成为制胜的”金点子”

来源：解放军报 作者：韩 帅 杨茂生 童祖静 责任编辑：赵镭饷 2025-02-17

陆军某旅结合典型事例引导官兵集智破解练兵难题——

“手绘战术地图”的启示

■韩 帅 杨茂生 解放军报特约记者 童祖静

该旅组织夜间渗透训练。解放军报特约通讯员 张 毛摄

初春时节，陆军某旅一场夜间渗透训练紧张进行。班长常占带领侦察小队行动时，突遭”敌”强电磁干扰，造成导航设备部分功能失灵。

面对突如其来的特情，常占迅速取出”手绘战术地图”，手指在一条条等高线上划过，借助地面参照物，很快掌握了周边地形情况。

随后，常占带领侦察小队保持无线电静默，悄无声息绕过”敌”警戒网，抵达目标点位，完成渗透任务。

走下训练场，常占指着”手绘战术地图”对记者说：”这里面藏着我们的’制胜密码’。”

让记者想不到的是，这张看似普通的手绘地图，是常占和战友历时数月、修改调整数十次的成果。这张手绘地图的诞生，背后是该旅官兵从”被动适应”到”主动破局”的一段历程。

去年上半年，该旅奉命参加上级组织的某项训练任务。作为旅里首批使用新型数字化侦察装备的训练骨干，常占信心满满。没想到，行动展开后，他们却在”敌”强电磁干扰下陷入困境。

回忆起当时的窘境，常占至今仍觉脸颊发烫：因过度依赖电子设备，他和战友迷失了方向，被判失利。更让他感到意外的是，蓝方分队完成包抄任务，使用的是堪称”原始”的油印地图。

这场意料之外的失利，刺痛了常占那颗不服输的心。他从书架上翻出有些泛黄的《军事地形学》教材，夯实基础技能：夜间按星象辨方位、用步距丈量地形起伏……耗时两个月，常占和战友手绘出营区周边地形图，标注出百余个隐蔽点和十几条迂回路线。

绘图难，更难的还在后面。首次使用手绘地图参加训练，他们就出了岔子：因地图等高距标注错误，导致沙盘落差过大，战术推演时突击车无法开进预定阵地。

“这么原始的方法，能行吗？”渐渐地，质疑声多了起来。

连队训练交流会上，常占举起满是折痕的地图，语气坚定地说：”手绘地图训练不是为了替代电子地图，而是要确保在电子设备无法使用时，大家还能通过保底手段判定方位、为作战行动导航，保证在复杂战场环境下完成任务。”

面对挫折，常占没有退缩。他仔细分析归纳电子地图的数据，结合实地勘测手动校准误差。

“电子版架设框架，手绘版补充细节。”常占通过这样的作业模式，大幅提升了地形分析效率。在旅里组织的”抗干扰导航”比武中，常占带领侦察小队连续 3 次夺得冠军。

成绩来之不易。为校准航拍数据，常占带着大家一次次徒步验证，两个月走坏了一双作战靴；编写图像处理脚本时，原本对专业知识一窍不通的下士张远鹏啃下厚厚一本编程教材。一次对抗训练中，系统突然出现异常，在距目标点位还有一段路程的陌生地域，官兵依靠手绘地图上的岩层走向准确判定方位，完成一次”绝地反击”。

“比制作手绘地图更难的，是打破固有思维的束缚。”常占坦言，一开始，不少人质疑手绘地图是”开倒车”，这让他和战友感受到不小的压力。

转折，源自一场暴雨中进行的对抗训练。当时，导调组突然切断所有电子设备通联，大部分班组瞬间成了”无头苍蝇”，常占所在班组却利用防水油布包裹的纸质地图，率先发现”敌”防御体系漏洞——一处被数字化系统漏掉的缓坡，顺利完成穿插突袭任务。”那种感觉，就像突然获得了’双重视力’。”谈及当时的情形，中士陈宇航形容，”电子地图提供经纬坐标，手绘地图标注的枯树、暗河变成了立体坐标。”

“土办法”的成功逆袭，引起该旅党委的重视。议战议训会上，党委一班人经过深入研究，确立了”三个不能”的原则：不能用电子化替代脑力训练，不能以新装备性能参数掩盖实战短板，不能让创新成果停留在纸面。会后，常占所在班组归纳总结的”复杂环境下导航八步法”被该旅机关纳入训法库。

常占和战友的探索实践，犹如投向湖面的石子，在该旅激起层层涟漪：旅队”军士工作室”成立”战场生存技术攻关小组”，研发的”多功能地形尺”获国家实用新型专利；旅机关推动训练考评改革，在电子化考核标准基础上，增设”极端条件下人工判读”课目，倒逼官兵找准短板弱项，进一步提升应急应战能力；根据战场需求对部分装备进行升级改造，并预留手动操作接口……

该旅领导介绍，为推动更多”金点子”落实落地，他们还研究出台基层自主创新细则，建立完善容错机制，立起”不以成败论英雄”的鲜明导向，鼓励更多官兵拼搏奋斗、勇闯新路。

The Inspiration of “Hand-Drawn Tactical Map”: “Local Method” Becomes The “Golden Idea” for Winning

Source: PLA Daily Author: Han Shuai Yang Maosheng Tong Zujing Editor: Zhao Leixiang 2025-02-17 08:07:41

A certain army brigade combined typical cases to guide officers and soldiers to pool their wisdom to solve the training problems——

The inspiration of “hand-drawn tactical map”

■ Han Shuai Yang Maosheng PLA Daily special correspondent Tong Zujing

The brigade organized night infiltration training. PLA Daily special correspondent Zhang Mao photo

In early spring, a night infiltration training of a certain army brigade was carried out intensively. When squad leader Chang Zhan led the reconnaissance team to act, he was suddenly subjected to strong electromagnetic interference from the “enemy”, causing some functions of the navigation equipment to malfunction.

Faced with the sudden special situation, Chang Zhan quickly took out the “hand-drawn tactical map”, ran his fingers across the contour lines, and quickly mastered the surrounding terrain with the help of ground reference objects.

Afterwards, Chang Zhan led the reconnaissance team to maintain radio silence, quietly bypassed the “enemy” warning network, arrived at the target point, and completed the infiltration mission.

Walking down the training ground, Chang Zhan pointed to the “hand-drawn tactical map” and said to the reporter: “Our ‘winning code’ is hidden here.”

What the reporter didn't expect was that this seemingly ordinary hand-drawn map was the result of Chang Zhan and his comrades who spent several months and modified and adjusted dozens of times. Behind the birth of this hand-drawn map is a journey of the officers and soldiers of the brigade from "passive adaptation" to "active breakthrough".

In the first half of last year, the brigade was ordered to participate in a training task organized by the superiors. As the first batch of training backbones in the brigade to use new digital reconnaissance equipment, Chang Zhan was full of confidence. Unexpectedly, after the operation was launched, they fell into trouble under the strong electromagnetic interference of the "enemy".

Recalling the dilemma at that time, Chang Zhan still feels hot on his cheeks: due to over-reliance on electronic equipment, he and his comrades lost their way and were judged to have failed. What surprised him even more was that the blue team completed the outflanking mission using a "primitive" mimeographed map.

This unexpected defeat hurt Chang Zhan's unyielding heart. He took out the slightly yellowed "Military Topography" textbook from the bookshelf and consolidated his basic skills: identifying directions according to the stars at night, measuring the terrain with step length... It took two months for Chang Zhan and his comrades to hand-draw a topographic map around the camp, marking more than a hundred hidden points and more than a dozen detours.

Drawing is difficult, and the more difficult ones are still to come. The first time they used hand-drawn maps to participate in training, they had a problem: due to the wrong elevation distance marking on the map, the sand table had a large drop, and the assault vehicle could not drive into the designated position during the tactical deduction.

"Will such a primitive method work?" Gradually, more doubts emerged.

At the company training exchange meeting, Chang Zhan held up a map full of creases and said firmly: "Hand-drawn map training is not to replace electronic maps, but to ensure that when electronic equipment cannot be used, everyone can still use the backup means to determine the direction and navigate for combat operations, so as to ensure the completion of tasks in complex battlefield environments."

Faced with setbacks, Chang Zhan did not back down. He carefully analyzed and summarized the data of the electronic map, and manually calibrated the errors in combination with field surveys.

"The electronic version sets up the framework, and the hand-drawn version supplements the details." Chang Zhan greatly improved the efficiency of terrain analysis through this operation mode. In the "anti-interference navigation" competition organized by the brigade, Chang Zhan led the reconnaissance team to win the championship three times in a row.

The results were hard-won. In order to calibrate the aerial photography data, Chang Zhan led everyone to verify on foot again and again, and a pair of combat boots were worn out in two months; when writing the image processing script, Corporal Zhang Yuanpeng, who originally

knew nothing about professional knowledge, read a thick programming textbook. During a confrontation training, the system suddenly became abnormal. In an unfamiliar area some distance away from the target point, the officers and soldiers relied on the direction of the rock formations on the hand-drawn map to accurately determine the direction and complete a “Jedi counterattack”.

“What is more difficult than making a hand-drawn map is to break the shackles of inherent thinking.” Chang Zhan admitted that at the beginning, many people questioned that the hand-drawn map was “reversing”, which made him and his comrades feel a lot of pressure.

The turning point came from a confrontation training in a rainstorm. At that time, the command and dispatch group suddenly cut off all electronic equipment communications, and most teams instantly became “headless flies”. However, Chang Zhan’s team used a paper map wrapped in waterproof tarpaulin to first discover the loophole in the “enemy” defense system-a gentle slope missed by the digital system, and successfully completed the interspersed raid mission. “That feeling is like suddenly gaining ‘double vision’.” Talking about the situation at the time, Sergeant Chen Yuhang described, “The electronic map provides longitude and latitude coordinates, and the dead trees and underground rivers marked on the hand-drawn map have become three-dimensional coordinates.”

The successful counterattack of the “local method” attracted the attention of the brigade party committee. At the meeting on war and training, the Party Committee established the principle of “three cannots” after in-depth research: electronic training cannot be used to replace mental training, the performance parameters of new equipment cannot be used to cover up the shortcomings of actual combat, and the innovative results cannot remain on paper. After the meeting, the “Eight-step Navigation Method in Complex Environments” summarized by Chang Zhan’s team was included in the training method library of the brigade.

The exploration and practice of Chang Zhan and his comrades are like stones thrown into the lake, which have caused ripples in the brigade: the brigade’s “Sergeant Studio” has established a “Battlefield Survival Technology Research Group”, and the “Multi-function Terrain Ruler” developed has won the national utility model patent; the brigade has promoted the reform of training assessment, and added the “Manual Interpretation under Extreme Conditions” course on the basis of electronic assessment standards, forcing officers and soldiers to identify their shortcomings and weaknesses and further improve their emergency response capabilities; some equipment has been upgraded and renovated according to battlefield needs, and manual operation interfaces have been reserved...

The leaders of the brigade introduced that in order to promote the implementation of more “golden ideas”, they have also studied and issued detailed rules for grassroots independent innovation, established and improved fault-tolerant mechanisms, and established a clear orientation of “not judging heroes by success or failure”, encouraging more officers and soldiers to fight and bravely break new ground.

第八十一集团军某旅引导官兵在任务中因势因情因时而变

来源：解放军报 作者：王若龙 陈 辰 李浩然 责任编辑：赵镭饷 2025-02-18

第八十一集团军某旅引导官兵在任务中因势因情因时而变——

思维”破障”才能行动”突围”

■王若龙 陈 辰 解放军报记者 李浩然

侦察分队进行进攻战斗训练。曾阳程摄

“侦察 4 组隐蔽伪装效果最好，而且用时比平均水平短。”听到成绩通报，侦察 2 组官兵有些意外。

近日，第 81 集团军某旅组织侦察分队开展连贯课目训练，各侦察小组依照指令向目标地域机动。任务之初，侦察 2 组遥遥领先。孰料，后续任务中，侦察 4 组官兵奋勇争先、拔得头筹。

“侦察 4 组战友的速度太快了，他们完成了不可能完成的任务！”惊讶过后，侦察 2 组官兵复盘训练过程后，言语中流露出钦佩之情。

时针回拨到两小时前，侦察 4 组官兵驾驶侦察车准备快速通过碎石坡。

“10 多分钟后，你组所在地域将遇到’敌’卫星过顶侦察！”接到导调组的情况通报，侦察 4 组组长陈龙伟不禁眉头紧锁——他们本已落后，若按预案设定通过搭设伪装网等方法进行隐蔽伪装，无疑还会迟滞任务进程。

“敌情”就是命令。正当陈龙伟认真分析现场形势之际，左前方的一片密林引起了他的注意：”密林是天然的掩护场所。借助这一条件，只需进行简易操作，就能达到较好伪装效果，而且能节约不少时间。”

与几位组员商定后，陈龙伟命令驾驶员将侦察车开到密林附近，并做好周密防护，随后与大家一起冲进密林，利用现地条件进行隐蔽伪装。几分钟后，”敌”卫星过顶侦察，未发现侦察 4 组行踪。后来，他们趁此机会快速机动，率先到达目标地域并展开作业。

“不按预案设定搭设伪装网，这符合规定吗？”起初，听到导调组的评判，侦察 2 组组长张会强有些疑惑。

“战场上情况瞬息万变，对手总是想’攻其无备，出其不意’。如果我们平时训练习惯于按照脚本走流程、照搬预案练应对，那么面对战场上的突发情况怎么办呢？”导调组负责人房祥鑫的一席话，让大家陷入沉思。

“用固化思维应对变化了的情况，到了战场上是要吃大亏的。”随后，他进一步解释说，任务中，侦察 4 组根据现地情况，灵活运用密林环境实施隐蔽伪装，不仅操作简便、撤收迅速、隐蔽效果好，而且便于机动、便于观察、便于防护，符合作战要求。他们灵活应变、科学处置，为完成后续任务赢得了时间、抢占了先机。

听了房祥鑫的话，现场官兵纷纷点头，该旅现场负责组训的机关部门同志趁机引导大家结合复盘查摆不足、剖析交流。”战场上的情况不可能按照预定方案走，平时训练就应提高应急应变能力”“战争打的就是出其不意，复杂情况随时可能出现，按部就班只会陷入被动”“要不断强化官兵战场思维、实战意识”……讨论中，大家围绕”侦察 4 组之胜带来的思考”这一话题，你一言我一语争相发表看法，惯性思维作祟、实战意识不强、战术运用不灵活等”病根”被一一挖出。

“只有思维’破障’，才能实现行动’突围’。”该旅领导综合大家的发言分析说，作战预案是根据以往经验事先设定的，但战场情况是随时会变化的。在某些情况下，作战转折往往与固化思维相左相悖，一线指挥员要有对战场的洞察力，遇到突发情况绝不能”照葫芦画瓢”，而要因时而变谋划、灵活运用战术战法，找准实现作战转折的关键点和突破口，才能抓住甚至创造战机、赢得先机。

以此为契机，该旅引导官兵刀口向内，检视反思平时训练中存在的不足，并制订针对性改进措施：对标实战深化战训耦合，围绕作战环境、作战模式等充分预想多类情况，并将其融入练兵实践，使训练最大限度贴近实战；着眼提升应急应战能力组织专攻精练，根据阶段任务组织连贯课目训练，通过临机导调复杂特情提升官兵应急处置能力；灵活编组开展对抗训练，勇于打破”自己考自己”的传统模式，尝试互为对手、互为条件开展考核，让官兵在技术战术融合考、背靠背对抗考中接受摔打锤炼。

“训练中，我们遵循敌情仿真、环境逼真、战法求真的原则，逐步升级特情设置难度，加大实战化训练强度，不断强化一线指挥员和官兵应急应战能力。”该旅领导说，下一步，他们还将利用技术手段加强训练场地建设，突出物理环境与心理环境建设，统筹改造现有训练场，逐步打造能闻到硝烟味、听到爆炸声的准战场，让官兵置身其中便能激活”战场联想”。

短 评

察势用势赢主动

■卢 岗

《孙子兵法》中讲：”善战者，求之于势，不责于人，故能择人而任势。”势，作为一种无形的作战能量，是战场制敌胜敌的关键。因此，我国古代兵家大多善于察势用势，并因势利导把握形成作战良机。”战争是不确定性的王国”，变化和风险无处不在、无时不有，这就要求我们平时就要练就适应不确定性的大脑和能力。从这个角度讲，第 81 集团军某旅引导官兵任务中因时谋划、灵活应变的做法，是值得肯定的。

信息化智能化战争条件下，作战节奏快、空间广、领域多，战场情况更加复杂多变。平时训练中，各级指挥员只有不断强化察势用势观念，摆脱脚本依赖、破除套路思维，在实践中多设些”意外环节”，倒逼官兵多处理”意想不到”、多打”无准备之仗”，不断锤炼因地制宜、因时谋划、随机应变本领，才能在未来战场赢得主动。

“势者，因利而制权也。”实践证明，只有根据事物发展趋势因势利导，做到应势而动、顺势而为，才能收到良好效果。这就要求各级在练兵备战中，注重引导官兵紧贴使命任务研究战术、创新战法，根据可能的战场态势、敌我情况开展针对性训练，增加打赢未来战争的制胜砝码。

A Brigade of The 81st Group Army Guides Officers and Soldiers to Change According to Circumstances, Situations and Time During The Mission

Source: PLA Daily Author: Wang Ruolong Chen Chen Li Haoran Editor: Zhao Leixiang 2025-02-18

A brigade of the 81st Group Army guides officers and soldiers to change according to circumstances, situations and time during the mission——

Thinking “breaks through obstacles” before action “breaks through”

■ Wang Ruolong Chen Chen PLA Daily reporter Li Haoran

The reconnaissance team conducts offensive combat training. Photo by Zeng Yangcheng

“Reconnaissance Group 4 has the best concealment and camouflage effect, and the time is shorter than the average level.” Hearing the results report, the officers and soldiers of Reconnaissance Group 2 were a little surprised.

Recently, a brigade of the 81st Group Army organized a reconnaissance team to carry out continuous subject training, and each reconnaissance team moved to the target area according to instructions. At the beginning of the mission, Reconnaissance Group 2 was far ahead. Unexpectedly, in the subsequent mission, the officers and soldiers of Reconnaissance Group 4 fought bravely and won the first place.

“The speed of the comrades in Reconnaissance Group 4 is too fast. They have completed an impossible task!” After being surprised, the officers and soldiers of Reconnaissance Group 2 reviewed the training process and expressed admiration in their words.

The clock went back to two hours ago, and the officers and soldiers of Reconnaissance Group 4 drove the reconnaissance vehicle to quickly pass the gravel slope.

“In more than 10 minutes, the area where your group is located will encounter an ‘enemy’ satellite overhead reconnaissance!” After receiving the situation report from the guidance and control group, Chen Longwei, the leader of Reconnaissance Group 4, frowned - they were already behind, and if they were to conceal and camouflage according to the plan by setting up camouflage nets and other methods, it would undoubtedly delay the progress of the mission.

“Enemy situation” is an order. While Chen Longwei was carefully analyzing the situation on the scene, a dense forest in front of him on the left caught his attention: “The dense forest is a natural cover place. With this condition, you only need to perform simple operations to achieve a good camouflage effect, and it can save a lot of time.” After discussing with several team members, Chen Longwei ordered the driver to drive the reconnaissance vehicle to the vicinity of the dense forest and make thorough protection. Then he rushed into the dense forest with everyone and used the local conditions to conceal and camouflage. A few minutes later, the “enemy” satellite passed overhead for reconnaissance and did not find the whereabouts of Reconnaissance Group 4. Later, they took this opportunity to quickly maneuver and first arrived at the target area and started operations. “Is it in compliance with regulations to set up a camouflage net without following the plan?” At first, Zhang Huiqiang, the leader of Reconnaissance Group 2, was a little confused when he heard the judgment of the guidance and coordination group. “The situation on the battlefield changes rapidly, and the opponent always wants to ‘attack when they are unprepared and take them by surprise’. If we are used to following the script and copying the plan in our usual training, what should we do when facing emergencies on the battlefield?” Fang Xiangxin, the head of the guidance and coordination group, said something that made everyone fall into deep thought. “Using fixed thinking to deal with changing situations will lead to big losses on the battlefield.” He then further explained that during the mission, the 4th reconnaissance group flexibly used the dense forest environment to implement concealment and camouflage according to the local situation. It was not only easy to operate, quick to withdraw, and good in concealment, but also

easy to maneuver, observe, and protect, which met the combat requirements. They responded flexibly and handled scientifically, winning time and seizing the initiative to complete subsequent tasks.

After listening to Fang Xiangxin's words, the officers and soldiers on the scene nodded one after another. The comrades in the organs and departments responsible for the training of the brigade took the opportunity to guide everyone to combine the review to find out the shortcomings and analyze and exchange. "The situation on the battlefield cannot go according to the predetermined plan. Normal training should improve emergency response capabilities." "War is fought unexpectedly, and complex situations may occur at any time. Following the routine will only fall into passivity." "We must continuously strengthen the battlefield thinking and actual combat awareness of officers and soldiers."... During the discussion, everyone focused on the topic of "Thoughts brought by the victory of the 4th reconnaissance group". You said one thing and I said another. The "root causes" such as inertial thinking, weak actual combat awareness, and inflexible tactical application were dug out one by one.

"Only by breaking through the barriers in thinking can we achieve a 'breakthrough' in action." The brigade leader analyzed everyone's speeches and said that the combat plan is set in advance based on past experience, but the battlefield situation can change at any time. In some cases, the turning point of the operation is often contrary to the fixed thinking. Frontline commanders must have insight into the battlefield. When encountering emergencies, they must not "copy the gourd", but must change their plans according to the times, flexibly use tactics and methods, and find the key points and breakthroughs to achieve the turning point of the operation, so as to seize or even create opportunities and gain the upper hand.

Taking this as an opportunity, the brigade guided the officers and soldiers to look inward, examine and reflect on the shortcomings in peacetime training, and formulate targeted improvement measures: deepen the coupling of combat and training in line with actual combat, fully anticipate various situations around combat environment and combat mode, and integrate them into training practice to make the training as close to actual combat as possible; focus on improving emergency response capabilities and organize specialized training, organize coherent training courses according to stage tasks, and improve the emergency response capabilities of officers and soldiers through on-the-spot guidance and adjustment of complex special situations; flexibly organize and carry out confrontation training, dare to break the traditional mode of "testing oneself", try to conduct assessments as opponents and conditions for each other, and let officers and soldiers be tempered in technical and tactical integration tests and back-to-back confrontation tests.

"During the training, we followed the principles of enemy situation simulation, realistic environment, and realistic tactics, gradually upgraded the difficulty of special situation settings, increased the intensity of actual combat training, and continuously strengthened the emergency response capabilities of front-line commanders and officers and soldiers." The brigade leader said that in the next step, they will also use technical means to strengthen the construction of training

venues, highlight the construction of physical and psychological environments, coordinate the transformation of existing training grounds, and gradually create a quasi-battlefield where you can smell the smell of gunpowder and hear the sound of explosions, so that officers and soldiers can activate “battlefield associations” when they are in it.

Observe the situation and use the situation to win the initiative

■ Lu Gang

In “The Art of War”, it is said: “Those who are good at fighting seek it from the situation, not from people, so they can choose people and take the situation.” Situation, as an invisible combat energy, is the key to defeating the enemy on the battlefield. Therefore, most of the ancient Chinese military strategists were good at observing the situation and using the situation, and taking advantage of the situation to seize the opportunity to form a battle. “War is a kingdom of uncertainty”, changes and risks are everywhere and at all times, which requires us to train our brains and abilities to adapt to uncertainty in normal times. From this perspective, the practice of a brigade of the 81st Group Army to guide officers and soldiers to plan and respond flexibly in the mission is worthy of recognition.

Under the conditions of information-based and intelligent warfare, the battle rhythm is fast, the space is wide, the fields are multi-faceted, and the battlefield situation is more complex and changeable. In peacetime training, commanders at all levels can only win the initiative in the future battlefield by constantly strengthening the concept of observing and using the situation, getting rid of script dependence, breaking routine thinking, and setting more “unexpected links” in practice, forcing officers and soldiers to deal with more “unexpected” and fight more “unprepared battles”, and constantly tempering the ability to adapt to local conditions, plan according to the times, and adapt to changes.

“The situation is to control power because of the benefit.” Practice has proved that only by taking advantage of the situation according to the development trend of things, and acting according to the situation and following the trend, can good results be achieved. This requires all levels to focus on guiding officers and soldiers to study tactics and innovate tactics closely in the mission tasks during training and preparation, and to carry out targeted training according to possible battlefield situations and enemy and our situations, so as to increase the winning weight of winning future wars.

特情模拟设备用于驾驶训练

■刘 灿 邓联军

“左前轮爆胎！”冬日，第 74 集团军某旅组织运输车驾驶训练，车辆刚驶入预定地域，导调组便利用高速爆胎模拟设备导调特情。接到情况通报，驾驶员、一级上士吴迪一边均匀加力打方向，一边轻点刹车降车速。待车辆停稳后，他按照规程迅速更换轮胎，成功处置特情。

“日常训练中，我们借助特情模拟设备随机导调突发情况，让官兵在真实体验中练强应急本领。”该旅领导介绍说，以往开展运输车驾驶训练，因受训练场地、环境条件等因素限制，他们在课目内容、组训方法等方面存在同质化现象，尤其是特情导调大多是通过”口头指令”下达，参训官兵凭惯性走流程、练应对，久而久之易形成模式化思维，一旦置身复杂环境或遇到突发情况时很难做到快速反应，不符合应急应战要求。

高温条件下，车辆长时间行驶存在安全风险。在该旅机关组织的一次调研中，组训骨干王智勇建议，在易发生火情的车辆部位安装烟火模拟设备，让官兵在训练中体验到车辆起火情景，并通过实操锤炼处置能力。受此启发，机关同志举一反三，梳理以往任务中发现的常见问题后，通过向兄弟单位请教、与上级协调、跟厂家沟通，并经过多次试验论证，引入多套安全可靠、可循环使用的特情模拟设备，用于日常训练。

训练场上，随着转向失灵模拟设备的启动，驾驶员林志颖当机立断展开处置，成功恢复方向盘对车辆的控制。”在特情模拟设备辅助下，我在身临其境的体验中，熟练掌握了转向失灵等突发情况处置流程和操作技巧，今后遂行任务时底气更足了。”一轮训练结束，林志颖走下运输车说。

“我们还邀请经验丰富的专业教练员来营授课，借助模拟设备讲解示范特情处置实用技巧。”该旅领导说，相关部门结合官兵训练心得梳理形成经验性成果，用于完善特情处置教材教案；利用集训考核、比武竞赛、大项任务等时机召开”诸葛亮会”，收集官兵意见建议，为改进设备使用场景提供参考。

据了解，下一步，他们将利用厂家送训、院校培训等机会，遴选组训骨干送学深造；整合训练场地、优化训练方案，对照任务流程将特情模拟设备进行排列组合，满足官兵多样化训练需求；通过设险条件、设难环境，加大特情处置训练强度和难度，锤炼官兵应急应战能力。

A Brigade of The 74th Group Army Focuses on Strengthening The Emergency Response Skills of Officers and Soldiers in Real Experience

Source: PLA Daily Author: Liu Can Deng Lianjun Editor: Zhao Leixiang 2025-02-18

A brigade of the 74th Group Army focuses on strengthening the emergency response skills of officers and soldiers in real experience——

Special situation simulation equipment is used for driving training

■Liu Can Deng Lianjun

“The left front tire burst!” In winter, a brigade of the 74th Group Army organized a transport vehicle driving training. As soon as the vehicle entered the designated area, the guidance and dispatching team used the high-speed tire burst simulation equipment to guide the special situation. After receiving the situation report, the driver, Sergeant Wu Di, evenly increased the force to turn the steering wheel while lightly braking to reduce the speed. After the vehicle stopped, he quickly replaced the tire according to the regulations and successfully handled the special situation.

“In daily training, we use special situation simulation equipment to randomly guide emergencies, so that officers and soldiers can strengthen their emergency response skills in real experience.” The brigade leader said that in the past, due to the limitations of training venues, environmental conditions and other factors, they had homogeneity in terms of course content and training methods. In particular, special situation guidance was mostly issued through “verbal instructions”. The officers and soldiers who participated in the training followed the process and practiced coping by inertia. Over time, it is easy to form a stereotyped thinking. Once they are in a complex environment or encounter an emergency, it is difficult to respond quickly, which does not meet the requirements of emergency response.

Under high temperature conditions, there are safety risks for vehicles to drive for a long time. In a survey organized by the brigade, Wang Zhiyong, a backbone of the training, suggested that fireworks simulation equipment be installed in vehicle parts prone to fire, so that officers and soldiers can experience vehicle fire scenarios in training and hone their handling capabilities through practical operations. Inspired by this, the comrades in the agency learned from it and sorted out the common problems found in previous tasks. After consulting with brother units, coordinating with superiors, communicating with manufacturers, and after multiple tests and demonstrations, they introduced multiple sets of safe, reliable and reusable special situation simulation equipment for daily training.

On the training ground, with the start of the steering failure simulation equipment, the driver Lin Zhiying immediately took action and successfully restored the control of the steering wheel over the vehicle. “With the assistance of the special situation simulation equipment, I have mastered the handling process and operating skills of emergencies such as steering failure in an immersive experience, and I will be more confident when carrying out tasks in the future.” After a round of training, Lin Zhiying got off the transport vehicle and said.

“We also invited experienced professional instructors to give lectures in the camp, and used simulation equipment to explain and demonstrate practical skills for special situation handling.” The leader of the brigade said that the relevant departments combined the training experience of

officers and soldiers to form empirical results, which were used to improve the teaching materials and lesson plans for special situation handling; they held “Zhuge Liang meetings” during training assessments, competitions, and major tasks to collect opinions and suggestions from officers and soldiers, and provide references for improving equipment usage scenarios.

It is understood that in the next step, they will take advantage of opportunities such as training by manufacturers and training by colleges to select key training personnel for further study; integrate training venues, optimize training plans, and arrange and combine special situation simulation equipment according to the task process to meet the diverse training needs of officers and soldiers; increase the intensity and difficulty of special situation handling training by setting up dangerous conditions and difficult environments, and hone the emergency response capabilities of officers and soldiers.

第七十四集团军某旅探索动散条件下集约化组训新模式

来源：中国军网-解放军报 作者：陈典宏 许浩杰 责任编辑：尚晓敏 发布：2025-02-19 06:07:33

第七十四集团军某旅探索动散条件下集约化组训新模式

一方训练攻关 多方联动研战

编者按 全军基础训练现场会指出，要深化探索新时代基础训练方式，推开专长化任教、集约化组训、模拟化训练、标准化考核，着力提高教学组训水平。第 74 集团军某旅探索动散条件下集约化组训新模式，一方训练攻关，多方联动研战，提升了训练质效。

解放军报讯 记者陈典宏、特约通讯员许浩杰报道：风起云涌，战鹰出击。初春时节，第 74 集团军某旅一场实战化背景下的跨昼夜飞行训练打响。与以往不同的是，此次训练，既有执行飞行和保障任务的官兵在现场参训，又有分散在其他不同任务方向的官兵，以参与课题筹划、问题剖析、战法研究等方式在”后方”参训。

“这是我们探索动散条件下集约化组训新模式带来的新变化。”该旅领导介绍，近年来，随着部队演训任务越来越多，多点位部署、多任务推进成为常态。为此，他们积极探索动散条件下集约化组训新模式，组织各任务方向官兵依托指挥信息系统共享训练课题，按照月统课题、周统进度、日统任务的模式，推动形成多方联动研究训练课题、研练战术战法、验证训练质效的新格局。

一方训练攻关，多方联动研战。此次训练前，该旅统一确定训练课题，并拆分成不同的训练攻关任务，分派给各任务方向官兵。官兵根据任务安排，充分发挥各自优势，合力收集作战数据、分析作战问题、筹划作战方案，对作战细节提出 10 多条意见建议，并针对可

能出现的特情拟订多套方案。该旅领导介绍，依托多方联动研战攻关，他们针对不同地形和气象条件开展战术战法研练，进一步提升了战机编队突防能力。

多方联动研战，训练质效倍增。训练现场，数十名飞行员驾驶战机升空，展开夜间突击训练。面对飞行能见度低、”敌情”判别难等情况，编队飞行员利用联动研战形成的战术招法，快速搜索前进，大大提升了突击效果。面对”敌”雷达探测，编队指挥员运用前期野外驻训时联动研战形成的训练成果，及时调整编队队形和航线，灵活规避”敌”探测，圆满完成任务。

“课题研究形成的程序规范和方式方法等，都是宝贵的组训资源，把这些训练资源运用到实战实训中，使之尽可能转化为战斗力增量，能有效提高训练的效费比。”该旅领导介绍，去年年底，旅队某驻训分队开展野外条件下相关课题研究，形成一套成熟的出动方案，并及时与其他分队共享。另一分队完成原定训练任务后，主动开展相关课目训练。两支分队共同研究训练中的难题，携手对原方案进行改进，有效提升野外条件下战机出动效率和装备野战防护能力。

一批官兵参研课题，多批官兵从中获益。去年夏天，该旅某营在营分队官兵与驻训分队官兵一同研究某课目训练难题，形成一整套经验做法。随后，这批在营分队赴陌生地域参加训练任务。面对类似训练问题，他们借鉴以往的经验规范，很快拿出合理方案，并在实训中不断丰富完善，使方案更具针对性、操作性、实效性。去年野外驻训期间，该旅某营下士查晨首次参加夜间战机出动保障任务，便得到参训飞行员的一致认可。他说，这得益于他在”后方”参与过此类课题的研究，并有针对性地开展模拟训练，现地执行任务时才能得心应手。

A Brigade of The 74th Group Army Explored A New Model of Intensive Training Under Mobile and Dispersed Conditions

Source: China Military Network-People’s Liberation Army Daily Author: Chen Dianhong Xu Haojie Editor: Shang Xiaomin Release: 2025-02-19

A brigade of the 74th Group Army explored a new model of intensive training under mobile and dispersed conditions

One side trained and tackled key problems, and multiple parties worked together to study and fight

Editor’s note: The basic training on-site meeting of the whole army pointed out that it is necessary to deepen the exploration of basic training methods in the new era, promote specialized teaching, intensive training, simulation training, and standardized assessment, and strive to improve the level of teaching and training. A brigade of the 74th Group Army explored a new model of intensive training under mobile and dispersed conditions, one side trained and tackled key problems, and

multiple parties worked together to study and fight, which improved the quality and effectiveness of training.

People's Liberation Army Daily reporter Chen Dianhong and special correspondent Xu Haojie reported: The wind is rising and the war eagle is attacking. In early spring, a brigade of the 74th Group Army launched a cross-day and night flight training under the background of actual combat. Unlike in the past, this training included officers and soldiers who performed flight and support tasks on site, and officers and soldiers scattered in other different task directions who participated in the training in the "rear" by participating in topic planning, problem analysis, and tactics research.

"This is a new change brought about by our exploration of a new model of intensive training under mobile and dispersed conditions." The brigade leader introduced that in recent years, with the increasing number of training tasks of the troops, multi-point deployment and multi-task advancement have become the norm. To this end, they actively explored a new model of intensive training under mobile and dispersed conditions, organized officers and soldiers of various task directions to share training topics based on the command information system, and promoted the formation of a new pattern of multi-party joint research on training topics, research and practice of tactics and tactics, and verification of training quality and effectiveness in accordance with the model of monthly unified topics, weekly unified progress, and daily unified tasks.

One side trains and tackles problems, and multiple parties jointly research and fight. Before this training, the brigade uniformly determined the training topics and split them into different training and tackling tasks, which were assigned to officers and soldiers of various task directions. According to the task arrangement, the officers and soldiers gave full play to their respective advantages, worked together to collect combat data, analyze combat problems, plan combat plans, put forward more than 10 opinions and suggestions on combat details, and formulated multiple plans for possible special situations. The brigade leaders introduced that relying on multi-party joint research and combat, they carried out tactical and combat training for different terrains and weather conditions, further improving the penetration capability of the fighter formation.

Multi-party joint research and combat, the quality and efficiency of training doubled. At the training site, dozens of pilots took off in combat aircraft (helicopters) and carried out night assault training. Faced with low flight visibility and difficulty in judging the "enemy situation", the formation pilots used the tactical methods formed by joint research and combat to quickly search and advance, greatly improving the assault effect. Faced with "enemy" radar detection, the formation commander used the training results formed by joint research and combat during the previous field training to adjust the formation and route in time, flexibly avoid "enemy" detection, and successfully complete the task.

"The procedures, norms, methods and approaches formed by the research of the subject are all valuable training resources. Applying these training resources to actual combat training and transforming them into combat effectiveness increments as much as possible can effectively

improve the cost-effectiveness of training." The brigade leader introduced that at the end of last year, a training detachment of the brigade conducted research on related subjects under field conditions, formed a set of mature dispatching plans, and shared them with other detachments in a timely manner. After completing the original training task, another detachment took the initiative to carry out training on related subjects. The two detachments jointly studied the difficulties in training and worked together to improve the original plan, effectively improving the efficiency of fighter dispatching and the field protection capability of equipment under field conditions.

A group of officers and soldiers participated in the research project, and many groups of officers and soldiers benefited from it. Last summer, the officers and soldiers of a battalion detachment of a battalion of the brigade studied the training difficulties of a certain subject with the officers and soldiers of the training detachment, and formed a set of experience and practices. Subsequently, this group of detachments in the battalion went to unfamiliar areas to participate in training tasks. Faced with similar training problems, they drew on previous experience and norms, quickly came up with a reasonable plan, and continuously enriched and improved it in actual training, making the plan more targeted, operational and effective. During the field training last year, Corporal Cha Chen from a battalion of the brigade participated in the night combat aircraft support mission for the first time and was unanimously recognized by the participating pilots. He said that this was due to his participation in the research of such topics in the "rear" and the targeted simulation training, which enabled him to perform the mission with ease in the field.

火炮技师赵建红：”让我的战位成为放心战位”

来源：中国军网-解放军报 作者：陈 奕 倪 鹏 责任编辑：赵镭饷

2025-02-21

“让我的战位成为放心战位”

■陈 奕 倪 鹏

赵建红正在车内维修。郭坤鹏摄

初春时节，岭南腹地。第 74 集团军某旅一场射击课目示范正在展开。

讲解现场，自动检测仪突然发出异常声响，突发状况让在场官兵不禁为正在讲解的火炮技师赵建红捏了一把汗。然而，赵建红异常平静。调整、校准、测试……只见他全神贯注、精细作业，仔细查看检测仪各部件。一系列操作下，故障被顺利排除，装备重新恢复工作。讲解最后，随着几发模拟炮弹顺利出膛，现场响起一阵热烈的掌声。

今年，是赵建红从事坦克射击专业的第 15 个年头。如今，他拥有多个证书，已经是单位坦克射击专业名副其实的”兵专家”。然而，经历过多次重大任务的赵建红，依然对”兵之初”的一次经历记忆犹新。

那年，赵建红参加某型装备火炮试射。这是他第一次与其他单位的技师同台竞技。作为所有火炮技师中最年轻的一位，赵建红感到压力很大。

实弹射击训练中，赵建红像往常一样在车内操作装备火控系统。装备突发状况，幸亏身旁有一位经验丰富的老班长及时出手，保证了这次射击任务的顺利完成。

这次经历，让赵建红印象极其深刻。从那天起，他像着了迷一般开始钻研专业，忙起来像一个停不下来的陀螺。半年下来，他的专业能力有了很大精进。

“作为一名军人，就要干一行、爱一行、精一行。”赵建红说。这些年，随着装备快速发展，新旧更迭大大增加了火炮的维修难度。要想精通坦克射击专业，保障火炮”打得快、打得好、打得准”，就必须全身心投入其中，容不得半点懈怠。

一次射击训练，指挥部电台突然传来年轻炮长何俊的紧急求助。面对突发故障，赵建红受命前出排除。尽管火炮最终恢复正常，但最佳战机已被延误。这让赵建红产生一种强烈的本领恐慌。他意识到，只有不断”补课充电”，主动应变，维修装备才能得心应手。

为此，赵建红下定决心，针对某故障展开专项攻关。白天，他在车库反复进行实操训练，碰到不懂的问题就抓紧联系工厂师傅，虚心请教、记录要点；晚上，他在会议室强化专业理论，遇到不会的知识就立即查阅有关书籍。经过不懈努力，赵建红成功总结出一整套排除某故障的方案。方案一经推广，大大提高了单位实弹射击优良率。

从穿上军装的那天起，赵建红一直在努力证明自己。他在任务中不断更新丰富火炮操作维修经验，在工作之余广泛阅读专业领域书籍、了解最新专业进展。”只有不断提升自己，才能让我的战位成为放心战位。”赵建红说，瞄准打赢笃定前行，是他 15 年从事坦克射击专业的不竭动力。

Artillery Technician Zhao Jianhong: “Let My Position Become a Safe Position”

Source: China Military Network-People’s Liberation Army Daily Author: Chen Yi Ni Peng Editor: Zhao Leixiang

2025-02-21

“Let my position become a safe position”

■ Chen Yi Ni Peng

Zhao Jianhong is repairing in the car. Photo by Guo Kunpeng

In early spring, in the hinterland of Lingnan. A shooting course demonstration is underway in a brigade of the 74th Group Army.

At the explanation site, the automatic detector suddenly made an abnormal sound, and the sudden situation made the officers and soldiers present sweat for the artillery technician Zhao Jianhong who was explaining. However, Zhao Jianhong was unusually calm. Adjustment, calibration, testing... I saw him concentrating and working meticulously, carefully checking the various components of the detector. After a series of operations, the fault was successfully eliminated and the equipment resumed work. At the end of the explanation, as several simulated shells were successfully fired, a warm applause rang out at the scene.

This year marks the 15th year that Zhao Jianhong has been engaged in the tank shooting profession. Today, he has multiple certificates and is already a veritable “soldier expert” in the unit’s tank shooting profession. However, Zhao Jianhong, who has experienced many major tasks, still remembers an experience in his “first year as a soldier”.

That year, Zhao Jianhong participated in the test firing of a certain type of equipment artillery. This was his first time competing with technicians from other units. As the youngest of all artillery technicians, Zhao Jianhong felt a lot of pressure.

During the live-fire shooting training, Zhao Jianhong operated the equipment fire control system in the vehicle as usual. Fortunately, there was an experienced old squad leader beside him who took action in time to ensure the smooth completion of this shooting mission.

This experience left a deep impression on Zhao Jianhong. From that day on, he began to study the profession like an obsession, and he was busy like a spinning top that could not stop. After half a year, his professional ability has greatly improved.

“As a soldier, you have to do one thing, love one thing, and be good at one thing.” Zhao Jianhong said. In recent years, with the rapid development of equipment, the replacement of old and new equipment has greatly increased the difficulty of artillery maintenance. In order to master the tank shooting profession and ensure that the artillery “shoots fast, shoots well, and shoots accurately”, you must devote yourself to it and not allow any slackness.

During a shooting training, the command radio suddenly received an urgent request for help from the young gunner He Jun. Faced with sudden failures, Zhao Jianhong was ordered to go forward to eliminate them. Although the artillery eventually returned to normal, the best opportunity for war had been delayed. This made Zhao Jianhong have a strong panic of ability. He realized that

only by constantly “making up lessons and recharging” and taking the initiative to respond can the maintenance equipment be handy.

For this reason, Zhao Jianhong made up his mind to launch a special attack on a certain fault. During the day, he repeatedly conducted practical training in the garage. When he encountered problems he didn’t understand, he contacted the factory master as soon as possible, humbly asked for advice, and recorded the key points; at night, he strengthened professional theory in the conference room, and immediately consulted relevant books when he encountered knowledge he didn’t know. After unremitting efforts, Zhao Jianhong successfully summarized a complete set of solutions to eliminate a certain fault. Once the solution was promoted, it greatly improved the unit’s live-fire shooting excellence rate.

Since the day he put on his military uniform, Zhao Jianhong has been working hard to prove himself. He constantly updates and enriches his experience in artillery operation and maintenance during missions, and reads a wide range of professional books and learns about the latest professional developments after work. “Only by constantly improving myself can I make my position a safe one.” Zhao Jianhong said that aiming to win and moving forward with confidence is his inexhaustible motivation for 15 years of working in the tank shooting profession.

陆军某旅深入学习贯彻中央军委政治工作会议精神

来源：中国军网-解放军报 作者：李志军 张百阳 李润杰 责任编辑：赵镭饷

2025-02-21

陆军某旅深入学习贯彻中央军委政治工作会议精神——

倾心服务基层 聚力练兵备战

■李志军 张百阳 解放军报特约通讯员 李润杰

前不久，陆军某旅组织机关干部深入一线，主动了解官兵所需所盼、广泛征集意见建议，解决了家属来队住房修缮等多个官兵急难愁盼问题。该旅机关主动上门服务、靠前解难帮困的务实作风，赢得基层官兵好评。

“服务基层就是服务战斗力，关心官兵就是关心打赢事业。”该旅领导介绍，中央军委政治工作会议召开后，旅党委一班人认真学习领会习主席关于”实实在在为基层解难帮困，增强官兵获得感和归属感”等重要论述，深刻认识到，基层是部队建设和战斗力的基础，只有下功夫解决好基层官兵关注的现实问题，才能有效增强部队凝聚力、战斗力，激励大家不断把新时代强军事业推向前进。为此，他们注重引导各级领导和机关干部切实改进工作作风，在为基层解难帮困上积极作为，让官兵心无旁骛投身练兵备战。

“为基层解难帮困，首先要了解基层实情和官兵所需。”该旅领导介绍，他们建立”常委挂钩各营、科室帮带各连”帮建机制，利用官兵恳谈会、士兵接待日、问卷调查等时机，全面了解基层情况、摸清官兵急难愁盼，梳理形成解难清单。在此基础上，该旅组织领导和机关干部深入基层一线，与官兵面对面交流，广泛收集意见建议，逐项制订解难措施，明确责任分工和完成时限，确保解难清单如期清零。他们还要求机关定期组织解难情况”回头看”，梳理相关经验、完善相关制度，切实提升服务基层质效。

一次家属委员会会议上，部分随军家属提出”寒暑假期间孩子没有人照看”。该旅机关相关科室得知这一情况后，经过充分调研论证，通过组织假期托管班等，较好解决了官兵家庭的实际困难。此外，他们积极协调地方有关部门，帮助解决官兵子女入学入托、随军家属就业安置等难题，全力解除官兵后顾之忧，激发了大家的练兵热情。

“解难帮困成效如何，基层官兵最有发言权。”该旅机关一名干部介绍，此前一次机关基层双向讲评会上，有基层官兵反映，之前到机关办理结婚审批手续，由于相关工作人员出差等原因，跑了多次才办下来。为此，该旅党委要求相关业务部门立行立改，优化完善办事流程。与此同时，该旅举一反三、检视整改，系统梳理基层官兵需经常办理的业务，制订相关事项表、流程图，并明确责任人，方便官兵熟悉办事流程，让大家少跑腿、少牵扯精力。

倾心服务基层，聚力练兵备战。连日来，随着学习贯彻中央军委政治工作会议精神不断深入，该旅引导各级领导和机关干部持续提高服务基层水平，官兵干事创业的氛围更加浓厚，圆满完成各项任务。

A Certain Army Brigade Thoroughly Studied and Implemented the Spirit of the Central Military Commission’s Political Work Conference

Source: China Military Network-People’s Liberation Army Daily Author: Li Zhijun Zhang Baiyang Li Runjie Editor: Zhao Leixiang

2025-02-21

A certain army brigade thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference——

Devoted to serving the grassroots and focusing on training and preparation

■Li Zhijun Zhang Baiyang People’s Liberation Army Daily Special Correspondent Li Runjie

Not long ago, a certain army brigade organized its cadres to go deep into the front line, actively understand the needs and expectations of officers and soldiers, and widely solicit opinions and suggestions, solving many urgent and difficult problems for officers and soldiers such as the repair

of housing for family members. The pragmatic style of the brigade's organs to take the initiative to provide door-to-door services and solve problems in front of difficulties has won praise from grassroots officers and soldiers.

"Serving the grassroots is serving combat effectiveness, and caring about officers and soldiers is caring about winning the war." The brigade leader introduced that after the Central Military Commission's political work conference was held, the brigade party committee carefully studied and understood President Xi's important statements on "really solving problems and helping the grassroots, and enhancing the sense of gain and belonging of officers and soldiers", and deeply realized that the grassroots is the foundation of the army's construction and combat effectiveness. Only by working hard to solve the practical problems that the grassroots officers and soldiers are concerned about can we effectively enhance the cohesion and combat effectiveness of the troops and encourage everyone to continuously push forward the cause of strengthening the army in the new era. To this end, they focus on guiding leaders and cadres at all levels to effectively improve their work style, take positive actions to solve problems and help the grassroots, and let officers and soldiers devote themselves to training and preparation for war without distraction.

"To solve problems and help the grassroots, we must first understand the actual situation at the grassroots and the needs of officers and soldiers." The brigade leader introduced that they have established a mechanism of "Standing Committee members linked to each battalion, and departments helping each company", and use opportunities such as officers and soldiers' talks, soldier reception days, and questionnaires to fully understand the grassroots situation, find out the urgent needs of officers and soldiers, and sort out a list of solutions. On this basis, the brigade organized leaders and cadres to go deep into the grassroots, communicate with officers and soldiers face to face, collect opinions and suggestions extensively, formulate problem-solving measures item by item, clarify the division of responsibilities and completion time limit, and ensure that the problem-solving list is cleared as scheduled. They also asked the agency to regularly organize a "look back" on the problem-solving situation, sort out relevant experiences, improve relevant systems, and effectively improve the quality and efficiency of grassroots services.

At a family committee meeting, some military dependents said that "there was no one to take care of the children during the winter and summer vacations." After the relevant departments of the brigade learned of this situation, after sufficient research and demonstration, they organized holiday care classes to better solve the practical difficulties of the officers and soldiers' families. In addition, they actively coordinated with local relevant departments to help solve the problems of schooling and childcare for the children of officers and soldiers, employment and resettlement of military dependents, and made every effort to relieve the worries of officers and soldiers, and stimulated everyone's enthusiasm for training.

"Grassroots officers and soldiers have the most say in the effectiveness of problem-solving and helping the poor." A cadre of the brigade introduced that at a previous grassroots two-way review meeting of the agency, some grassroots officers and soldiers reported that they had gone to the

agency to handle the marriage approval procedures before, but because the relevant staff were on business trips, they had to go many times before they could get it done. To this end, the brigade's Party Committee requires relevant business departments to make immediate changes and optimize and improve the service process. At the same time, the brigade draws lessons from one case, examines and rectifies, systematically sorts out the business that grassroots officers and soldiers need to handle frequently, formulates relevant matters tables and flow charts, and clarifies the responsible persons, so that officers and soldiers can be familiar with the service process, so that everyone can run less errands and spend less energy.

Dedicated to serving the grassroots and focusing on training and preparation. In recent days, with the deepening of learning and implementing the spirit of the Central Military Commission's political work conference, the brigade has guided leaders and cadres at all levels to continuously improve their service to the grassroots, and the atmosphere of officers and soldiers doing things and starting businesses has become stronger, and all tasks have been successfully completed.

陆军某旅家属委员会用暖心服务搭起部队与家属之间的“连心桥”

来源：中国军网-解放军报 作者：王士帅 方 结 责任编辑：乌铭琪

2025-02-24

陆军某旅充分发挥家属委员会作用——

暖心服务搭起”连心桥”

■王士帅 方 结

“这几天正赶上我执行战备任务，多亏家属委员会的帮助，让我没了后顾之忧，可以安心投入工作……”近日，陆军某旅机关干部杜泽胜专门给家属委员会发去短信，感谢他们提供的各项服务。

“以实际行动为已婚军人家庭办实事，使他们可以安心投入工作，是我们不断创新和完善家属保障工作机制的目的。”该旅领导介绍，今年以来，全旅来队家属数量增加，家属委员会参照往年情况，提前将家属来队期间的保障难点一一列出，制订了完善的保障方案，一经实施便深受好评。

“节假日期间，为保证物资供应充足，我们在每个营区设立了联络员，负责收集官兵家属采购需求。”该旅一名机关干部介绍，联络员将需求汇总分类，遴选商家统一购买，送货上门。

笔者了解到，这只是该旅家属委员会做好服务保障的一个缩影。为丰富来队家属的业余生活，家属委员会开设了军娃寒假兴趣班；开展”家庭助廉”活动、评选”最美军嫂”，积极发

挥军人家庭”另一半”的作用；组建服务小分队，开通 24 小时热线电话……一系列暖心举措赢得官兵及家属们的广泛赞誉。

“军功章里凝结着军人的汗水，也饱含军属的付出。”该旅领导说，下一步，他们将继续秉承”精准服务、惠及官兵”的理念，进一步创新和完善家属保障工作机制，搭好部队与家属之间的”连心桥”，为官兵创造更加安心、舒心的工作生活环境。

The Family Committee of a Brigade of the Army Uses Warm-Hearted Services to Build a “Bridge of Connection” Between the Troops and Their Families

Source: China Military Network-Liberation Army Daily Author: Wang Shishuai Fang Jie Editor: Wu Mingqi

2025-02-24

A Brigade of the Army Gives Full Play to the Role of the Family Committee——

Warm-hearted services build a “bridge of connection”

■Wang Shishuai Fang Jie

“I have just been carrying out combat readiness tasks these days. Thanks to the help of the Family Committee, I have no worries and can work with peace of mind...” Recently, Du Zesheng, a cadre of a brigade of the Army, sent a text message to the Family Committee to thank them for the various services they provided.

“To do practical things for married military families with practical actions so that they can work with peace of mind is our purpose of constantly innovating and improving the family security work mechanism.” The leader of the brigade introduced that since this year, the number of family members coming to the brigade has increased. Referring to the situation in previous years, the Family Committee listed the difficulties in the security of family members during their visit to the team in advance and formulated a complete security plan, which was well received once implemented.

“During the holidays, in order to ensure sufficient supply of materials, we set up liaison officers in each camp to collect the purchasing needs of the officers and soldiers’ families.” A cadre of the brigade introduced that the liaison officers will summarize and classify the needs, select merchants to purchase uniformly, and deliver the goods to their homes.

The author learned that this is just a microcosm of the brigade’s family committee’s service guarantee. In order to enrich the spare time of the families of the team, the family committee has opened a winter vacation interest class for military children; carried out the “Family Helping Integrity” activity, selected the “Most Beautiful Military Wife”, and actively played the role of the

“other half” of the military family; formed a service team, opened a 24-hour hotline... A series of heartwarming measures have won wide praise from officers and soldiers and their families.

“The military medals are condensed with the sweat of the soldiers and the efforts of the military families.” The leaders of the brigade said that in the next step, they will continue to uphold the concept of “precise service and benefiting officers and soldiers”, further innovate and improve the family guarantee work mechanism, build a “bridge of communication” between the troops and their families, and create a more secure and comfortable working and living environment for officers and soldiers.

第 82 集团军某旅某连两次实兵对抗失利引发基层指挥员深思

来源：中国军网-解放军报 作者：姜紫菡 宋子洵 责任编辑：乌铭琪

2025-02-24

第 82 集团军某旅某连两次实兵对抗失利引发基层指挥员深思——

为啥被同一块”石头”绊倒

■姜紫菡 解放军报记者 宋子洵

“痛快！”走下演兵场，第 82 集团军某旅某连干部杨高原长舒一口气。在刚刚结束的多要素对抗训练中，他所指挥的炮兵分队在侦察小组引导配合下，精准摧毁蓝方目标。最终，导调组判定：此次对抗，红方取得胜利。

这是杨高原所在连队两次遇挫后，打的一场”翻身仗”。

此前，该连先后参加两场类似的训练，均以失利告终。如今终获一胜，杨高原不由感慨：”作为基层指挥员，一定要强化体系思维，才能把握制胜机理。”

顺着他的话头，记者得以了解两场失利的来龙去脉。

那是一次分队协同行动。训练场上，该旅兵分多路与”敌”展开对抗。战斗前沿，一辆步战车急速迂回突进，本想出其不意杀伤”敌”有生力量，却不小心闯入对方火力包围圈。

“发现’敌’多个单兵掩体，请求火力压制！”情急之下，车长陈福鹏急忙呼叫炮火支援。

在后方炮兵阵地待命的，正是杨高原所在连队官兵。不一会儿，炮弹呼啸而出，直击目标，成功掩护步战车脱离险境。

“首发即命中，还帮友军解了围，这次肯定要被表扬。”战斗还未结束，杨高原内心暗喜。

然而，复盘总结中，等待他的不是表扬，而是红方失利的消息，营长当众提出质疑：”接到炮火支援请求后，为什么不第一时间向上级报告？在了解整体作战计划的情况下，为什么擅自开火？”

一连串的发问，让杨高原意识到，炮兵分队的既定任务是配合步兵分队，对蓝方指挥所实施打击。贸然开火暴露了红方炮阵地位置，蓝方借机重新调整兵力部署，自己此举可以说是”捡了芝麻丢了西瓜”。

“出现这样的失误，说到底还是战场思维没有树牢。”事后，营长组织全营指挥员开展复盘反思，引导大家明白，未来战争是体系间的对抗，战场复杂多变，往往牵一发而动全身。在平时训练中，必须强化体系思维，决不能因某一环节考虑不周而影响全局。

下一场战斗如期而至。吸取了上次教训，杨高原根据任务阶段目标，严格执行火力计划。

正当大家按照预案进行时，导调组临时增加特情：蓝方突然后撤。

眼见炮兵大显身手的机会来了，但上一次的教训让杨高原一时难下决心。犹豫间，蓝方突击车不见了踪影。无奈之下，红方组织步兵迅速追击，结果遭”敌”火力压制，产生较大”伤亡”。导调组判定：红方告负。

“我们全程严格按作战预案行动，没有自作主张出击，为啥还是输了？”一些官兵感到不解。

紧急支援，擅自行动不可取；依案行动，未能灵活处置也不行。身为基层指挥员，到底该咋办？

冷静思考后，杨高原懊恼地拍了拍脑袋：战场形势瞬息万变，咋能完全按照预案来？体系思维不是一成不变的，不能墨守成规，从一个极端滑向另一个极端。

“两次实兵对抗失利，都是被同一块’石头’绊倒！”情况很快引起基层一众指挥员深思，也引起旅党委一班人的关注。

议战议训会上，他们结合学习贯彻全军合成训练现场会精神，针对这两次失利情形，对基层指挥员一线自主协同进行了规范。同时，以作战任务为牵引，梳理出多个典型作战场景，帮助基层指挥员在实战实训中进行科学决策、合理排兵布阵、开展密切配合。

此外，该旅还打出一套”组合拳”：定期举办”军事沙龙”，邀请全军优秀指挥员前来授课辅导；依托联演联训等大项任务，广泛开展交叉互学、岗位互换和专攻精练；把探索多型作战单元合成效能”更优解”作为新装备训练考核评定”硬杠杠”，提升官兵协同作战能力；采取送学培训、传帮带考等方式，建强懂指挥、善协同的班长骨干队伍。

一段时间过后，该旅官兵尤其是基层指挥员的体系素养有了明显提升。正是基于这样的收获，才有了文章开头的一幕。

“强化体系思维，不可能一蹴而就，但也等不得、慢不得。”该旅领导介绍，下一阶段，他们打算利用野外驻训时机，与其他军兵种单位开展联训，研究新的战法训法。

记者手记

由”榫卯结构”说协同

■宋子洵

采写这篇稿件时，记者不由得想到建筑学中的”榫卯结构”。别看只是凹凸卡口结合，无需一个钉子，却能支撑起一座高大建筑。

未来战争是诸军兵种一体化联合作战。如何让各兵种甚至军种攥指成拳、形成合力？或许可以从榫卯结构中得到启发。

众所周知，榫卯结构之所以牢固，关键就在于各个部件的严丝合缝、环环相扣。这告诉我们，无论专业之间、兵种之间，还是军种之间，在提升基于网络信息体系的联合作战能力过程中，都要打破建制壁垒，加强一体融合，实现”你中有我、我中有你”，共同构筑起坚不可摧的战斗力链条。

上文提到的案例，虽然说的是一个旅级单位内部的协同实践，其对存在问题的解决，却是实现合成、走向联合的前提。特别是引导基层指挥员强化打仗观念、体系思维，可谓抓到了关键。只有从”指挥端”打牢联合基础、练强体系能力，才能推动所属部队融入联战联训”大棋盘”，使自己成为战斗力链条坚强有力的那一环。

榫卯结构，各司其职、各尽其能。每一支部队、每一名官兵都要找准自己的方位，为建设联合作战能力”大厦”添砖加瓦。

The Failure of Two Live-Fire Confrontations in a Certain Company of a Certain Brigade of the 82nd Group Army Has Caused Grassroots Commanders to Think Deeply

Source: China Military Network-People’s Liberation Army Daily Author: Jiang Zihan Song Zixun Editor: Wu Mingqi

2025-02-24

The failure of two live-fire confrontations in a certain company of a certain brigade of the 82nd Group Army has caused grassroots commanders to think deeply——

Why was tripped by the same “stone”

■ Jiang Zihan People’s Liberation Army Daily reporter Song Zixun

“It’s great!” Walking down the military training ground, Yang Gaoyuan, a cadre of a certain company of a certain brigade of the 82nd Group Army, breathed a sigh of relief. In the multi-element confrontation training that just ended, the artillery unit he commanded, under the guidance and cooperation of the reconnaissance team, accurately destroyed the blue side’s targets. In the end, the guidance and coordination group determined that the red side won this confrontation.

This is a “turnaround battle” fought by Yang Gaoyuan’s company after two setbacks.

Previously, the company participated in two similar trainings, both of which ended in failure. Now that he has finally won a victory, Yang Gaoyuan couldn’t help but sigh: “As a grassroots commander, we must strengthen system thinking in order to grasp the winning mechanism.”

Following his words, the reporter was able to understand the ins and outs of the two defeats.

It was a coordinated action of the squad. On the training ground, the brigade’s soldiers fought against the “enemy” in multiple ways. At the forefront of the battle, an infantry fighting vehicle quickly made a detour and rushed forward, intending to kill the “enemy”‘s living forces unexpectedly, but accidentally broke into the enemy’s fire encirclement.

“We found multiple single-soldier bunkers of the ‘enemy’, requesting fire suppression!” In a hurry, the vehicle commander Chen Fupeng hurriedly called for artillery support.

On standby at the rear artillery position were the officers and soldiers of Yang Gaoyuan’s company. After a while, the shells whizzed out and hit the target directly, successfully covering the infantry fighting vehicle out of danger.

“The first shot hit the target and helped the friendly forces to get out of the siege. This time I will definitely be praised.” The battle was not over yet, and Yang Gaoyuan was secretly happy.

However, in the review and summary, what awaited him was not praise, but the news of the Red Army’s defeat. The battalion commander questioned in public: “Why didn’t you report to your superiors immediately after receiving the request for artillery support? Why did you open fire without authorization when you knew the overall combat plan?”

A series of questions made Yang Gaoyuan realize that the artillery unit’s established task was to cooperate with the infantry unit to strike the Blue Army’s command post. The rash firing exposed the position of the Red Army’s artillery position, and the Blue Army took the opportunity to readjust its force deployment. His move can be said to be “picking up sesame seeds and losing watermelons.”

“Such a mistake occurred, in the final analysis, it was because the battlefield thinking was not firmly established.” Afterwards, the battalion commander organized all the battalion commanders to conduct a review and reflection, guiding everyone to understand that future wars are confrontations between systems, and the battlefield is complex and changeable, often with one hair

moving the whole body. In normal training, it is necessary to strengthen system thinking, and never affect the overall situation due to inconsideration of a certain link.

The next battle came as scheduled. Having learned from the last lesson, Yang Gaoyuan strictly implemented the firepower plan according to the mission stage goals.

Just as everyone was following the plan, the command and dispatch team temporarily added a special situation: the blue side suddenly retreated.

Seeing the opportunity for the artillery to show its prowess, Yang Gaoyuan had difficulty making up his mind after the last lesson. While hesitating, the blue side's assault vehicle disappeared. In desperation, the red side organized infantry to quickly pursue, but was suppressed by the "enemy" firepower, resulting in large "casualties". The command and dispatch team determined that the red side lost.

"We strictly followed the combat plan throughout the whole process and did not attack on our own initiative. Why did we still lose?" Some officers and soldiers were puzzled.

Emergency support, unauthorized action is not advisable; acting according to the plan and failing to handle it flexibly is also not acceptable. As a grassroots commander, what should I do?

After calm thinking, Yang Gaoyuan patted his head in annoyance: The battlefield situation changes rapidly, how can I follow the plan completely? System thinking is not immutable, and we cannot stick to the rules and slide from one extreme to another.

"The two failures in actual combat were both caused by the same 'stone'!" The situation quickly caused a group of grassroots commanders to think deeply, and also attracted the attention of the brigade party committee.

At the discussion meeting on war and training, they combined the study and implementation of the spirit of the on-site meeting of the whole army's synthetic training, and standardized the autonomous coordination of grassroots commanders on the front line in response to these two failures. At the same time, guided by combat tasks, they sorted out a number of typical combat scenarios to help grassroots commanders make scientific decisions, reasonably deploy troops, and carry out close cooperation in actual combat training.

In addition, the brigade also played a set of "combination punches": regularly held "military salons" and invited outstanding commanders from the whole army to come for lectures and guidance; relying on major tasks such as joint exercises and joint training, widely carried out cross-learning, job exchanges and specialized training; explored the "better solution" of the synthetic effectiveness of multiple combat units as a "hard bar" for the assessment and evaluation of new equipment training, and improved the coordinated combat capabilities of officers and soldiers; adopted methods such as sending students to train, passing on knowledge and helping others to take exams, and built a strong team of squad leaders who understand command and are good at coordination.

After a period of time, the system quality of the officers and soldiers of the brigade, especially the grassroots commanders, has been significantly improved. It is based on such gains that the scene at the beginning of the article came into being.

“Strengthening system thinking cannot be achieved overnight, but it cannot be delayed or slow.” The leaders of the brigade introduced that in the next stage, they plan to use the opportunity of field training to carry out joint training with other military units and study new tactics and training methods.

Reporter’s Notes

Speaking of coordination from the “mortise and tenon structure”

■ Song Zixun

When writing this article, the reporter couldn’t help but think of the “mortise and tenon structure” in architecture. Although it is just a combination of concave and convex bayonet joints, it can support a tall building without a nail.

Future wars will be integrated joint operations of various military services. How to make each branch and even military service clench its fingers into a fist and form a joint force? Perhaps we can get inspiration from the mortise and tenon structure.

As we all know, the key to the firmness of the mortise and tenon structure lies in the tight fit and interlocking of each component. This tells us that whether between professions, arms, or services, in the process of improving the joint combat capability based on the network information system, we must break down the barriers of the system, strengthen integration, and achieve “you have me, I have you”, and jointly build an indestructible chain of combat effectiveness.

Although the case mentioned above is about the collaborative practice within a brigade-level unit, its solution to the existing problems is the prerequisite for achieving synthesis and moving towards jointness. In particular, guiding grassroots commanders to strengthen the concept of fighting and system thinking can be said to have grasped the key. Only by laying a solid foundation for joint operations and strengthening system capabilities from the “command end” can we promote the integration of the affiliated troops into the “big chessboard” of joint combat and training, and make ourselves the strong and powerful link in the chain of combat effectiveness.

Mortise and tenon structure, each performs its duties and does its best. Every unit and every officer and soldier must find their own position and contribute to the construction of the “building” of joint combat capabilities.

第 78 集团军某旅深入学习贯彻党的二十届三中全会精神

来源：中国军网-解放军报 作者：杨贵良 严 珊 责任编辑：赵镭饷

2025-02-25

第 78 集团军某旅深入学习贯彻党的二十届三中全会精神——

战位践学，集智攻关强本领

■杨贵良 解放军报记者 严 珊

2 月下旬，第 78 集团军某旅训练场上，一场实战化训练正在进行。营连主官带领官兵围绕重难点课目集智攻关，破解多个训练难题，圆满完成训练任务。

“党的二十届三中全会对持续深化国防和军队改革作出全面部署，我们要强化使命担当，坚持向深化改革要创造力、凝聚力、战斗力。”该旅领导介绍，党的二十届三中全会召开后，他们把学习全会精神与工作实际相结合，着力解决练兵备战中的短板弱项，全面提高备战打仗本领。他们不断完善机关科室与基层营连挂钩帮建机制，负责帮建的机关干部聚焦制约战斗力提升的难点堵点问题，帮助基层理清抓建思路、梳理训练难题、制订措施办法，进一步提升单位全面建设水平，不断把学习贯彻全会精神引向深入。

采访中记者了解到，为了提高帮建基层的针对性和实效性，该旅系统梳理各单位建设实际，结合工作经验、特点优势等，为基层单位精准选派帮建机关干部。帮建过程中，他们从训练、教育、管理、后勤保障等方面入手，建立帮带档案、问题台账，细致梳理制约战斗力提升的短板弱项；针对一些复杂棘手的重难点问题，机关科室与基层营连集智攻关，研究制订解决办法，有效提升基层单位建设质效。

“在机关干部的帮带下，我们破解了训练中存在的多个难题。”该旅某连连长告诉记者，前不久，该旅作训科张科长到连队挂钩帮建时发现，对运动目标射击的组训质效不高。针对这一问题，张科长主动带领连队展开集智攻关，组织专业教练员和训练骨干研究讨论，制订”分层选拔人员，充实教练员队伍”“优化教学编组，改进组训方式”等措施，有效提升了该连对运动目标射击的训练水平。

战位践学，集智攻关强本领。连日来，随着学习贯彻全会精神不断深入，该旅官兵训练热情高涨，多项战法训法得到检验。

A Brigade of the 78th Group Army Thoroughly Studied and Implemented the Spirit of the Third Plenary Session of the 20th CPC Central Committee

Source: China Military Network-People’s Liberation Army Daily Author: Yang Guiliang Yan Shan Editor: Zhao Leixiang

2025-02-25 06:26:13 0

A brigade of the 78th Group Army thoroughly studied and implemented the spirit of the Third Plenary Session of the 20th CPC Central Committee——

Practice at the battle position, gather wisdom to solve problems and strengthen skills

■ Yang Guiliang People's Liberation Army Daily reporter Yan Shan

In late February, a practical training was underway on the training ground of a brigade of the 78th Group Army. The battalion and company commanders led the officers and soldiers to gather wisdom to solve problems around the key and difficult subjects, solve multiple training problems, and successfully complete the training tasks.

"The Third Plenary Session of the 20th CPC Central Committee has made comprehensive arrangements for the continuous deepening of national defense and military reforms. We must strengthen our mission and insist on deepening reforms to gain creativity, cohesion and combat effectiveness." The brigade leaders introduced that after the Third Plenary Session of the 20th CPC Central Committee, they combined the study of the spirit of the plenary session with the actual work, focused on solving the shortcomings and weaknesses in training and preparation, and comprehensively improved their ability to prepare for war. They continuously improved the mechanism of linking the department and the grassroots battalion and company to help build. The cadres responsible for helping build focused on the difficult and blocked issues that restricted the improvement of combat effectiveness, helped the grassroots to clarify the ideas of building, sort out the training problems, and formulate measures to further improve the overall construction level of the unit, and continuously deepen the study and implementation of the spirit of the plenary session.

During the interview, the reporter learned that in order to improve the pertinence and effectiveness of helping build the grassroots, the brigade systematically sorted out the actual construction of each unit, combined with work experience, characteristics and advantages, and accurately selected cadres to help build the grassroots units. During the construction process, they started from training, education, management, logistics support and other aspects, established assistance files and problem records, and carefully sorted out the shortcomings that restricted the improvement of combat effectiveness; for some complex and difficult problems, the department and the grassroots battalion and company worked together to solve the problems, researched and formulated solutions, and effectively improved the quality and efficiency of grassroots unit construction.

"With the help of the cadres of the department, we solved many problems in training." The company commander of a company of the brigade told reporters that not long ago, when Section Chief Zhang of the brigade's training department came to the company to help build, he found that the quality and efficiency of the training for shooting at moving targets was not high. In response to this problem, Section Chief Zhang took the initiative to lead the company to carry out collective wisdom research, organized professional instructors and training backbones to study and discuss, and formulated measures such as "selecting personnel in layers, enriching the instructor team",

“optimizing teaching grouping, and improving training methods”, which effectively improved the company’s training level for shooting at moving targets.

Practice learning at the battle position, and strengthen skills through collective wisdom research. In recent days, as the study and implementation of the spirit of the plenary session has continued to deepen, the training enthusiasm of the brigade’s officers and soldiers has been high, and a number of combat strategies and training methods have been tested.

新疆军区某综合训练基地发挥骨干作用带兵育人

来源：中国军网-解放军报 作者：丁 雷 秦朝阳 责任编辑：尚晓敏 发布：2025-02-25

新疆军区某综合训练基地发挥骨干作用带兵育人——

学兵与班长共享荣光

■丁 雷 秦朝阳

前不久，新疆军区某综合训练基地举行群众性岗位练兵比武竞赛颁奖典礼。与以往不同的是，领奖台上，除了在各专业比武中取得名次的学兵外，还有他们各自的班长。聚光灯下，学兵脖子上挂着奖牌，班长手捧证书，笑意挂在所有人的脸上。

走下领奖台，夺得”挖掘机综合应用”课目金牌的学兵马勇康激动地告诉笔者：”这块金灿灿的奖牌背后，有班长胡金奎一半的功劳！”说着，他讲起胡班长带领自己备赛的经历。

此前，马勇康训练成绩并不突出，接到比武通知后，他皱起了眉头：这次比武不仅比专业技能，还要克服严寒环境，在陌生地域驾驶装备完成多个极具挑战性的任务。

“班长，我看还是算了吧！”想到自己比武经验不足，马勇康打起了退堂鼓。

“不能一遇到困难就想着退缩逃避，敢于挑战自我、战胜自我才能收获成长。”为了帮助马勇康坚定信心，胡金奎经常带着他在训练场加练，针对薄弱环节逐个攻克，并分享自己的参赛经历，为他加油打气。

渐渐地，马勇康的训练成绩不断提升，最终在比武中取得第一名。”班长，谢谢你的帮助和鼓励。”领奖时，马勇康给了胡金奎一个大大的拥抱。

“像胡金奎帮带马勇康夺冠这样的例子，在我们基地还有很多。”看着领奖台上学兵与班长共享荣光的场景，该基地领导细数学兵和班长之间的故事。

炮兵专业学兵胡睿备战”某加榴炮综合作业”比武时，每天扛着近百斤重的教练弹训练。班长秦超看在眼里疼在心上，每晚熄灯后一边帮胡睿在肿痛处涂抹红花油，一边为他复盘训练情况，分析查找不足。比武那天，胡睿一举超越对手，取得金牌。

工兵专业学兵王志春备战”装载机精准越障”比武时，班长粟乃伟始终坐在驾驶室，不厌其烦为他传授越障技巧，提醒注意事项：”控制斗齿角度”“调整好心态”“注意铲斗角度”……在班长的帮助下，王志春的技能越来越娴熟，最终在比武中夺得第一名。

……

“学兵的成长，离不开班长的悉心帮带。邀请他们与学兵共同登台领奖，既是对他们带兵能力的认可，也是对他们辛勤付出的肯定。”该基地领导说，下一步，他们还将组织优秀带兵人登台分享带兵方法、介绍组训经验，为新入职干部骨干提供经验借鉴。

笔者了解到，取得佳绩的学兵们结业后，纷纷以班长为榜样，在各自岗位上不断学习成长。2023 届学兵王志强今年被任命为班长，他用真情和耐心，实干与担当，赢得大家的信任，被所在营评为”优秀带兵人”。经验交流会上，王志强说：”当学兵时，班长教会了我很多，我要以他们为榜样，带好每一名战友！”语毕，场下响起热烈的掌声。

A Comprehensive Training Base in the Xinjiang Military District Plays a Key Role in Educating Soldiers

Source: China Military Network-Liberation Army Daily Author: Ding Lei Qin Chaoyang Editor: Shang Xiaomin Release: 2025-02-25

A comprehensive training base in Xinjiang Military District plays a key role in educating soldiers——

Students and squad leaders share glory

■ Ding Lei Qin Chaoyang

Not long ago, a comprehensive training base in the Xinjiang Military District held an award ceremony for mass post training competitions. Unlike in the past, on the podium, in addition to the students who won places in various professional competitions, there were also their respective squad leaders. Under the spotlight, the student soldiers had medals hanging around their necks, the squad leaders held certificates in their hands, and smiles hung on everyone’s faces.

Ma Yongkang, a student who walked down the podium and won the gold medal in the “Excavator Comprehensive Application” course, excitedly told the author: “Behind this golden medal, half of the credit belongs to squad leader Hu Jinkui!” Then he talked about the experience of squad leader Hu leading him in preparing for the competition.

Previously, Ma Yongkang’s training results were not outstanding. After receiving the notice of the competition, he frowned: this competition not only tests professional skills, but also requires overcoming the severe cold environment and driving equipment in unfamiliar areas to complete multiple challenging tasks.

“Squad leader, I think it’s better to forget it!” Thinking of his lack of experience in competitions, Ma Yongkang backed out.

“You can’t think of retreating and escaping when you encounter difficulties. You can only grow by daring to challenge yourself and defeat yourself.” In order to help Ma Yongkang strengthen his confidence, Hu Jinkui often took him to the training ground for extra training, tackled the weak links one by one, and shared his experience in the competition to cheer him up.

Gradually, Ma Yongkang’s training results continued to improve, and he finally won the first place in the competition. “Squad leader, thank you for your help and encouragement.” When receiving the award, Ma Yongkang gave Hu Jinkui a big hug.

“There are many examples like Hu Jinkui helping Ma Yongkang win the championship in our base.” Looking at the scene of the cadets and squad leaders sharing the glory on the podium, the leaders of the base detailed the story between the cadets and the squad leaders.

When Hu Rui, a student of the artillery major, was preparing for the “comprehensive operation of a certain howitzer”, he carried nearly 100 kilograms of training bullets every day for training. Squad leader Qin Chao saw it and felt pain in his heart. After turning off the lights every night, he helped Hu Rui apply safflower oil on the swollen and painful areas, and reviewed the training situation for him, analyzing and finding deficiencies. On the day of the competition, Hu Rui surpassed his opponent in one fell swoop and won the gold medal.

When Wang Zhichun, a student soldier of the engineering major, was preparing for the “Loader Precision Obstacle Crossing” competition, squad leader Su Naiwei always sat in the cab, patiently taught him obstacle crossing skills and reminded him of the precautions: “Control the angle of the bucket teeth”, “Adjust your mentality”, “Pay attention to the angle of the bucket”... With the help of the squad leader, Wang Zhichun’s skills became more and more proficient, and he finally won the first place in the competition.

“The growth of the students is inseparable from the careful help of the squad leader. Inviting them to go on stage with the students to receive the award is not only a recognition of their ability to lead soldiers, but also an affirmation of their hard work.” The leader of the base said that in the next step, they will also organize outstanding leaders to go on stage to share their methods of leading soldiers and introduce their training experience, so as to provide experience reference for new cadres and backbones.

The author learned that after graduation, the students who achieved good results took the squad leader as an example and continued to learn and grow in their respective positions. Wang Zhiqiang, a student soldier of the 2023 class, was appointed as the squad leader this year. He won everyone’s trust with his sincerity and patience, hard work and responsibility, and was named an “excellent leader” by his battalion. At the experience exchange meeting, Wang Zhiqiang said: “When I was a student, the squad leaders taught me a lot. I will take them as examples and lead every comrade-in-arms well!” After he finished speaking, warm applause broke out from the audience.

将心比心、放低姿态，带兵人要注重用心用情与战士互动交流

来源：中国军网-解放军报 作者：王玺 于瀚翔 责任编辑：尚晓敏 发布：2025-02-25

用心回复 用情带兵

■陆军某旅某连　王　玺

那天，在外培训的排长吕航打来电话，向我倾诉：”感觉最近排里战士有些奇怪，联系他们时，总是聊不了几句就结束了……”

“是不是对他们不够关心？”没想到我这样一问，吕航更加委屈。

吕航是去年入伍的一名直招军官。作为一名新排长，他对基层情况还没有完全熟悉。得知吕航所在培训队休息时间与连队基本一致，我时常提醒他在业余时间多与排里战士交流，及时掌握排里情况。

“平时对他们也挺关心的，每名战士我每周至少联系一次。”说罢，吕航将手机里的聊天截图发给了我。

仔细浏览后，我找到问题症结：对于战士们的日常分享与汇报，吕航大多使用”收到”“好的”之类的词予以回复，没有与他们进行互动交流。久而久之，战士们总感觉排长”高高在上”、不好接触，每次和他交流都是”剃头挑子一头热”。

“战士主动汇报思想，你要积极回应和鼓励，如果草草回复，他们就不愿再向你吐露心声。”电话里，我郑重提醒吕航。

其实，吕航遇到的问题，我也曾经历过。

去年，旅里举办军体运动会。本以为大家会踊跃报名，没想到，连里一些战士你推我让，找各种理由推脱。为此，我在点名时批评了这种缺乏集体荣誉感的行为。

几天后，营里收集基层意见建议时，有人提出了”指导员不关心战士”之类的意见。

正当我感到困惑不解时，一名战士道出了大家的真实感受：”指导员，上次比武时你在休假，大家获得名次后满怀期待地打电话向你汇报喜讯，希望得到你的表扬，可你只是简单回了句’同志们辛苦了，快去休息吧’就挂断了电话，大家瞬间就泄了气。这次军体运动会，你非但没有调动大家积极性，给予鼓励和肯定，反而上来就是一顿批评，我们心里难免感觉不是滋味。”直言不讳的一番话，让我恍然大悟。

在战士们看来，带兵人的每一句回复都很重要，无论是肯定与认可，关注与期许，还是提醒与勉励，皆能对他们的成长进步起到促进作用。别小看这个举动，回复长或短，用心还是敷衍，效果大不同。

善治者必达情，达情者必近人。从那以后，我十分注重与战士之间的互动交流，不仅在线上及时答复，线下也会用心沟通。这样的改变让战士们对我渐渐恢复了信任。

听了我的经历，吕航感触颇深。他当即表态，将心比心与战士们进行思想交流和感情沟通，放低姿态、用心用情赢得战士们真心相待。

下士刘伯良完成集训任务归队，吕航第一时间了解他的学习情况，鼓励他将所学所获运用到日常工作训练中；二级上士吕皓参加专项任务时感到压力很大，吕航一边为他出谋划策，一边引导他将压力转化为动力……一个个用心回复，一句句温暖话语，拉近了吕航与战士们的距离。

不久后，吕航再次打来电话，话语中充满了喜悦：”多亏您的指点，现在排里的战士和我联系，经常有说不完的话。”

Put Yourself in Their Shoes, Lower Your Posture, and Leaders Should Focus on Interacting and Communicating with Soldiers with Heart and Emotion

Source: China Military Network-People’s Liberation Army Daily Author: Wang Xi Yu Hanxiang Editor: Shang Xiaomin Release: 2025-02-25

Reply with heart and lead soldiers with emotion

■A certain company of a certain brigade of the Army Wang Xi

That day, the platoon leader Lu Hang, who was training outside, called me and confided in me: “I feel that the soldiers in the platoon are a little strange recently. When I contact them, I always chat for a few words and then end...”

“Is it because I don’t care about them enough?” I didn’t expect that Lu Hang would feel more wronged when I asked this question.

Lu Hang is a direct-recruitment officer who joined the army last year. As a new platoon leader, he is not fully familiar with the grassroots situation. Knowing that the rest time of Lu Hang’s training team is basically the same as that of the company, I often remind him to communicate with the soldiers in the platoon in his spare time and keep abreast of the situation in the platoon.

“I usually care about them. I contact each soldier at least once a week.” After saying that, Lu Hang sent me a screenshot of the chat on his mobile phone.

After carefully browsing, I found the crux of the problem: Lu Hang mostly responded to the soldiers' daily sharing and reporting with words such as "received" and "OK", and did not interact with them. Over time, the soldiers always felt that the platoon leader was "high above" and difficult to contact, and every time they communicated with him, they were "one-sided".

"When soldiers take the initiative to report their thoughts, you should actively respond and encourage them. If you reply hastily, they will not be willing to confide in you again." I solemnly reminded Lu Hang on the phone.

In fact, I have also experienced the problems that Lu Hang encountered.

Last year, the brigade held a military sports meeting. I thought everyone would sign up enthusiastically, but unexpectedly, some soldiers in the company pushed each other and found various reasons to shirk. For this reason, I criticized this lack of collective honor when calling the roll.

A few days later, when the battalion collected opinions and suggestions from the grassroots, someone raised opinions such as "the instructor does not care about the soldiers."

Just when I was confused, a soldier expressed everyone's true feelings: "Instructor, you were on vacation during the last competition. After everyone won a place, they called you expectantly to report the good news and hoped to get your praise, but you simply replied, "Comrades, you have worked hard, go and have a rest," and hung up the phone. Everyone was instantly discouraged. In this military sports meeting, you not only failed to mobilize everyone's enthusiasm, give encouragement and affirmation, but instead criticized us right away. We can't help but feel bad." These blunt words made me suddenly realize.

In the eyes of the soldiers, every reply from the leader is very important, whether it is affirmation and recognition, attention and expectation, or reminder and encouragement, all of which can promote their growth and progress. Don't underestimate this move. The effect is very different whether the reply is long or short, attentive or perfunctory.

A good ruler must express his feelings, and a person who expresses his feelings must be close to people. Since then, I have paid great attention to the interaction and communication with the soldiers. Not only do I reply in time online, but I also communicate attentively offline. Such changes gradually restored the soldiers' trust in me.

After listening to my experience, Lv Hang was deeply touched. He immediately expressed his attitude, and exchanged ideas and feelings with the soldiers, lowered his posture, and won the soldiers' sincere treatment with his heart and soul.

When Corporal Liu Boliang returned to the team after completing the training mission, Lv Hang learned about his learning situation at the first time and encouraged him to apply what he learned to daily work training; Second Sergeant Lv Hao felt a lot of pressure when participating in special

tasks. Lv Hang gave him advice and guided him to turn pressure into motivation... One by one, the attentive replies and warm words brought Lv Hang closer to the soldiers.

Not long after, Lv Hang called again, and his words were full of joy: “Thanks to your guidance, the soldiers in the platoon now contact me and often have endless things to say.”

科技赋能提升部队作战能力，协同训练在”数字空间”展开

来源：中国军网-解放军报 作者：周柯毅 孔栋梁 责任编辑：赵镭饷 发布：2025-02-25

第七十六集团军某旅坚持科技赋能提升部队作战能力——

协同训练在”数字空间”展开

■周柯毅 孔栋梁

该旅官兵利用模拟训练系统开展协同训练。刘金慧摄

初春时节，某高原训练场硝烟弥漫，第 76 集团军某旅一场合成营战术训练激战正酣。无人机实时回传”敌”装甲集群坐标、电抗分队同步释放电磁干扰、坦克炮长与步战车车长在共享态势图上标定攻击轴线……随着指挥员一声令下，装甲突击群与步兵分队在炮火掩护下精准合围，瞬间撕开”敌”防线。

演训场上这一幕，是该旅坚持科技赋能提升部队作战能力的一个缩影。复盘总结时，该旅一名领导看着系统显示的训练数据，感慨地说：”这套作战流程，战斗班组在’数字空间’已经磨合了几个月！”

“过去开展训练，各兵种习惯’各自为战’。如今，数据链将多种作战力量有机融合，确保发挥’1+1＞2’的效果。”该旅领导介绍，近年来，他们充分发挥模拟训练系统的”磨刀石”作用，将传统演训场与模拟训练系统深度融合，构建起”模拟系统打底、数据链贯通、实战化检验”融合训练体系，让侦察兵、炮兵、步兵等多个兵种在虚实交织的战场上攥指成拳，探索出一条合成部队练兵新路径。

走进该旅模拟训练中心机房，数十台交互终端全速运转。东侧无人机模拟器区域，侦察兵正在组织侦察训练，高清屏幕上的任务地域地形地貌随操纵杆偏转实时变化；西侧坦克模拟驾驶舱内，车长与炮手紧盯瞄准镜，手指在触控面板上快速滑动，与隔壁步兵班组同步标定突击路线；南侧电抗分队训练平台上，跳动的频谱图与装甲集群的运动轨迹汇聚成数据洪流……

“过去主要练的是’单打’，现在练的是’组合’。”谈起模拟训练系统支撑的融合训练体系，该旅某营张营长深有体会。以前组织模拟训练，各专业习惯各练各的”绝活”：坦克专业练射击精度、步兵专业练战术穿插、侦察专业练目标识别……但是，”绝活”练扎实了，一上训练场却发现协同不畅。

在探索中发现问题，在协同中解决问题。张营长介绍，经过持续攻关验证、改进组训方式，如今开展模拟训练，指挥终端可实时监测全营多个作战单元的动态数据，系统甚至能自动预判协同冲突。”在上周组织的一次推演中，系统警告’步坦间距超标’，我认真分析数据后及时调整队形，并在后续实战化训练中验证结果，大大提升了突击效率。”看着眼前屏幕上的训练数据，张营长感慨地说，”过去指挥员主要靠经验判断，现在注重用数据说话，心里更有底了。”

新的融合训练模式，同样影响着其他参训官兵。坦克炮长印育明介绍，以往组织模拟训练，注重让参训人员掌握基本原理、熟悉基本操作、处置基本情况。前段时间，各专业围绕协同训练展开专攻精练，官兵的协同意识明显增强。如今，操作舱与其他单元打通了数据链，不仅实时显示自身的射击参数，还标注了协同单元的作战信息。

“运用模拟训练系统开展训练，不仅有效锤炼了部队的作战能力，还提升了官兵对未来战争的认知水平。”张营长介绍，模拟训练系统为实战化训练提供了技术支撑，为提升军事训练质效按下了”加速键”。按照新的训练模式，不同作战方案、战法打法、作战编组、兵力部署等通过系统推演改进优化后，再将最优作战方案置于实战化演训环境检验，不仅节约了训练资源、缩短了训练时间，还大幅提升了训练效果。

“虚拟空间探寻训练最优解，实战环境’孵化’打赢新成果。”该旅领导介绍，科技赋能打破了场地、天候、环境的限制，改变了以往”千人百车”的训练模式，提高了各作战要素间的协同能力，强化了合成单位攥指成拳的作战效能。近几年，该旅利用跨军兵种联合训练、体系对抗训练等契机，对利用模拟训练系统探索出的数百组数据、数十种战法进行检验优化，充分发挥科技手段在军事训练中的”催化剂”作用，为部队战斗力生成注入强大动力。

“每一组数据更新，都是为打赢蓄能。”该旅领导介绍，下一步，他们将紧盯未来战场，持续探索科技练兵新路径、新方式，推动科技优势有效转化为能力优势、作战优势、制胜优势，促进实战化训练转型升级。

短评

用科技手段夯实打赢”底座”

■陈志国

习主席强调，要”加强模拟化、网络化、对抗性手段建设，探索’科技+”网络+’等训练方法，大幅提高训练科技含量。”当前，随着前沿科技的快速发展，战争形态加速向智能化、信息化演进，战争的时空特性和攻防模式发生了深刻变化，科技练兵的重要性前所未有地凸显出来。

面对高原复杂环境和多兵种协同作战难题，第 76 集团军某旅牢固树立科技练兵思维，探索构建”模拟系统打底、数据链贯通、实战化检验”融合训练体系，让各兵种、各专业官兵利用模拟训练系统练操作、练协同，在实战化演训场验证训法打法、研讨改进方案，形成”虚拟空间探寻训练最优解，实战环境’孵化’打赢新成果”的良性循环。

强军打赢，科技先行。制胜未来战场，迫切需要我们紧盯科技之变，从科技的角度审视战争、研究战争、思考战争，用科技手段夯实打赢”底座”。各级应树立科技思维、提升科技素养，加强现代科技特别是军事高科技知识的学习运用，结合自身实际探索运用科技手段创新战法训法的路径和方式，不断提升科技认知力、创新力、运用力，为打赢明天的战争蓄足实力底气。

Technology Empowers the Troops to Improve Their Combat Capability, and Coordinated Training Is Carried Out in the “Digital Space”

Source: China Military Network-People’s Liberation Army Daily Author: Zhou Keyi Kong Dongliang Editor: Zhao Leixiang Release: 2025-02-25

A brigade of the 76th Group Army insists on technology empowerment to improve the combat capability of the troops——

Coordinated training is carried out in the “digital space”

■ Zhou Keyi Kong Dongliang

The officers and soldiers of the brigade use the simulation training system to carry out coordinated training. Photo by Liu Jinhui

In early spring, a certain plateau training ground was filled with smoke, and a tactical training of a synthetic battalion of a brigade of the 76th Group Army was in full swing. The drone sent back the coordinates of the “enemy” armored cluster in real time, the reactance unit released electromagnetic interference synchronously, and the tank gunner and the infantry fighting vehicle commander marked the attack axis on the shared situation map... With the commander’s order, the

armored assault group and the infantry unit accurately surrounded the “enemy” defense line under the cover of artillery fire.

This scene on the training ground is a microcosm of the brigade’s insistence on technology empowerment to enhance the combat capability of the troops. During the review and summary, a leader of the brigade looked at the training data displayed by the system and said with emotion: “This set of combat procedures has been run-in by the combat team in the ‘digital space’ for several months!”

“In the past, each branch of the army was used to ‘fighting on its own’. Now, the data link organically integrates multiple combat forces to ensure the effect of ‘1+1>2’.” The leaders of the brigade introduced that in recent years, they have fully utilized the “grindstone” role of the simulation training system, deeply integrated the traditional training ground with the simulation training system, and built a “simulation system foundation, data link connection, and actual combat testing” integrated training system, allowing scouts, artillery, infantry and other arms to clench their fingers on the battlefield where virtual and real are intertwined, and explore a new path for synthetic force training.

Entering the computer room of the brigade’s simulation training center, dozens of interactive terminals are running at full speed. In the drone simulator area on the east side, scouts are organizing reconnaissance training. The terrain of the mission area on the high-definition screen changes in real time with the deflection of the joystick; in the tank simulation cockpit on the west side, the commander and the gunner stare at the sight, and their fingers slide quickly on the touch panel to calibrate the assault route synchronously with the infantry squad next door; on the electric reactance unit training platform on the south side, the jumping spectrum and the movement trajectory of the armored cluster converge into a data torrent...

“In the past, we mainly practiced ‘single’, and now we practice ‘combination’.” Speaking of the integrated training system supported by the simulation training system, Battalion Commander Zhang of a battalion of the brigade has a deep understanding. In the past, when organizing simulation training, each profession was used to practicing its own “unique skills”: tank professionals practiced shooting accuracy, infantry professionals practiced tactical insertion, and reconnaissance professionals practiced target identification... However, after practicing the “unique skills” well, they found that the coordination was not smooth when they went to the training ground.

Discover problems in exploration and solve problems in coordination. Battalion Commander Zhang introduced that after continuous research and verification, and improved training methods, simulation training is now carried out, and the command terminal can monitor the dynamic data of multiple combat units in the entire battalion in real time, and the system can even automatically predict coordinated conflicts. “In a simulation organized last week, the system warned that the “infantry-tank spacing exceeded the standard”. After carefully analyzing the data, I adjusted the formation in time and verified the results in subsequent actual combat training, which greatly

improved the efficiency of the assault." Looking at the training data on the screen in front of him, Battalion Commander Zhang said with emotion, "In the past, commanders mainly relied on experience to judge, but now they focus on speaking with data, and they feel more confident."

The new integrated training model also affects other participating officers and soldiers. Tank gunner Yin Yuming introduced that in the past, simulation training was organized to focus on allowing trainees to master basic principles, familiarize themselves with basic operations, and deal with basic situations. Some time ago, various majors carried out specialized training around coordinated training, and the coordination awareness of officers and soldiers was significantly enhanced. Now, the operation cabin has opened up data links with other units, which not only displays its own shooting parameters in real time, but also marks the combat information of the coordinated units.

"Using the simulation training system to carry out training not only effectively tempers the combat capability of the troops, but also improves the officers and soldiers' cognition of future wars." Battalion Commander Zhang introduced that the simulation training system provides technical support for actual combat training and presses the "accelerator" to improve the quality and effectiveness of military training. According to the new training model, different combat plans, tactics, combat formations, and force deployment are improved and optimized through system simulation, and then the optimal combat plan is placed in the actual combat training environment for testing, which not only saves training resources and shortens training time, but also greatly improves the training effect.

"Virtual space explores the optimal solution for training, and the actual combat environment 'hatches' and wins new results." The brigade leader introduced that scientific and technological empowerment has broken the limitations of venues, weather, and environment, changed the previous "thousands of people and hundreds of vehicles" training model, improved the coordination ability between various combat elements, and strengthened the combat effectiveness of synthetic units. In recent years, the brigade has used opportunities such as cross-service joint training and system confrontation training to test and optimize hundreds of data sets and dozens of tactics explored using simulation training systems, giving full play to the "catalyst" role of scientific and technological means in military training, and injecting strong impetus into the generation of combat effectiveness of the troops.

"Every set of data update is to accumulate energy for winning." The brigade leaders introduced that in the next step, they will keep a close eye on the future battlefield, continue to explore new paths and methods of scientific and technological training, promote the effective transformation of scientific and technological advantages into capability advantages, combat advantages, and winning advantages, and promote the transformation and upgrading of actual combat training.

Short comment

Use scientific and technological means to consolidate the "foundation" for winning

■ Chen Zhiguo

President Xi stressed that it is necessary to “strengthen the construction of simulation, networking, and confrontational means, explore training methods such as “science and technology +” and “network +”, and greatly increase the scientific and technological content of training.” At present, with the rapid development of cutting-edge science and technology, the war form is accelerating towards intelligence and informatization, and the time and space characteristics and attack and defense modes of war have undergone profound changes. The importance of scientific and technological training has been unprecedentedly highlighted.

Faced with the complex environment of the plateau and the difficulties of multi-service coordinated operations, a brigade of the 76th Group Army firmly established the scientific and technological training thinking, explored the construction of a fusion training system of “simulation system foundation, data link connection, and actual combat testing”, allowing officers and soldiers of various arms and professions to use simulation training systems to practice operation and coordination, verify training methods and methods in actual combat training grounds, and discuss improvement plans, forming a virtuous cycle of “exploring the optimal solution for training in virtual space, and “hatching” new achievements in actual combat environments”.

Strengthening the army and winning, science and technology first. To win the future battlefield, it is urgent for us to keep a close eye on the changes in science and technology, examine war, study war, and think about war from the perspective of science and technology, and use scientific and technological means to consolidate the “foundation” for winning. All levels should establish scientific and technological thinking, improve scientific and technological literacy, strengthen the study and application of modern science and technology, especially military high-tech knowledge, and explore the paths and methods of using scientific and technological means to innovate tactics and training methods in combination with their own reality, and continuously improve scientific and technological cognition, innovation, and application, so as to accumulate strength and confidence to win tomorrow’s war.

第七十六集团军某旅推进集约化组训走深走实

来源：中国军网-解放军报 作者：张磊峰 马嘉隆 孙 晨 责任编辑：尚晓敏 发布：2025-02-25

第七十六集团军某旅推进集约化组训走深走实——

关联课目组合训 重点课题集智解

■解放军报记者 张磊峰 马嘉隆 特约记者 孙 晨

该旅侦察分队展开多课目连贯训练。贺 丹摄

“1 号目标点，在 2 号方位物左侧……”春寒料峭，第 76 集团军某旅野外训练场一派火热景象，教练员下达指令后，战士们纷纷展开判定地形作业；几名军士率先完成，随即跑向场地另一片区域，投入图上量算作业；两个课目都”通关”后，大家又被重新分组，立即参加按图行进训练……

这是该旅推进集约化组训走深走实，组织识图用图相关课目训练带来的新变化。现场指挥员告诉记者，为了提升组训效率、整合训练资源，他们探索将一个主课目与多个关联课目组合训，进一步提升了基础训练质效。

踏访该旅训练场，记者看到，一个个主课目串起多个关联课目，在不同场地上并行展开，形成一个个训练”套餐”：自救与互救课目连贯考核后，官兵立即登上救护车奔赴预定地域展开班排战术训练；低姿匍匐、快速跃进战术动作完成后，马不停蹄赶赴手榴弹投掷场；实弹射击与轻武器分解结合训练设在同一场地，完成武器分解结合后，不用转场直接投入实弹射击训练……

“提升实战化训练水平，需要集约高效的训练资源保障，过去’大编组、一锅煮’的组训模式，已很难适应未来战场需要。”该旅领导介绍，为破解因训练资源紧张，造成”少数人练、部分人等、一群人看”等难题，他们创新组训模式，加强训练资源统筹，从开始制订训练计划就将关联课目进行”打包”，以”一主多辅”方式统成一个专题训、同块场地练，实现时间上错峰、效果上互促。为此，他们精心测算划分，最大限度拉近主课目与辅课目的训练场地距离，减少转场时间消耗；实行”过关升级”，由易到难编排关联课目组合顺序，激发官兵参训热情。

实弹射击训练场上，某连中士张嘉鹏面露喜色。这不仅因为他打出了优秀成绩，还在此前轻武器分解结合小竞赛中夺得冠军。”围绕主课目训练，穿插组织辅课目小竞赛小比武，不仅提高了训练效率，还能缓解疲劳，让官兵始终保持较高的专注度。”张嘉鹏说，他能取得这样的成绩，很大程度上得益于新的组合施训模式。

组合施训，不仅组合了关联课目，也推动了组训施训人才共享。为保证训练质量，该旅打破参训人员建制，遴选各专业骨干担任教练员，进行集约配置使用，对重点课题集智研究破解。

数架无人机升空，时而盘旋、时而俯冲……侦察分队训练场上，一场便携式无人机操作训练正在进行。记者注意到，其中一项训练内容是战士背对训练场，按要领操纵无人机飞行。正在组织训练的一级军士长殷鹏介绍：”这是我们最近探索出的一个新训法。”

今年，该旅侦察分队增设了便携式无人机操作课目。在组合施训过程中，干部骨干围绕课目核心能力生成难点问题展开攻关，摸索出”背身训练法”，让操作手习惯通过屏幕而不是目视操纵无人机，有效提升了参训人员规避障碍熟练程度，总结形成一套目标观察记忆法，让无人机操作手判别目标大小、方位的准确率明显提升。

随着组合施训模式不断推开，众多冒着”热气”的创新训法接连涌现。在此基础上，该旅针对 10 多个专业的重难点内容，编写训练教材、制作教学视频、规范考核标准，进一步推进基础训练提质增效、转型升级。前不久，该旅组织阶段性摸底考核，官兵们精神饱满，表现出色，整体成绩较去年同期明显提升。

A Brigade of the 76th Group Army Promotes Intensive Training to Go Deeper and More Practical

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Leifeng Ma Jialong Sun Chen Editor: Shang Xiaomin Release: 2025-02-25

A brigade of the 76th Group Army promotes intensive training to go deeper and more practical-

Combined training of related subjects and collective solution of key topics

■People’s Liberation Army Daily reporter Zhang Leifeng Ma Jialong special reporter Sun Chen

The brigade’s reconnaissance unit carried out multi-subject coherent training. Photo by He Dan

“Target point No. 1 is on the left side of the No. 2 position object...” It was chilly in spring, but the field training ground of a brigade of the 76th Group Army was full of enthusiasm. After the instructor issued the order, the soldiers started to determine the terrain; several sergeants completed it first, and then ran to another area of the field to engage in map measurement; after both subjects were “passed”, everyone was regrouped and immediately participated in the map-based marching training...

This is a new change brought about by the brigade’s promotion of intensive training and the organization of map-based training. The on-site commander told reporters that in order to improve the efficiency of training and integrate training resources, they explored combining a main subject with multiple related subjects for training, which further improved the quality and effectiveness of basic training.

Visiting the brigade's training ground, the reporter saw that the main subjects were linked to multiple related subjects, which were carried out in parallel at different venues to form a training "package": after the continuous assessment of self-rescue and mutual rescue subjects, the officers and soldiers immediately boarded the ambulance and rushed to the designated area to carry out squad tactical training; after completing the low-profile crawling and rapid leap tactical movements, they rushed to the grenade throwing field without stopping; live-fire shooting and light weapons disassembly and combination training were set up in the same venue. After completing the disassembly and combination of weapons, they could directly engage in live-fire shooting training without transferring...

"Promote To improve the level of actual combat training, intensive and efficient training resources are needed. The past "large group, one-pot" training model is difficult to adapt to the needs of future battlefields. "The brigade leaders introduced that in order to solve the problems of "a few people training, some people waiting, and a group of people watching" caused by the shortage of training resources, they innovated the training model, strengthened the coordination of training resources, and "packaged" the related subjects from the beginning of the training plan, and integrated them into a special training and training on the same site in a "one main and multiple auxiliary" way, so as to achieve time staggering and mutual promotion in effect. To this end, they carefully calculated and divided, and shortened the distance between the training sites of the main and auxiliary subjects to the maximum extent, reducing the time consumption of the transition; implemented "passing and upgrading", and arranged the order of related subject combinations from easy to difficult, so as to stimulate the enthusiasm of officers and soldiers to participate in the training.

On the live-fire shooting training ground, Sergeant Zhang Jiapeng of a certain company showed a happy face. This is not only because he scored excellent results, but also won the championship in the previous light weapons disassembly and combination competition. "Training around the main subjects and organizing small competitions and contests for auxiliary subjects not only improves training efficiency, but also relieves fatigue and allows officers and soldiers to always maintain a high level of concentration." Zhang Jiapeng said that he was able to achieve such results largely thanks to the new combined training model.

Combined training not only combines related subjects, but also promotes the sharing of training talents. In order to ensure the quality of training, the brigade broke the training personnel system, selected backbones of various majors as coaches, and used them intensively to conduct research and crack key topics.

Several drones took off, sometimes hovering, sometimes diving... A portable drone operation training was underway on the reconnaissance team training ground. The reporter noticed that one of the training contents was that the soldiers turned their backs to the training ground and operated the drone according to the essentials. First-class Sergeant Yin Peng, who was organizing the training, introduced: "This is a new training method we have recently explored."

This year, the brigade's reconnaissance team added a portable drone operation course. During the combined training process, the cadres and backbones tackled the difficult problems of the core competence generation of the course, and explored the "back-to-body training method" to make the operators accustomed to controlling the drone through the screen instead of visually, which effectively improved the proficiency of the trainees in avoiding obstacles, and summarized a set of target observation and memory methods, which significantly improved the accuracy of the drone operators in judging the size and direction of the target.

As the combined training model continues to be promoted, many innovative training methods with "hot" content have emerged one after another. On this basis, the brigade compiled training materials, produced teaching videos, and standardized assessment standards for the key and difficult contents of more than 10 majors, further promoting the improvement of quality and efficiency and transformation and upgrading of basic training. Not long ago, the brigade organized a phased survey and assessment. The officers and soldiers were in high spirits and performed well, and the overall results were significantly improved compared with the same period last year.

军营观察｜画好荣誉激励"同心圆"

来源：中国军网-解放军报 作者：郝铁兵 李国臣 刘 含 责任编辑：赵镭饷 发布：2025-02-25

"你已成长为真正军人，家人为你骄傲"

■郝铁兵 李国臣

前不久，陆军某旅营区内气氛热烈，一场"荣誉盛典"璀璨启幕。该旅 60 多名建功岗位的优秀官兵，以及他们从全国各地赶来的 120 余位亲属，共同参加由北京市团委与该旅联合组织的"看英雄儿女，看美丽北京"活动。

北京市团委已连续 10 多年与该旅联合组织"双看"活动。今年，该旅通过官兵投票和基层推荐，在全旅遴选群众公认、贡献突出的优秀官兵，邀请他们的家人来到部队驻地，参观营区建设感受部队生活、游览首都名胜感悟时代发展，让军人和亲属们共享奋斗荣光。

乐声铿锵，亲情融融。伴随着军乐队演奏的悠扬旋律，全旅以军人的礼仪迎接官兵亲属的到来。

"记得你刚穿上军装、离开家的那天，还是个青涩少年，经过部队培养，如今你已成长为真正军人，家人为你骄傲！"活动启动仪式上，优秀官兵亲属代表、二级上士张吉威父亲张友方的发言引发热烈掌声。

参观旅史场馆，游览天安门，登上居庸关……官兵和亲属一起参观，一路上交流生活感悟，欢声笑语环绕耳畔。

“咱家的亲朋好友，听说部队组织立功受奖的军属到首都参加活动，都很羡慕我有一个在部队建功立业的儿子……”一级上士苏献良的母亲，将儿子的军功章捧在手中，脸上写满笑容。

苏献良在旅创破纪录比武中夺得”十项全能”第一名，荣立二等功。旅队将喜报和立功牌匾送到他的家乡，还请家乡代表到部队参加颁奖典礼。拼搏奋斗取得荣誉，还能与家人一起分享荣誉，这给苏献良带来更大的奋斗动力。

“陪家人一起参观天安门广场。”战士刘烨入伍以来一直有个心愿。2024年，刘烨在旅运动会中夺得一个第一名、一个第二名的好成绩，通过官兵投票，顺利拿到活动的”荣誉资格证”。那天在天安门广场，刘烨与父亲一起合影，他高兴地说，这张照片是他和家人共同拼搏、彼此支持的见证。

“当尖兵吃香、争先进光荣，这已经成为官兵认同的鲜明导向。”该旅领导介绍，近年来，该旅先后有 2000 余名官兵亲属来到北京，感受军人荣誉，共享光荣时刻。荣誉之光照耀在每一名优秀官兵身上，激励一茬茬官兵在强军路上奋勇争先。

一名立功受奖战士与连队荣誉墙合影。裴书杰摄

画好荣誉激励”同心圆”

■郝铁兵 李国臣 刘 含

百余位官兵亲属中，不少人是第一次走进陆军某旅营区。当鲜红的绶带穿戴在官兵身上，荣誉之光照耀着军人亲属的心房，他们更加理解了何为军人的奋斗。

“看英雄儿女，看美丽北京”（以下简称”双看”）活动是该旅荣誉激励体系中的一块”金字招牌”，激励着一茬茬官兵精武强能。军人崇尚荣誉，取得荣誉是对军人最大的褒奖。如何激发官兵练兵备战动能，是该旅党委始终在思考的问题。

近年来，该旅打造荣誉激励”矩阵”，营造学典型、当典型的氛围，激发官兵投身强军梦的热情和斗志；通过军地双方交流互动，让军人与亲属共享荣誉。

陆军某旅某连官兵进行武装越野跑。王 豪摄

“一定要在部队干出一番成绩，让父母一起见证荣光”

“谁可以登上领奖台？”前不久，该旅机关遴选参加”双看”活动的优秀官兵，这个问题在党委会上引发热烈讨论。

在确定遴选标准时，该旅党委一班人纷纷提出建议：”每年部队任务不同，既要参照往年标准，也要符合当年情况”“标准不能太苛刻，要让更多人享受荣誉、获得资格；也不能降低标准，要选出真正优秀的官兵”……

该旅利用基层机关双向讲评会等时机，广泛征求基层意见。结合近年来的工作实绩，他们确定了奖励人员的遴选标准：”近两年荣立二等功以上奖励；两年内连续两次荣立三等功；参加集团军以上各类比武竞赛获得前 3 名；对单位发展建设作出突出贡献……”

立起荣誉激励的标准，也立起了练兵备战、岗位建功的鲜明导向。

一级上士苏献良入伍第二年时，恰逢旅队第一次组织”双看”荣誉颁奖活动，苏献良坐在台下，望着战友身披绶带站在聚光灯下，他暗自下定决心：”一定要在部队干出一番成绩，让父母一起见证荣光。”

为了实现这个目标，苏献良在训练中奋勇拼搏。练习据枪，就算肘部磨破、结痂，他也没在训练中叫过苦喊过累。

2017 年，苏献良取得集团军狙击手比武第二名，被选拔进入国际比武集训队，当年底荣立三等功。转眼来到 2024 年，他摘得集团军狙击比武桂冠。

“谁精武谁荣耀，要牢牢树立这种导向。”苏献良的不懈拼搏，战友们看在眼里。成绩就是”入场券”！苏献良取得了颁奖资格，他的父母也受邀来队参加活动。

某营炊事班班长岳海，坚守炊事班岗位多年，2024 年荣立三等功。岳海有意参加遴选，但心中也有顾虑：自己是名炊事员，从没参加过大项比武，凭啥和战斗岗位的战友竞争？

岳海在炊事班战位上兢兢业业，炊事班的每一道菜，他都精心把关。”让战友吃好、吃出战斗力，就是炊事员的打赢标准。”

岳海的贡献，战友们同样看在眼里，他们一致为炊事班的细心保障点赞。”三百六十行，行行出状元。发挥专长，扎根岗位，保障尖兵同样需要关注！”最终，岳海也取得了受奖资格。

立足岗位尽职尽责，就是为打赢作贡献。在该旅，像岳海这样的典型还有不少，该旅党委始终坚持荣誉激励效用最大化，让踏实肯干、在岗位上发光发热的官兵感受荣誉激励，收获更多奋斗获得感。

对荣誉的向往，让官兵成长成才有了动力源泉。某连列兵马锦润入伍不到半年，在旅军事体育运动会上取得了”双杠臂屈伸”第 5 名的成绩。

“希望你取得更大成绩。”班长王晨曦不断在训练中给他鼓励。前不久，连队组织官兵写下新年目标，马锦润在”心愿清单”上郑重写下一行字：”努力训练破纪录，让父母来队参加颁奖。”

“他们为荣誉而拼搏，也是连队荣誉的见证者、记录者”

第二次受邀来队参加颁奖活动，军嫂陈小攀的自豪之情溢于言表。

陈小攀就职于地方医院，丈夫周狮健是该旅某连排长，两人聚少离多，却始终相互鼓励。两人原本计划 2023 年夏天回老家办婚礼，但部队接到通知外出驻训，他们只得将婚期推迟。

驻训归来，部队为官兵举行了一场盛大的集体婚礼。陈小攀和 50 多位参加集体婚礼的姐妹一样，感受到了作为一名军嫂的自豪。

哪里有军人的奋斗，哪里就有亲属的付出。

军人和亲属同享荣光，凝聚成强军合力。该旅连续多年组织”缘聚军营”集体婚礼，举办”致敬榜样”感动军营年度人物颁奖典礼；坚持每年送喜报到家，组织官兵亲属到驻地参观。旅党委注重倾听基层声音，”拉单列表”解决基层难题，创新荣誉激励模式，提升官兵奋斗强军的荣誉感、归属感。

坚持岗位建功、岗位育人，画好荣誉激励”同心圆”的圆心。如今在该旅人人争当尖子，人人争上龙虎榜，形成”你追我赶、比学赶超”的良好氛围。

“旅有军史长廊、营有荣誉室、连有荣誉墙、班有荣誉柜。”在各级共同努力下，该旅荣誉激励体系构建完成。走进该旅营区，荣誉战旗迎风招展，荣誉灯箱熠熠生辉，彰显着官兵砥砺拼搏的风采。

2024 年初，该旅评选”十大标兵班长”，”英雄岳太全班”班长谢国平赫然在列。此后他在集团军”优秀班长”比武中名列前茅，再一次打响了”英雄传人”名号。

旅队派人为谢国平拍摄荣誉灯箱照片，他选择与”英雄岳太全班”的荣誉战旗同框。战友的点赞，让谢国平备受鼓舞。

颁奖活动期间，该旅”基层全面建设模范连”班长张吉威带父母来看连史展陈。张吉威怀着自豪之情讲解，父母认真聆听，脸上写满欣慰的笑容。

该连申指导员告诉张吉威的父母，只有立功受奖的官兵，才能成为”连史讲解员”。去年，张吉威在比武中打破纪录，荣立二等功。”他们为荣誉而拼搏，也是连队荣誉的见证者、记录者。”申指导员说。

“将荣誉激励日常化，经常和官兵亲属通报，形成催人奋进的激励合力。”这是某连陈指导员一直在研究的课题。

连队每周评选”周评一星”，他都会将评选结果发给官兵亲属。他认真梳理去年全连每名官兵成绩，写成一封”致亲属的信”。一封封书信飞往官兵家乡，让官兵亲属更加放心和安心。

“高勋殊荣，催人奋进；惠军利兵，枝叶关情。”前不久，一年一度的”致敬榜样”感动军营年度人物颁奖典礼在营区举行。结合年度荣誉表彰情况，该旅遴选 5 类具有较强正面示范引领作用的优秀官兵和军嫂，走进荣誉殿堂。

该旅还邀请优秀官兵家乡领导，到现场同部队领导一同为官兵颁奖，把荣誉激励的”同心圆”画得更大。

“部队是个大熔炉，我们一定支持他建功军营”

崇尚荣誉，争当英雄，一花盛开不是春，百花齐放春满园。

一个坚持 10 多年的”双看”活动背后，有着怎样的荣誉激励”引力场”，又为这支部队转型发展带来怎样的效应？

对于该旅无人机技师蓝诗东来说，取得荣誉的路，并非一马平川。

入伍之初，蓝诗东的父亲突发疾病不幸去世，他一度想”退伍返乡陪伴母亲”。蓝诗东在日记中写道：”人生就像一架无人操控的无人机，只能空中悬停，却找不到飞行航向。”

2018年，蓝诗东在训练中成绩突出，入选”双看”颁奖活动。与母亲共享奋斗荣光，让他笃定了建功军营的追求。这些年在专业技术领域，蓝诗东不断超越自己：”攀登更高的山峰，取得更大的荣誉，将更多的军功章献给母亲。”

“你精武我荣耀，你建功我自豪。”一路陪伴蓝诗东走来，母亲和妻子理解他的热爱和坚守，这次到部队参加颁奖活动，母亲自豪地说：”部队是个大熔炉，我们一定支持他建功军营。”

卫生科助理张娜是第七届”双看”活动优秀官兵代表。入伍之初，身形瘦小的她，训练成绩并不理想。

为了迎头赶上，张娜每天默默加练，每周比别人多跑几趟五公里，为了练习力量，她在背包里放砖头……最终在上级比武中，她和队友一起勇夺两个第一名，荣立二等功。

张娜的父母受邀来队参加颁奖典礼，站在聚光灯下，她红着眼眶说：”没有荣誉的召唤和激励，就没有今天的我。”

刚刚进行的这次颁奖活动，获奖女兵马聪慧，是张娜当排长时带出来的兵。起初马聪慧只想当两年义务兵就退伍返乡，张娜却在马聪慧身上看到一股不服输的劲头。马聪慧一次考核败北后，张娜主动靠上去鼓励她：”不放弃、肯吃苦就一定能成功，要用成绩证明自己。”

咬紧牙关、继续拼搏，近年来在上级组织的专业比武中，马聪慧夺得一个第一名、一个第二名。2024 年她被推选为优秀官兵，参加颁奖活动。

为何而奋斗，为何而精武？在该旅官兵眼中，”为荣誉而战”是一个公认的答案。

某营战士葛磊连续 3 年在旅运动会中破纪录。从超越他人到超越自己，是什么让葛磊不断拼搏？面对这一问题，葛磊讲起一段往事——

新兵下连时，葛磊被连队走廊里的荣誉牌吸引：”金牌射手王哲”“狙击枪王刘祖博”“侦察高手魏显奎”……聆听指导员的介绍，葛磊脑海萦绕荣誉之光：”要像前辈一样，成为荣誉的’书写者’。”

心中播下一颗渴望荣誉的种子，就会迎来绽放的那一刻。在荣誉激励感召下，葛磊训练刻苦，他说：”用脚步丈量训练场，只为了追寻那束荣誉之光。”

锐视点

让军人军属同享荣光

■郝长清

来儿子的宿舍看一看，去丈夫的岗位走一走……军属在与军营”零距离”的体验与接触中，更加理解了”军人”这个职业，也感受到了官兵昂扬向上的精神状态。身披戎装，在父母、妻子面前光荣亮相，对于军人和军属来说，都是值得骄傲的瞬间。

军人在训练场摸爬滚打，扛起保家卫国的重任，却不能时常承欢父母膝下、陪伴妻儿身旁。军属是国防和军队建设的坚强后盾，是军人的精神支柱。正是有了军属的默默支持，军人才能在战场上英勇无畏，为家国安宁贡献力量。

让军人军属同享荣光，既是给军人家庭报喜，也能增强军人军属的荣誉感、归属感，更加深刻地了解军人职责和使命，更加珍惜军人军属这一光荣的身份。这种荣誉感和归属感，是对军人矢志强军奋斗的激励，更是军队建设发展的有力支撑。

军人军属多一分荣光，官兵练兵备战就增几分热情，备战打仗就多几分胜算。这种情感信念可以内化为行为上的自觉，使其自愿为提升政治觉悟、提高军事素质、完成本职工作付出积极努力。

我军坚持把军人军属荣誉激励与政治工作相结合、使命任务与战斗精神激发相结合、榜样引领与教育宣传相结合、个人荣誉激励与集体荣誉激励相结合，塑造了革命战争年代我军官兵不畏强敌、英勇善战的光辉形象。

家门连着营门，军属牵动军心。一双双温暖的手紧紧握在一起，一颗颗敞亮的心紧紧贴在一起，军属感受荣誉自豪感，军人精武强能的决心和信心更足。在实打实中提升军人军属的幸福指数，在心连心中激发官兵爱军精武的工作热情，让荣誉之光照耀在每一名优秀官兵身上，激励一茬茬官兵在强军路上奋勇争先。

Military Camp Observation 丨 Draw a “Concentric Circle” of Honor Incentives

Source: China Military Network-Liberation Army Daily Author: Hao Tiebing Li Guochen Liu Han Editor: Zhao Leixiang Release: 2025-02-25

“You have grown into a real soldier, and your family is proud of you”

■Hao Tiebing Li Guochen

Not long ago, the atmosphere in the camp of a certain army brigade was warm, and a “honor ceremony” kicked off brilliantly. More than 60 outstanding officers and soldiers in the brigade’s meritorious posts, as well as more than 120 of their relatives who came from all over the country, participated in the “See the Heroic Sons and Daughters, See the Beautiful Beijing” event jointly organized by the Beijing Youth League Committee and the brigade.

The Beijing Youth League Committee has jointly organized the “Double View” event with the brigade for more than 10 years. This year, the brigade selected outstanding officers and soldiers who were recognized by the masses and made outstanding contributions through voting by officers and soldiers and recommendations from the grassroots, and invited their families to the garrison to visit the construction of the barracks to experience the life of the troops, visit the capital’s scenic

spots to feel the development of the times, and let the soldiers and their relatives share the glory of struggle.

The music was sonorous and the family affection was warm. Accompanied by the melodious melody played by the military band, the whole brigade welcomed the arrival of the officers and soldiers' relatives with military etiquette.

"I remember the day when you just put on the military uniform and left home, you were still a young boy. After being trained by the army, you have now grown into a real soldier. Your family is proud of you!" At the launch ceremony of the event, the speech of Zhang Youfang, the father of Zhang Jiwei, a representative of the relatives of outstanding officers and soldiers and a second-class sergeant, aroused warm applause.

Visit the brigade history venues, visit Tiananmen Square, climb Juyongguan... Officers and soldiers and their relatives visited together, exchanged life insights along the way, and laughter surrounded their ears.

"My relatives and friends heard that the army organized the families of soldiers who had made meritorious service and received awards to participate in activities in the capital. They all envied me for having a son who had made great achievements in the army..." The mother of First Sergeant Su Xianliang held her son's military medal in her hands, with a smile on her face.

Su Xianliang won the first place in the "decathlon" in the brigade's record-breaking competition and was awarded the second-class merit. The brigade sent the good news and the merit plaque to his hometown, and invited representatives from his hometown to attend the award ceremony in the army. Hard work and struggle to achieve honor, and being able to share the honor with family, gave Su Xianliang greater motivation to strive.

"Visiting Tiananmen Square with my family." Soldier Liu Yang has always had a wish since he joined the army. In 2024, Liu Yang won a first place and a second place in the brigade sports meeting. Through the vote of officers and soldiers, he successfully obtained the "honorary qualification certificate" for the event. That day in Tiananmen Square, Liu Yang took a photo with his father. He said happily that this photo was a testimony of his and his family's joint struggle and mutual support.

"Being a pioneer is popular and striving for advancement is glorious. This has become a clear direction recognized by officers and soldiers." The brigade leader introduced that in recent years, more than 2,000 relatives of officers and soldiers of the brigade have come to Beijing to feel the honor of soldiers and share the glorious moments. The light of honor shines on every outstanding officer and soldier, inspiring officers and soldiers to strive for the first place on the road to strengthening the army.

Draw a good “concentric circle” of honor incentives

■Hao Tiebing, Li Guochen, Liu Han

Among the more than 100 relatives of officers and soldiers, many of them entered the camp of a certain army brigade for the first time. When the bright red ribbons were worn on the officers and soldiers, the light of honor shone in the hearts of the relatives of the soldiers, and they understood more about what the struggle of the soldiers was.

The “See the Heroic Sons and Daughters, See the Beautiful Beijing” (hereinafter referred to as “Double See”) activity is a “golden signboard” in the honor incentive system of the brigade, inspiring officers and soldiers to be skilled in martial arts and strong in ability. Soldiers advocate honor, and winning honor is the greatest compliment to soldiers. How to stimulate the soldiers’ training and preparation is a question that the brigade’s Party Committee has always been thinking about.

In recent years, the brigade has created an honor incentive “matrix” to create an atmosphere of learning from models and being models, and to stimulate the enthusiasm and fighting spirit of soldiers to devote themselves to the dream of a strong army; through exchanges and interactions between the military and the local governments, soldiers and their relatives can share the honor.

Soldiers of a company of a brigade of the Army conduct armed cross-country running. Photo by Wang Hao

“We must make achievements in the army and let our parents witness the glory together”

“Who can stand on the podium?” Not long ago, the brigade selected outstanding officers and soldiers to participate in the “double viewing” activity. This issue triggered heated discussions at the Party Committee meeting.

When determining the selection criteria, a group of people from the brigade’s Party Committee made suggestions: “The tasks of the troops are different every year. We must refer to the standards of previous years and also meet the situation of the year.” “The standards cannot be too harsh, so that more people can enjoy the honor and obtain qualifications; nor can we lower the standards, so that truly outstanding officers and soldiers can be selected”...

The brigade used opportunities such as the two-way review meetings of grassroots agencies to widely solicit opinions from the grassroots. Combined with the work performance in recent years, they determined the selection criteria for awarding personnel: “Won the second-class merit or above in the past two years; won the third-class merit twice in two years; participated in various competitions above the group army and won the top 3; made outstanding contributions to the development and construction of the unit...”

Establishing the standard of honor incentives also established a clear orientation for training and preparation, and making contributions in the post.

In the second year of Su Xianliang's enlistment, the brigade organized the first "double-watching" honor award ceremony. Su Xianliang sat in the audience, watching his comrades standing in the spotlight with ribbons, and he secretly made up his mind: "I must make some achievements in the army and let my parents witness the glory together."

In order to achieve this goal, Su Xianliang fought bravely in training. When practicing holding the gun, even if his elbows were worn and scabbed, he never complained about the hardship or tiredness during training.

In 2017, Su Xianliang won the second place in the group army sniper competition and was selected to join the international competition training team. At the end of the year, he was awarded the third-class merit. In 2024, he won the group army sniper competition.

"Whoever is good at martial arts will be honored, and this orientation must be firmly established." Su Xianliang's unremitting struggle was seen by his comrades. The results are the "ticket"! Su Xianliang obtained the qualification for the award, and his parents were also invited to the team to participate in the event.

Yue Hai, the squad leader of a certain battalion's cooking squad, has been working in the cooking squad for many years and won the third-class merit in 2024. Yue Hai intends to participate in the selection, but he also has concerns in his heart: he is a cook and has never participated in a major competition. Why should he compete with his comrades in combat positions?

Yue Hai works diligently at the cooking squad position, and he carefully checks every dish of the cooking squad. "Let comrades eat well and eat out combat effectiveness, which is the standard for cooks to win."

Yue Hai's contribution was also seen by his comrades, and they unanimously praised the careful guarantee of the cooking squad. "There are top talents in every profession. It is also necessary to pay attention to the pioneers who give full play to their expertise, take root in their posts, and ensure that they are the vanguards!" In the end, Yue Hai also qualified for the award.

Doing one's duty based on one's post is to contribute to winning the war. In the brigade, there are many examples like Yue Hai. The brigade party committee has always insisted on maximizing the effectiveness of honor incentives, allowing officers and soldiers who are down-to-earth and hardworking and shine in their posts to feel the honor incentives and gain more sense of struggle and achievement.

The yearning for honor gives officers and soldiers a source of motivation to grow and become talents. Ma Jinrun, a sergeant in a certain company, joined the army for less than half a year and won the fifth place in the "Dual Bars Dips and Extensions" at the brigade military sports meeting.

"I hope you can achieve greater results." Squad leader Wang Chenxi constantly encouraged him during training. Not long ago, the company organized officers and soldiers to write down their

New Year goals. Ma Jinrun solemnly wrote a line on the "wish list": "Work hard to train and break records, and let parents come to the team to participate in the award ceremony."

"They fight for honor, and they are also witnesses and recorders of the company's honor."

The pride of military wife Chen Xiaopan, who was invited to the team to participate in the award ceremony for the second time, was beyond words.

Chen Xiaopan works in a local hospital, and her husband Zhou Shijian is a platoon leader of a company in the brigade. The two are together for a long time, but they always encourage each other. The two originally planned to return to their hometown to hold a wedding in the summer of 2023, but the troops received a notice to go out for training, so they had to postpone the wedding.

After returning from the training, the troops held a grand collective wedding for the officers and soldiers. Chen Xiaopan, like more than 50 sisters who participated in the collective wedding, felt the pride of being a military wife.

Where there is the struggle of soldiers, there are the contributions of relatives.

Soldiers and relatives share the glory and gather into a strong army. The brigade has organized collective weddings for "Gathering in the Barracks" for many years, and held the "Salute to Role Models" award ceremony for the annual figures who moved the barracks; it insists on sending good news to the families every year, and organizing the relatives of officers and soldiers to visit the garrison. The brigade party committee pays attention to listening to the voices of the grassroots, "pulling a list" to solve grassroots problems, and innovating the honor incentive model to enhance the sense of honor and belonging of officers and soldiers in striving to strengthen the army.

Adhere to the post of meritorious service and post-education, and draw the center of the "concentric circle" of honor incentives. Now in the brigade, everyone is striving to be the top, and everyone is striving to be on the dragon and tiger list, forming a good atmosphere of "chasing each other, learning from each other and surpassing each other".

"The brigade has a military history corridor, the battalion has an honor room, the company has an honor wall, and the squad has an honor cabinet." With the joint efforts of all levels, the brigade's honor incentive system has been completed. Walking into the brigade camp, the honor flag is fluttering in the wind, and the honor light box is shining, showing the style of officers and soldiers' hard work.

At the beginning of 2024, the brigade selected the "Top Ten Model Squad Leaders", and Xie Guoping, the squad leader of the "Heroic Yuetai Class", was on the list. Since then, he has ranked among the top in the "Excellent Squad Leaders" competition of the group army, and once again made a name for himself as a "hero successor".

The brigade sent someone to take a photo of Xie Guoping in an honorary light box, and he chose to be in the same frame with the honorary battle flag of the “Heroic Yuetai Class”. Xie Guoping was greatly encouraged by the praise of his comrades.

During the award ceremony, Zhang Jiwei, the squad leader of the “Model Company for Comprehensive Construction at the Grassroots Level” of the brigade, brought his parents to see the company history exhibition. Zhang Jiwei explained with pride, and his parents listened carefully, with a gratified smile on their faces.

The company instructor Shen told Zhang Jiwei’s parents that only officers and soldiers who have made meritorious contributions and received awards can become “company history explainers.” Last year, Zhang Jiwei broke the record in the competition and won the second-class merit. “They fight for honor, and they are also witnesses and recorders of the company’s honor.” Instructor Shen said.

“Make honorary incentives a daily routine, and frequently communicate with the relatives of officers and soldiers to form an inspiring force.” This is the topic that instructor Chen of a certain company has been studying.

Every week, the company selects “One Star of the Week”, and he will send the results to the relatives of officers and soldiers. He carefully sorted out the achievements of every officer and soldier in the company last year and wrote a “letter to relatives”. Letters flew to the hometowns of officers and soldiers, making the relatives of officers and soldiers more assured and at ease.

“High honors and honors inspire people to move forward; benefiting the army and soldiers, branches and leaves care about feelings.” Not long ago, the annual “Salute to Role Models” award ceremony for the annual figures of the moving military camp was held in the camp. In combination with the annual honorary commendations, the brigade selected 5 categories of outstanding officers and soldiers and military wives with strong positive demonstration and leading roles to enter the Hall of Honor.

The brigade also invited leaders from the hometowns of outstanding officers and soldiers to the scene to award the officers and soldiers together with the leaders of the troops, drawing a larger “concentric circle” of honorary incentives.

“The army is a melting pot, we must support him in making contributions to the military camp”

Advocate honor, strive to be a hero, one flower blooming is not spring, a hundred flowers blooming is spring in the garden.

What kind of honor incentive “gravitational field” is behind the “Double Watch” activity that has been persisted for more than 10 years, and what effect does it bring to the transformation and development of this army?

For Lan Shidong, a drone technician of the brigade, the road to honor is not smooth.

At the beginning of his enlistment, Lan Shidong's father died of a sudden illness, and he once wanted to "retire and return home to accompany his mother." Lan Shidong wrote in his diary: "Life is like an unmanned drone, which can only hover in the air, but can't find the flight direction."

In 2018, Lan Shidong performed outstandingly in training and was selected for the "Double Watch" award ceremony. Sharing the glory of struggle with his mother made him determined to pursue the goal of making contributions to the military camp. In the field of professional technology over the years, Lan Shidong has continuously surpassed himself: "Climb higher mountains, achieve greater honors, and dedicate more military medals to my mother."

"I am honored by your martial arts, and I am proud of your achievements." Accompanying Lan Shidong all the way, his mother and wife understand his love and perseverance. This time when he went to the army to participate in the award ceremony, his mother proudly said: "The army is a melting pot, and we must support him to make achievements in the barracks."

Zhang Na, an assistant in the health department, is a representative of outstanding officers and soldiers in the seventh "Double View" activity. At the beginning of joining the army, she was thin and her training results were not ideal.

In order to catch up, Zhang Na silently practiced every day, ran five kilometers more than others every week, and put bricks in her backpack to practice strength... In the end, in the superior competition, she and her teammates won two first places and won the second-class merit.

Zhang Na's parents were invited to the team to attend the award ceremony. Standing under the spotlight, she said with red eyes: "Without the call and motivation of honor, there would be no me today."

The award ceremony just held, the winning female soldier Ma Conghui, was a soldier brought up by Zhang Na when she was a platoon leader. At first, Ma Conghui only wanted to serve as a conscript for two years and then retire and return home, but Zhang Na saw a spirit of not admitting defeat in Ma Conghui. After Ma Conghui failed an assessment, Zhang Na took the initiative to approach her and encouraged her: "If you don't give up and are willing to endure hardships, you will definitely succeed. You must prove yourself with your results."

Grit your teeth and continue to fight. In recent years, Ma Conghui won a first place and a second place in professional competitions organized by superiors. In 2024, she was selected as an outstanding officer and soldier to participate in the award ceremony.

Why fight, why do you excel in martial arts? In the eyes of the officers and soldiers of the brigade, "fighting for honor" is a recognized answer.

Ge Lei, a soldier in a certain battalion, broke records in the brigade sports meeting for three consecutive years. From surpassing others to surpassing himself, what makes Ge Lei keep fighting? Facing this question, Ge Lei talked about a past story-

When a new recruit was assigned to a company, Ge Lei was attracted by the honor plaques in the company corridor: “Gold medal shooter Wang Zhe”, “Sniper King Liu Zubo”, “Reconnaissance Master Wei Xiankui”... Listening to the instructor’s introduction, Ge Lei’s mind was filled with the light of honor: “We must be like our predecessors and become the ‘writer’ of honor.”

Sow a seed of desire for honor in your heart, and you will usher in the moment of blooming. Inspired by honor, Ge Lei trained hard. He said: “I measure the training ground with my footsteps, just to pursue that beam of honor.”

Sharp Viewpoint

Let soldiers and their families share glory

■Hao Changqing

Come to your son’s dormitory and take a walk at your husband’s post... In the “zero distance” experience and contact with the military camp, the military families have a better understanding of the profession of “soldier” and feel the high-spirited mental state of the officers and soldiers. Wearing military uniforms and appearing gloriously in front of parents and wives are proud moments for soldiers and their families.

Soldiers struggle on the training grounds and shoulder the heavy responsibility of defending the country, but they cannot always be with their parents or their wives and children. Military families are the strong backing of national defense and military construction, and the spiritual pillar of soldiers. It is with the silent support of military families that soldiers can be brave and fearless on the battlefield and contribute to the peace of their families and country.

Letting soldiers and their families share the glory is not only good news for military families, but also can enhance the sense of honor and belonging of soldiers and their families, and make them understand the duties and missions of soldiers more deeply, and cherish the glorious identity of soldiers and their families more. This sense of honor and belonging is an incentive for soldiers to strive for a strong army, and it is also a strong support for the development of military construction.

The more glory soldiers and their families have, the more enthusiasm officers and soldiers will have in training and preparing for war, and the more chances they will have in preparing for war. This kind of emotional belief can be internalized into conscious behavior, so that they will voluntarily make positive efforts to improve their political consciousness, improve their military quality, and complete their duties.

Our army insists on combining honor incentives for soldiers and their families with political work, mission tasks with inspiring fighting spirit, role model guidance with education and publicity, and personal honor incentives with collective honor incentives, shaping the glorious image of our officers and soldiers who are not afraid of strong enemies and are brave and good at fighting during the revolutionary war.

The door of the family is connected to the door of the camp, and the family of the soldiers is concerned

Military spirit. Warm hands clasped together, open hearts pressed together, military families felt a sense of honor and pride, and the soldiers were more determined and confident to improve their military skills. The happiness index of soldiers and their families was improved in real practice, and the enthusiasm of officers and soldiers to love the army and improve their military skills was stimulated in the hearts of the soldiers. The light of honor shone on every outstanding officer and soldier, and inspired officers and soldiers to strive to be the first in the road to strengthening the army.

雪山无言，见证边防官兵赤胆忠诚

来源：中国军网-解放军报 作者：段伟　乔佳宇 责任编辑：赵镭饷 发布：2025-02-25

踏雪巡边

■段　伟　乔佳宇　摄影报道

观察边境情况。

检查维护边境设施。

巡逻分队骑马前行。

官兵顶着寒风，徒步前往巡逻点位。

已是初春，祖国的西北边陲依然寒风凛凛，皑皑白雪覆盖着连绵起伏的山峦。

清晨，太阳刚刚升起，新疆军区白哈巴边防连的官兵又一次踏上边关巡逻路。

官兵们骑着军马，行进在厚厚的积雪中，穿越雪山峡谷。寒风呼啸，卷起细碎的雪粒，不断拍打在官兵身上。因为天气寒冷，军马喘息时呼出一团团白气。

走着走着，巡逻分队来到一片树林前。这里路况复杂、倒伏在地的树木纵横交错，军马难以顺利通行，官兵们便将马拴在树上，徒步前往附近点位巡察边情。完成任务后，大家原路返回至拴马地点，然后继续骑马前往下一个点位。

经过 4 个多小时的艰难行进，巡逻分队抵达此次巡逻的最后一个点位。几名官兵登上哨楼观察瞭望，边境一线状况尽收眼底。随后，官兵们分头检查维护边境设施，仔细察看防区情况，确保边境安全。

雪山无言，见证赤胆忠诚。界碑前，官兵们面向国旗庄严宣誓，铮铮誓言在雪山峡谷间回荡。

Snow-Capped Mountains Are Silent, Witnessing the Loyalty of Border Guards

Source: China Military Network-People’s Liberation Army Daily Author: Duan Wei Qiao Jiayu Editor: Zhao Leixiang Release: 2025-02-25 07:04:59

Patrolling the border in the snow

■ Duan Wei Qiao Jiayu Photo Report

Observe the border situation.

Check and maintain border facilities.

The patrol team rode forward on horseback.

The officers and soldiers braved the cold wind and walked to the patrol point.

It was early spring, and the northwest border of the motherland was still cold and windy, and the snow covered the rolling mountains.

In the early morning, the sun had just risen, and the officers and soldiers of the Baihaba Border Defense Company of the Xinjiang Military District once again set foot on the border patrol road.

The officers and soldiers rode on military horses, marching in the thick snow and crossing the snow-capped mountain valleys. The cold wind whistled, rolling up fine snow particles, and constantly hitting the officers and soldiers. Because of the cold weather, the military horses exhaled white air when they panted.

As they walked, the patrol team came to a forest. The road conditions here were complicated, and the fallen trees were crisscrossed, making it difficult for the military horses to pass smoothly. The officers and soldiers tied the horses to the trees and walked to the nearby points to inspect the border situation. After completing the task, everyone returned to the horse-tying place and continued to ride to the next point.

After more than 4 hours of difficult march, the patrol team arrived at the last point of this patrol. Several officers and soldiers climbed up the sentry tower to observe and look out, and the situation on the front line of the border was in full view. Afterwards, the officers and soldiers separately inspected and maintained the border facilities, carefully inspected the defense zone, and ensured the safety of the border.

The snow-capped mountains are silent, witnessing the loyalty of the people. In front of the boundary monument, the officers and soldiers solemnly swore to the national flag, and the oaths echoed in the snow-capped mountain valley.

第七十六集团军某旅推进集约化组训走深走实

来源：中国军网-解放军报 作者：张磊峰 马嘉隆 孙 晨 责任编辑：尚晓敏 发布：2025-02-25

第七十六集团军某旅推进集约化组训走深走实——

关联课目组合训 重点课题集智解

■解放军报记者 张磊峰 马嘉隆 特约记者 孙 晨

该旅侦察分队展开多课目连贯训练。贺 丹摄

“1 号目标点，在 2 号方位物左侧……”春寒料峭，第 76 集团军某旅野外训练场一派火热景象，教练员下达指令后，战士们纷纷展开判定地形作业；几名军士率先完成，随即跑向场地另一片区域，投入图上量算作业；两个课目都”通关”后，大家又被重新分组，立即参加按图行进训练……

这是该旅推进集约化组训走深走实，组织识图用图相关课目训练带来的新变化。现场指挥员告诉记者，为了提升组训效率、整合训练资源，他们探索将一个主课目与多个关联课目组合训，进一步提升了基础训练质效。

踏访该旅训练场，记者看到，一个个主课目串起多个关联课目，在不同场地上并行展开，形成一个个训练”套餐”：自救与互救课目连贯考核后，官兵立即登上救护车奔赴预定地域展开班排战术训练；低姿匍匐、快速跃进战术动作完成后，马不停蹄赶赴手榴弹投掷场；实弹射击与轻武器分解结合训练设在同一场地，完成武器分解结合后，不用转场直接投入实弹射击训练……

“提升实战化训练水平，需要集约高效的训练资源保障，过去’大编组、一锅煮’的组训模式，已很难适应未来战场需要。”该旅领导介绍，为破解因训练资源紧张，造成”少数人练、部分人等、一群人看”等难题，他们创新组训模式，加强训练资源统筹，从开始制订训练计划就将关联课目进行”打包”，以”一主多辅”方式统成一个专题训、同块场地练，实现时间上错峰、效果上互促。为此，他们精心测算划分，最大限度拉近主课目与辅课目的训练场地距离，减少转场时间消耗；实行”过关升级”，由易到难编排关联课目组合顺序，激发官兵参训热情。

实弹射击训练场上，某连中士张嘉鹏面露喜色。这不仅因为他打出了优秀成绩，还在此前轻武器分解结合小竞赛中夺得冠军。”围绕主课目训练，穿插组织辅课目小竞赛小比武，不仅提高了训练效率，还能缓解疲劳，让官兵始终保持较高的专注度。”张嘉鹏说，他能取得这样的成绩，很大程度上得益于新的组合施训模式。

组合施训，不仅组合了关联课目，也推动了组训施训人才共享。为保证训练质量，该旅打破参训人员建制，遴选各专业骨干担任教练员，进行集约配置使用，对重点课题集智研究破解。

数架无人机升空，时而盘旋、时而俯冲……侦察分队训练场上，一场便携式无人机操作训练正在进行。记者注意到，其中一项训练内容是战士背对训练场，按要领操纵无人机飞行。正在组织训练的一级军士长殷鹏介绍：”这是我们最近探索出的一个新训法。”

今年，该旅侦察分队增设了便携式无人机操作课目。在组合施训过程中，干部骨干围绕课目核心能力生成难点问题展开攻关，摸索出”背身训练法”，让操作手习惯通过屏幕而不是目视操纵无人机，有效提升了参训人员规避障碍熟练程度，总结形成一套目标观察记忆法，让无人机操作手判别目标大小、方位的准确率明显提升。

随着组合施训模式不断推开，众多冒着”热气”的创新训法接连涌现。在此基础上，该旅针对 10 多个专业的重难点内容，编写训练教材、制作教学视频、规范考核标准，进一步推进基础训练提质增效、转型升级。前不久，该旅组织阶段性摸底考核，官兵们精神饱满，表现出色，整体成绩较去年同期明显提升。

A Brigade of the 76th Group Army Promotes Intensive Training to Go Deeper and Be More Practical

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Leifeng Ma Jialong Sun Chen Editor: Shang Xiaomin Release: 2025-02-25

A brigade of the 76th Group Army promotes intensive training to go deeper and more practical-

Combined training of related subjects and collective solution of key topics

■People's Liberation Army Daily reporter Zhang Leifeng Ma Jialong special reporter Sun Chen

The brigade's reconnaissance unit carried out multi-subject coherent training. Photo by He Dan

"Target point No. 1 is on the left side of the No. 2 position object..." It was chilly in spring, but the field training ground of a brigade of the 76th Group Army was full of enthusiasm. After the instructor issued the order, the soldiers started to determine the terrain; several sergeants completed it first, and then ran to another area of the field to engage in map measurement; after both subjects were "passed", everyone was regrouped and immediately participated in the map-based marching training...

This is a new change brought about by the brigade's promotion of intensive training and the organization of map-based training. The on-site commander told reporters that in order to improve the efficiency of training and integrate training resources, they explored combining a main subject with multiple related subjects for training, which further improved the quality and effectiveness of basic training.

Visiting the brigade's training ground, the reporter saw that the main subjects were linked to multiple related subjects, which were carried out in parallel at different venues to form a training "package": after the continuous assessment of self-rescue and mutual rescue subjects, the officers and soldiers immediately boarded the ambulance and rushed to the designated area to carry out squad tactical training; after completing the low-profile crawling and rapid leap tactical movements, they rushed to the grenade throwing field without stopping; live-fire shooting and light weapons disassembly and combination training were set up in the same venue. After completing the disassembly and combination of weapons, they could directly engage in live-fire shooting training without transferring...

"Promote To improve the level of actual combat training, intensive and efficient training resources are needed. The past "large group, one-pot" training model is difficult to adapt to the needs of future battlefields. "The brigade leaders introduced that in order to solve the problems of "a few people training, some people waiting, and a group of people watching" caused by the shortage of training resources, they innovated the training model, strengthened the coordination of training resources, and "packaged" the related subjects from the beginning of the training plan, and integrated them into a special training and training on the same site in a "one main and multiple auxiliary" way, so as to achieve time staggering and mutual promotion in effect. To this end, they carefully calculated and divided, and shortened the distance between the training sites of the main and auxiliary subjects to the maximum extent, reducing the time consumption of the transition; implemented "passing and upgrading", and arranged the order of related subject combinations from easy to difficult, so as to stimulate the enthusiasm of officers and soldiers to participate in the training.

On the live-fire shooting training ground, Sergeant Zhang Jiapeng of a certain company showed a happy face. This is not only because he scored excellent results, but also won the championship in

the previous light weapons disassembly and combination competition. “Training around the main subjects and organizing small competitions and contests for auxiliary subjects not only improves training efficiency, but also relieves fatigue and allows officers and soldiers to always maintain a high level of concentration.” Zhang Jiapeng said that he was able to achieve such results largely thanks to the new combined training model.

Combined training not only combines related subjects, but also promotes the sharing of training talents. In order to ensure the quality of training, the brigade broke the training personnel system, selected backbones of various majors as coaches, and used them intensively to conduct research and crack key topics.

Several drones took off, sometimes hovering, sometimes diving... A portable drone operation training was underway on the reconnaissance team training ground. The reporter noticed that one of the training contents was that the soldiers turned their backs to the training ground and operated the drone according to the essentials. First-class Sergeant Yin Peng, who was organizing the training, introduced: “This is a new training method we have recently explored.”

This year, the brigade’s reconnaissance team added a portable drone operation course. During the combined training process, the cadres and backbones tackled the difficult problems of the core competence generation of the course, and explored the “back-to-body training method” to make the operators accustomed to controlling the drone through the screen instead of visually, which effectively improved the proficiency of the trainees in avoiding obstacles, and summarized a set of target observation and memory methods, which significantly improved the accuracy of the drone operators in judging the size and direction of the target.

As the combined training model continues to be promoted, many innovative training methods with “hot” content have emerged one after another. On this basis, the brigade compiled training materials, produced teaching videos, and standardized assessment standards for the key and difficult contents of more than 10 majors, further promoting the improvement of quality and efficiency and transformation and upgrading of basic training. Not long ago, the brigade organized a phased survey and assessment. The officers and soldiers were in high spirits and performed well, and the overall results were significantly improved compared with the same period last year.

2025-02-27

陆军某旅深入学习贯彻中央军委政治工作会议精神——

向打仗聚焦 以实训强能

■解放军报记者 胡云艳 特约记者 池俊成

“特情处置能力不足”“敌情意识不强”……初春时节，陆军某旅一场考核后的复盘总结会上，官兵讲问题一针见血、谈不足直言不讳，聚力研究改进措施，为下一步训练打下坚实基础。

“通过学习会议精神，官兵工作训练更加积极，精神状态更加饱满。”该旅领导告诉记者，中央军委政治工作会议召开后，他们围绕新征程上推进政治建军要抓好的 6 个方面重点工作，把学习会议精神与解决实际问题相结合，引导大家聚焦备战打仗主责主业，积极破解制约部队战斗力提升的难点堵点问题，以解决问题的实际成效推动学习贯彻中央军委政治工作会议精神走深走实。

实践中，该旅充分利用蹲点调研、议战议训等时机，组织机关干部深入基层一线，对照实战标准梳理部队在训练中存在的短板不足，并形成问题清单。在此基础上，机关干部分别

领题深入一线，与基层官兵剖析问题症结、逐一制订对策。该旅还坚持把”当下改”和”长久立”结合起来，指导营连固化经验做法，同时组织”回头看”，确保问题整改到位。

前不久，该旅一名机关干部围绕实战化训练主题深入某连调研。交流中，该连指导员讲述了一次失败的经历。一次对抗训练，面对”敌”依托工事顽抗的情况，这名指导员组织官兵采取战场喊话等常规手段进行劝降，但是”敌”不仅没有投降，反而发起猛烈反攻。导调组最终判定：心理攻防行动无效，任务失败。

“形势任务在变，开展作战中政治工作的方法手段也应跟着变。”该连指导员的一席话，引发这名机关干部深思。随后，该旅举一反三、深挖根源，组织机关干部围绕战备训练、政治工作等在基层营连展开调研，发现个别单位训练中依然有拘泥于预想套路的固化思维，存在”战场喊话一喊就灵”等作战中政治工作研练走过场的问题。

通过系统梳理调研中发现的问题，该旅决定深入纠治训练中存在的顽症痼疾，清除思想中存在的和平积弊。他们召开议战议训会制订具体整改措施，严格考核评定标准，优化调整训练方案，在各级牢固立起备战打仗指挥棒，从根本上增强官兵实战意识，促进部队实战化训练提质增效。

向打仗聚焦，以实训强能。连日来，该旅官兵将学习贯彻中央军委政治工作会议精神焕发出的政治热情，转化为精武强能的实际行动，在真抓实备、真打实练、真考实训中淬炼打赢本领，圆满完成各项训练任务。

A Certain Army Brigade Focuses on Fighting and Strengthens Its Capabilities Through Practical Training

Source: China Military Network-People’s Liberation Army Daily Author: Hu Yunyan Chi Juncheng Editor: Sun Yue

2025-02-27

A certain army brigade thoroughly studies and implements the spirit of the Central Military Commission’s Political Work Conference——

Focus on fighting and strengthen its capabilities through practical training

■Hu Yunyan, reporter of the People’s Liberation Army Daily, special correspondent Chi Juncheng

“Insufficient ability to handle special situations” and “weak awareness of the enemy’s situation”... In early spring, at a review and summary meeting after an assessment of a certain army brigade, officers and soldiers spoke directly about problems and talked about shortcomings, frankly, focusing on studying improvement measures to lay a solid foundation for the next step of training.

“Through the study of the spirit of the conference, officers and soldiers are more active in work and training, and their mental state is fuller.” The leaders of the brigade told reporters that after the Central Military Commission’s political work conference was held, they focused on the six key tasks of promoting political building of the army on the new journey, combined the study of the spirit of the conference with solving practical problems, guided everyone to focus on the main responsibilities and main business of preparing for war, and actively solved the difficulties and bottlenecks that restricted the improvement of the combat effectiveness of the troops, and promoted the study and implementation of the spirit of the Central Military Commission’s political work conference to go deep and practical with the actual results of solving problems.

In practice, the brigade made full use of opportunities such as on-site investigation, war and training discussions, organized cadres to go deep into the grassroots, compared with the actual combat standards to sort out the shortcomings of the troops in training, and formed a list of problems. On this basis, the cadres of the organs led the topics to go deep into the front line, analyzed the crux of the problem with the grassroots officers and soldiers, and formulated countermeasures one by one. The brigade also insisted on combining “immediate reform” with “long-term establishment”, guiding the battalions and companies to consolidate their experience and practices, and at the same time organizing “looking back” to ensure that the problems were rectified in place.

Not long ago, a cadre of the brigade went deep into a company to investigate the theme of actual combat training. During the exchange, the instructor of the company told about a failed experience. In a confrontation training, facing the situation that the “enemy” relied on fortifications to resist stubbornly, the instructor organized officers and soldiers to use conventional means such as battlefield shouting to persuade them to surrender, but the “enemy” not only did not surrender, but launched a fierce counterattack. The guidance and coordination group finally determined that the psychological offensive and defensive actions were ineffective and the mission failed.

“The situation and tasks are changing, and the methods and means of carrying out political work in combat should also change accordingly.” The words of the company instructor triggered the cadre’s deep thinking. Subsequently, the brigade drew inferences from one example and dug deep into the root causes, and organized the cadres of the agency to conduct research on combat readiness training and political work at the grassroots battalions and companies. It was found that some units still had a fixed mindset of sticking to the expected routines in training, and there were problems such as “battlefield shouting works as soon as it is shouted” and the training of political work in combat was perfunctory.

Through systematically sorting out the problems found in the investigation, the brigade decided to thoroughly correct the stubborn problems in training and eliminate the peacetime malpractices in thinking. They held a meeting to discuss war and training to formulate specific rectification measures, strictly enforce assessment standards, optimize and adjust training plans, firmly establish the baton of preparing for war at all levels, fundamentally enhance the actual combat

awareness of officers and soldiers, and promote the improvement of quality and efficiency of actual combat training of troops.

Focus on fighting and strengthen capabilities through actual training. In recent days, the officers and soldiers of the brigade have transformed the political enthusiasm inspired by the spirit of the Central Military Commission's Political Work Conference into practical actions to improve their military skills and capabilities, and temper their ability to win in real preparation, real training, and real examinations and training, and successfully complete various training tasks.

战车驰骋炮声隆 陆军某旅装甲分队实弹射击训练

来源：中国军网-解放军报 作者：毛英椿　肖祖滨　敬轩 责任编辑：孙悦 发布：2025-02-27

战车驰骋炮声隆

——陆军某旅装甲分队实弹射击训练掠影

■毛英椿　肖祖滨　敬　轩　摄影报道

随着信号弹划破天空，战车驰骋、烟尘弥漫……初春时节，陆军某旅装甲分队一场跨昼夜实弹射击训练拉开帷幕。

官兵奔向战位。

机动途中，”敌”情突至。车长果断下达战斗指令，驾驶员快速占领射击阵位，炮手迅疾装填弹药，射手精确瞄准。少顷，火舌喷涌，炮弹直击左前方”敌”暗堡目标。随后，战车炮塔快速调转方向，又对右前方”敌”装甲目标实施打击。

“敌”情解除，战车继续前进。炮火拦阻、电磁干扰、无人机侦察……导调组临机导调多种特情。各车组成员沉着应对，一一化解。

火力打击”敌”目标。

战车快速机动。

夜幕降临，硝烟再起。部队很快转入夜间射击训练，官兵利用热成像仪精准锁定目标，”敌”残余力量被精准清除。

全神贯注观察”敌”情。

据介绍，此次训练紧贴实战设置多种”敌”情和突发情况，检验官兵战术素养。参训官兵连续战斗，先后完成多个波次、多种方式的实弹射击，锤炼了实战能力。

Tanks Gallop and Cannons Roar. The Armored Unit of a Certain Army Brigade Conducts Live-Fire Shooting Training

Source: China Military Network-Liberation Army Daily Author: Mao Yingchun, Xiao Zubin, Jing Xuan Editor: Sun Yue Release: 2025-02-27

Tanks gallop and cannons roar

——A glimpse of the live-fire shooting training of an armored unit of a certain army brigade

■Photo report by Mao Yingchun, Xiao Zubin, Jing Xuan

As the signal flares cut through the sky, tanks galloped and smoke filled the air... In early spring, a day-and-night live-fire shooting training of an armored unit of a certain army brigade kicked off.

Officers and soldiers rushed to their positions.

During the maneuver, the “enemy” situation suddenly arrived. The commander decisively issued a combat order, the driver quickly occupied the shooting position, the gunner quickly loaded ammunition, and the shooter aimed accurately. After a while, the flames gushed out, and the shells hit the “enemy” bunker target in the left front. Afterwards, the tank turret quickly turned around and attacked the “enemy” armored target in the right front.

The “enemy” situation was resolved, and the tanks continued to move forward. Artillery fire blocking, electromagnetic interference, drone reconnaissance... The command and control group directed various special situations on the spot. Each crew member responded calmly and resolved them one by one.

Firepower hit the “enemy” target.

The tanks maneuvered quickly.

As night fell, the smoke rose again. The troops quickly turned to night shooting training. The officers and soldiers used thermal imagers to accurately lock the target, and the remaining “enemy” forces were accurately eliminated.

Concentrate on observing the “enemy” situation.

It is reported that this training closely follows the actual combat and sets up a variety of “enemy” situations and emergencies to test the tactical qualities of the officers and soldiers. The participating officers and soldiers fought continuously, completed multiple waves and various methods of live-fire shooting, and tempered their actual combat capabilities.

第 82 集团军某旅突出单兵单装专业协同训练考核——

以 体 "系考"牵引 "合成练"

■党贺龙 程春蕾 解放军报记者 韩 成

该旅官兵闻令冲向战位。韩 成摄

复盘演训任务，研讨经典战例，梳理战法打法……春寒料峭，记者来到第 82 集团军某旅采访看到，机关部门正在组织作战问题集中会研活动。该旅 “全能型炮班长”李文明围绕阵地防卫提报的课题成果，受到评审团好评。

“结合前期经验总结，旅队进一步改进单兵单装训练考核模式，让我的能力水平得到快速提升。”李文明与记者聊起自己的经历时说，他不仅是旅队考评模式探索创新的参与者、见证者，而且是相关举措落地落实的受益者。

此前，在上级赋予的重大任务中，李文明与战友表现出色，所在班组多次获”神炮班”荣誉。去年初，该旅在基础训练中，围绕单兵单装训练考核，探索构建融合多专业课目、内容动态更新的”滚动方案库”，并利用这一方案库走开训、考、评一体路子。”起初，这种考评方式让我和战友感到前所未有的本领恐慌。”李文明说，一次比武考核”走麦城”后，他认真复盘分析、查摆训练短板，按照方案库中滚动更新的考核要求开展针对性训练，在不断夯实能力基础的同时，强化提升全班人员实战能力。

“考核模式接续升级，倒逼官兵不断提升专业技能和实战本领。”李文明说，去年驻训期间，旅队在实施”滚动方案库”考核模式的基础上，又尝试推开”营淬火”训练，着眼检验营级作战单元中官兵协同作战本领，引导大家从基础训练阶段就注重强固战斗力底盘，并在合成训练中强化体系意识、找准角色定位、明确战位所需。

今年初，李文明迎来一个新的角色——训练中，他被安排到指挥席，成为营指挥员的参谋助手，不但参与任务的筹划部署，而且与干部骨干一起开展作战课题研究。

“经过一段时间的实践探索，我们总结官兵能力生成规律，完善能力考评机制，聚焦单元集成训、战术协同训、对抗检验训，改进完善’营淬火’训练方案，提升各级指挥员合成指挥和官兵协同作战能力。”该旅领导告诉记者，在考核设计上，他们区分不同类型营级单位，根据作战运用特点分别制订组训方案，将相对成熟的纳入”滚动方案库”；在考评内容上，紧贴实案要求、核心能力和打仗急需，瞄准研究课题设计训练重点和评估要点，探索战训耦合的战斗力生成链路；在考评组织上，设计多个典型任务场景，并运用多种形式构设实战化训练环境，以”体系考”牵引”合成练”，助力各作战单元攥指成拳、实现整体能力跃升。

记者翻阅该旅”营淬火”训练方案看到，去年底考核复盘中梳理的问题短板，均被细化纳入新年度考评指标。”训练内容、考核条目的滚动升级，是这一训练方案的重点。”该旅作训科刘参谋告诉记者，他们着眼提升官兵合成素养，建立方案库常态滚动机制，在每次”营淬火”训练结束后，及时收集汇总评估数据、制订问题复盘清单，组织人员更新特情导调内容，确保”打一仗、进一步”。

“部署反制穿越机小组，申请友邻特战力量支援……”某营军官训练室内，该营王副营长正带领官兵组织模拟训练。在配属警戒力量时，王副营长不仅考虑到常规”敌情”，还筹划了多个”敌情”应对小组，同时注重友邻兵力的协同运用，从而为战炮分队快速占领阵地提供高效保障。

过硬的实力源自扎实的训练。记者采访了解到，从去年底开始，王副营长便带领官兵冒着严寒强短板、补弱项。新年度训练展开后，经验丰富的他敏锐地意识到，作为”滚动方案库”的升级版，”营淬火”训练必将增加新的特情场景和新的课目内容，应对新的情况必须加紧把本领练全面、练过硬。

“新的考核模式就像一位睿智的检测员，官兵基础夯得牢不牢、本领练得硬不硬、协同意识强不强，到了考场上都逃不过它的’法眼’。”谈及自己的练兵收获，王副营长提及”营淬火”训练中的两次经历。一次是组织战场道路勘察时，作为先遣分队指挥员，他因没有及时运用配属的工兵力量，延滞了后续部队行军速度；一次是开展作战保障中，他因忽视友邻部队兵力油料、弹药消耗量等情况，对弹种毁伤分析不精细，导致物资器材调配失当。

“无论是指挥员，还是普通官兵，只有人人立足自身战位、强化协同意识、练就过硬本领，才能确保作战体系同频共振、合力锻造制胜铁拳。”王副营长说，通过在”营淬火”训练中感知体系、深化融合、练强协同，他越发深刻地感受到体系练兵之要，尤其是作为一级指挥员开展任务筹划、进行指挥部署时，更要强化体系意识，只有切实将自己摆进作战体系，通盘考量人员、装备、要素、专业等因素，才能为战场制胜作出更大贡献。

前不久，王副营长被该旅推荐参加上级组织的某项战备任务。他充分运用”营淬火”训练中积累的经验，围绕火力分队等方面力量运用的标准规范积极建言，并聚焦待战分队有效融入体系链路提出自己的看法，得到上级领导认可。

“体系能力形成不是朝夕之事，推进合成训练是一个复杂的系统工程，要求各级把训练组织规范好、组训队伍建设好、保障条件配套好。”该旅领导说，下一步，他们将组织班、排、连战术小规模合成训练，切实筑牢战斗力建设根基；开展交叉任职、多岗锤炼提升指挥员综合素养，通过专题集训、送学培训、任务跟训等方式，逐步建强人才队伍；加大网链运用力度，注重依托系统调控战斗行动，定期开展协同训练、对抗训练，持续促进各作战力量从简单配合走向深度融合，不断增强体系作战能力。

短评

训练转型呼唤”考场革命”

■单正海

军事训练是未来战争的预演。如今，在没有战争检验的情况下，训练考核就成为衡量部队战斗力水平的重要手段，也是撬动训练质量提升的重要杠杆。如何用好军事训练考核这个”

指挥棒”，达到以考促训、以考促建、以考促战目的，是部队各级面对的一个重要课题。第 82 集团军某旅在探索构建单兵单装考评”滚动方案库”的基础上，通过改进训练考核模式提升部队战斗力。这一做法值得参考。

战场无定势，练兵贵思变，训练转型呼唤”考场革命”。当前，有的单位开展训练考核存在组织方法单一、程序化等情况，”硝烟味”不浓、”含战量”不高。考核方式直接关系考核成效。各级应遵循战斗力生成规律，探索”优化内容、创新手段、量化结果、灵活组考”的考评路子，加强研究、创新科学考评体系，量化官兵全过程能力指标，尤其要突出体系练兵要求，把单兵、单课目、单个作战单元的体系贡献率作为”硬指标”，引导官兵扎实筑牢战斗力基础，不断推动作战能力螺旋式上升。

战斗力建设是一项复杂的系统工程。我们在制订阶段考评方案的同时，还应进一步细化内容标准、建立科学合理的考评体系，优化考核评估指标内容，确保考得全面、考得复合、考得系统；创新考核方式和手段，引导官兵摒弃”为考而考”的应试心理，强化为战而训、向战而考的作战思维，通过以考促训、以考强能扎实提升战斗力。同时，紧盯科技之变、战争之变、对手之变构设练兵环境，让官兵在多维实战环境中真打实练，切实练强打赢本领、蓄足制胜底气。

A Certain Brigade of the 82nd Group Army: Using “System Test” to Lead “Combined-arms Training”

Source: PLA Daily Author: Dang Helong Cheng Chunlei Han Cheng Shan Zhenghai Editor: Sun Yue 2025-03-02

A certain brigade of the 82nd Group Army highlights the assessment of professional coordinated training of individual soldiers and equipment——

Using “system test” to lead “combined-arms training”

■ Dang Helong Cheng Chunlei PLA Daily reporter Han Cheng

The officers and men of the brigade rushed to their positions upon hearing the order. Photo by Han Cheng

Reviewing the training tasks, discussing classic battle examples, sorting out tactics and fighting methods... In the chilly spring, the reporter came to a certain brigade of the 82nd Group Army for an interview and saw that the organs were organizing a concentrated research activity on combat issues. The results of the subject submitted by Li Wenming, the “all-round artillery squad leader” of the brigade, on position defense were well received by the jury.

“Combined with the previous experience summary, the brigade further improved the individual soldier and equipment training assessment model, which quickly improved my ability level.” Li

Wenming talked to reporters about his experience and said that he was not only a participant and witness of the exploration and innovation of the brigade's assessment model, but also a beneficiary of the implementation of relevant measures.

Previously, in the major tasks assigned by the superiors, Li Wenming and his comrades performed well, and their team was awarded the honor of "Magic Cannon Team" many times. At the beginning of last year, in the basic training, the brigade explored the construction of a "rolling program library" that integrates multiple professional courses and dynamically updates the content around the individual soldier and equipment training assessment, and used this program library to take the path of training, assessment and evaluation. "At first, this assessment method made me and my comrades feel unprecedented panic." Li Wenming said that after a competition assessment "failed", he carefully reviewed and analyzed, checked the training shortcomings, and carried out targeted training according to the assessment requirements of the rolling update in the program library. While constantly consolidating the foundation of ability, it strengthened and improved the actual combat ability of the whole class.

"The assessment model has been continuously upgraded, forcing officers and men to continuously improve their professional skills and combat capabilities." Li Wenming said that during the training last year, the brigade, on the basis of implementing the "rolling solution library" assessment model, also tried to promote the "battalion quenching" training, focusing on testing the coordinated combat capabilities of officers and men in battalion-level combat units, guiding everyone to focus on strengthening the combat effectiveness chassis from the basic training stage, and strengthening system awareness, finding the role positioning, and clarifying the combat position requirements in combined-arms training.

At the beginning of this year, Li Wenming ushered in a new role - during training, he was assigned to the command seat and became a staff assistant to the battalion commander. He not only participated in the planning and deployment of tasks, but also carried out combat research with cadres and backbones.

"After a period of practical exploration, we have summarized the law of officers and men' ability generation, improved the ability assessment mechanism, focused on unit integration training, tactical coordination training, and confrontation test training, improved and perfected the 'battalion quenching' training program, and enhanced the integrated command and coordinated combat capabilities of commanders at all levels." The brigade leader told reporters that in the assessment design, they distinguished different types of battalion-level units, formulated training plans according to the characteristics of combat use, and included relatively mature ones in the "rolling plan library"; in the assessment content, they closely followed the requirements of the actual case, core capabilities and urgent needs of fighting, aimed at the research topics to design training priorities and evaluation points, and explored the combat effectiveness generation link of combat training coupling; in the assessment organization, they designed multiple typical task scenarios, and used various forms to construct a practical training environment, using "system test" to drive

“combined-arms training”, helping each combat unit to clench its fingers into a fist and achieve a leap in overall capabilities.

The reporter looked through the brigade’s “battalion quenching” training plan and saw that the problems and shortcomings sorted out in the assessment review at the end of last year were all refined and included in the new annual assessment indicators. “The rolling upgrade of training content and assessment items is the focus of this training program.” Liu, a staff officer from the brigade’s training department, told reporters that they focus on improving the synthesis quality of officers and men, establish a normal rolling mechanism for the program library, and collect and summarize evaluation data in a timely manner after each “battalion quenching” training, formulate a problem review list, and organize personnel to update the special situation guidance content to ensure “fighting one battle and moving forward.”

“Deploy a counter-crossing aircraft team and apply for support from friendly special operations forces...” In the officer training room of a certain battalion, Deputy Battalion Commander Wang of the battalion is leading officers and men to organize simulation training. When assigning alert forces, Deputy Battalion Commander Wang not only took into account the conventional “enemy situation”, but also planned multiple “enemy situation” response teams, while focusing on the coordinated use of friendly forces, so as to provide efficient guarantees for the artillery unit to quickly occupy positions.

Strong strength comes from solid training. The reporter learned from the interview that since the end of last year, Deputy Battalion Commander Wang has led officers and men to strengthen their shortcomings and make up for their weaknesses in the severe cold. After the new year’s training began, the experienced him was keenly aware that as an upgraded version of the “rolling solution library”, the “battalion quenching” training will inevitably add new special scenarios and new course content. To cope with new situations, we must step up to practice comprehensive and hard skills.

“The new assessment model is like a wise inspector. Whether the officers and men have a solid foundation, whether their skills are hard, and whether their coordination awareness is strong, they will not escape its “eyes” when they come to the examination room.” Talking about his training gains, Deputy Battalion Commander Wang mentioned two experiences in the “battalion quenching” training. One was when organizing a battlefield road survey. As the commander of the advance team, he delayed the marching speed of the follow-up troops because he did not use the assigned engineering forces in time; the other was during the combat support. He ignored the consumption of fuel and ammunition of the friendly troops, and did not make a detailed analysis of the damage of the bullets, resulting in improper allocation of materials and equipment.

“Whether it is a commander or an ordinary soldier, only when everyone is based on their own combat position, strengthens the awareness of coordination, and develops strong skills can we ensure that the combat system resonates with the same frequency and forges a winning iron fist together.” Deputy Battalion Commander Wang said that by perceiving the system, deepening

integration, and strengthening coordination in the "battalion quenching" training, he has increasingly deeply felt the importance of system training, especially as a first-level commander, when planning tasks and conducting command deployment, it is even more important to strengthen the awareness of the system. Only by truly putting oneself into the combat system and comprehensively considering factors such as personnel, equipment, elements, and professions can we make greater contributions to battlefield victory.

Not long ago, Deputy Battalion Commander Wang was recommended by the brigade to participate in a combat readiness task organized by the superiors. He made full use of the experience accumulated in the "battalion quenching" training, actively made suggestions on the standard specifications for the use of forces in the firepower team and other aspects, and focused on the effective integration of the combat team into the system link to put forward his own views, which were recognized by the superiors.

"The formation of system capabilities is not a matter of overnight. Promoting combined-arms training is a complex system project, which requires all levels to standardize training organization, build a good training team, and provide supporting conditions." The brigade leader said that in the next step, they will organize small-scale combined-arms training for squads, platoons, and companies to effectively lay a solid foundation for combat effectiveness construction; carry out cross-appointment and multi-post training to improve the comprehensive quality of commanders, and gradually build a strong talent team through special training, training, task training, etc.; increase the use of network chains, focus on relying on the system to control combat actions, regularly carry out coordinated training and confrontation training, and continuously promote various combat forces from simple cooperation to deep integration, and continuously enhance the combat capability of the system.

Training transformation calls for "examination revolution"

■ Shan Zhenghai

Military training is a rehearsal for future wars. Nowadays, in the absence of war tests, training assessment has become an important means to measure the combat effectiveness of troops, and an important lever to leverage the improvement of training quality. How to use the "baton" of military training assessment to achieve the purpose of promoting training, construction, and war through examination is an important issue facing all levels of the troops. A brigade of the 82nd Group Army has improved the combat effectiveness of its troops by improving the training assessment model on the basis of exploring the construction of a "rolling solution library" for individual soldier and equipment assessment. This practice is worth referring to.

The battlefield is unpredictable, and training requires change. Training transformation calls for a "revolution in the examination room". At present, some units have single organizational methods and procedural training assessments, and the "smoke smell" is not strong and the "combat content" is not high. The assessment method is directly related to the assessment results. All levels should

follow the laws of combat effectiveness generation, explore the assessment path of “optimizing content, innovating means, quantifying results, and flexible organization”, strengthen research and innovation of scientific assessment systems, quantify the full-process capability indicators of officers and men, and especially highlight the requirements of system training. The system contribution rate of individual soldiers, single subjects, and single combat units should be used as “hard indicators” to guide officers and men to build a solid foundation for combat effectiveness and continuously promote the spiral rise of combat capabilities.

Combat effectiveness construction is a complex system project. While developing the phased assessment plan, we should further refine the content standards, establish a scientific and reasonable assessment system, optimize the assessment indicators, ensure that the assessment is comprehensive, comprehensive, and systematic; innovate assessment methods and means, guide officers and men to abandon the test-taking mentality of “taking the exam for the sake of taking the exam”, strengthen the combat thinking of training for war and taking the exam for war, and solidly improve combat effectiveness by promoting training and strengthening ability through examinations. At the same time, we should keep a close eye on changes in technology, war, and opponents to build a training environment, so that officers and men can really fight and practice in a multi-dimensional actual combat environment, and effectively strengthen their ability to win and accumulate the confidence to win.

第 71 集团军某连设立”先锋荣誉墙”，让官兵成长看得见

来源：中国军网-解放军报 作者：余睿喆 周伟 责任编辑：孙悦

2025-03-07

第 71 集团军某连激励官兵精武强能争创荣誉——

“先锋荣誉墙”：让官兵成长看得见

■余睿喆 解放军报特约通讯员 周 伟

“小涂，你上榜了！”“有两下子，我们也得再加把劲了……”一个周末，第 71 集团军某旅”弘扬’两不怕’精神模范连”野战荣誉室里，”先锋荣誉墙”刚刚更新，不少官兵驻足观看讨论，为上榜的战友点赞。

看到这一幕，该连指导员孙佳祥很是欣慰。他告诉笔者，设立”先锋荣誉墙”，是连队对野战荣誉室内容形式的一次探索实践，实实在在起到了鼓舞官兵士气的作用。

驻训比武的奖牌、内务评比的锦旗、教育授课小标兵……笔者看到，”先锋荣誉墙”上，中士吴欣豪获得的”荣誉先锋”奖状在中间位置，尤为引人注目。在”先锋荣誉墙”的另一侧，

是连队历史上获得的各项传统荣誉。两面墙板相对而立，意在鼓励官兵传承先辈精神，书写新的荣光。

“‘先锋荣誉墙’虽然不大，但每一份荣誉都是连队官兵用汗水拼来的。”孙指导员告诉笔者，前段时间，连队受领任务较多、压力不小，驻训条件艰苦，个别官兵有些思想懈怠。一开始，连队按照惯例，将标语口号、前辈战斗事迹展板以及英模挂像等荣誉，从营区搬到驻训一线，并组织官兵参观讨论。可一段时间下来，效果并未达到预期：野战荣誉室内的陈列虽然丰富，但参观的官兵越来越少。

为何会出现这种情况？连队党支部组织了一次座谈，听取官兵的意见。

“咱们连队历史荣誉厚重，驻训取得的成绩相比起来微不足道”“这些都是革命先辈取得的，我们没啥参与感”“这些英雄事迹学过很多次了，已经耳熟能详，和在营区时没什么两样”……官兵的心里话，让连队干部陷入反思。

针对这些问题，孙指导员带领大家就野战荣誉室的陈列形式和标准进行探讨。大家普遍感到，要发挥野战荣誉室的教育感召作用，设置就不能简单照搬营区内容，必须紧贴任务和工作实际，接地气、有战味，引导官兵积极参与争创荣誉，这样既能展示连队光辉历史，也能见证官兵成长进步。

集思广益后，连里决定整合教育资源，在展示连队传统荣誉的基础上，新设置一面”先锋荣誉墙”，在驻训期间定期更新，让官兵新取得的荣誉和成绩也能有展示平台。

实践中，连队党支部根据驻训实际情况，明确榜上的各项内容和标准。为了强化激励引导，他们在”先锋荣誉墙”最显眼的地方设置”荣誉先锋”榜，结合每日讲评、阶段任务等，对官兵思想政治、军事训练、工作业绩、纪律作风、作用发挥 5 个方面的表现进行综合评定，每月汇总评比一次，选定排名前三的个人和集体为”荣誉先锋”。

规则公布后，连队官兵个个动力满满，憋足了劲准备”冲榜”。

一次，连队组织小比武，”王杰班”中士吴欣豪渴望为班里夺得荣誉。他克服心理压力，经常自觉加练，在比武中表现出色。当月底，吴欣豪的综合评分遥遥领先，被评为连队”荣誉先锋”。当奖状挂上荣誉墙的那一刻，他激动地说：”没给老班长丢脸！”

“过去的荣光是先辈们拼来的，新荣誉要靠我们来争取！”身处野战荣誉室，”王杰班”副班长周志鹏动情讲起此前课题攻关的经历。那一次，他带领全班进行某战法研究，面对新情况、新战法，他带头学理论、研战例，反复练、抠细节。遇到难题攻关受阻时，他就到野战荣誉室静坐思考，为自己打气：”一定要带领战友啃下硬骨头，取得新荣誉！”

功夫不负有心人。成果验收时，周志鹏牵头研究的新战法得到验证认可，全班也受到考核组好评。在战友的掌声中，他亲手将荣誉奖牌挂上”先锋荣誉墙”，在野战荣誉室留下全班的”专属印迹”。

野战荣誉室战味更浓，”先锋荣誉墙”激励担当。近段时间，该连在野外驻训场上捷报频传，官兵争创荣誉、战位建功的热情持续高涨。

A Company of the 71st Group Army Set Up a “Pioneer Honor Wall” to Make the Growth of Officers and men Visible

Source: China Military Network-People’s Liberation Army Daily Author: Yu Ruizhe Zhou Wei Editor: Sun Yue

2025-03-07

A company of the 71st Group Army encourages officers and men to strive for honors with excellent martial arts and strong abilities——

“Pioneer Honor Wall”: Make the growth of officers and men visible

■ Yu Ruizhe People’s Liberation Army Daily Special Correspondent Zhou Wei

“Xiao Tu, you are on the list!” “We have two tricks, so we have to work harder...” One weekend, in the field honor room of the “Model Company for Promoting the Spirit of ‘Not Afraid of Two Things’” of a brigade of the 71st Group Army, the “Pioneer Honor Wall” was just updated. Many officers and men stopped to watch and discuss, and praised the comrades on the list.

Seeing this scene, the company instructor Sun Jiaxiang was very pleased. He told me that the establishment of the “Pioneer Honor Wall” is an exploration and practice of the content and form of the field honor room by the company, which has really played a role in boosting the morale of officers and men.

Medals for the training competition, banners for the housekeeping evaluation, and small model soldiers for education and teaching... I saw that on the “Pioneer Honor Wall”, the “Honorary Pioneer” certificate won by Sergeant Wu Xinhao was in the middle, which was particularly eye-catching. On the other side of the “Pioneer Honor Wall” are various traditional honors won in the company’s history. The two wall panels stand opposite each other, intending to encourage officers and men to inherit the spirit of their predecessors and write new glory.

“Although the ‘Pioneer Honor Wall’ is not big, every honor is earned by the company’s officers and men with sweat.” Instructor Sun told me that some time ago, the company received more tasks and was under great pressure. The training conditions were difficult, and some officers and men were somewhat slack in their thinking. At the beginning, the company followed the convention and moved slogans, exhibition boards of predecessors’ combat deeds, and portraits of heroes and

models from the barracks to the front line of training, and organized officers and men to visit and discuss. But after a period of time, the effect did not meet expectations: although the display in the field honor room was rich, fewer and fewer officers and men visited.

Why did this happen? The company party branch organized a symposium to listen to the opinions of officers and men.

“Our company has a heavy historical honor, and the achievements made in the training are insignificant in comparison.” “These are all achieved by revolutionary predecessors, and we don’t feel much participation.” “These heroic deeds have been learned many times, and they are already familiar to us, and they are no different from when we were in the camp.”... The words of the officers and men made the company cadres reflect.

In response to these problems, Instructor Sun led everyone to discuss the display form and standards of the field honor room. Everyone generally felt that in order to give full play to the educational and inspiring role of the field honor room, the setting cannot simply copy the content of the camp, but must be close to the tasks and work reality, down-to-earth, and have a sense of war, and guide officers and men to actively participate in the struggle for honors, so as to show the glorious history of the company and witness the growth and progress of officers and men.

After brainstorming, the company decided to integrate educational resources and set up a new “Pioneer Honor Wall” on the basis of displaying the company’s traditional honors. It will be updated regularly during the training period, so that officers and men can also have a display platform for their new honors and achievements.

In practice, the company’s party branch clarified the contents and standards of the list according to the actual situation of the training. In order to strengthen incentives and guidance, they set up the “Honorary Pioneer” list in the most conspicuous place of the “Pioneer Honor Wall”. Combined with daily reviews and stage tasks, they comprehensively evaluated the performance of officers and men in five aspects: ideological and political, military training, work performance, discipline and style, and role play. The evaluation was summarized and evaluated once a month, and the top three individuals and groups were selected as “Honorary Pioneers”.

After the rules were announced, the company’s officers and men were full of motivation and were ready to “rush to the list”.

Once, the company organized a small competition, and Sergeant Wu Xinhao of the “Wang Jie Class” was eager to win honor for the class. He overcame psychological pressure, often consciously practiced more, and performed well in the competition. At the end of the month, Wu Xinhao’s comprehensive score was far ahead and he was named the company’s “Honorary Pioneer”. When the certificate was hung on the honor wall, he said excitedly: “I didn’t bring shame to the old squad leader!”

“The glory of the past was fought for by our predecessors, and the new honor depends on us!” Zhou Zhipeng, deputy squad leader of the “Wang Jie Class”, was in the field honor room and talked about his experience in the previous research project. That time, he led the whole class to study a certain tactic. Faced with new situations and new tactics, he took the lead in learning theories, studying combat examples, practicing repeatedly, and picking up details. When he encountered difficulties and was blocked from solving problems, he went to the field honor room to sit and think, and cheered himself up: “I must lead my comrades to bite the hard bones and win new honors!”

Hard work pays off. When the results were accepted, the new tactics led by Zhou Zhipeng were verified and recognized, and the whole class was also praised by the assessment team. Amid the applause of his comrades, he personally hung the honor medal on the “Pioneer Honor Wall”, leaving the “exclusive imprint” of the whole class in the field honor room.

The field honor room has a stronger fighting flavor, and the “Pioneer Honor Wall” inspires responsibility. Recently, the company has achieved frequent successes in field training, and the enthusiasm of officers and men to strive for honors and make contributions in battle continues to rise.

从”班长摇篮”到”随营军校”，陆军某旅教导队探索转型谋打赢

来源：中国军网-解放军报 作者：石良玉 刘 扬 责任编辑：孙悦

2025-03-07

陆军某旅教导队着眼实战探索转型——

从”班长摇篮”到”随营军校”

■石良玉 刘 扬

初春时节，陆军某旅的演训场上出现了这样一幕——教导队代替侦察连为全旅进行”敌”前沿侦察作业示范，”狙击+无人侦察”等战法让官兵眼前一亮。

“过去在一片空地训队列，如今在一座营区谋打赢。”谈及教导队的变化，教导员崔恒恒感慨，从昔日营房闲置、承训任务单一，仅能开展预提军士培训的”班长摇篮”，到如今集无人机操作、智能装备教学、跨兵种协同研训于一体的”随营军校”，教导队的转型正在产生良好辐射效应。

转型之路并非一蹴而就。几年前，崔恒恒从荣誉连队调任教导队担任教导员。当时，教导队训练模式比较传统，骨干人才专业领域固化，整体建设较为落后，这让他倍感压力。

教导队该如何建设发展？骨干交流会上，几名区队长谈起预提军士培训经验滔滔不绝，却很少提及教导队开展其他培训的可能性。这让崔教导员意识到，教导队职能单一容易形成”路径依赖”，进而导致进取动力缺失——作为”班长摇篮”，它被贴上了”只训班长”的标签。

“必须明确教导队’随营军校’的定位，将其作为综合性训练平台，向多任务、多领域转型！”转型的契机，源于一次”抢”来的任务。

那一年，旅队计划组织无人机操作手集训。得到消息后，崔教导员主动请缨，由教导队承担此次集训任务。

“要想任务完成好，人才必须跟上！”为顺利完成集训任务，崔教导员坚持”人才先行”理念，让教导队结合任务组建研战小组，在保留原有战术教练员的同时，带领其余骨干依托军事职业教育平台学习无人机基础理论，外聘专家授课辅导，借用装备训练实操。集训中，二区队长李岩将所学理论融入教学，运用”实战案例+模拟飞行”的创新模式，受到学员欢迎。

这次实践经历，为教导队转型开阔了思路。接下来的一段时间，本着让教导队成为全旅人才”蓄水池”的思路，他们着手建立动态人才库，打破营连界限，横向吸纳各类比武尖子，纵向跟踪官兵成长轨迹，将专业技能、发展情况等纳入评价体系。

如今，教导队教练员普遍精通 3 个以上专业，人才库覆盖 7 大专业领域，实现了”需要什么人才，就能快速调配什么人才”。

“从’班长摇篮’到’随营军校’，从单一承训到多元赋能，教导队的转型始终对接战场需求。”崔教导员介绍，如今，一些专业人才提出的创新战法已经在旅队推广，成果惠及基层一线，为部队战斗力建设作出重要贡献。

From “Squad Leader Cradle” to “Military School with the Camp”, The Instructor team of a Certain Army Brigade Explores Transformation and Seeks to Win

Source: China Military Network-Liberation Army Daily Author: Shi Liangyu Liu Yang Editor: Sun Yue

2025-03-07

The instructor team of a certain army brigade focuses on actual combat and explores transformation-

From “squad leader cradle” to “military school with the camp”

■Shi Liangyu Liu Yang

In early spring, such a scene appeared on the training ground of a certain army brigade-the instructor team replaced the reconnaissance company to demonstrate the “enemy” frontier

reconnaissance operation for the entire brigade, and tactics such as “sniper + unmanned reconnaissance” made the officers and men shine.

“In the past, we trained troops in an open field, but now we fight to win in a camp.” Speaking of the changes in the instructor team, instructor Cui Hengheng lamented that the transformation of the instructor team from the “cradle of squad leaders” with idle barracks and single training tasks, which could only carry out pre-provision sergeant training, to the “camp-based military school” that integrates drone operation, intelligent equipment teaching, and cross-arms collaborative research and training, is producing a good radiation effect.

The road to transformation is not achieved overnight. A few years ago, Cui Hengheng was transferred from the honorary company to the instructor team as an instructor. At that time, the training model of the instructor team was relatively traditional, the professional fields of key personnel were solidified, and the overall construction was relatively backward, which made him feel more pressured.

How should the instructor team be built and developed? At the backbone exchange meeting, several district captains talked about the experience of pre-provision sergeant training, but rarely mentioned the possibility of the instructor team to carry out other training. This made instructor Cui realize that the single function of the instructor team is prone to “path dependence”, which leads to a lack of motivation for progress-as a “cradle of squad leaders”, it is labeled as “only training squad leaders”.

“It is necessary to clarify the positioning of the instructor team’s ‘camp military school’ and use it as a comprehensive training platform to transform into a multi-task, multi-field one!” The opportunity for transformation came from a “grabbed” task.

That year, the brigade planned to organize a training camp for drone operators. After receiving the news, Instructor Cui took the initiative to ask the instructor team to undertake the training task.

“If you want to complete the task well, talents must keep up!” In order to successfully complete the training task, Instructor Cui insisted on the concept of “talent first” and let the instructor team form a research and combat team in combination with the task. While retaining the original tactical coaches, he led the rest of the backbones to learn the basic theory of drones based on the military vocational education platform, hired external experts to give lectures and guidance, and borrowed equipment for practical training. During the training camp, Li Yan, the captain of the second district, integrated the learned theories into teaching and used the innovative model of “actual combat cases + simulated flight”, which was welcomed by the trainees.

This practical experience has broadened the thinking for the transformation of the instructor team. In the following period of time, in line with the idea of making the instructor team a “reservoir” of talents for the entire brigade, they set out to establish a dynamic talent pool, break the boundaries between battalions and companies, horizontally absorb top players in various competitions,

vertically track the growth trajectory of officers and men, and incorporate professional skills and development into the evaluation system.

Today, the coaches of the instructor team are generally proficient in more than three majors, and the talent pool covers seven major professional fields, realizing “what talents are needed, what talents can be quickly deployed”.

“From the ‘cradle of squad leaders’ to the ‘camp military school’, from single training to multiple empowerment, the transformation of the instructor team has always been connected to the needs of the battlefield.” Instructor Cui introduced that now, some innovative tactics proposed by professional talents have been promoted in the brigade, and the results have benefited the grassroots frontline, making important contributions to the construction of the combat effectiveness of the troops.

第 83 集团军某旅充分发挥荣誉激励作用——

官兵建功军营 军属共享荣光

■闫帅印 郑夏云

前不久，第 83 集团军某旅组织军营开放日活动，邀请近年来 30 余名立功受奖官兵的家属来到驻地，在参观杨根思广场等红色教育基地的同时，零距离感受火热军营生活。

“荣誉不仅是个人的，更是家庭的。”该旅领导介绍，通过褒扬先进典型，发挥荣誉激励作用，不仅让军属感受到军人的荣光，更能激发官兵建功军营的动力。

“孩子立功受奖，部队不仅将喜报送上门，还邀请我们来驻地参观，全家人感到非常自豪。”二等功臣王玉恒的父亲王正国表示，他深感军营是人才成长的熔炉，也更加理解和支持儿子的选择。

在旅史馆里，军属们通过短片详细了解了丈夫、子女的工作生活情况。通信技师胡高岭的妻子感慨道：”看到他在演训任务中的出色表现，我感到很骄傲！往后的日子里，我要继续当好贤内助，做他最坚强的后盾。”

据介绍，该旅连续 10 年开展”功臣载誉返家乡”活动，推动”一人立功，全家光荣”形成社会风尚。一系列荣誉激励举措的实施，有效激发了官兵精武强能的热情。今年以来，全旅持续掀起训练热潮，各级干部骨干以身作则，广大官兵见红旗就扛、见第一就争，在各项

训练任务中屡创佳绩。该旅领导表示，下一步他们将继续创新形式方法，进一步浓厚崇尚荣誉、创先争优的良好氛围，激励官兵以更加昂扬的姿态投身强军实践。

A Certain Brigade of the 83rd Group Army: Officers and men Make Contributions to the Military Camp, and Military Families Share the Glory

Source: China Military Network-Liberation Army Daily Author: Yan Shuaiyin Zheng Xiayun Editor: Sun Yue

2025-03-07

A certain brigade of the 83rd Group Army fully exerts the role of honor incentives-

Officers and men make contributions to the military camp, and military families share the glory

■ Yan Shuaiyin Zheng Xiayun

Not long ago, a certain brigade of the 83rd Group Army organized a military camp open day event, inviting the families of more than 30 officers and men who have made meritorious contributions and received awards in recent years to come to the garrison. While visiting red education bases such as Yang Gensi Square, they experienced the hot military camp life at close range.

“Honor is not only personal, but also family.” The brigade leader introduced that by praising advanced models and playing the role of honor incentives, not only can military families feel the glory of soldiers, but also can inspire officers and men to make contributions to the military camp.

“The troops not only sent the good news to our home but also invited us to visit the station. The whole family is very proud.” Wang Zhengguo, the father of the second-class hero Wang Yuheng, said that he deeply felt that the military camp was a melting pot for the growth of talents, and he also understood and supported his son’s choice.

In the brigade history museum, the military families learned about the work and life of their husbands and children in detail through short films. The wife of communications technician Hu Gaoling said with emotion: “I am very proud to see his outstanding performance in the training mission! In the days to come, I will continue to be a good wife and be his strongest backing.”

According to reports, the brigade has carried out the “Heroes Return Home with Honor” activity for 10 consecutive years to promote the social trend of “one person’s meritorious service, the whole family’s glory”. The implementation of a series of honor incentive measures has effectively stimulated the enthusiasm of officers and men to improve their martial arts and strengthen their abilities. Since the beginning of this year, the whole brigade has continued to set off a training boom, and cadres and backbones at all levels have set an example. The majority of officers and men have taken up the red flag and strived for the first place, and have repeatedly achieved good results in various training tasks. The leaders of the brigade said that in the next step they will

continue to innovate forms and methods, further enhance the good atmosphere of respecting honor, pioneering and striving for excellence, and encourage officers and men to devote themselves to the practice of strengthening the army with a more high-spirited attitude.

全国人大代表陈晶：练兵备战 只争朝夕

来源：中国军网-解放军报 作者：亓少良 杨文月 杨 晶 责任编辑：郭妍菲 发布：2025-03-07

全国人大代表陈晶——

练兵备战 只争朝夕

■中国军网记者 亓少良 杨文月 杨 晶

多次征战国际国内比武赛场，勇夺 20 余枚奖牌，从”狙击枪王”到”全军军事训练先进个人”，全国人大代表、陆军第 80 集团军某旅连长陈晶说：”要将荣誉视为激励，不断奋斗，奔赴新的战场！”

成长为”狙击枪王”绝非朝夕之功。这些年，为了练”准”，陈晶常用针线穿大米，或在 50 米距离上打弹壳；为了练”远”，他苦练测风速、算弹道本领，直到双眼酸痛得睁不开；为了练”忍”，他冒着酷暑在荆棘丛里练狙击，顶着寒风在冷水沟里练潜伏。

担任连长后，陈晶不再满足于个人练好狙击、侦察技能，而是带领战友们向着合成精兵发起新突击，实现新装备当年列装当年形成战斗力。”练兵备战，只争朝夕，战斗力建设不能等也等不起！”陈晶说。

今年两会，中国军网记者将镜头对准陈晶。这位”硬汉”连长关注哪些话题，带来了战友们什么心声？扫描下方”解放军报客户端”和”中国军网”二维码，观看两会精彩视频和专题新闻。

NPC Deputy Chen Jing: Training and Preparing for War, Seize Every Minute

Source: China Military Network-Liberation Army Daily Author: Qi Shaoliang, Yang Wenyue, Yang Jing Editor: Guo Yanfei Release: 2025-03-07

NPC deputy Chen Jing——

Training and preparing for war, seize every minute

■China Military Network reporter Qi Shaoliang, Yang Wenyue, Yang Jing

Fighting in international and domestic competitions many times, winning more than 20 medals, from “Sniper Rifle King” to “Advanced Individual in Military Training of the Whole Army”, NPC deputy and company commander of a brigade of the 80th Army Group of the Army Chen Jing said: “We must regard honor as an incentive, keep striving, and rush to new battlefields!”

Becoming a “Sniper Rifle King” is not an overnight achievement. In recent years, in order to practice “accuracy”, Chen Jing often used needles and threads to thread rice, or shot shells at a distance of 50 meters; in order to practice “distance”, he practiced measuring wind speed and calculating ballistics until his eyes were sore that he couldn’t open them; in order to practice “endurance”, he practiced sniping in the thorn bushes in the scorching heat, and practiced lurking in the cold water ditch in the cold wind.

After becoming the company commander, Chen Jing was no longer satisfied with his personal practice of sniping and reconnaissance skills, but led his comrades to launch a new assault on the combined-arms elite soldiers, so that new equipment could be equipped and formed in the same year. “Training and preparing for war, we must seize the day and night, and we can’t wait and can’t afford to wait for the construction of combat effectiveness!” Chen Jing said.

At this year’s two sessions, China Military Network reporters aimed their cameras at Chen Jing. What topics did this “tough guy” company commander pay attention to, and what voices did he bring to his comrades? Scan the “People’s Liberation Army Daily Client” and “China Military Network” QR codes below to watch the wonderful videos and special news of the two sessions.

全国人大代表陈瑜：让青春在为战研战中闪耀光芒

来源：中国军网 作者：刘镇 李庆桐 责任编辑：王粲 发布：2025-03-09

全国人大代表陈瑜：让青春在为战研战中闪耀光芒

■中国军网记者 刘镇 李庆桐

海报制作：孙悦 徐占虎

回到代表团驻地，全国人大代表陈瑜忽然停下了脚步。她仰起头，望了望被春风拭得透亮的天空，嘴角不自觉地上扬，绽出一抹舒心的微笑。

恰好看见这一幕，记者快步走到陈瑜身旁，轻声和她打招呼。听见记者的声音，陈瑜转过头来，感慨地说：”我们那边也时常有这样的好天气，一样纯净又温暖的蓝天。”

作为一名无人机飞控手，虽然同样是驾驭战机、翱翔云端，但陈瑜的视线却始终聚焦在指控方舱里，那一方小小的屏幕之上。一次执行任务，陈瑜在指控方舱里坚守岗位 4 个多月，直到任务圆满完成。她回忆，”那段时间虽然一直在天上’飞’，但其实看到的只有一组组飞行数据反馈。”

战友们说，陈瑜的眼神中总是透露着一股坚韧与专注。4 年前，她还是通信连的”金牌话务员”。三尺机台上，她创下过”千次接转零差错”的纪录，带出的兵个个是骨干。但每当听到演训场上的轰鸣声，她的目光总忍不住飘向窗外。”我也想冲在第一线，让青春和’战场’直接对话。”

2021 年，旅里组建首个女子无人机班的消息传来，陈瑜连夜写下转岗申请书。从通信连的”金牌话务员”到旅里的首个女子无人机班班长，从保障打赢到无形战场，对于陈瑜来说，在梦想面前”兴奋远远大于压力”。从第一次接触无人机，到熟练掌握无人机操控，她带领战友们与时间赛跑，面对挑战一次次迎难而上，不到一年时间便形成了战斗力。

在探索无人机实战应用的过程中，陈瑜整理出了一本”胜战台账”，上面记录着每次任务复盘中提出的问题：临时绕行超出续航使用计划、指控站与机务站协同不紧……在她心中，始终牢记着一句话：”成绩属于过去，问题才是推动工作的’引擎’。”

这样的深刻感悟，源于令她印象深刻的一次考核。当时，考核过程中因”信号误判”，最终被判定不及格。考核结束后，陈瑜把自己一人关在了训练室里，将目光紧紧锁在信号频谱图上，一遍又一遍地仔细研读，深化记忆。见班长如此执着，女兵们也纷纷回到了训练室。

“班长，加练算我们一份！”几双温暖有力的手同时搭在了陈瑜略显瘦削的肩头。已近深夜，星光透过玻璃，洒落在这一张张年轻朝气的面庞上，她们的眼中跳动着同样炽热的火焰，那是在难关面前不服输的倔强，更是对胜利不懈追求的渴望。

“我们所有人都拧成一股绳，开弓没有回头箭。”此后，女子无人机班的强化训练全方位展开。2 个月后，陈瑜带领班组将理论考核刷到接近满分；无人机组装时间缩短一半；在某新型无人机首飞任务中更是以默契的配合化解了突发险情。看着连队荣誉墙上新增的集体三等功荣誉牌，这群女兵向战拼搏的劲头更足了。

陈瑜和战友们始终瞄准未来战场，积极探索无人化作战的制胜机理，前进的脚步从未停歇。”近年来，随着无人化作战力量发展，对无人装备相关人才的需求也逐渐增大。”陈瑜深知，要想抢占未来战争制高点，打开体系”新视界”，就必须加大人才培养力度。

过去的一年，陈瑜将目光聚焦在无人机作战人才培养上。”过去训练盯着’飞得好’，现在更关注’怎么飞才能打赢’。”陈瑜坦言，这种”带着敌情起飞”的转变，正是近年来她和战友们思想上最为深刻的”蝶变”。

“12年前参军时，我渴望改变自己；现在，我想和战友们一起改变未来。”蔚蓝的天空下，这位年轻女兵明亮的眼眸中闪耀着光芒。

NPC Deputy Chen Yu: Let Youth Shine in War Research

Source: China Military Network Author: Liu Zhen Li Qingtong Editor: Wang Can Release: 2025-03-09

NPC deputy Chen Yu: Let youth shine in war research

■China Military Network reporter Liu Zhen Li Qingtong

Poster production: Sun Yue Xu Zhanhu

Back to the delegation’s residence, NPC deputy Chen Yu suddenly stopped. She looked up at the sky that was wiped by the spring breeze, and the corners of her mouth unconsciously rose, revealing a comfortable smile.

Just seeing this scene, the reporter walked quickly to Chen Yu and greeted her softly. Hearing the reporter's voice, Chen Yu turned around and said with emotion: "We often have such good weather over there, the same pure and warm blue sky."

As a drone flight controller, although he also controls a fighter and soars in the clouds, Chen Yu's sight is always focused on the small screen in the command and control cabin. During a mission, Chen Yu stayed at her post in the command cabin for more than four months until the mission was successfully completed. She recalled, "Although I was 'flying' in the sky during that time, I actually only saw a group of flight data feedback."

Comrades said that Chen Yu's eyes always revealed a sense of tenacity and concentration. Four years ago, she was still the "gold medal operator" of the communications company. On the three-foot machine, she set a record of "zero error in a thousand transfers", and all the soldiers she led were backbones. But whenever she heard the roar on the training ground, her eyes couldn't help but drift out the window. "I also want to rush to the front line and let youth and the 'battlefield' talk directly."

In 2021, the news came that the brigade had formed the first female drone class, and Chen Yu wrote a transfer application overnight. From the "gold medal operator" of the communications company to the first female drone class leader in the brigade, from ensuring victory to the invisible battlefield, for Chen Yu, "excitement is far greater than pressure" in front of dreams. From the first contact with drones to mastering drone control, she led her comrades to race against time, faced challenges again and again, and formed combat effectiveness in less than a year.

In the process of exploring the actual combat application of drones, Chen Yu compiled a "victory account book", which recorded the problems raised in each mission review: temporary detours exceeded the endurance use plan, the command station and the maintenance station did not coordinate tightly... In her heart, she always kept in mind a sentence: "Achievements belong to the past, and problems are the 'engine' that drives work."

Such a profound feeling came from an assessment that impressed her. At that time, she was eventually judged to have failed due to "signal misjudgment" during the assessment. After the assessment, Chen Yu locked herself in the training room, locked her eyes on the signal spectrum diagram, and read it carefully over and over again to deepen her memory. Seeing the squad leader so persistent, the female soldiers also returned to the training room.

"Squad leader, count us in for extra training!" Several pairs of warm and powerful hands were placed on Chen Yu's slightly thin shoulders at the same time. It was late at night, and the starlight shone through the glass onto these young and energetic faces. The same fiery flame danced in their eyes, which was the stubbornness of not giving up in the face of difficulties, and the desire for unremitting pursuit of victory.

"We are all united, and there is no turning back once the bow is drawn." Since then, the intensive training of the women's drone class has been carried out in all directions. Two months later, Chen

Yu led the team to get close to full marks in the theoretical assessment; the drone assembly time was shortened by half; and in the first flight mission of a new type of drone, the sudden danger was resolved with tacit cooperation. Looking at the newly added collective third-class merit honor plaque on the company's honor wall, this group of female soldiers is more motivated to fight.

Chen Yu and his comrades have always aimed at the future battlefield, actively explored the winning mechanism of unmanned combat, and never stopped moving forward. "In recent years, with the development of unmanned combat forces, the demand for unmanned equipment-related talents has gradually increased." Chen Yu knows that in order to seize the commanding heights of future wars and open up the "new horizon" of the system, it is necessary to increase the intensity of talent training.

In the past year, Chen Yu has focused on the training of UAV combat talents. "In the past, training focused on 'flying well', but now we focus more on 'how to fly to win'." Chen Yu frankly said that this change of "taking off with enemy information" is the most profound "butterfly change" in her and her comrades' thinking in recent years.

"When I joined the army 12 years ago, I was eager to change myself; now, I want to change the future with my comrades." Under the blue sky, the young female soldier's bright eyes shined with light.

克敌制胜靠什么？军队代表委员：应擦亮这把"利刃"

来源：中国军网 作者：毛志文 崔然 责任编辑：于海洋 发布：2025-03-09

气为兵神，勇为兵本。

迎着春之召唤，军队代表委员肩扛使命共赴盛会。在队伍中间，始终澎湃着这样一种昂扬奋进的力量。

全国人大代表、陆军第 82 集团军某旅张冬旭在"代表通道"回答记者提问。中国军网记者 李庆桐摄

挺立如松、字句铿锵，眉宇间透着英气，硬汉营长张冬旭走上”代表通道”，浓郁的战斗气息扑面而来。

血性胆气，是军人敢打善拼的不竭动能。擦亮战斗精神这把”利刃”，战场上才能底气十足、豪气充盈。

对话代表委员，积淀的军人本色尽显——

或是来自英雄连队，带着”红色印记”一往无前；或是有胆魄、善深耕，脚踏实地、久久为功；或是冲锋不止，让”英雄气”接续传承……

而在他们身后，”后浪”正奔涌向前。

底色

“有了信仰，才能在战场上迸发战斗激情”

一把弯曲的刺刀，是人大代表赵松对老连队历史最具象化的理解。

赵松近影。 金 硕摄

从参军入伍到任”硬骨头六连”第 44 任连长，从作为新兵首次在连史馆参观到给一茬茬官兵讲解，过去在六连时，赵松对”硬骨头精神”内涵的认识是”实时更新”的。每次望着件件老物件，前辈们血战到底的画面就会在眼前延展开来——

77 年前的那个冬夜，天降大雪，六连老英雄刘四虎赤膊冲进敌群，拿着刺刀与 10 余名敌人拼杀，一连刺死 7 个敌人，自己身上却 11 处负伤，最终昏倒在了战壕里，而他手中那把刺刀已经拼弯了……

英雄之气在天地山河间激荡，也熔铸进了历史的年轮。

“八一勋章”获得者韦昌进。（资料图）

每次听到英雄事迹，韦昌进委员的内心都会同频共振，仿佛又与自己的战斗青春”相遇”了。

和赵松一样，当年来到军营后，韦昌进才知道，小时候在《开国大典》纪录片中看到的第一支走过天安门的受阅方阵，就是由他所在部队的官兵抽组而成的。

“原来，这支部队是从井冈山一路打出来的，还在朝鲜战场立下汗马功劳，被外国军队称为’王牌’！”

如星辰、似灯塔，英雄精神指引着英雄儿女慷慨赴难。当祖国发出召唤，韦昌进立即随部队开赴边疆，走上了血火交融的战场。

后来，追逐着光的人，自己也成为了光。

为什么是他们？能在国家需要时挺身而出、横刀立马？因为他们有共同的理想和坚定的信念，因为他们心系祖国命运与民族兴衰。

“一定要树立政治信仰，有了信仰，才能在战场上迸发战斗激情。”韦昌进觉得，当然还要有对我们红色江山发自内心的热爱。

心有所向，才会向险而行、矢志不渝。

工作中曾文龙指导陈杨。路佳晨摄

“下潜”高原，这是曾文龙委员近半军旅时光的写照。作为负责联合作战保障的工程师，他主动背着几十公斤的设备”走出去”，每年有一半以上的时间都在雪域高原爬冰卧雪，西部边防最艰苦偏远的阵地和哨所都有他的足迹。

“‘行走’在外，自然条件是十分恶劣的，这就需要精神力量的支撑。”来自黄继光故乡、从小听着红色故事长大的曾文龙，理想就是考军校走入军营。

而来了，就从未想过离开，再苦再累也咬牙坚持。”从军校到战位，我一直在和这一个专业打交道，我一辈子就想干好这一件事。”曾文龙语气坚定。

英雄，是激励后人的不灭火炬，也是锻造军人血性的永恒火焰。传承红色基因，就是要永葆革命军人勇猛顽强、逢敌亮剑的战斗作风。

“如果明天就上战场，我能不能像王成一样英勇奋战？”看着电影《英雄儿女》长大的韦昌进，曾经经常自问自答，今天，这句话也可以问给每一名官兵。

培塑

“在风雨中磨砺，在任务中摔打”

接过先辈的钢枪，把初心使命写在行动中、落在战位上，也是完成了一场跨越时光的告慰。而在投身练兵备战的时代大潮中，每名军人都应有股敢打敢冲的精气神。

西西玛近影。

“战斗精神是人民军队的独特优势和特质”，来自猎鹰突击队的西西玛委员认为，战斗精神不是天生固有的，需要精心培塑与打磨，”要在风雨中磨砺，在任务中摔打”。

一次国外集训结束后，一枚带有 2 ㎝钢钉的勋章被拍进了猎鹰突击队特战队员杨振的胸膛，这是委内瑞拉”猎人学校”特有的授予奖章的方式。

在这个让人闻风丧胆的地方，第一次参加”虐俘”课目训练，杨振的身体就被倒吊着淹入水中，此后，冲冷水、熏瓦斯、藤条抽打等更是家常便饭。5 个月的时间，参训的每一天杨振仿佛都在生与死的边缘挣扎。

当接近意志力极限时，是众多国旗中的那一抹红又激发出了杨振的无限可能。”像战斗一样严酷训练，才能锤炼出最顶尖的特战精兵，我可以说用生命捍卫了国旗荣光。”

提到这一细节，西西玛的眼中有些闪烁。他最清楚，走出国门参加比武竞赛，可能到最后比拼的就是战斗意志。

在”国家队”多年的实战化训练工作中，西西玛看了太多坚定且自信的身影，为了快一步、先一秒、多一环，他们把自己锻造成钢铁战士，”新时代的中国军人依然可爱如昨”。

从入伍之初对枪着迷的好苗子到成为当之无愧的”狙击枪王”，这一路，人大代表陈晶走了十年。狙击，本就是孤独且枯燥的，历尽艰辛不说，坎坷也”如影随形”。

全军特种兵比武，已通过层层选拔，却在备战中意外受伤遗憾退出……作为”英勇善战连”连长，陈晶明白，没有什么困难是不可攻坚的、没有什么胜利是争取不到的，面对眼前的困难，只有攻克。”英勇善战、勇猛决胜”，这八个字的连队战斗精神，始终巍然于连队官兵的心间。

越是和平时期，越要让精神之力融入到血液中、深植在骨髓里。

在”硬骨头六连”，战争年代传承下来的”三股劲”早已在官兵身上化作了蓬勃动力。军士唐雄在参加上级比武时，是所有选手中年龄最大的，50 公里行军、与蓝军对抗……在完成最后一个障碍战术动作时，已达到体能极限的他用牙咬住枪背带坚持到了最后，到达终点时已满嘴是血……

在优秀的团队中，人人都想变得更加优秀。

去年，在参加军地青年典型分享交流活动中，陈晶结识了坚守不同战位的优秀战友们，他意识到，点点星光汇聚，便可点亮前行之路。

续写

“连队厚重的历史，是一代代官兵共同写就的”

“爸爸，我想拿起武器去打仗。”一天，参观完党史馆后，小家伙突然严肃地表达着自己的想法，回想儿子在近代史展板前驻足了很久，西西玛也就读懂了他的小心思。

春风化雨，润物无声。西西玛觉得，这和带兵的道理是相通的。

为兄为父为人生导师，他认为，带兵人需要和战士们共同写好三本书——战士的成长之书、战士干部共同的奋进之书，同时干部要修炼成一本好书，让战士们从中有所启迪、有所收获。

由一颗心抵达更多心灵，这是一场持久的接力——

西西玛始终和基层官兵共同奋战在演训一线，毕竟一支队伍的战斗精神取决于指挥员的辐射带动。把精神坐标立起来，先”燃烧”自己，队伍的士气也就被点燃了；

行走高原，曾文龙向来都是身体力行。可对于军士陈杨这个徒弟的培养，他又放开了手脚，跳出只做些基础性工作的常规模式。去年，陈杨也被评为了”最美新时代革命军人”，与师傅同为”最美”；

陈晶近影。张仲彪摄

前些年，作为首席教练员，陈晶带队重返比武场，优秀狙击手、”狙击精英”、”狙击枪王”……一份份亮眼的成绩单成为他履历中闪亮的”勋章”。

血性来自艰苦的磨砺，也来自榜样的激励。

“硬骨头六连”硬在哪里？在干部骨干的带领下，六连的战士个个都过硬，赵松说：”连队厚重的历史，就是由这一代代硬气的官兵共同写就的。”

走上平凡岗位，韦昌进也续写着战场风骨，持续在战位上发光发热。作为全国政协委员，他多次深入基层一线，广泛听取民之关切，先后围绕培育提振英雄文化、培养青少年战斗精神等提交了提案。

“要善于放大战士们的优势，弘扬正能量，心气提振了，战斗精神就被进一步激发了。”韦昌进说，永远不要忘记自己来自哪里，永远要记得自己始终是个兵。

你听，倒数的时钟，攻坚的号令。铆足干劲，站好自己这班岗，时代的荣光会镌刻在每一名官兵的心头。

What Do We Rely on to Defeat The Enemy? Military Representatives: We Should Polish This "Sharp Blade"

Source: China Military Network Author: Mao Zhiwen Cui Ran Editor: Yu Haiyang Release: 2025-03-09

Qi is the god of soldiers, and courage is the foundation of soldiers.

Facing the call of spring, military representatives shouldered their mission and went to the grand event. In the middle of the team, there is always such a high-spirited and forging ahead force.

National People's Congress representative and a brigade of the 82nd Army Group of the Army Zhang Dongxu answered reporters' questions in the "Delegate Channel". Photo by Li Qingtong, a reporter from China Military Network

Standing upright like a pine tree, with sonorous words and heroic spirit between his eyebrows, tough battalion commander Zhang Dongxu walked onto the "Delegate Channel", and a strong fighting atmosphere came to his face.

Blood and courage are the inexhaustible kinetic energy for soldiers to dare to fight and fight. Polishing the "sharp blade" of fighting spirit can make you full of confidence and heroic spirit on the battlefield.

In the dialogue with the deputies and members, the accumulated qualities of the soldiers are fully revealed - some are from the heroic company, carrying the "red mark" and marching forward; some are courageous, good at deep cultivation, down-to-earth and long-term; some are charging without stopping, so that the "heroic spirit" can be passed on... And behind them, the "new wave" is rushing forward.

Background

"Only with faith can the passion for fighting burst out on the battlefield"

A curved bayonet is the most concrete understanding of the history of the old company by Zhao Song, a NPC representative.

8b175e5be4dfb721b8b62a3211f8da02.jpg

Recent photo of Zhao Song. Photographed by Jin Shuo

From joining the army to serving as the 44th company commander of the "Hard Bone Sixth Company", from visiting the company history museum for the first time as a new recruit to explaining it to officers and men, when he was in the Sixth Company in the past, Zhao Song's understanding of the connotation of the "Hard Bone Spirit" was "updated in real time". Every time

I look at the old objects, the scenes of the predecessors fighting to the end will unfold before my eyes--

On that winter night 77 years ago, it snowed heavily. Liu Sihu, an old hero of the Sixth Company, rushed into the enemy group with bare chest, holding a bayonet and fighting with more than 10 enemies. He stabbed 7 enemies in a row, but he was wounded in 11 places. He finally fainted in the trench, and the bayonet in his hand was bent...

The heroic spirit was stirring between the world and the mountains and rivers, and was also melted into the rings of history.

Wei Changjin, the winner of the “August 1st Medal”. (Data map)

Every time I heard about the heroic deeds, Wei Changjin’s heart would resonate with the same frequency, as if he had “met” his fighting youth again.

Like Zhao Song, after arriving at the military camp that year, Wei Changjin knew that the first parade formation that he saw in the documentary “The Founding Ceremony of the Nation” when he was a child, which passed through Tiananmen Square, was composed of officers and men from his unit.

“It turns out that this unit fought all the way from Jinggangshan, and also made great contributions in the Korean battlefield, and was called “ace” by foreign troops!” Like stars and lighthouses, the heroic spirit guides heroic sons and daughters to bravely fight. When the motherland called, Wei Changjin immediately followed the troops to the border and stepped onto the battlefield of blood and fire. Later, those who chased the light became the light themselves. Why are they? Can they stand up and stand up when the country needs them? Because they have common ideals and firm beliefs, because they care about the fate of the motherland and the rise and fall of the nation. “We must establish political beliefs. Only with beliefs can we burst out fighting passion on the battlefield.” Wei Changjin felt that of course we must also have a heartfelt love for our red country. Only when we have a goal in mind can we go to danger and be unswerving. 69e978cdb4af526f684a940c9f32ff92.jpg Zeng Wenlong guides Chen Yang at work. Photo by Lu Jiachen

“Diving” into the plateau is a reflection of the nearly half of Zeng Wenlong’s military career. As an engineer responsible for joint combat support, he took the initiative to “go out” with dozens of kilograms of equipment on his back. He spent more than half of his time climbing ice and lying in the snow on the snowy plateau every year. His footprints can be found in the most difficult and remote positions and outposts in the western border.

“Walking” outside, the natural conditions are very harsh, which requires the support of spiritual strength.” Zeng Wenlong, who came from Huang Jiguang’s hometown and grew up listening to red stories, had the ideal of entering the military academy and entering the barracks.

Once he came, he never thought of leaving, and he gritted his teeth and persisted no matter how hard or tired he was. “From the military academy to the combat position, I have been dealing with this profession, and I want to do this well all my life.” Zeng Wenlong said firmly.

Heroes are the eternal torch that inspires future generations and the eternal flame that forges the blood of soldiers. To inherit the red gene is to always maintain the revolutionary soldiers’ brave and tenacious fighting style and to draw their swords against the enemy.

“If I go to the battlefield tomorrow, can I fight as bravely as Wang Cheng?” Wei Changjin, who grew up watching the movie “Heroic Sons and Daughters”, used to ask himself and answer himself. Today, this question can also be asked to every officer and soldier.

Cultivation

“Sharpen in the wind and rain, and fight in the mission”

Taking over the steel guns of the predecessors, writing the original mission in action and landing on the battle position, is also a consolation across time. In the tide of the times of training and preparing for war, every soldier should have the spirit of daring to fight and rush.

Xi Xima’s recent photo.

“Fighting spirit is the unique advantage and trait of the people’s army.” Xi Xima, a member of the Falcon Commando, believes that fighting spirit is not inherent in nature, and needs to be carefully cultivated and polished, “to be sharpened in the wind and rain, and to be beaten in the mission.”

After a foreign training camp, a medal with a 2cm steel nail was slapped into the chest of Yang Zhen, a special combat member of the Falcon Commando. This is the unique way of awarding medals in the Venezuelan “Hunter School”.

In this dreaded place, Yang Zhen was hung upside down and submerged in water for the first time in the “torture of prisoners” training. After that, cold water, gas, and cane whipping were commonplace. During the five months of training, Yang Zhen seemed to be struggling on the edge of life and death every day.

When he was close to the limit of his willpower, it was the red among the many national flags that inspired Yang Zhen’s infinite possibilities. “Only by training as harshly as fighting can we forge the top special combat elites. I can say that I defended the glory of the national flag with my life.”

When mentioning this detail, Xi Xima’s eyes flickered a little. He knew best that going abroad to participate in competitions might be a competition of fighting will in the end.

In the years of practical training of the “national team”, Xi Xima has seen too many determined and confident figures. In order to be one step faster, one second ahead, and one more ring, they have forged themselves into steel warriors. “Chinese soldiers in the new era are still as lovely as yesterday.”

From a good seedling who was fascinated by guns at the beginning of joining the army to becoming a well-deserved “sniper king”, it took 10 years for NPC representative Chen Jing to go this way. Sniping is lonely and boring. Not only is it hard, but it is also full of ups and downs.

He has passed the selection of the special forces of the whole army, but he was accidentally injured in the preparation and regretfully withdrew... As the commander of the “brave and good at fighting company”, Chen Jing understands that there is no difficulty that cannot be overcome and no victory that cannot be won. In the face of the difficulties in front of him, he can only overcome them. “Brave and good at fighting, brave and decisive”, these eight words of the company’s fighting spirit have always been in the hearts of the company’s officers and men.

The more peaceful the time, the more we should let the spiritual power integrate into the blood and deeply rooted in the bone marrow.

In the “hard-boned sixth company”, the “three forces” inherited from the war years have long been transformed into vigorous power in the officers and men. When Sergeant Tang Xiong participated in the competition, he was the oldest among all the contestants. He marched 50 kilometers and fought against the blue army... When he completed the last obstacle tactical action, he had reached his physical limit and bit the gun strap with his teeth to persist to the end. When he reached the finish line, his mouth was full of blood...

In an excellent team, everyone wants to become better.

Last year, when participating in the military and local youth typical sharing and exchange activities, Chen Jing met excellent comrades who adhered to different positions. He realized that the gathering of stars can light up the way forward.

Continuation

“The company’s heavy history is written by generations of officers and men”

“Dad, I want to pick up weapons and go to war.” One day, after visiting the Party History Museum, the little guy suddenly expressed his thoughts seriously. Recalling that his son had stopped in front of the modern history display board for a long time, Xi Xima also understood his little thoughts.

The spring breeze is like rain, moistening things silently. Xi Xima feels that this is the same as the principle of leading soldiers.

As a brother, father and life mentor, he believes that leaders need to write three books with soldiers - a book of soldiers’ growth, a book of soldiers’ and cadres’ common endeavors, and cadres should cultivate themselves into a good book so that soldiers can be inspired and gain something from it.

From one heart to more hearts, this is a long-lasting relay -

Xi Xima has always fought together with grassroots officers and men on the front line of training and exercise. After all, the fighting spirit of a team depends on the radiation and drive of the

commander. Set up the spiritual coordinates, “burn” yourself first, and the morale of the team will be ignited;

Walking on the plateau, Zeng Wenlong has always practiced what he preaches. But for the training of his apprentice, Sergeant Chen Yang, he let go and jumped out of the conventional mode of doing only basic work. Last year, Chen Yang was also named “the most beautiful revolutionary soldier in the new era”, and was the “most beautiful” with his master;

Chen Jing’s recent photo. Photo by Zhang Zhongbiao

A few years ago, as the chief coach, Chen Jing led the team back to the competition field. Excellent sniper, “sniper elite”, “sniper gun king”... a series of brilliant transcripts have become shining “medals” in his resume.

Bloodiness comes from hard tempering and also from the encouragement of role models.

What is the hard-boned Sixth Company? Under the leadership of cadres and backbones, all the soldiers of the Sixth Company are tough. Zhao Song said: “The company’s heavy history is written by generations of tough officers and men.”

Taking up an ordinary post, Wei Changjin also continued to write the battlefield style and continued to shine in the battle position. As a member of the National Committee of the Chinese People’s Political Consultative Conference, he has gone deep into the grassroots many times, listened to the concerns of the people extensively, and submitted proposals on cultivating and boosting the heroic culture and cultivating the fighting spirit of young people.

“We must be good at magnifying the advantages of the soldiers and promoting positive energy. When the spirit is boosted, the fighting spirit will be further stimulated.” Wei Changjin said, never forget where you come from, and always remember that you are always a soldier.

Listen, the countdown clock is the call to attack. Work hard and do your job well. The glory of the times will be engraved in the hearts of every officer and soldier.

军营观察丨探寻”一堂好课”的标准

[Part 1]

来源：中国军网-解放军报 作者：孙官玺 孙红川 李佳豪 张石水 责任编辑：尚晓敏 发布：2025-03-10

“优秀政治教员”成长记

■解放军报特约记者 李佳豪 张石水

前不久，西部战区陆军某部组织年度表彰奖励颁奖仪式。因在战区陆军组织的”三会一好”政治教员比武中表现出色，某旅林教导员再次获评”优秀政治教员”。

连续多年参加”三会一好”政治教员比武，林教导员是大家熟悉的老面孔。这次颁奖现场，也亮相了众多新面孔——此次受表彰的”优秀政治教员”中，不少是首次参加比武获奖的后起之秀。

“林教导员，我新兵入营时的第一堂课就是你讲的”“我参加旅里组织的政治教员集训，看过你上次参赛的授课视频”……颁奖仪式结束后，不少获评”优秀政治教员”的官兵主动找到林教导员交流。

林教导员向各位战友提议：”能不能让我学习一下你们的授课教案？”就这样，当天晚上，一场基层思想政治教育交流会在会议室举行，大家纷纷拿出自己的”精彩一课”与战友们分享。

带着期待，一名刚毕业不久的新排长登台授课。他的这堂课让林教导员感到新风扑面。

这是一堂主题为”关心关爱士兵”的授课。与传统教案不同，这堂授课是由几名新兵写给家人的书信开头，中间穿插着连队士兵在干部骨干关爱下的成长故事，最后以一段退伍战士在离队前向班长们深情告白的视频结尾。

“将官兵书信、士兵日记、家人嘱托等元素融入授课，能够提升教育的亲和力、感染力。”在笔记本上，林教导员这样写道，”同时，这也是实现官兵自我教育的一种方式。”

这是林教导员坚持多年的习惯——每当看到新颖的教育形式、鲜活的施教方法，听到富有哲理的金句、发人深思的授课事例，他都会记在笔记本上，并借鉴运用到自己的授课中。

“把话筒交给战士，兵的语言、兵的形象更容易让战士接受，往往能够取得意想不到的效果”“想要提高思想政治教育的针对性和精准性，带兵人既要善于聆听’思想的鼓点’，更要善于打出’合奏的节拍’”……接下来的业务交流中，林教导员的笔记本上，又记录了几页关于如何改进基层思想政治教育的思考。

“虽然我是一名’老政工’，但我还是从大家的授课中学到许多。”讨论中，林教导员说，”你们的授课充满时代气息，让思想政治教育打开了新天地、展现了新风貌。让我们共同努力，上好新时代的思想政治教育课。”

探寻”一堂好课”的标准

■孙官玺 孙红川 解放军报特约记者 李佳豪 张石水

“什么样的教育授课，才可以称得上是一堂好课？”参加完上级年度表彰奖励颁奖仪式后，西部战区陆军某旅林教导员对这个问题有了新的思考。对于这个问题的探索，几乎贯穿了他多年的军旅生涯。

回想任指导员初期，他认为”一份内容丰富的教案+制作精良的课件”是问题的答案。然而，随着经验积累，他渐渐发现，这个问题似乎没有”标准答案”。

比如，首次参加”三会一好”政治教员比武时，他目睹一名选手以歌曲解析为课，讲述了几首耳熟能详的军歌背后的感人故事，引得台下官兵潸然泪下，至今仍被不少战士津津乐道。

又比如，在一次政治教员集训中，一名战士在授课中加入了时下深受青年官兵欢迎的脱口秀形式，赢得大家热烈掌声。最终，这堂形式新颖的授课入选上级”精品课资源库”，并排在点击榜前列。

“整合教育内容、调控教育比例，规范’课表式’教育计划”“根据官兵现实思想情况，区分人员类别搞教育，避免干部、军士、义务兵同吃’一锅饭’的问题”……这些心得感悟都被他记在笔记本上。多年来，林教导员记满了 6 个本子，也对何为”一堂好课”有了更多思考。

这次参加战区陆军”三会一好”政治教员比武，林教导员再次记录了 20 余页听课笔记。他说：”对于我们基层政治教员而言，’如何上一堂好课’是一个常态化课题。”

教育不是博眼球、抖包袱，而是”用思想的子弹射向思想的靶标”

这是一堂画面感很强的授课——

台上，授课选手采用视频混剪的方式，将连队历年来参加大项任务、演习演训的精彩视频，呈现在官兵眼前。

然而，授课评分公布后，他的成绩并不理想。

“与其说这是一堂教育课，不如说更像是一部单位宣传片。”在点评环节，台下评委一针见血地指出，”教育绝非’拍大片’。这些视频内容看似很热闹，但看完后给官兵带来什么启发，其中又有多少教育意义呢？”

这是一名并不被看好的参赛选手——

与其他参赛选手相比，这名选手平时有些沉默寡言。在登上授课席前，大家为他捏了一把汗。

让大家没想到的是，这名选手的授课却征服了台下官兵。他旁征博引、拓展延伸，从武器装备演变史，讲到军事科技未来发展趋势；从装备性能参数，讲到各类武器在战场上的实际运用。内容厚实、知识性强、信息量大，课堂氛围一度很”燃”。

最终，这名本不被看好的选手，获得授课评比环节的高分。

一堂”炫目而不叫座”的课，一匹出其不意的”黑马”……这样的反差，坚定了林教导员的观念：无论思想政治教育如何创新，”内容”始终是”一堂好课”的关键所在。

“若把教育比作’包包子’，那么教案内容就是’馅料’，所谓’包子好吃不在褶上’，提高授课内容质量才是首位。”在笔记本上，他写下这样的听课笔记，”教育不是博眼球、抖包袱，而是’用思想的子弹射向思想的靶标’，因此必须坚持’内容为王’。”

这也与战区陆军党委的抓教思路不谋而合。近年来，他们针对教育指向性、问题针对性、解惑实效性不强等问题，要求基层政治教员根据形势变化、官兵思想确定教育内容，规范提出 6 项备课要素，即要求授课内容必须具备聚焦现实思想的”靶点”、旗帜鲜明的”观点”、提供佐证的”事例”、贴近官兵的”语言”等，确保用真理说服人、用真情感染人、用真实打动人。

形式是内容的载体，只有彼此连接，教育才能真正”入心入脑”

一堂授课开始后，某部刘指导员给台下每名官兵发了一页白纸、一根铅笔，请大家画出心目中”新时代革命军人的模样”：”不需要画得多好、多像，只需要大家把你认为新时代革命军人应具备的要素画出来。”

对此，官兵开始动笔作画。有人画了一面党旗，”听党指挥是永远不变的军魂”；有人画了一双拳头，”新时代革命军人必须具备过硬打赢本领”；有人画了一座界碑，”我们就是祖国的边防线”；还有人画了一轮圆月，”从军意味着奉献，一家不圆万家圆”……

官兵作画完毕，刘指导员将大家的作品收集在一起，利用绘画软件将不同元素整合在一张纸上。瞬时，一个立体饱满的军人形象跃然眼前。紧接着，他话锋一转：”请大家对照这个模样，看一看自己身上缺了什么。”

就这样，一场”美术课”变成了一次自我检视。在短暂沉默过后，官兵们纷纷亮出自身存在的缺点不足，提出改正方案：”躺平不是新时代革命军人的样子，我要知重负重，为部队建设奋斗”“追名逐利不是新时代革命军人的样子，不能盯着虚名干工作”“违规违纪更不是新时代革命军人的样子，我们应该在遵纪守法上当好表率”……

“授课除了讲，还可以画、唱、演、舞、跑。”听完这堂以美术为载体的教育课，林教导员在自己的笔记本上写下心得——教育内容和形式创新之间的关系，就好比”载货的车”与”过车的桥”，只要能让”货车”顺利通过，无论是吊桥、拱桥还是石板桥，都能称为”好桥”。

接下来的一堂授课，某部陈中队长为听众搭建了一座截然不同的”桥”。

在这堂关于”缓解心理压力、构建和谐军营”的课上，陈中队长没有搬出晦涩难懂的专业理论，也没有一味地向官兵灌输”心灵鸡汤”，而是采取换位思考的方式，扮演了一名遇到思想困惑的战士，转而向在场的官兵寻求疏解办法。

面对陈中队长模拟出的情况，战友们纷纷出谋划策，给他讲道理、鼓士气，帮助他排解困惑。”我遇到过同样的思想困惑，可自己怎么也走不出来。”一名战士在课后由衷谈道，”所谓’不识庐山真面目，只缘身在此山中’，有些事情，只有站在旁观者的角度才能看得通透。得益于这堂课，提供了角色换位机会，让我得以站在旁人的视角去思考，真正与自己’和解’。”

“形式是内容的载体，只有彼此连接，教育才能真正’入心入脑’。”受到这堂课的启发，林教导员在笔记本上写下感悟，”教育不一定非得拘泥于’讲’与’听’，一场讨论、一次谈心交心，都能成为’一堂好课’。”

“基层教育方法形式的不断创新，得益于上级的大力支持。”林教导员介绍，近年来，战区陆军党委坚持效果导向，以对战斗力贡献率为评价依据，不断探索创新教育方式，提出”什么方式管用就用什么方式，部队需要什么教育就开展什么教育”的思路，鼓励基层政治教员大胆创新。

正如林教导员所言，在随后的评比中，各种形式多样的教育方法层出不穷，令人耳目一新。相关经验也被林教导员详细地记录在笔记本上，成为他探索”一堂好课”的宝贵创意。

在实践中归纳总结，在学习中博采众长，才能提升教育质效

授课开始后，林教导员没有急于开口，而是播放了一段自己休假期间拍摄的视频——他先是欣喜地登上国产 C919 大型客机，画面一转，他出现在高耸入云的上海某大厦脚下，几天游览过后，他又乘坐高铁抵达首都北京……

虽然摸不清他”葫芦里卖的什么药”，但这段视频吸引了在场官兵的注意。

“你能从这段视频中看到什么？”林教导员发问后，不少战士纷纷起身发言，”美食美景”“繁华都市”……闻此，他微笑点头：”大家讲得对，不过我却看到了别的东西，那就是我们国家的科技进步。”话音刚落，这堂授课的标题出现在大屏幕上——《下好科技创新先手棋，着力推动高质量发展》。

“说实话，这堂课不好讲。”在课后交流时，林教导员打了个比方，”其实上教育课和开商店有相似之处，首先要引起消费者的注意，吸引他走进你的门店。否则，酒香也怕巷子深。”

眼看官兵的注意力被吸引，林教导员开始切入授课内容：”国产大飞机投入运营，标志着中国航空工业取得了新进步；那座直插云霄的大厦，里面汇聚着众多新兴产业公司，是国内知名的人工智能、大数据计算等高科技研发中心；我们的京沪高铁，则是目前世界上运营时速最快的铁路之一，其背后是中国领先世界的交通网……”一堂课下来，台上林教导员讲得有声有色、台下战士们听得津津有味。

课程进入尾声，林教导员将话筒交给台下官兵：”现在请大家分享一下，你外出旅游时看到过什么科技景观。”许多战士纷纷举手发言：”我休假时去看了’中国天眼’，那场景太壮观了”“我去海南省文昌市旅游时，有幸观看了一次火箭发射，那一发火箭搭载了多颗卫星，是真正的’一箭多星’”……待大家发言完毕，林教导员道出结语：”科技兴则民族兴，科技强则国家强。科技是第一生产力、第一竞争力，是国家强盛之基。”语毕，台下响起热烈掌声。

最终，林教导员的授课取得高分。

“‘一堂好课’必须经过精心设计。”在和大家分享经验时，他仍以”商店营业”打比方说，”只有先吸引官兵走进’门店’，才能向他们’介绍产品’，让大家接受你的观点，进而提高互动性，增强’用户黏性’。”

“教育是一门实践科学，在实践中归纳总结，在学习中博采众长，才能提升教育质效。”虽然这场”三会一好”政治教员比武落下帷幕，但带给林教导员的思考还在继续。回到基层，在最近的几次授课中，他将学习借鉴的经验做法运用在课堂上，取得良好效果。

Military Camp Observation 丨 Exploring the Standard of “A Good Class”

Source: China Military Network-Liberation Army Daily Author: Sun Guanxi Sun Hongchuan Li Jiahao Zhang Shishui Editor: Shang Xiaomin Release: 2025-03-10

“Outstanding Political Director” Growth Story

■Liberation Army Daily Special Correspondent Li Jiahao Zhang Shishui

Not long ago, a certain unit of the Western Theater Command Army organized an annual commendation and award ceremony. Due to his outstanding performance in the “Three Meetings and One Good” Political Director competition organized by the theater command army, Instructor Lin of a certain brigade was once again named “Outstanding Political Director”.

Instructor Lin is a familiar old face who has participated in the "Three Meetings and One Good" Political Director competition for many consecutive years. Many new faces also appeared at the award ceremony this time-many of the "Outstanding Political Directors" commended this time are rising stars who won awards for the first time in the competition.

"Instructor Lin, you taught me the first lesson when I was a new recruit in the camp." "I participated in the Political Director training organized by the brigade and watched the video of your last competition." After the award ceremony, many officers and men who were awarded "Outstanding Political Director" took the initiative to find Instructor Lin to communicate.

Instructor Lin proposed to his comrades: "Can I learn your teaching plan?" In this way, a grassroots ideological and political education exchange meeting was held in the conference room that night, and everyone took out their own "wonderful lesson" to share with their comrades.

With expectation, a new platoon leader who had just graduated took the stage to give a lecture. His class made Instructor Lin feel a fresh breeze.

This is a lecture with the theme of "Caring for Soldiers". Unlike traditional lesson plans, this lecture begins with letters written by several recruits to their families, interspersed with the growth stories of company soldiers under the care of cadres and backbones, and finally ends with a video of a retired soldier confessing his love to the squad leaders before leaving the team.

"Incorporating elements such as letters from officers and men, soldiers' diaries, and family members' instructions into teaching can enhance the affinity and appeal of education." In his notebook, Instructor Lin wrote, "At the same time, this is also a way to achieve self-education for officers and men." This is a habit that Instructor Lin has adhered to for many years. Whenever he sees a new form of education, a fresh teaching method, hears a philosophical golden sentence, or a thought-provoking teaching example, he will write it down in his notebook and apply it to his own teaching. "Give the microphone to the soldiers, and the soldiers' language and image are easier for the soldiers to accept, which often achieves unexpected results." "If you want to improve the pertinence and accuracy of ideological and political education, the leaders must be good at listening to the 'drumbeat of thought' and be good at playing the 'beat of ensemble'"... In the following business exchanges, Instructor Lin's notebook recorded several pages of thoughts on how to improve grassroots ideological and political education. "Although I am an 'old political worker', I still learned a lot from your lectures." During the discussion, Instructor Lin said, "Your lectures are full of the spirit of the times, which has opened up new horizons and shown a new look for ideological and political education. Let us work together to teach ideological and political education in the new era."

Exploring the standard of "a good class"

■Sun Guanxi, Sun Hongchuan, Liberation Army Daily special correspondents, Li Jiahao, Zhang Shishui

A brigade of the Western Theater Command Army carried out a grassroots psychological service activity. Photo by He Yi

“What kind of education can be called a good class?” After attending the annual commendation and award ceremony of the superior, Instructor Lin of a brigade of the Western Theater Command Army had a new thought on this issue. The exploration of this issue has almost run through his many years of military career.

Looking back to the early days of his tenure as an instructor, he believed that “a rich lesson plan + well-made courseware” was the answer to the question. However, as he accumulated experience, he gradually discovered that there seemed to be no “standard answer” to this question.

For example, when he participated in the “Three Meetings and One Good” Political Director competition for the first time, he witnessed a contestant using song analysis as a lesson, telling the touching stories behind several familiar military songs, which made the officers and men in the audience cry, and many soldiers still talk about it with relish.

For example, in a Political Director training camp, a soldier added the talk show format that is currently popular among young officers and men in his lecture, winning warm applause from everyone. In the end, this novel lecture was selected into the superior “Excellent Course Resource Library” and ranked at the top of the click list.

“Integrate educational content, regulate educational proportions, and standardize the ‘timetable-style’ education plan”, “Educate according to the actual ideological situation of officers and men, and distinguish between personnel categories to avoid the problem of cadres, sergeants, and conscripts eating ‘one pot’”... These insights were all recorded in his notebook. Over the years, Instructor Lin has filled 6 notebooks and has also thought more about what is a “good lesson”.

This time, participating in the Theater Command Army’s “three meetings and one good” Political Director competition, Instructor Lin once again recorded more than 20 pages of lecture notes. He said: “For our grassroots Political Directors, ‘how to give a good class’ is a normalized topic.”

Education is not about attracting attention or shaking off baggage, but “shooting ideological targets with ideological bullets”

This is a lecture with a strong sense of picture-

On the stage, the lecturer used a video mix-cut method to present the company’s wonderful videos of participating in major tasks and exercises over the years to the officers and men.

However, after the lecture scores were announced, his results were not ideal.

“Rather than saying this is an educational class, it is more like a unit propaganda film.” In the commentary session, the judges below the stage pointed out incisively, “Education is by no means ‘making a blockbuster’. These videos seem to be very lively, but what inspiration do they bring to the officers and men after watching them, and how much educational significance do they have?”

This is a contestant who is not optimistic-

Compared with other contestants, this contestant is usually a bit taciturn. Before he took the lecture seat, everyone was worried about him.

What everyone didn't expect was that the lecture of this contestant conquered the officers and men below the stage. He cited a wide range of sources and expanded on the history of the evolution of weapons and equipment, and talked about the future development trend of military technology; from the performance parameters of equipment to the actual application of various weapons on the battlefield. The content is rich, knowledgeable, and informative, and the classroom atmosphere was once very "burning".

In the end, this contestant who was not optimistic about the teaching received a high score in the teaching evaluation.

A "dazzling but not popular" class, an unexpected "dark horse"... Such a contrast has strengthened the concept of Instructor Lin: no matter how the ideological and political education is innovated, "content" is always the key to "a good class".

"If education is compared to 'making dumplings', then the content of the lesson plan is the 'filling'. As the saying goes, 'the folds are not the key to making dumplings delicious', improving the quality of the teaching content is the first priority." In his notebook, he wrote down the following lecture notes, "Education is not about attracting attention or shaking off baggage, but about 'shooting ideological targets with ideological bullets', so we must insist on 'content is king'." This also coincides with the teaching ideas of the Theater Command Army Party Committee. In recent years, in response to the problems of education orientation, problem targeting, and lack of effectiveness in solving doubts, they have required grassroots Political Directors to determine the content of education based on changes in the situation and the thoughts of officers and men, and standardized the six elements of lesson preparation, namely, the teaching content must have a "target" that focuses on realistic thoughts, a clear-cut "viewpoint", "examples" that provide evidence, and "language" that is close to officers and men, etc., to ensure that people are persuaded with truth, infected with true feelings, and moved with reality. Form is the carrier of content. Only by connecting them can education really "enter the heart and mind".

After a class started, Instructor Liu of a certain unit gave each officer and soldier a piece of white paper and a pencil, and asked everyone to draw the "appearance of a revolutionary soldier in the new era" in their minds: "You don't need to draw it well or how similar it is. You just need to draw the elements that you think a revolutionary soldier in the new era should have."

In response, the officers and men began to paint. Some drew a party flag, "obeying the party's command is the eternal soul of the army"; some drew a pair of fists, "a revolutionary soldier in the new era must have a strong ability to win"; some drew a boundary monument, "we are the border of the motherland"; and some drew a full moon, "joining the army means dedication, one family is not round, thousands of families are round"...

After the officers and men finished painting, Instructor Liu collected everyone's works together and used painting software to integrate different elements on a piece of paper. Instantly, a three-dimensional and full image of a soldier appeared before his eyes. Then, he changed the subject: "Please compare yourself with this and see what you are missing."

In this way, an "art class" became a self-examination. After a brief silence, the officers and men revealed their shortcomings and proposed correction plans: "Lying flat is not the way of a revolutionary soldier in the new era. I must shoulder heavy responsibilities and strive for the construction of the army." "Chasing fame and fortune is not the way of a revolutionary soldier in the new era. We cannot work for fame." "Violating regulations and discipline is not the way of a revolutionary soldier in the new era. We should set a good example in abiding by laws and regulations."...

"In addition to speaking, you can also draw, sing, act, dance, and run." After listening to this education class with art as the carrier, Instructor Lin wrote down his thoughts in his notebook-the relationship between educational content and form innovation is like a "cargo truck" and a "bridge for passing cars". As long as the "truck" can pass smoothly, whether it is a suspension bridge, an arch bridge or a stone slab bridge, it can be called a "good bridge."

In the next class, Captain Chen of a certain unit built a completely different "bridge" for the audience.

In this class on "relieving psychological pressure and building a harmonious military camp", Captain Chen did not bring out obscure professional theories, nor did he blindly instill "chicken soup for the soul" to the officers and men. Instead, he took the approach of thinking from the perspective of others, played the role of a soldier who encountered ideological confusion, and turned to the officers and men present to seek solutions.

Faced with the situation simulated by Captain Chen, his comrades-in-arms came up with ideas, explained the truth to him, boosted his morale, and helped him resolve his confusion. "I have encountered the same ideological confusion, but I just can't get out of it." A soldier said sincerely after the class, "As the saying goes, 'I don't know the true face of Mount Lu because I am in it'. Some things can only be seen clearly from the perspective of an observer. Thanks to this class, I have the opportunity to change roles, which allows me to think from the perspective of others and truly 'reconcile' with myself."

"Form is the carrier of content. Only when they are connected can education really 'enter the heart and mind'." Inspired by this class, Instructor Lin wrote down his thoughts in his notebook, "Education does not necessarily have to be confined to 'speaking' and 'listening'. A discussion or a heart-to-heart talk can become a 'good class'."

"The continuous innovation of grassroots education methods and forms has benefited from the strong support of superiors." Instructor Lin introduced that in recent years, the Party Committee of the Theater Command Army has adhered to the effect-oriented approach, based on the

contribution rate to combat effectiveness, and constantly explored and innovated education methods, and put forward the idea of ”using whatever method works and carrying out whatever education the troops need”, encouraging grassroots Political Directors to innovate boldly.

As Instructor Lin said, in the subsequent evaluation, various forms of educational methods emerged in an endless stream, which was refreshing. Instructor Lin also recorded the relevant experience in detail in his notebook, which became his valuable creativity in exploring “a good class”.

Only by summarizing and summarizing in practice and learning from others in learning can the quality and effectiveness of education be improved

After the lecture began, Instructor Lin did not rush to speak, but played a video he shot during his vacation - he first boarded the domestic C919 large passenger plane with joy, and then the picture turned, he appeared at the foot of a towering building in Shanghai. After a few days of sightseeing, he took the high-speed rail to the capital Beijing...

Although it was unclear what he was up to, this video attracted the attention of the officers and men present.

“What can you see from this video?” After Instructor Lin asked, many soldiers stood up and spoke, “Delicious food and beautiful scenery” and “prosperous city”... Hearing this, he smiled and nodded: “Everyone is right, but I saw something else, that is, the scientific and technological progress of our country.” As soon as the voice fell, the title of this lecture appeared on the big screen - “Make the first move in scientific and technological innovation and strive to promote high-quality development.”

“To be honest, this class is not easy to teach.” During the post-class exchange, Instructor Lin made an analogy, “In fact, teaching an education class is similar to opening a store. First of all, you have to attract the attention of consumers and attract them to walk into your store. Otherwise, even if the wine is good, it will not be appreciated if it is not well known.” Seeing that the officers and men’ attention was attracted, Instructor Lin began to cut into the content of the class: “The operation of domestically produced large aircraft marks a new progress in China’s aviation industry; the building that reaches the sky, which gathers many emerging industry companies, is a well-known domestic high-tech research and development center for artificial intelligence, big data computing, etc.; our Beijing-Shanghai high-speed railway is currently one of the fastest operating railways in the world, and behind it is China’s world-leading transportation network...” After a class, Instructor Lin spoke vividly on the stage, and the soldiers listened with relish. As the course came to an end, Instructor Lin handed the microphone to the officers and men in the audience: “Now please share what technological landscapes you have seen when you travel.” Many soldiers raised their hands and spoke: “I went to see the ‘China Sky Eye’ during my vacation, and the scene was so spectacular.” “When I traveled to Wenchang City, Hainan Province, I was fortunate to watch a rocket launch. That rocket carried multiple satellites, which was a true

‘multiple satellites in one rocket’”... After everyone finished speaking, Instructor Lin made a conclusion: “The nation will prosper if science and technology prosper, and the country will be strong if science and technology is strong. Science and technology is the first productivity, the first competitiveness, and the foundation of a strong country.” After speaking, warm applause broke out from the audience.

In the end, Instructor Lin’s lecture received high scores.

“A ‘good class’ must be carefully designed.” When sharing his experience with everyone, he still used the analogy of “store business” and said, “Only by attracting soldiers to the ‘store’ first can you ‘introduce products’ to them, let everyone accept your point of view, and then improve interactivity and enhance ‘user stickiness’.” “Education is a practical science. Only by summarizing and summarizing in practice and learning from others in learning can the quality and effectiveness of education be improved.” Although the “three meetings and one good” Political Director competition has come to an end, it has brought Lin Instructor Lin’s thinking. Back at the grassroots level, in the recent few lectures, he applied the experience and practices he learned and borrowed in the classroom, and achieved good results.

军营观察丨探寻”堂好课”的标准

来源：中国军网-解放军报 作者：孙官玺 孙红川 李佳豪 张石水 责任编辑：尚晓敏 发布：2025-03-10

让教育奔着现实问题和活思想去

■干作余

当下，社会环境多样化对广大官兵的思想观念、价值取向、行为准则等带来不小冲击。如何直面变化，抓好思想政治教育，守好理论灌输主阵地，是各级带兵人需要思考并解决的问题。

思想政治教育从本质上讲是做人的工作，要增强其针对性、实效性，就要对准活思想、找准契合点，让教育奔着现实问题和活思想去，这样的教育，才能实现精准滴灌、走心入脑。

教育的目的是培养人、塑造人、引导人。实践证明，准确把握部队倾向性问题和官兵活思想，教育就会接地气、聚兵心，就能句句讲到点子上、讲到心坎里。现在，部队的教育资源越来越丰富，教育手段越来越先进，少数教育者却不得其法，其中一个重要原因是没有聚焦官兵的活思想。有的热衷照抄照搬，当文件材料的”搬运工”，讲出来的东西缺乏热气、不接地气；有的一味生硬灌输，忽略官兵关注的现实矛盾，找不准解决问题的突破口；还有的看不懂”网生代”官兵的”新思维”、看不惯他们的”新行为”，把教育人变成教训人。

思想政治教育是在人的头脑里搞建设，其生命力和活力源于创新、系于务实。新时代青年官兵思想活跃，灵活运用教育形式，创新使用文艺节目、互动问答等官兵喜闻乐见的方式灌输理论、引导交流，政治教育才能因时而进、因势而新，取得积极成效。

活思想是动态变化的，不同身份、不同学历、不同岗位的官兵，内心的思想困惑也有很大区别。作为带兵人，深入调研、找准问题根源是关键。要下沉到矛盾集中的群体、任务繁重的单位，通过学懂法规文件、摸清思想动态、体察具体困难，做到有的放矢、精准滴灌。

聚焦活思想，当好”调音师”，敢于直面热点问题，引导官兵交流思想、交锋观点，在讨论辨析中切实匡正思想认知、澄清模糊认识、廓清是非界限，这样的教育才更让官兵听得进、学得懂、记得住，真正使教育走进官兵、赢得兵心。

Military Camp Observation 丨 Exploring the Standard of “A Good Class”

[Part 2]

Source: China Military Network-Liberation Army Daily Author: Sun Guanxi Sun Hongchuan Li Jiahao Zhang Shishui Editor: Shang Xiaomin Release: 2025-03

Let education run towards real problems and living thoughts

■ Do more

At present, the diversification of the social environment has brought a lot of impact on the ideological concepts, value orientations, and behavioral norms of the majority of officers and men. How to face the changes, do a good job in ideological and political education, and guard the main position of theoretical indoctrination is a problem that leaders at all levels need to think about and solve.

Ideological and political education is essentially a work of being a person. To enhance its pertinence and effectiveness, it is necessary to focus on living thoughts and find the right points of fit, so that education can run towards real problems and living thoughts. Only in this way can education achieve precise drip irrigation and go into the heart.

The purpose of education is to cultivate, shape, and guide people. Practice has proved that by accurately grasping the tendency problems of the troops and the living thoughts of officers and men, education will be down-to-earth and gather the hearts of soldiers, and every sentence can be said to the point and to the heart. Now, the educational resources of the army are becoming more and more abundant, and the educational methods are becoming more and more advanced, but a few educators are not able to do it. One of the important reasons is that they do not focus on the living thoughts of officers and men. Some are keen on copying and pasting, acting as “porters” of documents and materials, and what they say lacks enthusiasm and is not grounded; some blindly indoctrinate, ignore the real contradictions that officers and men are concerned about, and cannot

find the breakthrough to solve the problem; others cannot understand the “new thinking” of the “net-born” officers and men, and cannot stand their “new behavior”, turning education into teaching.

Ideological and political education is to build in people’s minds, and its vitality and vitality come from innovation and depend on pragmatism. Young officers and men in the new era have active thoughts, flexibly use educational forms, and innovatively use art programs, interactive questions and answers and other methods that officers and men like to instill theories and guide exchanges. Only in this way can political education advance with the times and be innovative with the trend, and achieve positive results.

Living thoughts are dynamic, and officers and men of different identities, different academic qualifications, and different positions have very different ideological confusions in their hearts. As a leader, in-depth research and finding the root cause of the problem are the key. We should go down to the groups with concentrated contradictions and units with heavy tasks, learn laws and regulations, understand ideological trends, and understand specific difficulties, so as to achieve targeted and precise drip irrigation.

Focus on active thoughts, be a good “tuner”, dare to face hot issues, guide officers and men to exchange ideas and confront views, and effectively correct ideological cognition, clarify vague understandings, and clarify the boundaries of right and wrong in discussions and analysis. Only such education can make officers and men listen, learn, and remember, and truly make education accessible to officers and men and win their hearts.

热爱并坚守，他们是盛开在查果拉的”鲜花”

来源：中国军网-解放军报 作者：宋伟坤 陈武斌 责任编辑：尚晓敏

2025-03-10

查果拉——

寒哨春花开

■宋伟坤 解放军报特约通讯员 陈武斌

战士给格桑花浇水。

冰川巡逻。

吴晨晨在查果拉主峰执勤。连队官兵提供

初春，海拔 5300 多米的查果拉哨所依然寒风凛凛，哨楼如同一根钢钉，铆在冰山之上。那里的风，似乎永远不知疲倦，吹得国旗猎猎作响，却吹不散守哨官兵心头的思念。

一级上士吴晨晨已在哨所坚守了 16 个春秋，对于查果拉的风雪早已习以为常。

哨所迎来开山季。清晨，他站在哨楼前迎接日出，一份春天的气息扑面而来。”班长，嫂子给你寄的包裹到了。”哨楼下一个声音传来，吴晨晨心头满是欣喜——这个年初就从家乡寄出的包裹，因为大雪封山，未能被及时送到哨所。

下哨回到宿舍，吴晨晨满怀期待地打开包裹，只见塑料泡沫箱中还有 2 个小包裹。那是一包花种和一幅水粉画。

打开包着花种的纸盒，吴晨晨的心被温暖包围。想起每次探亲结束时，妻子王平平都会送他到车站，吴晨晨的心中又涌上一丝内疚。从相识到相知，这对夫妻总是聚少离多。妻子给了吴晨晨一个温暖的家，而他却始终对这个家亏欠太多。

两人在春天相识。那次吴晨晨休假回家，通过朋友介绍认识了王平平。初见时，两人都有些拘谨，不知道该聊些什么。吴晨晨长期在高原哨所任职，面庞晒得黝黑，人也不怎么健谈。

王平平大学毕业后有了一份令人羡慕的工作，给她介绍对象的朋友不少，但王平平从小就敬佩军人。在交流中，她被吴晨晨的真诚所打动，最终与吴晨晨携手走进婚姻的殿堂。

查果拉，藏语意为”鲜花盛开的地方”。哨所驻地自然条件恶劣，除了延绵的雪山，连鸟兽都鲜有出现。当地牧民将查果拉称为”鲜花哨所”，并非因为这里鲜花可觅，而是在牧民心中，边防军人就是盛开在查果拉的”鲜花”。

哨所建起阳光棚，官兵在这里栽种蔬菜、绿植，在一茬茬官兵不懈努力下，格桑花也在阳光棚绽放。那年王平平过生日，吴晨晨在阳光棚与她视频通话，看到雪山上绽放格桑花，她感动极了。

从那以后，王平平每隔一段时间便会寄来各种花种。从仙人掌、仙人球，到银杉、红柳，每一种植物都是她精心挑选的。

阳光棚面积不大，雪山冻土不利于植物扎根，官兵就从山下背土上哨。驻地寒潮袭来，一场暴雪过后，棚内温度陡降，原本种活的花一夜间枯萎了。吴晨晨和战友们清晨跑进阳光棚，看到打蔫儿的花朵，全都心疼坏了。

翌年开山时，吴晨晨收到王平平寄来的信：”兵在雪山扎根，查果拉就永远有春天。只要不放弃，哨所还会迎来春花开。”吴晨晨开始带人研究高原气候和植物生长习性，尝试种植耐寒、抗旱的花种。在地方科研人员的帮助下，杜鹃、格桑花先后在雪山寒哨扎根。

每年冬天，哨所周围一片白雪皑皑，但阳光棚内却是一派春色。战友们下哨后，都会在这里给家人打电话。阳光棚是温暖的港湾，盛开着”坚守之花”“爱情之花”“亲情之花”……每一种花，都是战士心中的珍宝。

有了花，雪山哨所的冬天，有了春天的气息。如今军嫂来队探亲，都会随身携带一包耐寒、抗旱的花种。她们希望哨所有花，希望雪山寒哨充满生机与活力，点缀缤纷色彩。

放下手中的花种，吴晨晨的目光落在了那幅水粉画上——一片油菜花田中，一家三口追逐嬉戏，脸上洋溢着幸福的笑容。每次和妻女打完电话，女儿都会用稚嫩的声音询问：”爸爸，你什么时候才能回家？”

吴晨晨就会告诉女儿：”等家乡的油菜花开的时候。”

那年女儿上小学了，美术老师带着她画了一幅油菜花田。放学后，小家伙高兴地让妈妈把这幅画拍给爸爸看。

电话这头，吴晨晨即将到观察哨执勤，他看着女儿的画，眼眶红了。走出宿舍，走进风雪中，他的脑海出现一个画面：妻女站在家门口，等待着他回家。

在今年开山时，他又一次收到女儿画的油菜花田，吴晨晨格外感动。他爬上哨楼，眺望远处的群山，心中悄然绽放一片花海。

他知道，无论哨所的环境多么艰苦，无论与家人相隔多远，那份对美好生活的向往和坚守都会像花一样，在哨所官兵心中盛开。无论身在何处，家的温暖、家人的牵挂，是军人最坚强的铠甲。

Love and Stick to it, They Are the “Flowers” Blooming in Chaguola

Source: China Military Network-People’s Liberation Army Daily Author: Song Weikun Chen Wubin Editor: Shang Xiaomin

2025-03-10

Chaguola——Spring flowers bloom in the cold sentry

■Song Weikun People’s Liberation Army Daily Special Correspondent Chen Wubin

Soldiers water the Gesang flowers.

Glacier patrol.

Wu Chenchen is on duty at the main peak of Chaguola. Provided by company officers and men [Chaguola is a military outpost at an elevation of 5.261m (17,260ft) above the sea level, located in Yadong County of the Tibet region of China, part of its Shigatse Prefecture.]

In early spring, the Chaguola sentry post at an altitude of more than 5,300 meters is still cold and windy, and the sentry tower is like a steel nail riveted on the iceberg. The wind there seems to be tireless forever, blowing the national flag fluttering, but it can’t blow away the thoughts of the sentry officers and men.

First Sergeant Wu Chenchen has been stationed at the sentry post for 16 years, and has long been accustomed to the wind and snow in Chaguola.

The sentry post ushered in the opening season. In the early morning, he stood in front of the sentry tower to greet the sunrise, and a breath of spring came to his face. “Squad leader, the package sent by your sister-in-law has arrived.” A voice came from the next sentry tower, and Wu Chenchen was full of joy - the package sent from his hometown at the beginning of the year was not delivered to the sentry post in time because of the heavy snow.

After leaving the sentry and returning to the dormitory, Wu Chenchen opened the package with great expectation, and saw that there were two small packages in the plastic foam box. It was a package of flower seeds and a gouache painting.

Opening the paper box containing the flower seeds, Wu Chenchen's heart was surrounded by warmth. Thinking of his wife Wang Pingping sending him to the station at the end of each visit, Wu Chenchen felt a little guilty. From acquaintance to understanding, the couple always spend less time together and more time apart. His wife gave Wu Chenchen a warm home, but he always owed too much to this family.

The two met in the spring. That time Wu Chenchen went home on vacation and met Wang Pingping through a friend's introduction. When they first met, they were a little restrained and didn't know what to talk about. Wu Chenchen has been working at the plateau outpost for a long time. His face is tanned and he is not very talkative.

After graduating from university, Wang Pingping got an enviable job. Many friends introduced her to potential partners, but Wang Pingping has admired soldiers since she was a child. During the communication, she was moved by Wu Chenchen's sincerity and finally walked into the palace of marriage with Wu Chenchen.

Chaguola means "a place where flowers bloom" in Tibetan. The natural conditions of the outpost are harsh. In addition to the continuous snow-capped mountains, even birds and animals are rarely seen. Local herdsmen call Chaguola the "flower outpost", not because flowers can be found here, but in the hearts of herdsmen, border guards are the "flowers" blooming in Chaguola.

The outpost built a sun shed, where officers and men planted vegetables and green plants. With the unremitting efforts of officers and men, Gesang flowers also bloomed in the sun shed. That year, Wang Pingping had a birthday, and Wu Chenchen had a video call with her in the sun shed. Seeing Gesang flowers blooming on the snow-capped mountains, she was very moved.

Since then, Wang Pingping has sent various flower seeds every once in a while. From cacti and prickly pear to silver fir and red willow, each plant is carefully selected by her.

The area of the sun shed is not large, and the frozen soil of the snowy mountain is not conducive to the rooting of plants, so the officers and men carry soil from the foot of the mountain to the sentry post. A cold wave hit the station, and after a blizzard, the temperature in the shed dropped sharply, and the flowers that were originally planted withered overnight. Wu Chenchen and his comrades ran into the sun shed in the morning and saw the wilted flowers, and they were all heartbroken.

When the mountain was opened the following year, Wu Chenchen received a letter from Wang Pingping: "Soldiers take root in the snowy mountains, and Chaguola will always have spring. As long as you don't give up, the outpost will usher in spring flowers." Wu Chenchen began to lead people to study the plateau climate and plant growth habits, and tried to plant cold-resistant and drought-resistant flower seeds. With the help of local scientific researchers, azaleas and gesang flowers took root in the cold outposts of the snowy mountains.

Every winter, the outpost is surrounded by snow, but the sun shed is full of spring. After leaving the post, the comrades would call their families here. The sun shed is a warm harbor, with “flowers of perseverance”, “flowers of love”, “flowers of family affection” in full bloom... Each flower is a treasure in the hearts of soldiers.

With flowers, the winter of the snowy mountain outpost has the breath of spring. Nowadays, when military wives come to visit their relatives in the team, they will bring a bag of cold-resistant and drought-resistant flower seeds with them. They hope that the outpost will have flowers, and hope that the snowy mountain cold outpost will be full of vitality and vitality, and embellished with colorful colors.

Putting down the flower seeds in his hand, Wu Chenchen’s eyes fell on the gouache painting-a family of three chasing and playing in a rapeseed field, with happy smiles on their faces. Every time he finished a phone call with his wife and daughter, his daughter would ask in a childish voice: “Dad, when can you go home?”

Wu Chenchen would tell his daughter: “Wait until the rapeseed flowers in my hometown bloom.”

That year, his daughter went to elementary school, and the art teacher took her to paint a rapeseed field. After school, the little guy happily asked his mother to take a picture of the painting and show it to his father.

On the other end of the phone, Wu Chenchen was about to go to the observation post for duty. He looked at his daughter’s painting and his eyes were red. Walking out of the dormitory and into the wind and snow, a picture appeared in his mind: his wife and daughter were standing at the door of the house, waiting for him to go home.

When he opened the mountain this year, he once again received a rapeseed field painted by his daughter, and Wu Chenchen was particularly moved. He climbed up the sentry tower and looked at the mountains in the distance, and a sea of flowers quietly bloomed in his heart.

He knew that no matter how difficult the environment of the post was, no matter how far away from his family, the yearning and perseverance for a better life would bloom like flowers in the hearts of the officers and men of the post. No matter where you are, the warmth of home and the care of your family are the strongest armor for soldiers.

列兵走上”先锋人物”领奖台,第 72 集团军某旅以战选人育人

来源：中国军网-解放军报 作者：姜晓晨 童祖静 责任编辑：尚晓敏 发布：2025-03-13

列兵走上”先锋人物”领奖台

——第七十二集团军某旅以战选人育人的一段经历

■姜晓晨 解放军报特约记者 童祖静

前段时间，第 72 集团军某旅举行”先锋人物”颁奖典礼，一名列兵登台领奖，在官兵中引发热议。

这名战士名叫李大征，入伍仅一年。令记者有些意外的是，他去年的军事训练总评成绩并没有排在前列。

带着疑问，记者走进李大征所在连队一探究竟。

“李大征入伍时间较短，基础体能尚在提升阶段，因此总体成绩不高。”该连指导员告诉记者，李大征此次能够获得荣誉，得益于他对部队战斗力建设作出的贡献。

原来，李大征是一名”持证入伍”的特长兵，入伍前就是学校小有名气的无人机飞控手。来到连队后，他主动报名参加上级组织的无人机飞控手集训比武，通过刻苦训练、顽强拼搏，最终在比武竞赛中取得单课目第二名的好成绩。

后来，他又成为集团军小型无人机飞控专业唯一一名列兵教练员，带教出一批无人机专业骨干。

“虽只是一名列兵，但能在上级组织的比武中获得佳绩并不容易，应该给予奖励。”在参赛人选推荐阶段，李大征所在营党委全力举荐。

对此，也有官兵存有疑虑：”凭借’一招鲜’就能’吃遍天’，那以后谁还追求全面发展、全面过硬呢？”

“基础课目当然要练好，但小李的体能成绩不理想只是暂时的，他的多项成绩一直在稳步提升。”讨论中，该旅党委态度一致：新装备列装后，有的官兵存在畏难情绪，一味盯着”米秒环”，不钻研运用新技术，我们要把”战斗力贡献率”作为评优评先的硬杠杠，大力表彰在新技术运用上作出突出贡献的官兵，树牢向战为战导向。

最终，大家一致同意推荐李大征参评旅队”先锋人物”。连队还安排体能骨干与他结成对子，帮助尽快补足短板。

结合这段经历，该旅组织基层官兵围绕”如何当一名好兵”等主题开展群众性讨论，引导大家牢固立起向战练兵、为战育人的鲜明导向。

“好兵就要平时过得硬，战时打得赢。”二级上士张广太告诉记者，他前一年参加旅综合演训时，面对”蓝军”多次袭扰依然顺利完成工程保障任务，年底也被旅里评为”先锋人物”。

“闻战则喜、不畏艰险、敢打敢拼，这些特质我总能在’好兵’身上看到。”对此，一级军士长孙波感同身受。去年孙波带队参加上级比武，李大征就是其中一员。

“不论资历看能力，按照战斗力贡献率给予荣誉激励，如今已成为官兵的普遍共识。”孙波说。

翻开旅队荣誉簿，记者看到，”油料尖兵”胡安康、”财务尖兵”蒋凯等一大批年轻战士被聘为”首席教练员”；通过广泛开展”师承带教”活动，20多名列兵走上主战岗位，38人当上技术骨干；建立高级军士”人才库”，10余名高级军士在不同战位发光发热……随着人才培养机制不断优化完善，该旅官兵牢固立起战斗力标准，岗位成才、战位建功的信心持续高涨。

记者感言

树牢”战斗力贡献率”导向

■童祖静

硬币两面看，人才不求全。如果仅从”米数、秒数、环数”等方面来衡量，李大征的个人成绩并不突出，但从对”战斗力贡献率”的角度来讲，他的表现可圈可点。他不仅能自身练就过硬技能，在比武场上脱颖而出，还能发挥特长，带教出一批无人机专业骨干，对部队战斗力建设带来显著效益。

当前，一大批高学历官兵进入军营，大量新武器、新装备列装使用，为能打胜仗提供了人才和物质基础。但是，”枪自己是不会动的，需要有勇敢的心和强有力的手来使用它”。虽然每名官兵都有各自的优长与短板，但作为军人，始终要牢固树立战斗力这个唯一的根本的标准，面向未来战场练兵，着力提高战斗力贡献率，而非一味盯着在比武中拿奖概率高的课目练。

因此，在工作和训练中，各部队要树立提高战斗力贡献率的良好导向，探索完善荣誉激励机制，坚持”打仗需要什么就苦练什么，部队最缺什么就专攻精练什么”，引导官兵紧盯强敌对手练强本领，把部队的人才优势和科技优势转化为能力优势、制胜优势。

Privates Took to the Podium to Receive the “Pioneer Figure”, and a Certain Brigade of The 72nd Group Army Selected and Educated People Through Combat

Source: China Military Network-People’s Liberation Army Daily Author: Jiang Xiaochen Tong Zujing Editor: Shang Xiaomin Release: 2025-03-13 06:32:47

Privates took to the podium to receive the “pioneer figure”

——An experience of a certain brigade of the 72nd Group Army selecting and educating people through combat

■ Jiang Xiaochen People’s Liberation Army Daily Special Correspondent Tong Zujing

Some time ago, a certain brigade of the 72nd Group Army held a “pioneer figure” award ceremony, and a private soldier took the stage to receive the award, which caused heated discussions among officers and men.

The soldier’s name is Li Dazheng, and he has been in the army for only one year. What surprised the reporter was that his overall military training score last year was not ranked at the top.

With doubts, the reporter walked into Li Dazheng’s company to find out.

“Li Dazheng has been in the army for a short time, and his basic physical fitness is still in the stage of improvement, so his overall performance is not high.” The company instructor told reporters that Li Dazheng was able to receive the honor this time thanks to his contribution to the combat effectiveness of the troops.

It turned out that Li Dazheng was a “certified soldier” and was a well-known drone pilot in the school before joining the army. After arriving at the company, he took the initiative to sign up for the drone pilot training competition organized by the superiors. Through hard training and tenacious struggle, he finally won the second place in the single subject in the competition.

Later, he became the only private instructor of the small drone flight control specialty of the group army, and trained a group of drone professional backbones.

“Although he is only a private soldier, it is not easy to achieve good results in the competition organized by the superiors, and he should be rewarded.” During the recommendation stage of the contestants, the party committee of Li Dazheng’s battalion made every effort to recommend him.

In this regard, some officers and men have doubts: “If you can “eat everything” with “one trick”, then who will pursue all-round development and all-round excellence in the future?” “Of course, basic subjects must be practiced well, but Xiao Li’s unsatisfactory physical fitness results are only temporary, and his many results have been steadily improving.” During the discussion, the brigade party committee had a consistent attitude: after the new equipment was put into service, some officers and men were afraid of difficulties and kept staring at the “meter-second ring” instead of studying and applying new technologies. We must use the “combat effectiveness contribution rate” as a hard bar for evaluation and commendation of officers and men who have made outstanding contributions in the application of new technologies, and establish a strong orientation for war. In the end, everyone unanimously agreed to recommend Li Dazheng to participate in the evaluation of the brigade’s “pioneer”. The company also arranged for physical fitness backbones to pair up with him to help make up for the shortcomings as soon as possible. In combination with this experience, the brigade organized grassroots officers and men to carry out mass discussions on themes such as “How to be a good soldier” to guide everyone to firmly establish a clear orientation of training for war and educating people for war. “A good soldier must be strong in peacetime and win in wartime.” Second Sergeant Zhang Guangtai told reporters that when he participated in the brigade’s comprehensive exercise the year before, he successfully completed the engineering

support task in the face of multiple harassments from the “blue army” and was named a “pioneer” by the brigade at the end of the year.

“I always see these qualities in ‘good soldiers’: they are happy to hear about war, are not afraid of hardships, and dare to fight and fight.” First Sergeant Sun Bo empathizes with this. Last year, Sun Bo led the team to participate in the competition of superiors, and Li Dazheng was one of them.

“Regardless of qualifications, we look at abilities, and give honor incentives according to the contribution rate of combat effectiveness. Now it has become a common consensus among officers and men.” Sun Bo said.

Opening the honor book of the brigade, the reporter saw that a large number of young soldiers, such as “Oil Pioneer” Hu Ankang and “Financial Pioneer” Jiang Kai, were hired as “chief trainers”; through the extensive “teaching and apprenticeship” activities, more than 20 privates took up the main combat positions, and 38 people became technical backbones; a “talent pool” of senior sergeants was established, and more than 10 senior sergeants shined in different combat positions... With the continuous optimization and improvement of the talent training mechanism, the officers and men of the brigade have firmly established the combat effectiveness standards, and their confidence in becoming talents in their positions and making contributions in their combat positions continues to rise.

Reporter’s comments

Firmly establish the “combat effectiveness contribution rate” orientation

■ Tong Zujing

Look at both sides of the coin, and talents do not seek perfection. If measured only from the aspects of “meters, seconds, and rings”, Li Dazheng’s personal performance is not outstanding, but from the perspective of “combat effectiveness contribution rate”, his performance is remarkable. He can not only develop excellent skills and stand out in the competition, but also give full play to his expertise and train a group of professional backbones of drones, bringing significant benefits to the combat effectiveness construction of the troops.

At present, a large number of highly educated officers and men have entered the military camp, and a large number of new weapons and equipment have been put into use, providing the talent and material basis for winning the battle. However, “the gun itself will not move, and it needs a brave heart and a strong hand to use it”. Although each officer and soldier has his own strengths and weaknesses, as a soldier, we must always firmly establish combat effectiveness as the only fundamental standard, train soldiers for the future battlefield, and focus on improving the contribution rate of combat effectiveness, rather than blindly focusing on the subjects with a high probability of winning awards in the competition. Therefore, in work and training, all troops should establish a good orientation for improving the contribution rate of combat effectiveness, explore and improve the honor incentive mechanism, adhere to “train hard what is needed for war, and

specialize in what the troops lack the most", guide officers and men to focus on strong enemies and opponents to strengthen their skills, and transform the talent and technological advantages of the troops into capability advantages and winning advantages.

"像连队先辈那样去攻坚"

■马 頔

高原某地，第 76 集团军某旅一场体系训练拉开战幕。接到临机战备拉动命令，"肖宏阁连"立即向数百公里外的陌生地域机动。

一路疾驰，机动至指定点位后，连队官兵立刻加班加点展开作业。规定时限内，长达数百米的堑壕、交通壕，以及机枪碉堡、单兵掩体等工事很快构筑完成。经检验，工事设置科学合理，符合要求。

"不管遇到什么情况，这个英雄连队始终值得信任，因为每名官兵身上都能看到肖宏阁的影子。"该旅领导介绍，"肖宏阁连"是一个从解放战争烽火硝烟中走来的英雄连队。在一次阻击战中，面对敌凶猛火力，老连长肖宏阁带领全连官兵坚守阵地 72 小时，打退敌 10 多次进攻。激烈战斗中，肖宏阁壮烈牺牲，但阵地寸土未失。战后，连队被上级命名为"肖宏阁连"，并逐渐凝聚形成了"打不垮、拼到底"的战斗精神。

红色基因代代传。如何当好英雄传人、续写连队荣耀？该连官兵用实际行动给出了答案。

一次，上级组织实战化对抗训练，该连官兵抵近前沿侦察时发现，"蓝军"碉堡和工事在山顶占据有利位置，己方步战车露头就会挨打。

"要是正面强攻，'伤亡'会比较大。"连长带领大家研究感到，必须让手中的武器打得更远。

由于该型武器高原射击的数据较少，连长便带领骨干依据平原射击数据推算，指导员带着射手练射击。可即便加班加点训练，实弹射击效果仍不理想。

"拿出敢想敢为、敢做敢当、敢拼敢闯的冲劲，再高的山也能翻越，再难的事也能干成。"连长告诉大家，"老连长肖宏阁带着全连坚守阵地，直至牺牲都没有后退半步，我们也要像连队先辈那样去攻坚！"

在连队主官带动下，全连重整旗鼓投入攻关训练。不知经历了多少次失败，一个雨天，射手迪力夏提终于精准命中了目标。”打中了！”连队战友欢呼雀跃，精神振奋。

紧接着，他们又用同样的思路方法，采集到数十组某型武器的高海拔射击数据，并运用到后来的对抗训练中，有效摧毁了”蓝军”阵地。

训练结束后，他们将有关射击经验拍摄制作成教学片，逐级上报，被上级推广到高原驻训部队学习借鉴。

全连官兵能够团结一致、屡创佳绩，同样离不开密切融洽的内部关系。

高原驻训环境恶劣，指导员经常与战士谈心，及时发现解决各种问题；连长每次去训练场最早，休息最晚，遇到难题就带着大家一起攻关。这些暖心举动，激发了战士们的工作训练热情。

那一次，车队顶着寒风向复杂地域机动，一台履带车突然熄火，装甲技师胡振栋和驾驶员张壮壮第一时间钻进狭小的动力舱检修。尽管双手冻得通红，面罩上布满冰碴子，他们仍咬牙坚持，心中只有一个念头：”要拼到底，决不能影响到连队任务。”

终于，故障及时得到排除，接下来的考核，全连全员全装参加，取得优异成绩。

这几年，该连官兵充分发扬”打不垮、拼到底”的战斗精神，敢啃硬骨头、善打攻坚战，先后顺利完成多项重大任务。连队被评为”四铁”先进连队，荣立集体三等功，连长也被战区陆军表彰为”练兵备战先锋”。

“Xiao Hongge Company” of a Brigade of the 76th Group Army: Attack Like the Predecessors of the Company

Source: China Military Network-People’s Liberation Army Daily Author: Ma Di Editor: Shang Xiaomin

2025-03-13

“Xiao Hongge Company” of a brigade of the 76th Group Army inherits and carries forward the spirit of “fighting to the end”-”Attack like the predecessors of the company”

■Ma Di

Somewhere on the plateau, a system training of a brigade of the 76th Group Army kicked off. After receiving the order to mobilize for emergency combat readiness, the “Xiao Hongge Company” immediately moved to an unfamiliar area hundreds of kilometers away.

After galloping all the way and moving to the designated point, the company’s officers and men immediately worked overtime to start operations. Within the specified time limit, trenches

hundreds of meters long, communication trenches, machine gun bunkers, single-soldier bunkers and other fortifications were quickly built. After inspection, the fortifications were set up scientifically and reasonably and met the requirements.

“No matter what situation we encounter, this heroic company is always trustworthy, because every officer and soldier can see the shadow of Xiao Hongge.” The brigade leader introduced that the “Xiao Hongge Company” is a heroic company that came from the flames of the Liberation War. In a blocking battle, facing the fierce firepower of the enemy, the old company commander Xiao Hongge led the officers and men of the company to hold their positions for 72 hours and repelled more than 10 enemy attacks. In the fierce battle, Xiao Hongge died heroically, but the position was not lost. After the war, the company was named “Xiao Hongge Company” by the superiors, and gradually formed a fighting spirit of “not being defeated and fighting to the end”.

The red gene is passed down from generation to generation. How to be a good successor of heroes and continue the glory of the company? The officers and men of the company gave the answer with practical actions.

Once, the superiors organized actual combat confrontation training. When the officers and men of the company approached the front line for reconnaissance, they found that the “Blue Army” bunkers and fortifications occupied a favorable position on the top of the mountain, and their own infantry fighting vehicles would be beaten if they showed their heads.

“If we attack head-on, the casualties will be relatively large.” The company commander led everyone to study and felt that the weapons in their hands must be able to shoot farther.

Since there is less data on plateau shooting of this type of weapon, the company commander led the backbone to calculate based on the plain shooting data, and the instructor took the shooter to practice shooting. But even with overtime training, the live-fire shooting effect is still not ideal.

“Take out the momentum of daring to think, dare to do, dare to fight, and dare to break through. No matter how high the mountain is, it can be climbed, and no matter how difficult the task is, it can be accomplished.” The company commander told everyone, “The old company commander Xiao Hongge led the whole company to hold the position, and did not retreat a step until he died. We must also attack like the predecessors of the company!”

Led by the company commander, the whole company regrouped and invested in attack training. I don’t know how many failures it has experienced. On a rainy day, the shooter Dilixiati finally hit the target accurately. “Hit it!” The company comrades cheered and were excited.

Then, they used the same thinking method to collect dozens of sets of high-altitude shooting data of a certain type of weapon, and applied it to the subsequent confrontation training, effectively destroying the “Blue Army” position.

After the training, they filmed the shooting experience and made it into a teaching film, which was reported step by step and promoted by the superiors to the plateau training troops for learning and reference.

The unity and success of the whole company's officers and men are also inseparable from the close and harmonious internal relationship.

The plateau training environment is harsh, and the instructors often talk with the soldiers to find and solve various problems in time; the company commander goes to the training ground the earliest and rests the latest every time, and takes everyone to solve problems when encountering difficulties. These heartwarming actions have inspired the soldiers' enthusiasm for work and training.

That time, the convoy maneuvered to a complex area in the cold wind, and a tracked vehicle suddenly stalled. Armored technician Hu Zhendong and driver Zhang Zhuangzhuang immediately got into the narrow power compartment for maintenance. Although their hands were red from the cold and their masks were covered with ice, they still gritted their teeth and persisted, with only one thought in their minds: "We must fight to the end and never affect the company's mission."

Finally, the fault was eliminated in time, and the whole company participated in the next assessment with full equipment and achieved excellent results.

In recent years, the officers and men of the company have fully carried forward the fighting spirit of "fighting to the end without being defeated", dared to take on tough tasks, and were good at fighting tough battles, and successfully completed many major tasks. The company was rated as an advanced company with "four irons" and won the third-class collective merit. The company commander was also commended by the theater army as a "pioneer in training and preparation."

第 82 集团军某旅：”家连共育”助力官兵成长

来源：中国军网-解放军报 作者：王飞虎 刘小云 责任编辑：尚晓敏

2025-03-13

第 82 集团军某旅——

“家连共育”助力官兵成长

■王飞虎 刘小云

“50 环！”前不久，第 82 集团军某旅某连举行实弹射击考核，列兵冯祥打出 50 环的好成绩，进步明显。随后，他便给家人发去一条短信：”请爸妈放心，我一定当个合格的兵。”

小冯的成长进步，既有战友帮带的功劳，也离不开家人的鼓励支持。该连指导员说，这是旅队探索”家连共育”模式助力官兵成长的一次生动实践。

笔者了解到，冯祥的外公是一名退伍老兵。去年，冯祥在外公的影响下参军入伍，在队列养成、内务整理、军事体能等方面表现突出。可在实弹射击中，他连续几次考核都不及格。虽然经常在干部骨干指导下加练，成绩还是不够稳定。

“或许是你太急于向家人证明自己，心理压力太大。”一次，小冯的母亲在电话中告诉他，”欲速则不达，你要放下心理包袱轻装上阵。”

听了母亲的话，冯祥开始调整心态，不再独自埋头琢磨，而是主动融入集体，训练时拉着身边战友分析弹道散布，请教稳定气息方法，在一点一滴中学习提升。

得知儿子进步明显，小冯的母亲给连队官兵写了一封感谢信：”你们纯朴谦逊、高尚纯洁的品质，让我真正体会到’最可爱的人’的含义，希望冯祥也能像你们一样，早日成为一名合格军人……”

捧读信件，指导员真切感受到了家庭和连队联教共育的作用。

“亲人是官兵的情感支柱，是官兵成长路上的重要力量。”该旅领导介绍，今年以来，他们结合开展家庭家教家风教育，组织开展了”上好一堂教育课、观看一部情景剧、组织一场讨论辨析、共读一封倡议信、宣传一批典型事迹”等系列活动，聚力打通家庭与部队联教共育链路，助力官兵走好军旅路。

在信息橱窗开设”涵养良好家风”专栏，宣扬军人家庭教知识、育品德的典型事迹；在战士生日、立功受奖等时机，邀请官兵亲属视频连线，共享军旅荣耀，激发训练热情……如今，官兵亲属在教育管理中发挥的作用越来越明显。

“我理解丈夫肩上的职责，孩子吵闹着要见爸爸时，我就告诉他，你的爸爸是名军人，需要守护我们的’大家’……”一次家属来队期间，二级军士长杨洪第的妻子王丹平分享起两人相恋相知的经历，让现场官兵和家属深受触动。在随后组织的”养成良好家风的长远意义”等话题讨论中，不少官兵表示，一定坚守岗位苦练本领，不辜负家人的期望和连队的培养。

“家连共育”助力官兵成长。该旅领导介绍，目前他们正在积极筹备修建托管所等惠兵设施，着力消除官兵的后顾之忧，让大家全身心投入练兵备战。

A Certain Brigade of the 82nd Group Army: “Home-Company Co-Education” Helps Officers and men Grow

Source: China Military Network-People's Liberation Army Daily Author: Wang Feihu Liu Xiaoyun Editor: Shang Xiaomin

2025-03-13

A certain brigade of the 82nd Group Army——

"Home-Company Co-education" helps officers and men grow

■Wang Feihu Liu Xiaoyun

"50 rings!" Not long ago, a certain company of a certain brigade of the 82nd Group Army held a live-fire shooting assessment. Private Feng Xiang scored 50 rings and made obvious progress. Afterwards, he sent a text message to his family: "Please rest assured, Mom and Dad, I will definitely be a qualified soldier."

Xiao Feng's growth and progress are not only due to the help of his comrades, but also inseparable from the encouragement and support of his family. The company instructor said that this is a vivid practice of the brigade exploring the "home-company co-education" model to help officers and men grow.

The author learned that Feng Xiang's grandfather is a retired veteran. Last year, Feng Xiang joined the army under the influence of his grandfather and performed outstandingly in formation, housekeeping, and military physical fitness. But in live-fire shooting, he failed several assessments in a row. Although he often practiced under the guidance of cadres and backbones, his results were still not stable enough.

"Maybe you are too eager to prove yourself to your family, and the psychological pressure is too great." Once, Xiao Feng's mother told him on the phone, "Haste makes waste, you have to put down your psychological burden and go into battle lightly."

After listening to his mother's words, Feng Xiang began to adjust his mentality and no longer pondered alone, but took the initiative to integrate into the group. During training, he pulled his comrades around him to analyze the trajectory dispersion and ask for advice on how to stabilize the breath, learning and improving bit by bit.

Knowing that her son had made significant progress, Xiao Feng's mother wrote a thank-you letter to the company officers and men: "Your simple, humble, noble and pure qualities have made me truly appreciate the meaning of 'the most lovely person'. I hope Feng Xiang can become a qualified soldier as soon as possible like you..."

Reading the letter, the instructor truly felt the role of joint education between family and company.

"Family members are the emotional pillars of officers and men, and an important force in their growth." The leaders of the brigade introduced that since this year, they have combined family education with family style education, and organized a series of activities such as "giving a good

education class, watching a situational drama, organizing a discussion and analysis, reading a letter of initiative, and publicizing a number of typical deeds", focusing on opening up the link between family and troops to jointly educate and educate, and helping officers and men to walk the military road well.

A column "cultivating good family style" was opened in the information window to publicize the typical deeds of military families educating knowledge and cultivating morality; on the occasions of soldiers' birthdays, meritorious service and awards, etc., invite officers and men' relatives to video link, share military glory, and stimulate training enthusiasm... Nowadays, the role of officers and men' relatives in education management is becoming more and more obvious.

"I understand the responsibilities of my husband. When the child clamors to see his father, I tell him that your father is a soldier and needs to protect our "everyone"..." During a family visit to the team, Wang Danping, the wife of Second Sergeant Yang Hongdi, shared the experience of their love and understanding, which deeply touched the officers and men and their families on the scene. In the subsequent discussion on topics such as "The long-term significance of developing a good family tradition", many officers and men said that they must stick to their posts and practice hard to live up to the expectations of their families and the training of the company.

"Family-company co-education" helps officers and men grow. The brigade leaders introduced that they are currently actively preparing to build facilities such as a care center to benefit soldiers, and strive to eliminate the worries of officers and men, so that everyone can devote themselves to training and preparation for war.

陆军某旅：向战淬火，岗位砺兵谋打赢

来源：解放军报 作者：廖晓彬 喻润东 责任编辑：孙悦 2025-03-14

陆军某旅深入学习贯彻中央军委政治工作会议精神——

向战淬火，岗位砺兵谋打赢

■解放军报特约记者 廖晓彬 喻润东

春日，粤东某训练场，陆军某旅一场综合对抗训练火热展开。该旅紧贴实战设置难局险局，着力引导官兵探索多兵种协同战法训法和新装备实战化应用。

“只有将学习贯彻中央军委政治工作会议精神成效体现为从难从严练兵备战的实际行动，才能不负重托，锤炼出战场制胜的过硬本领。”训练刚结束，该旅官兵立即展开复盘研讨，查摆分析训练中暴露出的短板弱项，逐项制订改进方案。

“政治上的坚定、行动上的自觉，来源于理论上的清醒。”该旅领导介绍，为将学习贯彻中央军委政治工作会议精神引向深入，推动部队建设高质量发展，他们结合新修订的军事训练大纲，广泛开展群众性讨论活动，引导官兵紧贴使命任务和岗位实践谈体会、话感悟，在讨论交流中找准贯彻会议精神的着力点，把学习成效转化为指导实践、推动工作的强大力量。

山地密林中，该旅某营组织侦察队员连贯展开观察报知、潜伏渗透、野外生存等课目训练，导调组针对性设置实战背景，采取多课目融合、多特情叠加等方式组织连贯考核，检验官兵专攻精练成效。”政治上的革命性锻造，激发出官兵更加高涨的训练热情，大家自觉谋战研战，积极投身险难课目训练……”该营领导介绍，官兵聚焦训练难点堵点问题建言献策，不少”金点子”被采纳，精武强能、建功战位的积极性被充分调动起来。

干部带头，身教示范。训练场上，该旅党员干部积极发挥先锋模范作用，紧盯制约战斗力提升难题集智攻关。”喊破嗓子，不如干出样子。我们要带头苦练专业技能，坚持高标准、严要求，带动广大官兵深入谋战研战，向着更高目标发起冲锋。”现场跟训的一名作训参谋说。

向战淬火，岗位砺兵谋打赢。连日来，该旅以深入学习贯彻中央军委政治工作会议精神为牵引，打通”学战—研战—验战”链路，通过体系化练兵、实战化考核等方式锤炼官兵战斗本领，部队训练质效持续提升。

A Certain Army Brigade: Tempering for War, Training Soldiers at Their Posts to Win

Source: PLA Daily Author: Liao Xiaobin Yu Rundong Editor: Sun Yue 2025-03-14

A certain army brigade thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference——

Tempering for war, training soldiers at their posts to win

■ PLA Daily Special Correspondent Liao Xiaobin Yu Rundong

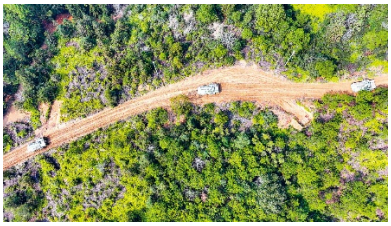
In spring, at a training ground in eastern Guangdong, a comprehensive confrontation training of a certain army brigade was launched. The brigade set up difficult and dangerous situations closely in actual combat, and focused on guiding officers and men to explore multi-service coordinated tactics and training methods and practical application of new equipment.

“Only by embodying the results of studying and implementing the spirit of the Central Military Commission’s Political Work Conference into practical actions of training soldiers in a difficult and strict manner can we live up to the trust and forge a strong ability to win on the battlefield.” As soon as the training ended, the officers and men of the brigade immediately launched a review and discussion, checked and analyzed the shortcomings and weaknesses exposed in the training, and formulated improvement plans item by item.

“Political firmness and conscious action come from theoretical clarity.” The brigade leaders introduced that in order to deepen the study and implementation of the spirit of the Central Military Commission’s political work conference and promote the high-quality development of the troops, they combined the newly revised military training outline to carry out extensive mass discussion activities, guide officers and men to talk about their experiences and feelings closely related to mission tasks and job practices, find the focus of implementing the spirit of the conference in discussions and exchanges, and transform the learning results into a powerful force to guide practice and promote work.

In the dense forests of the mountains, a battalion of the brigade organized reconnaissance team members to carry out continuous training in subjects such as observation and reporting, lurking infiltration, and field survival. The guidance and coordination group set up a practical background in a targeted manner, and organized continuous assessments by integrating multiple subjects and superimposing multiple special situations to test the effectiveness of officers and men’ specialization and training. “The revolutionary political forging has inspired officers and men to have a higher enthusiasm for training. Everyone consciously plans and studies war, and actively

participates in dangerous and difficult training...” The battalion leader introduced that officers and men focused on the difficulties and bottlenecks in training and made suggestions. Many “golden ideas” were adopted, and the enthusiasm for improving martial arts and strengthening capabilities and making contributions to combat positions was fully mobilized.



Cadres take the lead and set an example. On the training ground, the party members and cadres of the brigade actively played a pioneering and exemplary role, focusing on the problems that restrict the improvement of combat effectiveness and tackling them with wisdom. “It is better to do something than to shout. We must take the lead in practicing professional skills, adhere to high standards and strict requirements, and lead the majority of officers and men to plan and study war in depth, and charge towards higher goals.” A training staff officer who followed the training on the spot said.

Tempering for war, training soldiers at their posts to win. In recent days, the brigade has been guided by the in-depth study and implementation of the spirit of the Central Military Commission’s Political Work Conference, opening up the “learning about war - researching war - testing war” link, and honing the combat capabilities of officers and men through systematic training and practical assessments, and the quality and effectiveness of the troops’ training has continued to improve.

陆军某旅借力科技手段增强装备保障质效

来源：解放军报 作者：冯佳琦 许成宇 责任编辑：尚晓敏 2025-03-16

陆军某旅借力科技手段增强装备保障质效

修理车间提升信息化水平

解放军报讯 冯佳琦、许成宇报道：”从发动机构造到电路系统布局，每个细节清晰可见，而且经过模拟训练后，我对车辆内部构造有了更加直观的认识。”春日，陆军某旅”智慧修理间”建成并投入使用，下士邓开宝完成车辆拆卸模拟训练后，摘下 AR 眼镜欣喜地说。这是该旅运用科技手段提升装备保障信息化水平的缩影。

“新建成的’智慧修理间’分为装备综合维保和装备技术人才中心两个区域，配套的装备信息系统不仅有助于提升装备出入库效率，而且实现了装备维修档案数字化。”该旅领导说，这一系统实现了全旅备件信息统筹管理与一键查询。工作中，官兵借助维修操作台智能操作模式，可对多台车辆装备或工程装备同时进行维修；维修结束后，官兵将装备维修数据录入系统，后续复盘或查询装备维修环节时，相关人员点开系统就能对维修过程一目了然。

笔者走进装备综合维保区看到，”车辆底盘修理区”“钣焊制配区”“动力系统修理区”等区域内，官兵同步展开多项维修作业。二级上士吴国成在装备信息系统输入某型装备名称后，其型号参数、零件数量及存放位置等信息，在电子屏幕上逐一显现。”相较以往人工登记，这套系统不仅省时省力，统计误差也明显减小。”吴国成说。

“之前，遇到装备储备不足的情况时，官兵实操训练不得不按下’暂停键’。装备技术人才中心投入使用后，大家可利用模拟装备开展实操训练，确保了训练的连续性。”该旅领导说，科技手段赋能装备保障，既解决了大项维修任务的工作接续问题，又为开展装备维修教学提供了丰富样本。下一步，他们将利用相关资源加大专业骨干培养，为提升装备保障质效提供人才支撑。

A Certain Army Brigade Leverages Technology to Enhance the Quality and Efficiency of Support

Source: PLA Daily Author: Feng Jiaqi Xu Chengyu Editor: Shang Xiaomin 2025-03-16

A certain army brigade leverages technology to enhance the quality and efficiency of equipment support

Repair workshop improves information level

PLA Daily News Feng Jiaqi and Xu Chengyu reported: “From the engine structure to the circuit system layout, every detail is clearly visible, and after the simulation training, I have a more

intuitive understanding of the internal structure of the vehicle." In the spring, the "smart repair room" of a certain army brigade was built and put into use. After completing the vehicle disassembly simulation training, Corporal Deng Kaibao took off his AR glasses and said happily. This is a microcosm of the brigade's use of technology to improve the level of informationization of equipment support.

"The newly built 'smart repair room' is divided into two areas: equipment comprehensive maintenance and equipment technical talent center. The supporting equipment information system not only helps to improve the efficiency of equipment in and out of the warehouse, but also realizes the digitization of equipment maintenance files." The brigade leader said that this system realizes the coordinated management and one-click query of spare parts information for the entire brigade. During work, soldiers can use the intelligent operation mode of the maintenance console to repair multiple vehicles or engineering equipment at the same time; after the maintenance, soldiers will enter the equipment maintenance data into the system. When reviewing or querying the equipment maintenance link later, relevant personnel can click on the system to see the maintenance process at a glance.

The author walked into the comprehensive equipment maintenance area and saw that soldiers carried out multiple maintenance operations simultaneously in areas such as "vehicle chassis repair area", "sheet metal welding area" and "power system repair area". After Sergeant Wu Guocheng entered the name of a certain type of equipment into the equipment information system, its model parameters, number of parts and storage location and other information appeared one by one on the electronic screen. "Compared with the previous manual registration, this system not only saves time and effort, but also significantly reduces statistical errors." Wu Guocheng said.

"Before, when there was a shortage of equipment reserves, the soldiers had to press the 'pause button' on their practical training. After the Equipment Technical Talent Center was put into use, everyone can use simulated equipment to carry out practical training, ensuring the continuity of training." The brigade leader said that the use of scientific and technological means to empower equipment support has not only solved the problem of work continuity for major maintenance tasks, but also provided rich samples for equipment maintenance teaching. In the next step, they will use relevant resources to increase the training of professional backbones and provide talent support for improving the quality and efficiency of equipment support.

聆听第 82 集团军某旅 "大青山模范守备连"的暖心故事

来源：中国军网-解放军报 作者：刘小云 田鲁亚 责任编辑：孙悦

2025-03-17

"被战友需要是一种幸福"

——聆听第 82 集团军某旅”大青山模范守备连”的暖心故事

■刘小云 田鲁亚

陈智泉（右一）为战友发放快递。徐 超摄

“你走后，这活能不能交给我？”春日的一个午后，第 82 集团军某旅”大青山模范守备连”上等兵陈智泉找到中士向涛，希望自己可以负责收发快递工作，为连队建设出一分力。

向涛是连队的快递收发员。由于该连使命任务特殊、驻地相对偏僻，快递只能送到山下的村庄里。这几年，官兵收寄包裹，全部由向涛代劳。

前不久，由于岗位调整，向涛无法继续为大家服务，但他并不担心。因为这段时间，已经有好几个战友主动表示，愿意接手这个差事。

快递收发员，在基层部队既无编制，也没有多少技术含量。在旁人看来，这项工作占用不少时间和精力，有时甚至会”吃力不讨好”，为何有这么多战士抢着干？

“答案，藏在我们连的光荣传统里。”面对笔者的疑问，向涛作出解释，”当年，我连前身部队驻守大青山期间，通信员代继伟每天往返几十公里的山路，向执勤点下发通知，为官兵取寄信件，战友们亲切地称他’青山鸿雁’……”

如今，连队的工作生活条件大大改善，不再需要”鸿雁传书”，但这段佳话蕴含的奉献精神仍在不断赓续传承。

“战友们给予我无私帮助，不为他们做点什么，总觉得心里过意不去。”陈智泉告诉笔者，他军事素质偏弱，每次训练，战友们都会耐心向他传授技巧方法，其中还有人主动与他结成对子，手把手教动作、抠细节。

当上快递收发员的陈智泉，比以前更忙了。尽管牺牲了不少个人休息时间，但他没有丝毫怨言。当问及内心感受，陈智泉总是这样回答：”被战友需要是一种幸福。”

笔者在该连采访，发现这样的故事还有很多。

“小修不请人，大修省经费。”这是连队修理工、下士李自豪的口头禅。李自豪是一名”特长兵”，入伍前曾在地方技校学过焊接、维修电器等技术。下连之初，他本打算把这些技能隐藏起来，落得一个清闲，但不久后发生的一件事，改变了他的想法。

一次，李自豪外出执行任务，遇到天降大雨。返回连队的路上，浑身湿透的他突然想起自己晾在外面的衣服还没收。”糟糕，这下没有衣服可换了。”李自豪暗道。可回到宿舍，他看到自己的衣服已被战友收回并吹干，心底顿时涌起一股暖流。一旁的战友淡淡地说：”都是举手之劳的事，大家互相帮助嘛。如果是你，也会这么做的。”

“举手之劳，需要’我为人人、人人为我’的心胸。”李自豪深受触动，从此像变了一个人，不仅主动承担连队的维修工作，还牵头成立了维修技术组，把一些战友培养成了维修能手。

没有硬性规定，无需强行指派，全凭主动和自觉。中士元柯皓只要不休假，每周都会抽出半天时间为战友理发，至今已坚持 6 年；下士邱爽每天将报刊杂志按时送到每个班排，风雨无阻；上等兵何帅龙利用个人所学，加班加点帮助教学骨干制作课件和展板……采访期间，笔者有一种强烈的感受：官兵们心里时刻想着战友、装着连队，人人眼里有活儿，个个手上有事干，”以连为家”变得十分具体而生动。

“其实，一支连队建设发展的根基，就是在一茬茬官兵的点滴付出中累积和夯实的。”该连指导员说，”越是不起眼的暖心事，越能体现官兵的觉悟和境界，越能增进战友之间的信任和感情，越能凝聚起干事创业的力量。”

指导员坦言，生活在一个集体里，大家最不想听到的话是”与我无关”，最怕见到的行为是”视而不见”。只要每个人都担起自己的责任，为大家、为连队发光发热，就没有实现不了的目标，克服不了的困难。

细微之处见深情。”我生日那天，同年兵李旭专门去炊事班给我煮了一碗家乡面”“我体能训练跟不上，班长王辛平不辞辛苦，经常陪我加练”……在该连近日组织的”夸夸我的好战友”分享会上，官兵们争着上台分享身边的感动，现场不时响起阵阵掌声。”付出不求回报，但被战友们看在眼里、记在心中，我就会持续激发热情和动力。”一名”常做好事不留名”的战士对笔者说。

氛围的力量，有时胜过一切说教。被评为”四铁”先进单位，立功受奖人数逐年增加，申请留队的战士越来越多……在这个驻地相对偏远的连队，听到这些好消息，笔者也就不觉得惊讶了。

“Being needed by comrades is a kind of happiness”

-Listen to the heartwarming story of the “Daqingshan Model Guard Company” of a brigade of the 82nd Group Army

■Liu Xiaoyun Tian Luya

Chen Zhiquan (first from the right) distributes express to his comrades. Photo by Xu Chao

“After you leave, can this job be handed over to me?” One afternoon in spring, Corporal Chen Zhiquan of the “Daqingshan Model Guard Company” of a brigade of the 82nd Group Army found Sergeant Xiang Tao, hoping that he could be responsible for the delivery of express delivery and contribute to the construction of the company.

Xiang Tao is the company’s express delivery and delivery clerk. Due to the special mission of the company and the relatively remote location, express delivery can only be delivered to the villages at the foot of the mountain. In recent years, Xiang Tao has been responsible for the delivery of parcels by officers and men.

Not long ago, due to job adjustments, Xiang Tao was unable to continue serving everyone, but he was not worried. Because during this period, several comrades have already taken the initiative to express their willingness to take over this job.

Courier delivery personnel have neither establishment nor much technical content in grassroots units. In the eyes of others, this job takes up a lot of time and energy, and sometimes it is even “thankless”, why are there so many soldiers rushing to do it?

“The answer is hidden in the glorious tradition of our company.” Facing the author’s question, Xiang Tao explained, “Back then, when my company’s predecessor was stationed in Daqingshan, the communicator Dai Jiwei traveled dozens of kilometers of mountain roads every day to issue notices to the duty points and pick up and send letters for officers and men. Comrades affectionately called him ‘Qingshan Hongyan’...”

Today, the working and living conditions of the company have greatly improved, and there is no need for “Hongyan to deliver letters”, but the spirit of dedication contained in this story is still being passed on.

“My comrades-in-arms have given me selfless help. If I don’t do something for them, I always feel bad.” Chen Zhiquan told the author that his military quality is relatively weak. Every time he trains, his comrades-in-arms will patiently teach him skills and methods. Some of them even take the initiative to pair up with him to teach him the movements and details.

Chen Zhiquan, who has become a courier, is busier than before. Although he has sacrificed a lot of personal rest time, he has no complaints. When asked about his inner feelings, Chen Zhiquan always answers like this: “It is a blessing to be needed by comrades-in-arms.”

The author interviewed the company and found that there are many such stories.

“Minor repairs don’t hire people, and major repairs save money.” This is the mantra of Li Zihao, a repairman and corporal in the company. Li Zihao is a “special soldier”. Before joining the army, he had learned welding, electrical appliance repair and other technologies in a local technical school. At the beginning of the company, he planned to hide these skills and end up with a leisurely life, but an incident that happened soon after changed his mind.

Once, Li Zihao went out to perform a mission and encountered heavy rain. On the way back to the company, he suddenly remembered that his clothes hung outside had not been collected. “Oh no, I have no clothes to change now.” Li Zihao thought to himself. But when he returned to the dormitory, he saw that his clothes had been collected and dried by his comrades, and a warm current suddenly surged in his heart. The comrade next to him said lightly: “It’s just a little effort, everyone helps each other. If it were you, you would do the same.” “It’s just a little effort, it requires the mindset of ‘I am for everyone, everyone is for me’.” Li Zihao was deeply touched and became a different person from then on. He not only took the initiative to undertake the company’s maintenance work, but also took the lead in establishing a maintenance technical team and trained some comrades into maintenance experts. There are no hard and fast rules, no forced assignment, it all depends on initiative and consciousness. Sergeant Yuan Kehao, as long as he is not on vacation, will take half a day every week to cut hair for his comrades, and has persisted for 6 years; Corporal Qiu Shuang delivers newspapers and magazines to each squad on time every day, rain or shine; Corporal He Shuailong uses his personal knowledge to work overtime to help the teaching backbones make courseware and display boards... During the interview, the author had a strong feeling: the officers and men always think about their comrades and the company, everyone has work in their eyes, and everyone has things to do, “taking the company as home” has become very specific and vivid.

“In fact, the foundation of the construction and development of a company is accumulated and consolidated through the little efforts of officers and men.” The company instructor said, “The more inconspicuous and heartwarming things are, the more they can reflect the consciousness and realm of officers and men, the more they can enhance the trust and feelings between comrades, and the more they can gather the power to do things and start businesses.”

The instructor admitted that living in a collective, the words that everyone least wants to hear are “it has nothing to do with me”, and the behavior that they are most afraid of seeing is “turning a blind eye”. As long as everyone takes up their own responsibilities and shines for everyone and the company, there will be no unattainable goals and no unsurmountable difficulties.

The subtleties show deep affection. “On my birthday, Li Xu, a soldier of the same year, went to the kitchen to cook me a bowl of hometown noodles.” “I couldn’t keep up with the physical training, and the squad leader Wang Xinping took the trouble to often accompany me to practice more.”... At the “Praise My Good Comrades” sharing meeting organized by the company recently, officers and men rushed to the stage to share the touching moments around them, and applause broke out from time to time. “I don’t ask for anything in return, but my comrades see and remember it in their eyes, which will continue to inspire my enthusiasm and motivation.” A soldier who “often does good things without leaving a name” told the author.

The power of atmosphere sometimes beats all preaching. Rated as an advanced unit of “Four Irons”, the number of people who have made meritorious contributions and received awards has increased year by year, and more and more soldiers have applied to stay in the team... In this relatively remote company, I was not surprised to hear these good news.

压紧压实责任 建强战斗堡垒

——第 74 集团军某旅党委提高基层党支部委员履职尽责能力的探索与实践

■潘正丞 刘 杰 汪文棋

前不久，第 74 集团军某旅工兵分队组织开展架桥课目训练，提升官兵遂行实战化任务能力。图为该旅工兵分队党支部委员、排长李文钊（右三）讲解作业要点。谢 炜摄

编者按 基层党支部委员是基层党支部建设的骨干力量，其开展工作的能力水平直接影响党支部建设质量。具体工作实践中，个别支部委员找不准定位、厘不清责任，在履职尽责上被动等安排靠督促，一定程度上削弱了党支部带领官兵遂行作战任务的能力、领导单位全面建设的能力和解决自身问题的能力。

欲筑室者，先治其基。第 74 集团军某旅党委重视对党支部委员的帮带培养，通过强化党性、本领升级等方式，督导他们增强履职尽责的积极性主动性，努力提高开展工作的能力水平，不断增强党支部的向心力、凝聚力、战斗力。他们的探索有一定借鉴意义。

扛起责任——

厘清职责找准定位

作为一名任职 3 年的连队党支部委员，第 74 集团军某旅榴炮二连中尉排长孟德文，依然记得第一次参加连队支委会时的紧张与局促。

“自己是新成员，资历和经验都尚浅，会上更多的是倾听，会后做好自己负责的工作即可。”抱着这样的想法，孟德文处处小心翼翼。开展讨论时，他很少主动表达观点，形成决议时，更多只是随声附和、举手同意。

与孟德文的谨慎相比，指挥保障连党支部委员刘伟国则是因为曾经的挫折而变得畏首畏尾。

一次党支部议战议训会，刘伟国针对连队战术训练协同性差的问题，提出全新的训练思路，得到党支部肯定和采纳。然而，在后续的上级战术考核中，连队成绩并不理想。尽管战友们没有过多抱怨，但刘伟国内心充满自责。

“提建议却没带来好结果，以后还是少发言为妙。”此后，刘伟国在支委会上变得沉默寡言，有了意见建议也是闷着，在支部班子的存在感越来越低。

“支部强不强，除了书记、副书记，委员作用的发挥也很关键。”这些现象引起了该旅党委的关注。他们通过问卷调查、座谈交流、专项调研等形式，对基层党支部委员履职情况进行了解。结果显示，除个别支委不敢发言、不愿发言的问题外，还存在履职尽责缺乏清晰标准、党务与业务混淆不清，开展批评和自我批评”辣味”不够等情况。

“支部委员履职尽责意识淡化或是能力不足，都会严重影响党支部的决策质量和工作推进。”该旅领导介绍，为纠治问题，他们结合党组织书记培训、理论轮训等时机，积极开展专题培训、案例分析等活动，帮助支部委员明确自身定位，强化责任担当。

工作中，旅党委牵头，带领各级党务工作骨干，按照”立规矩、强本领”的原则，逐个破解基层党支部委员履职尽责难题。对照《中国共产党军队党的建设条例》等军队党内法规，他们将支委职责细化为 20 余项具体清单。比如，组织委员每季度至少组织一次党员思想分析，作战训练委员每月收集 3 条以上官兵训练建议……旅队还规范制订《支委个人履职报告》《支委履职考核鉴定表》等，让支部委员在考评鉴定中明方向、找差距、促提高。

刘伟国告诉笔者，后来，连队党支部书记王斯多次主动与他谈心，肯定他的初衷和努力，鼓励他放下包袱，从失败中吸取经验，提升能力，做到”敢言”且”善言”。他也积极开展学习，不断提升业务水平，在支委会上重新活跃起来。后来，他的多项建议被党支部采纳并

实施，提出的”利用模拟对抗提升战术协同”“定期组织战术研讨交流”等建议，为连队练兵备战带来了实实在在的活力动力。

升级本领——

履职尽责更有底数

在支部班子里，组织委员需负责掌握党组织建设情况，做好发展党员等工作，对党务工作能力素质要求较高。

面对考验，刚担任侦察二连党支部组织委员的排长陈展压力重重。会议组织的流程、发展党员的标准与程序、会议记录的规范等工作，有时让他手忙脚乱。

“任务节奏快、环境艰苦，个别党员思想出现懈怠，该如何及时开展激励？”“对于纠治战地党日’党味’不浓的问题，有什么好的思路？”……一次驻训中，机关随机抽查基层党支部战斗堡垒作用发挥情况，抽问陈展这些问题时，他的回答不太理想。

这段”掉链子”经历，让陈展不得不结合工作实践认真审视反思。他意识到，要想当好一名合格支委，除了态度积极，更要有过硬的能力素质。

为了胜任岗位，他在党支部督导下，利用业余时间学习党章党规，研究各类党务工作具体案例，向经验丰富的党务工作者请教。他还主动参加旅组织的”党务工作能力提升集训班”，系统学习军队党建法规，并通过模拟党支部会议、情景再现等方式，反复练习会议组织、党员发展、党日活动策划等实操技能。通过一段时间强化训练，陈展党务工作能力有了明显提升，在实践中有了自己的思路，并逐渐摸索出不少管用的方式方法。

一次筹备组织生活会，陈展精心组织，从会议主题的确定、会议流程的安排，到组织党员开展批评和自我批评，都进行得有条不紊，得到班子成员的一致认可。

该旅领导介绍，为有效帮助基层党支部委员提高履职尽责能力，他们在开展党组织书记培训时，同步将基层党支部新任支委纳入培训范围。建立”一对一”帮扶机制，让经验丰富的党务工作者与支部委员结对，在实践中传授经验和方法。此外，他们还编印《基层党组织党务工作实操手册》，梳理常见问题及解决方案，为支部委员提供”工具书”；开设”党务工作答疑热线”，安排机关党务业务部门人员轮流值班，及时解答基层支委的疑问。

担当作为——

坚持原则立起标杆

“拟接收下士陈堂鹏为预备党员！”那一次，榴炮一连在党务公开栏公示当季度党员发展对象人选时，一排战士小陈成为不少战友关注的焦点。

“支委里有一排的干部，会不会存在偏袒情况？”面对个别战士的疑虑，保卫委员、三排排长易点内心泛起波澜。这让他想起此前本排战士小潘入党落选时，个别人曾对他有意见，觉得”自己排的支委不给力”。

如何平衡排长与支委的双重身份，成为摆在一些排长支委面前的一道难题。

“党支部是连队统一领导和团结的核心，支委必须打破’一亩三分地’的局限。”该旅领导介绍，工作实践中，个别支委存在”认识偏差”，议事决策习惯性为本班排争资源、争荣誉，这种本位主义倾向既影响连队团结，更制约战斗力提升。

他们对照相关规定，利用专题党课重点解读党支部”领导本单位全面建设”的职责定位，编印《党支部议事决策 50 问》口袋书，组织”书记夜校”专题学习《中国共产党军队委员会（支部）工作规定》等，并邀请院校专家围绕”支部委员角色定位”开展案例式教学，帮助支部成员端正思想、理清思路。他们探索建立”三维赋能”机制：开设”支委能力提升工作坊”，安排优秀机关干部与基层支委结对帮带；定期组织”委员接待日”，建立支委履职热线；将跨班排工作成效作为评选”优秀支委”的重要指标。

易排长说，后来，党支部书记陈威帆专门找他谈心，并给全体党员上了一堂党课，讲清入党流程和支部议事规则，肯定了他坚持党性、认真履职的工作表现，立起靠素质实绩进步的鲜明导向。

陈威帆还组织党支部一班人围绕”如何树立全局意识，更好发挥支委作用”展开讨论辨析，对照党章党规展开思想交锋，引导大家站在党支部建设全局思考、发现和解决问题，齐心合力把一线战斗堡垒建得更强。

有了党支部作为坚强后盾，易排长工作干劲更足了。在课余时间，他常常与兄弟班排的战友交流互动，了解官兵思想动态；教育课上，他为大家分享思想政治教育方面的知识，拉近战友感情……一次党支部议教暨思想教育形势分析会上，易点提出的 4 条建议科学可行，全部被采纳。

“提高党性，助力连队建设发展，这才是党支部委员应有的姿态！”言语间，易点眼神里写满了自信。如今，像易点一样的基层支委们在岗位上积极作为、担当尽责，一条条可操作性强的建议被应用到实际当中，有力推进了单位全面建设发展。

成为战斗堡垒的合格一员

■张海阳

基层是部队全部工作和战斗力的基础。基层党组织是党在我军的神经末梢，不断增强基层党组织班子成员能力素质，才能更好发挥好一线战斗堡垒作用。

“绳短不能汲深井，浅水难以负大舟”，支委队伍能力素质直接关系党组织功能发挥。党务工作实践中，个别支部委员对自身职责认识不足，参与议事决策质量不高；有的党务知识匮乏，开展相关工作没章法没底数；还有的囿于专业局限，建言献策缺乏全局视野。这些现象与练兵备战要求存在差距，必须引起高度重视。

“艰辛知人生，实践长才干”。支委要成为战斗堡垒的合格一员，就要在学用相长中提升政治素养，在破解难题中增强业务能力，在服务官兵中锤炼务实作风。既要当好党务工作的”政策通”，更要成为带兵育人的”多面手”。要善用支委权利而不逾矩，严守纪律规矩而不懈怠。在议事决策中既敢发声更善发声，既有决策力又有执行力，真正把组织优势转化为制胜优势。

立身为旗，率先垂范。支委在支部是”兵代表”，在兵中就是”党代表”。日常管理要当”排头兵”，做到急难险重任务冲锋在前；思想引领要当”定盘星”，用真理力量凝聚军心士气；作风建设要当”风向标”，以自身正带动部队风气正。唯有如此，才能像磁石般将官兵紧紧凝聚在党旗下，让每个基层党组织都成为攻无不克的战斗堡垒。

The Party Committee of a Brigade of the 74th Group Army: Tighten and implement responsibilities and Build a Strong Battle Fortress

Source: China Military Network-People’s Liberation Army Daily Author: Pan Zhengcheng Liu Jie Wang Wenqi Zhang Haiyang Editor: Sun Yue

2025-03-17

Tighten and implement responsibilities and build a strong battle fortress

——The exploration and practice of the Party Committee of a Brigade of the 74th Group Army to improve the ability of grassroots party branch members to perform their duties

■Pan Zhengcheng Liu Jie Wang Wenqi

Not long ago, the engineering detachment of a brigade of the 74th Group Army organized a bridge-building course training to improve the ability of officers and men to carry out practical tasks. The picture shows Li Wenzhao (third from right), a member of the Party Branch of the Brigade’s Engineering Detachment and platoon leader, explaining the key points of the operation. Photo by Xie Wei

Editor’s note: Grassroots party branch members are the backbone of grassroots party branch construction, and their ability to carry out work directly affects the quality of party branch construction. In the specific work practice, some branch committee members cannot find their position and clarify their responsibilities. They are passive in fulfilling their duties and responsibilities and rely on supervision. To a certain extent, this weakens the ability of the party

branch to lead officers and men to carry out combat tasks, the ability to lead the comprehensive construction of the unit and the ability to solve their own problems.

If you want to build a house, you must first lay its foundation. The Party Committee of a brigade of the 74th Group Army attaches importance to the training and guidance of party branch members. By strengthening party spirit and upgrading skills, it supervises them to enhance their enthusiasm and initiative in fulfilling their duties, strive to improve their ability to carry out work, and continuously enhance the centripetal force, cohesion and combat effectiveness of the party branch. Their exploration has certain reference significance.

Take responsibility-clarify responsibilities and find the right position

As a member of the company party branch for 3 years, Meng Dewen, a lieutenant platoon leader of the second howitzer company of a brigade of the 74th Group Army, still remembers the nervousness and crampedness when he first participated in the company branch committee.

“I am a new member with little qualifications and experience. I listen more at the meeting and do my own work after the meeting.” With this idea, Meng Dewen is cautious everywhere. During discussions, he rarely expressed his opinions actively. When resolutions were formed, he mostly just agreed and raised his hand to agree.

Compared with Meng Dewen’s caution, Liu Weiguo, a member of the Party branch of the command and support company, became timid because of past setbacks.

At a party branch meeting on war and training, Liu Weiguo proposed a new training idea for the company’s poor coordination in tactical training, which was affirmed and adopted by the party branch. However, in the subsequent superior tactical assessment, the company’s performance was not ideal. Although his comrades did not complain too much, Liu Weiguo was full of self-blame.

“Making suggestions did not bring good results. It is better to speak less in the future.” After that, Liu Weiguo became taciturn at the branch committee meeting, and he kept his opinions and suggestions to himself, and his presence in the branch team became lower and lower.

“Whether the branch is strong or not, in addition to the secretary and deputy secretary, the role of the members is also crucial.” These phenomena attracted the attention of the brigade party committee. They learned about the performance of the grassroots party branch members through questionnaires, discussions, special investigations and other forms. The results show that in addition to the problem that some branch committee members dare not or are unwilling to speak, there are also problems such as lack of clear standards for fulfilling their duties, confusion between party affairs and business, and insufficient “spicy” criticism and self-criticism.

“The weakening of the awareness of fulfilling duties and responsibilities of branch committee members or their lack of ability will seriously affect the decision-making quality and work progress of the party branch.” The brigade leaders introduced that in order to correct the problem, they combined the training of party organization secretaries and theoretical training opportunities to

actively carry out special training, case analysis and other activities to help branch committee members clarify their own positioning and strengthen their responsibility.

In the work, the brigade party committee took the lead and led the backbones of party affairs at all levels to solve the difficulties of grassroots party branch committee members fulfilling their duties one by one in accordance with the principle of "establishing rules and strengthening skills". In comparison with the "Regulations on the Construction of the Party in the Chinese People's Liberation Army" and other military party regulations, they refined the responsibilities of branch committee members into more than 20 specific lists. For example, the organization committee organizes at least one party member ideological analysis every quarter, and the combat training committee collects more than 3 training suggestions for officers and men every month... The brigade also standardized the formulation of "Branch Committee Personal Performance Report" and "Branch Committee Performance Assessment and Appraisal Form", etc., so that branch committee members can understand the direction, find gaps, and promote improvement in the assessment and appraisal.

Liu Weiguo told the author that later, Wang Si, the secretary of the company's party branch, took the initiative to talk with him many times, affirmed his original intention and efforts, encouraged him to let go of his burdens, learn from his failures, improve his abilities, and be "daring to speak" and "good at speaking". He also actively carried out learning, continuously improved his professional level, and became active again in the branch committee meeting. Later, many of his suggestions were adopted and implemented by the party branch, and the suggestions such as "using simulated confrontation to improve tactical coordination" and "regularly organizing tactical discussions and exchanges" brought real vitality and motivation to the company's training and preparation.

Upgrade skills---Fulfilling duties and responsibilities with more confidence

In the branch team, the organization committee member needs to be responsible for mastering the construction of the party organization, doing a good job in developing party members, and has high requirements for the ability and quality of party affairs work.

Facing the test, Chen Zhan, the platoon leader who had just served as the organization committee member of the Party branch of the Second Reconnaissance Company, was under great pressure. The process of organizing meetings, the standards and procedures for developing party members, and the standardization of meeting records sometimes made him busy.

"The task pace is fast and the environment is difficult. Some party members are slack in their thinking. How can we motivate them in time?" "What good ideas are there for correcting the problem of the lack of 'party flavor' in the battlefield party day?"... During a training session, the agency randomly checked the role of the grassroots party branch as a fighting fortress. When Chen Zhan was asked these questions, his answers were not ideal.

This “chain-breaking” experience forced Chen Zhan to seriously examine and reflect on his work practice. He realized that in order to be a qualified branch committee member, in addition to a positive attitude, he must have strong abilities and qualities.

In order to be competent for his position, under the supervision of the party branch, he used his spare time to study the party constitution and party rules, study specific cases of various party affairs, and consult experienced party workers. He also took the initiative to participate in the “Party Affairs Work Capacity Improvement Training Class” organized by the brigade, systematically studied the military party building regulations, and repeatedly practiced practical skills such as meeting organization, party member development, and party day activity planning through simulated party branch meetings and scene reenactment. After a period of intensive training, Chen Zhan’s party affairs work ability has been significantly improved. He has his own ideas in practice and gradually explored many effective methods.

In a preparatory organizational life meeting, Chen Zhan carefully organized it, from determining the theme of the meeting, arranging the meeting process, to organizing party members to carry out criticism and self-criticism, all in an orderly manner, and was unanimously recognized by the team members.

The leaders of the brigade introduced that in order to effectively help grassroots party branch members improve their ability to perform their duties, they included the new branch members of the grassroots party branch in the training scope when conducting party organization secretary training. Establish a “one-to-one” assistance mechanism to allow experienced party workers to pair up with branch members to impart experience and methods in practice. In addition, they also compiled and printed the “Practical Manual for Party Affairs of Grassroots Party Organizations”, sorted out common problems and solutions, and provided “reference books” for branch committee members; set up a “Party Affairs Question and Answer Hotline”, arranged for personnel from the party affairs business department of the agency to take turns on duty, and promptly answered questions from grassroots branch committee members.

Take responsibility and act -

Adhere to principles and set a benchmark

“It is planned to accept Corporal Chen Tangpeng as a probationary party member!” That time, when the first howitzer company announced the candidates for party member development in the quarter in the party affairs public column, a platoon soldier Xiao Chen became the focus of attention of many comrades.

“There is a row of cadres in the branch committee. Will there be favoritism?” Faced with the doubts of individual soldiers, Yi Dian, the security committee member and the platoon leader of the third platoon, was in turmoil. This reminded him that when Xiao Pan, a soldier in his platoon, failed to join the party, some people had opinions about him and felt that “the branch committee of his platoon was not strong enough.”

How to balance the dual identities of platoon leader and branch committee member has become a difficult problem for some platoon leaders and branch committee members.

“The Party branch is the core of the company’s unified leadership and unity, and the branch committee must break the limitations of ‘one acre and three points of land’.” The brigade leader introduced that in the work practice, some branch committee members have “cognitive biases” and habitually compete for resources and honors for their own class in deliberation and decision-making. This parochial tendency not only affects the unity of the company, but also restricts the improvement of combat effectiveness.

In accordance with relevant regulations, they used special party classes to focus on interpreting the responsibilities of the party branch to “lead the comprehensive construction of the unit”, compiled and printed the pocket book “50 Questions on Party Branch Deliberation and Decision-making”, organized “Secretary Night School” to study the “Regulations on the Work of the Military Committee (Branch) of the Communist Party of China”, etc., and invited college experts to carry out case-based teaching around the “role positioning of branch committee members” to help branch members correct their thoughts and clarify their ideas. They explored the establishment of a “three-dimensional empowerment” mechanism: opening a “branch committee member capacity improvement workshop” to arrange outstanding cadres and grassroots branch committee members to pair up and help; regularly organizing “member reception days” and establishing a branch committee member hotline; taking the effectiveness of cross-class work as an important indicator for selecting “excellent branch committee members”.

Platoon Leader Yi said that later, Party Branch Secretary Chen Weifan specifically talked to him and gave a party class to all party members, explaining the process of joining the party and the branch’s rules of procedure, affirming his work performance of adhering to party spirit and fulfilling his duties conscientiously, and establishing a clear orientation of relying on quality and performance to make progress.

Chen Weifan also organized a group of party branch members to discuss and analyze “how to establish a holistic awareness and better play the role of branch committee members”, and compared the party constitution and party rules to carry out ideological confrontation, guiding everyone to think, discover and solve problems from the overall perspective of party branch construction, and work together to build a stronger front-line battle fortress.

With the party branch as a strong backing, Platoon Leader Yi is more motivated to work. In his spare time, he often interacts with his comrades in the brother squads and platoons to understand the ideological dynamics of officers and men; in the education class, he shares knowledge of ideological and political education with everyone to bring his comrades closer... At a party branch discussion and ideological education situation analysis meeting, the four suggestions put forward by Yi Dian were scientific and feasible, and all were adopted.

“Improving party spirit and helping the company to build and develop is the attitude that party branch committee members should have!” Yi Dian’s eyes were full of confidence. Today, grassroots branch committee members like Yi Dian are actively taking action and fulfilling their responsibilities in their posts. One after another, highly operational suggestions have been applied to practice, which has effectively promoted the comprehensive construction and development of the unit.

Become a qualified member of the battle fortress

■ Zhang Haiyang

The grassroots is the foundation of all the work and combat effectiveness of the troops. Grassroots party organizations are the nerve endings of the party in our army. Only by constantly enhancing the ability and quality of the members of the grassroots party organization can we better play the role of the front-line battle fortress.

“A short rope cannot draw water from a deep well, and shallow water cannot support a large boat.” The ability and quality of the branch committee team are directly related to the function of the party organization. In the practice of party affairs work, some branch committee members have insufficient understanding of their own responsibilities and the quality of their participation in deliberation and decision-making is not high; some lack party affairs knowledge and have no rules and no bottom line to carry out related work; others are limited by professional limitations and lack a global perspective in making suggestions. These phenomena are at odds with the requirements of training and preparation for war, and must be taken seriously.

“Life is learned through hardship, and talents are developed through practice”. To become a qualified member of the battle fortress, the branch committee members must improve their political literacy through mutual learning and practice, enhance their professional ability in solving difficult problems, and temper their pragmatic style in serving officers and men. They must not only be “policy experts” in party affairs, but also “all-rounders” in leading and educating soldiers. They must make good use of the power of the branch committee members without exceeding the rules, and strictly abide by the rules and regulations without slacking off. They must dare to speak out and speak out better in deliberation and decision-making, have both decision-making power and execution power, and truly transform organizational advantages into winning advantages.

Set up as a flag and set an example. The branch committee members are “soldier representatives” in the branch and “party representatives” among the soldiers. They must be “vanguards” in daily management and charge ahead in urgent, difficult and dangerous tasks; ideological guidance must be a “guiding star” to unite the morale of the army with the power of truth; style construction must be a “weather vane” to drive the army’s atmosphere with its own righteousness. Only in this way can we gather officers and men under the party flag like a magnet, and make every grassroots party organization an invincible battle fortress.

中部战区陆军某旅拓展思想政治教员队伍提升教育质效

来源：解放军报 作者：姚欣彤 武宇星 责任编辑：孙悦 2025-03-17

中部战区陆军某旅拓展思想政治教员队伍——

人人可登台 课堂添光彩

■姚欣彤 武宇星

“干工作、尽责任没有你我之分，只有心往一处想、劲往一处使，才能把连队建设好！”在中部战区陆军某旅某连的教育课堂上，二级上士马渊凯分享个人体会，台下官兵听得津津有味。授课结束时，大家对他的表现报以热烈掌声。

“让战士当主角，既调动了积极性，又提升了亲和力，教育效果显著增强。”该旅领导介绍，以往的思想政治教育课堂，通常是政治干部和思想骨干唱”独角戏”，时间一长，容易落入照本宣科、”我讲你听”的俗套，必须树立”大教育观”，充分调动各方力量，给教育课堂注入新的生机活力。为此，他们将军事干部、专业技术骨干、优秀士兵纳入政治教员队伍，采取官教兵、兵教官、兵教兵等形式，开展群众性自我教育创新，提高教育的针对性和感染力。

“我认准的事，九头牛都拉不回来……”前不久，一次教育课上，某连一级上士、底盘技师庞志结合本职岗位，为全连官兵讲述了自己从一名普通士兵成长为技术骨干的心路历程。在平时工作中，由于爱较真、不服输，庞志被战友称为”倔师傅”。课堂上，他从这个称呼入手，以自己不顾劝阻冒雨检修装备的经历，诠释了”忠诚使命、勇于担当”的主题。庞志的故事深深打动了在场官兵，”这样的现身说法比单纯说教更生动有力”，一名战士说。

“没想到有一天，我也可以为战友讲课。”马渊凯介绍，一年前，由于理论功底扎实，他被推选加入政治教员队伍。为了讲好自己的第一课，他专门在战友中间组织了一次小调研。”身为普通一兵，我更懂得战友关注什么、想听什么。”从最初的”心里没底”到现在的”得心应手”，站在讲台上的马渊凯讲得越来越好，整个人也变得越来越自信。

官兵站”C 位”，课堂活水来。尝到了甜头，该旅进一步扩大政治教员队伍，退伍老兵、官兵家属和地方高校师生等纷纷走上授课席。前不久，受该旅”钢八连”邀请，老兵张扬和某大学师生代表一起，与连队官兵同上教育课。授课现场，张扬回顾了连队的光荣历史与辉煌战绩，师生代表分享了新时代青年的梦想与追求。新兵与老兵的互动、军地同龄人之间的交流，让大家深受触动、收获满满。

人人可登台，课堂添光彩。该旅政治工作部领导介绍，从被动接受到积极参与，从单向灌输到互动讨论，随着政治教员队伍的扩大，各营连思想政治教育工作呈现新风貌，教育质效也随之有了显著提升。

A Brigade of the Central Theater Command Army Expands the Ideological and Political Instructor Team to Improve the Quality and Effectiveness of Education

Source: PLA Daily Author: Yao Xintong Wu Yuxing Editor: Sun Yue 2025-03-17

A brigade of the Central Theater Army expands the ideological and political instructor team——

Everyone can take the stage to add brilliance to the classroom

■Yao Xintong Wu Yuxing

“There is no distinction between you and me in doing work and fulfilling responsibilities. Only by thinking in one direction and working in one direction can we build a good company!” In the education class of a company of a brigade of the Central Theater Command Army, Second Sergeant Ma Yuankai shared his personal experience, and the officers and men in the audience listened with relish. At the end of the class, everyone gave him a warm applause for his performance.

“Letting soldiers play the leading role not only mobilizes enthusiasm, but also improves affinity, and significantly enhances the educational effect.” The leaders of the brigade introduced that in the past, ideological and political education classes were usually performed by political cadres and ideological backbones. Over time, it is easy to fall into the cliché of “I talk and you listen”. It is necessary to establish a “big education concept” and fully mobilize the forces of all parties to inject new vitality into the education class. To this end, they included military cadres, professional and technical backbones, and outstanding soldiers into the team of political instructors, and adopted the forms of officers teaching soldiers, soldiers teaching officers, and soldiers teaching soldiers to carry out mass self-education innovation and improve the pertinence and appeal of education. “I am determined to do something, and nine cows can’t pull it back...” Not long ago, in an education class, Pang Zhi, a first-class sergeant and chassis technician of a certain company, combined with his job position, told the officers and men of the whole company about his mental journey from an ordinary soldier to a technical backbone. In his usual work, Pang Zhi was called “stubborn master” by his comrades because he loved to be serious and refused to admit defeat. In the classroom, he started with this title and interpreted the theme of “loyalty to the mission and courage to take responsibility” with his experience of repairing equipment in the rain despite dissuasion. Pang Zhi’s story deeply moved the officers and men present. “Such personal testimony is more vivid and powerful than simple preaching,” said a soldier.

“I didn’t expect that one day I could also give lectures to my comrades.” Ma Yuankai introduced that a year ago, due to his solid theoretical foundation, he was elected to join the political instructor team. In order to give his first lesson well, he specially organized a small survey among his

comrades. “As an ordinary soldier, I know better what my comrades pay attention to and what they want to hear.” From the initial “no confidence” to the current “handy”, Ma Yuankai, who stood on the podium, spoke better and better, and the whole person became more and more confident.

Officers and men stand in the “C position”, and the classroom is full of vitality. Having tasted the sweetness, the brigade further expanded the team of political instructors, and veterans, family members of officers and men, and teachers and students of local universities took to the lecture seats. Not long ago, at the invitation of the brigade’s “Steel Eighth Company”, veteran Zhang Yang and representatives of teachers and students from a certain university took an education class with the company’s officers and men. At the lecture site, Zhang Yang reviewed the company’s glorious history and brilliant achievements, and representatives of teachers and students shared the dreams and pursuits of young people in the new era. The interaction between new recruits and veterans, and the exchanges between military and civilian peers, made everyone deeply touched and gained a lot.

Everyone can go on stage, adding brilliance to the classroom. The leader of the brigade’s political work department introduced that from passive acceptance to active participation, from one-way indoctrination to interactive discussion, with the expansion of the political instructor team, the ideological and political education work of each battalion and company has shown a new look, and the quality and effectiveness of education has also been significantly improved.

军营观察丨高级军士登台授课的前前后后

来源：中国军网-解放军报 作者：雷 彬 杨 鑫 彭冰洁 责任编辑：尚晓敏 发布：2025-03-17

高级军士成为人才培养新生力量

■解放军报记者 彭冰洁

仲春时节的一天晚上，新疆军区某师某团修理连的修理间内，一堂维修专业集训课正火热进行。该团首席教练员、一级军士长王栋林站在讲台上，正将自己总结的工作经验传授给战友们。这已经是王栋林第 4 次担任此类专业集训的教练员。

记者走访发现，在该旅，许多像王栋林一样的高级军士活跃在各个训练场、工作室、修理间，成为”战位课堂”中的关键角色。

该师领导告诉记者，部队的基础在基层，基层的中坚在军士，高级军士更是加快军事人员现代化、推动部队全面建设的重要力量。近两年，他们着力筛选培养了一批专业技术精湛的高级军士成为专业集训”首席教练员”。

协调院校提供学习资料，组织人员深入装备制造一线研究学习，邀请专家前来授课……在单位的大力支持下，王栋林成了新疆军区第一位考取火控系统修理高级技师证的维修骨干，并且拥有了以本人名字命名的”栋林工作室”。

“为人才发展扫清障碍，提供制度、条件支持，是贯彻落实党的二十大报告的具体实践。”该师机关的李干事告诉记者，随着《军士暂行条例》《军士职业发展管理暂行规定》等一系列法规制度的施行，一张军士队伍人才培养的规划蓝图正由顶层设计逐步向基层延伸落地。

高级军士登台授课的前前后后

一份操作手册引发的正向”蝴蝶效应”

跑野外、钻炮塔、排险情……新疆军区某师某团强军故事会上，以”栋林工作室”排除火炮故障为题材创作的情景剧登上舞台，赢得台下阵阵掌声。

作为团里名声在外的”火炮神医”，官兵们平日里遇到疑难问题总是第一时间找王栋林请教。

“当老师可没那么容易，没’两把刷子’哪能服众？”虽然已经是公认的”首席教练员”，王栋林却丝毫不敢松懈。

那年，该师全面调整改革，新的编制体制为军士群体注入了干事创业的新动力。从专业技术骨干到首批高级军士教练员，王栋林经历见证了该师选准用好高级军士群体的探索之路。

几年前，该师奔赴高原执行驻训任务。当时，各种新式装备列装部队。如何让新装备快速生成战斗力，成为摆在官兵面前的头等大事。就在这时，时任车组教练员的王栋林吸引了大家的视线——在他的带领下，某新型轮式突击车列装不久，就在高原完成实弹射击，形成单装战斗力。

原来，为考取装备维修高级技师资格，在武器换装之前，王栋林曾向机关申请赴工厂跟修培训。历经 5 个多月的培训，王栋林熟练掌握了多种类型装甲装备火控系统的操作运用。

新装备列装连队后，王栋林主动请缨。得益于前期的研究成果，他带领车组人员快速摸清新装备的技术性能，总结出新装备实弹射击中的注意事项，为用装分队提供了实操依据。

实弹射击结束后，王栋林立即带着战友根据全新理念和一手数据梳理修订新装备操作要点和专业教案。没多久，一份长达 23 页的火控系统操作手册”出炉”，经机关审核后下发到各基层连队，大幅提高了新装备战斗力生成时效。

让骨干人才发挥优长，带动全员能力”升级”。由这份手册引发思考，该师领导敏锐地意识到，高级军士群体对战斗力建设的推动作用还没有最大化。

“高级军士虽然集中在装备维修管理岗位，但不能简单将其定义为修理工、技术工。”经过蹲点调研，部分基层单位对高级军士角色定位不准确、培养方向有偏差、使用方式有问题等情况浮出水面。

为此，他们对全师高级军士群体进行了一次深入细致的调查摸底，并以”由高级军士担任各类专业集训教练员”为题，召集团营主官、高级军士代表展开讨论，同时在机关基层开展问卷调查。

一石激起千层浪，有人赞成，有人质疑。”精通于各专业领域的高级军士担任教练员，能更好地发挥专长，帮助官兵更快地掌握新装备”“高级军士个人能力虽强，但教学不比搞研究，必须要讲得出来、教得明白”……

“军士是实施部队管理、教育和训练的桥梁，衡量一名高级军士的能力如何，不仅要看其是否有一身本事，还要看其是否善于传授自己的技能，能否带出过硬的队伍。”经过半个月的调查研究，师党委常委达成共识：助推高级军士登上教练席，当好大师傅，带出好徒弟。

随后，该师作训科和人力资源科等机关部门对新体制下的专业领域进行细分，结合全师高级军士的个人基本情况，遴选 13 名高级军士组成首席教练员团队。

在平凡岗位发光发热，王栋林和他带队完成的一份操作手册，为单位建设带来了正向的”蝴蝶效应”，一场以高级军士为主体的教战研战热潮席卷全师。

多措并举助推”兵教头”能力升级

一名优秀的”兵教头”应该什么样？

“绝不能’茶壶里煮饺子——有货倒不出’。”该师某团技师兼驾驶员、三级军士长李巍给出了这样的回答，”作为教练员，不仅专业技能要过硬，授课水平也要出色。”

这是李巍从首次集训授课”滑铁卢”中得来的感悟。

3 年前，刚晋升为三级军士长的他首次担任全团装甲驾驶集训教练员。集训现场，李巍在讲台上滔滔不绝，台下有些官兵却一脸茫然。

授课结束后，课程效果评估结果让李巍困惑不已——为什么自认为讲得不错的课程无法达到满意的效果。负责考核的机关干部一针见血地指出，李巍在授课过程中存在知识点拆分不详细、重难点课目讲解不到位等问题。

无独有偶，该师机关经回访调研发现，一些高级军士登上讲台后，出现了相似的状况。

“技术水平和教学水平并不相等。如何提高高级军士的教学水平是抓好训练质效的关键。”该师人力资源科李干事表示，”想要快速适应教练岗位需求，无论是从个人专业知识储备、授课技巧，还是思维理念，都需要及时升级。”

没多久，该师研究制订出台一系列举措，助推”兵教头”能力升级——

遴选教练员”苗子”送学深造。他们邀请科研单位、制造厂家的专家授课，借用优秀师资力量对高级军士淬火锻造，缩短教练员队伍专长化任教的能力差。

强化岗前培训。依托师教导队集中进行”四会教练员”集训，从教案编写、课件制作等方面提升教练员授课能力，并严格组织考核讲评。

推出一人一案”规划图”。根据高级军士个人基本情况，结合基层连队专业建设现状，为”兵教头”量身拟制能力成长计划，针对短板弱项进行补差，不断提升教练员科研创新、教学授课等能力……

经过”加钢淬火”，李巍的教学水平明显提升。如今，他的驾驶专业集训课，在课程效果评估中已经名列前茅。

以教促训，带动全员能力升级。今年初，在该师首长机关训练课堂上出现了喜人一幕——数名高级军士相继走上讲台，围绕新型武器装备操作技巧等内容进行授课。

授课时，”兵教头”们不仅进行动作示范，还结合自身训练心得，精心总结技巧口诀，帮助大家记忆掌握。”授课人思路清晰、重点明确，与训练实践结合紧密，针对性很强。”现场听课的该师机关孙干事说。

如今，这些”兵教头”，已经多次承担各团专业训练任教。与此同时，该师机关还进一步出台举措支撑”栋林工作室”等多个创新工作室良性运转。这些基层科研创新”试验田”，为高级军士深钻细研专业、丰富教学组训资源提供了良好条件。

通过参与高级军士牵头负责的创新工作室，基层官兵边学边研，对标实战集智攻关，一批批创新成果瓜熟蒂落。

学习前沿知识、交流先进技术、集中力量攻关……全师各团 10 余个涉及新装备的工作室，在高级军士的带领下，高标准完成 30 余类火力效能毁伤试验，收集多项复杂条件下火力打击数据；”栋林工作室”先后取得 11 项国家实用新型专利。

专长化任教带来战斗力建设”春色满园”

“没有你的有力支援，我们很难取得这么好的成绩！”前不久，该师某团某连连长特意向兄弟连队的技师、三级军士长邱杨远表示感谢。

原来，去年高原驻训期间，该连即将参加实弹考核。但正值老兵复退之际，连队部分射击能力强、专业素质精的军士即将离队。

这让该连射击教练员、二级上士刘强心急如焚——某射击课目要求高、难度大，深知自身经验能力有限的他，不确定自己能否胜任此项任务。

经逐级汇报请示，最终，该团作训股统筹协调训练设备，并在全团范围内调配优秀射击技师对该连进行教学训练保障。

就这样，全团射击首席教练员邱杨远作为第一人选，开始了跨分队执教。他针对该连官兵技能基础和训练进度灵活施教，不仅提高了全连射手的专业成绩，还帮助连队培养出 2 名组训骨干。训练考核中，补齐短板的该连以全优的成绩通过了射击课目。

谈到这个双赢的喜讯，该师领导表示，推动高级军士专长化任教，不仅为部队带来了实打实的战斗力提升，对于年轻骨干的拔节成长也有促进作用。

“2 号战车主控计算机无法下达火炮发射指令！”去年 10 月，一场山地进攻训练在海拔 4500 多米的高原地区展开。训练进行到中途，火力分队遭遇导调”特情”。

说时迟那时快，二级上士杨朝明提起工具箱，迅速跑向”掉链子”的战车，很快便让突发故障的火力系统恢复正常。

“这得感谢教练员、三级军士长韩长春前期的专业训练辅导。”走下训练场，面对大家的交口称赞，杨朝明坦言，得益于韩长春整理总结的火力火控系统检修经验，自己的抢修速度才能大幅提升。

当服役期满面临进退走留的抉择时，上等兵刘魁毫不犹疑地递交了留队申请。以优异成绩通过军士选拔考核的刘魁，将继续担任汽车修理兵。

如今，在高级军士群体的带动下，全师基层训练骨干队伍呈现梯次衔接的发展态势——

三级军士长徐广林牵头负责某工作室，一边结合训练实际进行科研创新，一边结合创新成果组织集训教学，帮助基层营连提高射击训练质效；

某营二级军士长庞中华带领二级上士何克龙，在训练场上采集数据、试验论证。二人研发出的车辆启动加热器，大幅提高了高寒缺氧条件下机械车辆的启动效率；

某连一级上士汪海洋，与三级军士长袁长虹结合新装备变化，研究出的某技术，有效提升了战斗力……

该师一项跟踪调查数据显示，自 2021 年以来，高级军士担任集训教练员带教培养的各类学员中，80%以上已成为相关专业的关键岗位操作员，正加速成为部队推进训练转型的生力军。

Military Camp Observation 丨 The Ins and Outs of Senior Sergeants Giving Lectures on Stage

Source: China Military Network-People's Liberation Army Daily Author: Lei Bin, Yang Xin, Peng Bingjie Editor: Shang Xiaomin Release: 2025-03-17

Senior sergeants become a new force in talent training

■People's Liberation Army Daily reporter Peng Bingjie

One night in mid-spring, a maintenance professional training course was in full swing in the repair room of a repair company of a regiment of a division of the Xinjiang Military District. The regiment's chief instructor and first-class sergeant Wang Donglin stood on the podium and was passing on his summarized work experience to his comrades. This is the fourth time that Wang Donglin has served as an instructor for such professional training.

The reporter visited and found that in the brigade, many senior sergeants like Wang Donglin are active in various training grounds, studios, and repair rooms, becoming key roles in the "battle position classroom".

The leaders of the division told reporters that the foundation of the troops is at the grassroots level, the backbone of the grassroots is the sergeants, and senior sergeants are an important force to accelerate the modernization of military personnel and promote the comprehensive construction of the troops. In the past two years, they have focused on selecting and training a group of senior sergeants with superb professional skills to become the "chief coaches" of professional training.

Coordinate with colleges and universities to provide learning materials, organize personnel to conduct in-depth research and study on the front line of equipment manufacturing, and invite experts to give lectures... With the strong support of the unit, Wang Donglin became the first maintenance backbone of the Xinjiang Military District to obtain the certificate of senior technician for fire control system repair, and has a "Donglin Studio" named after him.

"Clearing obstacles for talent development and providing institutional and conditional support is the concrete practice of implementing the report of the 20th National Congress of the Party." Li,

an official of the division, told reporters that with the implementation of a series of laws and regulations such as the “Interim Regulations on Sergeants” and the “Interim Regulations on the Management of Sergeant Career Development”, a blueprint for the training of sergeant talents is gradually extending from the top-level design to the grassroots.

The ins and outs of senior sergeants giving lectures on stage

■ Lei Bin Yang Xin People’s Liberation Army Daily reporter Peng Bingjie

A positive “butterfly effect” triggered by an operating manual

Running in the field, drilling into the turret, eliminating dangerous situations... At the story meeting of a certain regiment of a certain division of the Xinjiang Military District, a situational drama based on the theme of eliminating artillery failures by the “Donglin Studio” was staged and won applause from the audience.

As a well-known “artillery doctor” in the regiment, officers and men always ask Wang Donglin for advice when they encounter difficult problems on weekdays.

“It’s not that easy to be a teacher. How can you convince the public without “two brushes”?” Although he is already a recognized “chief trainer”, Wang Donglin dare not relax at all.

That year, the division made comprehensive adjustments and reforms, and the new organizational system injected new impetus into the sergeant group to do things and start businesses. From professional and technical backbones to the first batch of senior sergeant trainers, Wang Donglin has witnessed the division’s exploration of selecting and using senior sergeant groups.

A few years ago, the division went to the plateau to perform training tasks. At that time, various new equipment was equipped in the troops. How to quickly generate combat effectiveness for new equipment has become the top priority for officers and men. At this time, Wang Donglin, who was the trainer of the crew at the time, attracted everyone’s attention. Under his leadership, a new type of wheeled assault vehicle was installed and completed live-fire shooting on the plateau shortly after it was installed, forming single-equipment combat effectiveness.

It turned out that in order to obtain the qualification of senior equipment maintenance technician, Wang Donglin applied to the agency to go to the factory for repair training before the weapon was replaced. After more than 5 months of training, Wang Donglin has mastered the operation and application of fire control systems of various types of armored equipment.

After the new equipment was installed in the company, Wang Donglin took the initiative to volunteer. Thanks to the previous research results, he led the crew to quickly understand the

technical performance of the new equipment, summarize the precautions in the live-fire shooting of the new equipment, and provide a practical basis for the equipment-using team.

After the live-fire shooting, Wang Donglin immediately took his comrades to sort out and revise the key points and professional teaching plans of the new equipment based on the new concept and first-hand data. Not long after, a 23-page fire control system operation manual was “released”. After being reviewed by the agency, it was distributed to all grassroots companies, greatly improving the timeliness of the new equipment’s combat effectiveness.

Let the backbone talents play their strengths and drive the “upgrade” of all staff’s capabilities. The manual triggered thinking, and the leaders of the division keenly realized that the role of senior sergeants in promoting combat effectiveness construction has not been maximized.

“Although senior sergeants are concentrated in equipment maintenance and management positions, they cannot be simply defined as repairmen and technicians.” After squatting and investigating, some grassroots units have inaccurate role positioning of senior sergeants, deviations in training directions, and problems in use methods.

To this end, they conducted an in-depth and detailed investigation of the senior sergeant group of the entire division, and convened the group battalion chief and senior sergeant representatives to discuss the topic of “senior sergeants serve as various professional training coaches”, and at the same time conducted a questionnaire survey at the grassroots level of the agency.

A stone stirs up a thousand waves, some people agree, and some people question. “Senior sergeants who are proficient in various professional fields can serve as coaches to better play their expertise and help officers and men master new equipment faster.” “Although senior sergeants have strong personal abilities, teaching is not like doing research. They must be able to explain and teach clearly.”...

“Sergeants are the bridge for implementing troop management, education and training. To measure the ability of a senior sergeant, we must not only look at whether he has a skill, but also whether he is good at imparting his skills and whether he can lead a strong team.” After half a month of investigation and research, the Standing Committee of the Division Party Committee reached a consensus: to help senior sergeants take the coaching seat, be a good master, and bring out good apprentices.

Subsequently, the division’s training department and human resources department and other organs subdivided the professional fields under the new system, and combined with the basic personal information of senior sergeants throughout the division, selected 13 senior sergeants to form a team of chief coaches.

Shining in ordinary positions, Wang Donglin and the operation manual he led to complete brought a positive “butterfly effect” to the unit construction. A wave of teaching, combat and research with senior sergeants as the main body swept the entire division.

Multiple measures are taken to promote the upgrading of the ability of “soldier coaches”

What should an excellent “soldier coach” be like?

“You must not ‘cook dumplings in a teapot - there is stuff but it cannot be poured out’.” Li Wei, a technician and driver of a regiment of the division and a third-class sergeant, gave this answer, “As a coach, not only must professional skills be strong, but the teaching level must also be excellent.”

This is the feeling that Li Wei got from the “Waterloo” of his first training and teaching.

Three years ago, he was promoted to a third-class sergeant and served as the first armored driving training instructor for the entire regiment. At the training site, Li Wei was talking nonstop on the podium, but some officers and men in the audience looked confused.

After the lecture, the course effect evaluation results confused Li Wei - why the course that he thought he taught well could not achieve satisfactory results. The cadre in charge of the assessment pointed out that Li Wei had problems such as insufficient knowledge point division and inadequate explanation of difficult and important subjects during the lecture.

Coincidentally, the division found through follow-up surveys that some senior sergeants had similar problems after they took the podium.

“Technical level and teaching level are not equal. How to improve the teaching level of senior sergeants is the key to ensuring the quality and effectiveness of training.” Li, an officer of the division’s human resources department, said, “If you want to quickly adapt to the needs of the coaching position, whether it is from personal professional knowledge reserves, teaching skills, or thinking concepts, you need to upgrade in time.”

Not long after, the division studied and formulated a series of measures to promote the ability upgrade of “soldier coaches” -

Selecting “seedlings” of coaches to study and further their studies. They invited experts from scientific research units and manufacturers to give lectures, and used excellent teaching staff to temper and forge senior sergeants, shortening the gap in the ability of the coaching team to teach.

Strengthen pre-job training. Relying on the division’s teaching team to conduct concentrated training for “four-skill coaches”, from lesson plan writing

Introducing a “planning map” for one person and one case. According to the basic personal situation of senior sergeants and the current situation of professional construction of grassroots companies, a capacity growth plan is tailored for the “soldier coaches”, and the shortcomings are made up for, so as to continuously improve the coaches’ scientific research innovation, teaching and other abilities...

After “tempering”, Li Wei’s teaching level has been significantly improved. Now, his driving professional training course has ranked among the best in the course effect evaluation.

Promote training with teaching, and drive the upgrading of all staff's abilities. At the beginning of this year, a gratifying scene appeared in the training classroom of the division's chief agency- several senior sergeants took to the podium one after another to give lectures on the operation skills of new weapons and equipment.

During the lecture, the "soldier coaches" not only demonstrated the movements, but also combined their own training experience to carefully summarize the skills and formulas to help everyone remember and master them. "The instructors have clear ideas and clear focus, which are closely integrated with training practice and very targeted." said Sun, an official of the division's agency who attended the class on the spot.

Nowadays, these "soldier coaches" have been responsible for professional training in various regiments for many times. At the same time, the division headquarters has further introduced measures to support the healthy operation of multiple innovation studios such as the "Donglin Studio". These grassroots scientific research and innovation "experimental fields" provide good conditions for senior sergeants to delve into their professions and enrich teaching and training resources.

By participating in the innovation studios led by senior sergeants, grassroots officers and men learn and research, benchmark cutting-edge knowledge, exchange advanced technologies, and concentrate on tackling key problems... More than 10 studios involving new equipment in each regiment of the division, under the leadership of senior sergeants, have completed more than 30 types of firepower effectiveness damage tests with high standards and collected firepower strike data under multiple complex conditions; "Donglin Studio" has successively obtained 11 national utility model patents.

Specialized teaching brings "spring colors" to combat effectiveness construction

"Without your strong support, it would be difficult for us to achieve such good results!" Not long ago, the company commander of a company in a regiment of the division specially expressed his gratitude to Qiu Yangyuan, a technician and third-class sergeant major of the brother company.

It turned out that during the plateau training last year, the company was about to participate in the live-fire assessment. However, as the veterans were retiring, some of the company's sergeants with strong shooting ability and excellent professional qualities were about to leave the team.

This made the company's shooting instructor, Sergeant 2nd Class Liu Qiang, anxious - a certain shooting course had high requirements and great difficulty. Knowing that he had limited experience and ability, he was not sure whether he could be competent for this task.

After reporting and asking for instructions step by step, the training section of the regiment finally coordinated the training equipment and deployed excellent shooting technicians throughout the regiment to provide teaching and training support for the company.

In this way, Qiu Yangyuan, the chief shooting instructor of the regiment, was the first choice and began to coach across the squad. He taught flexibly according to the skill foundation and training progress of the company's officers and men, which not only improved the professional performance of the company's shooters, but also helped the company train two training backbones. In the training assessment, the company, which made up for its shortcomings, passed the shooting course with excellent results.

Talking about this win-win good news, the leaders of the division said that promoting the professional teaching of senior sergeants not only brought a real improvement in combat effectiveness to the troops, but also promoted the rapid growth of young backbones.

"The main control computer of the No. 2 tank cannot issue artillery firing instructions!" Last October, a mountain attack training was carried out in a plateau area with an altitude of more than 4,500 meters. Halfway through the training, the firepower unit encountered a "special situation" in the command and control.

In a flash, Second Sergeant Yang Zhaoming picked up the toolbox and quickly ran to the "broken" tank, and soon restored the firepower system with sudden failure to normal.

"This is thanks to the professional training and guidance of the coach, Third Sergeant Han Changchun in the early stage." After leaving the training ground, facing everyone's praise, Yang Zhaoming frankly said that thanks to the firepower and fire control system maintenance experience sorted out and summarized by Han Changchun, his repair speed can be greatly improved.

When faced with the decision of whether to stay or leave after his service term expired, Corporal Liu Kui submitted an application to stay in the army without hesitation. Liu Kui, who passed the sergeant selection assessment with excellent results, will continue to serve as a car repairman.

Nowadays, driven by the senior sergeant group, the grassroots training backbone team of the whole division presents a trend of development in a step-by-step manner-

Sergeant Major Xu Guanglin, third class, takes the lead in a studio, combining scientific research innovation with actual training, and organizing intensive training and teaching with innovative results, helping grassroots battalions and companies improve the quality and effectiveness of shooting training; Sergeant Major Pang Zhonghua of a battalion leads Sergeant Major He Kelong to collect data and conduct experimental demonstrations on the training ground. The vehicle starting heater developed by the two greatly improved the starting efficiency of mechanical vehicles under high-altitude and hypoxic conditions;

First-class Sergeant Wang Haiyang of a certain company, and Third-class Sergeant Yuan Changhong combined the changes in new equipment to develop a certain technology that effectively improved combat effectiveness...

A follow-up survey data of the division showed that since 2021, more than 80% of the various types of trainees trained by senior sergeants as training instructors have become key position

operators in related majors, and are accelerating to become the main force in promoting training transformation in the troops.

在祖国西陲追赶阳光

■胡 铮 谢金明 闫冰洁

在这个万物复苏的季节，当灿烂而明亮的阳光洒满街巷，人们的心中更添了幸福和希望。但我们或许很难想象，在遥远的祖国西陲，有一群官兵在追赶着阳光。

阿然保泰，塔吉克语意为”一线天”。在帕米尔高原萨雷阔勒岭，新疆军区某团阿然保泰边防连的官兵，常年驻守在两座海拔超过 5000 米的大山之间，阳光对他们来说是个”稀罕物”。特殊的地理环境使得这里被阳光照耀的时间十分短暂——夏季日照时长大约 5 个小时，冬季则更短，仅 3 个小时。

他们热爱着阳光。每逢中午时分，官兵们格外期待一场酣畅淋漓的”日光浴”。一名战士说：”阳光照耀大地的同时也照亮了我们的内心，大家都有一个不惧困难和挑战的’阳光心态’。”

他们成了彼此的阳光。虽然在寒冷的日子里不常看到太阳，但有了战友的支持和陪伴，每个人的心中都是暖洋洋的。

有诗人说，不管多么渺小，也不管多么遥远，太阳的崇拜者总会得到一份太阳的光辉。今天，我们一同走近这群追赶阳光的官兵，相信他们的故事，如同阳光，能为你带来温暖和力量。

阿然保泰边防连官兵执行巡逻任务。王礼帅摄

“只要有一点阳光，我们也要尽全力保留下来”

新疆军区某团阿然保泰边防连二级上士赵永波从没想过，自己有一天会如此迫切地追赶阳光。

赵永波来自山东青岛，自小生长在海边。以前每每去沙滩上赶海，他嫌阳光太过强烈，总是用帽子和口罩把脸遮住。可现在，他正坐在小山坡上，把脸扬得高高的，感受着太阳带来的温暖。

这样的时刻并不常有。连日来，雪花一天连着一天地飘，昏沉沉的云把太阳捂得严严实实。终于等到天空晴朗起来，连队组织官兵在门口外的空地上享受半小时的”日光浴”，赵永波在这天的日历上画了一个大大的笑脸，赶忙同大家一起出去晒太阳。

赵永波说：”在这里，午时站岗是一件幸福事。”1 点过后，太阳正对连队岗楼，金色的光线随即铺洒开来，晒得人身上暖洋洋的。

由于太阳出现得太短暂，这里的动物也极度渴望阳光。下士阿布拉江·艾力刚成为军马饲养员时，一次疏忽忘了及时把军马”赤兔”拉出去晒太阳，结果”赤兔”耍起小脾气，怎么也不肯让他上马鞍。直到阿布拉江·艾力从包中翻出马粮，”赤兔”才乖乖听话。

对炊事班的战士来说，晒太阳更加不容易。太阳到来的时候，他们正忙着备菜做饭，等午饭过后大家把手里的活忙完，天色已经暗了下来。

中士王学兵曾在新兵时和同年兵陈伟翔定下一份”阳光协议”。作为炊事员，他们编入两个小组轮流做饭，那段时间，恰逢王学兵不当值的时候，天气不是阴天就是下雪：”刚下连就半个多月没见到太阳，心里实在郁闷。”为了激起王学兵的干劲，陈伟翔主动提议：”从今天开始，咱们在各项工作上比拼看看，让全班战友当裁判，谁做得好，等阳光一来，就由另一个人接替值班，到室外晒’日光浴’，怎么样？”

王学兵欣然答应了，两人开始你追我赶、相伴成长。王学兵发挥自己的强项，手把手带着陈伟翔练体能，陈伟翔也将自己拿手的识图技能教给王学兵。后来，这份”阳光协议”一直传承下来，成为激励炊事班战士互帮互学、携手并进的有效手段。

在老兵的记忆里，因为缺少阳光，晾衣服和电力供应一直是难题。

“阴天时，气温降低、风向稳定，一准出不了太阳。要是云层变薄升高，移动速度加快，大概率能见着太阳。下雪时，风向转变，温度回升，说明太阳就要露头了……”二级上士马剑楠当兵 9 年，在”捕捉”阳光这方面有着自己独特的敏锐性。衣服放在屋内有时几天也不见干，一旦太阳出现，大家便赶忙把衣物拿到屋外，并根据阳光的照射方向及时更换晾晒位置。

阿然保泰地处偏远，接通市电难度较大。前些年，连队官兵的大部分用电靠的是房顶上的太阳能电池板。日照时间稍长的夏天，即便大家尽量不使用大功率电器，几十组电池板每

天吸收的光照能量也仅够官兵日常使用；而到了冬天，大雪常常光顾，大家要及时为太阳能电池板除雪，有时蓄电量耗光，连队需要额外使用柴油发电机供电。

二级上士宋展鹏记得一场雪断断续续下了 4 天，他和战友趁着雪停的间隙爬上房顶扫除太阳能电池板上的积雪，就为了多积蓄一点太阳的能量：”只要有一点阳光，我们也要尽全力保留下来。”

如今，这里有了阳光晾衣房，也通上了市电。那些往事已经成了老兵们的专属经历，但官兵们追赶阳光的日子仍在继续。

蔬菜大棚中的柚子树结出果实。王礼帅摄

“种下一颗种子，官兵的心里就多了一份希望”

缺少日照，天气寒冷；土壤贫瘠，大多是盐碱地……很难想象，连队一代代官兵在这样的环境里种出了各式各样的蔬菜瓜果。

最初，营房四处大多是石头堆，大家硬是用小推车推走了石头，又从附近找来河水冲刷过的松软泥土，这才建起略显简陋的蔬菜大棚。附近的老乡们听闻此事，还纷纷骑着三轮车送来粪肥。

另一个棘手的问题是这里阳光稀少，夜间温度很低。为了给大棚保温，连队官兵专门在棚布上盖上棉被。等阳光好的时候，再将棉被收起来，为幼苗晒太阳。观察阳光也因此成了大家的开心事，每逢快到中午，宋展鹏和战友们便盯着远处的山脊看。

只见远处微微泛起一缕金光，太阳即将探出山头。”快快快，阳光马上就到！”宋展鹏回忆，大家在太阳快要蹦出之际火急火燎地卷棉被，甚至惊动了躺在棚顶上休憩的几条军犬。

尽管菜种的成活率不到一半，菜苗长得也十分缓慢，但在大家的悉心照料下，菜地里接连收获了黄瓜、萝卜、白菜……

二级上士柴雪峰对连队的种植养殖工作非常上心。那段时间，他在选种、育苗工作上下了很大功夫，常常电话请教老乡里的种植能手。

后来，上级为连队多配备了几十组太阳能电池板，大家为菜苗用上了补光灯。”但不敢多用，否则全连都会跳闸。”柴雪峰笑着回忆道，”那时候总在想，要是满园子都是丰盛的蔬果该有多好。”

随着连队接上市电，蔬菜大棚随即通上了电锅炉，增补了更多补光灯。如今，柴雪峰的梦想成了现实，这里成了四季温暖如春的”天然氧吧”，面积已经超过 300 平方米。

除了日常蔬菜，官兵还培育出了硕大的西瓜，种上了柚子树、石榴树、柠檬树……大家的心态和这些植物一样，越来越有生气了。”有些战友遇上烦心事了就来大棚里转一转，和这些蔬果一同晒晒太阳，许多困扰就会烟消云散。”柴雪峰说。

无论是休假还是出差，官兵的身体虽然下了高原，但是心还在牵挂着连队，牵挂着这片绿意浓浓的菜园，大家归队时总是不忘背些花种或是泥土上山。柴雪峰觉得：”种下一颗种子，官兵的心里就多了一份希望。”

年轻战士在雪山下弹吉他。王礼帅摄

“没有人后悔来到这里，因为大家心里装着暖阳”

在这里巡逻，”阳光”是一个绕不过去的话题。

秋冬季节，由于缺少日照，大家要面对厚厚的积雪和冰层。而到了夏季，冰雪在太阳的炙烤下融化，巡逻官兵难免遇上泥石流或是湍急的河水。

一级上士高铨铖是连队的驾驶员，戍边 15 年，巡逻路已不知走了多少趟，他是大家心中公认的”活地图”。

“放心，’铨铖’保你全程平安！”遇上新兵第一次巡逻，他嘴里总会蹦出这样一句口头禅，以此缓解新兵的紧张心情。”路走得多了，也练就了遇事不慌的平稳心态。”高铨铖说。

即便如此，想起曾经巡逻时的一次次惊险时刻，他仍有些后怕。

去年冬季的一次巡逻，车辆行至一处狭窄地带不得不暂停。路面上覆盖着深深浅浅的积雪，大家知道崖壁和道路之间存在一条深沟，但无法判断具体位置。

“咱们人工探路！”雪花仍在簌簌飘落，丝毫没有停歇的迹象，天色也越来越暗。带队的指导员一咬牙，决定与高铨铖二人手拉手前出探路。

高原上的路都是坑坑洼洼的乱石滩，指导员和高铨铖一左一右，小心翼翼地摸索着前进：”我们每走一步都要用脚先探探底，否则一脚踩下去可能就掉进了齐腰深的雪坑。”

等到了开阔地带，高铨铖才发现自己和指导员的手心早就冒了一层汗。他又深一脚浅一脚回到了车上，沿着路上留下的脚印把车开了过去。

这样的艰辛经历还有很多。一次巡逻路上，过路桥竟被封在冰层之下。冰面微微倾斜，有近 20 米长。为了防止车辆打滑，带队的连长带领大家在冰面上铺满事先携带的煤渣，高铨铖这才得以驾驶车辆安全通过该路段。

到了夏天，积雪融化产生的水流冲毁道路也是常见的事。车辆行驶在泥泞的坡路上，同样考验驾驶员的技术。

那是一段全程 800 米、坡度 30 度左右的弯行下坡路。由于惯性作用，车辆猛地快速冲下山坡。”左侧就是急流，一旦掉进水里车子必然失控，后果不堪设想。”高铨铖稳住方向盘，最终把车缓缓停在了坡下，而车上的战友们全都惊出一身冷汗。

“在看似平凡的生活里，我们无数次闯过’鬼门关’，在一处处关隘留下了边防军人的足迹。”高铨铖说，”令我们引以为豪的是，无论遇到什么艰难险阻，没有一个人在巡逻途中退缩或者放弃。”

高原上的春天，没有长满青草的旷野，没有花香拂面的微风，更多的是被冰雪覆盖的寂静无声。由于太阳见得少，一些官兵患有骨质疏松等病症，皮肤也常起湿疹。但就像高铨铖所说：”没有人后悔来到这里，因为大家心里装着暖阳。”

Get Close to the Officers and men Chasing the Sun in the Western Part of the Motherland and Feel the Warmth and Strength They Bring

Source: China Military Network-Liberation Army Daily Author: Hu Zheng, Xie Jinming, Yan Bingjie Editor: Shang Xiaomin Release: 2025-03-17

Chasing the sun in the western part of the motherland

■Hu Zheng, Xie Jinming, Yan Bingjie

In this season of revival, when the bright and bright sunshine fills the streets, people’s hearts are filled with happiness and hope. But it may be difficult for us to imagine that in the distant western part of the motherland, there is a group of officers and men chasing the sun.

Aranbaotai, which means “a line of sky” in Tajik. In the Sarikol Ridge of the Pamir Plateau, the officers and men of the Aranbaotai Border Defense Company of a regiment of the Xinjiang Military District are stationed between two mountains with an altitude of more than 5,000 meters all year round. Sunlight is a “rare thing” for them. The special geographical environment makes

the time for sunshine here very short-the sunshine duration in summer is about 5 hours, and it is even shorter in winter, only 3 hours.

They love the sun. Every noon, the officers and men are particularly looking forward to a hearty "sunbath". A soldier said: "The sun shines on the earth and also illuminates our hearts. Everyone has a 'sunshine mentality' that is not afraid of difficulties and challenges."

They have become each other's sunshine. Although the sun is not often seen on cold days, with the support and company of comrades, everyone's heart is warm.

A poet said that no matter how small or how far away, the sun worshippers will always get a share of the sun's glory. Today, we approach this group of officers and men chasing the sun together. I believe that their stories, like the sun, can bring you warmth and strength.

The officers and men of the Aranbaotai Border Defense Company perform patrol tasks. Photo by Wang Lishuai

"As long as there is a little sunshine, we must do our best to preserve it"

Zhao Yongbo, a second-class sergeant of the Aranbaotai Border Defense Company of a regiment of the Xinjiang Military District, never thought that one day he would be so eager to chase the sun.

Zhao Yongbo is from Qingdao, Shandong, and grew up by the sea. In the past, whenever he went to the beach to catch the sea, he always used a hat and a mask to cover his face because he thought the sun was too strong. But now, he is sitting on a small hill, raising his face high, feeling the warmth brought by the sun.

Such moments are not common. In recent days, snowflakes have been floating day after day, and the dark clouds have covered the sun tightly. Finally, when the sky cleared up, the company organized officers and men to enjoy a half-hour "sunbath" in the open space outside the gate. Zhao Yongbo drew a big smiley face on the calendar of this day and hurried out to bask in the sun with everyone.

Zhao Yongbo said: "Here, standing guard at noon is a happy thing." After 1 o'clock, the sun was facing the company's guardhouse, and the golden light spread out, making people warm.

Because the sun appears too briefly, the animals here are also extremely eager for sunlight. When Corporal Abulajiang Aili first became a horse breeder, he forgot to take the horse "Red Rabbit" out to bask in the sun in time. As a result, "Red Rabbit" got angry and refused to let him get on the saddle. It was not until Abulajiang Aili took out the horse feed from his bag that "Red Rabbit" obeyed.

For the soldiers in the kitchen squad, basking in the sun is even more difficult. When the sun came, they were busy preparing food and cooking. After lunch, everyone finished their work and it was dark.

Sergeant Wang Xuebing once made a “sunshine agreement” with his classmate Chen Weixiang when they were new recruits. As cooks, they were assigned to two groups to take turns cooking. During that time, Wang Xuebing was not on duty, and the weather was either cloudy or snowy: “I haven’t seen the sun for more than half a month since I joined the company, and I feel really depressed.” In order to inspire Wang Xuebing’s enthusiasm, Chen Weixiang took the initiative to propose: “Starting from today, let’s compete in various tasks. Let the whole class of comrades be referees. Whoever does well will be replaced by another person on duty when the sun comes out, and go outside to ‘sunbathe’, how about it?” Wang Xuebing readily agreed, and the two began to chase each other and grow together. Wang Xuebing played to his strengths and took Chen Weixiang to train his physical fitness. Chen Weixiang also taught Wang Xuebing his own map reading skills. Later, this “sunshine agreement” has been passed down and has become an effective means to encourage the soldiers in the kitchen squad to help each other and learn from each other and move forward hand in hand. In the memory of the veterans, due to the lack of sunlight, drying clothes and electricity supply have always been problems. “On cloudy days, the temperature drops and the wind direction is stable, so the sun will definitely not come out. If the clouds become thinner and higher, and the moving speed increases, the sun will most likely be seen. When it snows, the wind direction changes and the temperature rises, which means the sun is about to come out...” Second Sergeant Ma Jiannan has been in the army for 9 years and has his own unique sensitivity in “catching” the sun. Sometimes the clothes are left indoors for several days without drying. Once the sun comes out, everyone will rush to take the clothes outside and change the drying position in time according to the direction of the sun.

Aranbaotai is located in a remote area and it is difficult to connect to the city electricity. In the past few years, most of the electricity used by the company’s officers and men relied on solar panels on the roof. In the summer when the sunshine time is slightly longer, even if everyone tries not to use high-power electrical appliances, the light energy absorbed by dozens of panels every day is only enough for the daily use of officers and men; in winter, heavy snow often comes, and everyone has to remove snow from the solar panels in time. Sometimes the storage power is exhausted, and the company needs to use additional diesel generators for power.

Sergeant Song Zhanpeng remembers a snowstorm that lasted for four days. He and his comrades climbed onto the roof to clear the snow on the solar panels when the snow stopped, just to save more energy from the sun: “As long as there is a little sunshine, we will do our best to keep it.”

Nowadays, there is a sun drying room and electricity is connected. Those past events have become the exclusive experience of veterans, but the days of soldiers chasing the sun are still going on.

The grapefruit trees in the vegetable greenhouse are bearing fruits. Photo by Wang Lishuai

“Planting a seed brings more hope to the soldiers’ hearts”

Lack of sunshine, cold weather; poor soil, mostly saline-alkali land... It is hard to imagine that generations of soldiers in the company have grown a variety of vegetables and fruits in such an environment.

At first, there were mostly piles of stones everywhere in the barracks. Everyone pushed away the stones with a wheelbarrow and found soft soil washed by the river nearby, and then built a slightly simple vegetable greenhouse. When the villagers nearby heard about this, they rode tricycles to deliver manure.

Another tricky problem is that there is little sunlight here and the temperature is very low at night. In order to keep the greenhouse warm, the company soldiers specially covered the shed cloth with quilts. When the sun is good, the quilts are put away to let the seedlings bask in the sun. Observing the sun has become a happy thing for everyone. Every time it is almost noon, Song Zhanpeng and his comrades stare at the ridge in the distance.

A ray of golden light appeared in the distance, and the sun was about to peek out of the mountain. “Hurry up, the sun will be here soon!” Song Zhanpeng recalled that everyone rolled up the quilts in a hurry when the sun was about to jump out, and even startled several military dogs resting on the roof of the shed.

Although the survival rate of vegetable seeds is less than half and the seedlings grow very slowly, under everyone’s careful care, cucumbers, radishes, cabbages, etc. were harvested in the vegetable fields...

Second Sergeant Chai Xuefeng is very concerned about the company’s planting and breeding work. During that time, he put a lot of effort into seed selection and seedling cultivation, and often called to consult with the planting experts in his hometown.

Later, the superiors equipped the company with dozens of solar panels, and everyone used supplementary lights for the seedlings. “But I didn’t dare to use it too much, otherwise the whole company would trip.” Chai Xuefeng recalled with a smile, “At that time, I always thought, how great it would be if the whole garden was full of rich fruits and vegetables.”

As the company was connected to the market electricity, the vegetable greenhouse was immediately connected to the electric boiler and more supplementary lights were added. Today, Chai Xuefeng’s dream has become a reality. This place has become a “natural oxygen bar” with warm spring all year round, and the area has exceeded 300 square meters.

In addition to daily vegetables, officers and men also cultivated huge watermelons, planted grapefruit trees, pomegranate trees, lemon trees... Everyone’s mentality is like these plants, becoming more and more lively. “Some comrades come to the greenhouse when they encounter troubles, and bask in the sun with these fruits and vegetables, and many troubles will disappear.” Chai Xuefeng said.

Whether on vacation or on a business trip, the soldiers are physically away from the plateau, but their hearts are still concerned about the company and the green vegetable garden. When they return to the team, they always remember to carry some flower seeds or soil up the mountain. Chai Xuefeng believes: “Planting a seed will give the soldiers more hope.”

A young soldier plays guitar under the snow-capped mountains. Photo by Wang Lishuai

“No one regrets coming here, because everyone has the warm sun in their hearts”

Patrolling here, “sunshine” is an unavoidable topic.

In autumn and winter, due to the lack of sunshine, everyone has to face thick snow and ice. In summer, the ice and snow melt under the scorching sun, and patrolling soldiers will inevitably encounter mudslides or turbulent rivers.

First Sergeant Gao Quancheng is the company’s driver. He has been guarding the border for 15 years and has walked the patrol route countless times. He is recognized as a “living map” in everyone’s hearts.

“Don’t worry, ‘Quancheng’ will keep you safe all the way!” When he encounters a new soldier on his first patrol, he always says this catchphrase to ease the new soldier’s nervousness. “After walking a lot, I have developed a calm mentality to stay calm when encountering things.” Gao Quancheng said.

Even so, he still feels a little scared when he thinks of the thrilling moments during the patrol.

During a patrol last winter, the vehicle had to stop when it reached a narrow area. The road was covered with deep and shallow snow. Everyone knew that there was a deep ditch between the cliff and the road, but the specific location could not be determined.

“Let’s explore the road manually!” The snowflakes were still falling, with no signs of stopping, and the sky was getting darker and darker. The instructor who led the team gritted his teeth and decided to go out hand in hand with Gao Quancheng to explore the road.

The roads on the plateau were all bumpy and rocky. The instructor and Gao Quancheng were on the left and right, groping forward cautiously: “We have to feel the bottom with our feet before taking each step, otherwise we might fall into a waist-deep snow pit if we step on it.”

When we reached the open area, Gao Quancheng found that his and his instructor’s palms were already sweating. He stepped back to the car and drove along the footprints left on the road.

There are many such difficult experiences. On a patrol, the overpass was sealed under the ice. The ice surface was slightly tilted and nearly 20 meters long. In order to prevent the vehicle from slipping, the company commander led everyone to spread the coal slag brought in advance on the ice surface, so that Gao Quancheng was able to drive the vehicle safely through the section.

In summer, it is common for the water flow generated by the melting snow to destroy the road. Driving on a muddy slope also tests the driver's skills.

It was a 800-meter, 30-degree curved downhill road. Due to inertia, the vehicle rushed down the hillside suddenly and quickly. "There is a rapid on the left. Once it falls into the water, the car will inevitably lose control, and the consequences will be disastrous." Gao Quancheng steadied the steering wheel and finally stopped the car slowly at the bottom of the slope, and all the comrades in the car were shocked and sweating.

"In the seemingly ordinary life, we have passed through the 'gate of hell' countless times, leaving the footprints of border guards at every pass." Gao Quancheng said, "What we are proud of is that no matter what difficulties and obstacles we encounter, no one retreats or gives up during the patrol."

In the spring on the plateau, there are no wilderness covered with green grass, no breeze with the fragrance of flowers, but more of the silence covered by ice and snow. Because the sun is rarely seen, some officers and men suffer from osteoporosis and other diseases, and their skin often has eczema. But as Gao Quancheng said: "No one regrets coming here, because everyone has the warm sun in their hearts."

情暖兵心

——陆军某旅暖心惠兵工程建设掠影

■蒋雨铖 赵根沅 解放军报记者 胡云艳 摄影报道

官兵在影视厅观看电影。

前不久，陆军某旅上等兵吕鑫鑫对选晋军士相关政策法规不够了解，便到该旅"一站式"惠兵服务大厅进行咨询。窗口工作人员为他做了详细解答，解开了他心中的疑问。

惠兵服务大厅工作人员（中）为官兵提供服务。

该旅人力资源科干部叶景焘告诉记者，旅机关将政策咨询、事项办理、法律维权等多项服务集于一体，实行”一站式”服务，大大方便了官兵工作生活。

近年来，该旅积极推进暖心惠兵工程建设，改善官兵工作生活条件，取得明显成效。军营影视厅，军旅题材的影片更新及时、精彩纷呈；”向日葵”心灵驿站，VR 体验、解压游戏等各类活动丰富多彩、趣味十足；军体训练中心，功能齐全的健身设备，让官兵体能训练更加科学高效，也更有趣味性……这些为兵服务场所深受官兵喜爱，官兵利用休息时间纷纷前来”打卡”。

官兵体验 VR 娱乐设施。

官兵在心灵驿站参与游戏，放松身心。

真情暖兵心，训练添动力。该旅大力推动暖心惠兵工程建设，激发了官兵练兵备战热情，促进了部队战斗力提升。近年来，该旅多次完成上级赋予的重大任务。

A Certain Army Brigade: Sincerity Warms the Hearts of Soldiers and Adds Motivation to Training

China Economic Net > Military > Mainland Military 2025-03-18

Warming the hearts of soldiers

——A glimpse of the construction of a certain army brigade's heartwarming and benefiting soldiers project

■ Jiang Yucheng, Zhao Genyuan, People's Liberation Army Daily reporter Hu Yunyan photo report

Officers and men watch movies in the cinema.

Not long ago, Lv Xinxin, a senior soldier in a certain army brigade, was not familiar with the relevant policies and regulations for selecting and promoting sergeants, so he went to the brigade's "one-stop" benefit service hall for consultation. The window staff gave him a detailed answer and solved his doubts.

The staff of the benefit service hall (middle) provide services for officers and men.

Ye Jingtao, a cadre of the brigade's human resources department, told reporters that the brigade has integrated a number of services such as policy consultation, matter handling, and legal rights protection, and implemented "one-stop" services, which greatly facilitates the work and life of officers and men.

In recent years, the brigade has actively promoted the construction of the Warm Heart and Benefit Soldiers Project to improve the working and living conditions of officers and men, and achieved remarkable results. In the military camp cinema, military-themed films are updated in a timely and exciting manner; in the "Sunflower" Soul Station, VR experience, decompression games and other activities are rich and interesting; in the military physical training center, the fully functional fitness equipment makes the physical training of officers and men more scientific, efficient and interesting... These service places for soldiers are deeply loved by officers and men, and officers and men use their rest time to come to "check in".

Officers and men experience VR entertainment facilities.

Officers and men participate in games at the Soul Station to relax their bodies and minds.

True feelings warm the hearts of soldiers and add motivation to training. The brigade has vigorously promoted the construction of the Warm Heart and Benefit Soldiers Project, which has stimulated the enthusiasm of officers and men to train and prepare for war, and promoted the improvement of the combat effectiveness of the troops. In recent years, the brigade has completed many important tasks assigned by superiors.

陆军某旅优化配置训练资源提升组训施训质效——

统筹调配骨干 精细备课示教

■朱宇伦 卢明凯 解放军报特约通讯员 宋世杰

该旅教练员（右）讲解立姿据枪要领。林 敏摄

痼癖动作分析、操作技巧示范、模拟仿真训练……2 月中旬，笔者在陆军某旅防空营看到，排长赵一江针对官兵训练中存在的不足，从装备原理、结构特点到实践运用逐一进行讲解。

此前，他参加上级组织的无人设备教练员集训，在考核中取得优异成绩，返回单位后被机关纳入旅队训练指导小组，负责无人设备训练指导。”结合组训施训存在的不足，旅队统筹调配骨干力量针对性开展示教指导，有效提升了训练质量。”该营陈营长说。

发现问题、深入调研、形成报告、拿出举措、抓好落实……看到如今的情景，想起此前的经历，该旅作训科虞参谋颇感欣慰。

事情还得从之前的一次经历说起。那次，虞参谋检查督导基层训练情况时发现，有的教练员组训中往往凭借以往经验，事先准备的教案被放在一边。后来，结合督导情况进行讲评时，虞参谋表达了自己的担忧：”教练员凭借经验组训可能一时看不出啥问题，但是当新老教练员更替时，训练的标准化和规范化就很难保证。”

他的这一担忧引起了该旅领导重视。为此，该旅专门从机关部门抽组人员，深入一线展开调研。

“训练课目安排过于密集，连队教练员很难抽出时间精细打磨教案。”一番座谈了解，虞参谋终于弄清了事情原委。原来，基层单位阶段训练时间紧、任务重，为了赶进度，一些课目内容安排强度较大，有的组训人员图方便就直接照搬往年教案，或者借用兄弟单位教案，进行简单修改调整后，以应对机关督导检查。

对此，该旅领导专门召集机关人员、一线干部骨干进行深入剖析。他们研究后形成共识，机关安排部署工作绝不能仅靠行政指令，还须改进工作作风、强化服务意识，注重了解基层实际，善于聆听官兵心声，”下发通知”后还要”跟进抓落实”，用扎实的指导帮带代替简单的检查督导，以训练管理实效检验举措落实质效。

此后，该旅以共同课目训练为切入点，结合各单位人员、任务、专业设置等情况，按照集约组训要求统筹调配旅队训练资源：区分不同课目类别确定教练员组训方式，常规课目由旅队抽调各单位组训骨干，在机关部门和教导队指导下开展集中备课，并形成流程规范、标准统一、操作要求明确的系列教案，作为指定教材下发基层参考；小新特课目按照专业相关度将具体教学任务下达给营连，营连”对口”受领任务后研究编写相关教案，报机关部门审定通过后，指定专业尖子对相关专业官兵进行精准示教，营连同步抓好人员、内容、时间、质量”四落实”。

“我们还充分发挥旅队官兵特长优势，抽选信息统计、网页制作、美工制图等方面人才，在专业教练员协助下完成课件制作、课堂设计、器材准备等工作，通力协作抓好抓实组训施训各环节。”该旅领导说。

识图用图、自救互救、轻武器使用……经过一段时间的实践摸索，一系列课目组训备课完成，系列教案下发基层单位。在此基础上，该旅又指定一名旅领导牵头，抽选机关人员、营连主官、专业教练员和高级军士，组成训练指导小组负责教学指导。日常训练中，小组成员按编制划分参与训练，随机开展训练指导、收集官兵意见反馈。在旅队定期组织的训练指导中，他们利用专门时间就遇到的问题进行分析研讨、组织示范教学，并结合训练考核完善组训方案、制订改进措施。

在该旅轻武器使用课目训练现场笔者看到，训练指导小组成员、装步连二级上士曹俊杰以实物拆解为基础，并借助事先制作的挂图、视频辅助教学，为官兵讲解新配发装备的结构原理、性能特点和改进细节，同步进行使用技巧要领示范。

“讲解中，曹班长运用动画演示了该型装备的拆解与组装程序，教学过程更加直观、立体、全面，呈现的多处细节都是我们训练中容易忽视的环节。”列兵黄宇新说，接下来的训练中，他将对照教学示范严抠每一个动作要领，精益求精练强技能，争取在阶段性训练考核中取得优异成绩。

统筹调配骨干，精细备课示教，资源进一步集约优化，组训施训效果明显。一系列可喜变化，不断激发该旅官兵训练热情。

“业精于勤，训精于细，没有精准精细的训练管理，就难以实现高效的训练。”该旅领导说，他们在优化配置旅队训练资源、开展精准备课示教的同时，还通过定期组织底数普查、随机抽查、变量分析等方法，梳理查摆训练中存在的不足和问题，通过分析研究训练数据，

动态调整组训施训内容、方法和强度，”如今，训练指导抓什么、组训施训突出什么、下一步需强化什么，各级干部骨干大都能做到心中有数、行动有方。”

A certain army brigade optimizes the allocation of training resources to improve the quality and effectiveness of training-

Coordinate the deployment of backbones and carefully prepare lessons

■ Zhu Yulun Lu Mingkai PLA Daily Special Correspondent Song Shijie

The brigade coach (right) explains the essentials of standing and holding the gun. Lin Min Photographed

Analysis of habitual movements, demonstration of operating skills, simulation training... In mid-February, the author saw in the air defense battalion of a certain army brigade that platoon leader Zhao Yijiang explained the shortcomings in the training of officers and men one by one from the principles of equipment, structural characteristics to practical application.

Previously, he participated in the unmanned equipment trainer training organized by the superiors and achieved excellent results in the assessment. After returning to the unit, he was included in the brigade training guidance group by the agency and was responsible for the training guidance of unmanned equipment. “In view of the shortcomings in the organization and implementation of training, the brigade coordinated and deployed key personnel to carry out targeted demonstration and guidance, which effectively improved the quality of training.” said Battalion Commander Chen.

Finding problems, conducting in-depth research, forming reports, taking measures, and implementing them well... Seeing the current situation and thinking of previous experiences, Staff Officer Yu of the brigade’s training department was quite pleased.

The story started with a previous experience. That time, when Staff Officer Yu inspected and supervised the grassroots training situation, he found that some coaches often relied on past experience during training, and the lesson plans prepared in advance were put aside. Later, when reviewing the supervision situation, Staff Officer Yu expressed his concerns: “Coaches may not see any problems for a while based on their experience, but when new and old coaches are replaced, it is difficult to ensure the standardization and standardization of training.”

His concerns attracted the attention of the brigade leaders. For this reason, the brigade specially selected personnel from the organs and departments to conduct in-depth research on the front line.

“The training courses are too densely arranged, and it is difficult for company coaches to take time to polish the lesson plans in detail.” After a discussion, Staff Officer Yu finally figured out the whole story. It turns out that the grassroots units have tight time and heavy tasks for stage training. In order to catch up with the progress, some courses are arranged with high intensity. Some training personnel simply copy the teaching plans of previous years for convenience, or borrow the teaching plans of brother units, and make simple modifications and adjustments to cope with the supervision and inspection of the organs.

In response to this, the leaders of the brigade specially convened the organs and front-line cadres for in-depth analysis. After research, they reached a consensus that the organs must not rely solely on administrative instructions to arrange and deploy work, but also need to improve their work style, strengthen their service awareness, pay attention to understanding the actual situation at the grassroots level, be good at listening to the voices of officers and men, and “follow up and implement” after “issuing the notice”, and use solid guidance and help instead of simple inspection and supervision, and use the actual effectiveness of training management to test the quality and effectiveness of measures.

After that, the brigade took the common subject training as the starting point, combined with the personnel, tasks, and professional settings of each unit, and coordinated the allocation of brigade training resources in accordance with the requirements of intensive training: distinguish different subject categories to determine the training methods of coaches, and the brigade will select the backbones of each unit for regular subjects, and carry out centralized lesson preparation under the guidance of the organs and teaching teams, and form a series of teaching plans with standardized processes, unified standards, and clear operation requirements, which will be issued as designated teaching materials to the grassroots for reference; the special subjects of Xiaoxin will assign specific teaching tasks to the battalion and company according to the degree of professional relevance. After the battalion and company “counterparts” receive the tasks, they will study and write relevant teaching plans. After being approved by the organs, the top professionals will be designated to give precise teaching to the officers and men of the relevant professions. The battalion and company will simultaneously implement the “four implementations” of personnel, content, time, and quality.

We also give full play to the advantages of the specialties of the brigade officers and men, select talents in information statistics, web page production, art and drawing, and complete the work of courseware production, classroom design, equipment preparation, etc. with the assistance of professional coaches, and work together to grasp all aspects of training. “The brigade leader said.

Reading and using maps, self-rescue and mutual rescue, use of light weapons... After a period of practical exploration, a series of courses have been organized and prepared, and a series of teaching plans have been distributed to grassroots units. On this basis, the brigade has designated a brigade leader to take the lead, select agency personnel, battalion and company commanders, professional coaches and senior sergeants to form a training guidance group to be responsible for teaching

guidance. In daily training, team members participate in training according to their organization, conduct training guidance randomly, and collect feedback from officers and men. In the training guidance regularly organized by the brigade, they use special time to analyze and discuss the problems they encounter, organize demonstrations, and Teaching, and combined with training assessment to improve the training plan and formulate improvement measures.

At the training site of the brigade's light weapons use course, the author saw that Cao Junjie, a member of the training guidance team and a second-class sergeant of the armored infantry company, based on the disassembly of the real object, and with the help of pre-made wall charts and videos to assist teaching, he explained to the officers and men the structural principles, performance characteristics and improvement details of the newly issued equipment, and demonstrated the essentials of using skills at the same time.

"During the explanation, squad leader Cao used animation to demonstrate the disassembly and assembly procedures of this type of equipment. The teaching process was more intuitive, three-dimensional and comprehensive, and the many details presented were links that were easily overlooked in our training." Private Huang Yuxin said that in the next training, he will strictly follow the teaching demonstration to strictly grasp every action essential, strive for excellence and strengthen skills, and strive to achieve excellent results in the staged training assessment.

Coordinate the deployment of backbones, prepare lessons and teach carefully, further optimize resources, and the training effect is obvious. A series of gratifying changes continue to stimulate the training enthusiasm of the officers and men of the brigade.

"Proficiency in industry is diligence, and training is fine. Without precise and fine training management, it is difficult to achieve efficient training. "The brigade leader said that while optimizing the allocation of brigade training resources and conducting intensive training demonstrations, they also regularly organized basic data censuses, random checks, variable analysis and other methods to sort out and identify deficiencies and problems in training. By analyzing and studying training data, they dynamically adjusted the content, methods and intensity of training. "Now, cadres and backbones at all levels can know what to focus on in training guidance, what to emphasize in training, and what to strengthen in the next step, and they can act accordingly."

第 74 集团军某旅连贯对抗 提升部队战斗力水平

来源：解放军报 作者：石伟 金硕 责任编辑：刘上靖 2025-03-18

第 74 集团军某旅连贯对抗练硬功

解放军报讯 石伟、金硕报道：穿戴装具、领取武器、迅速登车……近日，第 74 集团军某旅组织一场对抗训练。官兵闻令而动、快速奔赴战位，各型战车按作战编队向目标地域机动。

“前方发现’有毒’烟雾！”车队驶出不久，侦察兵便通过电台传来情报，指挥员迅速命令官兵穿戴防毒面具。车队刚通过”染毒”路段，”敌机临空”的特情接踵而至。参训官兵沉着应对，迅速疏散隐蔽，规避”敌”空中侦察。

“战场态势瞬息万变，只有不断练强快速反应与灵活处置能力，才能抢占制胜先机。”该旅领导介绍，此次训练以作战任务为牵引，全程不设预案，导调员随队参加、临机导调，官兵克服陌生地域、夜间能见度差等不利因素，在近似实战的环境中检验装备性能状态、锤炼应急应战本领。

行进途中，一路硝烟。面对”‘敌人’袭扰、战车’受损’”的特情，车组乘员迅速下车抢修，警戒分队展开战斗队形、掩护其余车辆快速通过。

一路特情不断，官兵沉着冷静、有序处置，按时到达预定地域。侦察小组密切协同，利用攀登绳渗透至”敌”后，通过无人机将战场态势信息及时回传指挥所；火力分队根据情报信息，对目标地域实施火力覆盖……

“连续的高强度训练，检验了人装连续作战能力，部队战斗力水平得到提升。”该旅领导介绍，下一步，他们将围绕训练中暴露的问题开展针对性训练，确保”打一仗、进一步”。

A Brigade of the 74th Group Army Conducted Continuous Confrontations to Improve the Combat Effectiveness of the Troops

Source: PLA Daily Author: Shi Wei Jin Shuo Editor: Liu Shangjing 2025-03-18

A brigade of the 74th Group Army conducted continuous confrontations to practice hard skills

PLA Daily News Shi Wei and Jin Shuo reported: Wearing equipment, receiving weapons, and quickly getting on the car... Recently, a brigade of the 74th Group Army organized a confrontation training. The officers and men moved at the command and rushed to the battle position quickly. Various types of tanks maneuvered to the target area according to the combat formation.

“Toxic smoke was found ahead!” Soon after the convoy drove out, the scouts sent intelligence through the radio, and the commander quickly ordered the officers and men to wear gas masks. As soon as the convoy passed the “poisoned” section, the special situation of “enemy aircraft approaching the sky” followed one after another. The participating officers and men responded calmly, quickly evacuated and concealed, and avoided “enemy” aerial reconnaissance.

“The battlefield situation changes rapidly. Only by constantly strengthening the ability to respond quickly and flexibly can we seize the opportunity to win.” The brigade leader introduced that this training was driven by combat missions, and there was no plan throughout the whole process. The commander participated with the team and directed the troops on the spot. The officers and men overcame unfavorable factors such as unfamiliar areas and poor visibility at night, and tested the performance of equipment and tempered their emergency response skills in an environment close to actual combat.

During the march, there was smoke all the way. Faced with the special situation of “‘enemy’ harassment and ‘damage’ to the tank”, the crew members quickly got off the car for repairs, and the guard team deployed a combat formation to cover the other vehicles to pass quickly.

There were constant special situations along the way, and the officers and men were calm and orderly, and arrived at the designated area on time. The reconnaissance team worked closely together, using climbing ropes to infiltrate behind the “enemy”, and used drones to promptly transmit battlefield situation information back to the command post; the firepower team implemented firepower coverage on the target area based on intelligence information... “Continuous high-intensity training has tested the continuous combat capabilities of personnel and equipment, and the combat effectiveness of the troops has been improved.” The brigade leader introduced that in the next step, they will carry out targeted training around the problems exposed in the training to ensure “fighting one battle and moving forward.”

陆军某旅紧贴任务深学 立足岗位践行

来源：解放军报 作者：王梦圆 廖晓彬 责任编辑：刘上靖 2025-03-18

陆军某旅认真学习贯彻全国两会精神——

紧贴任务深学 立足岗位践行

■王梦圆 解放军报特约记者 廖晓彬

仲春时节，闽南大地，陆军某旅模拟训练中心内，红蓝双方依托兵棋系统开展网上对抗，多项战法训法得到验证。

“习主席在出席十四届全国人大三次会议解放军和武警部队代表团全体会议时强调，要坚定信心、直面挑战，落实高质量发展要求，如期完成既定目标任务。贯彻落实这一重要指示精神，对我们来说就要在解决制约战斗力生成的短板弱项上持续用力，助推战斗力建设转型升级。”该旅领导介绍，全国两会闭幕后，旅队组织党委理论学习中心组成员开展专题学习，认真领会会议精神，并结合单位实际研究制订贯彻落实措施，引导官兵深刻领悟习主席重要讲话精髓要义。

线上与线下共同发力，干部领学与个人自学交叉进行……连日来，该旅各单位掀起学习全国两会精神热潮，引导官兵围绕破解训练难题、创新战法训法等，开展讨论交流。

“我们既要当科技练兵的参与者，又要当科技练兵的推动者。”全国人大代表、该旅某营营长陈松回到部队，通过智慧课堂系统，第一时间与官兵分享学习体会，”习主席强调指出，’加快发展新质战斗力’。我们要通过科技赋能向’科技+”网络+’要战斗力，创新战斗力建设和运用模式，不断提高打赢能力。”

在该旅装步三连荣誉室，记者旁听了一场主题为”学两会精神、话发展成就、蓄打赢底气”的学习讨论。在交流发言中，刚刚被战区陆军表彰的二级上士贺胜广结合参加上级比武的经历，激励战友勇于挑战、拼搏进取：”基层舞台无比广阔，岗位建功正当其时，我们应立足本职练强本领，为强军事业贡献力量。”

雨后初晴。在该旅装甲训练场上，集团军”四会”教练员标兵、某连干部林弘楚正在给新驾驶员传授自己的经验与心得。前些年，还是作训参谋的他，与战友克服场地协调等困难，圆满完成某项重点任务。

“科学配置国防资源投向投量，提高经费使用精准度和效费比。”他说，通过学习习主席重要讲话精神，自己对处理好进度和质量、成本和效益、全局和重点、发展和监管、规划执行和能力形成的关系，走高质量、高效益、低成本、可持续发展路子，有了更加深刻的认识。

紧贴任务深学，立足岗位践行。连日来，该旅通过多种形式组织学习讨论，持续推动全国两会精神在基层落地生根，引导官兵将所学所思转化为练兵备战强大动力。在该旅近期组织的多课目考核中，官兵精神饱满，成绩明显提升。

A Certain Army Brigade Closely Follows the Mission and Deeply Studies, and Practices Based on the Post

Source: PLA Daily Author: Wang Mengyuan Liao Xiaobin Editor: Liu Shangjing 2025-03-18

A certain army brigade conscientiously studies and implements the spirit of the two sessions of the National People’s Congress——

Closely follow the mission and deeply study, and practice based on the post

■Wang Mengyuan PLA Daily special correspondent Liao Xiaobin

In mid-spring, in the southern Fujian land, in the simulation training center of a certain army brigade, the red and blue sides relied on the war game system to conduct online confrontation, and many tactics and training methods were verified.

“President Xi Jinping emphasized at the plenary meeting of the PLA and Armed Police Force delegation at the Third Session of the 14th National People’s Congress that we must strengthen our confidence, face challenges, implement the requirements of high-quality development, and complete the established goals and tasks on schedule. To implement this important instruction, we must continue to work hard to solve the shortcomings and weaknesses that restrict the generation of combat effectiveness, and promote the transformation and upgrading of combat effectiveness construction.” The brigade leader introduced that after the closing of the two sessions of the National People’s Congress, the brigade organized members of the Party Committee’s Theoretical Learning Center Group to carry out special studies, carefully understand the spirit of the meeting, and study and formulate implementation measures based on the actual situation of the unit, guiding officers and men to deeply understand the essence of President Xi’s important speech.

Online and offline efforts are made together, and cadres lead learning and personal self-study are carried out alternately... In recent days, various units of the brigade have set off a wave of learning the spirit of the two sessions of the National People’s Congress, guiding officers and men to discuss and exchange ideas around solving training problems and innovating tactics and training methods.

“We must be both participants and promoters of scientific and technological training.” Chen Song, a deputy to the National People’s Congress and the battalion commander of a battalion of the brigade, returned to the army and shared his learning experience with officers and men through the smart classroom system. “President Xi stressed that we should ‘accelerate the development of new quality combat effectiveness’. We should demand combat effectiveness from ‘technology +’ and ‘network +’ through technological empowerment, innovate combat effectiveness construction and application models, and continuously improve our ability to win.” In the honor room of the third company of the armored infantry of the brigade, the reporter listened to a study and discussion on the theme of “learning the spirit of the two sessions, talking about development achievements, and accumulating confidence to win.” In the exchange speech, He Shengguang, a second-class sergeant who had just been commended by the theater army, combined his experience of participating in the superior competition to encourage his comrades to be brave in challenges and strive for progress: “The grassroots stage is extremely broad, and it is the right time to make contributions in our posts. We should base ourselves on our duties to strengthen our skills and contribute to the cause of strengthening the army.” The sun cleared up after the rain. On the armored training ground of the brigade, Lin Hongchu, a model of the “four meetings” instructor of the group army and a cadre of a company, was imparting his experience and insights to new drivers. A few years ago, when he was still a training and operations staff, he and his comrades overcame difficulties such as site coordination and successfully completed a key task.

“Scientifically allocate the direction and amount of national defense resources, and improve the accuracy and cost-effectiveness of fund use.” He said that by studying the spirit of President Xi’s important speech, he had a deeper understanding of how to handle the relationship between progress and quality, cost and benefit, overall situation and focus, development and supervision,

planning execution and capacity formation, and take the path of high-quality, high-efficiency, low-cost and sustainable development.

Closely follow the task and learn deeply, and practice based on the post. In recent days, the brigade has organized learning and discussion in various forms, continuously promoted the spirit of the two sessions of the National People's Congress to take root at the grassroots level, and guided the officers and men to transform what they have learned and thought into a powerful driving force for training and preparation. In the multi-subject assessment organized by the brigade recently, the officers and men were full of energy and their scores were significantly improved.

统筹调配骨干、精细备课示教后，这个旅迎来一系列可喜变化

来源：中国军网-解放军报 作者：朱宇伦 卢明凯 宋世杰 责任编辑：刘上靖

陆军某旅优化配置训练资源提升组训施训质效——

统筹调配骨干 精细备课示教

■朱宇伦 卢明凯 解放军报特约通讯员 宋世杰

该旅教练员（右）讲解立姿据枪要领。林 敏摄

痼癖动作分析、操作技巧示范、模拟仿真训练……2 月中旬，笔者在陆军某旅防空营看到，排长赵一江针对官兵训练中存在的不足，从装备原理、结构特点到实践运用逐一进行讲解。

此前，他参加上级组织的无人设备教练员集训，在考核中取得优异成绩，返回单位后被机关纳入旅队训练指导小组，负责无人设备训练指导。”结合组训施训存在的不足，旅队统筹调配骨干力量针对性开展示教指导，有效提升了训练质量。”该营陈营长说。

发现问题、深入调研、形成报告、拿出举措、抓好落实……看到如今的情景，想起此前的经历，该旅作训科虞参谋颇感欣慰。

事情还得从之前的一次经历说起。那次，虞参谋检查督导基层训练情况时发现，有的教练员组训中往往凭借以往经验，事先准备的教案被放在一边。后来，结合督导情况进行讲评

时，虞参谋表达了自己的担忧：”教练员凭借经验组训可能一时看不出啥问题，但是当新老教练员更替时，训练的标准化和规范化就很难保证。”

他的这一担忧引起了该旅领导重视。为此，该旅专门从机关部门抽组人员，深入一线展开调研。

“训练课目安排过于密集，连队教练员很难抽出时间精细打磨教案。”一番座谈了解，虞参谋终于弄清了事情原委。原来，基层单位阶段训练时间紧、任务重，为了赶进度，一些课目内容安排强度较大，有的组训人员图方便就直接照搬往年教案，或者借用兄弟单位教案，进行简单修改调整后，以应对机关督导检查。

对此，该旅领导专门召集机关人员、一线干部骨干进行深入剖析。他们研究后形成共识，机关安排部署工作绝不能仅靠行政指令，还须改进工作作风、强化服务意识，注重了解基层实际，善于聆听官兵心声，”下发通知”后还要”跟进抓落实”，用扎实的指导帮带代替简单的检查督导，以训练管理实效检验举措落实质效。

此后，该旅以共同课目训练为切入点，结合各单位人员、任务、专业设置等情况，按照集约组训要求统筹调配旅队训练资源：区分不同课目类别确定教练员组训方式，常规课目由旅队抽调各单位组训骨干，在机关部门和教导队指导下开展集中备课，并形成流程规范、标准统一、操作要求明确的系列教案，作为指定教材下发基层参考；小新特课目按照专业相关度将具体教学任务下达给营连，营连”对口”受领任务后研究编写相关教案，报机关部门审定通过后，指定专业尖子对相关专业官兵进行精准示教，营连同步抓好人员、内容、时间、质量”四落实”。

“我们还充分发挥旅队官兵特长优势，抽选信息统计、网页制作、美工制图等方面人才，在专业教练员协助下完成课件制作、课堂设计、器材准备等工作，通力协作抓好抓实组训施训各环节。”该旅领导说。

识图用图、自救互救、轻武器使用……经过一段时间的实践摸索，一系列课目组训备课完成，系列教案下发基层单位。在此基础上，该旅又指定一名旅领导牵头，抽选机关人员、营连主官、专业教练员和高级军士，组成训练指导小组负责教学指导。日常训练中，小组成员按编制划分参与训练，随机开展训练指导、收集官兵意见反馈。在旅队定期组织的训练指导中，他们利用专门时间就遇到的问题进行分析研讨、组织示范教学，并结合训练考核完善组训方案、制订改进措施。

在该旅轻武器使用课目训练现场笔者看到，训练指导小组成员、装步连二级上士曹俊杰以实物拆解为基础，并借助事先制作的挂图、视频辅助教学，为官兵讲解新配发装备的结构原理、性能特点和改进细节，同步进行使用技巧要领示范。

“讲解中，曹班长运用动画演示了该型装备的拆解与组装程序，教学过程更加直观、立体、全面，呈现的多处细节都是我们训练中容易忽视的环节。”列兵黄宇新说，接下来的训练中，他将对照教学示范严抠每一个动作要领，精益求精练强技能，争取在阶段性训练考核中取得优异成绩。

统筹调配骨干，精细备课示教，资源进一步集约优化，组训施训效果明显。一系列可喜变化，不断激发该旅官兵训练热情。

“业精于勤，训精于细，没有精准精细的训练管理，就难以实现高效的训练。”该旅领导说，他们在优化配置旅队训练资源、开展精准备课示教的同时，还通过定期组织底数普查、随机抽查、变量分析等方法，梳理查摆训练中存在的不足和问题，通过分析研究训练数据，动态调整组训施训内容、方法和强度，”如今，训练指导抓什么、组训施训突出什么、下一步需强化什么，各级干部骨干大都能做到心中有数、行动有方。”

Analysis of habitual movements, demonstration of operating skills, simulation training... In mid-February, the author saw in the air defense battalion of a certain army brigade that platoon leader Zhao Yijiang explained the shortcomings in the training of officers and men one by one from the principles of equipment, structural characteristics to practical application.

Previously, he participated in the unmanned equipment trainer training organized by the superiors and achieved excellent results in the assessment. After returning to the unit, he was included in the brigade training guidance group and was responsible for the training guidance of unmanned equipment. “In view of the shortcomings in the organization and implementation of training, the brigade coordinated and deployed key personnel to carry out targeted demonstration and guidance, which effectively improved the quality of training.” said Battalion Commander Chen.

Finding problems, conducting in-depth research, forming reports, taking measures, and implementing them well... Seeing the current situation and thinking of previous experiences, Staff Officer Yu of the brigade's training department was quite pleased.

The story started with a previous experience. That time, when Staff Officer Yu inspected and supervised the grassroots training situation, he found that some often relied on past experience during training, and the lesson plans prepared in advance were put aside. Later, when reviewing the supervision situation, Staff Officer Yu expressed his concerns: "Instructors may not see any problems for a while based on their experience, but when new and old instructors are replaced, it is difficult to ensure the standardization of training."

His concerns attracted the attention of the brigade leaders. For this reason, the brigade specially selected personnel from the organs and departments to conduct in-depth research on the front line.

"The training courses are too densely arranged, and it is difficult for company instructors to take time to polish the lesson plans in detail." After a discussion, Staff Officer Yu finally figured out the whole story. It turns out that the grassroots units have tight time and heavy tasks for stage training. In order to catch up with the progress, some courses are arranged with high intensity. Some training personnel simply copy the teaching plans of previous years for convenience, or borrow the teaching plans of brother units, and make simple modifications and adjustments to cope with the supervision and inspection of the organs.

In response to this, the leaders of the brigade specially convened the organs and front-line cadres for in-depth analysis. After research, they reached a consensus that the organs must not rely solely on administrative instructions to arrange and deploy work, but also need to improve their work style, strengthen their service awareness, pay attention to understanding the actual situation at the grassroots level, be good at listening to the voices of officers and men, and "follow up and implement" after "issuing the notice", and use solid guidance and help instead of simple inspection and supervision, and use the actual effectiveness of training management to test the quality and effectiveness of measures.

After that, the brigade took the common subject training as the starting point, combined with the personnel, tasks, professional settings of each unit, and coordinated the allocation of brigade training resources in accordance with the requirements of intensive training: distinguish different subject categories to determine the training methods of instructors, and the brigade will select the backbones of each unit for regular subjects, and carry out centralized lesson preparation under the guidance of the organs and teaching teams, and form a series of teaching plans with standardized processes, unified standards, and clear operation requirements, which will be issued as designated teaching materials to the grassroots for reference; the special subjects will assign specific teaching tasks to the battalion and company according to the degree of professional relevance, and the battalion and company will study and compile relevant teaching plans after receiving the tasks, and after the approval of the organs, the designated professional top will conduct precise teaching

for the officers and men of the relevant professions, and the battalion and company will simultaneously grasp the "four implementations" of personnel, content, time, and quality.

"We also give full play to the advantages of the specialties of the brigade officers and men, select talents in information statistics, web page production, art and drawing, and complete the courseware production, classroom design, equipment preparation and other tasks with the assistance of professional instructores, and work together to grasp and implement all aspects of training." The brigade leader said.

Map reading and use, self-rescue and mutual rescue, use of light weapons... After a period of practical exploration, a series of training courses have been completed, and a series of teaching plans have been issued to grassroots units. On this basis, the brigade has designated a brigade leader to take the lead, select personnel, battalion and company commanders, professional instructors and senior sergeants to form a training guidance group to be responsible for teaching guidance. In daily training, team members participate in training according to the organization, conduct training guidance randomly, and collect feedback from officers and men. In the training guidance regularly organized by the brigade, they use special time to analyze and discuss the problems encountered, organize demonstration teaching, and improve the training plan and formulate improvement measures in combination with training assessment.

At the training site of the brigade's light weapons use course, the author saw that Cao Junjie, a member of the training guidance team and a second-class sergeant of the armored infantry company, based on the disassembly of the real objects, and with the help of pre-made wall charts and videos to assist in teaching, he explained to the officers and men the structural principles, performance characteristics and improvement details of the newly issued equipment, and simultaneously demonstrated the essentials of using skills.

"During the explanation, squad leader Cao used animation to demonstrate the disassembly and assembly procedures of this type of equipment. The teaching process was more intuitive, three-dimensional and comprehensive, and the many details presented were links that are easily overlooked in our training." Private Huang Yuxin said that in the next training, he will strictly follow the teaching demonstration to grasp every action essential, strive for excellence and strengthen skills, and strive to achieve excellent results in the phased training assessment.

Coordinated deployment of backbones, meticulous preparation of lessons and teaching, further intensive optimization of resources, and obvious results of training. A series of gratifying changes continue to stimulate the training enthusiasm of officers and men of the brigade.

"Diligence is the key to success, and meticulous training is the key to success. Without precise and meticulous training management, it is difficult to achieve efficient training." The brigade leader said that while optimizing the allocation of brigade training resources and conducting intensive training demonstrations, they also regularly organize basic data censuses, random checks, variable analysis and other methods to sort out and identify deficiencies and problems in training. By

analyzing and studying training data, they dynamically adjust the content, methods and intensity of training. “Now, cadres and backbones at all levels have a clear idea of what to focus on in training guidance, what to highlight in training, and what to strengthen in the next step, and they can act accordingly.”

转岗七个月，比武就夺魁

——第 82 集团军某旅某营副教导员朱明华的奋斗启示

■解放军报特约通讯员 刘 凡

“比武人员临时抽点，备赛 8 天就夺冠，真厉害！”“跨专业转岗时间短，很快脱颖而出，不简单！”前不久，第 82 集团军某旅更新荣誉表彰宣传灯箱，几名官兵谈论着某营副教导员朱明华的事迹，不禁为他点赞。

去年 11 月，集团军组织政治干部比武，采取各旅推荐和随机抽点人员的方式进行。担任某营副教导员不久的朱明华被随机抽中，与数十名政治干部同台竞技。凭借扎实的基本功和出色表现，朱明华夺得抽点组第一名。此时，距离他跨专业转岗刚满 7 个月。

朱明华是如何做到的？带着疑问，笔者决定一探究竟。

走进该营，笔者一连找了值班室、宿舍几个地方，都没见到朱明华的身影。

“想要找到朱副教导员可不容易，他每天都把自己的时间安排得满满当当，说不定又在哪里备课或者加练呢！”营部卫生员、一级上士赵京说。

笔者循着他的指点来到会议室，果然找到了正在试讲的朱明华。

听闻来意，朱明华不好意思地挠了挠头：”夺冠只是一个新的开始，想要成为一名过硬的政治干部，我要学的还有很多。”从朱明华的言语中，笔者感到一种紧迫感。

朱明华说，这种感觉，从他转岗那一天就有了。

2024 年 4 月初，朱明华从旅作训科参谋岗位调任该营副教导员。此前从未接触过政治工作的他，接到任职命令，心中充满对陌生岗位的本领恐慌。

刚到营里时，不少战友都劝他：”别着急，慢慢来”“以前没干过政工，需要时间进入状态”……说的人多了，朱明华也觉得有道理，开展工作”四平八稳”。

然而，随后而来的一次任务，给了朱明华一个”下马威”。当时，教导员正在休假，制订营教育计划的任务落到了朱明华身上。由于对营里情况不够熟悉，业务能力尚有短板，计划几经返工，最终在教导员的远程指导下才顺利完成。

手拿教育计划，朱明华觉得脸上如火烧一般。那一刻，他决心尽快胜任新的岗位，主动自我加压。

那段时间，朱明华既看书学理论、背法规，又积极参加各类政治工作集训，还拜战友为师，不放过任何一个学习提高的机会。

“朱副教导员的努力，我们有目共睹。”该营文书杨硕从保密柜里拿出厚厚的一摞政策法规，对笔者说，”这些都是他从我这里借阅过的资料，很多都被翻得卷了边。”

7 个月后，朱明华接到被抽点参加集团军政治干部比武的通知。只有 8 天准备时间，怎么办？朱明华心中五味杂陈。他了解到，参加这次比武的人员中，不仅有经验丰富的”老政工”，还有擅长讲课的”明星教员”，而自己只是一名新手，毫无优势可言。

“没有优势，就比别人多付出。”朱明华强迫自己冷静下来，很快制订出一张”备赛时间表”，具体到每一天做什么，并严格执行。对于比武要求预先准备的理论授课，他没有像其他人一样过多润色讲稿，而是在调查研究方面狠下功夫，通过组织官兵座谈，收到了不少真知灼见。他一遍遍修改教案，反复试讲，直到比武前 1 小时，还在精心准备。

如此努力，换来的是比武场上的从容不迫。无论理论知识考核，还是军事技能比拼，无论作战中政治工作运用，还是按纲抓建，朱明华思路清晰、逻辑严密、应答如流。

进入授课阶段，虽没有新奇手段和华丽辞藻，但朱明华用自信的仪态、接地气的话语、生动形象的阐释，赢得评委一致认可，大家纷纷感叹：”朱明华可不像是一个转岗不久的新手。”

随机教育考验环节，朱明华继续着出彩表现。他借鉴此前积累的经典案例，灵活应对，巧妙构思，出口成章。最终，朱明华一举夺魁。去年底，荣立个人三等功。

“抓住主要矛盾”“善于融会贯通”“广泛开展思想调查”……朱明华的笔记本上，写着他在比武期间整理的其他参赛选手的好经验、好做法。如今，这些内容已被他运用到自己的工作中。

积极转变心态、夯实能力基础、虚心追求进步、勇敢面对挑战……转岗任职以来， 朱明华一步一个脚印扎实前行。在他的心中，好像始终燃着一团火，为他照亮未来更长更远的路。

快评三两句

■邹 菲

基层军政干部交叉任职，是探索培养军政兼通型人才的一条有效途径。然而，个别同志在履职新岗位时，却存在”融入难”“适应慢”等问题。究其原因，除了客观因素外，个人思想懈怠、不积极主动作为是关键。

想要融入新集体、适应新岗位，必须及时转变工作思路，克服一切困难，不断提升履职能力。在此过程中，难免会有一些专业知识不懂、一些工作流程不熟，但不要灰心，更不能轻易否定自己。此时，要主动加强学习，走出”舒适区”，通过制订目标计划，不断激励自己努力奋进。

“通往成功的道路不会平坦开阔，实现梦想的过程不会一帆风顺。”面对转岗转型等情况，大家不妨对自己”狠”一点，多逼一逼自己，军旅人生也许就会大有不同。

How Did Zhu Minghua Do It? Seven Months after the Job Transfer, He Won the Championship in the Competition!

Source: China Military Network-Liberation Army Daily Author: Liu Fan Editor: Liu Shangjing

2025-03-18

Seven months after the job transfer, he won the championship in the competition

——The struggle inspiration of Zhu Minghua, deputy instructor of a battalion of a brigade of the 82nd Group Army

■Liu Fan, special correspondent of the People’s Liberation Army Daily

“The contestants were temporarily selected, and they won the championship after preparing for the competition for 8 days. It’s amazing!” “The cross-professional job transfer time is short, and it stands out quickly. It’s not easy!” Not long ago, a brigade of the 82nd Group Army updated the honorary commendation propaganda light box. Several officers and men talked about the deeds of Zhu Minghua, deputy Political Director of a battalion, and couldn’t help but praise him.

In November last year, the group army organized a political cadre competition, which was carried out by recommending and randomly selecting personnel from each brigade. Zhu Minghua, who had just served as the deputy Political Director of a battalion, was randomly selected and competed with dozens of political cadres. With solid basic skills and outstanding performance, Zhu Minghua won the first place in the lottery group. At this time, it had just been 7 months since he changed his job across majors.

How did Zhu Minghua do it? With doubts, the author decided to find out.

Entering the camp, the author searched the duty room and dormitory for several places, but did not see Zhu Minghua.

“It is not easy to find Deputy Director Zhu. He arranges his time very full every day. Maybe he is preparing lessons or practicing extra exercises somewhere!” said Zhao Jing, a medical worker at the battalion.

Following his instructions, the author came to the conference room and found Zhu Minghua who was giving a trial lecture.

Hearing the purpose of the visit, Zhu Minghua scratched his head embarrassedly: “Winning the championship is just a new beginning. If I want to become a strong political cadre, I still have a lot to learn.” From Zhu Minghua’s words, the author felt a sense of urgency.

Zhu Minghua said that this feeling had existed since the day he changed his job.

In early April 2024, Zhu Minghua was transferred from the brigade training office staff position to the deputy Political Director of the battalion. He had never been involved in political work before, and when he received the appointment order, he was full of panic about the skills of the unfamiliar position.

When he first arrived at the camp, many comrades advised him: “Don’t be anxious, take your time” “I have never done political work before, it takes time to get into the state”... As more and more people said this, Zhu Minghua also felt that it made sense, and he carried out his work “steadily”.

However, a subsequent task gave Zhu Minghua a “warning”. At that time, the instructor was on vacation, and the task of formulating the camp education plan fell on Zhu Minghua. Because he was not familiar with the situation in the camp and his business ability was still weak, the plan was reworked several times, and finally completed successfully under the remote guidance of the instructor.

Holding the education plan in hand, Zhu Minghua felt like his face was burning. At that moment, he was determined to be competent for the new position as soon as possible and took the initiative to put pressure on himself.

During that time, Zhu Minghua not only read books to learn theories and memorize laws and regulations, but also actively participated in various political work trainings, and also worshipped his comrades as teachers, not missing any opportunity to learn and improve.

“We all have seen the efforts of Deputy Instructor Zhu.” Yang Shuo, the clerk of the battalion, took out a thick stack of policies and regulations from the confidentiality cabinet and said to the author, “These are the materials he borrowed from me, and many of them have been turned over and curled.”

Seven months later, Zhu Minghua received a notice that he was selected to participate in the group army political cadre competition. There were only 8 days to prepare, what to do? Zhu Minghua felt mixed emotions. He learned that among the participants in this competition, there were not only experienced “old political workers” but also “star instructors” who were good at lecturing, and he was just a novice with no advantages at all.

“If you don’t have an advantage, you have to pay more than others.” Zhu Minghua forced himself to calm down and quickly worked out a “preparation schedule”, specifying what to do every day and strictly implementing it. For the theoretical lectures required in advance for the competition, he did not polish the lecture notes too much like others, but worked hard on investigation and research, and received a lot of insights by organizing officers and men to discuss. He revised the lesson plan over and over again, and repeatedly tried to give a trial lecture until 1 hour before the competition, and was still preparing carefully.

Such efforts have earned him a calm attitude in the competition. Whether it is the theoretical knowledge assessment or the military skills competition, whether it is the application of political work in combat or the construction according to the outline, Zhu Minghua has clear ideas, strict logic and fluent responses.

Entering the teaching stage, although there are no new methods and gorgeous words, Zhu Minghua won the unanimous recognition of the judges with his confident demeanor, down-to-earth words and vivid interpretation. Everyone sighed: “Zhu Minghua does not look like a novice who has just changed jobs.”

In the random education test, Zhu Minghua continued to perform well. He drew on the classic cases accumulated before, responded flexibly, conceived cleverly, and spoke fluently. In the end, Zhu Minghua won the championship in one fell swoop. At the end of last year, he was awarded the third-class individual merit.

“Grasp the main contradictions”, “Be good at integrating and understanding”, “Carry out extensive ideological investigations”... Zhu Minghua’s notebook is filled with the good experiences and practices of other contestants that he sorted out during the competition. Now, these contents have been applied to his own work.

Actively change your mindset, consolidate your ability foundation, humbly pursue progress, and bravely face challenges... Since he was transferred to the new post, Zhu Minghua has been moving forward step by step. In his heart, there seems to be a fire burning all the time, illuminating a longer and farther road for him in the future.

Quick Comments

■ Zou Fei

The cross-appointment of grassroots military and political cadres is an effective way to explore and cultivate talents with both military and political skills. However, some comrades have problems such as “difficult integration” and “slow adaptation” when performing their new duties. The reason is that in addition to objective factors, personal laziness and lack of initiative are the key.

If you want to integrate into the new collective and adapt to the new position, you must change your work ideas in time, overcome all difficulties, and continuously improve your ability to perform your duties. In this process, it is inevitable that you will not understand some professional knowledge and some work processes, but don’t be discouraged, and don’t easily deny yourself. At this time, you should take the initiative to strengthen your learning, step out of your “comfort zone”, and constantly motivate yourself to work hard by formulating goal plans.

“The road to success will not be flat and wide, and the process of realizing dreams will not be smooth sailing.” Faced with situations such as job transfers and transformations, you might as well be a little “harder” on yourself and push yourself a little more, and your military life may be very different.

新疆和田军分区神仙湾边防连二级上士祁龙：钢铁哨卡钢铁兵

来源：中国军网-解放军报 作者：赵金石 吴晓婧 责任编辑：孙悦

2025-03-18

新疆和田军分区神仙湾边防连二级上士祁龙——

钢铁哨卡钢铁兵

■赵金石 解放军报记者 吴晓婧

“风雪漫天，官兵的身影变得模糊了……”春日，记者到新疆和田军分区神仙湾边防连采访，二级上士祁龙一边整理相册，一边讲述他与战友的巡逻故事。

“巡逻途中，我们遭遇‘风吹雪’，每一步都走得很艰难。”祁龙说，那天，他们要去距哨所最远的一个点位巡逻，来回 20 余公里的路程走了 8 个多小时。入伍以来，他多次和战友踏上这样的巡逻路。

上大学后了解到不少校友参军入伍、建功军营，出身军人家庭的祁龙当兵的愿望变得更加强烈。2015年，读完大一的他应征入伍，结束新训下连后被分到神仙湾边防连。平均海拔 5000 多米，空气中含氧量不足平原的 50%，平均气温零摄氏度以下……来到哨所的那段

时间，祁龙对之前了解的这些信息有了切身感受——严重的高原反应，让他接连几天头疼得睡不着、吃不下。

过了最初的几周，祁龙努力让自己慢慢适应边防工作和生活。”上’英雄顶’那次比较凶险。”祁龙说，被战友们称作”英雄顶”的点位海拔 5900 多米，积雪终年不化，沿途最陡处坡度达 70 度。

“大家都说，没有英雄胆登不上’英雄顶’。”那次巡逻中，祁龙不慎摔倒、往下滑去。危急关头，时任班长刘万江一只手拽住祁龙的腿，另一只手紧紧抓住凸起的岩石，才化解危险。

“这里的天气变化快，刚才还是晴空万里，一转眼就可能是阴云密布。太阳一落，气温就会骤降。”祁龙说，神仙湾的天气变幻莫测，自己经历得多了，慢慢就习惯了。

“习惯”两个字，祁龙常挂在嘴边。从一名新兵成长为经验丰富的骨干，他已适应了高原环境，也习惯了边防线上的风吼雪舞。通往每一处点位的巡逻路上，都留下了他和战友的脚印。走的次数多了，哪段路比较颠簸、车要慢点开，哪处路坡度大、大家得相互搀扶，他都熟稔于心。

群山无言，一石一砾见证着他和战友的默默坚守。记者翻看相册，一张张照片定格的瞬间生动鲜活：茫茫雪野间，官兵迎着初升的朝阳，身姿挺拔；崎岖的路段，前面的战士蹚路，后面的战士踩着脚印紧随其后；最后一次巡逻，即将退役的老兵面向国旗红了眼眶……

“边防有我，请祖国放心！”连队门口的电子屏上，正播放祁龙拍摄的一段视频。视频中，战友们在哨楼前的台阶旁簇拥着鲜红的旗帜；阳光映射下，”喀喇昆仑钢铁哨卡”8 个大字格外耀眼……

Qi Long, a Second-Class Sergeant of the Shenxianwan Border Defense Company of the Hotan Military Sub-District in Xinjiang: Iron and Steel Post Iron and Steel Soldier

Source: China Military Network-People’s Liberation Army Daily Author: Zhao Jinshi Wu Xiaojing Editor: Sun Yue

2025-03-18

Qi Long, a second-class sergeant of the Shenxianwan Border Defense Company of the Hotan Military Sub-district in Xinjiang——

Iron and Steel Post Iron and Steel Soldier

■ Zhao Jinshi People’s Liberation Army Daily reporter Wu Xiaojing

“The wind and snow are all over the sky, and the figures of the officers and men have become blurred...” In spring, the reporter went to the Shenxianwan Border Defense Company of the Hotan

Military Sub-district in Xinjiang for an interview. While sorting out the photo album, Qi Long, a second-class sergeant, told the patrol story of him and his comrades.

During the patrol, we encountered “wind and snow”, and every step was difficult. “Qi Long said that day, they had to patrol the farthest point from the outpost, and the round trip of more than 20 kilometers took more than 8 hours. Since joining the army, he and his comrades have embarked on such patrols many times.

After going to college, he learned that many alumni joined the army and made contributions to the military camp. Qi Long, who came from a military family, wanted to be a soldier more strongly. In 2015, after finishing his freshman year, he enlisted in the army. After completing the new training and joining the company, he was assigned to the Shenxianwan Border Defense Company. The average altitude is more than 5,000 meters, the oxygen content in the air is less than 50% of that in the plains, and the average temperature is below zero degrees Celsius... During the time when he came to the outpost, Qi Long had a personal experience of the information he had learned before - severe altitude sickness, which made him unable to sleep and eat for several days in a row due to headaches.

After the first few weeks, Qi Long tried to slowly adapt himself to border work and life. “It was more dangerous to go to the ‘Hero Peak’. “Qi Long said that the point called “Hero Peak” by his comrades is more than 5,900 meters above sea level, with snow that never melts all year round, and the steepest slope along the way is 70 degrees.

“Everyone says that you can’t climb the ‘Hero Peak’ without the courage of a hero.” During that patrol, Qi Long accidentally fell and slid down. At the critical moment, the then squad leader Liu Wanjiang grabbed Qi Long’s leg with one hand and held the protruding rock with the other hand to resolve the danger.

“The weather here changes quickly. It was sunny just now, but it may be cloudy in a blink of an eye. Once the sun sets, the temperature will drop sharply. “Qi Long said that the weather in Shenxian Bay is unpredictable, and he has experienced a lot and gradually got used to it.

Qi Long often mentions the word “habit”. From a new recruit to an experienced backbone, he has adapted to the plateau environment and the howling wind and snow on the border. On the patrol road leading to each point, there are footprints of him and his comrades. After walking many times, he is familiar with which section of the road is bumpy and the car should be driven slowly, and which section of the road has a large slope and everyone has to support each other.

The mountains are silent, and every stone and gravel witnesses the silent perseverance of him and his comrades. The reporter flipped through the album, and the moments frozen in each photo were vivid: in the vast snow field, the officers and men faced the rising sun with upright posture; on the rugged road, the soldiers in front waded the road, and the soldiers behind followed closely in the footprints; on the last patrol, the veteran who was about to retire looked at the national flag with red eyes...

“I am here for the border defense, please rest assured, motherland! “A video shot by Qi Long was playing on the electronic screen at the entrance of the company. In the video, comrades gathered around the steps in front of the sentry tower with a bright red flag; under the sunlight, the eight characters “Karakoram Steel Post” were particularly dazzling...

第 75 集团军某旅：多机型协同、多课目结合锤炼突击作战力

来源：中国军网-解放军报 作者：曹一庆 谭阳林 责任编辑：王一亘

2025-03-19

第 75 集团军某旅提升突击作战能力——

多机型协同练 多课目结合训

■曹一庆 谭阳林

初春时节，第 75 集团军某旅依托野外综合训练场组织一场低空突防训练。该旅领导介绍，此次训练，他们按照”多机型协同练、多课目结合训”的思路，主要围绕超低空突防、大坡度转弯机动、多机型空中突防等难点课目展开，旨在锤炼部队在近似实战环境中的突击作战能力。

地面苦练，空中精飞。飞行训练展开前，该旅针对难度较大的飞行课目，组织飞行员进行地面模拟训练、地面座舱实习等，为飞行安全奠定坚实基础。

“遭’敌’强电磁干扰！”训练刚展开，特情不期而至，各机组迅速调整通信模式、降低飞行高度、变换战术动作，规避”敌”雷达搜索。

到达预定空域后，各战机迅速进入战斗状态。某型武装直升机进入战位后，悬停片刻随即俯冲、瞄准、锁定、发射。顷刻间，数枚火箭弹呼啸出膛，首轮火力突击告捷。

“直升机低空突防难度较大，飞行员需要具备过硬的驾驶技术和心理素质。”现场指挥员介绍，飞行过程中，飞行员要躲避对方雷达监测和防空武器射击。为此，他们在苦练精飞中研练战术战法，不断提高飞行员在复杂战场环境下的应急处置能力。

“目标地域安全，可以实施机降。”训练现场，根据空中侦察小组提供的情报信息，数架运输直升机搭载突击步兵、吊挂全地形车，在大机群交替掩护下实施机降。降落后，官兵迅速展开战斗队形，对”敌”进行立体合围。突击小组快速抢占有利位置，对”敌”要点部位实施重点打击。在各要素协同配合下，任务官兵迅速控制目标区域，圆满完成任务。

从空中情报侦察到近距火力支援，从远程兵力投送到纵深机降作战……训练中，该旅依托实兵对抗探索协同打击等作战样式，不断锤炼部队遂行任务能力。

训练结束，该旅立即组织复盘研讨，全面分析飞行数据、科学制订飞行计划、细化组训流程，从难从严锤炼飞行员过硬作战本领，有效提升部队协同作战水平。

该旅领导介绍，他们紧盯战斗力标准抓建设，坚持以战领训、以训促战，结合担负的各项训练任务，在近似实战条件下摔打锤炼部队，全面提升备战打仗能力，确保随时拉得出、上得去、打得赢。

A Brigade of the 75th Group Army: Multi-Aircraft Coordination and Multi-Subject Combination to Hone Assault Combat Capabilities

Source: China Military Network-People's Liberation Army Daily Author: Cao Yiqing Tan Yanglin Editor: Wang Yigen

2025-03-19

A brigade of the 75th Group Army improves assault combat capabilities——

Multi-aircraft coordination training and multi-subject combination training

■Cao Yiqing Tan Yanglin

In early spring, a brigade of the 75th Group Army organized a low-altitude penetration training based on a field comprehensive training ground. The brigade leaders introduced that in this training, they followed the idea of "multi-aircraft coordination training and multi-subject combination training", mainly focusing on difficult subjects such as ultra-low-altitude penetration, large-slope turning maneuvers, and multi-aircraft air penetration, aiming to hone the troops' assault combat capabilities in a near-actual combat environment.

Hard training on the ground, precise flying in the air. Before the flight training began, the brigade organized pilots to conduct ground simulation training and ground cockpit practice for more difficult flight subjects, laying a solid foundation for flight safety.

"Strong electromagnetic interference from the enemy!" As soon as the training started, a special situation came unexpectedly. Each crew quickly adjusted the communication mode, lowered the flight altitude, and changed tactical actions to avoid the "enemy" radar search.

After arriving at the designated airspace, each combat aircraft quickly entered combat status. After a certain type of armed helicopter entered the combat position, it hovered for a moment and then dived, aimed, locked, and fired. In an instant, several rockets roared out of the barrel, and the first round of firepower assault was successful.

"It is difficult for helicopters to penetrate at low altitudes, and pilots need to have excellent driving skills and psychological qualities." The on-site commander introduced that during the flight, pilots must avoid the enemy's radar monitoring and anti-aircraft weapons shooting. To this end, they

practiced tactics and methods in hard training and continuously improved the pilots' emergency response capabilities in complex battlefield environments.

"The target area is safe and can be airdropped." At the training site, according to the intelligence information provided by the air reconnaissance team, several transport helicopters carrying assault infantry and hanging all-terrain vehicles were airdropped under the cover of a large fleet of aircraft. After landing, the officers and men quickly deployed combat formations to encircle the "enemy" in three dimensions. The assault team quickly seized a favorable position and carried out key strikes on the key points of the "enemy". With the coordination of various elements, the officers and men on the mission quickly controlled the target area and successfully completed the mission.

From aerial intelligence reconnaissance to close-range fire support, from long-range force delivery to deep airdrop operations... During the training, the brigade relied on real-life confrontation to explore combat styles such as coordinated strikes, and continuously tempered the troops' ability to perform tasks.

After the training, the brigade immediately organized a review and discussion, comprehensively analyzed flight data, scientifically formulated flight plans, and refined the training process, so as to temper the pilots' strong combat skills from difficult and strict aspects, and effectively improve the troops' coordinated combat level.

The leaders of the brigade introduced that they closely followed the combat effectiveness standards and grasped the construction, insisted on leading training with war and promoting war with training, combined with the various training tasks they undertook, and tempered the troops under conditions close to actual combat conditions, comprehensively improving their ability to prepare for war, and ensuring that they could be pulled out, go up, and win at any time.

军营观察丨一张供应单背后的保障新探索

来源：中国军网-解放军报 作者：陈剑 包许 陈典宏 责任编辑：刘上靖

2025-03-19

关键词：关注驻训保障

连绵群山间，一场实战背景下的联合后勤保障训练打响。地方某单位接到陆军某基地指令后，迅速按照副食品供应单需求，完成物资分拣、装载和前送。

一张副食品供应单的保障效能有多大？走下训练场，该基地军需营房科张科长说，如今的快速有效保障，得益于基地创新构建的副食品统采统供平台。

打仗在某种意义上说就是打保障。陆军某基地常态担负驻训保障任务，一张供应单上的新变化，牵动着驻训部队官兵，也推动着基地保障模式和手段不断改进升级。

今天，让我们追踪这样一张供应单，感受部队保障能力升级的探索与思考。

一张供应单背后的保障新探索

■陈 剑 包 许 解放军报记者 陈典宏

陆军某基地副食品集配中心验收发放驻训部队供应物资。滕召森摄

从”散装”保障到驻场统供——

驻训餐桌的”新鲜度”上了一个层次

“订购食材已送达，请签字验收。”前不久，陆军某部千里机动至陆军某基地场区驻训，部队刚落脚，地方某单位就将食材送达指定地域。随后，炊事班将热气腾腾的饭菜端上餐桌。

这一幕，让陆军某部司务长徐良斌看在眼里，暖在心上。

“现在我们只需提报需求，后续工作全由基地保障完成，减轻不少负担。”作为司务长，徐良斌对野外驻训伙食保障有着深刻感受——

以往部队野外驻训，部队机关业务科室需与自行联系的供应商提前到驻训地展开调研、询价、运输车辆租赁等”粮草工作”，副食品筹措效益低、人力物力成本高，较为粗放的供应模式，牵扯部队精力。

就拿”生鲜副食品”来说，机关采购人员按照规定外出采买，菜品价格随市场波动大，种类和质量难以保证。野战环境下的后勤保障难度更大，”小远零散”单位还要投入资金用于运输保障。

对此，徐良斌感慨：”过去部队采购副食品，实行的是部队联系的供应商与基层营连’散装式’对接的供应方式，导致部队副食品供应品种少、新鲜度差。”

“不能因保障滞后，影响部队练兵质效。”为解决驻训部队在采购副食品中面临的跨地域供应、筹供效益低、质量难保证等困难，在上级指导下，该基地协调驻地政府，按照”依靠

政府、军地协力、市场运作”思路，探索形成”政府搭台、驻场统供、即接即入、军地联管”的副食品保障新模式。

该基地搭建运转高效、供给便捷的副食品统采统供平台。他们在指定区域筹建面积达上千平方米、可储藏大量物资的副食品集配中心，有效缩短新鲜食材到驻训餐桌的距离，让官兵吃上新鲜果蔬。

“生鲜食材贵在鲜，只有真正新鲜才能让官兵吃得放心。”该基地副食品集配中心负责人告诉记者，副食品集配中心建成后，他们开设冷链物流、冷链加工等功能区，建立物流标准，按照不同温层，明确副食品的包装要求、运输环境；把控供应商质检、部队验收等检验关口，定期对商品展开检测。

此外，该基地副食品集配中心区分不同物流专业，组建信息运维团队，负责副食品的筹措、仓储、质检、配送等工作，确保全流程运输畅通。

“既要能造船，也要学会借船出海。”去年，该基地走访相关单位，研发集成”订单管理、价格管理、采购管理、配送管理、质量管理”等信息模块的新软件，驻训部队副食品采购实现从”线下”到”线上”的升级。

如今，基地确定的供应商根据部队每日”线上”下单需求采买次日副食品，缩短物资筹措时间。他们还与驻训部队代表现地踏勘，科学设定配送路线，灵活搭配运输车辆，缩短配送时效，准点配送率大大提升，让驻训餐桌的”新鲜度”上了一个层次。

从吃饱吃好到个性化保障——

暖胃更暖心，练兵备战活力更足了

白灼虾、红烧肉……结束一天的训练，参加驻训的某部下士江洪斌走进餐厅帐篷，看着桌上摆放的菜肴，脸上露出笑容。

“无论是猪肉、海鲜还是蔬菜，对运输条件要求都很苛刻，一旦运输途中存储不当，就会造成相应损耗……”张科长说，在基地副食品统采统供平台还未建立之前，供应商综合成本考虑，提供给驻训部队的副食品选择性不多、种类也不多。

既要保障到位，更要保证到”胃”。

该基地坚持问计于兵，主动突破地域限制，借助地方单位运输设备先进、存储手段科学的优势，不仅保障驻训官兵吃上鲜活海产品，还将各地特色农副产品引入部队。

如今，无论是北方优质杂粮、南方新鲜果蔬，还是山区特产干货，源源不断汇聚到该基地副食品集配中心，丰富食材保障的多样性。

“食材的选择，是烹饪的关键，食材的新鲜度也会影响口感。”某营司务长张桐一边给记者讲解多种烹饪方法，一边拿出基地配发的平板电脑，打开 APP 订购食材。

记者看到，平板电脑屏幕上显示了多种菜系、百余种菜品，每个菜品都标注了营养元素。轻点常用副食品功能键，食材被划分成肉、蔬菜、鱼禽等 12 大类。

“以往驻训期间，制订食谱，总担心订不到大家想吃的菜，如今统采统供，菜品种类应有尽有，大家想吃的特色菜，我们轮番写入食谱中。”张桐说。

有了好食材，还得有过硬的厨艺。

为提升驻训炊事员保障能力，他们结合驻训任务性质、官兵训练强度和岗位需求，主动邀请地方名厨走进军营传授技能，编写教案推送至网络终端。

此外，为改善驻训部队制炊及用餐条件，该基地还向驻训部队开放”公物仓”，向他们提供各类操作台、分餐台、保鲜柜等设施设备。

走进驻训的某连食堂，只见餐厅帐篷内，除放置有常规餐台、餐桌等”五小样”，还配备奶制品保鲜柜、煮面机、饮料机等设备。

张桐说，如今野外驻训也能按照在营标准保障，达到分区合理、管理规范的要求。

“今天有黄焖鸡、地三鲜……”又到开饭时间，看着食堂的菜单，正在驻训的某部军需营房科助理员感慨道：”自从来到基地驻训，从吃饱吃好到个性化保障，暖胃更暖心，练兵备战活力更足了。”

从平时服务到战时支前——

供给更高效，野战保障挑大梁

车流滚滚，兵车竞发。

一次演习，某部担负主攻任务，各营连依托自身力量实施热食伴随保障，携带了一定数量的干粮。

临近中午，某营正准备埋锅做饭。谁知，导调员来了个出其不意：”你营炊事车被炸毁，人员伤亡严重，失去保障能力。”

“没有热食保障就吃单兵干粮。”面对突发情况，该营指挥员果断下定决心。

然而，一份上级文电随后而来：”当前战况胶着，请你营做好打持久战的准备。”

由于所带的干粮数量有限，该营指挥员有些着急：”时间久了，再过几天吃啥？”

纵观各野战演训场，”保障联、联保障”的图景持续涌现，各级有着共同的目标指向——深入探索联合训练、联合保障的新方法，下功夫破解驻训保障重难点问题，实现前后方力量的综合保障、各要素密切协同，切实为备战打仗提质增效。

情况急、任务重，联合保障必须跟上。在特殊作战环境下，后方力量如何实现高效供给？这一事关作战胜负的后勤保障问题，引起各级指挥员的深思。

“一切为了前线、一切为了胜利，一直都是后勤工作的出发点和落脚点。基地作为备战打仗的’屯兵场’，必须全部精力向打仗聚焦，全部工作向打仗用劲。”

该基地领导介绍，他们积极探索军地联合、平战一体的野战联合保障模式，与平台企业依据新的伙食费标准和实物定量标准，在广泛征求意见基础上建立副食品目录；与地方政府建立常态沟通和定期会商机制，确保野战地域信息畅通，指挥高效。

他们还积极协调驻地政府统筹周边优质资源，指导供应商与周边蔬菜水果种植基地、肉禽养殖企业建立合作关系，确保在日常演训和作战过程中快速供给。

“车辆伪装需要考虑地形地貌和环境，在行进过程中，一定要选择好合适的伪装材料……”在基地副食品集配中心，该基地干部朱金银正在给地方货运驾驶员讲解有关野战知识，确保他们熟悉规定要求，赢得阵阵掌声。

“我们虽然没穿军装，但同样也有保家卫国的责任。”一位副食品供应商说，基地定期选派人员，为他们上门”传经送宝”，大家的国防意识明显提高。

“只有把平时当战时，才能确保战时拉得出、上得去、保得好。”该基地领导介绍，一个时期以来，他们坚持按照实战标准，常态组织军地开展指挥协同、力量编组、运力衔接等训练，确保战时联合保障无缝对接，提高整体应急、支援保障能力。

“甲坚兵利，车固马良，畜积给足，士卒殷轸，此军之大资也。”坚实的保障力，能催生出强大的战斗力。

前不久，某部参加联合演训活动。到达演习地域后，该部生活服务中心主任陈志伟发了愁：基地驻地偏远，参演部队大量进驻后，给饮食保障带来诸多困难。

出乎意料的是，基地副食品集配中心安排的送货车也随后跟进，让陈志伟一颗悬着的心落了地。”从平时服务到野战保障，政府与部队创新机制提高保障效能，如今我们野外驻训时遇到的难题越来越少，有了强大的后勤保障力量支撑，我们更有信心打胜仗。”陈志伟感慨道。

Military Camp Observation | New Exploration of Support Behind a Supply List

Source: China Military Network-People's Liberation Army Daily Author: Chen Jian, Bao Xu, Chen Dianhong Editor: Liu Shangjing

2025-03-19

Keywords: Focus on training support

A joint logistics support training under the background of actual combat was launched in the mountains. After receiving the order from a certain army base, a local unit quickly completed the sorting, loading and forwarding of materials according to the requirements of the non-staple food supply list.

How effective is the support of a non-staple food supply list? Walking down the training ground, Zhang, the chief of the military quarters barracks section of the base, said that today's rapid and effective support is due to the innovative construction of the non-staple food unified procurement and supply platform by the base.

In a sense, fighting is fighting support. A certain army base is normally responsible for the training support task. The new changes in a supply list affect the officers and men of the training troops, and also promote the continuous improvement and upgrading of the base support model and means.

Today, let us track such a supply list and feel the exploration and thinking of the upgrading of the troops' support capabilities.

A new exploration of support behind a supply list

■ Chen Jian, Bao Xu, PLA Daily reporter Chen Dianhong

The food distribution center of a certain army base inspects and distributes supplies to the training troops. Photo by Teng Zhaosen

From "bulk" support to on-site unified supply--

The "freshness" of the training table has reached a new level

"The ordered ingredients have been delivered, please sign for acceptance." Not long ago, a certain army unit moved thousands of miles to a certain army base for training. As soon as the troops settled down, a local unit delivered the ingredients to the designated area. Afterwards, the kitchen team brought the steaming hot meals to the table.

This scene made Xu Liangbin, the quartermaster of a certain army unit, see it and feel warm in his heart.

"Now we only need to submit the demand, and the follow-up work will be completed by the base, which reduces a lot of burden." As the chief steward, Xu Liangbin has a deep feeling about the food support for field training. In the past, when the troops were stationed in the field, the business departments of the troops had to contact the suppliers in advance to the training site to conduct

research, inquiries, transportation vehicle leasing and other “food and grass work”. The efficiency of raising non-staple food was low, the cost of manpower and material resources was high, and the relatively extensive supply model involved the troops’ energy. Take “fresh non-staple food” as an example. The procurement personnel of the training group went out to buy according to regulations. The price of the dishes fluctuated greatly with the market, and the variety and quality were difficult to guarantee. The logistics support in the field environment is more difficult, and the “small, remote and scattered” units have to invest funds in transportation support. In this regard, Xu Liangbin lamented: “In the past, the troops purchased non-staple food in bulk, which resulted in a small variety of non-staple food and poor freshness.” “We cannot let the delay in support affect the quality and efficiency of the troops’ training.” In order to solve the difficulties faced by the garrison troops in purchasing non-staple food, such as cross-regional supply, low supply efficiency, and difficult quality assurance, the base coordinated with the garrison government under the guidance of the superiors, and explored the formation of a new non-staple food guarantee model of “government platform, garrison supply, immediate access, and joint management by the military and the local government” in accordance with the idea of ”relying on the government, military-local cooperation, and market operation”. The base has built a non-staple food unified procurement and supply platform with efficient operation and convenient supply. They are planning to build a non-staple food distribution center with an area of thousands of square meters in the designated area, which can store a large amount of materials, effectively shortening the distance from fresh ingredients to the garrison table, so that officers and men can eat fresh fruits and vegetables. “Fresh food ingredients are valuable because they are fresh. Only when they are truly fresh can soldiers eat with peace of mind.” The person in charge of the non-staple food distribution center of the base told reporters that after the non-staple food distribution center was built, they opened functional areas such as cold chain logistics and cold chain processing, established logistics standards, and clarified the packaging requirements and transportation environment of non-staple food according to different temperature layers; controlled the inspection checkpoints such as supplier quality inspection and troop acceptance, and regularly tested the goods.

In addition, the non-staple food distribution center of the base distinguishes different logistics majors and forms an information operation and maintenance team to be responsible for the fundraising, warehousing, quality inspection, and distribution of non-staple food to ensure smooth transportation throughout the entire process.

“We must be able to build ships and learn to borrow ships to go to sea.” Last year, the base visited relevant units and developed new software that integrated information modules such as “order management, price management, procurement management, distribution management, and quality management”, and the procurement of non-staple food for the training troops was upgraded from “offline” to “online”.

Today, the suppliers determined by the base purchase the next day’s non-staple food according to the troops’ daily “online” order needs, shortening the time for material fundraising. They also conducted on-site surveys with representatives of the garrison troops, scientifically set delivery

routes, flexibly matched transport vehicles, shortened delivery time, and greatly improved the on-time delivery rate, which brought the “freshness” of the garrison tables to a higher level.

From eating well to personalized guarantees -

Warming the stomach and the heart, training and preparation for war are more energetic

Boiled shrimp, braised pork... After a day of training, Jiang Hongbin, a corporal from a garrison who participated in the training, walked into the restaurant tent and looked at the dishes on the table with a smile on his face.

“Whether it is pork, seafood or vegetables, the transportation conditions are very demanding. Once they are improperly stored during transportation, they will cause corresponding losses...” Chief Zhang said that before the unified procurement and supply platform for non-staple food in the base was established, the suppliers considered the comprehensive cost and provided the non-staple food for the garrison troops with few choices and types.

It is necessary to ensure that it is in place and to ensure that it is “stomach”.

The base insists on asking the soldiers for advice, actively breaking through geographical restrictions, and taking advantage of the advanced transportation equipment and scientific storage methods of local units, it not only ensures that the garrison officers and men eat fresh seafood, but also introduces local specialty agricultural and sideline products into the troops.

Nowadays, whether it is high-quality grains from the north, fresh fruits and vegetables from the south, or dry goods from mountainous areas, they are constantly gathered at the base’s food distribution center, enriching the diversity of food security.

“The choice of ingredients is the key to cooking, and the freshness of ingredients will also affect the taste.” Zhang Tong, the quartermaster of a certain battalion, explained a variety of cooking methods to reporters while taking out a tablet computer distributed by the base and opening the APP to order ingredients.

The reporter saw that the tablet screen displayed a variety of cuisines and more than a hundred dishes, and each dish was marked with nutritional elements. Tap the commonly used food function key, and the ingredients are divided into 12 categories such as meat, vegetables, fish and poultry.

“In the past, during the training period, when formulating recipes, I was always worried that I couldn’t order the dishes everyone wanted to eat. Now we have unified procurement and supply, and we have all kinds of dishes. We take turns to write the special dishes everyone wants to eat into the recipes.” Zhang Tong said.

With good ingredients, you also need to have excellent cooking skills.

In order to improve the support capabilities of the cooks stationed in the training, they took the initiative to invite local chefs to the barracks to teach skills and write teaching plans to push them

to the network terminal in combination with the nature of the training mission, the intensity of officers and men' training and the job requirements.

In addition, in order to improve the cooking and dining conditions of the training troops, the base also opened the "public property warehouse" to the training troops, providing them with various operating tables, dining tables, fresh-keeping cabinets and other facilities and equipment.

Walking into the canteen of a certain company stationed in the training, I saw that in the restaurant tent, in addition to the "five small samples" such as regular dining tables and dining tables, it was also equipped with dairy fresh-keeping cabinets, noodle cookers, beverage machines and other equipment.

Zhang Tong said that now the field training can also be guaranteed according to the standards of the camp, meeting the requirements of reasonable zoning and standardized management.

"Today we have braised chicken, three fresh vegetables..." It's time for dinner again. Looking at the menu in the canteen, an assistant in the quartermaster barracks of a certain unit who is currently training said with emotion: "Since I came to the base for training, from eating well to personalized support, I have warmed my stomach and my heart, and I am more energetic in training and preparing for war."

From peacetime service to wartime support-

Supply is more efficient, and field support plays a major role

The traffic is rolling, and the vehicles are competing.

In an exercise, a certain unit was responsible for the main attack mission, and each battalion relied on its own strength to implement hot food accompanying support and carried a certain amount of dry food.

Near noon, a certain battalion was preparing to bury the pot and cook. Unexpectedly, the director came unexpectedly: "Your battalion's cooking car was blown up, and the casualties were serious, and the support capability was lost."

"If there is no hot food support, you will eat individual dry food." Faced with the emergency, the commander of the battalion made a decisive decision.

However, a superior document followed: "The current battle situation is stalemate, please prepare your battalion for a protracted war."

Due to the limited amount of dry food brought, the battalion commander was a little anxious: "What will we eat in a few days?"

Looking at the various field training grounds, the picture of "joint support and joint support" continues to emerge, and all levels have a common goal - to explore new methods of joint training and joint support, work hard to solve the key and difficult problems of training support, achieve

comprehensive support for front and rear forces, and close coordination of various elements, and effectively improve the quality and efficiency of preparing for war.

The situation is urgent and the task is heavy, and joint support must keep up. In a special combat environment, how can the rear forces achieve efficient supply? This logistical support issue, which is related to the outcome of the battle, has caused commanders at all levels to think deeply.

“Everything for the front line, everything for victory, has always been the starting point and foothold of logistics work. As a ‘garrison’ for preparing for war, the base must focus all its energy on fighting and work hard for fighting.”

The leaders of the base introduced that they actively explored the joint support model of military-civilian cooperation and peacetime-war integration in the field, and established a non-staple food catalog based on extensive consultation with platform companies based on the new food allowance standards and physical quantitative standards; established a normal communication and regular consultation mechanism with local governments to ensure smooth information flow in the field area and efficient command.

They also actively coordinated the local government to coordinate the surrounding high-quality resources, and guided suppliers to establish cooperative relations with surrounding vegetable and fruit planting bases and meat and poultry breeding enterprises to ensure rapid supply during daily training and combat.

“Vehicle camouflage needs to take into account the terrain and environment. During the journey, it is necessary to choose the appropriate camouflage materials...” At the non-staple food distribution center of the base, Zhu Jinyin, a cadre of the base, was explaining the relevant field knowledge to local freight drivers to ensure that they were familiar with the regulations and requirements, winning applause.

“Although we don’t wear military uniforms, we also have the responsibility to defend our country.” A non-staple food supplier said that the base regularly selects personnel to visit them to “pass on the knowledge and treasures”, and everyone’s national defense awareness has been significantly improved.

“Only by treating peacetime as wartime can we ensure that we can be deployed, go up, and protect well in wartime.” The leaders of the base introduced that for a period of time, they have insisted on following actual combat standards and regularly organized military and local command coordination, force organization, and transportation connection training to ensure seamless connection of joint support in wartime and improve overall emergency response and support capabilities.

“Strong armor, sharp weapons, solid chariots and good horses, sufficient livestock and supplies, and soldiers are well-equipped. This is the great asset of the army.” Solid support can give birth to strong combat effectiveness.

Not long ago, a certain unit participated in a joint exercise. After arriving at the exercise area, Chen Zhiwei, director of the unit's life service center, was worried: the base was located in a remote area, and after a large number of participating troops were stationed, it brought many difficulties to food support.

Unexpectedly, the delivery truck arranged by the base's food distribution center also followed up, which put Chen Zhiwei's heart at ease. "From peacetime service to field support, the government and the troops have innovated mechanisms to improve support efficiency. Now we encounter fewer and fewer problems during field training. With the support of strong logistics support, we are more confident in winning the battle," Chen Zhiwei said with emotion.

新疆军区某团增强官兵主观能动性提升教育质效

来源：中国军网-解放军报 作者：王俊 杨龙 责任编辑：王一亘

2025-03-20

新疆军区某团增强官兵主观能动性提升教育质效——

发挥集体智慧 燃旺教育炉火

■王 俊 杨 龙

"身边战友的成长故事说明，只要我们扎根岗位埋头实干，瞄定目标不懈奋斗，就一定能展现风采、取得成绩、实现梦想……"近日，新疆军区某团修理连组织教育课，三级军士长申治荣结合入伍 10 多年来的成长经历，围绕"担当使命、青春出彩"这一主题畅谈心得体会，赢得阵阵掌声。

一名军士主讲一堂教育课，而且表现出色，这不禁让人感到好奇。为此，笔者与该连干部牛雄杰攀谈起来。

去年底，该团领导围绕思想政治教育创新深入营连调研了解到，教育课堂或多或少存在内容陈旧、语言空洞、形式单一等情况，有些时候教育者在台上滔滔不绝，课堂氛围却不够活跃；官兵听课笔记工整规范，却没有入脑入心。为此，该团机关部门专门组织教育骨干集训，理思路、教方法、传技巧；大力倡导教育骨干与基层官兵交流互动，深入了解大家思想困惑、心理特点、想法需求；组织召开"诸葛亮会"，鼓励官兵围绕教育方式创新、课堂设计、备课授课等建言献策。在此基础上，他们梳理汇总官兵意见建议，吸纳具有建设性的内容，进一步优化完善教育计划。

前不久，该团月教育计划下发后，牛雄杰围绕"铆定岗位奋斗、坚定信念建功"这一主题征求官兵意见建议。有人建议说，申治荣入伍以来的经历，是这一教育主题的鲜活体现，他

的成长故事真实、可信、接地气，大家易于接受、便于学习，如果请他登台讲述，效果一定不错。

“我们采纳这一建议后，召集教育骨干与申治荣一起集中备课，并吸纳有特长的官兵参与进来，共同以灵活多样的形式进行课堂设计。”牛雄杰说，汇集官兵智慧火花收到良好效果，申治荣的讲述有效激发了战友们的奋斗热情，很多官兵表示”这堂课有味道、很解渴，让自己看到了追赶目标、明确了努力方向”。

二营五连组织”落实规章制度、争当守纪标兵”教育课，连队干部赖闯龙结合官兵”开门搞教育”的建议，先围绕遵规守纪重要性等进行讲解，然后组织大家到驻地相关单位，采取案例剖析、动画演示、情景再现等形式，开展现场警示教育。

勤务保障营卫生连干部信涛杰发挥官兵特长，根据二等功臣刘沛的经历，自编自导情景短剧《一名通信兵的华丽转身》，并邀请刘沛登上”士兵讲武堂”讲述自己的成长故事，引导大家学习身边榜样、争当强军先锋……

从封闭式课堂教育到开放式现地教育，从被动接受教育到主动参与其中，从单向灌输说教到双向互动交流，该团集聚官兵智慧、创新方式方法，推动思想政治教育发生喜人变化。

“越符合官兵期待，官兵就越喜欢；距离官兵越近，官兵就越容易接受。事实说明，只有善于发挥官兵的主观能动性，思想政治教育才能拨动心弦、触动灵魂、引发共鸣。”该团政治工作处干部冯浩说，他们在总结经验的基础上，还结合年度任务安排，利用遂行任务、新兵下连、比武竞赛等时机，引导官兵积极开展群众性自我教育，把话筒交给官兵，让他们真正”唱主角”，在相互启发中互促共进。

该团还结合阶段教育任务征集官兵”金点子”，组织”指导员研讨会”，打造”读书交流会”等互动平台，开展”学习榜样见行动”实践活动，进一步营造”人人参与教育、个个接受教育”的浓厚氛围。

近日，该团组织官兵到独库公路博物馆开展现地见学。他们以嘉宾点评、主持人访谈、时空对话等形式，引导官兵在亲身参与中感悟优良传统、传承先辈精神。”在今后的训练中，我要像革命先辈那样，发扬一不怕苦、二不怕死的战斗精神，铆定岗位精武强能，争取早日成为一名本领过硬、技能拔尖的专业精兵。”走出博物馆，列兵祁坤羽说。

“思想政治教育说到底是做人的工作。我们在实践中也发现，有的教育者片面理解群众性自我教育，过度出让教育主导权，以为把课堂交给官兵就可以撒手不管，使课堂偏离主题和主调。”该团领导说，下一步，他们将在梳理经验、形成规范的同时，对各级教育骨干加强教育引导和示范指导，一方面保护好官兵参与教育的热情，一方面对教育进行及时必要的引导，确保用优质内容、科学方法、灵活方式说服人、影响人、塑造人。

A Regiment of the Xinjiang Military Command Strengthens the Subjective Initiative of Officers and men and Improves the Quality and Effectiveness of Education

Source: China Military Network-Liberation Army Daily Author: Wang Jun Yang Long Editor: Wang Yigen

2025-03-20

A regiment of the Xinjiang Military Command strengthens the subjective initiative of officers and men and improves the quality and effectiveness of education——

Exerting collective wisdom to ignite the fire of education

■ Wang Jun Yang Long

“The growth stories of comrades around us show that as long as we take root in our posts and work hard, aim at our goals and work tirelessly, we will definitely be able to show our style, achieve results, and realize our dreams...” Recently, a repair company of a regiment of the Xinjiang Military Command organized an education class. The third-class sergeant Shen Zhirong combined his growth experience of more than 10 years in the army and talked about his experience around the theme of “taking on the mission and being outstanding in youth”, winning applause.

A sergeant gave an education class and performed well, which made people curious. For this reason, the author talked with Niu Xiongjie, a cadre of the company.

At the end of last year, the leaders of the regiment conducted in-depth research on the battalion and company around the innovation of ideological and political education and learned that the education classrooms were more or less outdated in content, empty in language, and single in form. Sometimes the educators were eloquent on the stage, but the classroom atmosphere was not active enough; the officers and men took neat and standardized notes during the class, but they did not get into their minds. To this end, the regiment’s organs organized a special training for education backbones to sort out ideas, teaching methods, and skills; vigorously advocated that education backbones interact with grassroots officers and men to deeply understand everyone’s ideological confusion, psychological characteristics, and ideas and needs; organized a “Zhuge Liang meeting” to encourage officers and men to make suggestions on innovation in education methods, classroom design, and lesson preparation and teaching. On this basis, they sorted out and summarized the opinions and suggestions of officers and men, absorbed constructive content, and further optimized and improved the education plan. Not long ago, after the monthly education plan of the regiment was issued, Niu Xiongjie solicited opinions and suggestions from officers and men around the theme of “fixing their posts and working hard, and strengthening their beliefs and making contributions.” Some people suggested that Shen Zhirong’s experience since joining the army is a vivid embodiment of this educational theme. His growth story is real, credible, and down-to-earth.

It is easy for everyone to accept and learn. If he is invited to the stage to tell the story, the effect will definitely be good.

“After we adopted this suggestion, we called together the backbone of education to prepare lessons with Shen Zhirong, and absorbed officers and men with special skills to participate, and jointly designed the classroom in a flexible and diverse form.” Niu Xiongjie said that gathering the wisdom of officers and men has achieved good results. Shen Zhirong’s story effectively inspired the fighting enthusiasm of his comrades. Many officers and men said that “this class is interesting and thirst-quenching, allowing them to see the goal of catching up and clarify the direction of their efforts.”

The Fifth Company of the Second Battalion organized an educational class on “Implementing rules and regulations and striving to be a model of discipline”. The company cadre Lai Chuanglong combined the officers and men’ suggestions of “open education” and first explained the importance of compliance with rules and regulations, and then organized everyone to go to the relevant units in the garrison to carry out on-site warning education in the form of case analysis, animation demonstration, and scene re-enactment.

Xin Taojie, a cadre of the medical company of the service support battalion, made full use of the specialties of officers and men, and based on the experience of Liu Pei, a second-class hero, wrote and directed a short situational play “The Gorgeous Transformation of a Communications Soldier”, and invited Liu Pei to the “Soldiers’ Military Academy” to tell his own growth story, guiding everyone to learn from the role models around them and strive to be the pioneers of a strong army...

From closed classroom education to open field education, from passive acceptance of education to active participation, from one-way indoctrination to two-way interactive communication, the regiment gathered the wisdom of officers and men, innovated methods and methods, and promoted gratifying changes in ideological and political education.

“The more it meets the soldiers’ expectations, the more they like it; the closer it is to the soldiers, the easier it is for them to accept it. Facts show that only by being good at giving full play to the subjective initiative of the soldiers can ideological and political education move their hearts, touch their souls, and resonate with them.” Feng Hao, a cadre of the regiment’s political work department, said that on the basis of summarizing experience, they also combined the annual task arrangement, and took advantage of opportunities such as carrying out tasks, recruits joining companies, and competitions to guide the soldiers to actively carry out mass self-education, handing the microphone to the soldiers, allowing them to truly “play the leading role” and promote each other through mutual inspiration.

The regiment also collected “golden ideas” from soldiers in combination with the stage education tasks, organized “instructor seminars”, created “reading exchange meetings” and other interactive platforms, and carried out “learning from role models and taking action” practical activities to

further create a strong atmosphere of “everyone participating in education and everyone receiving education”.

Recently, the regiment organized soldiers to visit the Duku Highway Museum for on-site learning. They guided the soldiers to appreciate the fine traditions and inherit the spirit of their predecessors in their personal participation in the form of guest comments, host interviews, and time and space dialogues. “In future training, I will carry forward the fighting spirit of not fearing hardship and death like the revolutionary predecessors, and strive to become a professional elite soldier with strong skills and outstanding skills as soon as possible.” Private Qi Kunyu said after leaving the museum.

“Ideological and political education is ultimately about being a human being. We have also found in practice that some educators have a one-sided understanding of mass self-education, excessively give up the leading power of education, and think that they can leave the classroom to officers and men, causing the classroom to deviate from the theme and main theme.” The leader of the regiment said that in the next step, while sorting out experience and forming norms, they will strengthen educational guidance and demonstration guidance for education backbones at all levels, on the one hand, protect the enthusiasm of officers and men to participate in education, and on the other hand, provide timely and necessary guidance for education, ensuring that people are persuaded, influenced, and shaped with high-quality content, scientific methods, and flexible methods.

军营观察丨在开门练兵中攥指成拳

来源：中国军网-解放军报 作者：张光轩 责任编辑：尚晓敏 发布：2025-03-20

陆军营级指挥所迎来空军”联络员”

■解放军报特约记者 张光轩

塞外初春，演训在即。第 78 集团军某旅地面引导员杨文民抬手看表，距离空地合练约定时间还剩不到 3 分钟。

数十里外，该旅某营指挥所内，各个席位上坐着来自不同军兵种的官兵，其中就有空军”联络员”。他们正对来自空、地、网、电等多种渠道的信息情报进行分析、研判。轻点发送键，信息流转，形成的建议迅速传送至上级指挥所。

演训活动开始后，已完成”空地链接”的杨文民所在引导小组迅速向空军、陆航等多架战机发送数据。

随后，在空中火力打击下，”敌”多个目标被精准摧毁。地面战车抓住战机快速出击，一举消灭残余之”敌”。

“形成空地合力，既要配合默契，又要及时沟通。”杨文民记忆犹新，过去的一次实战化训练中，空军战机遭遇复杂气象条件，不得不紧急应对，致使到达预定坐标时间有所延迟。因为情况特殊，没能及时完成空地沟通，地面力量按原定时间发起行动，结果不尽如人意。

“战场情况瞬息万变，响应时间越短，胜算就越大。”该旅党委一班人对此分析后认为，”要实现快速响应，必须让空地沟通更加通畅。”该旅与空军某部协商，引入战术空中控制组。空军派来”联络员”，帮助该旅培养能实现彼此高效沟通的”内行”。

之后的一次空地合练中，地面分队侦察发现”敌”增援力量，迅速将情报共享至空中力量。随之，空军战机规划好航线，按照地面引导员所指示方位快速到达，多方合力摧毁了目标。

在此期间，空军”联络员”的作用凸显出来。”航弹横向误差边界与地面分队相距较远，地面分队可提升机动速度缩减到达目标地域时间……”空军某部魏参谋依据战机回传的空中态势图，及时提出意见建议。魏参谋的表现以及合练所取得的效果，也使在场官兵看到了这个席位的重要性。

此后，杨文民发现，所在营”中军帐”内有了更多新变化，来自其他军兵种单位的新面孔也逐渐出现。

“来自不同军兵种的作战思维、理念不断碰撞、交融，让我很受启发。”夜幕降临，一天的训练结束，杨文民在日记中写道，”这是一个你醒得太慢就会被淘汰的时代。”

在开门练兵中攥指成拳

——第 78 集团军某旅深化体系练兵的一段经历

■解放军报特约记者 张光轩

第 78 集团军某旅携手陆航部队进行协同训练。丁柏淞摄

一个指头再硬也抵不过拳头的力量，体系练兵首先要练体系思维

初春，乍暖还寒，第 78 集团军某旅作训科曹科长的内心却一片”火热”。

“既要珍惜综合性训练机会，也要注重常态化开展小规模合成训练”“推进更大范围内的岗位互换、一人多岗训练，促进骨干对必要的各军兵种知识技能的了解”……该旅作战室内，

曹科长与来自空军和陆航、特战等多个军兵种单位的战友”云”端围坐，通过指挥专网视频连线就如何开展体系练兵集思广益。

“重要的不只是可以从这种交流中找到管用的方法，更重要的是，大家体系练兵的思维已经形成。”曹科长坦言，”与几年前相比，这是一个很大的跨越。”

作为成建制、成体系完成由传统步兵向合成步兵转型的营级单位，该旅某营官兵在一次惨痛教训后，认识到了体系练兵的重要性。

那是该营新组建后参加的第一次联合训练，凭借新装备的性能优势，该营迅速向”敌”固守要地发起攻击。然而，进攻过程中，该营忽视了与军兵种部队的协同，导致进攻队形脱节，钻进增援之”敌”的圈套……

复盘讲评时，营指挥员态度诚恳：”与传统步兵营相比，合成营所包括的兵种更多、岗位类别更多，作战更强调协同。紧急情况下，我们忽视了这种新变化、新要求，是导致战损增加的最主要原因。”

以此为鉴，一场头脑风暴在全旅掀起。”如果不了解其他军兵种的作战特点，上了战场难免各唱各调”“今后，与其他军兵种的联合行动会越来越多，要实现多火力协同，在更高层次上攥指成拳是大势所趋”……讨论中，该旅党委一班人的思路也越来越清晰：一个指头再硬也抵不过拳头的力量，体系练兵首先要练体系思维。

为了将新体制带来的新变化转化为实实在在的战斗力，该旅在上级支持下，借助承担空地火力协同相关任务，邀请空军部队和陆航、特战、电抗等力量携手训练，用扎扎实实的行动帮助官兵培塑体系练兵的理念。任务中，该旅官兵与各军兵种战友捆在一起训、绑在一起练，攥指成拳渐入佳境。

不久之后，又一场演训活动展开。在空地火力支援下，一营指挥员迅速组织地面突击群发起攻击，各分队协同作战，很快控制了目标地域。

“陆航力量处理传递情报可以再快一些”“电抗、工兵等配属力量没充分发挥出作用”……硝烟散去，各军兵种官兵围坐在一起，针对协同配合方面存在的问题进行复盘。随着一个个问题浮出水面，该旅”开门练、练体系”的组训格局有了下一步的目标。

只有多联手、多磨合，才能找到训练中的谐振点，精准破解协同中的难点、堵点

前不久，一场地面引导空中火力打击训练进入关键阶段。

苍穹之下，空军战机利用”敌”雷达盲区，进行低空突防，然后在该旅官兵引导配合下，精准命中”敌”防御工事。

走下训练场，参训官兵由衷感慨：”这次与空军的合练，在家门口就展开了，方便高效。”

“以往的联合训练，大多是借助专项任务、实兵演习等时机展开。”该旅领导告诉记者，”现在有了常态化训练协作机制，像引导空中火力打击这类训练课目，训练频次明显增加。”

新变化的发生，源于之前的一次演训活动。那次，该旅某营担负引导空军战机进行打击的任务，尽管他们早早发现目标，却因信息链路受到干扰，没能及时将作战信息发送给空中战机。

“作战信息发送不及时，表面上看是技术原因，实际上是因为双方合练不够经常和深入，因而应变方法不多。”这次”险情”，引起该旅党委一班人的深思，”生成联合作战能力同样有一个从量变到质变的过程，只有多联手、多磨合，才能找到训练中的谐振点，精准破解协同中的难点、堵点。从这个角度来看，有了’通讯录’很重要，保持常联系、常交往更重要。”

认知层面的提升，带来行动的转变。该旅开始举一反三，携手其他军兵种部队，共同建立常态化训练协作机制。

——通过面对面协商和线上会议等形式，定期召开联席会议，协调统一时间轴线，确保训练落到实处。

——与各军兵种单位精准对接训练需求，科学制订训练计划，并在此基础上不断研讨改进作战流程。

——坚持问题导向，瞄准短板聚力攻关，形成了一套行之有效的空地火力协同战法，有效缩短了”找到问题—弥补短板—检验成效—形成战法”的时间周期。

“高频次的携手训练，为破解体系练兵过程中的难点、堵点问题提供了条件。”谈起近年来训练协作机制带来的变化，该旅火力科常科长兴奋之情溢于言表。

他告诉记者，这几年，为补齐空地协同中的短板，旅里与其他军兵种部队一道，将理论探索和试训实践、装备挖潜与运用创新、研究性演练与实战化检验相结合，解决了空地协同指控编组、协同规则等方面的一连串问题。

谈到对体系练兵的感受，常科长打了一个形象的比喻：”体系练兵就像一支乐队排练，不同军兵种相当于这支乐队中使用不同乐器的乐手，只有经常排练、用心合练，才会熟能生巧、配合默契，演奏出美妙的乐曲。”

体系作战一环扣一环，任何一个环节有瑕疵，都有可能影响到整体作战效能

听着上级发来的”敌情”通报信息，面对渐渐飞近的”敌机”，该旅某营雷达班班长王钰辉镇定自若，没有急着发出开启雷达指令。

“开启雷达如同’点穴’，必须选择最合适的时机。”王钰辉指着三号手操作的器材解释说，”为避免暴露防空阵地位置和我方的作战意图，我们先尽力发挥其他侦测装备的作用。然后，在最合适的时机开启雷达锁定目标。”

“这种战法，是近年来在与空军、陆航部队进行对抗训练过程中摸索出来的。”王钰辉说，”通过对所发现问题的会诊与破解，如今，在体系练兵中的每次’受挫’都可能成为战斗力生成的新增长点。”

对王钰辉的这一观点，某营曾营长深表赞同：”和每次联合训练中总结出的经验相比，获得的教训同样宝贵。只有珍视这些教训并举一反三，才能在破解难题中实现战斗力新的跃升。即使是一些细节上的改变，也可能产生明显成效。”

一次实战化训练中，曾营长指挥地面分队协同空军火力，左右夹击打出”满堂彩”。

训练结束，他们没有庆祝，而是一头扎进”中军帐”展开复盘。虽然通过前期训练，他们与空军战友实现了较好协同，但这次训练中，他们也发现了一个问题，那就是由于陆空力量多年来军语习惯有差异，导致沟通过程出现了两次”卡顿”。

“体系作战一环扣一环，任何一个环节有瑕疵，都有可能影响到整体作战效能。”该旅领导迅速组织力量补齐短板。曾营长等训练骨干被遴选出来，与空军人员共同成立研究小组，一起协商，最终规范形成一套新的简令，使空地”合唱”更加顺畅、响亮。

“体系练兵既要以我为主敢于作为，又要胸怀全局融入体系。”曾营长告诉记者，”如今，这一理念已在该旅官兵脑海里生根发芽。”

随后一段时间，曾营长带着官兵趁热打铁，通过参与行动推演、演训复盘、研战研训等途径，不断拓展训练内容，优化战法训法，与友邻部队的协同效率进一步提升。

曾营长和战友的攻关历程，是该旅党委推动体系练兵走深走实的一个缩影。

近年来，该旅先后与空军、海军等不同军种的多家单位开展协作区训练，从”积木组合”到”有机融合”，探索创新多项训法战法。

“当前，武器装备飞速发展，作战要素更加丰富多样，作战力量更加多元。”该旅领导告诉记者，这就意味着加强体系练兵没有终止符，只有始终紧盯未来作战前沿，不断拓展体系练兵方式方法，才能向体系融合要战斗力，不断提升体系练兵质效。

Military Camp Observation | Clenching Fists in Open-Door Training

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Guangxuan Editor: Shang Xiaomin Release: 2025-03-20

The Army Battalion Command Post Welcomes the Air Force "Liaison Officer"

■People's Liberation Army Daily Special Correspondent Zhang Guangxuan

In early spring outside the Great Wall, the exercise is imminent. Yang Wenmin, a ground guide of a brigade of the 78th Group Army, raised his hand to look at the watch. There were less than 3 minutes left before the agreed time for the air-ground joint exercise.

Dozens of miles away, in the command post of a battalion of the brigade, officers and men from different military services were sitting in various seats, including the Air Force "liaison officer". They are analyzing and judging information intelligence from multiple channels such as air, ground, network, and electricity. Tap the send button, the information flows, and the suggestions formed are quickly transmitted to the superior command post.

After the exercise and training activities began, Yang Wenmin's guidance team, which had completed the "air-ground link", quickly sent data to multiple fighters such as the Air Force and Army Aviation.

Subsequently, under the air fire attack, multiple "enemy" targets were accurately destroyed. The ground vehicles seized the opportunity to attack quickly and wiped out the remaining "enemies" in one fell swoop.

"To form an air-ground joint force, we need to cooperate tacitly and communicate in time." Yang Wenmin still remembers that in a past actual combat training, the air force fighter encountered complex weather conditions and had to respond urgently, resulting in a delay in reaching the predetermined coordinates. Due to the special situation, the air-ground communication could not be completed in time, and the ground forces launched the action at the original time, but the result was not satisfactory.

"The battlefield situation changes rapidly, and the shorter the response time, the greater the chance of winning." After analyzing this, a group of people from the brigade's party committee believed that "to achieve rapid response, air-ground communication must be smoother." The brigade negotiated with a certain air force unit to introduce a tactical air control group. The air force sent a "liaison officer" to help the brigade cultivate "experts" who can achieve efficient communication with each other.

In a subsequent air-ground joint exercise, the ground unit discovered the "enemy" reinforcement force through reconnaissance and quickly shared the intelligence with the air force. Subsequently, the air force fighter planned the route and quickly arrived at the direction indicated by the ground guide, and destroyed the target with multiple forces.

During this period, the role of the Air Force "liaison officer" was highlighted. "The lateral error boundary of the bomb is far away from the ground unit, and the ground unit can increase the maneuvering speed and reduce the time to reach the target area..." Wei, a staff officer of a certain Air Force unit, made timely suggestions based on the air situation map sent back by the fighter.

Wei's performance and the results achieved by the joint training also made the officers and men present see the importance of this seat.

After that, Yang Wenmin found that there were more new changes in the "central army tent" of his camp, and new faces from other military units gradually appeared.

"I am very inspired by the constant collision and integration of combat thinking and concepts from different military units." As night fell and a day of training ended, Yang Wenmin wrote in his diary, "This is an era where you will be eliminated if you wake up too slowly."

Clenching fingers into fists in open-door training

——An experience of a brigade of the 78th Group Army deepening system training

■ PLA Daily special correspondent Zhang Guangxuan

A brigade of the 78th Group Army conducted coordinated training with the Army Aviation Force. Photo by Ding Baisong

No matter how hard a finger is, it cannot resist the power of a fist. Systematic training must first train systemic thinking

In early spring, it was still cold, but Chief Cao of the Operations and Training Section of a brigade of the 78th Group Army was "hot" in his heart.

"We should cherish the opportunity of comprehensive training, and also pay attention to the regular small-scale combined-arms training" "Promote job exchange and multi-job training in a larger range, and promote the backbones' understanding of the necessary knowledge and skills of various military services"... In the brigade's operations room, Chief Cao sat with his comrades from the Air Force, Army Aviation, Special Operations and other military services in the "cloud" terminal, and brainstormed on how to carry out systemic training through the command network video connection.

"It is not only important to find effective methods from this kind of communication, but more importantly, everyone's thinking of systemic training has been formed." Chief Cao said frankly, "Compared with a few years ago, this is a big leap."

As a battalion-level unit that has completed the transformation from traditional infantry to combined-arms infantry in an organized and systematic manner, the officers and men of a battalion of the brigade realized the importance of systemic training after a painful lesson.

That was the first joint training the battalion participated in after it was newly formed. With the performance advantages of the new equipment, the battalion quickly launched an attack on the "enemy" entrenched stronghold. However, during the attack, the battalion neglected the coordination with the military services, resulting in a disconnected offensive formation and falling into the trap of the "enemy" reinforcements...

During the review, the battalion commander was sincere: “Compared with traditional infantry battalions, combined-arms battalions include more arms and more job categories, and operations emphasize coordination more. In an emergency, we ignored this new change and new requirements, which is the main reason for the increase in combat losses.”

Taking this as a lesson, a brainstorming session was launched throughout the brigade. “If you don’t understand the combat characteristics of other military services, it is inevitable that you will sing your own tune on the battlefield.” “In the future, there will be more and more joint operations with other military services. To achieve multi-firepower coordination, it is a general trend to clench your fingers into a fist at a higher level.”... During the discussion, the ideas of the brigade’s party committee became clearer and clearer: no matter how hard a finger is, it cannot resist the power of a fist. System training must first train system thinking.

In order to transform the new changes brought about by the new system into real combat effectiveness, the brigade, with the support of its superiors, invited the Air Force and Army Aviation, special operations, and reactor forces to train together by undertaking tasks related to air-to-ground firepower coordination, and used solid actions to help officers and men cultivate the concept of system training. During the mission, the officers and men of the brigade trained and trained together with their comrades from various services and arms, and their fingers became fists and gradually got better.

Soon after, another training activity was launched. With the support of air-to-ground firepower, the commander of the first battalion quickly organized the ground assault group to launch an attack, and the various teams cooperated and quickly controlled the target area.

“The Army Aviation Force can process and transmit intelligence faster”, “The reactor, engineers and other attached forces have not fully played their role”... After the smoke dissipated, officers and men from various services and arms sat together to review the problems in coordination and cooperation. As problems surfaced one by one, the brigade’s training pattern of “open training and system training” had the next goal.

Only by working together and running in more can we find the resonance point in training and accurately solve the difficulties and bottlenecks in coordination.

Not long ago, a ground-guided air fire strike training entered a critical stage.

Under the sky, the air force fighters used the “enemy” radar blind spot to conduct low-altitude penetration, and then accurately hit the “enemy” fortifications under the guidance and cooperation of the brigade’s officers and men.

Walking off the training ground, the participating officers and men sincerely sighed: “This joint training with the Air Force was carried out at home, which is convenient and efficient.”

“Previous joint training was mostly carried out with the help of special tasks, live-fire exercises and other opportunities.” The brigade leader told reporters, “Now there is a normalized training

cooperation mechanism, and the frequency of training courses such as guiding air fire strikes has increased significantly."

The new changes occurred due to a previous training activity. On that occasion, a battalion of the brigade was responsible for guiding the air force fighters to strike. Although they found the target early, they failed to send combat information to the air fighters in time due to interference in the information link.

"The untimely sending of combat information is apparently due to technical reasons, but in fact it is because the joint training between the two sides is not frequent and in-depth enough, so there are not many ways to respond." This "dangerous situation" caused the brigade's party committee to think deeply. "The generation of joint combat capabilities also has a process from quantitative change to qualitative change. Only by more cooperation and more running-in can we find the resonance point in training and accurately solve the difficulties and bottlenecks in coordination. From this perspective, it is very important to have a "contact book", and it is more important to keep in touch and communicate frequently."

The improvement of the cognitive level brings about a change in action. The brigade began to draw inferences from one instance and work with other military services to jointly establish a normalized training cooperation mechanism.

- Through face-to-face consultations and online meetings, regular joint meetings are held to coordinate and unify the time axis to ensure that the training is implemented.

- Accurately match the training needs of various military services, scientifically formulate training plans, and continuously discuss and improve the combat process on this basis.

——Adhere to the problem-oriented approach, focus on the shortcomings and work hard to form a set of effective air-ground firepower coordination tactics, which effectively shortens the time cycle of "finding problems-making up for shortcomings-testing results-forming tactics".

"High-frequency joint training provides conditions for solving the difficulties and bottlenecks in the system training process." Talking about the changes brought about by the training cooperation mechanism in recent years, the excitement of the brigade's firepower section chief Chang was beyond words.

He told reporters that in recent years, in order to make up for the shortcomings in air-ground coordination, the brigade, together with other military services, has combined theoretical exploration and trial training practice, equipment potential tapping and application innovation, research exercises and actual combat tests, and solved a series of problems in air-ground coordination command formation, coordination rules, etc.

Talking about his feelings about system training, Chief Chang made a vivid metaphor: "System training is like a band rehearsal. Different military branches are equivalent to musicians playing

different instruments in the band. Only by rehearsing frequently and practicing together can we become proficient, cooperate tacitly, and play beautiful music."

System operations are linked one by one. Any flaw in any link may affect the overall combat effectiveness.

Listening to the "enemy situation" notification information sent by the superiors, facing the gradually approaching "enemy planes", Wang Yuhui, the radar squad leader of a battalion of the brigade, remained calm and did not rush to issue a command to turn on the radar.

"Turning on the radar is like 'pressing acupuncture points', and we must choose the most appropriate time." Wang Yuhui pointed to the equipment operated by the No. 3 operator and explained, "To avoid exposing the location of the air defense position and our combat intentions, we first try our best to play the role of other detection equipment. Then, turn on the radar to lock the target at the most appropriate time." "This tactic was explored in the process of confrontation training with the Air Force and Army Aviation in recent years." Wang Yuhui said, "Through the consultation and solution of the problems found, now every 'frustration' in system training may become a new growth point for combat effectiveness." Battalion Commander Zeng of a certain battalion deeply agreed with Wang Yuhui's point of view: "Compared with the experience summarized in each joint training, the lessons learned are equally valuable. Only by cherishing these lessons and drawing inferences from one example can we achieve a new leap in combat effectiveness in solving difficult problems. Even some changes in details may produce obvious results." In a combat training, Battalion Commander Zeng commanded the ground detachment to coordinate with the firepower of the Air Force, and the left and right pincer attack was a "full house applause". After the training, they did not celebrate, but plunged into the "central military tent" to review. Although they achieved good coordination with their air force comrades through previous training, they also found a problem during this training, that is, due to the differences in military language habits between the land and air forces over the years, the communication process was "stuck" twice.

"System operations are linked together, and any flaw in any link may affect the overall combat effectiveness." The brigade leaders quickly organized forces to make up for the shortcomings. Training backbones such as Battalion Commander Zeng were selected to form a research group with air force personnel, and negotiate together to finally standardize a new set of briefs to make the air-ground "chorus" smoother and louder.

"System training should be based on our own courage to act, and we should also integrate into the system with the overall situation in mind." Battalion Commander Zeng told reporters, "Now, this concept has taken root in the minds of the officers and men of the brigade."

For a period of time afterwards, Battalion Commander Zeng led the officers and men to strike while the iron was hot, and through participating in action simulations, training and exercise reviews, and research and training, he continuously expanded the training content, optimized the

tactics and training methods, and further improved the coordination efficiency with friendly neighboring forces.

The research process of Captain Zeng and his comrades is a microcosm of the brigade party committee's efforts to promote the in-depth and practical training of the system.

In recent years, the brigade has successively carried out cooperation area training with many units of different services such as the Air Force and the Navy, exploring and innovating a number of training methods and tactics from "building block combination" to "organic integration".

"At present, weapons and equipment are developing rapidly, combat elements are more diverse, and combat forces are more diversified." The brigade leader told reporters that this means that there is no end to strengthening system training. Only by keeping a close eye on the future combat frontier and constantly expanding the methods and means of system training can we demand combat effectiveness from system integration and continuously improve the quality and effectiveness of system training.

军营观察丨在开门练兵中攥指成拳

来源：中国军网-解放军报 作者：张光轩 责任编辑：尚晓敏 发布：2025-03-20

推动体系练兵向纵深挺进

■单明辉

习主席强调，立足复杂困难条件加强全要素、成体系、实案化训练，加大同其他军兵种部队协同训练力度，推进战训深度耦合。

仗要联合打，兵要体系练。近年来，体系练兵理念与实践正在改变着训练场上的传统模式。这一过程中，只有冷静地对体系练兵进行深刻思考与持续创新，才能推动体系练兵向纵深挺进。

强调聚力融合。面向未来战场，新的作战要素不断涌现。深化体系练兵，必须积极将这些新作战要素融入体系。很重要的一点，是推动思维转型，引导官兵跳出传统思维窠臼，从单一军兵种思维向体系思维转变，形成"在体系中定位，靠体系谋胜"的行动自觉。同时注重探索构建开放式体系训练架构，突出架构接入能力，确保新的作战要素顺畅高效纳入体系，在与传统作战要素的联手中使效能倍增。不仅如此，还需聚焦指挥决策、火力协同、情报处理等关键环节，通过相互协商和统一格式消除各军兵种之间的协作壁垒，确保侦察、指控、打击等链路相互贯通，在军兵种高效互联互通中，加速作战能力的体系化生成。

坚持常态化淬炼。只有平时练体系，战时才能打体系。诸军兵种的融合也是如此，只有平时就放在一起磨合、捆在一起训练，战时才能真正联成一体，充分发挥体系效能。这就要

求探索建立常态化联合值班、联合演训等机制，将体系练兵变为日常标准化操作，确保各作战单元在机制保障下形成合力。充分发挥考核评估的”指挥棒”作用，突出对链路贯通、协同程度等关键指标的考评检验，及时固强补弱，不断浓厚体系练兵的氛围。

做到常抓不懈。兵无常势，水无常形，尤其是当前不断涌现的颠覆性技术、新型武器及新作战理念，带来的变量更多。这种情况下，制胜机理、作战模式必然会随之而变，体系作战注定会处于动态变化之中。只有紧盯科技之变、战争之变、对手之变对体系练兵、体系作战进行不断思考、探索、创新，才能及时发现和破解练兵备战中的深层次矛盾。这就要求常态化开展体系作战问题研究，盯着新融入的作战要素琢磨新打法，盯着体系练兵中暴露出的短板弱项探索新办法，盯着当前使命任务、强敌对手研究新招法，并用所取得成果及时”反哺”体系练兵，真正提高对作战体系的贡献率，为打赢夯实能力根基。

Military Camp Observation | Clenching Fists in Open-Door Training

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Guangxuan Editor: Shang Xiaomin Release: 2025-03-20

Promoting System Training to Advance in Depth

■ Shan Minghui

President Xi Jinping emphasized that we should strengthen all-factor, systematic, and case-based training based on complex and difficult conditions, increase the intensity of coordinated training with other military services, and promote the deep coupling of combat and training.

Wars must be fought jointly, and soldiers must be trained systematically. In recent years, the concept and practice of system training are changing the traditional model on the training ground. In this process, only by calmly thinking deeply and continuously innovating system training can we promote system training to advance in depth.

Emphasize convergence and integration. Facing the future battlefield, new combat elements are constantly emerging. To deepen system training, we must actively integrate these new combat elements into the system. A very important point is to promote the transformation of thinking, guide officers and men to break out of the traditional thinking rut, and change from the thinking of a single military service to the thinking of the system, so as to form the action consciousness of “positioning in the system and relying on the system to win”. At the same time, we should focus on exploring the construction of an open system training framework, highlight the access capability of the framework, ensure that new combat elements are smoothly and efficiently incorporated into the system, and double the effectiveness in cooperation with traditional combat elements. Not only that, we should also focus on key links such as command decision-making, firepower coordination, and intelligence processing, eliminate the barriers to cooperation between the various military services through mutual consultation and unified formats, ensure that the links

such as reconnaissance, command and control, and strike are interconnected, and accelerate the systematic generation of combat capabilities in the efficient interconnection of the military services.

Adhere to normal tempering. Only by training the system in peacetime can we fight the system in wartime. The same is true for the integration of various military services. Only by putting them together for running-in and training together in peacetime can we truly become one in wartime and give full play to the effectiveness of the system. This requires exploring the establishment of mechanisms such as normalized joint duty and joint exercises, turning system training into daily standardized operations, and ensuring that various combat units form a joint force under the guarantee of the mechanism. Give full play to the "baton" role of assessment and evaluation, highlight the assessment and inspection of key indicators such as link penetration and coordination, timely strengthen strengths and make up for weaknesses, and continuously enhance the atmosphere of system training.

Do it constantly. Soldiers have no constant situation, and water has no constant shape, especially the disruptive technologies, new weapons and new combat concepts that are constantly emerging, which bring more variables. In this case, the winning mechanism and combat mode will inevitably change accordingly, and system combat is destined to be in dynamic change. Only by keeping a close eye on the changes in science and technology, changes in war, and changes in opponents, and constantly thinking, exploring, and innovating system training and system combat, can we timely discover and solve the deep-seated contradictions in training and preparation. This requires regular research on system combat issues, focusing on new combat elements to ponder new ways of playing, focusing on the shortcomings and weaknesses exposed in system training to explore new methods, focusing on current missions and tasks, strong enemies and opponents to study new tactics, and using the results achieved to "feed back" system training in a timely manner, truly improving the contribution rate to the combat system, and consolidating the foundation of capabilities for winning.

空军地导某营：学英雄事迹，锤炼实战胆气

来源：中国军网-解放军报 作者：陈菲莹 郭子桢 责任编辑：王一亘

2025-03-20

学英雄事迹 练英雄胆气

■陈菲莹 郭子桢

"与我的战友比起来，我不算英雄，真正的英雄都没能回来！"

3 月上旬，空军地导某营迎来一位特殊的客人——在革命年代荣立一等战功的老英雄连伙顺。讲台上，老英雄动情讲述，将在场官兵的思绪拉回到那个战火纷飞、硝烟弥漫的年代。

“一次，我们执行穿插任务，需要穿过一片无遮蔽的稻田，占领一处高地。当时敌人火力封锁严密，第一波突击中就有几名战友中弹牺牲。来不及悲伤，我们只能咬着牙继续冲锋，誓要为他们报仇……”聆听战斗故事，有的官兵红了眼眶。

“山因脊梁而雄，国因英雄而安，走得再远，也不能忘记来时的路。”一位营领导介绍，该营是空军首批跨代换装某新型地空导弹武器系统的部队，先辈们转战多地，历经百余次任务考验，建立了赫赫战功。一次重大演习，该营实弹打靶 6 发 6 中，荣立集体一等功。

为增强官兵对我军优良传统和战斗精神的情感认同，他们结合新兵入营、军衔晋升等时机，邀请老兵回营分享战斗故事，积极开展荣誉教育，让官兵在重温部队光荣历史中赓续胜战基因、扛起使命担当。

几十分钟转瞬即逝，动人心魄的事迹让官兵们心潮起伏、意犹未尽。大家纷纷举手发言，与前辈交流。

“我们眼里只有任务，只知道拼了命也要完成任务！”老英雄掷地有声的话语里，充满了对胜利的渴望，”当时所有同志都负了伤，我自己也头部中弹，至今还有一颗黄豆大小的弹片没有取出来。40 多年了，我常常梦见牺牲的战友们，所有的荣誉应该都是他们的。”轻抚胸前的军功章，老人眼中噙着泪花，令官兵动容。

学英雄事迹，练英雄胆气。交流讨论中，一级上士张帅坡与大家分享了自己备战某型武器实弹射击比武的经历。备赛时，为了提高无光条件下射击精准度，他主动加练，数十公斤的瞄准具一扛就是一个多小时，肩上肿起一大片，手上的水泡愈合又磨破，每天训练结束，体能训练服都像被水泡过。

功夫不负有心人。比武中，张帅坡精准命中目标，成功夺冠。”我不怕苦，只想打赢。”谈起那段经历，张帅坡语气坚定。

“这才是好样的！”老英雄夸赞之余，告诉大家：”战场上很多都是下意识的本能反应，平时把本领练强了，战胜对手的把握就大。”

“当’一等功营’的兵，就要奔着一等功去！我们要传承发扬先辈战斗精神，用真本事、硬功夫担起强军重任！”活动结束前，二级军士长赵帅代表”一等功营”传人向老英雄许下承诺。

饱含真情才能触动人心，贴近实际才能春风化雨。该营领导介绍，近年来，他们注重挖掘单位的红色资源和官兵身边的感人故事，鼓励大家走上讲台，用兵言兵语讲述官兵的奋斗与光荣，进一步激发练兵备战的热情动力。

高擎荣誉战旗，续写先辈荣光。强军征程上，该营官兵出色完成多项重大任务，被空军表彰为”先进基层党组织”，先后 3 次荣立集体三等功，涌现出一大批先进典型。

A Battalion of the Air Force Surface-to-Air Missile: Learn from Heroic Deeds and Temper the Courage of Actual Combat

Source: China Military Network-Liberation Army Daily Author: Chen Feiying Guo Zizhen Editor: Wang Yigen

2025-03-20

Learn from heroic deeds and practice heroic courage

■Chen Feiying Guo Zizhen

“Compared with my comrades, I am not a hero. The real heroes have not come back!”

In early March, a battalion of the Air Force Surface-to-Air Missile welcomed a special guest-the old hero Lian Huoshun who won first-class military merits in the revolutionary era. On the podium, the old hero spoke emotionally, pulling the thoughts of the officers and men present back to the era of war and smoke.

“Once, we performed an infiltration mission and needed to cross an uncovered rice field and occupy a high ground. At that time, the enemy’s firepower blockade was tight, and several comrades were shot and killed in the first wave of assault. There was no time to grieve, we could only grit our teeth and continue to charge, vowing to avenge them...” Listening to the battle story, some officers and men had red eyes.

“The mountains are majestic because of their backbones, and the country is safe because of its heroes. No matter how far we go, we must not forget the way we came.” A battalion leader introduced that the battalion is the first batch of troops in the Air Force to replace a new type of surface-to-air missile weapon system across generations. The predecessors fought in many places, experienced more than a hundred mission tests, and established illustrious military exploits. In a major exercise, the battalion hit 6 out of 6 live-fire targets and won the first-class collective merit.

In order to enhance the emotional identification of officers and men with the fine traditions and fighting spirit of our army, they combined the opportunities of recruits entering the camp and promotion of military ranks to invite veterans to return to the camp to share battle stories, actively carry out honor education, and let officers and men continue the victory gene and shoulder the mission in reviewing the glorious history of the army.

A few dozen minutes passed in a flash, and the touching deeds made the officers and men feel ups and downs and unsatisfied. Everyone raised their hands to speak and communicate with their predecessors.

“We only have the mission in our eyes, and we only know to complete the mission at the risk of our lives!” The old hero’s resounding words are full of desire for victory. “At that time, all

comrades were injured, and I was shot in the head. There is still a soybean-sized shrapnel that has not been removed. For more than 40 years, I often dream of my comrades who died. All the honors should belong to them." The old man stroked the military medal on his chest with tears in his eyes, which moved the officers and men.

Learn heroic deeds and practice heroic courage. During the exchange and discussion, Sergeant Zhang Shuaipo shared with everyone his experience of preparing for a live-fire shooting competition of a certain type of weapon. When preparing for the competition, in order to improve the accuracy of shooting under dark conditions, he took the initiative to practice more. He carried a sight weighing dozens of kilograms for more than an hour. A large area of swelling appeared on his shoulder, and the blisters on his hands healed and broke. At the end of each day's training, his physical training clothes looked like they had been blistered.

Hard work pays off. In the competition, Zhang Shuaipo accurately hit the target and successfully won the championship. "I'm not afraid of hardship, I just want to win." Talking about that experience, Zhang Shuaipo's tone was firm.

"That's great!" The old hero praised and told everyone: "Many things on the battlefield are subconscious instinctive reactions. If you practice your skills well in peacetime, you will have a greater chance of defeating your opponent."

"When you are a soldier of the 'First-Class Merit Battalion', you must strive for first-class merit! We must inherit and carry forward the fighting spirit of our predecessors, and take on the heavy responsibility of strengthening the army with real skills and hard work!" Before the end of the event, Second Sergeant Zhao Shuai made a promise to the old hero on behalf of the descendants of the "First-Class Merit Battalion".

Only with true feelings can you touch people's hearts, and only by being close to reality can you be like a spring breeze. The leaders of the battalion introduced that in recent years, they have focused on tapping the red resources of the unit and the touching stories around the officers and men, encouraging everyone to go to the podium and use soldiers' words to tell the struggle and glory of the officers and men, and further stimulate the enthusiasm and motivation for training and preparation.

Hold high the flag of honor and continue the glory of the predecessors. On the journey to build a strong military, the officers and men of the battalion have successfully completed many important tasks and were commended by the Air Force as an "advanced grassroots party organization". They have been awarded the third-class collective merit three times and a large number of advanced models have emerged.

陆军某旅某装甲步兵连转型路上勇冲锋

来源：解放军报 作者：杨茂生 张文哲 韩帅 责任编辑：尚晓敏 2025-03-21

陆军某旅某装甲步兵连转型路上勇冲锋——

“新连史从我们书写”

■杨茂生 张文哲 解放军报特约通讯员 韩 帅

步战车发射烟幕弹。 刘 帅摄

初春时节，乍暖还寒。陆军某旅野外训练场上，随着指挥员一声令下，某装甲步兵连官兵向”敌”阵地发起冲击，连续撕开”敌”多道防线。

任务圆满完成，官兵击掌相庆。目睹此景，该连张指导员不由得想起几年前那张”合成营对抗演练战损率 56%”的训练通报，内心百感交集。

部队编制体制调整改革中，该连由 3 个不同兵种单位抽调人员组建而成。连队调整组建之初，既没有显赫战史，也缺乏专业人才，首次参加合成营对抗演练就因协同不畅导致”战损”过半。

“必须为连队建设注入’催化剂’，加速实现转型重塑！”笔者翻开连队连务会记录本发现，连队成立不久后的一次集体讨论格外激烈。会后，时任指导员杨宇在笔记本上写下一句话：”新连史从我们书写。”

“3 个单位重组，不是简单的’1+1+1’，而是要把三根线拧成一股绳！”连队党支部研究决定：支委带头打破建制班排界限，从凝心聚力开始扎扎实实打基础、搞建设、谋转型。连队在全体官兵中广泛开展”装甲兵魂”大讨论，结合新的使命任务，梳理形成”铁心向党、铁甲攻坚、铁血担当”新连魂，开始了转型路上的新冲锋。

转型，意味着过往的经验、技能甚至荣誉全部”清零”。一级上士侯晓远熟练掌握多种工程机械操作技能，在原单位是响当当的”金牌教头”。转岗新专业后，面对复杂的装甲车仪表盘，他一时不知从何下手。一次协同训练，侯晓远误触了灭火装置按钮，瞬间喷出的干粉把车组成员变成了”雪人”。

这场意外，深深刺痛了侯晓远的心。从那以后，连队学习室的灯总是亮到深夜，官兵下哨时，总能看到侯晓远伏案学习专业理论知识的身影。为强化记忆效果，实装操作训练时，侯晓远用胶布把按键功能说明贴在手套内侧，方便随时查看。

功夫不负有心人。短短 3 个月，侯晓远不仅熟练掌握了新装备操作技能，还革新研制出一套可快速拆卸的”车载破障装置”，在集团军演训场上大显身手。载誉归来，他在连史簿上写道：”过去是’工兵尖刀’，现在要做’装甲铁拳’！”

走进连队专修室，墙上悬挂的一幅”转型路线图”引人注目：蓝色曲线标注着连队从摩托化向机械化、信息化、智能化转变的轨迹，红色箭头直指”智能化先锋连”目标。连队干部告诉笔者，这张”转型路线图”的背后，是一场全员参与的”换脑革命”。

2022年，连队列装某新型数字化装备。欣喜之余，官兵也面临”甜蜜的烦恼”：连队既无教材也无教员，开展训练只能从零起步。

面对困难，二级上士腾世军带领技术攻关小组，把厂家配发的技术手册内容拆解成上百个知识点，制作出三维交互课件，大幅提高了教学效果；区分火力、机动、防护三大模块，创新”模块化编组、迭代式升级”训练法，在训练中摸索出”新老搭配练、昼夜滚动训、短板专项补”的组训模式，大大缩短了新装备形成战斗力的时间。技术攻关小组探索总结的经验，在全旅推广。

“转型需要敢打敢拼的冲劲，也需要刀刃向内的勇气。”指着训练场电子显示屏上的”龙虎榜”，该连叶连长告诉笔者，每次组织训练，这块电子显示屏上会实时更新各车组训练数据，排名靠后的车组和个人会被自动标注。

列兵赵志强刚下连时曾连续 3 周被标注，憋着一股劲想要打个翻身仗。班长张广远结合自身经验，探索出一套”实操视频+实装操作”组合训练法。在张广远的帮带下，赵志强的训练成绩突飞猛进，去年参加全旅装甲专业比武，夺得第三名的好成绩。谈及这段经历，赵志强感慨地说：”每一次标注都在提醒我们——落后并不可怕，畏缩不前才可耻。”

深夜，连队学习室内依然灯火通明。中士朱寅威正与技术革新小组的战友一起，调试优化他们自主研发的”装甲作战效能评估系统”。在近期组织的一场训练中，这套系统显著提升了连队火力打击效能。叶连长告诉笔者，这群平均年龄 24 岁的官兵，已先后攻克山地复杂环境下战车机动、复杂电磁环境组网通信等多个重难点课题。

“能打胜仗，才能书写辉煌的连史！”张指导员告诉笔者，连队调整组建以来，实现了一个个历史性突破：首次新弹种实弹射击，首发命中率 100%；首次参加跨区机动演习，奔袭上千公里零故障；首次参加集团军装甲专业比武，取得两个单项第一……

在上级最近组织的一场对抗训练中，连队担负穿插突击任务。面对”敌”预设雷场和电磁压制，炮长李阳灵活采取新战术，在剧烈颠簸中实现行进间精准射击。复盘结果显示，该连摧毁目标数在参训连队中领先。

走进该连训练场，官兵正对新列装的无人侦察车进行编组测试。抚摸着战车车身，叶连长信心满满地说：”我们将继续拼搏奋斗，向着锻造能征善战的’智能化先锋连’目标奋力冲锋！”

短 评

答好转型考卷

■张 愈

国防和军队改革过程中，一个个新调整组建连队应运而生。无论是白手起家全新组建，还是在原有单位基础上调整优化，”转型”都是第一要务。面对全新的使命任务，每一个新调整组建连队都要经历”浴火重生”的转型重塑，在”破茧成蝶”中蜕变成长。

部队转型重塑，没有固定的模式，更没有现成的答案。只有瞄准打赢主动作为、结合实际创新求进，才能锻造出敢打硬仗、能打胜仗的精兵劲旅。陆军某旅某装甲步兵连调整组建后，结合全新使命任务，梳理形成”铁心向党、铁甲攻坚、铁血担当”新连魂，从凝心聚力开始扎扎实实打基础、搞建设、谋转型，促进部队战斗力提升，在奋勇冲锋中书写崭新连史。

转型重塑，武器装备的升级、编制体制的调整只是基础，理念的更新、思维的升级才是关键。答好转型考卷，既要有打破常规的眼光和勇气，更需保持久久为功的定力和韧劲。每一个新调整组建连队，都要敢于打破旧观念、勇于走出舒适区，在苦练精训中推动能力”突围”，在奋勇冲锋中实现理念”突围”。唯有如此，才能在强军征程上不断书写新辉煌。

An Armored Infantry Company of a Certain Army Brigade Bravely Charged on the Road of Transformation

Source: PLA Daily Author: Yang Maosheng Zhang Wenzhe Han Shuai Editor: Shang Xiaomin 2025-03-21

An armored infantry company of a certain army brigade bravely charged on the road of transformation——

“The new company history is written by us”

■ Yang Maosheng Zhang Wenzhe PLA Daily Special Correspondent Han Shuai

Infantry fighting vehicle fired smoke bombs. Photo by Liu Shuai

In early spring, it was still cold. At the field training ground of a certain army brigade, with the commander's order, the officers and men of an armored infantry company launched an attack on the "enemy" position and continuously tore through the "enemy" multiple lines of defense.

The mission was successfully completed, and the officers and men clapped their hands to celebrate. Witnessing this scene, the company Political Instructor Zhang couldn't help but think of the training notice of "56% loss rate of combined-arms battalion confrontation exercise" a few years ago, and his heart was filled with mixed feelings.

In the adjustment and reform of the army's organizational system, the company was formed by personnel drawn from three different arms units. At the beginning of the company's adjustment and establishment, it had neither a glorious war history nor professional talents. In its first participation in the combined battalion confrontation exercise, it suffered more than half of its losses due to poor coordination.

"It is necessary to inject a 'catalyst' into the company's construction and accelerate the transformation and reshaping!" The author opened the company's company meeting record book and found that a collective discussion shortly after the company was established was particularly intense. After the meeting, the then instructor Yang Yu wrote a sentence in his notebook: "The new company history starts with us."

"The reorganization of the three units is not a simple '1+1+1', but to twist the three lines into a rope!" The company's party branch studied and decided: the branch committee will take the lead in breaking the boundaries of the established squads and platoons, and start to lay a solid foundation, build and seek transformation from the beginning of gathering hearts and minds. The company has widely carried out a large-scale discussion on the "armored soldier soul" among all officers and men, combined with the new mission and tasks, sorted out and formed a new company soul of "loyal to the party, iron armor attack, and iron blood responsibility", and started a new charge on the road of transformation.

Transformation means that all past experience, skills and even honors are "cleared". First Sergeant Hou Xiaoyuan is proficient in a variety of engineering machinery operation skills and was a well-known "gold medal coach" in his original unit. After transferring to a new profession, he didn't know where to start when faced with the complex dashboard of an armored vehicle. During a collaborative training, Hou Xiaoyuan accidentally touched the button of the fire extinguishing device, and the dry powder sprayed out instantly turned the crew members into "snowmen". This accident deeply hurt Hou Xiaoyuan's heart. Since then, the lights in the company's study room have always been on until late at night, and when officers and men are off duty, they can always see Hou Xiaoyuan studying professional theoretical knowledge at his desk. In order to enhance the memory effect, during the actual operation training, Hou Xiaoyuan used tape to stick the button function instructions on the inside of the gloves for easy viewing at any time. Hard work pays off. In just 3 months, Hou Xiaoyuan not only mastered the operation skills of new equipment, but also innovated and developed a set of "vehicle-mounted obstacle-clearing devices" that can be quickly

disassembled, showing his skills on the group army training ground. After returning with honor, he wrote in the company history book: “In the past, we were the ‘engineer’s sharp knife’, and now we have to be the ‘armored iron fist’!”

Walking into the company’s special training room, a “transformation roadmap” hanging on the wall is eye-catching: the blue curve marks the trajectory of the company’s transformation from motorization to mechanization, informatization, and intelligence, and the red arrow points directly to the goal of “intelligent pioneer company”. The company cadres told the author that behind this “transformation roadmap” is a “brain-changing revolution” in which all members participate.

In 2022, the company will be equipped with a new type of digital equipment. In addition to the joy, the officers and men also face “sweet troubles”: the company has neither teaching materials nor instructors, and training can only start from scratch.

Faced with difficulties, Sergeant Teng Shijun led the technical research team to disassemble the contents of the technical manuals distributed by the manufacturer into hundreds of knowledge points, and produced three-dimensional interactive courseware, which greatly improved the teaching effect; distinguished the three modules of firepower, mobility, and protection, and innovated the “modular grouping, iterative upgrade” training method. In the training, he explored the training mode of “new and old combination training, day and night rolling training, and special supplement for shortcomings”, which greatly shortened the time for new equipment to form combat effectiveness. The experience explored and summarized by the technical research team was promoted throughout the brigade.

“Transformation requires the courage to fight and the courage to turn the blade inward.” Pointing to the “Dragon and Tiger List” on the electronic display screen of the training ground, the company commander Ye told the author that every time training is organized, the training data of each vehicle group will be updated in real time on this electronic display screen, and the vehicles and individuals ranked at the bottom will be automatically marked.

Private Zhao Zhiqiang was marked for three consecutive weeks when he first joined the company, and he was holding back his energy to fight a comeback. Squad leader Zhang Guangyuan combined his own experience to explore a set of “practical video + actual operation” combined training methods. With the help of Zhang Guangyuan, Zhao Zhiqiang’s training results have improved by leaps and bounds. Last year, he participated in the armored professional competition of the whole brigade and won the third place. Talking about this experience, Zhao Zhiqiang said with emotion: “Every time we are marked, we are reminded that falling behind is not terrible, but it is shameful to shrink back.”

Late at night, the lights in the company’s study room are still bright. Sergeant Zhu Yinwei is debugging and optimizing their independently developed “Armored Combat Effectiveness Evaluation System” with his comrades in the technical innovation team. In a recent training, this system significantly improved the company’s firepower strike effectiveness. Company

Commander Ye told the author that this group of officers and men with an average age of 24 have successively overcome many difficult and key topics such as tank mobility in complex mountain environments and networking and communication in complex electromagnetic environments.

“Only by winning battles can we write a glorious company history!” Instructor Zhang told the author that since the company was adjusted and established, it has achieved historic breakthroughs: the first live-fire shooting with a new type of ammunition, with a 100% first-shot hit rate; the first cross-regional mobile exercise, running thousands of kilometers without failure; the first participation in the group army armored professional competition, and won the first place in two individual items...

In a confrontation training recently organized by the superior, the company was responsible for the interspersed assault mission. Faced with the “enemy” preset minefield and electromagnetic suppression, the gunner Li Yang flexibly adopted new tactics to achieve accurate shooting on the move in the severe turbulence. The replay results show that the company leads the participating companies in the number of targets destroyed.

Walking into the company’s training ground, officers and men are conducting group tests on the newly equipped unmanned reconnaissance vehicles. Caressing the body of the tank, Captain Ye said confidently: “We will continue to work hard and strive to forge a ‘smart vanguard company’ that is capable of fighting!”

■Zhang Yu

In the process of national defense and military reform, new adjusted and established companies have emerged. Whether it is a new establishment from scratch or an adjustment and optimization based on the original unit, “transformation” is the top priority. Faced with new missions and tasks, each newly adjusted and established company must undergo a transformation and reshaping of “rebirth from the ashes” and grow in “breaking the cocoon and becoming a butterfly”.

There is no fixed model for the transformation and reshaping of the troops, and there is no ready-made answer. Only by aiming at winning the initiative and combining actual innovation and progress can we forge elite troops that dare to fight hard battles and win battles. After the adjustment and establishment of an armored infantry company of a certain brigade of the Army, combined with the new mission and tasks, a new company spirit of “loyalty to the Party, iron armor and iron blood” was formed. Starting from the concentration of hearts and minds, a solid foundation was laid, construction was carried out, and transformation was sought to promote the combat effectiveness of the troops, and a new company history was written in the brave charge.

Transformation and reshaping, the upgrading of weapons and equipment and the adjustment of the establishment system are only the basis, and the renewal of concepts and the upgrading of thinking are the key. To answer the transformation test paper well, we must have the vision and courage to break the routine, and we must maintain the determination and tenacity to work hard for a long time. Every newly adjusted and established company must dare to break the old ideas and dare to

step out of the comfort zone, promote the “breakthrough” of capabilities in hard training, and realize the “breakthrough” of concepts in the brave charge. Only in this way can we continue to write new glory on the journey of strengthening the army.

陆军某旅组织实弹射击训练 练强装甲分队火力协同打击能力

来源：解放军报 作者：刘波 魏龙 责任编辑：孙悦 2025-03-22

陆军某旅组织实弹射击训练

模块化编组 动态化配属

解放军报讯 刘波、魏龙报道：”前方发现’敌’装甲目标，立即实施火力打击！”随着指挥员一声令下，战车引擎轰鸣，向预定地域疾驰而去……仲春时节，陆军某旅组织装甲分队展开实弹射击训练。

“我们采用模块化编组、动态化配属的形式，检验装甲分队复杂地形下火力协同效能。”该旅领导介绍，与以往单兵单装训练不同，此次训练，他们将坦克与步战车组成战术群组，模拟真实战场环境临机导调特情，根据任务属性配置作战模块，全面锤炼官兵快速反应与临机应变能力。

“3 号高地侧翼出现移动靶群”“某地反斜面有暗堡工事”……导调组接连下达多个特情，指挥员迅速研判情况，将作战模块拆分为正面佯攻分队与侧翼突击集群。

坦克分队依托地形建立临时射击阵地，展开正面佯攻；步战车组抓住时机发射烟幕弹，随后变换队形迂回至”敌”侧翼。随着一声令下，坦克火炮与并列机枪同时开火，形成密集火力网，瞬间覆盖目标区域。

该旅领导表示，下一步，他们将利用雨雾天气、夜暗条件等不同环境展开专攻精练，着力练强复杂条件下装甲分队火力协同打击能力。

A Certain Army Brigade Organized Live-Fire Shooting Training to Strengthen the Firepower Coordination Strike Capability of the Armored Unit

Source: PLA Daily Author: Liu Bo Wei Long Editor: Sun Yue 2025-03-22

A certain army brigade organized live-fire shooting training

Modular grouping and dynamic assignment

PLA Daily News Liu Bo and Wei Long reported: “When an ‘enemy’ armored target is found in front, firepower strikes will be carried out immediately!” With the commander’s order, the tank

engine roared and rushed to the designated area... In mid-spring, a certain army brigade organized an armored unit to carry out live-fire shooting training.

“We use modular grouping and dynamic assignment to test the firepower coordination effectiveness of the armored unit under complex terrain.” The brigade leader introduced that, unlike the previous single-soldier single-equipment training, this training will form a tactical group of tanks and infantry fighting vehicles, simulate the real battlefield environment, and configure combat modules according to the mission attributes to fully hone the officers and men’ rapid response and emergency response capabilities.

“A mobile target group appeared on the flank of Hill No. 3” and “There is a bunker fortification on the reverse slope of a certain place”... The command and dispatch group issued several special situations in succession. The commander quickly analyzed the situation and divided the combat module into a frontal feint attack team and a flank assault cluster.

The tank team established a temporary shooting position based on the terrain and launched a frontal feint attack; the infantry fighting vehicle team seized the opportunity to launch smoke bombs, and then changed the formation to bypass the “enemy” flank. With an order, the tank artillery and the parallel machine gun fired at the same time, forming a dense firepower network that instantly covered the target area.

The brigade leaders said that in the next step, they will use different environments such as rainy and foggy weather and dark conditions to carry out specialized training, and focus on strengthening the firepower coordination strike capability of the armored team under complex conditions.

陆军某旅聚焦实战组织战备拉动提升应急应战能力

来源：中国军网-解放军报 作者：毛英椿 责任编辑：孙悦

2025-03-24

陆军某旅

聚焦实战组织战备拉动

解放军报讯 毛英椿报道：凌晨时分，警铃骤响。初春时节，陆军某旅一场全员全装战备拉动训练展开，担负值班任务的某营官兵迅速穿戴装具、装载物资，乘车向指定地域机动。

“宁可千日无战，不可一日无备。”该旅领导介绍，此次训练不打招呼、临机导调，围绕紧急机动、建立通联、情况处置等课目展开专攻精练，检验官兵应急应战能力。

“前方遭遇小股’敌’袭扰！”机动途中，突遇特情。指挥员沉着冷静，指挥处突分队前出接”敌”、保障分队展开”伤员”救治与装备抢修……官兵密切配合，将”敌”分散包围并逐个”歼灭”。

“面对接踵而至的特情，官兵反应迅速、处置高效，顺利完成任务。这得益于精细化的战备值班制度。”该营营长介绍，近年来，他们根据人员与装备实际情况，整合编组力量、完善应急预案，组建多支应急分队，将任务内容、行动步骤精确到人，确保遇有突发情况能快速部署、有效应对。

训练结束，官兵围绕训练中暴露的问题展开复盘总结，完善应急预案。下一步，该旅将持续展开全要素拉动训练，进一步提升部队应急应战能力。

A Certain Army Brigade Focuses on Actual Combat and Organizes Combat Readiness Training to Improve Emergency Response Capabilities

Source: China Military Network-People’s Liberation Army Daily Author: Mao Yingchun Editor: Sun Yue

2025-03-24

A certain army brigade

Focus on actual combat and organize combat readiness training

People’s Liberation Army Daily News Mao Yingchun reported: In the early morning, the alarm bell rang suddenly. In early spring, a certain army brigade launched a full-staff combat readiness training. The officers and men of a certain battalion on duty quickly put on equipment, loaded supplies, and moved to the designated area by car.

“It is better to have no war for a thousand days than to be unprepared for a day.” The leader of the brigade introduced that this training was conducted without greeting and on-the-spot guidance. It focused on emergency maneuvers, establishing communications, and handling situations to carry out specialized training to test the emergency response capabilities of officers and men.

“A small group of ‘enemies’ attacked in front!” During the maneuver, a special situation was encountered. The commander was calm and composed, commanding the emergency response team to go forward to meet the “enemy”, and the support team to treat the “wounded” and repair equipment... The officers and men worked closely together to disperse and surround the “enemy” and “annihilate” them one by one.

“Faced with the special situations that came one after another, the officers and men responded quickly, handled them efficiently, and successfully completed the task. This is due to the refined combat readiness duty system.” The battalion commander introduced that in recent years, they

have integrated the organization forces, improved the emergency plan, and formed multiple emergency teams based on the actual situation of personnel and equipment, and accurately assigned the task content and action steps to people to ensure that they can be quickly deployed and effectively responded to emergencies.

At the end of the training, the officers and men reviewed and summarized the problems exposed in the training and improved the emergency plan. In the next step, the brigade will continue to carry out full-element pull training to further enhance the emergency response capabilities of the troops.

第八十二集团军某旅开展防空训练提升官兵应急应战能力

来源：解放军报 作者：邹逸凡 责任编辑：孙悦 2025-03-24

第八十二集团军某旅提升官兵应急应战能力——

一路机动 特情不断

■邹逸凡

近日，第 82 集团军某旅训练场上引擎轰鸣，数十辆战车向任务地域疾驰。途中，防空警报骤然响起，参训官兵迅即展开装备、构建指挥链路……一场实战背景下的防空训练拉开帷幕。

雷达飞旋，导弹起竖，各战位官兵严阵以待。

“遭’敌’强电磁干扰，目标信号消失！”面对突发特情，指挥员研判分析后迅速启动预案。

很快，一道道指令传到各战位。战车内，雷达技师判明干扰属性，变换搜索方式；阵地上，某班组架设光瞄设备，展开搜索跟踪……官兵密切配合，再次锁定”敌”机。

“只有像打仗一样训练，战时才能更有胜算。”该旅领导介绍，此前他们调研发现，有的官兵平时训练中单项课目过硬，考核成绩也不错，但遂行大项任务时易出现紧张心理，尤其面对突发情况时，往往手忙脚乱。为此，他们按照”多课目融合、多特情叠加”思路，将战术背景与特情处置贯穿训练全程，引导官兵在应对突发情况中主动谋对策、灵活用战法，提升应急应战能力。

“敌”无人机侦察，展开隐蔽伪装；道路”损毁”，调整机动路线；小股”敌”袭扰，灵活组织反击；指挥通信不畅，重构通信链路……一路机动，特情不断。官兵沉着冷静、随机应变，有效展开处置。

“战车发生故障，’敌’卫星即将过顶！”一波特情刚处置完毕，官兵又接到新的情况通报。

班长李瀚昌与战友当即对战车进行伪装。”敌”卫星过顶情况解除后，他们迅速检查故障车辆，并同步将车辆故障信息回传至指挥所。接到指挥所指令，维修技师携带备件迅速前出，抢修故障车辆。很快，故障被排除，战车引擎再次响起轰鸣声……

“机动途中，不能只考虑行军速度，还要注意观察周围环境”“隐蔽伪装时，应灵活利用地物地貌”……训练结束，该旅组织官兵展开复盘剖析，认真查摆不足、总结经验。

“此次训练不仅检验了官兵临机处置能力，而且为下步组织连贯课目训练积累了经验。”该旅领导说，他们将把总结的经验运用到训练实践中，优化特情导调方法，不断锤炼官兵遂行多样化任务能力。

A Brigade of the 82nd Group Army Conducts Air Defense Training to Improve the Emergency Response Capabilities of Officers and men

Source: PLA Daily Author: Zou Yifan Editor: Sun Yue 2025-03-24

A brigade of the 82nd Group Army improves the emergency response capabilities of officers and men——

Mobile all the way, special situations continue

■Zou Yifan

Recently, the engines of a brigade of the 82nd Group Army roared on the training ground, and dozens of tanks rushed to the mission area. On the way, the air defense alarm suddenly sounded, and the officers and men participating in the training quickly deployed their equipment and built a command link... An air defense training under the background of actual combat kicked off.

The radar was spinning, the missile was erected, and the officers and men at each position were ready.

“The target signal disappeared due to strong electromagnetic interference from the ‘enemy’!” Faced with sudden special situations, the commander quickly launched the plan after analysis and judgment.

Soon, a series of instructions were transmitted to each position. Inside the tank, the radar technician identified the interference attribute and changed the search method; on the position, a team set up optical aiming equipment and started searching and tracking... The officers and men worked closely together and locked the “enemy” aircraft again.

“Only by training like fighting can we have a better chance of winning in wartime.” The brigade leaders introduced that they had previously found in their research that some officers and men were good at single subjects in daily training and had good assessment results, but they were prone to nervousness when carrying out major tasks, especially when facing emergencies, they were

often in a hurry. To this end, they followed the idea of ”integration of multiple subjects and superposition of multiple special situations” and integrated tactical background and special situation handling throughout the training process, guiding officers and men to actively seek countermeasures and flexibly use tactics in response to emergencies, and improve their emergency response capabilities.

“Enemy” drone reconnaissance, concealed camouflage; road “damage”, adjustment of mobile routes; small “enemy” harassment, flexible organization of counterattacks; poor command communication, reconstruction of communication links... Mobile all the way, special situations continue. The officers and men were calm and adaptable, and effectively handled them.

“The tank has a malfunction, and the ‘enemy’ satellite is about to pass overhead!” Just after a wave of emergencies was dealt with, the officers and men received a new situation report.

Squad leader Li Hanchang and his comrades immediately camouflaged the tank. After the “enemy” satellite passed overhead, they quickly checked the faulty vehicle and simultaneously sent the vehicle fault information back to the command post. After receiving the command from the command post, the maintenance technicians quickly went forward with spare parts to repair the faulty vehicle. Soon, the fault was eliminated and the tank engine roared again...

“During the maneuver, you can’t just consider the marching speed, but also pay attention to the surrounding environment.” “When concealing and camouflaging, you should flexibly use the terrain and topography.”... After the training, the brigade organized officers and men to conduct a review and analysis, carefully identify deficiencies and summarize experience.

“This training not only tested the officers and men’ ability to deal with emergencies, but also accumulated experience for the next step of organizing continuous training.” The brigade leaders said that they will apply the summarized experience to training practice, optimize the special situation guidance method, and continuously hone the officers and men’ ability to carry out diversified tasks.

第 83 集团军某旅认真学习贯彻全国两会精神——

深学细悟，创新驱动促发展

■解放军报记者 李浩然 特约通讯员 童 康

火炮应急检查创新技术提高故障检测精准度，实弹射击自动评判系统有效提高作业效率……仲春时节，第 83 集团军某旅多项聚焦练兵备战的创新成果在全旅推广使用。这是他们认真学习贯彻全国两会精神，广泛开展”训法战法创新、器材技术革新、军事纪录刷新”活动的缩影。

“习主席在出席十四届全国人大三次会议解放军和武警部队代表团全体会议时强调，要抓住我国新质生产力蓬勃发展机遇，创新战斗力建设和运用模式，健全先进技术敏捷响应和快速转化机制，加快发展新质战斗力。”该旅领导告诉记者，全国两会闭幕后，他们迅速掀起学习贯彻会议精神热潮，采用”深学+践学”的方式，把创新作为扎实推动部队高质量发展的着力点，营造积极创新、主动作为的良好氛围。

创新动员会上，该旅修理技师赵洪波向官兵讲述自己从一名普通战士成长为”陆军工匠”的故事。入伍 17 年来，他刻苦钻研，研发出的装备车辆防漏电系统、电站保障智能控制系统等被运用到练兵一线，解决了训练中的一些难题。台下官兵听后深受鼓舞。

该旅党委按照”以点带面、辐射带动、全员覆盖”的工作思路，对照打赢标准，以任务为牵引，积极推进创新体系建设，充分发挥旅”科技创新工作站”、营”创新服务点”、连”攻关小组”、班 “基层创客”的作用，努力把官兵智慧集聚起来，打造破解练兵备战难题的”金钥匙”。

“习主席强调，要’走高质量、高效益、低成本、可持续发展路子，确保建设成果经得起历史和实战检验’。这要求我们贯彻实战实用、勤俭建军要求。”讨论中，该旅”科技创新工作站”成员林宏旭说。近年来，他对某项科研经费精打细算，以较低的成本投入取得多项技术突破。

随着学习贯彻全国两会精神不断深入，该旅官兵训练热情持续高涨，干事创业的氛围更加浓厚。下一步，他们将优化基层官兵破解创新难题、评判创新成效、转化创新成果链路，不断推动创新成果向战斗力转化。

A Brigade of the 83rd Group Army Earnestly Studied and Implemented the Spirit of the NPC Two Sessions, and Promoted Development Through Innovation

Source: China Military Network-People’s Liberation Army Daily Author: Li Haoran Tong Kang Editor: Sun Yue

2025-03-25

A brigade of the 83rd Group Army earnestly studied and implemented the spirit of the National Two Sessions——

Learn in depth and understand carefully, and promote development through innovation

■People's Liberation Army Daily reporter Li Haoran Special correspondent Tong Kang

Innovative technology for emergency inspection of artillery improves the accuracy of fault detection, and the automatic evaluation system for live-fire shooting effectively improves operational efficiency... In mid-spring, a number of innovative achievements of a brigade of the 83rd Group Army focusing on training and preparation for war were promoted and used throughout the brigade. This is a microcosm of their earnest study and implementation of the spirit of the National Two Sessions, and the extensive implementation of the activities of "innovation in training and tactics, equipment and technology, and military record-breaking".

"President Xi Jinping emphasized at the plenary meeting of the PLA and Armed Police Force delegation at the Third Session of the 14th National People's Congress that we must seize the opportunity of the vigorous development of my country's new quality productivity, innovate the combat effectiveness construction and application mode, improve the agile response and rapid transformation mechanism of advanced technology, and accelerate the development of new quality combat effectiveness." The brigade leader told reporters that after the closing of the two sessions of the National People's Congress, they quickly set off a wave of learning and implementing the spirit of the meeting, adopting the method of "deep learning + practical learning", taking innovation as the focus of solidly promoting the high-quality development of the troops, and creating a good atmosphere of positive innovation and active action.

At the innovation mobilization meeting, Zhao Hongbo, a repair technician of the brigade, told the officers and men about his story of growing from an ordinary soldier to an "army craftsman". In the 17 years since he joined the army, he has worked hard to study and develop equipment and vehicle leakage prevention systems, power station security intelligent control systems, etc., which have been used in the front line of training and solved some problems in training. The officers and men under the stage were deeply encouraged after listening.

The brigade's Party Committee follows the working idea of "leading by point, radiating and driving, and covering all personnel", compares with the winning standards, takes the task as the guide, actively promotes the construction of the innovation system, gives full play to the role of the brigade's "Science and Technology Innovation Work Station", the battalion's "Innovation Service Point", the company's "Key Research Group", and the squad's "Grassroots Maker", and strives to gather the wisdom of officers and men to create a "golden key" to solve the problems of training and preparation.

"President Xi emphasized that we must 'take the path of high-quality, high-efficiency, low-cost, and sustainable development to ensure that the construction results can stand the test of history and actual combat'. This requires us to implement the requirements of practical combat and frugal military construction." During the discussion, Lin Hongxu, a member of the brigade's "Science and Technology Innovation Work Station", said. In recent years, he has carefully calculated the funds for a certain scientific research project and achieved a number of technological breakthroughs at a relatively low cost.

With the deepening of the study and implementation of the spirit of the two sessions of the National People's Congress, the training enthusiasm of the brigade's officers and men continues to rise, and the atmosphere of doing things and starting businesses is even stronger. In the next step, they will optimize the grassroots officers and men to solve innovation problems, judge innovation results, and transform innovation results, and continuously promote the transformation of innovation results into combat effectiveness.

陆军某旅深化模拟训练，为打赢未来战争锻造铁拳尖刀

来源：中国军网-解放军报 作者：邓子阳 韩帅 责任编辑：孙悦

2025-03-25

陆军某旅

模拟训练丰富战术背景

解放军报讯 邓子阳、特约通讯员韩帅报道：日前，陆军某旅合成营模拟训练专修室内，官兵头戴 VR 设备，在虚拟战场展开对抗训练。

“两点钟方向发现反坦克工事。”侦察席位传来情报，炮长席位立即调出穿甲弹参数，虚拟弹道轨迹在空中划过，精准”摧毁”目标。指挥员紧盯电子沙盘，根据态势下达指令……虚拟空间内，一场多兵种协同的”云端砺兵”火热进行。

“模拟训练专修室让官兵在虚拟战场中锤炼实战本领。”该旅领导介绍，受场地等限制，传统训练模式难以满足高强度对抗需求。为此，他们建成多专业模拟训练专修室，通过仿真系统、兵棋推演和实时数据反馈，构建逼真战场环境。官兵可反复训练实装操作流程，通过系统生成的”训练曲线图”补差强能，缩短能力生成周期。

“目标超出射界，调整仰角实施打击！”训练场上，新射手小李依令射击，炮弹精准命中目标。”多亏了前期在模拟训练专修室的专攻精练，我才能熟练掌握专业技能。”他说。

该旅作训科科长介绍，下一步，他们将深化模拟训练系统应用，进一步丰富战术背景、拓展训练课目，推动科技练兵成果向体系作战能力转化，为打赢未来战争锻造铁拳尖刀。

A Certain Army Brigade Deepens Simulation Training to Forge an Iron Fist and a Sharp Knife to Win Future Wars

Source: China Military Network-People's Liberation Army Daily Author: Deng Ziyang Han Shuai Editor: Sun Yue

2025-03-25

A certain army brigade

Simulation training enriches tactical background

People's Liberation Army Daily News Deng Ziyang and special correspondent Han Shuai reported: Recently, in the simulation training room of a combined arms battalion of a certain army brigade, officers and men wore VR equipment and carried out confrontation training in a virtual battlefield.

"Anti-tank fortifications were found at two o'clock." The reconnaissance seat sent intelligence, and the gunner's seat immediately called up the parameters of the armor-piercing projectile. The virtual ballistic trajectory passed through the air and accurately "destroyed" the target. The commander stared at the electronic sand table and issued instructions according to the situation... In the virtual space, a multi-service coordinated "cloud training" was in full swing.

"The simulation training room allows officers and men to hone their actual combat skills in the virtual battlefield." The brigade leader introduced that due to limitations such as venues, traditional training models are difficult to meet the needs of high-intensity confrontation. To this end, they built a multi-professional simulation training room, and constructed a realistic battlefield environment through simulation systems, war games and real-time data feedback. Soldiers can repeatedly train the actual operation process, and make up for the gaps and strengthen their abilities through the "training curve chart" generated by the system, shortening the ability generation cycle.

"The target is beyond the firing range, adjust the elevation angle to strike!" On the training ground, the new shooter Xiao Li fired according to the order, and the shells hit the target accurately. "Thanks to the specialization and training in the simulation training room in the early stage, I can master professional skills proficiently." He said.

The head of the brigade's training department introduced that in the next step, they will deepen the application of the simulation training system, further enrich the tactical background, expand the training subjects, promote the transformation of scientific and technological training results into system combat capabilities, and forge iron fists and sharp knives to win future wars.

"降魔尖兵"向战行！陆军某旅防化分队组织实战化考核

来源：中国军网-解放军报 作者：崔获阳 李明旭 向 伟 责任编辑：孙悦 发布：2025-03-25

"降魔尖兵"向战行

——陆军某旅防化分队实战化考核掠影

■崔获阳 李明旭 向 伟 摄影报道

向任务地域机动。

“前方发现不明烟雾，疑似’敌’化学武器袭击！”近日，陆军某旅防化分队官兵全副武装，展开一场实战化考核。

指挥员下达指令后，侦察组官兵携带装备迅速出动，向”染毒”地域挺进。官兵动作娴熟、配合默契，很快完成”染毒”区域的边界标记和样品采集。

在”染毒”地域侦测取样。

考核地域环境复杂，设备器材运行受到一定影响。化验组官兵沉着应对，不断调整参数，成功检测出”毒剂”种类和浓度，为后续行动提供了关键数据支撑。随后，洗消组官兵快速调制洗消液，对”染毒”地域展开洗消作业。

一名”伤员”在”染毒”地域昏迷，立即实施救援；快速建立洗消点，确保人员安全撤离……考核中，导调组临机设置多种特情。面对高强度的任务，官兵们沉稳应对、灵活处置，圆满完成考核。

开展洗消作业。

判定风向。

旅领导介绍，此次考核紧贴实战，重点检验防化分队在复杂环境下的应急处置能力。考核结束后，官兵立即复盘总结，有针对性地制定改进措施，在专攻精练中提升胜战本领。

“Demon-Slaying Pioneers” March to the Battle! A Chemical Defense Unit of a Certain Army Brigade Organizes a Practical Assessment

Source: China Military Network-People’s Liberation Army Daily Author: Cui Huoyang Li Mingxu Xiang Wei Editor: Sun Yue Release: 2025-03-25

“Demon-slaying pioneers” march to the battle

——A glimpse of the practical assessment of a chemical defense unit of a certain army brigade

■Cui Huoyang Li Mingxu Xiang Wei Photo report

Move to the mission area.

“Unknown smoke was found ahead, suspected to be an ‘enemy’ chemical weapons attack!” Recently, the officers and men of a chemical defense unit of a certain army brigade were fully armed and launched a practical assessment.

After the commander issued the order, the officers and men of the reconnaissance team quickly moved out with their equipment and advanced to the “contaminated” area. The officers and men were skilled in their movements and cooperated tacitly, and quickly completed the boundary marking and sample collection of the “contaminated” area.

Detection and sampling in the “contaminated” area.

The environment of the assessment area is complex, and the operation of equipment and equipment is affected to a certain extent. The officers and men of the laboratory team responded calmly, constantly adjusted the parameters, and successfully detected the type and concentration of the “toxic agent”, providing key data support for subsequent actions. Afterwards, the officers and men of the decontamination team quickly prepared the decontamination solution and carried out decontamination operations in the “contaminated” area.

A “wounded person” was unconscious in the “contaminated” area, and rescue was immediately carried out; a decontamination point was quickly established to ensure the safe evacuation of personnel... During the assessment, the command group set up a variety of special situations on the spot. Faced with high-intensity tasks, the officers and men responded calmly and handled them flexibly, and successfully completed the assessment.

Carry out decontamination operations.

Determine the wind direction.

The brigade leaders introduced that this assessment is closely related to actual combat, focusing on testing the emergency response capabilities of the chemical defense team in complex environments. After the assessment, the officers and men immediately reviewed and summarized, formulated targeted improvement measures, and improved their ability to win battles in specialized training.

西部战区陆军某旅紧跟时代特点提升思想政治教育质效——”多维课堂”激发强军动力

来源：解放军报 作者：靳钰龙 孙晨 张磊峰 责任编辑：孙悦 2025-03-25

开栏的话

掌握思想领导是掌握一切领导的基础。思想政治教育是军队政治工作的重要内容，是团结动员官兵投身强军实践、履行新时代军队使命任务的中心环节。

当前，各部队深入学习贯彻中央军委政治工作会议精神，坚持不懈用习近平新时代中国特色社会主义思想凝心铸魂，突出学好习近平强军思想，紧贴强军事业发展和备战打仗实际，紧贴官兵价值观念培塑和成长成才需要，持续更新教育理念、优化教育内容、改进教育方式，着力推动新时代思想政治教育体系落地，凝聚打好实现建军一百年奋斗目标攻坚战的意志力量。即日起，解放军报推出”推动新时代思想政治教育体系落地”专栏，集中反映部队抓好抓实主题教育、基础教育、经常性思想教育的生动实践和经验做法。

西部战区陆军某旅紧跟时代特点提升思想政治教育质效——

“多维课堂”激发强军动力

■靳钰龙 孙 晨 解放军报记者 张磊峰

春寒料峭，西部战区陆军某旅某连干部郭昊心里却暖乎乎的。他没想到，自己讲授的一堂教育课，不仅激发了连队官兵的练兵热情，还入选旅精品课教育资源池，点赞量持续”霸榜”，在全旅引起较好反响。

前段时间，旅里组织”砺剑杯”群众性岗位练兵比武，连队官兵训练压力较大。经过认真思考，郭昊决定借鉴旅里提供的”多维课堂”模板课，发挥红色教育资源作用，通过情景再现、时空对话等形式，引导官兵弘扬先辈精神，直面困难挑战，开展好练兵备战。

阳光透过树枝的缝隙洒在身上，让人倍感温暖。官兵聚集在军史长廊，认真听郭昊讲授的题为《传承》的教育课。

郭昊首先为大家播放了一部短片：70 多年前，渡江战役打响。面对敌人猛烈的炮火，该旅前身部队华东野战军第二纵队山炮团炮一班班长王秉让沉着冷静，带领战友利用缴获的一门没有瞄准镜的山炮，击沉敌舰 1 艘、摧毁敌江岸地堡 3 个，为夺取胜利作出突出贡献。战后，炮一班被上级授予”长江英雄班”荣誉称号并荣立集体一等功，王秉让被授予”华东三级人民英雄”荣誉称号。

“当年，先辈们打胜仗靠的是什么？今天，我们向先辈们学什么？”短片结束，郭昊向官兵抛出两个问题，组织大家展开讨论。

“先辈们能打胜仗，离不开听党指挥的坚定信仰、顽强的战斗精神和过硬的军事技能”“我们向先辈学习，就要刻苦训练”……随着讨论的深入，课堂的气氛更加热烈。

讨论结束，郭昊组织官兵来到王秉让半身雕像前，举起右拳庄严宣誓：”牢记使命，苦练精兵，用优异成绩向老英雄报告……”铿锵有力的誓言，久久回荡在军史长廊。

“只有推动新时代思想政治教育体系落地，才能为推进强军事业提供坚强思想政治保证。”该旅领导告诉记者，随着时代发展，官兵思维模式、行为方式、接受习惯等发生了很大变化，我们必须紧贴时代、紧贴实践、紧贴官兵创新教育方式方法。他们深入学习贯彻中央军委政治工作会议精神，综合运用情景教育、云端视听、互动体验等形式打造”多维课堂”，增强思想政治教育的时代性和感召力。

——打造模板。遴选优秀政治教员、理论骨干成立攻关小组，结合上级要求、部队实际和官兵关注重点，拟定教育主题，设计课堂环节，打造 10 余堂模板课，供各营连政治教员借鉴和二次创新。

——升级硬件。为基层单位配发”电子信息视窗”，升级改造教育课堂设施，为政治教员打造”多维课堂”提供硬件支持。

——发动官兵。不仅通过组织讨论等活动，激发官兵参与教育的积极性，还邀请利用休假等时机前往红色场馆、高新产业园、乡村振兴示范园等地参观的官兵，与战友视频连线，直播参观过程，讲述参观感悟，增强教育的感染力。

——共享好课。依托强军网设置精品课教育资源池，将各营连推荐的优质教育课纳入资源池，供全旅官兵观看学习。

“‘多维课堂’不仅形式生动活泼，而且内容引人入胜，让人明白很多道理。”在该旅某修理连，列兵赵生龙给记者讲起一堂令他难忘的教育课。

赵生龙入伍之初，因不适应部队高强度的训练，而放松了自我要求。一次，连队组织题为”拼搏奋斗、争创一流”的教育课，连队干部蔡亮视频连线正在某园区参观的休假战士李晨。李晨给战友直播园区人员忙碌工作的情景后说：”幸福是奋斗出来的。无论在部队还是在地方工作，要想干好都需要付出汗水。”赵生龙听后深受触动。后来，在连队干部骨干的帮带下，他严格要求自己，训练主动自我加码，成绩明显提升。

“多维课堂”激发强军动力。该旅领导告诉记者，他们紧跟时代特点创新教育方法，有效提升了教育质效，坚定了官兵听党指挥、奋斗强军的信念。不久前，该旅组织阶段性训练考核，官兵攻坚克难、奋勇争先，优良率较以往明显提升。

A Certain Brigade of the Western Theater Command Army Closely Follows the Characteristics of the Times to Improve the Quality and Effectiveness of Ideological and Political Education-”Multi-Dimensional Classroom” Stimulates the Motivation for Strengthening the Army

Source: PLA Daily Author: Jin Yulong Sun Chen Zhang Leifeng Editor: Sun Yue 2025-03-25

Opening remarks

Mastering ideological leadership is the basis for mastering all leadership. Ideological and political education is an important part of the military’s political work, and it is the central link for uniting and mobilizing officers and men to participate in the practice of strengthening the army and fulfilling the mission and tasks of the army in the new era.

At present, all units are deeply studying and implementing the spirit of the Central Military Commission’s Political Work Conference, and unremittingly using Xi Jinping’s New Era Socialist Thought to unite the heart and soul, highlighting the learning of Xi Jinping’s Thought on Strengthening the Army, keeping close to the development of the cause of strengthening the army and the actual preparation for war, keeping close to the value concept of officers and men and the need to grow and become talents, continuously updating educational concepts, optimizing educational content, and improving educational methods, and striving to promote the implementation of the ideological and political education system in the new era, and to gather the willpower to fight a tough battle to achieve the goal of building the army for 100 years. Starting today, the PLA Daily will launch a column titled “Promoting the Implementation of the Ideological and Political Education System in the New Era”, which will focus on reflecting the vivid practices and experiences of the troops in carrying out thematic education, basic education, and regular ideological education.

A brigade of the Western Theater Command Army closely follows the characteristics of the times to improve the quality and effectiveness of ideological and political education--"Multi-dimensional Classroom" stimulates the power of strengthening the army

■ Jin Yulong, Sun Chen, PLA Daily reporter Zhang Leifeng

It was chilly in spring, but Guo Hao, a cadre of a company of a brigade of the Western Theater Command Army, felt warm in his heart. He did not expect that the education class he taught would not only inspire the training enthusiasm of the company's officers and men, but also be selected into the brigade's excellent course education resource pool, and the number of likes continued to "dominate the list", causing a good response throughout the brigade.

Some time ago, the brigade organized the "Lijian Cup" mass post training competition, and the company's officers and men were under great training pressure. After careful consideration, Guo Hao decided to learn from the "multi-dimensional classroom" template class provided by the brigade, give full play to the role of red education resources, and guide officers and men to carry forward the spirit of their predecessors through scene re-enactment, time and space dialogue and other forms, face difficulties and challenges, and carry out training and preparation.

The sun shines through the gaps between the branches, making people feel warm. The officers and men gathered in the military history corridor and listened carefully to the educational class titled "Inheritance" taught by Guo Hao.

Guo Hao first played a short film for everyone: More than 70 years ago, the Battle of Crossing the Yangtze River began. Facing the enemy's fierce artillery fire, Wang Bingrang, the squad leader of the first artillery squad of the Second Column of the East China Field Army, the predecessor of the brigade, was calm and led his comrades to use a captured mountain artillery without a scope to sink an enemy ship and destroy three enemy riverside bunkers, making outstanding contributions to victory. After the war, the first artillery squad was awarded the honorary title of "Yangtze River Hero Squad" by the superiors and won the first-class collective merit, and Wang Bingrang was awarded the honorary title of "Third-level People's Hero of East China".

"What did our ancestors rely on to win the battle back then? Today, what do we learn from our ancestors?" At the end of the short film, Guo Hao asked two questions to the officers and men and organized everyone to discuss.

"The victory of our predecessors was inseparable from their firm belief in following the Party's command, their tenacious fighting spirit and excellent military skills." "We must train hard to learn from our predecessors." As the discussion deepened, the atmosphere in the classroom became more enthusiastic.

At the end of the discussion, Guo Hao organized the officers and men to come to the bust of Wang Bingrang and raised their right fists to solemnly swear: "Keep in mind the mission, train hard, and

report to the old hero with excellent results...” The sonorous oath echoed in the military history corridor for a long time.

“Only by promoting the implementation of the ideological and political education system in the new era can we provide a strong ideological and political guarantee for promoting the cause of strengthening the army.” The leaders of the brigade told reporters that with the development of the times, the thinking patterns, behavior patterns, and acceptance habits of officers and men have changed greatly. We must keep up with the times, keep up with practice, and keep up with the officers and men to innovate education methods. They thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference, and comprehensively used situational education, cloud audio-visual, interactive experience and other forms to create a “multi-dimensional classroom” to enhance the timeliness and appeal of ideological and political education.

- Create a template. Select outstanding political instructors and theoretical backbones to form a research group. Combined with the requirements of superiors, the actual situation of the troops and the focus of officers and men, formulate education themes, design classroom links, and create more than 10 template classes for reference and secondary innovation of political instructors in various battalions and companies.

-- Upgrade hardware. Distribute “electronic information windows” to grassroots units, upgrade and transform educational classroom facilities, and provide hardware support for political instructors to create “multi-dimensional classrooms”.

-- Mobilize officers and men. Not only through organizing discussions and other activities to stimulate the enthusiasm of officers and men to participate in education, but also invite officers and men who take advantage of vacations and other opportunities to visit red venues, high-tech industrial parks, rural revitalization demonstration parks and other places to video-link with comrades, live-stream the visit process, and tell about the visit experience to enhance the appeal of education.

-- Share good courses. Relying on the strong army network to set up a high-quality course education resource pool, the high-quality education courses recommended by each battalion and company are included in the resource pool for officers and men of the whole brigade to watch and learn.

“‘Multi-dimensional classroom’ is not only lively in form, but also fascinating in content, which makes people understand many truths.” In a repair company of the brigade, Private Zhao Shenglong told reporters about an unforgettable education class.

When Zhao Shenglong first joined the army, he relaxed his self-requirements because he was not adapted to the high-intensity training of the troops. Once, the company organized an education class entitled “Strive for Struggle and Strive for First-Class”. The company cadre Cai Liang video-linked Li Chen, a soldier on vacation who was visiting a park. After Li Chen broadcast the scene of the busy work of the park staff to his comrades, he said: “Happiness comes from struggle.

Whether working in the army or in the local area, you need to sweat to do a good job." Zhao Shenglong was deeply touched after hearing this. Later, with the help of the company's cadres and backbones, he strictly required himself, took the initiative to increase his training, and his performance improved significantly.

"Multi-dimensional classroom" inspires the power of strengthening the army. The leaders of the brigade told reporters that they kept up with the characteristics of the times and innovated education methods, effectively improved the quality and effectiveness of education, and strengthened the officers and men' belief in obeying the party's command and striving to strengthen the army. Not long ago, the brigade organized a phased training assessment, during which officers and men overcame difficulties, fought bravely and strived to be the best, and the rate of excellence was significantly improved compared with the past.

第 74 集团军某旅课目融合练战术协同

来源：中国军网-解放军报 作者：张百阳 李润杰 责任编辑：刘上靖

2025-03-26

解放军报讯 张百阳、特约通讯员李润杰报道：春日某训练场，战车轰鸣，第 74 集团军某旅一场战术协同训练火热展开。

"迅速抢占前方有利地形！"战车抵达预定位置，官兵快速下车组成战斗队形，隐蔽接近目标。无人机操作手随即操控无人机升空侦察，确定"敌"火力点和防御部署。指挥员根据侦察信息及时调整火力配置，下令对目标展开射击。

该旅领导介绍，此次训练以山地进攻战斗为背景，着重检验班排指挥员指挥能力与各分队协同作战水平。

"前方发现雷场，道路封锁""一辆战车遭'敌'炮火袭击，人员'受伤'，车辆'受损'"……激战正酣，特情接踵而至。指挥员立即研判战场态势，灵活调整战术：战车组实施烟幕遮障，破障组开辟通路，火力组交替掩护，医疗救护组和装备抢修组择机抢救抢修。各小组闻令而动，协同摧毁"敌"火力点，成功突破"敌"前沿防御阵地。

训练结束，官兵随即展开复盘，细致梳理训练中暴露的问题，逐一研究改进措施。据了解，下一步，他们将继续加强战术协同与多课目融合训练，在实战实训中锤炼官兵战斗本领。

The 74th Group Army Brigade Integrates Subjects to Train Tactical Coordination

Source: China Military Network-People's Liberation Army Daily Author: Zhang Baiyang Li Runjie Editor: Liu Shangjing

2025-03-26

People's Liberation Army Daily News Zhang Baiyang and special correspondent Li Runjie reported: In a training ground in spring, tanks roared, and a tactical coordination training of a brigade of the 74th Group Army was launched.

"Quickly seize the favorable terrain ahead!" The tanks arrived at the designated location, and the officers and men quickly got off the car to form a combat formation and approached the target in secret. The drone operator then controlled the drone to take off for reconnaissance and determine the "enemy" firepower point and defense deployment. The commander adjusted the firepower configuration in time according to the reconnaissance information and ordered to fire at the target.

The brigade leader introduced that this training was based on the background of mountain offensive combat, focusing on testing the command ability of squad commanders and the level of coordinated combat of each unit.

"A minefield was found ahead and the road was blocked" "A tank was attacked by "enemy" artillery fire, personnel were "injured", and the vehicle was "damaged"... The fierce battle was in full swing, and special situations followed one after another. The commander immediately analyzed the battlefield situation and flexibly adjusted the tactics: the tank group implemented smoke screens to block obstacles, the obstacle removal group opened up a path, the firepower group took turns to provide cover, and the medical rescue group and equipment repair group chose the opportunity to rescue and repair. Each group acted upon hearing the order, coordinated to destroy the "enemy" firepower points, and successfully broke through the "enemy" frontier defense positions.

After the training, the officers and men immediately conducted a review, carefully sorted out the problems exposed in the training, and studied improvement measures one by one. It is understood that in the next step, they will continue to strengthen tactical coordination and multi-subject integration training, and hone the combat skills of officers and men in actual combat training.

新疆军区某团连贯特情砺防空利剑

来源：中国军网-解放军报 作者：严壮 陈明 责任编辑：刘上靖

2025-03-26

解放军报讯 严壮、陈明报道：数架"敌机"呼啸而至，防空警报骤然响起……日前，新疆军区某团一场应急防空训练拉开战幕。防空分队迅速启动战备预案，各小组同步展开作战筹划，迅速完成物资装载、请领弹药、组网建链、转移阵地等行动。

“只有平时练过硬，战场上才能打得赢。”该团领导表示，应急分队战备出动速度影响作战效能发挥。此次训练全程无预告，从难从严设置训练环境，叠加特情连贯嵌入，全面检验官兵快速反应能力。

“‘敌机’进入我防空区域，做好对空抗击准备。”收到”敌情”通报，指挥员迅速研判态势，拟制射击方案；雷达操纵员密切观察”敌情”；装弹手装填弹药，做好射击准备。随着指挥员一声令下，官兵完成一轮射击。

特情不断，官兵见招拆招、沉着应对。射击完毕，转移途中，通信设备突然遭遇不明电磁干扰，官兵立即根据预案进行处置，成功恢复通信。

据了解，该团将持续瞄准短板弱项展开专攻精练，进一步推动战斗力水平提升。

A Regiment of the Xinjiang Military Command Sharpens Its Air Defense Sword with Continuous Special Situations

Source: China Military Network-People’s Liberation Army Daily Author: Yan Zhuang Chen Ming Editor: Liu Shangjing

2025-03-26

People’s Liberation Army Daily News Yan Zhuang and Chen Ming reported: Several “enemy planes” roared in, and the air defense alarm suddenly sounded... A few days ago, an emergency air defense training of a regiment of the Xinjiang Military Command kicked off. The air defense unit quickly launched the combat readiness plan, and each group simultaneously carried out combat planning, quickly completing operations such as material loading, requesting ammunition, networking and chain building, and relocating positions.

“Only by training hard in peacetime can we win on the battlefield.” The leader of the regiment said that the speed of the emergency unit’s combat readiness deployment affects the effectiveness of combat. This training was unannounced throughout the process, and the training environment was set up from difficult and strict, with special situations continuously embedded, to comprehensively test the rapid response capabilities of officers and men.

“‘Enemy planes’ have entered our air defense area, and we must be prepared for air combat.” After receiving the “enemy situation” report, the commander quickly judged the situation and formulated a shooting plan; the radar operator closely observed the “enemy situation”; the loader loaded ammunition and prepared for shooting. With the commander’s order, the officers and men completed a round of shooting.

Special situations continued, and the officers and men responded calmly. After the shooting, during the transfer, the communication equipment suddenly encountered unknown electromagnetic

interference. The officers and men immediately handled it according to the plan and successfully restored the communication.

It is understood that the regiment will continue to focus on its shortcomings and weaknesses to carry out specialized training to further promote the improvement of combat effectiveness.

一场模拟对抗引发官兵反思检讨：真正把战场全局装进头脑

第八十二集团军某旅一场模拟对抗引发官兵反思检讨——

真正把战场全局装进头脑

■刘小云 解放军报记者 卢东方

模拟对抗训练。李鹏伦摄

“我们命中了目标，为什么被判失败？”

前不久，第 82 集团军某旅组织一场模拟对抗训练。训练一结束，红方指挥员、合成一营秦营长便快步走进导演组指挥帐篷，要”讨个说法”。

面对秦营长的疑问，导演组裁决员林国辉打开录制的对抗态势视频，并结合对抗各阶段红蓝双方指挥员的口令记录，和秦营长一起复盘了这场战斗。

“‘敌’已进入射程，请求火力打击！”战斗打响后，红方火力参谋以小股兵力佯攻，成功诱”敌”落网，并请求火力打击。”不能错失良机！”秦营长迅速指挥火力分队对”敌”实施打击。

本以为胜利在望，结果却大失所望。红方侦察参谋从无人机传回的”毁伤”画面中发现，他们中了蓝方”圈套”，火力分队打击的其实是蓝方抛出的诱饵。

“我方阵地暴露，请求转移！”接到侦察参谋的报告，秦营长心头一惊，赶紧调整部署：步兵按预案继续发起攻击，火力分队转移至预备阵地。

火力分队打击”敌”前沿暗堡，掩护工兵破障开路；无人机分队引导地面突击车从侧翼穿插……秦营长不敢掉以轻心，按预定作战计划指挥官兵全力出击。

战斗胶着之际，秦营长接到情况通报：山脊处突然杀出一支蓝方突击分队，企图袭击红方指挥所。

此时，秦营长面临两种选择：一是同属红方的炮兵营离目标更近，可以请求他们火力支援，但需向上级申请；二是使用营属火力分队，但存在弹药不足的风险。

“火力拦截！”战机稍纵即逝，出于平时训练习惯，秦营长立即命令营属火力分队实施打击。”成功’命中’目标！”侦察分队传回”毁伤”效果，秦营长心中窃喜。

没想到，此时导演组突然宣布：对抗结束，红方落败。

林国辉摁下视频暂停键说：”你方落入’敌’圈套后，火力分队使用了一轮弹药；掩护工兵破障开路时，火力分队又使用了一轮弹药。再加上这一轮火力拦截，从弹药存量和兵力部署上看，你方已无法完成后续作战任务。”

林国辉的一番话，让秦营长低下了头。痛定思痛，他找出症结所在：炮兵营与他所在营属平级单位，作战中如果需要火力支援，须向上级申请。平时训练中，他为图省事很少申请炮兵营支援，习惯于使用营属火力分队展开对”敌”打击。久而久之，单打独斗的惯性思维在他脑海中扎下了根，最终不得不吞下这次对抗失利的苦果。

“指挥员要用全局眼光观察战场，充分考虑各要素衔接，找到克敌制胜的’最优解’。”复盘总结会上，该旅领导一针见血指出，各级指挥员必须将战场全局装进头脑，若只在自己熟悉的作战单元里练攻防，必然会在战场上吃败仗。

合成一营的这场失利，也引起该旅党委高度重视。他们组织机关深入基层调研发现，习惯甚至依赖自己熟悉的火力单元作战、指挥意识跟不上战场节奏的指挥员，不在少数。

跳出”舒适圈”，练强”中军帐”。为引导各级指挥员树牢战场意识、练强指挥决策能力，该旅随后打出一套”组合拳”：定期组织各级指挥员进行战术战法研究，围绕重点课题研讨经典战例、创新战法训法，提高指挥员战场判断力、决策力；建立”一人一案、一岗一策”课题研究机制，组织各级指挥员针对不同作战场景分析战场态势、拟定行动方案；常态组织实案化对抗训练，围绕体系协同、临机特情处置等内容展开专攻精练。

记者在合成一营看到，该营为练强”中军帐”专门制订的”作战能力拓展计划”内容丰富：各专业模块编组、各要素融合训练，指挥员分阶段、分层级、分对象研究作战方案；组织”

砺剑讲堂”，邀请兄弟单位优秀指挥员来营传授经验；各席位参谋定期交叉轮岗，嵌入不同分队参训，掌握不同武器装备操作技能和兵种基础知识……

不久后，该旅组织新一轮模拟对抗训练，红蓝双方再度交手。记者翻开此次模拟对抗训练方案看到，该旅依据战场环境与作战任务，将兵种力量、武器装备等要素进行混编，判定标准也不仅限于战损比、命中率，而是根据各指挥席位的判断精度、决策力度、行动速度等表现，综合评判指挥员指挥能力，倒逼指挥员胸怀战场全局排兵布阵。

“‘敌’释放电磁干扰”“上级命令你部迅速转移”……电台里，上级通报接踵而至。作为红方指挥员，秦营长冷静应对，一边下令采取抗干扰措施，一边根据无人机侦察回传的情报综合研判战场态势，成功识破蓝方诡计。

随后的战斗中，秦营长带领官兵顺藤摸瓜锁定蓝方通信站与指挥所。”呼叫炮兵火力打击！”经过研判，秦营长果断向炮兵集群发送坐标信息。随着上级指挥所一声令下，蓝方多个重要节点被成功摧毁.

A Simulated Confrontation Caused Officers and men to Reflect and Review: Really Put the Overall Situation of the Battlefield into Their Minds

Source: China Military Network-People’s Liberation Army Daily Author: Liu Xiaoyun Lu Dongfang Editor: Liu Shangjing

2025-03-26

A simulated confrontation of a brigade of the 82nd Group Army caused officers and men to reflect and review-

Really put the overall situation of the battlefield into their minds

■Liu Xiaoyun People’s Liberation Army Daily reporter Lu Dongfang

Simulated confrontation training. Photo by Li Penglun

“We hit the target, why were we judged to have failed?”

Not long ago, a brigade of the 82nd Group Army organized a simulated confrontation training. As soon as the training ended, the commander of the Red Army and the commander of the combined battalion, Qin, walked quickly into the director’s command tent to “ask for an explanation.”

Faced with the questions of Captain Qin, the director’s referee Lin Guohui opened the recorded video of the confrontation situation, and combined with the command records of the commanders of the red and blue sides at each stage of the confrontation, he reviewed the battle with Captain Qin.

“The ‘enemy’ has entered the range, request fire strike!” After the battle started, the Red Fire Staff used a small force to feint and successfully lured the “enemy” into the trap, and requested fire strike. “Don’t miss the opportunity!” Battalion Commander Qin quickly commanded the fire squad to attack the “enemy”.

I thought victory was in sight, but the result was disappointing. The Red Reconnaissance Staff found from the “damage” picture sent back by the drone that they had fallen into the “trap” of the Blue side, and the fire squad was actually attacking the bait thrown by the Blue side.

“Our position is exposed, request to move!” After receiving the report from the reconnaissance staff, Battalion Commander Qin was shocked and quickly adjusted the deployment: the infantry continued to attack according to the plan, and the fire squad moved to the reserve position.

The fire squad attacked the “enemy” front bunker to cover the engineers to break through obstacles and open the way; the drone squad guided the ground assault vehicle to penetrate from the flank... Battalion Commander Qin did not dare to take it lightly, and commanded the officers and men to attack with all their strength according to the predetermined combat plan.

When the battle was stalemate, Battalion Commander Qin received a situation report: a blue assault team suddenly appeared on the ridge, attempting to attack the red command post.

At this time, Battalion Commander Qin faced two choices: one was that the artillery battalion belonging to the red side was closer to the target, and he could request their fire support, but he had to apply to his superiors; the other was to use the battalion’s firepower team, but there was a risk of insufficient ammunition.

“Firepower interception!” The opportunity was fleeting, and out of his usual training habits, Battalion Commander Qin immediately ordered the battalion’s firepower team to carry out the attack. “Successfully ‘hit’ the target!” The reconnaissance team sent back the “damage” effect, and Battalion Commander Qin was secretly happy.

Unexpectedly, at this time, the director team suddenly announced: The confrontation was over and the red side was defeated.

Lin Guohui paused the video and said, “After you fell into the ‘enemy’ trap, the firepower unit used a round of ammunition; when covering the engineers to break through obstacles and open the way, the firepower unit used another round of ammunition. In addition to this round of firepower interception, from the perspective of ammunition inventory and troop deployment, you can no longer complete subsequent combat missions.” Lin Guohui’s words made Captain Qin bow his head. After thinking hard, he found out the crux of the problem: the artillery battalion and his battalion are equal units, and if firepower support is needed during combat, he must apply to his superiors. In normal training, he rarely applied for artillery battalion support for the sake of saving trouble, and was accustomed to using the battalion’s firepower unit to launch attacks on the “enemy”. Over time, the inertial thinking of fighting alone took root in his mind, and he eventually

had to swallow the bitter fruit of this defeat. “Commanders should observe the battlefield from a global perspective, fully consider the connection of various elements, and find the ‘optimal solution’ to defeat the enemy.” At the review summary meeting, the brigade leader pointed out that commanders at all levels must put the overall situation of the battlefield into their heads. If they only practice offense and defense in the combat units they are familiar with, they will inevitably suffer defeat on the battlefield.

This defeat of the combined battalion also attracted the brigade’s party committee’s high attention. They organized the agency to conduct in-depth investigations at the grassroots level and found that there were many commanders who were accustomed to or even relied on the firepower units they were familiar with and whose command awareness could not keep up with the rhythm of the battlefield.

Jump out of the “comfort zone” and strengthen the “central army tent”. In order to guide commanders at all levels to strengthen their battlefield awareness and command and decision-making capabilities, the brigade then launched a set of “combination punches”: regularly organize commanders at all levels to conduct tactical and combat research, discuss classic battle examples around key topics, innovate combat and training methods, and improve commanders’ battlefield judgment and decision-making capabilities; establish a “one person one case, one post one policy” research mechanism, organize commanders at all levels to analyze battlefield situations and formulate action plans for different combat scenarios; regularly organize real-case confrontation training, and carry out specialized training around system coordination, emergency special situation handling and other contents.

The reporter saw in the combine-arms battalion that the “combat capability expansion plan” specially formulated by the battalion to strengthen the “central army account” is rich in content: various professional modules are organized, various elements are integrated and trained, and commanders study combat plans in stages, levels and objects; organize “sword sharpening lectures” to invite outstanding commanders from brother units to the battalion to impart experience; staff officers of various seats regularly rotate, embed in different squads to participate in training, and master different weapons and equipment operation skills and basic knowledge of arms...

Soon after, the brigade organized a new round of simulated confrontation training, and the red and blue sides fought again. The reporter opened the simulated confrontation training plan and saw that the brigade mixed the forces, weapons and equipment and other elements according to the battlefield environment and combat missions. The judgment criteria were not limited to the combat loss ratio and hit rate, but were based on the judgment accuracy, decision-making strength, action speed and other performances of each command seat. The commander’s command ability was comprehensively judged, forcing the commander to arrange troops with the overall battlefield in mind.

“The enemy released electromagnetic interference” “The superior ordered your unit to move quickly”... In the radio station, the superior’s reports came one after another. As the commander of

the red side, Battalion Commander Qin responded calmly. While ordering anti-interference measures, he comprehensively judged the battlefield situation based on the intelligence sent back by the drone reconnaissance and successfully saw through the blue side's trick.

In the subsequent battle, Battalion Commander Qin led the officers and men to follow the clues and lock the blue side's communication station and command post. "Call artillery fire strike!" After analysis and judgment, Battalion Commander Qin decisively sent coordinate information to the artillery cluster. With the order from the superior command post, many important nodes of the blue side were successfully destroyed.

越来越多"00 后"崭露头角！加强年轻战士培养使用成效明显

来源：解放军报 作者：阿合卓勒·努尔兰别克　田雲瑞 责任编辑：刘上靖 2025-03-26

新疆军区某团某营加强年轻战士培养使用取得明显成效——

越来越多"00 后"崭露头角

■阿合卓勒·努尔兰别克　田雲瑞

新疆军区某团某营"士兵大讲堂"，座无虚席。某连中士王剑豪站在台上，讲述自己的奋斗故事。他的胸前，一枚二等功奖章十分醒目。进入 3 月，该营"士兵大讲堂"的"C 位"，迎来更多的年轻士兵。

王剑豪是该营两年内第 3 位荣立二等功的"00 后"。说起自己快速成长的经历，他坦言："离不开组织的信任和培养。"

"能否派王剑豪参加上级组织的专业集训比武？"去年一次连务会上，该连肖连长的提议，让与会的班长骨干感到有些意外。

彼时，王剑豪还是一名上等兵。打开该连以往参加集训比武的人员名单，无一例外是专业过硬、经验丰富的班长骨干。让一名上等兵代表连队参加上级比武集训，在连队尚无先例。

"王剑豪入伍时间短，经验能力还差了一些火候。"讨论中，一些班长骨干提出反对意见。他们的考虑很现实：万一王剑豪搞砸了，无法为连队赢得荣誉，该如何交代？

面对大家的担忧，肖连长说出了自己的看法："王剑豪是一名大学生士兵，虽然经验不足，但训练刻苦、悟性好，身上有一股不服输的劲儿，我们应该相信他会带来惊喜。"

肖连长之所以对王剑豪有信心，主要基于王剑豪的现实表现。此前，专业岗位调整后，他仅用 1 个月时间，就把专业成绩提升到全连第一名。此外，肖连长想借机试一试，放手让年轻战士"挑大梁"。

“推动连队建设全面进步全面过硬，不能也不应该过分依赖少数骨干，必须让人才家底厚实起来。要多给年轻战士成长锻炼的机会，让他们在实践中淬炼成钢。”肖连长一番话，引发与会人员共鸣。最终，大家达成一致意见：选派王剑豪参加此次集训比武。

得知消息，王剑豪感到惊喜。集训开始后，他拿出”拼命三郎”的劲头，努力学习专业知识，不仅坚持每天复盘训练情况，还经常向经验丰富的战友请教，不断突破自身极限。”我不能辜负连队和战友的信任。”王剑豪说。

功夫不负有心人。王剑豪以优异成绩接连夺得师、团两级专业比武第一名，并被推荐参加军区组织的专业集训比武。与来自各单位的”高手”同场竞技，王剑豪不落下风，作为唯一一名上等兵，最终获得所在分组头名。

去年 9 月选晋军士时，王剑豪顺利通过考核，按照有关规定直接晋升为中士。

“王剑豪的出色表现，坚定了我们的信心，培养骨干人才就要敢给年轻战士交任务、压担子。”肖连长说，这也是营党委鼓励年轻战士成长成才的一个缩影。

盘点该营这几年取得的荣誉，年轻战士的成长进步令人瞩目。除了像王剑豪一样在比武中摘金夺银，还有一些战士为部队提升战斗力持续贡献智慧和力量。”00 后”中士向双晨就是其中之一。

前年，向双晨所在连队配发的某型装置对光照条件和使用环境要求较高。

“如果给新装置配一副’眼镜’，过滤强光干扰，是不是就能有效提升射击精度？”当时还是下士的向双晨，大胆建言。

这个充满创意的建议，让人眼前一亮，但也引来了一波质疑。有些官兵认为，此想法过于新奇，存在风险隐患，稍有不慎就有可能损坏装置。

该营耿营长没有人云亦云，而是看到了其中的”可行性”。他召集干部骨干以及火炮技师、修理工等人，围绕向双晨的建议展开专题研讨。经过分析论证，大家认为这一设想并非空中楼阁，具有理论依据和实现的可能。

耿营长立刻联系厂家技术人员，询问”给新装置配副’眼镜’”是否可行。深入交流探讨后，技术专家给出了肯定的答复。

耿营长难掩兴奋之情，第一时间把这个好消息告诉了向双晨，并让他牵头成立攻关小组，负责推进落实。

“战斗力建设，需要这样的创新火花！年轻战士敢想敢干，我们应给予充分的信任和支持，为他们提供施展才华、实现价值的舞台。”营党委会上，耿营长的发言，得到一致认可。

任务艰巨，向双晨没有辜负这份信任，面对既无经验可循又无教材参照的现实困境，他和攻关小组成员全神贯注、埋头攻关。经过数月的努力，他们攻克了棘手的技术难题。经过改进的装置第一次投入使用，该连官兵就凭借其助力，在规定时间内完成射击任务，取得10发全中的优异成绩。

“浇灌嫩芽成栋梁。无论王剑豪还是向双晨，他们的成长经历再次证明，在实践中经风雨、见世面，才能壮筋骨、长才干。”耿营长说，他们将继续鼓励和支持年轻战士在练兵备战第一线、重大任务最前沿以及关键吃劲岗位上磨砺锻炼、精武强能，不断提高打仗本领。

如今，在该营，越来越多的”00后”崭露头角，成为组训施训、攻坚克难的骨干力量。这些年轻战士的持续涌现，为部队战斗力建设注入了新的生机活力。

More and More “Post-00s” Are Emerging! Strengthening the Training and Use of Young Soldiers Has Achieved Obvious Results

Source: PLA Daily Author: Ahezhuole Nurlanbek Tian Yunrui Editor: Liu Shangjing 2025-03-26

A battalion of a regiment in the Xinjiang Military Command has achieved obvious results in strengthening the training and use of young soldiers——

More and more “post-00s” are emerging

■Ahezhuole Nurlanbek Tian Yunrui

The “Soldiers’ Lecture Hall” of a battalion of a regiment in the Xinjiang Military Command is full. Sergeant Wang Jianhao of a certain company stood on the stage and told his struggle story. On his chest, a second-class merit medal is very eye-catching. In March, the “C position” of the “Soldiers’ Lecture Hall” of the battalion welcomed more young soldiers.

Wang Jianhao is the third “post-00s” who has won the second-class merit in the battalion in two years. Talking about his rapid growth experience, he said frankly: “It is inseparable from the trust and cultivation of the organization.”

“Can Wang Jianhao be sent to participate in the professional training competition organized by the superiors?” At a company meeting last year, the company commander Xiao’s proposal surprised the squad leaders and backbones present.

At that time, Wang Jianhao was still a corporal. Opening the list of personnel who participated in the company’s previous training competitions, without exception, they were professional and experienced squad leaders and backbones. There is no precedent in the company for a corporal to represent the company in the superior competition training.

“Wang Jianhao has been in the army for a short time, and his experience and ability are still a little lacking.” During the discussion, some squad leaders and backbones raised objections. Their

considerations are very realistic: What if Wang Jianhao messes up and fails to win honor for the company?

Facing everyone's concerns, Captain Xiao expressed his own views: "Wang Jianhao is a college soldier. Although he lacks experience, he is hardworking in training, has good comprehension, and has a spirit of not admitting defeat. We should believe that he will bring surprises."

Captain Xiao's confidence in Wang Jianhao is mainly based on Wang Jianhao's actual performance. Previously, after the professional position adjustment, he took only one month to improve his professional performance to the first place in the company. In addition, Captain Xiao wanted to take the opportunity to give it a try and let the young soldiers "take the lead."

"To promote the overall progress and overall excellence of the company, we cannot and should not rely too much on a few backbones, and we must make the talent base solid. We must give young soldiers more opportunities to grow and exercise, so that they can be tempered into steel in practice." Captain Xiao's words resonated with the participants. In the end, everyone reached a consensus: to select Wang Jianhao to participate in this training competition.

Wang Jianhao was surprised to hear the news. After the training began, he worked hard to learn professional knowledge. He not only insisted on reviewing the training situation every day, but also often asked experienced comrades for advice and constantly broke through his own limits. "I can't live up to the trust of the company and comrades." Wang Jianhao said.

Hard work pays off. Wang Jianhao won the first place in the professional competitions at the division and regiment levels with excellent results, and was recommended to participate in the professional training competition organized by the Military Command. Competing with "masters" from various units, Wang Jianhao did not fall behind. As the only corporal, he finally won the first place in his group.

When selecting sergeants for promotion in September last year, Wang Jianhao successfully passed the assessment and was directly promoted to sergeant in accordance with relevant regulations.

"Wang Jianhao's outstanding performance has strengthened our confidence. To cultivate backbone talents, we must dare to give tasks and pressure to young soldiers." Captain Xiao said that this is also a microcosm of the battalion party committee's encouragement of young soldiers to grow and become talents.

Taking stock of the honors achieved by the battalion in recent years, the growth and progress of young soldiers are remarkable. In addition to winning gold and silver medals in competitions like Wang Jianhao, there are also some soldiers who continue to contribute their wisdom and strength to improve the combat effectiveness of the troops. Sergeant Xiang Shuangchen, who was born in the 2000s, is one of them.

The year before last, a certain type of device distributed by Xiang Shuangchen's company had high requirements for lighting conditions and use environment.

“If we equip the new device with a pair of ‘glasses’ to filter out strong light interference, can we effectively improve the shooting accuracy?” Xiang Shuangchen, who was still a corporal at the time, made a bold suggestion.

This creative suggestion was eye-catching, but it also attracted a wave of doubts. Some officers and men believed that this idea was too novel and had risks and hidden dangers, and the device could be damaged if they were not careful.

Captain Geng of the battalion did not follow the crowd, but saw the “feasibility” of it. He convened cadres, backbones, artillery technicians, repairmen and others to hold a special discussion around Xiang Shuangchen’s suggestion. After analysis and demonstration, everyone believed that this idea was not a castle in the air, and it had a theoretical basis and the possibility of realization.

Captain Geng immediately contacted the manufacturer’s technical staff to ask whether it was feasible to “equip the new device with a pair of ‘glasses’“. After in-depth exchanges and discussions, the technical experts gave a positive answer.

Captain Geng could not hide his excitement and told Xiang Shuangchen the good news as soon as possible, and asked him to take the lead in setting up a research team to promote implementation.

“Combat effectiveness construction requires such innovative sparks! Young soldiers dare to think and act, we should give full trust and support, and provide them with a stage to display their talents and realize their values.” At the battalion party committee meeting, Captain Geng’s speech was unanimously recognized.

The task was arduous, and Xiang Shuangchen did not live up to this trust. Faced with the realistic dilemma of having no experience to follow and no textbooks to refer to, he and the members of the research team were fully focused and immersed in research. After months of hard work, they overcame the thorny technical problems. The first time the improved device was put into use, the officers and men of the company relied on its help to complete the shooting task within the specified time and achieved an excellent result of 10 shots in full.

“Watering the young shoots will make them pillars. Whether it is Wang Jianhao or Xiang Shuangchen, their growth experience once again proves that only by going through the wind and rain and seeing the world in practice can one strengthen his muscles and bones and grow his talents.” Battalion Commander Geng said that they will continue to encourage and support young soldiers to hone their skills and strengthen their abilities in the front line of training and preparation, at the forefront of major tasks, and in key and demanding positions, and constantly improve their fighting skills.

Nowadays, in the battalion, more and more “post-00s” have emerged and become the backbone of training and overcoming difficulties. The continuous emergence of these young soldiers has injected new vitality into the construction of the combat effectiveness of the troops.

第 79 集团军某连: “兴趣夜校”课余充电，培育技能 “多面手”

来源：中国军网-解放军报 作者：王昭岳 赖宏承 海洋 张彪 责任编辑：王一亘

2025-03-27

第 79 集团军某旅某连为官兵营造良好学习环境——

“兴趣夜校”助力充电强能

■王昭岳 赖宏承 解放军报特约记者 海 洋

官兵在”兴趣夜校”学习修理工具使用方法。石少晗摄

“漏电保护器是用于低压电路的电气安全保护装置，它的工作原理是这样的……”仲春夜晚，第 79 集团军某旅某连学习室内，官兵认真聆听战友关于电工电器知识的授课讲解。

“这里的学习氛围真浓厚。”看到这一幕，记者感叹。

“这是连队开办的’兴趣夜校’，大家学习的大都是日常生活和训练中能够用到的知识。”该连指导员张彪说，过去，一到休息时间，不少官兵在宿舍内闲聊天、打电话，有的沉浸于”一机一世界”，参与集体娱乐活动的积极性也不高。为了让大家合理利用休息时间，他也想过不少办法。

一次，连队体能训练结束后组织放松，卫生员集训归来的战士朱宸皓自告奋勇，为大家讲解了腿部放松的穴位按压方法。官兵反映效果特别好，希望这样的讲解能再多些。

“连队很多战士都有一技之长，如果引导利用好，既能让个人特长得到发挥，也能帮助战友补足专业短板，充实’技能包’。”经张指导员提议，连队党支部研究决定开办”兴趣夜校”，每周抽出两个小时，发动”五小工”等有特长的战士上台讲解专业知识，传授相关技能，鼓励感兴趣的官兵参加学习。

让人始料未及的是，”兴趣夜校”开办以来，官兵参加学习活动的热情持续高涨。

战士曹达森入伍前就想学摄影摄像，在”兴趣夜校”听了战友对相关知识的讲解后，拍摄能力提高很快。前不久，他为退役老兵和下连新兵各制作了一期视频，播放后很受大家欢迎……

在夜校浓厚学习氛围的熏陶下，官兵对钻研新装备、攻关新战法、搞技术革新的兴趣也越来越浓厚。记者翻开”兴趣夜校”学习计划表看到，里面的课程不仅有电路电工知识、电脑软件使用，还有训练技巧方法，既有理论课，也有实操演示课，授课内容和形式丰富多样。

“兴趣夜校”的出发点虽好，但是否会挤占官兵休息时间呢？

“对于活动开展，我们并不做硬性要求，全是官兵自愿参与。在学习时长上，我们充分尊重官兵意见，每周抽两天时间各安排 1 个小时。”张指导员说。

交谈中，刚刚下哨归来的战士乔子鑫正急匆匆走向学习室。”夜校学习并不会感到劳累，反而觉得能更好地放松身心。与其在虚拟世界中消磨时间，不如为自己多充充电。”他坦言，想通过夜校丰富多彩的课程学习，成为一名技能”多面手”。

每周两个小时，到底能学到多少？

“仅就单次学习时长来说，学会并掌握某一项技能确实有些难，但学习是一个持续的过程，官兵也会在课后相互交流学习。我们更应该看到的是，相较于每次学有所成，能引导官兵培养热爱学习、勤于思考的习惯，更显难能可贵。这也是我们坚持开办’兴趣夜校’的初衷。”张指导员这样说。

通过一段时间的学习，连队官兵的观察能力和思考能力得到提高，也为连队战斗力建设带来新变化：参加战时政治工作演训，下士付文乾正是凭借刚学会的摄影摄像技术，很快完成了”战场取证”任务；一次训练中，某型装备电瓶发生故障，上等兵闫伟康和几名战友运用在夜校学习的装备维修技能，顺利排除故障，并采集了该型装备在严寒条件下的作战数据……张指导员感慨，”兴趣夜校”的育人强能效应正在不断显现。

下一步，该连党支部将趁热打铁，鼓励官兵组建更多兴趣小组和技能小组，同时申请购买相关教学书籍和器材，完善图书室、学习室设施，并尝试邀请不同连队、不同专业官兵前来授课，让大家在交流碰撞中学有所获、学以致用，不断为连队战斗力建设赋能。

微议录

学习力就是战斗力

■第 79 集团军某旅某连指导员 张 彪

以前，我曾听一名战士这样说：”比起读书学习，我宁愿去跑一个五公里。”如今，这名战士告诉我，学习让他知晓了更多知识和道理，学会了观察和思考，尝到了甜头。经过这段时间的实践，我也更加坚信：一个单位想要生机勃勃、实现高质量发展，离不开深度学习。

鸟欲高飞先振翅，人求上进先读书。古往今来，一支有战斗力的军队，必然是一支注重学习、善于学习的军队。实践也告诉我们，学习力就是战斗力，越是善于学习的军队，越能掌握战场主动权。更何况，当前时代飞速发展和部队使命任务拓展，对官兵的知识水平、能力素质的要求越来越高，加紧读书学习、提高本领素质显得尤为迫切。因此，军营既要有训练场上的隆隆炮火声，也要有课堂上的琅琅读书声。

学习的习惯和能力不是与生俱来的，需要在日常生活工作中慢慢养成。就像种粮食，虽不会立刻开花结果，但只要把种子埋进土壤，悉心浇灌打理，终有一天嫩芽会破土而出，茁壮成长。

基于这个理念，连队通过搭建平台开办”兴趣夜校”，一方面让战士不断充实自己、提升能力，养成良好的学习习惯；另一方面引导大家认识并发挥自己的特长，学以致用、交流互促，更好地提升练兵备战质效。我想，这既是基层单位带兵育人的职责所在，也是推动学习型军营建设的应有之义。

A company of a brigade of the 79th Group Army creates a good learning environment for officers and men——

“Interest Night School” helps recharge and strengthen energy

■Wang Zhaoyue Lai Hongcheng People’s Liberation Army Daily Special Correspondent Haiyang

Soldiers learn how to use repair tools in the “Interest Night School”. Photo by Shi Shaohan

“The leakage protector is an electrical safety protection device for low-voltage circuits. Its working principle is as follows...” On a mid-spring night, in the study room of a company of a brigade of the 79th Group Army, officers and men listened carefully to their comrades’ lectures on electrical and electrical knowledge.

“The learning atmosphere here is really strong.” Seeing this scene, the reporter sighed.

“This is the ‘interest night school’ run by the company. Most of what we learn is knowledge that can be used in daily life and training.” Zhang Biao, the Political Instructor of the company, said that in the past, when it was time to rest, many officers and men chatted and made phone calls in the dormitory, and some were immersed in “one machine, one world”, and were not very enthusiastic about participating in collective entertainment activities. In order to let everyone use their rest time reasonably, he has also thought of many ways.

Once, the company organized a relaxation after the physical training. Zhu Chenhao, a soldier who returned from the medical training, volunteered to explain the acupoint pressing method for leg relaxation. The officers and men said that the effect was particularly good, and they hoped that there would be more such explanations.

“Many soldiers in the company have a skill. If they are guided and used well, they can not only give full play to their personal expertise, but also help their comrades make up for their professional shortcomings and enrich their ‘skills package’.” At the suggestion of Political Instructor Zhang, the company’s party branch decided to open an “interest night school”, taking out two hours a week to mobilize soldiers with special skills such as “five small workers” to come on stage to explain professional knowledge, impart relevant skills, and encourage interested officers and men to participate in learning.

Unexpectedly, since the opening of the “Interest Night School”, the enthusiasm of officers and men to participate in learning activities has continued to rise.

Soldier Cao Dasen wanted to learn photography and videography before joining the army. After listening to his comrades’ explanations of relevant knowledge in the “Interest Night School”, his shooting ability improved rapidly. Not long ago, he made a video for retired veterans and new recruits in the company, which was very popular after being played...

Under the influence of the strong learning atmosphere of the night school, officers and men are more and more interested in studying new equipment, tackling new tactics, and engaging in technological innovation. The reporter opened the study schedule of the “Interest Night School” and saw that the courses in it not only include circuit electrical knowledge, computer software use, but also training skills and methods. There are both theoretical classes and practical demonstration classes, and the teaching content and form are rich and diverse.

Although the starting point of the “Interest Night School” is good, will it squeeze the rest time of officers and men?

“We don’t have any rigid requirements for the activities, all soldiers participate voluntarily. We fully respect the opinions of soldiers on the study time, and arrange one hour each day two days a week.” Instructor Zhang said.

During the conversation, Qiao Zixin, a soldier who had just returned from sentry duty, was hurried to the study room. “I don’t feel tired when studying at night school, but I feel that I can relax my

body and mind better. Instead of wasting time in the virtual world, it is better to recharge myself." He said frankly that he wanted to become a "jack of all trades" through the rich and colorful courses of night school.

How much can you learn in two hours a week?

"In terms of the length of a single study, it is indeed difficult to learn and master a certain skill, but learning is a continuous process, and soldiers will also communicate and learn with each other after class. What we should see more is that compared with learning something every time, it is more valuable to guide soldiers to cultivate the habit of loving learning and thinking. This is also the original intention of our insistence on opening the "interest night school." Instructor Zhang said.

After a period of study, the observation and thinking abilities of the company's officers and men have been improved, which has also brought new changes to the company's combat effectiveness construction: when participating in wartime political work exercises, Corporal Fu Wenqian quickly completed the "battlefield evidence collection" task with the photography and videography skills he had just learned; during a training session, a battery of a certain type of equipment failed, and Corporal Yan Weikang and several comrades used the equipment maintenance skills learned in the night school to successfully eliminate the fault and collect the combat data of this type of equipment under severe cold conditions... Instructor Zhang sighed that the "interest night school" is constantly showing its educational and empowering effect.

In the next step, the company's party branch will strike while the iron is hot and encourage officers and men to form more interest groups and skill groups. At the same time, it will apply for the purchase of relevant teaching books and equipment, improve the facilities of the library and study room, and try to invite officers and men from different companies and different majors to come to teach, so that everyone can learn something from the exchange and collision, apply what they have learned, and continuously empower the company's combat effectiveness construction.

Micro-discussion

Learning ability is combat effectiveness

■ Zhang Biao, instructor of a company of a brigade of the 79th Group Army

In the past, I heard a soldier say: "I would rather run a five-kilometer race than study." Now, this soldier told me that learning has made him know more knowledge and truth, learn to observe and think, and taste the sweetness. After this period of practice, I am more convinced that if a unit wants to be vibrant and achieve high-quality development, it cannot do without deep learning.

Birds flap their wings before they want to fly high, and people read books before they want to make progress. Throughout the ages, a combat-effective army must be an army that pays attention to learning and is good at learning. Practice also tells us that learning ability is combat effectiveness, and the more good an army is at learning, the more it can grasp the initiative on the battlefield.

What's more, with the rapid development of the current era and the expansion of the mission and tasks of the troops, the requirements for the knowledge level and ability quality of officers and men are getting higher and higher, and it is particularly urgent to intensify reading and learning and improve their skills and qualities. Therefore, the military camp should have both the rumbling sound of artillery fire on the training ground and the sound of reading in the classroom.

The habit and ability of learning are not innate, but need to be developed slowly in daily life and work. Just like planting crops, although they will not bloom and bear fruit immediately, as long as the seeds are buried in the soil and carefully watered and cared for, one day the sprouts will break through the soil and grow vigorously.

Based on this concept, the company has set up a "interest night school" by building a platform. On the one hand, it allows soldiers to constantly enrich themselves, improve their abilities, and develop good learning habits; on the other hand, it guides everyone to recognize and give full play to their own strengths, apply what they have learned, and promote exchanges and mutual promotion, so as to better improve the quality and effectiveness of training and preparation. I think this is not only the responsibility of grassroots units to lead and educate soldiers, but also the due meaning of promoting the construction of learning-oriented military camps.

第 82 集团军某旅：角色互换，打破红蓝定式提升战斗力

来源：中国军网-解放军报 作者：李浩然 姚欣彤 责任编辑：王一亘

2025-03-27

第 82 集团军某旅在对抗训练中常态组织角色互换——

打破常规，超越红蓝

■解放军报记者　李浩然　特约记者　姚欣彤

北疆大漠，炮声隆隆。

时隔两年，再次走进朱日和联合训练基地，第 82 集团军某旅某连官兵"一雪前耻"——率先发现并摧毁蓝军指挥所。

双方对抗态势原本十分胶着。面对蓝军设下的重重阻碍，"红军"无人扫雷车动弹不得，只好派出官兵人工破障。结果，部分"红军"官兵暴露在蓝军视野中，遭到猛烈火力打击。

情急之下，该连兰连长冷静分析认为：蓝军此时正集中火力攻击"红军"暴露的目标，可以利用这一时机派出小分队从侧翼渗透。兰连长立即命令一队官兵利用地形掩护，快速寻找蓝军指挥所。果然，官兵经过仔细搜寻后，成功发现目标。

“好一招将计就计！”训练结束，红蓝双方展开复盘总结，蓝军一名指挥员向”对手”竖起大拇指。

兰连长的巧思，源于该连官兵对蓝军战术战法的深入研究。

两年前，还是在朱日和联合训练基地，面对同样强大的一支蓝军，兰连长所在的”红军”分队遭遇挫折。还没来得及复盘，兰连长就接到上级通知，旅机关计划依托他所在连成立专业蓝军分队。

“吃透蓝军，才能当好蓝军。”从那天起，兰连长带领官兵开始了”知彼”的潜心研究。从武器装备到实战案例，从战术手段到战略思维……他们由表及里、由浅入深，全面研究蓝军要素，作战本领越练越强。

“深研蓝军的作战思维，让我们视野更加开阔，思考更加全面，从而获得更多打仗灵感。”兰连长坦言，身份和视角的转换，为官兵打开了更多破局思路。

此后的训练中，该连作为旅里的蓝军，在与其他营连对抗训练中大显身手，成为砥砺战斗力的”磨刀石”，自身打赢本领也不断提高。

蓝军分队的训练成效，引起该旅领导关注。他们深入研究后决定，全面推开红蓝对抗训练模式，常态组织红蓝双方角色互换，实打实锤炼官兵作战本领：动态设置蓝军分队，各连队均可遴选官兵在训练中充当蓝军，体验不同角色；组建”蓝军研究团队”，组织各营训练骨干深研蓝军战术战法，将研究成果纳入”蓝军资料库”，为对抗训练提供案例样本和理论依据……

采访中，记者问兰连长：”红蓝双方，你觉得自己更胜任哪个角色？”

兰连长告诉记者，自己曾多次思考过这个问题：”只要有利于提升战斗力，担任什么角色并不重要。打破常规，超越红蓝，才能胜战打赢。”

A Certain Brigade of the 82nd Group Army: Role Swapping, Breaking the Red and Blue Pattern to Improve Combat Effectiveness

Source: China Military Network-People’s Liberation Army Daily Author: Li Haoran Yao Xintong Editor: Wang Yigen

2025-03-27

A certain brigade of the 82nd Group Army regularly organizes role swapping in confrontation training-

Breaking the routine and surpassing the red and blue

■People's Liberation Army Daily reporter Li Haoran Special correspondent Yao Xintong

In the desert of northern Xinjiang, the sound of artillery roared.

After two years, entering the Zhurihe joint training base again, the officers and men of a certain company of a certain brigade of the 82nd Group Army "avenged the previous shame"-the first to discover and destroy the blue army command post.

The confrontation between the two sides was originally very stalemate. Faced with the many obstacles set by the blue army, the "Red Army" unmanned minesweeper could not move, so it had to send officers and men to manually break the obstacles. As a result, some officers and men of the "Red Army" were exposed to the blue army's field of vision and were hit by fierce firepower.

In a hurry, the company commander Lan calmly analyzed that the Blue Army was concentrating its firepower to attack the exposed targets of the "Red Army" at this time, and it could take advantage of this opportunity to send a small team to infiltrate from the flank. Captain Lan immediately ordered a team of officers and men to use the terrain to cover and quickly find the Blue Army command post. Sure enough, after a careful search, the officers and men successfully found the target.

"What a good trick!" After the training, the Red and Blue sides conducted a review and summary, and a commander of the Blue Army gave a thumbs up to the "opponent".

Captain Lan's ingenuity came from the company's officers and men' in-depth research on the Blue Army's tactics and tactics.

Two years ago, still at the Zhurihe Joint Training Base, facing an equally powerful Blue Army, Captain Lan's "Red Army" team suffered a setback. Before he had time to review, Captain Lan received a notice from his superiors that the brigade planned to establish a professional Blue Army team based on his company.

"Only by understanding the Blue Army can you be a good Blue Army." From that day on, Captain Lan led the officers and men to start a dedicated study of "knowing the enemy". From weapons and equipment to actual combat cases, from tactical means to strategic thinking... they studied the elements of the Blue Army from the outside to the inside, from the shallow to the deep, and their combat skills became stronger and stronger.

"In-depth study of the combat thinking of the Blue Army has broadened our horizons and made us think more comprehensively, so as to gain more inspiration for fighting." Captain Lan said frankly that the change of identity and perspective has opened up more ideas for officers and men to break through.

In the subsequent training, as the Blue Army in the brigade, the company showed its prowess in the confrontation training with other battalions and companies, becoming a "grindstone" for sharpening combat effectiveness, and its own ability to win has also been continuously improved.

The training results of the Blue Army squad have attracted the attention of the brigade leaders. After in-depth research, they decided to fully promote the red-blue confrontation training mode, regularly organize the red and blue sides to exchange roles, and truly hone the combat skills of officers and men: dynamically set up blue army teams, and each company can select officers and men to serve as blue army in training to experience different roles; set up a “blue army research team”, organize the training backbones of each battalion to deeply study the blue army tactics and methods, and include the research results in the “blue army database” to provide case samples and theoretical basis for confrontation training...

During the interview, the reporter asked Captain Lan: “Red and blue, which role do you think you are more competent for?”

Captain Lan told reporters that he had thought about this question many times: “As long as it is conducive to improving combat effectiveness, it doesn’t matter what role you play. Breaking the routine and surpassing the red and blue can win the battle.”

第 74 集团军某旅：”手拉手”联训，把体系作战能力练过硬

来源：中国军网-解放军报 作者：郑烨 郭澍东 王德赛 朱埠 责任编辑：王一亘

2025-03-27

第 74 集团军某旅联合多军兵种部队推进体系联训——

从”背对背”到”手拉手”

■郑 烨 解放军报记者 郭澍东 王德赛

仲春时节，春暖花开。记者走进第 74 集团军某旅演兵场，恰逢一场陆空对抗训练火热展开。

训练现场，”敌”机快速下降高度，沿着山脊线超低空飞行，企图规避雷达搜索。数百公里外，该旅联合友邻空军部队织密防空”天网”，多型防空武器模块编组，静待”敌”机飞临。

不多时，根据友邻空军部队传来的空情信息，该旅雷达精准捕获”敌”机位置。随着指挥员一声令下，导弹腾空而起、直扑目标，成功将”敌”机摧毁。

“‘敌’机虽超出我部雷达搜索范围，却无法逃出联合防空体系的严密监控，这就是体系制胜的优势。”训练间隙，该旅导弹射手吴新才告诉记者，”随着体系练兵不断深入，过去的’金牌射手’定义正在被改写。如今，只有既精通本兵种、本专业作战技能，又熟悉其他军兵种作战知识，才称得上’金牌射手’。”

采访中，吴新才给记者讲起自己一次”败走麦城”的经历——几年前，某新型导弹列装部队，官兵一度以为，凭借新装备的性能优势，对抗训练战胜对手稳操胜券。没想到，”敌”机采取新战术快速突防，巧妙躲过雷达搜索，让被誉为”金牌射手”的他吃了败仗。

“融入体系，才能打赢未来战争。”演兵场上的一次次磨合切磋，倒逼该旅官兵不断强化”体系练、练体系”的作战理念。

为扎扎实实提升体系作战能力，该旅紧盯现代防空作战需求深化体系练兵，与友邻空军部队建立联演联训机制，共享空情信息；联合科研院所、装备生产厂家升级优化指挥信息系统，打通指挥控制链路，充分发挥体系优势，扩大战场态势感知能力，大幅提升实战化训练质效。

“体系练兵犹如’冲击波’，冲击着训练场上的积弊痼疾，改变了部队的练兵模式，更新了官兵的训练和作战理念。”该旅某营潘营长介绍，以往，受训练条件所限，他们一度”训无对手、练无空情”，只能依靠理论数值和航模靶机展开训练。如今，该旅与友邻空军部队从”背对背”到”手拉手”、从”我”到”我们”，在联演联训中不断练强”十八般武艺”，探索出一条体系练兵新路径。

近年来，该旅常态组织所属地空导弹、电子对抗等分队与友邻空军部队开展体系联训；分批次组织多型雷达进驻空军机场开展训练；组织不同兵种分队与陆航某部展开攻防训练；邀请友邻空军部队指挥员到旅队交流战法打法，组织地空导弹营嵌入海军航空兵部队演训，在真打实抗中淬炼新”剑法”……随着体系练兵思维不断强化，体系赋能的”防空利剑”渐露锋芒。

“小型机两架。”夜幕降临，一个波次对抗刚结束，”敌”机突然高速突防，再次发起攻击。吴新才迅速操作雷达锁定目标，寻找有利时机。就在”敌”机即将进入射界时，屏幕上突然一片”雪花”，目标随之消失。

“‘敌’机实施强电磁干扰！”眼看对手即将突破导弹防御，隐蔽一旁的该旅电子对抗分队果断行动，来自多方雷达侦测的空情数据也迅速流转至各火力单元。不多时，”复明”后的雷达再次锁定目标，紧接着两枚导弹齐发，双双命中来袭”敌”机。

优势互补，高效协同。另一波次对抗中，该旅多型防空雷达利用自身性能优势为空军战机指示目标，引导空中火力实施精准打击，成功歼”敌”。

训练结束后，中军帐内，该旅官兵与空军战友共同复盘总结，将思想火花转化为制胜妙招。交流研讨中，该旅指挥员说：”陆军防空兵与空军航空兵常态化开展互为对手、互为条件、互为支撑的体系联训，让各自部队的侦察预警、火力打击和应对复杂战场态势能力大幅提升。”

聚合优势，淬炼胜战”剑锋”。该旅领导介绍，他们通过嵌入多军兵种部队深化体系练兵，常态组织对抗数据评估、协同战法研究、复盘检讨反思，有效解决多个训练重难点问题，创新多项战法训法，一批具有体系作战思维的复合型打仗人才拔节成长，部队体系作战能力明显提升。

短 评

用体系贡献率检验评判练兵效果

■朱 埠

现代战争制胜机理告诉我们，离开体系支撑，仅靠一个军兵种单打独斗、一种装备独当一面，很难取得最终胜利。只有把每个作战单元、各类武器装备融入体系，整合力量、聚合优势、释放效能，才能增加战场上的胜算。

深入推进体系练兵，必须从”单一组训”转为”体系联训”，变”单兵作战”为”协同联动”，让”体系制胜”的理念渗透到班排末端、落实到一兵一卒。第 74 集团军某旅着眼战场需求深化体系练兵，主动瞄准整体练个体、服务体系强单元，实现不同作战力量攥指成拳，有效提升了部队整体作战能力。

仗要联合打，兵要体系练。各级应主动将自己嵌入体系作战链条，积极探索体系练兵的新方法、新路径，用体系贡献率检验评判练兵效果，促进体系作战能力快速提升，成为能战善战的精兵劲旅。

A Certain Brigade of the 74th Group Army: “Hand in Hand” Joint Training, Practice the System Combat Capability

Source: China Military Network-People’s Liberation Army Daily Author: Zheng Ye, Guo Shudong, Wang Desai, Zhu Bu Editor: Wang Yigen

2025-03-27

A certain brigade of the 74th Group Army jointly promotes system joint training with multiple military arms forces-

From “back to back” to “hand in hand”

■Zheng Ye People’s Liberation Army Daily reporter Guo Shudong Wang Desai

In mid-spring, the flowers are blooming. The reporter walked into the military training ground of a certain brigade of the 74th Group Army, just in time for a land-air confrontation training to be launched.

At the training site, the “enemy” aircraft quickly descended in altitude and flew at ultra-low altitude along the ridge line in an attempt to evade radar search. Hundreds of kilometers away, the brigade and the friendly air force woven a dense air defense “Skynet”, and formed a multi-type air defense weapon module, waiting for the “enemy” aircraft to fly over.

Not long after, according to the air situation information sent by the friendly air force, the brigade’s radar accurately captured the position of the “enemy” aircraft. At the commander’s command, the missile took off and flew straight to the target, successfully destroying the “enemy” aircraft.

“Although the “enemy” aircraft was beyond the search range of our radar, it could not escape the close monitoring of the joint air defense system. This is the advantage of the system’s victory.” During the training break, the brigade’s missile shooter Wu Xincai told reporters, “With the continuous deepening of system training, the past definition of “gold medal shooter” is being rewritten. Nowadays, only those who are proficient in their own arms and professional combat skills and familiar with the combat knowledge of other military arms can be called “gold medal shooters.”

During the interview, Wu Xincai told reporters about his experience of “failure at Maicheng” - a few years ago, a new type of missile was equipped in the troops, and the officers and men once thought that with the performance advantages of the new equipment, they would be able to win the confrontation training against the opponent. Unexpectedly, the “enemy” aircraft adopted a new tactic to quickly penetrate the defense and cleverly evaded the radar search, causing him, who was known as the “gold medal shooter”, to suffer a defeat.

“Only by integrating into the system can we win future wars.” Repeated training and exchange on the military exercise field forced the officers and men of the brigade to continuously strengthen the combat concept of “training the system and training the system”.

In order to improve the combat capability of the system in a down-to-earth manner, the brigade closely followed the needs of modern air defense operations to deepen system training, established a joint exercise and training mechanism with friendly air forces, and shared air situation information; jointly upgraded and optimized the command information system with scientific research institutes and equipment manufacturers, opened up the command and control link, gave full play to the advantages of the system, expanded the battlefield situation awareness capability, and greatly improved the quality and effectiveness of actual combat training.

“System training is like a ‘shock wave’, impacting the accumulated problems on the training field, changing the training mode of the troops, and updating the training and combat concepts of officers and men.” Battalion Commander Pan of a battalion of the brigade introduced that in the past, due to the limitations of training conditions, they once “had no opponents to train and no air situation to train”, and could only rely on theoretical values and model aircraft to carry out training. Today, the brigade and its neighboring air force units have gone from “back to back” to “hand in hand”,

from “I” to “we”, and have continuously strengthened their “eighteen martial arts” in joint exercises and training, exploring a new path for system training.

In recent years, the brigade has regularly organized its surface-to-air missile, electronic warfare and other units to conduct system training with neighboring air force units; organized multiple types of radars to enter air force airports in batches for training; organized different arms units to conduct offensive and defensive training with a certain unit of the Army Aviation; invited commanders of friendly air force units to the brigade to exchange tactics and tactics, organized surface-to-air missile battalions to embed into naval aviation units for training, and tempered new “swords” in real combat... With the continuous strengthening of system training thinking, the “air defense sword” enabled by the system has gradually revealed its edge.

“Two small aircraft.” As night fell, a wave of confrontation had just ended, and the “enemy” aircraft suddenly broke through at high speed and launched another attack. Wu Xincai quickly operated the radar to lock the target and look for a favorable opportunity. Just as the “enemy” aircraft was about to enter the firing range, a “snowflake” suddenly appeared on the screen, and the target disappeared.

“The ‘enemy’ aircraft is carrying out strong electromagnetic interference!” Seeing that the opponent was about to break through the missile defense, the electronic countermeasures unit of the brigade, which was hiding nearby, took decisive action, and the air situation data from multiple radar detections were quickly transferred to various firepower units. Not long after, the radar, which had “recovered”, locked the target again, and then two missiles were fired at the same time, both hitting the incoming “enemy” aircraft.

Complementary advantages and efficient coordination. In another wave of confrontation, the brigade’s multi-type air defense radar used its own performance advantages to indicate targets for air force fighters, guiding air firepower to carry out precise strikes and successfully annihilating the “enemy”.

After the training, in the central military tent, the officers and men of the brigade and their air force comrades reviewed and summarized together, turning the sparks of thought into winning tricks. During the exchange and discussion, the brigade commander said: “The Army Air Defense Force and the Air Force Aviation Force have carried out system joint training on a regular basis, with each other as opponents, conditions and supports, which has greatly improved the reconnaissance and early warning, firepower strikes and the ability to respond to complex battlefield situations of their respective units.”

Aggregate advantages and temper the “sword edge” of victory. The leaders of the brigade introduced that they deepened system training by embedding multiple military services, routinely organized confrontation data evaluation, coordinated tactics research, and review and reflection, effectively solved multiple key and difficult training problems, innovated multiple tactics and

training methods, and a group of compound combat talents with system combat thinking grew rapidly, and the combat capability of the military system was significantly improved.

Short Review

Use the system contribution rate to test and judge the training effect

■ Zhu Bu

The winning mechanism of modern warfare tells us that without system support, it is difficult to achieve the final victory by relying on only one military service and one equipment to fight alone. Only by integrating each combat unit and various weapons and equipment into the system, integrating strength, aggregating advantages, and releasing efficiency can we increase the chances of winning on the battlefield.

To further promote system training, it is necessary to change from “single group training” to “system joint training”, change “single soldier combat” to “coordinated linkage”, and let the concept of “system victory” penetrate into the end of the squad and platoon and implement it to every soldier. A brigade of the 74th Group Army focused on battlefield needs to deepen system training, actively aimed at overall training of individuals, and served the strong units of the system, so as to realize the unity of different combat forces and effectively improve the overall combat capability of the troops.

Wars must be fought jointly, and soldiers must be trained systematically. All levels should actively embed themselves into the system combat chain, actively explore new methods and new paths for system training, use the system contribution rate to test and judge the training effect, promote the rapid improvement of the system combat capability, and become a strong and capable elite force.

中部战区某调度中心做好上半年新兵运输投送工作

来源：解放军报 作者：张鑫 郭晨 责任编辑：尚晓敏 2025-03-27

中部战区某调度中心做好上半年新兵运输投送工作

情暖新兵入营路

解放军报讯 张鑫、记者郭晨报道：3月中旬，一架满载湖北籍新兵的飞机，从武汉天河机场起飞。这批新兵即将奔赴祖国边疆，为守护万里边关贡献力量。这是中部战区某调度中心严密组织、优化服务，扎实做好今年上半年新兵运输投送工作的一个缩影。

该中心领导介绍，为全力做好上半年新兵运输投送工作，中心及所属军代室紧前筹划部署，紧盯运输需求提报、运力资源分配、服务保障对接等关键环节，会同国防动员系统、新兵接收单位等，科学制订新兵运输计划和应急处置预案。

为高标准、高效率保障新兵顺利入营，该中心积极协调民航管理部门、机场为新兵安排航班、开设专属值机柜台和快速安检通道；与铁路运输部门协商建立”优先购票、专区候车、绿色通道、暖心军供”四位一体保障机制。

在周密做好新兵运输投送工作的同时，该中心还多方协调，为新兵提供各具特色的优质旅途服务。武汉军代室联合航班工作人员，在客舱内开展拥军主题活动，为新兵送上专属登机纪念牌；西安军代室利用省市（县）联动保障机制，为短时停靠列车上的新兵提供丰盛晚餐；宜昌军代室在车站设立医疗保障点，为新兵提供常用药品……

疾驰的高铁上，接过热气腾腾的晚餐，来自河南商丘的新兵王培臣感动地说：”一路上，我们体会到部队和家乡人民的厚爱。到军营后，我们一定刻苦训练、早日建功。”

A Dispatch Center in the Central Theater Command Has Done a Good Job in the Transportation and Delivery of New Recruits in the First Half of the Year

Source: PLA Daily Author: Zhang Xin Guo Chen Editor: Shang Xiaomin 2025-03-27

A dispatch center in the Central Theater Command has done a good job in the transportation and delivery of new recruits in the first half of the year

Warming the new recruits on their way to the camp

PLA Daily News Zhang Xin and reporter Guo Chen reported: In mid-March, a plane full of new recruits from Hubei took off from Wuhan Tianhe Airport. This batch of new recruits are about to go to the border of the motherland to contribute to the protection of the thousands of miles of border. This is a microcosm of the strict organization and service optimization of a dispatch center in the Central Theater Command to do a good job in the transportation and delivery of new recruits in the first half of this year.

The leaders of the center introduced that in order to do their best to do a good job in the transportation and delivery of new recruits in the first half of the year, the center and its military representative office planned and deployed in advance, kept a close eye on key links such as transportation demand submission, transportation resource allocation, and service guarantee docking, and worked with the national defense mobilization system and new recruit receiving units to scientifically formulate new recruit transportation plans and emergency response plans.

In order to ensure the smooth entry of new recruits with high standards and high efficiency, the center actively coordinated with the civil aviation management department and the airport to arrange flights for new recruits, set up exclusive check-in counters and fast security check channels; and negotiated with the railway transportation department to establish a four-in-one guarantee mechanism of "priority ticket purchase, special waiting area, green channel, and warm military supply".

While carefully carrying out the transportation and delivery of new recruits, the center also coordinated with many parties to provide new recruits with high-quality travel services with their own characteristics. The Wuhan Military Representative Office and the flight staff jointly carried out the theme activities of supporting the army in the cabin and presented the new recruits with exclusive boarding commemorative plaques; the Xi'an Military Representative Office used the provincial, municipal (county) linkage guarantee mechanism to provide a sumptuous dinner for new recruits on short-term stop trains; the Yichang Military Representative Office set up a medical guarantee point at the station to provide new recruits with common medicines...

On the high-speed rail, Wang Peichen, a new recruit from Shangqiu, Henan, took over the steaming hot dinner and said with emotion: "Along the way, we have experienced the love of the army and the people of our hometown. After arriving at the military camp, we will definitely train hard and make achievements as soon as possible."

第 76 集团军某旅：岗位践学锻造制胜铁拳

来源：中国军网-解放军报 作者：周柯毅 孙 晨 张磊峰 责任编辑：孙悦

2025-03-28

第 76 集团军某旅认真学习贯彻全国两会精神——

岗位践学锻造制胜铁拳

■周柯毅 孙 晨 解放军报记者 张磊峰

西北戈壁，铁甲轰鸣。近日，第 76 集团军某旅一场实兵对抗训练激战正酣，某型火箭炮车与无人机配合，迅速完成空中侦察、疏散隐蔽、炮火打击等课目。

“在十四届全国人大三次会议解放军和武警部队代表团全体会议上，习主席围绕高质量完成我军建设‘十四五’规划目标任务提出明确要求、作出全面部署。”走下训练场，该旅三级军士长侯昆围绕学习习主席重要讲话精神，同官兵开展讨论交流。

入伍 18 年，从普通一兵成长为专业技术骨干，侯昆亲历旅队火力打击能力由近距到远程、从单炮到协同的转变。”新装备列装，我们更要立足岗位战位，努力创新战法训法，为新质战斗力生成打下坚实基础。”侯昆的发言让在场官兵深受鼓舞。

“我们必须贯彻落实好习主席关于‘加快发展新质战斗力’的重要指示精神，更新思想观念，把握新域新质作战力量建设规律，抓住机遇、乘势而上，勇于创新、苦干实干。”该旅领导介绍，全国两会闭幕后，他们掀起学习贯彻会议精神热潮，通过营区广播、信息视窗、强军网等滚动播放；遴选精武标兵、技术骨干和先进典型等，走上讲台、走进战位，紧贴

使命任务与强军实践话心得、谈体会；推动学习成果向任务聚焦、向战位延伸，引导官兵积极研练新装备、探索新战法。

前不久，该旅赴高原驻训。由于地形天候复杂，加之新装备信息化程度高，对官兵装备操作能力提出更高要求，一些课目训练一时难以取得突破，部分官兵产生了畏难情绪。

为破除制约战斗力提升的思想误区，一场群众性讨论在驻训场展开。”学习贯彻全国两会精神，就是要在推动新质战斗力生成上闯出新路子”“一代人有一代人的使命，一代人有一代人的担当。今天，让新装备加快形成战斗力，是我们这一代军人必须交出的使命答卷”……官兵结合岗位实际展开讨论，在交流中廓清思想迷雾、凝聚奋进力量。

随后，该旅各级干部骨干组成”党员炮班”，奋战训练一线；抓住难题攻关这个关键，以党委支部带动基层班排、以问题牵引带动谋战研战，先后攻克单兵操作、地空协同等难题，多种战法得到检验，官兵自主研发的多个技术革新成果显威训练场。

深学笃行砺斗志，立足岗位谋打赢。连日来，该旅广泛开展战备拉动、信息组网和实兵训练，官兵斗志昂扬，纷纷表示要铸牢政治忠诚、打好攻坚之战，用过硬本领锻造制胜铁拳。

A Certain Brigade of the 76th Group Army: Practice on the Job to Forge a Winning Iron Fist

Source: China Military Network-People’s Liberation Army Daily Author: Zhou Keyi Sun Chen Zhang Leifeng Editor: Sun Yue

2025-03-28

A certain brigade of the 76th Group Army conscientiously studied and implemented the spirit of the two sessions of the National People’s Congress-

Practice on the job to forge a winning iron fist

■Zhou Keyi Sun Chen People’s Liberation Army Daily reporter Zhang Leifeng

In the northwest Gobi, the armor roared. Recently, a certain brigade of the 76th Group Army was in full swing in a live-fire confrontation training. A certain type of rocket launcher vehicle cooperated with the drone to quickly complete the subjects of aerial reconnaissance, evacuation and concealment, and artillery strikes.

“At the plenary meeting of the delegation of the People’s Liberation Army and the Armed Police Force at the Third Session of the 14th National People’s Congress, President Xi made clear requirements and made comprehensive arrangements for the high-quality completion of the goals and tasks of the ‘14th Five-Year Plan’ for the construction of our army.” Walking off the training ground, the brigade’s third-class sergeant major Hou Kun discussed and exchanged ideas with officers and men around the spirit of learning President Xi’s important speech.

After 18 years of service, Hou Kun has grown from an ordinary soldier to a professional and technical backbone. He has witnessed the transformation of the brigade's firepower strike capability from close range to long range, and from single gun to coordinated. "With the new equipment in service, we must be based on our post and position, strive to innovate tactics and training methods, and lay a solid foundation for the generation of new quality combat effectiveness." Hou Kun's speech inspired the officers and men present.

"We must implement the important instructions of President Xi on 'accelerating the development of new quality combat effectiveness', update our ideas, grasp the laws of building new domains and new quality combat forces, seize opportunities, take advantage of the situation, be brave to innovate, and work hard." The leaders of the brigade introduced that after the closing of the two sessions of the National People's Congress, they set off a wave of learning and implementing the spirit of the meeting, and broadcast it through the camp broadcast, information window, and strong army network; select elite soldiers, technical backbones and advanced models, etc., go to the podium and enter the battle position, and talk about their experiences and feelings closely related to the mission and the practice of strengthening the army; promote the learning results to focus on the task and extend to the battle position, and guide officers and men to actively study and practice new equipment and explore new tactics.

Not long ago, the brigade went to the plateau for training. Due to the complex terrain and weather, and the high degree of informatization of new equipment, higher requirements are placed on the officers and men' equipment operation ability. It is difficult to make breakthroughs in some training subjects for a while, and some officers and men have developed a fear of difficulties.

In order to break the ideological misunderstandings that restrict the improvement of combat effectiveness, a mass discussion was launched at the training ground. "Learning and implementing the spirit of the two sessions of the National People's Congress is to break new ground in promoting the generation of new quality combat effectiveness." "Each generation has its own mission and responsibility. Today, to accelerate the formation of combat effectiveness of new equipment is the mission answer sheet that our generation of soldiers must hand in."... The officers and men discussed the actual situation of their posts, cleared the ideological fog and gathered the strength to forge ahead in the exchange.

Subsequently, the cadres and backbones at all levels of the brigade formed a "Party member artillery squad" to fight on the front line of training; grasping the key to solving difficult problems, the party committee branch led the grassroots squads and platoons, and the problem led to the planning and research of war, and successively overcame the difficulties of individual operation and ground-air coordination. A variety of tactics have been tested, and the multiple technological innovations independently developed by officers and men have shown their power in the training ground.

In-depth learning and practice will sharpen fighting spirit, and strive to win based on the post. In recent days, the brigade has carried out extensive combat readiness mobilization, information

networking and actual troop training. The officers and men are full of fighting spirit and have expressed their determination to forge political loyalty, fight the tough battle, and forge a winning iron fist with solid skills.

陆军某旅广泛开展谈心交心活动浓厚团结奋斗氛围

来源：中国军网-解放军报 作者：徐振 任旭 王宁 责任编辑：孙悦

2025-03-28

陆军某旅广泛开展谈心交心活动浓厚团结奋斗氛围——

打开心灵窗口 拉近情感距离

■徐 振 解放军报记者 任 旭 特约记者 王 宁

“新兵陈鑫被评为训练之星，荣登龙虎榜！”前不久，陆军某旅一个连队的好消息，引发官兵热议。

“我的进步得益于身边战友的帮助，是大家共同努力的结果。”谈起自己的成长，陈鑫说。

此前，由于训练跟不上，陈鑫一度产生自卑情绪，不愿与人交流。排长徐翔发现后，主动找他谈心交心，帮他分析原因，向他传授训练经验。连队其他干部骨干也纷纷靠上前，帮助陈鑫练力量、练耐力、练技巧。经过大家的共同努力，陈鑫的训练成绩提高很快，性格也变得开朗起来。

“谈心交心活动开展以来，官兵团结奋斗氛围日益浓厚。像陈鑫这样，在战友帮助下取得进步的官兵还有很多。”该旅一名干部告诉记者。

记者了解到，此前，该旅领导调研发现，有的年轻官兵独立意识强，对战友关心不够，内部关系不够密切。”谈心交心、解难帮困，是我军的优良传统，是增进战友情谊的有效方法。”该旅党委一班人认真学习中央军委政治工作会议精神进一步认识到，必须引导官兵弘扬我军优良传统、培育深厚的战友情谊，持续激发上下团结奋斗的热情。为此，他们研究决定广泛开展谈心交心活动，要求带兵人主动找官兵交流思想，帮助他们解决思想困惑和工作生活困难。

“谈心交心是心与心的交流，态度一定要真诚”“等上门不如找上门，叫过来不如走过去”……在该旅某营，记者看到营部党支部委员、三级军士长施冬海正认真阅读一本名为《谈心交心细节提示》的小册子。

施冬海告诉记者，针对部分带兵人不会谈心、一些战士不愿谈心等问题，旅领导走上讲台，为官兵讲述谈心交心、互帮互助的意义；组织基层经验丰富的机关干部走进班排，面对面

同官兵谈心，手把手向带兵人传授谈心方法；梳理优秀带兵人的谈心经验并编辑成册，供大家学习借鉴。

“这些措施不仅让我更加认识到谈心交心的重要性，还学会了很多谈心交心的方法。”施冬海说。

去年底，营里决定将营部中士小胡调整到某连。小胡得知消息，感觉自己被”下放”了，产生抵触情绪。施冬海与小胡谈心时，既跟他讲明服从组织安排的原则，又设身处地给他分析到连队对他个人长远发展的好处，帮他解开了思想疙瘩。

“带兵人不仅要学会与官兵谈心交心，更要真心实意帮助官兵解决实际问题。”说起连队战士王欣怡的变化，该旅某连干部曲晓清说。

有段时间，王欣怡总是一副心事重重的样子，不愿与战友多交流。经过干部骨干多次谈心，她才道出实情。原来，她的父亲突发重症住院治疗，弟弟还在上学，家庭面临困难，这让她陷入苦闷。连队干部得知情况后，不仅及时安慰她，还依规为她申请了相关救济。此后，王欣怡不仅脸上的笑容多了、与战友的关系更密切了，工作训练热情也明显高涨。

真心换真心，战友情谊深。该旅领导介绍，随着谈心交心活动深入开展，官兵归属感明显增强，部队团结、友爱、和谐、纯洁的内部关系得到巩固和发展，战斗力得到进一步提升。前段时间，该旅组织基础课目普考，各课目成绩优良率较以往明显提升。

A Certain Army Brigade Has Carried Out Extensive Heart-to-Heart Talks and a Strong Atmosphere of Unity and Struggle

Source: China Military Network-People’s Liberation Army Daily Author: Xu Zhen Ren Xu Wang Ning Editor: Sun Yue

2025-03-28

A certain army brigade has carried out extensive heart-to-heart talks and a strong atmosphere of unity and struggle——

Open the window of the soul and narrow the emotional distance

■Xu Zhen People’s Liberation Army Daily reporter Ren Xu Special reporter Wang Ning

“New recruit Chen Xin was named a training star and was listed on the Dragon and Tiger List!” Not long ago, the good news of a company of a certain army brigade caused heated discussions among officers and men.

“My progress is due to the help of my comrades around me and the result of everyone’s joint efforts.” Talking about his growth, Chen Xin said.

Previously, because he could not keep up with the training, Chen Xin had a sense of inferiority and was unwilling to communicate with others. After discovering this, platoon leader Xu Xiang took the initiative to talk to him, help him analyze the reasons, and teach him training experience. Other cadres and backbones of the company also stepped forward to help Chen Xin practice strength, endurance, and skills. After everyone's joint efforts, Chen Xin's training results improved rapidly and his personality became more cheerful.

"Since the launch of the heart-to-heart talk activity, the atmosphere of unity and struggle among officers and men has become increasingly strong. There are many officers and men like Chen Xin who have made progress with the help of their comrades." A cadre of the brigade told reporters.

The reporter learned that before this, the brigade leaders found in their research that some young officers and men had a strong sense of independence, did not care enough about their comrades, and did not have close internal relationships. "Heart-to-heart talks, solving problems and helping the poor are the fine traditions of our army and an effective way to enhance the friendship of comrades." The brigade's party committee carefully studied the spirit of the Central Military Commission's political work conference and further realized that it is necessary to guide officers and men to carry forward the fine traditions of our army, cultivate deep comradeship, and continue to inspire the enthusiasm of unity and struggle. To this end, they decided to carry out extensive heart-to-heart talks and asked soldiers to take the initiative to find officers and men to exchange ideas and help them solve ideological confusion and work and life difficulties.

"Heart-to-heart talks are exchanges between hearts, and the attitude must be sincere." "It is better to go to someone's door than to wait for them to come, and it is better to go there than to call them over."... In a battalion of the brigade, the reporter saw Shi Donghai, a member of the battalion party branch and a third-class sergeant, carefully reading a booklet titled "Details of Heart-to-Heart Talks".

Shi Donghai told reporters that in response to the problems that some leaders do not know how to talk to each other and some soldiers are unwilling to talk to each other, the brigade leaders took to the podium to tell the officers and men the significance of heart-to-heart talks and mutual help; organized grassroots experienced cadres to go to the squads and platoons, talk to the officers and men face to face, and teach the leaders how to talk to each other; sorted out the experience of excellent leaders in talking to each other and compiled it into a book for everyone to learn from.

"These measures not only made me more aware of the importance of heart-to-heart talks, but also taught me a lot of ways to talk to each other." Shi Donghai said.

At the end of last year, the battalion decided to transfer the battalion sergeant Xiao Hu to a certain company. When Xiao Hu heard the news, he felt that he was "demoted" and had resistance. When Shi Donghai talked with Xiao Hu, he not only explained to him the principle of obeying the organization's arrangements, but also put himself in his shoes and analyzed the benefits of the company to his personal long-term development, helping him to untie the knot in his mind.

“Leaders should not only learn to talk to officers and men, but also sincerely help officers and men solve practical problems.” Speaking of the changes in the company soldier Wang Xinyi, Qu Xiaoqing, a cadre of a company in the brigade, said.

For a period of time, Wang Xinyi always looked worried and unwilling to communicate more with her comrades. After many heart-to-heart talks with cadres and backbones, she told the truth. It turned out that her father suddenly became seriously ill and was hospitalized, her younger brother was still in school, and her family was facing difficulties, which made her depressed. After the company cadres learned about the situation, they not only comforted her in time, but also applied for relevant relief for her in accordance with the regulations. Since then, Wang Xinyi not only smiled more, had a closer relationship with her comrades, but also had a significantly higher enthusiasm for work and training.

Sincerity for sincerity, comrades-in-arms have deep friendship. The brigade leaders introduced that with the in-depth development of the heart-to-heart talks, the sense of belonging of officers and men has been significantly enhanced, the unity, friendship, harmony and purity of the internal relations of the troops have been consolidated and developed, and the combat effectiveness has been further improved. Some time ago, the brigade organized a general examination of basic subjects, and the rate of excellent scores in each subject has been significantly improved compared with the past.

第 72 集团军某旅设计多条思想政治教育线路构建体系课堂

来源：解放军报 作者：刘 灿 向黎鸣 童祖静 责任编辑：尚晓敏 2025-03-28

第 72 集团军某旅设计多条思想政治教育线路构建体系课堂——

沿线走一趟 思想受触动

■刘 灿 解放军报记者 向黎鸣 特约记者 童祖静

近日，记者在第 72 集团军某旅”红军榴炮连”蹲点时，恰遇兄弟营连的官兵到该连荣誉室参观。一问才知，这些官兵正在开展以”作风优良才能塑造过硬战斗部队”为主题的教育，课堂分别设在该连和另外两个点位。

为何要这样安排？带着好奇，记者跟上参观队伍一探究竟。

“老板，我们吃了你半坛咸菜、几根大葱、烧了几根柴，共补你黄豆六升。”一张当年红军留下的字条，吸引官兵驻足观看。听着讲解员的介绍，他们深刻感悟人民子弟兵薪火相传的铁纪作风。

离开”红军榴炮连”，官兵来到”政治工作成绩优异连”。该连先辈在抗美援朝时期帮助朝鲜人民兴建学校的故事，又给大家带来新的触动。紧接着，官兵列队在旅”作风践履墙”前，听授课人讲解如何培养老老实实的思想作风、扎扎实实的工作作风和朴朴实实的生活作风。

一堂教育课，换了 3 个地点，内容各有侧重。该旅宣传科科长的介绍，让记者明白了其中的用意：”通过教育资源的有机整合，将多个教育意义相近的点位串联起来，打造’流动课堂’，给官兵提供营养更加丰富的’精神大餐’。”

为此，该旅精选 16 个点位，综合考量其位置、教育承载等因素，规划设计出”忠诚”“党建”“胜战”等多条主题线路，并以历史故事、精神谱系为脉络，筹划开展教育活动，用”众人拾柴”代替”单打独斗”、用”体系发力”代替”零敲碎打”、用”创新求变”代替”千篇一律”，让官兵在常学常新、常悟常进中不断强化思想武装、筑牢信仰之基。

前不久，该旅某营火力连受领重要任务。出征前，他们组织官兵先后来到旅”坚守英雄”广场、战斗英烈事迹长廊、”战斗模范连”荣誉室等点位，开展战斗精神教育。

教育中，官兵学习的战例既有”狭路相逢勇者胜”的浴血鏖战，也有”宜将剩勇追穷寇”的连战连捷，更有”舍生忘死闯敌阵”的拔点攻坚，这穿越历史时空的一幕幕，点燃了官兵们的血性胆气。

教育一结束，该连立刻开展誓师动员。官兵士气高昂、话语铿锵，大家纷纷表示，要像革命先辈那样，努力克服一切艰难险阻，坚决完成任务。

“同题串讲，质效倍增。”该旅政治工作部领导说，这种教育方式的优点在于多点位同为一堂课服务，使教育内容更加丰富、角度更加多元、体验更加真切。官兵沿着主题线路走一趟，思想就会深受触动。

如今在该旅，依托教育线路开展同题串讲，已成为各营连的常态。记者在采访中看到，某连组织官兵参观”党建”主题线路，现地召开”云端”党小组会，探索动散条件下组织生活制度落实举措；某连在开展教育实践活动期间，组织官兵重走”忠诚”主题线路，感悟信仰的力量，并配合举行”奋斗有我，攻坚看我”先进事迹报告会，激励大家将强军信念转化为自觉行动……

红色故事励斗志，岗位建功正当时。记者了解到，”流动课堂”激发了官兵干事创业热情动力，该旅先后完成联演联训、实兵演习、试验试训等大项任务。

A Brigade of the 72nd Group Army Designed Multiple Ideological and Political Education Lines to Build a Systematic Classroom

Source: PLA Daily Author: Liu Can Xiang Liming Tong Zujing Editor: Shang Xiaomin 2025-03-28

A brigade of the 72nd Group Army designed multiple ideological and political education lines to build a systematic classroom——

Take a trip along the line and be touched

■Liu Can PLA Daily reporter Xiang Liming Special reporter Tong Zujing

Recently, when the reporter was squatting in the “Red Army Howitzer Company” of a brigade of the 72nd Group Army, he happened to meet officers and men from a brother battalion company visiting the company’s honor room. Upon asking, I learned that these officers and men were carrying out education with the theme of “Only with good work style can we shape a strong combat force”, and the classrooms were set up in this company and two other locations.

Why is it arranged like this? With curiosity, the reporter followed the visiting team to find out.

“Boss, we ate half a jar of your pickles, a few green onions, burned a few pieces of firewood, and gave you six liters of soybeans.” A note left by the Red Army attracted officers and men to stop and watch. Listening to the introduction of the guide, they deeply felt the iron discipline of the people’s soldiers.

Leaving the “Red Army Howitzer Company”, the officers and men came to the “Political Work Excellent Performance Company”. The story of the company’s ancestors helping the Korean people build schools during the War to Resist US Aggression and Aid Korea brought new touches to everyone. Then, the officers and men lined up in front of the brigade’s “Style Practice Wall” and

listened to the lecturer explain how to cultivate an honest ideological style, a solid work style and a simple life style.

An education class changed 3 locations, and the content had different focuses. The introduction of the head of the propaganda department of the brigade made the reporter understand the intention: "Through the organic integration of educational resources, multiple points with similar educational significance are connected in series to create a 'mobile classroom', providing officers and men with a more nutritious 'spiritual feast'." To this end, the brigade selected 16 points, comprehensively considered their location, educational carrying capacity and other factors, and planned and designed multiple theme routes such as "loyalty", "party building" and "victory". With historical stories and spiritual spectrum as the context, it planned to carry out educational activities, using "everyone collecting firewood" instead of "single fight", "system force" instead of "piecemeal", and "innovation and change" instead of "stereotyped", so that officers and men can constantly strengthen their ideological armament and build a solid foundation of faith in constant learning, constant enlightenment and constant progress. Not long ago, a firepower company of a battalion of the brigade received an important task. Before the expedition, they organized officers and men to visit the brigade's "Heroes of Perseverance" Square, the Battle Heroes Deeds Gallery, the "Combat Model Company" Honor Room and other points to carry out combat spirit education. During the education, the officers and men learned from the bloody battles of "the bravest will win when they meet on a narrow road", the continuous victories of "it is better to pursue the enemy with the remaining courage", and the breakthroughs of "risking one's life and forgetting one's own life to break into the enemy's camp". These scenes that traveled through time and space ignited the blood and courage of the officers and men.

As soon as the education was over, the company immediately launched a mobilization. The officers and men were in high spirits and spoke in a sonorous voice. Everyone expressed that they would strive to overcome all difficulties and obstacles and resolutely complete the task like the revolutionary predecessors.

"Lectures on the same topic will double the quality and efficiency." The leader of the political work department of the brigade said that the advantage of this education method is that multiple points serve as one class, making the education content richer, the angles more diverse, and the experience more real. The officers and men will be deeply touched when they take a trip along the theme route.

Nowadays, in the brigade, it has become the norm for all battalions and companies to carry out lectures on the same topic based on the education route. During the interview, the reporter saw that a certain company organized officers and men to visit the "Party Building" theme route, held a "cloud" party group meeting on the spot, and explored the implementation measures of the organizational life system under mobile conditions; during the educational practice activities, a certain company organized officers and men to re-walk the "loyalty" theme route to feel the power of faith, and held a "struggle with me, and attack with me" advanced deeds report meeting to

encourage everyone to transform the belief of strengthening the army into conscious action... Red stories inspire fighting spirit, and it is time to make contributions at work. The reporter learned that the “mobile classroom” has stimulated the enthusiasm and motivation of officers and men to do things and start businesses. The brigade has successively completed major tasks such as joint exercises and training, live-fire exercises, and test training.

陆军某旅”花小钱办大事”解决无人机维修保障难题

来源：解放军报 作者：盛呈祥 章志扬 责任编辑：孙悦 2025-03-29

陆军某旅”花小钱办大事”解决无人机维修保障难题——

易损件好修还能精修

■盛呈祥 章志扬

近日，陆军某旅无人机专修室内，装备维修员将一组有裂纹的旋翼支架放在维修平台上进行维修。经过革新技术修复的旋翼重新装回机身，无人机再次呼啸升空。

“过去，无人机遇到这种程度的损伤只能报废，现在有了高科技加持，我们就能让其’起死回生’。”这名维修员告诉笔者。

今年以来，该旅机关调研经费使用情况时发现，随着模拟化训练逐步推开，无人机部件损坏率随之提高。面对旋翼断裂、支架变形等常见问题，传统的”换件维修”模式不仅周期长，而且单个部件采购成本较高。”每次看着受损的无人机，既心疼装备损耗，更担心训练连续性难以保证。”该旅一名无人机操作教练员道出新装备保障的痛点。

“表面看是经费损耗，深层次暴露的是保障能力短板。”面对难题，该旅党委瞄准”推进装备维修降本增效”的措施引入革新技术，在无人机专修室开辟自主维修阵地，既拧紧了资源消耗的”阀门”，也打开了战斗力提升的”闸门”。越来越多的维修骨干在破解技术难题中练就了”即时精修”的硬功。

“降本增效的关键在于激活技术赋能。”该旅装备管理科科长向笔者介绍，维保小组不仅实现大部分易损件的自主再造，更尝试优化结构，使维修后的部件更能抵抗冲击，让无人机的全寿命周期得以延长。

“装备的自主维修能力是训练的保障力，也是战斗力的倍增器。”该旅无人机专修室负责人告诉笔者，节省下来的维修经费被用于购买先进的性能模块。

“旅里’花小钱办大事’的创新之路证明，勤俭建军不仅是简单的节衣缩食，更要通过科技赋能实现保障效能倍增。”该旅领导表示，下一步他们将把无人机部件维修经验推广至全装备领域，让”用技术创新降本增效”的方式向战场保障最前沿延伸。

A Certain Army Brigade “Spends Little Money to Do Big Things” to Solve the Problem of Drone Maintenance and Support

Source: PLA Daily Author: Sheng Chengxiang Zhang Zhiyang Editor: Sun Yue 2025-03-29

A certain army brigade “spends little money to do big things” to solve the problem of drone maintenance and support-

Vulnerable parts can be repaired easily and finely

■ Sheng Chengxiang Zhang Zhiyang

Recently, in the drone repair room of a certain army brigade, equipment maintenance personnel placed a set of cracked rotor brackets on the maintenance platform for maintenance. The rotors repaired by innovative technology were reinstalled on the fuselage, and the drone roared into the sky again.

“In the past, drones could only be scrapped when they encountered this degree of damage. Now with the blessing of high technology, we can make it “resurrect from the dead.” The maintenance worker told the author.

Since the beginning of this year, when the brigade investigated the use of funds, it was found that as the simulation training was gradually launched, the damage rate of drone parts increased. Faced with common problems such as rotor fracture and bracket deformation, the traditional “replacement maintenance” model not only has a long cycle, but also has a high procurement cost for a single component. “Every time I look at a damaged drone, I feel bad about the equipment loss and worry about the difficulty in ensuring the continuity of training.” A drone operator instructor of the brigade said the pain point of new equipment support.

“On the surface, it is a loss of funds, but at a deeper level, it exposes the shortcomings of support capabilities.” Faced with the problem, the brigade’s Party Committee introduced innovative technologies to promote the measures of “promoting equipment maintenance to reduce costs and increase efficiency” and opened up an independent maintenance position in the drone repair room, which not only tightened the “valve” of resource consumption, but also opened the “gate” of combat effectiveness. More and more maintenance backbones have mastered the hard skills of “instant fine repair” in solving technical problems.

“The key to reducing costs and increasing efficiency lies in activating technology empowerment.” The head of the equipment management section of the brigade introduced to the author that the maintenance team not only achieved the independent reconstruction of most vulnerable parts, but also tried to optimize the structure so that the repaired parts can better resist impact, so that the full life cycle of the drone can be extended.

“The independent maintenance capability of the equipment is the guarantee of training and a multiplier of combat effectiveness.” The person in charge of the drone repair room of the brigade told the author that the saved maintenance funds were used to purchase advanced performance modules.

“The brigade’s innovative approach of ‘spending little money to achieve great things’ proves that building the army with diligence and frugality is not just a simple matter of tightening spending, but also about doubling the effectiveness of support through technological empowerment.” The brigade leaders said that in the next step they will promote the experience of drone component maintenance to the entire equipment field, allowing the method of “using technological innovation to reduce costs and increase efficiency” to extend to the forefront of battlefield support.

第 74 集团军某旅集约统训加速能力生成

来源：解放军报 作者：罗彬 李由之 责任编辑：孙悦 2025-03-29

第 74 集团军某旅

集约统训加速能力生成

解放军报讯 罗彬、记者李由之报道：”发现’敌’步战车，短停’歼灭’！”春日粤北，战车驰骋，第 74 集团军某旅一场装甲车车长考核紧张进行。列兵车长聂雄伟和战友成功处置多个临机特情，顺利通过考核。

“接触车长专业时间不长，聂雄伟通过刻苦学习和训练，已基本掌握车长岗位所需专业技能，这是集约统训带来的成效。”该旅某营干部告诉记者。据了解，为提升官兵训练质效，他们针对专业种类多、场地保障难、部分专业教练员组训能力弱等实际，在全旅范围内统筹训练资源，遴选经验丰富的专业骨干，根据不同官兵能力水平，分级分类制订训练计划，开展专业集中强训。

从基础入门到重难点攻关、从理论学习到实操技能……记者在训练场看到，一块场地被划分为多个片区，不同训练水平的官兵正分组展开针对性训练。

驾驶训练场上，面对高难度组合障碍路段，驾驶员李建斌按照首席教练员传授的技能要领快速通过；无人机飞行训练，操作手成嘉文操控无人机精准穿越障碍，完成目标态势采集……记者翻看训练成绩登记册看到，随着集约统训逐步深入，各专业整体优良率稳步提升。

“训练场连着战场，集约统训能更好形成向战合力。”该旅领导告诉记者，通过集约统训、集中强训，训练资源配置持续优化，进一步推升部队战斗力。

The 74th Group Army Brigade's Intensive Training Accelerates the Generation of Capabilities

Source: PLA Daily Author: Luo Bin Li Youzhi Editor: Sun Yue 2025-03-29

74th Group Army Brigade

Intensive training accelerates the generation of capabilities

PLA Daily News Luo Bin and reporter Li Youzhi reported: "Discover the 'enemy' infantry fighting vehicle, stop briefly to 'annihilate'!" In the spring in northern Guangdong, the tanks are galloping, and an armored vehicle commander assessment of a brigade of the 74th Group Army is in full swing. Private armored vehicle commander Nie Xiongwei and his comrades successfully handled multiple emergency special situations and passed the assessment smoothly.

"It's not long since I came into contact with an armored vehicle commander. Through hard study and training, Nie Xiongwei has basically mastered the professional skills required for the position of tank commander. This is the result of intensive training." A battalion cadre of the brigade told reporters. It is understood that in order to improve the quality and effectiveness of officers and men' training, they have coordinated training resources throughout the brigade, selected experienced professional backbones, formulated training plans according to the different levels of officers and men' abilities, and carried out professional concentrated training.

From basic entry to key and difficult points, from theoretical learning to practical skills... The reporter saw at the training ground that a field was divided into multiple areas, and officers and men of different training levels were conducting targeted training in groups.

On the driving training ground, facing the difficult combination obstacle section, driver Li Jianbin quickly passed it according to the skills taught by the chief instructor; in drone flight training, operator Cheng Jiawen controlled the drone to accurately cross obstacles and completed the target situation collection... The reporter looked through the training results register and saw that with the gradual deepening of intensive training, the overall excellent rate of each profession has steadily increased.

"The training ground is connected to the battlefield, and intensive training can better form a joint force for war." The brigade leader told reporters that through intensive training and concentrated training, the allocation of training resources has been continuously optimized, further boosting the combat effectiveness of the troops.

第 76 集团军某旅精准选岗 助力新兵迈好军旅生涯关键一步

来源：解放军报 作者：李星浒 周柯毅 宋义忠 责任编辑：孙悦 2025-03-30

第七十六集团军某旅探索建立新兵定岗机制——

精准选岗：迈好军旅生涯关键一步

■李星浒 周柯毅 宋义忠

新兵进入专业岗位后参加训练。姬童 摄

“我申请担任导弹射手！”日前，第 76 集团军某旅组织新兵定岗会，新兵余秋雨经过慎重考虑，申请走上导弹射手岗位。笔者在定岗会上看到，下连不久的新兵们，按个人意愿申请岗位，并在登记表上签下自己的姓名。

拿着登记表，该旅人力资源科李科长告诉笔者，未来一段时间内，机关将按照”单位需要、能力匹配、个人自愿、人岗相适”原则，对新兵岗位适应情况进行综合打分，并最终为新兵定岗。

“机关梳理营连岗位需求后向全体新兵公布；新兵根据自身情况提出申请；机关与营连分析新兵岗位实际表现后最终定岗。”李科长告诉笔者，这是旅队新兵定岗机制的主要过程，经过几年实践探索，不少基层营连反映，新兵选岗定岗精准度更高了。

据了解，该旅前些年采取的新兵定岗方式较为粗放，少数新兵走上岗位后才发现人岗不适。回忆那段往事，该旅一名领导感慨：”一边是战士后悔‘没选好’，一边是营连感慨‘没挑对’，既不利于战士成长成才，也不利于基层建设发展。”

该旅领导告诉笔者，为了帮助新兵迈好军旅生涯关键一步，尽可能让他们在定岗时做到人岗相适、人尽其才，该旅探索建立新兵定岗机制。

这名领导以 2024 年下半年入伍新兵为例，向笔者详细道来，这批新兵下连之前，他们根据旅机关提供的信息，系统梳理新兵的学历层次、专业特长等，对这批新兵的整体情况做到”心中有数”；下连之初，营连干部和骨干利用平时训练、谈心谈话等时机，进一步了解新兵性格、兴趣爱好等个人情况，并依据旅队统一部署，组织专业骨干为新兵们进行集中宣讲，介绍不同岗位的任务定位、能力要求等基本信息，引导新兵结合自身意愿科学合理提出申请；下连一段时间后，机关根据新兵岗位适应情况进行综合打分、适当调整。

“新兵初入军营，即便开展集中宣讲，他们对各专业岗位的认识也不够深，个人申请是否依旧存在‘一厢情愿’现象？”面对笔者的疑问，这名领导介绍，为了帮助新兵精准选岗，

各营连安排班长为新兵进一步讲解各专业具体情况，让新兵从自身实际出发长远考虑，提高选岗精准度。

下士李铭堃是大学生士兵，在校期间学的是汽车检测与维修技术专业。听完营里组织的集中宣讲后，他对汽车修理专业产生了浓厚兴趣，并向班长刘亚鑫说了自己的想法。一次谈心时，刘亚鑫为李铭堃详细介绍了汽车修理专业岗位具体情况后说道：”这个岗位虽然听起来与你所学专业很相近，但对实操技能要求很高，而你的长处是理论知识扎实。”听完班长的建议，李铭堃经过深思熟虑，最终申请了更适合自己的机械设备检修岗位。走上岗位之后，他积极发挥自身特长，干得十分出色，专业训练成绩一直处于同批新兵前列。在机关组织的新兵适岗情况打分中，李铭堃的综合排名位列机械设备检修专业第一。

笔者翻阅选岗新兵《量化评分表》发现，高学历人才、急需紧缺专业、拥有专业证书……除新兵阶段考核成绩评分这个共同项目外，还有 10 余个聚焦专业需求和实际能力的加分项。

某营新兵司晨晖大学期间主修的是汉语言文学专业，若是依据所学专业申请导弹射手岗位并不占优势，但他大学期间不仅考取了无人机执照，还两次在无人机飞行比赛中获奖。定岗时，他凭借这一特长，走上导弹射手岗位。

“定岗并不是‘一锤子买卖’，我们根据新兵岗位表现视情组织调整。”李科长告诉笔者，首次定岗后，他们为每名新兵建立成长档案，动态掌握新兵成长进步情况，按照”个人潜力评估、岗位匹配度分析、战斗力贡献值测算”原则，结合新兵岗位适应情况和单位实际需求，动态组织调整。

紧接着，李科长向笔者讲述了某导弹营上等兵刘天一的经历。入伍前，刘天一学的是气象专业，下连后他申请了导弹操作手岗位。一段时间后，他发现自己与导弹操作手岗位并不适配，日常训练常常感到很吃力。岗位调整时，他主动申请转岗到雷达专业。在新岗位上，他不仅快速掌握了雷达专业知识和操作技巧，还在专业考核中取得优异成绩。

“每名官兵都是战斗力生成链路上的一环，精准定岗、人尽其才，关乎部队战斗力生成质效。”该旅领导表示，探索施行新兵定岗机制以来，旅队新兵人岗适配率稳步提升。下一步，他们将继续秉持”以战领建、为战选才”理念，进一步完善这一机制，为制胜未来战场培养更多高素质专业化人才。

A Brigade of the 76th Group Army Selects Positions Accurately to Help Recruits Take a Key Step in Their Military Career

Source: PLA Daily Author: Li Xinghu Zhou Keyi Song Yizhong Editor: Sun Yue 2025-03-30

A brigade of the 76th Group Army explores the establishment of a mechanism for recruits to be assigned positions——

Accurate selection of positions: a key step in a good military career

■Li Xinghu Zhou Keyi Song Yizhong

Recruits participate in training after entering professional positions. Photo by Ji Tong

“I apply to be a missile shooter!” A few days ago, a brigade of the 76th Group Army organized a recruit assignment meeting. After careful consideration, recruit Yu Qiuyu applied to take the position of missile shooter. At the assignment meeting, the author saw that the recruits who had just joined the company applied for positions according to their personal wishes and signed their names on the registration form.

Holding the registration form, Li, the chief of the brigade's Human Resources Office, told me that in the future, the office will comprehensively score the recruits' job adaptability according to the principle of “unit needs, ability matching, personal willingness, and people-to-job matching”, and finally assign positions for the recruits.

“The office will sort out the job requirements of the battalion and company and announce them to all recruits; the recruits apply according to their own situation; the office and the battalion and company will analyze the actual performance of the recruits and finally assign them positions.” Li told me that this is the main process of the brigade's recruit assignment mechanism. After several years of practical exploration, many grassroots battalions and companies have reported that the accuracy of recruits' job selection and assignment has been higher.

It is understood that the brigade's recruit assignment method adopted in previous years was relatively extensive, and a few recruits found that they were not suitable for their positions after they took up their posts. Recalling that period, a leader of the brigade lamented: “On one hand, the soldiers regretted that they 'did not choose well', and on the other hand, the battalions and companies lamented that they 'did not choose the right one', which was not conducive to the growth and development of soldiers, nor to the development of grassroots construction.”

The leader of the brigade told the author that in order to help the recruits take a key step in their military career and to make them fit the positions as much as possible and make the best use of their talents when they are assigned positions, the brigade explored the establishment of a mechanism for assigning positions for recruits.

Taking the recruits who will join the army in the second half of 2024 as an example, the leader told the author in detail that before these recruits were assigned to the company, they systematically sorted out the recruits' educational level, professional expertise, etc. based on the information provided by the brigade headquarters, and had a “clear idea” of the overall situation of these recruits; at the beginning of the company, the cadres and backbones of the battalion and company used opportunities such as daily training and heart-to-heart talks to further understand the personal

situation of the recruits, such as their personalities, interests and hobbies, and organized professional backbones to conduct centralized lectures for the recruits according to the unified deployment of the brigade, introducing the basic information such as the task positioning and ability requirements of different positions, and guiding the recruits to apply scientifically and reasonably based on their own wishes; after a period of time in the company, the headquarters gave comprehensive scores and made appropriate adjustments based on the recruits' job adaptation.

“When new recruits first enter the military camp, even if concentrated publicity is carried out, their understanding of various professional positions is not deep enough. Is there still a phenomenon of “wishful thinking” in personal applications?” In response to the author's question, the leader introduced that in order to help new recruits choose positions accurately, each battalion company arranges squad leaders to further explain the specific situation of each profession to new recruits, so that new recruits can consider the long-term situation based on their own reality and improve the accuracy of job selection. Corporal Li Mingkun is a college student soldier. He studied automobile inspection and maintenance technology as a student. After listening to the concentrated publicity organized by the camp, he became very interested in the automobile repair major and told his squad leader Liu Yaxin about his ideas. During a heart-to-heart talk, Liu Yaxin gave Li Mingkun a detailed introduction to the specific situation of the automobile repair professional position and said: “Although this position sounds very similar to your major, it requires high practical skills, and your strength is solid theoretical knowledge.” After listening to the squad leader's advice, Li Mingkun thought carefully and finally applied for a mechanical equipment maintenance position that was more suitable for him. After taking up the post, he actively exerted his expertise and did an excellent job. His professional training results have always been at the forefront of the same batch of recruits. In the scoring of recruits' job suitability organized by the agency, Li Mingkun's comprehensive ranking ranked first in the mechanical equipment maintenance major.

The author looked through the “Quantitative Scoring Table” for recruits who were selected for positions and found that highly educated talents, urgently needed and scarce majors, and possessing professional certificates... In addition to the common project of scoring the assessment results of the recruit stage, there are more than 10 bonus items focusing on professional needs and actual abilities.

Si Chenhui, a recruit in a certain battalion, majored in Chinese language and literature during college. If he applied for a missile shooter position based on his major, he would not have an advantage. However, during college, he not only obtained a drone license, but also won two awards in drone flight competitions. When he was assigned to a post, he took up the position of missile shooter with this specialty.

“Job assignment is not a one-time deal. We organize adjustments based on the recruits' job performance.” Chief Li told the author that after the first job assignment, they established a growth file for each recruit, dynamically grasped the recruits' growth and progress, and dynamically

organized adjustments according to the principles of “personal potential assessment, job matching analysis, and combat effectiveness contribution value calculation”, combined with the recruits' job adaptation and the actual needs of the unit.

Then, Chief Li told the author about the experience of Private Liu Tianyi of a missile battalion. Before joining the army, Liu Tianyi studied meteorology, and after joining the company, he applied for a missile operator position. After a period of time, he found that he was not suitable for the missile operator position, and he often felt very strenuous in daily training. When the position was adjusted, he took the initiative to apply for a transfer to the radar major. In the new position, he not only quickly mastered radar professional knowledge and operating skills, but also achieved excellent results in professional assessments.

“Every soldier is a link in the chain of combat effectiveness. Accurate posting and making the best use of talents are related to the quality and efficiency of combat effectiveness of the troops.” The brigade leader said that since the exploration and implementation of the new recruit posting mechanism, the brigade's new recruits' job matching rate has steadily increased. In the next step, they will continue to uphold the concept of “building the army based on war and selecting talents for war”, further improve this mechanism, and cultivate more high-quality professional talents to win the future battlefield.

丛林深处起硝烟，第 78 集团军某旅组织全要素训练

来源：解放军报 作者：王毅 张光轩 责任编辑：尚晓敏 2025-03-30

第 78 集团军某旅组织全要素训练

丛林深处起硝烟

解放军报讯 王毅、特约记者张光轩报道：日前，第 78 集团军某旅组织一场全要素实战化训练。随着一声令下，官兵们迅速奔赴丛林深处任务地域。

“‘敌’无人机侦察！”接到特情通报，现场指挥员快速研判情况，组织官兵利用地形隐蔽，并对无人机展开反制。与此同时，导调组再次临机出题：”‘敌’实施电磁干扰！”指挥员立即下令启用预案，操作手迅速分析情况，有条不紊展开操作，通信很快恢复。

“紧贴实战临机导调，旨在提升官兵应急处置能力。”该旅领导介绍，他们充分利用各种复杂环境，临机设置多种特情，让官兵在险难条件下练协同、验战法，淬炼应急处置和协同作战能力。

行进途中，前方突然出现一处断崖，官兵借助周边树木滑降通过。随即又传来”小股‘敌’袭扰”通报，官兵迅速组织火力还击。残余之”敌”逃窜至丛林中负隅顽抗，指挥员根据战

场态势，迅速制订作战方案：侦察小队放飞无人机抵近侦察，火力分队正面吸引”敌”火力，突击小组隐蔽接”敌”、实施突袭。

训练结束，官兵围绕协同配合不紧密等问题展开复盘总结，并针对性制订补训计划。

Smoke Rises from Deep in the Jungle, a Brigade of the 78th Group Army Organizes Full-Element Training

Source: PLA Daily Author: Wang Yi Zhang Guangxuan Editor: Shang Xiaomin 2025-03-30

A brigade of the 78th Group Army organizes full-element training

Smoke rises from deep in the jungle

PLA Daily News Wang Yi and special correspondent Zhang Guangxuan reported: Recently, a brigade of the 78th Group Army organized a full-element combat training. With an order, the officers and men quickly rushed to the mission area deep in the jungle.

“'Enemy' drone reconnaissance!” After receiving the special situation report, the on-site commander quickly judged the situation, organized the officers and men to use the terrain to hide, and launched a counterattack against the drone. At the same time, the command and dispatch group once again asked a question on the spot: “'Enemy' implemented electromagnetic interference!” The commander immediately ordered the activation of the plan, the operator quickly analyzed the situation, carried out the operation in an orderly manner, and the communication was quickly restored.

“Closely following the actual combat and ad hoc guidance, the purpose is to improve the emergency response capabilities of officers and men.” The leaders of the brigade introduced that they made full use of various complex environments and set up various special situations on the spot, so that officers and men could practice coordination and combat methods under dangerous conditions, and temper their emergency response and coordinated combat capabilities.

During the march, a cliff suddenly appeared in front, and the officers and men slid down with the help of surrounding trees. Then there was a report of “small group of 'enemy' harassment”, and the officers and men quickly organized firepower to fight back. The remaining “enemy” fled to the jungle and resisted stubbornly. The commander quickly formulated a combat plan based on the battlefield situation: the reconnaissance team released drones for close reconnaissance, the firepower unit attracted the “enemy” firepower head-on, and the assault team secretly met the “enemy” and carried out a surprise attack.

At the end of the training, the officers and men reviewed and summarized the problems of poor coordination and cooperation, and formulated targeted supplementary training plans.

猛士竞速勇冲锋——来自中部战区陆军某旅的观察报告

来源：解放军报 作者：邹菲 李倩 刘小云 责任编辑：孙悦 2025-03-31

猛士竞速勇冲锋

——来自中部战区陆军某旅的观察报告

■解放军报记者 邹 菲 李 倩 特约通讯员 刘小云

子夜时分，燕山脚下，由”猛士”突击车组成的车队疾驰前行。

星夜兼程，长途飞驰。中部战区陆军某旅组织整建制跨区机动训练，官兵边走边打、边打边总结，部队作战能力得到有效锤炼。

狂飙突进，全力冲锋。该旅官兵锚定建军一百年奋斗目标，与时代竞速，与时间赛跑，加快提升部队打赢能力，争当新型步兵转型先锋，在强军新征程上留下闪光印记。

部队机动途中。徐超 摄

一辆车的突击——

战车的速度更快，形成战斗力的速度也要加快

陆战场上，轮式车辆的速度优势充分显现。

装载物资、固定武器、启动车辆……一次，该旅一营组织紧急拉动训练，”猛士”突击车如猛虎下山，呼啸疾驰，很快到达目标地域。

“这次训练成绩比上次又有提高！”训练结束，看着眼前的战车，一营干部秦明亮心中充满自豪，思绪不由回到了几年前——

那天，秦明亮来到旅部受领任务：上级率先给一营配发”猛士”突击车，要求他们半年内完成新装备试训任务。

“一刻也不能耽误！”受领任务后，秦明亮一路小跑往营里赶。路过”战旗林”时，看到那面鲜红的”势如破竹”战旗，他更加充满干劲。

百团大战期间，一营前身部队勇当先锋，连战连捷，被晋察冀军区授予”势如破竹”战旗。在国庆 70 周年阅兵战旗方队中，这面鲜红的战旗迎风飘扬，光荣接受党和人民检阅。

“一无教材可学，二无经验可循，怎么做才能完成好任务？”秦明亮带回的消息让一营官兵既感到兴奋，又有些担心。

“当年，先辈们用势如破竹的精神战胜强敌。今天，我们也要拿出这种劲头攻坚克难，当好转型先锋。”新装备试训任务动员会上，秦明亮激情澎湃的发言燃起大家斗志。

“战车的速度更快，形成战斗力的速度也要加快。”很快，一场突击战在该营拉开帷幕——

全营干部骨干分别领衔成立攻关小组，围绕一个个新装备训练难题展开攻关；官兵白天在训练场学习实装操作，晚上加班学习相关业务理论知识……

奋斗无止境，冲锋不停歇。如期完成新装备试训任务后，该营官兵继续拼搏，不断提升新装备战斗力。

模拟昼夜战场环境，缩短更换车辆轮胎时间；改装车载武器站，适应多种火器架设切换；借助基站通信，在空旷地域、山岳丛林等环境采集数据……一项项难题被相继攻克。

二级上士吴伟鹏受领野外搭设伪装网攻关任务后，带领所在班战士认真研究、大胆创新，有效提高了整车伪装效率。他牵头整理的《野外伪装网搭设》教学范例，入选强军网军事职业教育平台慕课。

上高原、钻密林、进大漠……近年来，该营官兵远程机动数万公里，以高标准、严要求，创新形成一批战法训法，蹚出一条新型步兵作战力量转型新路。

一场仗的冲击——

不仅要战车跑得快，还得整体作战效能强

那场训练虽已过去多年，但在该旅很多官兵心中留下的记忆，至今仍未消散。

一次，该旅与兄弟部队进行对抗训练。关键时刻，数十辆”猛士”突击车直插”敌”心脏，却遭到隐藏在山后的”敌”炮兵突袭，损失惨重。

“不仅要战车跑得快，还得整体作战效能强。战场上，若看不远打不到，那么车跑得再快也没有意义。”复盘会上，该旅领导的发言一针见血。失利的教训让大家有了清醒认识：要打赢未来战争，既要发挥单装的技战性能，又要提升部队整体战斗力。

从哪里跌倒，就从哪里爬起来。该旅组织官兵认真查找存在的短板弱项，研究制订提升作战体系整体效能方案，组织专门力量进行课题攻关。同时，他们积极引导官兵开展自主攻关，提升部队整体战斗力。

一次对抗训练中，某连侦察排干部刘志强带领官兵布设雷场时，遭”敌”狙击手打击。这让刘志强萌生出一个想法：采用无人设备布雷，不仅可以减少人员伤亡，还能提升效率。随后，他与几名骨干组成攻关小组，在上级有关部门和科研机构指导下，进行研究试验。两个月后，他们研制的无人智能布雷设备，在训练场上成功应用。

无人机勘察路线，实施定点打击；无人扫雷车破除障碍，快速开辟通路；无人运输车运送物资，及时进行补给……随着该旅各作战要素与装备力量普遍加强、有机融合，战车犹如长出”三头六臂”，作战能力明显提升。

“如今，坐在战车里，能够实时掌握战场态势，根据不同情况采取相应行动，部队打胜仗更有底气了。”一名营指挥员说。

事事高标准，处处严要求。在该旅采访，记者深深感受到官兵对每个细节的极致追求。

去年初，该旅进行战备规范优化。时任”红三连”干部朱冲印象最深的是，仅饮用水的携带方式就优化了 3 次。

第一次，他们以连为单位，利用运输车装载饮用水，结果发现这样做虽然省时省力，但官兵取水不便；第二次，换成单兵随身携带，但很快发现此举不适合步兵长距离机动作战。于是，他们又一次改变方法，实行以班为单位，利用全挂车拖载，既方便携带又方便官兵饮用。

“细节决定成败。”提及此事，该旅领导说，只有注重细节，把每个环节都做到极致，才能确保部队整体战斗力提质增效。

一群人的奋击——

战车性能升级，官兵的能力必须随之升级

如今，百余名指挥员同上一堂课、共研一道题，在该旅已成为寻常一幕。

为提高指挥员队伍能力素质，该旅领导定期召集参谋长、科长、营长、连长、排长五级指挥员，学习前沿军事知识，研究局部战争案例，并结合部队实际开展战法训法研讨。这项活动被大家称为”五长”集训。

“刚开始参加集训活动时，很多指挥员都倍感压力。”该旅一名干部告诉记者，每次集训时，旅领导都会根据学习内容现场出题，随机抽点人员答题，让大家共同研讨。经常有人因为回答不好问题，闹个大红脸。

“战车性能升级，官兵的能力必须随之升级。”该旅领导说，当今，世界新军事革命风起云涌，我军各项建设日新月异，部队转型发展步伐加快，战争制胜观念、制胜要素、制胜方法都在发生重大变化。打赢未来战争，需要官兵不断提升能力素质。开展”五长”集训，带动机关人员一起训练、共研难题，是倒逼机关人员和各级指挥员能力生成的一种有效手段。

该旅机关参谋夏宇，就曾在”五长”集训中”红过脸”。

那次，他被旅领导抽点答题，由于对相关知识掌握不深，始终没能说到重点。”当时，我紧张得直冒冷汗，真想找个地缝钻进去。”虽然此事已经过去了很久，但夏宇仍然记忆犹新。

痛定思痛。夏宇一有时间就学习前沿军事知识，研究战法训法，还时常让身边战友给他临机出题，锻炼应变能力。又是一个集训日，夏宇再次被旅领导抽点答题。这次，他以独到的分析与见解赢得热烈掌声。

在该旅，加快提升能力素质，也成为基层官兵的自觉行动。

去年初，下士陈基豪参加旅里组织的班长骨干轮训。走进轮训队，他被浓厚的学习氛围所感染。队员们白天练技能、练专业、练指挥，晚上背理论、编写教案、准备教具。楼道里、操场上，随处可见大家认真学习的身影，每个人都铆足了劲想要学到真本领、取得好成绩。回忆当时的情景，陈基豪说：”那种感觉就像每天都在打仗。”

经过轮训，陈基豪的能力素质有了很大提升。去年，在旅里组织的教学比武中，他取得优异成绩。今年，他为自己定下新目标：争取早日成为一名优秀”四会”教练员。

随着能力素质的提升，官兵打赢底气越来越足。近年来，该旅多次圆满完成上级赋予的重大任务。”当前，实现建军一百年奋斗目标到了吃劲奋斗的攻坚期、加油加压的冲刺期，我们必须奋力冲锋，坚决完成党和人民赋予的各项任务。”该旅领导说。

记者结束采访离开该旅时，恰逢一队官兵迈着整齐的步伐，高唱《猛士战歌》走向训练场，嘹亮的歌声在营区久久回荡。

Warriors Race to Charge Bravely - Observation Report from a Brigade of the Central Theater Command Army

Source: PLA Daily Author: Zou Fei Li Qian Liu Xiaoyun Editor: Sun Yue 2025-03-31

Warriors race to charge bravely

- Observation report from a brigade of the Central Theater Command Army

■ PLA Daily reporter Zou Fei Li Qian Special Correspondent Liu Xiaoyun

At midnight, at the foot of Yanshan Mountain, a convoy of “Warriors” assault vehicles rushed forward.

Starry night, long-distance speed. A brigade of the Central Theater Command Army organized a whole-unit cross-region mobile training. The officers and men fought while walking and summed up while fighting, and the combat capability of the troops was effectively tempered.

Rush forward and charge with all their strength. The officers and men of the brigade anchored the struggle goal of the 100th anniversary of the founding of the army, raced with the times, raced with time, accelerated the improvement of the troops’ ability to win, strived to be the pioneer of the transformation of the new infantry, and left a shining mark on the new journey of strengthening the army.

The troops are on the move. Photo by Xu Chao

A vehicle assault--

The speed of the tank is faster, and the speed of forming combat effectiveness must also be accelerated

On the battlefield, the speed advantage of wheeled vehicles is fully demonstrated.

Loading supplies, fixing weapons, starting vehicles... Once, the first battalion of the brigade organized an emergency training. The “Mengshi” assault vehicle rushed like a tiger down the mountain and quickly reached the target area.

“This training result is better than the last time!” After the training, looking at the tank in front of him, Qin Mingliang, a cadre of the first battalion, was full of pride, and his thoughts went back to a few years ago--

That day, Qin Mingliang came to the brigade headquarters to receive the task: the superiors took the lead in distributing the “Mengshi” assault vehicle to the first battalion, and asked them to complete the new equipment test training task within half a year.

“Don’t delay for a moment!” After receiving the task, Qin Mingliang trotted all the way to the camp. When passing by the “Battle Flag Forest”, he saw the bright red “Unstoppable” battle flag, which made him even more motivated.

During the Hundred Regiments Campaign, the predecessor of the First Battalion bravely served as a pioneer and won victory after victory, and was awarded the “Unstoppable” battle flag by the Jin-Cha-Ji Military Region. In the battle flag formation of the 70th anniversary of the National Day parade, this bright red battle flag fluttered in the wind and proudly accepted the inspection of the Party and the People.

“Without any textbooks to learn and no experience to follow, how can we complete the task well?” The news brought back by Qin Mingliang made the officers and men of the First Battalion excited and a little worried.

“Back then, our predecessors defeated the powerful enemy with the spirit of unstoppable. Today, we must also take this kind of momentum to overcome difficulties and be a pioneer in transformation.” At the mobilization meeting for the new equipment trial training task, Qin Mingliang’s passionate speech ignited everyone’s fighting spirit.

“The speed of the tanks is faster, and the speed of forming combat effectiveness must also be accelerated.” Soon, a blitzkrieg began in the battalion--

The backbone cadres of the whole battalion led the establishment of research teams to tackle the training problems of new equipment one by one; the officers and men learned the actual operation of the equipment in the training field during the day, and worked overtime at night to learn relevant business theoretical knowledge...

The struggle is endless, and the charge never stops. After completing the new equipment trial training task as scheduled, the officers and men of the battalion continued to fight and continuously improve the combat effectiveness of the new equipment.

Simulate the day and night battlefield environment to shorten the time for changing vehicle tires; modify the vehicle-mounted weapon station to adapt to the switching of various firearms; use base station communication to collect data in open areas, mountain jungles and other environments... One by one, the problems were overcome.

After receiving the task of setting up a camouflage net in the field, Second Sergeant Wu Weipeng led the soldiers in his class to study carefully and innovate boldly, effectively improving the camouflage efficiency of the whole vehicle. The teaching example of “Setting up a Camouflage Net in the Field” compiled by him was selected into the military vocational education platform of Qiangjun.com.

Going up the plateau, drilling through the dense forest, entering the desert... In recent years, the officers and men of the battalion have traveled tens of thousands of kilometers, with high standards and strict requirements, and have innovatively formed a number of tactics and training methods, and have blazed a new path for the transformation of new infantry combat forces.

The impact of a battle -

Not only must the tank run fast, but also the overall combat effectiveness must be strong

Although that training has been over for many years, the memory left in the hearts of many officers and men of the brigade has not dissipated to this day.

Once, the brigade conducted confrontation training with brother units. At the critical moment, dozens of "Mengshi" assault vehicles went straight into the heart of the "enemy", but were attacked by the "enemy" artillery hidden behind the mountain, and suffered heavy losses.

"Not only must the tank run fast, but also the overall combat effectiveness must be strong. On the battlefield, if you can't see far and can't hit, then it's meaningless for the car to run fast." At the review meeting, the speech of the brigade leader was sharp. The lessons of failure have made everyone have a clear understanding: to win future wars, we must not only give full play to the technical and combat performance of individual equipment, but also improve the overall combat effectiveness of the troops.

Get up from where you fell. The brigade organized officers and men to carefully find the existing shortcomings and weaknesses, study and formulate plans to improve the overall effectiveness of the combat system, and organize special forces to tackle the problems. At the same time, they actively guided officers and men to carry out independent research and improve the overall combat effectiveness of the troops.

During a confrontation training, Liu Zhiqiang, a cadre of a reconnaissance platoon in a certain company, was attacked by "enemy" snipers when he led officers and men to lay minefields. This gave Liu Zhiqiang an idea: using unmanned equipment to lay mines can not only reduce casualties, but also improve efficiency. Subsequently, he and several backbones formed a research team to conduct research and experiments under the guidance of relevant superior departments and scientific research institutions. Two months later, the unmanned intelligent mine-laying equipment they developed was successfully applied on the training ground.

Drones survey routes and implement targeted strikes; unmanned minesweepers remove obstacles and quickly open up passages; unmanned transport vehicles transport supplies and provide timely supplies... With the general strengthening and organic integration of various combat elements and equipment forces of the brigade, the tanks are like "three heads and six arms", and their combat capabilities have been significantly improved.

"Now, sitting in a tank, we can grasp the battlefield situation in real time and take corresponding actions according to different situations, which makes the troops more confident in winning battles." said a battalion commander.

High standards for everything and strict requirements everywhere. During the interview with the brigade, the reporter deeply felt the officers and men' extreme pursuit of every detail.

At the beginning of last year, the brigade optimized its combat readiness standards. Zhu Chong, the then cadre of the "Red Third Company", was most impressed by the fact that the way of carrying drinking water alone was optimized three times.

The first time, they used a transport vehicle to load drinking water as a company unit. It turned out that although this method saved time and effort, it was inconvenient for officers and men to get

water; the second time, it was changed to a single soldier carrying it, but it was soon discovered that this was not suitable for long-distance mobile operations of infantry. So, they changed the method again and implemented a squad as a unit, using a full trailer to tow, which was convenient for carrying and drinking by officers and men.

“Details determine success or failure.” When mentioning this, the brigade leader said that only by paying attention to details and doing every link to the extreme can the overall combat effectiveness of the troops be improved in quality and efficiency.

A group of people’s efforts--

As the performance of tanks is upgraded, the capabilities of officers and men must be upgraded accordingly

Nowadays, it has become a common scene in the brigade for more than a hundred commanders to take the same class and study the same question together.

In order to improve the ability and quality of the commander team, the leaders of the brigade regularly convene five-level commanders, including the chief of staff, section chief, battalion commander, company commander, and platoon commander, to learn cutting-edge military knowledge, study local war cases, and carry out discussions on tactics and training methods in combination with the actual situation of the troops. This activity is called the “five-leader” training.

“When I first participated in the training activities, many commanders felt pressured.” A cadre of the brigade told reporters that during each training session, the brigade leaders would ask questions on the spot based on the learning content, randomly select people to answer questions, and let everyone discuss together. People often blushed because they didn’t answer the questions well.

“As the performance of tanks is upgraded, the capabilities of officers and men must be upgraded accordingly.” The leader of the brigade said that today, the new military revolution in the world is surging, the construction of our army is changing with each passing day, the pace of transformation and development of the troops is accelerating, and the concepts, elements and methods of winning wars are undergoing major changes. To win future wars, officers and men need to continuously improve their capabilities and qualities. Carrying out the “five leaders” training and driving the staff to train together and study problems together is an effective means to force the staff and commanders at all levels to generate capabilities.

Xia Yu, the staff officer of the brigade, once “blushed” in the “five leaders” training.

That time, he was picked by the brigade leader to answer questions, but because he did not have a deep grasp of the relevant knowledge, he was unable to get to the point. “At that time, I was so nervous that I was sweating coldly and really wanted to find a crack in the ground to crawl into.” Although this incident happened a long time ago, Xia Yu still remembers it vividly.

Learn from the pain. Whenever Xia Yu has time, he studies cutting-edge military knowledge, studies tactics and training methods, and often asks his comrades around him to give him questions on the spot to exercise his adaptability. It was another training day, and Xia Yu was picked by the brigade leader to answer questions again. This time, he won warm applause with his unique analysis and insights.

In the brigade, accelerating the improvement of capabilities and qualities has also become a conscious action of grassroots officers and men.

At the beginning of last year, Corporal Chen Jihao participated in the rotation training of squad leaders organized by the brigade. When he entered the rotation training team, he was infected by the strong learning atmosphere. The team members practiced skills, professional skills, and command during the day, and memorized theories, wrote lesson plans, and prepared teaching aids at night. In the corridors and on the playground, everyone can be seen studying seriously everywhere, and everyone is trying hard to learn real skills and get good results. Recalling the scene at that time, Chen Jihao said: “It felt like fighting every day.” After the rotation training, Chen Jihao’s ability and quality have been greatly improved. Last year, he achieved excellent results in the teaching competition organized by the brigade. This year, he set a new goal for himself: strive to become an excellent “four-skill” coach as soon as possible. With the improvement of ability and quality, officers and men are more and more confident to win. In recent years, the brigade has successfully completed many major tasks assigned by superiors. “At present, the goal of building the army for 100 years has reached the tough period of hard struggle and the sprint period of refueling and pressure. We must charge hard and resolutely complete the tasks assigned by the party and the people.” The leader of the brigade said. When the reporter finished the interview and left the brigade, he happened to see a group of officers and men marching in neat steps, singing “Warrior’s Battle Song” towards the training ground. The loud singing echoed in the camp for a long time.

第 77 集团军某旅开展空地协同训练，党员骨干带头冲锋。　许晓宇摄

编者按　基层单位类型多样、使命任务日趋多元、人员构成相对复杂……改革调整以来，各部队执行战备演训、抢险救灾、应急备勤等任务更加频繁，如何在常态动散条件下实现精准、长久、有效的抓建，成为各级党组织普遍面临的一个现实课题。部队越是动态分散，基层党组织越要发挥”主心骨”作用。为此，第 77 集团军某旅党委坚持从完善抓建机制上寻求破解办法，探索开展”沉浸帮建”，党委委员下沉一线、靠前指导，帮助基层党组织进一步理顺思路、带好队伍、解决难题，基层党组织统筹全局、精准抓建、夯基固本的能力得到进一步提升。他们的实践有一定借鉴意义。

关键词 加强统筹

组织领导全覆盖无盲区

去年初，第 77 集团军某旅某营炊事员小吴随队赴某点位执行专项任务。临近年终，随着旅年度表彰奖励工作的展开，小吴总感觉心里”不太踏实”。

完成任务出色、能力素质突出、模范带头作用发挥较好……在身边战友看来，小吴获评”四有”优秀士兵应该没有什么问题。然而小吴感到，他所在的临时党支部虽认可其工作表现，但并没有推荐权；而能够推荐自己的党支部，又不一定全面了解自己的成绩和表现。因此，自己不仅没优势，还可能在评比中”吃亏”。

在该旅，类似小吴这样的官兵不在少数。能不能从偏远点位和临时任务中脱颖而出，获得党组织和战友们的认可，是他们关注的一个现实问题。

“营一级党委作为’中坚力量’，要做到有责有权、责权统一。特别是热点敏感事项上，更要注重加强统筹、把握全局。”该旅党委领导告诉记者，他们着眼工作难同步、节奏难把控等特点，通过”沉浸式”跟踪指导，帮助营级党委立足克服”工、学、训、建”的矛盾困难，探索建立起一套行之有效、科学管用的机制。比如分片负责，列席基层会议，推荐并指定思想成熟、能力过硬、作风扎实、责任心强的党员骨干担任临时党小组长，负责抓好任务保障和全面建设；交班统筹，定期驻点办公，用好交班会制度，安排部署工作、协调矛盾

困难；请示报告，积极对接协调，收集整理临时党组织的任务进展、矛盾困难等情况，并及时与上级机关沟通对接，帮助尽快解决现实困难，等等。

去年底，小吴所在营成立专项考评小组，通过电话问询、资料查阅、问卷调研等方式，对全营涉及表彰奖励且长期在外执行任务的官兵进行了一次全面考评。最终，小吴凭借出色表现，被评为”四有”优秀士兵。如今，小吴工作干劲更足，模范带头作用更加突出。

“部队常态动散，营党委作为’前沿指挥所’，要发挥好’关键部位’的’关键作用’，当好部队全面建设的连接枢纽，确保任务开展到哪里，组织触角就延伸到哪里。”该旅一名党委领导介绍，他们着眼任务期间混编抽组、点多面广的实际，按照”伴随点位建、紧盯任务走、跟着人员动”的原则，做好”沉浸式”指导、”嵌入式”帮建等工作，常态运行好正式和临时两套组织架构——对野外驻训、联演联训等人员较多的方向，成立临时党支部，并指定营党委委员担任临时党支部书记；对接装送装、抢险救灾等人员较少的分队，按需组成临时党小组，由党务工作经验丰富的党员骨干担任临时党小组组长，确保组织的全面领导和临时组织的一线指导统一协调。

一次，某营留守分队承担上级交给的试点建设任务。面对工程建设、氛围改造、飞行保障等多项任务，该营党委不等不靠、积极统筹，赋予临时党支部相关职能，明确任务标准、把住时间节点。同时，指定党委成员分头嵌入一线、各司其职、包干指导，确保试点建设任务运转有序、高效推进，取得良好效果。

关键词 精准发力

既要”输血”更要”造血”

去年底，以往连续多年未评先进的某连取得长足进步，被表彰为”四铁”先进连队。

“如果没有上级党委的科学帮带和精准指导，我们很难打好这场’翻身仗’。”台下，该连党支部副书记韩冰深有感触。他清楚，连队的建设发展离不开全连官兵共同努力，更离不开上级党委深入一线把脉问诊，沉在前端精准发力，持续有力开展帮建的探索实践。

前年，韩冰从旅机关调整到该连任职。和他同行的，还有负责对口帮建的该旅党委书记。起初，党委书记并没有急于让他踢”头三脚”，而是坚持吃住在班排、调研在一线，结合旅党委对全面建设靠后单位开展的”过支部”活动，对连队进行了一次全面彻底的”扫描”。

“连队人员类别多样，有的党员骨干教育管理顾虑较多，放不开手脚”“在外执行任务时，少数同志’临时’观念重，’组织’观念轻”……随着座谈调研深入，问题逐渐浮出水面。剖析这些问题，韩冰发现，一个很重要的原因在于连队党组织作用发挥不够好，在制度执行、组织运行、责任落实等方面不同程度存在宽松软问题。

为帮助该连打好”翻身仗”，旅党委书记持续开展”沉浸式”调研，靠前指导、挂钩帮建，经常与连队党支部共同探讨抓建薄弱问题，理清工作思路；全过程参与”过支部”活动，定期召开按纲抓建形势分析会，帮助支部梳理阶段重点，确定工作目标，研商具体举措；加强审核把关，从调整计划方案到研究评比措施，从正规各项秩序到跟踪督导推进，党委书记嵌入”时度效”各个环节，在”定人、定时、定责”中，形成”常委带头、各级联动、末端落实”的责任闭环。

基层要过硬，既靠上级指导”输血”，更靠强化自建”造血”。结合上级帮建，该连党支部着眼人才队伍建设”青黄不接”“人才断茬”、个别关键岗位捉襟见肘的情况，着眼长远、体系规划，通过开展”师带徒”“老带新”等活动，为官兵量身制订成才帮带规划，缩减了人才培养周期，很快实现了人才骨干的有序接替，党支部建设和人才队伍建设同频共振。

关键词 夯基固本

紧盯经常性基础性工作下苦功使长劲

采访期间，前些年一份由某连官兵填写的”伙食满意度评价”，引起了记者注意。评价显示，官兵满意度不高，有人在建议栏中反映：”食谱制订’一厢情愿’，经济民主组很少征集大家的意见……”

采访时，一名连队支委坦言，当时无论是军人委员会还是团支部，在官兵心中”存在感”都不算高。了解情况后，该旅党委研究开出”药方”：以组织联建推动基层自建，引导激励基层”三大组织”发挥作用，常态收集官兵意见建议并纳入党支部决策，通过党建带团建、团建促党建，凝聚兵心、提振士气。经过有效整改，该连官兵满意度显著提升。

“党的执政根基在基层，要持之以恒抓基础，靶向发力补短板，使每个基层党组织都成为坚强的战斗堡垒。”一名旅党委成员告诉记者，在落实组织制度的实践中，个别任务分队容易出现统筹力度不够、工作衔接不畅、创新意识不强等问题。比如，个别单位抓建力度不够一致，有的连队成为”示范窗口”、有的则连续多年未评先进；个别党员外出执行任务向组织汇报思想时流于形式，贴合任务不够紧、触及思想不够深；个别党支部班子成员缺乏”主人翁”意识，对党支部开展组织生活方面主动思考不够，存在被动应付、得过且过的等靠思想……

“只有紧盯经常性基础性工作下苦功、使长劲，才能垒土成山、行稳致远。”该旅党委结合蹲连住班时机，指定党委委员落实”责任包干制”，开展挂钩帮建和下沉指导，并围绕基层党组织建设薄弱环节，举一反三开展工作。

负责帮建某营的旅政治工作部主任告诉记者，他抽出一段时间铆在一线开展”沉浸式”帮建，与基层党组织一起研究战备训练、组织生活和全面建设等方面精准帮建计划，既查短板、

又树标杆，推动基层党组织建设全面提档升级。去年底，该营被集团军表彰为”四铁”先进单位，所属某连也因全面建设过硬荣立集体三等功。

前段时间，该旅受命抽组分队赴国外参加某联演任务。针对人员多、分布散、任务重等实际，他们探索形成分片包干、分工合作、分类指导的有益做法，任务分队各临时党支部结合实际统抓片区各项工作，积极研究制订人员管控、机务保障、警戒防卫、涉外交往等 4 类规范，选派干部骨干分头督导落实。任务期间，各片区定期线上对接工作、共享信息、交流问题，及时发现并补齐工作短板，最终高标准完成了联演任务。

“Immersed in helping to build” to create a strong battle fortress

——The exploration and practice of a certain brigade of the 77th Group Army to improve the quality and efficiency of grassroots party organizations under the conditions of dispersion

■ PLA Daily reporter Zhang Leifeng Wang Yue

A certain brigade of the 77th Group Army carried out air-ground coordination training, and the backbone party members took the lead in the charge. Photo by Xu Xiaoyu

Editor’s note: The types of grassroots units are diverse, the missions and tasks are becoming more diverse, and the personnel composition is relatively complex... Since the reform and adjustment, various troops have performed combat readiness exercises, disaster relief, emergency standby and other tasks more frequently. How to achieve accurate, long-term and effective construction under normal conditions of dispersion has become a realistic issue faced by party organizations at all levels. The more dynamically dispersed the troops are, the more the grassroots party organizations must play the role of “backbone”. To this end, the Party Committee of a brigade of the 77th Group Army insisted on seeking solutions from improving the mechanism of grasping and building, exploring the implementation of “immersion and helping to build”, and the Party Committee members went down to the front line and provided guidance to help grassroots party organizations further sort out ideas, lead the team, and solve problems. The ability of grassroots party organizations to coordinate the overall situation, grasp construction accurately, and consolidate the foundation has been further improved. Their practice has certain reference significance.

Keywords Strengthening overall planning

Organizational leadership covers all aspects without blind spots

At the beginning of last year, Xiao Wu, a cook of a battalion of a brigade of the 77th Group Army, went to a certain point with the team to perform a special task. Near the end of the year, as the brigade's annual commendation and reward work was carried out, Xiao Wu always felt "not very at ease" in his heart.

Excellent completion of tasks, outstanding ability and quality, and good exemplary role... In the eyes of his comrades, Xiao Wu should have no problem in being rated as an excellent soldier with "four qualities". However, Xiao Wu felt that although his temporary party branch recognized his work performance, it did not have the right to recommend; and the party branch that could recommend him did not necessarily have a comprehensive understanding of his achievements and performance. Therefore, not only did he have no advantage, but he might also "suffer losses" in the evaluation.

In the brigade, there are many officers and men like Xiao Wu. Whether they can stand out from remote locations and temporary tasks and gain recognition from the party organization and comrades is a practical issue they are concerned about.

"As the 'backbone force', the battalion-level party committee must have responsibilities and powers, and unify responsibilities and powers. Especially on hot and sensitive issues, we must pay more attention to strengthening coordination and grasping the overall situation." The leaders of the brigade's party committee told reporters that they focused on the characteristics of difficult synchronization of work and difficult rhythm control, and through "immersive" tracking and guidance, helped the battalion-level party committee to overcome the contradictions and difficulties of "work, study, training, and construction" and explore and establish a set of effective, scientific and practical mechanisms. For example, they are responsible for different areas, attend grassroots meetings, recommend and designate party members with mature ideas, strong abilities, solid work style, and strong sense of responsibility as temporary party group leaders, responsible for ensuring tasks and comprehensive construction; handover coordination, regular on-site office, make good use of the handover meeting system, arrange and deploy work, and coordinate contradictions and difficulties; ask for instructions and reports, actively connect and coordinate, collect and organize the progress of tasks, contradictions and difficulties of temporary party organizations, and communicate and connect with higher authorities in a timely manner to help solve practical difficulties as soon as possible, etc.

At the end of last year, Xiao Wu's battalion set up a special assessment team, which conducted a comprehensive assessment of the officers and men in the battalion who were involved in commendations and rewards and who were on long-term missions outside through telephone inquiries, data review, questionnaire surveys, etc. In the end, Xiao Wu was rated as an excellent soldier with "four qualities" for his outstanding performance. Now, Xiao Wu is more motivated at work and his exemplary role is more prominent.

"The troops are in regular movement and dispersion. The battalion party committee, as the 'frontline command post', must play a 'key role' in the 'key position' and serve as a connecting

hub for the comprehensive construction of the troops, ensuring that the organization's tentacles extend to wherever the mission is carried out." A party committee leader of the brigade introduced that they focused on the reality of mixed formations and multiple points and wide areas during the mission, and in accordance with the principle of "building with points, keeping a close eye on the tasks, and following the movement of personnel", they did a good job of "immersive" guidance and "embedded" assistance, and operated the formal and temporary organizational structures normally - for the directions with more personnel such as field training, joint exercises and joint training, a temporary party branch was established, and a member of the battalion party committee was designated as the secretary of the temporary party branch; for the detachments with fewer personnel such as equipment delivery, emergency rescue and disaster relief, a temporary party group was formed as needed, and the backbone party members with rich experience in party affairs served as the leader of the temporary party group to ensure the unified coordination of the overall leadership of the organization and the front-line guidance of the temporary organization.

Once, a battalion's left-behind detachment undertook the pilot construction task assigned by the superior. Faced with multiple tasks such as engineering construction, atmosphere transformation, and flight support, the battalion party committee did not wait or rely on others, but actively coordinated, gave the temporary party branch relevant functions, clarified the task standards, and grasped the time nodes. At the same time, designated party committee members were embedded in the front line, each performing their duties, and taking full responsibility for guidance to ensure that the pilot construction tasks were carried out in an orderly and efficient manner and achieved good results.

Keywords Precise efforts

It is necessary to "transfuse blood" and "make blood"

At the end of last year, a certain company that had not been rated as advanced for many years in a row made great progress and was commended as an advanced company with "four irons".

"Without the scientific help and precise guidance of the superior party committee, it would be difficult for us to win this "turnaround battle." Offstage, Han Bing, deputy secretary of the company's party branch, was deeply touched. He knew that the construction and development of the company could not be separated from the joint efforts of all the officers and men of the company, and it was even more inseparable from the superior party committee's in-depth diagnosis and diagnosis of the front line, sinking into the front line to make precise efforts, and continuously and effectively carry out the exploration and practice of helping to build.

The year before last, Han Bing was transferred from the brigade headquarters to the company. Accompanying him was the secretary of the brigade party committee who was responsible for the counterpart help. At first, the party secretary was not in a hurry to let him take the "first three steps", but insisted on eating and living in the squad and conducting research on the front line. In combination with the "passing the branch" activities carried out by the brigade party committee

for the units lagging behind in comprehensive construction, a comprehensive and thorough “scan” of the company was carried out.

“The company’s personnel are diverse, and some party members have many concerns about education and management, and they can’t let go.” “When performing tasks outside, a few comrades have a strong sense of “temporary” and a weak sense of “organization”...” As the discussion and research deepened, the problems gradually surfaced. Analyzing these problems, Han Bing found that a very important reason is that the role of the company’s party organization is not well played, and there are different degrees of looseness and softness in the implementation of the system, organizational operation, and responsibility fulfillment.

In order to help the company win the “turnaround battle”, the brigade party committee secretary continued to carry out “immersive” research, provide guidance and help with construction, and often discuss weak points with the company party branch to clarify work ideas; participate in the “passing the branch” activities throughout the process, hold regular situation analysis meetings to help the branch sort out the key points of the stage, determine work goals, and discuss specific measures; strengthen review and control, from adjusting plans to studying evaluation measures, from formalizing various orders to tracking and supervising the promotion, the party committee secretary is embedded in all links of “time, degree and effect”, and in “fixing people, timing and responsibilities”, a closed loop of responsibility of “standing committee members taking the lead, linkage at all levels, and implementation at the end” is formed.

To be strong at the grassroots level, it depends not only on the “blood transfusion” of the superior’s guidance, but also on strengthening self-construction “blood production”. Combined with the help from the superiors, the party branch of the company focused on the situation of “lack of successors” and “talent gap” in the construction of the talent team, and the shortage of some key positions. Focusing on the long-term and system planning, through carrying out activities such as “master-apprentice” and “old-new”, the company tailored the talent training plan for officers and men, shortened the talent training cycle, and quickly realized the orderly succession of talent backbones. The construction of the party branch and the construction of the talent team resonated at the same frequency.

Keywords Lay a solid foundation

Focus on regular basic work and work hard to make long-term efforts

During the interview, a “food satisfaction evaluation” filled out by officers and men of a certain company a few years ago attracted the attention of reporters. The evaluation shows that the officers and men are not satisfied. Some people reflected in the suggestion column: “The recipe is formulated ‘one-sidedly’, and the economic democracy group rarely solicits everyone’s opinions...”

During the interview, a company branch committee member admitted that at that time, whether it was the military committee or the regiment branch, the “sense of existence” in the hearts of officers and men was not high. After understanding the situation, the brigade party committee studied and

prescribed a “prescription”: promote grassroots self-construction through organizational joint construction, guide and encourage the grassroots “three major organizations” to play their role, regularly collect opinions and suggestions from officers and men and incorporate them into the decision-making of the party branch, and promote party building through party building to unite the soldiers and boost morale. After effective rectification, the satisfaction of the officers and men of the company has been significantly improved.

“The ruling foundation of the party is at the grassroots level. We must persist in grasping the foundation, target efforts to make up for shortcomings, and make each grassroots party organization a strong fighting fortress.” A member of the brigade party committee told reporters that in the practice of implementing the organizational system, individual task teams are prone to problems such as insufficient coordination, poor work connection, and weak innovation awareness. For example, some units did not have consistent efforts to build the company, some companies became “demonstration windows”, and some companies did not receive advanced awards for many years; some party members were superficial in reporting their thoughts to the organization when they went out to perform tasks, and they did not fit the tasks closely enough and did not touch their thoughts deeply enough; some members of the party branch lacked a sense of “ownership”, did not actively think about the party branch’s organizational life, and had a passive coping and muddle-headed mentality...

“Only by focusing on regular basic work and working hard and making long-term efforts can we build a mountain of earth and move forward steadily.” The brigade’s party committee, in conjunction with the opportunity of squatting in the company, designated party committee members to implement the “responsibility package system”, carry out linked construction and sinking guidance, and carry out work around the weak links in the construction of grassroots party organizations.

The director of the brigade’s political work department, who was responsible for helping to build a battalion, told reporters that he took some time to carry out “immersive” construction at the front line, and worked with grassroots party organizations to study precise construction plans in combat readiness training, organizational life and comprehensive construction, to check shortcomings and set benchmarks, and promote the comprehensive upgrading of grassroots party organization construction. At the end of last year, the battalion was commended by the group army as an advanced unit of “Four Irons”, and a company under it was also awarded the third-class collective merit for its comprehensive construction.

Some time ago, the brigade was ordered to draw a team to go abroad to participate in a joint exercise mission. In view of the reality of large number of personnel, scattered distribution, and heavy tasks, they explored and formed a beneficial practice of piecemeal contracting, division of labor and cooperation, and classified guidance. The temporary party branches of the task team combined the actual situation to grasp the work of the area, actively studied and formulated four types of norms such as personnel control, maintenance support, alert defense, and foreign

exchanges, and selected cadres and backbones to supervise the implementation separately. During the mission, each area regularly connected work online, shared information, and exchanged problems, timely discovered and made up for work shortcomings, and finally completed the joint exercise mission with high standards.

军营观察丨飞行训练场走来”抓训智囊团”

来源：中国军网-解放军报 作者：张宇驰 童祖静 邢 沛 刘 兵 责任编辑：孙悦 发布：2025-04-01

集智破解直升机攻击难关

■邢 沛 解放军报特约记者 童祖静

“位某高地反斜面目标，前出搜索！”初春时节，夜色如墨，陆军某陆航旅一场实战化训练正在进行。

飞行员驾驶直升机在空中完成一套高难度战术动作后，精准锁定目标。

这一套新战术动作的主创者，正是该旅”抓训智囊团”成员——某营飞行教员滕勇。

“在山地攻防战斗中，反斜面目标位于背向进攻方向的一侧山坡，过去直升机只能采用迂回进攻的方式展开打击，容易被’敌’发现，这一直都是直升机作战的难点。”滕教员告诉记者，去年一次实战化训练中，该旅就有多个机组被”敌”在反斜面部署的低空防空武器”重创”。

破解”反斜面之困”，消灭”山那边”的目标，该旅调集多专业骨干组成的”抓训智囊团”，再度发挥重要作用。滕教员和其他”抓训智囊团”成员在反复征求飞行员意见和综合考虑武器装备作战性能后，紧贴实战需要设计和升级战术动作，形成新战法。

“山谷中，面对山体如何隐蔽跃升”“跃升时，如何规避火力打击”“跃升后，如何第一时间发现目标”……面对多个实战运用难题，滕教员和其他”抓训智囊团”成员日夜奋战，梳理出 5 类 26 种典型作战场景深入展开细致研究，并借助飞行战术模拟训练系统反复检验。他们将针对性训练细化为”理论学研、模拟试训、实装带飞、实弹检验”4 个阶段，逐步提升训练难度，在循序渐进中帮助飞行员掌握作战技巧。

滕教员告诉记者，他们在研究探索中，还借鉴拉力赛副驾驶提供导航的模式，大幅提升了训练精确度。

如今，在”抓训智囊团”的推动下，新的战术动作已多次在训练中进行验证，既有效破解了”反斜面之困”，又联动推进多个战法创新，打开了训练新局面。

飞行训练场走来”抓训智囊团”

■张宇驰 解放军报特约记者 童祖静

陆军某陆航旅组织直升机海上训练。 解放军报特约通讯员 张欢朋摄

集智更利于攻关，”众人拾柴”才能”火焰高”

说起”抓训智囊团”的诞生过程，陆军某陆航旅领导提起了一次难题攻关经历。

一次实弹射击考核，某直升机连连长郭恒龙担任裁判组成员。他发现，在较为复杂的条件下，其他弹种成绩尚可，但某型火箭弹射击精度波动较大，命中率忽高忽低。

复盘总结会上，郭恒龙提出了一个问题：如何在复杂条件下稳定该型火箭弹命中率？

可是问题抛出后，一时并没有找到很好的对策。

不久，郭恒龙受领任务，代表旅队参加大项训练活动。他将带领机组，完成对”敌”地面目标的火力打击任务。

在进行作战筹划时，郭恒龙发现：战场环境较为复杂，目标性质类型多样，仅依靠空地导弹难以摧毁所有目标，费效比也并不科学。此时，该型火箭弹命中率的问题又一次摆在了他们面前。机组成员认真研究偏差值，详细分析影响因素，全力查找影响命中率的”症结”。

在实飞训练的模拟攻击中，郭恒龙发现瞄准目标时，直升机机体受多种因素影响会产生一定晃动，可能会导致激光测距发生偏移。

“火箭弹命中率低的问题可能是距离测量不准导致的。”经过研究论证，他们发现在特定条件下射击时，直升机机体哪怕只有轻微的晃动，弹着点都有可能产生不小的误差。

为解决这一问题，该旅飞行骨干和技术骨干汇聚一堂，通过对武器设备原理进行研究分析，决定改变以往瞄准、测距的一贯做法，创新提出了一整套新的射击方法，使直升机测距摆脱机体晃动影响。

在后来的大项训练任务中，该旅实弹射击取得”满堂彩”，官兵们自主创新的”精准攻击法”逐渐应用开来。

“集智更利于攻关，’众人拾柴’才能’火焰高’。”此次经历，让该旅党委有了一个共识：加快实现军事训练转型升级，必须有一支理论功底深、专业技术精、创新意识强的骨干团队。

为此，该旅结合自身训练特点，采取”个人申请、营连推荐、资质审查、综合考评、资质认证”的步骤，遴选飞行、机务、通信、气象等专业骨干组成”抓训智囊团”，作为旅党委领战抓训的”参谋”“助手”。

在旅领导直接调动下，团队成员一线参训跟训，强化训练指导和过程监督，有效提升了部队战备训练水平。记者了解到，”抓训智囊团”运行一年后，全旅有 20 余名官兵在上级比武活动中摘金夺银，该旅先后被陆军表彰为”战备工作先进单位”“装备工作先进单位”。

哪里有训练难题，”外脑”就链接到哪里

走下战机，飞行骨干王晋博已完成当日飞行计划，然而他并没有休息。跑道旁，他时而拿起秒表计时，时而带上相机跑向降落点，认真观察每架战机起飞和降落。

“飞机降落时，机身姿态保持不够平稳，轮胎接地过于粗猛。”当日飞行训练讲评会上，王晋博投影出一张降落点图片，对轮胎摩擦痕迹进行分析。讲台下，被讲评的机组成员认真记录问题，研究整改措施。

作为首批改装某型直升机的飞行员，王晋博不仅自身飞行技术过硬，还是优秀的飞行教员，曾带教出不少飞行骨干。像王晋博这样的骨干在该旅不乏其人，他们被吸纳进”抓训智囊团”，在抓好自身训练的同时当好”参谋”“助手”，辅助旅党委抓好部队练兵备战工作。

该旅领导告诉记者，”抓训智囊团”成员大部分是营连骨干人才，通过在全旅层面加强资源统筹，发挥他们身处训练一线的优势，让旅党委领战抓训的触角向末端延伸。

为此，他们调整飞行训练指挥组人员编成，采取轮流值班的方式，安排”抓训智囊团”对应的专业小组进场跟训，全程指导督导训练开展，并对当日飞行训练各要素履职情况进行讲评，助力部队解决训练难题。

在该旅组织的每周训练分析会上，需要对本周飞行训练进行集中讲评，并对下周飞行训练进行研究筹划和要点提示。”抓训智囊团”成员的发言常常是”重头戏”。

“五六分钟的发言看似简单，却需要大量的数据和事例支撑，才能提出管用的建议。”王晋博告诉记者，一周紧张忙碌的飞行训练结束后，不少战友都已就寝入睡，而自己经常在飞参判读室挑灯夜战。

在一次实弹射击训练中，多枚空地导弹未命中目标。精确制导武器为何没有命中？这个结果让官兵出乎意料，大家纷纷把目光转向”抓训智囊团”，期待他们在周讲评会上拨开”迷雾”。

深夜，飞参判读室灯火通明。飞行骨干史军滔一帧一帧回放画面，一组一组判读飞行参数，气象预报师仔细分析当日天气情况对导弹的影响，弹药负责人积极对接厂家，进一步查找原因……

“通过观察分析，可能是由于目标位置特殊，攻击距离较近，加上风向、地形等因素影响，第一发导弹命中后产生火焰、粉尘等干扰物质，对后续导弹造成干扰，导致命中率降低。”在当周的训练分析会上，史军滔的分析发言，为解决问题打开了”突破口”。

哪里有训练难题，”外脑”就链接到哪里。前不久一次旅党委议战议训会上，如何提升火力打击效率被列为重点课题，列席的”抓训智囊团”成员围绕课题积极发言，提出解决措施。

在随后的攻关研究中，史军滔带领攻关小组根据目标性质，采取不同高度、不同距离和不同攻击方式进行检验性射击，广泛收集整理多组数据，结合射击结果进行深入研究分析，一套火力打击效率更高的组合攻击新方法应运而生。

为进一步激发”抓训智囊团”的创新活力和训练热情，该旅党委尝试用主创人员姓名来命名各类战法打法。

“是谁创新的战法，就用谁的名字命名。”“抓训智囊团”成员们深入练兵场摸实情、谋实策，扭住影响备战打仗的瓶颈问题集智攻关，”严科教学法”“张景导气法”等一批成果也随之”诞生”，部队战斗力基础不断夯实。

“抓训智囊团”运行以来，骨干成员常态参加教学研讨、考核督导和难点攻关等活动，梳理总结的多项抓训经验在旅党委议战议训会上被采纳。

辅助领战抓训，要有”本领恐慌”，必须主动突破自我

在飞行模拟训练中心，飞行员张灏在模拟舱内时而”驾机穿越山谷”，时而”与’敌’展开空中格斗”……”抓训智囊团”成员雒星身在指挥中心，通过大屏观看飞行训练全程。

“飞行状态没保持好，原因是压杆蹬舵力度稍大了些。”张灏的训练一结束，雒星就拿到了飞行参数评估报告表，对照图表上的数据曲线进行飞行人员能力分析。而这些新鲜出炉的数据，经过梳理总结后，都会第一时间呈到旅党委议战议训会上，成为旅党委研究训练形势的重要依据。

“以往飞行教学主要依靠手把手带教，效益并不高。”雒星告诉记者，为此，”抓训智囊团”主动联系厂家院所，与”外脑”组网，携手开发战术模拟训练系统，预设不同地域空域、不同对抗条件和不同电磁环境的模拟战场，组织开展多个新课目训练。

未来战场瞬息万变，战斗进程明显加快，装备抢救抢修效率必须跟上作战节奏。记者在该旅机务训练中心看到，旅保障部领导正在督导一场直升机线路故障排除训练。

一名航电师拿着平板电脑，采用”抓训智囊团”成员、机务骨干郑玮自主研究的”智能化通断测试系统”，接上插头插针，屏幕上很快就出现指示，电缆通断的具体位置一目了然。

以往排查线路故障位置需要更换机载设备，严重影响抢修效率。郑玮带领战友将分离式布线图进行系统整合，搭建新系统，通过数千次测试论证，通断测试准确度达 90%以上。

“创新连着部队战斗力，哪怕一点点的错漏都不能有。”就在大家准备申报成果时，郑玮却叫了”暂停”：10%的失败概率不排除，贻误战机的后果不堪设想。随后的 300 多个日夜里，郑玮带领战友潜心研究，认真分析影响精准度的诸多因素，并逐一消除或降低。

“辅助领战抓训，要有’本领恐慌’，必须主动突破自我。”这是”抓训智囊团”成员们的共识。

前段时间，部队改装某型直升机。”关键时刻必须挺出来！”新装备集成化程度高，综合航电系统复杂，座舱结构也发生较大变化，”抓训智囊团”成员率先踏上改装之旅。

改装队伍中，特级飞行员卢陶是年龄最大的飞行员，机械师韩北君是年龄最大的”老空勤”。作为”抓训智囊团”成员，他们虽然经验丰富，但体力、精力和记忆力都不比年轻时候，面对系统复杂、操控陌生、风险未知的新机型，他们选择下”苦功夫”“笨功夫”。

经过日日夜夜的辛苦付出，卢陶和韩北君成为全旅第一个完成首飞的机组，改装团队在短时间内就完成了第一批战机的试飞交接，连厂家都感到”了不起”。在”抓训智囊团”成员带教下，大批飞行人员顺利完成改装，新课目训练成效取得突破。

骨干团队勇于攻关，党委领战坚强有力。该旅领导告诉记者，他们将持续深化前期做法，进一步建强壮大”抓训智囊团”，助推部队建设转型，加速提升实战能力。

（本版人名均为化名，采访中得到孙宏平、袁诚、代建华大力协助，特此致谢）

锐视点

畅通智慧转化链路

■刘 兵

古人云：”能用众力，则无敌于天下矣；能用众智，则无畏于圣人矣。”历史一再证明，最富有创造力的解决方案往往孕育于基层实践的沃土之中。而在决策学中的”群体智慧”理论，说的也是在众人参与论证下，个体智慧得以聚合，抵消偏见、修正错误。

立足训练执勤一线、身处备战打仗前沿，基层官兵作为武器装备的操作者、战法训法的实践者，其想法往往最符合部队实际，也最贴近战位需要。但是个人智慧总有一定局限性，

再有经验的维修骨干，也不可能精通所有排除故障的方法，运用基层智慧集智攻关战训难题，有助于推动部队战斗力建设提质增效。正如一位学者感叹的那样：”用好群众智慧，整个世界就是你的智囊团！”

建立开放包容的参与机制，群体智慧才能发挥真正威力。搭建对话平台，形成常态化意见收集网络，营造”人人皆可建言”的氛围；打破专业壁垒，让不同专业之间产生思想碰撞，吸收借鉴经验方法；善于梳理分析，从大量的群体智慧中，寻找关键有用信息，服务战训难题解决。

群体智慧的作用发挥，最终还是要看战训效能转化比，否则也只是纸上谈兵。形成智慧转化的畅通链路，需要打造”创新共享平台”，让分散的基层智慧得以汇聚、碰撞、进化；需要建立价值转化机制，通过”实践—理论—效能”的良性循环，将群体智慧转化为战斗力提升动能；需要树立动态更新理念，及时吸收新观念、新想法，定期完善更新”成果库”，做到与时俱进地转化运用。

未来战场具有鲜明的”智战”特点，群体智慧是科学决策的重要支撑。基层官兵位于军事斗争准备最前沿，善于倾听一线的想法，想方设法”借智”“集智”，努力实现众筹与众创并举，才能在关键时刻精准施策、决战决胜。

Military Camp Observation 丨”Training Think Tank” Comes to the Flight Training Ground

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Yuchi, Tong Zujing, Xing Pei, Liu Bing Editor: Sun Yue Release: 2025-04-01

Collective wisdom to solve the difficulties of helicopter attack

■Xing Pei, People’s Liberation Army Daily Special Correspondent Tong Zujing

“A target on the reverse slope of a certain highland, go forward to search!” In early spring, the night is as dark as ink, and a combat training of a certain army aviation brigade is underway.

After the pilot completed a set of difficult tactical actions in the air, he accurately locked the target.

The creator of this new set of tactical actions is a member of the brigade’s “Training Think Tank” - a flight instructor of a certain battalion, Teng Yong.

“In mountain offensive and defensive battles, the reverse slope target is located on the side of the hillside facing away from the attack direction. In the past, helicopters could only launch attacks in a roundabout way, which was easy to be discovered by the ‘enemy’. This has always been a difficulty in helicopter operations.” Instructor Teng told reporters that in a practical training last year, multiple crews of the brigade were “severely damaged” by the low-altitude air defense weapons deployed by the “enemy” on the reverse slope.

To solve the “reverse slope dilemma” and eliminate the targets “on the other side of the mountain”, the brigade mobilized a “training think tank” composed of multi-professional backbones, which once again played an important role. After repeatedly soliciting the opinions of pilots and comprehensively considering the combat performance of weapons and equipment, Instructor Teng and other members of the “training think tank” designed and upgraded tactical actions in line with actual combat needs to form new tactics.

“In the valley, how to hide and jump from the mountain”, “How to avoid fire attack when jumping”, “How to find the target in the first time after jumping”... Faced with multiple practical application problems, Instructor Teng and other members of the “training think tank” worked day and night to sort out 5 categories of 26 typical combat scenarios for in-depth and detailed research, and repeatedly tested with the help of the flight tactical simulation training system. They refined the targeted training into four stages of “theoretical research, simulation training, actual equipment and flight, and live ammunition testing”, gradually increasing the difficulty of training, and helping pilots master combat skills in a step-by-step manner. Instructor Teng told reporters that in their research and exploration, they also borrowed the navigation mode provided by the co-pilot of the rally, which greatly improved the accuracy of training. Today, under the promotion of the “training think tank”, new tactical actions have been verified in training many times, which not only effectively solved the “reverse slope dilemma”, but also promoted multiple tactics innovations in a coordinated manner, opening up a new situation for training. The “training think tank” came to the flight training ground

■ Zhang Yuchi, special correspondent of the People’s Liberation Army Daily, Tong Zujing

An Army Aviation Brigade organized helicopter sea training. Photo by Zhang Huanpeng, special correspondent of the People’s Liberation Army Daily

Gathering wisdom is more conducive to solving problems, and “many people add fuel to the fire” can “the flames are high”

Speaking of the birth process of the “training think tank”, the leader of an Army Aviation Brigade mentioned an experience of solving difficult problems.

In a live-fire shooting assessment, Guo Henglong, the commander of a helicopter company, served as a member of the referee group. He found that under more complex conditions, the results of other types of ammunition were acceptable, but the shooting accuracy of a certain type of rocket fluctuated greatly, and the hit rate fluctuated.

At the review summary meeting, Guo Henglong raised a question: How to stabilize the hit rate of this type of rocket under complex conditions?

However, after the question was raised, no good countermeasures were found for a while.

Soon, Guo Henglong accepted the task and represented the brigade to participate in major training activities. He will lead the crew to complete the firepower strike mission against the "enemy" ground targets.

When planning the operation, Guo Henglong found that the battlefield environment was relatively complex, the nature and types of targets were diverse, and it was difficult to destroy all targets by relying solely on air-to-ground missiles, and the cost-effectiveness ratio was not scientific. At this time, the problem of the hit rate of this type of rocket was once again placed before them. The crew members carefully studied the deviation value, analyzed the influencing factors in detail, and tried their best to find the "crux" that affected the hit rate.

In the simulated attack of the actual flight training, Guo Henglong found that when aiming at the target, the helicopter body would shake to a certain extent due to various factors, which might cause the laser ranging to deviate.

"The problem of low rocket hit rate may be caused by inaccurate distance measurement." After research and demonstration, they found that when shooting under certain conditions, even if the helicopter body only shook slightly, the impact point might have a significant error.

To solve this problem, the flight backbones and technical backbones of the brigade gathered together, and through research and analysis of the principles of weapons and equipment, they decided to change the previous practice of aiming and ranging, and innovatively proposed a whole set of new shooting methods to make the helicopter ranging free from the influence of body shaking.

In the subsequent major training tasks, the brigade's live-fire shooting achieved "full applause", and the officers and men' independently innovated "precision attack method" was gradually applied.

"Collective wisdom is more conducive to tackling key problems, and 'many people gather firewood' to 'burn high'." This experience has made the brigade's party committee reach a consensus: to accelerate the transformation and upgrading of military training, there must be a backbone team with deep theoretical foundation, professional skills and strong innovation awareness.

To this end, the brigade, in combination with its own training characteristics, adopted the steps of "personal application, battalion and company recommendation, qualification review, comprehensive assessment, and qualification certification" to select professional backbones such as flight, maintenance, communication, and meteorology to form a "training think tank" as the "staff" and "assistant" of the brigade party committee to lead the war and training.

Under the direct mobilization of the brigade leaders, team members participated in the training on the front line, strengthened training guidance and process supervision, and effectively improved the combat readiness training level of the troops. The reporter learned that after the "training think

tank" was put into operation for one year, more than 20 officers and men of the brigade won gold and silver medals in the superior competition activities. The brigade was successively commended by the Army as an "advanced unit for combat readiness" and "advanced unit for equipment work".

Wherever there is a training problem, the "external brain" will be linked there

After getting off the fighter plane, the flight backbone Wang Jinbo had completed the flight plan for the day, but he did not rest. Beside the runway, he sometimes picked up a stopwatch to time, and sometimes took a camera to run to the landing point, carefully observing the takeoff and landing of each helicopter.

"When the helicopter landed, the fuselage posture was not stable enough, and the tire grounding was too rough." At the flight training review meeting that day, Wang Jinbo projected a picture of the landing point and analyzed the tire friction marks. Under the podium, the crew members who were reviewed carefully recorded the problems and studied rectification measures.

As one of the first pilots to modify a certain type of helicopter, Wang Jinbo not only has excellent flying skills, but is also an excellent flight instructor who has trained many flight backbones. There are many backbones like Wang Jinbo in the brigade. They are absorbed into the "training think tank" and serve as "staff" and "assistant" while doing a good job in their own training, assisting the brigade party committee in training and preparing for war.

The brigade leader told reporters that most of the members of the "training think tank" are backbone talents of battalions and companies. By strengthening resource coordination at the brigade level and giving full play to their advantages in the front line of training, the brigade party committee can extend its tentacles of leading the war and training to the end.

To this end, they adjusted the composition of the flight training command group, took turns on duty, arranged professional groups corresponding to the "training think tank" to enter the field to follow the training, guided and supervised the training throughout the process, and reviewed the performance of various elements of flight training on that day, helping the troops solve training problems.

At the weekly training analysis meeting organized by the brigade, it is necessary to conduct a centralized review of this week's flight training, and to study and plan and provide key points for next week's flight training. The speeches of the members of the "training think tank" are often the "highlights".

"A five- or six-minute speech may seem simple, but it requires a lot of data and examples to support effective suggestions." Wang Jinbo told reporters that after a week of intense flight training, many of his comrades had gone to bed, but he often worked late into the night in the flight reference interpretation room.

In a live-fire shooting training, several air-to-ground missiles missed the target. Why did the precision-guided weapons not hit? This result surprised the officers and men, and everyone turned

their attention to the “training think tank”, expecting them to clear the “fog” at the weekly review meeting.

Late at night, the flight reference interpretation room was brightly lit. Shi Juntao, a key flight member, played back the images frame by frame and interpreted the flight parameters in groups. The meteorologist carefully analyzed the impact of the weather conditions on the missiles. The person in charge of ammunition actively contacted the manufacturer to further find out the cause...

“Through observation and analysis, it may be due to the special location of the target, the short attack distance, and the influence of factors such as wind direction and terrain. After the first missile hit, it produced flames, dust and other interfering substances, which interfered with the subsequent missiles and reduced the hit rate.” At the training analysis meeting that week, Shi Juntao’s analysis opened a “breakthrough” for solving the problem.

Wherever there are training problems, the “external brain” will be linked there. At a brigade party committee meeting on war and training not long ago, how to improve the efficiency of firepower strikes was listed as a key topic. The members of the “training think tank” who attended the meeting actively spoke around the topic and proposed solutions.

In the subsequent research, Shi Juntao led the research team to conduct test shooting at different heights, distances and attack methods according to the nature of the target, widely collected and sorted out multiple sets of data, and conducted in-depth research and analysis based on the shooting results. A new method of combined attack with higher firepower strike efficiency came into being.

In order to further stimulate the innovative vitality and training enthusiasm of the “training think tank”, the brigade party committee tried to name various tactics and methods with the names of the main creators.

“Name it after whoever innovated the tactics.” The members of the “training think tank” went deep into the training ground to find out the real situation and make practical plans, focusing on the bottleneck problems that affect the preparation for war and tackling them with wisdom. A number of achievements such as “Yan Ke Teaching Method” and “Zhang Jing Qi Guiding Method” were also “born”, and the combat effectiveness of the troops was continuously consolidated.

Since the operation of the “training think tank”, key members have regularly participated in teaching seminars, assessment supervision and difficult problem-solving activities, and a number of training experiences summarized and sorted out were adopted at the brigade party committee’s war and training meeting.

To assist in leading the battle and training, we must have “skill panic” and must take the initiative to break through ourselves

In the flight simulation training center, pilot Zhang Hao sometimes “flies through the valley” in the simulation cabin, and sometimes “combats the enemy in the air”... Luo Xing, a member of the “training think tank”, is in the command center, watching the entire flight training on the big screen.

“The flight state was not maintained well because the pressure on the stick and the rudder was a little too strong.” As soon as Zhang Hao’s training was over, Luo Xing got the flight parameter evaluation report form and compared the data curve on the chart to analyze the flight personnel’s ability. After sorting and summarizing, these freshly baked data will be presented to the brigade party committee’s war and training meeting as soon as possible, becoming an important basis for the brigade party committee to study the training situation.

“In the past, flight teaching mainly relied on hand-to-hand teaching, and the efficiency was not high.” Luo Xing told reporters that for this reason, the “training think tank” took the initiative to contact manufacturers and institutes, networked with “external brains”, and worked together to develop a tactical simulation training system, preset simulated battlefields in different regional airspaces, different confrontation conditions and different electromagnetic environments, and organized training for multiple new subjects.

The battlefield of the future is changing rapidly, and the battle process is significantly accelerated. The efficiency of equipment rescue and repair must keep up with the pace of combat. The reporter saw at the brigade’s maintenance training center that the leader of the brigade’s support department was supervising a helicopter line troubleshooting training.

An avionics technician held a tablet computer and used the “intelligent on-off test system” independently researched by Zheng Wei, a member of the “training think tank” and a backbone of the maintenance team. After plugging the plug, the screen quickly showed the instructions, and the specific location of the cable on and off was clear at a glance.

In the past, it was necessary to replace the onboard equipment to check the location of the line fault, which seriously affected the efficiency of the repair. Zheng Wei led his comrades to integrate the separate wiring diagram into a system, build a new system, and through thousands of tests and demonstrations, the accuracy of the on-off test reached more than 90%.

“Innovation is connected to the combat effectiveness of the troops, and there can be no mistakes or omissions.” Just when everyone was about to report the results, Zheng Wei called a “pause”: the probability of failure of 10% cannot be ruled out, and the consequences of missing the fighter are unimaginable. In the following 300 days and nights, Zheng Wei led his comrades to concentrate on research, carefully analyze the many factors that affect accuracy, and eliminate or reduce them one by one.

“To assist the leadership of combat and training, we must have ‘skill panic’ and must take the initiative to break through ourselves.” This is the consensus of the members of the “training think tank”.

Some time ago, the troops modified a certain type of helicopter. “We must stand up at the critical moment!” The new equipment has a high degree of integration, a complex integrated avionics system, and a major change in the cockpit structure. The members of the “training think tank” took the lead in embarking on the modification journey.

Among the modification team, special pilot Lu Tao is the oldest pilot, and mechanic Han Beijun is the oldest "old aircrew". As members of the "training think tank", although they are experienced, their physical strength, energy and memory are not as good as when they were young. Faced with new models with complex systems, unfamiliar controls and unknown risks, they choose to work hard and do stupid work.

After hard workday and night, Lu Tao and Han Beijun became the first crew in the brigade to complete the first flight. The modification team completed the test flight handover of the first batch of fighters in a short time, which even the manufacturer felt was "amazing". Under the guidance of the members of the "training think tank", a large number of flight personnel successfully completed the modification, and the training results of the new subjects achieved breakthroughs.

The backbone team is brave to tackle key problems, and the party committee is strong and powerful in leading the battle. The leaders of the brigade told reporters that they will continue to deepen the previous practices, further strengthen the "training think tank", promote the transformation of the troops, and accelerate the improvement of actual combat capabilities.

(All names in this edition are pseudonyms. During the interview, Sun Hongping, Yuan Cheng, and Dai Jianhua provided great assistance, and special thanks are given)

Sharp Viewpoint

Smooth Wisdom Transformation Link

■Liu Bing

The ancients said: "If you can use the power of the masses, you will be invincible in the world; if you can use the wisdom of the masses, you will not be afraid of the saints." History has repeatedly proved that the most creative solutions are often nurtured in the fertile soil of grassroots practice. The theory of "group wisdom" in decision-making science also says that individual wisdom can be aggregated to offset prejudice and correct errors under the participation of everyone in argumentation.

Based on the front line of training and duty, and at the forefront of preparing for war, grassroots officers and men, as operators of weapons and equipment and practitioners of tactics and training methods, often have ideas that are most in line with the actual situation of the troops and are closest to the needs of the battle position. However, personal wisdom always has certain limitations. Even the most experienced maintenance backbones cannot be proficient in all troubleshooting methods. Using grassroots wisdom to collectively tackle combat and training problems will help promote the quality and efficiency of the troops' combat effectiveness. As one scholar lamented: "Use the wisdom of the masses well, and the whole world will be your think tank!"

Only by establishing an open and inclusive participation mechanism can group wisdom exert its true power. Build a dialogue platform, form a normalized opinion collection network, and create an atmosphere where "everyone can make suggestions"; break down professional barriers, allow

different professions to have ideological collisions, absorb and learn from experience and methods; be good at sorting out and analyzing, and find key and useful information from a large amount of group wisdom to serve the solution of combat and training problems.

The role of collective wisdom will ultimately depend on the conversion ratio of combat and training effectiveness, otherwise it will only be empty talk. To form a smooth link of wisdom conversion, it is necessary to create an “innovation sharing platform” to allow the scattered grassroots wisdom to converge, collide and evolve; it is necessary to establish a value conversion mechanism to transform collective wisdom into combat effectiveness through a virtuous cycle of “practice-theory-effectiveness”; it is necessary to establish a dynamic update concept, absorb new concepts and ideas in a timely manner, and regularly improve and update the “results library” to achieve transformation and application in line with the times.

The future battlefield has a distinct “smart war” feature, and collective wisdom is an important support for scientific decision-making. Grassroots officers and men are at the forefront of military struggle preparations. They are good at listening to the ideas of the front line, trying every means to “borrow wisdom” and “collect wisdom”, and strive to achieve crowdfunding and crowd innovation at the same time, so as to accurately implement policies and win decisive battles at critical moments.

雪域边关，查果拉哨所官兵的热血青春与坚守

来源：解放军报 作者：左南星 刘煜钦 崔运红 责任编辑：王一亘 2025-04-01

热血青春守边关

■左南星 刘煜钦 崔运红 摄影报道

巡逻途中，官兵攀爬积雪覆盖的山坡。

官兵开展刺杀操训练。

官兵精心种植的花草，为哨所带来了春意。

阳光房内，官兵休息时间下棋娱乐。

“大家注意安全，踩着我的脚印走……”

3 月中旬，喜马拉雅山脉北麓的群山之间，依然冰雪覆盖、寒气袭人。清晨，西藏军区查果拉哨所巡逻官兵，前往某山口执行巡逻任务。

查果拉，藏语意为”鲜花盛开的地方”，蕴含着对生命禁区的美好期望。然而在这片高原山巅，绿色植物只有在雨季才能星星点点看到，鲜花更是难得一见。虽然高寒缺氧，环境恶劣，一茬茬官兵却在这里斗志昂扬地坚守战位、戍守边关。近年来，在上级大力帮建下，哨所接通光缆电缆，修建了集生活、学习、娱乐等功能于一体的阳光房，官兵戍边条件显著改善。今年开春后，官兵还在室内种下一些花草，为哨所增添了几分春意。

积雪覆盖的乱石，深不见底的冰缝，陡峭湿滑的山坡……巡逻路上充满危险，大家小心翼翼，顶着凛冽寒风前进。经过几个小时的艰难跋涉，巡逻分队顺利抵达目标点位。官兵展开随身携带的一面国旗，表达对祖国的赤子情怀。山口地域寒风呼啸，五星红旗迎风飘展，鲜艳无比。

认真完成边情查勘、观察瞭望等任务后，巡逻分队踏上归途。”我站立的地方是中国，我用生命捍卫守候……”翻过一座山头，哨所依稀出现在眼前，巡逻官兵唱起战歌。歌声充满豪情，在群山之间回荡。

Snowy Border, the Passionate Youth and Perseverance of the Soldiers at Chagola Post

Source: PLA Daily Author: Zuo Nanxing Liu Yuqin Cui Yunhong Editor: Wang Yigen 2025-04-01

Passionate youth guards the border

■ Zuo Nanxing Liu Yuqin Cui Yunhong Photo report

During the patrol, the soldiers climbed the snow-covered hillside.

The soldiers conducted assassination training.

The flowers and plants carefully planted by the soldiers brought spring to the post.

In the sunroom, the soldiers played chess for entertainment during their rest time.

“Everyone pay attention to safety, follow my footsteps...”

In mid-March, the mountains on the northern foot of the Himalayas were still covered with ice and snow, and the cold air was overwhelming. In the early morning, the patrol officers and men of the Chagola Post of the Tibet Military Command went to a mountain pass to perform patrol tasks.

Chagola, which means “a place where flowers bloom” in Tibetan, contains beautiful expectations for the forbidden zone of life. However, on this plateau mountaintop, green plants can only be seen in the rainy season, and flowers are even rarer. Despite the high altitude, lack of oxygen, and harsh environment, soldiers have been fighting and guarding the border with high morale. In recent years, with the help of superiors, the outpost has been connected to optical cables and a sunroom with living, learning, and entertainment functions has been built, which has significantly improved the conditions for soldiers to guard the border. After the beginning of spring this year, soldiers also planted some flowers and plants indoors, adding a touch of spring to the outpost.

Snow-covered rocks, bottomless ice cracks, steep and slippery slopes... The patrol road is full of dangers. Everyone is cautious and moves forward in the biting cold wind. After several hours of arduous trekking, the patrol team successfully arrived at the target point. The soldiers unfolded a national flag they carried with them to express their sincere feelings for the motherland. The cold

wind whistled in the mountain pass area, and the five-star red flag fluttered in the wind, bright and incomparable.

After conscientiously completing border investigation, observation and other tasks, the patrol team set out on their way home. “Where I stand is China, I will defend and wait with my life...” After climbing over a hill, the sentry post vaguely appeared in front of them, and the patrol officers and men sang a war song. The song was full of passion and echoed among the mountains.

第 82 集团军某旅多措并举加强法治军营建设,培塑官兵法治思维

来源：解放军报 作者：贾建光 温巍巍 责任编辑：郭妍菲 2025-04-01

第 82 集团军某旅着力加强法治军营建设

树牢法治理念 培塑法治思维

解放军报讯 贾建光、温巍巍报道：”开发商未按时交房怎么维权”“宅基地纠纷如何妥善解决”……日前，第 82 集团军某旅邀请中央司法警官学院法律专家走进军营，围绕官兵关注度较高的涉法问题现场答疑解惑。该旅领导介绍，他们着力加强法治军营建设，引导官兵通过多种方式学用法律知识，有效提升了法治素养。

“人人学法、懂法、用法，让法治理念根植心底，法治军营建设才能行稳致远。”该旅领导介绍，他们在前期调研时发现，少数官兵存在法治观念不强、依法维权意识较弱等问题。如何教育引导官兵树牢办事依法、遇事找法、解难靠法的法治理念，成为亟待解决的一个问题。

为此，他们从营造浓厚法治氛围入手，在营区广泛设置法治标语，让官兵时时受教育、处处受熏陶；利用”宪法宣传周”“民法典宣传月”等时机，灵活开展形式多样的法治教育；常态举办”法治讲堂”等活动，邀请法律专家走进军营，为官兵提供精准专业的法律服务。

此外，他们还与高校法律专业院系开展共建活动，通过签署法律援助合作协议、挂牌成立”法律援助工作站”等方式，在法治教育、法律咨询、涉军维权等方面深入合作，不断增强官兵法治意识，为部队全面建设注入强劲动能。

“平时多学习掌握法律知识，一旦遇到涉法问题，解决起来就容易多了。”一次法律知识竞赛中，上等兵卢天行分享学习感悟时说，法律法规与官兵工作生活密切相关，只有学法懂法，才能不断提升依法办事能力。

该旅领导介绍，下一步，他们将持续推进法治军营建设，进一步深化与高校法律专业院系合作，通过组织专业培训、模拟法庭、知识竞赛等活动，让法律意识进一步深入兵心。

A Brigade of the 82nd Group Army Has Taken Multiple Measures to Strengthen the Construction of a Law-Based Barracks and Cultivate the Legal Thinking of Officers and Men

Source: PLA Daily Author: Jia Jianguang Wen Weiwei Editor: Guo Yanfei 2025-04-01

A brigade of the 82nd Group Army has focused on strengthening the construction of a law-based barracks

Firmly establish the concept of the rule of law and cultivate the legal thinking

PLA Daily News Jia Jianguang and Wen Weiwei reported: "How to protect rights if the developer fails to deliver the house on time" and "How to properly resolve disputes over homesteads"... Recently, a brigade of the 82nd Group Army invited legal experts from the Central Judicial Police College to enter the barracks to answer questions and solve problems related to the law that officers and men are more concerned about. The leaders of the brigade introduced that they have focused on strengthening the construction of a law-based barracks and guiding officers and men to learn and use legal knowledge in various ways, which has effectively improved their legal literacy.

"Everyone learns, understands and uses the law, so that the concept of the rule of law is rooted in their hearts, and the construction of a law-based barracks can be steady and long-term." The leaders of the brigade introduced that they found in the early stage of the investigation that a few officers and men had problems such as weak legal concepts and weak awareness of protecting rights according to law. How to educate and guide officers and men to firmly establish the concept of rule of law, to act in accordance with the law, to find the law when encountering problems, and to rely on the law to solve problems has become an urgent problem to be solved.

To this end, they started with creating a strong atmosphere of rule of law, widely set up rule of law slogans in the barracks, so that officers and men can be educated at all times and be influenced everywhere; take advantage of opportunities such as "Constitution Promotion Week" and "Civil Code Promotion Month" to flexibly carry out various forms of rule of law education; regularly hold "Rule of Law Lecture Hall" and other activities, invite legal experts to enter the barracks, and provide officers and men with precise and professional legal services.

In addition, they also conducted co-construction activities with colleges and universities' law departments, and through signing legal aid cooperation agreements and setting up "legal aid workstations", they deepened cooperation in rule of law education, legal consultation, and military-related rights protection, continuously enhancing officers and men' awareness of the rule of law, and injecting strong momentum into the comprehensive construction of the troops.

"Learn more legal knowledge in peacetime, and once you encounter legal problems, it will be much easier to solve them." In a legal knowledge competition, Corporal Lu Tianxing shared his learning experience and said that laws and regulations are closely related to the work and life of

officers and men. Only by learning and understanding the law can we continuously improve our ability to act in accordance with the law.

The brigade leaders introduced that in the next step, they will continue to promote the construction of a law-based military camp, further deepen cooperation with law departments of universities, and make legal awareness more deeply rooted in the hearts of soldiers by organizing professional training, mock trials, knowledge competitions and other activities.

第 77 集团军某旅工兵连激励官兵不懈奋斗苦练精训

来源：解放军报 作者：杞卫东 朱赟 责任编辑：郭妍菲 2025-04-01

第 77 集团军某旅工兵连激励官兵驰而不息苦练精训——

“我们再次跨入了先进行列”

■解放军报特约通讯员 杞卫东

工兵连组织训练。杨兵 摄

日前，第 77 集团军某旅第一季度”双争”排名公布，工兵连一跃成为旅队”标杆连队”。面对来之不易的成绩，该连指导员何法不禁感慨万千。

2017年，该连在部队调整改革中组建。建连之初，连队面临”无装备、无技术骨干”的双重难题，战斗力建设艰难爬坡。在旅里组织的”双争”评比活动中，该连排名一度垫底。那段时间，连队官兵士气低迷、干劲不足。

何法介绍，连队由来自 6 个不同基层单位的官兵组成，技术骨干所学专业五花八门、水平参差不齐。眼前的困境让连队党支部一班人深刻认识到，要使连队走上正轨，必须扎扎实实打基础、谋发展。

“我们是新调整组建连队，决不能甘于平庸，更不能成为旅队战斗力建设的一块短板！”军人大会上，时任连长的发言，点燃了官兵书写新连史的激情。

后来两年多时间里，党支部一班人带头参训，严格落实训练计划；狠抓专业骨干人才培养，鼓励技术骨干发挥”传帮带”作用，以老带新缩短人才培养周期……在全连官兵艰苦努力下，2019 年底，该连获评旅”基层建设先进单位”。

然而，令人没想到的是，面对来之不易的荣誉，部分官兵产生了”歇歇脚”的思想，冲劲干劲出现了滑坡的苗头，连队训练再次陷入低层次徘徊状态。

2022年底，该旅”双争”评比结果揭晓，工兵连连续第三次与先进无缘。在连队召开的支部党员大会上，军士支委陈攀深刻剖析原因，言语间充满愧疚：”连队再次与先进失之交臂，我有责任。”

原来，旅队此前组织建制连比武竞赛时，陈攀因休假期间疏于体能锻炼，成绩明显下滑，拖了连队后腿。面对陈攀的自我检讨，连长带头反思：”比武成绩明显落后，说明我们的训练基础不够扎实。只有正视问题、迎头赶上，才能扬眉吐气，打个翻身仗！”

为激励全连官兵始终保持奋斗精神、驰而不息苦练精训，连队党支部经过讨论研究决定，将此次比武失利作为警示事例写进连史，激励官兵知耻后勇、奋起直追。

“我们不仅要扛得动红旗，更要经得起挫折！面对差距，除了奋斗，别无选择！”连队专题教育会上，何法的一番话，拨动了每名官兵的心弦。此后，连队以精武强能目标为牵引，推出一系列改革举措：遴选训练尖子参加支部议训会，持续研究改进组训方法；组织专业骨干轮流登台授课，常态分享经验体会，帮助新同志快速成长；开展”一对一”结对帮带活动，通过精准指导提高训练质效……

“每次想起那场比武失利，官兵们都想着一定要把红旗夺回来！为了实现这个目标，大家把’奋斗’刻印在心底。”何法说，每次训练，大家都把自己当成那个被抽考的人；每次考核，大伙儿心里想得最多的就是拿第一。在官兵共同努力下，连队训练水平明显提升，大家的信心也越来越足。

去年，该连在外驻训期间，以总评优秀的好成绩通过上级组织的战斗力检验评估，被旅里表彰为”野外驻训正规化管理先进连”。年底，连队官兵踊跃报名参加旅里组织的群众性练兵比武，3 名军士分别取得 10 公里跑第一名、400 米障碍第二名和单杠引体向上第三名的好成绩，刷新连队比武成绩纪录。

载誉归来，连队官兵不骄不躁，与往常一样一门心思扑到训练中。

在全体官兵的共同努力下，去年年底，连队被评为军事训练一级单位、保障工作先进单位，8 名官兵受到表彰奖励。表彰大会结束后，连队官兵将奖牌郑重陈列在荣誉室。

“我们再次跨入了先进行列，但依然要不懈奋斗、永远奋斗！”面对连队官兵那一张张朝气蓬勃的脸，何法的一番话掷地有声，这句话也是大家的共同心声。

短 评

奋斗没有”暂停键”

■朱 赟

“逆水行舟用力撑，一篙松劲退千寻。”寥寥数语，道出一个朴素的道理：奋斗没有”暂停键”。大到单位建设，小到个人成长，都离不开长期的、持续的、艰苦的奋斗。

奋斗是军人最美的姿态。从军事训练到政治教育，从日常管理到战备执勤，部队全面建设的每一项工作、每一个环节，都需要官兵全力以赴、接续奋斗。第 77 集团军某旅工兵连调整组建不久即被评为先进单位，又因干劲滑坡连续几年与先进无缘，尔后知耻后勇、奋起直追，以优异成绩再次跨入先进行列。这一曲折经历启示我们，奋斗是艰苦的、寂寞的，但又是甘甜的、幸福的，只有”咬定青山不放松”，才能在不懈奋斗中创造辉煌、成就卓越。

当前，我们正为如期实现建军一百年奋斗目标而奋力攻坚，时间紧迫、任务艰巨。作为新时代革命军人，每名官兵都要保持永不懈怠的精神状态和一往无前的奋斗姿态，在强军新征程上勇攀高峰。各级要以”功成不必在我”的境界和”功成必定有我”的担当，只争朝夕、奋发进取、再接再厉、善作善成，为打好实现建军一百年奋斗目标攻坚战贡献智慧力量。

The Engineer Company of a Brigade of the 77th Group Army Encourages Officers and Men to Work Hard and Train Hard

Source: PLA Daily Author: Qi Weidong Zhu Yun Editor: Guo Yanfei 2025-04-01

The engineer company of a brigade of the 77th Group Army encourages officers and men to work hard and train hard-

“We have once again entered the ranks of the advanced”

■ PLA Daily Special Correspondent Qi Weidong

The engineering company organizes training. Photo by Yang Bing

Recently, the first quarter “double competition” ranking of a brigade of the 77th Group Army was announced, and the engineer company became the “benchmark company” of the brigade. Faced with the hard-won achievements, the company political director He Fa could not help but feel deeply moved.

In 2017, the company was established during the adjustment and reform of the army. At the beginning of the company’s establishment, the company faced the dual difficulties of “no equipment and no technical backbone”, and the combat effectiveness construction was difficult to climb. In the “double competition” evaluation activities organized by the brigade, the company

ranked last for a time. During that time, the morale of the company's officers and men was low and their motivation was insufficient.

He Fa introduced that the company is composed of officers and men from 6 different grassroots units, and the technical backbones have studied a wide range of majors and their levels are uneven. The current predicament has made the party branch of the company deeply realize that in order to put the company on the right track, it is necessary to lay a solid foundation and seek development.

"We are a newly adjusted and established company, and we must not be content with mediocrity, let alone become a shortcoming in the combat effectiveness construction of the brigade!" At the military meeting, the speech of the then company commander ignited the passion of officers and men to write the history of the new company.

In the following two years, a group of people in the party branch took the lead in participating in training and strictly implemented the training plan; they focused on the training of professional backbone talents, encouraged technical backbones to play a role in "passing on, helping and guiding", and shortened the talent training cycle with the old and the new... With the hard work of all the officers and men of the company, at the end of 2019, the company was rated as the "Advanced Unit of Grassroots Construction" of the brigade.

However, what is unexpected is that in the face of the hard-won honor, some officers and men have the idea of "taking a break", and the momentum and enthusiasm have shown signs of decline, and the company training has once again fallen into a low-level hovering state.

At the end of 2022, the results of the brigade's "double competition" evaluation were announced, and the engineering company missed the advanced for the third time in a row. At the party branch meeting held by the company, the sergeant branch committee member Chen Pan deeply analyzed the reasons, and his words were full of guilt: "The company missed the advanced again, and I am responsible."

It turned out that when the brigade organized a competition for the established company, Chen Pan neglected physical exercise during his vacation, and his performance declined significantly, dragging the company down. In the face of Chen Pan's self-examination, the company commander took the lead in reflecting: "The obvious lag in the competition results shows that our training foundation is not solid enough. Only by facing the problem and catching up can we be proud and fight a turnaround!"

In order to encourage all officers and men of the company to always maintain the spirit of struggle and work hard and train tirelessly, the company party branch decided after discussion and research to write the failure of this competition into the company history as a warning example to encourage officers and men to know shame and catch up.

"We must not only be able to carry the red flag, but also be able to withstand setbacks! In the face of the gap, there is no choice but to struggle!" At the company's special education meeting, He

Fa's words touched the hearts of every officer and soldier. Since then, the company has launched a series of reform measures with the goal of improving martial arts and strengthening capabilities: selecting top trainees to participate in branch training meetings, continuously studying and improving training methods; organizing professional backbones to take turns to teach on stage, regularly sharing experiences and helping new comrades grow quickly; carrying out "one-on-one" pairing and helping activities, and improving the quality and effectiveness of training through precise guidance... "Every time I think of the loss in the competition, the officers and men think about taking the red flag back! In order to achieve this goal, everyone has engraved "struggle" in their hearts." He Fa said that every time they train, everyone regards themselves as the person who is selected for the test; every time they are assessed, what everyone thinks most is to get first place. With the joint efforts of officers and men, the company's training level has been significantly improved, and everyone's confidence is getting stronger and stronger. Last year, during the training period, the company passed the combat effectiveness test and evaluation organized by the superiors with excellent overall evaluation, and was commended by the brigade as the "Advanced Company for Regularized Management of Field Training". At the end of the year, the company's officers and men actively signed up for the mass training competition organized by the brigade. Three sergeants won the first place in the 10-kilometer race, the second place in the 400-meter obstacle race, and the third place in the horizontal bar pull-up, breaking the company's competition record.

After returning with honors, the company's officers and men were neither arrogant nor impatient, and they devoted themselves to training as usual.

With the joint efforts of all officers and men, at the end of last year, the company was rated as a first-level military training unit and an advanced unit for support work, and 8 officers and men were commended and rewarded. After the commendation meeting, the company's officers and men solemnly displayed the medals in the honor room.

"We have once again entered the ranks of the advanced, but we still have to work hard and fight forever!" Facing the vigorous faces of the company's officers and men, He Fa's words were loud and clear, and this sentence was also the common voice of everyone.

Short Review

Struggle has no "pause button"

■ Zhu Yun

"To row against the current, you must row hard. If you relax, you will fall back thousands of miles." In just a few words, a simple truth is revealed: struggle has no "pause button". From unit construction to personal growth, long-term, continuous and arduous struggle is indispensable.

Struggle is the most beautiful posture of a soldier. From military training to political education, from daily management to combat readiness, every work and every link of the comprehensive construction of the troops requires officers and men to go all out and continue to struggle. The

engineering company of a brigade of the 77th Group Army was rated as an advanced unit shortly after its adjustment and establishment. However, it missed the advanced status for several consecutive years due to its declining enthusiasm. Later, it learned from its shame and caught up with others, and once again entered the advanced ranks with excellent results. This tortuous experience tells us that struggle is hard and lonely, but sweet and happy. Only by "holding on to the green mountains and not letting go" can we create brilliance and achieve excellence in unremitting struggle.

At present, we are working hard to achieve the goal of the 100th anniversary of the founding of the army as scheduled. Time is pressing and the task is arduous. As a revolutionary soldier in the new era, every officer and soldier must maintain a never-slackening mental state and an indomitable fighting attitude, and bravely climb to the top on the new journey of strengthening the army. All levels should take the state of "success does not have to be mine" and the responsibility of "success must be mine", seize the day, forge ahead, make persistent efforts, and do a good job, so as to contribute wisdom and strength to the battle to achieve the goal of the 100th anniversary of the founding of the army.

南部战区陆军某旅强化一专多能人才预储孵化

来源：解放军报 作者：陈典宏 周宇鹏 冯邓亚 责任编辑：林诗清 2025-04-02

南部战区陆军某旅强化一专多能人才预储孵化——

备份号手及时补位挑大梁

■解放军报记者 陈典宏 特约记者 周宇鹏 特约通讯员 冯邓亚

官兵在训练中。尤英墩 摄

"一号发射车遭'敌'火力打击""主号手'重伤'，战车'受损'"……3 月中旬，南部战区陆军某旅一场陆空对抗训练打响，战场抢修、伤员抢救、接替操作等特情连贯展开。

某连指挥员麻迪超迅速组织官兵抢修战车、后送"伤员"。战车"趴窝"期间，备份号手、下士朱浩然及时补位，接替担任战车主号手，指挥班组快速重建通联、研判"敌"情。

“点火！”凭借过硬技能，朱浩然熟练指挥，带领班组驾驶战车重新投入战斗。训练结束后，朱浩然的表现得到导调组高度肯定。

“备份号手朱浩然能在战场减员情况下及时接替、无缝衔接，得益于旅队扎实开展一专多能训练。”该旅一名领导说，近年来，他们依托战训任务狠抓人才预储孵化，在平时训练中，设真作战场景、设强交战对手，把 “战场减员情况下官兵接替遂行任务能力”作为重要内容训实训精。如今，朱浩然这样的一专多能人才在全旅越来越多。

作为一名军人，记者深知，战场是血与火的考验，总会有流血牺牲，加强减员训练是实战所需。这名领导说得更为直白：战场打不赢，一切等于零，战斗中如果没有备份号手，我们面临的很可能是败仗。

这名领导回忆，那年，他们携手友邻单位组织一场对抗训练。战斗打响后，各单位按作战预案部署到位。起初，虽不时有 “敌”情传来，但官兵密切配合、应对自如。战斗进入白热化阶段，“阵地遭’敌’空袭，数辆主战装备’受损’，主号手’阵亡’”，连贯特情让官兵一下乱了阵脚。

情急之下，指挥员下令由另一名号手接替主号手。面对”敌”连续出招，这名临阵上场的号手因相关技能掌握不熟练，对抗最终失利。

“这些年，我们把训练重心放在一人一岗上，觉得只要把本职岗位的本领练精练强，合起来就会成一个铁拳头。可大家忽视了一点：战场上，作战链条上的每个人都有可能缺位，一旦没有人及时顶上去，整体作战效能势必受到影响。”复盘会上，该旅一名领导率先检讨，一针见血指出这次失利的根源。

一石激起千层浪。随着讨论深入，官兵总结前期演训任务发现，受人员岗位调整、老兵复退等因素影响，少数关键岗位一定程度存在人才断层、号手青黄不接等问题。大家反映，这些问题如果得不到及时解决，将极大影响部队战斗力建设。

打赢未来战争，人才储备是关键。该旅党委迅速召开议战议训会，围绕人才培养推出一系列人才预储孵化措施：优化人才培养模式，推行”一对一”结对帮带活动，”一人一策”制订培养方案，夯实年轻官兵能力基础；开展小专业专攻精练，利用各类演训演练契机，帮助官兵积累战斗经验、淬炼实战本领；严抓各类专业集训，将专业技能和指挥能力纳入预提指挥军士集训必训必考内容；建立完善人才储备库，通过专长任教、组织换岗轮训等方式，全面建强基层骨干队伍。

上等兵玄鹏举是该旅便携式导弹专业发射新号手，起初，他对自己的定位存在思想误区。在他看来，连队训练十分扎实，比他优秀的射手比比皆是，战场上，根本 “用不上”他。

一次综合演练，上级临机导调特情：“主号手‘阵亡’，新号手执行对空实弹射击任务！”任务突至，玄鹏举措手不及，被上级当场指出射击时动作不连贯、射击精度不高等多个问题。走下训练场，玄鹏举懊悔不已。

痛定思痛。归队后，玄鹏举主动报名参加结对帮带活动。在帮带骨干指导下，他利用模拟训练系统加班加点练操作、强技能。经过一段时间努力，玄鹏举基本具备了独立遂行任务的能力。采访中，玄鹏举告诉记者，那次失利至今让他记忆犹新，目前，他正朝着“全能号手”目标努力。

发生在玄鹏举身上的变化，是该旅施行人才预储孵化措施以来，青年官兵成长成才的一个缩影。

某修理连以往遇有维修任务时，通常安排维修骨干承担。久而久之，一些年轻战士因历练机会少、维修技能提升慢，滋生了懈怠思想。支部一班人发现这个现象后，借旅队加强人才预储孵化契机，主动优化人才培养模式，大胆给年轻战士交任务、压担子、搭舞台，激发他们干事创业的动力活力。经过一段时间探索，该旅不少年轻战士在任务中经风雨、强筋骨、长才干，成长为独当一面的骨干，下士莽正龙就是其中之一。

“常见的车辆故障，就没有他排除不了的。”记者了解到，虽然莽正龙才二十出头，但已是掌握多项维修技能的“兵专家”。不仅如此，经过多次任务历练的他，还练就了一手给战车“听诊把脉”的绝活。然而，两年前的莽正龙，连独立完成保障任务的能力都不具备。“这几年，连队常态化开展士兵讲堂、强军课堂，组织维修专业骨干轮流登台分享经验、交流技巧。”谈及自己的成长，莽正龙说，“学经验”是一方面，“干中练”是另一方面。连队不仅定期开展全能修理能手小竞赛小比武，还组织连队新战士、新骨干轮流参加大项任务，助推大家在实践中磨砺本领。

充实人才库，备战底气足。如今，该旅八成以上官兵能做到一专多能，一批专业骨干迅速成长，在大项任务中挑大梁、站排头。前不久，该旅携手友邻空军部队展开实兵对抗演练，多名备份号手接替上岗、表现出色，各作战单位密切配合、相互补位，合力打了一场胜仗。

短 评

“多备一手”储人才

■黄 松

独木不成林。作战链条上，每名官兵、每个战位都与战场制胜密切相关。战场上，一旦某个环节出现问题，备份力量上不去、顶不住，就可能导致作战链条断裂、战斗体系瘫痪。南部战区陆军某旅依托战训任务狠抓人才预储孵化，培养了一批能在大项任务中挑大梁、站排头的年轻骨干、储备力量，为制胜未来战场夯实了人才基础，他们的做法值得点赞。

战场态势瞬息万变，正如该旅一名领导所言：战斗中如果没有备份号手，我们面临的很可能是败仗。这既是对战场的冷静思考，也是对底线思维的生动解读。这种思考和解读提醒我们，必须时刻保持储备打仗人才的紧迫感和忧患感，从最坏处着眼、从最难处下手，尤其要高度重视培养关键岗位的关键人才，确保在“多备一手”中锻炼队伍、培养人才。

军人生来为打赢。对官兵来说，必须时刻以主人翁意识担起打仗职责、苦练打赢本领，确保任何情况下都能召之即来、来之能战、战之必胜。

A Certain Brigade of the Southern Theater Command Army Strengthens the Pre-Storage and Incubation of Talents with One Specialty and Multiple Abilities

Source: PLA Daily Author: Chen Dianhong Zhou Yupeng Feng Dengya Editor: Lin Shiqing 2025-04-02

A certain brigade of the Southern Theater Command Army strengthens the pre-storage and incubation of talents with one specialty and multiple abilities——

The backup operator takes up the responsibility in time

■ PLA Daily reporter Chen Dianhong Special reporter Zhou Yupeng Special correspondent Feng Dengya

a0fa82aae992183e8e3bc5072e09174f.jpg

Officers and men in training. Photo by You Yingdun

“The No. 1 launch vehicle was hit by ‘enemy’ firepower”, “The main operator was ‘seriously injured’, and the tank was ‘damaged’”... In mid-March, a land-air confrontation training was launched in a certain brigade of the Southern Theater Command Army, and special situations such as battlefield repair, rescue of the wounded, and replacement operation were conducted in a continuous manner.

A certain company commander Ma Dichao quickly organized officers and men to repair the tank and evacuate the “wounded”. During the period when the tank was “down”, the backup operator, corporal Zhu Haoran, took over as the main operator of the tank in time, commanding the team to quickly rebuild the communication and judge the “enemy” situation.

“Ignite!” With excellent skills, Zhu Haoran commanded skillfully and led the team to drive the tank back into battle. After the training, Zhu Haoran’s performance was highly recognized by the command and dispatch group.

“Backup operator Zhu Haoran was able to take over in time and seamlessly connect in the case of battlefield reduction, thanks to the brigade’s solid implementation of one-specialty-multi-skill training.” A leader of the brigade said that in recent years, they have relied on combat training

tasks to focus on talent pre-storage and incubation. In peacetime training, they set up real combat scenes and strong opponents, and took “the ability of officers and men to take over tasks in the case of battlefield reduction” as an important content of training. Nowadays, there are more and more talents like Zhu Haoran in the brigade.

As a soldier, the reporter knows that the battlefield is a test of blood and fire, there will always be bloodshed and sacrifice, and strengthening the reduction training is necessary for actual combat. The leader said it more bluntly: If we can’t win the battle, everything is equal to zero. If there is no backup operator in the battle, we may face defeat.

The leader recalled that year, they organized a confrontation training with friendly neighboring units. After the battle started, each unit was deployed according to the combat plan. At first, although there were occasional reports of “enemy” information, the officers and men cooperated closely and responded with ease. The battle entered a white-hot stage, the position was attacked by the “enemy” air strike, several main combat equipment were “damaged”, and the main operator was “killed”, and the continuous special situation made the officers and men confused.

In a hurry, the commander ordered another operator to replace the main operator. Faced with the continuous moves of the “enemy”, the operator who went on the battlefield was not proficient in the relevant skills, and the confrontation eventually failed.

“In recent years, we have focused our training on one person and one post, thinking that as long as we practice and strengthen the skills of our own posts, we will become an iron fist. But everyone overlooked one point: on the battlefield, everyone in the combat chain may be absent. Once no one takes over in time, the overall combat effectiveness will inevitably be affected.” At the review meeting, a leader of the brigade took the lead in reviewing and pointed out the root cause of the defeat.

A stone stirs up a thousand waves. As the discussion deepened, the officers and men summarized the previous training tasks and found that due to factors such as personnel position adjustments and veterans’ retirement, a few key positions have a certain degree of talent gaps and a lack of young and old operators. Everyone reflected that if these problems are not solved in time, it will greatly affect the combat effectiveness of the troops.

To win future wars, talent reserves are the key. The brigade’s Party Committee quickly convened a meeting to discuss war and training, and launched a series of talent pre-reserve incubation measures around talent training: optimize the talent training model, promote “one-to-one” pairing and mentoring activities, and formulate training plans for “one person, one policy” to consolidate the ability foundation of young officers and men; carry out small professional specialization and training, and use various training and exercise opportunities to help officers and men accumulate combat experience and temper their practical skills; strictly grasp various professional trainings, and include professional skills and command capabilities in the training and examination content of pre-promotion command sergeants; establish and improve the talent reserve pool, and

comprehensively strengthen the grassroots backbone team through teaching with expertise, organizing rotation training, etc.

Corporal Xuan Pengju is a new professional launcher of portable missiles in the brigade. At first, he had a misunderstanding of his own positioning. In his opinion, the company's training is very solid, and there are many shooters who are better than him. On the battlefield, he is "not useful" at all.

During a comprehensive exercise, the superiors made an emergency command: "The main operator was killed, and the new operator will perform the air-to-air live-fire shooting mission!" The mission came suddenly, and Xuan Pengju was caught off guard. His superiors pointed out on the spot that his shooting movements were not coherent and his shooting accuracy was not high. After leaving the training ground, Xuan Pengju regretted it.

Learn from the pain. After returning to the team, Xuan Pengju took the initiative to sign up for the paired assistance activity. Under the guidance of the backbone of the assistance, he used the simulation training system to work overtime to practice operation and strengthen skills. After a period of hard work, Xuan Pengju basically has the ability to perform tasks independently. In the interview, Xuan Pengju told reporters that the failure is still fresh in his memory. At present, he is working towards the goal of "all-round operator".

The changes that have taken place in Xuan Pengju are a microcosm of the growth and development of young officers and men since the brigade implemented the talent pre-storage incubation measures.

In the past, when a repair company encountered a maintenance task, it usually arranged the backbone of the maintenance to undertake it. Over time, some young soldiers developed a lazy mentality due to the lack of training opportunities and slow improvement of maintenance skills. After discovering this phenomenon, a group of people in the branch took the opportunity of strengthening the talent reserve incubation of the brigade to actively optimize the talent training model, boldly assign tasks, pressure and build a stage for young soldiers, and stimulate their motivation and vitality to do things and start businesses. After a period of exploration, many young soldiers of the brigade have experienced hardships, strengthened their muscles and bones, and grown their talents in the missions, and have grown into backbones who can take charge of their own affairs. Corporal Mang Zhenglong is one of them. "There is no common vehicle failure that he can't eliminate." The reporter learned that although Mang Zhenglong is only in his early twenties, he is already a "soldier expert" who masters multiple maintenance skills. Not only that, after many missions, he has also mastered the unique skill of "listening to the pulse" of the tank. However, two years ago, Mang Zhenglong did not even have the ability to independently complete the support mission. "In recent years, the company has regularly held soldier lectures and military strengthening classes, and organized maintenance professional backbones to take turns to share experiences and exchange skills on stage." Talking about his own growth, Mang Zhenglong said, "Learning experience" is one aspect, and "practicing while doing" is another. The company not

only regularly holds small competitions and small competitions for all-round repair experts, but also organizes new soldiers and new backbones of the company to take turns to participate in major tasks, helping everyone to hone their skills in practice.

Enrich the talent pool and prepare for war with confidence. Today, more than 80% of the officers and men of the brigade can be multi-talented, and a group of professional backbones have grown rapidly, taking the lead in major tasks. Not long ago, the brigade joined hands with the friendly air force to carry out live-fire confrontation exercises. Many backup operators took over and performed well. The various combat units cooperated closely and complemented each other, and worked together to win a victory.

Short Review

“Prepare more” to reserve talents

■ Huang Song

A single tree cannot make a forest. In the combat chain, every officer and soldier and every combat position is closely related to winning the battlefield. On the battlefield, once a problem occurs in a certain link, the backup force cannot be used and cannot withstand it, which may lead to the break of the combat chain and the paralysis of the combat system. A brigade of the Southern Theater Command Army has focused on talent pre-reservation and incubation based on combat training tasks, and has cultivated a group of young backbones and reserve forces who can take the lead in major tasks, laying a solid foundation for winning the future battlefield. Their approach deserves praise.

The battlefield situation changes rapidly. As a leader of the brigade said: If there is no backup operator in the battle, we are likely to face a defeat. This is both a calm thinking about the battlefield and a vivid interpretation of the bottom line thinking. This kind of thinking and interpretation reminds us that we must always maintain a sense of urgency and anxiety in reserving talents for war, starting from the worst and the most difficult, and especially attach great importance to cultivating key talents in key positions, ensuring that the team is trained and talents are cultivated in “more preparations”.

Soldiers are born to win. For officers and men, they must always take on the responsibility of fighting with a sense of ownership, work hard to practice winning skills, and ensure that they can come when called, fight when they come, and win when they fight under any circumstances.

陆军某部组织多课目跨昼夜飞行训练

来源：解放军报 作者：胡云艳 石芝鹏 责任编辑：林诗清 2025-04-02

陆军某部组织多课目跨昼夜飞行训练——

披星戴月 奋飞砺翅

■解放军报记者 胡云艳 特约通讯员 石芝鹏

近日，某机场引擎轰鸣，陆军某部一场多课目跨昼夜飞行训练拉开帷幕。”起飞！”随着塔台指挥员一声令下，多架战鹰接续升空，完成战斗编组后，飞向目标空域。

“05号直升机尾桨故障！”刚抵达目标空域，飞行员焦一琛就接到特情通报。他一边控制直升机姿态，一边调整飞行参数。经过一系列操作，他成功处置特情，操纵直升机安全着陆。

该旅领导介绍，他们紧贴使命任务推进战训耦合，在训练中随机嵌入连贯特情，让飞行员带着敌情飞、瞄准对手练、紧盯战场训，着力在实战实训中强化打仗意识、锤炼胜战本领。

“遭’敌’强电磁干扰，通信中断！”重新起飞后，特情再次传来。焦一琛果断切换备用通信频道，同时运用战术动作规避干扰源，成功摆脱”敌”强电磁干扰。另一片空域，飞行员钱怀洋正驾机在山谷间低空飞行。虽然目标区域地形复杂，但钱怀洋凭借丰富经验，沉着冷静操纵战机利用地形掩护快速逼近目标。发现目标后，他在僚机配合下，对”敌”实施精准模拟打击。

夜幕降临，一架架战鹰完成补给维护后，再次升空投入夜间训练。夜空中，飞行员只能依靠微弱灯光和航电设备辨别方向，但飞行员胡杰凭借过硬技术和心理素质，出色完成了野外场地起降等课目训练。

“未来战场瞬息万变，只有平时练好、练精、练过硬，战时才能拉得出、上得去、打得赢。”该旅领导告诉记者，近年来，他们聚焦战场需求，从难从严组织专攻精练，不断探索创新训练方法和战术运用手段，提升部队在复杂环境下的应急应战水平。

茫茫夜色中，随着最后一架战鹰平稳着陆，本次训练落下帷幕。参训官兵马不停蹄，立即展开复盘总结。大家围坐一起，针对此次训练中暴露的问题短板展开讨论，一场”头脑中的战斗”在讲评室中展开。

A Certain Army Unit Organized Multi-Subject Cross-Day and Night Flight Training

Source: PLA Daily Author: Hu Yunyan Shi Zhipeng Editor: Lin Shiqing 2025-04-02

A certain army unit organized multi-subject cross-day and night flight training——

Flying day and night to sharpen wings

■ PLA Daily reporter Hu Yunyan Special correspondent Shi Zhipeng

Recently, the engine roared at a certain airport, and a multi-subject cross-day and night flight training of a certain army unit kicked off. “Take off!” With the command of the tower commander,

several warhawks took off one after another, completed the combat formation, and flew to the target airspace.

“The tail rotor of helicopter No. 05 is faulty!” As soon as he arrived at the target airspace, pilot Jiao Yichen received a special situation report. He controlled the helicopter’s attitude while adjusting the flight parameters. After a series of operations, he successfully handled the special situation and manipulated the helicopter to land safely.

The leaders of the brigade introduced that they closely followed the mission and tasks to promote the coupling of combat and training, and randomly embedded coherent special situations in training, so that pilots could fly with enemy situations, train with aiming at opponents, and train closely on the battlefield, focusing on strengthening combat awareness and tempering the ability to win in actual combat training.

“Communication was interrupted due to strong electromagnetic interference from the enemy!” After taking off again, the special situation came again. Jiao Yichen decisively switched to the backup communication channel, and at the same time used tactical actions to avoid the interference source, and successfully got rid of the strong electromagnetic interference of the “enemy”. In another airspace, pilot Qian Huaiyang was flying at a low altitude between the valleys. Although the terrain in the target area was complex, Qian Huaiyang relied on his rich experience to calmly manipulate the fighter plane to quickly approach the target using the terrain cover. After discovering the target, he conducted precise simulated strikes on the “enemy” with the cooperation of his wingman.

As night fell, after completing the supply and maintenance, the warhawks took off again for night training. In the night sky, pilots can only rely on weak lights and avionics equipment to identify directions, but pilot Hu Jie, with his excellent technical and psychological qualities, successfully completed training on subjects such as take-off and landing in the field.

“The battlefield of the future is changing rapidly. Only by practicing well, practicing finely, and practicing hard in peacetime can we be able to pull out, go up, and win in wartime.” The leaders of the brigade told reporters that in recent years, they have focused on battlefield needs, organized specialized training from difficult and strict, and continuously explored innovative training methods and tactical application methods to improve the emergency response level of the troops in complex environments.

In the vast night, with the smooth landing of the last war eagle, this training came to an end. The officers and men participating in the training did not stop and immediately started a review and summary. Everyone sat together to discuss the problems and shortcomings exposed in this training, and a “battle in the mind” unfolded in the review room.

第 73 集团军某旅：建成诊疗中心 守护官兵健康

来源：解放军报 作者：冯杨 陈游峰 责任编辑：杜圣智 2025-04-02

第 73 集团军某旅——

建成诊疗中心 守护官兵健康

■冯 杨 解放军报特约通讯员 陈游峰

在诊疗中心接受两个疗程的康复理疗后，第 73 集团军某旅下士孙涛腰痛症状明显缓解。

孙涛是一名火箭筒手。训练中，他时常需要背负数十公斤重的装备。此前，由于长时间高强度负重，他开始感到腰疼。前往体系医院检查，医生诊断为腰肌劳损，建议他定期做康复治疗。

由于营区距离体系医院太远，孙涛的康复治疗进行得断断续续，效果不尽如人意。不过今年初，传来了好消息，旅诊疗中心建成并投入使用，官兵们足不出营便可享受日常诊疗、健康体检、康复理疗等服务。孙涛因此接受了系统治疗，身体明显好转。

“提高诊疗水平，守护官兵健康。为官兵提供便捷优质的在营诊疗服务，也是在为战斗力建设服务。”该旅领导告诉笔者，随着训练强度难度的增加，官兵们出现训练伤的风险同步增大。这些年，各级都很重视军事训练伤防治工作，建设诊疗中心是其中一项重要举措。

“训练伤防治，要突出预防。”该诊疗中心负责人介绍，在为官兵提供健康诊疗的同时，他们重视做好训练伤预防常识科普工作，强化官兵科学训练和自我防护意识。

该旅诊疗中心康复理疗室内，某连下士李康梁正在磁振热治疗仪上接受理疗。这段时间，因为备战群众性练兵比武，训练强度加大，他腿部肌肉出现酸痛不适，为了避免发展成训练伤，便第一时间来到这里进行预防治疗。

除了建设诊疗中心，从去年开始，该旅还从完善配套基础医疗设施着手，分批次引入医疗器械，为营连配备了康复训练理疗仪、按摩床、弹力带等运动恢复器材，提升基层自主防治军事训练伤能力水平。

在诊疗中心建设伊始，该旅同步挑选了一批营连卫生员到中心轮岗培训，学习掌握常见训练伤预防方法和基础理疗技能，提升基层卫勤人员医疗救治水平。

上等兵张创是某连卫生员。这段时间，他在诊疗中心进行临床见习，接受系统培训。”我希望能够将所学应用于实践，帮助战友预防训练伤，消除伤病困扰。”谈及今后的打算，他充满信心地说。

A Certain Brigade of the 73rd Group Army: A Diagnosis and Treatment Center Was Built to Protect the Health of Officers and Men

Source: PLA Daily Author: Feng Yang Chen Youfeng Editor: Du Shengzhi 2025-04-02

A certain brigade of the 73rd Group Army——

A diagnosis and treatment center was built to protect the health of officers and men

■ Feng Yang PLA Daily Special Correspondent Chen Youfeng

After receiving two courses of rehabilitation therapy at the diagnosis and treatment center, Sun Tao, a corporal of a certain brigade of the 73rd Group Army, had significantly relieved his back pain symptoms.

Sun Tao is a rocket launcher. During training, he often needs to carry equipment weighing dozens of kilograms. Previously, due to long-term high-intensity weight-bearing, he began to feel back pain. He went to the system hospital for examination, and the doctor diagnosed him with lumbar muscle strain and recommended that he undergo regular rehabilitation treatment.

Because the camp was too far away from the system hospital, Sun Tao's rehabilitation treatment was intermittent and the effect was not satisfactory. However, at the beginning of this year, good news came. The brigade's diagnosis and treatment center was completed and put into use. Soldiers can enjoy daily diagnosis and treatment, health examinations, rehabilitation and physiotherapy services without leaving the camp. Sun Tao received systematic treatment and his health improved significantly.

"Improve the level of diagnosis and treatment and protect the health of soldiers. Providing convenient and high-quality in-camp diagnosis and treatment services to soldiers is also serving the construction of combat effectiveness." The brigade leader told the author that as the intensity and difficulty of training increase, the risk of training injuries among soldiers increases simultaneously. In recent years, all levels have attached great importance to the prevention and treatment of military training injuries, and the construction of a diagnosis and treatment center is one of the important measures.

"Prevention and treatment of training injuries should focus on prevention." The person in charge of the diagnosis and treatment center introduced that while providing health diagnosis and treatment for soldiers, they attach importance to popularizing knowledge about the prevention of training injuries and strengthening the scientific training and self-protection awareness of soldiers.

In the rehabilitation and physiotherapy room of the brigade's diagnosis and treatment center, Li Kangliang, a corporal of a company, is receiving physiotherapy on a magnetic resonance thermal therapy device. During this period, because of the preparation for mass training competitions, the

training intensity increased, and his leg muscles became sore and uncomfortable. In order to avoid developing into training injuries, he came here for preventive treatment as soon as possible.

In addition to building a diagnosis and treatment center, since last year, the brigade has also started from improving the supporting basic medical facilities, introducing medical equipment in batches, and equipped the battalion and company with rehabilitation training physiotherapy equipment, massage beds, elastic bands and other sports recovery equipment to improve the grassroots' ability to prevent and treat military training injuries independently.

At the beginning of the construction of the diagnosis and treatment center, the brigade simultaneously selected a group of battalion and company medical staff to rotate training at the center to learn and master common training injury prevention methods and basic physiotherapy skills, and improve the medical treatment level of grassroots medical staff.

Corporal Zhang Chuang is a medical staff of a company. During this period, he conducted clinical internships at the diagnosis and treatment center and received systematic training. "I hope to apply what I have learned to practice, help my comrades prevent training injuries, and eliminate injuries and diseases." Talking about his future plans, he said confidently.

第 76 集团军某旅"一站式"服务解兵忧

来源：中国军网-解放军报 作者：吴骁峰 李潇潇 责任编辑：杜圣智

2025-04-03

第 76 集团军某旅汇编为兵服务手册

"一站式"服务解兵忧

解放军报讯 吴骁峰、李潇潇报道：近日，第 76 集团军某旅干部邢鸿泰出差归队后，按照旅机关下发的为兵服务手册准备好票据。随后，他来到机关，联系手册中指定的工作人员，很快完成差旅费报销。"流程清晰、过程便捷，机关'一站式'服务为我们节省了不少时间，办事效率更高了。"邢鸿泰高兴地说。

"前期调研中，有官兵反映，由于不了解具体业务办理流程、材料上交时间节点等，到机关办事时往往要跑好几趟。"该旅领导介绍，为提高机关服务基层质效，他们探索推出"一站式"服务机制。他们通过问卷调查、座谈了解等方式，征求基层官兵意见建议，汇总梳理出证件办理、福利待遇、器材请领、故障申报等 7 类日常办事内容。在此基础上，他们将办事内容细化为具体办事清单，组织机关相关科室逐项认领，并在每件办事内容后详细列出办理流程、经办人员姓名电话、必备材料等提示，最后汇编成为兵服务手册下发基层。

前不久，该旅某营中士李京澎因购房需要，需到机关开具提取住房公积金的相关证明。他根据为兵服务手册相关提示，提前准备好个人材料，前往旅机关人力资源科进行审核，很快便开出了证明。”机关不仅服务态度好，而且办事效率高，我特别满意！”李京澎不由得竖起大拇指。

“一站式”服务解兵忧暖兵心。在近期一次问卷调查中，该旅官兵对机关服务基层满意度明显提升。据了解，该旅将定期收集基层官兵反馈建议，动态优化为兵服务手册内容，不断提升官兵幸福感、获得感。

The “One-Stop” Service of a Brigade of the 76th Group Army Relieves Soldiers’ Worries

Source: China Military Network-People’s Liberation Army Daily Author: Wu Xiaofeng Li Xiaoxiao Editor: Du Shengzhi

2025-04-03

A brigade of the 76th Group Army compiled a service manual for soldiers

“One-stop” service relieves soldiers’ worries

People’s Liberation Army Daily News Wu Xiaofeng and Li Xiaoxiao reported: Recently, after returning from a business trip, Xing Hongtai, a cadre of a brigade of the 76th Group Army, prepared the bills in accordance with the service manual for soldiers issued by the brigade. Afterwards, he came to the administrative organization and contacted the staff designated in the manual, and quickly completed the reimbursement of travel expenses. “The process is clear and convenient, and the administrative organization’s ‘one-stop’ service saves us a lot of time and makes things more efficient.” Xing Hongtai said happily.

“In the early stage of the investigation, some officers and men reported that because they did not understand the specific business handling process, the time node for submitting materials, etc., they often had to run several times to the administrative organization to do things.” The leaders of the brigade introduced that in order to improve the quality and efficiency of the administrative organization’s service to the grassroots, they explored and launched a “one-stop” service mechanism. Through questionnaire surveys and discussions, they solicited opinions and suggestions from grassroots officers and men, and summarized and sorted out 7 types of daily affairs, such as certificate processing, welfare benefits, equipment application, and fault reporting. On this basis, they refined the service content into a specific service list, organized the relevant departments of the administrative organization to claim them one by one, and listed the processing procedures, the name and phone number of the person in charge, the necessary materials and other tips in detail after each service content, and finally compiled them into a soldier service manual and distributed them to the grassroots.

Not long ago, Li Jingpeng, a sergeant in a battalion of the brigade, needed to go to the administrative organization to issue relevant certificates for withdrawing housing provident funds due to the need to buy a house. According to the relevant tips in the service manual for soldiers, he prepared his personal materials in advance and went to the human resources department of the brigade for review, and soon issued a certificate. “The administrative organization not only has a good service attitude, but also has high efficiency. I am very satisfied!” Li Jingpeng couldn’t help but give a thumbs up.

“One-stop” service relieves soldiers’ worries and warms their hearts. In a recent questionnaire survey, the officers and men of the brigade were significantly satisfied with the grassroots service of the administrative organization. It is understood that the brigade will regularly collect feedback and suggestions from grassroots officers and men, dynamically optimize the content of the service manual for soldiers, and continuously improve the officers and men’ sense of happiness and gain.

http://www.81.cn/lj_208555/jdt_208556/16378796.html

积极主动开门练兵 让革新成果惠及友邻部队

来源：中国军网-解放军报 作者：廖晓彬 石芝鹏 向黎鸣 责任编辑：杜圣智 发布：2025-04-03

陆军某旅积极主动开门练兵——

让革新成果惠及友邻部队

■解放军报特约记者 廖晓彬 特约通讯员 石芝鹏 记者 向黎鸣

超低空飞行训练。吴延辉摄

隐蔽抵近、发起攻击……近日，一场实战化训练在某空域拉开帷幕。陆军某部飞行员驾驶直升机，采用陆军某旅共享的战法对目标展开攻击，精准命中目标。

走下战机，谈及该旅共享的战法，该部飞行员难掩兴奋：”这不仅解决了长期困扰我们的训练难题，还为我们下一步组训拓宽了思路。”

无独有偶。另一支陆航部队运用该旅针对直升机海上低空突防组训难题摸索出的一套新战法，成功提升了部队海上低空作战能力。

“近年来，我们打破建制壁垒，与友邻部队分享自主革新的战法成果，共享彼此在训练中的收获，走开战术战法经验共享、优势互补新路。”该旅领导介绍，这一举措既让友邻单位通过吸收好的战法、经验提升训练效益，又让训练革新成果接受更多实践检验，得到进一步优化完善。

谈及为何将宝贵训练经验”拱手送人”，该旅领导讲起一件往事。

前些年，因为一无经验二无教材，该旅直升机海上搜救课目训练效果不佳。为此，他们决定前往海军某大队取经。没想到，该大队将这一课目的组训方法倾囊相授，帮助他们有效破解组训瓶颈。

“只有不断扩大’朋友圈’，才能收获更多训练’金点子’。”那次经历，让该旅党委一班人达成共识：在接下来的训练中，要着力打破建制壁垒，共享战法革新成果。

他们按照”共享共用、优势互补”原则，构建战训革新成果共享机制，将探索的多项战法训法、技术革新成果等梳理成文字资料、制作成视频短片，定期举办”战训革新成果分享会”，与友邻单位共享；利用参观见学、研讨交流、联合训练等时机，向友邻部队推荐介绍战训革新成果。”无论哪家单位要借鉴革新思路、引进革新成果，我们都敞开大门、随时欢迎！”该旅领导说。

开门练兵让该旅多项训练革新成果”走”出营门：”直升机热加油补弹”保障方法，推广至多个陆航部队；”八绳同时机降”训练方法，被友邻部队引进应用……

“与友邻单位共享革新成果，我们既是奉献者，也是受益者。”该旅领导介绍，去年，他们摸索出某项直升机海上超低空突防战法，友邻单位引入后破解了困扰多年的海上突防难题。尔后，友邻部队在这一战法基础上，对多个作战课题展开研究论证，让该战法日臻完善，更加管用实用。

在共享中共进，在交流中融合。如今，该旅将训练革新成果共享机制不断向联合作战领域延伸——与海军舰艇支队共享直升机海上着舰经验，与无人机分队共研协同战法，与海军直升机分队分享海上搜索目标技巧……

前不久，陆军某部借鉴该旅处置异常空海情经验，在能见度不佳的条件下，成功完成异常空情的查证处置任务，受到上级好评。

对此，该部领导感慨地说：”不同军兵种、不同作战力量优势互补、经验互鉴、有机融合，汇聚成更强大的体系作战能力。”

短 评

开门练兵 共享共进

■方星贤

党的十八大以来，人民军队强军兴军步伐铿锵有力，实战化训练不断向纵深推进。在推动战斗力持续提升过程中，各部队发挥官兵智慧，在练兵实践中总结出大量管用实用的经验做法。陆军某旅打破建制壁垒共享训练革新成果的做法，不仅解了友邻单位”燃眉之急”，更推动已有成果”再上层楼”，实现”双赢”。

他山之石，可以攻玉。当前，部队深入推进实战化军事训练过程中，面临不少新情况、新问题。各单位应强化开门练兵意识，对战法训法、创新成果等共享互通、互学共鉴，在取长补短、优势互补中，形成强大战斗合力。然而，少数单位将”独门秘籍”藏着掖着，生怕”教会徒弟、饿死师傅”。长此以往，不仅不利于自身建设发展，也不利于部队整体战斗力提升。

开门练兵，共享共进。视野有多宽，决定我们能走多远、登多高。现代战争是体系与体系的对抗，单靠任何一个军兵种都不可能”包打天下”，只有充分发挥各军兵种力量的特点优长，才能集优聚能、体系增效。平时训练中，各单位应树牢”一盘棋”思想，坚持开门练兵、共享共进，变”独门秘籍”为”众家之长”，通过互学共鉴实现共同进步，推动部队整体战斗力不断提升。

Actively Open the Door to Training and Let the Results of Innovation Benefit Friendly Troops

Source: China Military Network-People’s Liberation Army Daily Author: Liao Xiaobin Shi Zhipeng Xiang Liming Editor: Du Shengzhi Release: 2025-04-03

A certain army brigade actively and proactively open the door to training-

Let the results of innovation benefit friendly troops

■People’s Liberation Army Daily Special Correspondent Liao Xiaobin Special Correspondent Shi Zhipeng Reporter Xiang Liming

Ultra-low altitude flight training. Photo by Wu Yanhui

Covert approach, launch an attack... Recently, a practical training kicked off in a certain airspace. A pilot of a certain army unit drove a helicopter and used the tactics shared by a certain army brigade to attack the target and hit the target accurately.

Stepping off the fighter aircraft and talking about the tactics shared by the brigade, the pilot of the unit could not hide his excitement: “This not only solves the training problems that have plagued us for a long time, but also broadens our ideas for the next step of training.”

Coincidentally. Another army aviation unit successfully improved its low-altitude combat capability at sea by using a new set of tactics that the brigade had explored to solve the problem of low-altitude helicopter penetration training at sea.

“In recent years, we have broken down the barriers of the system, shared the results of self-innovated tactics with friendly troops, shared each other’s gains in training, and embarked on a new path of sharing tactical experience and complementary advantages.” The brigade leader introduced that this measure not only allows friendly units to improve training efficiency by absorbing good tactics and experience, but also allows the results of training innovation to be tested more in practice and further optimized and improved.

When talking about why the valuable training experience was “handed over to others”, the brigade leader talked about a past event.

In the past few years, because of no experience and no teaching materials, the training effect of the brigade’s helicopter maritime search and rescue course was not good. For this reason, they decided to go to a naval brigade to learn from it. Unexpectedly, the brigade taught them the training methods of this course, helping them to effectively break the bottleneck of training.

“Only by continuously expanding the ‘circle of friends’ can we gain more ‘golden ideas’ for training.” That experience made the brigade’s party committee reach a consensus: in the next training, we must strive to break down the barriers of the system and share the results of the innovation of tactics.

In accordance with the principle of “sharing and using, complementary advantages”, they built a mechanism for sharing the results of combat and training innovation, sorted out the many tactics and training methods, technical innovation results, etc. explored into text materials, made them into short videos, and regularly held “combat and training innovation results sharing meetings” to share with friendly units; using opportunities such as visits, seminars, exchanges, and joint training to recommend and introduce combat and training innovation results to friendly troops. “No matter which unit wants to learn from innovative ideas and introduce innovative results, we are open to the door and welcome them at any time!” said the leader of the brigade.

Open training has allowed the brigade to “walk” out of the camp with many training innovation results: the “hot refueling and ammunition replenishment” support method has been promoted to multiple army aviation units; the “eight-rope simultaneous airdrop” training method has been introduced and applied by friendly neighboring units...

“Sharing the results of innovation with friendly neighboring units, we are both contributors and beneficiaries.” The brigade leader introduced that last year, they explored a certain helicopter ultra-low altitude penetration tactic at sea, which solved the problem of sea penetration that has troubled them for many years after being introduced by friendly neighboring units. Afterwards, friendly neighboring units conducted research and demonstration on multiple combat topics based on this tactic, making the tactic more perfect and more effective and practical.

Advance together in sharing and integrate in communication. Today, the brigade has continuously extended the sharing mechanism of training innovation results to the field of joint operations - sharing helicopter landing experience at sea with the naval ship detachment, jointly researching coordinated tactics with the drone detachment, and sharing sea target search skills with the naval helicopter detachment...

Not long ago, a certain army unit learned from the brigade's experience in handling abnormal air and sea situations, and successfully completed the task of verifying and handling abnormal air situations under conditions of poor visibility, which was well received by superiors.

In this regard, the leader of the unit said with emotion: "Different military services and different combat forces complement each other's advantages, learn from each other's experiences, and organically integrate to form a more powerful system combat capability."

Short review

Open training, sharing and progress

■Fang Xingxian

Since the 18th National Congress of the Communist Party of China, the People's Army has made vigorous steps to strengthen the army, and practical training has continued to advance in depth. In the process of promoting the continuous improvement of combat effectiveness, various units have exerted the wisdom of officers and men and summed up a large number of useful and practical experiences and practices in training practice. The practice of a certain army brigade to break down the barriers of the organization and share the results of training innovation has not only solved the "urgent needs" of friendly units, but also promoted the existing results to "go to a higher level" and achieved a "win-win" situation.

Others' stones can be used to polish jade. At present, the troops are facing many new situations and new problems in the process of deepening practical military training. All units should strengthen the awareness of open training, share and communicate combat methods, training methods, and innovative results, and learn from each other, so as to form a strong combat force in learning from each other's strengths and complementing each other's advantages. However, a few units hide their "unique secrets" for fear of "teaching apprentices and starving the masters". In the long run, it is not only not conducive to their own construction and development, but also not conducive to the improvement of the overall combat effectiveness of the troops.

Open training, sharing and progress. How wide the vision is determines how far we can go and how high we can climb. Modern warfare is a confrontation between systems. It is impossible for anyone service to "take the world". Only by giving full play to the characteristics and strengths of each service can we gather strengths and increase the efficiency of the system. During routine training, all units should firmly establish the idea of "one chess game", adhere to open training, share and progress together, transform "unique secrets" into "the strengths of many", achieve

common progress through mutual learning and mutual reference, and promote the continuous improvement of the overall combat effectiveness of the troops.

第七十四集团军某旅发挥特色教育资源作用激励官兵坚定强军信念

来源：解放军报 作者：黄可越 陈典宏 李由之 责任编辑：林诗清 2025-04-03

开栏的话

经中央军委批准，今年初，军委政治工作部印发《关于聚焦”铸牢政治忠诚、打好攻坚之战”深化教育实践活动的通知》（以下简称《通知》），深入贯彻中央军委政治工作会议精神，对全军年度重大教育作出部署。

强化政治引领，突出实践指向，注重求真务实。各部队认真贯彻落实《通知》要求，始终把党的创新理论武装作为铸魂育人的首要任务，深入持久扎实学习习近平强军思想，紧贴强军事业发展和备战打仗实际，紧贴官兵价值观念培塑和成长成才需要，重点围绕坚定强军信念、树牢打仗意识、激励担当奋斗、永葆本色作风等方面内容开展专题教育，凝聚打好实现建军一百年奋斗目标攻坚战的奋斗意志。

号角催征，使命如山。即日起，解放军报开设”铸牢政治忠诚 打好攻坚之战·深化教育实践活动”专栏，报道各部队深化教育实践活动的好做法，反映各部队官兵奋斗强军的新风采，激励广大官兵锚定目标、聚力攻坚。

第七十四集团军某旅发挥特色教育资源作用激励官兵坚定强军信念——

把”硬骨头精神”发扬光大

■黄可越 解放军报记者 陈典宏 李由之

仲春时节，阳光明媚。记者来到第 74 集团军某旅采访，正赶上该旅举办”砺刃”强军故事分享会。

分享会上，该旅”硬骨头六连”官兵纷纷走上讲台，讲述发生在自己身边的强军故事。

2020 年 1 月 18 日，习主席给”硬骨头六连”全体官兵回信并勉励他们：”希望你们牢记强军目标，传承红色基因，苦练打赢本领，把’硬骨头精神’发扬光大，把连队建设得更加坚强。”

牢记嘱托练精兵，奋勇攻坚当先锋。5 年来，该连官兵始终牢记习主席嘱托，发扬”硬骨头精神”，不畏艰难、苦练精兵，在强军征程上留下一串闪光足迹。

那年，该连战士周锋鹏经过层层选拔，参加国际军事比赛。赛场上，他与战友团结协作、顽强拼搏夺得冠军。回到连队后，他担任狙击专业教练员，悉心向战友传授经验，培养了一批训练尖子。

一次，该连参加上级组织的军事训练等级评定考核，官兵历经三天两夜高强度作业，取得优异成绩。征尘未洗，他们又参加旅里组织的新年度创破纪录比武。官兵不畏艰难，奋勇争先，夺得 6 个单项第一、1 个团体第一……

分享会上的一个个鲜活故事，生动再现了”硬骨头六连”官兵牢记习主席嘱托、奋斗强军的奋进历程，台下官兵听得热血沸腾。

“身边典型最感人，一个故事一堂课。”该旅领导告诉记者，组织学习”硬骨头六连”官兵牢记习主席嘱托、奋斗强军的先进事迹，是他们搞好聚焦”铸牢政治忠诚、打好攻坚之战”深化教育实践活动的重要举措之一。

记者了解到，该旅党委一班人结合学习贯彻中央军委政治工作会议精神，深入调研进一步认识到，只有立足部队实际、针对官兵特点深化教育实践活动，才能取得更大成效。为此，他们在做好专题教育基础上，积极创新教育方法，充分发挥旅里特色教育资源作用，引导官兵进一步坚定强军信念、树牢打仗意识。

不久前，一场别开生面的”硬骨雄风访谈会”在该旅”攻坚英雄连”举行。老英雄黄仲虎重回老连队，与官兵一起忆传统、讲忠诚、话使命。

黄仲虎曾是该连的一名班长。一次作战，连队受领收复某高地的艰巨任务。得知消息，他第一个报名参加突击队。战斗中，他凭借过硬的军事素质，带领 4 名战士从敌人侧后方发起攻击占领高地，并打退敌人反扑，圆满完成任务。

英雄故事催人奋进，强军信念愈发坚定。聆听黄仲虎讲述的战斗故事，官兵纷纷畅谈感悟。”老英雄的事迹，让我深受触动。我要向老英雄学习，练就过硬本领，争当一名能打胜仗的兵。”该连班长张波说。

访谈会结束，黄仲虎和官兵来到该连荣誉室，举行捐赠仪式。当年，由于在战斗中贡献突出，黄仲虎被中央军委授予”战斗英雄”荣誉称号。为激励官兵弘扬优良传统，在强军征程上再立新功，黄仲虎决定将自己荣获的一级英模奖章捐赠给连队。

官兵郑重地把奖章挂在荣誉墙上。”只有把使命看得比生命还重，才能扛起历史的重担。我们要牢记习主席嘱托，传承红色基因，不怕苦不畏难，以只争朝夕的精神，锚定实现建军一百年奋斗目标全力攻坚。”该旅领导说。

“突出实践指向，是我们深化教育实践活动的鲜明特点。”该旅领导告诉记者，他们灵活运用网络、灯箱、宣传橱窗等载体，大力宣传近年来旅队涌现出的先进典型事迹，激发官兵

学习先进、争当先进的热情；明确要求各级干部深入训练一线，以实际行动为官兵做好示范；精心组织”我为打赢献一计”活动，引导官兵研究破解制约战斗力提升的难点问题；广泛开展群众性练兵比武活动，浓厚练兵备战氛围。

某连二级上士周佳伟带领战友集智攻关，聚力挖掘某装备作战潜能；某连组织官兵瞄准短板弱项开展专攻精练，不断提升训练成绩……踏访该旅多个连队，记者感受到浓厚的练兵备战氛围。某连刘指导员说，随着深化教育实践活动持续推进，官兵为实现建军一百年奋斗目标贡献力量的热情更加高涨，锤炼能打仗、打胜仗能力的行动更加自觉。

采访结束，踏上归程。路过该旅训练场，看着眼前一派火热的练兵场景，回想此次采访经历，记者坚信，该旅官兵一定能在强军征程上写下更多精彩篇章。

A Certain Brigade of the 74th Group Army Played the Role of Special Educational Resources to Inspire Officers and Men to Strengthen Their Belief in Strengthening the Army

Source: PLA Daily Author: Huang Keyue Chen Dianhong Li Youzhi Editor: Lin Shiqing 2025-04-03

Opening remarks

Approved by the Central Military Commission, at the beginning of this year, the Political Work Department of the Military Commission issued the “Notice on Deepening the Education and Practice Activities of Focusing on “Forging Political Loyalty and Fighting the Tough Battle”” (hereinafter referred to as the “Notice”), thoroughly implementing the spirit of the Central Military Commission’s Political Work Conference that was held in Yan’an in June 2024 and making arrangements for the annual major education of the entire army.

Strengthen political guidance, highlight practical orientation, and focus on seeking truth and being pragmatic. All units conscientiously implement the requirements of the “Notice”, always regard the armed with the Party’s innovative theories as the primary task of forging souls and educating people, deeply and persistently study Xi Jinping’s thoughts on strengthening the army, closely follow the development of the cause of strengthening the army and the actual preparation for war, and closely follow the value concept of officers and men. The cultivation and growth of talents needs, focusing on strengthening the belief in strengthening the army, establishing a strong sense of war, encouraging responsibility and struggle, and maintaining the true style of work. Carry out special education, and gather the will to fight the tough battle to achieve the goal of building the army for 100 years.

The horn urges the march, and the mission is as heavy as a mountain. Starting today, the PLA Daily will open a column titled “Forge political loyalty, fight a tough battle, and deepen educational practice activities” to report on the good practices of various troops in deepening educational practice activities, reflect the new style of officers and men in various troops in striving to

strengthen the army, and encourage officers and men to anchor their goals and focus on tackling tough problems.

A brigade of the 74th Group Army plays the role of special educational resources to encourage officers and men to strengthen their faith in strengthening the army-

Carry forward the “hard-boned spirit”

■Huang Keyue PLA Daily reporter Chen Dianhong Li Youzhi

It was mid-spring and the sun was shining. The reporter came to a brigade of the 74th Group Army for an interview, and happened to catch up with the brigade’s “Sharpening the Blade” strong army story sharing session.

At the sharing session, officers and men of the brigade’s “Hard-boned Sixth Company” took to the podium one after another to tell stories of strong army stories happening around them.

On January 18, 2020, President Xi wrote back to all officers and men of the “Hard Bone Sixth Company” and encouraged them: “I hope you will keep in mind the goal of strengthening the army, inherit the red gene, work hard to win the battle, carry forward the “hard bone spirit”, and build the company stronger.”

Remember the instructions to train elite soldiers and bravely attack as a pioneer. Over the past five years, the officers and men of the company have always kept in mind the instructions of President Xi, carried forward the “hard bone spirit”, feared no difficulties, worked hard to train elite soldiers, and left a string of shining footprints on the journey of strengthening the army.

That year, Zhou Fengpeng, a soldier of the company, participated in the international military competition after layers of selection. On the field, he and his comrades worked together in unity and fought hard to win the championship. After returning to the company, he served as a sniper professional coach, carefully imparted experience to his comrades, and trained a group of top trainers.

Once, the company participated in the military training level assessment organized by the superiors. The officers and men went through three days and two nights of high-intensity operations and achieved excellent results. Before the dust of the expedition was washed off, they participated in the new year’s record-breaking competition organized by the brigade. The officers and men were not afraid of difficulties and fought bravely to win 6 first places in individual events and 1 first place in the group...

The vivid stories at the sharing session vividly reproduced the progress of the officers and men of the “Hard-Boned Sixth Company” who kept in mind Chairman Xi’s instructions and fought to strengthen the army, and the officers and men in the audience were excited.

“The typical people around us are the most touching, and each story is a lesson.” The leaders of the brigade told reporters that organizing the study of the advanced deeds of the officers and men

of the “Hard-Boned Sixth Company” who kept in mind Chairman Xi’s instructions and fought to strengthen the army is one of their important measures to focus on “forging political loyalty and fighting a tough battle” to deepen the education and practice activities.

The reporter learned that the brigade party committee combined the study and implementation of the spirit of the Central Military Commission’s political work conference, and conducted in-depth research to further realize that only by deepening the education and practice activities based on the actual situation of the troops and targeting the characteristics of the officers and men can greater results be achieved. To this end, on the basis of doing a good job in special education, they actively innovated education methods, gave full play to the role of the brigade’s characteristic education resources, and guided the officers and men to further strengthen their belief in strengthening the army and establish a strong sense of fighting.

Not long ago, a unique “Hard-boned Heroic Interview” was held in the “Heroic Company of Attack” of the brigade. The old hero Huang Zhonghu returned to the old company and recalled traditions, talked about loyalty and mission with officers and men.

Huang Zhonghu was once a squad leader of the company. In a battle, the company received the arduous task of recovering a certain highland. Upon hearing the news, he was the first to sign up for the commando. In the battle, he led 4 soldiers to attack from the enemy’s side and rear to occupy the highland with his excellent military qualities, and repelled the enemy’s counterattack and successfully completed the task.

Heroic stories inspire people to move forward, and the belief in strengthening the army is becoming firmer. Listening to the battle stories told by Huang Zhonghu, officers and men talked about their feelings. “The deeds of the old hero deeply touched me. I want to learn from the old hero, practice excellent skills, and strive to be a soldier who can win the battle.” The squad leader Zhang Bo said.

After the interview, Huang Zhonghu and officers and men came to the company’s honor room to hold a donation ceremony. That year, Huang Zhonghu was awarded the honorary title of “Combat Hero” by the Central Military Commission for his outstanding contribution in the battle. In order to encourage officers and men to carry forward the fine traditions and make new contributions in the journey of strengthening the army, Huang Zhonghu decided to donate the first-class hero medal he won to the company.

The officers and men solemnly hung the medal on the honor wall. “Only by considering the mission more important than life can we shoulder the burden of history. We must keep in mind Chairman Xi’s instructions, inherit the red gene, not be afraid of hardships or difficulties, and with the spirit of seizing the day, anchor the goal of achieving the 100-year struggle of the army and make all-out efforts to overcome difficulties.” The leader of the brigade said.

“Highlighting the practical orientation is a distinctive feature of our deepening educational practice activities.” The leaders of the brigade told reporters that they flexibly used the Internet, light boxes, publicity windows and other carriers to vigorously publicize the advanced typical deeds that have

emerged in the brigade in recent years, inspiring the enthusiasm of officers and men to learn from the advanced and strive to be advanced; clearly required cadres at all levels to go deep into the front line of training and set a good example for officers and men with practical actions; carefully organized the "I contribute a plan to win" activity to guide officers and men to study and solve the difficult problems that restrict the improvement of combat effectiveness; widely conducted mass training and competition activities to create a strong atmosphere of training and preparation.

A company's second-class sergeant Zhou Jiawei led his comrades to pool their wisdom and focus on tapping the combat potential of a certain equipment; a company organized officers and men to focus on shortcomings and weaknesses to carry out specialized training and continuously improve training results... Visiting multiple companies of the brigade, the reporter felt a strong atmosphere of training and preparation. Instructor Liu of a company said that with the continuous advancement of the deepening of educational practice activities, the enthusiasm of officers and men to contribute to the realization of the struggle goal of the 100th anniversary of the founding of the army has become higher, and the actions to temper the ability to fight and win have become more conscious.

The interview ended and we set off on our way home. Passing by the brigade's training ground, looking at the enthusiastic training scene in front of him and recalling the interview experience, the reporter firmly believes that the officers and men of the brigade will definitely be able to write more wonderful chapters in the journey of building a strong army.

陆军某试验大队"为战服务组"常态开展一线服务调研

来源：解放军报 作者：赵春辉 田 源 责任编辑：林诗清 2025-04-04

陆军某试验大队——

深入练兵一线提供上门服务

■赵春辉 田 源

3 月中旬，陆军某旅组织开展装备维护保养。在此过程中，官兵发现某型校射雷达出现故障，无法发送数据，只能手动统计落点。

"这将增加操作时间。"操作手检查无果，急得脑门冒汗。这时，一名军官快步上前，梳理数据、检验软件、查找比对……一番操作后，故障被迅速排除，引来在场官兵点赞。

这名军官名叫孙兆友，是陆军某试验大队"为战服务组"成员。这些天，他与其他 6 名专家把演训场跑了一遍。如何获取雷达目标的更多信息、怎样精准识别捕捉低慢小目标……深入一线调研中，一个个难题接连浮出水面。他们与基层装备管理人员、操作骨干面对面开展讨论交流，逐一答疑释惑。

“作战部队需要什么，我们就上门提供什么服务！”该大队领导告诉笔者，为提高试训为战质效，进一步提升基层战斗力，他们秉持岗位对接战位的原则，常态开展一线服务调研。对现场发现和官兵提出的问题，能当场解决的，立行立办；一时解决不了的，形成问题台账，明确时限，责任到人。

据悉，今年初以来，”为战服务组”已为一线官兵解决数十个训练难题，还总结申报 1 个创新项目，出台 5 套技术方案，初步确定 3 个研究课题和 2 个攻关项目。

The “Service for War” Group of a Certain Test Brigade of the Army Conducts Front-Line Service Surveys on a Regular Basis

Source: PLA Daily Author: Zhao Chunhui Tian Yuan Editor: Lin Shiqing 2025-04-04

A certain test brigade of the Army——

Provide door-to-door service at the front line of training

■ Zhao Chunhui Tian Yuan

In mid-March, a certain brigade of the Army organized equipment maintenance. During this process, officers and men found that a certain type of calibration radar had a fault and could not send data, so they could only manually count the landing points.

“This will increase the operation time.” The operator checked to no avail and was so anxious that his forehead was sweating. At this time, an officer stepped forward quickly, sorted out the data, checked the software, searched and compared... After a series of operations, the fault was quickly eliminated, which attracted praise from the officers and men present.

The officer’s name is Sun Zhaoyou, and he is a member of the “Service for War” group of a certain test brigade of the Army. These days, he and 6 other experts ran around the training ground. How to obtain more information about radar targets, how to accurately identify and capture low, slow and small targets... In the in-depth front-line survey, one problem after another surfaced. They held face-to-face discussions with grassroots equipment management personnel and key operators, answering questions one by one.

“We will provide services on-site as long as the combat troops need them!” The leader of the brigade told the author that in order to improve the quality and efficiency of trial training for combat and further enhance the combat effectiveness of the grassroots, they adhere to the principle of connecting positions with combat positions and conducting regular front-line service surveys. For problems found on the spot and raised by officers and men, those that can be solved on the spot will be dealt with immediately; those that cannot be solved for the time being will form a problem ledger, clarify the time limit, and assign responsibilities to people.

It is reported that since the beginning of this year, the “Service for Combat Group” has solved dozens of training problems for front-line officers and men, and has also summarized and applied for 1 innovation project, issued 5 sets of technical solutions, and preliminarily determined 3 research topics and 2 key research projects.

第 76 集团军某连改进评比机制激发官兵动力

来源：解放军报 作者：曾建伟 马兆鑫 责任编辑：林诗清 2025-04-04

第七十六集团军某旅某连改进评比机制——

让流动红旗”流动”起来

■曾建伟 马兆鑫

“这次评比，一班夺得’军事训练’流动红旗！”近日，第 76 集团军某旅某连组织流动红旗综合评选，连续”霸榜”的五班被一班反超，在连队引发热议。这看似普通的”红旗易主”背后，是该连改进评比机制，激发官兵动力的创新探索。

从去年下半年开始，为鼓励官兵奋勇争先、不懈拼搏，该连设置”军事训练”“内务卫生”“纪律作风”3 面流动红旗，定期组织评选。其中，”军事训练”流动红旗根据每个班所有人的月考核结果进行评定。

然而，相较其他班，五班尖子多、成绩好，自评选展开以来，”军事训练”流动红旗就像被钉在五班的荣誉墙上。时间一长，五班战士认为”流动红旗非己莫属”，训练热情开始下降；其他班同志则觉得”再拼也追不上五班”，索性放弃比拼，权当没有这面流动红旗，甚至因此产生消极情绪，影响正常训练。原本是激励大家的举措，却产生了反效果，该连贾连长对此十分焦急。

连务会上，干部骨干针对这一现象展开讨论。有人直言，既然是”军事训练”流动红旗，就应该用训练成绩说话，五班分数高，获得流动红旗理所应当；但也有人指出，评比标准不够合理，流动红旗”流不动”，会导致官兵失去动力，应该适当改进评比机制。

最终，该连党支部综合大家的意见建议，修改完善”军事训练”流动红旗评比细则，在原有基础上引入”进步指数”，即每个人考核成绩较上次提升 10%以上，可获得额外加分，达到”横向比排名”与”纵向比进步”并重的效果。

在此之前，该连一班由于新兵较多，每次评比成绩都不太理想。新机制推行后，大家训练热情高涨，老兵发挥稳定表现优异，新兵奋起直追进步明显，多人获得额外加分，最终将流动红旗收入囊中。

而原本稳居榜首的五班，因为没有对新机制引起足够的重视，部分同志在考核时仍旧进步幅度不大，最终遗憾”败北”。这段经历给他们敲响了警钟，五班班长坦言：”虽然这次没能拿到’军事训练’流动红旗，但让大家重燃了斗志。我们一定端正训练态度，争取在下一次评比中把红旗夺回来。”

“让流动红旗’流动’起来，才能充分激发每名同志的动力，只有每个班排、每名战士都力争上游，连队建设才能生机勃勃。”贾连长介绍，下一步，他们将进一步探索完善评比机制，并将其推广运用到其他领域。

A Company of the 76th Group Army Improves the Evaluation Mechanism to Stimulate the Motivation of Officers and Men

Source: PLA Daily Author: Zeng Jianwei Ma Zhaoxin Editor: Lin Shiqing 2025-04-04

A company of a brigade of the 76th Group Army improves the evaluation mechanism

Let the mobile red flag “flow”

■ Zeng Jianwei Ma Zhaoxin

“In this evaluation, Squad 1 won the mobile red flag of “military training”!” Recently, a company of a brigade of the 76th Group Army organized a comprehensive evaluation of the mobile red flag. The five squads that had been “dominant” for a long time were overtaken by Squad 1, which caused heated discussions in the company. Behind this seemingly ordinary “change of ownership of the red flag” is the company’s innovative exploration of improving the evaluation mechanism and stimulating the motivation of officers and men.

Since the second half of last year, in order to encourage officers and men to strive for the first place and work tirelessly, the company has set up three mobile red flags of “military training”, “housekeeping hygiene” and “discipline style”, and organized selections regularly. Among them, the “military training” mobile red flag is evaluated based on the monthly assessment results of everyone in each squad.

However, compared with other squads, Squad 5 has more top students and better grades. Since the selection began, the “Military Training” mobile red flag has been nailed to the honor wall of Squad 5. Over time, the soldiers of Squad 5 believed that “the mobile red flag belongs to them”, and their training enthusiasm began to decline; comrades from other squads felt that “no matter how hard they try, they can’t catch up with Squad 5”, so they simply gave up the competition and pretended that there was no mobile red flag, and even had negative emotions, affecting normal training. It was originally a measure to motivate everyone, but it had the opposite effect, and the company commander Jia was very anxious about it.

At the company meeting, the cadres and backbones discussed this phenomenon. Some people bluntly said that since it is a “military training” mobile red flag, the training results should speak for themselves. Squad 5 has a high score and deserves to get the mobile red flag; but some people pointed out that the evaluation criteria are not reasonable enough, and the “unable to flow” of the mobile red flag will cause officers and men to lose motivation, and the evaluation mechanism should be appropriately improved.

Finally, the company’s party branch combined everyone’s opinions and suggestions, revised and improved the “military training” mobile red flag evaluation rules, and introduced the “progress index” on the original basis, that is, each person’s assessment score increased by more than 10% compared with the previous time, and extra points can be obtained, achieving the effect of “horizontal ranking” and “vertical progress”.

Before this, the Squad 1 of the company had a large number of new recruits, and the results of each evaluation were not ideal. After the implementation of the new mechanism, everyone’s training enthusiasm was high, the veterans performed stably and excellently, the new recruits caught up and made obvious progress, and many people got extra points, and finally won the mobile red flag.

However, Squad 5, which was originally at the top of the list, did not pay enough attention to the new mechanism, and some comrades still made little progress in the assessment, and finally “failed” regretfully. This experience sounded a wake-up call for them. The leader of Squad 5 said frankly: “Although we failed to get the ‘military training’ mobile red flag this time, it rekindled everyone’s fighting spirit. We must correct our training attitude and strive to get the red flag back in the next evaluation.” “Only by letting the mobile red flag ‘flow’ can we fully stimulate the motivation of every comrade. Only when every squad and every soldier strives to be the best can the company construction be full of vitality.” Captain Jia introduced that, in the next step, they will further explore and improve the evaluation mechanism and promote it to other fields.

新疆和田军分区开展”下沉式解难”活动提升服务基层质效

来源：中国军网-解放军报 作者：赵金石 孙兴维 责任编辑：林诗清 发布：2025-04-06

新疆和田军分区实施”下沉式解难”建设过硬基层——

“大篷车”综合服务队情暖高原哨所

■赵金石 解放军报记者 孙兴维

仲春时节，新疆和田军分区某边防团组织阶段性考核。结果显示，官兵考核成绩比上次有了明显提升。该团领导高兴地说，军分区开展”下沉式解难”活动以来，”大篷车”综合服务队奔赴高原哨所巡回服务，有效提升服务基层质效，激发了官兵戍边守防热情。

据了解，该军分区所属边防一线连队，大都分布在平均海拔 4500 米以上的雪域高原。驻地自然环境恶劣、远离机关、社会依托少，制约基层建设发展的矛盾问题较为突出。

“建设过硬基层，领导和机关干部要带头下到基层、沉到一线，搞好服务、解决难题。”该军分区党委深入学习贯彻中央军委政治工作会议精神认识到，只有切实为基层解难帮困，才能推动部队建设高质量发展。结合部队驻地”高、远、散”等实际，他们深入调研后决定，广泛开展”下沉式解难”活动，抽调机关干部和相关专业骨干组成”大篷车”综合服务队，定期上高原进哨所，开展人才培养、政策宣讲、法律咨询、心理疏导、装备检修等服务。

不久前，”大篷车”综合服务队来到海拔 5380 米的神仙湾哨所。记者看到，哨所俱乐部里，服务队带队干部为官兵讲解新修订的共同条令主要变化、基本改点；阅览室里，法律援助服务站律师为官兵答疑解惑；车库里，专业骨干为哨所检修装备，并手把手向战士传授检修经验。一名哨所干部说：”‘大篷车’综合服务队帮我们解决了许多训练生活中的难题，让我们感受到了组织的关心和温暖。”

“开展’下沉式解难’活动，贵在落细落实。”该军分区领导介绍，他们明确规定，”大篷车”综合服务队开展上门服务时，对官兵工作生活中的难题，能解决的现场给予解决；不能解决的及时向上级反映，由上级协调解决。

今年初，”大篷车”综合服务队到某哨所开展服务活动时，发现有的驾驶员早晨提前起床发动车辆。他们调查后得知，因哨所车辆增加，保温车库无法停放所有车辆。受高原冬季高寒影响，车辆启动时间长，有的驾驶员为确保车辆能快速出动，提前起床做准备。他们将这一情况及时反映给哨所所在团领导。该团领导调查发现，类似情况在其他哨所也存在。随后，该团党委研究后决定，给相关哨所扩建保温车库，使问题得到有效解决。

“建设过硬基层，既要紧盯’硬件’解难，又要抓好’软件’建设。”该军分区领导告诉记者，他们把帮助基层党支部增强带领官兵遂行作战任务的能力、领导单位全面建设的能力和解决自身问题的能力，作为”下沉式解难”活动的重要内容；同时明确要求，”大篷车”综合服务队利用到一线开展服务活动的契机，深入了解基层全面建设情况，为军分区党委抓好基层建设提供决策参考。

去年，”大篷车”综合服务队在开展服务活动时发现，个别连队存在党支部成员工作经验不足、抓建能力不强等问题，他们立即将情况反映给军分区领导。军分区党委就此展开专题调研后，决定选派优秀机关干部到相关连队蹲点帮建。

该军分区一名机关干部在某连蹲点帮建时，与官兵谈心交心，听取官兵意见建议；与连队党支部一班人深入分析连队建设情况，针对存在的问题制订整改方案。他还结合履职经历，向党支部一班人传授提高议事决策质量、按纲抓建、科学组训等方法，并及时帮助纠正工作中出现的偏差。

在这名机关干部的帮带下，该连党支部战斗力明显提升，一些困扰连队的难题得到解决。去年底，该连迈入先进行列。

倾心解难暖兵心，基层建设面貌新。该军分区领导告诉记者，”下沉式解难”活动开展以来，”大篷车”综合服务队到基层一线开展巡回服务累计 20 余次，有力促进基层建设全面过硬。去年以来，该军分区多次完成上级赋予的重大任务，20 余个基层单位受到军以上单位表彰。

Xinjiang Hotan Military Sub-District Carries Out “Downward Problem-Solving” Activities to Improve the Quality and Efficiency of Grassroots Services

Source: China Military Network-People’s Liberation Army Daily Author: Zhao Jinshi Sun Xingwei Editor: Lin Shiqing Release: 2025-04-06

Xinjiang Hotan Military Sub-district implements “downward problem-solving” to build a strong grassroots-

“Caravan” comprehensive service team warms the plateau outposts

■ Zhao Jinshi People’s Liberation Army Daily reporter Sun Xingwei

In mid-spring, a border defense regiment of Xinjiang Hotan Military Sub-district organized a phased assessment. The results showed that the assessment scores of officers and men have improved significantly compared with the last time. The leader of the regiment said happily that since the military sub-district conducted the “downward problem-solving” activity, the “Caravan” comprehensive service team has gone to the plateau outposts for tour services, effectively improving the quality and efficiency of grassroots services and stimulating the enthusiasm of officers and men to guard the border.

It is understood that most of the front-line border defense companies of the military sub-district are distributed in the snowy plateau with an average altitude of more than 4,500 meters. The natural environment of the station is harsh, far away from the organs, and there is little social support. The contradictions and problems that restrict the development of grassroots construction are more prominent.

“To build a strong grassroots, leaders and cadres should take the lead in going down to the grassroots and sinking to the front line to provide good services and solve problems.” The Party Committee of the Military Sub-district has thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference and realized that only by effectively solving problems for the grassroots can the high-quality development of the army’s construction be promoted. In view of the actual situation of the troops’ garrisons being “high, far, and scattered”, they decided after in-depth research to widely carry out “sinking-style problem-solving” activities, and to select cadres and relevant professional backbones to form a “caravan” comprehensive

service team, which will regularly go to the plateau and enter the outposts to carry out talent training, policy propaganda, legal consultation, psychological counseling, equipment maintenance and other services. Not long ago, the "caravan" comprehensive service team came to the Shenxianwan outpost at an altitude of 5,380 meters. The reporter saw that in the outpost club, the service team leader explained to the officers and men the main changes and basic changes in the newly revised common regulations; in the reading room, lawyers at the legal aid service station answered questions and solved doubts for the officers and men; in the garage, professional backbones repaired equipment for the outposts and taught the soldiers the maintenance experience hand in hand. A post cadre said: "The 'Caravan' comprehensive service team helped us solve many problems in training and life, and made us feel the care and warmth of the organization."

"The key to carrying out the 'downward problem-solving' activity is to implement it in detail." The leaders of the military sub-district introduced that they clearly stipulated that when the "Caravan" comprehensive service team carries outdoor-to-door services, the problems in the work and life of officers and men can be solved on the spot; if they cannot be solved, they will be reported to the superiors in time for coordination and resolution.

At the beginning of this year, when the "Caravan" comprehensive service team went to a post to carry out service activities, they found that some drivers got up early in the morning to start the vehicle. After investigation, they learned that due to the increase in vehicles at the post, the insulated garage could not park all vehicles. Affected by the high cold in the plateau in winter, the vehicle startup time is long. Some drivers get up early to prepare to ensure that the vehicle can be dispatched quickly. They reported this situation to the leaders of the regiment where the post was located in a timely manner. The leaders of the regiment found that similar situations also existed in other posts. Subsequently, the regiment party committee decided to expand the insulated garage for the relevant posts after research, so that the problem was effectively solved.

"To build a strong grassroots, we must not only focus on solving the 'hardware' problems, but also do a good job in the 'software' construction." The leaders of the military sub-district told reporters that they regard helping grassroots party branches to enhance their ability to lead officers and men to carry out combat missions, their ability to lead the comprehensive construction of units, and their ability to solve their own problems as an important part of the "downward problem-solving" activity; at the same time, they clearly require that the "Caravan" comprehensive service team take advantage of the opportunity of carrying out service activities at the front line to deeply understand the comprehensive construction of the grassroots and provide decision-making references for the military sub-district party committee to do a good job in grassroots construction.

Last year, when the "Caravan" comprehensive service team was carrying out service activities, it was found that some companies had problems such as insufficient work experience and weak construction ability of party branch members. They immediately reported the situation to the military sub-district leaders. After the military sub-district party committee conducted a special

investigation on this, it decided to select outstanding cadres from the organs to help with the construction of relevant companies.

When a cadre from the organs of the military sub-district was helping with the construction of a company, he talked with the officers and men and listened to their opinions and suggestions; he and a group of people from the company's party branch deeply analyzed the company's construction situation and formulated rectification plans for existing problems. He also taught the party branch members how to improve the quality of deliberation and decision-making, build according to the guidelines, and organize training scientifically based on his work experience, and helped correct deviations in the work in a timely manner.

With the help of this cadre, the combat effectiveness of the company's party branch has been significantly improved, and some problems that have troubled the company have been solved. At the end of last year, the company entered the ranks of advanced units.

Dedicated to solving problems and warming the hearts of soldiers, the grassroots construction has a new look. The leaders of the military sub-district told reporters that since the launch of the "sinking problem-solving" activity, the "caravan" comprehensive service team has conducted more than 20 rounds of tour services at the grassroots level, which has effectively promoted the overall improvement of grassroots construction. Since last year, the military sub-district has completed many major tasks assigned by superiors, and more than 20 grassroots units have been commended by military units and above.

第 75 集团军某旅引导官兵增强训练实战意识

来源：解放军报 作者：陈典宏 周宇鹏 责任编辑：林诗清 2025-04-07

第 75 集团军某旅引导官兵增强训练实战意识——

用"放大镜"审视"微场景"

■解放军报记者 陈典宏 特约记者 周宇鹏

战机轰鸣，战车列阵。日前，第 75 集团军某旅组织的一场陆空对抗训练火热展开。

随着战斗打响，该旅导弹营某连驾驶员娴熟驾车出击，根据指挥员吕峰的指令调整位置，将战车精准停在指定点位。

"上次考核，我们就因发射车定点出现偏差被判'失败'。"吕峰告诉记者，当时，连队到达发射阵地后立即展开装备，与空军某部展开对抗。双方较量中，吕峰沉着指挥，官兵见招拆招，成功处置"电磁干扰导致通信中断"等特情，有效抗击"敌"机多轮打击。

然而，考核结果公布，吕峰却发现他们的成绩表上写着"不合格"。

“所有动作都在规定时间内完成，陆空对抗任务也顺利完成，为啥总评成绩不合格？”吕峰百思不得其解，找到考核组一问究竟。没想到，考官列出的第一个扣分项，便让他陷入了沉默。

“发射车定点位置超出允许的误差范围。根据作战要求，仅凭这一项，任务就已失败。”考官告诉他。

“真是聪明反被聪明误！”仔细回想指挥流程，吕峰懊恼不已。原来，发射车进入战位时，他求胜心切，为抢时间忽略了对定位精度的把控。战车展开虽比以往快了不少，但定位失准导致后续任务脱离了合格点位。

复盘总结时，吕峰主动承担失利责任并深刻反思：”战车定位出现偏差造成对抗失利，说到底还是实战意识不强所致。”

“上了战场，所有细节都可能影响战争胜负的走向。”讲评会上，该旅领导直击要害——现代战争已进入发现即摧毁的”秒杀”时代，差之毫厘就可能错失战机、输掉战斗。制胜未来战场，不仅要校准训练中的行动偏差，更要消除官兵头脑中的思想”误差”，牢固立起按实战标准严抓细训的鲜明导向。

会上，参训官兵将训练中的一系列”微场景”，拿到实战标准的”放大镜”下逐一复盘。大家一一查摆平时容易忽略的细节问题，针对存在的短板弱项逐条逐项制订整改措施。

打仗硬碰硬，训练必须实打实。走下训练场，该旅一位领导感慨地说：”只有强化实战练兵标准，把每一个课目、每一个步骤、每一个动作都训实训精、练到极致，才能确保在未来战场上精准制敌。”

A Brigade of the 75th Group Army Guides Officers and Men to Enhance Their Awareness of Actual Combat Training

Source: PLA Daily Author: Chen Dianhong Zhou Yupeng Editor: Lin Shiqing 2025-04-07

A brigade of the 75th Group Army guides officers and men to enhance their awareness of actual combat training---Use a “magnifying glass” to examine “micro scenes”

■ PLA Daily reporter Chen Dianhong Special correspondent Zhou Yupeng

Fighters roared and tanks lined up. A few days ago, a land-air confrontation training organized by a brigade of the 75th Group Army was launched.

As the battle started, the driver of a company of the missile battalion of the brigade drove out skillfully, adjusted the position according to the command of the commander Lu Feng, and stopped the tank accurately at the designated point.

“In the last assessment, we were judged as ‘failed’ because of the deviation of the launch vehicle’s fixed point.” Lu Feng told reporters that at that time, the company immediately deployed its equipment after arriving at the launch position and confronted a certain unit of the Air Force. During the battle between the two sides, Lv Feng commanded calmly, and the officers and men responded to the moves, successfully handling special situations such as “electromagnetic interference causing communication interruption”, and effectively resisting multiple rounds of attacks by “enemy” aircraft.

However, when the assessment results were announced, Lv Feng found that their score sheet said “unqualified”.

“All actions were completed within the specified time, and the land-air confrontation mission was also successfully completed. Why is the overall score unqualified?” Lv Feng was puzzled and found the assessment team to ask. Unexpectedly, the first deduction item listed by the examiner made him fall into silence.

“The fixed position of the launch vehicle exceeded the allowable error range. According to the combat requirements, the mission has failed with this item alone.” The examiner told him.

“It’s really clever and stupid!” Thinking carefully about the command process, Lv Feng was very upset. It turned out that when the launch vehicle entered the battle position, he was eager to win and ignored the control of positioning accuracy in order to save time. Although the deployment of the tank was much faster than before, the inaccurate positioning caused the subsequent tasks to deviate from the qualified point.

During the review and summary, Lv Feng took the initiative to take responsibility for the defeat and reflected deeply: “The failure of the confrontation was caused by the deviation in the positioning of the tank. In the final analysis, it was due to the lack of actual combat awareness.” “On the battlefield, all details may affect the outcome of the war.” At the review meeting, the brigade leaders hit the key point - modern warfare has entered the “instant kill” era of discovery and destruction. A slight difference may miss the opportunity and lose the battle. To win the future battlefield, it is necessary not only to calibrate the action deviation in training, but also to eliminate the ideological “errors” in the minds of officers and men, and firmly establish a clear orientation of strict and detailed training according to actual combat standards. At the meeting, the participating officers and men reviewed a series of “micro scenes” in the training one by one under the “magnifying glass” of actual combat standards. Everyone checked and dealt with the details that are usually easily overlooked, and formulated rectification measures for the existing shortcomings one by one. In a head-on battle, training must be practical. After leaving the training ground, a leader of the brigade said with emotion: “Only by strengthening the actual combat training standards and training every subject, every step, and every action to perfection can we ensure accurate defeat of the enemy on future battlefields.”

第 74 集团军某旅”硬骨头六连”开展批评帮助激发官兵动力活力

来源：解放军报 作者：杨 扬 石 伟 杨 伦 责任编辑：林诗清 2025-04-07

开展批评帮助 激发动力活力

——第 74 集团军某旅”硬骨头六连”用好批评武器的探索实践

■杨 扬 石 伟 解放军报记者 杨 伦

编者按 批评和自我批评是我党我军在长期斗争实践中形成的优良传统，是我们党保持肌体健康的锐利武器，也是加强和规范党内政治生活的重要手段。在党内政治生活中，我们只有大胆使用、经常使用，才会越用越灵、越用越有效果。

第 74 集团军某旅”硬骨头六连”，在革命战争年代就经常顶着炮火、冒着硝烟召开民主大会。和平年代，六连发扬这一优良传统，逐渐形成行之有效的做法。走进新时代，六连让批评和自我批评成为一种习惯、一种自觉、一种责任，官兵在批评中进步，连队在批评中发展，着力做到”战士的问题不出班排，党员的问题不出小组，干部的问题不出支部”，党支部凝聚力战斗力不断增强。他们的做法有一定借鉴意义。

镜头① 上任”满月”接受群众批评

哪里做得不好，及时有人指出

“每一个经历过连队全体党员批评的干部，都有着刻骨铭心的记忆。”回想自己去年刚任职时，全体党员送给自己的”批评炮火”，第 74 集团军某旅”硬骨头六连”党支部书记高博文感触颇深。

在新干部上任满 1 个月时，组织召开党员大会，对干部进行讲评批评，是六连坚持了 40 多年的一个传统。每次党员大会，全体党员不讲客套话、不讲车轱辘话，而是当面锣对面鼓，对新任职干部在工作中暴露出的问题进行查摆批评，目的是让干部在红脸出汗中看到差距不足，自觉主动整改完善，更快融入连队、更好履职尽责。

去年，高博文走马上任”满月”时，党支部组织召开党员大会，为这位新上任的党支部书记提提意见建议。回想自己上任一个月来，虽说没有特别亮眼的工作，但也没出什么问题，高博文的内心起初比较坦然。

可没想到，会议一开始党员们就直奔问题。”融入节奏较慢，任务面前慌乱，有些工作拿不定主意”“队列作风较差，不像六连干部的样子”……支委们率先”开炮”后，其他党员也紧跟着发言，大家开诚布公、一针见血、有理有据，先后提出十几条批评意见，让他着实红脸出汗。

“虽然当时有些难堪，但仔细一想，大家本着对我负责的态度，说得句句在理，确实是自己没做好，那就应该虚心接受。”会后，高博文坦言，虽然这些批评”辣味”十足，但他也感受到了来自组织和战友的关心，并在接受批评中明晰了下步开展工作的思路。

软锤打不了硬铁，低温炼不出好钢。在六连，”你好我好大家好”的老好人思想没有市场，从党支部书记、副书记再到其他连队干部，大家不会因为批评对象是自己的上级或战友就蜻蜓点水、隔靴搔痒，而是针针见血、直指要害。不管是谁，只要哪里做得不好，很快会有人指出来。

尽管时隔数年，党支部副书记王刚对当初大家批评他的几条意见仍记忆犹新。”自己从下连当兵就在六连，后来当班长、提干，又回到连队，整个军旅生涯几乎都在六连度过。本以为自己是’老资历’，大家会口下留情，没想到依旧’辣味’十足。”那天会后，王刚把所有的批评意见都记在笔记本上，每当自己工作中想”歇歇脚”时，就拿出来看一看，鞭策自己不要停下奋斗脚步。

讲党性不讲私情、讲真理不讲面子。正是在这种良好氛围下，连队党支部的凝聚力战斗力不断增强，使得连队建设长期过硬。

镜头② 把庆功会开成”揭短会”

获得成绩荣誉，不忘反思剖析

“个别党员骨干带头作用不明显，平时说得响当当，落实起来软绵绵”“为连队争得荣誉是好事，但不能躺在功劳簿上’吃老本’，从而降低工作标准”……

新年伊始，该旅军事体育运动会落下帷幕，六连获得建制连队总分第一，为全年工作开了一个好头。按照惯例，连队举行了一次以揭短亮丑、查摆问题为主题的总结会。

为什么把庆功会开成揭短会？高博文告诉记者，以往有的官兵在取得成绩、获得荣誉后，会或多或少出现骄傲自满、思想松懈等情况。即使成绩再好，也有不尽如人意的地方，揭短短变长，护短长变短。”让官兵对短板不足始终保持警觉和重视，才能’记住伤疤不忘痛’，不断补短强能”。

因此，六连经常在取得荣誉后，专挑成绩背后的不足进行检讨剖析，形成”取得成绩-揭短补短-再出成绩”的良性循环，督促官兵不断取得进步。

那年盛夏，六连参加实兵对抗训练，以蓝方身份担负防守任务。任务分队在闷热的工事内坚守阵地数小时，然后突然出击，对红方指挥所成功实施精准打击，对最终获胜起到了决定性作用。训练刚结束，大家没有沾沾自喜，而是在复盘会上围绕训练暴露的问题逐个发言，既讲连队问题，也点个人不足，整个会议持续了 3 个半小时，梳理总结出 6 类数十个具体问题。

会后，党支部将问题整改具体到个人，并将问题清单和整改细则并排贴在墙上，用来提醒全连官兵。

“什么时候满足于荣誉，什么时候就会止步于荣誉。”如今，台上领奖、台下揭短已经成为六连的常态，这一传统不仅夯实了连队战斗力建设基础，还成为连队保持清醒、发扬民主、凝聚共识，开展批评和自我批评的重要抓手。

采访时，记者发现该连有一面墙，上面挂满了连队自诞生以来取得的各项荣誉，墙上有处”留白”格外引人注目。高博文介绍说，这个位置是特意空出来的，留给下一个荣誉，目的是让官兵在取得成绩的同时，始终意识到能力上还有”空白”，从而激励大家戒骄戒躁，努力奋进取得更多荣誉。

不把荣誉当包袱，不把锦旗当资本，走出”功劳簿”，努力查找不足才能始终保持充足干劲。今年初，六连制订新年度目标时，顺势开展了一次”面对荣誉怎么看、永葆先进怎么干”讨论交流活动，让全连官兵结合查摆去年工作的差距和不足，为新年度连队建设发展贡献智慧和力量。

镜头③ 六连官兵眼里”不揉沙子”

没有特殊党员，更无监督盲区

“六连没有不管事的党员，也没有管不了的党员，更没有脱离组织管理和监督的党员。”问起六连党员骨干和其他连队的有哪些不同，这是被提及最多的话。

“全排都在努力工作，你作为老党员为啥关键时刻站不出来顶不上去”“这段时间，我们身上不同程度出现了’各人自扫门前雪’的现象，这不利于连队建设”……前不久，在六连某党小组会上，党员逐一发言，直指问题、时常提醒，大事小事都不放过。

连队一名支委告诉记者，连队开展批评很注重时度效，要求每名党员利用组织生活会等时机，随时发现问题随时开展批评，让开展批评和自我批评常态化。这样既能及时帮出现问题的同志纠偏正向，又能警醒其他同志主动预防，确保每次批评都有实实在在的成效。

有段时间，连队各项工作压茬推进，文书小田由于缺乏统筹，效率较低，就经常占用训练时间完成工作，导致个人训练成绩下滑。小田所在党小组组长发现问题后，专门召开党小组会，对小田近期表现开展了批评，其他党员也纷纷提出意见建议。小田深刻认识到自己的问题，当场表态会利用休息时间加练，努力做到工作训练两不误。后来，在身边党员帮带下，小田的成绩很快赶了上来。

六连官兵眼里不揉沙子、批评不留情面，问题何时露头，批评就何时开展。大家都说，连队没有特殊党员，更没有监督盲区。那么，批评自己的上级，会不会担心被”穿小鞋”？六连党员骨干通过多次实践证明，思想交锋越多，干部的威信就越高；批评”辣味”越浓，连

队的氛围就越团结。因此，党员的问题群众敢提、支委的问题党员敢说、书记副书记的问题支委敢讲。

有一次，六连召开党员大会，查纠连队日常建设存在的问题。轮到一名排长发言时，他犹豫半天，最后却说了句"没有意见"。结果遭到几名党员当场批评：如果真没意见，说明在日常没有尽到党员应尽的责任；如果有意见却不说，就是对连队不负责任。经过提醒，这位排长意识到了自己的问题，表示立即整改，请党组织和全体党员进行监督。

当面批评见人见事、背后不说坏话，依靠组织管干部、严格制度管党员，有了这一优良传统，连队的党员敢负责、敢较真碰硬、敢讲真话，六连党支部这个战斗堡垒也因此变得更加坚强有力。

The "Hard-Boned Sixth Company" of a Certain Brigade of the 74th Group Army Conducted Criticism to Help Stimulate the Motivation and Vitality of Officers and men

Source: PLA Daily Author: Yang Yang Shi Wei Yang Lun Editor: Lin Shiqing 2025-04-07

Carry out criticism to help stimulate motivation and vitality

——The exploration and practice of the "Hard-Boned Sixth Company" of a certain brigade of the 74th Group Army to make good use of the weapon of criticism

■ Yang Yang Shi Wei PLA Daily reporter Yang Lun

Editor's note Criticism and self-criticism are the fine traditions formed by our Party and our army in the long-term struggle practice. It is a sharp weapon for our Party to maintain the health of the body and an important means to strengthen and standardize the political life within the Party. In the political life within the Party, we will become more and more effective only if we use it boldly and frequently.

The "Hard-Boned Sixth Company" of a certain brigade of the 74th Group Army often held democratic conferences under fire and smoke during the revolutionary war. In peacetime, the Sixth Company carried forward this fine tradition and gradually formed effective practices. Entering the new era, the Sixth Company has made criticism and self-criticism a habit, a consciousness, and a responsibility. The officers and men have made progress in criticism, and the company has developed in criticism. They have strived to achieve "the problems of soldiers do not go beyond the squad, the problems of Party members do not go beyond the group, and the problems of cadres do not go beyond the branch", and the cohesion and combat effectiveness of the Party branch have been continuously enhanced. Their approach has certain reference significance.

Lens ① Accepting criticism from the masses after taking office for "full month"

Someone pointed out what was not done well in time

“Every cadre who has experienced criticism from all Party members of the company has an unforgettable memory.” Recalling the “critical artillery fire” given to him by all Party members when he just took office last year, Gao Bowen, secretary of the Party branch of the “Hard Bone Sixth Company” of a brigade of the 74th Group Army, was deeply touched.

When the new cadres have been in office for one month, the Sixth Company has held a Party member meeting to comment and criticize the cadres. This is a tradition that has been upheld by the Sixth Company for more than 40 years. At each Party member meeting, all Party members do not speak politely or talk about the same old things, but face to face to criticize the problems exposed by the newly appointed cadres in their work. The purpose is to let the cadres see the gaps and shortcomings in their blushing and sweating, consciously and actively rectify and improve, integrate into the company faster, and perform their duties better.

Last year, when Gao Bowen took office for “full month”, the Party branch organized a Party member meeting to give opinions and suggestions to the newly appointed Party branch secretary. Looking back on the past month since he took office, although there was no particularly eye-catching work, there were no problems. Gao Bowen was relatively calm at first.

Unexpectedly, the Party members went straight to the problem at the beginning of the meeting. “The pace of integration is slow, the tasks are flustered, and some work is undecided.” “The team style is poor, not like the cadres of the sixth company”... After the branch committee members took the lead in “firing”, other Party members followed suit. Everyone was open and honest, to the point, and well-founded, and successively put forward more than a dozen critical opinions, which made him blush and sweat.

“Although it was a bit embarrassing at the time, after thinking about it carefully, everyone was responsible for me and said something reasonable. It was indeed my fault, so I should accept it with an open mind.” After the meeting, Gao Bowen admitted that although these criticisms were “spicy”, he also felt the care from the organization and comrades, and in accepting the criticisms, he clarified the ideas for the next step of work.

Soft hammers cannot beat hard iron, and low temperatures cannot make good steel. In the Sixth Company, the “good guy” mentality of “you are good, I am good, and everyone is good” has no market. From the Party branch secretary, deputy secretary to other company cadres, everyone will not touch the water or scratch the itch just because the object of criticism is their superiors or comrades, but will hit the nail on the head and hit the key points. No matter who it is, as long as there is something wrong, someone will soon point it out.

Although it has been several years, Wang Gang, deputy secretary of the Party branch, still remembers several opinions that everyone criticized him for. “I have been in the Sixth Company since I was a soldier in the lower company. Later, I became a squad leader, was promoted, and returned to the company. I spent almost my entire military career in the Sixth Company. I thought that I was a ‘veteran’ and everyone would be lenient with me, but I didn’t expect that they would

still be so ‘spicy’.” After the meeting that day, Wang Gang wrote down all the criticisms in a notebook. Whenever he wanted to “take a break” from work, he would take it out and read it to urge himself not to stop struggling.

Talk about Party spirit instead of personal feelings, and talk about truth instead of face. It is in this good atmosphere that the cohesion and combat effectiveness of the company’s Party branch have been continuously enhanced, making the company’s construction long-term and strong.

Lens ② Turn the celebration Party into a “shortcomings-exposing meeting”

After achieving achievements and honors, do not forget to reflect and analyze

“Some Party members and backbones do not play a leading role. They usually talk loudly but are weak in implementation.” “It is a good thing to win honors for the company, but we cannot rest on our laurels and lower our work standards”...

At the beginning of the new year, the military sports meeting of the brigade came to an end. The Sixth Company won the first place in the total score of the established companies, which made a good start for the work of the whole year. According to convention, the company held a summary meeting with the theme of exposing shortcomings and problems.

Why turn the celebration Party into a shortcoming-exposing meeting? Gao Bowen told reporters that in the past, some officers and men would become more or less proud and complacent, and their thoughts would be lax after achieving achievements and honors. Even if the results are good, there are still unsatisfactory aspects. Exposing shortcomings will make them longer, and protecting shortcomings will make them shorter. “Let the officers and men always be alert and pay attention to their shortcomings, so that they can “remember the scars and not forget the pain” and constantly make up for their shortcomings and strengthen their abilities.”

Therefore, after achieving honors, the Sixth Company often reviews and analyzes the shortcomings behind the achievements, forming a virtuous cycle of “achieving achievements-exposing shortcomings and making up for shortcomings-achieving again”, urging officers and men to make continuous progress.

In the midsummer of that year, the Sixth Company participated in actual combat training and took on the defense task as the blue team. The task force held its position in the hot fortifications for several hours, and then suddenly attacked, successfully carrying out a precise strike on the red team’s command post, which played a decisive role in the final victory. As soon as the training ended, everyone did not feel complacent, but spoke one by one at the review meeting around the problems exposed by the training, talking about both the company’s problems and personal shortcomings. The entire meeting lasted 3 and a half hours, and sorted out and summarized 6 categories of dozens of specific problems.

After the meeting, the Party branch specificized the rectification of the problems to individuals, and posted the problem list and rectification details side by side on the wall to remind all officers and men of the company.

“When you are satisfied with honor, you will stop at honor.” Nowadays, receiving awards on stage and exposing shortcomings off stage have become the norm for the Sixth Company. This tradition not only consolidates the foundation of the company’s combat effectiveness, but also becomes an important starting point for the company to stay sober, promote democracy, build consensus, and carry out criticism and self-criticism.

During the interview, the reporter found that the company had a wall full of various honors the company had won since its inception. There was a “blank” on the wall that was particularly eye-catching. Gao Bowen introduced that this position was deliberately left empty for the next honor. The purpose is to make officers and men always aware of the “blank” in their abilities while making achievements, so as to encourage everyone to guard against arrogance and impatience and work hard to achieve more honors.

Don’t treat honor as a burden, don’t treat silk banners as capital, get out of the “credit book”, and work hard to find deficiencies to always maintain sufficient motivation. At the beginning of this year, when the Sixth Company formulated new annual goals, it took the opportunity to carry out a discussion and exchange activity on “how to look at honor and how to stay advanced forever”, so that all officers and men in the company can combine the gaps and deficiencies in last year’s work to contribute wisdom and strength to the construction and development of the company in the new year.

Lens ③ The Sixth Company’s officers and men “don’t tolerate any sand”

There are no special Party members, and no blind spots in supervision

“There are no Party members in the Sixth Company who don’t care about things, nor are there Party members who can’t manage things, and there are no Party members who are out of organizational management and supervision.” When asked about the differences between the backbone Party members of the Sixth Company and other companies, this is the most mentioned sentence.

“The whole platoon is working hard, why can’t you, as an old Party member, stand up at the critical moment?” “During this period, we have shown the phenomenon of ‘everyone sweeping the snow in front of their own door’ to varying degrees, which is not conducive to the construction of the company”... Not long ago, at a Party group meeting of the Sixth Company, Party members spoke one by one, pointed out problems, reminded from time to time, and did not let go of big and small things.

A branch committee member of the company told reporters that the company attaches great importance to timeliness and effectiveness in carrying out criticism, and requires each Party

member to use opportunities such as organizational life meetings to find problems and carry out criticism at any time, so as to normalize criticism and self-criticism. This can not only help comrades with problems to correct their mistakes in a timely manner, but also alert other comrades to take the initiative to prevent them, and ensure that each criticism has real results.

For a period of time, the company's various tasks were pushed forward in succession. Due to the lack of coordination and low efficiency, the clerk Xiaotian often occupied the training time to complete the work, resulting in a decline in personal training results. After the leader of Xiaotian's Party group found the problem, he held a special Party group meeting to criticize Xiaotian's recent performance, and other Party members also put forward opinions and suggestions. Xiaotian deeply realized his problem and stated on the spot that he would use his rest time to practice more and strive to do both work and training. Later, with the help of Party members around him, Xiaotian's performance quickly caught up.

The officers and men of the Sixth Company did not tolerate any sand in their eyes and criticized without mercy. Whenever the problem emerged, the criticism was conducted. Everyone said that there were no special Party members in the company, let alone blind spots in supervision. So, if you criticize your superiors, will you worry about being "put on small shoes"? The backbone Party members of the Sixth Company have proved through many practices that the more ideological confrontations, the higher the prestige of cadres; the stronger the "spicy" criticism, the more united the atmosphere of the company. Therefore, the masses dare to raise the problems of Party members, the Party members dare to speak about the problems of branch committees, and the branch committees dare to speak about the problems of the secretary and deputy secretary.

Once, the Sixth Company held a Party member meeting to check and correct the problems in the daily construction of the company. When it was the turn of a platoon leader to speak, he hesitated for a long time, but finally said "no opinion". As a result, he was criticized on the spot by several Party members: If you really have no opinion, it means that you have not fulfilled the responsibilities of a Party member in daily life; if you have an opinion but don't say it, it means you are irresponsible to the company. After being reminded, the platoon leader realized his problem and said that he would make corrections immediately and ask the Party organization and all Party members to supervise him.

Criticize people and things in person, don't say bad things behind their backs, rely on the organization to manage cadres, and strictly manage Party members. With this fine tradition, the Party members of the company dare to take responsibility, dare to be serious, and dare to tell the truth. The Sixth Company Party Branch, a battle fortress, has become stronger and more powerful.

——陆军某旅携手友邻部队开展陆空对抗训练见闻

■解放军报记者 张磊峰 特约记者 张石水

“‘敌’释放强电磁干扰，企图进行低空突袭……”近日，某山地训练场，随着”敌情”突至，陆军某旅携手友邻部队，展开一场复杂电磁环境下的跨昼夜陆空对抗训练。

雷达方舱内，显示屏上突然一片”雪花”。紧急关头，雷达号手王锐果断采取反干扰措施，使雷达快速”复明”。随后，屏幕上显示，两个闪烁的光点正在急速突进。

“西南方向，发现’敌’目标……”面对来袭”敌机”，指挥员迅速研判态势，通过加密信道向各作战单元下达指令。刹那间，各防空火力单元蓄势待发，严密织就一张防空”天网”。

“敌机”快速逼近，炮长李国胜紧盯火控计算机，待目标进入有效杀伤区域后，随着指挥员一声令下，他快速瞄准击发，隆隆炮声响彻山谷。观瞄系统记录仪显示，尽管两架”敌机”迅速调整飞行轨迹，仍被交叉火力”击中”。

黄昏时分，另一波次”敌机”呼啸袭来，借助云层掩护快速抵近，企图打击该旅地面战车。与此同时，某导弹分队遭遇”敌”全频段强电磁干扰，未能及时捕获”敌”目标。

正当”敌机”即将突破该旅导弹防御网时，隐蔽一旁的电子对抗分队果断出击，帮助导弹分队快速捕捉到目标。

指挥员果断下令，各防空火力单元接连开火，成功击落”敌机”。

“要想练就过硬本领，必须多与强敌对手过招，多在危局险局中摔打。”该旅领导告诉记者，此次训练，他们携手友邻部队，跨昼夜连贯展开多空域侦察搜捕、多途径信息通联、多批次连续抗击等课目，着力锤炼复杂电磁环境下部队实战能力。

无形空间，电波交织。夜幕降临，新一轮对抗训练悄然展开。电台中传来”敌机”来袭警报，但目标进入雷达搜索区域不久，信号便从屏幕上消失。

“迅速向预备阵地转移！”结合对”敌机”数量和航向的综合分析，某营景营长判断对手可能采取前出诱敌的方式侦察我防空体系部署情况，为后续机群突防创造条件，于是立即指挥部队转移阵地。

一波未平，一波又起。某连二级上士刘志刚带领的导弹分队正借助地形隐蔽待命。突然，夜视仪中闪过一个个光斑，多架无人机快速来袭。

面对突发情况，指挥员指挥高炮分队用短点射实施弹幕拦截，同时命令导弹分队利用便携式防空导弹重点狙杀”敌”指挥机。

当最后一架无人机被精准”命中”，时针已指向翌日凌晨一时……

A Certain Army Brigade Joins Hands with Friendly Troops to Carry Out Land-Air Confrontation Training to Hone the Actual Combat Capabilities of the Troops

Source: PLA Daily Author: Zhang Leifeng Zhang Shishui Editor: Guo Yanfei 2025-04-08

Fighting day and night to weave “Skynet”

——A certain army brigade joins hands with friendly troops to carry out land-air confrontation training

■PLA Daily reporter Zhang Leifeng Special reporter Zhang Shishui

“The ‘enemy’ releases strong electromagnetic interference and attempts to conduct low-altitude raids...” Recently, at a certain mountain training ground, as the “enemy situation” suddenly arrived, a certain army brigade joined hands with friendly troops to carry out a cross-day and night land-air confrontation training in a complex electromagnetic environment.

In the radar cabin, a “snowflake” suddenly appeared on the display screen. At the critical moment, radar operator Wang Rui decisively took anti-interference measures to quickly “recover” the radar. Subsequently, the screen showed that two flashing light spots were advancing rapidly.

“In the southwest direction, the ‘enemy’ target was found...” Faced with the incoming “enemy aircraft”, the commander quickly judged the situation and issued instructions to each combat unit through an encrypted channel. In an instant, all air defense firepower units were ready to go, and a tightly woven air defense “Skynet” was formed.

The “enemy plane” approached quickly, and the gunner Li Guosheng stared at the fire control computer. After the target entered the effective killing area, he quickly aimed and fired at the commander’s order, and the rumbling sound of the gun resounded through the valley. The sighting system recorder showed that although the two “enemy planes” quickly adjusted their flight trajectories, they were still “hit” by the crossfire.

At dusk, another wave of “enemy planes” roared in, approaching quickly with the help of cloud cover, attempting to attack the brigade’s ground combat vehicles. At the same time, a missile unit encountered strong electromagnetic interference from the “enemy” in the entire frequency band and failed to capture the “enemy” target in time.

Just as the “enemy plane” was about to break through the brigade’s missile defense network, the electronic countermeasures unit hidden on the side decisively attacked and helped the missile unit quickly capture the target.

The commander decisively ordered that the air defense firepower units opened fire in succession and successfully shot down the “enemy plane”.

“If you want to develop strong skills, you must fight more with strong enemies and fight more in dangerous situations.” The brigade leader told reporters that in this training, they joined hands with friendly neighboring troops to carry out multi-air space reconnaissance and search, multi-channel information communication, and multi-batch continuous resistance across the day and night, focusing on honing the actual combat capabilities of the troops in a complex electromagnetic environment.

Invisible space, radio waves interweave. As night falls, a new round of confrontation training quietly begins. The radio station came with an alarm for the “enemy plane” to attack, but the signal disappeared from the screen shortly after the target entered the radar search area.

“Move quickly to the reserve position!” Combined with a comprehensive analysis of the number and direction of the “enemy plane”, the battalion commander Jing of a certain battalion judged that the opponent might take the approach of luring the enemy to scout the deployment of our air defense system, creating conditions for subsequent aircraft groups to break through, so he immediately commanded the troops to move their positions.

One wave has not yet subsided, and another wave has risen. The missile squad led by Sergeant Liu Zhigang of a certain company is hiding and waiting with the help of the terrain. Suddenly, spots of light flashed in the night vision goggles, and multiple drones were approaching quickly.

Faced with the sudden situation, the commander ordered the anti-aircraft artillery unit to intercept the barrage with short bursts, and at the same time ordered the missile unit to use portable air defense missiles to focus on sniping the “enemy” command aircraft.

When the last drone was accurately “hit”, the clock had pointed to 1 a.m. the next day...

第 82 集团军某旅紧贴官兵实际出实招，聚力提升教育质效

来源：解放军报 作者：姚欣彤 责任编辑：郭妍菲 2025-04-08

第 82 集团军某旅创新模式提升思想政治教育质效——

紧盯任务精准教 分层分类全员学

■姚欣彤

“越是部队动散、任务艰巨，教育越要跟上。要采用更加灵活的方式，让教育收到事半功倍的效果，激励官兵进一步坚定强军信念、凝聚奋进力量……”春日，第 82 集团军某旅组织政治教员围绕”如何搞好思想政治教育”课题展开研讨，结合前期调研成果，集智共商破题良策，紧贴官兵实际拿出一系列切实可行的招法，聚力提升教育质效。

“新时代青年官兵思维活跃、个性鲜明，只有充分尊重官兵主体地位，不断创新教育模式，努力增强教育的针对性、贴近性，才能让思想政治教育真正入脑入心。”该旅领导告诉笔者，他们认真分析教育堵点难点，不断创新思想政治教育模式，探索走开”精准滴灌、分众实施、全员发力”的教育路子，并借助全旅政治教员集训契机广泛推行，营造人人参与教育、个个接受教育的良好氛围。

“只有针对官兵具体情况，因人施教、量体裁衣，让教育内容更加贴近实际、贴近基层，才能有效提升教育质效。”该旅领导介绍，他们要求各级政治教员区分不同岗位、不同层次的官兵，差异化设置思想政治教育内容，灵活开展分众教育，通过”精准滴灌、分众实施”实现有的放矢，确保教育全员覆盖、有力有效。

前不久，该旅某连干部尹鸿儒讲了一堂教育公开课。课堂上，他结合单位建设实际，积极回应此前收集梳理的官兵诉求，与大家交流互动，课堂气氛热烈。课后，尹鸿儒向旁听讲课的其他政治教员分享了自己的经验。他说，抓部队建设离不开一人一事这个基础性工作，思想政治教育也是如此。想要把教育课讲出成效，前提是做好课前调研，弄清每名官兵所思所想所惑，紧盯他们活思想”解扣子”，把道理真正讲到官兵心坎上。

“做好思想政治教育，还要注重发挥广大官兵主观能动性，让官兵主动参与教育、创新教育、接受教育。”该旅领导说，他们依托基层”三大组织”，引导官兵积极开展群众性自我教育，形成人人参与、全员发力的良好局面。实践中，他们鼓励不同岗位官兵走上讲台，通过情景模拟等形式谈身边人、讲身边事，让大家在讨论交流中深化理解，在换位思考中受到启发；充分发挥先进典型示范引领作用，组织旅队典型登台授课，用自身经历现身说法，增加教育的说服力、感染力。

据介绍，该旅推行”精准滴灌、分众实施、全员发力”教育模式以来，思想政治教育质效不断提升，官兵理想信念更加坚定、练兵备战动力更足。下一步，该旅将定期收集官兵反馈，及时调整教育模式，优化完善备课示教、效果评估等机制，确保教育内容与基层建设紧密结合，努力做到学用结合、学以致用、以学促干，推动思想政治教育走深走实。

A Brigade of the 82nd Group Army Closely Follows the Actual Situation of Officers and Men and Takes Practical Measures to Improve the Quality and Effectiveness of Education

Source: PLA Daily Author: Yao Xintong Editor: Guo Yanfei 2025-04-08

A brigade of the 82nd Group Army innovates models to improve the quality and effectiveness of ideological and political education——

Focus on tasks and teach accurately, and classify and learn by all members

■Yao Xintong

“The more dispersed the troops are and the more difficult the tasks are, the more education must keep up. We must adopt more flexible methods to make education more effective, encourage officers and men to further strengthen their belief in strengthening the army and gather strength for progress...” In spring, a brigade of the 82nd Group Army organized political instructors to discuss the topic of “How to do a good job in ideological and political education”, combined with the results of previous research, and gathered wisdom to discuss good solutions. Closely following the actual situation of officers and men, a series of practical and feasible methods were put forward to improve the quality and effectiveness of education.

“Young officers and men in the new era have active thinking and distinct personalities. Only by fully respecting the dominant position of officers and men, constantly innovating education models, and striving to enhance the pertinence and closeness of education can ideological and political education truly enter their minds and hearts.” The leaders of the brigade told the author that they carefully analyzed the difficulties and bottlenecks in education, constantly innovated the ideological and political education model, explored the educational path of “precise drip irrigation, segmented implementation, and full-staff efforts”, and took advantage of the opportunity of the brigade’s political instructors’ training to widely promote it, creating a good atmosphere for everyone to participate in education and everyone to receive education.

“Only by tailoring education to the specific situation of officers and men, making the education content closer to reality and closer to the grassroots, can the quality and effectiveness of education be effectively improved.” The leaders of the brigade introduced that they require political instructors at all levels to distinguish between officers and men of different positions and levels, set up ideological and political education content in a differentiated manner, and flexibly carry out segmented education. Through “precise drip irrigation and segmented implementation”, they can achieve targeted results and ensure that education covers all personnel and is effective and effective.

Not long ago, Yin Hongru, a cadre of a company of the brigade, gave an open education class. In the classroom, he actively responded to the demands of officers and men that he had collected and sorted out before, interacted with everyone, and the classroom atmosphere was warm. After class, Yin Hongru shared his experience with other political instructors who attended the lecture. He said that the construction of the army is inseparable from the basic work of one person and one thing, and the same is true for ideological and political education. If you want to make the education class effective, the premise is to do a good job of pre-class research, find out what each officer and

soldier thinks, and keep an eye on their living thoughts to “unbutton”, and really speak the truth to the officers and men. “To do a good job in ideological and political education, we must also focus on giving full play to the subjective initiative of the officers and men, so that the officers and men can actively participate in education, innovate education, and accept education.” The brigade leader said that they rely on the “three major organizations” at the grassroots level to guide officers and men to actively carry out mass self-education, forming a good situation where everyone participates and all members exert their strength. In practice, they encourage officers and men in different positions to take the podium and talk about people and things around them through scenario simulations, so that everyone can deepen their understanding in discussions and exchanges and be inspired by empathy; give full play to the exemplary leading role of advanced models, organize brigade models to give lectures on stage, and use their own experiences to speak out, so as to increase the persuasiveness and appeal of education.

According to reports, since the brigade implemented the “precision drip irrigation, segmented implementation, and full-staff effort” education model, the quality and effectiveness of ideological and political education has been continuously improved, and the officers and men have become firmer in their ideals and beliefs, and more motivated to train and prepare for war. In the next step, the brigade will regularly collect feedback from officers and men, adjust the education model in a timely manner, optimize and improve the mechanisms of lesson preparation, demonstration, and effect evaluation, ensure that the education content is closely integrated with grassroots construction, strive to combine learning with practice, apply what is learned, and promote learning to promote work, so as to promote ideological and political education to go deeper and more practical.

一份优化升级的《军事训练计划表》，激活练兵棋局

来源：解放军报 作者：向黎鸣 赵前松 责任编辑：郭妍菲 2025-04-09

陆军某旅精细制订训练计划精准调配训练资源——

绘好一张表 下活一盘棋

■解放军报记者 向黎鸣 特约通讯员 赵前松

三月皖东，某综合训练场，陆军某旅某坦克连二级上士程昊刚完成指挥信息系统使用课目考核，便马不停蹄参加下一场考核。不到一天时间，该连官兵在同一训练场完成了坦克驾驶、射击、通信 3 个专业 6 个课目的考核。

“场地不再闲置，车辆不再轮空，人员不再漏训。”谈及高效率完成训练考核任务背后的原因，该连曹连长告诉记者，旅队通过优化升级《军事训练计划表》，精细制订训练计划、精准调配训练资源，大幅提升了基础训练质效。

记者从该旅作训科了解到，以往组织训练，常常面临基础训练时间少但课目多、教练员和场地分配不均等问题。为此，他们深入研讨后决定，在落实《陆军军事训练大纲》要求基础上，严格按照基础训练专长化任教、集约化组训、模拟化训练、标准化考核的”四化”要求，修订完善《军事训练计划表》。

“按纲施训是原则，完善训练计划有助于更好地落实规定要求。”该旅领导介绍，新修订的《陆军军事训练大纲》中有关训练课目、组训方式、考核评定等方面内容都有不少新变化，对教学组训提出了更高要求。针对这一实际，他们对《军事训练计划表》进行了优化升级。在全旅范围内遴选各专业优秀教练员，打破单位建制组训施教，让每名官兵享受到优质教学资源；统筹训练资源，增加训练场地划分、训练方式调整等具体内容，各连队根据训练课目难易程度，区分专业、划分层级，科学安排训练时间；充分利用模拟训练室展开专攻精练，有效缩短官兵作战能力生成周期。

绘好一张表，下活一盘棋。记者在训练现场看到，一名列兵刚学完理论知识，便直奔指挥楼里的模拟训练室。

原来，他的下一个课目是模拟射击训练。”扎实掌握基础理论后，可使用模拟训练平台开展强化训练，然后再进行实弹射击。”曹连长指着《军事训练计划表》里”组训方法”一栏告诉记者，一些专业训练课目后面特意备注了”模拟器训练”，强调这些课目需要进行模拟训练。

模拟训练室内，整齐摆放着各式各样的模拟训练器材，不同专业官兵全神贯注投入训练。

曹连长告诉记者，得益于旅队《军事训练计划表》的科学统筹，新兵基础训练时间偏短、专业能力提升较慢等问题得到有效解决。

走出模拟训练室，记者看到训练场上多名军士围着一名上等兵，还不时为他鼓掌。

原来，这名上等兵是大学生士兵，在计算机操作方面具有专长。此刻，他正为大家传授指挥信息系统的操作技巧。

人岗相适，人尽其才。把合适的人放在合适的岗位，才能让其长处得到充分发挥。该旅按照”专长化任教”思路，在《军事训练计划表》中提倡有特长的大学生士兵和年轻骨干充分发挥自身优势，在相关训练课目中”挑大梁”。

该旅最近组织的一场实弹射击考核中，坦克、步战车轮番上阵，越过弹坑、洼地等重重障碍，对多个隐显靶标开火射击，命中率较以往大幅提高。

An Optimized and Upgraded “Military Training Schedule” Activates the Chess Gameo of Military Training

Source: PLA Daily Author: Xiang Liming Zhao Qiansong Editor: Guo Yanfei 2025-04-09

A certain army brigade carefully formulates training plans and accurately allocates training resources——

Draw a good table and play a live chess game

■ PLA Daily reporter Xiang Liming Special correspondent Zhao Qiansong

In March, in eastern Anhui, at a comprehensive training ground, Cheng Hao, a second-class sergeant of a tank company of a certain army brigade, had just completed the assessment of the command information system use course, and he immediately participated in the next assessment. In less than a day, the officers and men of the company completed the assessment of 6 courses in 3 majors, including tank driving, shooting, and communication, at the same training ground.

“The venue is no longer idle, the vehicles are no longer rotated, and the personnel are no longer missed training.” Talking about the reasons behind the high efficiency of completing the training assessment tasks, the company commander Cao told reporters that the brigade has greatly improved the quality and effectiveness of basic training by optimizing and upgrading the “Military Training Schedule”, carefully formulating training plans, and accurately allocating training resources.

The reporter learned from the brigade’s training office that, in the past, when organizing training, they often faced problems such as short basic training time but many subjects, and uneven distribution of instructors and venues. To this end, they decided after in-depth discussions to revise and improve the “Military Training Schedule” on the basis of implementing the requirements of the “Army Military Training Outline” and strictly following the “four” requirements of basic training specialization teaching, intensive training, simulation training, and standardized assessment.

“Training according to the outline is the principle, and improving the training plan will help better implement the regulations.” The brigade leader introduced that the newly revised “Army Military Training Outline” has many new changes in terms of training subjects, training methods, assessment and evaluation, and puts forward higher requirements for teaching and training. In response to this reality, they optimized and upgraded the “Military Training Schedule”. Select outstanding instructors from all professions throughout the brigade, break the unit organization and training, so that every officer and soldier can enjoy high-quality teaching resources; coordinate training resources, increase the division of training venues, adjust training methods and other specific contents, and each company will distinguish professions and levels according to the difficulty of training courses, and scientifically arrange training time; make full use of the simulation training room to carry out specialized training, effectively shortening the combat capability generation cycle of officers and men.

Draw a table and play a chess game. The reporter saw at the training site that a private soldier went straight to the simulation training room in the command building after learning theoretical knowledge.

It turned out that his next course was simulated shooting training. “After mastering the basic theory, you can use the simulation training platform to carry out intensive training, and then conduct live ammunition shooting.” Captain Cao pointed to the “Training Method” column in the “Military Training Plan” and told reporters that some professional training courses were specially noted with “simulator training” behind them, emphasizing that these courses need to be simulated.

In the simulation training room, various simulation training equipment are neatly placed, and officers and men of different professions are fully focused on training.

Captain Cao told reporters that thanks to the scientific coordination of the brigade’s “Military Training Schedule”, the problems of short basic training time for recruits and slow improvement of professional ability have been effectively solved.

Walking out of the simulation training room, the reporter saw many sergeants on the training ground surrounding a corporal, and they applauded him from time to time.

It turned out that this corporal was a college student soldier with expertise in computer operation. At this moment, he was teaching everyone the operation skills of the command information system.

People are suitable for their posts and people are fully utilized. Only by putting the right people in the right positions can their strengths be fully utilized. In accordance with the idea of ”specialized teaching”, the brigade advocates college student soldiers and young backbones with special skills to give full play to their own advantages in the “Military Training Schedule” and “take the lead” in relevant training courses.

In a live-fire shooting assessment recently organized by the brigade, tanks and infantry fighting vehicles took turns to cross obstacles such as craters and depressions, and fired at multiple hidden and visible targets, with a hit rate significantly improved compared with the past.

第 81 集团军某旅着力打造复合型军士人才队伍

来源：解放军报 作者：李芊逸 章志扬 责任编辑：林诗清 2025-04-11

第 81 集团军某旅着力打造复合型军士人才队伍

“个性化路径”助推”本领扩容”

解放军报讯 李芊逸、章志扬报道：”经过每月一次专业复训，我的理论基础和实操技能都更强了。”日前，第 81 集团军某旅一场专业训练结束后，中士李耀阳看到进步明显的训练成绩，不禁喜上眉梢。

该旅领导介绍，为打造一支专业技术精、综合能力强的军士人才队伍，他们结合岗位履历、技术特长等实际情况，为每名军士量身定制能力成长的”个性化路径”，帮助他们加速从专业骨干成为复合型人才。

该旅领导介绍，他们在前期调研中发现，部分军士存在岗位调整后适应周期长、能力提升慢等问题。为此，他们结合军士人才队伍特点，探索构建”精细化分类、阶梯式培养、实战化检验”机制，帮助军士找准差距不足、补齐短板弱项。

实践中，该旅将军士人才成长周期划分为”基础适应期、技能提升期、岗位精通期、创新突破期、骨干成熟期”5 个阶段，针对每个阶段设定差异化培养目标，明确培养措施和进阶标准；注重加强新域新质人才培养，打破专业壁垒，构建”主专业精训+副专业轮训+前沿课目特训”培养链条。同时，他们采取”周期复盘+滚动升级”模式，定期开展专业复训，帮助大家重温前期所学内容，进一步巩固强化专业素养。

该旅某军士集训队负责人介绍，得益于新的人才培养模式，不少军士综合素质快速提升：驾驶员张晓亮在前期评估中专业能力存在短板，随即被安排进入补训小组，在旅队”红旗驾驶员”的指导帮带下快速提升驾驶技能；精通修理专业的一级上士赵紫健通过副专业轮训，成功考取无人机操作手专业证书，并在结业考核中取得第一名……

“精准施策、精细培养，让军士成长成才的速度显著提升。”该旅领导介绍，新的人才培养模式实施以来，旅队很多军士成功实现”本领扩容”，为部队战斗力奠定了坚实人才基础。

A Brigade of the 81st Group Army Strives to Build a Team of NCO Talents

Source: PLA Daily Author: Li Qianyi Zhang Zhiyang Editor: Lin Shiqing 2025-04-11

A brigade of the 81st Group Army strives to build a team of NCO talents

“Personalized path” promotes “capacity expansion”

PLA Daily News Li Qianyi and Zhang Zhiyang reported: “After professional refresher training once a month, my theoretical foundation and practical skills are stronger.” A few days ago, after a professional training of a brigade of the 81st Group Army, Sergeant Li Yaoyang saw the obvious improvement in training results and could not help but be happy.

The leaders of the brigade introduced that in order to build a team of NCO talents with professional skills and strong comprehensive abilities, they combined the actual situation of job resumes, technical expertise, etc., and tailored a “personalized path” for the growth of abilities for each NCO, helping them to accelerate from professional backbones to compound talents.

The leaders of the brigade introduced that they found in the early research that some NCOs had problems such as long adaptation period after job adjustment and slow ability improvement. To

this end, they combined the characteristics of the NCO talent team and explored the construction of a “fine classification, step-by-step training, and practical testing” mechanism to help NCOs identify gaps and make up for weaknesses.

In practice, the brigade divided the NCO talent growth cycle into five stages: “basic adaptation period, skill improvement period, job proficiency period, innovation breakthrough period, and backbone maturity period”. Differentiated training goals were set for each stage, and training measures and advancement standards were clarified; attention was paid to strengthening the training of new domains and new talents, breaking professional barriers, and building a “main professional training + secondary professional rotation training + frontier subject special training” training chain. At the same time, they adopted the “periodic review + rolling upgrade” model, and regularly conducted professional refresher training to help everyone review what they learned in the early stage and further consolidate and strengthen their professional quality.

The person in charge of a NCO training team of the brigade introduced that thanks to the new talent training model, the comprehensive quality of many NCOs has been rapidly improved: driver Zhang Xiaoliang had shortcomings in professional ability in the early assessment, and was immediately arranged to join the supplementary training group, and quickly improved his driving skills under the guidance of the brigade’s “Red Flag Driver”; First Sergeant Zhao Zijian, who is proficient in repair, successfully passed the secondary professional training and successfully obtained the drone operator professional certificate, and won the first place in the final examination... “Precise policies and meticulous training have significantly improved the speed of NCOs’ growth and development.” The brigade leader introduced that since the implementation of the new talent training model, many NCOs of the brigade have successfully achieved “skill expansion”, laying a solid talent foundation for the combat effectiveness of the troops.

陆军某旅开展夜视装备强化训练的一段经历

来源：解放军报 作者：李浩然 徐艺洋 韩帅 张愈 责任编辑：林诗清 2025-04-12

解读一条”维修曲线”的起伏波动

——陆军某旅开展夜视装备强化训练的一段经历

■李浩然 徐艺洋 解放军报特约通讯员 韩帅

陆军某旅夜视装备讲解现场。张飞跃 摄

3 月下旬，笔者走进陆军某旅装备维修科看到，该科干部郑墩杰与周洋正在梳理夜视装备维修数据。数据表上，一条曲线格外显眼——这条曲线起初近乎水平，却在去年某月陡然攀升、达到高峰，今年则逐渐回落并趋于平稳。

外行看热闹，内行看门道。笔者对这条曲线的波动感到十分好奇。

“曲线呈现了近几年旅队夜视装备维修数量的变化。”周洋告诉笔者，要解释清数据陡然攀升的原因，还得从去年那次全旅装备抽查说起。

去年装备换季保养期间，该旅组织了一次装备抽查，周洋带领检查组走进某连器材室。打开器材箱，几十套夜视装备整齐码放、崭新如初，一旁的登记本上，使用记录不足两页……

“这么好的装备，官兵为啥不用？”面对这一现象，周洋十分不解。更让人意外的是，在后续检查其他连队过程中，检查组频频发现”装备配而不用”的情况。为查明背后原因，他们召集各连干部骨干举行一场座谈交流。

“夜视仪精密’娇贵’，训练时万一不小心磕坏了怎么办”“每次取用都要维护保养，既麻烦又浪费时间”……座谈会上，官兵们你一言我一语道出实情。原来，夜视装备刚配发时，曾有官兵因操作不当导致装备受损，虽然未影响装备核心功能，但报修流程繁琐，耗时费力。久而久之，一些官兵干脆放弃使用夜视装备，生怕”惹麻烦”。

根据这次调研结果，检查组专门撰写了一篇关于夜视装备使用情况的报告，提交给该旅党委。

“这些夜视装备配发时都是’宝贝’，如今却成了器材室里的’摆设’。必须抓紧解决问题背后的问题。”议战议训会上，该旅党委一班人下定决心破解”重列装轻使用、重保管轻训练”问题，推动夜视装备训练实现全员覆盖。

为此，该旅邀请厂家技术人员来队授课，为官兵详细讲解夜视装备操作方法、技术性能和常见故障排除技巧；拟制《夜视装备维修流程图》，优化维修流程的同时，明确各环节责任人和联系方式，方便官兵准确把握维修进度；定期召开经验分享会，组织官兵分享管装用装过程中总结的”金点子”和”小妙招”，并针对训练中遇到的装备使用难题展开集智攻关……一系列务实举措的出台，不仅打消了官兵曾经的顾虑，更激发了大家训练的热情。

“夜间作战是战场的重要一环，熟练运用夜视装备是提升部队夜战能力的基本要求。”该旅机关趁热打铁，以某新型装备配发部队为契机，组织官兵开展夜视装备强化训练，锤炼部队夜间作战本领。

训练室内，某装步连季连长和训练骨干反复练习夜视装备在不同场景下的使用技巧，严抠细训每个技术动作；夜训场上，官兵头戴夜视仪开展据枪瞄准、目标识别、功能切换等训练……

采访期间，有个细节让笔者印象深刻：下士朱帆使用的某型单兵夜视仪套袋已经被磨出了毛边，而这型装备刚刚配发不久。这个细节表明，官兵们已经在训练中高强度使用新装备。

随着夜视装备使用频率提高，装备维修科收到的报修需求也多了起来。为此，该旅加强人员力量，加班加点完成维修作业。对自身无法解决的问题，他们及时协调厂家，并跟进维修进度，想方设法确保官兵训练不受影响。

为打消少数官兵对”装备损坏要担责”的顾虑，该旅党委专门制订《夜视装备训练使用免责条款》，明确规定”非故意损坏不追责、科学组训出故障不问责”，帮助官兵卸下心理包袱、轻装上阵。

随着夜视装备在训练中广泛应用，该旅装备维修科的”维修曲线”渐趋平稳。然而，一次夜间对抗训练再次引起该旅领导关注。

训练中，某连官兵如往常一样借助夜视装备向”敌”阵地穿插。突然，对手实施强电磁干扰，穿插小队的夜视仪瞬间变成”雪花屏”。官兵顿时乱了手脚，在夜色中迷失方向，对抗以失败告终。

“武器装备是提升战斗力的工具，可以依靠，但不能过度依赖。”该旅领导表示，在这次失利的启发下，为防止官兵对夜视装备产生过度依赖心理，他们要求部队在用好夜视装备的同时，也要持续强化夜间传统作战手段训练。

某侦察连为夯实官兵夜间作战能力，在所有夜训课目中设置”夜视装备失灵”特情。官兵精练指北针判定方位、星光条件下识别目标等传统夜战手段。夜幕下，他们摸黑拆装武器、构筑工事、渗透侦察，将夜战基本功练硬练扎实。

夜色如墨，某合成营正在开展夜间实弹射击训练。中士高扬通过夜视仪锁定目标后，在击发前突然闭上一只眼睛——这是他自己摸索出的”单眼切换”技巧。”真碰上装备故障也不怕，咱还有这双’火眼金睛’！”高扬说。

“解读这条’维修曲线’的起伏波动，这背后凝结着官兵无数汗水与智慧。”该旅领导由衷感慨。

短评

唯有实践出真知

■张 愈

“夜袭阳明堡机场”“夜渡长江”“奇袭白虎团”……在过去的战争实践中，夜战曾是我军克敌制胜的重要手段。今时今日，我们既需要发扬夜战传统优势，也要注重运用科技手段提高夜战能力，淬炼制胜高技术战争的”暗夜尖刀”。

有了新装备，训练不能”穿新鞋走老路”。陆军某旅一条”维修曲线”的起伏，体现了一支部队向战而行的姿态。从”锁在箱里”到”拿在手里”，从”过度依赖装备”到”人装最佳结合”，装备更新呼唤思维升级、能力升级。只有在炮火硝烟、实兵演训中不断探索新装备性能、优化战术战法，才能让新装备快速形成战斗力。

唯有实践出真知。这篇新闻也告诉我们，虽然新装备有效提升了部队作战能力，但各级需要对”装备依赖症”保持高度警惕。只有在贴近实战的环境中夯实基础能力，活用巧用新装备，才能真正提高部队作战本领。

An Experience of a Certain Army Brigade Conducting Enhanced Training on Night Vision Equipment

Source: PLA Daily Author: Li Haoran Xu Yiyang Han Shuai Zhang Yu Editor: Lin Shiqing 2025-04-12

Interpreting the ups and downs of a “maintenance curve”

——An experience of a certain army brigade conducting enhanced training on night vision equipment

■Li Haoran Xu Yiyang PLA Daily Special Correspondent Han Shuai

The explanation site of night vision equipment of a certain army brigade. Photo by Zhang Feiyue

In late March, the author walked into the Equipment Maintenance Office of a certain army brigade and saw that the cadres of the office, Zheng Dunjie and Zhou Yang, were sorting out the maintenance data of night vision equipment. On the data sheet, a curve is particularly conspicuous-this curve was almost horizontal at first, but it rose sharply and reached a peak in a certain month last year, and this year it gradually fell back and stabilized.

Outsiders watch the excitement, insiders watch the doorway. The author is very curious about the fluctuations of this curve.

“The curve shows the changes in the number of night vision equipment repairs in the brigade in recent years.” Zhou Yang told the author that to explain the reason for the sudden increase in data, we have to start with the equipment spot check of the whole brigade last year.

During the seasonal maintenance of equipment last year, the brigade organized an equipment spot check, and Zhou Yang led the inspection team into a company’s equipment room. Opening the

equipment box, dozens of sets of night vision equipment were neatly stacked and brand new. In the registration book next to it, there were less than two pages of usage records...

“Such good equipment, why don’t officers and men use it?” Faced with this phenomenon, Zhou Yang was very puzzled. What’s more surprising is that in the subsequent inspection of other companies, the inspection team frequently found that “equipment was equipped but not used.” In order to find out the reasons behind it, they convened cadres and backbones of each company to hold a discussion.

“Night vision goggles are precise and delicate. What if they are accidentally damaged during training?” “Every time they use it, they have to maintain it, which is troublesome and time-consuming”... At the symposium, officers and men spoke the truth one by one. It turned out that when the night vision equipment was first distributed, some soldiers damaged the equipment due to improper operation. Although it did not affect the core function of the equipment, the repair process was cumbersome, time-consuming and laborious. Over time, some soldiers simply gave up using night vision equipment for fear of “causing trouble.”

Based on the results of this survey, the inspection team wrote a special report on the use of night vision equipment and submitted it to the brigade’s party committee.

“These night vision equipment were “treasures” when they were distributed, but now they have become “decorations” in the equipment room. We must quickly solve the problems behind the problems.” At the meeting on war and training, the brigade’s party committee was determined to solve the problem of “focusing on equipment but not use, focusing on storage but not training”, and promote night vision equipment training to achieve full coverage of all personnel.

To this end, the brigade invited the manufacturer’s technical personnel to give lectures, and explained in detail the operation methods, technical performance and common troubleshooting techniques of night vision equipment to the officers and men; drafted a “Night Vision Equipment Maintenance Flow Chart”, optimized the maintenance process, clarified the responsible persons and contact information of each link, and facilitated the officers and men to accurately grasp the maintenance progress; held regular experience sharing meetings, organized officers and men to share the “golden ideas” and “little tricks” summarized in the process of management and use of equipment, and launched collective wisdom to tackle the equipment usage problems encountered in training... The introduction of a series of pragmatic measures not only dispelled the officers and men’ previous concerns, but also stimulated everyone’s enthusiasm for training.

“Night combat is an important part of the battlefield, and proficient use of night vision equipment is a basic requirement for improving the troops’ night combat capabilities.” The brigade struck while the iron was hot, and took the opportunity of the distribution of a new type of equipment to organize officers and men to conduct night vision equipment intensive training to hone the troops’ night combat skills.

In the training room, Captain Ji and the training backbones of a certain armored infantry company repeatedly practiced the use of night vision equipment in different scenarios, and strictly trained each technical action; on the night training field, officers and men wore night vision goggles to conduct training such as aiming with guns, target identification, and function switching...

During the interview, there was a detail that impressed the author: the bag of a certain type of individual night vision goggles used by Corporal Zhu Fan had been worn out, and this type of equipment had just been issued. This detail shows that officers and men have been using new equipment intensively in training.

As the frequency of use of night vision equipment increases, the Equipment Maintenance Office has received more repair requests. To this end, the brigade has strengthened its personnel and worked overtime to complete the maintenance work. For problems that they cannot solve themselves, they coordinate with manufacturers in a timely manner and follow up on the maintenance progress, trying every means to ensure that the training of officers and men is not affected.

In order to dispel the concerns of a few officers and men about “being responsible for equipment damage”, the brigade party committee specially formulated the “Night Vision Equipment Training and Use Disclaimer Clause”, which clearly stipulates that “no accountability for non-intentional damage and no accountability for scientific training failures”, helping officers and men to unload psychological burdens and go into battle lightly.

With the widespread use of night vision equipment in training, the “maintenance curve” of the brigade’s equipment maintenance department has gradually stabilized. However, a night confrontation training once again attracted the attention of the brigade leaders.

During the training, the officers and men of a certain company used night vision equipment to penetrate the “enemy” position as usual. Suddenly, the opponent implemented strong electromagnetic interference, and the night vision device of the penetration team instantly turned into a “snow screen”. The officers and men were immediately confused and lost their way in the night, and the confrontation ended in failure.

“Weapons and equipment are tools to enhance combat effectiveness. They can be relied on, but not over-reliant.” The leaders of the brigade said that inspired by this failure, in order to prevent officers and men from over-relying on night vision equipment, they required the troops to continue to strengthen the training of traditional night combat methods while making good use of night vision equipment.

In order to strengthen the night combat capability of officers and men, a certain reconnaissance company set up the special situation of “night vision equipment failure” in all night training courses. Officers and men practiced traditional night combat methods such as using compasses to determine directions and identifying targets under starlight conditions. Under the cover of night,

they disassembled and assembled weapons, built fortifications, and infiltrated reconnaissance in the dark, practicing the basic skills of night combat.

The night was as dark as ink, and a certain combine battalion was conducting night live-fire shooting training. After locking the target through the night vision goggles, Sergeant Gao Yang suddenly closed one eye before firing - this was the “single-eye switching” technique he figured out himself. “Don’t be afraid if you really encounter equipment failure, we still have this pair of ‘fire eyes and golden eyes’!” Gao Yang said.

“To interpret the ups and downs of this ‘maintenance curve’, it is the result of countless sweat and wisdom of officers and men.” The leaders of the brigade sighed sincerely.

Short review

Only practice can bring true knowledge

■ Zhang Yu

“Night attack on Yangmingbao Airport”, “Night crossing of the Yangtze River”, “Surprise attack on the White Tiger Regiment”... In the past war practice, night combat was an important means for our army to defeat the enemy. Today, we need to carry forward the traditional advantages of night combat, and also focus on using scientific and technological means to improve night combat capabilities and temper the “dark night sharp knife” to win high-tech wars.

With new equipment, training cannot “wear new shoes and walk the old path”. The ups and downs of a “maintenance curve” of a certain army brigade reflect the attitude of a unit heading for war. From “locked in a box” to “held in hand”, from “over-reliance on equipment” to “the best combination of people and equipment”, equipment updates call for thinking upgrades and capability upgrades. Only by constantly exploring the performance of new equipment and optimizing tactics and methods in the smoke of gunfire and actual military exercises can the new equipment quickly form combat effectiveness.

Only practice can bring true knowledge. This news also tells us that although the new equipment has effectively improved the combat capability of the troops, all levels need to remain highly vigilant against “equipment dependence”. Only by consolidating basic capabilities in an environment close to actual combat and making good use of new equipment can we truly improve the combat capabilities of the troops.

陆军某旅从难从严组织战场救护训练，淬炼官兵战场救护技能

来源：解放军报 作者：张子庚 向黎鸣 责任编辑：王一亘 2025-04-13

陆军某旅从难从严组织战场救护训练——

随机导调让特情充满变数

■张子庚 解放军报记者 向黎鸣

伤员’左腿受伤，立即前出处置！近日，陆军某旅一场战场救护训练紧张展开。接到情况通报，班长刘波与战友迅速前出，隐蔽靠近”伤员”，判明”伤情”后立即展开紧急救治。

很快，导调组临机给出特情——”敌”化学武器袭击。特情传来，刘波与战友立即采取措施，对 “伤员”伤口进行隔离处理，避免沾染有毒物质。随后的训练中，导调组又临机嵌入多个特情，刘波与战友密切配合、灵活处置，最终顺利完成任务。走下训练场，刘波直言：这场训练”硝烟味”十足，如同上了真实战场。

“训练实打实，战场才敢硬碰硬，平时只有盯着战场练，战时救护才能底气足。”该旅保障部领导告诉记者，他们在以往训练中，大都预先设置特情，久而久之，官兵对处置训练中遭遇的”特情”轻车熟路，训练效果大打折扣。

前段时间，上级组织卫勤专业考核。考核组下达”‘伤员’右小腿骨折”通报后，突然给出意料之外的特情——”敌”无人机空中侦察，迅速组织”伤员”隐蔽。面对陌生特情，官兵一时有些慌乱，一边展开紧急救治，一边寻找掩体隐蔽。由于情况紧急，他们暴露出”伤情处置步骤混乱”“选择隐蔽地点不合理”等问题。

在随后召开的训练形势分析会上，该旅党委深刻反思感到，只有平时训练提高”含战量”，战时救治才能确保拉得出、上得去、救得下。为此，他们按照真、难、严、实标准，模拟逼真战场环境、构设复杂救治场景，在紧急救护、伤员后送等课目中，随机导调多种连贯特情，倒逼官兵提升应急应变能力，练就过硬战场救护技能。

为进一步提升部队战场救护水平，该旅机关相关部门深入基层调研，梳理出训风不严、训法单一等问题。随后，他们从训练内容、组训方法、考核形式等方面入手，制订针对性改进措施，优化不同战场环境下的救护流程，汇编不同作战阶段、战斗任务中的救护经验方法；按照”基础能力强化训、关联课目连贯训、紧急特情重点训”的思路，改进组训方法；加大多专业联合、多课目连贯、多技能综合训练强度，淬炼官兵战场救护技能。

“训练场连着战场，岗位就是战位，只有不断强化本领，才能有效提升遂行多样化任务能力。”该旅领导介绍，下一步，他们将在构设实战化环境、加大练兵力度的同时，尝试建立联训互学机制，延伸开展多专业全要素协同训练，推动部队战时卫勤保障能力持续提升。

A Certain Army Brigade Organized Battlefield Rescue Training From Difficult and Strict Conditions to Temper the Battlefield Rescue Skills of Officers and Men

Source: PLA Daily Author: Zhang Zigeng Xiang Liming Editor: Wang Yigeng 2025-04-13

A certain army brigade organized battlefield rescue training from difficult and strict conditions——

Random guidance makes special situations full of variables

■ Zhang Zigeng PLA Daily reporter Xiang Liming

“The ‘wounded’ has a wounded left leg, go forward immediately to deal with it!” Recently, a battlefield rescue training of a certain army brigade was conducted intensively. After receiving the situation report, squad leader Liu Bo and his comrades quickly went forward, secretly approached the “wounded”, and immediately conducted emergency treatment after determining the “injury”.

Soon, the guidance group gave a special situation on the spot-”enemy” chemical weapons attack. When the special situation came, Liu Bo and his comrades immediately took measures to isolate the wounds of the “wounded” to avoid contamination with toxic substances. In the subsequent training, the guidance group embedded multiple special situations on the spot. Liu Bo and his comrades worked closely and flexibly, and finally successfully completed the task. After leaving the training ground, Liu Bo said frankly: This training was full of “gun smoke”, just like being on a real battlefield.

“Only by training hard can we dare to fight hard on the battlefield. Only by focusing on the battlefield can we have confidence in rescue in wartime.” The leader of the brigade’s support department told reporters that in previous training, they mostly set up special situations in advance. Over time, the officers and men were familiar with the “special situations” encountered in the training, and the training effect was greatly reduced.

Some time ago, the superior organized a medical professional assessment. After the assessment team issued a notice of “the right calf fracture of the ‘injured’”, it suddenly gave an unexpected special situation - the “enemy” drone aerial reconnaissance, and quickly organized the “injured” to hide. Faced with unfamiliar special situations, the officers and men were a little panicked for a while, while conducting emergency treatment, they looked for shelters to hide. Due to the urgency of the situation, they exposed problems such as “confusion in the treatment of injuries” and “unreasonable selection of hiding places”.

At the training situation analysis meeting held subsequently, the brigade’s Party Committee reflected deeply and felt that only by improving the “combat content” in peacetime training can wartime treatment ensure that they can be pulled out, raised and rescued. To this end, they simulated realistic battlefield environments and constructed complex treatment scenes in accordance with the standards of true, difficult, strict and practical. In emergency rescue, wounded evacuation and other subjects, they randomly directed a variety of coherent special situations, forcing officers and men to improve their emergency response capabilities and develop excellent battlefield rescue skills.

In order to further improve the level of battlefield rescue in the troops, the relevant departments of the brigade conducted in-depth investigations at the grassroots level and sorted out problems such as lax training style and single training methods. Subsequently, they started from the aspects of training content, training methods, and assessment forms, formulated targeted improvement measures, optimized the rescue process in different battlefield environments, and compiled rescue experience methods in different combat stages and combat missions; improved the training methods in accordance with the idea of ”basic ability strengthening training, related subject coherence training, and emergency special situation focus training”; increased the intensity of multi-professional joint, multi-subject coherence, and multi-skill comprehensive training to temper the battlefield rescue skills of officers and men.

“The training ground is connected to the battlefield, and the post is the combat position. Only by constantly strengthening our skills can we effectively improve our ability to carry out diversified tasks.” The brigade leader introduced that in the next step, while creating a real combat environment and increasing training efforts, they will try to establish a joint training and mutual learning mechanism, extend multi-professional and full-element coordinated training, and promote the continuous improvement of the troops’ wartime medical support capabilities.

新疆和田军分区边防部队高原官兵迎来 “银行流动服务车”

来源：中国军网-解放军报 作者：赵金石 孙兴维 刘 丹 责任编辑：林诗清 发布：2025-04-14

记者探访新疆和田军分区边防部队——

高原官兵迎来”银行流动服务车”

■赵金石 解放军报记者 孙兴维 刘 丹

“即使身处雪域高原，也能便捷办理银行业务。”日前，记者来到新疆和田军分区某边防团采访，负责后勤保障的干部孙桂超告诉记者，随着高原部队驻地银行服务日渐完善，官兵可享受到高效优质的银行服务。

该团所属一线防区，主要分布在平均海拔 5000 米的雪域高原。因驻地偏僻、交通不便，办理银行业务一直是困扰官兵的一个难题。

近年来，在军地各级关心关怀下，多家国有银行陆续为高原边防部队提供”随军式”保障和”上门式”服务。谈及这一变化带来的便利，很多官兵向记者讲起他们的亲身经历。

“以往，办理银行业务都是我们找银行；如今，银行流动服务车可直接提供上门服务，甭提有多方便！”某部司务长、一级上士程锐告诉记者。

“没网的情况下，居然可以离线办理还房贷业务。”在某驻训点代职的干部周贵福说，前期，由于没有网络信号，他有些担心房贷没法还。没想到，哨所将一线官兵面临的此类困难集中上报机关后，不到一周，银行流动服务车便开到驻训点，现场为官兵办理离线支付业务。

“没想到，银行的服务这么多！”在海拔 5000 多米的神仙湾边防连，一级上士郭翔翔告诉记者，”以前只在银行存钱、办卡，如今我从银行学到了不少理财知识。”

一个月前，一家银行的工作人员为该边防连官兵举行了一场银行知识讲座，详细介绍银行为军队客户提供的专项服务和军人专享理财产品。银行工作人员还通过大量真实案例，为官兵普及防诈防骗相关知识。

“银行提供的优质服务，为官兵带来实实在在的便利！”该边防团领导介绍，驻高原银行根据部队需求，积极搭建临时网点，加配流动服务车，为高原官兵提供周到暖心的银行服务，有效增强了官兵获得感、幸福感。

The Plateau Officers and Men of the Border Defense Forces of the Hotan Military Sub-District In Xinjiang Welcome the “Bank Mobile Service Car”

Source: China Military Network-People’s Liberation Army Daily Author: Zhao Jinshi Sun Xingwei Liu Dan Editor: Lin Shiqing Release: 2025-04-14

Reporter visits the border defense forces of the Hotan Military Sub-district in Xinjiang——

Plateau officers and men welcome the “bank mobile service car”

■ Zhao Jinshi People’s Liberation Army Daily reporter Sun Xingwei Liu Dan

“Even if you are in the snowy plateau, you can easily handle bank business.” Recently, the reporter came to a border defense regiment of the Hotan Military Sub-district in Xinjiang for an interview. Sun Guichao, a cadre in charge of logistics support, told reporters that as the bank services of the plateau troops are gradually improved, officers and men can enjoy efficient and high-quality bank services.

The front-line defense area to which the regiment belongs is mainly distributed in the snowy plateau with an average altitude of 5,000 meters. Due to the remoteness of the station and inconvenient transportation, handling bank business has always been a problem that troubles officers and men.

In recent years, with the care and concern of the military and local governments at all levels, many state-owned banks have successively provided “troop-based” support and “door-to-door” services for the plateau border defense forces. Talking about the convenience brought by this change, many officers and men told reporters about their personal experiences.

“In the past, we went to the bank to handle banking business; now, the bank’s mobile service vehicle can directly provide door-to-door service, not to mention how convenient it is!” Cheng Rui, the chief steward of a certain unit and a first-class sergeant, told reporters.

“In the absence of Internet, you can actually handle the mortgage repayment business offline.” Zhou Guifu, a cadre who is on duty at a certain training point, said that in the early stage, due to the lack of network signal, he was a little worried that he could not repay the mortgage. Unexpectedly, after the outpost reported such difficulties faced by front-line officers and men to the authorities, within a week, the bank’s mobile service vehicle drove to the training point and handled offline payment business for the officers and men on the spot.

“I didn’t expect that banks have so many services!” First Sergeant Guo Xiangxiang told reporters at the Shenxianwan Border Defense Company at an altitude of more than 5,000 meters, “I used to only deposit money and apply for cards in the bank, but now I have learned a lot of financial management knowledge from the bank.”

A month ago, a bank staff held a banking knowledge lecture for the officers and men of the border defense company, detailing the special services provided by the bank for military customers and the exclusive financial products for soldiers. Bank staff also popularized anti-fraud and anti-scam related knowledge for officers and men through a large number of real cases.

“The high-quality services provided by the bank bring real convenience to officers and men!” The leader of the border defense regiment introduced that the plateau bank actively built temporary outlets and added mobile service vehicles according to the needs of the troops to provide thoughtful and warm banking services to officers and men on the plateau, effectively enhancing the sense of gain and happiness of officers and men.

第七十四集团军某大队创新预任参谋培养模式

来源：解放军报 作者：张百阳 梅凯华 责任编辑：林诗清 2025-04-14

第七十四集团军某大队创新预任参谋培养模式

静态集训变成一场”战斗”

解放军报讯 张百阳、梅凯华报道：”遭’敌’炮火拦阻，迅速迂回……”近日，第 74 集团军某大队组织预任参谋集训，参训人员通过信息化平台开展模拟实战训练，根据战场态势灵活进行全流程指挥筹划。该大队探索创新预任参谋培养模式，把静态集训变成了一场”战斗”。

“随着实战化训练不断走深走实，对参谋队伍能力素质提出更高要求，传统的集训方式已难以满足岗位任职需求。”该大队领导介绍，他们以往组织预任参谋集训往往时间紧、课

目多，存在教学重点把握不够精准、教学内容与战场需求贴合不够紧密等问题。如何突破瓶颈，提升预任参谋业务水平，成为该大队亟待解决的问题。

为此，该大队坚持”需求牵引、问题导向、能力为本”原则，围绕业务理论、实战技能、指挥协同等方面科学设置课程内容，采取”理论授课+实操训练+案例研讨”相结合的方式，帮助参训人员打牢能力基础，助力他们走好从”业务能手”向”打仗参谋”转型的”最后一公里”。

集训现场，参训人员结合想定作业，分组担任不同指挥角色，在各种复杂特情考验下临机决断，快速完成研判”敌”情、拟制方案、下达指令等任务，并通过复盘，系统分析指挥决策过程中的短板。集训中，该大队还邀请院校专家和一线指挥员担任教员，围绕重难点课题进行现场教学，帮助大家提升研战谋战综合能力。

“过去参训人员多是面对静态想定完成作业，如今他们要在’动态战场’上见招拆招。”该大队领导介绍，他们通过”场景模拟训、环境仿真训、平台系统训”等方式，常态组织模拟实战训练，参训人员指挥能力显著提升。

该大队领导介绍，集训结束后，他们将常态跟踪调研参训人员成长发展情况，并收集用人单位的意见建议，不断优化参谋人才培养模式，为部队战斗力提升持续注入动能。

A [Battalion-level] Group [Dadui] of the 74th Group Army Innovates the Training Model for Pre-Appointed Staff Officers

Source: PLA Daily Author: Zhang Baiyang Mei Kaihua Editor: Lin Shiqing 2025-04-14

A group [Dadui] of the 74th Group Army innovates the training model for pre-appointed staff officers

Static training turns into a “battle”

PLA Daily News Zhang Baiyang and Mei Kaihua reported: “Blocked by ‘enemy’ artillery fire, quickly detoured...” Recently, a battalion-level group of the 74th Group Army organized a pre-appointed staff officer training. The trainees conducted simulated combat training through an information platform and flexibly conducted full-process command planning according to the battlefield situation. The brigade explored and innovated the training model for pre-appointed staff officers, turning static training into a “battle”.

“As practical training continues to go deeper and more practical, higher requirements are placed on the ability and quality of the staff team. The traditional training method can no longer meet the job requirements.” The group leader introduced that their previous pre-appointed staff training was often tight in time and had many subjects. There were problems such as insufficient grasp of the teaching focus and insufficient fit between the teaching content and the battlefield needs. How to

break through the bottleneck and improve the professional level of the pre-appointed staff has become an urgent problem to be solved by the group.

To this end, the group adheres to the principle of "demand-driven, problem-oriented, and capability-based", scientifically sets the course content around functional department theory, practical skills, command coordination, etc., and adopts a combination of "theoretical teaching + practical training + case study" to help trainees lay a solid foundation for their abilities and help them walk the "last mile" of the transformation from "functional department experts" to "warfare staff".

At the training site, trainees combined the assumed operations and divided into different command roles. They made decisions on the spot under various complex special situations, quickly completed tasks such as analyzing the "enemy" situation, formulating plans, and issuing instructions, and systematically analyzed the shortcomings in the command decision-making process through review. During the training, the group also invited experts from colleges and universities and front-line commanders to serve as instructors, and conducted on-site teaching around key and difficult topics to help everyone improve their comprehensive ability to study and plan for war.

"In the past, trainees mostly completed their work in the face of static assumptions, but now they have to respond to the challenges on the 'dynamic battlefield'." The leader of the group said that they regularly organized simulated combat training through "scenario simulation training, environmental simulation training, platform system training" and other methods, and the command ability of trainees has been significantly improved.

The leader of the group said that after the training, they will regularly track and investigate the growth and development of trainees, collect opinions and suggestions from employers, continuously optimize the training model of staff talents, and continuously inject momentum into the improvement of the combat effectiveness of the troops.

第 82 集团军某旅高炮连"战位影集"成为连队传家宝

来源：解放军报 作者：蔡广森 刘 敏 责任编辑：林诗清 2025-04-14

第八十二集团军某旅高炮连记录官兵身影，讲好强军故事——

"战位影集"成为连队传家宝

■蔡广森 解放军报记者 刘 敏

该连战士翻看”战位影集”。赵浩程 摄

“炮膛卡弹，徒手抠住滚烫的炮闩，这样的照片，能不能入选影集？”

几天前，记者到第 82 集团军某旅采访，正赶上高炮连举办新一届”战位影集”入册评审会。当投影屏上出现一张被灼伤的手部特写照片，中士周涛举起缠着纱布的右手，向大家讲起照片背后的故事。

当时，连队正在组织实弹射击，一门火炮的炮闩突然卡死。周涛深知，如不及时处置，极可能发生危险。他未加思索，立即攥紧开闩手柄，将炮闩拉至后侧，全然不顾金属碎屑刺入掌心。在他的努力下，炮弹很快被取出。

这惊险的一幕，被负责现场记录的上等兵王宏达捕捉到了，快门按下，将周涛的冲锋姿态定格。

值得一提的是，这张照片与 2015 年时任八班班长邓杰的一张照片如出一辙。当时，一枚炮弹卡在炮膛里，随时有爆炸的风险，邓杰毫不犹豫地冲向炮位，排除了故障。

“是邓班长的故事激励了我。”事后被问及之所以挺身而出的原因，周涛提到了影集里的这张照片。

不同的时空，相似的场景。评审现场，周涛的事迹得到大家一致认可，那张手部特写照片被收录到”战位影集”里。看着大家严肃认真的讨论审核，记者顿时感到这本影集不一般。

“照片定格的，是官兵们练兵备战和执行任务的精彩瞬间，也是开展思想政治教育最生动鲜活的教材。”

“在我们心中，这本影集是不断更新的连史，谁的照片能够被收录其中，绝对是一件值得骄傲和自豪的事情。”

“‘战位影集’已经成了我们连的传家宝，每张照片都承载着非比寻常的意义。”

……

听着大家你一言我一语的介绍，翻开这本边角已经磨白的影集，一茬茬官兵接续奋斗的身影映入眼帘。随着目光在光影之间流转，记者深切感受到”传承”二字的分量。

2023 年，第一次参加”影集故事会”时，列兵张伟便被一张拍摄于 1983 年的黑白照片吸引了。画面里，30 多名老兵喊着号子，用麻绳把旧式高炮拖上陡坡，不少人的肩头被磨破。

“现在有了牵引车，还需要这么拼吗？”张伟疑惑地问道。

一旁的连长没有说话，把影集翻到第 17 页，上面是连队一级上士刘建雨参加抗洪抢险时留下的照片。只见他站在齐腰深的湍流里，将通信设备高举过头顶，脖颈青筋暴起。照片空白处，写着他的留言：”装备能升级，但血性任何时候都不能丢！”

看到这句话，张伟点点头，陷入沉思。

次日车炮场日，暴雨倾盆。张伟负责的火炮在行驶过程中不慎陷入泥潭。”人工推炮！”连长的指令刺破雨幕，张伟冲进泥潭开始作业。40 年前老照片中的一幕，在大雨中重现。

当火炮成功脱困，张伟发现自己的作战靴早已灌满了砂石，脚趾被硌得生疼。此时的他，终于悟道：”影集记录的是过往的影像，诠释的却是一以贯之的血性。”从那以后，张伟在训练中格外刻苦，立志凭借自己的出色表现，为影集增添新照片。

“每次翻看这本影集，我们都感觉是在同老兵对话、向前辈汇报。”连队干部赵鹏说，现在尽管装备更新换代了，但同样的血性仍在新一代官兵身上传承、延续——刘建雨顶着 40℃高温操作雷达，中暑后仍不愿离开战位；上等兵刘杜明在操作比武中受伤，坚持完成剩余课目……

记者在该连采访发现，如今”战位影集”已拓展为”三位一体”的传承载体：纸质影集收录精彩瞬间，连队”信息视窗”动态更新训练影像，连队荣誉室借助信息手段还原历史照片。赵鹏告诉记者：”现在，官兵们随时都可以看到影集，了解照片背后的故事，在沉浸式教育氛围中持续激发荣誉感和使命感。”

暮色降临，记者再次见到赵鹏，他刚把当日训练视频导入”信息视窗”终端。霞光透过窗户，洒在”战位影集”扉页上，照片里的一门旧火炮，正与训练场上停放的新型装备遥相呼应。

记者手记

光影为笔 奋斗有痕

■刘 敏

来到该连采访，首次听到”战位影集”时，记者不由得好奇：”战位”二字赋予了这本影集怎样的意味？

翻开影集，万家灯火璀璨时，两名战士坚守在哨位上；装备底盘下，一名老兵神情专注地排除故障；落日的余晖中，一支小分队肩扛电缆、步伐坚定地走向战位；授枪仪式上，新兵们目光坚定、高声宣誓……

定格精彩瞬间，展现冲锋姿态，看到照片时，记者被这种蓬勃向上的力量所吸引。这些瞬间，不是惊天动地的大事件，却让我们感受到不一样的力量——在平凡中创造不凡，何尝不是一种冲锋呢？

合上影集，记者心中思绪万千：今天的奋斗足迹，都是在书写新的历史。就像我们看到战争年代的黑白照片，总会被先烈攻坚克难、奋勇向前的精神所感召。连队官兵们每天翻看这本”战位影集”，也必然能从中汲取宝贵的精神财富。

每一种冲锋都值得被铭记。冲锋并不总是衔枚疾走、攻城夺隘，它可以是进击的姿态、拼搏的力量，也可以是青春的脉动、不屈的斗志，就像高炮连官兵那样始终有一颗火热的奋进之心。

The “Battle Position Album” of the Anti-Aircraft Artillery Company of a Brigade of the 82nd Group Army Has Become a Family Heirloom of the Company

Source: PLA Daily Author: Cai Guangsen Liu Min Editor: Lin Shiqing 2025-04-14

The Anti-aircraft Artillery Company of a Brigade of the 82nd Group Army records the figures of officers and men and tells the story of a strong army——

“Battle Position Album” has become a family heirloom of the company

■Cai Guangsen PLA Daily reporter Liu Min

The soldiers of the company looked through the “Battle Position Album”. Photo by Zhao Haocheng

“The barrel is stuck, and the hot breech block is held with bare hands. Can such a photo be selected for the album?”

A few days ago, the reporter went to a brigade of the 82nd Group Army for an interview, and it happened to be the time when the anti-aircraft artillery company held a new “Battle Position Album” entry review meeting. When a close-up photo of a burned hand appeared on the projection screen, Sergeant Zhou Tao raised his right hand wrapped in gauze and told everyone the story behind the photo.

At that time, the company was organizing live-fire shooting, and the breech block of a gun suddenly got stuck. Zhou Tao knew that if he did not deal with it in time, it would be very dangerous. Without thinking, he immediately grasped the bolt handle and pulled the bolt to the back, completely ignoring the metal debris piercing his palm. With his efforts, the shell was quickly taken out.

This thrilling scene was captured by the senior soldier Wang Hongda who was responsible for recording on the scene. The shutter was pressed to freeze Zhou Tao’s charging posture.

It is worth mentioning that this photo is exactly the same as a photo of Deng Jie, the then squad leader of the eighth squad in 2015. At that time, a shell was stuck in the barrel and there was a risk of explosion at any time. Deng Jie rushed to the gun position without hesitation and eliminated the fault.

“It was the story of squad leader Deng that inspired me.” When asked about the reason why he stood up later, Zhou Tao mentioned this photo in the album.

Different time and space, similar scenes. At the review site, Zhou Tao’s deeds were unanimously recognized by everyone, and the close-up photo of his hand was included in the “Battle Position Album”. Watching everyone’s serious discussion and review, the reporter immediately felt that this album was extraordinary.

“The photos freeze the wonderful moments of officers and men training and preparing for war and performing tasks, and are also the most vivid and lively teaching materials for ideological and political education.”

“In our hearts, this album is a constantly updated company history. Whoever’s photo can be included in it is definitely a matter of pride and pride.”

“‘Battle Position Album’ has become a family heirloom of our company, and each photo carries extraordinary significance.”

...

Listening to everyone’s introduction, I opened this album with whitened edges, and the figures of officers and men who continued to struggle came into view. As my eyes moved between light and shadow, the reporter deeply felt the weight of the word “inheritance”.

In 2023, when Private Zhang Wei participated in the “Album Story Meeting” for the first time, he was attracted by a black-and-white photo taken in 1983. In the picture, more than 30 veterans shouted slogans and used hemp ropes to drag the old anti-aircraft guns up the steep slope. Many of them had their shoulders worn out.

“Now that we have a tractor, do we still need to work so hard?” Zhang Wei asked doubtfully.

The company commander on the side did not speak, but turned to page 17 of the album, which showed the photo of the company’s first-class sergeant Liu Jianyu participating in flood relief. He was seen standing in the waist-deep turbulence, holding the communication equipment above his head, with veins on his neck bulging. In the blank space of the photo, his message was written: “Equipment can be upgraded, but blood can never be lost!”

Seeing this, Zhang Wei nodded and fell into deep thought.

The next day, it was a car and artillery field day, and it rained heavily. The artillery that Zhang Wei was responsible for accidentally fell into a mud pit during driving. “Push the gun manually!” The

company commander's command pierced the rain curtain, and Zhang Wei rushed into the mud to start working. A scene in an old photo 40 years ago reappeared in the heavy rain.

When the artillery was successfully rescued, Zhang Wei found that his combat boots were already filled with sand and gravel, and his toes were hurt. At this time, he finally realized: "The photo album records the past images, but it interprets the consistent bloodiness." Since then, Zhang Wei has been particularly hardworking in training, determined to add new photos to the photo album with his outstanding performance.

"Every time we look through this photo album, we feel like we are talking to veterans and reporting to our predecessors." Company cadre Zhao Peng said that although the equipment has been updated, the same bloodiness is still inherited and continued by the new generation of officers and men-Liu Jianyu operated the radar in a high temperature of 40℃ and was still unwilling to leave the battle position after suffering from heatstroke; Corporal Liu Duming was injured in the operation competition and insisted on completing the remaining courses...

The reporter found in the company that now the "battle position photo album" has been expanded into a "three-in-one" inheritance carrier: the paper photo album includes wonderful moments, the company's "information window" dynamically updates training images, and the company's honor room uses information means to restore historical photos. Zhao Peng told reporters: "Now, officers and men can watch the album at any time, understand the stories behind the photos, and continue to inspire a sense of honor and mission in an immersive educational atmosphere."

As dusk fell, the reporter saw Zhao Peng again. He had just imported the training video of the day into the "Information Window" terminal. The sunset shines through the window and sprinkles on the cover of the "Battle Position Album". An old artillery in the photo echoes the new equipment parked on the training ground.

Reporter's Notes

Light and shadow as a pen, struggle leaves traces

■Liu Min

When I came to the company for an interview and heard the "Battle Position Album" for the first time, I couldn't help but be curious: What meaning does the word "battle position" give to this album?

Opening the album, two soldiers stood guard at their posts while thousands of lights were shining brightly; under the chassis of the equipment, an old soldier was concentrating on troubleshooting; in the afterglow of the setting sun, a small team carried cables on their shoulders and walked to their battle positions with firm steps; at the gun-awarding ceremony, the recruits looked firm and swore loudly...

Freeze the wonderful moments and show the charging posture. When seeing the photos, the reporter was attracted by this vigorous and upward force. These moments are not earth-shattering events, but they make us feel a different kind of power - creating extraordinary things in the ordinary is also a kind of charge?

Closing the album, the reporter had a lot of thoughts in his mind: Today's struggle footprints are all writing new history. Just like when we see black and white photos of the war years, we are always inspired by the spirit of the martyrs who overcame difficulties and bravely moved forward. The company officers and men look through this "battle position album" every day, and they will definitely be able to draw valuable spiritual wealth from it.

Every charge is worth remembering. A charge does not always mean rushing with weapons in mouth or capturing cities. It can be an offensive posture, the strength of struggle, or the pulse of youth and the indomitable fighting spirit, just like the officers and men of the anti-aircraft artillery company who always have a fiery heart of progress.

第 81 集团军某旅引导机关干部压实责任提升帮建质效

来源：解放军报 作者：杨世伟 宋子洵 责任编辑：郭妍菲 2025-04-15

第八十一集团军某旅引导机关干部持续改进工作作风——

蹲连住班，解决问题是关键

■杨世伟 解放军报记者 宋子洵

不久前，第 81 集团军某旅召开干部蹲连住班总结会。看着手里的问卷调查总结表，不少机关科室领导感到脸上火辣辣的。表格显示，基层官兵对机关科室的工作，提出了指导帮带少、工作不到底等问题。

总结会结束后，该旅机关科室迅速分头召开专题会议，针对本科室存在的问题，逐项剖析、检视反思，研究制订改进措施、明确整改时限和相关负责人。

"坚持问题导向、改进工作作风，是我们提升抓建基层质效的一项重要举措。"该旅领导介绍，前期，他们在调研中发现，个别机关部门存在以会议抓落实等现象，导致了解基层浮于表面、帮建基层流于形式。

"只有切实端正态度、改进作风，才能实现机关基层'双向奔赴'。"今年以来，该旅党委对照问题检视反思，建立"常委分片负责、机关联合负责、主官全面负责、官兵按职负责"工作机制，形成"一级一岗定责任、一事一物明责任"工作链路，持续改进机关工作作风，切实发挥指导帮建作用。

“深入基层是解决基层问题的好办法。”相关工作机制建立后，该旅机关系统梳理形成基层问题清单，遴选机关干部带着问题深入营连蹲点，与基层官兵共同破解难题。

得知机关干部要到基层蹲点帮建，某连姜指导员带着官兵提前做足准备工作。然而，前来蹲点的机关干部没有坐在办公室看材料，而是融入连队训练、生活，实打实摸情况、想对策。在此过程中，这名蹲点干部主动找到姜指导员，围绕连队面临的突出问题碰撞思想火花，理清抓建思路、优化抓建方案，受到连队官兵好评。

该旅领导告诉记者，为持续改进工作作风，他们建立”一级帮一级”制度，并将挂钩帮建情况纳入年度考评，压实帮建责任，提升帮建质效。

帮建过程中，他们还帮助基层单位进一步做好”三大组织”联建联创，畅通民主渠道，广泛开展”我为单位建设献一计”等活动，让官兵更直接、更有效地参与基层建设，真正将工作指导落实到末端。

蹲连住班，解决问题是关键。最近，该旅机关修订完善《为兵服务手册》，持续推动解决家属楼改造、晾衣房建设等官兵关注度较高的实际问题，大家幸福感、归属感明显增强，对机关工作的满意度持续提升。

A Brigade of the 81st Group Army Guides Cadres to Strengthen Their Responsibilities and Improve the Quality and Effectiveness of Assistance

Source: PLA Daily Author: Yang Shiwei Song Zixun Editor: Guo Yanfei 2025-04-15

A brigade of the 81st Group Army guides cadres to continuously improve their work style——

Living in the company, solving problems is the key

■ Yang Shiwei PLA Daily reporter Song Zixun

Not long ago, a brigade of the 81st Group Army held a summary meeting for cadres in the company. Looking at the questionnaire summary form in their hands, many leaders of the department felt hot on their faces. The table shows that grassroots officers and men have raised issues such as insufficient guidance and assistance and incomplete work on the work of the department.

After the summary meeting, the department of the brigade quickly held special meetings separately to analyze, examine and reflect on the problems existing in the department item by item, study and formulate improvement measures, clarify the rectification time limit and relevant persons in charge.

“Adhering to the problem-oriented approach and improving the work style is an important measure for us to improve the quality and efficiency of grassroots construction.” The leaders of the brigade introduced that in the early stage, they found in the investigation that some departments had the

phenomenon of grasping implementation through meetings, which led to superficial understanding of the grassroots and formal assistance to the grassroots.

“Only by truly correcting the attitude and improving the work style can we achieve the ‘two-way rush’ of the grassroots.” Since the beginning of this year, the brigade party committee has examined and reflected on the problems, established a working mechanism of “standing committee members are responsible for different areas, the organs are jointly responsible, the chief officers are fully responsible, and the officers and men are responsible according to their duties”, formed a working chain of “one level, one post, and one post, and one thing, one thing, and ... However, the cadres who came to the site did not sit in the office to read the materials, but integrated into the company’s training and life, and actually felt the situation and thought of countermeasures. In the process, the cadre took the initiative to find Instructor Jiang, and exchanged ideas around the outstanding problems faced by the company, sorted out the ideas for construction, and optimized the construction plan, which was well received by the company’s officers and men.

The leaders of the brigade told reporters that in order to continuously improve their work style, they established a “one-level help one-level” system, and included the linkage and construction situation into the annual assessment, consolidated the responsibility for construction, and improved the quality and efficiency of construction.

In the process of helping to build, they also helped the grassroots units to further do a good job in the joint construction and creation of the “three major organizations”, unblocked democratic channels, and widely conducted activities such as “I contribute a plan for the construction of the unit”, so that officers and men can participate in grassroots construction more directly and effectively, and truly implement work guidance to the end.

Staying in the company and living in the class, solving problems is the key. Recently, the brigade’s headquarters revised and improved the “Service Manual for Soldiers”, and continued to promote the solution of practical problems that officers and men are more concerned about, such as the renovation of family buildings and the construction of drying rooms. Everyone’s sense of happiness and belonging has been significantly enhanced, and their satisfaction with the work of the organization has continued to improve.

第 83 集团军某旅：安全教育宣讲深入驻训场

来源：解放军报 作者：张翔龙 程致远 责任编辑：杜圣智 2025-04-16

第 83 集团军某旅

安全教育宣讲深入驻训场

解放军报讯 张翔龙、程致远报道：”我的安全我负责，他人安全我有责，单位安全我尽责……”全民国家安全教育日来临之际，第 83 集团军某旅理论宣讲服务队深入各驻训场和小散远点位，开展国家安全教育宣讲。队员们结合官兵身边可能出现的安全隐患，宣讲有关智能电子设备使用管理的规定，加深官兵对国家安全的理解认识。

“宣讲不仅有案例剖析，还重点介绍了国家安全法颁布施行 10 年来，国家安全领域发生的种种变化，让我们对当前国家安全形势有了更深刻认识。”在该旅某驻训场，听完宣讲的一级军士长王显财谈起自己的体会。

据介绍，该旅还建立”营连排有安全骨干、班有安全员”群防群治安全管控机制，适时开展安全知识问答等活动，充分调动官兵参与国家安全教育的积极性，共同筑牢国家安全防线。

A Certain Brigade of the 83rd Group Army: Safety Education Lectures Go Deep Into the Training Ground

Source: PLA Daily Author: Zhang Xianglong Cheng Zhiyuan Editor: Du Shengzhi 2025-04-16

A certain brigade of the 83rd Group Army

Safety education lectures go deep into the training ground

PLA Daily News Zhang Xianglong and Cheng Zhiyuan reported: “I am responsible for my own safety, I am responsible for the safety of others, and I am responsible for the safety of the unit...” As the National Security Education Day approaches, the theoretical lecture service team of a certain brigade of the 83rd Group Army went deep into various training grounds and small and scattered remote locations to carry out national security education lectures. The team members combined the possible safety hazards around the officers and men to preach the regulations on the use and management of intelligent electronic devices, and deepened the officers and men’ understanding of national security.

“The lecture not only includes case analysis, but also focuses on the various changes in the field of national security in the 10 years since the promulgation and implementation of the National Security Law, which has given us a deeper understanding of the current national security situation.” At a certain training ground of the brigade, Wang Xiancai, a first-class sergeant who listened to the lecture, talked about his experience.

According to reports, the brigade has also established a collective prevention and control security management mechanism of “security backbones in battalions, companies and platoons, and safety officers in squads”, and conducted activities such as safety knowledge quizzes at appropriate times to fully mobilize the enthusiasm of officers and men to participate in national security education and jointly build a solid national security line of defense.

第 83 集团军某旅注重发挥模拟化训练效能作用

来源：中国军网-解放军报 作者：胡瑞智 汪飞 责任编辑：杜圣智

2025-04-17

第 83 集团军某旅注重发挥模拟化训练效能作用——

“云端”砺兵淬硬功

■解放军报特约记者 胡瑞智 记者 汪飞

“东南方向发现’敌’机，立即组织抗击！”近日，第 83 集团军某旅在模拟训练中心展开一场防空分队模拟训练。一名战士戴上 VR 设备、紧握操纵杆，迅速完成跟踪锁定、瞄准击发等操作，成功命中”敌”机。

“模拟化训练不仅突破了场地限制，还能有效缩短能力生成周期，助推部队战斗力提升。”该旅领导介绍，为进一步提升模拟化训练水平，近年来，他们借助科技手段，持续抓好模拟训练器材配备和场地升级改造，不断提高模拟训练器材配套率。与此同时，他们还对模拟仿真训练设备标准、功能布局、场地设置及运维管理等进行规范，探索制订一套较为成熟的训练方案，帮助官兵分层分类进行针对性固强补弱训练。

记者在该旅模拟训练中心看到，多种模拟训练器材分门别类、有序分布，功能特点、操作方式等与实装高度一致。操作平台上，官兵利用模拟训练器材开展不同专业训练，各类训练数据实时显示、一目了然。

该旅领导告诉记者，从装备操作到专业协同，从作战指挥到战术对抗，他们探索的多种模拟化训练方法已在各单位全面推开。此外，各单位按照旅队制订的训练标准，依托模拟训练中心强化基础训练，走开”新手全面普训、尖子升级精训、分层重点强训”的组训路子，有效夯实部队战斗力基础。

“发现’敌’坦克，迅速歼灭！”采访期间，该旅某营在模拟训练中心组织了一场协同训练。发现目标后，步战车驾驶员迅速占据有利位置，炮兵快速瞄准击发，侦察兵操控无人机实时评估毁伤效果，随后工兵分队前出清理受阻道路……训练中，各专业官兵高效协同、一体联动，模拟战场”硝烟扑面”。

“模拟训练系统能存储参训官兵训练数据，帮助大家准确分析训练中暴露的短板不足。”教练员徐宏伟告诉记者，他们在狠抓模拟化训练基础上，还将官兵日常训练成绩录入模拟训练系统，精准分析其阶段性训练成效，为下一步专攻精练找准方向。

“云端”砺兵淬硬功，实训场上显身手。近年来，该旅紧贴使命任务拓展深化科技练兵，先后圆满完成高原驻训、战斗力检验评估等任务。该旅领导表示，他们将持续优化整合资源，坚持模拟化训练和实战实训同步推进，不断提升部队战斗力建设水平。

A Brigade of the 83rd Group Army Focuses on the Effectiveness of Simulation Training

Source: China Military Network-People’s Liberation Army Daily Author: Hu Ruizhi Wang Fei Editor: Du Shengzhi

2025-04-17

A brigade of the 83rd Group Army focuses on the effectiveness of simulation training-

“Cloud” soldiers tempering skills

■People’s Liberation Army Daily Special Correspondent Hu Ruizhi Reporter Wang Fei

“If an ‘enemy’ aircraft is found in the southeast direction, immediately organize a fight!” Recently, a brigade of the 83rd Group Army launched a simulation training of an air defense unit at the simulation training center. A soldier put on VR equipment, held the joystick tightly, and quickly completed tracking, locking, aiming and firing operations, and successfully hit the “enemy” aircraft.

“Simulation training not only breaks through the venue restrictions, but also effectively shortens the capability generation cycle and promotes the improvement of the combat effectiveness of the troops.” The leaders of the brigade introduced that in order to further improve the level of simulation training, in recent years, they have used scientific and technological means to continuously grasp the equipment of simulation training equipment and the upgrading and transformation of venues, and continuously improve the matching rate of simulation training equipment. At the same time, they also standardized the standards, functional layout, site settings and operation and maintenance management of simulation training equipment, explored and formulated a relatively mature training plan to help officers and men to carry out targeted strengthening and strengthening training in a layered and classified manner.

The reporter saw at the brigade’s simulation training center that a variety of simulation training equipment was classified and distributed in an orderly manner, and the functional characteristics and operation methods were highly consistent with the actual equipment. On the operating platform, officers and men used simulation training equipment to carry out different professional training, and various training data were displayed in real time and clearly.

The brigade leaders told reporters that from equipment operation to professional coordination, from combat command to tactical confrontation, the various simulation training methods they explored have been fully implemented in various units. In addition, in accordance with the training standards formulated by the brigade, each unit relied on the simulation training center to strengthen

basic training, and took the training path of "comprehensive general training for novices, upgrading and intensive training for top students, and layered and focused training" to effectively consolidate the combat effectiveness of the troops.

"Discover the 'enemy' tank and quickly annihilate it!" During the interview, a battalion of the brigade organized a coordinated training at the simulation training center. After discovering the target, the driver of the infantry fighting vehicle quickly took a favorable position, the artillery quickly aimed and fired, the scout controlled the drone to evaluate the damage effect in real time, and then the engineering team went forward to clear the blocked road... During the training, officers and men of various professions worked together efficiently and worked together as a whole, simulating the battlefield "smoke and smoke".

"The simulation training system can store the training data of the participating officers and men, helping everyone to accurately analyze the shortcomings exposed in the training." Coach Xu Hongwei told reporters that on the basis of focusing on simulation training, they also entered the daily training results of officers and men into the simulation training system, accurately analyzed their phased training results, and found the right direction for the next step of specialization and training.

"Cloud" soldiers temper their skills and show their skills on the actual training field. In recent years, the brigade has closely followed the mission and tasks to expand and deepen scientific and technological training, and has successfully completed tasks such as plateau training and combat effectiveness inspection and evaluation. The leaders of the brigade said that they will continue to optimize and integrate resources, insist on the simultaneous advancement of simulation training and actual combat training, and continuously improve the level of combat effectiveness of the troops.

第 78 集团军某旅"百战百胜第三营"：以胜利续写荣光

来源：解放军报 作者：张光轩 陈浩煜 责任编辑：郭妍菲 2025-04-17

第 78 集团军某旅"百战百胜第三营"——

以胜利续写荣光

■张光轩 陈浩煜

在第 78 集团军某旅，有这样一支英雄的先锋营队。作为为数不多拥有八路军和新四军血脉的红军营，他们历经大小战役战斗千余次，屡立战功，将对胜利的不懈追求沉淀为文化品格，融入精神血脉。

1942 年 11 月的佃湖战斗中，该营前身部队先烈英勇顽强，浴血奋战，击毙日寇第 17 师团联队长，还缴获了日军”扫荡”苏北根据地的作战计划和地图，为新四军反”扫荡”斗争提供重要情报。战后，该营被新四军第 3 师授予”百战百胜第三营”锦旗。

80 余年来，一茬茬官兵高擎”百战百胜第三营”战旗，用一场场胜利续写荣光。日前，我们来到这支英雄营队，探寻官兵的胜战足迹。

抗美援朝老兵李维波（右二）为官兵讲述战斗故事。 作者提供

一

走进该营荣誉室，一面挂着地图的墙体引起我们注意。地图上插满了密密麻麻的”红旗”，连接着纵横的标注线——这是 3 营的”胜战足迹”，也是官兵心中的”精神高地”。

1949 年，年仅 16 岁的刘广武作为该营 7 连司号员，随连队参加解放镇南关的战斗。战斗打响后，敌人凭借坚固工事负隅顽抗，敌我双方战斗渐渐进入胶着状态。

“吹冲锋号！”关键时刻，连长一声令下。刘广武不惧生死，迅速前出至阵地最前沿，在枪林弹雨中吹起了冲锋号。

2021 年，该营干部辛鹏等人远赴新疆，探望刘老。刘老拉着辛鹏的手，好像有说不完的话：”炮火连天的战场上，战旗伴着我的军号声飘扬。战友们势不可挡，令敌人闻风丧胆。”

一声声冲锋的号角，承载着他们不可阻挡的勇敢顽强：解放天津战斗中，7 连官兵以伤亡大半的代价，快速完成爆破和架桥任务，保证主力部队顺利进城；抗美援朝战争中，7 连 4 班与数倍于己之敌激战 4 昼夜，用生命守住阵地，被志愿军总部授予”坚守二二二点九高地一级英雄班”锦旗，记集体特等功……

辛鹏带回了老兵讲述的故事，将一个个”红旗”标记在地图上。

地图前，二级上士李向前自豪地指向首都北京，告诉我们，那里有属于他的难忘记忆。

2019 年国庆 70 周年阅兵仪式前，李向前作为擎旗手，带着”百战百胜第三营”战旗来到首都北京，准备接受最终考核。

军姿静站 3 小时，是一场无声的较量。”3 营的兵绝不认输。”李向前瘦削的脸颊上，咬肌微微隆起。凭借顽强信念，他成功坚持到考核结束的哨声响起。最终，他将这面旗帜带上阅兵场，光荣接受了党和人民的检阅。

二

山川尚在梦中，士兵已经醒来。

起床号音还未响，二级上士王述斌便已穿戴装具前往车场，为一天的训练作准备。

寒风骤起。训练场一隅，王述斌紧锣密鼓地一遍遍测试装备通联状况，直到所有装备通联情况良好。此时，连队已在前往训练场的路上。

为什么提前这么早到训练场？王述斌的回答很朴实：”这样连队一来就能训练，不耽误时间。”

紧迫感，源于强烈的责任感。几年前，该营列装数字化新型装备，半年后就要接受上级的检验。

那段时间，面对无教学训练骨干、无经验借鉴、无训练器材的困难，从营主官到普通战士，个个签下任务书。冒着酷暑钻战车，向装备厂家技术人员讨教，官兵边实践、边总结、边完善，不断摸索新训法、新打法……

“时间是公平的。谁能抢出时间强化适应战场的能力，谁就能在’那一天’到来时，拥有更多底气。”该营郝营长说。近年来，他们常态化开展战备教育，不断增强官兵紧迫感。大家形成一个共识：想要百战百胜，就要始终比对手站得高、看得远。

在这样的清醒与警醒中，3 营的训练计划上，每一页都写满了”弓满弦张”的日子。

那年底，他们完成马里维和任务归建后，新的陆军军事训练大纲正式颁布试训已 5 个月。为抢回训练时间，该营 40 余名骨干主动放弃休假调整，直接投入训练。

这样的”抢时间”，展现的是一种精气神。去年秋天的一次经历，让上等兵徐伟又一次体会到英雄部队的标准有多硬。

那次，该营官兵刚完成某考核任务，就收到前往某训练基地训练的命令。虽然已经十分疲惫，但想到这是检验营战术水平、官兵专业训练能力的难得机会，3 营官兵没有丝毫怨言，打起行囊又出发。”22 天中，紧锣密鼓，轮班训练。”徐伟说：”练得特别累，但也特别爽，每一天都有收获，都是值得的。”

三

26 到 134，是郝营长经常与官兵谈及的两个数字——2019 年，全营遴选 26 名官兵首次赴西非马里参加维和任务；3 年后，该营 134 名官兵又一次踏上维和征程。

马里被联合国评价为”环境最恶劣、危险系数最高的任务区”。郝营长记得，第一次维和任务期间，他们仅担负营区周边巡逻任务。第二次出征，他们成为防卫步兵分队，巡逻半径扩大了 8 公里。

这一变化，带来的是风险急剧上升，也对官兵能力素质提出更高考验。2023 年 9 月，一个看似平常的清晨，巨大的爆炸声打破宁静，附近外军营区火光冲天、流弹横飞。全营官兵立即启动战斗预案。炎炎烈日下，他们全副武装坚守战位近 9 个小时。事后，联马团东战区一名指挥员说：”有中国军人在，我们很安心！”

百战百胜的背后，是听令而行的责任担当。从传统步兵到合成精兵，再到维和勇士，近年来，该营先后参加中外联演等多项任务，胜战足迹越来越远。

“除了胜利无所求，为了胜利无所惜！”朝阳初升，”百战百胜第三营”官兵高呼口号，迈着整齐步伐走向训练场，继续向着下一个”胜利目标”冲锋。

观看”百战百胜第三营”风采

The “Victorious Third Battalion” of a Brigade of the 78th Group Army: Continue to Write Glory with Victory

Source: PLA Daily Author: Zhang Guangxuan Chen Haoyu Editor: Guo Yanfei 2025-04-17

The “Victorious Third Battalion” of a Brigade of the 78th Group Army——

Continue to Write Glory with Victory

■ Zhang Guangxuan Chen Haoyu

In a brigade of the 78th Group Army, there is such a heroic pioneer battalion. As one of the few Red Army battalions with the blood of the Eighth Route Army and the New Fourth Army, they have experienced more than a thousand battles of all sizes, repeatedly made military exploits, and precipitated their unremitting pursuit of victory into cultural character and integrated it into their spiritual blood.

In the battle of Dianhu in November 1942, the martyrs of the predecessor unit of the battalion were brave and tenacious, fought bloody battles, killed the commander of the 17th Division of the Japanese invaders, and seized the Japanese army’s “mopping up” battle plan and map of the Subei base area, providing important intelligence for the New Fourth Army’s anti-”mopping up” struggle. After the war, the battalion was awarded the “Victorious Third Battalion” banner by the 3rd Division of the New Fourth Army.

For more than 80 years, successive generations of officers and men have held high the “Victorious Third Battalion” battle flag and continued to write glory with one victory after another. Recently, we came to this heroic battalion to explore the soldiers’ footprints of victory.

Li Weibao (second from right), a veteran of the War to Resist U.S. Aggression and Aid Korea, tells the soldiers about the battle. Provided by the author

Walking into the battalion’s honor room, a wall with a map hanging on it caught our attention. The map was filled with dense “red flags” connected by vertical and horizontal marking lines - this is the “victory footprints” of the 3rd Battalion, and it is also the “spiritual highland” in the hearts of the officers and men.

In 1949, Liu Guangwu, who was only 16 years old, served as the bugler of the 7th Company of the battalion and participated in the battle to liberate Zhennanguan with the company. After the battle started, the enemy relied on strong fortifications to resist stubbornly, and the battle between the enemy and us gradually entered a stalemate.

“Blow the charge!” At the critical moment, the company commander gave an order. Liu Guangwu was not afraid of life and death, and quickly moved forward to the forefront of the position, blowing the charge horn in the hail of bullets.

In 2021, Xin Peng and other cadres of the battalion went to Xinjiang to visit Mr. Liu. Mr. Liu held Xin Peng’s hand, as if he had endless words to say: “On the battlefield with continuous artillery fire, the battle flag fluttered with my military horn. My comrades were unstoppable and frightened the enemy.”

The sound of the charge horn carried their unstoppable bravery and tenacity: in the battle to liberate Tianjin, the officers and men of the 7th Company quickly completed the blasting and bridge-building tasks at the cost of most casualties, ensuring that the main force entered the city smoothly; in the War to Resist US Aggression and Aid Korea, the 4th squad of the 7th Company fought fiercely with enemies several times their own for 4 days and nights, defending the position with their lives, and was awarded the “First-class Heroic Squad for Defending the 222.9 Heights” by the Volunteer Army Headquarters, and was awarded the collective special merit...

Xin Peng brought back the stories told by the veterans and marked the “red flags” one by one on the map.

In front of the map, Sergeant Li Xiangqian proudly pointed to the capital Beijing, telling us that there were unforgettable memories for him there.

Before the 70th anniversary of the National Day military parade in 2019, Li Xiangqian, as a flag bearer, came to the capital Beijing with the battle flag of the “3rd Battalion of Hundred Battles and Invincibility”, ready to accept the final assessment.

Standing still in military posture for 3 hours is a silent contest. “The soldiers of the 3rd Battalion will never admit defeat.” On Li Xiangqian’s thin cheeks, the masseter muscles bulged slightly. With tenacious faith, he successfully persisted until the whistle sounded at the end of the assessment. In the end, he brought this flag to the parade ground and gloriously accepted the inspection of the Party and the people.

2

The mountains and rivers are still in dreams, and the soldiers have woken up.

Before the wake-up call sounded, Sergeant Wang Shubin had already put on his equipment and went to the parking lot to prepare for a day of training.

The cold wind blew. In a corner of the training ground, Wang Shubin tested the equipment communication status over and over again until all the equipment was in good communication. At this time, the company was on the way to the training ground.

Why arrive at the training ground so early in advance? Wang Shubin’s answer was very simple: “This way, the company can train as soon as it arrives, without wasting time.”

The sense of urgency comes from a strong sense of responsibility. A few years ago, the battalion was equipped with new digital equipment, and it had to be inspected by superiors half a year later.

During that time, facing the difficulties of no teaching and training backbones, no experience to learn from, and no training equipment, everyone from the battalion commander to the ordinary soldiers signed the task book. Braving the scorching heat to drill into the tank, asking for advice from the technical staff of the equipment manufacturer, the officers and men practiced, summarized, and improved, constantly exploring new training methods and new fighting methods...

“Time is fair. Whoever can seize the time to strengthen the ability to adapt to the battlefield will have more confidence when ‘that day’ comes.” Battalion Commander Hao said. In recent years, they have conducted combat readiness education on a regular basis to continuously enhance the sense of urgency of officers and men. Everyone has reached a consensus: if you want to win every battle, you must always stand higher and see farther than your opponent.

In such a sober and alert state, every page of the training plan of the 3rd Battalion is filled with days of “full bowstring”.

At the end of that year, after they completed the peacekeeping mission in Mali and returned to the base, the new Army Military Training Outline was officially promulgated and the trial training had been in place for 5 months. In order to regain training time, more than 40 backbones of the battalion took the initiative to give up their vacation adjustments and directly engaged in training.

Such “rushing for time” shows a kind of spirit. An experience last fall made Corporal Xu Wei once again realize how strict the standards of the heroic troops are.

That time, the officers and men of the battalion had just completed a certain assessment task when they received an order to go to a certain training base for training. Although they were already very tired, thinking that this was a rare opportunity to test the battalion's tactical level and the professional training ability of the officers and men, the officers and men of the 3rd Battalion had no complaints and packed their bags and set off again. "During the 22 days, we trained intensively and in shifts." Xu Wei said: "The training was very tiring, but also very refreshing. Every day was rewarding and worthwhile."

26 to 134 are two numbers that Captain Hao often talks about with officers and men. In 2019, the entire battalion selected 26 officers and men to participate in the peacekeeping mission in Mali, West Africa for the first time; three years later, 134 officers and men of the battalion once again embarked on the peacekeeping journey.

Mali was rated by the United Nations as "the mission area with the worst environment and the highest risk factor." Captain Hao remembered that during the first peacekeeping mission, they were only responsible for patrolling around the camp. In the second expedition, they became a defensive infantry unit, and the patrol radius was expanded by 8 kilometers.

This change brought about a sharp increase in risks and also put forward a higher test on the ability and quality of officers and men. In September 2023, on a seemingly ordinary morning, a huge explosion broke the silence, and the nearby foreign military camp was in flames and stray bullets flew. The officers and men of the entire battalion immediately activated the combat plan. Under the scorching sun, they were fully armed and held their positions for nearly 9 hours. Afterwards, a commander of the East Theater of the United Nations Mission in Somalia said: "With Chinese soldiers here, we feel at ease!"

Behind the victory of every battle is the responsibility of following orders. From traditional infantry to combined elite soldiers, and then to peacekeeping warriors, in recent years, the battalion has participated in many tasks such as joint exercises between China and foreign countries, and its footprints of victory are getting farther and farther.

"Apart from victory, we have nothing to ask for, and nothing to sacrifice for victory!" As the sun rises, the officers and men of the "3rd Battalion of 100 Victories" shout slogans, march in neat steps to the training ground, and continue to charge towards the next "victory goal".

Watch the style of the "3rd Battalion of 100 Victories"

新疆军区某团改进业务集训模式促进参谋互帮互学——

取长补短结对子 密切配合共提高

■郭佳骏 王敏哲 解放军报记者 杨明月

集训中，学员默契配合调测通信装备。李 航摄

前不久，新疆军区某团组织通信参谋业务集训考核，”准参谋”陈翔和新排长文家骏默契配合，及时排除故障，在规定时限内完成电子标图，取得小组第一的好成绩，考核组对他们的表现给予好评。

这次集训不仅涵盖参谋业务基础技能，还聚焦多种通信业务，涉及要素多、范围广。该团参谋长说，一些参加集训的基层排长和预选参谋，因任职经历不同，专业领域各有所长，在多要素协同的任务实践中有时配合不佳，影响任务进程，”陈翔和文家骏就有这么一段典型经历”。

此前一次摸底考核，文家骏作为新排长经历毕业联考不久，对于作战标图等参谋基础技能掌握较好，成绩排名靠前。而陈翔是从该团保送提干的战士学员，对参谋基础技能知识掌握不深，成绩不够理想。

但在机动通信专业岗位上，陈翔实操经验丰富。一次训练，教练员组织拟制多通信要素编组联训计划，陈翔结合自身经历进行作业讲评，获得了教练员肯定。而文家骏由于实操经验较少，不熟悉业务处置流程，作业质量不高。

看到差距不足，文家骏和陈翔决心尽快补足短板，在下次考核中一较高下，于是都开始加班加点学习强能。

不久后的一次周考，集训学员要以小组为单位进行编组联训，不仅要绘制业务流程图，还需相互配合完成业务引导对接。特点鲜明的两人受到关注，教练员安排他俩成为同组队友。

可在考核中，他们缺乏配合，各自为战，导致成绩垫底。

“执行任务讲究要素协同，队友之间只有取长补短密切配合，才能完成好任务。”复盘讲评时，教练员的话让两人都低下了头，”作为一个集体的队友，首先要统一思想、形成合力，彼此取长补短，这样才能共同进步，完成好任务。”

在教练员帮带下，他俩开始主动在学习和训练中互帮互教。

“以往集训，参谋业务和通信业务划分得很清楚。有官兵反馈，个别集训干部在调整到参谋岗位后，对一些通信要素仍然掌握不深，协同意识也不强。”团作训股股长说，此次集训既要帮助年轻干部补齐专业短板，也要让他们尽早养成体系协同思维。

集训中，他们首先根据学员能力水平进行分组，依据每周考核成绩评估学员的长处短板，按照能力互补思路，安排小组成员结成对子；结合学员专业不同的实际，在组织通信专业训练时，安排不同通信分队学员结成训练”搭子”，引导他们在训练中熟悉彼此专业、查找自身不足；定期组织优秀学员授课，交流分享经验的同时锻炼教学能力，受训结束回到连队能胜任”小教员”……

从各自为战到结对帮带，从相互较劲到相互配合。文家骏和陈翔的变化，也同样发生在其他参训学员身上。

排长孙荣和新排长王军成是同一所军校毕业的师兄弟，从摸底考核开始两人就相互比拼，然而到了学习通信专业内容时，王军成比起师兄总是差点火候。一次，两人参与通信车组的通联考核，王军成因为缺乏操作经验，始终无法完成通联调测，眼看时间不多，孙荣及时赶到排除故障，两人最终顺利通过考核。

“一个简单的竖大拇指点赞动作，看似只有大拇指突出，实则离不开另外四根指头的协调配合。”考核结束，孙荣告诉身边战友，多要素协同配合也是如此，把自身本领练过硬的同时，要学会团结协作，这样才能攥指成拳，形成合力。

该团领导告诉记者，下一步，他们将围绕多要素融合设置 20 余项考核内容，结合岗位实际加强任务牵引，引导学员在训练任务中找差距、补短板、强协同，尽快提升岗位履职能力。

短 评

补齐短板出战斗力

■张锋涛

“短板效应”启示我们，木桶能盛多少水，不是由最长的木板决定，而是由最短的木板决定。无论是部队战斗力的发挥，还是个人能力素质的进步，都不能有明显短板。新疆军区某团改进参谋业务集训模式，帮助年轻干部查找并补齐能力短板，既有利于个人成长进步，也利于部队战斗力提升。

现代战争是体系与体系的对抗，作战体系既可能出现”1+1>2”的合力优势，也可能存在”100-1=0”的致命软肋。作战体系中的每一个作战单元、每一个作战要素，都是作战行动中不可或缺的力量，一旦某一要素或单元存在短板，就无法充分发挥作战体系优势，甚

至产生严重后果。各部队要注重从”官之初”“兵之初”“训之初”就帮助官兵提升思想认识、强化协同意识、补足自身弱项，这样才能变短板为长板，促量变为质变，加快部队体系作战能力生成。

During the training, the trainees cooperated tacitly to adjust and test the communication equipment. Photo by Li Hang

Not long ago, a regiment of the Xinjiang Military Command [District] organized a functional department training assessment for communication staff. “Quasi-staff” Chen Xiang and the new platoon leader Wen Jiajun cooperated tacitly, eliminated faults in time, and completed the electronic mapping within the specified time limit, achieving the first place in the group. The assessment team praised their performance.

This training not only covers the basic skills of staff functional department, but also focuses on a variety of communication functional department, involving many elements and a wide range. The chief of staff of the regiment said that some grassroots platoon leaders and pre-selected staff who participated in the training camp sometimes did not cooperate well in the practice of multi-element coordinated tasks due to their different work experience and their strengths in their professional fields, which affected the progress of the task. “Chen Xiang and Wen Jiajun had such a typical experience.”

In a previous survey assessment, Wen Jiajun, as a new platoon leader, had just experienced the graduation joint examination. He had a good grasp of basic staff skills such as combat mapping and ranked high in the results. However, Chen Xiang was a soldier trainee recommended for promotion from the regiment. He did not have a deep grasp of the basic skills and knowledge of staff, and his results were not ideal.

However, in the professional position of mobile communications, Chen Xiang has rich practical experience. During a training session, the coach organized the drafting of a joint training plan for multiple communication elements. Chen Xiang combined his own experience to comment on the work and was affirmed by the coach. However, Wen Jiajun had little practical experience and was not familiar with the functional department handling process, so the quality of his work was not high.

Seeing the gap, Wen Jiajun and Chen Xiang were determined to make up for the shortcomings as soon as possible and compete in the next assessment, so they both started to work overtime to learn to strengthen their abilities.

In a weekly test not long after, the trainees had to conduct joint training in groups. They not only had to draw functional department process diagrams, but also had to cooperate with each other to complete functional department guidance docking. The two people with distinct characteristics attracted attention, and the coach arranged them to be teammates in the same group.

However, in the assessment, they lacked cooperation and fought alone, resulting in the bottom score.

“The execution of tasks requires the coordination of elements. Only by learning from each other’s strengths and weaknesses and working closely together can the tasks be completed well.” During the review and commentary, the coach’s words made both of them bow their heads, “As a collective teammate, we must first unify our thoughts, form a joint force, learn from each other’s strengths and weaknesses, so that we can make progress together and complete the tasks well.”

With the help of the coach, the two began to take the initiative to help each other in learning and training.

“In previous training, the staff functional department and communication functional department were clearly divided. Some officers and men reported that after individual training cadres were adjusted to staff positions, they still did not have a deep grasp of some communication elements and did not have a strong sense of coordination.” The head of the regiment’s training section said that this training should not only help young cadres make up for their professional shortcomings, but also let them develop system collaborative thinking as soon as possible.

During the training, they first divided the trainees into groups according to their ability levels, evaluated the strengths and weaknesses of the trainees based on the weekly assessment results, and arranged the group members to form pairs according to the idea of complementary abilities; combined with the different majors of the trainees, when organizing the communication professional training, they arranged the trainees from different communication teams to form training “pairs” to guide them to get familiar with each other’s majors and find their own shortcomings during the training; regularly organized excellent trainees to give lectures, exchange and share experiences while exercising their teaching abilities, and after the training, they returned to the company to be competent as “small instructors”...

From fighting alone to pairing up to help each other, from competing with each other to cooperating with each other. The changes of Wen Jiajun and Chen Xiang also happened to other trainees.

Platoon leader Sun Rong and new platoon leader Wang Juncheng are brothers who graduated from the same military academy. They have been competing with each other since the basic assessment. However, when it comes to learning the content of the communication major, Wang Juncheng is always a little behind his senior brother. Once, two people participated in the communication assessment of the communication vehicle group. Wang Juncheng was unable to complete the communication adjustment due to his lack of operating experience. Seeing that time was running out, Sun Rong arrived in time to troubleshoot the problem, and the two finally passed the assessment smoothly.

“A simple thumbs-up gesture seems to only have the thumbs protruding, but in fact it is inseparable from the coordination and cooperation of the other four fingers.” After the assessment, Sun Rong told his comrades around him that the coordination of multiple factors is also the same. While practicing their own skills, they must learn to unite and cooperate, so that they can clench their fingers into a fist and form a joint force.

The leaders of the regiment told reporters that in the next step, they will set up more than 20 assessment contents around the integration of multiple factors, strengthen task traction in combination with the actual position, guide the trainees to find gaps, make up for shortcomings, and strengthen coordination in training tasks, so as to improve their job performance as soon as possible.

Short Review

Filling up the shortcomings to produce combat effectiveness

■ Zhang Fengtao

The “short board effect” tells us that how much water a wooden barrel can hold is not determined by the longest board, but by the shortest board. Whether it is the performance of the combat effectiveness of the troops or the improvement of personal ability and quality, there should be no obvious shortcomings. A regiment of the Xinjiang Military Command [District] has improved the staff training model to help young cadres find and make up for their shortcomings, which is beneficial to personal growth and progress, as well as to the improvement of the combat effectiveness of the troops.

Modern warfare is a confrontation between systems. The combat system may have the combined advantage of “1+1>2” or the fatal weakness of “100-1=0”. Every combat unit and every combat element in the combat system is an indispensable force in combat operations. Once a certain element or unit has shortcomings, the advantages of the combat system cannot be fully utilized, and even serious consequences may occur. All troops should focus on helping officers and men

improve their ideological understanding, strengthen their sense of coordination, and make up for their own weaknesses from the “beginning of officers”, “beginning of soldiers”, and “beginning of training”. Only in this way can we turn shortcomings into strengths, promote quantitative changes to qualitative changes, and accelerate the generation of combat capabilities of the troop system.

军营观察丨合成训练：“答题”思路在刷新

来源：中国军网-解放军报 作者：于云之 宋世杰 刘仁浩 邹维亮 责任编辑：王一亘 发布：2025-04-18

合成训练：”答题”思路在刷新

■于云之 解放军报特约记者 宋世杰 特约通讯员 刘仁浩

陆军某旅组织训练。图为侦察分队官兵抵近侦察。黄瑞摄

深夜，陆军某旅作战研究室内，键盘敲击声不绝于耳。机关参谋们坐在电脑前，为训练计划的拟制集思广益。屏幕上，数个色彩缤纷的色块赫然在目，标记出此次计划中涉及的不同军兵种力量。

“增加新质力量训练比重，加速联合指挥层级下沉……”拿到最新下发的训练计划，某营袁营长惊喜地发现，计划中的合成训练方向，似乎与自己 3 年前那篇有些”超前”的联合训练课题论文产生了共振。与此同时，指挥信息系统中”新鲜出炉”的 10 余个作战预案，同样澎湃着体系融合的强大动能。

为强军事业不懈奋斗的征程上，该旅官兵认识到，部队合成训练正在联合作战的背景图下发生深刻演变。他们也深深知道，作为战场上不可或缺的作战角色，他们必须坚守在各自战位，用实际行动答好这份来自未来战场的考卷。

“兵马炮”跨域入阵，”自绊马腿”却频频上演——

战场背景图不断切换，合成训练首先要更换”审题”视角

合成营进攻战斗，并不是一个新课题，但再次走上演训场，陆军某旅某营首席参谋王参谋没想到——同样一道考题，由于加入一种新的作战力量，解答过程就变得截然不同。

那次训练，该营侦察编组无人机操作员崔志和装甲步兵连无人机操作员刘宏宇在复盘会上讨论热烈。原因很简单——他们操纵的无人机在天上差点”撞车”。

“我们正在空中编队，准备进行火力侦察，你们却直接冲过来。要不是我们及时解散编队、下降高度，后果不堪设想。”崔志说。

刘宏宇也觉得有点委屈：”你们本该在 5 分钟前脱离那片空域，我们是按计划飞行。”

问题还不止于此，这次训练中，多个方向由于无人机的介入而状况迭出：无人机遮挡突击车射界、通信排干扰无人机遥控频道、炮火覆盖”误伤”无人机……复盘会上，不少官兵认为友邻单位干扰了自己行动，一时间争论不休。

“各兵种无人机在短时间内密集出动，有限的空域中，难免会出现’磕磕碰碰’等情况。”对于这场训练暴露出的问题，王参谋感慨不已，”没想到，只是引入新的’空中战友’，以前熟悉的操作和配合竟然都变得不确定了。”

更让王参谋担忧的是，此项训练的后续方案还包含与空军部队的协同课目。”如果加上其他军种的影响，这道战场考题还会增加多少未知变量？”跳出以往熟悉的陆地战场，王参谋不得不重新审视那片一抬头就能看见的天空。

“身在陆战场，眼睛不能只盯着’地平线’。我们同样要对空中的各种作战要素进行精准规划，否则航路、频谱就会像线团一样互相纠缠，直接影响到地面作战。”议战议训会上，该旅领导的一番话，给了官兵们启发。

“从宏观上看，每一种作战力量融入，都会增添一条全新的作战时空线；从微观上看，每个兵种与专业都可能因为’新战友’加入，展现出与往日不同的战斗属性。”新的启发与思考，也让王参谋回想起之前一次实战化训练。

那次，上级为该营配属了空军与陆航力量，辅助他们展开主攻。然而进入作战部署阶段，该营官兵对空军和陆航力量的作战样式与协同方式不甚了然——”何时让哪型战机投入战斗？各自的作战时空又如何划分？”他们感到”无从下手”。

“战斗”在即，身为现场指挥员的王参谋知道，如果贸然将这些不确定因素引入作战过程，稍有差错就可能满盘皆输。权衡之后，他将空军战机和陆航武装直升机当作打击”敌”纵深目标的”空中火力点”，让它们游离于合成营作战体系之外，尽量减少与地面分队的直接接触。

那次训练，结果可想而知。该营付出极大代价，取得了一场优势微弱的胜利。复盘会上，导调组一针见血地指出：空中力量不仅可以作为攻击之”矛”，也能成为掩护之”盾”，关键在于怎样将有限的作战力量搭配组合，打出”七十二般变化”。

“战场背景图不断切换，合成训练首先要更换’审题’视角。”面对合成训练的新挑战，王参谋感慨地说。

兄弟军种”重拳出击”，既伤了”敌”也误伤了友——

合成训练主体日趋多元，”解题”思路也要加速驶入体系轨道

“第一波次侦察无人机返航着陆，注意清空着陆场！”训练现场，刘宏宇对着身后的无人机操作员下达指令。记者看到，第一波次无人机稳稳落地后，下一波次的无人机任务编队立即掠过官兵头顶，飞向”敌”阵地。

战场更远处，随着炮兵完成火力打击，校射无人机即刻降低高度，进入火力通道捕捉炸点、校正炮位；侦察无人机根据空域规划图上精算得出的飞行通道，引导装步分队搜索并清剿”残敌”。

无人机在短时间内密集出动，却各司其职、井然有序。王参谋介绍，这得益于该旅前期进行的课题攻关。针对低空协同作战可能出现的各种情况，他们经过充分设想与预演论证，探索形成一幅”空中交通规划图”，可以在战场上展开”精确导航”。

“如今，合成训练主体日趋多元，’解题’思路也要加速驶入体系轨道。”该旅领导说。

据了解，为进一步推动装备释放效能、融入作战体系，该旅采用技术嫁接、信息嵌入等方式，让多型号无人装备与主战装备”血脉相通”。同时，他们结合任务实际，将各兵种训练骨干汇聚到一起，从侦察、步兵、装甲、火力等不同专业角度展开”体系推演”，进一步完善”空中交通规划图”的相关参数和动态使用流程，让官兵增强对彼此了解，培塑立体协同的思维意识。

“实现各军兵种力量编组的统筹运用，关键在于跨越——专业知识的跨越、能力结构的跨越、思维理念的跨越，每个环节都需要强大的’体系逻辑’作支撑。”该旅领导进一步解释。

该旅某合成营内，中士甘光欢参加完培训回到营队，桌上多了一摞各军兵种参与联合火力打击的专业资料，他立即投入新的学习研究。

去年底，一场实战化训练中，甘光欢所在营担负主攻任务。当时，该营官兵与蓝方部队陷入苦战，持续胶着、久攻不下，甘光欢和战友专门向上级申请了兄弟军种火力支援。然而，由于他们对兄弟军种火器的攻击参数研究不足、判断有误，本该成为有力支援的导弹不仅”毁伤”了蓝方目标，也”误伤”了前出的突击小队……

复盘会上，经过和兄弟军种战友充分沟通后，该营官兵恍然意识到，以往适用于炮兵火力的协同招法，并不能用于跨军种火力支援——如果不能精算”打击面”、预留”提前量”，就打不好”携手仗”。

“只有将不同军兵种’车马炮’的参数信息和组合变化，都提前预想到、研究到，战场上的未知变量才能转换为于我有利的作战常量。”该旅根据任务划分作战要素与编组，邀请兄弟军兵种单位”金牌教练员”助阵，统一协同规则、分练协同要领、合练协同动作，逐步强化战斗技能。

如今，走进该营”中军帐”，记者翻看工作计划发现，”体系作战大讲堂”组织得越来越频繁，多军种参谋成为该营”编外智囊团”，官兵们在共同研讨中探索出练兵备战”金点子”。

借力攻坚，破障分队突然感到”无用武之地”——

战场是一张开放式考卷，想要做出优秀答案，就不能拘泥于某种固定解法

在某营袁营长的电脑中，总是留存着两份方案：一份是常规的作战方案，另一份方案则留出一大片空白。留白的部分，既可以对现实作战力量进行分类推演，也可以充分展开对战场的畅想。

“从合成迈入联合，再从联合反思合成，这两者蕴含着一种辩证统一的战场哲学。”作为一名一线指挥员，袁营长对于近几年军事训练的加速演变，有着”春江水暖鸭先知”般的感受——如果是 3 年前，一名合成营长对其他军兵种战法了如指掌，可以称得上一件了不起的”稀罕事”；而现如今，合成营与其他军兵种协同训练越来越频繁，联合的”大棋局”上，合成营长不仅是”棋子”，还要具备”棋手”意识。

“当联合素养成为我们的’必修课’，天上飞的、地上跑的、视线外的，都要成为我们条件反射就能运用的应战手段。”袁营长感慨。对于这张属于合成部队的”联合考卷”，他也始终在探索答案。

去年一次联合破障行动中，他们第一次将空军要素纳入作战计划。随着两枚航弹精准命中目标，原本只依靠合成营本级力量需要花费大量时间攻克的障碍，顷刻间土崩瓦解。在空军力量的支持下，该营破障分队官兵竟然感到有些”无用武之地”。

“随着时代发展，战场制胜的答案已经不取决于某一具体’胜负手’，而要看各个作战力量在体系中的贡献率。我们要在新棋局上思考自己的’用武之地’。”这次行动让袁营长意识到，未来战争追求的是模块化编组、积木式组合，合成营只有化作一个战场上即插即用的”集成零件”，才能在与不同军种、不同单位的协同中，寻找到更多搭配的可能性。

“战场是一张开放式考卷，想要做出优秀答案，就不能拘泥于某种固定解法。”袁营长说。

近年来，该旅号召官兵开拓视野，跳出本级框架与岗位局限，从”联合”“体系”角度出发梳理本专业能力链条，进一步探寻合成营战斗力的增长点，鼓励大家围绕多种背景下的作战课题展开研究。

“我们和其他军种的’话语体系’有哪些差别，应该建立怎样的沟通标准”“拔点夺隘，能推导出多少种引导联合火力进行打击的方式”……前不久，该旅指挥作业室内，一场关于合成训练多项课题的讨论火热进行。10 余名营连主官与技术骨干齐聚一堂，围绕官兵提报的一系列课题展开论证。经过一番激烈的”头脑风暴”，10 余项冒着热气的研究课题”新鲜出炉”——

某营侦察班班长王云台与全班战友共同提报了一项”小型无人机如何引导联合火力打击”的课题，打算根据以往演训经验，将影响火力打击的因素整合为一个个标准化模块，合理分布与排序。他们希望梳理细化出有效的方法路径，借助无人机的空中视角优势，更好地引导联合火力打击。

某连邬连长准备结合近年来的真实战例，对”装甲突击车如何在战场上完成火力单元与侦察单元的角色转换”展开研究；某连班长杨恒计划完整梳理”战斗班组引导不同军种火力打击的不同方式”……

翻看通过审核的 10 余份开题报告，每个课题都直指合成训练的体系末端，每项研究的目的，都是破解合成部队在联合作战中面临的矛盾问题、探寻新的战斗力增长点。

展望未来的跨越之路，官兵们充满干劲。该旅领导告诉记者，接下来，他们将围绕这 10 余项课题，同步展开研究论证与实践探索，尽快补齐能力短板，努力找寻制胜未来战场的”最佳答案”。

锐视点

善用全局思维解题

■邹维亮

体系支撑与深度联合，是制胜未来战场的关键因素。今日战场”大棋局”中，只有陆、海、空、天、电、网等作战单元无缝衔接，情报、指控、火力等作战要素有机融合，才能够占据优势。许多真实战例启示我们，现代战争参战力量多元、战场空间多维、作战行动多样，任何单一兵种都难以”包打天下”。

牵一发而动全身，联万众而为一心。当作战样式朝着一体化联合作战加速演进，传统训练模式难以承载立体攻防的复杂程式。唯有以全局思维解题，才能在未来战场上交出满意答卷。

善用全局思维解题，应打破认知壁垒。无人机旋翼掀起的微小气流，如何演变为冲击传统认知的”思维风暴”？究其根本，是武器装备的立体延伸，带动了传统”平面协作”的指挥链路向多维拓展。联合不能囿于物理层面的叠加，必须做到思维融合。如果没有全局思维统筹，不同作战要素共同涌入战场时，任一节点的变量都可能导致整个系统陷入”卡顿”。新

时代合成训练已跨越军种”藩篱”，构建起任务牵引的动态网络。各级指战员必须不断思考如何跳出自身战位局限，结合任务、立足全局，做好兵力配置，提升联合质效。

善用全局思维解题，应加速本领扩容。高水平的联合不是机械地叠加力量，而要环环相扣、精密运转。每名官兵都是”大棋局”上的一个节点，如果防空分队不了解空军作战，炮兵分队不熟悉情报侦察，无人机分队不清楚陆航战法，”有效联合”就会变成纸上谈兵、空中楼阁。只有每名官兵都聚焦联合强固本领、自觉嵌入联合体系、拓展自身能力边界，才能有效提升部队整体联合作战水平。

善用全局思维解题，应优化指挥机制。步入信息化战争时代，制胜战场离不开体系支撑。只有作战体系内部运行顺畅，战斗时才能如臂使指、应对自如。未来战场瞬息万变，曾经应用于机械化战争时代的线性指挥机制，难以支撑信息化战场”网状分发”的动态需求。健全联合作战体系，应推动指挥信息系统向外拓展、向下延伸，把各种作战力量、作战单元、作战要素融合起来，努力畅通作战指挥链路。同时，应进一步厘清内部要素与外部支援保障力量的关系，确保指挥流程既不会因一线官兵自主协同而失序，又能充分释放末端作战单元的应变活力。

Military Camp Observation ｜ Combined Training: The Idea of ”Answering Questions” Is Being Refreshed

Source: China Military Network-People’s Liberation Army Daily Author: Yu Yunzhi Song Shijie Liu Renhao Zou Weiliang Editor: Wang Yigen Release: 2025-04-18

Combined Training: The idea of ”answering questions” is being refreshed

■Yu Yunzhi People’s Liberation Army Daily Special Correspondent Song Shijie Special Correspondent Liu Renhao

A certain army brigade organizes training. The picture shows the officers and men of the reconnaissance unit approaching for reconnaissance. Photo by Huang Rui

Late at night, in the combat research room of a certain army brigade, the sound of keyboard tapping is endless. The staff of the department sat in front of the computer and brainstormed for the formulation of the training plan. On the screen, several colorful blocks of color are clearly visible, marking the different military forces involved in this plan.

“Increase the proportion of new quality force training, accelerate the sinking of joint command levels...” After receiving the latest training plan, Captain Yuan of a certain battalion was pleasantly surprised to find that the planned combined training direction seemed to resonate with his somewhat “advanced” joint training topic paper three years ago. At the same time, more than 10 “freshly released” combat plans in the command information system also surge with the powerful kinetic energy of system integration.

On the journey of unremitting struggle for the cause of strengthening the army, the officers and men of the brigade realized that the combined training of the troops is undergoing profound evolution under the background of joint operations. They also deeply know that as an indispensable combat role on the battlefield, they must stick to their respective positions and answer this test paper from the future battlefield with practical actions.

“Soldiers, horses and artillery” cross-domain into the battle, but “tripping the horse’s leg” is frequently staged-

The battlefield background picture keeps switching, and combined training must first change the “question review” perspective

The offensive battle of the combined battalion is not a new topic, but when he stepped onto the training ground again, Wang, the chief staff of a battalion of a brigade of the army, did not expect that the same test question would be completely different due to the addition of a new combat force.

During that training, Cui Zhi, a drone operator of the battalion’s reconnaissance formation, and Liu Hongyu, a drone operator of the armored infantry company, had a heated discussion at the review meeting. The reason was simple - the drones they were operating almost “crashed” in the sky.

“We were in formation in the air, preparing for fire reconnaissance, but you rushed directly over. If we hadn’t disbanded the formation and descended in time, the consequences would be disastrous.” Cui Zhi said.

Liu Hongyu also felt a little aggrieved: “You should have left that airspace 5 minutes ago, and we were flying according to the plan.”

The problem is not just that. During this training, multiple directions were affected by the intervention of drones: drones blocked the firing range of assault vehicles, the communication platoon interfered with the drone remote control channel, and artillery fire covered “accidentally” drones... At the review meeting, many officers and men believed that friendly units interfered with their actions and argued endlessly for a while.

“Drones of various arms are deployed intensively in a short period of time, and in the limited airspace, it is inevitable that there will be ‘bumps and bumps’ and other situations.” Staff Officer Wang was full of emotion about the problems exposed by this training, “I didn’t expect that just by introducing new ‘air comrades’, the operations and cooperation that were familiar before became uncertain.” What worries Staff Officer Wang even more is that the follow-up plan of this training also includes coordination courses with the Air Force. “If the influence of other arms is added, how many unknown variables will this battlefield test add?” Jumping out of the familiar land battlefield in the past, Staff Officer Wang had to re-examine the sky that he could see as soon as he looked up. “When you are on the land battlefield, your eyes cannot just stare at the ‘horizon’.

We also need to accurately plan various combat elements in the air, otherwise the routes and spectrum will be entangled like a ball of thread, directly affecting ground combat." At the discussion meeting on war and training, the words of the brigade leader inspired the officers and men. "From a macro perspective, the integration of each combat force will add a new combat time and space line; from a micro perspective, each branch of the army and profession may show different combat attributes from the past because of the addition of 'new comrades'." New inspiration and thinking also reminded Staff Officer Wang of a previous combat training.

That time, the superior assigned the Air Force and Army Aviation forces to the battalion to assist them in launching the main attack. However, when entering the combat deployment stage, the officers and men of the battalion were not very clear about the combat style and coordination methods of the Air Force and Army Aviation forces - "When to put which type of fighter into battle? How to divide the respective combat time and space?" They felt "no idea where to start."

"Battle" is imminent, and Staff Officer Wang, as the on-site commander, knows that if these uncertain factors are rashly introduced into the combat process, a slight mistake may lead to a complete loss. After weighing the pros and cons, he regarded the Air Force fighters and Army Aviation armed helicopters as "air fire points" to strike the "enemy" deep targets, allowing them to stay outside the combat system of the combined battalion and minimize direct contact with ground units.

The result of that training is predictable. The battalion paid a huge price and won a victory with a slight advantage. At the review meeting, the guidance and coordination team pointed out that air power can not only be used as a "spear" for attack, but also as a "shield" for cover. The key lies in how to combine limited combat forces to achieve "seventy-two changes".

"The battlefield background map is constantly switching, and combined training must first change the "question review" perspective." Facing the new challenges of combined training, Staff Officer Wang said with emotion.

The "heavy punch" of the brother services not only hurt the "enemy" but also hurt friends by mistake-

The subjects of combined training are becoming more and more diverse, and the "problem solving" ideas must also accelerate into the system track

"The first wave of reconnaissance drones are returning to land, pay attention to clearing the landing field!" At the training site, Liu Hongyu issued instructions to the drone operator behind him. The reporter saw that after the first wave of drones landed steadily, the next wave of drone task formations immediately passed over the heads of officers and men and flew towards the "enemy" position.

Further away from the battlefield, as the artillery completed its fire strike, the calibration drone immediately lowered its altitude and entered the fire channel to capture the explosion point and

correct the gun position; the reconnaissance drone guided the armored infantry unit to search and eliminate the “remaining enemy” according to the flight channel calculated on the airspace planning map.

The drones were dispatched intensively in a short period of time, but each performed its duties in an orderly manner. Staff Officer Wang introduced that this was due to the research and development of the brigade in the early stage. In response to various situations that may arise in low-altitude coordinated operations, they explored and formed an “air traffic planning map” after full imagination and pre-rehearsal demonstration, which can carry out “precise navigation” on the battlefield.

“Nowadays, the subjects of combined training are becoming more and more diverse, and the “problem-solving” ideas must also accelerate into the system track.” The brigade leader said.

It is understood that in order to further promote the release of equipment efficiency and integrate into the combat system, the brigade adopts technology grafting, information embedding and other methods to make multi-model unmanned equipment and main combat equipment “blood connected”. At the same time, they combined the actual tasks and brought together the training backbones of various arms, conducted “system deduction” from different professional perspectives such as reconnaissance, infantry, armor, and firepower, and further improved the relevant parameters and dynamic use process of the “air traffic planning map”, so that officers and men can enhance their understanding of each other and cultivate a three-dimensional collaborative thinking consciousness.

“The key to realizing the coordinated use of the forces of various arms and services is to cross-professional knowledge, ability structure, and thinking concepts. Each link needs a strong “system logic” to support it.” The leader of the brigade further explained.

In a combined battalion of the brigade, Sergeant Gan Guanghuan returned to the battalion after training. There was a pile of professional materials on the joint firepower strike of various arms and services on the table. He immediately devoted himself to new learning and research.

At the end of last year, in a practical training, Gan Guanghuan’s battalion was responsible for the main attack task. At that time, the officers and men of the battalion were in a bitter battle with the blue troops, and they continued to be stalemate and could not attack for a long time. Gan Guanghuan and his comrades specifically applied to their superiors for firepower support from brother services. However, due to their insufficient research on the attack parameters of brother service firearms and their misjudgment, the missiles that should have been a powerful support not only “destroyed” the blue side’s targets, but also “accidentally injured” the assault team that was advancing...

At the review meeting, after fully communicating with comrades in the brother service, the officers and men of the battalion suddenly realized that the coordinated tactics previously applicable to artillery firepower could not be used for cross-service firepower support - if the “strike surface”

could not be accurately calculated and the “advance amount” could not be reserved, the “hand-in-hand battle” could not be fought well.

“Only when the parameter information and combination changes of the “horse and artillery” of different services are anticipated and studied in advance, the unknown variables on the battlefield can be converted into combat constants that are beneficial to us.” The brigade divided the combat elements and formations according to the tasks, invited the “gold medal coaches” of the brother service units to help, unified the coordination rules, practiced the coordination essentials separately, and practiced the coordinated actions together, and gradually strengthened the combat skills.

Now, walking into the “central military tent” of the battalion, the reporter looked through the work plan and found that the “system combat lecture hall” was organized more and more frequently, and the staff of multiple services became the “extra-staff think tank” of the battalion. The officers and men explored the “golden ideas” for training and preparation in joint discussions.

With the help of the attack, the obstacle-breaking team suddenly felt “useless” -

The battlefield is an open test paper. If you want to make an excellent answer, you can’t stick to a fixed solution.

In the computer of a battalion commander Yuan, there are always two plans: one is a conventional combat plan, and the other plan leaves a large blank. The blank part can not only classify and deduce the actual combat forces, but also fully develop the imagination of the battlefield.

“From combined to joint, and then from joint to combined, these two contain a dialectical and unified battlefield philosophy.” As a front-line commander, Captain Yuan has a feeling of “the duck knows first when the spring river water is warm” about the accelerated evolution of military training in recent years. If it was three years ago, a commander of a combined battalion knew the tactics of other services and arms very well, which could be called a remarkable “rare thing”; but now, the joint training of combined battalions and other services and arms is becoming more and more frequent. In the joint “big chess game”, the commander of the combined battalion is not only a “chess piece”, but also a “chess player”.

“When joint literacy becomes our ‘compulsory course’, flying in the sky, running on the ground, and out of sight, all must become means of combat that we can use by conditioned reflex.” Captain Yuan sighed. For this “joint test paper” belonging to the combined force, he has always been exploring the answer.

In a joint obstacle-breaking operation last year, they included air force elements into the combat plan for the first time. As the two bombs hit the target accurately, the obstacles that originally required a lot of time to overcome by the combined battalion’s own forces collapsed in an instant. With the support of the air force, the officers and men of the battalion’s obstacle-clearing team actually felt that they were “useless”.

“With the development of the times, the answer to winning on the battlefield no longer depends on a specific “winner”, but on the contribution rate of each combat force in the system. We must think about our “place to use” in the new chess game.” This action made Captain Yuan realize that future wars pursue modular grouping and building block combinations. Only when the combined battalion becomes a plug-and-play “integrated part” on the battlefield can it find more possibilities for matching in coordination with different services and units.

“The battlefield is an open test paper. If you want to make an excellent answer, you can’t stick to a fixed solution.” Captain Yuan said.

In recent years, the brigade has called on officers and men to broaden their horizons, break out of the framework and job limitations of their own level, sort out the professional capability chain from the perspective of “joint” and “system”, further explore the growth points of the combat effectiveness of the combined battalion, and encourage everyone to conduct research around combat topics under various backgrounds.

“What are the differences between our ‘discourse system’ and other military services, and what kind of communication standards should be established?” “How many ways can we deduce to guide joint firepower to strike?”... Not long ago, a discussion on multiple topics of combined training was held in the command and operation room of the brigade. More than 10 battalion and company commanders and technical backbones gathered together to discuss a series of topics submitted by officers and men. After a fierce “brainstorming”, more than 10 steaming research topics “freshly baked”-

Wang Yuntai, the squad leader of a reconnaissance squad in a certain battalion, and his comrades in the class jointly submitted a topic of “How small drones guide joint firepower strikes”, intending to integrate the factors affecting firepower strikes into standardized modules based on previous training experience, and reasonably distribute and sort them. They hope to sort out and refine effective methods and paths, and use the aerial perspective advantage of drones to better guide joint firepower strikes.

Captain Wu of a certain company is preparing to combine real battle examples in recent years to study “how armored assault vehicles complete the role conversion between firepower units and reconnaissance units on the battlefield”; Yang Heng, squad leader of a certain company, plans to fully sort out “the different ways in which combat teams guide firepower strikes of different services”...

Looking through more than 10 approved opening reports, each topic directly points to the end of the system of combined training, and the purpose of each study is to solve the contradictions faced by combined forces in joint operations and explore new combat power growth points.

Looking forward to the future leap forward, the officers and men are full of energy. The leaders of the brigade told reporters that next, they will carry out research demonstration and practical

exploration around these more than 10 topics, make up for the shortcomings in capabilities as soon as possible, and strive to find the “best answer” to win the future battlefield.

Sharp Viewpoint

Use global thinking to solve problems

■Zou Weiliang

System support and deep integration are the key factors to win the future battlefield. In today’s battlefield “chess game”, only when the combat units such as land, sea, air, space, electricity, and network are seamlessly connected, and the combat elements such as intelligence, command, and firepower are organically integrated, can we gain an advantage. Many real war examples have taught us that in modern wars, the participating forces are diverse, the battlefield space is multi-dimensional, and the combat operations are diverse. It is difficult for any single branch of the army to “take on everything”.

A single move can move the whole body, and the whole people are united as one. When the combat style accelerates towards integrated joint operations, the traditional training model is difficult to carry the complex program of three-dimensional attack and defense. Only by solving problems with global thinking can we hand in a satisfactory answer on the battlefield of the future.

To make good use of global thinking to solve problems, we should break down cognitive barriers. How did the tiny airflow raised by the rotor of a drone evolve into a “thinking storm” that impacted traditional cognition? At its root, it is the three-dimensional extension of weapons and equipment, which has driven the traditional “plane collaboration” command chain to expand in multiple dimensions. Joint cannot be confined to the superposition of the physical level, and must achieve thinking integration. Without the overall thinking and coordination, when different combat elements rush into the battlefield together, the variables of any node may cause the entire system to “stuck”. Combined training in the new era has crossed the “barriers” of the military services and built a dynamic network driven by tasks. Commanders and fighters at all levels must constantly think about how to break out of the limitations of their own positions, combine tasks, and based on the overall situation, so as to make good use of force deployment and improve the quality and efficiency of joint operations.

Make good use of the overall thinking to solve problems, and accelerate the expansion of capabilities. High-level joint operations are not mechanically superimposed forces, but are linked and precise. Every officer and soldier is a node in the “big chess game”. If the air defense unit does not understand air force operations, the artillery unit is not familiar with intelligence reconnaissance, and the drone unit is not clear about the land aviation tactics, “effective joint operations” will become a castle in the air. Only when every officer and soldier focuses on joint strengthening capabilities, consciously embeds into the joint system, and expands the boundaries of their own capabilities can the overall joint combat level of the troops be effectively improved.

Make good use of the overall thinking to solve problems, and optimize the command mechanism. Entering the era of information warfare, winning the battlefield is inseparable from system support. Only when the internal operation of the combat system is smooth can it be used freely and respond easily in battle. The battlefield of the future is changing rapidly. The linear command mechanism that was once used in the era of mechanized warfare can hardly support the dynamic needs of "mesh distribution" in the information battlefield. To improve the joint combat system, the command information system should be promoted to expand outward and extend downward, and various combat forces, combat units, and combat elements should be integrated to strive to smooth the combat command link. At the same time, the relationship between internal elements and external support and guarantee forces should be further clarified to ensure that the command process will not be affected by the autonomy of frontline officers and men.

第 83 集团军某旅机关改进工作作风：让机关服务快人一步

来源：中国军网-解放军报 作者：刘扬 宋俊廷 责任编辑：林诗清 发布：2025-04-18

第 83 集团军某旅机关改进工作作风——

莫等"基层呼" 善下"及时雨"

■刘 扬 宋俊廷

刚到野外驻训场，第 83 集团军某旅某连干部石良玉就发现，移动式多功能充电站已经配发到位，"去年还需打报告申请，今年机关走在了我们前面。"

为提升机关服务基层质效，去年初，该旅依托强军网搭建了"铁拳小管家"为兵服务平台。投入运行后，该平台畅通了民主渠道，官兵反映问题较以往方便了不少，但基层对机关工作的满意度却不见改观。究其原因，从某营一级上士李啸博的一番话可见一斑："个别机关人员缺乏主动服务意识，工作效率不高，影响了基层官兵的获得感。"

"不能在办公室里坐等官兵登门求助，而要经常深入一线提供上门服务。"该旅领导认为，当前练兵备战任务日益繁重，以往的服务基层机制和模式已不能满足现实需要，机关必须主动对接基层需求，靠前服务。

为此，该旅设立"基层工作日"制度，每周三由部门领导带队下沉一线，通过举办"帐篷夜话""战位恳谈"等活动，听取官兵呼声；构建"需求预判"模型，依据训练阶段转换、重大任务节点，提前调配预置物资，确保及时供应；实行首接负责制，避免事务办理推诿拖延。

莫等"基层呼"，善下"及时雨"。这次野外驻训前，作战训练科组织维修人员提前进驻车炮场，对装备进行全方位检修；军需营房科根据驻训地天气和环境，提前配发防蛇虫药品、防潮垫等物资……对于机关的改变，某营潘营长给出好评："如今在驻训场，无论生活物

资供给还是训练设施维护，机关都能提前筹划、保障到位，我们可以将更多时间和精力投入到训练中。”

“以往是下基层收集形成’问题清单’，如今是带着’服务清单’下基层解难帮困。”谈起转变工作作风，该旅人力资源科柏科长体会深刻。

上个月初，柏科长带领机关宣讲队来到某连，现场解答官兵关心关注的政策问题。当时，战士纪强正与家人商量买房，但对住房公积金使用和住房补贴申请有关规定知之甚少。宣讲队的到来，不仅解了他的燃眉之急，还送给他和战友人手一本《为兵服务手册》，内容涉及上百个与官兵切身利益相关的事项。

“想基层之所想，急基层之所急，努力把工作做在基层前面。”该旅领导介绍，目前他们正着手绘制”为兵服务动态图”，以便实时掌握各业务科室工作进度，推动机关服务基层工作提高到一个新的水平。

An 83rd Group Army Brigade Improves Its Work Style: Let the Departments Serve Faster

Source: China Military Network-People’s Liberation Army Daily Author: Liu Yang Song Junting Editor: Lin Shiqing Release: 2025-04-18

The 83rd Group Army Brigade improves its work style——

Don’t wait for “the grassroots to call” and be good at “timely rain”

■Liu Yang Song Junting

As soon as he arrived at the field training site, Shi Liangyu, a cadre of a company of a brigade of the 83rd Group Army, found that the mobile multi-functional charging station had been distributed in place. “Last year, we still needed to write a report to apply, but this year the department is ahead of us.”

In order to improve the quality and efficiency of the department’s service to the grassroots, at the beginning of last year, the brigade relied on the Strong Army Network to build a “Iron Fist Little Butler” service platform for soldiers. After it was put into operation, the platform opened up democratic channels, and it was much more convenient for officers and men to reflect problems than before, but the grassroots’ satisfaction with the department’s work did not change. The reason can be seen from the words of Li Xiaobo, a sergeant of a certain battalion: “Some staff members lack the awareness of proactive service and their work efficiency is low, which affects the sense of gain of grassroots officers and men.” “We can’t sit in the office and wait for officers and men to come to us for help, but we must often go to the front line to provide door-to-door services.” The leaders of the brigade believe that the current training and preparation tasks are becoming increasingly heavy, and the previous service mechanisms and models for the grassroots can no longer meet the actual needs. The organs must take the initiative to meet the needs of the grassroots

and provide front-line services. To this end, the brigade has established a “grassroots working day” system. Every Wednesday, the department leaders will lead the team to the front line to listen to the voices of officers and men through activities such as “tent night talks” and “battle position talks”; build a “demand prediction” model, and allocate pre-placed materials in advance according to the transition of training stages and major task nodes to ensure timely supply; implement the first-contact responsibility system to avoid delays in handling affairs. Don’t wait for “grassroots calls” and be good at “timely rain”. Before the field training, the combat training department organized maintenance personnel to enter the vehicle and artillery field in advance to conduct a comprehensive inspection of the equipment; the quartermaster barracks department distributed anti-snake and insect medicines, moisture-proof mats and other materials in advance according to the weather and environment of the training site... Regarding the changes in the organization, the battalion commander Pan of a certain battalion gave a good comment: “Now in the training field, whether it is the supply of living materials or the maintenance of training facilities, the organization can plan and ensure them in advance, and we can devote more time and energy to training.” “In the past, we went to the grassroots to collect and form a ‘problem list’, but now we go to the grassroots with a ‘service list’ to solve problems and help the poor.” Talking about the change in work style, the brigade’s human resources department chief Bai has a deep understanding. At the beginning of last month, Chief Bai led the organization’s propaganda team to a certain company to answer policy issues that officers and men were concerned about. At that time, soldier Ji Qiang was discussing buying a house with his family, but he knew little about the relevant regulations on the use of housing provident funds and housing subsidy applications. The arrival of the propaganda team not only solved his urgent needs, but also gave him and his comrades a copy of the “Service Manual for Soldiers”, which covers hundreds of matters related to the vital interests of officers and men.

“Think about what the grassroots think, worry about what the grassroots worry about, and work hard to do the work ahead of the grassroots.” The brigade leader introduced that they are currently working on drawing a “dynamic map of service for soldiers” to grasp the work progress of various functional departments in real time and promote the work of the department serving the grassroots to a new level.

陆军某旅组织侦察分队进行夜间多课目训练

来源：解放军报 作者：赵祥祥 王培霖 责任编辑：王一亘 2025-04-19

陆军某旅组织侦察分队进行夜间多课目训练——

雨夜，侦察兵凌厉出击

■赵祥祥 王培霖

仲春雨夜，随着一阵急促的哨声响起，战车疾驰而出。陆军某旅一场侦察分队多课目连贯训练，在茫茫夜色中拉开战幕。

“前方车辆陷入淤泥，迅速营救！”车队行进至一处泥泞路段，特情突至。官兵分工协作、默契配合，成功救出被困车辆，车队继续前进。

该旅领导介绍，此次夜间训练，重点围绕崖壁攀登、隐蔽接敌、夜间破袭等课目展开，全程随机导调特情，旨在通过多任务牵引、多课目融合、多场景切换，检验提升侦察分队复杂环境下的作战能力。

到达预定地域，官兵迅速展开武装奔袭，很快被一道陡峭崖壁挡住了去路。”A 组警戒，B 组攀登。”任务官兵立即整理装备、系好绳索，利用岩钉向崖顶攀爬。由于雨水冲刷，崖壁十分湿滑，给队员攀登带来不小难度。突然，一名队员脚下打滑，紧随其后的战友眼疾手快，迅速帮他稳定身体。大家一鼓作气，成功登顶。

登顶后，官兵立即操控无人机展开侦察。指挥员根据无人机回传画面分析研判”敌情”，快速完成行动部署。密林深处，一道道黑影闪过，如利箭般刺向”敌”阵地。

“遭’敌’无人机侦察，迅速伪装隐蔽”“通信受到干扰，立即切换频率”……机动途中，特情接连不断，官兵沉着冷静、见招拆招，顺利抵达目标地域。

“战争是实打实的较量、硬碰硬的对抗。只有将制胜刀锋磨得更加锋利，才能在未来战场掌握主动、赢得胜利。”该旅领导介绍，近年来，他们坚持从难从严、从实战需求出发，常态组织复杂环境下重难点课目训练，加强夜间技能比武、陌生地域实弹射击等实战化课目训练，锤炼官兵应急应战能力。

“行动！”随着指挥员一声令下，狙击组快速抢占制高点，无人机组操控无人机升空，突击组借助夜色涉水迂回。官兵密切配合、协同出击，成功歼”敌”。

夜色如墨，雨水浸衣。官兵正准备撤离，”敌”后方支援部队突然赶到，企图将任务官兵包围。”无人机发烟掩护！”指挥员迅速下达指令。官兵交替掩护、边打边撤，最终摆脱”敌”追击，撤离至安全地域。

天色渐白，训练结束。参训官兵随即展开复盘，总结梳理训练中暴露的不足，逐一制订改进措施，为下一场战斗做好准备。

A Certain Army Brigade Organized a Reconnaissance Unit to Conduct Multi-Subject Training at Night

Source: PLA Daily Author: Zhao Xiangxiang Wang Peilin Editor: Wang Yigeng 2025-04-19

A certain army brigade organized a reconnaissance unit to conduct multi-subject training at night——

On a rainy night, the scouts attacked fiercely

■ Zhao Xiangxiang Wang Peilin

On a rainy night in mid-spring, with a burst of rapid whistles, the tanks rushed out. A reconnaissance unit of a certain army brigade conducted a multi-subject continuous training, which kicked off in the vast night.

“The vehicle ahead is stuck in the mud, rescue quickly!” The convoy was traveling to a muddy section of the road, and a special situation suddenly arrived. The officers and men divided the work and cooperated tacitly, successfully rescued the trapped vehicles, and the convoy continued to move forward.

The leaders of the brigade introduced that this night training focused on cliff climbing, covert enemy contact, night raids and other subjects, and randomly guided special situations throughout the process, aiming to test and improve the combat capabilities of the reconnaissance unit in complex environments through multi-task traction, multi-subject integration, and multi-scene switching.

Arriving at the designated area, the officers and men quickly launched an armed raid, but were soon blocked by a steep cliff. “Group A is on guard, Group B is climbing.” The officers and men on the mission immediately sorted out their equipment, tied ropes, and used rock nails to climb to the top of the cliff. Due to the erosion of rain, the cliff was very slippery, which brought considerable difficulty to the team members. Suddenly, a team member slipped, and the comrade who followed him quickly helped him stabilize his body. Everyone worked hard and successfully reached the top.

After reaching the top, the officers and men immediately controlled the drone to conduct reconnaissance. The commander analyzed and judged the “enemy situation” based on the pictures sent back by the drone, and quickly completed the action deployment. In the depths of the dense forest, a series of black shadows flashed by, piercing the “enemy” position like a sharp arrow.

“Encountered by the ‘enemy’ drone, quickly disguised and concealed” “Communication was interfered with, and the frequency was switched immediately”... During the maneuver, special situations continued one after another, and the officers and men were calm and composed, and they successfully arrived at the target area.

“War is a real contest and a head-on confrontation. Only by sharpening the winning blade can we take the initiative and win in the future battlefield.” The leaders of the brigade introduced that in recent years, they have insisted on starting from the difficult and strict, starting from the actual combat needs, and regularly organizing the training of difficult and key subjects in complex

environments, strengthening the practical training of night skills competitions, live-fire shooting in unfamiliar areas, and tempering the emergency response capabilities of officers and men.

“Action!” With the commander’s order, the sniper team quickly seized the commanding heights, the drone team controlled the drone to take off, and the assault team took advantage of the night to wade through the water. The officers and men cooperated closely and attacked in coordination, successfully destroying the “enemy”.

The night was like ink, and the rain soaked the clothes. The officers and men were preparing to evacuate, and the “enemy” rear support troops suddenly arrived, trying to surround the mission officers and men. “Drone smoke cover!” The commander quickly issued an order. The officers and men took turns to cover, fight and retreat, and finally got rid of the “enemy” pursuit and evacuated to a safe area.

The sky gradually brightened and the training ended. The participating officers and men immediately reviewed the training, summarized and sorted out the shortcomings exposed in the training, and formulated improvement measures one by one to prepare for the next battle.

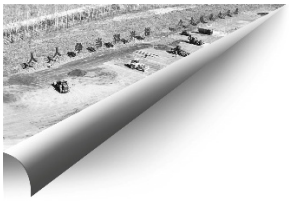
第 78 集团军某旅 4 名新兵分享下连后的感悟

来源：解放军报 作者：张申奥 黄皓然 袁硕 时浩然 责任编辑：王一亘 2025-04-19



第 78 集团军某旅 4 名新兵分享下连后的感悟——

我们体验着”熔炉”的温度

写在前面

“有人说，新兵是初生的牛犊，活力四射；有人说，新兵是未淬的钢坯，脆弱易折。我想说，每一名新兵的心里都燃烧着滚烫的火焰！”

前不久，第 78 集团军某旅组织了一场新兵交流会。新兵带着憧憬来到部队，在陌生的环境、繁重的任务面前，难免一时有各种各样的不适应。但他们有理想、有追求、有拼劲，敢于直面挑战、勇于突破自我，逐渐融入火热的军营，在蜕变中收获成长。

题图：第 78 集团军某旅官兵开展训练。

1 怕训练成绩拖后腿？

加油跑就会赶上去

■第 78 集团军某旅列兵 张申奥

张申奥。

入伍前，我的内心其实有些矛盾——既心怀憧憬，又有些不安，怕自己适应不了当兵的苦和累。

果不其然，在新训基地，体能训练一时成了我难以迈过去的坎。体能不占优势的我，对一些课目感到吃力，训练成绩常常垫底。

“怎么无精打采的？”班长看出了我的沮丧。”班长，我的成绩太差了，拖了大家的后腿。”“这有什么可担心的？有人跑得快，就会有人跑得慢，这很正常。你才刚入伍，前面的路还长，只要你不放弃、加油跑，一定会赶上去。”

班长的话让我恍然大悟：我的”怕”，是对困难的畏惧，是对失败的胆怯，是对责任的逃避。年轻意味着希望和潜力，同时也意味着要付出更多的汗水、补齐更多的短板。作为一名新兵，一开始，动作可以不标准，技能可以不熟练，体能可以不优秀，但”我是新兵”不应该成为懈怠的借口，而应该作为成长的起点。

既然知道落后，那就加油追上去。在身边战友的鼓励下，在班长骨干的帮带下，下连后的一次考核中，3 公里我跑出 11 分 50 秒的成绩。曾经以为很遥远的”13 分以内”，曾经以为非常高的”屏障”，就这样被我”撞”破了。这背后，是一次次的咬牙坚持，是对”再快一点”的不懈追求。

渐渐地，我变得”不怕了”，积极参加营里组织的演讲比赛，毛遂自荐主持饭堂广播，在各种活动中崭露头角。

人生之路充满挑战，脚下的路不会一直平坦，挫折、失意也许会常伴左右。可是，敢于克服”不容易”、勇于挑战”不可能”，不正是年轻人成长的意义所在吗？军旅生涯才刚刚开始，我会一直和自己说：”没关系，加油跑就会赶上去！”

2 怕能力与军衔不匹配？

在”灯丝渐亮”中发出自己的光

■第 78 集团军某旅下士 黄皓然

黄皓然。

作为一名直招军士，也算是一名新兵。刚下连那段日子，我觉得自己有些”格格不入”——虽然戴着下士军衔，一些专业课目的成绩却不如同年新兵，更不用提和老兵比。

“刚到部队，凡事不要着急，不要一味地去和别人比。虽然你已经是名军士，别把自己想得太’高’，也别把自己想得太’低’。”班长李占安对我说，”你入伍前在大学就读的是体育教育专业，应该发挥自己的优势，找到适合自己的赛道。”

我开始重新审视自己，尝试在训练中发挥所长，为战友们分享科学的体能训练方法。渐渐地，找我交流的战友多了起来。此外，我结合营养配餐、科学饮食等方面的专业知识，在伙食满意度调查中提出减少高热量食物比例、增加膳食纤维摄入的建议。没想到很快被采纳，炊事班还邀请我参与日常食谱的制订。

训练之余，一些想考学提干的战友找到我，希望我能帮他们辅导文化课。辅导他们的同时，我也虚心向他们请教专业课目的训练技巧，在互相帮助中共同成长。

当收获的肯定越来越多，我慢慢找到了”存在感”，内心不再焦虑。我终于明白，就像灯丝会随着电流持续通过而越来越亮，每个人都有自己的成长节奏，起步时或许平平无奇，只要坚持不懈、奋发努力，终会发出自己的光。

3 怕不适应新岗位？

当一条搅动池水的”鲶鱼”

■第 78 集团军某旅列兵 袁 硕

袁硕。

“2 分 16 秒！”通信装备操作考核中，当考官报出我的成绩，战友们发出一阵欢呼，我也终于长出了一口气。

刚下连时，正逢连队即将执行一项重大演训任务。班里几名老兵由于休假、外出学习不在位，连队打算让我一起参加任务。我兴奋地跃跃欲试，训练中却感受到几名老兵投来不信任的目光。

不服输的我找到连长，申请担任此次任务的操作手。连长却说：”你还是个新兵，参加保障就行。”

“新兵怎么了？战场上可没有新老兵之分。”看到我有些激动，连长露出惊讶的表情：”距离任务开始还有些日子，拿训练成绩说话！”

那段时间，我废寝忘食地投入理论知识学习和装备操作训练，因频繁操作设备按钮，手指都磨破了皮。出色的表现得到大家的认可，我被编组到操作手位置。

任务开始，我在通信车里熟练操作设备。突然，我接到”敌”对我指挥所实施电磁干扰的指令。”别慌，你能行！”我迅速调整电台频率，确保指挥所第一时间收到准确信息。

“演练结束，可以撤收。”当听筒里传来任务结束的命令，我难掩内心的激动。连长说，我的优秀表现也激发了老兵的热情，像一条”鲶鱼”搅动了池水。一些老兵看到新兵在大项任务中发挥作用，加紧补齐能力短板。

新年伊始，旅里组织创破纪录比武，我荣登训练龙虎榜。其实，每个人身上都蕴藏着无穷的潜力，只要勇于挑战自我，不懈拼搏奋斗，总会迎来出彩时刻。

4 怕融入不了集体？

军营大家庭没有”陌生人”

■第 78 集团军某旅列兵 时浩然

时浩然。

“浩然，歇一会儿！”站在训练场边，班长将水壶抛给我。我稳稳接住，迎上了班长身旁几名老兵鼓励的目光。很难想象，刚下连时，我还在担心自己融入不了这个大家庭。

我不算一个性格开朗的人，平时话不多。刚到连队时，身处新环境、面对新战友，担心”说多做多错多”，我打算不声不响当个”小透明”。

“到班里有段时间了，没怎么看见你和大家聊天。是不是有什么心事？”班长关切地问。看着他诚恳的目光，我吞吞吐吐说出自己的想法。

班长告诉我，身在连队，就是大家庭的一员。战友间看重的是彼此在训练生活中的态度和表现，要用实实在在的成绩证明自己，赢得认可。

打那时起，我经常在晚上去健身房加练。击打沙袋的闷响声、举起杠铃的喘息声，渐渐冲淡了心头的忐忑。一段时间后，我的训练成绩进步明显，我也收获了战友们关注的目光。

一次早饭，班里最活跃的老兵张国威端着餐盘坐到我身边。”浩然，你这个南方人吃得惯馒头不？”他把老家寄来的辣酱推到我面前，”尝尝，比你们那儿的甜口带劲！”看我一时有些愣住，身旁的几位老兵咧着嘴笑出了声。那笑声裹着北风的粗犷，又像老家灶台上汤锅冒泡的咕嘟声，让人眼眶发热。

周末，我独自绕着操场跑圈，脚步越来越沉。忽然有人跟上来与我并肩奔跑：”呼吸跟着步频走，两步一呼，两步一吸……”中士许杰放慢速度给我示范。我学着他的节奏调整呼吸，竟然多跑了一圈半。

在许杰的指导下，之后的一次 3 公里跑测试中，我跑出 12 分 20 秒的成绩。终点处，我撑着膝盖大口喘气，许杰走过来轻轻拍着我的背部说：”行啊浩然，下次跑步你当排头兵！”

军营里哪有什么”陌生人”？那些说着”新兵蛋子”却默默替你扛枪的人，那些嫌你”笨手笨脚”却手把手教你打背囊的人，早已把风雨中的营房，变成和故乡一样温暖的家。

Four New Recruits from a Brigade of the 78th Group Army Shared Their Feelings After Joining the Company

Source: PLA Daily Author: Zhang Shen’ao Huang Haoran Yuan Shuo Shi Haoran Editor: Wang Yigen 2025-04-19

Four new recruits from a brigade of the 78th Group Army shared their feelings after joining the company——

We experience the temperature of the “melting pot”

Written in the front

“Some people say that new recruits are newborn calves, full of vitality; some people say that new recruits are unquenched steel billets, fragile and easy to break. I want to say that every new recruit has a hot flame burning in his heart!”

Not long ago, a brigade of the 78th Group Army organized a new recruit exchange meeting. New recruits came to the army with their dreams. In the face of unfamiliar environments and heavy tasks, it is inevitable that they will have various kinds of discomfort for a while. But they have ideals, pursuits, and fighting spirit. They dare to face challenges and break through themselves. They gradually integrate into the hot military camp and grow in transformation.

Title picture: Officers and men of a brigade of the 78th Group Army conduct training.

1Are you afraid that your training results will lag behind?

You will catch up if you keep running

■Private soldier of a brigade of the 78th Group Army Zhang Shen’ao

Zhang Shen’ao.

Before joining the army, I was actually somewhat conflicted - I had aspirations, but also some anxiety, fearing that I could not adapt to the hardships and fatigue of being a soldier.

As expected, at the new training base, physical training became a hurdle that I could not overcome for a while. I was not physically strong, so I found some subjects difficult and my training results were often at the bottom.

“Why are you so listless?” The squad leader saw my frustration. “Squad leader, my results are too bad, and I am holding everyone back.” “What is there to worry about? Some people run fast, and some people run slow. This is normal. You have just joined the army, and there is still a long way to go. As long as you don’t give up and keep running, you will definitely catch up.”

The squad leader's words made me suddenly realize my "fear" is the fear of difficulties, the timidity of failure, and the avoidance of responsibility. Being young means hope and potential, but it also means working harder and making up for more shortcomings. As a recruit, at the beginning, your movements may not be standard, your skills may not be proficient, and your physical fitness may not be excellent, but "I am a recruit" should not be an excuse for slacking off, but should be the starting point for growth.

Since you know you are behind, then try your best to catch up. With the encouragement of my comrades around me and the help of the squad leader and backbone, I ran 3 kilometers in 11 minutes and 50 seconds in an assessment after joining the company. I once thought that the "13 minutes or less" that was very far away and the "barrier" that was once thought to be very high were "broken" by me. Behind this is the repeated grit and persistence, and the unremitting pursuit of "a little faster".

Gradually, I became "not afraid", actively participated in the speech contest organized by the camp, volunteered to host the canteen broadcast, and emerged in various activities.

The road of life is full of challenges, the road under your feet will not always be flat, and setbacks and frustrations may always be with you. However, isn't it the meaning of young people's growth to dare to overcome "difficulties" and dare to challenge "impossibles"? My military career has just begun, and I will always tell myself: "It doesn't matter, I will catch up if I keep running!"

2 Afraid that your ability does not match your military rank?

Shine your own light in the "gradually brightening filament"

■Corporal of a brigade of the 78th Group Army Huang Haoran

Huang Haoran.

As a direct-recruited sergeant, I am also a new recruit. When I first joined the company, I felt that I was a little "out of place" - although I wore the rank of corporal, the results of some professional courses were not as good as those of the same year, not to mention compared with the veterans.

"When you first arrive at the army, don't be anxious about everything, and don't blindly compare yourself with others. Although you are already a sergeant, don't think too much of yourself, and don't think too little of yourself." Squad leader Li Zhan'an said to me, "You studied physical education in college before joining the army. You should play to your strengths and find a track that suits you."

I began to re-examine myself, try to play to my strengths in training, and share scientific physical training methods with my comrades. Gradually, more and more comrades came to me for communication. In addition, I combined my professional knowledge in nutritional meal matching and scientific diet, and proposed suggestions to reduce the proportion of high-calorie foods and

increase dietary fiber intake in the food satisfaction survey. Unexpectedly, it was quickly adopted, and the cooking class also invited me to participate in the formulation of daily recipes.

In addition to training, some comrades who wanted to take exams and be promoted came to me, hoping that I could help them with cultural courses. While tutoring them, I also humbly asked them for training skills for professional courses, and grew together with mutual help.

As I gained more and more affirmation, I slowly found a "sense of existence" and was no longer anxious. I finally understood that, just like the filament will become brighter and brighter as the current continues to flow, everyone has their own growth rhythm. They may be mediocre at the beginning, but as long as they persevere and work hard, they will eventually emit their own light.

3 Afraid of not adapting to the new position?

Being a "catfish" that stirs the water

■ Private Yuan Shuo of a brigade of the 78th Group Army

Yuan Shuo.

"2 minutes and 16 seconds!" During the communication equipment operation assessment, when the examiner reported my score, my comrades cheered, and I finally breathed a sigh of relief.

When I just joined the company, the company was about to carry out a major training mission. Several veterans in the class were absent due to vacation or going out to study, so the company planned to let me participate in the mission together. I was excited and eager to try, but I felt the distrustful eyes of several veterans during the training.

Unwilling to admit defeat, I found the company commander and applied to be the operator of this mission. The company commander said, "You are still a new soldier, just join the support."

"What's wrong with new soldiers? There is no distinction between new and old soldiers on the battlefield." Seeing that I was a little excited, the company commander showed a surprised expression: "There are still some days before the mission begins, let the training results speak for themselves!"

During that time, I devoted myself to theoretical knowledge learning and equipment operation training, and my fingers were worn out due to frequent operation of equipment buttons. My outstanding performance was recognized by everyone, and I was assigned to the operator position.

At the beginning of the mission, I skillfully operated the equipment in the communication vehicle. Suddenly, I received an order from the "enemy" to implement electromagnetic interference on my command post. "Don't panic, you can do it!" I quickly adjusted the radio frequency to ensure that the command post received accurate information as soon as possible.

"The exercise is over, you can withdraw." When the order to end the mission came from the receiver, I couldn't hide my excitement. The company commander said that my excellent

performance also inspired the enthusiasm of the veterans, like a “catfish” stirring the water in the pond. Some veterans saw that the new recruits played a role in major tasks and stepped up to make up for their shortcomings in ability.

At the beginning of the new year, the brigade organized a record-breaking competition, and I was honored on the training dragon and tiger list. In fact, everyone has infinite potential. As long as you dare to challenge yourself and work hard, you will always have a brilliant moment.

4 Afraid of not being able to integrate into the collective?

There are no “strangers” in the military camp family

■ Private soldier of a brigade of the 78th Group Army Shi Haoran

Shi Haoran.

“Haoran, take a break!” Standing on the side of the training ground, the squad leader threw the water bottle to me. I caught it steadily and met the encouraging eyes of several veterans beside the squad leader. It is hard to imagine that when I just joined the company, I was still worried that I would not be able to integrate into this big family.

I am not a cheerful person, and I don’t talk much. When I first arrived at the company, I was in a new environment and faced new comrades. I was worried that “talking more, doing more, and making more mistakes”, so I planned to be a “little transparent” quietly.

“It’s been a while since I came to the class, and I haven’t seen you chatting with everyone. Is there something on your mind?” The squad leader asked with concern. Looking at his sincere eyes, I stammered out my thoughts.

The squad leader told me that being in the company means being a member of a big family. Comrades value each other’s attitude and performance in training life, and they must prove themselves with real results and win recognition.

Since then, I often go to the gym to practice at night. The muffled sound of hitting the sandbag and the panting sound of lifting the barbell gradually diluted the uneasiness in my heart. After a period of time, my training results improved significantly, and I also gained the attention of my comrades.

At breakfast once, Zhang Guowei, the most active veteran in the class, sat next to me with a plate. “Haoran, are you used to eating steamed buns as a southerner?” He pushed the hot sauce sent from his hometown in front of me, “Try it, it’s sweeter than yours!” Seeing that I was a little stunned for a while, several veterans beside me grinned and laughed out loud. The laughter was wrapped in the roughness of the north wind, and it was like the bubbling sound of the soup pot on the stove in my hometown, which made people’s eyes hot.

On the weekend, I ran around the playground alone, and my steps became heavier and heavier. Suddenly, someone caught up with me and ran side by side: “Breathe in accordance with the pace,

exhale after two steps, inhale after two steps...” Sergeant Xu Jie slowed down to demonstrate to me. I learned his rhythm and adjusted my breathing, and actually ran one and a half more laps.

Under Xu Jie’s guidance, I ran a 3-kilometer test in 12 minutes and 20 seconds. At the finish line, I supported my knees and gasped for air. Xu Jie came over and patted me on the back and said, “Okay, Haoran, you will be the vanguard next time you run!”

Where are there “strangers” in the military camp? Those who said “new recruits” but silently carried guns for you, those who thought you were “clumsy” but taught you to pack your backpack, have long turned the barracks in the wind and rain into a warm home like your hometown.

为新兵茁壮成长选好 “土壤”

来源：解放军报 作者：杨茂生 张文哲 韩帅 责任编辑：王一亘 2025-04-19

陆军某旅探索实施”兵员适配机制”——

为新兵茁壮成长选好”土壤”

■杨茂生 张文哲 解放军报特约通讯员 韩 帅

“陈光泽，成绩优秀……”暮春时节，陆军某旅组织一场体能考核，新兵陈光泽取得优异成绩，令身边战友刮目相看。

从下连之初的训练”困难户”，到跻身”优秀”行列，谈及成绩提升的”秘诀”，陈光泽感激地说：”是钱班长的帮助和鼓励，给了我不断突破自我的勇气和信心！”

去年底，下半年入伍新兵下连后，该旅某营火力连组织了一场特殊的分配定岗仪式。在全连官兵注视下，多名班长轮流登上讲台，逐一介绍本班人员构成、专业设置等情况，阐述自己的带兵育人理念和方法；新兵们依次登台介绍个人情况、自身特长和成长规划，表达个人分配意愿。最后，连队党支部根据班长和新兵双方意愿，综合考量人员情况、岗位需求等因素，研究决定新兵分配定岗方案。

“二班是烈士陈平平生前所在班。作为英雄的传人，就是要工作争第一、打仗冲在前！”分班仪式上，聆听二班班长钱奕霖深情讲述的英雄故事，陈光泽对加入二班这个光荣集体非常向往。

被分配到二班后，陈光泽选择了炮手岗位。在钱班长耐心帮带下，他的各课目训练成绩进步很快。他还结合班长传授的经验技巧，改进和优化了炮闩分解结合流程，提高了训练质效，被连队评为”进步之星”。

“陈光泽的成长进步，是旅队推行’兵员适配机制’取得实效的一个缩影。”该连徐指导员介绍，之前，旅里基层连队主要采取随机分配的方式，根据人员缺口情况确定新兵专业岗位。由于人员配置粗放，新兵下连后”人岗不适配”等问题屡见不鲜。机关调研发现，按照这种人员分配机制，有的人才”没用好”、有的人才”不够用”，既不利于官兵成长成才，也不利于人才活力释放。

如何提高人岗适配度，实现人才培养和训练质效同步提升？该旅党委一班人研究决定，探索建立”兵员适配机制”：新训结束后，根据新兵综合素质和现实表现将其分配至适配连队，连队结合人才培养需求、人岗适配度等因素进行分配定岗，最后在征求个人意见基础上进行微调，最大限度为新兵创造良好的成长成才环境，激发他们融入部队、融入战位的热情动力。

为有效提升新兵与专业岗位的适配度，该旅某连为新兵设置了两个月的岗位适应期。适应期内，连队持续跟踪和记录新兵成长情况；适应期结束后，他们综合考量训练成绩、个人意愿、骨干意见及群众评议结果等因素，对新兵班级和岗位进行适当调整，确保他们在适宜的”土壤”中茁壮成长。

新兵谢庭冠入伍前学的是体育专业。分配定岗仪式上，他抱着”发挥专业优势，干出一番成绩”的想法，表达了加入炮兵侦察班的意愿，炮兵侦察班班长也很看好他的发展潜力。最终，谢庭冠如愿加入炮兵侦察班。

然而，此后的训练中，谢庭冠发现自己体能优势明显，但专业学习却有些吃力。时间一长，谢庭冠越来越跟不上训练节奏，积极性和自信心受到打击。

“谢庭冠入伍前曾考取了驾驶证，有一定的驾驶专业基础，可根据其这一特长调整岗位。”适应期结束后，该连干部骨干经过商议并征求本人意见，决定对谢庭冠进行岗位调整，由驾驶经验丰富的班长张鑫负责帮带。在张班长的悉心帮助指导下，谢庭冠在新岗位上进步很快，阶段性考核达到良好以上水平。

该旅领导介绍，”兵员适配机制”不仅为下连新兵提供了适合个人成长的舞台，也有利于他们在融入岗位中找准奋斗目标和方向，实现双向奔赴。

“我是 9 班班长黄禹，我的带兵育人理念是以真心换真心……”该旅侦察连新兵分配定岗仪式上，听完黄禹的话，新兵陈金城憧憬着能加入 9 班。

被分配到 9 班那天，黄禹和班里战友为陈金城举办了一场简约而温馨的欢迎仪式。仪式开始后，副班长端出大家亲手制作的蛋糕，动情地对陈金城说：”进了 9 班门，就是 9 班人。

从今天起，你就是我们甘苦与共、生死相依的好战友。9 班的过去我们没有共同经历，但辉煌的未来我们可以一起书写！”

吹灭蜡烛那一刻，陈金城的眼眶有些湿润。从那天起，陈金城就把”当一个过硬好兵，为集体增光添彩”作为自己的奋斗目标。

“那段时间，心里想的全是怎么把训练成绩提上去。”白天，陈金城在训练场上挥汗如雨；晚上，他在学习室里加班加点学习理论知识。为帮助陈金城提高训练成绩，班长还为他量身定制”成长进阶计划”，与他一起专攻精练。经过一段时间的努力，陈金城的训练成绩稳步提升。

“我们的目标，就是为新兵茁壮成长选好’土壤’。”该旅领导介绍，”兵员适配机制”推行以来，新兵岗位适配率、专业成绩合格率均大幅提升，人才成长周期明显缩短，形成”人尽其才、才尽其用”的良好氛围。目前，该旅正着手构建”兵员成长数字档案”，为进一步提升人岗适配度提供数据支撑，努力培养更多适应岗位需求、本领作风过硬的打仗型人才。

Select the Right “Soil” for the Growth of New Recruits

Source: PLA Daily Author: Yang Maosheng Zhang Wenzhe Han Shuai Editor: Wang Yigen 2025-04-19

A certain army brigade explores the implementation of the “troop adaptation mechanism”——

Select the right “soil” for the growth of new recruits

■ Yang Maosheng Zhang Wenzhe PLA Daily Special Correspondent Han Shuai

“Chen Guangze, excellent results...” In late spring, a certain army brigade organized a physical fitness test, and the new recruit Chen Guangze achieved excellent results, which impressed his comrades around him.

From the “difficult” training at the beginning of the company to joining the ranks of “excellent”, talking about the “secret” of improving performance, Chen Guangze said gratefully: “It was the help and encouragement of squad leader Qian that gave me the courage and confidence to constantly break through myself!”

At the end of last year, after the new recruits who joined the company in the second half of the year were assigned to the company, a firepower company of a battalion of the brigade organized a special assignment ceremony. Under the watchful eyes of all the officers and men of the company, several squad leaders took turns to go up to the podium, introduced the personnel composition and professional settings of their squads one by one, and elaborated on their own ideas and methods of leading and educating soldiers; the recruits took turns to introduce their personal situation, their own strengths and growth plans, and expressed their personal assignment wishes. Finally, the

company party branch studied and decided on the assignment plan for the recruits based on the wishes of both the squad leaders and the recruits, comprehensively considering factors such as personnel situation and job requirements.

“The second squad was the squad where the martyr Chen Pingping was during his lifetime. As the successor of the hero, we must strive to be the first in work and rush to the front in battle!” At the class division ceremony, Chen Guangze listened to the heroic stories told affectionately by the squad leader Qian Yilin of the second squad. He was very eager to join the glorious collective of the second squad.

After being assigned to the second squad, Chen Guangze chose the position of gunner. With the patient help of squad leader Qian, his training results in various subjects improved rapidly. He also combined the experience and skills taught by the squad leader to improve and optimize the process of disassembling and combining the breech block, improved the quality and efficiency of training, and was rated as a “Progress Star” by the company.

“Chen Guangze’s growth and progress is a microcosm of the effectiveness of the brigade’s implementation of the ‘troop adaptation mechanism’.” Instructor Xu of the company introduced that before, the grassroots companies in the brigade mainly adopted a random allocation method to determine the professional positions of new recruits based on the personnel gap. Due to the extensive personnel allocation, problems such as “people and positions are not suitable” after new recruits are assigned to the company are common. The department investigation found that according to this personnel allocation mechanism, some talents are “not used well” and some talents are “not enough”, which is not conducive to the growth and development of officers and men, nor is it conducive to the release of talent vitality.

How to improve the adaptability of people and positions and achieve simultaneous improvement in talent training and training quality and efficiency? The brigade party committee decided to explore the establishment of a “troop adaptation mechanism”: after the new training, the recruits will be assigned to the adaptation company according to their comprehensive quality and actual performance. The company will allocate and determine positions based on factors such as talent training needs and people and positions, and finally make fine adjustments based on personal opinions to create a good growth and development environment for new recruits to the maximum extent, and stimulate their enthusiasm and motivation to integrate into the troops and into the battle positions.

In order to effectively improve the adaptability of recruits to professional positions, a company of the brigade set up a two-month job adaptation period for recruits. During the adaptation period, the company continued to track and record the growth of recruits; after the adaptation period, they comprehensively considered factors such as training results, personal wishes, backbone opinions and public evaluation results, and made appropriate adjustments to the recruits’ classes and positions to ensure that they thrive in the appropriate “soil”.

Recruit Xie Tingguan studied sports before joining the army. At the assignment ceremony, he expressed his willingness to join the artillery reconnaissance squad with the idea of ”giving full play to professional advantages and making achievements”, and the squad leader of the artillery reconnaissance squad was also optimistic about his development potential. In the end, Xie Tingguan joined the artillery reconnaissance squad as he wished.

However, in the subsequent training, Xie Tingguan found that he had obvious physical advantages, but professional learning was a bit difficult. Over time, Xie Tingguan could not keep up with the training rhythm, and his enthusiasm and self-confidence were hit.

“Xie Tingguan had obtained a driver’s license before joining the army, and has a certain professional driving foundation. His position can be adjusted according to his specialty.” After the adaptation period, the company’s cadres and backbones discussed and solicited his opinions, and decided to adjust Xie Tingguan’s position. Zhang Xin, a squad leader with rich driving experience, was responsible for helping him. Under the careful help and guidance of squad leader Zhang, Xie Tingguan made rapid progress in his new position, and his periodic assessments reached a good level or above.

The leaders of the brigade introduced that the “troop adaptation mechanism” not only provides a stage suitable for personal growth for the new recruits of the company, but also helps them find the right goals and directions in their integration into the position, and achieve two-way running.

“I am Huang Yu, the squad leader of the 9th squad. My concept of leading soldiers and educating people is to exchange sincerity for sincerity...” At the new recruit assignment ceremony of the brigade’s reconnaissance company, after listening to Huang Yu’s words, the new recruit Chen Jincheng looked forward to joining the 9th squad.

On the day he was assigned to the 9th squad, Huang Yu and his comrades in the squad held a simple and warm welcome ceremony for Chen Jincheng. After the ceremony began, the deputy squad leader brought out the cakes made by everyone and said to Chen Jincheng emotionally: “Once you enter Class 9, you are a member of Class 9. From today on, you are our good comrade who shares joys and sorrows and lives and dies together. We did not share the past of Class 9, but we can write a brilliant future together!”

When he blew out the candle, Chen Jincheng’s eyes were a little wet. From that day on, Chen Jincheng made “being a good soldier and adding luster to the collective” his goal.

“During that time, all I thought about was how to improve my training results.” During the day, Chen Jincheng sweated profusely on the training ground; at night, he worked overtime in the study room to learn theoretical knowledge. In order to help Chen Jincheng improve his training results, the squad leader also tailored a “growth and advancement plan” for him and worked with him to specialize in training. After a period of hard work, Chen Jincheng’s training results have steadily improved.

“Our goal is to select the right ‘soil’ for the new recruits to thrive.” The brigade leader said that since the implementation of the “troop adaptation mechanism”, the post adaptation rate and professional qualification rate of new recruits have increased significantly, and the talent growth cycle has been significantly shortened, forming a good atmosphere of “people are fully utilized and talents are fully utilized”. At present, the brigade is working on building a “digital archive of soldier growth” to provide data support for further improving the degree of human-post adaptation, and strive to cultivate more combat-oriented talents who are adaptable to job requirements and have strong skills and work styles.

陆军某旅用好红色资源优势深化教育实践活动

来源：解放军报 作者：臧朔阳 黄昆仑 童祖静 责任编辑：王一亘 2025-04-20

陆军某旅用好红色资源优势深化教育实践活动——

赓续英雄血脉 凝聚攻坚力量

■臧朔阳 解放军报记者 黄昆仑 特约记者 童祖静

“一江山岛战役中，连队前身部队作为我军第一支喷火分队，配属步兵一同发起冲锋……”

近日，记者走进陆军某旅某连学习室，一堂”云端”教育课正在进行。视频另一端，该旅派出的”寻根小分队”官兵在一江山岛登陆战纪念馆里，以视频直播的方式，带领连队学习室内的官兵进行线上参观，回顾该连前身部队在一江山岛战役中担任破阵先锋的战斗经历，在传承先辈战斗精神中不断砥砺敢于斗争、敢于胜利的血性胆魄。

这是该旅聚焦”铸牢政治忠诚、打好攻坚之战”深化教育实践活动的生动一幕。

“‘先锋精神’是我们能打胜仗的根与魂。”该旅政治工作部领导介绍，旅队诞生于抗日战争的烽火硝烟中，在长期战斗历程中熔铸形成了”铁心向党、为战而备、不怕牺牲、勇当先锋”的”先锋精神”。这一优良传统，成为激励一代代官兵在强军路上奋勇争先的动力源泉，也是深化教育实践活动的宝贵教材。

为进一步弘扬”先锋精神”，提升深化教育实践活动质效，他们在全旅遴选多名官兵成立”先锋”理论宣讲服务队，深入基层一线开展理论宣讲；组织”强军有我、请党放心”故事分享会，邀请旅队精武标兵、有成边经历的官兵等”先锋”代表，登台分享奋斗经历；积极开展”先锋”人物评选活动，大力宣传先进典型事迹，激励官兵对标先进、争当先锋。

“这块石头来自海拔 3800 多米的某号界碑附近，是在边防的战友给我寄来的。那里没有花繁叶茂，遍布被风雕刻过的石头。”分享交流中，从高原边防部队到该旅任职不久的某连

副连长，拿出一块棱角分明的石头，向大家动情地讲述边防官兵抗严寒、斗风雪的感人故事。

“去年野外驻训时间长，大家普遍感觉很苦很累，但跟边防战友们比起来，这点苦累算不了什么。”上等兵雷猛听后表示，一定当好”先锋精神”传人，练强打赢本领。

赓续英雄血脉，凝聚攻坚力量。采访中，记者了解到，在深化教育实践活动中，该旅紧贴备战打仗实际、突出实践导向，结合旅队武器装备更新、战法训法升级、作战能力跃升等变化，区分不同层级，围绕”奋斗攻坚怎么看、岗位建功怎么干”广泛开展群众性讨论活动，进一步树牢打仗意识；组织官兵走进驻地先进实验室等场所参观见学，在感受科技快速发展中坚定强军信念；邀请部队院校专家围绕”树立人民军队好样子”等主题进行授课辅导，引导官兵深刻感悟人民军队转型发展的伟大成就，永葆本色作风。

“强军事业是干出来的，我们要当好战斗力建设的’螺丝钉’”“作为新时代的参与者、创造者、见证者，我们要在强军实践中书写精彩人生篇章”……点击该旅强军网，记者在聚焦”铸牢政治忠诚、打好攻坚之战”深化教育实践活动的专题页面上看到，百余条学习体会滚动展示，诉说着该旅官兵强军必成的坚定信念和奋斗攻坚的决心意志。

A Certain Army Brigade Makes Good Use of the Advantages of Red Resources to Deepen the Educational Practice Activities

Source: PLA Daily Author: Zang Shuoyang Huang Kunlun Tong Zujing Editor: Wang Yigeng 2025-04-20

A certain army brigade makes good use of the advantages of red resources to deepen the educational practice activities——

Continue the bloodline of heroes and gather the strength of attack

■ Zang Shuoyang PLA Daily reporter Huang Kunlun Special reporter Tong Zujing

“In the Yijiangshan Island battle, the predecessor of the company was the first flamethrower of our army, and the infantry launched a charge together...”

Recently, the reporter walked into the study room of a certain company of a certain army brigade, and a “cloud” education class was in progress. On the other side of the video, the “root-seeking team” sent by the brigade led the officers and men in the company’s study room to visit the Yijiangshan Island Landing Battle Memorial Hall online in the form of live video broadcast, reviewing the combat experience of the predecessor of the company as a pioneer in the Yijiangshan Island battle, and constantly sharpening the courage to fight and win in the inheritance of the fighting spirit of the predecessors.

This is a vivid scene of the brigade's focus on "forging political loyalty and fighting a tough battle" to deepen the educational practice activities.

"'Pioneer spirit' is the root and soul of our ability to win the battle." The leader of the brigade's political work department introduced that the brigade was born in the flames of the Anti-Japanese War, and in the long-term fighting process, it has forged the "pioneer spirit" of "loyal to the party, prepared for war, not afraid of sacrifice, and bravely being a pioneer". This fine tradition has become a source of motivation for generations of officers and men to strive for the first place on the road to strengthening the army, and it is also a valuable teaching material for deepening the educational practice activities.

In order to further carry forward the "pioneer spirit" and improve the quality and effectiveness of deepening the educational practice activities, they selected a number of officers and men in the brigade to form a "pioneer" theory propaganda service team, and conducted theoretical propaganda at the grassroots level; organized a "Strong Army has me, please rest assured the party" story sharing meeting, and invited the brigade's elite soldiers, officers and men with border defense experience and other "pioneer" representatives to share their struggle experiences on stage; actively conducted the "pioneer" character selection activities, vigorously publicized advanced typical deeds, and encouraged officers and men to benchmark advanced and strive to be pioneers.

"This stone comes from a certain boundary marker at an altitude of more than 3,800 meters. It was sent to me by a comrade on the border. There are no flowers and leaves there, and there are stones carved by the wind." During the sharing and exchange, a deputy company commander who had just taken office in the brigade from the plateau border defense force took out a sharp-edged stone and told everyone the touching story of the border guards fighting the severe cold and the snowstorm.

"Last year, the field training last year was long, and everyone generally felt very bitter and tired, but compared with the border comrades, this little bit of hardship is nothing." After hearing this, Corporal Lei Meng said that he must be a good successor of the "pioneer spirit" and practice to strengthen his ability to win.

Continue the blood of heroes and gather strength to attack. During the interview, the reporter learned that in deepening the educational practice activities, the brigade closely followed the actual preparation for war, highlighted the practice orientation, combined with the brigade's weapons and equipment updates, tactics and training upgrades, combat capability leaps, and other changes, distinguished different levels, and conducted extensive mass discussion activities around "how to look at the struggle and how to make contributions at the post", further strengthening the awareness of fighting; organized officers and men to visit advanced laboratories and other places in the garrison, and strengthened the belief in strengthening the army while experiencing the rapid development of science and technology; invited military academy experts to give lectures and guidance on themes such as "establishing a good image of the people's army", and guided officers

and men to deeply appreciate the great achievements of the transformation and development of the people's army, and always maintain their true colors and style.

"The cause of strengthening the military is achieved through hard work. We must serve as good 'screws' in building combat effectiveness." "As participants, creators and witnesses of the new era, we must write wonderful chapters of life in the practice of strengthening the military." Clicking on the brigade's military strengthening website, the reporter saw on the special page focusing on the deepening of the education and practice activities of "forging firm political loyalty and fighting tough battles" that more than a hundred learning experiences were displayed in a rolling manner, telling of the brigade's officers and men' firm belief in strengthening the military and their determination and will to fight and overcome difficulties.

陆军某旅 "绑绳搭档"互帮互助共同进步

来源：解放军报 作者：王成业 贾鹏飞 责任编辑：林诗清 2025-04-20

互帮互助 共同进步

"绑绳搭档"同时实现军衔晋升

解放军报讯 王成业、贾鹏飞报道："中士刘明全晋升二级上士军衔。""上等兵姜海洋晋升下士军衔。"仲春时节，陆军某旅组织了一场晋衔仪式，战士刘明全与姜海洋并肩走上台。这对训练中的"绑绳搭档"同时晋升军衔，是该旅"以老带新、以新促老，双向带动、共同促进"活动成效的生动例证。

该旅领导介绍，近年来，他们大力发扬"三大互助"传统，探索推出"思想互助结对子、训练互助搭班子、任务互助挑担子"机制。他们遴选出多名专业能手组成"种子人才库"，按照"双向选择、合理搭配"原则，让专业能手们与官兵组成帮带对子，利用平时训练、执行大项任务等时机，共享训练经验、共克训练难题、共同成长进步。刘明全与姜海洋就是其中一对。

姜海洋初入军营时，队列动作不协调、体能考核"吊车尾"。为了帮助姜海洋克服短板不足，刘明全悉心讲解动作要领、分享训练经验，帮他克服痼癖动作。训练时，刘明全将背包绳分别系在他与姜海洋的腰间，带着姜海洋加练 3000 米跑。在刘明全的倾心帮助下，姜海洋 3000 米跑成绩进步明显，被连队评为"训练之星"，他们俩也被战友们称为"绑绳搭档"。

"我在帮带姜海洋成长的同时，自己也在逐渐进步。"谈及"绑绳搭档"，刘明全说，去年实弹射击考核，他首次担任炮长，内心有些紧张。姜海洋察觉到刘明全的情绪变化，不仅主动陪刘明全散步聊天，还拉着他反复研练流程，帮助刘明全增加完成任务的信心。考核当天，刘明全指挥班组沉着操作、密切配合，精准命中靶标。

“绑绳搭档”书写精武佳话。笔者在采访期间了解到，该旅已经组建百余组帮带对子，大家互帮互助、你追我赶，比学赶帮超氛围更加浓厚。

The “Tied Rope Partners” of a Certain Army Brigade Help Each Other and Make Progress Together

Source: PLA Daily Author: Wang Chengye Jia Pengfei Editor: Lin Shiqing 2025-04-20

Help each other and make progress together

“Tied rope partners” achieve military rank promotion at the same time

PLA Daily News Wang Chengye and Jia Pengfei reported: “Sergeant Liu Mingquan was promoted to the rank of second-class sergeant.” “Private First Class Jiang Haiyang was promoted to the rank of corporal.” In mid-spring, a certain army brigade organized a promotion ceremony, and soldiers Liu Mingquan and Jiang Haiyang walked onto the stage side by side. This pair of “tied rope partners” in training were promoted to military ranks at the same time, which is a vivid example of the effectiveness of the brigade’s “old leads the new, the new promotes the old, two-way drive, and common promotion” activities.

The leaders of the brigade introduced that in recent years, they have vigorously carried forward the tradition of “three major mutual assistance” and explored and launched the mechanism of “pairing up for ideological mutual assistance, training mutual assistance team building, and task mutual assistance burden”. They selected a number of professional experts to form a “seed talent pool”. According to the principle of “two-way selection and reasonable matching”, professional experts and officers and men were paired to help each other. They took advantage of opportunities such as daily training and the execution of major tasks to share training experience, overcome training difficulties, and grow and progress together. Liu Mingquan and Jiang Haiyang are one of them.

When Jiang Haiyang first entered the barracks, his queue movements were not coordinated and his physical fitness assessment was “the last one”. In order to help Jiang Haiyang overcome his shortcomings, Liu Mingquan carefully explained the key points of the movements, shared training experience, and helped him overcome his habitual movements. During training, Liu Mingquan tied the backpack ropes around his waist and Jiang Haiyang’s waist respectively, and took Jiang Haiyang to practice 3,000 meters. With Liu Mingquan’s dedicated help, Jiang Haiyang’s 3,000-meter running performance improved significantly, and he was named “Training Star” by the company. The two of them were also called “Rope Tie Partners” by their comrades.

“While I was helping Jiang Haiyang grow, I was also gradually improving myself.” Speaking of the “rope-binding partner”, Liu Mingquan said that he was a little nervous when he served as the gunner for the first time in the live-fire shooting assessment last year. Jiang Haiyang noticed Liu Mingquan’s emotional changes, and not only took the initiative to accompany Liu Mingquan for a

walk and chat, but also took him to repeatedly practice the process to help Liu Mingquan increase his confidence in completing the task. On the day of the assessment, Liu Mingquan commanded the team to operate calmly, cooperate closely, and accurately hit the target.

“Rope-binding partners” write a good story of Jingwu. During the interview, the author learned that the brigade has formed more than 100 pairs of helping pairs, and everyone helps each other and chases each other, and the atmosphere is even stronger than learning, catching up, helping, and surpassing.

陆军某旅“00 后”双胞胎兄弟携手互助成为训练尖子

来源：解放军报 作者：屈凯明 张克诚 责任编辑：林诗清 2025-04-20

双向奔赴 相互成就

“龙兄虎弟”携手成为训练尖子

解放军报讯 屈凯明、张克诚报道：3 月中旬，陆军某旅训练场上，一对双胞胎兄弟格外引人注目。400 米障碍训练区域内，哥哥刘贺新为新战友讲解动作要领，赢得阵阵掌声；3000 米跑赛道上，弟弟刘贺千夺得连队第一名。

“刘贺新、刘贺千这对’00 后’双胞胎兄弟，入伍 3 年双双跻身训练尖子行列，是旅队发扬’三帮一带’传统的鲜活写照。”该旅领导介绍，近年来，他们深入发扬”帮思想进步、帮技能提高、帮身心健康、带优良作风”传统，让官兵在互帮互助、互学互促中实现能力升级。

下连之初，隶属不同连队的两兄弟曾出现不同程度的”水土不服”：刘贺新体能成绩屡屡垫底，刘贺千专业考核多次亮起”红灯”。连队骨干在了解情况后，分别主动靠上去谈心交心，帮他们分析问题原因、缓解心理压力。在进一步了解他们新训期间表现、个人特长等情况后，两个连队按照旅队”三帮一带”要求，遴选训练骨干与他们结成帮扶对子。此外，两个连队还创新帮带方式，让两兄弟结成互助对子，分享训练经验、彼此取长补短。平时训练中，刘贺新体能偏弱，刘贺千便将自己的体能训练经验分享给哥哥；刘贺千专业考核成绩不理想，刘贺新总给弟弟加油鼓劲。

经过一段时间努力，两兄弟训练成绩均有所提升，刘贺千 3000 米跑成绩进步明显，在旅队军事运动会崭露头角。刘贺新体能成绩稳步提升的同时，充分发挥自身绘画特长，绘制的连队系列主题板报，赢得战友们点赞。去年底，因综合表现突出，刘贺新获得嘉奖，刘贺千被评为”四有”优秀士兵，战友们说：”为咱旅的’龙兄虎弟’点赞！”

The Twin Brothers Born in the 2000s in a Certain Army Brigade Join Hands to Help Each Other and Become Top Trainees

Source: PLA Daily Author: Qu Kaiming Zhang Kecheng Editor: Lin Shiqing 2025-04-20

Running in both directions and achieving each other

“Brothers and sisters” join hands to become top trainees

PLA Daily News Qu Kaiming and Zhang Kecheng reported: In mid-March, a pair of twin brothers were particularly eye-catching on the training ground of a certain army brigade. In the 400-meter obstacle training area, the elder brother Liu Hexin explained the essentials of the movements to his new comrades and won rounds of applause; on the 3,000-meter racetrack, the younger brother Liu Heqian won the first place in the company.

“Liu Hexin and Liu Heqian, the twin brothers born in the 2000s, have both become top trainees in three years of enlistment, which is a vivid portrayal of the brigade’s tradition of “three helping and one leading.” The leaders of the brigade introduced that in recent years, they have deeply carried forward the tradition of “helping ideological progress, helping skills improvement, helping physical and mental health, and leading good work style”, so that officers and men can achieve capacity upgrades through mutual help, mutual learning and mutual promotion.

At the beginning of the company, the two brothers who belonged to different companies had different degrees of “not adapting to the local environment”: Liu Hexin’s physical fitness scores were repeatedly at the bottom, and Liu Heqian’s professional assessments repeatedly turned on the “red light”. After understanding the situation, the backbones of the company took the initiative to approach them and talk to them, helping them analyze the causes of the problems and relieve psychological pressure. After further understanding their performance during the new training, personal expertise, etc., the two companies selected training backbones to form a pair of assistance with them in accordance with the brigade’s “three help and one lead” requirements. In addition, the two companies also innovated the way of helping and leading, allowing the two brothers to form a mutual assistance pair, share training experience, and learn from each other. In normal training, Liu Hexin’s physical fitness was weak, so Liu Heqian shared his physical training experience with his brother; Liu Heqian’s professional assessment results were not ideal, and Liu Hexin always cheered his brother up. After a period of hard work, the training results of the two brothers have improved. Liu Heqian’s 3,000-meter run has improved significantly, and he has emerged in the brigade’s military games. While Liu Hexin’s physical fitness has been steadily improving, he has also made full use of his painting skills to draw a series of company-themed bulletin boards, which have won praise from his comrades. At the end of last year, Liu Hexin was commended for his outstanding overall performance, and Liu Heqian was named an excellent soldier with “four qualities”. His comrades said, “Thumbs up for our ‘dragon brothers and tiger brothers’!”

第 82 集团军某旅提升党员教育管理质效的探索实践

来源：解放军报 作者：姚欣彤 郑云皓 责任编辑：王一亘 2025-04-21

激发每一名党员的动力活力

——第 82 集团军某旅提升党员教育管理质效的探索实践

■姚欣彤 郑云皓

党员是党的肌体细胞和党的活动的主体。把党员队伍建设好，把广大党员先锋模范作用发挥好，部队就有了骨干力量，完成任务就有了重要依托。在新时代背景下，提升党员教育管理质效，是部队基层党组织一项十分重要的工作。

一名党员一盏灯，一名党员一面旗。第 82 集团军某旅不断探索加强党员教育管理的招法，通过全方位强化思想淬炼、政治历练、实践锻炼和专业训练，教育引导广大党员认真履职、勇于担当，锤炼平常时候看得出来、关键时刻站得出来、危急关头豁得出来的素质和能力，真正立起党员的好样子。他们的探索实践值得借鉴。

——编 者

探索① 明晰培养方向 助力成长成才

“一人一策”精准培养党员

前不久，在第 82 集团军某旅一场实战化训练中，某连党员骨干刘斌带领全班战士穿插”敌”后，高标准完成上级赋予的任务。训练结束，刘斌没有喜形于色，而是立即带领大家复盘总结，认真分析经验、讨论战法。

“有了党支部的’一人一策’，我能更好找准定位，发挥长处。”刘斌说，这是自己能在任务中表现突出的一个重要原因。

“党员队伍建设既要靠思想引领铸魂，更要靠目标牵引赋能。”该连党支部书记张亚星介绍，为了让每名党员都能在组织中找准定位、发挥作用，连队党支部在旅队指导下，探索”一人一策”党员精准培养模式。他们结合党员骨干实际，逐个制订包括党性修养、专业能力和育人能力等方面的目标实施计划表，细化为季度清单、年度目标和阶段规划，帮助党员全面提升能力素质、更好履行党员义务。

带领党员突击队仅用一个多月就完成全连装备系统更新；在一次任务中带队前出侦察抓获”敌”目标；先后两次荣立三等功……刘斌的成长经历，就是”目标激励”的一个生动样本。

“从普通战士成长为连队骨干，并非一帆风顺，自己也曾一度对军旅之路感到困惑迷茫。”刘斌坦言，是党组织及时了解他的思想，帮他明晰了冲锋方向，激发了奋进动力。

笔者翻开笔记本，党支部为他量身制订的阶段培养计划清晰明确：第一阶段，完成职业技能鉴定二级认证；第二阶段，考取特级车长资格；第三阶段，带出 3 名骨干接班人。如今，刘斌的三个阶段成长目标都已完成，正在党支部指导下思考制订新的目标。

作为连队重点培养的技术型人才，该连火炮技师、党员蒋亚楠也有着明确的”三步走”计划：从夯实基础，到专攻技术，再到创新突破，每一步都十分扎实。为鼓励帮助他达成目标，党支部推荐他参加旅级专业骨干集训，并赴战区级单位培训学习。学成归来，蒋亚楠不仅当上连队教练员，还成为全旅炮手专业的”首席教练员”，带出一批优秀学员。

对党员进行目标激励时，该旅要求各级党组织注重”三个结合”：将个人目标与单位建设相结合；把党员承诺与战备任务相结合；把短期激励与长期培养相结合。如今，很多基层党组织每季度组织党员先锋论坛分享经验，每半年评选”攻坚克难标兵”，让目标激励转化为看得见、摸得着的实践成果。

“清晰的目标就像灯塔，指引航向，激发着每一名党员强能力、打头阵、当先锋的动力活力。”该旅领导介绍，下一步，旅里将继续引导基层党支部以目标为牵引，为每一名党员明晰方向，激励党员队伍不断成长进步，营造比学赶帮超的良好氛围。

探索② 主动反躬自省 强化示范引领

党员骨干编入”三互小组”

采访中，笔者发现在该旅基层部队，每个”三互小组”基本都有一名党员。党员不仅在理论学习、作风养成等方面成为官兵身边的榜样，更要在日常训练和大项任务中发挥模范带头作用。

“无论何时何地，都要引导党员能够站得出来、顶得上去。”对此，该旅一名党委领导很有感触。

此前有段时间，大项任务压茬推进，个别基层党员骨干产生了畏难情绪。为此，旅党委研究决定，对基层”三互小组”重新编组，确保每个小组都有党员加入，让他们既能在平时帮带身边战友，在任务中带头攻克难关，又能时刻接受大家督促，始终牢记身份，保持先进性。

那一次，某连在演训中执行破障任务，由于”敌”火力猛烈，人员损失严重，最后仅剩党员宋海傲所在的战斗小组。面对险局，宋海傲临危不乱，带领小组 4 人紧密配合，成功完成任务。走下训练场，小组成员感慨，在党员示范引领下，”三互小组”日常注重团结协作，这次才能发挥出最大威力。

为进一步发挥”三互小组”效能，该旅建立完善对党员骨干的监督机制，定期组织小组成员对党员骨干先锋模范作用和实际表现进行评议，提出意见建议，加强整改监督。

“三互小组”既是发挥党员先进作用的阵地，也是强化党员自身能力的平台。有段时间，某”三互小组”组长韩泺发现新兵小李情绪低落。找战友侧面了解得知，小李入伍后体能考核成绩一直徘徊在及格线，拖了小组后腿。小李感到自己虽然一直在苦练，但不得要领，成绩始终没有明显提升，被组长批评了几次开始心灰意冷。

得知实情后，韩泺意识到自己的带兵方式有问题，由此进行了深刻反思。从那之后，他主动改变谈心谈话方式，经常靠上去了解小李的情况和需求，并陪他一起练习，教他体能训练技巧。

既帮助指出分析问题，也帮助提供整改思路措施，这让战士更易于接受。前不久，在韩泺和身边战友帮助下，小李的体能成绩终于步入优秀行列。

韩泺说，这种监督与自我监督相结合的方式，让党员在小组中既有压力也有动力，能够更加自觉主动反躬自省，进一步发挥好模范带头作用。

如今，该旅基层党员骨干在演训考核、重要任务中，能够主动帮助团员、群众，形成了互学、互帮、互教的良好氛围。在最近一次专业技能课目抽考中，该旅官兵优良率较以往又有提升。

探索③ 加强思想淬炼 提高党性修养

党员登台讲好”一人一课”

“记得刚成为入党积极分子时，我还是一名下士，当时就觉得党员光荣，无论如何也要加入党组织，连队有工作就抢着干，有任务就抢着上……”仲春时节，在该旅某连党团活动中，有着 12 年党龄的一级上士阳世杰通过讲述自己的入党经历，为大家上了一堂”微党课”，很多战友深受触动。

该连党支部书记李继祥介绍，邀请党员上台讲授”微党课”，已从他们连队推广开来，成为各连一个普遍做法。

此前一次训练，李继祥发现连队一名老骨干训练不积极，就上前进行批评提醒。可对方却表示，自己马上就要退伍了，只想安安稳稳就好。

在位一分钟，干好六十秒。李继祥剖析感到，”安安稳稳”的背后是党性弱化，如何帮助这类党员找回入党初心、提振奋斗干劲，是亟待解决的问题。他立即带领支委深入调研，拿出针对性措施。其中，组织党员登上”微党课”讲台，是一个重要抓手。

具体实践中，他们鼓励引导党员轮流站上讲台，既可以围绕党的创新理论、党史军史等内容进行授课，也可以结合自己的入党初心、成长经历以及工作实践进行讲述。这种”一人一课”的形式，不仅丰富了党员教育形式，还能让党员在备课授课中对照反思检视自己的党性修养和现实表现。

前不久一次教育中，某连一级上士王欣走上讲台，讲述自己在集团军比武中通过刻苦训练、认真钻研，在装备落后的情况下以弱胜强，获得第一名，荣立二等功的经历。

“我在入党时就告诉自己，无论何时何地都要勇于挑战自己，攻坚克难、奋勇冲锋的脚步不能停。这些年，我常对照反思，感觉一有懈怠就督促自己抓紧改正……”课堂上，王欣的讲述让很多战友受到启发。几名老党员表示，不能因为党龄长了、当兵久了就弱化党性锻炼，放松自我要求，而应更好发挥党员模范带头作用，成为身边战友的表率。

把每一次授课都当作是一次心灵的检视和洗礼。为进一步增强”微党课”的实效性、感召力，该旅鼓励各连队根据实际创新授课形式。比如，有的党员通过情景模拟，再现入党宣誓的庄严时刻；有的则采用互动问答，激发大家的思考和讨论，等等。

经过实践探索，该旅党员队伍的精神状态明显提振，干事创业的热情进一步高涨。前不久，该旅赴野外开展驻训，在远程投送过程中，到处能看到党员骨干的身影，他们站排头、冲在前，带领身边战友圆满完成任务，受到上级肯定。

The Exploration and Practice of Improving the Quality and Efficiency of Party Member Education and Management by a Certain Brigade of the 82nd Group Army

Source: PLA Daily Author: Yao Xintong Zheng Yunhao Editor: Wang Yigeng 2025-04-21

Inspire the motivation and vitality of every party member

——The exploration and practice of improving the quality and efficiency of party member education and management by a certain brigade of the 82nd Group Army

■Yao Xintong Zheng Yunhao

Party members are the body cells of the party and the main body of party activities. If we build a good team of party members and give full play to the vanguard and exemplary role of the majority of party members, the troops will have backbone forces and have an important support for completing tasks. In the context of the new era, improving the quality and efficiency of party member education and management is a very important task for the grassroots party organizations of the troops.

A party member is a lamp, and a party member is a flag. A certain brigade of the 82nd Group Army continues to explore ways to strengthen the education and management of party members. Through

all-round strengthening of ideological tempering, political experience, practical training and professional training, it educates and guides the majority of party members to perform their duties conscientiously and be brave to take responsibility, temper the qualities and abilities that can be seen in normal times, stand up at critical moments, and be willing to sacrifice at critical moments, and truly set up a good example for party members. Their exploration and practice are worth learning from.

——Editor

Exploration① Clarify the training direction to help grow and become a talent

"One person, one policy" to accurately train party members

Not long ago, in a combat training of a brigade of the 82nd Army Group, Liu Bin, a party member of a company, led the whole class of soldiers to penetrate the "enemy" and completed the tasks assigned by the superiors with high standards. After the training, Liu Bin did not show his joy, but immediately led everyone to review and summarize, carefully analyze the experience and discuss tactics.

"With the 'one person, one policy' of the party branch, I can better find my position and play my strengths." Liu Bin said that this is an important reason why he can perform outstandingly in the task.

"The construction of the party member team must rely on ideological guidance to cast the soul, and more importantly, it must rely on goal-driven empowerment." Zhang Yaxing, secretary of the company's party branch, introduced that in order to enable each party member to find their position and play a role in the organization, the company's party branch, under the guidance of the brigade, explored the "one person, one policy" precise training model for party members. Based on the actual situation of the party members, they formulated a target implementation plan table including party spirit cultivation, professional ability and education ability, which was refined into quarterly lists, annual goals and stage plans to help party members comprehensively improve their abilities and better fulfill their obligations as party members.

He led the party member assault team to complete the equipment system update of the entire company in just over a month; he led the team to conduct reconnaissance and capture the "enemy" target in a mission; he was awarded the third-class merit twice... Liu Bin's growth experience is a vivid example of "goal motivation".

"It was not smooth sailing to grow from an ordinary soldier to a company backbone. I was once confused and confused about the military journey." Liu Bin frankly said that it was the party organization that understood his thoughts in time, helped him clarify the direction of the charge, and inspired the motivation to forge ahead.

The author opened the notebook and found that the stage training plan tailored for him by the party branch was clear and clear: in the first stage, complete the second-level certification of professional

skills appraisal; in the second stage, obtain the qualification of special car captain; in the third stage, bring out 3 backbone successors. Now, Liu Bin has completed all three stages of growth goals, and is thinking about setting new goals under the guidance of the party branch.

As a technical talent that the company focuses on training, Jiang Yanan, a gunner technician and party member of the company, also has a clear "three-step" plan: from consolidating the foundation, to specializing in technology, and then to innovative breakthroughs, each step is very solid. In order to encourage and help him achieve his goals, the party branch recommended him to participate in the brigade-level professional backbone training and go to the theater-level unit for training and study. After returning from school, Jiang Yanan not only became a company coach, but also became the "chief coach" of the gunner major of the entire brigade, bringing out a group of outstanding students.

When motivating party members with goals, the brigade requires party organizations at all levels to pay attention to "three combinations": combining personal goals with unit construction; combining party members' commitments with combat readiness tasks; combining short-term incentives with long-term training. Nowadays, many grassroots party organizations organize party member pioneer forums to share experiences every quarter, and select "model soldiers for overcoming difficulties" every six months, so that goal incentives can be transformed into visible and tangible practical results.

"A clear goal is like a lighthouse, guiding the direction, inspiring the motivation and vitality of every party member to strengthen their ability, take the lead, and be a pioneer." The brigade leader introduced that in the next step, the brigade will continue to guide the grassroots party branches to use the goal as a guide, clarify the direction for each party member, encourage the party members to continue to grow and progress, and create a good atmosphere of learning from each other and helping each other.

Exploration ② Actively reflect on oneself and strengthen demonstration and leadership

Party members are included in the "three mutual groups"

During the interview, the author found that in the grassroots units of the brigade, each "three mutual groups" basically has a party member. Party members not only become role models for officers and men in theoretical learning and style formation, but also play an exemplary role in daily training and major tasks.

"No matter when and where, we must guide party members to stand up and stand up." A party committee leader of the brigade was very touched by this.

There was a period of time before, when major tasks were pushed forward in succession, some grassroots party members and backbones developed a fear of difficulties. To this end, the brigade party committee decided to reorganize the grassroots "three mutual groups" to ensure that each group has party members, so that they can not only help their comrades around them in peacetime,

take the lead in overcoming difficulties in the mission, but also accept everyone's supervision at all times, always remember their identity, and maintain their advanced nature.

That time, a certain company performed an obstacle-clearing task during the exercise. Due to the fierce firepower of the "enemy", the personnel losses were serious, and only the combat group where party member Song Haiao was located was left. Faced with a dangerous situation, Song Haiao remained calm and led the four members of the team to work closely together to successfully complete the task. Walking off the training ground, the team members sighed that under the demonstration and guidance of party members, the "three mutual groups" paid attention to unity and cooperation on a daily basis, and this time they could play the greatest power.

In order to further give play to the effectiveness of the "three mutual groups", the brigade established and improved the supervision mechanism for party members and backbones, and regularly organized group members to evaluate the vanguard and exemplary role and actual performance of party members and backbones, put forward opinions and suggestions, and strengthen rectification and supervision.

The "three mutual groups" are not only a position for giving play to the advanced role of party members, but also a platform for strengthening the ability of party members themselves. For a while, Han Luo, the leader of a "three-way interaction group", found that the new recruit Xiao Li was in a low mood. After finding out from his comrades, he learned that Xiao Li's physical fitness test scores had been hovering around the passing line after joining the army, dragging the group down. Xiao Li felt that although he had been practicing hard, he did not get the point, and his scores had not improved significantly. He began to feel discouraged after being criticized by the team leader several times.

After learning the truth, Han Luo realized that there was a problem with his way of leading soldiers, and he reflected deeply on it. Since then, he has taken the initiative to change the way of talking and often approached Xiao Li to understand his situation and needs, and practiced with him and taught him physical training skills.

Not only did he help point out and analyze problems, but he also helped provide ideas and measures for rectification, which made it easier for soldiers to accept. Not long ago, with the help of Han Luo and his comrades, Xiao Li's physical fitness scores finally entered the ranks of excellence.

Han Luo said that this combination of supervision and self-supervision allows party members to have both pressure and motivation in the group, and to be more conscious and proactive in self-examination, and further play a good role as a model leader.

Nowadays, the grassroots party members and backbones of the brigade can take the initiative to help the league members and the masses in the training and assessment and important tasks, forming a good atmosphere of mutual learning, mutual help and mutual teaching. In the latest professional skills test, the excellent rate of officers and men of the brigade has improved compared with the past.

Exploration ③ Strengthen ideological tempering and improve party spirit cultivation

Party members go on stage to give a good "one lesson for one person"

"I remember when I just became an active member of the party, I was still a corporal. At that time, I felt that it was glorious to be a party member. I had to join the party organization anyway. I rushed to do the work and the tasks in the company..." In mid-spring, during the party and league activities of a company in the brigade, Yang Shijie, a first-class sergeant with 12 years of party membership, gave everyone a "micro party class" by telling his experience of joining the party. Many comrades were deeply touched.

Li Jixiang, secretary of the party branch of the company, introduced that inviting party members to give "micro party classes" on stage has been promoted from their company and has become a common practice in each company.

In a previous training session, Li Jixiang found that an old backbone of the company was not active in training, so he stepped forward to criticize and remind him. But the other party said that he was about to retire and just wanted to live a stable life.

One minute in office, sixty seconds of good work. Li Jixiang analyzed that behind the "stable and stable" is the weakening of party spirit. How to help such party members find their original intention of joining the party and boost their fighting spirit is an urgent problem to be solved. He immediately led the branch committee to conduct in-depth research and come up with targeted measures. Among them, organizing party members to take the "micro-party class" podium is an important starting point.

In specific practice, they encourage and guide party members to take turns to stand on the podium. They can not only teach about the party's innovative theories, party history and military history, but also tell stories based on their original intention of joining the party, their growth experience and their work practice. This form of "one person, one lesson" not only enriches the form of party member education, but also allows party members to reflect and examine their party spirit cultivation and actual performance in class preparation and teaching.

In a recent education session, Wang Xin, a first-class sergeant of a certain company, took to the podium and told about his experience of winning the first place and winning the second-class merit in the group army competition through hard training and serious research, despite backward equipment.

"When I joined the party, I told myself that I must have the courage to challenge myself at any time and in any place, and I must not stop my pace of overcoming difficulties and charging forward bravely. Over the years, I often reflect on myself and urge myself to correct myself as soon as I feel slack..." In the classroom, Wang Xin's story inspired many comrades. Several old party members said that they should not weaken their party spirit training and relax their self-requirements just because they have been in the party for a long time and have served in the army

for a long time, but should better play the exemplary role of party members and become a role model for their comrades around them.

Treat every lecture as a spiritual examination and baptism. In order to further enhance the effectiveness and appeal of “micro party classes”, the brigade encourages each company to innovate the teaching form according to actual conditions. For example, some party members simulated situations to recreate the solemn moment of the oath of joining the party; some used interactive questions and answers to stimulate everyone’s thinking and discussion, etc.

After practical exploration, the mental state of the brigade’s party members has been significantly boosted, and their enthusiasm for doing things and starting businesses has further increased. Not long ago, the brigade went to the field for training. During the long-distance delivery process, the figures of party members and backbones could be seen everywhere. They stood in the front and led their comrades to successfully complete the task, which was affirmed by their superiors.

第七十九集团军某旅扎实开展“三互”活动,在取长补短中进步

来源：解放军报 作者：刘冠良 海洋 责任编辑：王一亘 2025-04-21

第七十九集团军某旅扎实开展”三互”活动——

编组科学灵活 训练取长补短

■刘冠良 解放军报特约记者 海 洋

暮春时节，第 79 集团军某旅野外综合训练场上硝烟弥漫，一场战斗射击考核火热展开。

“优秀！”考核成绩揭晓，该旅某连炮手刘睿脸上露出欣慰的笑容。走下战车，刘睿所在”三互”小组组长、车长苑振文朝他竖起大拇指。

“刘睿训练成绩快速提升，得益于我们坚持把’三互’活动与军事训练紧密结合，通过灵活编组、科学搭配，缩短了能力生成周期。”现场组训的该连王连长告诉记者。

前期，专业训练展开后，刘睿所在”三互”小组进行过两次调整：基础训练阶段，连队按专业为官兵编组，指派两名专业骨干与他组成”三互”小组，手把手指导帮带，帮助他打牢专业能力基础；射击课目展开后，改为按车组编组，将一个战斗车组编为一个”三互”小组，他与车组成员围绕协同配合展开专攻精练，提升了综合能力。

该旅领导介绍，他们按照”动态调整、灵活运行、常态激励、支部统管”原则，指导营连开展互学、互帮、互教”三互”活动。他们采取按建制编组、编制岗位编组、独立执勤点编组、临时任务分队编组等方式，科学编配”三互”小组、灵活开展”三互”活动，做到感知问题及时精准、解难帮困直达末端，帮助官兵快速提升训练成绩。

前不久，该旅组织坦克和步战车分队到野外驻训场开展专业训练。因人员和场地相对分散，以往按建制班排编配”三互”小组的方式难以满足任务需要。为此，分队结合任务实际灵活调整编组模式，按照”强弱搭配”原则，将训练基础薄弱的战士与能力素质过硬的专业骨干搭配编组，大家在取长补短中共同进步，不仅提升了军事训练成绩，还密切了新老兵之间的关系。

A Brigade of the 79th Group Army Solidly Conducted the “Three Mutual” Activities and Made Progress in Learning from Each Other’s Strengths

Source: PLA Daily Author: Liu Guanliang Haiyang Editor: Wang Yigeng 2025-04-21

A brigade of the 79th Group Army solidly conducted the “three mutual” activities-

Scientific and flexible organization, training to learn from each other’s strengths and make up for each other’s weaknesses

■Liu Guanliang, special correspondent of the PLA Daily Haiyang

In late spring, the field comprehensive training ground of a brigade of the 79th Group Army was filled with smoke, and a combat shooting assessment was launched.

“Excellent!” The assessment results were announced, and Liu Rui, a gunner of a company of the brigade, showed a gratified smile on his face. After getting off the tank, Yuan Zhenwen, the leader of Liu Rui’s “three mutual” group and the driver, gave him a thumbs up.

“Liu Rui’s training results have improved rapidly, thanks to our insistence on closely combining the “three mutual” activities with military training, and shortening the ability generation cycle through flexible organization and scientific matching.” The company commander Wang, who organized the training on the spot, told reporters.

In the early stage, after the professional training started, Liu Rui’s “three mutual” group was adjusted twice: in the basic training stage, the company organized officers and men according to their professions, and assigned two professional backbones to form a “three mutual” group with him to guide and help him lay a solid foundation for professional ability; after the shooting course started, it was changed to group by vehicle crew, and a combat vehicle crew was organized into a “three mutual” group. He and the crew members conducted specialized training around coordination and cooperation, and improved their comprehensive ability.

The leaders of the brigade introduced that they guided the battalion and company to carry out “three mutual” activities of mutual learning, mutual help and mutual teaching in accordance with the principles of “dynamic adjustment, flexible operation, normal incentives, and branch management”. They adopted the methods of grouping by organization, grouping by establishment positions, grouping by independent duty points, and grouping by temporary task teams,

scientifically assigned “three mutual” groups, flexibly conducted “three mutual” activities, and achieved timely and accurate perception of problems, and solved difficulties and difficulties directly to the end, helping officers and men to quickly improve their training results.

Not long ago, the brigade organized tank and infantry fighting vehicle teams to carry out professional training at the field training ground. Due to the relatively scattered personnel and venues, the previous method of arranging “three-way” teams according to the established squads and platoons was difficult to meet the needs of the task. To this end, the team flexibly adjusted the teaming mode based on the actual task, and in accordance with the principle of “strong and weak matching”, the soldiers with weak training foundations were matched with professional backbones with strong capabilities and qualities. Everyone made progress together by learning from each other’s strengths and weaknesses, which not only improved the military training results, but also strengthened the relationship between new and old soldiers.

陆军某旅组织多兵种合成训练见闻

来源：解放军报 作者：吴绍鑫 韩 帅 责任编辑：林诗清 2025-04-21

立体出击 协同制胜

——陆军某旅组织多兵种合成训练见闻

■吴绍鑫 解放军报特约通讯员 韩 帅

装甲集群突击、防空火力拦截……近日，陆军某旅训练场上硝烟弥漫、战车轰鸣，一场复杂电磁环境下的多兵种合成训练拉开序幕。

“蓝方已占领三号阵地。”特情突至，红方指挥员认真研判态势后迅速下达指令：”侦察分队前出锁定目标，突击分队向三号阵地进攻！”

红方侦察分队闻令而动，操纵无人机对目标地域实施侦察；坦克、步战车组成的突击分队，快速向三号阵地发起进攻……笔者在现场看到，多兵种力量密切配合、协同出击，侦察监视、装甲突进等行动连贯展开。

“遭’敌’强电磁干扰！”突然，红方指挥方舱显示屏上一片 “雪花”，通信中断。紧急关头，电子对抗分队迅速分析干扰频率，采用多种手段对”敌”进行电磁压制。与此同时，两架新型无人机呼啸起飞，架设新的通信链路，重新构建指挥网络，引导各分队高效行动。

“各作战要素只有融在一块，成为有机整体，才能攥指成拳，形成制胜合力。”该旅领导介绍，近年来，他们不搞”脚本化”训练，不设”套路化”特情，常态组织实兵对抗训练，不断提升部队实战能力。

一路突进，一路特情。”前方发现混合雷场。”红方突击分队将目标信息回传后，破障分队随即锁定目标区域，发射火箭爆破器开辟通路。”‘敌’无人机抵近侦察！”火力分队雷达显示屏上，数个目标点不断闪烁。官兵熟练操作，”敌”无人机很快被锁定。

战斗进入白热化阶段，蓝方依托装甲火力和坚固工事构筑防御阵地。”3 号坦克’中弹’，乘员’受伤’！”面对突发情况，红方立即派出装甲抢修分队前出处置，坦克很快继续投入战斗；卫勤分队同步展开战场救护。

随着侦察分队精准锁定”敌”火力点，将坐标信息快速回传至后方火力分队，数发炮弹呼啸而出，蓝方前沿防御阵地迅速瓦解。红方各战斗分队多路出击，直插蓝方腹地……

训练刚结束，复盘随即展开。参训官兵围绕训练中暴露出的问题展开研讨，并制订针对性整改措施，为下一步训练找准方向，用过硬本领锻造制胜铁拳。

A Certain Army Brigade Organizes Multi-Branch Combined Training

Source: PLA Daily Author: Wu Shaoxin Han Shuai Editor: Lin Shiqing 2025-04-21

Three-dimensional attack, coordinated victory

——A certain army brigade organizes multi-service combined training

■Wu Shaoxin PLA Daily Special Correspondent Han Shuai

Armored cluster assault, anti-aircraft fire interception...Recently, the training ground of a certain army brigade was filled with smoke and tanks roared, and a multi-service combined training in a complex electromagnetic environment kicked off.

“The blue side has occupied the No. 3 position.” The special situation suddenly arrived, and the red side commander carefully analyzed the situation and quickly issued an order: “The reconnaissance team went forward to lock the target, and the assault team attacked the No. 3 position!”

The red side reconnaissance team acted upon hearing the order, and operated the drone to conduct reconnaissance in the target area; the assault team composed of tanks and infantry fighting vehicles quickly launched an attack on the No. 3 position...The author saw at the scene that the forces of multiple arms closely cooperated and coordinated, and reconnaissance, surveillance, armored advance and other actions were conducted in a coherent manner.

“Strong electromagnetic interference from the ‘enemy’!” Suddenly, a “snowflake” appeared on the display screen of the Red Army’s command cabin, and the communication was interrupted. At the critical moment, the electronic countermeasures team quickly analyzed the interference frequency and used various means to suppress the “enemy” electromagnetically. At the same time,

two new drones took off with a roar, set up new communication links, rebuilt the command network, and guided the teams to act efficiently.

“Only when all combat elements are integrated into an organic whole can we clench our fingers into a fist and form a winning force.” The leaders of the brigade introduced that in recent years, they have not conducted “scripted” training, nor set up “routine” special situations, but have organized real-life confrontation training on a regular basis to continuously improve the actual combat capabilities of the troops.

Advancing all the way, special situations all the way. “Mixed minefields were found ahead.” After the Red Army’s assault team sent back the target information, the obstacle removal team immediately locked the target area and launched a rocket blaster to open up a path. “The ‘enemy’ drone is approaching for reconnaissance!” Several target points kept flashing on the radar display screen of the firepower team. The officers and men operated skillfully, and the “enemy” drone was quickly locked.

The battle entered a white-hot stage, and the blue side relied on armored firepower and solid fortifications to build a defensive position. “Tank No. 3 was ‘hit’ and the crew was ‘injured’!” Faced with the emergency, the red side immediately sent an armored repair team to deal with it, and the tank quickly continued to fight; the medical team simultaneously launched battlefield rescue.

As the reconnaissance team accurately locked the “enemy” firepower point and quickly transmitted the coordinate information back to the rear firepower team, several shells whizzed out, and the blue side’s frontier defense position quickly collapsed. The red side’s combat teams attacked from multiple directions and penetrated directly into the blue side’s hinterland...

As soon as the training ended, the review began. The participating officers and men discussed the problems exposed in the training and formulated targeted rectification measures to find the right direction for the next step of training and forge a winning iron fist with solid skills.

第 81 集团军某旅施行训练人才资源共享机制,训练水平稳步提升

来源：解放军报 作者：吴超 樊龙佳 责任编辑：王一亘 2025-04-22 08:31:51

第八十一集团军某旅探索施行训练人才资源共享机制——

两个营队的”携手进阶”

■吴 超 樊龙佳

近日，笔者来到第 81 集团军某旅采访时，恰逢二营正在开展体能训练。令笔者感到意外的是，在现场负责组训的不是该营军体教员，而是来自该旅勤务保障营的下士谷城政。

“谷城政是旅里 5000 米跑纪录保持者，在体能训练上’有一套’。”二营郭营长介绍，今年，他们专门邀请谷城政来营，结合新版《军事体育训练大纲》为官兵讲授体能训练方法，帮助官兵科学提升体能素质。

谈及训练骨干跨单位组训施教带来的变化，该旅领导以二营为例向笔者说道：”如今，二营专业拔尖、比武拿名次的官兵越来越多，去年还被旅里评为’实弹射击优胜营’。”他随即话锋一转：施行训练骨干跨单位组训施教前，二营多年未评先进，整体训练水平徘徊不前。

前期，该旅机关帮带组在分析二营训练情况时发现，二营的主要不足是炮班协同课目薄弱，导致整体训练成绩始终上不去。但二营也有自己的强项——测地、火炮维修等单兵专业成绩在旅队拔尖，专业课目组训能力突出。帮带期间，该旅组织了一次炮班协同课目比武，二营的成绩仍不理想。比武中，与二营一样多年未评先进的一营却表现出色，成绩在全旅名列前茅。

帮带组进一步了解得知，炮班协同课目一直是一营的强项。该旅组织的一次”神炮班”评选中，共评选出 3 个”神炮班”，一营就占了两个。但一营也有弱项——由于测地、火炮维修专业尖子偏少，部分专业组训水平不高。

“一营强项是二营弱项，二营强项又是一营弱项。两个营如果共享人才资源，就能实现优势互补、取长补短。”在帮带组建议下，二营郭营长和一营李营长围绕训练骨干跨单位组训深入研究，决定先由一营的骨干来二营授课教学。

几天后，一营两个”神炮班”的班长韩传峰和陈宇分别来到二营训练场，围绕炮班协同课目现场示范教学。他们将以往训练中总结的经验分享给二营的炮班班长们，并帮助他们梳理出”战斗准备流程不合理”“火炮操作动作不规范”等训练问题。

一段时间后，该旅组织实弹射击比武，二营炮班班长刘柱和洪希达带领班组密切配合，与旅队多个炮班同场较量，取得佳绩。去年，这两个班百尺竿头更进一步，双双通过旅队评选，获得”神炮班”称号，实现营史零的突破。

思路一变天地宽。一营和二营训练骨干跨单位组训的步子迈得更加坚定。二营通信专业班长李林多次在旅队比武中夺冠，一营邀请他前来组训教学，使通信训练成绩明显提升；一营二级上士郭亮曾多次在旅侦察专业比武中夺冠，经常应邀来二营授课，二营侦察专业训练成绩水涨船高……两个营队的训练尖子越来越多，整体训练水平稳步提升。

一营和二营都打了”翻身仗”，引起该旅党委的关注。一次议战议训会上，该旅领导表示，两个营共享训练人才资源，发挥了训练骨干”1＋1＞2”的组训效益。

为盘活旅队训练人才资源，该旅机关总结一营和二营训练骨干跨单位组训经验，结合旅队实际探索施行训练人才资源共享机制。他们区分基础训练、专业训练等不同内容，将各专

业比武纪录保持者等训练尖子，统一纳入旅队训练人才库，各营结合自身训练情况，按照训练人才库名单，邀请其他营的专业尖子来营帮训，针对性提升薄弱课目的训练水平。

据介绍，为进一步发挥人才使用效益，该旅还将人才资源共享范围向政治工作、维修保障等领域延伸，以业务大讲堂、军营公开课等形式，组织来自不同战位的精武标兵登台授课、分享经验，帮助官兵拓宽工作视野、打开练兵思路。

“旅队通过多种方式推动人才资源流动和共享，官兵争当打赢尖兵的底气越来越足。”二营郭营长告诉笔者，近期他们和一营组织业务骨干围绕下一阶段的协同训练集智攻关，联合研讨训练计划，多项组训措施得到优化完善。

A Brigade of the 81st Group Army Implements a Training Talent Resource Sharing Mechanism, and the Training Level Is Steadily Improving

Source: PLA Daily Author: Wu Chao Fan Longjia Editor: Wang Yigen 2025-04-22

A brigade of the 81st Group Army explores the implementation of a training talent resource sharing mechanism——

The “hand-in-hand advancement” of two battalions

■ Wu Chao Fan Longjia

Recently, when the author came to a brigade of the 81st Group Army for an interview, it happened that the second battalion was conducting physical training. To the author’s surprise, the person in charge of the training on the spot was not the military physical education instructor of the battalion, but the corporal Gu Chengzheng from the service support battalion of the brigade.

“Gu Chengzheng is the record holder of the 5,000-meter run in the brigade, and he has a set of physical training.” Battalion Commander Guo of the Second Battalion introduced that this year, they specially invited Gu Chengzheng to the battalion to teach officers and men physical training methods in combination with the new version of the “Military Physical Training Outline” to help officers and men improve their physical fitness scientifically.

Talking about the changes brought about by the cross-unit training of training backbones, the brigade leader took the second battalion as an example and said to the author: “Nowadays, more and more officers and men in the second battalion have outstanding professional skills and won prizes in competitions. Last year, it was rated as the “Live-fire Shooting Winning Battalion” by the brigade.” He then changed the subject: Before the implementation of cross-unit training of training backbones, the second battalion had not been rated as advanced for many years, and the overall training level was stagnant.

In the early stage, when analyzing the training situation of the second battalion, the brigade's assistance group found that the main shortcoming of the second battalion was the weak artillery squad coordination subjects, which led to the overall training results. But the second battalion also has its own strengths - the individual professional results of surveying and artillery maintenance are outstanding in the brigade, and the ability to organize training for professional subjects is outstanding. During the assistance period, the brigade organized a competition for artillery squad coordination subjects, and the results of the second battalion were still not ideal. In the competition, the first battalion, which had not been rated as advanced for many years like the second battalion, performed well and ranked among the best in the brigade.

The assistance group further learned that the artillery squad coordination subjects have always been the strength of the first battalion. In a selection of "magic artillery squads" organized by the brigade, a total of three "magic artillery squads" were selected, and the first battalion accounted for two. But the first battalion also has weaknesses - due to the lack of top talents in geodesy and artillery maintenance, the training level of some majors is not high.

"The strengths of the first battalion are the weaknesses of the second battalion, and the strengths of the second battalion are the weaknesses of the first battalion. If the two battalions share talent resources, they can achieve complementary advantages and learn from each other's strengths to make up for their weaknesses." At the suggestion of the mentoring group, Battalion Commander Guo of the second battalion and Battalion Commander Li of the first battalion conducted in-depth research on cross-unit training of training backbones and decided to let the backbones of the first battalion come to the second battalion to teach.

A few days later, Han Chuanfeng and Chen Yu, the squad leaders of the two "magic artillery squads" of the first battalion, came to the training ground of the second battalion respectively to demonstrate and teach on the spot around the artillery squad coordination course. They shared the experience summarized in previous training with the artillery squad leaders of the second battalion, and helped them sort out training problems such as "unreasonable combat preparation process" and "irregular artillery operation".

After a period of time, the brigade organized a live-fire shooting competition. Liu Zhu and Hong Xida, the squad leaders of the second battalion's artillery squad, led the team to work closely together and competed with multiple artillery squads of the brigade, achieving excellent results. Last year, the two squads went a step further and both passed the brigade selection and won the title of "God Artillery Squad", achieving a breakthrough in the battalion's history.

The world is wide when the thinking changes. The training backbones of the first and second battalions have taken more determined steps to organize cross-unit training. Li Lin, the squad leader of the second battalion's communications major, has won the championship in the brigade competition many times. The first battalion invited him to come to organize training and teaching, which significantly improved the communication training results; Guo Liang, the second sergeant of the first battalion, has won the championship in the brigade's reconnaissance professional

competition many times, and is often invited to teach in the second battalion. The training results of the second battalion's reconnaissance major have risen... There are more and more top trainers in the two battalions, and the overall training level has steadily improved.

Both the first and second battalions have fought a "turnaround battle", which has attracted the attention of the brigade's party committee. At a meeting to discuss war and training, the brigade leader said that the two battalions shared training talent resources, giving full play to the training efficiency of "1+1>2" for training backbones.

In order to activate the training talent resources of the brigade, the brigade headquarters summarized the cross-unit training experience of the training backbones of the first and second battalions, and explored and implemented a training talent resource sharing mechanism in combination with the actual situation of the brigade. They distinguished between basic training, professional training and other different contents, and included the top trainers such as record holders of various professional competitions into the brigade training talent pool. Each battalion, based on its own training situation and according to the list of the training talent pool, invited the top professional trainers from other battalions to help train in the battalion, and improved the training level of weak subjects.

According to reports, in order to further give full play to the efficiency of talent use, the brigade also extended the scope of talent resource sharing to political work, maintenance and support and other fields, and organized elite soldiers from different combat positions to give lectures and share experiences on stage in the form of business lectures and military camp open classes, helping officers and men broaden their work horizons and open up their training ideas.

"The brigade promotes the flow and sharing of talent resources through various means, and the officers and men are more and more confident in striving to be the vanguard in winning the battle." Captain Guo of the Second Battalion told the author that recently they and the backbones of the First Battalion organized by the First Battalion have worked together to tackle key problems around the next stage of collaborative training and jointly discussed training plans, and a number of training measures have been optimized and improved.

跳出装备说明书，陆军某旅突破装备固有操作研创防卫新战法

来源：解放军报 作者：张晓彤 杨子毅 责任编辑：王一亘 2025-04-22

"跳"出装备说明书之后……

■张晓彤 杨子毅

前不久，大漠戈壁，黄沙飞扬。模拟训练显示屏上，一行行数据平稳跳动。

在陆军某旅指挥所防卫分队下士肖炜耀眼中，这些看似平常的数据，有着不一样的意义——战友们连续奋战几个月，新战法探索终于有了突破！

此前的一次对抗训练中，为防范蓝方火力打击，上级命令红方立即转移阵地。谁知，数十秒后，蓝方火力呼啸而至，红方指挥所还没来得及反应，就被判定人员”阵亡”。

训练结束，盯着导演部发来的对抗战报，防卫分队杨队长皱着眉头，久久不语。

痛定思痛，杨队长结合复盘数据分析检讨：”随指挥所一同撤收过程中，防卫分队的相关装备处于关机状态，导致指挥所防卫出现’真空期’。”

检讨反思会上，杨队长提出，现有装备操作流程有时难以适应瞬息万变的战场。为有效满足防卫作战需求，分队必须研究新流程、探索新战法。

“目前的战法，经过多次实战实训检验，有必要改变吗？”

“改变装备使用说明书上的操作流程，装备发生损坏的风险谁来承担？”

……

面对分队骨干提出的不同看法，杨队长一时间也有些犹豫。

“训练场就是战场，研究新战法就是提升战斗力。”分队邝教导员的一番话，让大家坚定了探索新战法的信心。

后来，杨队长召集技术骨干，按照”先单装后系统、先电脑模拟后实兵推演”的思路，积极探索火力突然来袭时的指挥所防卫新战法。

官兵解放思想大胆求变，从现有装备操作流程中”跳”出来，重新分析测算装备性能。为获取第一手数据，分队干部骨干天不亮就前往训练场；返回营区后，又马不停蹄地对数据进行梳理分析。

数据不达标，就逐个环节测试；结果不理想，就从头再来。工作日志上，一行行测试记录，镌刻下分队官兵的奋斗足迹。几个月的时间里，杨队长带领分队官兵反复采集、测试、模拟、实践，钻研装备快速开机、行进间部署等内容，充分挖掘装备技战术性能，探索出一套全时防卫、实时防卫的新战法。

新战法投入使用后，他们发现，分队各要素配合更加顺畅，装备效能进一步释放，有效缩短防卫预警时间，指挥所防卫水平有了明显提升。

战法研讨会上，邝教导员感慨地说：”这次探索新战法，我们跳出惯性思维，探索出了某装备性能新边界。”

“这段探索新战法的经历，对我们来说只是一个起点。”杨队长说，下一步，他们将瞄准战斗力提升，积极开拓视野、潜心钻研装备，持续探索战法创新。

Jumping Out of the Equipment Manual, a Certain Army Brigade Breaks Through the Inherent Operation of the Equipment and Develops a New Defense Method

Source: PLA Daily Author: Zhang Xiaotong Yang Ziyi Editor: Wang Yigen 2025-04-22

After “jumping” out of the equipment manual...

■ Zhang Xiaotong Yang Ziyi

Not long ago, the desert Gobi was flying with yellow sand. On the simulated training display screen, rows of data jumped steadily.

In the eyes of Xiao Weiyao, a corporal of the defense detachment of a certain army brigade command post, these seemingly ordinary data have different meanings-the comrades have fought for several months in a row, and the exploration of new tactics has finally made a breakthrough!

In a previous confrontation training, in order to prevent the blue side’s firepower attack, the superior ordered the red side to move the position immediately. Who knew that after dozens of seconds, the blue side’s firepower roared in, and the red side’s command post was judged to be “killed” before it could react.

After the training, staring at the confrontation report sent by the director’s office, Captain Yang of the defense detachment frowned and remained silent for a long time.

After learning from the painful experience, Captain Yang combined the data analysis of the replay to review: “During the withdrawal process with the command post, the relevant equipment of the defense team was in a shutdown state, resulting in a ‘vacuum period’ in the defense of the command post.”

At the review and reflection meeting, Captain Yang pointed out that the existing equipment operation procedures are sometimes difficult to adapt to the ever-changing battlefield. In order to effectively meet the needs of defense operations, the team must study new procedures and explore new tactics.

“Is it necessary to change the current tactics after multiple actual combat and training tests?”

“If the operation procedures in the equipment manual are changed, who will bear the risk of damage to the equipment?”

Faced with the different opinions raised by the backbone of the team, Captain Yang hesitated for a while.

“The training ground is the battlefield, and studying new tactics is to improve combat effectiveness.” The words of the instructor Kuang of the team strengthened everyone’s confidence in exploring new tactics.

Later, Captain Yang convened technical backbones and actively explored new tactics for command post defense when firepower suddenly attacked according to the idea of ”first single equipment, then system, first computer simulation, then real-life simulation”.

The officers and men liberated their minds and boldly sought change, “jumping” out of the existing equipment operation process, and re-analyzing and calculating the equipment performance. In order to obtain first-hand data, the backbone cadres of the detachment went to the training ground before dawn; after returning to the camp, they immediately sorted out and analyzed the data.

If the data does not meet the standards, they will test each link; if the results are not ideal, they will start all over again. In the work log, line after line of test records are engraved with the struggle footprints of the detachment officers and men. Over a period of several months, Captain Yang led the detachment officers and men to repeatedly collect, test, simulate, and practice, delve into the rapid startup of equipment, deployment on the move, and other contents, fully explore the technical and tactical performance of equipment, and explore a set of new tactics for full-time defense and real-time defense.

After the new tactics were put into use, they found that the coordination of various elements of the detachment was smoother, the equipment efficiency was further released, the defense warning time was effectively shortened, and the defense level of the command post was significantly improved.

At the tactics seminar, Instructor Kuang said with emotion: “This time, we explored new tactics and jumped out of inertial thinking to explore new boundaries of equipment performance.” “This experience of exploring new tactics is just a starting point for us.” Captain Yang said that in the next step, they will aim to improve combat effectiveness, actively expand their horizons, concentrate on studying equipment, and continue to explore innovations in tactics.

第 82 集团军某旅“红三连”鼓励官兵增强”三互”自觉性主动性

来源：解放军报 作者：姜帅 孙义 刘小云 责任编辑：王一亘 2025-04-22

第 82 集团军某旅”红三连”鼓励官兵增强”三互”自觉性主动性——

帮战友所需 解战友之难

■姜 帅 孙 义 解放军报特约通讯员 刘小云

叶再洪绘

“多亏黄星宇的指点，我才能收获个人最好成绩。”近日，第 82 集团军某旅”红三连”组织负重越野训练，下士刘彬一改此前耐力不足问题，大步冲过终点。接下来几个课目中，不少像刘彬一样的战士，经过结对战友的帮带，成绩也都有了明显进步。

训练场上的可喜一幕，是该连鼓励官兵自主结对帮带呈现出的新变化。该连干部赵普说：”主动帮战友所需、自觉解战友之难，很多问题不需干部骨干操心就能解决。”

谈起连队的这项举措，还要从一名新排长的转变说起。

当时，新排长余聪从院校毕业来到连队，由于缺乏基层经验，他开展工作接连”碰壁”。二级上士班长铁英杰看出余聪的焦急不安，主动与他结成对子，帮助他尽快适应环境、进入角色。

业余时间，铁英杰带着余聪熟悉连队发展情况、管理方式和官兵特点，同时为他传授组训经验、带兵方法、谈心技巧。在此过程中，余聪得知铁英杰虽然装备维修技术过硬，但理论基础薄弱，便结合自己在军校所学知识，帮助铁英杰打牢理论功底。

铁英杰与余聪自主结对、相互促进的经历，让该连干部对连队长期以来开展的互学、互帮、互教”三互”活动有了新的认识：以往，”三互”小组成员多由各班排根据兵龄长短、强弱互补、新老搭配来确定，这一组合方式看似合理，可作用发挥有时并不理想。

对此，他们专门组织了一次问卷调查，不少官兵道出真实想法：”多数官兵进行结对帮带，都是在对方遇到困难或提出需求时才会提供帮助，缺乏主动靠上去关心战友的意识”“有时候遇到问题，想请教其他排的专业骨干，又担心与自己在’三互’小组中结对的战友有意见而只能作罢”……

针对这些问题，该连党支部决定，发挥官兵主观能动性，打破班排建制限制，在全连范围内展开自主结对，鼓励大家发挥自身优长，向需要帮助的战友伸出援手。干部骨干利用点名、连务会等时机，对主动帮带战友的官兵提出表扬，并将结对帮带情况纳入每季度”双争”评比，激励大家共同进步。

这一举措推行后，结对帮带的老传统焕发出新活力。没有硬性规定、无需强行指派，只要战友有困难，大家都会主动提供帮助。

去年 9 月，三排下士任凯调整至二排担任班长，虽然军事素质过硬，但他遇事容易急躁。久而久之，班里战士对他产生不满情绪。

一次，三排排长孙富豪偶然听到任凯所在班战士发牢骚。凭借对任凯的了解，孙富豪主动找到他结成对子，结合自身经验传授带兵方法，教他冷静处事、耐心倾听。

在孙富豪的帮带下，任凯逐渐改掉了”老毛病”，日常工作中非常注意与大家的沟通方式，渐渐与班里战士打成一片，整个班建设水平跨入连队前列。

“以前，大家认为只要帮带好自己’三互’小组的成员即可。现在，不分班排组别，只要我能帮到你，就主动靠上前，连队形成了’我为人人、人人为我’的良好氛围。”赵普告诉笔者，自主结对帮带活动开展后，连队官兵更愿意主动作为，更关心身边战友，帮带内容也从军事训练、专业技能延伸至个人考学培训和兴趣爱好等方面。

学历高的新兵与有意愿学历升级的军士结对，帮助补习文化知识；班长骨干主动结对新选晋的军士，帮助提高教学组训能力；连队干部一心为有特长的战士搭建展示平台，创造成长机会……在一次次主动帮带、相互促进中，官兵能力特长有效发挥，短板弱项得到及时弥补，连队凝聚力向心力不断增强。

据了解，该连开展自主结对帮带活动以来，官兵们争先创优、团结奋进意识更强了，战备训练、比武竞赛、作风建设等方面成绩都较以往有了明显提升。今年第一季度，5 人在旅里组织的创破纪录比武中取得前三名，全连基础课目考核优良率超过 80%。

The “Red Third Company” of a Brigade of the 82nd Group Army Encourages Officers and Men to Enhance Their “Three Mutual” Consciousness and Initiative

Source: PLA Daily Author: Jiang Shuai Sun Yi Liu Xiaoyun Editor: Wang Yigeng 2025-04-22

The “Red Third Company” of a brigade of the 82nd Group Army encourages officers and men to enhance their “three mutual” consciousness and initiative——

Help comrades in need and solve their difficulties

■ Jiang Shuai Sun Yi PLA Daily Special Correspondent Liu Xiaoyun

Drawing by Ye Zaihong

“Thanks to Huang Xingyu’s guidance, I can achieve my best personal results.” Recently, the “Red Third Company” of a brigade of the 82nd Group Army organized a cross-country training with weights. Corporal Liu Bin changed his previous problem of insufficient endurance and strode across the finish line. In the next few subjects, many soldiers like Liu Bin have made significant progress in their performance after being helped by their paired comrades.

A gratifying scene on the training ground is the new change presented by the company’s encouragement of officers and men to pair up and help each other on their own. Zhao Pu, a cadre of the company, said: “Take the initiative to help comrades and consciously solve their difficulties. Many problems can be solved without the cadres and backbones worrying about them.”

Talking about this measure of the company, we have to start with the transformation of a new platoon leader.

At that time, the new platoon leader Yu Cong graduated from the academy and came to the company. Due to his lack of grassroots experience, he repeatedly “hit a wall” in his work. Second-class sergeant squad leader Tie Yingjie saw Yu Cong’s anxiety and took the initiative to pair him up to help him adapt to the environment and get into the role as soon as possible.

In his spare time, Tie Yingjie took Yu Cong to familiarize himself with the development of the company, management methods and characteristics of officers and men, and at the same time taught him training experience, leading methods, and talking skills. In the process, Yu Cong learned that although Tie Yingjie had strong equipment maintenance skills, his theoretical foundation was weak, so he combined the knowledge he learned in the military academy to help Tie Yingjie lay a solid theoretical foundation.

Tie Yingjie and Yu Cong’s experience of pairing up and promoting each other has given the company’s cadres a new understanding of the “three mutual” activities of mutual learning, mutual help and mutual teaching that the company has been carrying out for a long time: in the past, the members of the “three mutual” group were mostly determined by each squad and platoon based on the length of service, complementary strengths and weaknesses, and the combination of the old and the new. This combination method seems reasonable, but the effect is sometimes not ideal.

In this regard, they specially organized a questionnaire survey, and many officers and men expressed their true thoughts: “Most officers and men will only provide help when the other party encounters difficulties or makes demands, and lack the awareness of actively approaching and caring for their comrades.” “Sometimes when encountering problems, I want to consult the professional backbones of other platoons, but I am worried that the comrades who are paired with me in the “three mutual” group will have opinions and can only give up.” ...

In response to these problems, the company’s party branch decided to give full play to the subjective initiative of officers and men, break the restrictions of the squad and platoon system,

and carry out autonomous pairing throughout the company, encouraging everyone to give full play to their own strengths and lend a hand to comrades in need. The backbone cadres use opportunities such as roll call and company affairs meetings to praise the officers and men who take the initiative to help their comrades, and include the pairing and helping situation in the quarterly "double competition" evaluation to encourage everyone to make progress together.

After the implementation of this measure, the old tradition of pairing and helping has been revitalized. There are no rigid regulations and no need for forced assignment. As long as the comrades have difficulties, everyone will take the initiative to provide help.

Last September, Ren Kai, a corporal from the third platoon, was transferred to the second platoon as a squad leader. Although he has excellent military qualities, he is easily impatient when encountering things. Over time, the soldiers in the class became dissatisfied with him.

Once, Sun Fuhao, the platoon leader of the third platoon, accidentally heard the soldiers in Ren Kai's class complaining. With his understanding of Ren Kai, Sun Fuhao took the initiative to find him to pair up, combined with his own experience to teach him how to lead soldiers, and taught him to be calm and listen patiently.

With the help of Sun Fuhao, Ren Kai gradually got rid of his "old bad habits". He paid great attention to the way of communicating with everyone in his daily work, and gradually became one with the soldiers in the class. The level of the entire class construction has entered the forefront of the company.

"In the past, everyone thought that as long as they could help the members of their own "three mutual" group, they would be fine. Now, regardless of the class or platoon group, as long as I can help you, I will take the initiative to step forward, and the company has formed a good atmosphere of "I am for everyone, everyone is for me." Zhao Pu told the author that after the autonomous pairing and helping activities were conducted, the company's officers and men were more willing to take the initiative and care more about their comrades around them. The content of the help also extended from military training and professional skills to personal examination training and hobbies.

New recruits with high academic qualifications are paired with sergeants who are willing to upgrade their academic qualifications to help them learn cultural knowledge; squad leaders and backbones take the initiative to pair up with newly selected sergeants to help improve their teaching and training capabilities; company cadres are dedicated to building a display platform for soldiers with special skills and creating growth opportunities... In the process of active assistance and mutual promotion, the officers and men' abilities and specialties are effectively exerted, their shortcomings are promptly made up, and the company's cohesion and centripetal force are constantly enhanced.

It is understood that since the company conducted the autonomous pairing and assistance activities, the officers and men have a stronger sense of striving for excellence and unity and progress, and

their achievements in combat readiness training, competitions, and style construction have been significantly improved compared with the past. In the first quarter of this year, 5 people won the top three in the record-breaking competition organized by the brigade, and the excellent rate of basic course assessment in the whole company exceeded 80%.

军某旅某营持续开展”睡前半小时”读书活动，引导官兵爱上读书学习

来源：解放军报 作者：郑隆海 连源 朱凯 陈岩 责任编辑：郭妍菲 2025-04-23

编者按 阅读是人类获取知识、启智增慧、培养道德的重要途径。在世界军事竞争日益激烈的今天，培养造就堪当强军重任的高素质专业化新型军事人才，离不开读书学习，必须依靠读书学习。

4 年前，陆军某旅某营开展”睡前半小时”读书活动，旨在引导官兵爱上读书学习。经过 4 年的坚持，该营官兵逐步养成了读书习惯，增长了见识和能力，经历了成长与蜕变。

在世界读书日来临之际，来自该营的战士郑隆海，与我们分享了发生在他身边的读书故事，希望能对大家有所启发。

每天半小时，让改变发生

■陆军某旅某营战士 郑隆海

“读书是一个好习惯，一定要坚持下去！”听着台上战友分享自己的心得体会，我不由得想起前任教导员连源的叮嘱。

说实话，以前提到读书，我和一些战友都感到头疼，总觉得有那闲工夫不如打游戏、刷短视频。但现在，我们营的读书氛围越来越浓厚，更多的战友把读书当成了一种精神享受。

改变，发生在连教导员上任之后。

在野外驻训期间，该营官兵分享读书体会。彭志富 摄

听班长说，连教导员非常喜欢读书，报到当天，光书就带了满满两大箱。

为了鼓励大家读书，营里专门翻新了图书室，采购了桌椅，努力营造温馨的学习环境。刚开始，大家积极性很高，然而新鲜劲儿一过，安心读书学习的战友所剩无几。

“平时训练任务那么重，没有时间和精力看书”“部队生活节奏快，很难静下心来”……听起来，理由好像很充分。

“哪怕一天挤出半小时，读几页书，只要坚持下去，必定积少成多、积沙成塔，积跬步以至千里。”这天，教导员提议开展”睡前半小时”读书活动，除了夜训和特殊情况外，每人每天利用睡前半个小时读书学习，每月举办一次读书分享会，得到了营党委的批准。

起初，不少人有”迎检”心态，故意在书上留下一些痕迹，我就是这样。后来，听了战友黄嘉威的读书分享，才改变了态度。

黄嘉威是某连的训练尖子，以前也不怎么爱读书。然而，一次备战比武，他不小心拉伤了膝部韧带。此时距离比武不到 20 天，黄嘉威不得不中断训练、退出备战。

那段时间，黄嘉威情绪低落，躺在病床上不愿搭理任何人，甚至萌生退伍的想法。教导员前来探望时，特意带了一本《平凡的世界》，希望黄嘉威能从主人公身上汲取力量。不过，彼时的他并未听到心里去。

一天，百无聊赖的黄嘉威，随手翻开这本书，很快被里面的故事吸引了，主人公不屈从命运、努力奋斗改变人生的经历，让他产生强烈共鸣。在那之后，他重拾信心，身体康复后刻苦训练。再次走上某专业比武场，他勇夺第一名，并荣立三等功。

自此，黄嘉威爱上了阅读，专门在床头柜里放了几本书，每天睡前拿出来读一读，渐渐成为读书分享会的”常客”。

我和黄嘉威的成长经历不同，但与书结缘的过程却很相似。刚入伍时，因为身体素质较弱，我的体能训练成绩一直比较靠后，我一度认为自己不是当兵的料。消沉之际，黄嘉威递给我一本书——《钢铁是怎样炼成的》。

“我们的人生就应该像保尔·柯察金那样，在逆境中不屈不挠、勇于追梦！”黄嘉威以自身经历告诉我，读书真的可以改变一个人。我将信将疑，抱着试试看的想法，有样学样地读了起来。

慢慢地，我也爱上了阅读，床头柜里的书换了一本又一本，其中就有体能训练方面的，让我受益匪浅。

看的书多了，眼界也变宽了。”营里有趣的事和先进战友的事迹，为啥不写出来呢？”一天，我突发奇想，开始了写作，还在媒体上发表了几篇文章。

没想到，这在营里引发了热议。有的战友打趣道：”我们中间还藏着一个作家呢，高低得给他颁个奖！”

说者无意，听者有心。教导员萌生了一个想法：每季度结合官兵日常读书学习表现、读书笔记展评等情况，评选”读书之星”，并颁发证书和奖品。

为了让大家更好理解读书的意义，教导员专门组织了一次教育，有一句话令人印象深刻：”读书是私事，但对军人来说，又不仅仅是私事，它事关官兵能力素质提升、事关部队战斗力建设质效。无论建设学习型军营，还是建成世界一流军队，都需要我们把读书当作一种生活方式。”

此后，营连主官以身作则，主动推荐好书，分享读书体会，引领读书风尚。从”要我读”到”我要读”，越来越多的官兵开始自觉读书学习。

某连战士张赛，以前一看书就犯困。有段时间，他把一本《孙子兵法》摆在床头，战友们见了直摇头。

其实，张赛一开始也看不懂。怎么办？他说，就一个字——”钻”。利用睡前半小时，他一边看一边查注释，不时在笔记本上写写画画。等看完了《孙子兵法》，他又找来一些兵器类的图书继续读。

那年，张赛转岗，投入新装备研究。他惊喜地发现，此前养成的读书习惯，让他学理论更快，几个月就啃完了厚厚一摞专业教材。专业集训时，他运用积累的知识破解了不少训练难题，并入选了单位专业人才库。

从文学作品到科普读物，再到专业书籍，在张赛的示范带动下，不少战友的读书选择悄然发生改变。通过读书，大家学习新知识、掌握新技能、实现新进步，一些战士成长为连队专业能手和管理骨干。

如今，我们的读书时间也突破了”睡前半小时”的局限。漫步营区，经常能看到这样的情景——训练间隙，三五战友聚在一起讨论战史战例；周末休息，大家放下手机，在书海里畅游……

（毛英椿、解放军报特约通讯员李健整理）

亲历者说

点燃读书学习的星火

■陆军某旅某营干部 连 源

书山有路勤为径，学海无涯苦作舟。我们倡导”睡前半小时”读书活动，并每月举办一次读书分享会，就是希望官兵养成喜欢读书、热爱学习的好习惯。

刚开始，很多人对此表示不理解：为什么学校老师用了那么长时间都不一定做到的事，你一个基层带兵人却坚持做呢？因为我相信，开卷有益、星火燎原，日拱一卒、功不唐捐。

当然，最直接的原因是，我希望让官兵走出”一人一机一世界”，到知识的海洋里遨游。大家知道，智能手机使用管理，一直是基层工作的重点和难点。尤其是与此有关的违规违纪问题的发生，着实让人头疼。值得注意的是，即使按规定使用智能手机，一些年轻官兵也将大量时间花费在打游戏、刷短视频上。以过来人的角度看，这并不利于官兵成长进步、健康发展。

人的大脑是用进废退的。一个人如果不经常学习充电、汲取新的知识，能力就会在低水平徘徊甚至出现倒退。而读书，恰恰可以有效防止和解决这个问题。

读书学习的过程就是提升能力素养的过程。我也许做不到让每名官兵都爱上读书、爱上学习，但如果通过”睡前半小时”、读书分享会等活动，能让一部分人产生并保持这种热爱，我的努力就有价值，就没有白费。

4 年前，我们点燃了读书学习的星火；4 年后，这星火越燃越旺。随着”睡前半小时”和读书分享会等活动的常态开展，整个营出现了可喜变化：一是自发买书的官兵越来越多；二是大家的阅读范围不断拓展；三是很多官兵”腹有诗书气自华”，变得更加沉稳成熟了。

更令我惊喜的是，很多官兵自觉将读书学习的收获运用于练兵备战。曾经恐高的侦察兵雷淼，从书中学会了克服心理恐惧的方法，如今成为索降教练员；二级上士程关佑查阅专业书籍，研制出射击激光模拟器，提高了训练质效；战士肖杰自学计算机知识，设计了有助于优化某型装备操作的程序……

“学习力就是战斗力。”现在，我越发觉得，读书学习也是练兵备战的重要一环，它不像体能训练、专业训练那样，效果立竿见影，更像是春风化雨、润物无声，在潜移默化中深刻影响官兵的价值取向、人生选择和能力素质。

当今世界军事领域的竞争，说到底是人才的竞争。打赢未来战争，必须培养懂联合、知实战、会打仗的高素质专业化新型军事人才。人民军队依靠学习走到今天，也必将依靠学习走向未来。对基层官兵而言，就是要有坚持学习、长期学习的意识和行动。从培养读书兴趣开始，让学习成为一种习惯，不失为一种好的选择。

官兵恳谈

不只是陆军某旅某营，这些年，读书学习的氛围在大江南北座座军营越来越浓，建设学习型军营正在成为广大官兵的自觉行动。不过，说起读书学习，仍有一些问题困扰着一线带兵人。我们邀请两位基层干部，请他们谈谈自己的认识和做法。

读书时间从何而来

■新疆军区英塔尔边防连干部 朱 凯

“没有时间”，是很多基层官兵拒绝读书的主要理由。所以，推动读书学习成为常态，必须保证官兵有时间读书。那么，读书时间从何而来？

用好官兵自主支配时间是重点。法定节假日、周末、非夜训日的晚上等，这些可以由官兵自行安排的时间，算起来并不少。在日常工作中，要尽量避免对这些时间的侵占，提醒官兵在处理完个人事务后，抽出时间看看书。无论几十分钟，还是三两个小时，只要开卷展读，就会有所收获。

除了整块时间，还要充分利用好训练间隙、睡前饭后等碎片时间。时间碎片化并不等于知识碎片化，每次抓紧读上几页，长期积累下来也会有不小的阅读量。

一位古人说：”苟能发奋自立，则家塾可读书，即旷野之地，热闹之场，亦可读书，负薪牧豕，皆可读书。”这告诉我们，如果一个人真正想读书、爱读书，他总能找到读书的时间，因为时间就像海绵里的水，挤一挤总是有的。

（刘欣雨整理）

所读之书如何选择

■海军某部某连干部 陈 岩

先有读书的兴趣，才有阅读的热爱。因此，在官兵形成阅读习惯之前，引导他们读什么样的书，显得十分重要。所谓”开卷有益”，如果官兵们不爱”开卷”，读书的好处自然无从谈起。

除了有关党的创新理论、纪律规矩等必读书目，我给连队官兵推荐以下三类书：

一是技能提升类。与演讲口才相关的书，实用性、操作性很强，官兵们比较爱读，收获立竿见影。此外，企业管理、心理学等方面的书，特别适合班长骨干阅读，里面的知识方法能帮助他们提高工作能力。

二是人文社科类。主要是有助于培塑正确”三观”的书，比如《低姿匍匐》《人生》等。历史书籍和名人传记也不错，官兵们读了能从中明辨是非曲直、汲取经验教训，校正人生的方向。

三是党史军史战史类。比如《星火燎原》《大决战》《抗日战争》《朝鲜战争》等，让官兵增长军事知识的同时，更加清晰了解我党我军不平凡的奋斗历程，从而坚定从军报国信念。

A Battalion of a Certain Brigade of the Army Continues to Carry Out the “Half an Hour before Bedtime” Reading Activity To Guide Officers and Men to Fall in Love with Reading and Learning

Source: PLA Daily Author: Zheng Longhai Lian Yuan Zhu Kai Chen Yan Editor: Guo Yanfei 2025-04-23

Editor's note Reading is an important way for humans to acquire knowledge, enlighten wisdom, and cultivate morality. In today's increasingly fierce world military competition, cultivating high-quality and professional new military talents capable of strengthening the army is inseparable from reading and learning, and must rely on reading and learning.

Four years ago, a battalion of a certain brigade of the army conducted the "half an hour before bedtime" reading activity to guide officers and men to fall in love with reading and learning. After four years of persistence, the officers and men of the battalion gradually developed a habit of reading, increased their knowledge and abilities, and experienced growth and transformation.

On the occasion of World Book Day, Zheng Longhai, a soldier from the battalion, shared with us the reading stories that happened around him, hoping to inspire everyone.

Half an hour a day, let the change happen

■Zheng Longhai, a soldier from a battalion of a brigade of the Army

"Reading is a good habit, and you must stick to it!" Listening to the comrades on the stage sharing their experiences, I couldn't help but think of the advice of the former instructor Lian Yuan.

To be honest, when it comes to reading, some of my comrades and I feel a headache, always thinking that it is better to play games and watch short videos if we have that free time. But now, the reading atmosphere in our battalion is getting stronger and stronger, and more comrades regard reading as a spiritual enjoyment.

The change happened after the company instructor took office.

During the field training, the officers and men of the battalion shared their reading experiences. Photo by Peng Zhifu

I heard from the squad leader that the company instructor likes reading very much. On the day of reporting, he brought two full boxes of books.

In order to encourage everyone to read, the battalion specially renovated the library, purchased tables and chairs, and worked hard to create a warm learning environment. At the beginning, everyone was very enthusiastic, but after the novelty wore off, there were few comrades who were willing to study and study at ease.

"The training tasks are so heavy that I don't have the time and energy to read books." "The pace of life in the army is fast and it's hard to calm down." It sounds like the reasons are very sufficient.

"Even if you squeeze out half an hour a day to read a few pages of a book, as long as you stick to it, you will definitely accumulate a lot, accumulate sand into a tower, and accumulate small steps to a thousand miles." On this day, the instructor proposed to carry out the "half an hour before

bedtime" reading activity. Except for night training and special circumstances, everyone uses half an hour before bedtime to read and study every day, and holds a book sharing meeting every month, which was approved by the battalion party committee.

At first, many people had a "welcoming inspection" mentality and deliberately left some marks on the book. I was like this. Later, I changed my attitude after listening to my comrade Huang Jiawei's book sharing.

Huang Jiawei is a top trainer in a company, and he didn't like reading much before. However, in preparation for a competition, he accidentally strained his knee ligament. At this time, less than 20 days before the competition, Huang Jiawei had to interrupt training and withdraw from preparation.

During that time, Huang Jiawei was in a low mood, lying on the hospital bed and unwilling to talk to anyone, and even had the idea of retiring. When the instructor came to visit, he brought a copy of "Ordinary World" specifically, hoping that Huang Jiawei could draw strength from the protagonist. However, he did not take it to heart at that time.

One day, Huang Jiawei, who was bored, flipped through the book casually and was quickly attracted by the story in it. The protagonist's experience of not succumbing to fate and working hard to change his life resonated strongly with him. After that, he regained his confidence and trained hard after his physical recovery. He won the first place and won the third-class merit again when he stepped onto a professional competition field.

Since then, Huang Jiawei has fallen in love with reading. He put a few books in the bedside table and took them out to read every day before going to bed. Gradually, he became a "regular" at the book sharing meeting.

Huang Jiawei and I had different growth experiences, but the process of becoming attached to books was very similar. When I first joined the army, because of my weak physical fitness, my physical training results were always relatively backward. I once thought that I was not suitable for being a soldier. When I was depressed, Huang Jiawei handed me a book - "How the Steel Was Tempered".

"Our life should be like Paul Korchagin, unyielding in adversity and courageous in pursuing dreams!" Huang Jiawei told me from his own experience that reading can really change a person. I was skeptical, and with the idea of giving it a try, I started reading like him.

Slowly, I also fell in love with reading. The books in the bedside table were replaced one after another, including those on physical training, which benefited me a lot.

Reading more books broadened my horizons. "Why don't I write about the interesting things in the camp and the deeds of advanced comrades?" One day, I suddenly had an idea and started writing, and published several articles in the media.

Unexpectedly, this caused heated discussions in the camp. Some comrades joked: “There is a writer hidden among us, we should give him an award!”

The speaker is unintentional, but the listener is attentive. The instructor came up with an idea: every quarter, based on the soldiers’ daily reading and learning performance, reading notes exhibition and evaluation, etc., select “Reading Stars” and issue certificates and prizes.

In order to make everyone better understand the meaning of reading, the instructor organized a special education. There is a sentence that is impressive: “Reading is a private matter, but for soldiers, it is not just a private matter. It is related to the improvement of officers’ and men’ ability and quality, and the quality and effectiveness of the troops’ combat effectiveness. Whether building a learning-oriented barracks or building a world-class army, we need to regard reading as a way of life.”

Since then, the battalion and company commanders have set an example, actively recommended good books, shared reading experiences, and led the reading trend. From “I have to read” to “I want to read”, more and more officers and men began to read and study consciously.

Zhang Sai, a soldier in a certain company, used to feel sleepy when he read. For a while, he put a copy of “The Art of War” on the bedside, and his comrades shook their heads when they saw it.

In fact, Zhang Sai couldn’t understand it at first. What to do? He said, just one word - “drill”. In the half hour before bedtime, he read and checked the annotations, writing and drawing in his notebook from time to time. After finishing “The Art of War”, he found some books on weapons to continue reading.

That year, Zhang Sai changed his job and devoted himself to the research of new equipment. He was pleasantly surprised to find that the reading habit he had developed before made him learn theory faster, and he finished a thick stack of professional textbooks in a few months. During the professional training, he used the accumulated knowledge to solve many training problems and was selected into the unit’s professional talent pool.

From literary works to popular science books, and then to professional books, under the demonstration and drive of Zhang Sai, the reading choices of many comrades have quietly changed. Through reading, everyone learns new knowledge, masters new skills, and achieves new progress. Some soldiers have grown into professional experts and management backbones of the company.

Today, our reading time has also broken through the limitation of “half an hour before bedtime”. Walking around the camp, you can often see such scenes - during training breaks, three or five comrades gather together to discuss war history and examples; on weekends, everyone puts down their mobile phones and swims in the sea of books...

(Compiled by Mao Yingchun and Li Jian, special correspondent of the People’s Liberation Army Daily)

Witnesses say

Ignite the spark of reading and learning

■ Lian Yuan, a cadre of a battalion of a certain brigade of the Army

There is a path to the mountain of books, and diligence is the path; there is no end to the sea of learning, and hard work is the boat. We advocate the "half an hour before bedtime" reading activity and hold a book sharing meeting every month, hoping that officers and men will develop a good habit of liking to read and love learning.

At the beginning, many people expressed their incomprehension: Why do you, a grassroots leader, insist on doing something that schoolteachers may not be able to do after so long? Because I believe that reading is beneficial, sparks will set the prairie on fire, and every day will be a step forward, and the work will not be in vain.

Of course, the most direct reason is that I hope to let officers and men get out of the "one person, one device, one world" and swim in the ocean of knowledge. As everyone knows, the management of smartphone use has always been the focus and difficulty of grassroots work. In particular, the occurrence of violations of rules and regulations related to this is really a headache. It is worth noting that even if smartphones are used according to regulations, some young officers and men spend a lot of time playing games and watching short videos. From the perspective of those who have experienced it, this is not conducive to the growth, progress and healthy development of officers and men.

The human brain is used and lost. If a person does not often learn and recharge, and acquire new knowledge, his ability will linger at a low level or even regress. Reading can effectively prevent and solve this problem.

The process of reading and learning is the process of improving ability and literacy. I may not be able to make every officer and soldier fall in love with reading and learning, but if through activities such as "half an hour before bed" and book sharing sessions, I can make some people develop and maintain this love, my efforts will be valuable and not in vain.

Four years ago, we ignited the spark of reading and learning; four years later, this spark is burning more and more vigorously. With the regular implementation of activities such as "half an hour before bedtime" and book sharing sessions, the entire battalion has seen gratifying changes: first, more and more officers and men spontaneously buy books; second, everyone's reading range is constantly expanding; third, many officers and men are "reading poetry and books" and have become calmer and more mature.

What surprised me even more was that many officers and men consciously applied the gains from reading and learning to training and preparation. Lei Miao, a scout who used to be afraid of heights, learned how to overcome psychological fear from books and now becomes a rappelling instructor; Second Sergeant Cheng Guanyou consulted professional books and developed a shooting laser

simulator to improve the quality and effectiveness of training; Soldier Xiao Jie self-taught computer knowledge and designed a program that helps optimize the operation of a certain type of equipment...

“Learning ability is combat effectiveness.” Now, I feel more and more that reading and learning is also an important part of training and preparation. It is not like physical training and professional training, which have immediate effects. It is more like a spring breeze and rain, moistening things silently, and profoundly affecting the value orientation, life choices and ability quality of officers and men in a subtle way.

The competition in the military field in today’s world is, after all, a competition for talents. To win future wars, we must cultivate high-quality, professional new military talents who understand joint operations, actual combat, and can fight. The People’s Army has relied on learning to get to where it is today, and it will also rely on learning to move forward into the future. For grassroots officers and men, it is necessary to have the awareness and action of persisting in learning and long-term learning. Starting from cultivating an interest in reading, making learning a habit is a good choice.

Officers and men talk

Not only in a certain brigade and a certain battalion of the Army, in recent years, the atmosphere of reading and learning has become increasingly strong in military camps across the country, and building learning-oriented military camps is becoming a conscious action of the majority of officers and men. However, when it comes to reading and learning, there are still some problems that bother front-line leaders. We invited two grassroots cadres to talk about their understanding and practices.

Where does reading time come from

■ Zhu Kai, a cadre of the Yingtal Border Defense Company of the Xinjiang Military Command [District]

“No time” is the main reason why many grassroots officers and men refuse to read. Therefore, to promote reading and learning to become a normal practice, it is necessary to ensure that officers and men have time to read. So, where does reading time come from?

Making good use of the time that officers and men can control on their own is the key. Legal holidays, weekends, evenings on non-night training days, etc., these can be arranged by officers and men themselves, which is not a small amount. In daily work, we should try to avoid encroaching on these times and remind officers and men to take time to read books after handling personal affairs. Whether it is dozens of minutes or three or two hours, as long as you open the book and read, you will gain something.

In addition to the whole block of time, we should also make full use of fragmented time such as training intervals, before going to bed and after meals. Fragmentation of time does not mean

fragmentation of knowledge. If you read a few pages every time, you will have a considerable amount of reading in the long run.

An ancient said: “If you can work hard and be independent, you can read at home, in the wilderness, in a busy place, and you can read while carrying firewood and herding pigs.” This tells us that if a person really wants to read and loves to read, he can always find time to read, because time is like water in a sponge, and there is always time if you squeeze it.

(Compiled by Liu Xinyu)

How to choose the books to read

■ Chen Yan, a cadre of a certain company of a certain naval unit

First, there is an interest in reading, and then there is a love of reading. Therefore, before the officers and men form a reading habit, it is very important to guide them to read what kind of books. As the saying goes, “Reading is beneficial”. If the officers and men do not like to “read”, the benefits of reading are naturally out of the question.

In addition to the must-read books on the party’s innovative theories, disciplines and rules, I recommend the following three types of books to the company’s officers and men:

First, skill improvement. Books related to speech and eloquence are very practical and operational. Officers and men like to read them and gain immediate results. In addition, books on business management, psychology, etc. are especially suitable for squad leaders and backbones to read. The knowledge and methods in them can help them improve their work ability.

Second, humanities and social sciences. They are mainly books that help to cultivate the correct “three views”, such as “Crawling Low” and “Life”. Historical books and celebrity biographies are also good. Officers and men can distinguish right from wrong, learn lessons and correct the direction of life after reading them.

Third, party history, military history, and war history. For example, “Sparks Spreading Across the Land”, “The Decisive Battle”, “The War of Resistance Against Japanese Aggression”, “The Korean War”, etc., allow officers and men to increase their military knowledge while having a clearer understanding of the extraordinary struggle of our party and army, thereby strengthening their belief in joining the army and serving the country.

第七十四集团军某旅打造装备研用挖潜队伍——

飞行训练场走来”多能团队”

■解放军报记者 陈典宏 特约通讯员 许浩杰

风起云涌，铁翼飞旋。

近日，迎着绵绵春雨，记者走进第 74 集团军某旅训练场，见证了一场多机型飞行训练。面对复杂气象条件，飞行员紧盯空情变化，驾驶战机搏击长空，按计划完成预定训练课目。

“让战鹰飞出’向战加速度’，既离不开飞行员的苦练精飞，也离不开旅装备研用’多能团队’对战机各项性能的持续挖潜。”该旅领导告诉记者，近年来，随着多型战机陆续列装部队，该旅遴选培养相关专业理论尖子、教学尖子、组训尖子，打造了一支集研究、教学、组训于一体的装备研用”多能团队”。他们围绕理论研究、装备挖潜、组训创新、备课示教等展开攻关，着力提升飞行训练质效。

空中，激战正酣；塔台里，指令奔流。接到”编组前出突破’敌’雷达阵地”命令后，飞行员们迅速操纵战机变换阵型，采取低空突防战术，向目标地域发起突击……

战机起落间，大量飞行数据汇聚塔台。某机房里，”多能团队”成员正操作电脑收集数据并展开分析。记者了解到，通过分析比对近几次训练数据变化，他们发现了飞行员训练中存在的技术短板，并给出针对性补强措施。

“‘多能团队’不仅磨砺’老剑法’，还研练’新招式’。”一名飞行参谋告诉记者，某型战机列装后，”多能团队”对战机飞控系统和火控系统展开深入研究，进一步优化操作流程、挖掘装备潜能。在他们的助力下，该型战机列装不久便完成首飞。

谈话间，记者看到两名完成训练的飞行员走进塔台，与”多能团队”成员围绕训练细节展开讨论。

“战术层面的创新离不开技术层面的支撑。”其中一名飞行员告诉记者，今年以来，为探索一项多机协同新战法，他们多次向”多能团队”请教技战术问题，并有针对性地展开专攻精练，取得明显成效。

该旅领导介绍，依托”多能团队”力量，他们探索构建”理论—技术—战术”战斗力生成链路，取得 10 余项战法训法成果，着力把装备科技优势转化为能力优势、作战优势。

夜色渐浓，星垂四野，该旅官兵转入夜间训练。航灯下，数架战机腾空而起，消失在茫茫夜空。

仰望加力奋飞的”鹰群”，记者仿佛看到，一条飞行员”能力进阶之路”正在向远方延伸……

A Brigade of the 74th Group Army Has Built a Team to Tap the Potential of Equipment Research and Use

Source: PLA Daily Author: Chen Dianhong Xu Haojie Editor: Du Shengzhi 2025-04-23

A brigade of the 74th Group Army has built a team to tap the potential of equipment research and use——

A "multi-skilled team" came to the flight training ground

■ PLA Daily reporter Chen Dianhong Special correspondent Xu Haojie

The wind is rising and the iron wings are flying.

Recently, in the continuous spring rain, the reporter walked into the training ground of a brigade of the 74th Group Army and witnessed a multi-aircraft [helicopter] flight training. Faced with complex weather conditions, the pilots kept a close eye on the changes in the air situation, drove the combat aircraft to fight in the sky, and completed the scheduled training courses as planned.

"To make the war eagle fly at an 'accelerated speed', it is inseparable from the hard training of pilots and the continuous potential tapping of various performances of the aircraft by the 'multi-functional team' of the brigade's equipment research and application." The brigade leader told reporters that in recent years, as various types of combat aircraft have been successively equipped with troops, the brigade has selected and trained top theoretical, teaching and training experts in related majors, and created a "multi-functional team" for equipment research and application that integrates research, teaching and training. They have conducted research on theoretical research, equipment potential tapping, training innovation, lesson preparation and demonstration, and strived to improve the quality and effectiveness of flight training.

In the air, the battle is in full swing; in the tower, the instructions are running. After receiving the order to "form a group to break through the 'enemy' radar position", the pilots quickly manipulated the combat aircraft to change formations, adopted low-altitude penetration tactics, and launched an assault on the target area...

During the takeoff and landing of combat aircraft, a large amount of flight data gathered in the tower. In a certain computer room, members of the "multi-functional team" are operating computers to collect data and conduct analysis. The reporter learned that by analyzing and comparing the changes in recent training data, they found the technical shortcomings in pilot training and gave targeted reinforcement measures.

"The 'multi-skill team' not only sharpened the 'old swordsmanship', but also studied 'new moves'." A flight staff told reporters that after a certain type of aircraft was put into service, the "multi-skill team" conducted in-depth research on the fighter's flight control system and fire control system to further optimize the operating process and tap the potential of the equipment. With their help, the fighter completed its first flight shortly after it was put into service.

During the conversation, the reporter saw two pilots who had completed the training walked into the tower and discussed the details of the training with members of the "multi-skill team".

“Innovation at the tactical level is inseparable from the support at the technical level.” One of the pilots told reporters that since this year, in order to explore a new multi-aircraft coordinated tactical method, they have repeatedly asked the “multi-skill team” for technical and tactical issues, and conducted targeted specialization and refinement, achieving significant results.

The leaders of the brigade introduced that relying on the strength of the “multi-skilled team”, they explored the construction of the “theory-technology-tactics” combat power generation link, achieved more than 10 combat methods and training results, and focused on transforming the advantages of equipment technology into capability advantages and combat advantages.

As the night deepened and the stars hung in the sky, the officers and men of the brigade turned to night training. Under the navigation lights, several combat aircraft took off and disappeared into the vast night sky.

Looking up at the “eagle flock” flying with full force, the reporter seemed to see that a pilot’s “capability advancement path” was extending into the distance...

第 78 集团军某旅组织基层党组织书记集训

来源：解放军报 作者：高岩泽 梁铎 责任编辑：林诗清 2025-04-24

第 78 集团军某旅组织基层党组织书记集训——

培养”明白人” 练强”领头雁”

■高岩泽 梁 铎

“动态分散条件下如何发挥党组织功能作用”“怎样在抓好军事训练的同时做好安全管理”……近日，第 78 集团军某旅组织基层党组织书记集训，来自基层的党组织书记齐聚一堂，分享工作心得、共研管用招法。

“提升基层全面建设水平，建强’领头雁’队伍是关键。”该旅领导介绍，他们前期调研发现，少数基层党组织书记履职时间不长、工作经验不够丰富，一定程度存在抓经常性工作招法不多、党务工作能力不强等问题，影响组织功能发挥。为此，他们组织专题集训，精心研究方案计划和授课内容，帮助基层党组织书记在集训淬火中提升履职能力，培养基层建设”明白人”。

集训中，该旅重点围绕组织建设、思想政治教育、日常管理等方面，通过授课辅导、情景模拟、实案剖析、研讨交流等方式，把”学、研、考、看、讲、练”结合起来，帮助大家掌握工作急需、抓建管用招法。其间，他们还利用集中学习、经验分享、考核评比等时机，针对基层党务工作中的重难点问题组织难题会诊、专题研讨，引导参训人员结合具体案例剖析症结、制订对策。

一次情景模拟环节中，该旅某连党支部书记郭振现场分享了”支委扩大会研究制订年度按纲建连规划”等基层党务工作经验。他结合连队具体案例，讲解流程步骤，分享心得体会。课后，参训人员纷纷表示，沉浸式学习让他们收获满满。

带着问题来，装着收获走。据了解，本次集训筹备阶段，该旅机关围绕基层党组织建设的难点堵点问题，归纳整理形成问题清单。集训开始后，他们邀请经验丰富的党员干部和业务骨干，结合自身经验分享工作做法，并将集训成果制作成册，发放到每名参训人员手中，以便他们返营后能随查随用。

“既有鲜活的情景案例，也有实用的招法传授，这次集训帮我补齐短板弱项，理清工作思路。”该旅某连新任党支部书记张驰表示，他将把集训中学到的方法运用到工作实践中，推动连队建设持续向上向好。

A Brigade of the 78th Group Army Organized a Training Session for Grassroots Party Organization Secretaries

Source: PLA Daily Author: Gao Yanze Liang Duo Editor: Lin Shiqing 2025-04-24

A brigade of the 78th Group Army organized a training session for grassroots party organization secretaries——

Cultivate “understanding people” and strengthen “leading geese”

■ Gao Yanze Liang Duo

“How to play the role of party organizations under dynamic dispersion conditions” “How to do a good job in safety management while doing a good job in military training”... Recently, a brigade of the 78th Group Army organized a training session for grassroots party organization secretaries. Party organization secretaries from the grassroots gathered together to share work experiences and jointly study effective strategies.

Improving the level of comprehensive grassroots construction and building a strong “leading goose” team is the key. “The leaders of the brigade introduced that they found in their previous investigation that a few grassroots party organization secretaries had not been in office for a long time and did not have rich work experience. To a certain extent, they had few methods for regular work and weak party work ability, which affected the function of the organization. To this end, they organized special training, carefully studied the plan and teaching content, and helped the grassroots party organization secretaries improve their ability to perform their duties in the training, and cultivated grassroots construction “knowledgeable people”. During the training, the brigade focused on organizational construction, ideological and political education, daily management and other aspects, and combined “learning, research, examination, watching, speaking, and practicing” through teaching and tutoring, scenario simulation, case analysis, discussion and exchange, etc.,

to help everyone master the urgent needs of work and grasp the methods of construction and management. During this period, they also took advantage of opportunities such as concentrated learning, experience sharing, and assessment and evaluation to organize problem consultations and special seminars on key and difficult issues in grassroots party work, and guide the trainees to conclude Combine specific cases to analyze the crux and formulate countermeasures.

In a scenario simulation session, Guo Zhen, secretary of a company party branch of the brigade, shared his experience in grassroots party affairs such as "the expanded branch committee meeting studies and formulates the annual company building plan according to the outline". He combined the specific cases of the company, explained the process steps, and shared his experience. After the class, the trainees said that the immersive learning made them gain a lot.

Come with questions and leave with gains. It is understood that during the preparation stage of this training, the brigade headquarters summarized and sorted out the difficult and blocked problems in the construction of grassroots party organizations to form a list of problems. After the training began, they invited experienced party members and cadres and business backbones to share their work practices based on their own experience, and made a book of the training results and distributed it to each trainee so that they can check and use it after returning to the camp.

"There are both vivid scenario cases and practical tactics. This training helped me to make up for my shortcomings and clarify my work ideas. "Zhang Chi, the new party branch secretary of a company of the brigade, said that he will apply the methods learned in the training to work practice and promote the continuous improvement of the company's construction.

军营观察丨第 77 集团军某旅探索创新新兵训练模式

来源：解放军报 作者：蔡从润 李佳豪等 责任编辑：林诗清 2025-04-25

"新兵临时炮班"精彩亮相

■蔡从润 解放军报特约记者 李佳豪

初春，巴蜀大地披上新绿，在第 77 集团军某旅营区内，一场新修订的军事训练大纲课目示范展开。

"全班注意，开始吊装。"随着班指挥员下达口令，某炮班成员立即奔赴战位。

此时，记者看到课目示范与以往不同之处——这个炮班，从班指挥员到炮手、再到吊装手，均由新兵担任。准备器材、构设阵地、开展吊装……他们操作娴熟流畅，某型火炮徐徐展开，炮口直指云霄。

“报告，某型火箭炮弹药吊装课目完成。”随着班指挥员的声音传来，穿梭于各个战位的新兵们，迅速靠拢，昂首挺立呈一字队形列队。

“这个炮班怎么都是新兵？”面对记者的提问，该炮班所在营张教导员回答：”其实，这不是一个建制班，而是由新兵组成的临时炮班。”

谈及这个”新兵临时炮班”的来龙去脉，张教导员说：”得知旅里要组织课目示范，这几名刚下连不久的新兵个个摩拳擦掌，主动找到我，申请担负相关任务。”

“一方面，如今新兵多是大学生，知识底子厚、能力素质强，来到部队后渴望拥有展示才能的舞台，尽快崭露头角；另一方面，随着这些年我们创新探索新兵训练模式，新兵下连后，能够跑步进入战位。”张教导员介绍说，”接到这几名新兵的申请，营党委经过研究，决定将新修订的军事训练大纲中相对简单的课目示范交给他们。”

就这样，”新兵临时炮班”应运而生——得益于在新兵连时的专业课目前置训练，几名新兵很快掌握了装备操作要领。不仅如此，他们还发挥大学生士兵知识储备丰富等优势，针对示范任务绘制了详细的思维导图，将每个动作间的衔接流程精确到秒，课目完成时限大幅缩短。

“过去，大家总认为我们新兵下连后要度过’第二适应期’，难以快速进入情况、担起重担。然而事实证明，只要训练方法科学得当，我们也能很快跑步进入战位。”走下课目示范训练场，刚刚担任班指挥员的新兵唐赞打比方说，”同样是罗汉松，它既可以挺立山巅傲然风雪，也可以成为盆栽弱不禁风，区别在于人们如何定义它、培育它。”

“好一群拔节生长的’罗汉松’！”看到刚才”新兵临时炮班”行云流水般的操作，记者禁不住称赞道。

当天晚点名，一场为”新兵临时炮班”特意准备的表彰仪式在营部举行。唐赞和其他几名新兵战友被评为”新兵之星”，他们的脸上露出灿烂的笑容。

“下次遇到大项任务，我们新兵争取继续挑重担、打头阵。”唐赞自信地说。

军营观察丨第 77 集团军某旅探索创新新兵训练模式

第 77 集团军某旅探索创新新兵训练模式——

从”第二适应期”到”拔节成长期”

■张 军 陈俊旭 解放军报记者 张磊峰 特约记者 李佳豪

第 77 集团军某旅某连组织新兵授枪仪式。张永宏 摄

“2 分 17 秒，完成课目！”3 月下旬，一场小比武在第 77 集团军某旅火箭炮营进行。随着计时员的报告声，官兵将目光投向下连不久的新兵赖文杰。在某型火炮操作这个高难度课目比拼中，赖文杰脱颖而出，荣获季军。

晚点名时，值班员将赖文杰的照片贴上训练”龙虎榜”。记者发现，还有多名新兵光荣上榜。

“现在的新兵不容小觑。虽然他们下连时间不长，但不少人成长为某一岗位、某项任务的骨干力量。”谈及新兵们的优异成绩，该营金营长欣喜地说，”以往我们将新兵下连后的头几个月称为’第二适应期’，大家都想办法帮助他们尽快胜任岗位。随着旅队探索创新’前置训练—纳入编组—任务实践’新兵训练模式，如今，这一周期大幅缩短，’第二适应期’成为新兵的’拔节成长期’。”

下连没多久，新兵成了”神炮手”——

前置专业训练，跑步进入战位

“所谓’第二适应期’，不仅是新兵在适应连队，连队其实也在适应新兵。”过去，每逢新兵下连，某连吴连长都会感到焦虑：老兵已经离队，新兵尚不具备相应的专业能力，一些岗位出现缺位，部分课目训练不顺利。

“这时候，我们常常感到分身乏术。”某连中士彭凯煜坦言，过去新兵下连，作为老兵，一边要手把手为新兵教学，一边还要接手新兵尚不能担负的岗位职责。

下连后的一次训练，彭凯煜至今记忆犹新。营里组织实装训练，班里剩下的 6 名老兵，1 人休假，1 人在院校培训，1 人参加上级专业集训，他不得不”赶鸭子上架”，作为炮手随班参训。由于下连没几天，他对于专业知识、器材使用、装备操作一知半解，在训练中根本插不上手。”老兵们忙得团团转，而我只能在一旁干着急，心情就像是在火上烤。”彭凯煜说。

无独有偶，类似的情况在其他连队同样出现。某连王指导员说：”我们炮兵单位多人一门炮，每个人都有各自的职责分工，缺一不可。少任何一个环节，都可能影响到战斗力生成。”

“不过现在情况大不一样了。”王指导员话锋一转，他以最近一次训练为例，对记者说，”从通信兵到计算兵，从炮手到弹药手……刚下连的新兵们各司其职，确保了训练顺利进行。”

“改变源于旅队前置训练课目的探索。”彭凯煜说，作为连队的新训骨干，他和多名老兵连续几年都被派往新训机构担任专业教练员，提前对新兵开展营属武器使用、主战装备操作等多个专业课目的教学训练。他说：”新兵们在新训机构提前接受专业课目辅导，下连后自然能够与岗位实现’无缝衔接’。”

对于组训模式的改变，该旅今年首位登上训练”龙虎榜”的新兵赵永润直言”获益匪浅”——在前置训练期间，他被班长发现有担任炮手的潜力。于是，在接下来的时间里，他一边完成新兵基础训练，一边接受火炮专业理论学习、模拟装备操作等课目辅导。就这样，在新兵训练结业时，他已经基本掌握了某型火炮专业知识。下连后没多久，他就作为炮手参加实弹射击训练。在去年年终考核中，他凭借多课目优秀的成绩，如愿被旅队评为”神炮手”，登上训练”龙虎榜”。

“过去，从新兵成长为’神炮手’，没有一年半载绝对不行。”该旅领导说，这些年，随着兵员素质提升，新兵的学习能力增强，适时在新兵基础训练中前置穿插专业课目，既有助于新兵下连后尽快胜任岗位，也能稳步提升部队战斗力水平。

新兵下连后的第一个月，被定为”战备月”——

纳入行动编组，形成”肌肉记忆”

深夜时分，一阵急促的警报声打破营区的宁静，一场战备应急拉动训练展开。

“应急出动信号！”判明警报声类别后，新兵徐鑫锐立即起身穿衣、披挂装具，火速奔向库房，与战友们协力完成作战物资装载……几分钟后，他完成应急出动准备，抵达预定集结地域。

“物资齐全、流程准确，做得好！”在完成物资检查后，班长吴昭琨表扬了徐鑫锐的训练表现。徐鑫锐笑着说：”班长，我参加了这么多次编组训练，早就形成’肌肉记忆’了。”

“以往，连队通常采取以训代学的方式，让新兵在训练中循序渐进掌握课目内容。”紧接着，吴昭琨话锋一转，”然而前些年一次训练，我所在连队新兵不熟悉战备行动方案，险些影响任务进程。”

“新兵之’新’，在于他们只初步掌握了基础军事技能，想要走上战位，还有许多内容需要学习掌握。”吴昭琨向记者举例说，”以我们连队普通一兵为例，这名战士下连后不仅要尽快学习炮兵作战行动战术战法，还要掌握包括抗洪抢险、抗震救灾等在内的 10 余套行动编组方案。”

“这些年，部队执行任务更加频繁、担负使命更加多样，及时将新兵纳入行动编组已迫在眉睫！”这件事提醒该旅党委，新兵下连只是起点，帮助他们快速进入战位才是关键。

针对这一情况，该旅将新兵下连后的第一个月定为”战备月”，集中组织新兵学习战备方案、熟悉出动流程、掌握器材使用等内容，并通过训练、拉动等方式，让新兵第一时间融入各类作战编组。

作为连队步枪手，新兵蒋宇轩不仅在作战编组中担负炮阵地警戒防卫任务，同时也在应急救灾编组中担任工程器械操作手。为此，在”战备月”中，他先是被安排到警卫勤务连参加警戒专业集训，随后又被派去某地方职业学校学习挖掘器械操作。

此举带来的效果立竿见影。在学成归队后不久，旅队驻地周边某县发生地震。所幸灾情影响不大，该旅未接到参与抗震救灾任务的命令。不过，以此为契机，旅里组织了一场抗震救灾应急比武。比武现场，蒋宇轩操作工程器械和战友们同台竞技，最终脱颖而出，以课目第三名的好成绩，登上训练”龙虎榜”。

站在训练”龙虎榜”前回忆此事，蒋宇轩深有感触地说：”不管是新兵还是老兵，只要穿上这身军装，就要随时做好遂行各项任务的准备。”

“新兵兼职岗”设立后，一大批新兵毛遂自荐——

任务实践牵引，自信走上前台

周末，走进该旅某营俱乐部，一堂机械设计理论授课正在如火如荼进行。毕业于某知名大学机械工程专业的新兵陈勇，作为教练员站在讲台上，向台下战友讲授相关专业知识。台下，官兵们聚精会神地听课、做笔记。

陈勇能成为教练员，是因为有着过硬的专业能力。他具备机械设计特长，下连后不久就担任”训练器材技术革新员”。陈勇不负众望，在随后 3 个月内完成某型装备辅助连接杆设计，并凭借这项小发明，一举将该型装备展开课目训练时间大幅缩短，因此登上训练”龙虎榜”。

“如今的新兵自我意识强，都希望能尽快崭露头角，在连队发光发热。”谈及陈勇”训练器材技术革新小组组长”头衔的由来，该旅领导向记者介绍，”针对这一特点，从下连伊始，我们就结合新兵们的专业特长、兴趣爱好，在营连设置多个’新兵兼职岗’，并赋予相应任务职责，以此为他们搭建施展才能的舞台。”

事情还要从去年初新兵下连讲起。该旅人力资源科王干事说，旅里组织问卷调查，询问新兵”下连后感到最不适应的事情是什么”。本以为新兵大多会选择”想家”“不适应高强度训练”，没想到，超过半数新兵给出的答案是”在连队没有存在感”。

某连新兵唐赞坦言：”如果怕离家、怕吃苦，就不会选择当兵。相比在训练场上流血流汗，更让我感到苦恼的，是连队有时候把我们新兵当成’透明人’。”他在随后的座谈中举例说，

一次连队组织某新战法试训，得知消息后，他欣然报名，没想到却被骨干以”担心新兵受伤”为由拒绝。对此，唐赞有些苦恼：”我们新兵不是’娇弱花朵’，别总把我们关在’温室大棚’里。”

自”新兵兼职岗”设立后，一大批新兵毛遂自荐走上前台。在该旅训练专修室，入伍前曾在一家互联网公司工作的新兵樊一江，正领衔该旅软件开发小组，对某系统进行升级；在游泳训练中心，拥有国家二级运动员资质的新兵赵永润正带领补差队，利用业余时间进行强训……

“当然，我们也不会让任何新兵掉队。”该旅领导说，尽管新兵刘瑞没有什么特长爱好，但他所在连队主官还是赋予了他”兼职安全员”的职责。从参与连队安全隐患排查，到列席安全形势分析会，刘瑞干起工作来尽心尽责。不仅如此，他在连队的表现也发生了转变，从起初不善言谈的”闷葫芦”，变成了积极建言献策的”点子王”。

“能够参与连队重要工作，让我感到自己时刻’被需要’。”谈及个人转变，刘瑞深有感触地说，”在一次次任务牵引下，我完成了从旁观者到参与者的转变，真正融入连队集体。”

“每名新兵都是部队建设的主人翁。”该旅领导告诉记者，随着越来越多的新兵在各自岗位上发挥聪明才干，旅队新兵下连后对连队满意率达到97%，上一批满服役期的义务兵申请留队率超过 90%。

军营观察丨第 77 集团军某旅探索创新新兵训练模式

来源：解放军报 作者：蔡从润 李佳豪等 责任编辑：林诗清 2025-04-25 10:12:18

亲历者说

担任炮长，打出好成绩

■肖 铮

“成功摧毁’敌’火力点！”前年，还是新兵的我，随部队赴大漠戈壁参加火炮实弹射击训练。听到电台里传来观察所火力毁伤评估结果后，我心里悬着的石头终于落了地。

这次训练，不仅是我的军旅生涯首次担任炮长，也是旅里第一次安排义务兵担任炮长领衔实弹射击任务。走下训练场，战友们纷纷为我点赞。

炮兵岗位专业性强，特别是”一炮之长”，需要具备很好的指挥素养。以往，一名新兵成长为炮长，至少需要两三年时间。我之所以能这么快胜任岗位，还要从新训机构时的训练说起。一次炮兵专业前置训练，连队一名老炮长发现我对火炮操作有天赋，便将我当成”种子选手”培养。从那以后，我白天与战友们在训练场上摸爬滚打，晚上向老炮长学习专业知识。新兵训练结束后，我已经掌握了不少专业知识。

下连后，作为炮手，我多次参加旅里组织的实弹射击训练，成为同批战友中参加训练任务最多、实弹射击经验最丰富的新兵。

“小肖，下次实弹射击训练，你担任炮长，有没有信心？”一次实弹射击训练前，连长找到我征求意见。我坚决受领任务，最终不负众望，带领炮班打出了好成绩。凭借优异表现，我登上旅队训练”龙虎榜”。

担任”安全员”，找到成就感

■刘 瑞

新兵连时，我的性格内向又没有特长，在同批新兵中存在感很低，自信心接连受到打击。

下连后，连队为部分新兵设置了”新兵兼职岗”。看着同批新兵毛遂自荐，纷纷崭露头角，逐渐融入连队集体，我感到很焦虑，担心错失成长进步的机会。

一次教育课上，我因没有认真听讲被值班员点名批评，顿时站在队伍里不知所措。指导员看出我的异样，课后找我谈心。

我鼓足勇气对指导员说：”指导员，我虽然没有特长，但也想为连队做点贡献。”

了解情况后，指导员拍了拍我的肩膀说：”我知道你想为集体争光，连队需要一名’兼职安全员’，你愿意试试吗？”

见我激动地点了点头，指导员讲述了连队几名优秀骨干的成长经历。他们在”兵之初”时和我一样有思想包袱，但他们没有被困难吓倒，而是越挫越勇，最终实现自身价值。

“岗位虽小，但责任重大。”在指导员的耐心开导下，我摆正心态、振作精神，努力完成好组织赋予我的职责。

不久后，我列席参加了连队的安全形势分析会，并以”兼职安全员”的身份向连队党支部提交了安全隐患意见建议。从战友们的眼神里，我看到了认可。这一刻，我真正融入了连队集体。

Military Camp Observation ｜ A Brigade of the 77th Group Army Explores Innovative Training Models for New Recruits

Source: PLA Daily Author: Cai Congrun, Li Jiahao, etc. Editor: Lin Shiqing 2025-04-25

“New Recruits Temporary Artillery Squad” Makes a Wonderful Appearance

■ Cai Congrun, Special Correspondent of PLA Daily, Li Jiahao

In early spring, the land of Bashu is covered with new green. In the camp of a brigade of the 77th Group Army, a newly revised military training syllabus course demonstration was launched.

“Attention, all classes, start hoisting.” As the squad commander gave the order, members of a certain artillery squad immediately rushed to their positions.

At this time, the reporter saw the difference between the course demonstration and the past - this artillery squad, from the squad commander to the gunner, and then to the hoisting hand, are all new recruits. Prepare equipment, set up positions, carry out hoisting... They operate skillfully and smoothly, and a certain type of artillery is slowly deployed, with the muzzle pointing straight to the sky.

“Report, the course of hoisting ammunition for a certain type of rocket launcher has been completed.” As the squad commander’s voice came, the recruits who were shuttling between various combat positions quickly gathered together, stood tall and lined up in a straight line.

“Why are all the new recruits in this artillery squad?” In response to the reporter’s question, Instructor Zhang of the battalion where the artillery squad is located replied: “In fact, this is not a regular squad, but a temporary artillery squad composed of new recruits.”

Talking about the ins and outs of this “temporary artillery squad of new recruits”, Instructor Zhang said: “When they learned that the brigade was going to organize a course demonstration, these new recruits who had just joined the company were eager to find me and apply for related tasks.”

“On the one hand, most of the new recruits nowadays are college students with a solid foundation of knowledge and strong ability and quality. After joining the army, they are eager to have a stage to show their talents and make a name for themselves as soon as possible; on the other hand, as we have innovated and explored the training model for new recruits in recent years, new recruits can run into their combat positions after joining the company.” Instructor Zhang introduced, “After receiving the applications from these new recruits, the battalion party committee decided to give them the relatively simple course demonstrations in the newly revised military training outline after research.”

In this way, the “temporary artillery squad of new recruits” came into being - thanks to the professional course pre-position training in the recruit company, several new recruits quickly mastered the essentials of equipment operation. Not only that, but they also took advantage of the college students’ rich knowledge reserves and drew detailed mind maps for the demonstration tasks, accurately connecting the processes between each action to the second, and greatly shortened the time limit for completing the course.

“In the past, everyone always thought that we recruits had to go through the ‘second adaptation period’ after joining the company, and it was difficult for us to quickly get into the situation and take on the heavy responsibility. However, the facts have proved that as long as the training methods are scientific and appropriate, we can also run into the battle position quickly.” After

leaving the course demonstration training ground, the new recruit Tang Zan, who had just served as the squad commander, said by analogy, “The same Podocarpus can stand proudly on the top of the mountain in the wind and snow, or it can become a potted plant that is weak and vulnerable to the wind. The difference lies in how people define it and cultivate it.”

“What a group of ‘Podocarpus’ is growing rapidly!” Seeing the smooth operation of the “new recruits temporary artillery squad” just now, the reporter couldn’t help but praise it.

At the roll call that night, a commendation ceremony specially prepared for the “new recruits temporary artillery squad” was held at the battalion headquarters. Tang Zan and several other new recruits were named “new recruits stars”, and they showed bright smiles on their faces.

“Next time we encounter a major task, we recruits will strive to continue to shoulder heavy responsibilities and take the lead.” Tang Zan said confidently.

A Brigade of the 77th Group Army Explores Innovative Training Models for Recruits——

From the “Second Adaptation Period” to the “Jointing Growth Period”

■ Zhang Jun, Chen Junxu, PLA Daily Reporter Zhang Leifeng, Special Correspondent Li Jiahao

A company of a brigade of the 77th Group Army organized a gun-awarding ceremony for recruits. Photo by Zhang Yonghong

“2 minutes and 17 seconds, complete the course!” In late March, a small competition was held in the rocket artillery battalion of a brigade of the 77th Group Army. With the report of the timekeeper, the officers and men turned their eyes to Lai Wenjie, a new recruit who had just joined the company. In the competition of a certain type of artillery operation, Lai Wenjie stood out and won the third place.

During the evening roll call, the duty officer posted Lai Wenjie’s photo on the training “Dragon and Tiger List”. The reporter found that there were many other recruits who were honored to be on the list.

“The new recruits nowadays should not be underestimated. Although they have not been in the company for a long time, many of them have grown into the backbone of a certain position or a certain task.” Speaking of the excellent performance of the new recruits, the battalion commander Jin said happily, “In the past, we called the first few months after the new recruits were assigned to the company the ‘second adaptation period’, and everyone tried to help them become competent for their positions as soon as possible. With the brigade exploring and innovating the ‘pre-training-

incorporation-task practice' new recruit training model, now this cycle has been greatly shortened, and the 'second adaptation period' has become the 'joint growth period' for new recruits."

Not long after being assigned to the company, the new recruits became "magic gunners"-

Pre-professional training, running into the battle position

"The so-called 'second adaptation period' is not only the new recruits adapting to the company, but the company is actually adapting to the new recruits." In the past, whenever new recruits were assigned to the company, Captain Wu of a certain company would feel anxious: the old soldiers had left the team, the new recruits did not yet have the corresponding professional capabilities, some positions were vacant, and some training subjects were not smooth.

"At this time, we often feel overwhelmed." A company sergeant Peng Kaiyu admitted that in the past, when new recruits were assigned to the company, as a veteran, he had to teach the new recruits hand in hand, and at the same time take over the job responsibilities that the new recruits could not yet undertake.

Peng Kaiyu still remembers a training session after being assigned to the company. The battalion organized a practical training. Of the six veterans left in the class, one was on vacation, one was in academy training, and one was participating in a higher-level professional training. He had to "force the ducks to go on the shelf" and participate in the training as a gunner with the class. Because he had only been assigned to the company for a few days, he had only a vague understanding of professional knowledge, equipment use, and equipment operation, and could not get involved in the training at all. "The veterans were busy, and I could only be anxious on the side, and my mood was like being roasted on the fire." Peng Kaiyu said.

Coincidentally, similar situations also occurred in other companies. Instructor Wang of a certain company said: "There are many people in our artillery unit and one gun. Everyone has their own responsibilities and they are indispensable. Any lack of any link may affect the generation of combat effectiveness."

"But the situation is very different now." Instructor Wang changed the subject and told reporters, taking the latest training as an example, "From communication soldiers to computer soldiers, from gunners to ammunition handlers... the new recruits who just joined the company each performed their duties and ensured the smooth progress of the training."

"The change stems from the exploration of the brigade's pre-training courses." Peng Kaiyu said that as the backbone of the company's new training, he and many veterans have been sent to the new training institution as professional coaches for several consecutive years to conduct teaching and training on multiple professional courses such as the use of battalion weapons and the operation of main combat equipment for new recruits in advance. He said: "The new recruits receive professional course guidance in advance in the new training institution, and they can naturally achieve 'seamless connection' with the positions after joining the company."

For the change in the training model, Zhao Yongrun, the first recruit of the brigade to be on the training "Dragon and Tiger List" this year, said frankly that he "benefited a lot" - during the pre-training, he was discovered by the squad leader to have the potential to serve as a gunner. Therefore, in the following time, while completing the basic training for recruits, he received guidance on artillery professional theory learning, simulated equipment operation and other subjects. In this way, when the recruit training was completed, he had basically mastered the professional knowledge of a certain type of artillery. Not long after joining the company, he participated in live-fire shooting training as a gunner. In last year's year-end assessment, he was rated as a "master gunner" by the brigade as he wished with excellent results in many subjects, and was listed on the "Dragon and Tiger List" of training.

"In the past, it would take at least a year or two to grow from a recruit to a 'master gunner'." The brigade leader said that in recent years, with the improvement of the quality of soldiers and the improvement of the learning ability of recruits, timely interspersing professional subjects in the basic training of recruits can not only help recruits to be competent for their posts as soon as possible after joining the company, but also steadily improve the combat effectiveness of the troops.

The first month after the recruits joined the company was designated as the "combat readiness month" -

Incorporated into the action group to form "muscle memory"

Late at night, a burst of urgent alarms broke the tranquility of the camp, and a combat readiness emergency pull-up training was launched.

"Emergency dispatch signal!" After determining the type of alarm, new recruit Xu Xinrui immediately got up, dressed, and put on his gear, and rushed to the warehouse, working with his comrades to complete the loading of combat supplies... A few minutes later, he completed the emergency dispatch preparations and arrived at the designated assembly area.

"The supplies are complete and the process is accurate, well done!" After completing the material inspection, squad leader Wu Zhaokun praised Xu Xinrui's training performance. Xu Xinrui smiled and said, "Squad leader, I have participated in so many group trainings that I have already formed 'muscle memory'."

"In the past, the company usually adopted the method of training instead of learning, so that the recruits could gradually master the content of the course during the training." Then, Wu Zhaokun changed the subject, "However, in a training a few years ago, the recruits in my company were not familiar with the combat readiness action plan, which almost affected the progress of the mission."

"The 'newness' of the recruits is that they have only mastered the basic military skills. If they want to take up the battle position, there are still many things to learn and master." Wu Zhaokun gave an example to the reporter, "Take an ordinary soldier in our company as an example. After joining the company, this soldier must not only learn the tactics and methods of artillery combat operations

as soon as possible, but also master more than 10 sets of action grouping plans including flood control and rescue, earthquake relief, etc."

"In recent years, the troops have carried out tasks more frequently and undertaken more diverse missions. It is urgent to include the recruits in the action group in time!" This incident reminded the brigade party committee that the joining of the company is just the starting point for the recruits, and helping them quickly enter the battle position is the key.

In response to this situation, the brigade designated the first month after the recruits were assigned to the company as the "War Readiness Month", and organized the recruits to learn the combat readiness plan, familiarize themselves with the dispatch process, master the use of equipment, and integrate the recruits into various combat formations as soon as possible through training and mobilization.

As a company rifleman, recruit Jiang Yuxuan not only undertakes the task of guarding and defending the artillery position in the combat formation, but also serves as an engineering equipment operator in the emergency rescue formation. For this reason, in the "War Readiness Month", he was first arranged to participate in the professional training of the guard service company, and then was sent to a local vocational school to learn the operation of excavation equipment.

The effect of this move was immediate. Shortly after returning to the team after completing his studies, an earthquake occurred in a county near the brigade's station. Fortunately, the disaster did not have a great impact, and the brigade did not receive an order to participate in the earthquake relief mission. However, taking this as an opportunity, the brigade organized an earthquake relief emergency competition. At the competition site, Jiang Yuxuan operated engineering equipment and competed with his comrades on the same stage. In the end, he stood out and was listed on the training "Dragon and Tiger List" with a good result of third place in the subject.

Standing in front of the training "Dragon and Tiger List" and recalling this, Jiang Yuxuan said with deep emotion: "Whether it is a new recruit or a veteran, as long as you put on this military uniform, you must be ready to carry out various tasks at any time."

After the establishment of the "new recruit part-time post", a large number of new recruits volunteered-

Task practice leads, confidently stepping to the front

On the weekend, walking into a battalion club of the brigade, a mechanical design theory class was in full swing. Chen Yong, a new recruit who graduated from a well-known university with a major in mechanical engineering, stood on the podium as a coach and taught relevant professional knowledge to his comrades below the stage. Below the stage, the officers and men listened attentively and took notes.

Chen Yong was able to become a coach because of his strong professional ability. He has a specialty in mechanical design and served as a "training equipment technology innovator" shortly after joining the company. Chen Yong lived up to expectations and completed the design of an auxiliary connecting rod for a certain type of equipment within the next three months. With this small invention, he significantly shortened the training time for this type of equipment, and was therefore listed on the "Dragon and Tiger List" of training.

"Today's recruits have a strong sense of self-awareness, and they all hope to stand out as soon as possible and shine in the company." Talking about the origin of Chen Yong's title of "Leader of the Training Equipment Technology Innovation Group", the brigade leader introduced to reporters, "In view of this feature, from the beginning of joining the company, we have combined the professional expertise and interests of the recruits to set up multiple 'part-time positions for recruits' in the battalion and company, and assigned corresponding tasks and responsibilities, so as to build a stage for them to display their talents."

The story also started when the recruits joined the company at the beginning of last year. Wang, an officer of the brigade's human resources department, said that the brigade organized a questionnaire survey and asked the recruits "what they felt most uncomfortable with after joining the company." It was thought that most recruits would choose "homesickness" and "unsuitable for high-intensity training", but unexpectedly, more than half of the recruits gave the answer "no sense of existence in the company."

Tang Zan, a new recruit of a certain company, said frankly: "If I was afraid of leaving home and suffering, I would not choose to be a soldier. Compared with the blood and sweat on the training ground, what bothers me more is that the company sometimes treats us new recruits as 'invisible people'." In the subsequent discussion, he gave an example that once the company organized a trial training for a new combat method, after learning the news, he happily signed up, but he did not expect to be rejected by the backbone on the grounds of "worrying about the injuries of new recruits." In this regard, Tang Zan was a little distressed: "We new recruits are not 'delicate flowers', don't always lock us up in the 'greenhouse'."

Since the establishment of the "new recruit part-time post", a large number of new recruits have volunteered to come to the front. In the training room of the brigade, recruit Fan Yijiang, who worked in an Internet company before joining the army, is leading the brigade's software development team to upgrade a system; in the swimming training center, recruit Zhao Yongrun, who has the qualification of a national second-level athlete, is leading the supplementary team to use his spare time for intensive training... "Of course, we will not let any recruits fall behind." The leader of the brigade said that although the recruit Liu Rui has no special hobbies, the chief officer of his company still gave him the responsibility of "part-time safety officer". From participating in the company's safety hazard inspection to attending the safety situation analysis meeting, Liu Rui does his job conscientiously. Not only that, his performance in the company has also changed, from a "dumb person" who is not good at talking at first to an "idea king" who actively offers

suggestions. “Being able to participate in the important work of the company makes me feel that I am always ‘needed’.” Talking about his personal transformation, Liu Rui said with deep feeling, “Under the guidance of tasks, I have completed the transformation from a bystander to a participant and truly integrated into the company.” “Every recruit is the master of the army’s construction.” The brigade leader told reporters that as more and more recruits have demonstrated their intelligence and talents in their respective positions, the satisfaction rate of the brigade’s recruits with the company has reached 97%, and the application rate of the last batch of conscripts who have completed their service period to stay in the team has exceeded 90%.

Military Camp Observation | A Brigade of the 77th Group Army Explores Innovative Recruit Training Model

Source: PLA Daily Author: Cai Congrun Li Jiahao, etc. Editor: Lin Shiqing 2025-04-25 10:12:18

Eyewitnesses say

Served as a gunner and achieved good results

■ Xiao Zheng

“Successfully destroyed the ‘enemy’ firepower point!” Two years ago, I was still a recruit and went to the desert Gobi with the troops to participate in artillery live-fire shooting training. After hearing the fire damage assessment results of the observation post on the radio, the stone hanging in my heart finally fell to the ground.

This training was not only the first time in my military career that I served as a gunner, but also the first time that the brigade arranged a conscript to serve as a gunner to lead a live-fire shooting mission. After leaving the training ground, my comrades praised me one after another.

Artillery positions are highly professional, especially the “chief of one gun”, which requires good commanding qualities. In the past, it took at least two or three years for a recruit to grow into a gunner. The reason why I was able to take on the position so quickly has to do with the training in the new training institution. During an artillery professional pre-training, an old gunner in the company found that I had a talent for artillery operation, so he trained me as a “seed player”. Since then, I have been working hard with my comrades on the training ground during the day, and learning professional knowledge from the old gunner at night. After the recruit training, I have mastered a lot of professional knowledge.

After joining the company, as a gunner, I participated in the live-fire shooting training organized by the brigade many times, becoming a participant in the same batch of comrades.

The recruits with the most training tasks and the most live-fire shooting experience.

“Xiao Xiao, do you have confidence in being the gunner in the next live-fire shooting training?” Before a live-fire shooting training, the company commander came to me for advice. I resolutely

accepted the task, and finally lived up to expectations and led the artillery squad to achieve good results. With my outstanding performance, I was on the "Dragon and Tiger List" of brigade training.

Serving as a "safety officer" and finding a sense of accomplishment

■ Liu Rui

When I was in the recruit company, I was introverted and had no special skills. I had a low sense of presence among the same batch of recruits, and my self-confidence was hit one after another.

After joining the company, the company set up "part-time positions for recruits" for some recruits. Watching the same batch of recruits recommend themselves, emerging one after another, and gradually integrating into the company collective, I felt very anxious and worried about missing the opportunity to grow and progress.

In an education class, I was criticized by the duty officer for not listening carefully, and I was at a loss standing in the team. The instructor saw that I was different and talked to me after class.

I mustered up the courage to say to the instructor: "Instructor, although I don't have any special skills, I also want to make some contributions to the company."

After understanding the situation, the instructor patted my shoulder and said: "I know you want to win glory for the collective. The company needs a 'part-time safety officer'. Are you willing to try?"

Seeing that I nodded excitedly, the instructor told the growth experience of several outstanding backbones in the company. They had ideological burdens like me when they were "soldiers", but they were not frightened by difficulties. Instead, they became more and more courageous and finally realized their own value.

"Although the position is small, the responsibility is great." Under the patient guidance of the instructor, I adjusted my mentality, cheered up, and worked hard to complete the duties assigned to me by the organization.

Soon after, I attended the company's safety situation analysis meeting and submitted safety hazard opinions and suggestions to the company's party branch as a "part-time safety officer". I saw recognition in the eyes of my comrades. At this moment, I really integrated into the company collective.

南部战区陆军某旅开展“官兵接待日”解决基层难题

来源：解放军报 作者：申飞 麻沙 责任编辑：王一亘 2025-04-25

南部战区陆军某旅常态开展”官兵接待日”活动——

解难纾困有了”直通车”

■申飞　麻沙

“一营提出家属来队住房老旧的问题，下面请营房科作出回应……”近日，南部战区陆军某旅组织开展”官兵接待日”活动，机关围绕基层急难愁盼问题现场办公，逐条逐项拿出解决措施。

这支部队驻守边关，小散远单位较多，基层官兵前往机关办事十分不便。今年年初，该旅强军网”兵情兵声”栏目，收到一条来自基层的反馈：边防连队单独驻防，环境条件有限，报废资产占据存储空间。针对此类问题的调研随即展开，相关科室发现大部分基层单位不同程度存在老旧资产管理不便，移交、回收、销毁无门的困扰。为此，他们结合旅队”公物仓”建设工作依法依规进行集中收储，很快解决了这一问题。

此事过后，该旅举一反三，将基层呼声作为机关开展工作的有力抓手，常态组织开展”官兵接待日”等活动，并公开旅主官、纪委、机关科室负责人的联系方式，畅通机关基层沟通渠道，切实为官兵解难纾困。为方便官兵反映问题，他们还开通了线上服务，机关为基层解难纾困有了”直通车”。

前段时间，该旅战士梅帮兴因家人涉法问题影响了工作训练。在战友的建议下，他在旅强军网信箱反映了相关情况，很快便有人与他联系对接并积极协调。此后没过多久，梅帮兴的家人打电话告诉他，问题已经解决，让他不要分心。

连队卫勤力量建设需加强、小专业人才培养不够重视、身份证补办周期过长……该旅政治工作部主任介绍，自活动展开以来，官兵反映的问题涉及卫生、作训、人力资源、部队管理等多个科室，目前均已得到解决和答复。下一步，他们将持续健全制度机制，把好事办好、实事办实，坚定官兵扎根边防、守卫边防、建功边防的信念，激发练兵备战的热情。

A Certain Brigade of the Southern Theater Command Army Held an “Officers and Men Reception Day” to Solve Grassroots Problems

Source: PLA Daily Author: Shen Fei Ma Sha Editor: Wang Yigeng 2025-04-25

A certain brigade of the Southern Theater Command Army regularly held the “Officers and Men Reception Day” activity-

There is a “through train” to solve problems and alleviate difficulties

■ Shen Fei Masha

“The first battalion raised the problem of old housing for family members to come to the team. Please ask the barracks department to respond...” Recently, a certain brigade of the Southern Theater Command Army organized an “Officers and Men Reception Day” activity. The department worked on-site around the urgent and difficult problems at the grassroots level and came up with solutions one by one.

This unit is stationed at the border, with many small and scattered units, and it is very inconvenient for grassroots officers and men to go to the department to do things. At the beginning of this year, the “Soldiers’ Feelings and Voices” column of the brigade’s Strong Army Network received a feedback from the grassroots: the border defense company was stationed alone, the environmental conditions were limited, and the scrapped assets occupied the storage space. A survey on such issues was immediately launched, and the relevant departments found that most grassroots units had different degrees of inconvenience in managing old assets, and were troubled by the difficulty of transferring, recycling, and destroying them. To this end, they combined the construction of the brigade’s “public property warehouse” with the law and regulations to carry out centralized storage, and quickly solved this problem.

After this incident, the brigade learned from it and used the grassroots voice as a powerful tool for the department to carry out its work. It regularly organized activities such as “Officers and Men Reception Day”, and made public the contact information of the brigade commander, the Commission for Discipline Inspection, and the heads of the department, unblocked the grassroots communication channels of the department, and effectively solved problems for officers and men. In order to facilitate officers and men to report problems, they also opened online services, and the department had a “through train” to solve problems for the grassroots.

Some time ago, Mei Bangxing, a soldier of the brigade, was affected in his work and training due to his family’s legal issues. At the suggestion of his comrades, he reported the relevant situation in the brigade’s strong army network mailbox, and soon someone contacted him and actively coordinated. Not long after that, Mei Bangxing’s family called to tell him that the problem had been solved and asked him not to be distracted.

The company’s medical force construction needs to be strengthened, the training of small professional talents is not given enough attention, and the ID card reissue period is too long... The director of the brigade’s political work department introduced that since the launch of the activity, the problems reported by officers and men involved multiple departments such as health, training, human resources, and troop management, and they have all been resolved and responded to. In the next step, they will continue to improve the system mechanism, do good things well, do practical things, strengthen the officers and men’ belief in taking root in the border defense, guarding the border defense, and making contributions to the border defense, and stimulate their enthusiasm for training and preparation for war.

陆军某旅注重强化体系练兵，带动训练水平提升

来源：解放军报 作者：陈游峰 向黎鸣 责任编辑：王一亘 2025-04-25

陆军某旅注重强化体系练兵

穿插小组扫清”拦路虎”

解放军报讯 陈游峰、记者向黎鸣报道：前不久，陆军某旅一场实兵对抗训练拉开帷幕。训练场上，装步分队与侦察、火力等作战要素共同组成穿插小组，官兵密切配合、协同出击，与”敌”展开对抗。

该旅作训科黄参谋介绍，他们将班、排、连战术嵌入基础训练阶段，让各作战要素攥指成拳、形成合力，在真打实抗中检验战法训法、补齐能力短板。

“遭’敌’火力阻拦，立即前出处置！”行进途中，特情突至，指挥员迅速下达指令。然而，在”敌”火力打击下，派出的爆破组很快被导调组判定”阵亡”。

指挥员综合研判后，派出无人机迅速升空侦察。通过分析实时回传的图像，观察手很快发现并上报藏匿于某处的”敌”狙击手位置信息。确认信息后，机枪手立即展开火力压制，爆破手利用地形地物，交替掩护向”敌”火力点迂回接近，成功完成爆破任务。

该旅领导介绍，近年来，他们聚力打通战斗力生成链路，深化推进体系练兵。他们紧贴使命任务创新练兵模式，在强化单兵单装等基本作战单元训练的同时，常态组织多兵种体系练兵，在兵种协同和要素融合中打破壁垒、完善机制，带动训练水平提升。

“左翼遭小股’敌’袭扰”“步战车被’击毁’”……一路硝烟弥漫，一路特情不断。穿插小组刚抵近目标地域，又遭”敌”火力打击。

面对不利局面，指挥员立即组织侦察力量抵近侦察，引导炮兵火力打击；装步分队借助炮火掩护，迅速抢占前沿射击位置，对”敌”展开火力压制。经过一番激战，官兵成功突破”敌”防御阵地，完成要点夺控任务。

“打胜仗必须筑牢基础，建体系必须强固’底盘’。”该旅领导介绍，下一步，他们将继续下沉体系练兵重心，将协同流程向末端一线延伸，通过跨专业交叉授课、多岗位轮训等方式不断提升练兵质效。

A Certain Army Brigade Focuses on Strengthening System Training and Driving the Improvement of Training Level

Source: PLA Daily Author: Chen Youfeng Xiang Liming Editor: Wang Yigen 2025-04-25

A certain army brigade focuses on strengthening system training

The interspersed team clears the “roadblocks”

PLA Daily News Chen Youfeng and reporter Xiang Liming reported: Not long ago, a real-life confrontation training of a certain army brigade kicked off. On the training ground, the armored infantry unit and reconnaissance, firepower and other combat detachments jointly formed an interspersed team. The officers and men cooperated closely and attacked in coordination to confront the “enemy”.

Huang, a staff officer of the brigade’s training office, introduced that they embedded the tactics of the squad, platoon and company into the basic training stage, allowing each combat detachment to clench its fingers into a fist and form a joint force, and test the tactics and training methods in real combat and make up for the shortcomings in capabilities.

“If you are blocked by the ‘enemy’ firepower, go forward immediately to deal with it!” During the march, a special situation suddenly arrived, and the commander quickly issued an order. However, under the “enemy” firepower attack, the blasting team sent out was quickly judged as “killed” by the command and dispatch group.

After comprehensive analysis, the commander sent a drone to quickly take off for reconnaissance. By analyzing the real-time images sent back, the observer quickly discovered and reported the location information of the “enemy” sniper hiding somewhere. After confirming the information, the machine gunner immediately launched fire suppression, and the blaster used the terrain and objects to alternately cover the “enemy” firepower point and successfully completed the blasting task.

The leaders of the brigade introduced that in recent years, they have focused on opening up the combat power generation link and deepening the promotion of system training. They closely follow the mission and task to innovate the training mode. While strengthening the training of basic combat units such as individual soldiers and equipment, they regularly organize multi-arms system training, break barriers and improve mechanisms in the coordination of arms and integration of detachments, and drive the improvement of training level.

“The left wing was harassed by a small group of “enemies”“ “The infantry fighting vehicle was “destroyed”“... The smoke was filled all the way, and special situations continued all the way. The interspersed team had just approached the target area when it was hit by “enemy” firepower.

Faced with an unfavorable situation, the commander immediately organized reconnaissance forces to conduct close reconnaissance and guide artillery fire strikes; the armored infantry squad quickly seized the front-line shooting position with the help of artillery cover and launched fire suppression on the “enemy”. After a fierce battle, the officers and men successfully broke through the “enemy” defense position and completed the task of seizing key points.

“To win a battle, we must lay a solid foundation, and to build a system, we must strengthen the ‘chassis’.” The leaders of the brigade introduced that in the next step, they will continue to sink the focus of system training, extend the collaborative process to the end line, and continuously improve the quality and efficiency of training through cross-disciplinary cross-course teaching, multi-position rotation training and other methods.

陆军某旅推动“三大组织”同向共进，抓建基层呈现良好势头

来源：解放军报 作者：邰二东 杞卫东 责任编辑：王一亘 2025-04-25

陆军某旅推动”三大组织”同向共进

合在一起抓 联成一体建

解放军报讯 邰二东、特约通讯员杞卫东报道：”活动组织经常、作用发挥明显……”日前，陆军某旅某营召开基层建设形势分析会，对党支部、团支部、军人委员会”三大组织”建设情况进行讲评。该旅领导介绍，他们通过完善培训机制、选准配强骨干等方式建强”三大组织”，有力提升了基层全面建设水平。

“加强基层治理，很重要的一条就是坚持党建引领、以党建带群建，把’三大组织’打造成一块整钢。”该旅领导介绍，前期，他们在深入基层调研时发现，一些单位干部骨干任职时间不长、工作经验不足，抓建基层存在思路不清、措施不当等问题，一定程度上影响了工作质效。

为此，该旅引导各营连结合自身实际，以《军队基层建设纲要》为依据，优化完善”三大组织”工作机制，进一步理清工作思路、提升抓建能力。他们针对部分”三大组织”成员对规章制度不熟悉、工作流程不清晰、组织活动不经常等问题，定期组织专题培训，将其履职尽责情况纳入”双争”评比；梳理形成工作职责清单，为”三大组织”成员开展工作提供参考；建立跟进帮带机制，以干部骨干能力素质提升推动群众组织建设增效；遴选训练尖子、技术能手、理论骨干纳入”三大组织”，提升开展工作的科学化、专业化、法治化水平。

“现场聆听’老政工’的授课，大家普遍感到受益匪浅。”一次专题培训结束后，该旅某连军人委员会副主任罗川有感而发。

“‘三大组织’是一个有机整体，必须合在一起抓、联成一体建。”该旅领导介绍，他们抓住基层党组织正副书记这个关键，通过建强”战斗堡垒”，带动引领团支部和军人委员会两个群众组织建设，抓建基层呈现良好势头。

A Certain Army Brigade Promotes the “Three Major Organizations” to Move Forward in the Same Direction, and the Construction of the Grassroots Is Showing a Good Momentum

Source: PLA Daily Author: Tai Erdong Qi Weidong Editor: Wang Yigen 2025-04-25

A certain army brigade promotes the “three major organizations” to move forward in the same direction

Work together to build as one

PLA Daily News Tai Erdong and special correspondent Qi Weidong reported: “Activities are organized regularly and their effects are obvious...” A few days ago, a battalion of a certain army brigade held a grassroots construction situation analysis meeting to review the construction of the “three major organizations” of the party branch, the Communist Youth League party branch [consisting primarily of enlisted personnel], and the military committee. The leaders of the brigade introduced that they have strengthened the “three major organizations” by improving the training mechanism and selecting and strengthening the backbone, which has effectively improved the level of comprehensive grassroots construction.

“To strengthen grassroots governance, it is very important to adhere to the leadership of party building, use party building to lead mass building, and build the ‘three major organizations’ into a piece of solid steel.” The leaders of the brigade introduced that in the early stage, when they went deep into the grassroots to investigate, they found that some cadres and backbones of some units had not been in office for a long time and lacked work experience. There were problems such as unclear ideas and improper measures in building the grassroots, which affected the quality and efficiency of work to a certain extent.

To this end, the brigade guided the battalions and companies to combine their own actual conditions, based on the “Outline of Grassroots Construction of the Army”, to optimize and improve the working mechanism of the “three major organizations”, further clarify the working ideas and improve the ability to build. They organized special training regularly to address the problems of some members of the “three major organizations” being unfamiliar with rules and regulations, unclear work processes, and infrequent organization of activities, and included their performance of duties in the “double competition” evaluation; sorted out and formed a list of work responsibilities to provide reference for the members of the “three major organizations” to carry out their work; established a follow-up and assistance mechanism to promote the efficiency of mass organization construction by improving the ability and quality of cadres and backbones; selected training tops, technical experts, and theoretical backbones to be included in the “three major organizations” to improve the scientific, professional, and legal level of work.

“Everyone felt benefited from listening to the lectures of the ‘old political workers’ on site.” Luo Chuan, deputy director of the military committee of a company of the brigade, expressed his feelings after a special training.

“The ‘three major organizations’ are an organic whole, and must be grasped and built together as a whole.” The leaders of the brigade introduced that they grasped the key of the secretary and deputy secretary of the grassroots party organization, and through building a strong “battle

fortress", led the construction of the two mass organizations of the Youth League branch and the military committee, and showed a good momentum in building the grassroots.

第 81 集团军某旅改进机关服务基层作风：让“家属社区”笑语欢声

来源：解放军报 作者：吴 超 樊龙佳 责任编辑：林诗清 2025-04-26

第八十一集团军某旅改进机关服务基层作风——

“家属社区”笑语欢声

■吴 超 樊龙佳

4 月中旬的一个周末，第 81 集团军某旅”家属社区”内充满欢声笑语。

“办好’家属社区’，是我们做好为基层办实事’下篇文章’的举措之一。”该旅领导介绍，去年，他们组织恳谈会，不少官兵反映家属来队期间生活比较单调。为此，该旅机关积极回应期盼，将闲置营房改建成”家属社区”并增添儿童娱乐设施。然而，刚”开张”时红红火火的”家属社区”，很快又冷清起来。

该旅机关与家属委员会进行走访调研，有的官兵家属说，”家属社区”设备虽然很新，但带孩子体验一下就可以，次数多了有些乏味；有的官兵表示，官兵家属彼此不熟悉，大多时间只能各自活动。

对此，该旅采纳官兵和家属建议，发挥家属委员会作用，鼓励官兵家属参与”家属社区”日常管理工作；为培养军娃的兴趣爱好，邀请有文体特长的官兵和家属在空闲时间担任小教员。经过一段时间努力，之前冷清的”家属社区”变得热闹起来，官兵家属之间的交流越来越多、关系越来越近。

“‘家属社区’再次热闹起来，反映了机关务实的工作作风。”该旅领导表示，机关服务基层是一项长期工程，不能一蹴而就，必须持续改进机关服务基层作风，紧盯实效做好为基层办实事的”下篇文章”。

今年以来，该旅精心组织为基层办实事系列活动，机关对基层官兵急难愁盼问题进行拉单列表，梳理形成”问题清单”并逐项制订解难举措。在此基础上，他们紧盯末端抓落实，及时收集基层官兵意见建议、强化常态跟踪问效。

“机关务实的工作作风，发挥了很好的表率作用。”工兵连连长李瑞安告诉笔者，去年以来，旅机关干部多次深入基层，为战士们详细解读军士的遴选补充、培养使用、教育管理、选拔晋升等相关政策，在军士人才保留使用工作上下了很大功夫。在机关带动下，李瑞安带领连队骨干集思广益，针对军士们普遍关注的职业技能鉴定等问题制订解决方案。连队区

分专业组建强化培训班，指定各专业负责人牵头施训。最终，李瑞安所在连队军士均通过了职业技能鉴定。

好作风连着战斗力。随着一系列解兵难、排兵忧的举措落地落实，该旅多个制约基层建设发展的问题得到解决。训练场上，官兵练兵备战热情高涨，多个训练课目扎实推进。

A Brigade of the 81st Group Army Improves the Style of Serving the Grassroots: Let the “Family Community” Laugh and Laugh

Source: PLA Daily Author: Wu Chao Fan Longjia Editor: Lin Shiqing 2025-04-26

A brigade of the 81st Group Army improves the style of serving the grassroots——

“Family community” laugh and laugh

■Wu Chao Fan Longjia

On a weekend in mid-April, the “family community” of a brigade of the 81st Group Army was full of laughter and joy.

“Running a good “family community” is one of our measures to do a good job in the “next article” of doing practical things for the grassroots.” The leaders of the brigade introduced that last year, they organized a talk, and many officers and men reflected that their families’ lives were relatively monotonous during their stay in the team. To this end, the brigade actively responded to expectations, converted idle barracks into a “family community” and added children’s entertainment facilities. However, the “family community” that was booming when it was just “opened” soon became deserted again.

The brigade’s headquarters and the family committee conducted visits and surveys. Some family members of officers and men said that although the equipment in the “family community” is very new, it is enough to take the children to experience it once, and it is a bit boring if it is too many times; some officers and men said that the families of officers and men are not familiar with each other and can only do their own activities most of the time.

In this regard, the brigade adopted the suggestions of officers and men and their families, gave full play to the role of the family committee, and encouraged the families of officers and men to participate in the daily management of the “family community”; in order to cultivate the interests and hobbies of military children, officers and men with specialties in culture and sports and their families were invited to serve as small teachers in their spare time. After a period of hard work, the previously deserted “family community” became lively, and the exchanges between the families of officers and men increased and the relationship became closer.

“The ‘family community’ has become lively again, reflecting the pragmatic work style of the organization.” The leaders of the brigade said that the organization’s service to the grassroots is a

long-term project that cannot be achieved overnight. It is necessary to continuously improve the organization's service style at the grassroots level and focus on the effectiveness of doing a good job in the "next article" of doing practical things for the grassroots.

Since the beginning of this year, the brigade has carefully organized a series of activities to do practical things for the grassroots. The organization has drawn up a list of urgent and difficult problems of grassroots officers and men, sorted out a "problem list" and formulated measures to solve the problems one by one. On this basis, they closely followed the end to implement, timely collected opinions and suggestions from grassroots officers and men, and strengthened regular tracking and performance evaluation.

"The pragmatic work style of the department has played a good role as a model." Li Ruian, the commander of the engineering company, told the author that since last year, the cadres of the brigade have repeatedly visited the grassroots to explain in detail the relevant policies on the selection, supplementation, training and use, education management, selection and promotion of sergeants, and made great efforts in the retention and use of sergeant talents. Driven by the department, Li Ruian led the backbone of the company to brainstorm and formulate solutions to the problems of professional skills appraisal that the sergeants are generally concerned about. The company organized intensive training classes according to the professions and designated the heads of each profession to lead the training. In the end, all the sergeants in Li Ruian's company passed the professional skills appraisal.

Good work style is connected to combat effectiveness. With the implementation of a series of measures to solve the difficulties and worries of soldiers, many problems that restrict the development of grassroots construction in the brigade have been solved. On the training ground, the officers and men were enthusiastic about training and preparing for war, and many training courses were steadily advanced.

第 76 集团军某旅开展低气象条件下飞行训练

来源：中国军网-解放军报 作者：吴骁峰 李潇潇 责任编辑：林诗清 发布：2025-04-26

第 76 集团军某旅开展低气象条件下飞行训练——

战机编队穿云破雾

■吴骁峰 李潇潇

仲春时节，西南某机场上空云雾弥漫。"起飞！"指令传来，第 76 集团军某旅多架直升机起飞升空，展开一场低气象条件下飞行训练。

透过舷窗望去，山峦之间云雾缭绕，受气流影响，飞行途中战机颠簸不断，机长文荃与飞行员彭修帮全神贯注。

“前方出现大面积积雨云，注意规避。”耳机中传来气象值班员的提醒，彭修帮一边将目光投向飞行仪表上的飞行参数，一边稳稳操控驾驶杆，机长文荃则仔细观察战机飞行姿态。随后，彭修帮操纵战机进入备用航线，成功避开积雨云。

“陌生地域和复杂天候，是淬炼飞行技术的’磨刀石’。”现场指挥员金伟告诉笔者，近年来，旅队结合任务实际，组织部队赴高原、戈壁等陌生地域，展开野外场地起降、夜间仪表着陆、模拟特情处置等训练，锤炼飞行员实战本领。

天空阴沉，春雨霏霏。另一片空域中，直升机双机编队飞越丘陵地带，不利气象条件造成飞行员视距受限。”‘单发停车’，立即处置！”飞行员柴斌驾驶战机飞行时，突然接到特情通报。由于能见度较低，机长谭杰立即点击触控屏，调出电子地图，寻找临时降落地点。”10点钟方向，河滩着陆！”按照谭杰指令，柴斌迅速调整战机航向，向目标地点飞去。

距离目标地点越来越近，柴斌切断”故障”发动机油路，操纵战机稳稳降落在河滩上。机械师任继鹏随即争分夺秒检查战机，顺利排除”故障”。很快，战机再次升空。

随着低气象条件下飞行训练结束，参训战机依次安全着陆，机务分队立即对战机进行检查维护。官兵密切配合、有序作业，为接下来的夜间训练做准备。

该旅领导介绍，为提升训练质效，他们周密筹划训练方案，瞄准重难点课目开展专攻精练，有效锤炼飞行人员与保障人员应急应战能力。

夜幕降临，发动机轰鸣声再次响起。一架架战机在夜色中起飞，展开新一轮训练……

A Brigade of the 76th Group Army Conducted Flight Training Under Low Weather Conditions

Source: China Military Network-People’s Liberation Army Daily Author: Wu Xiaofeng Li Xiaoxiao Editor: Lin Shiqing Release: 2025-04-26

A brigade of the 76th Group Army conducted flight training under low weather conditions——

Fighter formations broke through the clouds and fog

■Wu Xiaofeng Li Xiaoxiao

In mid-spring, there was fog over a certain airport in the southwest. “Take off!” The command came, and several helicopters of a brigade of the 76th Group Army took off and launched a flight training under low weather conditions.

Looking through the porthole, there were clouds and fog between the mountains. Affected by the air flow, the combat aircraft was constantly bumping during the flight. Captain Wen Quan and pilot Peng Xiubang were fully focused.

“There are large areas of cumulonimbus clouds ahead, pay attention to avoid them.” The reminder of the meteorological duty officer came from the headset. Peng Xiubang looked at the flight parameters on the flight instrument while steadily controlling the joystick, and Captain Wen Quan carefully observed the flight posture of the helicopter. Afterwards, Peng Xiubang manipulated the combat aircraft into the backup route and successfully avoided the cumulonimbus clouds.

“Unfamiliar areas and complex weather conditions are the ‘grindstones’ for tempering flight skills.” Jin Wei, the on-site commander, told the author that in recent years, the brigade has organized troops to go to unfamiliar areas such as plateaus and Gobi, based on the actual tasks, to carry out field take-off and landing, night instrument landing, simulated special situation handling and other training to hone pilots’ practical skills.

The sky was gloomy and the spring rain was drizzling. In another airspace, a two-plane formation of helicopters flew over the hilly area, and unfavorable weather conditions caused the pilots’ visual range to be limited. “‘Single engine stop’, deal with it immediately!” Pilot Chai Bin suddenly received a special situation report while flying a helicopter. Due to low visibility, Captain Tan Jie immediately clicked on the touch screen, called up the electronic map, and looked for a temporary landing site. “10 o’clock direction, landing on the river beach!” According to Tan Jie’s instructions, Chai Bin quickly adjusted the course of the helicopter and flew towards the target location.

Getting closer and closer to the target location, Chai Bin cut off the oil line of the “faulty” engine and manipulated the helicopter to land steadily on the river beach. Mechanic Ren Jipeng then raced against time to check the helicopter and successfully eliminated the “fault”. Soon, the helicopter took off again.

As the flight training under low weather conditions ended, the participating helicopters landed safely one after another, and the maintenance team immediately inspected and maintained them. The officers and men cooperated closely and worked in an orderly manner to prepare for the next night training.

The leaders of the brigade introduced that in order to improve the quality and effectiveness of training, they carefully planned the training plan, focused on the key and difficult subjects to carry out specialized training, and effectively tempered the emergency response capabilities of flight personnel and support personnel.

As night fell, the roar of the engine sounded again. Combat aircraft took off in the night and started a new round of training...

陆军某旅科学统筹专业技术教学资源,提升专业能力和综合素质

来源：中国军网-解放军报 作者：郑烨 李连杰 责任编辑：王一亘

2025-04-27

陆军某旅科学统筹专业技术教学资源——

“兵专家”带出过硬骨干

■郑　烨　李连杰

“某型雷达突发故障，立即组织抢修。”日前，陆军某旅四营组织一场专业训练，接到装备抢修指令，两名专业骨干迅速前出，展开抢修作业。与此同时，该旅二营维修”大拿”、一级军士长岳景洲利用某型系统终端实时提供远程指导。

“军士队伍作为备战打仗’生力军’，如何精准培养、科学使用，一直是旅队机关关注的重要课题。”该旅领导介绍，他们在前期调研中发现，随着装备迭代更新速度加快，各营连专业骨干培养质量参差不齐，一定程度上影响部队战斗力提升。

为此，他们打破营连建制，科学统筹专业技术教学资源，广泛开展专长化任教。他们按照”一名’兵专家’带出一群骨干，一群骨干盘活一个领域”的思路，推动全旅优质教学资源共用共享，充分发挥高级军士的”酵母”作用，探索推行”兵专家”带教模式，为年轻骨干成长成才提供帮带指导。

实践中，该旅结合岗位需求、任务特点，区分雷达、导弹、通信、驾驶等不同专业，遴选各专业岗位工作实绩突出、带教经验丰富的高级军士，采取集中培训、结对帮带等方式，对各营连推荐的骨干苗子进行精准帮带。同时，他们结合野外驻训、大项任务、巡检巡修等时机，让年轻骨干在任务实践中摔打磨砺、经受考验，不断提升专业能力和综合素质。

该旅三营雷达技师、三级军士长黄皎智与一营中士银墨然结成帮带对子。黄皎智根据银墨然的学历背景、专业基础等，为其量身定制培养计划。经过一段时间的帮带指导，银墨然成长为技术过硬的专业能手。

“全旅共享优质教学资源，不仅有效提升了各领域专业人才的能力素质，更助推部队战斗力水平再上新台阶。”该旅某营孙营长介绍，某新型通信装备列装后，营里面临缺教材、缺人才的难题，机关及时协调作战支援营三级军士长陈进城为年轻骨干授课辅导，帮带培养出一批优秀装备操作手。

A Certain Army Brigade Scientifically Coordinates Professional and Technical Teaching Resources to Improve Professional Capabilities and Comprehensive Qualities

Source: China Military Network-People’s Liberation Army Daily Author: Zheng Ye Li Lianjie Editor: Wang Yigen

2025-04-27

A certain army brigade scientifically coordinates professional and technical teaching resources——

“Soldier experts” bring out excellent backbones

■Zheng Ye Li Lianjie

“A certain type of radar suddenly broke down, and immediately organized emergency repairs.” A few days ago, the fourth battalion of a certain army brigade organized a professional training. After receiving the equipment emergency repair order, two professional backbones quickly went forward to carry out emergency repairs. At the same time, the maintenance “master” of the second battalion of the brigade, the first-class sergeant Yue Jingzhou, used a certain type of system terminal to provide real-time remote guidance.

“As the “fresh force” preparing for war, how to accurately train and scientifically use the sergeant team has always been an important topic of concern to the brigade.” The leaders of the brigade introduced that they found in the early stage of the investigation that with the acceleration of the equipment iteration and update speed, the quality of training of professional backbones in various battalions and companies was uneven, which to a certain extent affected the improvement of the combat effectiveness of the troops.

To this end, they broke the battalion and company system, scientifically coordinated professional and technical teaching resources, and widely carried out specialized teaching. They followed the idea of ”one ‘soldier expert’ brings out a group of backbones, and a group of backbones activates a field”, promoted the sharing of high-quality teaching resources throughout the brigade, gave full play to the “yeast” role of senior sergeants, explored and implemented the “soldier expert” teaching model, and provided guidance for the growth of young backbones.

In practice, the brigade distinguished different majors such as radar, missiles, communications, and driving according to job requirements and task characteristics, selected senior sergeants with outstanding work performance and rich teaching experience in various professional positions, and adopted centralized training, paired assistance and other methods to accurately help the backbone seedlings recommended by each battalion and company. At the same time, they combined field training, major tasks, inspections and repairs, etc., so that young backbones could be tempered and tested in task practice, and continuously improve their professional ability and comprehensive quality.

Huang Jiaozhi, a radar technician and third-class sergeant major of the third battalion of the brigade, and Yin Moran, a sergeant of the first battalion, formed a pair of helpers. Huang Jiaozhi tailored a training plan for Yin Moran based on his academic background and professional foundation. After a period of guidance, Yin Moran grew into a skilled professional.

“The sharing of high-quality teaching resources by the entire brigade not only effectively improves the ability and quality of professionals in various fields, but also helps to push the combat

effectiveness of the troops to a new level." Battalion Commander Sun of a battalion of the brigade introduced that after a new type of communication equipment was put into service, the battalion faced the problem of lack of teaching materials and talents. The headquarters promptly coordinated with the combat support battalion's third-class sergeant Chen Jincheng to give lectures and tutoring to young backbones, helping to train a group of excellent equipment operators.

陆军某旅创新授课模式增强思想政治教育的时代性和感召力

来源：中国军网-解放军报 作者：陈典宏 周宇鹏 冯邓亚 责任编辑：林诗清 发布：2025-04-27

陆军某旅创新授课模式增强思想政治教育的时代性和感召力——

“智慧课堂”激发强军动力

■解放军报记者 陈典宏 特约记者 周宇鹏 特约通讯员 冯邓亚

南国春日，万物勃发，陆军某旅某连”智慧课堂”上，官兵们围绕”铁心向党、奋斗强军”主题，不时通过视频弹幕发表观点、提出问题。授课过程中，某连指导员董瑞祥积极为官兵实时答疑解惑，课堂氛围十分热烈。

“打造’智慧课堂’教育平台，是我们积极推动新时代思想政治教育体系落地的一项务实举措。”该旅领导介绍，去年以来，他们针对新时代思想政治教育面临的新特点、新问题，积极创新教育理念、内容、方法、力量、工作运行和制度机制，综合运用多媒体教学资源推进”智慧课堂”教育平台建设。该平台具有课堂互动、好课共享、点播录播等多种功能，自投入使用以来得到旅队政治教员群体和基层官兵广泛好评，为开展思想政治教育注入新动力。

记者登录”智慧课堂”教育平台看到，当月的官兵思想调查报告，以及根据调查结果精准制订的教员授课计划，均被置于主页醒目位置。

“每人贡献一堂课，官兵共享知识宴。”董瑞祥介绍，每月自主教育日备受官兵期待。机关在调研了解官兵听课需求的基础上，统筹教学资源推出精品好课。这种模式推动教育从”供给侧”向”需求侧”发力的转变，有效解决了授课内容众口难调问题，较好满足了官兵的听课需求，同时倒逼政治教员积极创新授课模式、提升授课质效，不断增强思想政治教育的时代性和感召力。

“每一次做选择，既是判断价值的过程，也是自我审视的过程。”在一堂消费观教育课上，某连指导员苏杰授课内容贴近官兵实际，把情与理讲到大家心坎里。这堂课深受官兵好评，一度荣登该旅”好课榜”榜首。

“过去，因为任务冲突等因素，教员有时容易放松自我要求，备课联系实际不紧密，课件制作也不够精良。”说起”智慧课堂”教育平台带来的新变化，某连指导员刘宇航说，自从有了这个教育平台，他们可以对照好课标准找差距，及时完善授课内容，改进教学方法；机关通过线上听课、现场评课、课后打分，将授课效果作为优秀政治教员评选、推荐参加上级比武的一个重要依据，大家授课劲头越来越足，授课水平明显提升。

“‘智慧课堂’突破传统教育手段的时空限制，提升了教育灵活度和覆盖面。”该旅政治工作部领导告诉记者，单位点多线长，战备任务繁重，即使在同一营区，开展大课辅导人员也难集中，通过”智慧课堂”教育平台，官兵可以在不同点位同步学习，人员难集中、时间难保证、效果难落实等问题迎刃而解，基本实现了教育全时全员覆盖。不仅如此，借助”智慧课堂”教育平台课程点播录播功能，平时因站哨、出公差等任务没有现场听课的官兵，也可以灵活选择时间补课，确保教育人员、时间、内容、效果”四落实”。

燃旺教育炉火，激发强军动力。近日，该旅组织战备拉动训练，旅领导通过”智慧课堂”教育平台进行战斗动员，全体官兵闻令而动、斗志昂扬，高标准完成既定任务。

A Certain Army Brigade Innovates Its Teaching Mode to Enhance the Timeliness and Appeal of Ideological and Political Education

Source: China Military Network-Liberation Army Daily Author: Chen Dianhong Zhou Yupeng Feng Dengya Editor: Lin Shiqing Release: 2025-04-27

A certain army brigade innovates its teaching mode to enhance the timeliness and appeal of ideological and political education——

“Smart Classroom” inspires the power of strengthening the army

■Liberation Army Daily reporter Chen Dianhong Special reporter Zhou Yupeng Special correspondent Feng Dengya

In the spring of the south, everything is flourishing. In the “Smart Classroom” of a certain company of a certain army brigade, officers and men expressed their views and raised questions through video barrage from time to time around the theme of “loyalty to the party and striving to strengthen the army”. During the course, Dong Ruixiang, the instructor of a certain company, actively answered questions and solved doubts for officers and men in real time, and the classroom atmosphere was very warm.

“Building a ‘smart classroom’ education platform is a pragmatic measure for us to actively promote the implementation of the ideological and political education system in the new era.” The brigade leaders introduced that since last year, they have actively innovated educational concepts, content, methods, strengths, work operations and institutional mechanisms in response to the new characteristics and new problems faced by ideological and political education in the new era, and

comprehensively used multimedia teaching resources to promote the construction of the "smart classroom" education platform. The platform has multiple functions such as classroom interaction, sharing of good courses, on-demand recording and broadcasting. Since it was put into use, it has been widely praised by the brigade's political instructors and grassroots officers and men, injecting new impetus into the development of ideological and political education.

The reporter logged into the "smart classroom" education platform and saw that the officers and men' ideological survey report of the month, as well as the instructor's teaching plan accurately formulated according to the survey results, were placed in a prominent position on the homepage.

"Everyone contributes a class, and officers and men share a knowledge feast." Dong Ruixiang introduced that the monthly autonomous education day is highly anticipated by officers and men. On the basis of investigating and understanding the needs of officers and men to listen to classes, the department coordinated teaching resources to launch high-quality courses. This model promotes the transformation of education from the "supply side" to the "demand side", effectively solves the problem of the difficulty in satisfying everyone's tastes in teaching content, and better meets the listening needs of officers and men. At the same time, it forces political instructors to actively innovate teaching models, improve teaching quality and effectiveness, and continuously enhance the timeliness and appeal of ideological and political education.

"Every time you make a choice, it is not only a process of judging value, but also a process of self-examination." In a consumption education class, Su Jie, an instructor of a certain company, taught content close to the reality of officers and men, and spoke about emotion and reason to everyone's heart. This class was well received by officers and men, and once topped the "Good Course List" of the brigade.

"In the past, due to factors such as task conflicts, instructors sometimes tended to relax their self-requirements, did not closely link lesson preparation with reality, and did not produce good courseware." Speaking of the new changes brought about by the "Smart Classroom" education platform, Liu Yuhang, an instructor of a certain company, said that since the education platform was available, they can find gaps by comparing the standards of good courses, improve the teaching content in a timely manner, and improve teaching methods; the department uses online lectures, on-site evaluations, and post-class scoring to use the teaching effect as an important basis for the selection of outstanding political instructors and recommendation to participate in the superior competition. Everyone is more and more enthusiastic about teaching, and the teaching level has been significantly improved.

"'Smart Classroom' breaks through the time and space limitations of traditional educational methods and improves the flexibility and coverage of education." The leader of the political work department of the brigade told reporters that the unit has many points and long lines, and the combat readiness tasks are heavy. Even in the same camp, it is difficult to concentrate personnel for large-scale tutoring. Through the "Smart Classroom" education platform, officers and men can learn simultaneously at different points, and the problems of difficulty in concentrating personnel,

difficulty in ensuring time, and difficulty in implementing results are solved, basically achieving full-time and full coverage of education. In addition, with the on-demand recording function of the "Smart Classroom" education platform, officers and men who are usually unable to attend classes on site due to tasks such as standing guard or going on business trips can also flexibly choose time to make up for the lessons, ensuring the "four implementations" of education personnel, time, content, and effect.

Ignite the fire of education and stimulate the motivation to strengthen the army. Recently, the brigade organized a combat readiness training. The brigade leaders carried out combat mobilization through the "Smart Classroom" education platform. All officers and men acted upon hearing the order, with high morale, and completed the set tasks with high standards.

第 81 集团军某旅实战化训练"战斗减员"仍打出"满堂彩"

来源：中国军网-解放军报 作者：王培霖　任 和 责任编辑：林诗清

2025-04-28

"战斗减员"仍打出"满堂彩"

■王培霖　任　和

"全车注意，抢占前方土岭！"仲春，第 81 集团军某旅一场实战化训练打响。抵近"敌"前沿阵地途中，突击分队一辆战车接到特情通报：战车弹药耗尽，驾驶员和炮手"阵亡"。

紧急关头，车组乘员、下士顾传银坐上驾驶位接替驾驶战车；车长、一级上士周杨康一边通过电台协调补充弹药，一边担起炮长职责观瞄"敌"目标方位。训练中，车组乘员密切协同，不仅成功处置特情，还将"敌"目标悉数摧毁，打出"满堂彩"。

训练结束后，正当笔者感叹该旅"一专多能"训练成效时，现场组训的一名连长接过话茬。"'战斗减员'状态下能打出'满堂彩'，得益于旅队坚持开展'一专多能'训练。"他随即话锋一转，"但'一专多能'的关键不在于'多'，而在于'能'——官兵接替补位后，各战斗单元能否攥指成拳形成合力，这才是重点。"他向笔者讲起一件往事。

那年该旅组织一场训练，战车向目标地域机动途中，车组突然接到"战车履带出现故障"特情。驾驶员随即下车进行抢修，却意外遭到对手"打击"。车长指挥车组乘员下车协力抢修履带。虽然他们平时参加过"一专多能"训练，但由于配合生疏、各自为战，无法按时完成抢修任务，结果贻误了战机。

"'一专多能'训练已经开展了很长时间，为什么还会出现这种情况？"复盘总结会上，该旅领导的追问，让官兵陷入沉思。该旅机关深入基层调研，发现问题所在：平时"一专多能"

训练大多侧重个人技能提升，官兵虽然掌握了很多专业技能，但协同作战能力还有差距，一旦临时换岗很难快速形成合力。

找准靶标好发力。针对梳理发现的问题，该旅推出系列举措——打破建制，将不同专业官兵随机编成战斗小组开展”一专多能”训练，提高不同专业官兵之间的协同配合水平；构设复杂战场环境，组织官兵在不同战场条件下开展跨专业训练，提升大家对复杂战场环境的适应能力；遴选各单位技术尖子组建研究室，围绕”一专多能”训练常见问题，常态召开”诸葛亮会”进行集智攻关，并针对性制订解决措施。

谈话间，结束训练的各车组官兵已经在利用战损评估系统展开复盘。”转这个弯的时候可以加大油门”“炮长和驾驶员配合得还不够默契”……大家你一言我一语，逐项分析训练中暴露的不足。该旅领导介绍，下一步，他们将结合实弹射击、对抗训练等时机，常态化组织减员训练，推动”一专多能”训练高效对接战场需求。

The Actual Combat Training of a Brigade of the 81st Group Army Still Received a “Full House Applause” Despite “Combat Casualties”

Source: China Military Network-People’s Liberation Army Daily Author: Wang Peilin Ren He Editor: Lin Shiqing

2025-04-28

“Combat casualties” still received a “full house applause”

■ Wang Peilin Ren He

“Attention all vehicles, seize the front earth ridge!” In mid-spring, a real-combat training of a brigade of the 81st Group Army started. On the way to the “enemy” front position, a tank of the assault team received a special situation report: the tank’s ammunition was exhausted, and the driver and gunner were “killed in action”.

At the critical moment, the crew member, Corporal Gu Chuanyin, took the driver’s seat to take over the driving of the tank; the commander, Sergeant Zhou Yangkang, coordinated the replenishment of ammunition through the radio while taking on the responsibility of the gunner to observe the “enemy” target position. During the training, the crew members worked closely together, not only successfully handling the special situation, but also destroying all the “enemy” targets, and received a “full house applause”.

After the training, just as the author was lamenting the effectiveness of the brigade’s “one specialty, multiple capabilities” training, a company commander who organized the training on site took over the conversation. “The brigade can play a ‘full house’ in the state of ‘combat reduction’, thanks to its insistence on carrying out ‘one specialty, multiple capabilities’ training.” He then changed the subject, “But the key to ‘one specialty, multiple capabilities’ is not ‘more’, but ‘ability’ - after the

officers and men take over the positions, whether each combat unit can form a fist to form a joint force, this is the key." He told the author an old story.

That year, the brigade organized a training. On the way to the target area, the crew suddenly received a special situation of "the tank track failure". The driver immediately got off the car for emergency repairs, but was unexpectedly "hit" by the opponent. The commander commanded the crew to get off the car to work together to repair the track. Although they usually participated in "one specialty, multiple capabilities" training, they were unable to complete the emergency repair task on time due to unfamiliarity with cooperation and fighting alone, resulting in missed opportunities.

"'One specialty, multiple capabilities' training has been carried out for a long time, why does this situation still occur?" At the review summary meeting, the brigade leader's questioning made the officers and men fall into deep thought. The brigade headquarters conducted in-depth investigations at the grassroots level and found the problem: the usual "one specialty, multiple capabilities" training mostly focuses on personal skill improvement. Although the officers and men have mastered many professional skills, there is still a gap in the ability to coordinate operations. Once they change positions temporarily, it is difficult to quickly form a joint force.

Find the right target to exert force. In response to the problems found in the review, the brigade launched a series of measures - breaking the establishment, randomly organizing officers and men of different professions into combat teams to carry out "one specialty, multiple capabilities" training, and improving the level of coordination and cooperation between officers and men of different professions; constructing a complex battlefield environment, organizing officers and men to carry out cross-professional training under different battlefield conditions, and improving everyone's ability to adapt to complex battlefield environments; selecting technical elites from various units to form a research room, focusing on the common problems of "one specialty, multiple capabilities" training, and regularly holding "Zhuge Liang meetings" to gather wisdom and solve problems, and formulate targeted solutions.

During the conversation, the officers and men of each vehicle crew who had finished the training were already using the battle damage assessment system to review. "You can increase the throttle when turning this corner" "The gunner and the driver don't cooperate well enough" ... Everyone analyzed the shortcomings exposed in the training one by one. The brigade leader introduced that in the next step, they will combine live-fire shooting, confrontation training and other opportunities to organize reduction training on a regular basis, and promote the "one specialty, multiple capabilities" training to efficiently meet battlefield needs.

长空砺翅！陆军某旅开展多机型混编飞行训练

来源：解放军报 作者：向黎鸣 石芝鹏 责任编辑：王一亘 2025-04-28

陆军某旅开展多机型混编飞行训练——

长空砺翅 协同出击

■解放军报记者 向黎鸣 特约通讯员 石芝鹏

侦察直升机前出搜索引导；运输直升机在武装直升机掩护下，搭载突击队员低空抵近目标区域……近日，陆军某旅一场多机型混编飞行训练火热展开，官兵围绕低空突防等重难点课目进行连贯训练。

“刀在石上磨，兵在险中练。”该旅领导介绍，此次训练他们统筹参训力量与施训课目，灵活采取”机型混合编组、课目融合施训、人员新老搭配”方式，从难从严组织专攻精练，锤炼部队实战能力。

训练中，该旅将不同机型按任务需求编为突击、掩护、侦察等小组，并明确各小组间的配合关系；科学制订训练计划，融合开展目标侦察、机降突击等课目训练，检验多机型协同作战能力；按照以老带新原则，组织官兵结成对子，提升整体技战术水平。

长空之上，各型直升机不断调整航向，向目标区域隐蔽机动。

“发现’敌’装甲车！”编队最前端，侦察直升机发现”敌情”后，迅速将目标信息传输至火力打击组。武装直升机长机建立攻击航线，僚机紧密配合，左右包抄发起模拟攻击，精准”命中”目标。随着地面目标被清除，运输直升机降低高度，突击队员快速完成机降……

征衣未解，复盘开始。针对训练中暴露的”战术动作不协调”“作战节奏不同步”等问题，官兵及时展开研讨，逐一提出改进方案，为后续训练明确方向。

“只有将各要素力量深度融合，才能真正形成制胜合力。”该旅领导说，他们采取”多机型混编训、多课目连贯练”组训模式以来，部队整体作战水平明显提升。

Sharpen Your Wings in the Sky! A Certain Army Brigade Conducts Mixed Flight Training of Multiple Aircraft Types

Source: PLA Daily Author: Xiang Liming Shi Zhipeng Editor: Wang Yigeng 2025-04-28

A certain army brigade conducts mixed flight training of multiple aircraft types——

Sharpen your wings in the sky and attack in coordination

■ PLA Daily reporter Xiang Liming Special correspondent Shi Zhipeng

Reconnaissance helicopters go forward to search and guide; transport helicopters, under the cover of armed helicopters, carry commandos to the target area at low altitude... Recently, a mixed flight

training of multiple aircraft types in a certain army brigade was launched, and officers and men conducted continuous training on key and difficult subjects such as low-altitude penetration.

“Knives are sharpened on stones, and men are trained in danger.” The leaders of the brigade introduced that in this training, they coordinated the participating forces and training subjects, and flexibly adopted the method of “mixed grouping of aircraft types, integrated training of subjects, and matching of new and old personnel”, and organized specialized training from difficult and strict aspects to hone the actual combat capabilities of the troops.

During the training, the brigade organized different aircraft types into assault, cover, reconnaissance and other groups according to mission requirements, and clarified the coordination relationship between each group; scientifically formulated training plans, integrated and carried out training on target reconnaissance, airdrop assault and other subjects, and tested the coordinated combat capabilities of multiple aircraft types; in accordance with the principle of old leading new, officers and men were organized into pairs to improve the overall technical and tactical level.

In the sky, various types of helicopters constantly adjusted their course and maneuvered towards the target area in a covert manner.

“Found the ‘enemy’ armored vehicle!” At the front of the formation, the reconnaissance helicopter discovered the “enemy situation” and quickly transmitted the target information to the fire strike group. The leader of the armed helicopter established an attack route, and the wingman cooperated closely to launch a simulated attack from the left and right, accurately “hitting” the target. As the ground targets were cleared, the transport helicopter lowered its altitude, and the commandos quickly completed the airdrop...

The military uniforms were not yet untied, and the review began. In response to the problems exposed in the training, such as “uncoordinated tactical actions” and “unsynchronized combat rhythm”, the officers and men held discussions in a timely manner, and proposed improvement plans one by one to clarify the direction for subsequent training.

“Only by deeply integrating the forces of various elements can we truly form a winning synergy.” The brigade leader said that since they adopted the training model of “multi-aircraft mixed training and multi-subject continuous training”, the overall combat level of the troops has been significantly improved.

从比武垫底到勇摘桂冠，这个连队如何蜕变

来源：解放军报 作者：倪鑫磊 廖晓彬 陈程 责任编辑：王一亘 2025-04-29

陆军某旅机关下沉营连精准帮建基层取得实效——

道路二连：从比武垫底到勇摘桂冠

■倪鑫磊 解放军报特约记者 廖晓彬

谢 岩绘

暮春时节，陆军某旅第一季度”双争”评比排名公布，某营道路二连被评为”好”。对此，该连干部楚国梁感慨道：”这是全连官兵用汗水换来的成绩，更是机关精准帮建结出的硕果。”

去年初，该旅党委一班人调研发现，部分建设水平落后的连队陷入”帮扶年年搞，成效难见好”之中，表面看是基层基础薄弱、抓建能力欠缺，深层原因还是机关帮建基层出了问题。主要表现为：帮建力量”临时搭台”，部分人员对基层不够熟悉；指导帮建”大水漫灌”，未能针对连队特点精准施策；虽然带着问题和诉求回到机关，却迟迟不见”下篇文章”……

“必须改进机关帮建方式，既要’把准脉’又要’开好方’。”为提升帮建基层质效，该旅决定以《军队基层建设纲要》为遵循，推行精准帮建模式，成立”帮扶小组”，出台”帮理思路、帮带思想、帮教方法、帮解难题、帮排隐患”5 项举措，构建”精准识别—定制方案—跟踪问效”的闭环模式。

此外，他们还着眼营连建制类型各不相同、建设水平参差不齐、阶段目标各有侧重等现实情况，坚持逐单位调研摸底、”点对点”把脉问诊，明确抓建目标和思路举措。

翻阅该旅制订的《精准帮建实施方案》，记者发现，每项内容都标注了具体责任人、阶段目标和验收标准。同时，方案规定”帮扶小组”成员要有基层主官工作经验，保证其具备较强的指导帮建能力。

道路二连的蜕变历程，正是机关精准帮建的一个缩影。近几年，这个连队专业骨干队伍不强，导致训练成绩下滑，在旅建制连比武中多次排名垫底。

为此，该旅选派作训、人力资源等 6 个科室精干力量组成”帮扶小组”下沉道路二连。两周后，他们查找出多个关键问题，并归口认领，结合该连实际情况开出”药方”：训练骨干不足，作训科颜科长从制订训练计划、科学组训施训等环节入手，进行手把手帮带，并协调其他先进连队训练尖子和操作能手前来”传经送宝”；专业人才队伍缺乏，人力资源科肖干事为他们量身定制专业人才培养路线图，展开具体规划指导……

在机关精准帮建下，这个连续多年与先进无缘的连队，经过持续努力，终于在上级抽考中总评成绩跃居旅队前列，摘得旅建制连比武桂冠，被上级表彰为”先锋连”。去年底，他们还捧回了”四铁”先进单位奖牌。

这个连队的”华丽转身”，同时也折射出该旅精准帮建理念的不断更新。”精准帮建不是大包大揽，关键要激活基层自建动力、提高基层自建能力。”该旅领导介绍，精准帮建中，他们按照”一营（连）一案”模式，区分军事训练、组织建设等多个方面制订”成长计划”，压实基层自建责任，定期召开”双向讲评会”，对各营连党组织领导单位全面建设和解决自身问题的能力进行评估监督。

今年初，机关选派”帮扶小组”来到某营舟桥二连。针对该连”军事过硬、管理偏软”的倾向性问题，提出强化骨干管理能力、加强作风纪律教育等帮扶措施，指导连队党支部形成一份详细的连队建设方案。翻看方案，该连干部屈昭豁然开朗：”既有规范流程又有实际案例，为连队自主抓建明确了思路、指明了方向。”

党委机关精准帮建，基层面貌焕然一新。据了解，”帮扶小组”下沉营连精准解难以来，许多困扰基层的”挠头事”得到解决，一些多年排名靠后的单位步入先进行列，部队全面建设水平持续攀升。

短 评

咬定”精准”不放松

■陈 程

基层是部队工作和战斗力的基础，是强军兴军的根基所在。当前，各级机关在帮建基层上下了很大功夫，取得了显著成效，但帮建思路同质化、指导方法太粗放、发力方向有偏差等问题仍不同程度存在。究其原因，一言以蔽之，就是帮建不够精准。

帮建基层，须注意界限和分寸，不出手则已，一出手就要直指痛处、清除堵点，帮助解决基层依靠自身无法解决的问题。所以，精准帮建的关键是找对”问题靶标”，然后靶向施策。

然而，实践中，一些单位虽讲靶向施策，但有的找错了靶标，把”活动靶”当成”固定靶”，帮建缺乏针对性灵活性；有的用错了弹药，把对这个单位管用的思路举措照搬到那个单位，导致靶标”中而未倒”，问题悬而未决甚至反弹回潮。这启示我们，衡量精准帮建是否有效，既要看问题找得准不准，更要看问题有没有解决掉。陆军某旅专门成立”帮扶小组”下沉到营连，通过精准识别、定制方案、跟踪问效，帮助基层解决了很多”急难愁盼”，使一些单位跨入先进行列。他们的探索实践和帮建成效，正是这种理念的生动体现。

From the Bottom of the Competition to First Place, How Did This Company Transform?

Source: PLA Daily Author: Ni Xinlei Liao Xiaobin Chen Cheng Editor: Wang Yigen 2025-04-29

The headquarters of a certain army brigade went down to the battalion company to help build the grassroots accurately and achieved practical results——

Road Company No. 2: From the bottom of the competition to the first place

■Ni Xinlei PLA Daily Special Correspondent Liao Xiaobin

Xie Yanhui

In late spring, the ranking of the first quarter of the “double competition” evaluation of a certain army brigade was announced, and the second road company of a certain battalion was rated as “good”. In this regard, Chu Guoliang, a cadre of the company, said with emotion: “This is the result of the sweat of the officers and men of the whole company, and it is also the fruit of the precise help of the organs.”

At the beginning of last year, a group of people from the brigade party committee found that some companies with backward construction levels fell into “helping every year, but the results are difficult to see”. On the surface, the grassroots foundation is weak and the ability to grasp construction is lacking. The deeper reason is that there is a problem with the organs helping to build the grassroots. The main manifestations are: the assistance force “sets up a stage temporarily”, and some personnel are not familiar with the grassroots; the guidance and assistance are “flooding”, and they fail to implement precise policies based on the characteristics of the company; although they return to the department with problems and demands, they have not seen the “next article” for a long time...

“It is necessary to improve the department’s assistance and construction methods, both to “get the pulse right” and to “prescribe a good prescription.” In order to improve the quality and efficiency of grassroots assistance, the brigade decided to follow the “Outline of Grassroots Construction of the Army”, promote the precise assistance and construction model, set up a “assistance group”, and introduce five measures of “assisting ideas, helping ideas, helping teaching methods, helping to solve problems, and helping to eliminate hidden dangers”, and build a closed-loop model of “precise identification-customized plans-tracking and asking for results”.

In addition, they also focus on the reality that the types of battalion and company organizations are different, the construction levels are uneven, and the stage goals have different focuses. They insist on investigating each unit, “point-to-point” pulse diagnosis, and clarify the construction goals and ideas and measures.

Looking through the “Precision Assistance Implementation Plan” formulated by the brigade, the reporter found that each item was marked with specific responsible persons, stage goals and acceptance standards. At the same time, the plan stipulates that members of the “assistance group” must have work experience as grassroots officers to ensure that they have strong guidance and assistance capabilities.

The transformation process of the Second Road Company is a microcosm of the precise assistance of the department. In recent years, the professional backbone team of this company is not strong, resulting in a decline in training results and ranking at the bottom many times in the brigade's established company competitions.

For this reason, the brigade selected six departments such as training and human resources to form an "assistance group" to sink to the Second Road Company. Two weeks later, they found several key problems and took charge of them. They prescribed a "prescription" based on the actual situation of the company: the training backbones were insufficient, and the training section chief Yan started from the formulation of training plans, scientific training and training, and provided hands-on assistance, and coordinated the training tops and operation experts of other advanced companies to come to "pass on the knowledge and treasures"; there was a lack of professional talent teams, and the human resources section officer Xiao tailored a professional talent training roadmap for them and carried out specific planning guidance...

Under the precise assistance of the organs, this company, which had not been advanced for many years, finally jumped to the forefront of the brigade in the overall evaluation in the superior's random test after continuous efforts, and won the championship of the brigade's organized company competition, and was commended by the superior as a "pioneer company". At the end of last year, they also won the "Four Irons" advanced unit medal.

The "gorgeous turn" of this company also reflects the continuous updating of the brigade's precise assistance concept. "Precise assistance is not about taking on too much. The key is to activate the motivation of grassroots self-construction and improve the ability of grassroots self-construction." The brigade leader introduced that in the precise assistance, they followed the "one battalion (company) one case" model, distinguished between military training, organizational construction and other aspects to formulate a "growth plan", consolidated the responsibility of grassroots self-construction, and held "two-way review meetings" regularly to evaluate and supervise the ability of the leading units of the party organizations of each battalion and company to comprehensively build and solve their own problems.

At the beginning of this year, the department selected an "assistance team" to come to the second company of the pontoon bridge of a certain battalion. In response to the company's tendency of "strong military and weak management", assistance measures such as strengthening the management ability of backbones and strengthening style and discipline education were proposed, and the company party branch was guided to form a detailed company construction plan. Looking through the plan, the company cadre Qu Zhao suddenly saw the light: "There are both standardized processes and actual cases, which clarify the ideas and directions for the company to build independently."

The party committee department accurately helped to build, and the grassroots appearance was completely renewed. It is understood that since the "assistance group" went down to the battalion and company to solve problems accurately, many "headaches" that have troubled the grassroots

have been solved, some units that have been ranked low for many years have entered the ranks of advanced units, and the overall construction level of the troops has continued to rise.

Short Review

Stick to “precision” and don’t relax

■ Chen Cheng

The grassroots is the foundation of the work and combat effectiveness of the troops, and it is the foundation of strengthening the army. At present, agencies at all levels have made great efforts to help build the grassroots and have achieved remarkable results, but problems such as homogeneity of ideas for help, too extensive guidance methods, and deviations in the direction of effort still exist to varying degrees. The reason, in a nutshell, is that the help is not accurate enough.

When helping build the grassroots, we must pay attention to boundaries and proportions. If we don’t take action, we will not do it. Once we take action, we must point directly to the pain points, clear the blockages, and help solve the problems that the grassroots cannot solve on their own. Therefore, the key to accurate help is to find the right “problem target” and then implement targeted policies.

However, in practice, although some units talk about targeted measures, some have found the wrong target, treating the “moving target” as a “fixed target”, and the assistance lacks targeted flexibility; some use the wrong ammunition, copying the ideas and measures that work for this unit to that unit, resulting in the target “hitting but not knocking down”, and the problem is unresolved or even rebounding. This tells us that to measure whether the precise assistance is effective, we must not only look at whether the problem is accurately found, but also whether the problem has been solved. A certain brigade of the army has set up a special “assistance group” to sink to the battalion and company. Through precise identification, customized solutions, and follow-up and performance evaluation, it has helped the grassroots solve many “urgent needs and worries”, enabling some units to enter the ranks of advanced units. Their exploration and practice and the effectiveness of assistance are a vivid embodiment of this concept.

战炮怒吼震山谷

——陆军某旅炮兵分队实弹射击训练影像

■彭久海 赵建程 解放军报特约通讯员 孙长义 摄影报道

炮弹出膛。

官兵快速奔向战位。

装定诸元。

构筑工事。

晨曦初露，警报声骤然响起。陆军某旅炮兵分队官兵快速出动，赴野外陌生地域开展实弹射击训练。

抵达任务地域，官兵立即完成行军战斗转换。构筑工事、观察目标、装定诸元、完成射击准备……与此同时，渗透至”敌”前沿的侦察小组，将目标信息及时回传至指挥所。指挥员迅速制订作战计划，一道道作战指令通过指挥信息系统传送至各火力单元。

射击指令下达。震耳欲聋的炮火声响起，”敌”阵地火光四射，硝烟弥漫。一轮打击结束，官兵快速撤收武器装备，向预备阵地转移。

进入新阵地，指挥员依据前沿观察所回传数据，调整战斗方案，指挥炮班对”敌”残存力量进行打击。随即，隆隆炮声响彻山谷，一枚枚炮弹接续出膛，织成一张巨大的火力网扑向”敌”阵地……

快节奏转换，高强度练兵。训练中，该旅构设险难环境，临机导调敌情特情，将侦察、气象等要素力量与火力单元深度融合，有效锤炼了官兵复杂环境下快速反应、临机协同和精准打击等实战能力。

The Roar of the War Artillery Shook the Valley-The Live-Fire Shooting Training Image of the Artillery Unit of a Certain Army Brigade

Source: PLA Daily Author: Peng Jiuhai Zhao Jiancheng Sun Changyi Editor: Lin Shiqing 2025-04-29

The roar of the war artillery shook the valley

-the live-fire shooting training image of the artillery unit of a certain army brigade

■ Peng Jiuhai Zhao Jiancheng PLA Daily Special Correspondent Sun Changyi Photo Report

The shells were fired.

The officers and men quickly ran to their positions.

Set all the elements.

Build fortifications.

At dawn, the alarm sounded suddenly. The officers and men of the artillery detachment of a certain army brigade quickly set out to conduct live-fire shooting training in unfamiliar areas in the wild.

Arriving at the mission area, the officers and men immediately completed the transition from marching to combat. Build fortifications, observe targets, set all the elements, complete shooting preparations... At the same time, the reconnaissance team that infiltrated the “enemy” front line promptly transmitted the target information back to the command post. The commander quickly formulated a combat plan, and combat orders were transmitted to each firepower detachment through the command information system.

The firing order was issued. The deafening sound of artillery fire rang out, and the “enemy” position was full of flames and smoke. After a round of strikes, the officers and men quickly withdrew their weapons and equipment and moved to the reserve position.

Entering the new position, the commander adjusted the combat plan based on the data sent back by the forward observation post, and commanded the artillery squad to strike the remaining forces of the “enemy”. Then, the rumbling sound of artillery resounded through the valley, and shells were fired one after another, forming a huge firepower net and rushing towards the “enemy” position...

Fast-paced conversion, high-intensity training. During the training, the brigade set up a dangerous environment, guided the enemy’s special situation on the spot, and deeply integrated the reconnaissance, meteorological and other elements with the firepower detachment, effectively tempering the officers and men’ practical capabilities such as rapid response, on-the-spot coordination and precise strikes in complex environments.

第 76 集团军某旅组织高原实战化训练

来源：中国军网-解放军报 作者：吴骁峰 刘小龙 责任编辑：郭妍菲 2025-05-03

第 76 集团军某旅组织高原实战化训练——

战鹰振翅战昆仑

■吴骁峰 刘小龙

暮春时节，昆仑山腹地某机场。伴随巨大的轰鸣声，数架战机腾空而起，飞赴目标空域，第 76 集团军某旅一场实战化训练拉开帷幕。

据了解，随着海拔不断攀升，空气中氧气含量越来越低，直升机操纵难度增大，对飞行员技战术水平提出更高要求。

飞行途中，前方一座山峰被”浓积云”遮挡。当直升机穿过云层，山峰突然出现在飞行员眼前。飞行员处变不惊，立即熟练操控直升机，安全飞越山峰。

“此次训练采取极限条件下高强度连贯作业方式，对地突击、超低空突防等课目轮番展开。”该旅领导介绍，部队常年担负高原战备任务，长期面临氧气稀薄、天候恶劣等复杂条件。为此，他们结合任务实际常态组织实战化训练，研练不同弹种在高原环境下的战法训法。同时，他们突出全天候、全时域、全要素战法训法研练，为部队遂行高原作战任务收集一手数据。

飞抵目标空域不久，负责前出侦察的武装直升机机载报警器突然鸣响：前方雪山之间发现一架高速机动的飞行器。飞行员操作设备仔细辨别并判定其为”敌”空中侦察机后，立即将情报数据发送给长机机长所在的攻击机组。接到情况通报，担负侧翼攻击任务的武装直升机根据目标方位调整攻击阵位，利用机载设备迅速瞄准、锁定，对”敌”空中侦察机进行精准拦截打击。

战鹰振翅、硝烟弥漫，战斗进入白热化。攻击机组发射空地导弹，对地面装甲目标展开”打击”，同时发射火箭弹和航炮对近距地面目标进行空地火力压制。任务结束，机群以大速度、大坡度退出战斗航线，并发射红外干扰弹，迅速离场。

“依托险难环境练兵，才能真正锤炼打仗本领。”该旅领导介绍，连日来，他们组织高原飞行战法训法研练，采集直升机在高原环境下实战数据，联合气象、通信等专业力量完善多个特情处置方案，有效提升部队实战水平。

A Brigade of the 76th Group Army Organized Plateau Combat Training

Source: China Military Network-People's Liberation Army Daily Author: Wu Xiaofeng Liu Xiaolong Editor: Guo Yanfei 2025-05-03

A brigade of the 76th Group Army organized a plateau combat training-

War eagles flap their wings to fight Kunlun

■Wu Xiaofeng Liu Xiaolong

In late spring, at an airport in the hinterland of the Kunlun Mountains. With a huge roar, several combat aircraft took off and flew to the target airspace. A combat training of a brigade of the 76th Group Army kicked off.

It is understood that as the altitude continues to rise, the oxygen content in the air becomes lower and lower, and the difficulty of helicopter operation increases, which puts higher requirements on the technical and tactical level of pilots.

During the flight, a mountain in front was blocked by "cumulonimbus clouds". When the helicopter passed through the clouds, the mountain suddenly appeared in front of the pilot. The pilot was calm and immediately skillfully controlled the helicopter to fly over the mountain safely.

"This training adopts a high-intensity and continuous operation mode under extreme conditions, and subjects such as ground assault and ultra-low-altitude [100 meters or lower] penetration are carried out in turn." The brigade leader introduced that the troops are responsible for plateau combat readiness tasks all year round, and have long faced complex conditions such as thin oxygen and bad weather. To this end, they organized practical training in combination with the actual normality of the task, and studied and practiced the tactics and training methods of different types of ammunition in the plateau environment. At the same time, they emphasized the research and practice of all-weather, all-time, and all-element tactics and training methods to collect first-hand data for the troops to conduct plateau combat tasks.

Shortly after arriving at the target airspace, the airborne alarm of the armed helicopter responsible for forward reconnaissance suddenly sounded: a high-speed and maneuverable aircraft was found between the snow-capped mountains ahead. After the pilot carefully identified and determined that it was an "enemy" aerial reconnaissance aircraft by operating the equipment, he immediately sent the intelligence data to the attack crew where the captain of the lead aircraft was. After receiving the situation report, the armed helicopter responsible for the flank attack mission adjusted the attack position according to the target direction, and used the airborne equipment to quickly aim and lock, and accurately intercepted and struck the "enemy" aerial reconnaissance aircraft.

The battle became intense as the war eagles flapped their wings and smoke filled the air. The attack crew launched air-to-ground missiles to "strike" ground armored targets, and at the same time

launched rockets and aircraft guns to suppress close-range ground targets with air-to-ground firepower. After the mission was completed, the fleet withdrew from the combat route at a high speed and a large slope, and launched infrared jammers and left the scene quickly. “Only by training in a dangerous environment can we truly hone our combat skills.” The leaders of the brigade introduced that in recent days, they have organized the research and training of plateau flight tactics and training methods, collected actual combat data of helicopters in plateau environments, and combined with meteorological, communication and other professional forces to improve multiple special situation handling plans, effectively improving the actual combat level of the troops.

陆军某旅打破阶梯式培养路线 列兵与老炮长同台竞技

来源：解放军报 作者：谭公禄 王润鑫 宋世杰 责任编辑：杜圣智 2025-05-03

“任务式考评”助力列兵拔节成长

■谭公禄 王润鑫 宋世杰

“自动调炮系统突发故障……”近日，在陆军某旅驻训地，一场任务考评正紧前展开。入伍仅一年的火箭炮操作手、列兵王睿棋沉着应对临时设置的特情，根据现场情况迅速作出判断，果断改用手动调炮，圆满完成射击任务。

一名列兵能与老炮长同台竞技，得益于该旅探索推出的”任务式考评”机制。”我们让能力突出、渴望进步的列兵提前拿到参与大项任务的’入场券’，让他们在真刀实枪的演练中强化综合素质，帮助其步入成长’快车道’。”该旅领导介绍，近年来，他们打破以往列兵阶梯式培养路线，不再单一用”米、秒、环”作标准，而是通过阶段性赋予的实际任务，实现对其能力素质的全面历练。

在某连王指导员看来，传统的培养模式下，营连制订的培养计划按部就班。同时，带兵人对列兵的过度”保护”，也容易让他们抗压能力不足。即使平时”米、秒、环”成绩亮眼，可遇到重要任务时，容易慌乱出错”掉链子”。

“列兵作为部队的新鲜血液，其能力素质事关部队战斗力生成和长远建设。”为加强单位列兵培养，缩短成长周期，该旅成立专项小组，探索建立考评新办法，加快提升列兵能力素质。

修理专业的列兵何建华为人稳重、责任心强，但因性格内敛，以往参加训练不够主动。”任务式考评”机制推开后，他所在班组受领了车辆机动保障任务，要求新兵随班组参训。随着任务压肩，何建华有了一股钻研劲头，主动向班长骨干请教技术问题。

保障任务如期而至。机动途中，何建华发现某运输车存在漏液故障。情急之下，他先让身边战友上报情况，随后独自爬进车底修理排查，将故障顺利排除。

“‘任务式考评’不仅要激励大多数，更要选出‘潜力股’。”该旅政治工作部王干事表示，他们在选拔列兵”潜力股”时，不仅要看平时训练成绩，其个人意愿、心理素质也十分重要。对训练成绩突出或有某项专长，且有长期服役意愿的列兵，可以通过”任务式考评”机制，为其量身打造”后备人才任务清单”，进行重点培养。

火箭炮操作手、列兵赖鹤菱是”后备人才任务清单”中的培养对象。在战友看来，赖鹤菱性格沉稳、学习能力强，入伍前就有电气工程专业基础。在”任务式考评”机制激励下，渴望在军营发光发热的他，在夯实原有知识基础上主动钻研，技能专长进一步强化。

一次全营考核中，导调组先后数次更换目标位置，赖鹤菱冷静操作火控设备，协助炮班组顺利完成火力打击任务。此后，他被连队赋予参加更多大项任务的机会，成为列兵里的”种子”选手。不久前，他向单位表达了留队意愿。

“我们坚持因材定策，在制订计划时避免出现担子过重、任务过于简单等问题，确保培养质效。”该旅机关干事拿出一份最新的考评目录，上面既有考验专业基础的协助课目教案编写，也有聚焦分析判断的参与某型装备常见故障排除，还有注重综合素质的随班组参与比武考核……

任务导向提速度，实践磨砺练硬功。在该旅，列兵干事创业底气更足，越来越多的”种子”人才，活跃在基层练兵备战一线。

A Certain Army Brigade Breaks the Ladder-Style Training Route, and Privates Compete with Veteran Artillery Chiefs on the Same Stage

Source: *PLA Daily* Author: Tan Gonglu Wang Runxin Song Shijie Editor: Du Shengzhi 2025-05-03

“Task-based assessment” helps privates grow rapidly

■Tan Gonglu Wang Runxin Song Shijie

“The automatic artillery adjustment system suddenly failed...” Recently, at the training site of a certain army brigade, a task assessment was underway. Private Wang Ruiqi, a rocket launcher operator who has only been in the army for one year, calmly responded to the special situation set up temporarily, made a quick judgment based on the on-site situation, decisively switched to manual artillery adjustment, and successfully completed the shooting task.

A private can compete with the veteran artillery chief on the same stage, thanks to the “task-based assessment” mechanism explored and launched by the brigade. “We let privates with outstanding

abilities and eager to make progress get the 'ticket' to participate in major tasks in advance, so that they can strengthen their comprehensive qualities in real-life drills and help them enter the 'fast lane' of growth." The brigade leaders introduced that in recent years, they have broken the previous ladder-style training route for privates, no longer using "meters, seconds, and rings" as the only standard, but through the actual tasks assigned in stages, to achieve a comprehensive experience of their abilities and qualities.

In the view of a certain company instructor Wang, under the traditional training model, the training plans formulated by the battalion and company are conducted step by step. At the same time, the excessive "protection" of privates by the leaders can easily make them lack stress resistance. Even if the "meters, seconds, and rings" are outstanding in normal times, they are prone to panic and make mistakes when encountering important tasks.

"As the fresh blood of the troops, the ability and quality of privates are related to the formation and long-term construction of the troops' combat effectiveness." In order to strengthen the training of privates in the unit and shorten the growth cycle, the brigade set up a special group to explore and establish new assessment methods to accelerate the improvement of the ability and quality of privates.

He Jianhua, a private soldier in the repair profession, is steady and responsible, but because of his introverted personality, he was not proactive enough in participating in training in the past. After the "task-based assessment" mechanism was launched, his team received the vehicle mobility support task, requiring new recruits to participate in training with the team. With the pressure of the task, He Jianhua had a strong desire to study and took the initiative to ask the squad leader for technical questions.

The support task arrived as scheduled. During the maneuver, He Jianhua found that a transport vehicle had a leakage fault. In a hurry, he first asked his comrades around him to report the situation, and then climbed under the vehicle alone to repair and troubleshoot, and successfully eliminated the fault.

"'Task-based assessment' should not only motivate the majority, but also select 'potential stocks'." Wang, an officer of the political work department of the brigade, said that when they select private "potential stocks", they should not only look at their usual training results, but also their personal willingness and psychological quality are also very important. For privates who have outstanding training results or have certain expertise and are willing to serve for a long time, a "reserve talent task list" can be tailored for them through the "task-based assessment" mechanism, and they can be trained with emphasis.

Lai Heling, a rocket launcher operator and private, is a training target in the "reserve talent task list". In the eyes of his comrades, Lai Heling has a calm personality and strong learning ability. He had a professional foundation in electrical engineering before joining the army. Under the encouragement of the "task-based assessment" mechanism, he, who is eager to shine in the

barracks, actively studies on the basis of consolidating his original knowledge, and further strengthens his skills and expertise.

In a battalion-wide assessment, the command and dispatch group changed the target position several times. Lai Heling calmly operated the fire control equipment and assisted the artillery team to successfully complete the fire strike mission. Since then, he has been given the opportunity to participate in more major tasks by the company and became a “seed” player among privates. Not long ago, he expressed his willingness to stay in the team to the unit.

“We insist on making decisions based on the talents of the people, and avoid problems such as excessive burdens and overly simple tasks when making plans to ensure the quality and effectiveness of training.” The brigade’s headquarter officer took out a latest assessment catalog, which includes assisting in the preparation of lesson plans for courses that test professional foundations, participating in the troubleshooting of common faults of a certain type of equipment that focuses on analysis and judgment, and participating in competitions and assessments with the team that focuses on comprehensive quality...

Task orientation speeds up, and practice hones hard skills. In the brigade, private officers are more confident in starting businesses, and more and more “seed” talents are active in the grassroots training and preparation front line.

陆军某旅深入学习贯彻中央军委政治工作会议精神

来源：中国军网-解放军报 作者：黄俊 金王伟 责任编辑：杜圣智

2025-05-04

陆军某旅深入学习贯彻中央军委政治工作会议精神——

建强堡垒，聚力攻坚谋打赢

■黄 俊 金王伟

前不久，陆军某旅无人机分队在组织飞行训练时，风速骤然增大，逼近某型无人机技术参数上限。面对恶劣气象条件，营连两级党组织综合研判后决定：”打仗不择天气，按原计划实施！”

“党的力量来自组织，部队凝聚力战斗力来自组织。”该旅领导介绍，旅党委一班人认真学习中央军委政治工作会议精神认识到，完成好党和人民赋予的各项任务，必须在提高各级党组织领导力、组织力、执行力上下功夫。只有把党组织建设得更加坚强有力，才能把官兵拧成一股绳，为履行使命任务提供可靠保证。

“有的基层党组织还存在抓备战打仗能力不强、组织功能发挥不明显等问题。”针对前期调研中发现的问题，该旅党委一班人分赴基层进行挂钩帮建。实践中，他们结合练兵备战实际，制订《基层党务工作流程规范》，帮助基层党组织理清抓建思路、明确抓建标准；采取”战地党务课堂”“新老书记结对”等形式，帮助基层党组织找准影响组织功能发挥、制约战斗力生成等问题症结，研究制订改进措施。

笔者采访中了解到，该旅注重在突出实践导向、聚力攻坚克难上见成效。某连列装新型弹种后官兵一时难以适应，战斗力生成较慢。该旅党委了解这一情况后，立即指派一名常委赴该连跟训，帮助连队查摆问题、研讨对策。他带领连队党支部一班人围绕”如何快速形成战斗力”主题，集智研究新型弹种射击训法，同时邀请院校专家就”高盐高湿环境下的弹药维护”为官兵进行专题授课。前不久，在上级组织的该型弹种实弹射击训练中，该连党支部书记、副书记身先士卒，带领官兵取得优异成绩。

建强堡垒，聚力攻坚谋打赢。随着学习贯彻中央军委政治工作会议精神走深走实，该旅基层党组织战斗堡垒作用、党员先锋模范作用发挥更加明显，官兵练兵备战热情高涨，助推部队战斗力稳步提升。

A Certain Army Brigade Thoroughly Studied and Implemented the Spirit of the Central Military Commission’s Political Work Conference

Source: China Military Network-Liberation Army Daily Author: Huang Jun Jin Wangwei Editor: Du Shengzhi

2025-05-04

A certain army brigade thoroughly studied and implemented the spirit of the Central Military Commission’s Political Work Conference that was held in Yan’an, Shaanxi Province, in June 2024

Build a strong fortress, focus on attacking and winning

■Huang Jun Jin Wangwei

Not long ago, when the drone detachment of a certain army brigade was organizing flight training, the wind speed suddenly increased, approaching the upper limit of the technical parameters of a certain type of drone. Faced with severe weather conditions, the party organizations at the battalion and company levels made a comprehensive judgment and decided: “Fighting does not choose the weather, and it will be implemented as planned!”

“The strength of the party comes from the organization, and the cohesion and combat effectiveness of the troops come from the organization.” The brigade leader introduced that the brigade party committee carefully studied the spirit of the Central Military Commission’s Political Work Conference and realized that in order to complete the various tasks assigned by the party and the

people, it is necessary to work hard to improve the leadership, organization, and execution of party organizations at all levels. Only by building a stronger and more powerful party organization can officers and men be united as one and provide a reliable guarantee for fulfilling their missions.

“Some grassroots party organizations still have problems such as weak ability to prepare for war and unclear organizational functions.” In response to the problems found in the previous investigation, a group of people from the brigade’s party committee went to the grassroots to help build. In practice, they combined the actual training and preparation for war to formulate the “Grassroots Party Affairs Work Process Specifications” to help grassroots party organizations clarify their ideas and standards for building; they adopted “battlefield party affairs classrooms” and “new and old secretary pairings” to help grassroots party organizations identify the crux of problems that affect the function of organizations and restrict the generation of combat effectiveness, and study and formulate improvement measures.

The author learned from the interview that the brigade focuses on highlighting practice orientation and focusing on overcoming difficulties. After a certain company was equipped with a new type of ammunition, the officers and men found it difficult to adapt for a while, and the combat effectiveness was generated slowly. After the brigade party committee learned about this situation, it immediately assigned a standing committee member to the company to follow the training to help the company identify problems and discuss countermeasures. He led a group of people from the company’s party branch to study the new type of ammunition shooting training method around the theme of “how to quickly form combat effectiveness”, and invited experts from colleges and universities to give special lectures to officers and men on “ammunition maintenance in high-salt and high-humidity environments”. Not long ago, in the live-fire shooting training of this type of ammunition organized by the superiors, the party branch secretary and deputy secretary of the company took the lead and led the officers and men to achieve excellent results.

Build a strong fortress and focus on attacking and winning. With the in-depth study and implementation of the spirit of the Central Military Commission’s Political Work Conference, the role of the grassroots party organizations of the brigade as a combat fortress and the vanguard and exemplary role of party members have become more obvious, and the enthusiasm of officers and men for training and preparation for war has been high, which has helped to steadily improve the combat effectiveness of the troops.

陆军某旅组建”教育团队”群策群力打造”一堂好课”

来源：解放军报 作者：王梦圆 毛英椿 责任编辑：郭妍菲 2025-05-06

陆军某旅探索组建”教育团队”提升思想政治教育质效——

群策群力打造”一堂好课”

■王梦圆 毛英椿

“教育团队”成员正在研究制作课件内容。曾冰阳 摄

“-40℃的茫茫雪原，你能爬冰卧雪保持潜伏姿态一动不动吗？”近日，陆军某旅某营教育课上，伴随大屏幕上长津湖战役的场景再现，某连干部蔡鑫抛出这个问题。此时，台下官兵纷纷向志愿军老前辈表达敬意，现场气氛十分热烈。

授课结束，蔡鑫向笔者展示了他的课件——通过一个个小故事讲解历史事件，并在故事关键节点穿插情景再现、现场问答等互动内容。”相较以往单向灌输式的教育模式，这种方式更容易被年轻官兵接受。”蔡鑫告诉笔者，精彩内容的背后，饱含着他所在”教育团队”的智慧和汗水。

蔡鑫口中的”教育团队”，是该旅为提升思想政治教育质效专门组建的。在此前的调研中，该旅领导发现，一些年轻政治干部在日常授课中，存在授课经验欠缺、内容把握不准等问题。加之部队训练任务重，他们备课时间有限，教育效果很难保证。

为此，该旅统筹全旅教育资源，从基层营连挑选不同职务的官兵，组建了 10 支”教育团队”，大家优势互补、团结协作，群策群力共同打造”一堂好课”。旅机关将年度重点教育内容分别赋予不同团队，每个团队按照”多人备课、一人主讲”模式，承担不同授课任务，最终形成一堂堂精品课，统一纳入旅”优质教育课程库”，或用于巡回授课，或供各营连学习借鉴。

今年初，机关将”在党的旗帜下铸牢军魂”专题教育任务赋予蔡鑫所在”教育团队”。考虑到蔡鑫所在荣誉连队历史厚重，他本人理论基础较为扎实，团队负责人王达滨便将授课任务交给了他，并召集团队多名成员，围绕授课主题集智研究，确定教案内容和授课形式。

随即，大家按照分工，紧锣密鼓展开工作——某连干部曾涛有比较丰富的机关任职经验，他协助蔡鑫收集资料、精选案例、打磨讲稿；技术骨干、大学生士兵于咸涵擅长课件制作，他与蔡鑫两人每天加班加点，反复推敲课件内容……讲稿和课件打磨成熟后，团队里的”老政工”、某营干部贾广武带着蔡鑫一遍遍试讲，传授经验和注意事项……在队友们协助

下，蔡鑫的课件设计不断完善、授课思路也愈发清晰，最终给官兵端上了一道”精神大餐”，深受好评。

“过去搞教育，大部分授课都要靠自己准备。现在，每个团队专攻一个主题，备课效率更高，授课更有针对性。”谈及新模式带来的变化，蔡鑫深有感触地说，”教育团队”发挥的作用不止于此，各营连组织日常授课时，可以直接从”优质教育课程库”中选择适合的教案，再结合各单位情况稍作修改即可使用，既保证了授课质量，又能让大家有更多精力投入练兵备战。

“作为教育者，要找到与官兵的情感共鸣点，才能产生’一棵树摇动另一棵树，一朵云推动另一朵云，一个灵魂唤醒另一个灵魂’的效果。”该旅领导告诉笔者，他们要求每名教员授课后，都要深入班排交流，收集意见建议，进一步完善教案内容、丰富授课模式，让教育课堂精准对接官兵思想需求。

前不久，一名战士向”教育团队”成员、某营干部范吉民建议：能否借鉴网络热播节目做法，创新课堂呈现形式？范吉民立即与团队成员展开研究论证，决定将”打牢牺牲奉献的军人底色”这堂教育课分解成军营脱口秀、访谈对话等单元，穿插开展”听我说——我崇敬的那个他”活动，让官兵讲述身边人身边事。施教者当主持，受教者站”C 位”，顿时调动起大家的兴趣。授课结束，官兵们意犹未尽，纷纷表达了对下一堂教育课的期待。

该旅”教育团队”成立以来，将一堂堂冒热气、接地气、鼓士气的思想政治教育课送到基层一线，有效激发了大家备战打仗的热情动力。笔者了解到，下一步，该旅将组织”教育团队”与友邻单位、驻地红色教育基地建立联教联学机制，常态开展经验交流、资源共享，探索合作育人新模式，不断推动新时代思想政治教育体系走深走实、落地见效。

A Certain Army Brigade Has Formed an “Education Team” to Work Together to Create a “Good Lesson”

Source: *PLA Daily* Author: Wang Mengyuan Mao Yingchun Editor: Guo Yanfei 2025-05-06

A certain army brigade explored the formation of an “education team” to improve the quality and effectiveness of ideological and political education——

Work together to create a “good lesson”

■ Wang Mengyuan Mao Yingchun

Members of the “education team” are studying and producing courseware content. Photo by Zeng Bingyang

“Can you climb ice and lie in the snow in a vast snowfield at -40℃ and stay in a lurking posture without moving?” Recently, in an education class of a battalion of a certain army brigade,

accompanied by the reappearance of the scene of the Battle of Changjin Lake on the big screen, a company cadre Cai Xin raised this question. At this time, the officers and men under the stage expressed their respect to the old predecessors of the Volunteer Army, and the atmosphere on the scene was very warm.

At the end of the class, Cai Xin showed the author his courseware-explaining historical events through small stories, and interspersing interactive content such as scene reappearance and on-site Q&A at key points of the story. “Compared with the previous one-way indoctrination education model, this method is easier to be accepted by young officers and men.” Cai Xin told the author that behind the wonderful content is the wisdom and sweat of his “education team”.

The “education team” mentioned by Cai Xin is specially formed by the brigade to improve the quality and effectiveness of ideological and political education. In previous surveys, the leaders of the brigade found that some young political cadres had problems such as lack of teaching experience and inaccurate content in daily teaching. In addition, the troops have heavy training tasks and they have limited time to prepare lessons, so it is difficult to guarantee the educational effect.

To this end, the brigade coordinated the educational resources of the entire brigade, selected officers and men of different positions from the grassroots battalions and companies, and formed 10 “education teams”. Everyone complemented each other’s strengths, worked together in unity, and worked together to create “a good class”. The brigade headquarters assigned the annual key education content to different teams. Each team took on different teaching tasks according to the “many people prepare lessons, one person lectures” model, and finally formed a series of high-quality classes, which were uniformly included in the brigade’s “high-quality education course library”, or used for touring lectures, or for learning and reference by various battalions and companies.

At the beginning of this year, the department assigned the special education task of “Forging the Military Soul Under the Party’s Banner” to Cai Xin’s “Education Team”. Considering that Cai Xin’s honorary company has a long history and he has a solid theoretical foundation, the team leader Wang Dabin gave him the teaching task and called together many members of the team to conduct research on the teaching theme and determine the content of the lesson plan and the form of teaching.

Then, everyone started working intensively according to the division of labor - Zeng Tao, a cadre of a certain company, has relatively rich experience in serving in the agency. He assisted Cai Xin in collecting materials, selecting cases, and polishing the lecture notes; Yu Xianhan, a technical backbone and college student soldier, is good at courseware production. He and Cai Xin worked overtime every day and repeatedly scrutinized the content of the courseware... After the lecture notes and courseware were polished and mature, Jia Guangwu, an “old political worker” in the team and a cadre of a certain battalion, took Cai Xin to give trial lectures over and over again, imparting experience and precautions... With the assistance of his teammates, Cai Xin’s

courseware design was constantly improved and his teaching ideas became clearer. In the end, he served a “spiritual feast” to the officers and men, which was well received.

“In the past, most of the teaching had to be prepared by ourselves. Now, each team specializes in a theme, and the preparation efficiency is higher, and the teaching is more targeted.” Talking about the changes brought about by the new model, Cai Xin said with deep feeling that the role played by the “education team” is not limited to this. When each battalion and company organizes daily teaching, they can directly select suitable teaching plans from the “high-quality education course library”, and then make slight modifications based on the situation of each unit. It can not only ensure the quality of teaching, but also allow everyone to devote more energy to training and preparation.

“As an educator, you must find the emotional resonance point with the officers and men to produce the effect of ‘one tree shakes another tree, one cloud pushes another cloud, and one soul awakens another soul’.” The leaders of the brigade told the author that they require each instructor to communicate in depth with the class after teaching, collect opinions and suggestions, further improve the content of the teaching plan, enrich the teaching model, and make the education classroom accurately meet the ideological needs of officers and men.

Not long ago, a soldier suggested to Fan Jimin, a member of the “education team” and a cadre of a battalion: Can we learn from the practices of popular online programs and innovate the classroom presentation format? Fan Jimin immediately conducted research and discussion with team members, and decided to decompose the educational class of “Laying a solid foundation for the sacrifice and dedication of soldiers” into military camp talk shows, interviews and dialogues, and interspersed with “Listen to me - the one I admire” activities, so that officers and men can tell about the people and things around them. The teacher is the host, and the learner stands in the “C position”, which immediately arouses everyone’s interest. After the class, the officers and men were still not satisfied, and they all expressed their expectations for the next educational class.

Since the establishment of the brigade’s “education team”, it has sent a series of ideological and political education classes that are hot, down-to-earth, and morale-boosting to the grassroots, effectively stimulating everyone’s enthusiasm for preparing for war. The author learned that in the next step, the brigade will organize the “education team” to establish a joint teaching and learning mechanism with friendly units and resident red education bases, conduct regular experience exchanges and resource sharing, explore new models of cooperative education, and continuously promote the ideological and political education system in the new era to go deep and practical, and achieve results.

第 82 集团军某旅为新兵党员组织主题党日活动

来源：解放军报 作者：王政杰 杨开明 责任编辑：郭妍菲 2025-05-06

第 82 集团军某旅为新兵党员组织主题党日活动——

争当新时代”李启元”

■王政杰 解放军报特约通讯员 杨开明

学习英雄事迹，弘扬英雄精神。近日，第 82 集团军某旅为新兵党员组织主题党日活动，用旅队老英雄英勇顽强的战斗精神激励大家立足岗位、建功军营。

李启元是我军第一代炮兵，在抗日战争和解放战争时期，经历大小战斗百余次，多次立功受奖，1950年被中央军委授予”炮兵战斗英雄”荣誉称号。在一次战斗中，他指挥火炮发发命中敌碉堡，创造了百发百中的奇迹，所在连队获得”百发百中神炮兵”等荣誉。多年来，老英雄李启元的战斗精神和光辉事迹，在官兵中代代相传，成为激励大家奋勇争先的鲜活教材。

活动中，新兵党员集体走进旅军史长廊。一张张泛黄的历史照片、一个个感人的英雄故事、一件件斑驳的老物件，为大家勾勒出一幅清晰的英雄画像。新兵党员小王入伍前一心想驾驶火炮战车驰骋疆场，下连后面对紧张的训练节奏和严格的纪律要求有些难以适应。学习李启元的英雄事迹，让他深受触动：”千锤百炼的磨砺才成就了百发百中的英雄，只有脚踏实地苦练精训，才能在平凡岗位创造不凡业绩。”

为引导新兵党员更好地理解和践行英雄精神、争当新时代的”李启元”，该旅邀请一批先进典型登台分享强军故事，用榜样的力量激励大家时刻牢记党员身份，立足岗位建功。

“刚入伍时，班长就告诉我，当炮兵就要像李启元一样过硬。从那时起，我就有了明确的学习目标和努力方向。”炮长黄佳豪连续两年荣立个人三等功，他分享的心得体会，赢得官兵热烈掌声。

“在日常工作中，我们也要像李启元那样，敢于站排头、挑重担”“在训练时要不怕苦、不怕累，勇于突破自我”……在随后展开的交流活动中，新兵党员们纷纷道出自己对英雄精神的理解感悟，表示要赓续传承英雄精神，以奋进姿态续写英雄荣光。

A Brigade of the 82nd Group Army Organized a Themed Party Day Activity for New Recruits

Source: *PLA Daily* Author: Wang Zhengjie Yang Kaiming Editor: Guo Yanfei 2025-05-06

A brigade of the 82nd Group Army organized a themed party day activity for new recruits-

Strive to be the “Li Qiyuan” of the new era

■ Wang Zhengjie, special correspondent of the *PLA Daily* Yang Kaiming

Learn heroic deeds and promote heroic spirit. Recently, a brigade of the 82nd Group Army organized a themed party day activity for new recruits, using the heroic and tenacious fighting spirit of the old heroes of the brigade to inspire everyone to stand firm in their posts and make contributions to the barracks.

Li Qiyuan is the first generation of artillerymen of our army. During the Anti-Japanese War and the War of Liberation, he experienced more than a hundred battles of all sizes, and was awarded many times for meritorious service. In 1950, he was awarded the honorary title of "Artillery Combat Hero" by the Central Military Commission. In a battle, he commanded the artillery to hit the enemy bunkers one by one, creating a miracle of hitting the target every time. His company won honors such as "God Artilleryman with a Hundred Hit Points". Over the years, the fighting spirit and glorious deeds of the old hero Li Qiyuan have been passed down from generation to generation among officers and men, becoming a vivid teaching material to inspire everyone to strive for the first place.

During the event, the new recruits collectively walked into the military history gallery of the brigade. Yellowed historical photos, touching heroic stories, and mottled old objects have outlined a clear heroic portrait for everyone. Before joining the army, Xiao Wang, a new recruit party member, wanted to drive an artillery vehicle and gallop on the battlefield. After joining the company, he found it difficult to adapt to the intense training rhythm and strict discipline requirements. Learning about Li Qiyuan's heroic deeds deeply touched him: "Only the tempering of thousands of hammers and hundreds of times has made a hero who never misses a shot. Only by practicing hard and training down to earth can we create extraordinary achievements in ordinary positions."

In order to guide new recruits to better understand and practice the heroic spirit and strive to be the "Li Qiyuan" of the new era, the brigade invited a group of advanced models to share stories of strengthening the army on stage, and use the power of role models to inspire everyone to always remember their party membership and make contributions based on their posts.

"When I first joined the army, the squad leader told me that to be an artillery soldier, I must be as hardworking as Li Qiyuan. Since then, I have had a clear learning goal and direction of effort." Gunner Huang Jiahao was awarded the third-class individual merit for two consecutive years. His sharing of experience won warm applause from officers and men.

"In daily work, we must also be like Li Qiyuan, dare to stand in the front and take on heavy responsibilities" "In training, we must not be afraid of hardship or fatigue, and have the courage to break through ourselves"... In the subsequent exchange activities, the new recruits expressed their understanding and feelings of the heroic spirit, and expressed their willingness to continue to inherit the heroic spirit and continue to write the glory of heroes with an enterprising attitude.

从怯场到从容，新排长跳出”舒适区”收获成长

来源：中国军网-解放军报 作者：张会庆 蔡壮 蒋杰一 责任编辑：郭妍菲

2025-05-06

怯场的新排长有了自信

■第 82 集团军某旅某营干部 张会庆

“穿越门框、窄缝等障碍物时，要保持匀速，同时适当微调飞行姿态……”前不久，无人机操作课上，新排长吴昊一边为全营官兵讲解操作要领，一边进行操作演示。细致的讲解，精彩的示范，赢得战友们一致认可。

吴昊的优秀表现，让我想起去年他刚下连时的样子。那时，作为新排长，他工作刻苦努力，各项任务完成得都很不错。然而一天晚上，我发现一个现象——吴昊在点名讲评时，说话磕磕巴巴，没讲几句就将队伍解散了。

我连续观察了几天，情况依旧如此。随即，我找到他的连长询问情况。原来，每次讲评工作时，吴昊都表现得十分紧张，生怕说错了话。连长也曾多次为吴昊传授讲评方法技巧，但收效甚微。

我决定先找吴昊谈谈心。”我性格内向，说话容易怯场，读军校时就不爱上台展示自己。久而久之，就更不愿意在人前讲话了。”听得出来，吴昊本人也在为此事苦恼。

组织工作讲评是基层抓建的重要一环，不仅能及时查缺补漏、奖先促后，对值班员也是一种锻炼。

想到这里，我开始琢磨如何帮助吴昊战胜胆怯心理、做好讲评工作。营里每周开展的”能力授课”活动给了我启发。了解到吴昊日常喜欢研究无人机，我打算通过赋予他一项授课任务，倒逼他提高语言表达能力。

“下个月，你给咱营官兵讲一堂无人机操作课怎么样？”当我把这项任务交给吴昊时，他有些紧张，红着脸不停推辞：”您还是另找他人吧，我怕把课讲砸了！”“不逼自己一把，怎么知道自己不行呢？我们都会帮你的。”见吴昊不自觉得退缩，我不停给他打气。

最后，吴昊勉强受领了任务。经过半个月的准备，虽然有了教案和课件，但是每次试讲，吴昊依然有些紧张，稿子背得再熟，也会经常忘词。

“要把听众想象成好朋友，讲课时，你就当和朋友在聊天。”见此情形，连长为他支了一招。思路一变天地宽。在随后的试讲中，吴昊放松了不少，能够边讲边与台下战士互动。经过一段时间的反复练习，他顺利完成我交给的授课任务。

在热烈的掌声中，我向吴昊表示祝贺。他既感激又兴奋：”多亏您逼了我一把，帮我战胜了怯场心理。以后，我再也不害怕在公开场合讲话了！”

从怯场不敢说话，到大方从容授课，吴昊的转变说明了一个道理：其实，能力是可以倒逼出来的。每个人都有自己的短板弱项，但不能逃避、遮掩，只要肯跳出”舒适区”，在风吹雨打中壮筋骨、长才干，就能真正收获属于自己的成长。尤其是年轻同志，更要把握机会、争取机会，多当几回”热锅上的蚂蚁”，多接几次”烫手的山芋”。

“本周连队各项工作进展顺利，陈子函、李晓亮两位同志表现不错……”又一次点名工作，吴昊自信大方、总结到位。

From Stage Fright to Calmness, the New Platoon Leader Jumped Out of the “Comfort Zone” and Gained Growth

Source: China Military Network-People’s Liberation Army Daily Author: Zhang Huiqing Cai Zhuang Jiang Jieyi Editor: Guo Yanfei

2025-05-06

The new platoon leader who was stage fright has gained confidence

■ Zhang Huiqing, a cadre of a battalion of a brigade of the 82nd Group Army

“When crossing obstacles such as door frames and narrow gaps, you must maintain a uniform speed and appropriately fine-tune the flight attitude...” Not long ago, in the drone operation class, the new platoon leader Wu Hao explained the operation essentials to the officers and men of the entire battalion while demonstrating the operation. The detailed explanation and wonderful demonstration won unanimous recognition from his comrades.

Wu Hao’s excellent performance reminded me of how he looked when he just joined the company last year. At that time, as a new platoon leader, he worked hard and completed all tasks very well. However, one night, I discovered a phenomenon-Wu Hao stuttered when he called the roll and commented, and disbanded the team after a few words.

I observed it for several days in a row, and the situation remained the same. Then, I found his company commander to ask about the situation. It turned out that every time Wu Hao reviewed his work, he was very nervous, for fear of saying something wrong. The company commander had taught Wu Hao the review methods and skills many times, but with little effect.

I decided to talk to Wu Hao first. “I am introverted and easily stage fright when speaking. When I was in military school, I didn’t like to show myself on stage. Over time, I was even more reluctant to speak in front of people.” It can be heard that Wu Hao himself was also troubled by this matter.

Reviewing organizational work is an important part of grassroots construction. It can not only timely check for deficiencies and fill in the gaps, reward the first and promote the latter, but also be a kind of exercise for the duty officer.

Thinking of this, I began to think about how to help Wu Hao overcome his timidity and do a good job of reviewing. The "ability teaching" activities conducted every week in the camp inspired me. Knowing that Wu Hao likes to study drones on a daily basis, I plan to force him to improve his language expression ability by giving him a teaching task.

"Next month, how about you give our battalion officers and men a drone operation class?" When I gave this task to Wu Hao, he was a little nervous and kept refusing with a red face: "You should find someone else, I'm afraid I'll mess up the class!" "If you don't push yourself, how do you know you can't do it? We will all help you." Seeing Wu Hao retreat unconsciously, I kept cheering him up.

Finally, Wu Hao reluctantly accepted the task. After half a month of preparation, although he had lesson plans and courseware, Wu Hao was still a little nervous every time he tried to teach. No matter how well he memorized the manuscript, he would often forget the words.

"Think of the audience as good friends. When you teach, just think of it as chatting with friends." Seeing this situation, the company commander gave him a trick. Once the thinking changes, the world will be wide. In the subsequent trial lectures, Wu Hao relaxed a lot and was able to interact with the soldiers in the audience while speaking. After a period of repeated practice, he successfully completed the teaching task I assigned.

Amid warm applause, I congratulated Wu Hao. He was grateful and excited: "Thanks to you for pushing me and helping me overcome my stage fright. From now on, I will never be afraid to speak in public again!"

From being afraid to speak to teaching calmly and generously, Wu Hao's transformation illustrates a truth: in fact, ability can be forced out. Everyone has their own shortcomings, but they cannot escape or cover up. As long as they are willing to jump out of their "comfort zone" and strengthen their muscles and bones and grow their talents in the wind and rain, they can truly reap their own growth. Especially young comrades, they must seize opportunities, strive for opportunities, be "ants on the hot pot" more often, and take on more "hot potatoes".

"This week, all work of the company has progressed smoothly. Comrades Chen Zihan and Li Xiaoliang have performed well..." Wu Hao was confident and generous in his work again, and his summary was in place.

陆军某旅探索旅营联动场景化研案推案模式

来源：中国军网-解放军报 作者：许生军 贡奇锴 陈典宏 责任编辑：杜圣智

2025-05-06

陆军某旅探索旅营联动场景化研案推案模式——

从作战室走向演兵场

■许生军 贡奇锴 解放军报记者 陈典宏

暮春时节，某训练场硝烟骤起。陆军某旅侦察分队正依据原定作战方案，在密林中快速搜索前进。与此同时，演兵现场影像和一条条作战数据被实时传回旅作战室。

“将研案推案过程融入实战化演训进程，是我们探索旅营联动场景化研案推案模式带来的变化。”该旅作训科徐科长向记者介绍，过去，研案推案过程相对独立。如今，他们采取”边研边打”的训练模式，使研战与演训过程耦合更加紧密。

说话间，刺耳的警报声突然在作战室响起，战场监视屏幕上顿时一片”雪花”。”侦察分队遭电磁干扰！”侦察席迅速向指挥员报告情况。

记者在作战室屏幕上看到，红色”暂停”标识突然亮起。由于”敌”使用新型干扰手段，原有反制方案不再适用。针对这一特情，旅、营、连三级指挥员经过充分讨论，迅速修改反制方案。

“测试反制方案！”随着指挥员一声令下，干扰车随即启动。

“反制成功！”接到侦察席通报，火力席迅速抓住打击窗口，获取”敌”目标精确坐标，下达打击指令。数分钟后，导调组判定：打击成功！

“战场情况瞬息万变，研案推案必须依’敌’情实时调整。”参训的某连苏连长说。

随着演训深入，一名旅指挥员指着屏幕上的数据，对刚结束的行动提出建议：”虽然打击行动奏效了，但方案还有优化空间，需要精心打磨。”

“运用无人机群作战”“组织突击小队渗透”……夜色渐浓，该旅作战室内，官兵你一言我一语，研战热情愈发高涨。据了解，这场演训，方案反复研推 10 余次，不符合实战的细节被一一拎出来修正。

拿起一本推案记录本，记者看到，一条条”妙计”被记录在案：某班在河道阻击时创新战术；某连进行夜间渗透时，用”伪装法”成功躲避红外监测……”演兵场上’灵光一闪’，作战室迅即捕捉。通过’边研边打’模式，我们优化了多个战法训法。”该旅领导说。

为推动研案推案模式走向深入，该旅还探索建立军情研究制度，结合研案推案中发现的新情况、新问题，邀请军地专家授课辅导，并定期组织研究成果汇报，引导各级指挥员主动研究战争、研究对手，不断提出”金点子”，为实战化训练提供有效支撑。

“研训耦合越紧密，作战方案的可操作性就越强。”走出该旅作战室，旅领导告诉记者，他们结合实战化训练，已组织多次研案推案，一批新战法训法得到检验。

A Certain Army Brigade Explores the Scenario-Based Case Research and Promotion Model of Brigade-Camp Linkage

Source: China Military Network-People’s Liberation Army Daily Author: Xu Shengjun Gong Qikai Chen Dianhong Editor: Du Shengzhi

2025-05-06

A certain army brigade explores the scenario-based case research and promotion model of brigade-camp linkage——

From the operations room to the military training ground

■Xu Shengjun Gong Qikai People’s Liberation Army Daily reporter Chen Dianhong

In late spring, a certain training ground was filled with smoke. The reconnaissance unit of a certain army brigade is searching and advancing rapidly in the dense forest according to the original combat plan. At the same time, the images of the military training scene and the combat data are transmitted back to the brigade operations room in real time.

“Integrating the case research and promotion process into the actual combat training process is a change brought about by our exploration of the scenario-based case research and promotion model of brigade-camp linkage.” Director Xu of the brigade’s training section told reporters that in the past, the case research and promotion process was relatively independent. Now, they adopt a “research and fight” training model to make the research and combat and training processes more closely coupled.

As they were talking, a piercing alarm suddenly sounded in the operations room, and the battlefield monitoring screen was suddenly covered with “snowflakes”. “The reconnaissance team was subjected to electromagnetic interference!” The reconnaissance seat quickly reported the situation to the commander.

The reporter saw on the operations room screen that the red “pause” sign suddenly lit up. Because the “enemy” used new interference methods, the original countermeasure plan was no longer applicable. In response to this special situation, the commanders of the brigade, battalion, and company levels quickly modified the countermeasure plan after full discussion.

“Test the countermeasure plan!” With the commander’s order, the jammer started immediately.

“Countermeasure successful!” After receiving the notification from the reconnaissance seat, the firepower seat quickly seized the strike window, obtained the precise coordinates of the “enemy” target, and issued a strike order. A few minutes later, the command and control group determined that the strike was successful!

“The battlefield situation changes rapidly, and the case research and promotion must be adjusted in real time according to the “enemy” situation.” said Captain Su of a certain company participating in the training.

As the exercise progressed, a brigade commander pointed to the data on the screen and made suggestions for the action that had just ended: “Although the strike action was effective, there is still room for optimization in the plan and it needs to be carefully polished.”

“Use drone swarms to fight” “Organize assault teams to infiltrate”... As the night deepened, in the brigade’s operations room, officers and soldiers talked to each other, and their enthusiasm for research and warfare became increasingly high. It is understood that in this exercise, the plan was repeatedly researched and promoted more than 10 times, and the details that did not conform to actual combat were picked out and corrected one by one.

Picking up a case record book, the reporter saw that a series of “clever ideas” were recorded: a certain class innovated tactics when blocking the river; a certain company used “camouflage” to successfully avoid infrared monitoring during night infiltration... “The “flash of inspiration” on the exercise field was quickly captured by the operations room. Through the “research and fight” mode, we have optimized multiple tactics and training methods.” The brigade leader said.

In order to promote the in-depth development of the case research and case promotion model, the brigade also explored the establishment of a military intelligence research system, combined with new situations and new problems found in the case research and case promotion, invited military and local experts to give lectures and guidance, and regularly organized research results reports to guide commanders at all levels to actively study wars and opponents, and constantly put forward “golden ideas” to provide effective support for actual combat training.

“The closer the coupling of research and training, the more operational the combat plan.” Walking out of the brigade’s operations room, the brigade leader told reporters that they have organized many case research and case promotions in combination with actual combat training, and a number of new combat methods and training methods have been tested.

南部战区陆军某部某连开展换岗体验

来源：解放军报 作者：董浩浩 朱俊 责任编辑：杜圣智 2025-05-07

南部战区陆军某部某连开展”今天我当班”活动——

换岗体验换来”将心比心”

■董浩浩 朱俊

烈日炎炎，南部战区陆军某部某连结束 5 公里武装越野训练，官兵挥汗如雨。正当大家喘着粗气进行拉伸时，哨音从主楼传来：”一个排各派一人出公差。”

闻言，几名战士不禁抱怨：”连口气都不让喘啊”“文书坐在屋里，炊事班这会儿也不做饭，肯定很闲，怎么不派他们”……这话声音不大，却被路过的炊事员杨成杰听见。他正忙着验收领取食材，此时已满头大汗，不由有些生气地反驳：”是我们不想参加训练吗？大家的伙食谁来保障？”

没想到，这引发了双方的争执，这边说炊事班围着灶台起早贪黑很少休息，那厢抱怨训练辛苦、公差多，声音很快便把连队伍指导员吸引了过来。了解情况后，他对双方进行了批评教育，告诉大家作为战友应该相互体谅，从对方的角度思考问题。

此事过后，伍指导员陷入沉思。近期，连队担负教学示范任务，工作训练任务重、公差勤务多，不少人因压力较大心浮气躁，产生抱怨抵触情绪。由于天气逐渐变热，一些战士认为通信、炊事、文书等岗位”风吹不着、雨淋不到”，而自己整天在外面训练，格外辛苦。

“官兵思想有疙瘩，凝聚力就会受影响。”在随后召开的支委会会议上，伍指导员讲述了事情经过和自己的想法。经过讨论，为消除官兵误解，避免出现攀比问题，该连决定开展”今天我当班”活动，组织部分官兵换岗体验。

中士吴日和被安排到通信值班室，他原本暗自得意：”不就是接接电话、送送文件，这不比跑 5 公里轻松？”然而，现实与他的想象大相径庭。他凳子还没坐热，电话就响了起来，上级通知要进行战备抽查，需要马上联通远程会议系统。他刚要调试系统，电话再次响起，有紧急通知需要立即传达……幸亏通信兵杜康博及时兜底，才没有耽误工作。一天值班结束，吴日和只觉得头晕，耳边似乎一直响着电话铃声。

另一边，天还没亮，曾认为炊事班工作清闲的上等兵王铭庆就被叫醒，开始了自己作为炊事员的一天。处理完各种食材后，他立即扎进满是油烟的灶台一直忙到中午，匆匆吃完饭便又要开始清理油污……一天下来，王铭庆累得直不起腰，看着耐心征求”今日伙食意见”的炊事员心生敬意：”谁说炊事班躲清闲？”

这次活动虽然只持续了几天，但成效十分明显。”每个岗位都不容易。之前我言语不当实在不该，你们为连队的付出，不比别人少。”王铭庆心生愧疚，向杨成杰郑重道歉。”大家岗位不同，都是在为连队建设作贡献，不应胡乱攀比”“要学会换位思考，理解体谅战友”……大家你一言我一语，思想疙瘩解开了，战友情谊更深了。

如今，该连内部氛围焕然一新，很少听见抱怨牢骚，大家在工作生活中相互帮助，训练热情持续高涨。在前不久展开的按纲施训考核中，该连官兵齐心协力奋勇拼搏，全员取得”良好”以上成绩。

A Company of a Certain Unit of the Southern Theater Command Army Conducted a Shift Change Experience

Source: *PLA Daily* Author: Dong Haohao Zhu Jun Editor: Du Shengzhi 2025-05-07

A company of a certain unit of the Southern Theater Command Army conducted the “I am on duty today” activity——

The shift change experience exchanged for “putting yourself in others’ shoes”

■ Dong Haohao Zhu Jun

Under the scorching sun, a company of a certain unit of the Southern Theater Command Army finished a 5-kilometer armed cross-country training, and the officers and men were sweating profusely. Just as everyone was panting and stretching, a whistle sounded from the main building: “Each platoon will send one person on a business trip.”

Hearing this, several soldiers couldn’t help complaining: “They don’t even let us breathe.” “The clerk is sitting in the room, and the kitchen team is not cooking at this time. They must be very idle. Why don’t they send them?”... The voice was not loud, but it was heard by the passing cook Yang Chengjie. He was busy inspecting and receiving food materials, and was sweating profusely. He couldn’t help but retort angrily: “Don’t we want to participate in the training? Who will guarantee everyone’s meals?” Unexpectedly, this triggered a dispute between the two sides. One side said that the cooking team worked around the stove from dawn to dusk and rarely rested, and the other side complained about the hard training and many errands. The voices quickly attracted the company political instructor. After understanding the situation, he criticized and educated both sides, telling everyone that as comrades, they should be considerate of each other and think about problems from each other’s perspective. After this incident, Instructor Wu fell into deep thought. Recently, the company has been responsible for teaching demonstration tasks, with heavy work and training tasks and many errands. Many people are impatient due to the pressure and complain and resist. As the weather gradually gets hotter, some soldiers think that positions such as communications, cooking, and clerical work are “not exposed to the wind and rain”, and they are training outside all day, which is particularly hard. “If there are knots in the minds of officers and men, cohesion will be affected.” At the branch committee meeting held later, Instructor Wu told the story and his thoughts. After discussion, in order to eliminate misunderstandings among officers and men and avoid comparison problems, the company decided to conduct the “I am on duty today” activity and organize some officers and men to experience the change of posts.

Sergeant Wu Rihe was assigned to the communication duty room. He was originally proud of himself: “Isn’t it just answering calls and delivering documents? Isn’t this easier than running 5 kilometers?” However, the reality is very different from his imagination. Before he could sit on the stool, the phone rang. The superior notified that a combat readiness spot check was to be conducted and the remote conference system needed to be connected immediately. He was about to debug the system when the phone rang again. There was an urgent notice that needed to be conveyed immediately... Fortunately, the communication soldier Du Kangbo covered the bottom in time and did not delay the work. At the end of the day’s duty, Wu Rihe only felt dizzy, and the phone seemed to keep ringing in his ears.

On the other side, before dawn, Private Wang Mingqing, who had thought that the work of the kitchen squad was idle, was awakened and started his day as a cook. After processing all kinds of food, he immediately went to the stove full of oil smoke and worked until noon. After a quick meal, he had to start cleaning up the oil stains again... At the end of the day, Wang Mingqing was so tired that he couldn’t straighten his back. Looking at the cooks who patiently asked for “opinions on today’s meals”, he felt respect: “Who said that the kitchen team is idle?” Although this activity only lasted for a few days, the effect was very obvious. “Every position is not easy. I shouldn’t have said something inappropriate before. You have contributed no less to the company than others.” Wang Mingqing felt guilty and apologized to Yang Chengjie solemnly. “Everyone has different positions and is contributing to the construction of the company. We should not compare them randomly.” “We should learn to think from each other’s perspective and understand and sympathize with our comrades.”... Everyone talked and untied their ideological knots, and the friendship between comrades deepened. Today, the internal atmosphere of the company has been completely renewed, and complaints are rarely heard. Everyone helps each other in work and life, and the enthusiasm for training continues to rise. In the training assessment carried out not long ago, the officers and men of the company worked together and fought bravely, and all of them achieved results above “good”.

北京卫戍区某团特勤连：应急拉动随机进行

来源：解放军报 作者：曹建 张龙眠 责任编辑：杜圣智 2025-05-07

北京卫戍区某团特勤连——

应急拉动随机进行

■曹 建 张龙眠

“1 分 40 秒！”4 月下旬，北京卫戍区某团特勤连组织应急拉动训练，看着秒表上的数字，杨连长心中多日的阴霾一扫而空。

前段时间的一个周三，楼道突然响起铃声，是上级组织突击检查。该连原本正在组织授课，毫无预兆的警铃让官兵措手不及，集合完毕时早已超出规定时限。

看着检查组在记录本上写下的”不合格”3 个大字，杨连长又气又恼：平时应急拉动训练，大家都很迅速，怎么到了关键时刻就”掉链子”？

“事发突然，大家没有准备……”原来，按照惯例，应急拉动训练一般在周五上午进行，官兵们大多在周四晚上就提前做好准备。但这次突击检查没有提前通知，各类装备用具摆放不够规范有序，一时间难以找齐，最终导致集合超时。

“备战打仗必须实打实、硬碰硬！”了解情况后，杨连长立即拍板，”平时耍这种’小聪明’，战场上一定会吃大亏！”随后，该连立即改变做法，将周五上午的例行拉动调整为随机拉动，同时要求官兵常态化做好战备物资管理，不可随意动用和乱放。在此基础上，他们深入清理和平积弊，使用”备用被子”、非制式作战靴等不符合实战要求的问题被逐一指出整改。

前不久，机关再次突击检查，该连官兵携带物资齐备、集合迅速有序，得到了”优秀”的评价。

Special Service Company of a Regiment in the Beijing Garrison: Emergency Pulling is Conducted Randomly

Source: *PLA Daily* Author: Cao Jian Zhang Longmian Editor: Du Shengzhi 2025-05-07

Special Service Company of a Regiment in Beijing Garrison——

Emergency Pulling is Conducted Randomly

■Cao Jian Zhang Longmian

“1 minute and 40 seconds!” In late April, a special service company of a regiment in Beijing Garrison organized emergency pull training. Looking at the numbers on the stopwatch, the haze in Captain Yang’s heart for many days was swept away.

One Wednesday some time ago, a bell suddenly rang in the corridor. It was a surprise inspection organized by the superiors. The company was originally organizing lectures, and the alarm bell without any warning caught the officers and men off guard. When the assembly was completed, it had already exceeded the prescribed time limit.

Looking at the three big words “unqualified” written by the inspection team in the record book, Captain Yang was angry and annoyed: In normal emergency pull training, everyone is very fast, why did they “drop the chain” at the critical moment?

“It happened suddenly, and we were not prepared...” It turned out that according to convention, emergency training is usually conducted on Friday morning, and most officers and men prepare in advance on Thursday night. However, there was no advance notice for this surprise inspection, and the various equipment and tools were not placed in a standardized and orderly manner, which made it difficult to find them all at once, which eventually led to the assembly timeout.

“Preparing for war must be real and hard-hitting!” After understanding the situation, Captain Yang immediately made a decision, “If you play this kind of “little cleverness” in normal times, you will definitely suffer a big loss on the battlefield!” Subsequently, the company immediately changed its practice and adjusted the routine training on Friday morning to random training. At the same time, it required officers and men to manage war preparedness materials on a regular basis and not to use or place them at will. On this basis, they thoroughly cleaned up the accumulated problems in peacetime, and the use of “spare quilts” and non-standard combat boots that did not meet the actual combat requirements were pointed out and rectified one by one.

Not long ago, the department conducted another surprise inspection. The company’s officers and men carried complete materials and assembled quickly and orderly, which was evaluated as “excellent”.

基层指挥员如何早日成长 他俩的经历给大家带来启示

来源：解放军报 作者：魏继亮 姚忠杰 责任编辑：杜圣智 2025-05-07

写在前面

生长军官和士兵提干军官，是基层指挥员的两个主要来源。在带兵育人中，两者各有优势，也各有短板。如何扬长避短、固强补弱，关系到他们能否早日成长成才、能否胜任本职岗位、能否推动单位建设全面发展。本期”特别关注”，我们把目光投向两名指导员，希望他俩的经历能够给大家带来启示。

把高学历转化为高能力

■陆军某旅某连指导员 魏继亮

我是 2022 年年底来到连队担任指导员的。此前，从军校毕业当排长期间，又被选拔至旅机关工作。初到连队时，我身上带着”‘四有’优秀学员”“研究生学历”“‘四有’优秀军官”等光环，与之伴随而来的，便是压力。

对军校培养的生长军官，各级组织往往会高看一眼，充满期待。但与土生土长的士兵提干军官相比，我们这类干部容易出现”水土不服”——由于缺乏基层经历，知兵、带兵、练兵方面均有不少短板。

如何在基层扎下根？如何在基层主官岗位将理论学识转化为带兵育人实效？如何实现专业优势与岗位需求的精准对接……这些问题，一直困扰着我。

起初，我即便坚持”五同六到位”，但仍感觉与官兵隔着一层无形屏障——鲜有战士主动向我倾诉心声，个别骨干对我有抵触情绪，有的还会私下议论，说我是来基层”刷履历”的。

帮助我打破困境的，是教导员的点拨：”连队主官需要经历两个转变——情感上，从旁观者到家人的转变；能力上，从理论研究者到实践带头人的转变。”

成为官兵的”家人”，从拆除”心墙”开始。训练场不再只是检查督导的场所，而是与官兵们共同研究战术协同、攻关重难点课目的战位；班排宿舍不仅是查铺查哨的必经之地，更是倾听家庭困难、分享成长故事的暖心驿站……

我开始建立”兵情档案”，要求自己把全连官兵的籍贯、特长、性格特点、家庭状况、训练短板等了然于心。列兵小王母亲突发重病，我及时帮他申请困难官兵救济；上等兵小李打算考学，我主动为他辅导功课；军士老张恋爱受挫，我第一时间靠上去耐心疏导……用心用情，此前那种疏离感悄然消融。

情感上与官兵实现共鸣，能力上也须与岗位需求匹配。作为一名生长军官，我知道自己的军事素养、专业知识与部队实际需求存在错位。

具体来说，读军校时，我把基层生活想得过于简单，殊不知事事处处都是考验。战术标图手足无措、特情处置举棋不定、装备操作频现失误……面对我在训练中的表现，战士们嘴上不说，眼神里却透着疑虑：这样的指挥员能带领我们打胜仗吗？时至今日，回想起初次参加实兵训练的窘境，我仍会觉得脸上发热。

知耻后勇。我制订了”三个不放过”补差计划：不放过任何跟训机会，从连队专业基础理论重新学起；不放过任何操作实践，向训练尖子拜师学艺；不放过任何复盘检讨，在问题整改中积累经验。

努力不会被辜负。2023 年的一次实战化训练，我主动请战担任指挥员，面对各种特情有条不紊逐一处置，确保我方主战装备正常发射。”五发全中！”捷报传来时，战士脱口而出的话语是对我的最高褒奖：”以前总觉得指导员是来’镀金’的，现在才知道，是来和我们一起’炼钢’的。”

从”象牙塔”到练兵场的征程，本质上是对”为谁带兵、怎样带兵”的持续叩问。我们既有思维活跃、视野开阔的优长，也面临经历单薄、根基不牢的短板。但正如连队的”尖刀精神”昭示的那样，真正的锋利，永远来自千百次的打磨，一个人的成长成才必须百炼成钢。当看到连队蝉联”军事训练一级单位”时，当看到连队官兵手捧立功喜报时，我深知，基层这片沃土，终将回报每一滴汗水的浇灌。

当前，组织为我们搭建了不少成长平台，”军政换岗”“交叉任职”等培养机制，为我们补齐短板提供了有效途径。因此，我们要把每个岗位都当作淬火机会，把每次挫折都视为进步阶梯。唯有以归零心态扎根基层，以冲锋姿态钻研主业，以创新魄力破解难题，方能真正把高学历转化为高能力，在强军征程上书写无愧于时代和使命的人生篇章。

常想想自己还是战士时

■新疆军区某旅高炮二连指导员　姚忠杰

我来到二连担任指导员时，连队正处于转型关键期：训练进度滞后，官兵思想波动较大，连队全面建设水平不高。”二连需要一次脱胎换骨的改变。”赴任前夜，旅领导的叮嘱让我感到”压力山大”。

当战士时，我只需完成班长交代的任务；当排长时，带好二三十人虽不轻松，但掌握方法也并不困难；而要想当好一名指导员，却需要站在全局高度统筹教育、训练、管理等各项工作。对我而言，这是一个很大的挑战。

当时的连长王龙，战术素养出众，但性子急躁。我与他约定：军事训练他唱”黑脸”，思想工作我当”红脸”，但涉及原则问题必须支委会集体决策。这样的配合让我的工作局面打开得十分顺畅——因为有士兵提干的经历，我对大家的”痛点”格外敏感。

下士杨艳杰曾在上级组织的炊事比武中获得第二名，却因 3000 米跑这个”老大难”，经常被战友调侃。有一次，他坐在器械场发呆，长久沉默后问：”指导员，我是不是该打退伍报告？”

这样的场景太过熟悉。2012 年参加侦察兵集训时，我因成绩垫底心生退意。是时任指导员用自己提干前 3 次考学失败的经历点醒了我：”战场需要尖刀，也需要磨刀石，每个人都有自己的定位和战位。”

第二天，我推荐杨艳杰参加野战炊事技能培训。3 个月后，他改良的菜品广受好评，体能成绩也大有起色。他红着眼眶对我说：”是您帮我找准了自身定位、坚定了信心，我一定在部队好好干。”

安排大学生士兵担任理论辅导员、指定训练尖子与后进战士结对帮扶、推荐文艺骨干参加上级组织的演出……我快速融入连队，掌握官兵情况，制订出大家认可的”一人一策”培养计划。

然而，我也有不小的困扰——要做好官兵的思想教育工作，自身理论功底必须扎实，而这恰恰是我的短板。

我是大专毕业，深知自身存在的不足，从来到连队开始，就给自己制订了”强学计划”。尽管如此，第一次组织主题教育授课，我仍然被官兵评价：”像念工作材料。”

“或许你可以想想，自己当战士时，更喜欢什么样的授课。”王龙的提议让我找到了破局方法。我召集党员骨干成立理论学习小组，把课堂搬到训练场、任务中。

一次野外驻训，半夜下起瓢泼大雨，我带领大家紧急转移物资、搭建帐篷。雨点砸在帐篷布上啪啪作响，不知是谁起头，大家喊起了劳动号子。大学生士兵魏小龙突然冒出一句：”指导员，官兵一致是不是就像咱们现在这样？”我笑了笑没吭声，但心里对如何开展思想政治教育又有了新的感悟。

后来，这段经历被我放入了课件。受此启发，我摸索出”理论+”学习模式：”理论+战例”“理论+兵情”“理论+网言网语”。讲斗争精神时，我重温革命前辈的战斗故事配以视频照片；说科技创新时，我拿连队革新研制的装备便携架当案例，组织官兵现身说法……渐渐地，课后反馈从”听不懂”的抱怨变成了”再讲点”的认可。

荣立集体三等功、连续两年被表彰为”四铁”先进单位、理论考核成绩从全营倒数第一到全旅第三……我不知道连队取得这样的成绩算不算实现了”脱胎换骨”的目标，但自己对此十分欣慰。

回想这一路走来，我每次解决棘手问题，都少不了想想自己”还是战士时”。我想，这就是我能胜任本职岗位的原因。正是曾为普通一兵的经历，让我习惯站在战士的角度思考和处理问题，才成就了如今的我。作为一线带兵人，不论身份如何转变，只有把自己放在战士之中、当成兵中一员，才不会失去本心、有违初心。

How Can Grassroots Commanders Grow up Early? Their Experiences Bring Inspiration to Everyone

Source: *PLA Daily* Author: Wei Jiliang Yao Zhongjie Editor: Du Shengzhi 2025-05-07

Foreword

Growing officers and having enlisted personnel become officers are the two main sources of grassroots commanders. In leading soldiers and educating people, both have their own advantages and shortcomings. How to make the best use of their strengths and avoid weaknesses, consolidate strengths and make up for weaknesses, is related to whether they can grow up and become talents as soon as possible, whether they can be competent for their posts, and whether they can promote the comprehensive development of unit construction. In this issue of “Special Attention”, we turn

our attention to two company Political Instructors, hoping that their experiences can bring inspiration to everyone.

Transforming high education into high ability

■Instructor of a company of a certain brigade of the Army Wei Jiliang

I came to the company as a Political Instructor at the end of 2022. Prior to this, when I graduated from the military academy and served as a platoon leader, I was selected to work in the brigade headquarters. When I first arrived at the company, I was carrying the aura of "'Four Haves' Excellent Student", "Postgraduate Degree", "'Four Haves' Excellent Officer", etc., and with it came pressure.

Organizations at all levels often look up to officers trained in military academies and are full of expectations. However, compared with native soldiers promoted to officers, our cadres are prone to "not adapting to the local environment" - due to lack of grassroots experience, there are many shortcomings in knowing soldiers, leading soldiers, and training soldiers.

How to take root at the grassroots level? How to transform theoretical knowledge into the effectiveness of leading soldiers and educating people in the grassroots chief position? How to achieve the precise connection between professional advantages and job requirements... These problems have always troubled me.

At first, even if I insisted on "five similarities and six in place", I still felt that there was an invisible barrier between me and the officers and men - few soldiers took the initiative to confide in me, and some backbones had resistance to me, and some would even talk about me privately, saying that I came to the grassroots to "brush up my resume".

What helped me break the dilemma was the Political Instructor's advice: "The company leaders need to go through two transformations - emotionally, from a bystander to a family member; in terms of ability, from a theoretical researcher to a practical leader."

Becoming a "family member" of officers and men starts with removing the "wall of heart". The training ground is no longer just a place for inspection and supervision, but a battle position for studying tactical coordination and tackling difficult and key subjects with officers and men; the squad dormitory is not only a must-go place for checking the barracks and sentries, but also a warm station for listening to family difficulties and sharing growth stories...

I began to establish a "soldier situation file" and required myself to know the native place, specialties, personality traits, family situation, training shortcomings, etc. of all the officers and men in the company. When Private Xiao Wang's mother suddenly became seriously ill, I helped him apply for relief for officers and men in need in time; when Corporal Xiao Li planned to take the entrance examination, I took the initiative to tutor him; when Sergeant Lao Zhang was frustrated in love, I approached him and patiently counseled him at the first time... With heart and emotion, the previous sense of alienation quietly melted away.

Emotionally resonate with officers and men, and ability must also match the job requirements. As a growing officer, I know that my military literacy and professional knowledge are misaligned with the actual needs of the troops.

Specifically, when I was in military school, I thought that grassroots life was too simple, but I didn't know that everything was a test. Tactical mapping was at a loss, special situations were handled indecisively, and equipment operation frequently made mistakes... Facing my performance in training, the soldiers did not say anything, but their eyes were full of doubts: Can such a commander lead us to victory? To this day, when I think back to the predicament of participating in the actual military training for the first time, I still feel hot on my face.

Knowing shame and then being brave. I formulated a "three-not-let-go" plan to make up for the difference: not letting go of any training opportunities, starting from the company's professional basic theory; not letting go of any operational practice, learning from the top trainers; not letting go of any review and review, accumulating experience in problem rectification.

Efforts will not be in vain. In a practical training in 2023, I took the initiative to ask for the commander's position, and dealt with various special situations in an orderly manner one by one to ensure the normal launch of our main combat equipment. "All five shots hit the target!" When the victory report came, the soldier blurted out the highest praise for me: "I always thought that the Political Instructor was here to 'gild', but now I know that he is here to 'forge steel' with us." The journey from the "ivory tower" to the training ground is essentially a continuous question of "who to lead the troops and how to lead the troops". We have the advantages of active thinking and broad vision, but also face the shortcomings of thin experience and weak foundation. But as the "sharp knife spirit" of the company shows, the real sharpness always comes from thousands of times of polishing, and a person's growth and success must be tempered into steel. When I saw the company win the title of "First-Class Military Training Unit" for two consecutive years, and when I saw the company's officers and men holding the good news of meritorious service, I knew that the fertile soil at the grassroots level will eventually reward every drop of sweat. At present, the organization has built a lot of growth platforms for us, and the training mechanisms such as "military-political job exchange" and "cross-appointment" have provided us with effective ways to make up for our shortcomings. Therefore, we should regard every position as a tempering opportunity and every setback as a step for progress. Only by taking root at the grassroots level with a zero-based mentality, delving into the main business with a charging attitude, and solving problems with innovative courage can we truly transform high education into high ability and write a life chapter that is worthy of the times and mission on the journey of strengthening the army.

(Compiled by Wei Xukai)

Always think about when you were still a soldier

■Yao Zhongjie, Political Instructor of the second anti-aircraft artillery company of a brigade of the Xinjiang Military Command [District]

When I came to the second company as a Political Instructor, the company was in a critical period of transformation: the training progress was lagging behind, the officers and men' thoughts fluctuated greatly, and the company's overall construction level was not high. "The second company needs a complete change." On the eve of taking office, the brigade leader's exhortation made me feel "under great pressure."

When I was a soldier, I only needed to complete the tasks assigned by the squad leader; when I was a platoon leader, it was not easy to lead 20 or 30 people, but it was not difficult to master the methods; and to be a good Political Instructor, you need to coordinate education, training, management and other work from a global perspective. For me, this is a big challenge.

The company commander at that time, Wang Long, had outstanding tactical qualities, but an impatient temper. I agreed with him that he would play the "black face" in military training and I would play the "red face" in ideological work, but the branch committee must make collective decisions on issues of principle. Such cooperation made my work situation very smooth - because of the experience of soldiers being promoted, I was particularly sensitive to everyone's "pain points".

Corporal Yang Yanjie once won the second place in the cooking competition organized by the superior, but was often teased by his comrades because of the "difficult" 3,000-meter run. Once, he sat in a daze in the equipment field, and after a long silence, he asked: "Instructor, should I report for retirement?"

Such a scene is too familiar. When I participated in the scout training in 2012, I wanted to quit because my grades were at the bottom. It was the Political Instructor at the time who used his experience of failing the exam three times before being promoted to cadres to wake me up: "The battlefield needs a sharp knife and a whetstone, and everyone has his own position and position."

The next day, I recommended Yang Yanjie to participate in the field cooking skills training. Three months later, his improved dishes were widely praised, and his physical fitness also improved greatly. With red eyes, he said to me: "You helped me find my own position and strengthened my confidence. I will definitely work hard in the army."

Arrange college student soldiers as theoretical counselors, designate top trainees to pair up with backward soldiers for assistance, and recommend literary and artistic backbones to participate in performances organized by superiors... I quickly integrated into the company, mastered the situation of officers and men, and formulated a "one person, one policy" training plan recognized by everyone.

However, I also have a lot of troubles-to do a good job in the ideological education of officers and men, one's own theoretical foundation must be solid, and this is exactly my shortcoming.

I graduated from a junior college and I am well aware of my own shortcomings. Since I came to the company, I have formulated a "strong learning plan" for myself. Despite this, when I organized

the first theme education class, I was still evaluated by officers and men: “It’s like reading work materials.”

“Maybe you can think about what kind of lectures you prefer when you are a soldier.” Wang Long’s proposal helped me find a way out. I convened party members and backbones to form a theoretical study group and move the classroom to the training ground and tasks.

During a field training, it rained heavily in the middle of the night. I led everyone to urgently transfer supplies and build tents. The raindrops hit the tent cloth and made a clacking sound. I don’t know who started it, but everyone started to shout labor songs. Wei Xiaolong, a college student soldier, suddenly said, “Instructor, is the unity of officers and men like what we have now?” I smiled and said nothing, but I had a new understanding of how to carry out ideological and political education.

Later, I put this experience into the courseware. Inspired by this, I explored the “theory +” learning model: “theory + battle examples”, “theory + soldiers’ situation”, and “theory + online language”. When talking about the spirit of struggle, I reviewed the battle stories of revolutionary predecessors with video photos; when talking about scientific and technological innovation, I took the company’s innovative equipment portable rack as an example and organized officers and men to speak out... Gradually, the feedback after class changed from complaints of “I don’t understand” to recognition of “tell more”.

Won the third-class collective merit, was commended as the “Four Irons” advanced unit for two consecutive years, and the theoretical assessment score went from the last in the battalion to the third in the brigade... I don’t know if the company’s achievements can be regarded as the goal of “rebirth”, but I am very pleased with it.

Looking back on this journey, every time I solve a difficult problem, I can’t help but think about myself “when I was still a soldier”. I think this is why I am competent for my job. It is the experience of being an ordinary soldier that makes me accustomed to thinking and dealing with problems from the perspective of a soldier, which makes me what I am today. As a front-line leader, no matter how your identity changes, only by putting yourself among the soldiers and treating yourself as a soldier can you not lose your original intention and go against your original intention.

陆军某旅营指挥员努力熟练掌握主战装备战术技术性能

来源：解放军报 作者：张子庚 陆栋钰 责任编辑：杜圣智 2025-05-07

陆军某旅营指挥员努力熟练掌握主战装备战术技术性能——

营长驾驶装甲车

■张子庚 解放军报特约通讯员 陆栋钰

开栏的话

习主席反复强调，”军队要有军队的样子”“军人要有军人的样子”。新修订的共同条令发布施行，为塑造人民军队的良好形象提供了依据、规范了路径，也提出了新的更高要求。

法规制度的生命力在于执行，权威也在于执行。新修订的共同条令发布后，全军部署开展学条令、守规矩、正秩序”活动，组织官兵学习基本内容、掌握精神实质，营造严格军规军纪、正规部队秩序浓厚氛围，切实把条令规范内化为政治信念和道德修养、外化为行为准则和行动自觉。

即日起，解放军报推出”新条令·新亮点”专栏，聚焦新修订的共同条令重要改点，反映各部队学条令、用条令、守条令的生动实践和鲜活经验，敬请关注。

军队是要打仗的，军人的主要担当就是要能打仗、打胜仗。新修订的共同条令因应部队练兵备战和建设运行新特点新变化，强化各级当兵打仗、带兵打仗、练兵打仗意识，充实完善军人练兵备战相关规范。

■新修订的《中国人民解放军内务条令》在营长职责的规定中，将”掌握所属主战武器装备战技术性能”调整为”熟练掌握所属主战装备战术技术性能”。

■新修订的《中国人民解放军内务条令》对班长职责明确规定：带领全班做好战斗准备，培育顽强的战斗精神、战斗作风和战斗意志，指挥全班完成战斗任务。

该旅开展驾驶训练。解放军报特约通讯员 张　毛摄

镜头

笔者在陆军某旅装甲车辆驾驶训练场见到刘营长时，他正带领官兵开展复杂道路驾驶训练。

在刘营长眼中，新修订的共同条令关于”营长职责”的规定是他关注的重点。”新条令对’营长职责’作出 9 条硬性规定，更加鲜明地突出责任二字。”刘营长说，与原来的条令相比，

新条令要求更高、落点更实，对营长岗位能力素质要求有了”硬杠杠”，立起备战打仗根本指向。

作为营主官，刘营长既是训练组织者和指挥员，也作为参训人员与普通官兵一起观摩教练员的示范。随后，他作为驾驶员坐上驾驶位进行实训，进一步熟悉装备性能。

“新条令规定，营长需熟练掌握所属主战装备战术技术性能。’熟练’二字，要求具体、责任重大。”刘营长介绍，这对营长掌握装备操作、落实战备规定等提出了新的更高要求，进一步压实了营长备战打仗职责。

“新条令强化了各级当兵打仗、带兵打仗、练兵打仗意识，体现了对提升部队战斗力的深远考量。”刘营长举了一个例子。前些年，他们参加上级组织的一场实战化演练。规划行军路线时，刘营长决定走一条穿越泥泞林地的”捷径”，装甲底盘技师却提出不同意见。

原来，该营当时列装的某型轮式装甲车，与以往履带式装备的性能差异较大。刘营长基于老装备特点提出的方案，并不适用于新装备。

“凭老经验筹划，差点造成失误。”这件事引发他的深刻反思，”指挥员对装备战术技术性能的熟悉程度，直接影响战场决策。当前部队装备更新快、种类多，作为一名营长，要想在未来战场上科学带兵打仗，必须夯实新装备训练这个基础，这是法规要求，更是职责所系。”

笔者在训练场看到，驾驶训练结束后，刘营长又赶往工兵爆破课目训练场。因之前较少接触工兵专业，刘营长与两名新兵共同组成训练补差小组，学习搜排爆装备的操作使用。

“新条令不仅压实了担子和责任，也明确了目标和方向。”训练间隙，刘营长告诉笔者，新修订的共同条令对营长职责提出了具体要求，自己提升能力素质有了明确”标尺”。

笔者了解到，为贯彻落实新修订的共同条令对指挥员备战打仗职责的要求，该旅从军官抓起，突出”集中精力研究军事、研究战争、研究打仗，提高打赢本领”，严格按军事训练大纲制订训练计划和组织考核，定期组织战备训练交叉检查，聚焦战场开展作战问题研究，将备战打仗职责履行情况作为军官考核重要内容。

“考核结束，成绩评定为良好！”当天组织的装甲车辆驾驶课目考核中，刘营长作为驾驶员参训，拿到了一个不错的成绩。欣喜之余，他对自己提出了更高要求：”熟练掌握主战装备只是’及格’，要想达到优秀标准，必须系统学习各类装备知识，努力做到全面掌握、灵活运用。”

亲历

全班过硬才是过硬

■海军航空兵某部三级军士长　周火

一个机械日，我蹲在机翼下，为上等兵陈程演示如何校正起落架液压阀。我连做 3 遍后，陈程上手操作。看着他慢吞吞的动作和时不时”卡住”的尴尬，我忍不住心想：”还不如自己动手。”于是，我拿起工具再次上手，很快完成了作业。

绘图：唐建平

这样的场景，在我多年带兵经历中，是司空见惯的一幕。

新修订的共同条令施行后，指导员组织班长骨干集体学习，逐条解读”班长职责”，逐句剖析重要改点。”‘班长职责’总共七条，前六条强调的都是’全班’。”学习结束时，指导员语重心长地说，”班长首先要姓’全’，不仅要自身全面过硬，更要时时处处想着全班，不能让一个战士掉队。全班过硬才是过硬。”

当时，我心里有些不以为然：战场上分秒必争，关键时刻还得靠老同志。

现实很快给了我一个教训。没过几天，上级组织一次夜间紧急拉动演练。白天例行试车时，我们没有发现什么问题。没想到，演练过程中，空中机械师复查时发现起落架液压阀参数没调整到位，虽然不影响战机安全飞行，但如果遇到紧急情况，将不利于机务官兵第一时间排查原因。

冷静下来后，我仔细回忆白天的任务经过：当时，我因手里有其他工作，便让陈程独立校正起落架液压阀。我原以为，这个操作很简单，加之此前为他演示过多次，理应不成问题，没想到起落架液压阀参数还是没有调整到位。

“不能让一个战士掉队。”那天，指导员的话在我耳边反复回响。此事让我意识到：班里任何一个战士”掉链子”，都可能影响作战训练，甚至战场胜负。作为一班之长，必须时刻想着把全班带过硬。

这段时间，我把新修订的共同条令中”带领全班做好战斗准备”“带领全班严格执行法规制度”等班长职责的相关要求背了下来，时时反躬自省。为了带好兵，我把自己总结的常见故障排查方法拆解成标准化流程，带着全班战士在模拟器上反复研练。针对陈程学习掌握

速度慢的实际，我为他量身定制训练计划，手把手带着他反复练习。看着他努力追赶的劲头，我告诉自己，要多给他一点”成长的时间”。

功夫不负有心人。前几天的一次跨昼夜训练中，陈程第一时间发现战机某项数据异常，受到上级表扬。看着战士们熟练操作装备的身影，我想，我正在落实新修订的共同条令中”带领全班爱护装备，严格遵守使用规定，熟练掌握装备”的要求。

“心里时时想着’全班’，行动处处考虑战友。”站在跑道旁，看着战机呼啸升空，新修订的共同条令里的”班长七条”再次浮现在我脑海中。未来的日子，我会继续全力扛起班长职责，带领全班向战冲锋，决不让一个战士掉队。

（傅琳、邓杰元整理）

点睛

条令如山 “战”字千钧

■严　壮

“战士责任重，军事要过硬……”这首《爱军习武歌》，一经传唱，就深受官兵喜爱。

新修订的共同条令关于”战”“作战”“战时”等方面的内容，增加了多处，向战为战的导向更加鲜明。对广大官兵来说，新修订的共同条令不仅是制度规范，更要成为行动自觉，落实在一言一行、一举一动中。

职责清，干事明。学习新修订的共同条令，第一位的就是要学习军人职责。很多官兵感言，贯彻落实新修订的共同条令，最好的行动就是牢记职责、忠于职守、向战为战。

条令条令，条条是令。条令如山，”战”字千钧。军队的核心职能是打仗，一切建设和工作的根本指向是战斗力，每名军人的主责主业是备战打仗。新修订的共同条令重点强化了军人的核心职能，彰显了向战聚力的价值指向。作为军人，我们必须把条令刻印在心，对照条令落实备战打仗职责要求。

一分部署，九分落实。学习贯彻新修订的共同条令，核心在严格落实，关键在不打折扣。新征程上，广大官兵只有严格按照条令规范，强化当兵打仗、带兵打仗、练兵打仗意识，树牢战斗队思想，落实战斗力标准，履行战斗员职能，全部精力向打仗聚焦、全部工作向打仗用劲，锤炼本领、精武强能，才能做到不辱使命、不负重托。

The Commander of a Certain Army Brigade Battalion Strives to Master the Tactical and Technical Performance of the Main Battle Equipment

Source: *PLA Daily* Author: Zhang Zigeng Lu Dongyu Editor: Du Shengzhi 2025-05-07

The commander of a certain army brigade battalion strives to master the tactical and technical performance of the main battle equipment——

The battalion commander drives an armored vehicle

■ Zhang Zigeng *PLA Daily* Special Correspondent Lu Dongyu

Opening remarks

President Xi repeatedly emphasized that "the army [military] should look like an army [military]" and "the soldiers should look like soldiers". The release and implementation of the newly revised common regulations provide a basis for shaping the good image of the people's army, standardizing the path, and also putting forward new and higher requirements.

The vitality of laws and regulations lies in implementation, and authority also lies in implementation. After the release of the newly revised common regulations, the entire PLA deployed to carry out the "learning regulations, abiding by rules, and rectifying order" activities, organizing officers and men to learn the basic content and master the spiritual essence, creating a strong atmosphere of strict military regulations and discipline, and regular military order, and effectively internalizing the regulations into political beliefs and moral cultivation, and externalizing them into behavioral norms and conscious actions.

Starting today, the *PLA Daily* will launch a column titled "New Regulations· New Highlights", focusing on the important changes in the newly revised common regulations, reflecting the vivid practice and fresh experience of various troops in learning, using and abiding by the regulations. Please pay attention.

The army is to fight, and the main responsibility of soldiers is to be able to fight and win. The newly revised common regulations respond to the new characteristics and changes in the training and preparation of troops and the construction and operation of the troops, strengthen the awareness of serving, leading and training soldiers at all levels, and enrich and improve the relevant norms for soldiers' training and preparation.

■ The newly revised "Regulations on Internal Affairs of the Chinese People's Liberation Army" adjusts "mastering the combat and technical performance of the main combat weapons and equipment" to "proficiently mastering the tactical and technical performance of the main combat equipment" in the provisions on the responsibilities of the battalion commander.

■ The newly revised "Regulations on Internal Affairs of the Chinese People's Liberation Army" clearly stipulates the responsibilities of the squad leader: lead the whole squad to prepare for battle, cultivate a tenacious fighting spirit, fighting style and fighting will, and command the whole squad to complete combat tasks.

The brigade carried out driving training. Photo by Zhang Mao, a special correspondent of the People's Liberation Army Daily

When I met Captain Liu at the armored vehicle driving training ground of a certain army brigade, he was leading officers and men to conduct complex road driving training.

In the eyes of Captain Liu, the provisions of the newly revised common regulations on the "duties of the battalion commander" are the focus of his attention. "The new regulations have made 9 mandatory provisions on the 'duties of the battalion commander', which more clearly highlights the word responsibility." Captain Liu said that compared with the original regulations, the new regulations have higher requirements and more practical implementation points, and have "hard bars" for the job ability and quality requirements of the battalion commander, setting up the fundamental direction of preparing for war.

As the battalion commander, Captain Liu is not only the organizer and commander of the training, but also a trainee who observes the demonstration of the Political Instructor together with ordinary officers and men. Afterwards, he sat in the driver's seat as a driver for practical training to further familiarize himself with the performance of the equipment.

"The new regulations stipulate that battalion commanders must be proficient in the tactical and technical performance of their main combat equipment. The word 'proficient' requires specific requirements and heavy responsibilities." Captain Liu introduced that this puts forward new and higher requirements for battalion commanders to master equipment operation and implement combat readiness regulations, and further consolidates the battalion commander's responsibilities for preparing for war.

"The new regulations strengthen the awareness of soldiers at all levels to fight, lead soldiers to fight, and train soldiers to fight, reflecting the far-reaching considerations for improving the combat effectiveness of the troops." Captain Liu gave an example. A few years ago, they participated in a combat exercise organized by their superiors. When planning the marching route, Captain Liu decided to take a "shortcut" through the muddy woods, but the armored chassis technicians expressed different opinions.

It turned out that the performance of a certain type of wheeled armored vehicle equipped by the battalion at that time was quite different from that of the previous tracked equipment. The solution proposed by Captain Liu based on the characteristics of the old equipment is not applicable to the new equipment.

"Planning based on old experience almost caused mistakes." This incident triggered his deep reflection, "The commander's familiarity with the tactical and technical performance of equipment directly affects battlefield decision-making. At present, the troops' equipment is updated quickly and in many types. As a battalion commander, if you want to lead troops to fight scientifically on the battlefield in the future, you must lay a solid foundation for new equipment training. This is a legal requirement and a responsibility." The author saw at the training ground that after the driving training, Captain Liu rushed to the engineering blasting training ground. Because he had little contact with the engineering profession before, Captain Liu and two recruits formed a training

supplementary group to learn the operation and use of search and disposal equipment. “The new regulations not only consolidate the burden and responsibility, but also clarify the goals and directions.” During the training, Captain Liu told the author that the newly revised common regulations put forward specific requirements for the duties of the battalion commander, and he had a clear “yardstick” to improve his ability and quality. The author learned that in order to implement the requirements of the newly revised common regulations on commanders’ combat readiness responsibilities, the brigade started with officers, highlighting “concentrating on military research, war research, and combat research, and improving the ability to win”, strictly formulating training plans and organizing assessments in accordance with the military training outline, regularly organizing combat readiness training cross-checks, focusing on battlefield combat problem research, and taking the performance of combat readiness responsibilities as an important part of officer assessment.

“The assessment is over, and the results are rated as good!” In the armored vehicle driving course assessment organized that day, Captain Liu participated in the training as a driver and got a good score. In addition to being happy, he put forward higher requirements for himself: “Mastering the main combat equipment is only ‘passing’. To achieve excellent standards, you must systematically learn all kinds of equipment knowledge and strive to fully master and flexibly use it.”

Personal experience

The whole class is strong only when it is strong

■Zhou Huo, a third-level sergeant major of a certain naval aviation unit

On a mechanical day, I squatted under the wing and demonstrated to Corporal Chen Cheng how to calibrate the landing gear hydraulic valve. After I did it three times in a row, Chen Cheng started to operate it. Watching his slow movements and the embarrassment of “getting stuck” from time to time, I couldn’t help thinking: “It’s better to do it myself.” So, I picked up the tools and started again, and quickly completed the work.

Drawing: Tang Jianping

Such scenes are common in my many years of leading soldiers.

After the implementation of the newly revised common regulations, the Political Instructor organized the backbone of the squad leaders to study collectively, interpret the “squad leader’s responsibilities” one by one, and analyze the important changes sentence by sentence. “There are seven ‘squad leader’s responsibilities’ in total, and the first six emphasize ‘the whole class’.” At the end of the study, the Political Instructor said earnestly, “The squad leader must first be ‘all’. Not only must he be comprehensive and strong, but he must also think about the whole class at all times and places, and not let a soldier fall behind. Only when the whole class is strong can it be strong.”

At that time, I was a little skeptical: every second counts on the battlefield, and at critical moments, we have to rely on old comrades.

Reality soon taught me a lesson. A few days later, the superior organized an emergency pull-up exercise at night. During the routine test run during the day, we did not find any problems. Unexpectedly, during the exercise, the air mechanic found that the parameters of the landing gear hydraulic valve were not adjusted properly during the review. Although it did not affect the safe flight of the fighter, it would be unfavorable for the maintenance officers to find out the cause in the first time if an emergency occurred.

After calming down, I carefully recalled the task during the day: At that time, I had other work in my hands, so I asked Chen Cheng to independently calibrate the landing gear hydraulic valve. I thought that this operation was very simple, and it should not be a problem because I had demonstrated it to him many times before. Unexpectedly, the parameters of the landing gear hydraulic valve were still not adjusted properly.

“Don’t let a soldier fall behind.” That day, the Political Instructor’s words echoed in my ears repeatedly. This incident made me realize that any soldier in the class who “drops the chain” may affect combat training and even the outcome of the battlefield. As the leader of a squad, you must always think about leading the whole squad.

During this period, I memorized the relevant requirements of the squad leader’s duties in the newly revised common regulations, such as “leading the whole class to prepare for battle” and “leading the whole class to strictly implement laws and regulations”, and reflected on myself from time to time. In order to lead the soldiers well, I disassembled the common troubleshooting methods I summarized into standardized processes, and took the whole class of soldiers to practice repeatedly on the simulator. In view of the fact that Chen Cheng was slow to learn and master, I tailored a training plan for him and took him to practice repeatedly. Seeing his efforts to catch up, I told myself to give him more “growth time”.

Hard work pays off. In a cross-day and night training a few days ago, Chen Cheng was the first to discover that a certain data of the fighter was abnormal and was praised by his superiors. Looking at the soldiers’ skillful operation of the equipment, I thought that I was implementing the requirements of the newly revised common regulations to “lead the whole class to care for the equipment, strictly abide by the use regulations, and master the equipment proficiently.”

“Thinking about the ‘whole class’ in my heart, and considering my comrades in action.” Standing by the runway, watching the fighter plane roaring into the sky, the “Seven Rules of the Squad Leader” in the newly revised common regulations once again came to my mind. In the days to come, I will continue to shoulder the responsibilities of the squad leader with all my strength, lead the whole class to charge to the battle, and never let a soldier fall behind.

(Compiled by Fu Lin and Deng Jieyuan)

Highlights

Regulations are like mountains, and the word “war” is extremely important

■Strict and strong

“Soldiers have heavy responsibilities, and military affairs must be strong...” This song “Love the Army and Practice Martial Arts” has been deeply loved by officers and men since it was sung.

The newly revised common regulations have added many contents on “war”, “combat” and “wartime”, and the orientation of fighting for war is more distinct. For the majority of officers and men, the newly revised common regulations are not only institutional norms, but also must become conscious actions, implemented in every word, every action, and every move.

Responsibilities are clear, and things are clear. When learning the newly revised common regulations, the first thing to do is to learn the responsibilities of soldiers. Many officers and men said that the best action to implement the newly revised common regulations is to remember the responsibilities, be loyal to the duties, and fight for war.

Regulations are orders, and every order is an order. Regulations are like mountains, and the word “war” is extremely important. The core function of the army is to fight, and the fundamental direction of all construction and work is combat effectiveness. The main responsibility and main business of every soldier is to prepare for war. The newly revised common regulations focus on strengthening the core functions of soldiers and highlighting the value orientation of focusing on war. As soldiers, we must keep the regulations in mind and implement the responsibilities and requirements of preparing for war in accordance with the regulations.

One point of deployment, nine points of implementation. The core of learning and implementing the newly revised common regulations is strict implementation, and the key is not to compromise. On the new journey, the officers and men can only fulfill their mission and trust by strictly following the regulations, strengthening their awareness of serving in the army, leading the army, and training the army, establishing a strong fighting team mentality, implementing the combat effectiveness standards, and performing the functions of combatants, focusing all their energy on fighting, working hard on fighting, and honing their skills and strengthening their martial arts.

西藏日喀则军分区”高原戍边模范营”官兵牢记嘱托忠诚卫国戍边

来源：解放军报 作者：宋伟坤 张磊峰 刘大辉 责任编辑：郭妍菲 2025-05-07

西藏日喀则军分区”高原戍边模范营”官兵牢记嘱托忠诚卫国戍边——

把青春融入祖国山河

■宋伟坤 解放军报记者 张磊峰 特约记者 刘大辉

编者按 2016 年，习主席签署中央军委命令，授予西藏日喀则军分区某营”高原戍边模范营”荣誉称号。该营官兵常年驻守在平均海拔 4800 多米的雪域高原。2021 年，全营官兵给习主席写信，汇报授称以来工作情况，表达牢记习主席期望重托、忠诚卫国戍边的坚定信念和决心。习主席给该营官兵回信，勉励他们忠诚履行好卫国戍边职责，努力为党和人民再立新功。官兵牢记嘱托，像钢钉一样铆在边防线上，用青春热血诠释使命担当。

西部广袤热土，青年大有可为。我们期待广大军地青年像该营官兵一样，积极响应党和国家号召，扎根西部、报效祖国。

仲春时节，青藏高原依旧冰封雪裹。日喀则市岗巴县，终年不化的曲登尼玛冰川巍峨矗立。冰川之上，一支迷彩队伍奋力前行——西藏日喀则军分区”高原戍边模范营”某连官兵正在例行巡逻。

巡逻路线中最险的一条，海拔最低点 4600 多米，最高点 6000 多米。在这条巡逻路上，悬崖连着冰壁，不时有碎石滚落。连长旦增曲觉带领队伍迎难而上，经过 2 个多小时艰难跋涉，按时到达点位，徐徐展开鲜艳的五星红旗。

9 次获得全国全军表彰、5 次被授予荣誉称号，涌现出 5 名一等功臣、47 名二等功臣……”高原戍边模范营”荣誉室内，摆满了金灿灿的奖牌，展示着长长的荣誉名录。2021 年，全营官兵给习主席写信，汇报该营被授予”高原戍边模范营”荣誉称号以来工作情况，表达牢记习主席期望重托、忠诚卫国戍边的坚定信念和决心。习主席回信勉励官兵：”希望同志们强化使命担当，发扬优良传统，加强练兵备战，忠诚履行好卫国戍边职责，努力为党和人民再立新功。”

5318、5371、5592……该营驻守之地，雪山连绵，平均海拔高。这里，空气中含氧量不足内地一半，最低气温-40℃，每年 8 级以上大风 200 多天。边关艰险，却挡不住边防军人的决心和脚步——卫国戍边成为一茬茬官兵的青春选择。

“把火热的青春融入祖国山河，这样的人生最壮美”“雪域高原，有我的诗和远方”……这片土地高寒缺氧，却生长忠诚和坚韧。官兵牢记嘱托，努力向下扎根、向阳生长，用无畏的脚步丈量无悔的青春。

10 多年前，李耿当兵来到该营，就再没想过”挪窝”。执行观察任务，他在雪地里一趴就是几小时；前出侦察，他主动请缨勘探新路线。李耿如饥似渴地学习边防知识、熟悉巡边环境、苦练本领技能，笔记本上记满了特情处置方法，成为营队”边防通”“活地图”。风雪中的历练，让已成长为指导员的李耿坚信一个道理：苦地方，险地方，正是建功立业的好地方！

立志扎根边防、建功高原，李耿不是个例。近年来，该营 30 多名官兵主动放弃到低海拔地区工作机会，7 人军校毕业后申请归队。列兵丰艳红二次入伍回到老单位，主动申请戍

守海拔 5318 米的查果拉哨所；一级上士马世胜，多次放弃调离机会，在塔克逊哨所一待就是 12 年……”为祖国守边，是军人的使命，更是无上的光荣。”这是他们共同的心声。

青春在哪里扎根，理想就在哪里绽放。常年在雪山跋涉，他们不断汲取向上的力量，书写了一个个奋斗故事，创造了一个个优异成绩。

在以海拔高度命名的驻兵点 5592 观察哨，二级上士西热尼玛是第一批主动申请驻哨的战士。他以苦为荣、苦中作为，先后参加巡逻 500 余次，累计里程 8000 余公里。2020 年，他参加全团大比武，夺得武装五公里越野第一名，打破手榴弹投掷、精度射击两个课目成绩纪录，被陆军表彰为”优秀士官标兵”，荣立个人三等功 2 次。

在风雪漫天的巡逻路上，一级上士王翔背着电台勇闯”生命禁区”。每次新装备配发，为摸清其性能底数、发挥其最佳效能，他总在山巅、风口等复杂地形环境下测试采集不同装备参数，为执行巡逻等任务织起一张牢固的通信网。

新装备列装初期，炮长吕玉寒带领官兵突破一个又一个训练瓶颈。某新型装备列装部队，面对没有教材、没有经验、没有教员等难题，吕玉寒白天围着装备转、晚上抱着书本看。不到一年，他就掌握了该型装备各项技战术性能，总结出一套高效操作流程，并在实弹射击考核中实现首发命中。

如何让新装备更加适应高原特点，把作战效能发挥到极致？面对新课题，二级上士姚攀飞主动攻关，采集更新不同天候、温度、风力等条件下射击数据，进一步提高高海拔地区火炮射击精度。

“西部高原，是成才的沃土、冲锋的疆场！”随着边防基础设施建设不断升级、戍边条件不断改善，该营官兵践行岗巴精神的热情更高，建功高原边关的劲头更足。营队的荣誉，不断激励着他们无惧挑战、砥砺前行！

The Officers and Men of the “Highland Border Guarding Model Battalion” of the Xigaze Military Sub-District in Tibet Remember the Instructions and Loyally Defend the Country and Guard the Border

Source: *PLA Daily* Author: Song Weikun Zhang Leifeng Liu Dahui Editor: Guo Yanfei 2025-05-07

The officers and men of the “Highland Border Guarding Model Battalion” of the Xigaze Military Sub-district in Tibet remember the instructions and loyally defend the country and guard the border-

Integrate youth into the mountains and rivers of the motherland

■ Song Weikun, *PLA Daily* reporter Zhang Leifeng, special reporter Liu Dahui

Editor's note In 2016, President Xi signed an order of the Central Military Commission to award the honorary title of "Highland Border Guarding Model Battalion" to a battalion of the Xigaze Military Sub-district in Tibet. The officers and men of the battalion are stationed on the snowy plateau with an average altitude of more than 4,800 meters all year round. In 2021, the officers and men of the entire battalion wrote a letter to President Xi to report on their work since the award, expressing their firm belief and determination to remember President Xi's expectations and trust and loyally defend the country and guard the border. President Xi wrote back to the officers and men of the battalion, encouraging them to faithfully perform their duties of defending the country and guarding the border, and strive to make new contributions to the Party and the people. The officers and men kept the instructions in mind, riveted on the border like steel nails, and interpreted their mission with their youth and blood.

The vast land of the west has great potential for young people. We expect the majority of military and civilian youth to actively respond to the call of the Party and the country, take root in the west, and serve the motherland like the officers and men of the battalion.

In mid-spring, the Qinghai-Tibet Plateau is still covered with ice and snow. In Gangba County, Shigatse City, the Qudennima Glacier, which never melts all year round, stands majestically. On the glacier, a camouflage team is striving forward-the officers and men of a company of the "Highland Border Guarding Model Battalion" of the Shigatse Military Sub-district in Tibet are on routine patrol.

The most dangerous patrol route has an altitude of more than 4,600 meters at the lowest point and more than 6,000 meters at the highest point. On this patrol route, cliffs are connected to ice walls, and gravel rolls down from time to time. Company commander Danzeng Qujue led the team to meet the challenge. After more than two hours of arduous trek, they arrived at the point on time and slowly unfolded the bright five-star red flag.

9 times of national and military commendations, 5 times of honorary titles, 5 first-class meritorious service, 47 second-class meritorious service... The honor room of the "Model Battalion for Plateau Border Defense" is filled with golden medals and a long list of honors. In 2021, officers and men of the battalion wrote to President Xi to report on the work of the battalion since it was awarded the honorary title of "Model Battalion for Plateau Border Defense", expressing their firm belief and determination to keep in mind President Xi's expectations and trust and to loyally defend the country and guard the border. President Xi wrote back to encourage officers and men: "I hope that comrades will strengthen their mission, carry forward fine traditions, strengthen training and preparation, faithfully perform their duties of defending the country and guarding the border, and strive to make new contributions to the Party and the people."

5318, 5371, 5592... The place where the battalion is stationed is full of snow-capped mountains with a high average altitude. Here, the oxygen content in the air is less than half of that in the mainland, the lowest temperature is -40℃, and there are more than 200 days of strong winds above level 8 every year. The border is difficult, but it can't stop the determination and steps of border

guards - defending the country and guarding the border has become the youthful choice of officers and men.

“Integrating the fiery youth into the mountains and rivers of the motherland, such a life is the most magnificent” “The snowy plateau has my poems and distant places”... This land is cold and lacks oxygen, but it grows loyalty and tenacity. The officers and men keep the instructions in mind, strive to take root downwards, grow towards the sun, and measure their regretless youth with fearless steps.

More than 10 years ago, Li Geng came to the camp as a soldier and never thought about “moving”. When performing observation tasks, he lay in the snow for several hours; when he went out for reconnaissance, he took the initiative to explore new routes. Li Geng eagerly learned border defense knowledge, familiarized himself with the border patrol environment, and practiced his skills. His notebook was full of special situation handling methods, and he became the “border expert” and “living map” of the camp. The experience in the wind and snow has made Li Geng, who has grown into an Political Instructor, firmly believe in one truth: a hard place, a dangerous place, is a good place to make achievements!

Li Geng is not an exception in his determination to take root in the border defense and make achievements on the plateau. In recent years, more than 30 officers and men of the battalion have voluntarily given up the opportunity to work in low-altitude areas, and 7 of them applied to return to the team after graduating from the military academy. Private Feng Yanhong returned to the old unit after enlisting for the second time and took the initiative to apply to guard the Chaguola outpost at an altitude of 5,318 meters; First Sergeant Ma Shisheng gave up the opportunity to transfer many times and stayed at the Takxun outpost for 12 years... “Guarding the border for the motherland is the mission of the soldiers and the supreme honor.” This is their common voice.

Where youth takes root, ideals bloom. Trekking in the snow-capped mountains all year round, they constantly draw strength to move forward, write stories of struggle, and create outstanding achievements.

At the 5592 observation post named after the altitude, Second Sergeant Xire Nima was the first soldier to take the initiative to apply for stationing. He takes hardship as his pride and takes action in it. He has participated in more than 500 patrols, with a total mileage of more than 8,000 kilometers. In 2020, he participated in the regiment-wide competition, won the first place in the armed five-kilometer cross-country race, broke the record of grenade throwing and precision shooting, and was commended by the Army as an “excellent non-commissioned officer model” and won the third-class individual merit twice.

On the patrol road covered with wind and snow, First Sergeant Wang Xiang bravely broke into the “life restricted zone” with a radio on his back. Every time new equipment is distributed, in order to find out its performance and give full play to its best efficiency, he always tests and collects

different equipment parameters in complex terrain environments such as mountain tops and wind outlets, and weaves a solid communication network for patrol and other tasks.

In the early stage of the new equipment, the gunner Lv Yuhan led the officers and men to break through one training bottleneck after another. When a new type of equipment was equipped in a unit, facing the difficulties of no textbooks, no experience, and no Political Instructors, Lv Yuhan circled around the equipment during the day and read books at night. In less than a year, he mastered the technical and tactical performance of this type of equipment, summarized a set of efficient operation procedures, and achieved first-shot hits in live-fire shooting assessments.

How to make new equipment more adaptable to the characteristics of the plateau and maximize combat effectiveness? Faced with new topics, Second Sergeant Yao Panfei took the initiative to tackle the problem, collect and update shooting data under different weather, temperature, wind and other conditions, and further improve the accuracy of artillery shooting in high-altitude areas.

“The western plateau is a fertile ground for success and a battlefield for charging!” With the continuous upgrading of border defense infrastructure construction and the continuous improvement of border defense conditions, the officers and men of the battalion are more enthusiastic about practicing the Gangba spirit and are more motivated to make contributions to the plateau border. The honor of the battalion constantly inspires them to face challenges and forge ahead!

第 83 集团军某旅某营：”战场校验区”帮官兵吃透教材

来源：解放军报 作者：谭海波 刘扬 责任编辑：杜圣智 2025-05-08

“战场校验区”帮官兵吃透教材

——第 83 集团军某旅某营开展 “专业理论对接实战”活动见闻

■谭海波 刘 扬

某连教练员正在结合专业理论开展实践教学。赵金攀摄

天还未亮，一场战备拉动在第 83 集团军某旅驻训场展开。接到命令，某连展连长带领官兵快速集合编组，一路苦练”走打吃住藏”，按时到达任务地域。

得到上级表扬认可，展连长和官兵们都很感慨，就在数月前，连队还因战备拉动中接连出现”特情处置不当”“车辆伪装失效”等问题，被上级点名批评。

那次拉动，连队前往集结地域途中，接连遭遇考核组下达的特情，二排指挥员虽严格按照标准，命令各车组缩减车距加速通过，却未想到利用附近遮蔽物及时规避”敌”侦察，最终被判任务失败；疏散地域进行伪装作业时，三排虽严格按大纲规定架设制式伪装网，但由于缺乏临机灵活性，致使车辆伪装与周边地貌契合度不高，反倒暴露了目标。

“为何战备专业理论考核全优，标准规定背得滚瓜烂熟，却在实战化训练中漏洞百出？”复盘会上，潘营长要求大家对此进行认真反思。剖析问题时，又有一些类似现象浮出水面。比如，个别带兵人把规定中的”定人定物”，机械理解为贴标签、划格子，等等。有些官兵认识有偏差，觉得只要按标准要求做了，出了问题也没责任。

“学习不能死记硬背、生搬硬套，必须紧贴实际灵活运用，在实战硝烟中接受检验！”随后，潘营长带领大家展开讨论，并就”装备更新速度加快，教材修订周期跟不上”“面对新情况，个别官兵仍习惯死记硬背，缺乏随机应变意识”等问题进行辩析反思。

“此前训练，我就吃过死记硬背的亏。”展连长率先发言：敌人不会按题库”出题”，战场上也没有标准答案！

对此，有官兵小声嘀咕：”标准规定也是从实战中总结而来的，总不能全盘否定吧。”

“理论与实践其实并不冲突，但要根据战场环境灵活运用。”潘营长用实弹射击举例：射击瞄准原理官兵必须掌握，但据枪姿势如何调整，却要与所处环境地形相适应；战备物资定位，遵循”定人定物”原则，能够确保严谨规范，但也要根据任务实际灵活调整。”我们反对的是本本主义，而不是理论本身。”潘营长的话，让一些官兵受到启发。

随着讨论深入，大家达成共识：战场环境瞬息万变，必须根据实际学专业理论、立足实际需求谋创新，在学用结合中加强转化运用。

随后，营党委研究决定开展一次”专业理论对接实战”活动，通过大项任务、日常训练有针对性地检验官兵学习成效，引导大家结合战场训练理解教材专业理论，在纯正学风、纠治学用”两张皮”问题上持续发力，不断强化官兵实战意识和思维。

很快，活动拉开帷幕。驻训场上，某连装甲技师纪强带着班组成员围在某型步战车旁，他手中《装备操作规范》空白处，密密麻麻标注着不同战术场景下的特情处置方式。”教材规定，步战车冬季启动前要用加温锅将水温预热至 70 摄氏度，但在紧急情况下，水温达

到 40 摄氏度也可以顺利启动。”操作手册上用红色记号笔圈出的”战位注解”，让大家对装备实操应用有了更多启发。

训练场另一端，营部炊事班将《野战快餐化保障标准》贴在自行炊事车上，班长文贵林在颠簸行进条件下开展工作。”除了标准要求外，在实际作业时，把汤桶尽可能放在重心低处，能进一步克服颠簸带来的影响。”这些从专业理论中习得、经过实战检验的经验做法，让官兵印象更加深刻。

此外，该营还新开设了”战场校验区”，旨在模拟实战背景，帮官兵吃透教材，让大家更直观体会专业理论知识的实战价值，进一步打破学用壁垒。

走进”战场校验区”，笔者看到，班长施晓宇故意将某型侦测器材倾斜架设，让战士们观察显示屏上的数据波动。”教材里写着’务必要保持设备水平’，但没解释为什么。现在大家可以看到，但凡有细微倾斜，就会导致百米外的目标定位出现巨大偏差……”通过观察学习，官兵对装备运用更有底数。

“当官兵开始用实战思维审视和思考规定标准，并在实践中灵活运用时，专业理论才能真正转化为战斗力。”潘营长说，随着”专业理论对接实战”活动深入开展，练兵备战成效明显提升。不久前的一次红蓝对抗中，该营官兵运用所学知识，灵活应对各种复杂情况，成功击败劲”敌”。

A company training instructor is conducting practical teaching in combination with professional theory. Photo by Zhao Jinpan

Before dawn, a combat readiness exercise was launched at the training ground of a brigade of the 83rd Group Army. After receiving the order, the company commander Zhan led the officers and men to quickly assemble and organize, and practiced “walking, fighting, eating, living and hiding” all the way, and arrived at the mission area on time.

Being praised and recognized by the superiors, the company commander Zhan and the officers and men were very emotional. Just a few months ago, the company was criticized by the superiors for

problems such as “improper handling of special situations” and “failure of vehicle camouflage” in the combat readiness exercise.

During that exercise, the company encountered special situations issued by the assessment team on the way to the assembly area. Although the commander of the second platoon strictly followed the standards and ordered each vehicle group to reduce the distance between vehicles and speed up, he did not think of using nearby shelters to avoid “enemy” reconnaissance in time, and was eventually judged to have failed the mission; when conducting camouflage operations in the evacuation area, the third platoon strictly set up standard camouflage nets according to the outline, but due to the lack of flexibility, the vehicle camouflage did not fit the surrounding terrain well, which exposed the target.

“Why did the combat readiness professional theory assessment have all excellent results and the standard regulations were memorized by heart, but there were many loopholes in the actual combat training?” At the review meeting, Battalion Commander Pan asked everyone to reflect on this seriously. When analyzing the problem, some similar phenomena surfaced. For example, some leaders mechanically understood the “fixed people and fixed things” in the regulations as labeling, marking grids, etc. Some officers and men have a deviation in their understanding and think that as long as they do it according to the standard requirements, they will not be responsible if there is a problem.

“Learning cannot be rote learning or mechanical application. It must be applied flexibly in accordance with reality and tested in the smoke of actual combat!” Then, Battalion Commander Pan led everyone to discuss and analyze and reflect on issues such as “the equipment update speed is accelerated, and the textbook revision cycle cannot keep up” and “in the face of new situations, some officers and men are still accustomed to rote learning and lack the awareness of adaptability.” “I have suffered from rote learning in previous training.” Company Commander Zhan took the lead in speaking: The enemy will not “set questions” according to the question bank, and there are no standard answers on the battlefield! In response, some officers and men whispered: “The standard regulations are also summarized from actual combat, and they can’t be completely denied.” “Theory and practice are not in conflict, but they must be used flexibly according to the battlefield environment.” Battalion Commander Pan used live ammunition shooting as an example: officers and men must master the principles of shooting aiming, but how to adjust the gun posture must be adapted to the environment and terrain; the positioning of combat readiness materials follows the principle of “fixing people and things”, which can ensure strict standards, but also needs to be flexibly adjusted according to the actual task. “What we oppose is book worship, not the theory itself.” The words of Battalion Commander Pan inspired some officers and men.

As the discussion deepened, everyone reached a consensus: the battlefield environment is changing rapidly, and it is necessary to learn professional theories based on reality, seek innovation based on actual needs, and strengthen transformation and application in the combination of learning and application.

Subsequently, the battalion party committee decided to carry out a “professional theory docking actual combat” activity, through major tasks and daily training to test the learning results of officers and men in a targeted manner, guide everyone to understand the professional theories of textbooks in combination with battlefield training, continue to work hard on the pure learning style and correct the problem of “two skins” in learning and application, and continuously strengthen the actual combat awareness and thinking of officers and men.

Soon, the activity kicked off. At the training ground, Ji Qiang, an armored technician of a certain company, led his team members to gather around a certain type of infantry fighting vehicle. In the blank space of the “Equipment Operation Specifications” in his hand, there were densely marked special situation handling methods in different tactical scenarios. “The textbook stipulates that the water temperature of the infantry fighting vehicle should be preheated to 70 degrees Celsius with a heating pot before starting in winter, but in an emergency, the water temperature can reach 40 degrees Celsius and it can start smoothly.” The “battle position annotation” circled with a red marker in the operation manual gave everyone more inspiration for the practical application of equipment.

At the other end of the training ground, the battalion’s cooking squad posted the “Field Fast Food Support Standard” on the self-propelled cooking vehicle, and the squad leader Wen Guilin conducted work under bumpy conditions. “In addition to the standard requirements, in actual operations, placing the soup bucket as low as possible at the center of gravity can further overcome the impact of bumps.” These experiences and practices learned from professional theories and tested in actual combat have left a deeper impression on officers and men.

In addition, the battalion has also opened a new “battlefield verification area” to simulate the actual combat background, help officers and men thoroughly understand the textbooks, let everyone more intuitively experience the practical value of professional theoretical knowledge, and further break down the barriers to learning and application.

Walking into the “battlefield verification area”, the author saw that squad leader Shi Xiaoyu deliberately tilted a certain type of detection equipment to let the soldiers observe the data fluctuations on the display screen. “The textbook says ‘it is necessary to keep the equipment level’, but it does not explain why. Now you can see that any slight tilt will cause a huge deviation in the positioning of the target 100 meters away...” Through observation and learning, officers and men have a better understanding of the use of equipment.

“When officers and men begin to examine and think about the prescribed standards with practical thinking and apply them flexibly in practice, professional theories can truly be transformed into combat effectiveness.” Battalion Commander Pan said that with the in-depth development of the “professional theory docking actual combat” activity, the effectiveness of training and preparation has been significantly improved. In a recent red-blue confrontation, the officers and men of the battalion used the knowledge they learned to flexibly respond to various complex situations and successfully defeated the strong “enemy”.

军营观察 “教练员之家”走来新时代“郭兴福”

来源：中国军网-解放军报 作者：冯佳琦 杨茂生 童祖静 责任编辑：郭妍菲 发布：2025-05-07

1961 年，一位将军蹲点到连，问了负责训练的副连长郭兴福 3 个问题：一、在深山密林里，刮着狂风，下着暴雨，既没有地图，又没有指北针和向导，你们连能不能夜行百里？二、在各种距离上，在表尺规定的射程内，不论出现什么目标，你们连的战士能不能一举枪就把敌人消灭掉？三、在两百米以内，在猛烈的敌火下，你们连的战士，能不能勇猛地冲上去，用刺刀、枪托消灭敌人？

这三问，让郭兴福更加清醒地认识到训练的问题所在。在上级帮助下，郭兴福结合积累的打仗经验刻苦钻研，逐渐摸索出”围绕打仗、把兵练活”的教学训练方法。

如今，作战样式和战争制胜机理不断变化，对部队打赢能力提出新的更高要求，部队教练员群体也应该像当年的郭兴福一样自省思考：教学观念和思维能否与时俱进？教学模式的探索创新是否深入？新型教学手段有没有全面掌握？

面对从思维理念到教学实践等方方面面的挑战，陆军某旅不断探索锻造优秀教练员群体的方法和路径。依托”教练员之家”，该旅帮助今天的”郭兴福”顺应新时代练兵备战形势，加速提升教学组训质效。解析该旅的具体做法，或许能为其他单位在教练员培养的探索上提供思路和启发。

“教练员之家”走来新时代”郭兴福”

■冯佳琦 杨茂生 解放军报特约记者 童祖静

新形势新挑战呼唤新时代”郭兴福”

作为陆军某旅某连桥梁专业教练员，二级上士郭瀚元承担着有关重型机械化桥操作与使用的教学任务。凭借着多年积累的经验，郭瀚元在架桥教学上得心应手，曾被评为集团军优秀”四会”教练员。

谁也没想到，这位优秀的教练员，去年在教学中碰到了难题。《陆军军事训练大纲》中增加了某项训练内容后，他突然感到有些力不从心：”新的操作要求危险系数较高，是之前从没练习过的。这意味着一名战士要熟练两套操作流程，并能保证随时响应命令切换动作，难度非常大。”

凭借着自己的理解，郭瀚元设计了新的人员分工方案，却遭到大家的质疑：”郭班长，你安排的这套动作流程实操起来非常困难，感觉并不合理。”

教学现场，不少人因为记混了动作而有些手忙脚乱，训练效果并不理想。对此，郭瀚元在苦恼的同时也感到十分困惑：”以前的操作方式快速便捷，并且能在短时间内完成任务。在新的训练内容上花费大量时间和精力，可效益究竟如何？”

二级上士徐晓杰也遇到了类似的困境。

去年初，排爆机器人在某连列装，徐晓杰被上级任命为教练员。新装备虽然科技含量高、操作难度大，但大家都觉得新奇，钻研学习的劲头很足。不久后，他们迎来了一场实兵演习。

任务一直持续到了夜间。”侦察发现遗留未爆弹！”由于现场环境复杂，指挥员未采用人工排爆方式，而是命令排爆分队迅速操作排爆机器人前出处理特情。徐晓杰一时慌了神：”夜间排爆由于视野范围有限，难度要远远高于日间排爆，十分考验操作手的技能水平。”

当时，操作排爆机器人作业并未列入《陆军军事训练大纲》。一直按照惯性节奏施训的徐晓杰并没有特意训练队员的夜间操作能力，此次演习中，分队未能在规定时限内完成任务。

一场失利浇灭了队员们的热情，大家的训练积极性大不如前。遇到教学瓶颈的徐晓杰开始反思：”究竟是什么原因导致自己未能穷尽新型装备的使用场景？此前的教学思路是否需要改善？”

陆军某旅教练员讲解排爆机器人相关性能。潘光波 摄

“不得不承认，面对新装备、新专业、新内容带来的新要求，绝大多数教练员是在’摸着石头过河’。”该旅参谋部一名作训参谋坦言，许多在以往的教学组训中大展拳脚的教练员们，面临着老方法与新形势无法”合拍”的挑战。

该旅兄弟单位为”郭兴福教学法”发源地，多年来持续摸索教学实践新形式新方法。通过与兄弟单位交流探讨，该旅不断学习思考如何深入挖掘”郭兴福教学法”的时代内涵，如何进一步培育和锻造出与时代同行的新型”郭兴福”。

教练员队伍是否过硬，关乎各类专业课目的训练成果和战斗力建设质效。”单靠教练员个人的研究摸索，抑或上级提供一些临时性解决方案，无法从根本上解决问题。”该旅领导认为，”‘头疼医头、脚疼医脚’是不行的，破除困境的答案是走开体系化培养的路子。”

去年，该旅着手在各营建立”教练员之家”。各营同一专业的教练员在”教练员之家”讨论交流，完成集中备课，形成教学方案。各营连主官与专业骨干担任”教练员之家”的”教练”，对教案中的课程设计、操作流程等内容进行研讨分析，指出改进方向，并为一些值得拓展的教学方案协调资源和技术支持，帮助今天的”郭兴福”实现教学思维和教学方式的转型升级。

“头脑风暴”带来教学思维升级

在某营”教练员之家”，记者看到，郭瀚元与几名同专业的教练员正在针对某重难点课目进行集中备课。在与其他教练员的交流中，郭瀚元感到自己固有的思维受到了冲击。

针对郭瀚元此前碰到的教学难题，一名教练员提出了自己的看法：”新大纲增加的训练内容虽然难度系数高、耗费时间长，但新的操作流程与整体作战行动融合更好，这是一体设计的结果，实质上为作战提供了更多时间窗口。”

“的确如此，从战场逻辑的角度重新思考，许多问题便迎刃而解了。之前我的理解太浅显，操作流程自然设计得不够合理。”沟通中，郭瀚元意识到自己思维的局限。

通过深入交流，几名教练员针对新的训练内容共同设计了教学方案。为了让大家在训练中不受天气变化干扰，郭瀚元提出在教学中增加”盲操”等训练内容。

无独有偶。徐晓杰也在与同专业的教练员交流中迈开了加速学习的步子。越交流，徐晓杰越感到一种深深的本领恐慌：”新的排爆装备虽然不好’啃’，但一些教练员已经储备了大量知识和信息。相比之下，我的知识储备远远不够，教学方案明显过于单一。”

一位营长道出了集中备课环节的重要作用：”各个教练员在这里进行观念的碰撞，完成了教学方案的统一，更关键的是实现了群体智慧的聚集和教学思维的升级。”

思维的进阶没有止境。帮助教练员实现观念升级，集中备课环节只是第一步。教学方案出炉后，”教练员之家”的”教练”们还要对其进行研讨分析，进一步审视校正教练员的教学思维。

针对卫生专业某课目通过设置烟雾弹来模拟战场环境的惯性操作，一名连长在研讨中提出：”在你们所构设的战场环境中，即使遭到炮弹打击，大概率也不会出现烟雾弥漫的情况。”

“说实话，过于追求训练中的场景感是我们的一种通病，这看似与’战’贴得很紧，实则背道而驰。”卫生专业教练员、二级上士唐静说。此后，几名卫生专业教练员聚焦实战情况进一步完善了教学方案。

一场研讨分析会中，某营葛营长认为筑城专业某课目的教学方案有些”保守”，他鼓励各教练员在教学中积极探索装备性能边界，并分享了自己在训练中带领官兵将武器用到极致的故事。这让筑城专业教练员唐连长突然意识到自己多年来强调的”操作零失误”，反而让官兵们在使用和研究装备时变得谨小慎微。

此后，唐连长开始重新审视自己的训练模式，带领大家主动跨越舒适区：”实现人装合一，就是要把人的操作技能练到极限，把装备的作战性能用到极限。”在一场指挥所开设的连贯作业中，唐连长在恶劣环境下带领官兵提前完成任务，作业效率相较以往明显提升。

“我们发现，教练员的头脑中还存在与新时代练兵备战形势不相符的思维习惯，教学过程中容易产生对武器装备钻研不深、对训练要求理解不到位、教学方法不能与时俱进等问题。为了打赢明天的战争，今天的教练员必须不断升级教学观念。”葛营长说，”所有的教学目标都必须指向胜战。研讨分析教学方案的过程，也是帮助教练员培塑实战思维、准确把握教学重心的过程。”

与此同时，”教练员之家”还定期组织教练员进行前沿业务专题的研究和分享，让大家持续解读和剖析有关现代化战争的制胜机理，深刻认识新型作战力量，建立体系作战理念，以更宽的视野、更大的格局考量战场态势。

在一场场”头脑风暴”中，越来越多的教练员开始挣脱思维惯性，走出视野盲区，走向明天战场。

整合资源为创意火花赋能

思维不会自动转化为战斗力。该旅领导认为，除了清除一些教练员头脑中的沉疴，”教练员之家”还需要抓住教练员在教学训练中产生的创意火花。

依托”教练员之家”，该旅定期收集各营连教练员的想法或需求，帮助一些教练员将前沿思路真正落地为教学实践。

上等兵李大征是某连无人机专业教练员，他希望能将数字化模式引入自己的教学过程，解决现地教学场景单一的问题：”现在，我们的模拟训练仅限于较为基础的飞行动作，如果能够利用大数据、增强现实等技术增设模拟场景和实操动作，或许能帮助大家加速完成能力进阶。”

李大征的想法，受到了”教练员之家”的关注。需求上报后，旅队派他前往相关厂家和单位调研学习，并多次指导他进行有关构想和方案的效费比论证。如今，深入开展无人机专业数字化教学的想法正在一步步变为现实。

道路专业教练员熊连长一直有升级模拟操作装备的想法：”现在的设备只能实现单兵操作，如果能将整个模拟训练中心的各类设备联通，大家就可以实现协同训练。”

熊连长向”教练员之家”提报了自己的想法。很快，旅队协调相关厂家前来调研。沟通中，厂家根据熊连长的描述增设了更多贴近实战的作业场景。”教学方式要一直与时俱进。”下一步，熊连长希望联通其他营部的模拟设备，实现更大编组范围内的联网组训。

官兵进行舟桥专业模拟训练。潘光波 摄

该旅教导队一名教员说：”我们还会与一些院校或其他军兵种单位合作，定期选派教练员前去学习交流。当教练员的内生动力被进一步调动，教学实践也能得到深化拓展。”

除此之外，借助上级的大数据资源，该旅各个”教练员之家”还建立了”教学资源库”，涵盖录像、课件、教案、试题等内容，为教练员的教学实践提供支撑。

“教练员之家”成立以来，该旅新型”郭兴福”接连涌现，一幅幅崭新的练兵图景跃入眼帘——

汽艇驾驶专业教练员、二级上士张吉王与厂家沟通合作，不断改良某新型驾驶模拟器，官兵戴上 VR 头盔便能立刻投入沉浸式训练。

伪装专业教练员、一级军士长孙波联合院校专家研发出某新型装备涂料攻克训练难题，创新成果获得国家实用新型专利。

侦察专业教练员王参谋创新组训模式，通过融合 10 余种战场信息系统，实现”数据驱动决策、系统赋能指挥”的转型突破……

锻造新时代教练员队伍刻不容缓

■汤 超

当前，战争形态加速演变，科技之变、战争之变、对手之变推动军事训练向更高层次跃升，锻造一支过硬的新时代教练员队伍是一项紧迫的任务。针对教练员群体与新时代练兵备战未能完全”合拍”导致教学组训质量效益不高等问题，陆军某旅建立”教练员之家”，多维度培养新时代”郭兴福”的做法，为各级锻造高素质、专业化的教练员队伍提供了借鉴。

教练员队伍如果固守传统教学模式，像从前那样仅凭着”熟能生巧”学习基础操作，或者靠着传统思维在体系作战中单打独斗，必然在未来战场上吃亏。俗话说，名师出高徒。教练员在军事训练中担负着教学、组训、示范等重要任务，在新时代战斗力建设的坐标系中处于重要位置，很多时候，他们的水平直接影响着一个课目甚至一个专业的训练水平。只有培养和锻造更多新时代的”郭兴福”，打造一支与新型军事训练体系相匹配的教练员方阵，才能全面提高部队的训练水平和打赢能力。

有学者说过：”无论是谁，一旦戴上思维定式的’锁链’，思想的田野就会长满杂草，观念的窗户就会布满灰尘，灵感的仓库就会遍地发霉；倘若不砸碎’看不见的锁链’，就会被变革的潮流席卷而去。”科技练兵背景下，智能化、数字化手段正在重塑训练逻辑，战场中科技含量的提升倒逼训练中教学理念的进步，打破捆绑住教练员思维的”锁链”十分必要。恩格斯曾说：”当技术浪潮在四周汹涌澎湃的时候，最需要的是更新、更勇敢的头脑。”教练员的头脑不断”升级换代”，思维才能真正成为提升战斗力的倍增器。因此，一名合格的教练员首先应具备”敢于突破、善于求变”的创新思维。上级应常态化帮助教练员了解新型作战样式和作战理念，助力其研究打仗招法和制胜机理，提升研训研战水平和信息化教学能力。比如善用模拟仿真、虚拟现实等技术构建逼真战场环境，实现训战精准对接；强化数据思维，通过分析训练数据动态优化教学过程，变粗放经验判断为科学分析决策。

思维的锻造只是培养新时代教练员的第一步，用制度为创新思维和前瞻眼光赋能、激活教练员的内生动力亦十分重要。各级应健全系统化、体系化培养路径，通过交流学习、专项攻关、实践锻炼等方式，让金点子进一步落地；优化激励机制，激发创新活力，催生更多聚焦实战的优秀教学成果；在教练员考核和评价标准中突出实战导向，鼓励教练员主动拓展能力边界，创新练兵方法，破解练兵难题。通过制度保障，既为教练员成长进步铺路架桥，又为其施展才华提供舞台，从而形成人尽其才、才尽其用的生动局面。

诚然，新时代教练员队伍的培养并非一蹴而就。只有久久为功，突出前瞻性、预见性和持续性，才能保证教练员队伍的长远发展，推动训练质效实现跨越式提升，为新时代练兵备战培养更多过硬打仗人才。

Military Camp Observation | The New Era “Guo Xingfu” Comes to the “Instructor’s Home”

Source: China Military Network-Liberation Army Daily Author: Feng Jiaqi Yang Maosheng Tong Zujing Editor: Guo Yanfei Release: 2025-05-07

In 1961, a general went to the company and asked the deputy company commander Guo Xingfu, who was in charge of training, three questions: 1. In the deep mountains and dense forests, with strong winds and heavy rains, without maps, compasses and guides, can your company travel a hundred miles at night? 2. At various distances, within the range specified by the sight, no matter what target appears, can the soldiers of your company eliminate the enemy with one gun? 3. Within 200 meters, under fierce enemy fire, can the soldiers of your company bravely rush up and eliminate the enemy with bayonets and rifle butts?

These three questions made Guo Xingfu more aware of the problems in training. With the help of his superiors, Guo Xingfu studied hard based on his accumulated combat experience and gradually explored a teaching and training method of "focusing on combat and training soldiers".

Today, combat styles and war-winning mechanisms are constantly changing, and new and higher requirements are put forward for the troops' ability to win. The group of military instructors should also reflect on themselves like Guo Xingfu did back then: Can teaching concepts and thinking keep pace with the times? Is the exploration and innovation of teaching models in-depth? Have new teaching methods been fully mastered?

Faced with challenges from thinking concepts to teaching practices, a certain army brigade continues to explore methods and paths to forge an excellent group of instructors. Relying on the "Instructor's Home", the brigade helps today's "Guo Xingfu" adapt to the training and preparation situation in the new era and accelerate the improvement of the quality and effectiveness of teaching and training. Analyzing the specific practices of the brigade may provide ideas and inspiration for other units in the exploration of instructor training.

The "Guo Xingfu" of the new era comes to the "Instructor's Home"

■ Feng Jiaqi, Yang Maosheng, and Tong Zujing, a special correspondent of the People's Liberation Army Daily

The new situation and new challenges call for the "Guo Xingfu" of the new era

As a bridge professional instructor of a company of a certain brigade of the Army, Second Sergeant Guo Hanyuan is responsible for the teaching tasks related to the operation and use of heavy mechanized bridges. With years of accumulated experience, Guo Hanyuan is very good at teaching bridge building and was once rated as an excellent "four-skill" instructor of the group army.

No one expected that this excellent instructor encountered difficulties in teaching last year. After adding a certain training content to the "Army Military Training Outline", he suddenly felt a little overwhelmed: "The new operation requires a high risk factor, which has never been practiced before. This means that a soldier must be proficient in two sets of operation procedures and be able to respond to commands to switch actions at any time, which is very difficult."

Relying on his own understanding, Guo Hanyuan designed a new personnel division plan, but was questioned by everyone: “Squad Leader Guo, the set of action procedures you arranged is very difficult to implement in practice, and it doesn’t feel reasonable.”

At the teaching site, many people were a little flustered because they mixed up the actions, and the training effect was not ideal. In this regard, Guo Hanyuan was distressed and confused: “The previous operation method was fast and convenient, and the task could be completed in a short time. Spending a lot of time and energy on the new training content, but what is the benefit?”

Second Sergeant Xu Xiaojie also encountered a similar dilemma.

At the beginning of last year, the bomb disposal robot was equipped in a certain company, and Xu Xiaojie was appointed as an instructor by his superiors. Although the new equipment has high technological content and high difficulty in operation, everyone feels novel and is very motivated to study and learn. Soon after, they ushered in a live-fire exercise.

The mission lasted until the night. “Reconnaissance found unexploded bombs left behind!” Due to the complex on-site environment, the commander did not use manual bomb disposal, but ordered the bomb disposal team to quickly operate the bomb disposal robot to deal with the special situation. Xu Xiaojie panicked for a moment: “Due to the limited field of vision, the difficulty of nighttime bomb disposal is much higher than that of daytime bomb disposal, which is a great test of the operator’s skill level.”

At that time, the operation of bomb disposal robots was not included in the “Army Military Training Outline”. Xu Xiaojie, who had been training at an inertial rhythm, did not specifically train the team members’ night operation capabilities. In this exercise, the team failed to complete the task within the specified time limit.

A failure dampened the enthusiasm of the team members, and everyone’s training enthusiasm was much lower than before. Xu Xiaojie, who encountered a bottleneck in teaching, began to reflect: “What exactly caused me to fail to exhaust the use scenarios of new equipment? Do previous teaching ideas need to be improved?”

An instructor from an army brigade explained the performance of bomb disposal robots. Photo by Pan Guangbo

“We have to admit that in the face of new requirements brought by new equipment, new professions and new content, most instructors are ‘crossing the river by feeling the stones’.” A training staff officer of the brigade’s staff department admitted that many instructors who had made great achievements in previous teaching and training were facing the challenge of the old methods not being able to “match” with the new situation.

The brother unit of the brigade is the birthplace of the “Guo Xingfu teaching method” and has been exploring new forms and methods of teaching practice for many years. Through exchanges and discussions with brother units, the brigade continues to learn and think about how to deeply explore

the contemporary connotation of the “Guo Xingfu teaching method” and how to further cultivate and forge a new type of “Guo Xingfu” that keeps pace with the times.

Whether the instructor team is strong or not is related to the training results of various professional courses and the quality and effectiveness of combat effectiveness construction. “Relying solely on the individual research and exploration of instructors, or some temporary solutions provided by superiors, cannot fundamentally solve the problem.” The leaders of the brigade believe that “‘treating the head when the headache hurts and the foot when the foot hurts’ will not work. The answer to breaking the dilemma is to take the path of systematic training.”

Last year, the brigade set out to establish “instructor homes” in each battalion. Instructors of the same profession in each battalion discussed and exchanged ideas in the “instructor home”, completed centralized lesson preparation, and formed a teaching plan. The company commanders and professional backbones of each battalion served as “instructors” in the “instructor home”, discussed and analyzed the course design, operation process and other contents in the teaching plan, pointed out the direction of improvement, and coordinated resources and technical support for some teaching plans worth expanding, helping today’s “Guo Xingfu” to achieve the transformation and upgrading of teaching thinking and teaching methods.

“Brainstorming” brings about an upgrade of teaching thinking

In a battalion’s “instructor home”, the reporter saw that Guo Hanyuan and several instructors of the same profession were preparing lessons for a certain difficult and important subject. In the communication with other instructors, Guo Hanyuan felt that his inherent thinking was impacted.

In response to the teaching difficulties Guo Hanyuan encountered before, an instructor put forward his own opinion: “Although the training content added in the new syllabus is difficult and time-consuming, the new operation process is better integrated with the overall combat operations. This is the result of an integrated design, which actually provides more time windows for combat.” “Indeed, many problems can be solved by rethinking from the perspective of battlefield logic. My previous understanding was too superficial, and the operation process was naturally not designed reasonably enough.” During the communication, Guo Hanyuan realized the limitations of his thinking. Through in-depth exchanges, several instructors jointly designed teaching plans for the new training content. In order to prevent everyone from being disturbed by weather changes during training, Guo Hanyuan proposed to add training content such as “blind operation” in teaching. Coincidentally, Xu Xiaojie also took the step of accelerating learning in exchanges with instructors of the same profession. The more they communicated, the more Xu Xiaojie felt a deep fear of lack of skills: “Although the new bomb disposal equipment is not easy to ‘chew’, some instructors have already accumulated a lot of knowledge and information. In comparison, my knowledge reserve is far from enough, and the teaching plan is obviously too simple.”

A battalion commander pointed out the important role of the centralized lesson preparation link: “The instructors have a collision of ideas here, which completes the unification of the teaching

plan, and more importantly, it realizes the gathering of group wisdom and the upgrading of teaching thinking."

There is no end to the advancement of thinking. To help instructors upgrade their concepts, the centralized lesson preparation link is only the first step. After the teaching plan is released, the "instructors" of the "Instructor Home" will also discuss and analyze it to further examine and correct the instructors' teaching thinking.

Regarding the inertial operation of setting up smoke bombs to simulate the battlefield environment in a certain subject of the health profession, a company commander proposed in the seminar: "In the battlefield environment you have constructed, even if you are hit by artillery shells, there is a high probability that there will be no smoke." "To be honest, it is a common problem for us to pursue the sense of scene in training too much. This seems to be very close to "war", but it actually runs counter to it." said Tang Jing, a second-class sergeant and a health professional instructor. After that, several health professional instructors focused on actual combat situations to further improve the teaching plan. In a seminar and analysis meeting, Battalion Commander Ge of a certain battalion believed that the teaching plan of a certain subject of the city construction major was a bit "conservative". He encouraged all instructors to actively explore the performance boundaries of equipment in teaching, and shared his story of leading officers and men to use weapons to the extreme in training. This made Company Commander Tang, a city construction professional instructor, suddenly realize that the "zero error in operation" that he had emphasized for many years made officers and men cautious when using and studying equipment. After that, Captain Tang began to re-examine his training mode and led everyone to actively cross the comfort zone: "To achieve the unity of man and equipment, we must practice people's operating skills to the limit and use the combat performance of equipment to the limit." In a continuous operation set up by the command post, Captain Tang led officers and men to complete the task ahead of schedule in a harsh environment, and the operation efficiency was significantly improved compared with the past.

"We found that the instructors still have thinking habits that are inconsistent with the training and preparation situation in the new era. In the teaching process, it is easy to have problems such as not studying weapons and equipment deeply, not understanding training requirements in place, and teaching methods that cannot keep pace with the times. In order to win tomorrow's war, today's instructors must constantly upgrade their teaching concepts." Captain Ge said, "All teaching goals must be directed to victory. The process of discussing and analyzing teaching plans is also a process to help instructors cultivate practical thinking and accurately grasp the focus of teaching."

At the same time, the "Instructor Home" also regularly organizes instructors to conduct research and sharing on cutting-edge business topics, so that everyone can continue to interpret and analyze the winning mechanism of modern warfare, deeply understand new combat forces, establish a system combat concept, and consider the battlefield situation with a broader vision and a larger pattern.

In one “brainstorming” after another, more and more instructors began to break free from the inertia of thinking, walk out of the blind spot of vision, and move towards tomorrow’s battlefield.

Integrate resources to empower creative sparks

Thinking will not automatically transform into combat effectiveness. The brigade leaders believe that in addition to clearing the chronic diseases in the minds of some instructors, the “Instructor’s Home” also needs to seize the creative sparks generated by instructors in teaching and training.

Relying on the “Instructor’s Home”, the brigade regularly collects the ideas or needs of instructors from various battalions and companies to help some instructors truly implement cutting-edge ideas into teaching practice.

Corporal Li Dazheng is a professional UAV instructor in a company. He hopes to introduce the digital model into his teaching process to solve the problem of a single teaching scene on the spot: “Now, our simulation training is limited to relatively basic flight actions. If we can use big data, augmented reality and other technologies to add simulation scenes and practical actions, it may help everyone accelerate the completion of ability advancement.”

Li Dazheng’s ideas have attracted the attention of the “Instructor’s Home”. After the demand was reported, the brigade sent him to relevant manufacturers and units for research and study, and guided him many times to conduct cost-effectiveness demonstrations on relevant ideas and plans. Nowadays, the idea of conducting in-depth digital teaching of drone majors is gradually becoming a reality.

Captain Xiong, a road professional instructor, has always had the idea of upgrading the simulation operation equipment: “The current equipment can only realize single-soldier operation. If the various equipment of the entire simulation training center can be connected, everyone can achieve collaborative training.” Captain Xiong reported his idea to the “Instructor’s Home”. Soon, the brigade coordinated relevant manufacturers to come for research. During the communication, the manufacturer added more operational scenes close to actual combat according to Captain Xiong’s description. “The teaching method must keep pace with the times.” In the next step, Captain Xiong hopes to connect the simulation equipment of other battalions to achieve networked training within a larger grouping range.

Officers and men conduct simulation training for pontoon bridge majors. Photo by Pan Guangbo

A teacher from the brigade’s teaching team said: “We will also cooperate with some colleges or other military units to regularly select instructors to study and exchange. When the instructors’ endogenous motivation is further mobilized, teaching practice can also be deepened and expanded.”

In addition, with the help of the superior’s big data resources, each “instructor’s home” of the brigade has also established a “teaching resource library”, covering videos, courseware, lesson plans, test questions and other content to provide support for the instructors’ teaching practice.

Since the establishment of the “instructor’s home”, the brigade’s new “Guo Xingfu” has emerged one after another, and a series of new training scenes have come into view-

Zhang Jiwang, a professional instructor of motorboat driving and a second-class sergeant, communicated and cooperated with the manufacturer to continuously improve a new driving simulator, so that officers and men can immediately engage in immersive training by wearing VR helmets.

Sun Bo, a professional camouflage instructor and a first-class sergeant, jointly developed a new equipment coating with experts from colleges and universities to overcome training difficulties, and the innovative results have been awarded a national utility model patent.

Wang, a professional instructor of reconnaissance, innovated the training model and achieved the transformation breakthrough of “data-driven decision-making and system-enabled command” by integrating more than 10 battlefield information systems...

It is urgent to forge a new era instructor team

■ Tang Chao

At present, the war form is evolving rapidly. Changes in technology, war, and opponents have promoted military training to a higher level. It is an urgent task to forge a strong new era instructor team. In response to the problems that the instructor group and the new era training and preparation have not been fully “in sync”, resulting in low quality and efficiency of teaching and training, a certain army brigade established a “instructor home” and cultivated the new era “Guo Xingfu” in multiple dimensions, which provided a reference for forging high-quality and professional instructor teams at all levels.

If the instructor team sticks to the traditional teaching model, and learns basic operations only by “practice makes perfect” as before, or fights alone in system operations with traditional thinking, it will inevitably suffer on the battlefield in the future. As the saying goes, a good teacher produces good students. In military training, instructors are responsible for important tasks such as teaching, organizing training, and demonstrating. They occupy an important position in the coordinate system of combat effectiveness construction in the new era. In many cases, their level directly affects the training level of a subject or even a profession. Only by cultivating and forging more “Guo Xingfu” in the new era and building a phalanx of instructors that match the new military training system can the training level and winning ability of the troops be comprehensively improved.

A scholar once said: “No matter who you are, once you wear the ‘chains’ of a fixed mindset, the field of thought will be overgrown with weeds, the windows of concepts will be covered with dust, and the warehouse of inspiration will be moldy; if you don’t break the ‘invisible chains’, you will be swept away by the tide of change.” Under the background of scientific and technological training, intelligent and digital means are reshaping the logic of training. The improvement of

scientific and technological content in the battlefield has forced the advancement of teaching concepts in training. It is very necessary to break the "chains" that bind the instructors' thinking. Engels once said: "When the technological wave is surging all around, what is most needed is a newer and braver mind." The instructors' minds are constantly "upgraded" so that thinking can truly become a multiplier for improving combat effectiveness. Therefore, a qualified instructor should first have an innovative mindset of "daring to break through and being good at seeking change." Superiors should routinely help instructors understand new combat styles and concepts, help them study combat tactics and winning mechanisms, and improve their research, training, and combat levels and information-based teaching capabilities. For example, make good use of simulation, virtual reality and other technologies to build a realistic battlefield environment and achieve precise docking of training and combat; strengthen data thinking and dynamically optimize through analysis of training data.

The forging of thinking is only the first step in cultivating instructors in the new era. It is also very important to use the system to empower innovative thinking and forward-looking vision and activate the endogenous motivation of instructors. All levels should improve the systematic and systematic training path, and further implement the golden ideas through communication and learning, special research, practical training and other methods; optimize the incentive mechanism, stimulate innovation vitality, and give birth to more excellent teaching results focusing on actual combat; highlight the actual combat orientation in the instructor assessment and evaluation standards, and encourage instructors to actively expand the boundaries of their capabilities, innovate training methods, and solve the training problems. Through institutional guarantees, it not only paves the way for the growth and progress of instructors, but also provides a stage for them to display their talents, thus forming a vivid situation where people can make the best use of their talents.

Indeed, the training of the instructor team in the new era is not achieved overnight. Only by working hard for a long time and highlighting foresight, predictability and sustainability can we ensure the long-term development of the instructor team, promote the leapfrog improvement of training quality and efficiency, and cultivate more strong fighting talents for training and preparation in the new era.

"舒心小屋"让官兵展笑颜，静心之所成了不可或缺的存在

来源：解放军报 作者：王选利 刘欣雨 责任编辑：郭妍菲 2025-05-09

新疆军区某边防团某连为官兵搭建设施助力心理服务——

"舒心小屋"：给你一个好心情

■王选利 刘欣雨

推荐理由

工作训练生活紧张而忙碌，是基层官兵的常态。不过，身处集体之中，总会有那么一个时刻，想要拥有一个安静的空间，盛放那些不想外露的情绪，或者不被打扰地独处一会儿。新疆军区某边防团某连紧贴官兵需求，在宿舍楼顶层辟出了一间”舒心小屋”，让官兵放松心情、释放压力，取得了显著效果。他们的探索，为基层单位更好地开展心理服务和思想教育带来有益启示。

“舒心小屋”内，该连排长崔豫乾（中）正与战士谈心。邹菁泓 摄

新闻样本

春夏之交，各地暑气日增，而新疆军区某边防团某连驻地山巅积雪犹在，营区内的白杨才吐露新芽。

“感到烦闷苦恼，就去’舒心小屋’坐坐，心情立马变好。”早就对该连”舒心小屋”有所耳闻，一个阳光明媚的周末，笔者慕名探访。

“舒心小屋”坐落在该连宿舍楼顶层，原本是闲置的房间，两年前被改造成一个可以放松交流的空间。

恰如其名，”舒心小屋”虽然面积不大，只有十几平方米，但暖黄色的墙纸、原木色的地板、穿过纱幔照进来的阳光，让人一步入就有温馨舒适之感。屋门左侧，摆放着沙发和圆形矮桌；右侧，贴墙固定的桌子，几把高脚凳，以及摆放着书籍、绿植的置物架，构成了吧台区。

“训练结束或者休息时间，很多人喜欢来小屋待上一会儿，放松放松。”见笔者前来参观，原本坐在吧台区看书的中士徐雷，主动起身介绍。

徐雷是从去年开始爱上”舒心小屋”的。彼时，他刚参加完一个大项任务，因长期高度紧张、神经紧绷，归队后睡眠质量较差。那段时间，徐雷觉得压力重重，工作训练受到影响，与战友交流更是少之又少。

发现徐雷的异样后，连队指导员崔建德主动邀他来到”舒心小屋”。一杯牛奶、一部电影过后，两人面对面聊着天。放松的环境让徐雷袒露心声，将烦恼和盘托出。

在这之后，徐雷经常来这里，播放一首舒缓音乐，闭眼小憩。慢慢地，他的睡眠得到改善，精气神越来越好，工作训练状态恢复正常。

“给官兵打造一隅’心灵静区’，是建造’舒心小屋’的初衷。”崔建德介绍，小屋是由连队前任指导员步少康提议并主持建造的。

步少康产生这样的想法，原因有三：一是，他观察发现部分战士与家人通电话时，喜欢躲在楼道角落里，缺少相对私密的空间；二是，高强度训练后，官兵容易身心俱疲，加上驻地冬季寒冷，大家宁愿窝在班排宿舍玩手机，也不愿出门活动；三是，官兵恳谈会上，很多”00 后”官兵多次表示想拥有一处静心之所，放松心情、释放压力。

为此，步少康专门翻阅了《环境心理学》《社会心理学》等专业书籍，向心理咨询师请教有关事宜，确定了最终的设计思路——

优先选择安静的、阳光充沛的、距离宿舍较近的空间；鼓励官兵建言献策，每个班出一个方案，择优选用；布设时尽可能避免空间拥挤，防止造成心理上的压迫感……

谈起”舒心小屋”，某班班长湛鹏最喜欢的是沙发。”这里的环境比宿舍更容易让人放松下来。”他说，”现在，班长骨干都喜欢到这里开展谈心交心，有的班还将班务会、茶话会’搬’了过来。”

“这里让我有家的感觉。”列兵李事起说，初来连队的各种不适应，思想上的”小疙瘩”，在一次次同班长的”沙发谈心”中，逐渐消解了，心里对连队的归属感越来越强。

如果细心观察，就会发现，”以连为家”的设计理念，藏在”舒心小屋”的细节之中。

参观时，一面墙格外吸引笔者注意。只见上面张贴着许多照片，尽管场景各有不同，但每一张都有笑脸，或喜极而泣，或开怀大笑，或嘴角微扬。透过照片，笔者能感受到喜悦、开心与幸福。

“笑脸墙是我最喜欢的设计。”女兵班班长罗雯雯，指着一张 3 位女兵开心拥抱的照片说，”这是前年我们克服困难成功考取体能’特三’后，战友用照相机抓拍的。这是我军旅生涯的一段难忘经历。”

罗雯雯不仅是”舒心小屋”的常客，还参与了设计建造：”征集照片时，指导员就要求大家，提供对自己有特殊意义的笑脸照。”

于是，一级上士王子寿家属来队时和战友们一起包饺子，下士孙滔完成了自己在部队首个绘画作品，上等兵张学柳组建的”舒心乐队”为连队战友演出……这些记录着官兵军旅生活的瞬间纷纷被定格在笑脸墙上。

罗雯雯说：”这面墙，不仅承载了大家的美好记忆，还成为我们的’充电站”加油站’。心情沮丧或者烦闷时来这里看一看，大家能从中汲取不少正能量。”

“舒心小屋”设计上的用心之处不止于此——吧台上放置了多排孔插座，方便充电使用；墙面四周的管道用麻绳缠绕起来，与屋内整体设计保持一致……除此之外，该连还购置了投影仪、咖啡机等，供官兵使用。

走进去是”愁容”，走出来是”笑脸”。如今，”舒心小屋”的环境布设越来越温馨，官兵们也越来越爱来。在这里，既能享受一个人的独处时光，也可以多人相约观影品茗、谈天说地，拉近彼此距离、密切内部关系。

“这些年，我们不断提高按纲抓建水平，逐步完善基础设施，搭建’舒心小屋’只是其中一个动作。”崔建德告诉笔者，如今，连队已建起图书室、健身房、唱吧等，各种文体活动常态开展。闲暇之余，官兵们选择更多了，活动空间更大了。

但”舒心小屋”仍是最受官兵欢迎的地方，这小小的一隅，以它独有的方式关爱着这个连队的每一个人，已经成为他们军营生活中不可或缺的存在。

亲历者说

“小屋”其实并不小

■新疆军区某边防团某连指导员　崔建德

去年刚到连队任职时，我想尽快进入工作状态，于是挨个谈心，了解熟悉官兵。但事与愿违，我的做法非但没有拉近与大家的距离，反而引起不少人抵触。

为此，我向前任指导员步少康请教经验。他告诉我，走进官兵内心不能急于求成，要善于从实际需求出发开展工作、建立信任。他建议我多去”舒心小屋”看看，说不定有意想不到的收获。

虽不明其意，但我还是照做了。留心观察”舒心小屋”一段时间后，我发现上等兵李洛喜欢安静，一个人一本书，享受阅读时光；下士孙滔擅长绘画、雕刻，抽空就窝在沙发搞创作……如此一来，我逐渐掌握了很多官兵的兴趣爱好。

此后，我打开了思路：谈心内容不必局限于训练学习，从兴趣爱好入手，更能让官兵打开”话匣子”。我还有意将谈心地点移至”舒心小屋”，置身舒适的环境，官兵更愿意敞开心扉。从实际效果看，这些做法都奏效了。

“舒心小屋”带给我的启发不止于此。今年初，在我的提议下，小屋新增了一面”心愿墙”。我发现，面对面交流并不适用于每一名官兵，有的战士就是不愿开口表露自己。

在”心愿墙”上，官兵们可以写下个人成长愿望，也可以提出有关连队建设的意见建议。由此，我听到了更多”好声音”，收获了改进工作的”金点子”。

如今，我发现”小屋”其实并不小，它不只是一个可以让官兵放松静心的空间，更像是一个博大的”怀抱”，接纳大家的喜怒哀乐，搭起战友之间的连心桥，为干部骨干开展思想教育工作提供了无形的帮助。

“舒心”其实并不难

■新疆军区某边防团某连原指导员　步少康

“舒心小屋”改造完成并投入使用的翌年 4 月，我被调整至其他连队任职。在交接工作时，我向继任指导员崔建德，专门介绍了”舒心小屋”的由来。从后面同他的交流来看，”舒心小屋”的作用得到了很好发挥与拓展，深受官兵喜爱。可见，我们办的是真正惠兵暖兵的实事。

当前，”95后”“00后”日渐成为基层官兵主体。他们学历更高、思想更活跃、自我意识更强烈，普遍期望有更多个人空间、受到更多尊重。看着休息日散布在连队各个角落的官兵，我意识到，单纯依靠连队组织集体活动，已满足不了他们多元化、多样性的个体需求。

建造一间”舒心小屋”的想法一经提出，便受到了连队官兵赞同。这充分展现了他们内心的真实需求：在个人自主支配时间拥有一个温馨舒适的空间。当然，这也是我的初衷，让官兵在这样的环境中，放松心情、缓解压力。

最大程度从官兵实际需求出发，”舒心小屋”才能名副其实地让大家”舒心”。各级领导总是告诫我们，要用心用情带兵。我认为，体现在实践中，就是在开展各项工作时，从官兵的真正需要出发进行考虑、筹划。而这些需要，只要于连队建设有利，未必非要等官兵亲口说出，带兵人应该在日常工作中善于观察发现，并及时有所行动。比如，我们主动安排高学历干部对有考学意愿的战士进行辅导授课；购买乐器、画具，成立兴趣小组，支持并培养想学才艺的战士。这些都是对官兵需求的主动回应和及时满足。日积月累，大家对连队的认同感、归属感不断增强，工作训练也更加认真刻苦。

回想这段经历，我发现让战友”舒心”其实并不难，只要我们时刻把官兵的需求放心上，让他们感受到组织的关心和温暖，体会到被尊重、被信任，就能凝聚兵心、勠力同心、团结奋斗，推动连队全面建设蒸蒸日上。

“Comfortable House” Makes Officers and Men Smile, and a Place for Meditation Has Become an Indispensable Existence

Source: PLA Daily Author: Wang Xuanli Liu Xinyu Editor: Guo Yanfei 2025-05-09

A company of a border defense regiment of the Xinjiang Military Command [District] built facilities for officers and men to help with psychological services——

“Comfortable Hut”: Give you a good mood

■ Wang Xuanli Liu Xinyu

Recommendation reason

Work, training and life are tense and busy, which is the norm for grassroots officers and men. However, when you are in a group, there will always be a moment when you want to have a quiet space to hold those emotions that you don’t want to show, or be alone for a while without being disturbed. A company of a border defense regiment of the Xinjiang Military Command [District] closely follows the needs of officers and men and set up a “comfortable hut” on the top floor of the dormitory building to let officers and men relax and release pressure, and achieved remarkable results. Their exploration has brought useful inspiration for grassroots units to better conduct psychological services and ideological education.

News sample

At the turn of spring and summer, the heat in various places is increasing day by day, but the snow is still on the top of the mountain where a company of a border defense regiment of the Xinjiang Military Command [District] is stationed, and the poplars in the camp are just beginning to sprout new buds.

“If you feel bored and distressed, go to the ‘comfortable hut’ and sit down, and your mood will immediately improve.” I have heard about the “comfortable hut” of the company for a long time, and on a sunny weekend, I visited it.

“Comfortable Hut” is located on the top floor of the company’s dormitory building. It was originally an idle room, but it was transformed into a space for relaxation and communication two years ago.

As the name suggests, although the “comfortable hut” is not large, only more than ten square meters, the warm yellow wallpaper, the original wood-colored floor, and the sunlight shining through the gauze curtain make people feel warm and comfortable as soon as they enter. On the left side of the door, there are sofas and round low tables; on the right side, there are tables fixed

to the wall, several high stools, and shelves with books and green plants, which constitute the bar area.

“After training or during breaks, many people like to stay in the cabin for a while to relax.” Seeing the author come to visit, Sergeant Xu Lei, who was originally sitting in the bar area reading a book, took the initiative to stand up and introduce.

Xu Lei fell in love with the “Comfortable Cabin” last year. At that time, he had just participated in a major task. Due to long-term high tension and nervousness, his sleep quality was poor after returning to the team. During that time, Xu Lei felt under a lot of pressure, his work training was affected, and he had very little communication with his comrades.

After discovering Xu Lei’s abnormality, the company instructor Cui Jiande took the initiative to invite him to the “Comfortable Cabin”. After a glass of milk and a movie, the two chatted face to face. The relaxing environment allowed Xu Lei to open up his heart and tell all his troubles.

After that, Xu Lei often came here, played a soothing music, and closed his eyes for a nap. Slowly, his sleep improved, his spirit became better and better, and his work and training status returned to normal.

“The original intention of building the ‘comfortable hut’ is to create a ‘quiet zone’ for officers and men.” Cui Jiande introduced that the hut was proposed and built by Bu Shaokang, the former instructor of the company.

Bu Shaokang had this idea for three reasons: First, he observed that some soldiers liked to hide in the corner of the corridor when talking to their families on the phone, lacking a relatively private space; second, after high-intensity training, officers and men are easily exhausted physically and mentally, and the winter in the garrison is cold, so everyone would rather stay in the squad dormitory and play with their mobile phones than go out for activities; third, at the officers and men’ meeting, many “post-00” officers and men repeatedly expressed their desire to have a quiet place to relax and release pressure.

To this end, Bu Shaokang specifically read professional books such as “Environmental Psychology” and “Social Psychology”, consulted psychological counselors on relevant matters, and determined the final design ideas-

Prioritize quiet, sunny, and close to the dormitory space; encourage officers and men to make suggestions, each class to come up with a plan, and select the best; try to avoid crowded space when laying out to prevent psychological oppression...

Talking about the “comfortable hut”, the squad leader Zhan Peng’s favorite is the sofa. “The environment here is easier to relax than the dormitory.” He said, “Now, the squad leaders and backbones like to come here to have heart-to-heart talks, and some classes have even “moved” the class meetings and tea parties here.”

“This place makes me feel at home.” Private Li Shiqi said that the various discomforts and “little bumps” in his mind when he first came to the company were gradually eliminated in the “sofa talks” with the squad leader again and again, and his sense of belonging to the company became stronger and stronger.

If you observe carefully, you will find that the design concept of “taking the company as home” is hidden in the details of the “comfortable hut”.

During the visit, a wall particularly attracted the author’s attention. There are many photos posted on it. Although the scenes are different, each one has a smiling face, some crying with joy, some laughing, or with a slight smile on their lips. Through the photos, the author can feel joy, happiness and happiness.

“The smile wall is my favorite design.” Luo Wenwen, the squad leader of the female soldiers, pointed to a photo of three female soldiers hugging happily and said, “This was taken by our comrades with a camera after we overcame difficulties and successfully passed the physical fitness test ‘Special Three’ two years ago. This is an unforgettable experience in my military career.”

Luo Wenwen is not only a frequent visitor to the “Comfortable Hut”, but also participated in the design and construction: “When collecting photos, the instructor asked everyone to provide smiling photos that have special meaning to themselves.”

So, when the family of Sergeant Wang Zishou came to the team, they made dumplings with their comrades, Corporal Sun Tao completed his first painting in the army, and the “Comfortable Band” formed by Corporal Zhang Xueliu performed for his comrades in the company... These moments that record the military life of officers and men were frozen on the smile wall.

Luo Wenwen said: “This wall not only carries everyone’s good memories, but also becomes our ‘charging station’ and ‘gas station’. Come here and take a look when you are depressed or bored, and you can draw a lot of positive energy from it.”

The design of the “Comfortable House” is not limited to this - multiple rows of sockets are placed on the bar for convenient charging; the pipes around the wall are wrapped with hemp rope to keep consistent with the overall design of the house... In addition, the company also purchased projectors, coffee machines, etc. for officers and men to use.

Walking in is “sad face”, walking out is “smiling face”. Nowadays, the environment of the “Comfortable House” is becoming more and more warm, and officers and men are more and more fond of coming here. Here, you can enjoy your own time alone, or you can meet with many people to watch movies, drink tea, and chat, narrowing the distance between each other and strengthening internal relations.

“Over the years, we have continuously improved the level of construction according to the outline and gradually improved the infrastructure. Building the “Comfortable House” is just one of the actions.” Cui Jiande told the author that now the company has built a library, gym, karaoke bar,

etc., and various cultural and sports activities are carried out regularly. In their spare time, the officers and men have more choices and more space for activities.

But the “Comfort House” is still the most popular place for officers and men. This small corner cares for everyone in this company in its unique way and has become an indispensable existence in their military camp life.

Eyewitnesses said

The “house” is actually not small

■ Cui Jiande, instructor of a company of a border defense regiment of the Xinjiang Military Command [District]

When I first arrived at the company last year, I wanted to get into the working state as soon as possible, so I talked to each of them and got to know the officers and men. But things went against my wishes. Instead of narrowing the distance with everyone, my approach caused resistance from many people.

For this reason, I asked the former instructor Bu Shaokang for advice. He told me that we should not rush to get into the hearts of officers and men, but should be good at starting work and building trust based on actual needs. He suggested that I go to the “Comfort House” more often, and maybe there will be unexpected gains.

Although I didn’t understand the meaning, I still did it. After paying attention to the “Comfortable Hut” for a while, I found that Corporal Li Luo likes quietness, reading a book by himself, and enjoying reading time; Corporal Sun Tao is good at painting and carving, and he would sit on the sofa to create when he has time... In this way, I gradually mastered the interests and hobbies of many officers and men.

After that, I opened my mind: the content of the heart-to-heart talk does not have to be limited to training and learning. Starting from interests and hobbies can make officers and men open up their “chatterboxes”. I also deliberately moved the heart-to-heart talk location to the “Comfortable Hut”. In a comfortable environment, officers and men are more willing to open their hearts. From the actual results, these practices have worked.

The inspiration brought to me by the “Comfortable Hut” is not limited to this. At the beginning of this year, at my suggestion, a “Wish Wall” was added to the hut. I found that face-to-face communication is not suitable for every officer and soldier, and some soldiers just don’t want to speak up and express themselves.

On the “Wish Wall”, officers and men can write down their personal growth wishes, and they can also put forward opinions and suggestions on company construction. As a result, I heard more “good voices” and gained “golden ideas” to improve my work.

Now, I find that the "hut" is not small. It is not just a space for officers and men to relax and calm down, but more like a broad "embrace" that accepts everyone's joys, sorrows, anger and happiness, builds a bridge of connection between comrades, and provides invisible help for cadres and backbones to conduct ideological education.

"Comfortable" is actually not difficult

■ Bu Shaokang, former instructor of a company of a border defense regiment of the Xinjiang Military Command [District]

In April of the following year, when the "Comfortable Hut" was renovated and put into use, I was transferred to another company. When handing over the work, I specifically introduced the origin of the "Comfortable Hut" to the successor instructor Cui Jiande. From the subsequent exchanges with him, it can be seen that the role of the "Comfortable Hut" has been well played and expanded, and it is deeply loved by officers and men. It can be seen that what we are doing is a real thing that benefits and warms the soldiers.

At present, "post-95s" and "post-00s" are gradually becoming the main body of grassroots officers and men. They have higher education, more active thoughts, and stronger self-awareness. They generally expect to have more personal space and be respected. Looking at the officers and men scattered in every corner of the company on rest days, I realized that simply relying on the company to organize collective activities can no longer meet their diverse and diverse individual needs.

Once the idea of building a "comfortable hut" was proposed, it was approved by the officers and men of the company. This fully demonstrates their true inner needs: to have a warm and comfortable space in their personal autonomous time. Of course, this is also my original intention, to let the officers and men relax and relieve stress in such an environment.

Starting from the actual needs of the officers and men to the greatest extent, the "comfortable hut" can truly make everyone "comfortable". Leaders at all levels always warn us to lead the soldiers with heart and emotion. I think that in practice, it is to consider and plan from the real needs of the officers and men when conducting various tasks. And these needs, as long as they are beneficial to the construction of the company, do not necessarily have to wait for the officers and men to say it in person. The leaders should be good at observing and discovering in their daily work, and take timely action. For example, we proactively arranged for highly educated cadres to provide tutoring and teaching to soldiers who were willing to take exams; we purchased musical instruments and painting supplies, set up interest groups, and supported and cultivated soldiers who wanted to learn talents. These are proactive responses and timely satisfaction of the needs of officers and men. Over time, everyone's sense of identity and belonging to the company has been continuously strengthened, and work training has become more serious and hardworking.

Looking back on this experience, I found that it is not difficult to make my comrades "comfortable". As long as we always keep the needs of officers and men in mind, let them feel the care and warmth

of the organization, and feel respected and trusted, we can unite the hearts of the soldiers, work together, and work together to promote the comprehensive construction of the company.

The teaching process changes the extensive experience judgment into scientific analysis and decision-making.

陆军某旅“南京路上好八连”密切内部关系浓厚战斗情谊

来源：解放军报 作者：安阳 童祖静 陈大帅 责任编辑：郭妍菲 2025-05-10

陆军某旅“南京路上好八连”密切内部关系浓厚战斗情谊——

“你叠的伞，我来跳”

■安 阳 童祖静 陈大帅

“以后，我和朱钦雨做叠伞搭档。他叠的伞，由我来跳！”前不久的一天晚点名，陆军某旅”南京路上好八连”指导员崔凯当众宣布这一决定，让在场的官兵惊讶不已。

为何？崔凯解释，伞降实跳训练中，”自己叠的伞自己跳”是不成文的规定，每个人要对自己的生命负责，如果用别人叠的伞完成实跳，无异于性命相托。更重要的是，在不少官兵眼中，朱钦雨的表现有点一般。

“连队不会放弃任何一个人，但指导员的话，还是让我们有点担心……”二级上士、伞降教练员左泽超回忆，那时朱钦雨因工作积极性不高，被调整到新的小队，叠伞训练多次不合格。为此，晚点名结束后，左泽超找到崔凯，劝他收回这个决定。

一连数日，这件事成为该连官兵热议的话题。面对劝说，崔凯不为所动。几年前，他在八连任小队长时，就对朱钦雨印象深刻，还和他结下深厚情谊。重回连队任指导员，发现原本活泼开朗的朱钦雨好像变了个人，找他谈心总是沉默不语。

崔凯了解到，朱钦雨日常表现下滑明显，骨干感到很头疼，不知不觉间，身边战友也开始与他疏远。朱钦雨的小队长杨迅有些束手无策：”我们想了很多办法，但他始终不愿和我们敞开心扉，有时还表现出强烈的抵触情绪……”

“内部关系是基层风气的’风向标’和’晴雨表’。只有锻造’甘苦与共、生死相依’的内部关系，才能让新风正气满军营。”崔凯告诉笔者，他的决定并非心血来潮，而是尝试激发连队士气、融洽内部关系的”一剂药方”。

为了让朱钦雨有所转变，崔凯翻开《兵情录》：”朱钦雨，江西九江人，从小听着解放军九江抗洪的故事长大，怀揣保家卫国的理想参军……”“绝不能让这样的战士消沉下去！”崔凯决心找到朱钦雨的”病根”。

一次查寝，崔凯发现朱钦雨躲在学习室里写东西，走近一看，本子上记录的是他和连队帮扶对象胡红根老人的往来交流。

胡红根是连队帮扶了 40 多年的残障人士，连队每个月都会派人前去探望。前两年，胡红根返回安徽老家休养，和连队的交流渐渐少了。没想到，朱钦雨一直和他保持联系，还经常为老人寄送生活用品。

看着本上密密麻麻的记录，崔凯心中既意外又感动。那晚，他和朱钦雨促膝长谈，朱钦雨终于打开了心扉。原来，去年上级组织比武，原本有实力取得好名次的朱钦雨因故未能参加。那段时间，朱钦雨变得消沉，这又让战友产生了误解，他索性选择了躺平。

为了帮朱钦雨卸下包袱，崔凯在那天晚点名时公布了与他做叠伞搭档的决定。当朱钦雨带着难以置信的心情找到崔凯时，崔凯坚定地告诉他：”朱钦雨，我们是战友，我无条件地信任你！”

此后，崔凯和朱钦雨作为主副手搭档练习叠伞，朱钦雨的叠伞技能进步很快。当崔凯提出和他一起参加伞降实跳，朱钦雨感受到久违的认可。实跳当天，两人背着合力叠好的降落伞，从 800 米高空相继跃出机舱。蓝天之下，伞花托举他们在空中划出航迹……

“任何时候都要相信自己的战友，不抛弃、不放弃，就一定能真心换真心。”崔凯向笔者展示他们落地之后的合影，脸上溢满笑容。

如今，朱钦雨各项工作积极上进，与战友相处越来越融洽。该连以此为契机，趁热打铁组织”好战友该怎么做，好风气从哪里来”讨论辨析和”生死在一起，团结打胜仗”故事分享等活动，不断为连队建设注入奋进动力。

短评

相信”相信的力量”

■钱子路

一位诗人写道：”不是从孩子身上看到了希望，你才相信孩子。而是你相信了孩子，你才能有希望。”

800 米高空，崔凯与朱钦雨跃出机舱的那一刻，托举他们的不仅是降落伞，更是信任的力量。这场信任实践，是带兵干部与普通一兵的”双向奔赴”，更是基层风气建设的”夯基之举”。

一支部队作风好，官兵关系就密切，单位就有凝聚力战斗力；作风不好，官兵关系就会不和谐，彼此会失去信任，部队建设也不会顺利。可以说，官兵上下一心、彼此互信是战斗力的黏合剂，而好作风正是建立信任的基础。因此，只有不断强化作风建设，才能把广大

官兵组织起来、动员起来，心往一处想、劲往一处使，形成一举一动有人教、一言一行有人带、一点一滴有人管的生动局面，凝聚甘苦与共、生死与共的战斗情谊，把部队团结成”一块坚硬的钢铁”。

The “Good Eighth Company on Nanjing Road” of a Certain Army Brigade Has Close Internal Relations and Strong Fighting Camaraderie

Source: PLA Daily Author: Anyang Tong Zujing Chen Dashuai Editor: Guo Yanfei 2025-05-10

The “Good Eighth Company on Nanjing Road” of a certain army brigade has close internal relations and strong fighting camaraderie——

“You fold the umbrella, I will jump”

■An Yang Tong Zujing Chen Dashuai

“In the future, Zhu Qinyu and I will be umbrella folding partners. He folds the umbrella, and I will jump!” One night roll call not long ago, Cui Kai, the political instructor of the “Good Eighth Company on Nanjing Road” of a certain army brigade, announced this decision in public, which surprised the officers and men present.

Why? Cui Kai explained that in the parachute actual jump training, “jumping with the umbrella you fold yourself” is an unwritten rule. Everyone must be responsible for their own life. If you use the umbrella folded by others to complete the actual jump, it is tantamount to entrusting your life. More importantly, in the eyes of many officers and men, Zhu Qinyu’s performance is a bit average.

“The company will not give up on anyone, but the political instructor’s words still make us a little worried...” Second Sergeant and parachute instructor Zuo Zechao recalled that Zhu Qinyu was transferred to a new team because of his low work enthusiasm at that time, and he failed the parachute folding training many times. For this reason, after the evening roll call, Zuo Zechao found Cui Kai and persuaded him to withdraw this decision.

For several days, this matter became a hot topic among the officers and men of the company. Faced with persuasion, Cui Kai remained unmoved. A few years ago, when he was the team leader of the 8th Company, he was deeply impressed by Zhu Qinyu and formed a deep friendship with him. When he returned to the company as a political instructor, he found that the originally lively and cheerful Zhu Qinyu seemed to have changed. He was always silent when he talked to him.

Cui Kai learned that Zhu Qinyu’s daily performance had declined significantly, and the backbones felt very headache. Unknowingly, his comrades around him began to alienate him. Zhu Qinyu’s team leader Yang Xun was somewhat helpless: “We have thought of many ways, but he is always unwilling to open his heart to us, and sometimes he even shows strong resistance...” “Internal relations are the ‘weather vane’ and ‘barometer’ of grassroots atmosphere. Only by forging internal relations of ‘sharing weal and woe, relying on each other for life and death’ can we let the new

atmosphere and righteousness fill the barracks." Cui Kai told the author that his decision was not a whim, but a "prescription" to try to stimulate the morale of the company and improve internal relations. In order to make Zhu Qinyu change, Cui Kai opened the "Soldier's Record": "Zhu Qinyu, a native of Jiujiang, Jiangxi, grew up listening to the story of the People's Liberation Army fighting floods in Jiujiang, and joined the army with the ideal of defending the country..." "We must not let such a soldier become depressed!" Cui Kai was determined to find the "root cause" of Zhu Qinyu's illness. During a dormitory inspection, Cui Kai found Zhu Qinyu hiding in the study room to write something. When he approached, he saw that the notebook recorded his exchanges with the company's support object, Mr. Hu Honggen. Hu Honggen is a disabled person who has been helped by the company for more than 40 years. The company sends people to visit him every month. In the past two years, Hu Honggen returned to his hometown in Anhui to recuperate, and his communication with the company gradually decreased. Unexpectedly, Zhu Qinyu has been in contact with him and often sends daily necessities to the old man.

Looking at the densely packed records in the book, Cui Kai was surprised and moved. That night, he and Zhu Qinyu had a long talk, and Zhu Qinyu finally opened his heart. It turned out that last year, the superiors organized a competition, and Zhu Qinyu, who had the ability to get a good ranking, was unable to participate for some reason. During that time, Zhu Qinyu became depressed, which caused comrades to misunderstand, and he simply chose to lie down.

In order to help Zhu Qinyu unload his burden, Cui Kai announced his decision to be his partner in folding umbrellas during the roll call that night. When Zhu Qinyu found Cui Kai with an unbelievable mood, Cui Kai firmly told him: "Zhu Qinyu, we are comrades-in-arms, I trust you unconditionally!"

After that, Cui Kai and Zhu Qinyu practiced folding parachutes as the main and deputy partners, and Zhu Qinyu's folding skills improved rapidly. When Cui Kai proposed to participate in the parachute jump with him, Zhu Qinyu felt the long-lost recognition. On the day of the actual jump, the two of them carried the parachutes that they had folded together and jumped out of the cabin from an altitude of 800 meters. Under the blue sky, the parachute flowers lifted them to draw tracks in the air...

"You must believe in your comrades-in-arms at any time. If you don't abandon or give up, you will definitely be able to exchange your sincerity for sincerity." Cui Kai showed the author a group photo after they landed, with a smile on his face.

Now, Zhu Qinyu is actively making progress in all aspects of his work and getting along more and more harmoniously with his comrades-in-arms. Taking this as an opportunity, the company took advantage of the opportunity to organize discussions and analysis on "What should good comrades-in-arms do and where does the good atmosphere come from" and story sharing activities such as "Life and death together, unity to win the battle", constantly injecting motivation for the company's construction.

Short review

Believe in the “power of belief”

■Qian Zilu

A poet wrote: “It is not because you see hope in children that you believe in them. It is because you believe in children that you have hope.”

At an altitude of 800 meters, when Cui Kai and Zhu Qinyu jumped out of the cabin, it was not only the parachute that lifted them up, but also the power of trust. This trust practice is a “two-way rush” between the leading cadres and ordinary soldiers, and it is also a “foundation-laying move” for the construction of grassroots atmosphere.

If a unit has a good style, the relationship between officers and men will be close, and the unit will have cohesion and combat effectiveness; if the style is not good, the relationship between officers and men will be disharmonious, they will lose trust in each other, and the construction of the unit will not be smooth. It can be said that the unity of officers and men and mutual trust are the glue of combat effectiveness, and a good style is the foundation for building trust. Therefore, only by constantly strengthening the construction of work style can we organize and mobilize the majority of officers and men, think in one direction and work in one direction, form a vivid situation where every move is taught, every word and deed is guided, and every little thing is managed, so as to condense the fighting friendship of sharing weal and woe, life and death, and unite the troops into “a piece of solid steel.”

陆军某旅针对官兵特点因人施教开展分层教育

来源：解放军报 作者：赵文彦 刘灿 责任编辑：郭妍菲 2025-05-10

陆军某旅针对官兵特点开展分层教育

因人施教实现”精准滴灌”

解放军报讯 赵文彦、刘灿报道：”风高浪急，战车突发故障，我们争分夺秒排除故障，确保战车顺利驶入登陆舰……”日前，陆军某旅组织一堂微教育，三级军士长陈家净为装甲分队战友分享自己的任务经历和感悟体会，受到官兵欢迎。

营区另一角，该旅通信、工兵等专业官兵分布多个会场，同步开展读书交流会、官兵互赞会等活动。

“‘大水漫灌’式的教育无法满足官兵的个性化需求，’精准滴灌’才能帮助官兵解决思想困惑、激发奋进动力。”该旅领导介绍，为增强教育的针对性、实效性，他们根据官兵年龄差异、专业特长、成长经历等实际，结合不同教育主题分层分类展开教育授课。

以婚恋观教育为例，以往组织相关教育，他们习惯讲授夫妻相处、家庭和睦等方面内容，大多数未婚官兵兴趣不高。分层教育开展以来，他们区分官兵实际情况，依托旅队教育直播平台精准施教，引导未婚官兵加强自身修养、树立正确择偶观；关注已婚官兵家庭困难、子女教育等情况，帮助其解决实际困难。”分层教育使每个人都能有效参与，找到适合自己的内容。”授课结束后，一名战士坦言收获满满。

为进一步提升分层教育质效，该旅还注重加强政治教员队伍建设，按照备课、审课、讲课、评课等环节归纳整理学习资料，引导政治教员精心打磨教案，不断提升授课水平。在此基础上，他们在严守保密要求的前提下，建立”线上教育课堂”，营连可通过随机组课、互动交流等方式广泛参与，实现优质教育资源共享共用。

前不久，该旅装步七连林指导员按照计划组织一堂教育课。授课中，他以独特的破题思路和生动的案例剖析，赢得官兵点赞。他的授课视频上传至”线上教育课堂”后，被多个兄弟单位用于开展思想政治教育，广受好评。

分层精准施教，点燃精武热情。连日来，该旅针对驻训分队流动分散的特点灵活组织现地教育，营造”处处是课堂、时时受教育”的浓厚氛围，官兵训练热情高涨，训练成绩稳步提升。

A Certain Army Brigade Conducts Stratified Education Based on the Characteristics of Officers and Men

Source: PLA Daily Author: Zhao Wenyan Liu Can Editor: Guo Yanfei 2025-05-10

A certain army brigade conducts stratified education based on the characteristics of officers and men

Teaching according to the individual to achieve “precision drip irrigation”

PLA Daily News Zhao Wenyan and Liu Can reported: “The wind is high and the waves are rough, and the tank suddenly breaks down. We race against time to troubleshoot and ensure that the tank enters the landing ship smoothly...” A few days ago, a certain army brigade organized a micro-education class. Sergeant Major Chen Jiajing shared his mission experience and feelings with his comrades in the armored unit, which was welcomed by officers and men.

In another corner of the camp, the brigade’s communications, engineering and other professional officers and men were distributed in multiple venues, and simultaneously conducted activities such as reading exchanges and mutual praise meetings between officers and men.

“‘Flooding’-style education cannot meet the personalized needs of officers and men. ‘Precision drip irrigation’ can help officers and men solve ideological confusion and inspire motivation for progress.” The brigade leaders introduced that in order to enhance the pertinence and effectiveness

of education, they conducted education and teaching in layers and categories according to the age differences, professional expertise, and growth experiences of officers and men, combined with different educational themes.

Take marriage and love education as an example. In the past, when organizing relevant education, they were used to teaching about husband and wife getting along and family harmony, and most unmarried officers and men were not interested. Since the implementation of stratified education, they have distinguished the actual situation of officers and men, and relied on the brigade's education live broadcast platform to teach accurately, guide unmarried officers and men to strengthen their own cultivation and establish a correct view of mate selection; pay attention to the family difficulties and children's education of married officers and men, and help them solve practical difficulties. "Stratified education enables everyone to participate effectively and find content that suits them." After the lecture, a soldier admitted that he had gained a lot.

In order to further improve the quality and effectiveness of stratified education, the brigade also focuses on strengthening the construction of the political instructor team, summarizing and organizing learning materials according to the links of lesson preparation, review, lecture, and evaluation, guiding political instructors to carefully polish lesson plans, and continuously improve the teaching level. On this basis, they established an "online education classroom" under the premise of strictly adhering to confidentiality requirements. Battalions and companies can participate widely through random group classes, interactive exchanges, etc., to achieve the sharing and use of high-quality educational resources.

Not long ago, Instructor Lin of the Seventh Company of the Mechanized Infantry of the brigade organized an education class according to the plan. During the lecture, he won the praise of officers and men with his unique problem-solving ideas and vivid case analysis. After his teaching video was uploaded to the "online education classroom", it was used by many brother units to carry out ideological and political education and was widely praised.

Stratified and precise teaching ignites the enthusiasm for Jingwu. In recent days, the brigade has flexibly organized on-site education in response to the characteristics of the mobile and dispersed training units, creating a strong atmosphere of "classrooms everywhere and education at all times", and the officers and men are enthusiastic about training and their training results are steadily improving.

陆军某旅跨地域执行任务途中开设"车厢课堂"抓好随机教育

来源：解放军报 作者：常海洋 杜祥 责任编辑：郭妍菲 2025-05-10

陆军某旅结合任务实际抓好随机教育

机动途中开设"车厢课堂"

解放军报讯 常海洋、杜祥报道：”这里是黄麻起义的重要策源地之一，战争年代曾涌现出大批革命先辈……”日前，陆军某旅官兵跨地域执行任务途中，某连干部杨晓龙充分利用沿途红色资源，灵活开展随机教育，引发官兵强烈共鸣。

“随着部队担负的使命任务不断拓展，任务分队部署分散、动中转换成为常态，开展思想政治教育面临人员难集中、时间难同步等现实问题。”该旅领导介绍，为此，他们针对机动转场频繁、人员分散流动等实际，探索改进教育模式，利用远程机动、任务转场等时机，灵活开设”车厢课堂”，让官兵时时受教育、处处受熏陶。

课堂随着任务走，教育跟着车轮转。实践中，他们采取”机关统一筹划、营连自主组织”的方式，结合任务沿途红色场馆、革命旧址等资源，灵活组织小演讲活动，引导官兵学党史军史、悟红色传统；精选官兵关注的热点话题作为授课内容，鼓励基层单位开展”微课堂”活动，让官兵听得懂、有触动、受启发。

为进一步丰富教育形式、提升教育质效，该旅在广泛征求大家意见建议基础上，集中采购了一批优秀书籍，供官兵阅读学习，并鼓励官兵根据自身实际制订读书计划，在教育课堂上分享自己的读书心得。

“从主人公的成长经历中，我读懂了’坚持’的意义……”在该旅某连任务途中组织的”书香浸润强军梦”读书分享会上，上等兵刘守锐结合自身经历分享的读书体会，让身边战友深受触动。

三五分钟不嫌短、三五个人不嫌少。该旅领导介绍，随着随机教育广泛深入开展，”车厢课堂”逐渐变身为传承红色基因、弘扬优良传统的前沿阵地。不仅如此，每到达一个驻训地，他们都会组织官兵到当地红色场馆、革命旧址开展现地教育，进一步激发大家矢志强军、建功军营的动力。

A Certain Army Brigade Opened a “Carriage Classroom” During Cross-Regional Missions to Conduct Random Education

Source: PLA Daily Author: Chang Haiyang Du Xiang Editor: Guo Yanfei 2025-05-10

A certain army brigade combines the actual mission to carry out random education

Opening a “carriage classroom” during mobility

PLA Daily News Chang Haiyang and Du Xiang reported: “This is one of the important sources of the Huangma Uprising. A large number of revolutionary predecessors emerged during the war years...” Recently, while officers and men of a certain army brigade were on their way to perform tasks across regions, a certain company cadre Yang Xiaolong made full use of the red resources

along the way and flexibly conducted random education, which aroused strong resonance among officers and men.

“With the continuous expansion of the missions and tasks undertaken by the troops, the deployment of task teams has become dispersed and the transition on the move has become the norm. Conducting ideological and political education faces practical problems such as difficulty in concentrating personnel and synchronizing time.” The leaders of the brigade introduced that for this reason, they explored and improved the education model in response to the frequent mobile transfers and the dispersed flow of personnel, and took advantage of opportunities such as long-distance mobility and task transfers to flexibly open “carriage classrooms” so that officers and men can be educated at all times and influenced everywhere.

The classroom follows the mission, and education follows the wheel. In practice, they adopt the method of “unified planning by the department and independent organization by the battalion and company”, combine the red venues and revolutionary sites along the mission, flexibly organize small speech activities, guide officers and men to learn the history of the party and the army, and understand the red tradition; select hot topics that officers and men are concerned about as the teaching content, and encourage grassroots units to carry out “micro-classroom” activities so that officers and men can understand, be touched, and be inspired.

In order to further enrich the form of education and improve the quality and effectiveness of education, the brigade has purchased a batch of excellent books for officers and men to read and study on the basis of widely soliciting opinions and suggestions from everyone, and encourages officers and men to formulate reading plans according to their own actual situation and share their reading experience in the education classroom.

“From the protagonist’s growth experience, I understand the meaning of ‘persistence’...” At the “Book Fragrance Immerses the Dream of a Strong Army” reading sharing meeting organized by a company of the brigade during the mission, Private Liu Shourui shared his reading experience based on his own experience, which deeply touched his comrades around him.

Three to five minutes is not too short, and three to five people are not too few. The brigade leaders introduced that with the extensive and in-depth development of random education, the “train classroom” has gradually transformed into a frontier position for inheriting the red gene and promoting fine traditions. Not only that, every time they arrive at a training site, they will organize officers and men to conduct on-site education at local red venues and revolutionary sites to further inspire everyone to be determined to strengthen the army and make contributions to the barracks.

新条令·新亮点丨陆军某旅严格按新条令规范连队登记统计事项

来源：中国军网-解放军报 作者：姜紫菡 宋子洵 责任编辑：郭妍菲 2025-05-11

“五多”不整治，基层难减负。纠治”五多”这一顽症痼疾，必须立起法治标尺，以条令为制度利器，压减影响备战打仗的繁文缛节、干扰羁绊、额外负担，确保条令每条每款都落到实处、刚性执行，把广大官兵手脚从形式主义的束缚中解脱出来，轻装上阵、干事创业。

新修订的《中国人民解放军内务条令》对登记统计明确规定：”七本、五簿、三表、一册”，除《航泊日志》由军兵种确定外，其他由军委机关有关部门统一式样和监制。军队单位不得在本条令规定以外，增加连队登记统计事项；确需增加的，由副战区级以上单位规定。

陆军某旅严格按新条令规范连队登记统计事项——

连队”本本”少了 机关作风实了

■姜紫菡 解放军报记者 宋子洵

镜头

时隔一个月，再次到基层了解官兵思想动态，中部战区陆军某旅保卫科张干事直奔训练场。趁着训练间隙，他与官兵坐在一起”拉家常”。走进训练场，扎进”兵堆”里，张干事很快摸清了不少基层的新情况。

该旅开展机动训练。李天文 摄

“过去，我们往往通过查阅谈心交心记录本了解基层官兵思想情况。新修订的共同条令，进一步对连队登记统计事项进行规范，促进机关干部转作风、出实招。”谈及工作方式的变化，张干事颇有感触。

今年 4 月 1 日起，新修订的《中国人民解放军内务条令》正式施行，明确规定：”连队应当认真做好登记统计，真实、准确、及时、规范填写’七本、五簿、三表、一册’”“军队单位不得在本条令规定以外，增加连队登记统计事项；确需增加的，由副战区级以上单位规定”。

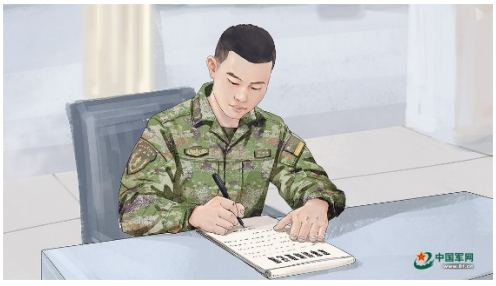
“一下子少了那么多’本本’，会不会影响工作正常运转？”新修订的共同条令实施之初，基层官兵纷纷拍手叫好，可不少机关干部却感到开展工作”没了抓手”。张干事就是其中之一。

当时，恰逢该旅组织机关干部到基层调研官兵思想动态。张干事到几个连队转了大半天，却没问出多少新情况新问题。

为啥出现这种尴尬局面？张干事说，到基层调研时不查”本本”，他一时感觉”无从下手”。

记者了解到，除了机关干部，不少基层干部骨干也习惯通过各种登记统计本掌握工作动态、留存工作痕迹。”过去，连队参照《连务会记录本》，制作下发了《排务会记录本》《班务会记录本》。如今，规定外的’本本’都被废止了。”某连排长张浩林告诉记者，过去不少干部骨干习惯通过”本本”开展工作，时间一长便产生了依赖心理，突然之间”两手空空”，心里有些没底。

“新修订的共同条令一方面为基层官兵减负松绑，另一方面也对干部骨干的能力素质提出了更高要求。”在该旅召开的全体干部大会上，一名旅领导说：依靠”本本”干工作看似抓手具体，实际存在面上应付和作风不实问题。如今，丢掉”本本”这根”拐杖”，要求我们创造性开展好各项工作。”只有切实转变作风、改进方法，倾听官兵心声、摸清基层实情，才能真正把工作抓实、抓活、抓出成效，把官兵从无谓的消耗中解放出来，让大家有更多时间和精力投入练兵备战。”这名领导说。



旅领导的一番话，让张干事深受触动。他积极转变工作作风，将检查工作的方式由查”本本”转变为扎”兵堆”，在深入基层调研中听真话、察实情。与张干事一样，其他机关干部也纷纷主动下连，在零距离接触中与基层官兵打成一片。

最近一段时间，该旅某连王指导员带领干部骨干围绕连队”一人一事”思想工作，多次进行讨论研究。他告诉记者，谈心谈话记录本”下岗”，倒逼他们时刻关注官兵思想动态和想法诉求。谈及这一转变，他深有感触地说：”现在，官兵的情况都装在我脑子里了。”

亲历

“做减法”让我登上”龙虎榜”

■火箭军某连中士军械员兼文书 李 健

绘图：唐建平

登记完军事训练数据，我合上《军事训练登记簿》，一身轻松准备就寝。看着登记簿封面，我突然想起年初那场让我”出糗”的考核——

那天，我正拿着多本登记统计本整理相关数据，耳边突然传来值班员口令声：”集合，自救互救课目考核马上开始！”我连忙抓起作训帽冲出值班室，与战友一起赶往训练场。

不出意料，我的考核成绩勉强及格。与我形成鲜明对比的是，不少以前训练成绩远不如我的战友，在这次考核中把我甩在身后。看着他们一个个被评为”训练之星”，羡慕之余，我心里很不是滋味。

连队登记统计工作繁琐复杂，我担任文书后，经常要加班加点在多个本子上填写记录。遇到临时增设的专项台账，我的活就更多了。”副业”挤占时间，让我难以专心训练，不少课目考核成绩出现下滑。

新修订的共同条令施行后，我认真学习”七本、五簿、三表、一册”的相关规定。起初，我为自己能腾出更多时间投入训练而倍感兴奋，但很快又感到有些不托底：给统计本”做减法”，会不会影响连队抓建管理？直到第一次看到新版《军事训练登记簿》，我心中的担忧才随之化解。

以往上级为便于分析训练成效，要求层层统计战士训练成绩，还要营连分别提供改进建议。新版《军事训练登记簿》没有繁琐的项目，严格依据训练计划，区分专业编组记录训练时间。这样的设计不仅更加科学规范，还节省了人力物力。

前些天，营队接到”值班状态转换”命令，要求半小时内上报人员在位、装备状态等情况。这下子，我平时按照”七本、五簿、三表、一册”规范整理的资料派上了用场。

作为连队文书，我真切感受到，”七本、五簿、三表、一册”是部队正规化建设的重要一环。新修订的共同条令改的是点滴细节，体现的是务实作风，减轻了基层负担，引导大家时刻牢记备战打仗主责主业。

如今，登记统计工作精简规范，让我有了更多时间训练。前几天，旅里组织军械员比武，我取得了不错成绩，还登上了训练”龙虎榜”。

（王兴来、鲁俊整理）

点睛

用制度压减”五多”

■严　壮

“五多”问题的危害，一个重要体现就是影响实战、不够实用、缺乏实效，消耗官兵心力，不利于战斗力建设。

新修订的《中国人民解放军内务条令》，一大亮点就是坚持依法治军，大力压减”五多”。针对”五多”方面的问题，条令对各种情形作出规范，明确了刚性要求，提供了依法治理的依据。

贯彻落实新修订的共同条令，贵在用制度压减”五多”，强化实战、实用之风。

把条令落到实处，把务实高效放在第一位，才能提高工作效率，提升部队反应速度，确保官兵把更多心思和精力投入练兵备战。

条令不是摆设，关键在用。用条令规范做好减”五多”的下篇文章，把基层管理好治理好，才能节约时间成本、人力成本、管理成本。新征程上，各级应做到不作无补之功、不为无益之事，一丝不苟执行条令，树牢集约、规范、精准、高效的工作理念，坚决摒弃繁琐哲学、避免空转内耗，始终保持雷厉风行的作风和冲锋的姿态。

New regulations · New highlights | A Certain Army Brigade Strictly Follows the New Regulations to Standardize the Registration and Statistics of the Company

Source: China Military Network-People’s Liberation Army Daily Author: Jiang Zihan Song Zixun Editor: Guo Yanfei 2025-05-11

If the “five mores” are not rectified, it will be difficult to reduce the burden at the grassroots level. To correct the stubborn disease of “five mores”, it is necessary to set up a rule of law yardstick, use regulations as a system weapon, reduce the red tape, interference and extra burden that affect the preparation for war, ensure that every article and clause of the regulations are implemented and rigidly enforced, and free the hands and feet of the officers and men from the shackles of formalism, so that they can go into battle lightly and start businesses.

The newly revised “Regulations on Internal Affairs of the Chinese People’s Liberation Army” clearly stipulates registration and statistics: “seven books, five books, three tables, and one volume”. Except for the “Navigation Log” which is determined by the military service, the others are unified and supervised by the relevant departments of the Military Commission. Military units shall not add company registration and statistics items beyond the provisions of this regulation; if it is necessary to add, it shall be stipulated by units at or above the deputy theater level.

A certain army brigade strictly regulates company registration and statistics items in accordance with the new regulations——

The company has fewer “books” and the work style of the agency has become more practical

■ Jiang Zihan, PLA Daily reporter Song Zixun

Camera

A month later, Zhang, a security officer of a certain army brigade in the Central Theater Command, went straight to the training ground to understand the ideological dynamics of officers and men at the grassroots level again. Taking advantage of the training interval, he sat with the officers and men to "chat". Entering the training ground and immersing himself in the "pile of soldiers", Officer Zhang quickly found out a lot of new situations at the grassroots level.

The brigade carried out mobile training. Photo by Li Tianwen

"In the past, we often understood the ideological situation of grassroots officers and men by checking the heart-to-heart record book. The newly revised common regulations further regulate the registration and statistics of the company, and promote the cadres of the department to change their work style and take practical measures." Speaking of the changes in working methods, Officer Zhang was quite touched.

Starting from April 1 this year, the newly revised "People's Liberation Army Internal Affairs Regulations" was officially implemented, which clearly stipulates: "The company should do a good job in registration and statistics, and fill in the "seven books, five books, three tables, and one book" truthfully, accurately, timely, and in a standardized manner." "Military units shall not add company registration and statistics items beyond the provisions of this regulation; if it is necessary to add, it shall be stipulated by the deputy theater level and above units."

"Will the normal operation of the work be affected by the loss of so many "books" at once?" At the beginning of the implementation of the newly revised common regulations, grassroots officers and men applauded, but many cadres felt that they had "no grip" in carrying out their work. Zhang is one of them.

At that time, the brigade organized cadres to go to the grassroots to investigate the ideological dynamics of officers and men. Zhang went to several companies for most of the day, but did not ask many new situations and new problems.

Why did this embarrassing situation occur? Zhang said that when he went to the grassroots to investigate without checking the "books", he felt "nowhere to start" for a while.

The reporter learned that in addition to the cadres in the organs, many grassroots cadres and backbones are also accustomed to grasp the work dynamics and keep work traces through various registration and statistical books. "In the past, the company referred to the "Company Affairs Meeting Record Book" and issued the "Platoon Affairs Meeting Record Book" and "Squad Affairs Meeting Record Book". Now, all the "books" outside the regulations have been abolished." Zhang Haolin, a platoon leader of a certain company, told reporters that in the past, many cadres and backbones were accustomed to working through "books". After a long time, they developed a dependence mentality. Suddenly, they were "empty-handed" and felt a little unsure.

"On the one hand, the newly revised common regulations reduce the burden on grassroots officers and men, and on the other hand, they also put forward higher requirements for the ability and

quality of cadres and backbones." At the general cadre meeting held by the brigade, a brigade leader said: Relying on "books" to do work seems to be a specific grasp, but in fact there are problems of superficial coping and unrealistic work style. Now, throwing away the "crutch" of "books" requires us to carry out various tasks creatively. "Only by truly changing the work style, improving methods, listening to the voices of officers and men, and finding out the real situation at the grassroots level can we truly grasp the work, make it lively, and achieve results, free officers and men from unnecessary consumption, and allow everyone to devote more time and energy to training and preparing for war." The leader said.

The words of the brigade leader deeply touched Zhang. He actively changed his work style, changing the way of checking work from checking "books" to "soldiers", listening to the truth and observing the facts in in-depth grassroots research. Like Zhang, other cadres from the organs also took the initiative to go to the company and get along with the grassroots officers and men in close contact.

Recently, Wang, the political instructor of a company of the brigade, led the cadres and backbones to discuss and study the ideological work of "one person, one thing" of the company many times. He told reporters that the "layoff" of the record book for heart-to-heart talks forced them to always pay attention to the ideological dynamics and ideas of officers and men. Talking about this change, he said with deep feeling: "Now, the situation of officers and men is all in my mind."

Personal experience

"Subtraction" made me on the "Dragon and Tiger List"

■Li Jian, a sergeant and clerk of a certain company of the Rocket Force

Drawing: Tang Jianping

After registering the military training data, I closed the "Military Training Registration Book" and prepared to go to bed with ease. Looking at the cover of the registration book, I suddenly remembered the assessment that made me "embarrassed" at the beginning of the year-

That day, I was holding several registration and statistics books to organize relevant data, and suddenly I heard the duty officer's command: "Assemble, the self-rescue and mutual rescue course assessment will begin immediately!" I quickly grabbed the training cap and rushed out of the duty room, and rushed to the training ground with my comrades.

As expected, my assessment score barely passed. In sharp contrast to me, many comrades who had previously trained far worse than me left me behind in this assessment. Watching them being rated as "training stars" one by one, I felt very uncomfortable in addition to envy.

The registration and statistics work of the company is cumbersome and complicated. After I became a clerk, I often had to work overtime to fill in records in multiple notebooks. When I encountered a special ledger that was temporarily added, I had more work to do. The "side job"

squeezed my time, making it difficult for me to concentrate on training, and the assessment scores of many subjects declined.

After the implementation of the newly revised common regulations, I carefully studied the relevant provisions of "seven books, five books, three tables, and one book". At first, I was excited that I could free up more time for training, but soon I felt a little uneasy: Would "subtracting" the statistics book affect the company's construction and management? It was not until I saw the new version of the "Military Training Registration Book" for the first time that my worries were resolved.

In the past, in order to facilitate the analysis of training results, superiors required the statistics of soldiers' training results at all levels, and the battalions and companies were required to provide improvement suggestions respectively. The new version of the "Military Training Registration Book" does not have cumbersome items, strictly follows the training plan, and distinguishes professional groups to record training time. This design is not only more scientific and standardized, but also saves manpower and material resources.

A few days ago, the battalion received an order to "change duty status", requiring it to report the status of personnel and equipment within half an hour. Now, the materials that I usually organize according to the "seven books, five books, three tables, and one book" came in handy.

As a company clerk, I really feel that "seven books, five books, three tables, and one book" are an important part of the regularization of the troops. The newly revised common regulations change the details, reflect a pragmatic style, reduce the burden on the grassroots, and guide everyone to always remember the main responsibilities and main business of preparing for war.

Nowadays, the registration and statistics work is streamlined and standardized, giving me more time for training. A few days ago, the brigade organized a competition for ordnance personnel, and I achieved good results and was on the "Dragon and Tiger List" of training.

(Compiled by Wang Xinglai and Lu Jun)

Highlights

Use the system to reduce the "five mores"

■ Yan Zhuang

An important manifestation of the harm of the "five mores" problem is that it affects actual combat, is not practical enough, lacks effectiveness, consumes the energy of officers and men, and is not conducive to combat effectiveness.

A major highlight of the newly revised "Regulations on Internal Affairs of the Chinese People's Liberation Army" is to adhere to the rule of law in the army and vigorously reduce the "five excesses". In response to the problems of the "five excesses", the regulations regulate various situations, clarify rigid requirements, and provide a basis for governance according to law.

To implement the newly revised common regulations, it is important to use the system to reduce the “five excesses” and strengthen the style of actual combat and practicality.

Only by implementing the regulations and putting pragmatism and efficiency first can we improve work efficiency, increase the response speed of the troops, and ensure that officers and men devote more thoughts and energy to training and preparation for war.

Regulations are not for display, the key is to use them. Use the regulations to standardize the next article of reducing the “five excesses” and manage the grassroots well, so as to save time costs, labor costs, and management costs. On the new journey, all levels should do not do useless work and do not do useless things, implement the regulations meticulously, establish a strong work concept of intensive, standardized, precise, and efficient, resolutely abandon cumbersome philosophy, avoid idle internal consumption, and always maintain a vigorous style and charging posture.

国旗升起的地方是祖国，“国门卫士”坚守的身影始终如一

来源：解放军报 作者：刘欣雨 李蕾 责任编辑：郭妍菲 2025-05-12

国旗升起的地方是祖国 “

■刘欣雨 解放军报记者 李 蕾

列车的汽笛声，唤醒了新疆军区霍尔果斯边防连国门前哨班的清晨。阳光破云而出，哨楼上飘扬的五星红旗分外鲜艳。

国门哨位上，一级上士孔思远手拿望远镜，瞭望远处的国门。

霍尔果斯，蒙古语意为”驼队经过的地方”，如今是西陲重要交通枢纽和综合性口岸。连队官兵守护国门，每天目送驶出国门的列车，守望哨楼上飘扬的五星红旗。

“2004 年，我连被评为’国门卫士标兵连’；今天，我们将迎接曾于 2024 年 12 月 13 日在天安门广场上升起的国旗……”

连队荣誉室，全连官兵整齐列队，共同见证这面国旗”入列”连队荣誉室的光荣时刻。

此刻仰望国旗，跟随连长从首都北京迎回国旗的孔思远，难掩激动之情。

“香港回归祖国那年，我们村只有一台电视，我和小伙伴怀着激动的心情收看电视报道……”望着冉冉升起的五星红旗，孔思远理解了老师说过的一句话——”国旗象征着祖国”。

2012 年，孔思远参军入伍，来到霍尔果斯边防连服役。如今，他已是连队兵龄最长的兵。”只要连队需要我，我会一直守下去。”他说，这是”国门卫士”对祖国的承诺。

国旗升起的地方是祖国。清晨，首都北京，国旗护卫队官兵迎着朝阳踏上金水桥。几小时后，千里之外的西陲口岸，”国门卫士”沐浴着阳光踏上巡逻路。站在国旗下，他们共同守卫着祖国。

望着这面国旗，下士艾利亚斯想起了家人。

距离艾利亚斯家门口不远处驻守着一个连队。儿时，他和家人站在自家院中，便能看见五星红旗冉冉升起。每天，当《义勇军进行曲》的旋律响起，一家人便会站在小院中望着不远处的一抹红色，大声唱起国歌。

后来连队移防，那团燃烧的火焰依旧在艾利亚斯的脑海中跃动。高中毕业后，他参军入伍。在新兵营表现突出的他，被推选为升旗手。

国旗见证着官兵忠诚的守望。坚守的岁月，无声地在边防军人的脸上留下痕迹，也将一份深情深埋在他们心中。

今年是一级上士陈贵川驻守国门的第 16 个春秋。在他的记忆中，北疆的盛夏阳光热烈，官兵站哨一天归来，皮肤都被晒脱了皮……陈贵川站哨的界碑点位，曾是一处网红景点，许多游客慕名前来”打卡”留影。

那年国庆节前夕，陈贵川在界碑旁执勤，一个小女孩跑到哨位旁，将一面小国旗递给他。此刻的国门前人头攒动，每名游客手中都拿着一面国旗，这一幕，让他这位”界碑前的哨兵”内心充满自豪。

对于排长艾孜买提来说，每次眺望边防线，他都会想起他的父亲。

艾孜买提的父亲曾是一名在西北边防服役的老兵。从小到大，父亲常给他讲戍边卫国的故事，告诉他”何为国、何为家”。

后来，艾孜买提也成了一名边防军人。一次巡逻途中，巡逻队遇到暴风雪迷了路，官兵在雪原中走了几个小时，直到看到哨楼上空飘扬的五星红旗，每个人都热泪盈眶。

在界碑旁站哨，看着界碑上的”中国”两字，列兵胡浪总觉得亲切而又自豪。

“我曾有幸在此触摸过界碑……”小时候，胡浪曾跟着父母到霍尔果斯口岸旅游。

那时，母亲握着他的手在界碑上描摹”中国”两字。时光流传，15年后再次挺立在界碑前，他已成长为一名”国门卫士”，守望界碑是扛在肩头的责任。

“要当就当优秀的兵。”自入伍那天起，胡浪便这样激励自己。

连队有个传统，只有优秀的兵，才能入选霍尔果斯国门前哨班。为此，胡浪训练争着上、执勤站排头，还被连队遴选为荣誉室讲解员……

“我是中国人民解放军军人，我宣誓……” 那天的界碑前，前哨班组织界碑描红和宣誓仪式。胡浪拿起毛笔，认真为”中国”二字描红。夕阳西下，胡浪与巡逻官兵踏上返程路。他们脚下，路向前延伸；远方，飘扬的五星红旗，指引着他们前进的方向。

无论时代如何变迁，国门前，官兵们坚守的身影始终如一。他们将热血和忠诚融入这片土地，成为霍尔果斯一道亮丽风景线。

The Place Where the National Flag Is Raised Is the Motherland, and the Figure of the “National Gate Guards” Is Always the Same

Source: PLA Daily Author: Liu Xinyu Li Lei Editor: Guo Yanfei 2025-05-12

The place where the national flag is raised is the motherland

■Liu Xinyu PLA Daily reporter Li Lei

The train whistle awakened the morning of the national gate outpost squad of the Horgos Border Defense Company of the Xinjiang Military Command [District]. The sun broke through the clouds, and the five-star red flag flying on the sentry tower was particularly bright.

At the national gate sentry post, First Sergeant Kong Siyuan held a telescope and looked at the national gate in the distance.

Horgos, which means “the place where the camel caravan passed by” in Mongolian, is now an important transportation hub and comprehensive port in the west. The company’s officers and men guard the national gate, watching the trains leaving the country every day and watching the five-star red flag flying on the sentry tower.

“In 2004, our company was rated as the ‘National Gate Guard Model Company’; today, we will welcome the national flag that was raised in Tiananmen Square on December 13, 2024...”

In the company’s honor room, all the officers and men of the company lined up neatly to witness the glorious moment when the national flag was “listed” in the company’s honor room.

At this moment, looking up at the national flag, Kong Siyuan, who followed the company commander to welcome the national flag back from the capital Beijing, could not hide his excitement.

“The year when Hong Kong returned to the motherland, there was only one TV in our village. My friends and I watched the TV report with excitement...” Looking at the rising five-star red flag, Kong Siyuan understood what the teacher said-”The national flag symbolizes the motherland.”

In 2012, Kong Siyuan joined the army and came to Horgos Border Defense Company to serve. Now, he is the soldier with the longest service in the company. “As long as the company needs me, I will keep guarding.” He said that this is the promise of the “national gate guard” to the motherland.

Where the national flag is raised is the motherland. In the early morning, in the capital Beijing, the officers and men of the national flag guard stepped onto the Jinshui Bridge facing the rising sun. A few hours later, at the western port thousands of miles away, the “national gate guards” set out on patrol in the sunshine. Standing under the national flag, they jointly guarded the motherland.

Looking at this national flag, Corporal Elias thought of his family.

Not far from Elias’s doorstep was a company stationed. When he was a child, he and his family stood in their yard and could see the five-star red flag rising slowly. Every day, when the melody of “March of the Volunteers” sounded, the family would stand in the yard and look at a touch of red not far away, singing the national anthem loudly.

Later, when the company moved, the burning flame still jumped in Elias’ mind. After graduating from high school, he joined the army. He was elected as the flag-raiser for his outstanding performance in the recruit camp.

The national flag witnessed the loyal watch of the officers and men. The years of perseverance silently left traces on the faces of border guards and buried deep affection in their hearts.

This year is the 16th year that Sergeant First Class Chen Guichuan has been stationed at the national border. In his memory, the midsummer sun in northern Xinjiang is hot, and the soldiers’ skin is sunburned after a day of standing guard... The boundary monument where Chen Guichuan stood guard was once a popular online attraction, and many tourists came to “check in” and take pictures.

On the eve of National Day that year, Chen Guichuan was on duty next to the boundary monument. A little girl ran to the sentry post and handed him a small national flag. At this moment, there were crowds of people in front of the national gate, and every tourist held a national flag in his hand. This scene made him, the “sentinel in front of the boundary monument”, feel proud.

For Platoon Leader Aizimati, every time he looks at the border line, he will think of his father.

Aizimati’s father was a veteran who served in the northwest border. From childhood to adulthood, his father often told him stories about defending the border and the country, and told him “what is a country and what is a home”.

Later, Aizimaiti also became a border guard. During a patrol, the patrol team encountered a snowstorm and lost their way. The officers and men walked in the snow for several hours until they saw the five-star red flag flying over the sentry tower. Everyone was in tears.

Standing guard next to the boundary marker and looking at the word “China” on the boundary marker, Private Hu Lang always felt cordial and proud.

“I was fortunate to touch the boundary marker here...” When he was a child, Hu Lang followed his parents to travel to Horgos Port.

At that time, his mother held his hand and traced the word “China” on the boundary marker. Time has passed, and 15 years later, he stood in front of the boundary marker again. He has grown into a “national gate guard”, and guarding the boundary marker is a responsibility on his shoulders.

“If you want to be, be an excellent soldier.” Since the day he joined the army, Hu Lang has motivated himself in this way.

The company has a tradition that only excellent soldiers can be selected for the Horgos National Gate Frontier Squad. To this end, Hu Lang competed for training and was the first on duty. He was also selected by the company as the interpreter of the honor room...

“I am a soldier of the Chinese People’s Liberation Army, I swear...” In front of the boundary monument that day, the outpost squad organized a boundary monument red-painting and oath-taking ceremony. Hu Lang picked up the brush and carefully painted the word “China” in red. As the sun set, Hu Lang and the patrol officers and men set out on the return journey. Under their feet, the road stretched forward; in the distance, the fluttering five-star red flag guided their direction.

No matter how the times change, the soldiers’ figures remain the same in front of the national gate. They integrate their passion and loyalty into this land and become a beautiful landscape in Horgos.

@带兵人：交任务、压担子也要使巧劲

来源：解放军报 作者：李延志 责任编辑：杜圣智 2025-05-13

压担子也要使巧劲

■第 74 集团军某旅某连干部 李延志

前不久，旅里组织基础课目抽考，排长谷雨轩与战友密切配合，取得总评优秀。他的成长进步让我懂得了一个带兵道理：交任务、压担子也要使巧劲。

谷雨轩是一名大学生士兵提干的新排长。刚到连队时，他不仅熟悉基层工作，还有一定组训经验。为此，我对他寄予厚望。一次，得知小谷参加过通信值班，我便将”通信装备操作与使用”课目的教学任务交给了他，希望通过压担子，帮助他快速成长。

接到任务后，小谷每天埋头查资料写教案，晚上经常加班研究装备性能。看着他干劲十足的样子，我暗自为他高兴，觉得他一定能够顺利踢开”头三脚”。

然而，连队组织授课那天，在示范使用装备时，小谷虽然动作迅速、操作熟练，但在分步讲解时却变得语无伦次。特别是看到台下战士因为他的讲解不到位小声议论时，小谷更是慌了神。

“我一站上讲台面对那么多战友，就会不由自主地紧张……”授课结束，小谷满脸失落，低着头向我解释。原来，他曾在特种部队服役，虽然有一定专业基础，但从未担任过教练员，缺乏相关经验，所以初次上讲台，难免少了自信。

听了小谷的解释，我恍然大悟：由于自己片面认为”会做就会教”，没有深入了解情况，就一味给小谷压担子，导致他第一次亮相就出了糗。

“新排长拔节成长，需要压担子，但也要讲究方式方法。”深入思考后，我决定改变培养思路，从提升他们的岗位任职能力做起。我先是安排谷雨轩担任连队值班员，让他在学中干、干中学；同时，指定优秀排长与他结成对子，分享带兵心得、传授管理经验，让他更快熟悉连队情况。

鉴于谷雨轩当过特战队员，我便鼓励他分享训练经验，这下”英雄有了用武之地”：战术训练场上，小谷教战友们如何合理运用战术动作，强化实战思维；体能训练时，小谷为大家讲解间歇跑训练法，不少官兵因此提高了长跑成绩……渐渐地，小谷得到大家认可，也成功克服了紧张心理。

今年初，旅里组织”钢铁工兵竞技”比武。考虑到小谷是合适人选，我推荐他带队参加。备赛期间，他结合以往经验，科学制订训练计划，并根据队员特点、能力强弱灵活调整，带着大家反复研练，最终斩获全旅第一名。

从初入基层的迷茫无助，到后来的独当一面，谷雨轩的成长转变让我懂得，给新排长压担子，不能简单地甩任务、交工作、用蛮力，而是要结合个人特点科学施策，把他们的优势、干劲激发出来，然后再循序渐进施力加压，这样才能让他们快速进入角色，提升能力、收获成长。

@Leader: You Need to Be Clever When Assigning Tasks and Putting Pressure on Others

Source: PLA Daily Author: Li Yanzhi Editor: Du Shengzhi 2025-05-13

You need to be clever when putting pressure on others

■Li Yanzhi, a cadre of a company of a brigade of the 74th Group Army

Not long ago, the brigade organized a random test on basic subjects. Platoon leader Gu Yuxuan worked closely with his comrades and achieved excellent overall evaluation. His growth and

progress taught me a principle of leading soldiers: you need to be clever when assigning tasks and putting pressure on others.

Gu Yuxuan is a new platoon leader who was promoted from a college student soldier. When he first arrived at the company, he was not only familiar with grassroots work, but also had certain training experience. For this reason, I have high hopes for him. Once, I learned that Xiao Gu had participated in communication duty, so I gave him the teaching task of the "Operation and Use of Communication Equipment" course, hoping to help him grow quickly by putting pressure on others.

After receiving the task, Xiao Gu buried his head in checking materials and writing lesson plans every day, and often worked overtime at night to study equipment performance. Seeing his energetic look, I secretly felt happy for him and thought that he would be able to kick the "first three kicks" smoothly.

However, on the day when the company organized the class, when demonstrating the use of equipment, although Xiao Gu was quick and skilled in operation, he became incoherent when explaining step by step. Especially when he saw the soldiers below the stage whispering because of his inadequate explanation, Xiao Gu was even more panicked.

"When I stand on the podium and face so many comrades, I will be nervous involuntarily..." After the class, Xiao Gu looked disappointed and explained to me with his head down. It turned out that he had served in the special forces. Although he had a certain professional foundation, he had never served as an instructor and lacked relevant experience. Therefore, he was inevitably less confident when he first went to the podium.

After listening to Xiao Gu's explanation, I suddenly realized: because I unilaterally believed that "if you can do it, you can teach it", I did not have a deep understanding of the situation, and blindly put pressure on Xiao Gu, which led to his first appearance.

"New platoon leaders need to bear heavy responsibilities as they grow rapidly, but they also need to pay attention to methods and approaches." After deep thinking, I decided to change the training ideas and start from improving their job performance. I first arranged Gu Yuxuan to be the company's duty officer, so that he could learn by doing; at the same time, I designated excellent platoon leaders to pair up with him to share their experience in leading soldiers and impart management experience, so that he could get familiar with the company's situation more quickly.

Given that Gu Yuxuan had been a special operations soldier, I encouraged him to share his training experience, and now "the hero has a place to use his skills": on the tactical training ground, Xiao Gu taught his comrades how to use tactical actions reasonably and strengthen practical thinking; during physical training, Xiao Gu explained the interval running training method to everyone, and many officers and men improved their long-distance running results... Gradually, Xiao Gu was recognized by everyone and successfully overcame his nervousness.

At the beginning of this year, the brigade organized a “Steel Engineer Competition”. Considering that Xiao Gu is a suitable candidate, I recommended him to lead the team to participate. During the preparation period, he combined past experience to scientifically formulate training plans, and flexibly adjusted them according to the characteristics and strengths of the team members. He led everyone to repeatedly practice and finally won the first place in the brigade.

From the confusion and helplessness when he first entered the grassroots to his later independence, Gu Yuxuan’s growth and transformation made me understand that when putting pressure on new platoon leaders, we cannot simply throw away tasks, hand over work, and use brute force, but we must combine personal characteristics to scientifically formulate policies, stimulate their advantages and enthusiasm, and then gradually apply pressure, so that they can quickly enter the role, improve their abilities, and gain growth.

(Compiled by Deng Lianjun, special correspondent of the People’s Liberation Army Daily)

流动的床铺 让新排长补上知兵这一课

来源：解放军报 作者：韦仕麒 责任编辑：杜圣智 2025-05-13

流动的排长床铺

■陆军某部某连排长 韦仕麒

茅文宽绘

“欢迎您，再次成为二排五班一员！”上个周末，我把自己的被褥从四班搬到了五班，刚一进门，大家就围拢过来嘘寒问暖。望着床头棱角分明的军被，我不由想起自己初到二排发生的事。

下连那天，我被安排住进二排五班宿舍。为了和我尽快熟络起来，上午训练间隙，五班班长老汪笑着说：”排长，咱们来个基础体能比拼吧！”看着他一米八五的身高和健硕的小臂，

文书出身的我深知实力不如，便以临时要写连务会材料为由”落荒而逃”。就在此时，我瞥见班里几名战士在窃窃私语。

“五班是住不下去了。”下午，趁大家外出训练，我悄悄把床铺挪到了六班。本以为能安心住一段时间，没想到再次”节外生枝”。

那天晚上，我查哨归来，刚要回班休息，就听到门里传出对话：”你说排长为啥非要住我们班，不会是来监视我们的吧”“我睡觉轻，他夜里查铺查哨肯定会吵醒我”……我在门口站了很久，心中五味杂陈。

“算了，还是搬回五班吧！”我想了又想，待大家熟睡后，抱起被褥轻手轻脚往外走。

“排长，您来我们班住吧！”突然，刚下夜哨的四班陈班长从后面叫住了我。一番询问得知，四班列兵小梁最近情绪低落，陈班长几次找他谈心都收效甚微，便想让我来开导。就这样，我住进了四班。

后来了解到，一向要强的小梁，在几次考核中成绩都不理想，感到十分失落，甚至开始怀疑自己。为了让小梁重拾信心，我一有空就拉着他聊天，带着他训练，还用自己的成长经历鼓励他。一个多月后，小梁各方面成绩都有了进步，我与四班战士也渐渐打成了一片。

本以为了解了四班，就对全排的基本情况有了全面认识。然而，实际情况并非如此。

一天下午，我组织排里人员整理战备器材库。就在工作进入最后阶段时，我看到两名战士坐在一旁，便径直过去责问：”为什么不一鼓作气完成任务再休息？”

见我有些生气，六班副班长小邹赶忙跑过来解释：”最近训练任务较重，这两名同志旧伤复发，我安排他们暂时休息一下。”说着，小邹拉起上等兵小祝的裤腿。

看着小祝红肿的脚踝，我内疚不已：之所以会误解战士，还是因为对他们不够了解和熟悉。

回到宿舍，我陷入了自责，脑海中反复回忆这段时间与四班战士共同训练生活的画面：从起初的无话可讲，到后来的无话不谈，我渐渐意识到，想要准确掌握战士的思想底数，走进他们的内心世界，就要和他们吃住在一起、学训在一起、娱乐在一起。

宿舍是一个能够让人放松下来的场所，每天紧张的训练过后，大家回到宿舍聊聊家常、说说心事，压力能得到极大释放。有时，战士们的真实想法，就藏在这样的闲谈中。如果不和他们住在一起，就很难了解到。

如今的年轻战士思想活跃、个性鲜明，他们的想法、情绪都会随着训练节奏、任务强度、家庭情况等因素不断变化。带兵人想要抓住他们的”活思想”，自己也必须”动”起来。于是，我决定每两周换一个班住宿，同时准备了一个笔记本，随时记录换班住宿过程中了解到的困难问题，并逐一想办法解决。

一段时间过后，战士们渐渐喜欢和我交流，遇到事情也习惯先听听我的意见，大家的心贴得越来越近，排里凝聚力、向心力越来越强。

一张小小的床铺，不只是休息放松的地方，更是心灵沟通的"驿站"。如今在我们连，排长定时换班住宿已成常态。流动的床铺、永远的家，通过这种方式，我们这些新排长补上了知兵这一课，为今后带兵育人打下坚实基础。

Mobile Beds Allow New Platoon Leaders to Learn the Lesson of Knowing Soldiers

Source: PLA Daily Author: Wei Shiqi Editor: Du Shengzhi 2025-05-13

Mobile platoon leader beds

■ Wei Shiqi, platoon leader of a company of a certain army unit

Drawing by Mao Wenkuan

"Welcome, you are once again a member of the fifth squad of the second platoon!" Last weekend, I moved my bedding from the fourth squad to the fifth squad. As soon as I entered the door, everyone gathered around to ask about my well-being. Looking at the angular military blanket at the head of the bed, I couldn't help but think of what happened when I first arrived at the second platoon.

On the day of joining the company, I was arranged to live in the barracks of the fifth squad of the second platoon. In order to get familiar with me as soon as possible, during the morning training break, the squad leader of the fifth squad, Lao Wang, smiled and said, "Platoon leader, let's have a basic physical fitness competition!"

"The fifth squad can't live here anymore." In the afternoon, while everyone was out training, I quietly moved my bed to the sixth squad. I thought I could live there peacefully for a while, but I didn't expect that "something unexpected would happen" again.

That night, when I came back from the sentry duty and was about to go back to the class to rest, I heard a conversation from the door: "Why do you think the platoon leader must live in our class? He won't come to monitor us, right?" "I sleep lightly, and he will definitely wake me up when he checks the beds and sentries at night"... I stood at the door for a long time, feeling mixed emotions.

"Forget it, let's move back to the fifth squad!" I thought about it again and again, and after everyone fell asleep, I picked up the quilt and walked out quietly.

"Platoon leader, come live in our class!" Suddenly, squad leader Chen of the fourth squad, who had just finished his night sentry, called me from behind. After some inquiries, I learned that private Xiao Liang of the fourth squad had been in a low mood recently. Squad leader Chen had talked to

him several times but to little effect, so he wanted me to come and enlighten him. In this way, I moved into the fourth squad.

Later, I learned that Xiao Liang, who had always been strong, did not perform well in several assessments. He felt very disappointed and even began to doubt himself. In order to help Xiao Liang regain his confidence, I would chat with him whenever I had time, take him to train, and encourage him with my own growth experience. After more than a month, Xiao Liang's performance in all aspects has improved, and I have gradually become one with the soldiers in the fourth squad.

I thought that after understanding the fourth squad, I would have a comprehensive understanding of the basic situation of the entire platoon. However, the actual situation is not the case.

One afternoon, I organized the platoon personnel to sort out the combat readiness equipment warehouse. Just when the work entered the final stage, I saw two soldiers sitting aside, and I went straight over to ask: "Why don't you complete the task in one go before taking a rest?"

Seeing that I was a little angry, Xiao Zou, the deputy squad leader of the sixth squad, hurried over to explain: "The training tasks are heavy recently, and the old injuries of these two comrades have relapsed. I arranged for them to take a temporary rest." As he said, Xiao Zou pulled up the trouser legs of Corporal Xiao Zhu.

Looking at Xiao Zhu's swollen ankle, I felt guilty: the reason why I misunderstood the soldiers was because I didn't know them well enough.

Back in the barracks, I fell into self-blame, and repeatedly recalled the scenes of training and life with the soldiers of the fourth squad during this period: from having nothing to say at the beginning to talking about everything later, I gradually realized that if I want to accurately grasp the soldiers' thoughts and enter their inner world, I have to eat, live, study and train with them, and have fun with them.

The barracks is a place where people can relax. After the intense training every day, everyone returns to the barracks to chat about family matters and talk about their worries, and the pressure can be greatly released. Sometimes, the real thoughts of the soldiers are hidden in such small talk. If you don't live with them, it is difficult to understand.

Today's young soldiers are active in thinking and have distinct personalities. Their thoughts and emotions will change with factors such as training rhythm, task intensity, and family situation. If the leaders want to grasp their "living thoughts", they must also "move" themselves. So, I decided to change the accommodation of a class every two weeks, and prepared a notebook to record the difficulties I learned during the change of accommodation at any time, and find ways to solve them one by one.

After a period of time, the soldiers gradually liked to communicate with me, and they were used to listening to my opinions first when encountering things. Everyone's hearts were getting closer and closer, and the cohesion and centripetal force in the platoon were getting stronger and stronger.

A small bed is not only a place to rest and relax, but also a "station" for spiritual communication. Now in our company, it has become a normal practice for platoon leaders to change shifts and stay regularly. Mobile beds, permanent homes, in this way, we new platoon leaders have learned the lesson of knowing soldiers, laying a solid foundation for leading soldiers and educating people in the future.

新组建单位如何破解人才短缺问题 这个旅有妙招

来源：解放军报 作者：陈鸿斌 廖晓彬 喻润东 责任编辑：杜圣智 2025-05-13

机关按需"下单" 基层精准"荐才"

■陈鸿斌 解放军报特约记者 廖晓彬 喻润东

写在前面

近年来，国防和军队改革持续深入推进，很多部队增设了新岗位、列装了新装备，对官兵素质提出更高要求。但一些新组建单位却面临人才短缺问题，亟待解决。

陆军某旅着眼部队转型和任务需要，打破常规做法，在旅党委领导下，由机关根据岗位编制向基层征集人才，基层结合机关需求精准选配人才，通过科学定岗等方式，加快培养人才，取得明显成效。其经验做法值得各基层单位尤其是新组建部队借鉴。

初夏时节，陆军某旅各营连公示栏前，官兵们三五成群围着机关张贴的一份"招才"通知议论纷纷。

"下阶段预计扩充中高级修理专业技师 2 人、光电对抗专业技师 1 人、爆破专业技师 3 人……"记者看到，这份通知不仅明确了相应岗位的专业人数和选配标准，还在火力引导、无人智能等新域新质作战力量建设上有所侧重，要求各营连党组织择优遴选推荐。

经过了解，记者得知，这样的"招才"方式在该旅不是第一次，很多基层官兵已经在新的岗位发光发热。以往，选培专业骨干一般由各营连提报需求，机关根据指标名额筛选合适人员安排学习培训。然而，由于该旅正处于改革调整期，一批新组建单位及新装备的出现，导致部分官兵能力素质难以适应新的岗位要求。

二级上士陈曦的经历颇具代表性。前些年，该旅组建某新型无人机分队。当时，由于缺乏相关专业骨干，陈曦所在侦察营考虑他素质全面，且有无人机操作经验，决定让他转岗当无人机操作手。

然而，转岗容易适岗难。学历层次低、专业技能欠缺……几次训练后，陈曦和一同转岗来的战友都不同程度感到，自身能力与新岗位要求还有很大差距。

“那段时间，强烈的’本领恐慌’倒逼着我们没日没夜地学理论、练操作。”陈曦告诉记者，为了提升专业能力，旅队为他们临时组织了补差补弱集训班，尽最大努力协调场地、教材和装备，同时邀请友邻单位相关专业骨干、院校专家现场指导帮带。

但这种突击式的人才培养方式，不仅给旅里增加了统训压力，更让受训官兵吃不消。这让该旅领导认识到：部队转型建设期间，只有提前精准培养适岗人才，制订体系化培养方案，才能确保”人才供给侧”与”战场需求侧”精准对接，实现人岗匹配、人尽其才。

为此，他们打破专业骨干的选培模式，统筹全旅现阶段人才需求，聚焦联合作战指挥员、小特专业教练员、新质课目战斗员等紧缺人才岗位，向基层下发”人才订单”，拥有一定专业匹配度和对此专业感兴趣的官兵均可报名。经党组织考察推荐，确定人选后，再由机关各业务科室结合人员能力特点，制订”一人一策”，进行对口培养。

“受益于’订单式’人才培养模式，我重新审视了自己的职业规划，确定了新的成长目标。”采访中，某连二级上士王云龙讲述了自己的经历。

去年初，该旅下发光电对抗专业人才”订单”，对光电专业感兴趣的王云龙主动报了名。随即，结合王云龙个人情况，该旅信息保障科第一时间为他申请光电技师职业技能鉴定考核、提供复习资料，并同步跟踪训练进展。经过半年多的努力，王云龙能力提升很快，顺利通过光电技师职业技能鉴定，成功转岗。

据了解，新的人才培养模式施行近一年来，该旅仅光电对抗专业缺编率就较去年减少了70%，人力指标与战力指标匹配率大幅提升。此外，随着专业人才不断充实到各个岗位，机关下发的”订单”也从”解决岗位空缺”向”锻造专精人才”转变。

有一次，该旅得到选派人员赴外单位学习培训、锤炼提升联合作战能力的机会。为了公平起见，他们将这些指标以”订单”形式下发至基层。某摩步营段营长凭借多次参加联演联训的经历，在众多报名者中脱颖而出。学成归来，段营长不仅总结出多项创新成果，还将其应用到基础训练和重大演训任务中，取得良好效果。

该旅人力资源科管科长介绍，下一步，他们将结合部队任务需要，动态调整育人方式方法，形成更加有利于人才成长的培养机制、有利于人尽其才的使用机制和有利于人才脱颖而出的竞争机制，使人才队伍建设的”准星”始终对准战斗力建设的”靶心”。

How Can Newly Formed Units Solve the Problem of Talent Shortage? This Brigade Has a Good Idea

Source: PLA Daily Author: Chen Hongbin Liao Xiaobin Yu Rundong Editor: Du Shengzhi 2025-05-13

Organizations “place orders” on demand and grassroots “recommend talents” accurately

■ Chen Hongbin PLA Daily Special Correspondent Liao Xiaobin Yu Rundong

Written in the front

In recent years, national defense and military reforms have continued to advance in depth. Many troops have added new positions and equipped new equipment, which have put forward higher requirements for the quality of officers and men. However, some newly formed units are facing a shortage of talents, which needs to be solved urgently.

A certain brigade of the Army focuses on the transformation of the troops and the needs of the tasks, breaking the conventional practices. Under the leadership of the brigade Party Committee, the organs recruit talents from the grassroots according to the post establishment, and the grassroots accurately select talents according to the needs of the organs. Through scientific post determination and other methods, the training of talents has been accelerated and significant results have been achieved. Its experience and practices are worth learning from for all grassroots units, especially newly formed troops.

In early summer, in front of the bulletin boards of the battalions and companies of a certain army brigade, officers and men gathered in groups of three or five to discuss a “recruitment” notice posted by the department.

“In the next stage, it is expected to expand the number of mid- and senior repair technicians by 2, optoelectronic countermeasure technicians by 1, and blasting technicians by 3...” The reporter saw that this notice not only clarified the number of professionals and selection standards for the corresponding positions, but also focused on the construction of new domains and new qualities of combat forces such as fire guidance and unmanned intelligence, requiring the Party organizations of each battalion and company to select and recommend the best.

After understanding, the reporter learned that this “recruitment” method is not the first time in the brigade, and many grassroots officers and men have already shined in their new positions. In the past, the selection and training of professional backbones was generally submitted by each battalion and company, and the department selected suitable personnel according to the quota and arranged learning and training. However, as the brigade is in a period of reform and adjustment, a number of newly formed units and new equipment have emerged, making it difficult for some officers and men to adapt to the new job requirements.

The experience of Second Sergeant Chen Xi is quite representative. A few years ago, the brigade formed a new type of drone unit. At that time, due to the lack of relevant professional backbones, Chen Xi’s reconnaissance battalion considered that he had comprehensive qualities and experience in drone operation, and decided to let him transfer to become a drone operator.

However, it is easy to transfer but difficult to find the right job. Low academic level, lack of professional skills... After several trainings, Chen Xi and his comrades who transferred to the new position felt to varying degrees that there was still a big gap between their abilities and the requirements of the new position.

“During that period, the strong ‘skill panic’ forced us to study theory and practice operations day and night.” Chen Xi told reporters that in order to improve their professional abilities, the brigade temporarily organized a training class for them to make up for the gaps and weaknesses, and made every effort to coordinate venues, teaching materials and equipment. At the same time, it invited relevant professional backbones and college experts from friendly neighboring units to provide on-site guidance and help.

However, this sudden talent training method not only increased the pressure of unified training on the brigade, but also made the trained officers and men overwhelmed. This made the brigade leaders realize that during the transformation and construction of the troops, only by accurately training suitable talents in advance and formulating a systematic training plan can we ensure the precise connection between the “talent supply side” and the “battlefield demand side” and achieve the matching of people and positions and the full use of talents.

To this end, they broke the selection and training model of professional backbones, coordinated the current talent needs of the entire brigade, focused on the scarce talent positions such as joint combat commanders, small special professional instructors, and new quality subject combatants, and issued “talent orders” to the grassroots. Officers and men with a certain degree of professional matching and interest in this profession can sign up. After the Party organization’s investigation and recommendation, the various business departments of the department will formulate a “one person, one policy” based on the characteristics of the personnel’s abilities and conduct targeted training.

“Benefiting from the ‘order-based’ talent training model, I re-examined my career plan and determined new growth goals.” In the interview, a company’s second-class sergeant Wang Yunlong talked about his experience.

At the beginning of last year, the brigade issued an “order” for professional talents in photoelectric countermeasures, and Wang Yunlong, who was interested in the optoelectronics major, took the initiative to sign up. Then, combined with Wang Yunlong’s personal situation, the brigade’s information assurance department immediately applied for the optoelectronic technician professional skills appraisal assessment for him, provided review materials, and simultaneously tracked the training progress. After more than half a year of hard work, Wang Yunlong’s ability improved rapidly, and he successfully passed the optoelectronic technician professional skills appraisal and successfully transferred to another position.

It is understood that in the past year since the implementation of the new talent training model, the brigade’s vacancy rate in the optoelectronic confrontation major alone has decreased by 70%

compared with last year, and the matching rate between human resources indicators and combat power indicators has increased significantly. In addition, as professional talents continue to be added to various positions, the "orders" issued by the department have also changed from "solving job vacancies" to "forging specialized talents."

Once, the brigade was given the opportunity to select personnel to study and train in other units to improve their joint combat capabilities. In order to be fair, they issued these indicators to the grassroots in the form of "orders." Battalion Commander Duan of a motorized infantry battalion stood out among many applicants with his experience of participating in joint exercises and training many times. After returning from school, Battalion Commander Duan not only summarized a number of innovative results, but also applied them to basic training and major exercise and training tasks, achieving good results.

The head of the brigade's human resources department introduced that in the next step, they will combine the needs of the troops' tasks, dynamically adjust the methods of education, and form a training mechanism that is more conducive to the growth of talents, a use mechanism that is conducive to the full use of talents, and a competition mechanism that is conducive to the emergence of talents, so that the "sight" of talent team building is always aimed at the "bull's eye" of combat power construction.

第 80 集团军某旅按新条令规范智能电子设备管理

来源：解放军报 作者：王冰心 付君臣 责任编辑：孙智英 2025-05-15

第 80 集团军某旅按新条令规范智能电子设备管理——

智能手表：趋利避害可以戴

■王冰心　解放军报特约记者　付君臣

当前，智能电子设备深度嵌入工作生活，给人们带来极大便利。新修订的共同条令顺应时代发展要求，回应官兵热切期盼，本着适度放开、有序可控、安全保密原则，对智能电子设备使用管理作了调整，进一步规范使用时机、场合和保密要求。

■关于智能电子设备的管理，新修订的《中国人民解放军内务条令》第二百四十条新增规定：军队单位和军人在智能电子设备使用管理中，应当尊重和保护官兵个人隐私；未按照国家法律和军事法规有关规定报经批准，不得利用信息技术手段进行检查、监管。

■关于智能电子设备的使用，新修订的《中国人民解放军内务条令》第二百四十三条新增规定：连队官兵在休息日、节假日和由个人支配的课外活动时间，可以使用私人智能电子设备；其他时间，通常以班、排或者连队为单位集中保管。

该旅官兵佩戴智能手表健身。 王冰心 摄

初夏一个周末，第 80 集团军某旅驻地举行了一场马拉松比赛，跑步爱好者、排长潘仁刚按规定报备后外出参赛。跑步过程中，他根据智能手表显示的配速、心率等信息，及时调整步幅、步频，刷新个人最好成绩。

长跑结束后，潘仁刚一边在智能手表上查看跑步数据信息，一边告诉记者：”我们的智能手表都有专属’电子身份证’。”接过潘仁刚递过来的智能手表，记者看到手表背后贴有一张塑封卡片，上面记录了手表型号、联网情况、使用人姓名等信息。

该旅信息保障科科长告诉记者，新修订的共同条令施行后，他们按照条令要求，对官兵的智能电子设备进行实名登记，并将使用人姓名、设备型号及用途等信息同步录入管理系统。此外，他们进一步规范智能电子设备的管理办法，由班排进行统一管理。官兵在休息日、节假日和由个人支配的课外活动时间，可自主使用私人智能电子设备。

某连宿舍内，一个智能电子设备专用充电柜引起记者注意。充电柜内，分格存放着官兵的手机、手表、手环等智能电子设备。”训练时集中管理，休息时按需使用，保密要求和生活需求两不误。”该连郑连长介绍说。

科技赋能带来的便利，在官兵生活中悄然显现。某连中士董云成向记者展示了他的运动记录——周末休息时，他喜欢佩戴智能手表去游泳馆游泳。根据手表显示的心率、划水频率等信息，他科学调整节奏，游泳成绩不断提升。

走进营区健身房，记者看到不少官兵佩戴智能手表进行”数据化”健身：手表实时记录心率、热量消耗等数据，健身结束后生成个人体能训练档案。”过去，健身时靠人工记录数据，费时费力；现在，手表上的数据一目了然，还能自动生成训练分析报告。”该旅机关刘干事笑着说，”智能手表的血氧饱和度检测等功能，也颇受官兵欢迎。每到休息时间，大家都会戴上手表测一测。”

“智能电子设备不是洪水猛兽，关键是要管好、用对。”该旅领导表示，下一步，他们将在确保安全使用前提下，进一步发挥智能电子设备在科学训练、健康管理等方面的积极作用，让科技真正服务战斗力。

A Brigade of the 80th Group Army Regulates the Management of Smart Electronic Devices According to the New Regulations

Source: PLA Daily Author: Wang Bingxin Fu Junchen Editor: Sun Zhiying 2025-05-15

A brigade of the 80th Group Army regulates the management of smart electronic devices according to the new regulations——

Smart watches: Wear them to avoid harm

■Wang Bingxin, PLA Daily special correspondent, Fu Junchen

At present, smart electronic devices are deeply embedded in work and life, bringing great convenience to people. The newly revised common regulations conform to the requirements of the development of the times and respond to the eager expectations of officers and men. In line with the principles of moderate release, orderly control, and security and confidentiality, adjustments have been made to the use and management of smart electronic devices, and the timing, occasions and confidentiality requirements of use have been further standardized.

■Regarding the management of smart electronic devices, the newly revised "Internal Affairs Regulations of the Chinese People's Liberation Army" Article 240 adds a new provision: Military units and men should respect and protect the personal privacy of officers and men in the use and management of smart electronic devices; without approval in accordance with relevant provisions of national laws and military regulations, information technology means shall not be used for inspection and supervision.

■Regarding the use of smart electronic devices, the newly revised "People's Liberation Army Internal Affairs Regulations" has a new provision in Article 243: Company officers and men can use private smart electronic devices on rest days, holidays and extracurricular activities at their own discretion; at other times, they are usually kept in a centralized manner by squad, platoon or company.

The officers and men of the brigade wear smart watches for fitness. Photo by Wang Bingxin

On a weekend in early summer, a marathon competition was held at the garrison of a brigade of the 80th Group Army. Running enthusiast and platoon leader Pan Rengang went out to participate in the competition after reporting in accordance with regulations. During the run, he adjusted his stride and frequency in time according to the pace, heart rate and other information displayed on the smart watch, and refreshed his personal best.

After the long run, Pan Rengang checked the running data information on the smart watch and told the reporter: "Our smart watches all have exclusive 'electronic ID cards'." Taking the smart watch handed over by Pan Rengang, the reporter saw a plastic-sealed card on the back of the watch, which recorded the watch model, network status, username and other information.

The head of the brigade's information assurance department told reporters that after the implementation of the newly revised joint regulations, they registered the soldiers' smart electronic devices in real name in accordance with the regulations, and entered the user's name, device model and purpose into the management system simultaneously. In addition, they further standardized the management methods of smart electronic devices, which are uniformly managed by squads and platoons. Soldiers can use their private smart electronic devices independently on rest days, holidays and extracurricular activities at their own discretion.

In a company barracks, a dedicated charging cabinet for smart electronic devices attracted the attention of reporters. In the charging cabinet, smart electronic devices such as mobile phones, watches, and bracelets of officers and men are stored in separate compartments. "Centralized management during training, on-demand use during rest, confidentiality requirements and life needs are not missed." Company Commander Zheng said.

The convenience brought by technology empowerment has quietly emerged in the lives of officers and men. Sergeant Dong Yuncheng of a company showed reporters his sports records-on weekends, he likes to wear a smart watch to swim in the swimming pool. According to the heart rate, stroke frequency and other information displayed on the watch, he scientifically adjusted his rhythm and his swimming performance continued to improve.

Walking into the barracks gym, the reporter saw many soldiers wearing smart watches for "data-based" fitness: the watch records heart rate, calorie consumption and other data in real time, and generates personal physical training files after fitness. "In the past, it was time-consuming and laborious to record data manually during fitness; now, the data on the watch is clear at a glance, and it can also automatically generate training analysis reports." Liu, an officer from the brigade, said with a smile, "The blood oxygen saturation detection function of the smart watch is also very popular among soldiers. Every time during rest time, everyone will wear a watch to measure it." "Smart electronic devices are not a flood or a beast. The key is to manage them well and use them correctly." The leaders of the brigade said that in the next step, they will further play the positive role of smart electronic devices in scientific training, health management and other aspects under the premise of ensuring safe use, so that technology can truly serve combat effectiveness.

陆军某旅强化党委领战领训能力，激励官兵担当奋斗

来源：解放军报 作者：宋子洵 童康 责任编辑：郭妍菲 2025-05-15

陆军某旅强化党委领战领训能力——

带头研战谋战 激励担当奋斗

■解放军报记者 宋子洵 特约通讯员 童 康

“作战单元配合不紧密，战术战法运用不灵活……”前不久，陆军某旅一场实战化训练结束，一名跟训的旅党委常委随即组织官兵开展复盘总结，梳理剖析制约部队战斗力提升的短板弱项。旅机关和相关单位领导主动认领问题，拿出整改措施，并明确整改标准和时限。这是该旅党委聚焦备战打仗主责主业，强化领战领训能力，带头研战谋战的一个缩影。

“备战打仗是军队的主责主业，抓战领战是各级党委的政治责任。抓战斗力建设必须坚持党委带头、以上率下。”该旅领导介绍，在聚焦”铸牢政治忠诚、打好攻坚之战”深化教育实践活动中，旅党委坚持把深化教育实践活动与加强战斗力建设相结合，将战斗力标准贯彻到部队建设各领域全过程，带头研究军事、研究战争、研究打仗。他们紧贴任务实际，带头破解训练中的重难点问题，引导官兵提振干事创业精神状态，助推部队战斗力不断提升。

实践中，该旅党委一班人结合部队担负使命任务，从作战协同、精准毁伤、战时保障等方面着手，探索建立紧跟任务议、上下联动议、训练复盘议等议战议训模式；围绕战法创新、资源融合、体系练兵等展开深入研讨，集中精力真谋实研、真打实备，将全部资源向备战打仗聚焦，激励官兵人人思打仗之责、干打仗之事、强打仗之能。

该旅前期组织综合训练，某保障分队采取分组模式对各指挥所进行保障。由于指挥层级较多、需协调事项繁杂，保障质效不高。

“战场环境瞬息万变，对保障要求越来越高，我们要结合任务实际创新保障模式。”该旅党委一班人充分讨论后决定，统筹部队保障力量，探索模块化保障方式。随后，官兵围绕模块化保障进行攻关，区分任务和专业展开专攻精练，有效提升战场保障质效。

带头研战谋战，激励担当奋斗。随着深化教育实践活动持续推进，该旅党委一班人瞄准打仗”靶心”不断用力，围绕多个重难点课目带头攻关，部队练兵备战热情持续高涨。

A Certain Army Brigade Strengthens the Party Committee’s Ability to Lead Combat and Training, and Encourages Officers and Men to Take Responsibility and Struggle

Source: PLA Daily Author: Song Zixun Tong Kang Editor: Guo Yanfei 2025-05-15

A certain army brigade strengthens the Party Committee’s ability to lead combat and training——

Take the lead in researching and planning combat, and encourage responsibility and struggle

■ PLA Daily reporter Song Zixun Special correspondent Tong Kang

“The combat units are not closely coordinated, and the tactics and methods are not flexible...” Not long ago, a combat training of a certain army brigade ended. A member of the brigade Party Committee who followed the training immediately organized officers and men to conduct a review and summary, sorting out and analyzing the shortcomings that restrict the improvement of the

combat effectiveness of the troops. The leaders of the brigade and relevant units took the initiative to acknowledge the problems, put forward rectification measures, and clarified the rectification standards and time limits. This is a microcosm of the brigade Party Committee focusing on the main responsibilities and main business of preparing for war, strengthening the ability to lead combat and training, and taking the lead in researching and planning combat.

"Preparing for war is the main responsibility of the army, and leading the war is the political responsibility of Party Committees at all levels. To build combat effectiveness, we must insist on the Party Committee taking the lead and leading by example." The brigade leader introduced that in the focus on "forging political loyalty and fighting a tough battle", the brigade Party Committee insisted on combining the deepening of the education and practice activities with strengthening combat effectiveness, implementing the combat effectiveness standards in all areas of the army's construction, and taking the lead in studying military affairs, studying war, and studying fighting. They closely follow the actual tasks, take the lead in solving the key and difficult problems in training, guide officers and men to boost their entrepreneurial spirit, and promote the continuous improvement of the combat effectiveness of the troops.

In practice, the brigade's Party Committee, in combination with the missions and tasks of the troops, explored the establishment of a discussion and training model such as following the task, linking the upper and lower levels, and reviewing the training. They conducted in-depth discussions on tactics innovation, resource integration, and system training, and concentrated their efforts on real planning and real research, real fighting and real preparation, focusing all resources on preparing for war, and encouraging officers and men to think about the responsibility of war, do war, and strengthen their ability to fight.

The brigade organized comprehensive training in the early stage, and a certain support team adopted a group mode to support each command post. Due to the large number of command levels and the complexity of matters to be coordinated, the quality and efficiency of support were not high.

"The battlefield environment is changing rapidly, and the requirements for support are getting higher and higher. We must innovate the support model in combination with the actual tasks." After full discussion, the brigade's Party Committee decided to coordinate the support forces of the troops and explore modular support methods. Subsequently, officers and men tackled problems around modular support, distinguished tasks and specialties, and carried out specialized training, effectively improving the quality and efficiency of battlefield support.

Take the lead in researching and planning wars, and encourage responsibility and struggle. As the deepening of the education and practice activities continues to advance, the brigade's Party Committee has been aiming at the "bull's eye" of fighting and has been taking the lead in tackling a number of difficult and key subjects. The troops' enthusiasm for training and preparation continues to rise.

西部战区陆军某旅工兵连：三维建模助力物资装载训练

来源：解放军报 作者：张志强 李强 责任编辑：杜圣智 2025-05-16

西部战区陆军某旅工兵连——

三维建模助力物资装载训练

■张志强 李强

“3D 建模技术可以模拟装载过程，直观展示物资摆放位置、动态变化、空间利用率，提升物资运投保障效能。”前不久，西部战区陆军某旅工兵连组织物资装载训练，官兵根据优化后的装载方案各司其职，效率明显提升。

该连干部马金良介绍，一线保障实践中，物资装载效率直接影响战斗力。以往他们凭借经验进行物资装载训练，在分类、查询过程中存在精细化可视化程度不足等问题。

“注意前重后轻，左右平衡……”那次接到紧急装载任务后，马金良迅速按照计划进行分工，但实际情况与预想的大不一样——装载过程严格落实要求，车辆划分也与之前一致，但物资却没办法全部装载，最终只能卸车重装。

任务结束复盘时，马金良进行了剖析反思和自我批评，组织大家根据”物资定位不准确”“空间利用不合理”等训练中暴露出的问题，针对性研究整改措施。上等兵易径舟提出，可以建立可视化模型，输入信息参数对物资排列组合，找到空间利用最大化的方案。经过研究论证，大家一致感到这一想法可操作性强，值得一试。连队官兵共同努力，很快完成了数据采集，易径舟制作完成了三维模型，并投入应用。

“磨刀不误砍柴工。进行 3D 建模看似花费了一定精力，但长远来看能够减少返工频次，节省大量时间成本和人力资源。”建模技术对工作的助力，让大家打开思路，学习研究以技术手段、创新思路破解训练难题的热情更加高涨。

在后续一次远程机动任务中，该连官兵通过软件系统模拟完成车辆伪装、编队分组、特情处置等行动，为任务完成赋能增效，相关做法在全旅推广。此外，他们还把 3D 建模技术运用到爆破器材背具革新、连队库房整治规划等工作中，均取得较好效果。

Engineer Company of a Brigade of the Western Theater Command Army: 3D Modeling Assists Material Loading Training

Source: PLA Daily Author: Zhang Zhiqiang Li Qiang Editor: Du Shengzhi 2025-05-16

Engineer Company of a Brigade of the Western Theater Command Army——

3D Modeling Assists Material Loading Training

■ Zhang Zhiqiang Li Qiang

“3D modeling technology can simulate the loading process, intuitively display the placement, dynamic changes, and space utilization of materials, and improve the efficiency of material transportation and support.” Not long ago, the engineering company of a brigade of the Western Theater Command Army organized material loading training. The officers and men performed their duties according to the optimized loading plan, and the efficiency was significantly improved.

Ma Jinliang, a cadre of the company, introduced that in the front-line support practice, the efficiency of material loading directly affects the combat effectiveness. In the past, they relied on experience to conduct material loading training, and there were problems such as insufficient refinement and visualization in the classification and query process.

“Pay attention to the front being heavy and the back being light, and the left and right being balanced...” After receiving the emergency loading task, Ma Jinliang quickly divided the work according to the plan, but the actual situation was quite different from what he expected - the loading process strictly implemented the requirements, and the vehicle division was consistent with the previous one, but the materials could not be fully loaded, and finally had to be unloaded and reloaded.

When reviewing the task at the end, Ma Jinliang analyzed, reflected and criticized himself, and organized everyone to study the rectification measures based on the problems exposed in the training, such as “inaccurate material positioning” and “irrational space utilization”. Corporal Yi Jingzhou proposed that a visual model could be established, and information parameters could be input to arrange and combine materials to find a solution to maximize space utilization. After research and demonstration, everyone felt that this idea was highly operational and worth a try. The company’s officers and men worked together to quickly complete the data collection, and Yi Jingzhou completed the three-dimensional model and put it into use.

“Sharpening the knife does not delay the chopping of wood. 3D modeling may seem to take a certain amount of effort, but in the long run it can reduce the frequency of rework and save a lot of time and human resources.” The help of modeling technology in work has opened up everyone’s minds, and the enthusiasm for learning and studying to solve training problems with technical means and innovative ideas has increased.

In a subsequent long-distance mobile mission, the company’s officers and men completed vehicle camouflage, formation grouping, special situation handling and other actions through software system simulation, empowering and increasing the efficiency of mission completion, and related practices have been promoted throughout the brigade. In addition, they also applied 3D modeling technology to the innovation of blasting equipment backpacks and the planning of company warehouse renovation, all of which achieved good results.

一次谈心交心后 新兵当上“编外教练员”

来源：解放军报 作者：金靖凯 刘立鑫 责任编辑：杜圣智 2025-05-16

新兵当上”编外教练员”

■金靖凯 刘立鑫

“别紧张，回忆一下班长讲解的射击要领，咱们一定没问题……”北疆腹地，第 78 集团军某旅轻武器射击训练场上，新兵赵鎏华鼓励同年兵小刘克服恐惧心理。训练结束后，小刘终于闯过这一关，向赵鎏华和班长陈长海表示感谢。

“每次参加实弹射击，我都有点紧张，又不好意思向班长说，怕给班长留下不好的印象。”其实，小刘的紧张担忧，陈长海一直看在眼里，考虑到他自尊心强，于是派出”编外教练员”赵鎏华进行疏导。

让新兵发挥教练员作用，缘于一次谈心交心。

二次入伍新兵赵鎏华，初到连队就表现出了优势——体能基础好、适应快、劲头足，很快成为新兵中的佼佼者。大家对他很佩服，训练中遇到难题都愿意向他请教，生活中出现困扰也经常向他倾诉。

一次班务会上，陈长海询问大家的成长规划和对提升训练质效的建议。有的新兵提出，让赵鎏华担任”编外教练员”，发挥骨干作用，给其他新兵”打个样”。对此，赵鎏华也不推脱，大方表示自己很乐意分享训练经验、提供成长帮助。

接下来的时间，赵鎏华成了班长的得力助手。体能训练中，他牵头组织讲授训练技巧；平时生活里，他发挥善于沟通的优势，把一些新兵的思想问题化解在萌芽状态……在阶段性工作分析会上，陈长海报告相关情况，引起了上级领导的思考和关注。

该旅一名领导感到，不只是二次入伍新兵，许多刚步入军营的大学生士兵身上也有很多优长，发挥好他们”同龄人、同行者”的优势，对做好新兵教育管理工作会有很大帮助。

此后，他们在了解新兵基本情况的基础上，采取集体座谈、个别谈心、问卷调查等形式，深入挖掘新兵的性格特点、成长经历、兴趣特长等信息，遴选出一批能力素质过硬或有一定特长的新兵，作为”编外教练员”助力连队训练管理工作。

由于有了展示才华的”用武之地”，越来越多新兵从”队列中”走到”队列前”——训练间隙，运动康复专业毕业的新兵纪治廷为大家讲授训练伤预防办法；新兵时浩然曾是体育特长生，对如何高效提升体能训练成绩有自己的见解……借助这些”编外教练员”，班长排长们得以投入更多精力分析训练质量，提升组训施教水平，连队的训练针对性、精准度显著增强。

After a Heart-to-Heart Talk, the New Recruit Became an “Extra-Staff Instructor”

Source: PLA Daily Author: Jin Jingkai Liu Lixin Editor: Du Shengzhi 2025-05-16

New recruits became “extra-staff instructors”

■ Jin Jingkai Liu Lixin

“Don’t be nervous, recall the shooting essentials explained by the squad leader, we will definitely have no problem...” In the hinterland of northern Xinjiang, at the light weapons shooting training ground of a brigade of the 78th Group Army, new recruit Zhao Liuhua encouraged his fellow soldier Xiao Liu to overcome his fear. After the training, Xiao Liu finally passed this level and expressed his gratitude to Zhao Liuhua and squad leader Chen Changhai.

“Every time I participate in live-fire shooting, I am a little nervous, but I am embarrassed to tell the squad leader, fearing that I will leave a bad impression on the squad leader.” In fact, Chen Changhai has always seen Xiao Liu’s nervousness and worries. Considering his strong self-esteem, he sent “extra-staff instructor” Zhao Liuhua to guide him.

Let the new recruits play the role of instructors because of a heart-to-heart talk.

Zhao Liuhua, a second-time recruit, showed his advantages when he first arrived at the company - good physical foundation, quick adaptation, and strong energy, and soon became a leader among the recruits. Everyone admired him very much. They were willing to ask him for advice when they encountered difficulties in training, and often confided in him when they encountered troubles in life.

At a class meeting, Chen Changhai asked everyone about their growth plans and suggestions for improving the quality and effectiveness of training. Some recruits suggested that Zhao Liuhua be an “extra-staff instructor” to play a backbone role and “set an example” for other recruits. In this regard, Zhao Liuhua did not shirk and generously expressed that he was happy to share training experience and provide growth help.

In the following time, Zhao Liuhua became the squad leader’s right-hand man. In physical training, he took the lead in organizing and teaching training skills; in daily life, he took advantage of his good communication skills to resolve some recruits’ ideological problems in the barracks. At the periodic work analysis meeting, Chen Changhai reported the relevant situation, which aroused the thinking and attention of the superiors.

A leader of the brigade felt that not only the recruits who had enlisted for the second time, but also many college students who had just entered the barracks had many advantages. It would be of great help to give full play to their advantages as “peers and companions” to do a good job in the education and management of recruits.

After that, on the basis of understanding the basic situation of the recruits, they adopted collective discussions, individual talks, questionnaires and other forms to deeply explore the personality characteristics, growth experience, interests and specialties of the recruits, and selected a group of recruits with strong abilities or certain specialties as “extra-staff instructors” to assist the company’s training management.

With the “place to use” to show their talents, more and more recruits have gone from “in the queue” to “in front of the queue” - during the training interval, Ji Zhiting, a recruit who graduated from the physical rehabilitation major, taught everyone how to prevent training injuries; recruit Shi Haoran was a sports specialty student and had his own insights on how to efficiently improve physical training results... With the help of these “extra-staff instructors”, squad leaders and platoon leaders were able to devote more energy to analyzing the quality of training and improving the level of training and teaching, and the company’s training was significantly more targeted and accurate.

第 79 集团军某旅大力开展群众性创新活动让基层“创客”多起来

来源：解放军报 作者：杨加木 杨至武 王立军 责任编辑：郭妍菲 2025-05-17

写在前面

创新能力是一支军队的核心竞争力，也是生成和提高战斗力的加速器。处在作战能力生成的最末端，基层官兵对训练、保障、装备等瓶颈问题最有发言权。大力开展群众性创新活动，激发官兵创新热情，是破解训练难题、助力战斗力生成的重要举措。

“创造新陆地的，不是那滚滚的波浪，却是它底下细小的泥沙。”近年来，第 79 集团军某旅致力于开展群众性创新活动，多项装备技术革新成果应用于演训一线。让我们走进该旅，听听官兵们对开展群众性创新活动的看法，以及有哪些建议和期冀。

“创客小组”骨干为战友讲解革新器材使用方法。王卓 摄

让基层”创客”多起来

如何挖掘官兵创新潜力

人人皆可为，人人皆能为

上等兵郭宸志：刚开始参加群众性创新活动时，我觉得自己军衔低、经验少，经常”自我设限”，有项目不敢申请，讨论会很少发言。后来，班长得知我在大学学的是计算机编程专业，有一定的实践基础，就让我负责 3D 建模和数据分析等工作，我渐渐获得大家的认可。

如今的年轻战友，大多有一技之长，要珍惜好机会和舞台，敢于发挥自己的聪明才智，用专业特长积极参加创新攻关，为单位建设贡献”新”力量。

中士陈浩：创新不分军龄学历，只要有能力、想创新，人人都可以成为”主角”。入伍前，我只有高中学历。得知旅队开展群众性创新活动后，我担心自身知识储备不够，以为就算参加了也出不了成绩，没有第一时间报名。

一次研讨会上，我提出的一个训练难题，成为那次创新研讨的主要攻关方向。此后，我信心倍增，一有时间就翻书学习，主动申请参加培训。如今，我研发的多功能维修工具已在旅队推广使用。

研发过程中，我还发现，仅有”灵感”远远不够。就像一位班长说的那样，”理论跟不上，革新就像没根的树，站不稳”，必须不断钻研专业理论，持续不断学习，有了坚实的理论基础，才能更有针对性地进行发明创造。

当前，各单位都十分重视基层创新，我们要乘着这股东风，规划好成长路线，主动提升个人能力，努力成为新时代创新型人才。

政治教导员李海涛：”创新不问出身，英雄不论出处”，技术革新并非遥不可及，普通一兵也能有所作为。基层官兵身处练兵备战第一线，哪里需要创新、哪里能够创新、哪里该怎样创新，他们掌握着第一手资料。

随着时代发展，兵员素质、学历水平等都有大幅提升，官兵普遍知识面宽、思想活跃，并且乐于发表意见建议，具备创新的先天条件和优势。作为带兵人，我们要充分尊重官兵主体地位和首创精神，引导他们以兴趣爱好为切入点主动谋创研创，营造支持创新、敢于创新的内部环境，鼓励官兵在创新路上各尽所能、各展其长，最大限度挖掘官兵的创新潜力，让创新氛围在军营蔚然成风，为备战打仗提供澎湃势能。

“创客小组”成员检验革新器材效能。李东雪 摄

如何为”创客”加油鼓劲

鼓励”翻跟头”，允许”跌跟头”

三级军士长谢晓鹏：我从事维修专业十几年，以往在训练中发现过一些制约战斗力生成的矛盾问题，也萌生过搞一些小革新的想法。然而，由于当时对想法可不可行没有把握，就没有提出来。

有人说，创新是”寂寞的长跑”，也是”冒险的攀登”，容易让官兵畏首畏尾。当时，身边不少战友和我一样，有想法有思路，但不知如何”往前走”，导致很多想法”搁浅”。旅队组织开展群众性创新活动后，机关出台了很多政策，为基层”创客”搭建平台、提供支持，定期召集基层连队的专业大拿、技术骨干研讨创新思路，及时论证反馈，确保好想法能够落地见效。

一次研讨会上，我提出了”牵引车自动拖挂装置”的设计构想。会后，旅队第一时间组织有关技术人员进行论证，认为研发该项目贴合部队实际，具有较强的可行性和实用性。1 个月后，项目资金获批，两名拥有相关专业背景的大学生士兵成为我的助手，创新研发得以加速推进。

连长刘富强：不可否认，基层官兵的建议和思路，很多是零散的而不是系统的，是一时一地的而不是着眼全局的，他们有时还会面临无平台、无资源的困境。比如，我所在连队的一名上等兵，曾提出优化桥梁装备操作盒的设想，却因缺乏资金、设备和测试场地而放弃。后来，营里成立了”创客小组”，设备配备齐全，并开设”创新夜校”，邀请院校教员共同研究创新思路。此外，连队还设立了”即时奖励”机制，为取得创新成果的战士颁发”创新之星”证书，积极帮助申报专利。如今，连队已有 3 项成果获旅级推广，不少官兵从”旁观者”变为”主力军”。

机关科长闫绍刚：旅里最初开展群众性创新活动时，大部分官兵存在瞻前顾后的思想。我们曾做过一次问卷调查，有三分之一的官兵担心旅队支持力度不够，五分之一的官兵担心创新不成弄巧成拙，还有一些官兵认为普通一兵弄不出什么名堂来。

过去，许多创新好点子”夭折”，不是因为官兵缺乏智慧，而是机制不够健全，比如审批流程过长、资源调配滞后等。为此，各级机关要多到一线倾听官兵呼声，树立为敢于创新的官兵兜底打气的鲜明导向，当好官兵创新创造的坚强后盾，积极出台相关政策举措，将革新成果与立功受奖、评优评先挂钩，建立开放包容的容错机制，既鼓励官兵大胆”翻跟头”，又允许官兵”跌跟头”，让基层”创客”最大限度地保持创新动力活力。

如何让”好点子”结出”金果子”

创新的”准星”，瞄准打赢的”靶心”

下士苟德兴：基层创新创造的关键，不在于科技含量有多高，关键在于能不能解决具体问题。刚开始参加群众性创新活动时，我总想着借这个机会，研究一些”高大上”的项目，不

屑于日常训练所需的小发明、小革新。一段时间过后，因为选题难度较大，我没有研究出成果，白白浪费了时间和资源。”创客小组”组长告诉我：”技术革新不分大小，只要能提高战斗力，就是好点子。”后来，我紧盯训练中的一些小问题，研究出不少管用实用的小发明。

我认为，作为基层”创客”，要先”低头看路”，步子稳了再”抬头看天”。眼睛向下看、身子往下沉，紧贴战位开展小革新，就能结出有助于战斗力提升的创新成果。

二级军士长戎朋光：我从事装备技术革新近 10 年，见证了许多”好点子”结出”金果子”。作为旅队群众性创新活动的牵头人，我发现，实际工作中一些同志容易陷入”重形式、轻实效”的误区，比如一味追求技术性，却忽视实用性、可行性。为此，我认为基层单位应当建立相关的装备技术革新”战斗力评估标准”，所有项目立项前需回答 3 个问题：解决了什么难点？能提升多少效率？是否符合实战标准？创新成果推出后第一时间投入实践检验，同时收集官兵意见进一步改进完善，切实与战斗力提升无缝衔接。

营长汤忠德：基层官兵作为创新主体，聚焦练兵备战是核心要求，创意可以”天马行空”，但效果一定要求真务实。开展群众性创新活动之初，部分官兵看到旅队出台政策支持，创新成果与表彰奖励挂钩，一心只想着获奖，花了不少心思，结果却不如人意。

基层创新的准星，必须瞄准打赢”靶心”，不能搞不符合实际、不紧贴实战的”花架子”和”假把式”。针对这类问题，我认为应当建立调研论证、立项科研、实战检验联动机制，鼓励官兵深入训练场查摆问题，从训练总结会中提取共性难题，让创新成果与备战打仗精准对接。同时，完善优化课题提报、评审验收、成果培育、组织推广等方面制度机制，推动革新成果转化应用。

A Brigade of the 79th Group Army Vigorously Carries Out Mass Innovation Activities to Increase the Number of Grassroots “Makers”

Source: PLA Daily Author: Yang Jiamu Yang Zhiwu Wang Lijun Editor: Guo Yanfei 2025-05-17

Foreword

Innovation capability is the core competitiveness of an army and an accelerator for generating and improving combat effectiveness. At the end of the generation of combat capability, grassroots officers and men have the most say in bottleneck issues such as training, support, and equipment. Vigorously carrying out mass innovation activities and stimulating the enthusiasm of officers and

men for innovation are important measures to solve training problems and help generate combat effectiveness.

“It is not the rolling waves that create new land, but the fine sand under it.” In recent years, a brigade of the 79th Group Army has been committed to carrying out mass innovation activities, and a number of equipment and technology innovation results have been applied to the front line of training and exercise. Let us go to the brigade and listen to the officers and men’ views on carrying out mass innovation activities, as well as what suggestions and expectations they have.

The backbone of the “Maker Group” explained to his comrades how to use innovative equipment. Photo by Wang Zhuo

Let there be more grassroots “makers”

How to tap the innovation potential of officers and men

Everyone can do it, everyone can do it

Corporal Guo Chenzhi: When I first started participating in mass innovation activities, I felt that I had a low military rank and little experience, and I often “set limits on myself”. I didn’t dare to apply for projects and rarely spoke in discussions. Later, the squad leader learned that I studied computer programming in college and had a certain practical foundation, so he asked me to be responsible for 3D modeling and data analysis, and I gradually gained everyone’s recognition.

Most of today’s young comrades have a skill. They should cherish good opportunities and stages, dare to use their own intelligence and wisdom, actively participate in innovation and tackle key problems with their professional expertise, and contribute “new” forces to the construction of the unit.

Sergeant Chen Hao: Innovation does not distinguish between military service and academic qualifications. As long as you have the ability and want to innovate, everyone can become the “protagonist”. Before joining the army, I only had a high school degree. After learning that the brigade was carrying out mass innovation activities, I was worried that my knowledge reserves were not enough. I thought that even if I participated, I would not be able to achieve results, so I did not sign up at the first time.

At a seminar, a training problem I raised became the main research direction of that innovation seminar. Since then, my confidence has doubled. Whenever I have time, I will turn to books to study and take the initiative to apply for training. Now, the multifunctional maintenance tools I developed have been promoted and used in the brigade.

During the research and development process, I also found that “inspiration” alone is far from enough. As a squad leader said, “If the theory can’t keep up, innovation is like a tree without roots, and it can’t stand steadily.” We must continue to study professional theories and continue to learn.

At present, all units attach great importance to grassroots innovation. We must take advantage of this favorable wind, plan our growth route, actively improve our personal abilities, and strive to become innovative talents in the new era.

Political instructor Li Haitao: “Innovation does not ask about origin, and heroes do not ask about origin.” Technological innovation is not out of reach, and ordinary soldiers can also make a difference. Grassroots officers and men are at the forefront of training and preparation for war. They have first-hand information on where innovation is needed, where innovation can be achieved, and how innovation should be achieved.

With the development of the times, the quality and educational level of soldiers have been greatly improved. Officers and men generally have a wide range of knowledge, active thinking, and are willing to express opinions and suggestions, and have the innate conditions and advantages of innovation. As leaders, we must fully respect the dominant position and pioneering spirit of officers and men, guide them to take the initiative to seek innovation and research based on their interests and hobbies, create an internal environment that supports and dares to innovate, encourage officers and men to do their best and show their strengths on the road of innovation, maximize the innovation potential of officers and men, and make the innovation atmosphere a trend in the military barracks, providing surging potential for preparing for war.

How to cheer for “makers”

Encourage “somersaults” and allow “somersaults”

Sergeant Major Xie Xiaopeng: I have been engaged in maintenance for more than ten years. In the past, I have found some contradictions that restrict the generation of combat effectiveness in training, and I have also had the idea of making some small innovations. However, because I was not sure whether the idea was feasible at the time, I did not put it forward.

Some people say that innovation is a “lonely long-distance race” and a “risky climb”, which can easily make officers and men timid. At that time, many comrades around me had ideas and ideas like me, but they did not know how to “move forward”, causing many ideas to be “stranded”. After the brigade organized mass innovation activities, the department issued many policies to build platforms and provide support for grassroots “makers”, regularly convened professional masters and technical backbones of grassroots companies to discuss innovative ideas, and timely demonstrate feedback to ensure that good ideas can be implemented and effective.

At a seminar, I proposed the design concept of “automatic towing device for tractors”. After the meeting, the brigade immediately organized relevant technical personnel to conduct demonstrations, believing that the development of this project fits the actual situation of the troops and has strong feasibility and practicality. One month later, the project funds were approved, and two college student soldiers with relevant professional backgrounds became my assistants, and innovative research and development was accelerated.

Company Commander Liu Fuqiang: It is undeniable that many of the suggestions and ideas of grassroots officers and men are scattered rather than systematic, and are temporary and local rather than focusing on the overall situation. Sometimes they will face the dilemma of no platform and no resources. For example, a corporal in my company once proposed the idea of optimizing the bridge equipment operation box, but gave up due to lack of funds, equipment and testing sites. Later, the battalion set up a “maker group” with complete equipment and opened an “innovation night school” to invite college instructors to jointly study innovative ideas. In addition, the company has also established an “instant reward” mechanism to issue “Innovation Star” certificates to soldiers who have achieved innovative results, and actively help to apply for patents. Today, the company has 3 achievements that have been promoted at the brigade level, and many officers and men have changed from “bystanders” to “main force”.

Yan Shaogang, Section Chief of the Organization: When the brigade first launched mass innovation activities, most officers and men were hesitant. We once conducted a questionnaire survey, and one-third of the officers and men were worried that the brigade’s support was not enough, one-fifth of the officers and men were worried that innovation would backfire, and some officers and men believed that ordinary soldiers could not come up with anything.

In the past, many innovative ideas “died”, not because the officers and men lacked wisdom, but because the mechanism was not sound enough, such as the approval process was too long and the resource allocation was delayed. To this end, organizations at all levels should go to the front line more often to listen to the voices of officers and men, establish a clear orientation to provide a bottom-line support for officers and men who dare to innovate, serve as a strong backing for officers and men to innovate and create, actively introduce relevant policies and measures, link innovation results with meritorious service and awards, and establish an open and inclusive fault-tolerant mechanism, which not only encourages officers and men to boldly “turn over” but also allows them to “fall” so that grassroots “makers” can maintain the vitality of innovation to the maximum extent.

How to make “good ideas” bear “golden fruits”

The “sight” of innovation, aiming at the “bull’s eye” of winning

Corporal Gou Dexing: The key to grassroots innovation and creation is not how high the scientific and technological content is, but whether it can solve specific problems. When I first started to participate in mass innovation activities, I always wanted to take this opportunity to study some

“high-end” projects, and disdained the small inventions and innovations required for daily training. After a period of time, because the topic selection was difficult, I did not produce any results, wasting time and resources in vain. The leader of the “maker group” told me: “Technical innovation is not big or small, as long as it can improve combat effectiveness, it is a good idea.” Later, I kept a close eye on some small problems in training and developed a lot of useful and practical small inventions.

I think that as a grassroots “maker”, you should first “look down at the road” and then “look up at the sky” when your steps are steady. Look down, sink down, and carry out small innovations close to the battle position, and you can produce innovative results that help improve combat effectiveness.

Second Sergeant Rong Pengguang: I have been engaged in equipment technology innovation for nearly 10 years and have witnessed many “good ideas” bear “golden fruits”. As the leader of the brigade’s mass innovation activities, I found that some comrades in actual work are prone to fall into the misunderstanding of “focusing on form and neglecting effectiveness”, such as blindly pursuing technicality but ignoring practicality and feasibility. For this reason, I believe that grassroots units should establish relevant equipment technology innovation “combat effectiveness evaluation standards”, and all projects need to answer 3 questions before the project is established: What difficulties have been solved? How much efficiency can be improved? Does it meet the actual combat standards? After the launch of innovative results, they will be put into practical testing as soon as possible, and at the same time, the opinions of officers and men will be collected for further improvement and perfection, so as to seamlessly connect with the improvement of combat effectiveness.

Battalion Commander Tang Zhongde: As the main body of innovation, grassroots officers and men focus on training and preparation for war as the core requirement. Creativity can be “unrestrained”, but the effect must be real and pragmatic. At the beginning of the mass innovation activities, some officers and men saw that the brigade issued policy support and linked innovative results with commendation and rewards. They only thought about winning awards and spent a lot of time, but the results were not satisfactory.

The crosshairs of grassroots innovation must be aimed at winning the “bull’s eye”. We must not engage in “flowery” and “fake tricks” that are not in line with reality and not close to actual combat. In response to this type of problem, I believe that a linkage mechanism should be established for research and demonstration, project establishment and scientific research, and actual combat testing, encouraging officers and men to go deep into the training ground to find problems, extract common problems from the training summary meeting, and accurately connect innovative results with preparations for war. At the same time, improve and optimize the institutional mechanisms in terms of subject submission, review and acceptance, results cultivation, and organizational promotion, and promote the transformation and application of innovative results.

(Compiled by Yang Jiamu, Yang Zhiwu, and Liberation Army Daily special correspondent Wang Lijun)

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育

来源：解放军报 作者：李红宙 韩帅 责任编辑：杜圣智 2025-05-17

陆军某旅扎实开展深入贯彻中央八项规定精神学习教育——

新会风激发新活力

■李红宙 解放军报特约通讯员 韩帅

没有冗长的讲话，不设固定发言席……初夏，一场安全工作会议在陆军某旅召开。会议现场，分管业务的旅领导、机关干部对安全工作进行精准讲评和部署，各基层单位主官通过视频系统参会，围绕工作要点展开讨论交流。这次会议直面问题、务实高效。

深入贯彻中央八项规定精神学习教育开展以来，该旅党委以”作风建设永远在路上”的政治自觉，把整顿会风作为改进工作作风的突破口。他们组织党员干部认真学习领会中央八项规定精神、军委十项规定及其实施细则精神对改进会风的要求，通过深学、细查、实改，推动作风建设向纵深发展，以会风转变促进工作落实。

会风反映作风。该旅前期通过组织问卷调查、蹲点调研、官兵恳谈会等发现，少数机关业务部门还存在”以会议落实会议”的思维惯性和工作作风，导致基层干部疲于参会，抓训练、管理等工作的时间被挤占。

针对会风问题，该旅党委在广泛征求意见建议后，结合部队实际立下”铁规矩”：能线上布置的不集中组织，能合并召开的不单独办会，无实质性内容的会议一律取消。他们还要求机关业务部门根据会议内容，严格控制参会人员数量，进一步压缩会议规模、时间和议程。

会议少了、时间短了，让该旅领导和机关干部有更多时间深入演训一线，现场解决装备保障、战术协同等方面问题，带动基层将更多精力用于提高战斗力建设。

作风连着战斗力。该旅领导表示，他们以此次学习教育为契机，将改进作风与抓练兵备战深度融合，以务实高效的新会风不断激发基层官兵干事创业的新活力。

A Certain Army Brigade Has Carried Out a Thorough Study and Education on the Spirit of the Eight Central Regulations

Source: PLA Daily Author: Li Hongzhou Han Shuai Editor: Du Shengzhi 2025-05-17

A certain army brigade has carried out a thorough study and education on the spirit of the eight central regulations——

New meeting style stimulates new vitality

■Li Hongzhou PLA Daily Special Correspondent Han Shuai

There are no lengthy speeches, no fixed speaking seats... In early summer, a safety work meeting was held in a certain army brigade. At the meeting, the brigade leaders and cadres in charge of the business gave precise comments and deployments on safety work, and the heads of various grassroots units participated in the meeting through the video system to discuss and exchange ideas around the key points of work. This meeting faced the problem directly, was pragmatic and efficient.

Since the study and education on the spirit of the eight central regulations was carried out, the brigade Party Committee has taken the political consciousness of "style construction is always on the road" and regarded the rectification of meeting style as a breakthrough for improving work style. They organized Party members and cadres to earnestly study and understand the requirements of the Central Committee's eight regulations, the Military Commission's ten regulations and their implementation rules for improving the style of meetings. Through in-depth study, careful investigation and practical reform, they promoted the in-depth development of work style construction and promoted the implementation of work through the change of meeting style.

Meeting style reflects work style. The brigade found through questionnaire surveys, on-site investigations, and officers and men' talks in the early stage that a few organs and business departments still have the thinking inertia and work style of "implementing meetings with meetings", which makes grassroots cadres tired of attending meetings and the time for training, management and other work is squeezed.

In response to the problem of meeting style, the brigade Party Committee, after widely soliciting opinions and suggestions, established "iron rules" in combination with the actual situation of the troops: those that can be arranged online will not be organized in a centralized manner, those that can be combined will not be held separately, and all meetings without substantive content will be cancelled. They also require the organs and business departments to strictly control the number of participants according to the content of the meeting, and further reduce the scale, time and agenda of the meeting.

Fewer and shorter meetings allow the brigade leaders and cadres to have more time to go deep into the front line of training and exercise, solve problems in equipment support and tactical coordination on the spot, and drive the grassroots to devote more energy to improving combat effectiveness.

Style is linked to combat effectiveness. The leaders of the brigade said that they will take this study and education as an opportunity to deeply integrate the improvement of style with the training and

preparation for war, and constantly stimulate the new vitality of grassroots officers and men to do things and start businesses with a pragmatic and efficient new meeting style.

第 83 集团军某旅改进评价机制，授课效果官兵说了算

来源：解放军报 作者：陶然 李少卿 责任编辑：郭妍菲 2025-05-17

第 83 集团军某旅推出自主选课评课系统

授课好不好 官兵说了算

解放军报讯　陶然、李少卿报道：”这堂课融合运用了动漫特效，形式很新颖”“希望下次授课时能安排’无人智能装备作战’内容”……前不久，刚结束授课的第 83 集团军某旅指导员周星宇通过自主选课评课系统，认真查看官兵对本次授课的评价及下次授课的建议。

授课效果好不好，官兵最有发言权。该旅前期调研了解到，有的政治干部教育授课虽然内容丰富，但形式单一，官兵提不起兴趣；有的授课形式虽然融入音效、视频等多种元素，却因内容不接地气、针对性不强，难以引起官兵共鸣。

为此，该旅依托信息视窗设计出一套自主选课评课系统。每次授课结束后，官兵可以通过系统对本次授课效果评分留言，对下次授课内容提出建议。

“这种评价机制增强了政治干部的紧迫感，如果课讲得不好，官兵可不会’手下留情’。”某连指导员宋佳琪说，前段时间，连长带着骨干参加战训法集训，连队各项工作由他牵头负责，忙得不可开交。直到授课前一天，他才腾出时间匆忙备课。由于时间紧张，他简单收集了一些资料，并草草制作课件，第二天便登台授课了。

授课结束后，宋佳琪在自主选课评课系统里看到，官兵对他的授课评分为”不及格”，而且不少人对这堂课颇有意见：”照本宣科，怎么可能让教育入脑入心”“既没有新颖的形式，也没有感人的故事，这堂课没意思”……看到官兵的”吐槽”，宋佳琪满脸羞愧，恨不得找个地缝钻进去。

痛定思痛。宋佳琪认真吸收官兵意见建议，积极改进授课形式、丰富授课内容，并精心打磨教案、准备课件。前不久，他再次走上讲台，精彩的授课得到官兵一致好评。

该旅领导告诉笔者，自主选课评课系统投入使用以来，政治干部的积极性主动性创造性被不断激发，授课内容更加丰富，授课形式更加灵活，官兵参加教育的热情普遍提高。

A Brigade of the 83rd Group Army Has Improved the Evaluation Mechanism, and the Officers and Men Have the Final Say on the Teaching Effect

Source: PLA Daily Author: Tao Ran Li Shaoqing Editor: Guo Yanfei 2025-05-17

A brigade of the 83rd Group Army launched an independent course selection and evaluation system

Officers and men have the final say on whether the teaching is good or not

PLA Daily News Tao Ran and Li Shaoqing reported: “This class integrates the use of animation special effects, and the form is very novel” “I hope that the next time I teach, I can arrange the content of ‘unmanned intelligent equipment combat’“... Not long ago, Zhou Xingyu, an instructor of a brigade of the 83rd Group Army who had just finished teaching, carefully checked the officers and men’ evaluation of this class and suggestions for the next class through the independent course selection and evaluation system.

Whether the teaching effect is good or not, the officers and men have the most say. The brigade’s preliminary research found that although some political cadres’ education courses are rich in content, the form is single, and the officers and men are not interested; some teaching forms, although they incorporate multiple elements such as sound effects and videos, are difficult to resonate with officers and men because the content is not grounded and targeted.

To this end, the brigade designed a self-selected course evaluation system based on the information window. After each class, officers and men can leave comments on the effectiveness of the class through the system and make suggestions on the content of the next class.

“This evaluation mechanism enhances the sense of urgency of political cadres. If the class is not taught well, officers and men will not show mercy.” Song Jiaqi, an instructor of a certain company, said that some time ago, the company commander took the backbone to participate in the combat training and law training. He was in charge of all the work of the company and was very busy. It was not until the day before the class that he made time to prepare for the class in a hurry. Due to time constraints, he simply collected some information and hastily made courseware, and went on stage to teach the next day.

After the class, Song Jiaqi saw in the self-selected course evaluation system that the officers and men gave him a “failed” grade for his class, and many people had opinions about the class: “How can education be absorbed by reading from the book?” “There is no novel form or touching story, this class is boring”... Seeing the “complaints” of the officers and men, Song Jiaqi was ashamed and wanted to find a crack in the ground to crawl into.

Learn from the pain. Song Jiaqi carefully absorbed the opinions and suggestions of the officers and men, actively improved the teaching form, enriched the teaching content, and carefully polished the lesson plan and prepared the courseware. Not long ago, he took to the podium again, and his wonderful lectures were unanimously praised by the officers and men.

The leaders of the brigade told the author that since the self-selected course evaluation system was put into use, the enthusiasm, initiative and creativity of political cadres have been continuously

stimulated, the teaching content has become richer, the teaching form has become more flexible, and the enthusiasm of officers and men to participate in education has generally increased.

第 74 集团军某旅加强军营文化建设激励官兵争当先锋

来源：解放军报 作者：邓联军 责任编辑：郭妍菲 2025-05-17

第 74 集团军某旅加强军营文化建设——

“先锋文化”砺精兵

■解放军报特约记者　邓联军

“下周计划组织年度第二轮小组赛，足球、篮球比赛共设 4 场……”春日南国，第 74 集团军某旅宣传科干事蔡树轩正与战友们一道，精心设计新一轮”先锋文化”活动方案。

近年来，该旅围绕”铸魂育人、谋战打赢、荣誉引领、工兵特色”，体系化打造”先锋文化”品牌，贯穿全年开展系列文化活动，营造奋斗强军、建功胜战浓厚氛围。

“我们注重抓好活动设计，为官兵打造内容丰富、形式多样的系列文化活动。”该旅领导介绍，他们组织机关骨干深入挖掘旅队红色资源，通过编写”红色家谱”、制作旅队宣传片、创作旅歌等形式，展示单位荣誉、宣传英模事迹，将红色基因融入官兵血脉；利用营区建设等契机，优化军营文化建设布局，引入 VR 等先进技术，打造军营 KTV、数字图书馆等文化阵地；探索推开”一营一特色”活动，引导各营根据自身特点组建文化队伍，鼓励官兵人人参与。

该旅新兵大课堂上，一堂”感悟时代伟力、奋进强军征程”思想政治教育课正在进行。某连指导员杨国梁介绍，这堂课是他们联合地方电视台协力打造的，融入了党史军史、单位典型人物等内容。”这堂课用小故事、短视频把创新理论讲得深入浅出、富有情感，我听后很有收获！”课后，一名战士说。

针对部队任务多样、点位分散等实际，该旅制订《任务分队文化工作实施规范》，指导任务分队拟制文化活动方案、筹备文化物资设备，结合任务实际常态开展忆战斗传统、唱战斗歌曲等活动，营造浓厚的战地文化氛围。

前不久，该旅派出分队遂行某大项任务，任务点位条件艰苦、环境恶劣。原本热情开朗的任务分队战士李秀云，一度变得沉默寡言。带队干部刘雄马了解得知，李秀云是首次参加大项任务，因工作繁重、节奏紧张，身心压力大，产生了强烈的想家情绪。

刘雄马和分队骨干商量后决定，先为李秀云进行心理疏导，缓解他的心理压力。随后，刘雄马联系李秀云父母，邀请他们录制了一份寄语视频，并在旅队的”先锋晚会”上播放。父

母的深情寄语，让李秀云湿了眼眶。随后的日子里，李秀云恢复了往日的热情开朗，全身心投入工作，与战友们一道圆满完成任务。

“先锋文化”激励官兵争当先锋。近期，该旅组织阶段训练考核，官兵努力拼搏、奋勇争先，多个课目成绩取得新突破。

A Brigade of the 74th Group Army Strengthens the Construction of Military Barracks Culture and Encourages Officers and Men to Be Pioneers

Source: PLA Daily Author: Deng Lianjun Editor: Guo Yanfei 2025-05-17

A brigade of the 74th Group Army strengthens the construction of military barracks culture——

“Pioneer culture” trains elite soldiers

■ PLA Daily special correspondent Deng Lianjun

“Next week, we plan to organize the second round of group matches of the year, with a total of 4 football and basketball games...” In the spring in the south, Cai Shuxuan, a propaganda officer of a brigade of the 74th Group Army, is working with his comrades to carefully design a new round of “pioneer culture” activity plans.

In recent years, the brigade has systematically built a “pioneer culture” brand around “casting souls and educating people, planning and winning battles, leading with honor, and featuring engineers”, and carried out a series of cultural activities throughout the year to create a strong atmosphere of striving to strengthen the army and making achievements and winning battles.

“We pay attention to the design of activities and create a series of cultural activities with rich content and diverse forms for officers and men.” The leaders of the brigade introduced that they organized the backbone of the organization to deeply explore the red resources of the brigade, and through the compilation of “red genealogy”, production of brigade propaganda films, creation of brigade songs and other forms, to display the honor of the unit, publicize the deeds of heroes and models, and integrate the red gene into the blood of officers and men; take advantage of opportunities such as barracks construction to optimize the layout of military barracks cultural construction, introduce advanced technologies such as VR, and create cultural positions such as military barracks KTV and digital library; explore and promote the “one barracks one feature” activities, guide each barracks to form a cultural team according to its own characteristics, and encourage officers and men to participate.

In the brigade’s recruit classroom, an ideological and political education class of “feeling the power of the times and forging ahead on the journey of strengthening the army” is in progress. Yang Guoliang, an instructor of a certain company, introduced that this class was jointly created by them and local TV stations, and incorporated content such as Party history and military history and

typical figures of the unit. “This class uses small stories and short videos to explain the innovative theory in a simple and emotional way. I have gained a lot after listening to it!” said a soldier after the class.

In view of the diverse tasks and scattered locations of the troops, the brigade formulated the “Implementation Specifications for Cultural Work of Task Teams” to guide the task teams to formulate cultural activity plans, prepare cultural materials and equipment, and carry out activities such as recalling combat traditions and singing combat songs in combination with the actual tasks to create a strong battlefield cultural atmosphere.

Not long ago, the brigade sent a team to carry out a major task. The conditions at the task site were difficult and the environment was harsh. Li Xiuyun, a soldier of the task team who was originally enthusiastic and cheerful, became silent for a while. Liu Xiongma, the team leader, learned that Li Xiuyun was participating in a major task for the first time. Due to heavy work, tight rhythm, and great physical and mental pressure, he had a strong sense of homesickness.

After discussing with the backbone of the team, Liu Xiongma decided to first provide psychological counseling for Li Xiuyun to relieve his psychological pressure. Later, Liu Xiongma contacted Li Xiuyun’s parents and invited them to record a message video and play it at the brigade’s “Pioneer Party”. The affectionate message from her parents made Li Xiuyun wet her eyes. In the following days, Li Xiuyun regained her former enthusiasm and cheerfulness, devoted herself to work, and successfully completed the task with her comrades.

“Pioneer culture” encourages officers and men to be pioneers. Recently, the brigade organized a phased training assessment, and officers and men worked hard and bravely to be the first, and achieved new breakthroughs in many subjects.

陆军某旅打破教员专业壁垒，锻造战场“多面手”

来源：解放军报 作者：刘华山　吴思哲　童祖静 责任编辑：郭妍菲 2025-05-17

陆军某旅提升教导队跨专业组训施教水平——

交叉轮训：让教员不再”偏科”

■刘华山　吴思哲　解放军报特约记者　童祖静

近段时间，陆军某旅专业集训渐次铺开，教导队的教员们格外忙碌。

无人机训练场上，炮兵专业出身的教员王子龙利用模拟训练软件，指导学员练习不同场景下无人机操作技能；兵棋推演室内，从侦察兵转型的教员孙延锋布下”电磁迷阵”，引导学员想方设法破解战场困局；模拟城镇中，通信专业教员李玉哲带领学员精研协同战法……

该教导队周队长向记者细数教员们的任务分工，”复合型”“一专多能”等关键词被他反复提及。”过去，除预提指挥军士集训和临时轮训外，教导队很少承担其他任务。”周队长回忆，由于缺乏任务历练，部分教员在自己擅长的专业领域”精耕细作”，可一旦走出自己的”一亩三分地”就”两眼一抹黑”。

那年，该旅组织多课目融合教学法集训。按要求，教导队各专业教员需围绕战术指挥、火力打击、战场救护等不同专业展开联合教学。

没想到，首场教学即遇困境：工兵专业出身的何教员讲解”战术穿插”时，全程聚焦破障技术，未能与火力压制课目联动；通信专业李教员虽能熟练演示电台操作，但开展战术背景下抗干扰教学却陷入照本宣科……

该旅领导得知情况后，要求机关组织专项调研。不久后，一份调研报告送到旅领导案头：教员都是从基层遴选的专业尖子，进入教导队后，他们一直承担基础课目和本专业教学任务。以往上级组织教员跨专业教学法集训没有硬性要求，不少教员只报名参加与本专业关联度较大的集训。久而久之，教员跨专业教学能力始终在低层次徘徊。近年来，随着该旅跨专业组训任务越来越多，这个问题愈发突出。

“‘偏科’的教员带不出过硬的战斗队，教员必须走出舒适区，补齐跨专业组训能力短板。”该旅领导的话掷地有声。不久后，他们分批选派教员赴院校、厂家、兄弟单位，跨专业参加侦察情报、无人机操作等集训；邀请院校专家、一线官兵来队，围绕协同战术战法等课题为教员授课。为打破专业壁垒，该旅还建立”双考双证”认证体系，教员集训结束归队后，只有通过旅队组织的理论笔试、实装教学双考核，才能取得跨专业任教资格证书；出台硬性规定，要求每名教员每年新增至少一个专业资质，并将专业资质认证结果与选晋评优挂钩。

炮兵专业教员王子龙，去年参加上级组织的侦察情报专业集训。从教员到受训者的身份转变，加上对所学专业较为陌生，让他一时无所适从。”作为教导队教员，如果这点困难都克服不了，日后还有什么底气给战友们讲课！”他在训练笔记本扉页写下这句话，暗下决心：咬碎牙也要啃下这块硬骨头。白天，他铆在车场反复研究侦察装备操作技能；晚上，在宿舍加班加点学习侦察专业理论知识。

结业时，王子龙不仅以优异成绩通过考核，还摸索出一套”装甲—侦察联动标定法”。归队后，王子龙将集训中学到的侦察专业知识应用到日常教学。一次训练中，由他带教的装甲分队在冲锋时灵活运用新战法，提前”歼灭”了埋伏的”敌人”，为步兵分队清除了威胁。

经过一段时间探索，该教导队教员们的”偏科”现象得到有效解决。然而，新的问题随之而来。去年夏天，该旅新排长岗前集训与无人机操作骨干集训时间”撞车”，而部分外训教员

尚未归队，导致在位教员人数不足，虽然最终按期完成了集训任务，但此事引起该旅领导重视。

为解决工训矛盾，该旅探索推行”交叉轮训”机制：一是精细制订培训计划，每次外出参训教员一般不超过 3 人；二是每名教员必须带教出两名能够接替担负教学任务的后备教员；三是建立”种子教员库”，在全旅遴选专业尖子，采取”边学边教、以工代训”方式，充实教导队教学力量。

今年初，”交叉轮训”机制迎来考验。该旅组织预任参谋集训，教导队首席教员吴正斌当时在外培训，他原先负责的作战计算、作战标图等课程，由”种子教员”沙宇航临时担任首席教员。吴正斌带教的后备教员娄浩然、秦康辉，分别承担基础理论讲解和技能训练教学任务。在他们的精心带教下，这批预任参谋在集团军考核中斩获佳绩。

记者在采访期间看到，吴正斌正忙着更新《常见特情处置手册》。”如今，教导队既要教’标准答案’，还要教’解题思路’。”吴正斌告诉记者，随着教员迈上更高的”能力台阶”，大家的视野从”课目全覆盖”拓宽到”质效双提升”。去年以来，他们将战场常见特情拆解成多个对应训练模块，教员区分专业结合实战背景展开教学，引导学员在自主识变应变中强化实战意识。

采访中，恰逢该教导队组织一场预提指挥军士结业考核。考核现场，红方接到”夺取蓝方高地”指令后发起攻击。面对对手设置的重重障碍，红方果断放弃强攻并调整部署：一组释放烟雾扰乱对手视线，二组侧翼迂回破障，三组佯攻吸引对手火力。

至此，记者本以为考核进入尾声。孰料，正当红方突击组即将攻上高地时，导调组临时设置”蓝方援兵赶到”特情，对抗陷入胶着。

危急时刻，红方自主应变：二组点燃信号棒制造主攻假象，三组改道穿插至援兵侧后、埋伏增援之”敌”，一组作为主力展开全力攻击。当红旗插上高地时，蓝方增援部队因被红方误导，仍在寻找红方主力。

采访结束，阴雨连绵的天空开始放晴。阳光下，教导队新一批教员正在接受执教能力考核。不远处的电子屏上，实时更新的成绩记录着这群复合型教员坚实的成长足迹……

A Certain Army Brigade Breaks Down the Professional Barriers of Instructors and Forges “All-Rounders” on the Battlefield

Source: PLA Daily Author: Liu Huashan Wu Sizhe Tong Zujing Editor: Guo Yanfei 2025-05-17

A certain army brigade improves the cross-professional training and teaching level of the instructor——

Cross-training: Let the instructors no longer be “biased”

■Liu Huashan Wu Sizhe PLA Daily Special Correspondent Tong Zujing

Recently, the professional training of a certain army brigade has been gradually rolled out, and the instructors of the instructors’ team are particularly busy.

On the drone training ground, Wang Zilong, an instructor from the artillery major, used simulation training software to guide students to practice drone operation skills in different scenarios; in the war game simulation room, Sun Yanfeng, an instructor who transformed from a scout, laid out an “electromagnetic maze” to guide students to find ways to solve the battlefield dilemma; in the simulated town, Li Yuzhe, a communication major instructor, led the students to study the coordinated tactics...

Captain Zhou of the instructor detailed the division of tasks of the instructors to reporters, and he repeatedly mentioned keywords such as “composite” and “one specialty and multiple abilities”. “In the past, except for the pre-training of command sergeants and temporary rotation training, the instructor rarely undertook other tasks.” Captain Zhou recalled that due to the lack of task experience, some instructors “worked hard” in their professional fields, but once they stepped out of their own “one acre and three points of land”, they were “completely in the dark”. That year, the brigade organized a training session on multi-course integrated teaching methods. According to the requirements, the professional instructors of the instructor need to carry out joint teaching around different majors such as tactical command, firepower strike, and battlefield rescue. Unexpectedly, the first teaching session encountered difficulties: Instructor He, who was from the engineering major, focused on the obstacle removal technology throughout the explanation of “tactical interspersion” and failed to link with the firepower suppression course; although Instructor Li of the communication major was able to demonstrate radio operation proficiently, he fell into rote reading when conducting anti-interference teaching under the tactical background... After the brigade leaders learned about the situation, they asked the department to organize a special investigation. Soon after, a research report was sent to the brigade leaders: the instructors were all professional top students selected from the grassroots level. After entering the instructor, they have been responsible for basic courses and teaching tasks in their majors. In the past, there were no rigid requirements for the superiors to organize cross-disciplinary teaching method training for instructors, and many instructors only signed up for training that was more related to their own majors. Over time, the cross-disciplinary teaching ability of instructors has always been at a low level. In recent years, as the brigade has more and more cross-disciplinary training tasks, this problem has become more prominent.

“Instructors who are ‘biased’ cannot lead a strong combat team. Instructors must step out of their comfort zone and make up for the shortcomings in cross-disciplinary training ability.” The words of the brigade leader were resounding. Soon after, they selected instructors in batches to go to colleges, manufacturers, and brother units to participate in cross-disciplinary training such as reconnaissance intelligence and drone operation; they invited experts from colleges and

universities and front-line officers and men to come to the team to teach instructors on topics such as coordinated tactics and methods. In order to break down professional barriers, the brigade has also established a “double test and double certificate” certification system. After the instructors return to the team after the training, they can only obtain the cross-professional teaching qualification certificate after passing the theoretical written test and practical teaching double assessment organized by the brigade; a hard rule is introduced, requiring each instructor to add at least one professional qualification every year, and the professional qualification certification results are linked to selection and promotion.

Wang Zilong, an artillery instructor, participated in the reconnaissance and intelligence professional training organized by the superior last year. The change from an instructor to a trainee, coupled with the unfamiliarity of the major he studied, made him at a loss for a while. “As an instructor of the instructor, if I can’t overcome this difficulty, what confidence do I have to teach my comrades in the future!” He wrote this sentence on the cover of his training notebook, and secretly made up his mind: I must bite this hard bone even if I have to bite my teeth. During the day, he repeatedly studied the operation skills of reconnaissance equipment in the parking lot; at night, he worked overtime in the barracks to learn the theoretical knowledge of the reconnaissance profession.

At the end of the course, Wang Zilong not only passed the assessment with excellent results, but also explored a set of “armor-reconnaissance linkage calibration method”. After returning to the team, Wang Zilong applied the reconnaissance expertise he learned in the training to daily teaching. In one training session, the armored unit he taught flexibly used new tactics during the charge, “annihilated” the ambushed “enemy” in advance, and eliminated the threat for the infantry unit.

After a period of exploration, the “biased” phenomenon of the instructors of the instructor was effectively solved. However, new problems followed. Last summer, the pre-job training of the new platoon leaders of the brigade and the training of the backbone of drone operation “collided”, and some foreign training instructors had not yet returned to the team, resulting in a shortage of instructors in place. Although the training task was finally completed on schedule, the matter attracted the attention of the brigade leaders.

In order to resolve the contradiction between work and training, the brigade explored and implemented the “cross-training” mechanism: first, the training plan was carefully formulated, and the number of instructors who went out for training each time was generally no more than 3; second, each instructor must train two reserve instructors who can take over the teaching tasks; third, a “seed instructor pool” was established to select professional top students from the entire brigade, and adopt the method of “learning while teaching, and training on the job” to enrich the teaching force of the instructor.

At the beginning of this year, the “cross-training” mechanism faced a test. The brigade organized a training camp for pre-appointed staff officers. Wu Zhengbin, the chief instructor of the instructor, was training outside at the time. The courses he was originally responsible for, such as combat

calculation and combat mapping, were temporarily taught by “seed instructor” Sha Yuhang as the chief instructor. Lou Haoran and Qin Kanghui, the reserve instructors taught by Wu Zhengbin, were responsible for basic theory explanation and skill training teaching tasks respectively. Under their careful guidance, this group of pre-appointed staff officers achieved good results in the group army assessment.

During the interview, the reporter saw that Wu Zhengbin was busy updating the “Common Special Situation Handling Manual”. “Nowadays, the instructor must teach not only the ‘standard answers’ but also the ‘problem-solving ideas’.” Wu Zhengbin told reporters that as the instructors have stepped up to a higher “capability level”, everyone’s vision has been broadened from “full coverage of courses” to “double improvement in quality and efficiency”. Since last year, they have broken down common special situations on the battlefield into multiple corresponding training modules. Instructors distinguish between majors and combine actual combat backgrounds to carry out teaching, guiding trainees to strengthen their actual combat awareness in self-identification and response.

During the interview, the instructor happened to organize a graduation assessment for pre-promotion command sergeants. At the assessment site, the Red side launched an attack after receiving the order to “capture the Blue side’s high ground”. Faced with the many obstacles set by the opponent, the Red side decisively gave up the strong attack and adjusted its deployment: one group released smoke to disrupt the opponent’s sight, the second group flanks to break obstacles, and the third group feinted to attract the opponent’s firepower.

At this point, the reporter thought the assessment was coming to an end. Unexpectedly, just as the Red side’s assault team was about to attack the high ground, the guidance and dispatching group temporarily set up the “Blue side reinforcements arrived” special situation, and the confrontation fell into a stalemate.

In the critical moment, the Red team responded autonomously: Group 2 lit the signal stick to create the illusion of the main attack, Group 3 changed the route to the side and rear of the reinforcements and ambushed the “enemy” who was reinforcing, and Group 1 launched a full-scale attack as the main force. When the red flag was planted on the high ground, the Blue team’s reinforcements were misled by the Red team and were still looking for the main force of the Red team.

After the interview, the rainy sky began to clear up. In the sunshine, a new batch of instructors of the instructor were undergoing the assessment of their teaching ability. On the electronic screen not far away, the real-time updated results recorded the solid growth footprints of this group of compound instructors...

从操场通往战场，组训模式之变带来训练场新景观

来源：解放军报 作者：倪鑫磊 喻润东 责任编辑：郭妍菲 2025-05-19

陆军某旅探索”军事体育+兵种专业”组训新模式——

“体能训练就像在打仗”

■倪鑫磊 解放军报特约记者 喻润东

初夏时节，陆军某旅训练场上，一支防化分队正在烟雾弥漫的”染毒”地带疾行。下士张一薄身着 20 多公斤重的重型防护服，将”伤员”搬运至指定地点后，接连完成杠铃提拉上翻、搬运弹药箱、翻滚轮胎等组合训练。从他略显沉重的步伐看得出，这次训练对身为训练尖子的张一薄来说挑战不小。

“这样的连贯训练确实把我的体能逼到了极限。”摘下防毒面罩，张一薄额头不断滚下汗珠。他告诉记者，此次训练与以往大有不同，传统的侦毒、洗消、检测等 10 余个专业课目，被整合成”400 米障碍+毒区伤员救援”“快速奔跑+毒剂侦检”等 6 个”军事体育+兵种专业”组合课目连贯实施，训练难度陡增。

一名战士穿戴防护服快速通过平衡桥。杨琪 摄

该旅作训科干部杨伟鹏告诉记者，这种组训新探索，源于去年的一次演练。

当时，伪装分队上等兵小杨奔袭至目标地点后，未经休息就被要求进行掩体构筑。然而，因体力不支，他未能在规定时间内完成作业，影响了后续任务进程。

复盘中，导演组并未将此简单归结为单兵素质不高，而是找到了更深层次的原因。

他们发现，各级在开展军事体育训练或专业训练时，”三多三少”现象普遍存在：操场跑道练得多，战术背景融入少；单课目强化多，组合式训练少；运动技巧强调多，战场实用考量少。

“今年初，新编修的《军事体育训练大纲》明确，军体训练由以健康体能为主向以战斗体能为主转变，提高对部队战斗力的贡献率。”杨伟鹏介绍，旅党委受到启发，着力探索”军事体育+兵种专业”组训新模式，将传统的”跑、跳、拉”等基础体能项目拆解重构，结合兵种专业特点要求，构设出多个典型场景，让训练最大程度贴近实战。

随着组训模式的变化，该旅训练场呈现新景观——

军体训练增加了敌情背景。采访中，某营商营长向记者展示他们先后使用的两张训练计划表，通过对比发现，”军事体育训练”一栏中，增加了敌情研判、特情处置等环节。

于是，可喜的一幕出现了：伴着突然响起的警报，官兵们充分研判”敌情”，接连完成隐蔽跃进、战场救护、伤员搬运等课目，未经休整便转入 5 公里武装越野训练。”这种组合训练既锤炼了体能，又强化了战场意识。虽然强度、难度较以往明显提高，但越来越贴近实战要求了。”走下训练场，二级上士颜鹏裕说出了战友们的共同感受，”体能训练就像在打仗。”

专业训练融入了军事体育。在道路训练场，分队官兵操纵大型机械装备过程中，穿插身体协调和短距离冲刺训练，提升官兵战场快速反应能力；在核生化模拟训练场，战士们身着防护服，完成一组快速奔跑训练后，立即进入”染毒”区域，和战友一起转运”伤员”，还没来得及喘口气，他们又遭遇了模拟火力打击……

“在专业训练中融入高频次的力量组合训练，使我的体能得到明显增强，能够遂行各种任务。”舟桥作业手、一级上士曾毅强告诉记者，在以往的舟桥架设训练中，他搬运几次重物便开始手脚发软、力不从心，而现在，每次训练结束后，他仍有不少余力。

“新的训练模式对组训者能力素质、训练场地配套提出了更高要求。”该旅领导告诉记者，下一步，他们将通过组织骨干交叉集训、扩建改造训练场地等措施，推动组合训练不断走深走实，着力打通训练场到战场的”最后一公里”。

编辑感言

这样的探索不妨多一些

■刘伟祺

今年 2 月，《军事体育训练大纲》开始施行，旨在推动全军军事体育训练转型升级，实现由以基础体能为主向以战斗体能为主转变。

顾名思义，战斗体能就是官兵聚焦兵种专业和特殊战场环境，有效遂行作战任务所需的身体能力。陆军某旅推开”军事体育+兵种专业”组训新模式，正是贯彻落实《军事体育训练大纲》、深化战斗体能训练的有力举措，这样的探索不妨多一些。

但就实际情况来看，有个别单位在这方面做得不够，或用老办法训练新课目，或体能训练与任务需求”两张皮”，像文中提到的”三多三少”现象不同程度存在。

我们常说，练为战、练即战，提升战训耦合度。这就要求平时的训练，既要从难从严从实战出发，也要结合单位实际，探索科学有效的训练模式。只要有利于提升部队战斗力，只要符合高质量发展理念，就要勇于尝试、大胆实践，从而总结出更多实用管用好用的方法手段，推动练兵备战工作不断走深走实。

From the Playground to the Battlefield, the Change of Training Mode Brings a New Landscape to the Training Ground

Source: PLA Daily Author: Ni Xinlei Yu Rundong Editor: Guo Yanfei 2025-05-19

A certain army brigade explores a new training mode of "military physical + arms specialty"——

"Physical training is like fighting a war"

■Ni Xinlei PLA Daily Special Correspondent Yu Rundong

In early summer, on the training ground of a certain army brigade, a chemical defense team was running in a smoky "contaminated" area. Corporal Zhang Yibao, wearing a heavy protective suit weighing more than 20 kilograms, carried the "wounded" to the designated location, and then completed a combination of training such as barbell lifting and flipping, carrying ammunition boxes, and rolling tires. From his slightly heavy steps, it can be seen that this training is a big challenge for Zhang Yibao, who is a top trainer.

"Such continuous training really pushed my physical fitness to the limit." Taking off the gas mask, Zhang Yibao's forehead kept rolling down with sweat. He told reporters that this training is very different from the past. More than 10 traditional professional subjects such as drug detection, decontamination, and testing have been integrated into six "military physical + arms specialty" combined subjects such as "400-meter obstacle + rescue of wounded in toxic areas" and "fast running + toxic agent detection" for continuous implementation, and the difficulty of training has increased sharply.

A soldier wearing protective clothing quickly passes through the balance bridge. Photo by Yang Qi

Yang Weipeng, a cadre of the brigade's training department, told reporters that this new exploration of group training originated from an exercise last year.

At that time, after Xiao Yang, a private of the camouflage squad, rushed to the target location, he was required to build a bunker without rest. However, due to physical exhaustion, he failed to complete the task within the specified time, which affected the progress of subsequent tasks.

In the review, the director team did not simply attribute this to the low quality of individual soldiers, but found a deeper reason.

They found that when conducting military physical training or professional training at all levels, the phenomenon of "three mores and three lesses" is common: more training on the playground track, less integration of tactical background; more emphasis on single subjects, less combination training; more emphasis on physical skills, less consideration of battlefield practicality.

“At the beginning of this year, the newly revised “Military Physical Training Outline” clearly stated that military physical training should shift from focusing on health and physical fitness to focusing on combat physical fitness, so as to improve the contribution rate to the combat effectiveness of the troops.” Yang Weipeng introduced that the brigade Party Committee was inspired and focused on exploring a new training model of “military physical + arms and professions”, dismantling and reconstructing traditional basic physical fitness projects such as “running, jumping, and pulling”, combining the characteristics and requirements of arms and professions, and constructing multiple typical scenes to make the training as close to actual combat as possible.

With the change of the training model, the brigade training ground presents a new landscape-

Military physical training has added enemy background. During the interview, a battalion commander showed reporters two training schedules they used successively. By comparison, it was found that the “military physical training” column added enemy situation analysis and special situation handling.

Then, a gratifying scene appeared: accompanied by the sudden alarm, the officers and men fully judged the “enemy situation”, completed the subjects of concealed leap, battlefield rescue, and wounded transportation, and turned to 5 kilometers of armed cross-country training without rest. “This combination of training not only strengthens physical fitness, but also strengthens battlefield awareness. Although the intensity and difficulty are significantly higher than before, it is getting closer and closer to actual combat requirements.” After leaving the training ground, Second Sergeant Yan Pengyu expressed the common feelings of his comrades, “Physical training is like fighting a war.” Professional training is integrated into military sports. In the road training field, the soldiers of the detachment [*fendui*] operated large mechanical equipment and interspersed body coordination and short-distance sprint training to improve their rapid response ability on the battlefield; in the nuclear, biological and chemical simulation training field, the soldiers wore protective clothing and completed a set of fast running training. They immediately entered the “contaminated” area and transferred the “wounded” with their comrades. Before they had time to catch their breath, they encountered simulated fire strikes...

“Integrating high-frequency strength combination training into professional training has significantly enhanced my physical fitness and enabled me to perform various tasks.” Zeng Yiqiang, a pontoon bridge operator and a first-class sergeant, told reporters that in previous pontoon bridge erection training, he began to feel weak and powerless after carrying heavy objects several times, but now, after each training, he still has a lot of spare energy.

“The new training model has put forward higher requirements on the ability and quality of trainers and the supporting training grounds.” The leaders of the brigade told reporters that in the next step, they will promote the combination training to go deeper and more practical through measures such as organizing cross-training of backbones and expanding and renovating training grounds, and strive to open up the “last kilometer” from the training ground to the battlefield.

Editor’s Note

There may be more explorations like this

■Liu Weiqi

In February this year, the “Military Physical Training Outline” came into effect, aiming to promote the transformation and upgrading of military physical training throughout the army, and to achieve a shift from basic physical fitness to combat physical fitness.

As the name suggests, combat physical fitness is the physical ability required for officers and men to focus on arms specialties and special battlefield environments and effectively conduct combat missions. The new training model of “military physical + arms specialties” launched by a certain army brigade is a powerful measure to implement the “Military Physical Training Outline” and deepen combat physical fitness training. There may be more explorations like this.

However, in actual conditions, some units have not done enough in this regard, or used old methods to train new subjects, or physical training and task requirements are “two skins”, such as the “three more and three less” phenomenon mentioned in the article.

We often say that training for war, training is war, and improving the coupling degree of combat and training. This requires that in peacetime training, we must start from difficulty, strictness, and actual combat, and also explore scientific and effective training models in combination with the actual situation of the unit. As long as it is conducive to improving the combat effectiveness of the troops and as long as it conforms to the concept of high-quality development, we must be brave to try and boldly practice, so as to summarize more practical, effective and easy-to-use methods and means, and promote the continuous deepening and implementation of training and preparation work.

第 83 集团军某旅打破模拟训练局限，体系协同训练质效提升

来源：解放军报 作者：童康 刘敏 责任编辑：郭妍菲 2025-05-19

第 83 集团军某旅推动模拟训练系统由单平台向成体系转变

协同战斗在虚拟战场打响

解放军报讯 童康、记者刘敏报道：前不久，伴随一阵急促的警报声，第 83 集团军某旅一场模拟化全要素协同训练拉开战幕。某模拟训练专修室内，信号灯不断闪烁，一连串作战指令在模拟指挥平台快速流转。

虚拟空间中，战位互联，数据互通：车队前进道路被毁，指挥员祁宾浩敲击键盘调出电子地图，重新规划行军路线；驾驶员在训练模拟器上握紧方向盘，调整车辆间距，驾驶战车

奔赴发射阵地；无人机飞控手易宏紧盯屏幕，操作无人机捕捉火炮打击画面……各要素实时联动、一体协同，成功打击”敌”目标。

“模拟训练不仅能模拟实装、实兵、实景，还能有效推动体系作战能力加速生成。”该旅领导介绍，由于传统训练场地难以满足训练需求，他们建起模拟训练专修室，以打破场地限制。一段时间后，他们发现，模拟仿真平台只能进行单装训练，各要素多为”单打独斗”。为此，他们充分挖掘协同、战术等模拟训练系统功能，将各作战要素融在一起开展体系练兵，有效提升协同训练质效。

记者在训练现场看到，主控屏上，各项作战数据滚动更新：侦察要素采集战场信息，快速判断目标性质；气象要素实时更新气象通报，以备炮手动态修正射击参数；指控要素灵活反应，统筹指挥火力打击……

为进一步提高模拟训练的练兵质效，该旅大力推进训练系统由单平台向成体系转变，主训内容由单兵操作技能向技术战术融合转变，运用方式由独立分散训向互联体系训转变。下一步，该旅将以作战任务为牵引，一体规划装备操作模拟、分队战术组网、仿真交战对抗等环节，将侦察、通信、火力等体系要素合理编组，稳步推进”模拟多训、实装精训”组训模式走深走实。

A Brigade of the 83rd Group Army Breaks the Limitations of Simulation Training, and the Quality and Efficiency of System Collaborative Training Are Improved

Source: PLA Daily Author: Tong Kang Liu Min Editor: Guo Yanfei 2025-05-19

A brigade of the 83rd Group Army promotes the transformation of simulation training system from a single platform to a system

Collaborative combat starts on the virtual battlefield

PLA Daily News Tong Kang and reporter Liu Min reported: Not long ago, accompanied by a burst of rapid alarms, a simulated full-element collaborative training of a brigade of the 83rd Group Army kicked off. In a simulation training room, signal lights kept flashing, and a series of combat commands quickly circulated on the simulation command platform.

In the virtual space, the battle positions are interconnected and data is interoperable: the road ahead of the convoy was destroyed, and the commander Qi Binhao tapped the keyboard to call up the electronic map and replanned the marching route; the driver held the steering wheel tightly on the training simulator, adjusted the distance between vehicles, and drove the tank to the launch position; the drone flight controller Yi Hong stared at the screen and operated the drone to capture the artillery strike picture... All elements are linked in real time and coordinated as a whole to successfully strike the “enemy” target.

“Simulation training can not only simulate real equipment, real soldiers, and real scenes, but also effectively promote the accelerated generation of system combat capabilities.” The leaders of the brigade introduced that since traditional training venues could not meet the training needs, they built a simulation training room to break the venue limitations. After a period of time, they found that the simulation platform could only conduct single-equipment training, and most of the elements were “single-handed”. To this end, they fully explored the functions of the simulation training system such as coordination and tactics, integrated various combat elements together to carry out system training, and effectively improved the quality and efficiency of coordinated training.

The reporter saw at the training site that on the main control screen, various combat data were updated in a rolling manner: reconnaissance elements collected battlefield information and quickly judged the nature of the target; meteorological elements updated meteorological reports in real time to prepare gunners to dynamically correct shooting parameters; command and control elements responded flexibly and coordinated firepower strikes...

In order to further improve the quality and efficiency of simulation training, the brigade vigorously promoted the transformation of the training system from a single platform to a system, the main training content changed from individual operation skills to technical and tactical integration, and the application method changed from independent and decentralized training to interconnected system training. In the next step, the brigade will take combat missions as the driving force, integrate the planning of equipment operation simulation, team tactical networking, simulated combat confrontation and other links, rationally organize reconnaissance, communication, firepower and other system elements, and steadily advance the “simulated multiple training, actual equipment precision training” training model to go deeper and more practical.

服务大厅由“冷”变“热”的背后，是为兵服务更暖心更用心

来源：解放军报 作者：王雲峤　孙晨　张磊峰 责任编辑：郭妍菲 2025-05-19

服务大厅由”冷”变”热”

——第 76 集团军某旅机关改进作风探索完善”一站式”服务的一段经历

■王雲峤　孙　晨　解放军报记者　张磊峰

近日，第 76 集团军某旅三营文书杨硕硕来到机关”一站式”服务大厅申领车辆保障器材。他填写提交《基层器材申领表》后，便前往仓库领取所需物资。

“办理业务只需跑一次机关、填一张表单，方便又高效。”谈及机关服务基层工作的新变化，杨硕硕称赞道。

此前，该旅组织机关基层恳谈会，有官兵反映，平时去机关办理业务，常因手续繁琐、流程不熟，需要往返多次，耗时又费力。该旅党委深入调研后决定，依托新建的”一站式”服务大厅，优化业务办理流程，提升为兵服务质效，避免基层官兵到机关办事反复跑、多头跑。

“报考司法考试需要什么条件”“为孩子办理转学需要哪些手续”……”一站式”服务大厅投入使用后，一度受到官兵欢迎，可没过多久又”冷”了下来。原来，由于骨干力量弱、业务内容杂，服务大厅起初只开设了 2 个窗口，有时为方便机关归口管理，不少业务集中在周五办理。前来办事的官兵，常常在窗口前排起长队。时间一长，官兵为了减少等待时间，又纷纷奔走在各业务科室之间，办理业务就回到”老路子”。

不久后，该旅再次召开机关基层恳谈会，官兵七嘴八舌谈起自己的感受。”休息时间本就紧张，光是在服务大厅排队就要好一阵子”“与其’排队 2 小时、办事 5 分钟’，还不如直接去机关科室办理”……

了解服务大厅”遇冷”的原因后，该旅机关随即进行整改。他们对窗口数量、服务内容、业务办理时间进行调整，根据官兵意见建议，适当增加办事窗口；细化制订窗口值班计划，确保机关正常工作与为兵服务两不误；制作《”一站式”服务大厅服务指南》并下发基层，进一步优化办事流程，缩短办事时间；在强军网同步开通线上业务办理申报渠道，官兵可以根据实际情况灵活选择；按照业务分工，延长业务量大的窗口服务时间……一套”组合拳”下来，前来办事的官兵等待时间大大缩短，满意度、获得感不断攀升。

优化升级后的服务大厅一亮相，便再次成为全旅”焦点”。记者走进服务大厅看到，”基层至上、士兵第一”几个大字引人注目。服务大厅自西向东，划分为业务办理、政策咨询和热线投诉 3 个区域，下设训练管理、财务结算等业务窗口。值班干部和公勤人员正在窗口开展”一对一”服务，耐心细致地解答办事官兵提出的问题。

业务窗口前，因训练伤急需办理转诊手续的某营下士吴群，填写提交《伤病员信息登记表》后，值班干部迅速对接旅卫生科，卫生科工作人员随即将吴群的伤情上报至上级医院，并为他开具了转诊单。很快，吴群就办完了伤病员异地就诊手续。不仅如此，服务大厅工作人员根据吴群后续离营就诊需求，为他填写了就诊审批单。

“我们受理官兵诉求后，当即能办的现场办；需要其他科室协助的，原则上 1 至 2 个工作日内办结。官兵只需填写一张业务申报单即可，剩余程序均交给机关内部流转办理。”该旅人力资源科干事李鹏告诉记者，近段时间以来，他们针对办理难度大、周期长、流程复杂的事项，建立了”首问负责制”“全程负责制”“限期办结制”等机制，机关全程跟踪问效，确保官兵办理的事项落地落实。与此同时，他们还定期收集官兵意见建议并列出台账，在机关周交班会上集中研究改进措施，指定专人负责、明确解决时限。

翻开《”一站式”服务大厅服务登记簿》，记者看到，自服务大厅投入使用以来，该旅已累计为官兵办理家属随军、转诊就医、证件补办等事项数百件。

机关倾心服务，官兵聚力打赢。前不久，该旅组织建制连考核，官兵斗志昂扬、热情高涨，多个课目成绩取得突破，部队战斗力水平进一步提升。

采访手记

把问题当考题

■张磊峰

第 76 集团军某旅”一站式”服务大厅由”冷”到”热”的转变，折射出做好为兵服务工作的”解题思路”：机关服务基层从来不是一次性、一阵子，而是需要在持续解决官兵”急难愁盼”中，让服务始终处于”在线”状态。

当官兵抱怨办事耗时费力，该旅党委把”排队比办事时间长”“流程太复杂”这些难题和需求记在本上、放在心上。服务大厅的”遇冷”与”回暖”让我们看到，机关服务基层必须俯下身子、倾听兵声，只有带着”把问题当考题”的诚恳、把官兵”呼声”当”哨声”的热忱，才能真正把为兵服务工作做到官兵心坎上。

该旅服务大厅”冷”与”热”的背后，蕴含着一个朴素道理：为兵服务从不是冰冷的流程，而是带着温度的接力跑。机关干部从”坐办公室”到”跑服务链”，那些”多走的一步路”“多想的一个细节”，才是为兵服务的”真义”。

有人说，服务基层，一头连着官兵”大事小情”，一头连着部队战斗力。当为兵服务的触角越来越细，我们就会发现，服务的暖心、用心不仅体现在官兵的笑脸上，更蕴藏在战斗力拔节的声音里。

Behind the Change of Service Hall From “Cold” to “Hot”, It Is to Serve Soldiers More Warmly and Attentively

Source: PLA Daily Author: Wang Yunqiao Sun Chen Zhang Leifeng Editor: Guo Yanfei 2025-05-19

The service hall has changed from “cold” to “hot”

——An experience of the 76th Group Army’s brigade improving its work style and exploring and improving the “one-stop” service

■ Wang Yunqiao Sun Chen PLA Daily reporter Zhang Leifeng

Recently, Yang Shuoshuo, a clerk of the third battalion of a brigade of the 76th Group Army, came to the "one-stop" service hall of the department to apply for vehicle support equipment. After filling out and submitting the "Grassroots Equipment Application Form", he went to the warehouse to collect the required materials.

"You only need to go to the department once and fill out a form to handle the business, which is convenient and efficient." Speaking of the new changes in the department's service to the grassroots, Yang Shuoshuo praised.

Previously, the brigade organized a grassroots forum for the department, and some officers and men reported that they usually went to the department to handle business, often because of cumbersome procedures and unfamiliar procedures, and needed to go back and forth many times, which was time-consuming and laborious. After in-depth research, the brigade's Party Committee decided to rely on the newly built "one-stop" service hall to optimize the business processing process, improve the quality and efficiency of services for soldiers, and avoid grassroots officers and men from running back and forth to the department to handle affairs.

"What are the conditions for applying for the judicial examination?" "What procedures are required for children to transfer schools?"... After the "one-stop" service hall was put into use, it was once welcomed by officers and men, but it soon became "cold". It turned out that due to the weak backbone and the diverse business content, the service hall initially opened only two windows. Sometimes, in order to facilitate the centralized management of the department, many businesses were concentrated on Fridays. Officers and men who came to handle affairs often lined up in front of the window. Over time, in order to reduce waiting time, officers and men ran between various business departments, and handling business returned to the "old way".

Not long after, the brigade held another grassroots meeting of the department, and officers and men talked about their feelings. "Rest time is tight, and it takes a long time just to queue up in the service hall." "Instead of 'queuing for 2 hours and doing things for 5 minutes', it is better to go directly to the office department to handle it."... After understanding the reasons why the service hall was "unpopular", the brigade headquarters immediately made rectifications. They adjusted the number of windows, service content, and business handling time, and appropriately increased the number of service windows according to the opinions and suggestions of officers and men; refined the window duty plan to ensure that the normal work of the office and the service for soldiers were not hindered; produced the "One-stop" Service Hall Service Guide and distributed it to the grassroots level to further optimize the service process and shorten the service time; opened an online business handling and declaration channel on the Strong Army Network at the same time, and officers and men can flexibly choose according to actual conditions; according to the division of business, extend the service time of windows with large business volume... After a set of "combination punches", the waiting time of officers and men who come to do things is greatly shortened, and their satisfaction and sense of gain continue to rise.

As soon as the optimized and upgraded service hall appeared, it once again became the "focus" of the entire brigade. The reporter walked into the service hall and saw the big words "Grassroots first, soldiers first" that attracted attention. The service hall is divided into three areas from west to east: business processing, policy consultation and hotline complaints. It has business windows such as training management and financial settlement. The duty officers and public service personnel are providing "one-to-one" services at the window, patiently and carefully answering questions raised by officers and men.

In front of the business window, Wu Qun, a corporal of a certain battalion who urgently needed to go through referral procedures due to training injuries, filled out and submitted the "Information Registration Form for the Injured and Sick". The duty officer quickly contacted the brigade health department. The health department staff immediately reported Wu Qun's injuries to the superior hospital and issued a referral form for him. Soon, Wu Qun completed the procedures for the injured and sick to see a doctor in another place. Not only that, the service hall staff filled out the medical approval form for him according to Wu Qun's subsequent medical needs outside the barracks.

"After we accept the soldiers' demands, we handle them on the spot if we can; if we need assistance from other departments, we handle them within 1 to 2 working days in principle. Soldiers only need to fill out a business application form, and the remaining procedures are handed over to the internal circulation of the department." Li Peng, an officer of the brigade's human resources department, told reporters that in recent times, they have established mechanisms such as "first-question responsibility system", "full-process responsibility system" and "time-limit completion system" for matters that are difficult to handle, have a long cycle and complex processes. The department tracks and inquires about the results throughout the process to ensure that the matters handled by the soldiers are implemented. At the same time, they also regularly collect opinions and suggestions from soldiers and list them in the ledger, concentrate on studying improvement measures at the weekly handover meeting of the department, designate specific people to be responsible and clarify the time limit for resolution.

Opening the "One-stop" Service Hall Service Registration Book, the reporter saw that since the service hall was put into use, the brigade has handled hundreds of matters for soldiers, such as family members accompanying the army, referral for medical treatment, and reissue of certificates.

The department is dedicated to service, and the soldiers are focused on winning. Not long ago, the brigade organized an assessment of its established companies. The officers and men were full of fighting spirit and enthusiasm, and achieved breakthroughs in multiple subjects, further improving the combat effectiveness of the troops.

Interview notes

Treat problems as test questions

■ Zhang Leifeng

The transformation of the "one-stop" service hall of a brigade of the 76th Group Army from "cold" to "hot" reflects the "problem-solving ideas" for serving soldiers: the service of the organs to the grassroots is never a one-time or a while, but it is necessary to keep the service "online" in the continuous solution of the "urgent, difficult, and anxious" of the officers and men.

When the officers and men complained that it was time-consuming and laborious to handle affairs, the brigade Party Committee wrote down these problems and needs such as "the queue is longer than the handling time" and "the process is too complicated" in the notebook and kept them in mind. The "cold" and "warming" of the service hall show us that the organs must bend down and listen to the voices of the soldiers when serving the grassroots. Only with the sincerity of "treating problems as test questions" and the enthusiasm of "the voices" of the officers and men as "whistles" can the service work for the soldiers be truly done to the hearts of the officers and men.

Behind the "cold" and "hot" service hall of the brigade, there is a simple truth: serving soldiers is never a cold process, but a relay race with warmth. From "sitting in the office" to "running the service chain", the "one more step" and "one more detail" of the cadres in the organs are the "true meaning" of serving soldiers.

Some people say that serving the grassroots is connected to the "big and small things" of officers and men on one end, and the combat effectiveness of the troops on the other. When the tentacles of serving soldiers become thinner and thinner, we will find that the warmth and dedication of the service are not only reflected in the smiling faces of officers and men, but also hidden in the sound of the growing combat effectiveness.

南部战区陆军某部用科技手段提升油料管理保障能力

来源：解放军报 作者：陈剑　陈典宏 责任编辑：尚晓敏 2025-05-20

南部战区陆军某部用科技手段提升油料管理保障能力——

让"战场血液"高效涌流

■陈　剑　解放军报记者　陈典宏

"系统信息显示，1号点位油气浓度升高，可能发生泄漏，迅速前出处置……"

初夏时节，云岭深处，南部战区陆军某部组织的一场油料保障特情处置训练火热展开。接到报告后，应急分队立即出动，迅速查明泄漏点，对受损零部件进行更换。

"我们利用科技手段，推动油料管理保障从'人工管控'向'数智管控'转变，极大提升了保障能力。"该部领导告诉记者。

该部驻扎在南方山区，闷热潮湿的气候导致设备故障频发，传统人工巡检的油料管理方式，存在效率低、耗时多等问题。近几年，随着实战化保障任务日益增多，该部保障效率偏低的不足日趋凸显。

“为此，我们大力推动油料管理保障工作向数字化转型，对传统油库和管线进行了现代化改造升级，使之具备实时感知、自动控制和智能安防等功能。”该部领导说。

不久前，该部组织的一次应急处突训练中，应急分队值班员王鑫收到值勤点位”不明身份人员擅闯油库”的报告后，迅速组织官兵赶赴现场将其控制。

“智能化安防系统就像’千里眼”顺风耳’，官兵足不出户即可实时掌握各库区动态。”该部领导介绍，库区安装边界报警系统和”智能围墙”后，一有可疑人员靠近即可自动发出警告，有效提高了应急处突反应速度。

有一次，下士保管员卢秋值班时，从监测系统中发现一个储油罐液位异常，立即向应急分队值班员报告情况。应急分队官兵闻令而动，立即赶往该储油罐所在库区进行科学处置，确保了油料安全。

该部领导介绍，近年来，他们结合任务实际和保障对象需求，持续对油料智能化管理系统进行升级改造，不断完善各项数据库，推动油料管理保障从”经验型”向”精准化”转变。

记者在该部控制室看到，工程师李亮正利用该系统核算上个月的油料发放情况。电子屏幕上，上个月的一次次发油时间、数量以及目前油料库存量等信息一目了然。

“油料被称为现代战争的’战场血液’。只有油料保障高效充足，飞机战车等装备才能动若风发。”该部领导说，”油料保障不断向信息化、智能化方向转型升级，如同为部队战斗力建设按下’加速键’。”

A Certain Unit of the Army in the Southern Theater Command Uses Scientific and Technological Means To Improve Its Fuel Management and Support Capabilities

Source: PLA Daily Author: Chen Jian Chen Dianhong Editor: Shang Xiaomin 2025-05-20

A certain unit of the army in the Southern Theater Command uses scientific and technological means to improve its fuel management and support capabilities——

Let the “blood of the battlefield” flow efficiently

■ Chen Jian PLA Daily reporter Chen Dianhong

“System information shows that the oil and gas concentration at point 1 has increased, and a leak may occur. Move forward quickly to deal with it...”

In early summer, deep in the Yunling Mountains [Yunnan Province], a special situation handling training for fuel support organized by a certain unit of the army in the Southern Theater Command was launched. After receiving the report, the emergency team immediately went out to quickly identify the leak point and replace the damaged parts.

“We use scientific and technological means to promote the transformation of fuel management and support from “manual control” to “digital control”, which greatly improves the support capabilities.” The leader of the unit told reporters.

The unit is stationed in the southern mountainous area. The hot and humid climate leads to frequent equipment failures. The traditional manual inspection fuel management method has problems such as low efficiency and time consumption. In recent years, with the increasing number of combat support tasks, the low support efficiency of the department has become increasingly prominent.

“To this end, we have vigorously promoted the digital transformation of oil management and support work, and modernized and upgraded traditional oil depots and pipelines to enable them to have real-time perception, automatic control and intelligent security functions.” The leader of the department said.

Not long ago, during an emergency response training organized by the department, Wang Xin, the duty officer of the emergency team, received a report from the duty point that “unidentified personnel trespassed into the oil depot” and quickly organized officers and men to rush to the scene to control them.

“The intelligent security system is like a ‘clairvoyance’ and a ‘wind-hearing’. Officers and men can grasp the dynamics of each depot area in real time without leaving their homes.” The leader of the department introduced that after the boundary alarm system and the “intelligent fence” were installed in the depot area, a warning could be automatically issued as soon as a suspicious person approached, which effectively improved the response speed of emergency response.

Once, when Corporal custodian Lu Qiu was on duty, he found an abnormal level of an oil tank from the monitoring system and immediately reported the situation to the duty officer of the emergency team. Upon hearing the order, the officers and men of the emergency team immediately rushed to the storage area where the oil tank was located to conduct scientific disposal and ensure the safety of the oil.

The leaders of the department introduced that in recent years, they have continuously upgraded and transformed the intelligent management system of oil in combination with the actual tasks and the needs of the guaranteed objects, continuously improved various databases, and promoted the transformation of oil management and guarantee from “experience-based” to “precision”.

The reporter saw in the control room of the department that engineer Li Liang was using the system to calculate the oil distribution situation last month. On the electronic screen, the time and quantity of oil distribution last month and the current oil inventory are clearly visible.

“Oil is called the ‘battlefield blood’ of modern warfare. Only when the oil guarantee is efficient and sufficient, can aircraft, combat vehicles and other equipment move like the wind.” The leader of the department said, “Oil guarantee is constantly transforming and upgrading in the direction of informatization and intelligence, just like pressing the ‘accelerator’ for the construction of the combat effectiveness of the troops.”

陆军某旅一连党支部：勇当转型路上“火车头”

来源：解放军报 作者：王杨恒欹 向黎鸣 廖晓彬 责任编辑：孙智英 2025-05-21

面对缺少技术骨干等重重困难，新调整组建的陆军某旅一连党支部——

勇当转型路上”火车头”

■王杨恒欹 解放军报记者 向黎鸣 特约记者 廖晓彬

初夏，闽南山地，陆军某旅一连接令迅速机动至预定地域，展开一场实战化对抗训练。

构建链路、处理信息、核校数据……官兵在强电磁干扰下顺利完成任务，创下新装备列装以来最快火力反应纪录。让记者感到意外的是，该连调整组建仅有两年时间。

该连开展实弹射击训练。吴昌盛 摄

“调整组建以来，连队半数以上官兵立功受奖，前不久旅队组织比武，连队还包揽了专业前三名。”谈及转型以来取得的成绩，该连熊连长如数家珍，”转型路上，连队面临各种各样的困难，党支部始终充当凝心聚力的’火车头’，带领官兵直面挑战、奋斗拼搏。”

记者翻开该连党支部会议记录本看到，从”研究装备参数”到”创新战法打法”，从”观点碰撞”到”协同攻坚”，一条”以战领建、以战促建”的抓建思路清晰可见。

回忆连队刚调整组建时面临的困难，熊连长记忆犹新，”当时，全连三分之一是新兵，专业技术骨干’断层断代’……如何填补人才缺口，成为摆在党支部面前的一大难题。”

不止于此，连队调整组建不久，又恰逢某型新装备列装该连。面对新装备操作手册上密密麻麻的说明，不仅新兵及新转专业官兵难以掌握，为数不多的技术骨干们也眉头紧锁，一时无从下手……那段时间，战士缺乏信心，干部底气不足，官兵干事创业的热情低落。

新装备列装新连队，新连队面临新难题。连队党支部一班人在第一次支委会上达成共识——要想在转型中开新局，就必须发挥基层党组织战斗堡垒作用，以新装备列装为突破口，把官兵一心谋打赢的战斗气魄和责任担当激发出来。

火车跑得快，全靠车头带。随后，连队支委身先士卒，带领技术骨干从基础专业理论学起，逐条梳理装备操作技巧，并根据官兵考核成绩，灵活调整连队专业训练计划。

从弹药装填到通联组网，军士支委、一级上士郑志鹏主动请缨，带领技术骨干逐个课目攻关、逐个环节打磨；军士支委、炮长徐锡文针对弹药装填速度慢的问题，带领全班刻苦钻研，将弹药装填速度提升50%；党员骨干、三级军士长卢凯楠专业基础过硬、组训经验丰富，他主动申请担任新兵教练员，将自己总结的训练心得分享给新战友……

连队结合官兵专业特长和任务需要，为每名官兵量身定制”成长路线图”，将官兵个人成长与连队发展紧密结合起来。为帮助官兵夯实专业能力基础，连队还建立模拟训练专修室，邀请友邻单位专业骨干、院校专家、装备厂家技术人员来队”传经送宝”，帮助大家掌握更多解决问题的思路对策。

在党支部不懈努力下，连队人才缺失问题得到有效解决，官兵干事创业热情高涨。然而，由于连队官兵从不同单位转隶而来，在训练方法、生活习惯等方面存在差异，合编未合心的问题依然存在。

二级上士洪志国比武经验丰富，中士耿江涛专业技能过硬，两人同为连队教练员，在制订连队训练计划时，常因训练重点不同而出现分歧：洪志国主张要打好基础，将精力主要放在单兵专业训练上；耿江涛则认为应加强班组协同训练，提升人员配合默契度。

那段时间，恰逢旅队组织比武考核，连队党支部以此为契机，开展”以连为家、勠力同心”官兵恳谈会，引导官兵齐心协力拼搏奋斗，共同书写连队荣光。凝聚官兵思想共识后，连队党支部希望洪志国和耿江涛发挥各自特长，决定由他们两人共同负责比武考核的准备工作。

在共同目标牵引下，两名昔日互相不服气的专业尖子携手制订训练计划、共同调整训练进度，带领官兵全身心投入比武考核准备工作。功夫不负有心人，连队最终在比武考核中取得优异成绩。同年，洪志国荣立三等功，耿江涛获评”四有”优秀士兵。这次经历不仅化解了两名专业尖子之间的隔阂，也让全连官兵深刻认识到凝聚力的重要性。

不久后，连队接令参加首场新装备实弹演训。在党支部带领下，连队官兵叫响”争头功、当标兵”口号，自觉拧成一股绳，白天扎在训练场练协同，晚上钻进学习室研战法。演训

当天，随着熊连长下达发射口令，刹那间大地震颤，一发发火箭弹呼啸出膛。”目标被成功摧毁！”听到电台里传来的通报，全连官兵欢欣鼓舞。

调整组建以来，在党支部带领下，该连基层建设水平稳步提升，官兵在一次次任务磨砺中淬火成钢，连队战斗力大幅提升。前不久，该连因战备工作出色，被战区陆军表彰为”练兵备战先进单位”。

短评

把战斗堡垒建坚强

■徐永庆

习主席在中央军委基层建设会议上强调，要”充分发挥基层党组织战斗堡垒作用”。基层建设要进步，关键在于党支部，必须着力强化战斗堡垒的战斗性。

党支部是实现党对军队绝对领导、团结巩固部队和完成各项任务的战斗堡垒。面对转隶官兵磨合难、连队专业人才严重缺失、新装备亟待形成战斗力等挑战，陆军某旅一连党支部客观分析问题，主动强化战斗堡垒的战斗性，蹚出了一条”合编合心合力”的基层建设之路，充分诠释了基层党组织战斗堡垒作用和党员先锋模范作用的实践价值。

基层工作千头万绪，无论是官兵思想作风还是部队军事训练，无论是连队正规化管理还是党支部自身建设，矛盾问题不可避免。作为强军事业的根基，基层党组织身处工作落实末端、备战打仗一线，党支部的战斗性就体现在解决一个个矛盾问题、推动部队全面进步上。强军新征程上，每个基层党组织都要持之以恒打基础、靶向发力补短板，将自己锻造为坚强的战斗堡垒，团结带领官兵克服困难挑战，不断从胜利走向新的胜利。

The Party Branch of the First Company of a Certain Army Brigade: Bravely Become the “Locomotive” on the Road of Transformation

Source: PLA Daily Author: Wang Yanghengqi Xiang Liming Liao Xiaobin Editor: Sun Zhiying 2025-05-21

Faced with many difficulties such as the lack of technical backbones, the newly adjusted and established Party Branch of the First Company of a Certain Army Brigade——

Bravely Become the “Locomotive” on the Road of Transformation

■ Wang Yanghengqi PLA Daily reporter Xiang Liming Special Correspondent Liao Xiaobin

In early summer, in the mountains of southern Fujian, the first company of a certain army brigade received an order to quickly maneuver to the designated area and launched a practical confrontation training.

Building links, processing information, verifying data... The officers and men successfully completed the task under strong electromagnetic interference, setting the fastest firepower response record since the new equipment was equipped. What surprised the reporter was that the company was adjusted and established only two years ago.

The company conducted live-fire shooting training. Photo by Wu Changsheng

“Since the adjustment and establishment, more than half of the officers and men of the company have made meritorious service and received awards. Not long ago, the brigade organized a competition, and the company also won the top three in the profession.” Speaking of the achievements made since the transformation, the company commander Xiong listed them all, “On the road to transformation, the company faced various difficulties, and the Party Branch has always acted as a ‘locomotive’ to gather strength and lead the officers and men to face challenges and fight hard.”

The reporter opened the meeting record book of the Party Branch of the company and saw that from “studying equipment parameters” to “innovating tactics and fighting methods”, from “collision of views” to “cooperative attack”, a “leading construction with war and promoting construction with war” approach is clearly visible.

Recalling the difficulties faced by the company when it was just adjusted and established, Captain Xiong still remembers it clearly, “At that time, one-third of the company were new recruits, and the professional and technical backbones were ‘broken’... How to fill the talent gap has become a major problem facing the Party Branch.”

Not only that, not long after the company was adjusted and established, but a new type of equipment was also installed in the company. Faced with the dense instructions in the new equipment operation manual, not only the new recruits and the newly transferred officers and men found it difficult to master, but also the few technical backbones frowned and had no idea where to start... During that period, the soldiers lacked confidence, the cadres were not confident, and the officers and men were not enthusiastic about doing things and starting businesses.

The new equipment was assigned in the new company, and the new company faced new problems. The company Party Branch reached a consensus at the first Branch Committee meeting - if you want to open a new situation in the transformation, you must give full play to the role of the grassroots party organization as a fighting fortress, use the new equipment as a breakthrough, and stimulate the fighting spirit and responsibility of the officers and men who are determined to win.

The train runs fast, all thanks to the locomotive. Afterwards, the company Branch Committee took the lead and led the technical backbones to learn from the basic professional theory, sort out the equipment operation skills one by one, and flexibly adjust the company’s professional training plan according to the officers and men’ assessment results.

From ammunition loading to communication networking, the sergeant Branch Committee member and first-class sergeant Zheng Zhipeng took the initiative to lead the technical backbone to tackle each subject and polish each link; the sergeant Branch Committee member and gunner Xu Xiwen led the whole class to study hard to improve the ammunition loading speed by 50%; the party member and third-class sergeant Lu Kainan has a solid professional foundation and rich training experience. He took the initiative to apply to be a recruit coach and share his training experience with new comrades...

The company combines the professional expertise and mission needs of officers and men to tailor a "growth roadmap" for each officer and soldier, and closely combines the personal growth of officers and men with the development of the company. In order to help officers and men consolidate their professional ability foundation, the company also established a simulation training room and invited professional backbones of friendly units, college experts, and technical personnel of equipment manufacturers to the team to "pass on the knowledge and treasures" to help everyone master more ideas and countermeasures to solve problems.

With the unremitting efforts of the Party Branch, the problem of talent shortage in the company has been effectively solved, and the enthusiasm of officers and men to do things and start businesses is high. However, since the officers and men of the company were transferred from different units, there were differences in training methods and living habits, and the problem of unharmonious integration still existed.

Second Sergeant Hong Zhiguo had rich experience in competitions, and Sergeant Geng Jiangtao had strong professional skills. Both of them were company coaches. When formulating the company training plan, they often disagreed due to different training focuses: Hong Zhiguo advocated laying a solid foundation and focusing on individual professional training; Geng Jiangtao believed that team coordination training should be strengthened to improve the tacit understanding of personnel.

During that period, the brigade organized a competition assessment. The company Party Branch took this as an opportunity to hold a "Take the company as home, work together" officers and men' meeting to guide the officers and men to work together and strive to write the glory of the company. After gathering the ideological consensus of the officers and men, the company Party Branch hoped that Hong Zhiguo and Geng Jiangtao would give full play to their respective strengths and decided that they would be jointly responsible for the preparations for the competition assessment.

Driven by a common goal, the two former top professionals who were dissatisfied with each other worked together to develop training plans, adjust the training progress, and lead the officers and men to devote themselves to the preparation for the competition. Hard work pays off, and the company finally achieved excellent results in the competition. In the same year, Hong Zhiguo was awarded the third-class merit, and Geng Jiangtao was awarded the "four-have" excellent soldier. This experience not only resolved the gap between the two top professionals, but also made the officers and men of the whole company deeply aware of the importance of cohesion.

Soon after, the company received an order to participate in the first live-fire exercise with new equipment. Under the leadership of the Party Branch, the officers and men of the company shouted the slogan of "Strive for the first merit and be a model soldier", consciously twisted into a rope, practiced coordination in the training ground during the day, and went into the study room at night to study tactics. On the day of the exercise, as Captain Xiong issued the launch command, the earth trembled in an instant, and rockets roared out of the barrel. "The target was successfully destroyed!" Hearing the report from the radio, the officers and men of the whole company were excited.

Since the adjustment and establishment, under the leadership of the Party Branch, the company's grassroots construction level has steadily improved, and the officers and men have been tempered into steel in the tempering of tasks, and the company's combat effectiveness has been greatly improved. Not long ago, the company was commended by the theater army as an "advanced unit for training and preparation" for its outstanding combat readiness work.

Short comment

Build a strong battle fortress

■Xu Yongqing

President Xi emphasized at the Central Military Commission's grassroots construction meeting that we must "give full play to the role of grassroots party organizations as a battle fortress." The key to progress in grassroots construction lies in the Party Branch, and we must focus on strengthening the combat effectiveness of the battle fortress.

The Party Branch is a battle fortress for realizing the party's absolute leadership over the army, uniting and consolidating the troops, and completing various tasks. Faced with challenges such as the difficulty of transferring officers and men to run-in, the serious lack of professional talents in the company, and the urgent need for new equipment to form combat effectiveness, the Party Branch of the first company of a certain army brigade objectively analyzed the problems, took the initiative to strengthen the combat effectiveness of the battle fortress, and blazed a path of grassroots construction of "joint organization, heart, and strength", fully interpreting the practical value of the role of grassroots party organizations as a battle fortress and the role of party members as pioneers and models.

Grassroots work is complicated, whether it is the ideological style of officers and men or the military training of the troops, whether it is the regular management of the company or the self-construction of the Party Branch, contradictions and problems are inevitable. As the foundation of the cause of strengthening the army, the grassroots party organizations are at the end of the implementation of work and the front line of preparing for war. The combat effectiveness of the Party Branch is reflected in solving contradictions and promoting the overall progress of the troops. On the new journey of strengthening the army, each grassroots party organization must persevere in laying the foundation, targeting efforts to make up for shortcomings, forging itself into a strong

battle fortress, uniting and leading officers and men to overcome difficulties and challenges, and constantly moving from victory to new victory.

从渴望成为飞行员到转任空中机械师，他努力坚持延续梦想

来源：解放军报 作者：李建亮 吕国贤 石芝鹏 责任编辑：尚晓敏 2025-05-21

没有如愿成为飞行员，陆军某旅干部丁世成经过艰苦努力成功转任空中机械师——

换条”赛道”，重返蓝天

■李建亮　吕国贤　解放军报特约通讯员　石芝鹏

丁世成在做飞行训练前准备工作。周泽来摄

清晨，阳光铺满整个机场，跑道上的直升机被勾勒出道道金边。

一架战机旁，陆军某旅空中机械师丁世成，手持工具，神情专注，从机头到机尾仔细检查，不放过任何一个细节。

“登机！”机长指令传来，丁世成深吸一口气，快步进入机舱就位。

随后，直升机盘旋而起，机舱微微震颤，丁世成心跳加速，内心既紧张又兴奋。

对丁世成来说，这一天非比寻常——这是他成为空中机械师后的首次飞行，也是他时隔 6 年重返蓝天。

2016 年 8 月，一纸招飞入伍通知书送到丁世成家里。那时候，丁世成暗下决心：一定要成为一名优秀的直升机飞行员。

想要飞上蓝天，必须闯过一道又一道难关。丁世成深信，做难事必有所得。在航校学习的前几年，他争分夺秒地淬炼自己。终于，2019 年 4 月，他迎来了期待已久的首飞。

加油门，拉动操纵杆，起飞……在发动机的轰鸣声中，丁世成驾驶战机升空，顺利完成第一次实装飞行训练。

那时的丁世成，对成为一名合格飞行员充满了信心。然而，在飞了几个架次后，经过专业鉴定，他被认为不太适合驾驶战机。

飞行生涯刚起步，就被按下了”暂停键”，从不言败的丁世成，攥着停飞通知书，眼眶红了。那天晚上，他无法入睡，反复问自己：”难道就这样告别蓝天了吗？”

接下来几天，丁世成像霜打的茄子，干啥都提不起劲儿。父亲得知情况后，打来电话劝慰：”儿子啊，一时的挫折不算啥。你不光是学生，更是军人，得服从命令。组织需要你干啥你就干啥。别灰心，往前看！”

一位飞行教员也留意到丁世成情绪低落：”驾驶不了战机翱翔蓝天，那就保障战鹰高飞远航。”他建议丁世成停飞后，先转为地面人员保障飞行，再努力”改空”重返蓝天。

所谓”改空”，是指地面保障人员通过培训考核转为空勤保障人员，跟随战机升空执行战备训练任务。

“换一条’赛道’，也能重返蓝天。”飞行教员的话，如同黑暗中点亮的一道光，让丁世成重新振作起来，他主动申请转入机械维修专业继续学习。两年后，丁世成以全优成绩毕业，成为陆军某旅一名地面机械师。

面对新岗位新挑战，丁世成更加努力提高自己——为了尽快摸透装备，他整天泡在外场，追着老骨干请教问题；争分夺秒学结构、练实操，抓紧时间背记专业数据……10 多本教材，被他翻得卷了边；故障案例分析，他光是笔记就写了 3 大本。经过勤学苦练，丁世成专业能力明显提升，愈发适应地面机械师的角色。

“我是在为将来’改空’作准备。”丁世成心中对于重返蓝天的渴望依旧强烈，尤其每次训练进场保障，看着战友们一次次驾机升空，他浑身充满力量。

然而，”改空”并不容易，首先要参加军队院校组织的空中机械师培训，取得必备条件，同时还须满足机务岗位任职 3 年以上、专业素质过硬等基本要求，之后才能参加单位组织的”改空”考核。

于是，丁世成一边努力做好地面保障工作，积攒经验、提高能力，一边等待实现梦想的机会到来。

前年初，旅里通知营连上报”改空”培训人员名单。此时已经在地面机械师岗位工作两年的丁世成，立即向组织提交了申请。

丁世成早已算好了”时间账”：培训定在第三季度，为期两个月，自己满足任职时间要求还有一年，等培训结束回到单位，还能有充足时间准备”改空”考核。

事情的发展正如丁世成的期待，凭借优秀的表现和过硬的实力，他争取到了培训机会。

结束院校培训回到连队，丁世成马不停蹄进入备考状态。那些日子里，他像上紧了发条，除了完成日常工作任务，抓紧一切空余时间学专业、练实操。连队专门安排经验丰富的机械师，对他进行一对一帮带。

实现梦想的过程不可能一帆风顺。准备”改空”考核过程中，丁世成萌生过放弃的念头，因为考核内容难度大、结果充满了未知，但是一想到组织的支持、领导的关心、家人的期盼，他还是选择坚持到底。

一次排除故障考核，丁世成的成绩不理想。短暂的失落过后，他想到一个办法：接下来的半个多月，每天让战友随机设置复杂故障，倒逼自己在规定时限内排除。此招果然管用，等到下一次考核，他以最快速度完成了故障的检测、排除，令人刮目相看。

靠着这样的执着和韧劲，去年底，丁世成以优异成绩通过了理论、实操、体检等数十项严格考核，拿到了成为空中机械师的”准入证”。任职命令宣布那一刻，他既激动又欣慰，激动的是自己能够继续逐梦蓝天，欣慰的是没有辜负坚持多年的梦想。

“高度稳定，速度正常，注意侧风。”前不久，丁世成跟机保障野外起降训练。他一边紧盯数据变化，一边及时通报情况，在与飞行员默契配合中，圆满完成了训练任务。

虽然转为空中机械师还不到半年，但丁世成已经十分成熟老练。”人生没有白走的路，每一步都算数。”他说，”过往的飞行经历，让我更了解战机，更熟悉训练要求，更懂得飞行员需要什么。”

如今的丁世成，十分珍惜拥有的一切。尽管每次升空训练，他都坐在飞行员旁边，但一点不影响他融入战机、守护蓝天。

编辑感言

梦想不坠，仍可飞翔

■胡　璞

每个人都有梦想，也都渴望实现梦想。如何才能实现梦想？有人说，靠坚持。坚持，说起来容易做起来难。尤其在遇到挫折而看不到实现可能时，是继续坚持还是就此放弃？陆军某旅空中机械师丁世成用自己的经历给出了另一种答案：梦想不坠，仍可飞翔。

丁世成曾经一心渴望成为优秀飞行员逐梦蓝天。然而梦想刚刚启航，他就被告知不能再继续飞行生涯了，可以想见，他当时是多么失落和茫然。好在这时，他得知还有另一种方式，

能够延续自己的梦想，那就是先成为地面机械师，再通过”改空”考核成为空中机械师，跟机保障飞行。

当”梦想之门”再次打开，虽然未来结果尚不确定，丁世成还是毫不犹豫地踏上了这条有些曲折的奋进之路。最终，经过 6 年的刻苦努力和耐心坚持，他终于重返蓝天。

设身处地想一下，如果我们遇到同样的情况，会如何选择？可能会将曾经的梦想埋藏在内心最深处不再触碰，也可能因为受到打击而一蹶不振。此前同一些基层干部交流时，编者就听到过类似的情况。不可否认的是，”轻言放弃”正在一些年轻官兵身上发生着。有时，一个小小的挫折或者暂时看不到实现的希望，就会让他们放弃了目标或梦想。而这样做的结果，往往会影响个人工作训练状态、阻碍成长进步，进而可能影响单位的士气和全面建设发展。

在实现梦想过程中，我们难免会遭遇困难，有时也可能会走一些弯路。这些都可以看作是一种考验，有的人会被失败击垮，于是就此放弃；有的人选择坚持，勇毅向前。而后者，只要能够经受住时间和实践的考验，最终就会实现梦想。

坚持梦想不是盲目的。当明确知道一条路走不通时，就要清醒而理智地寻找其他可能的实现方式。虽然新的选择不一定成功，但也不用惧怕失败。就像丁世成一样，即使没能成为空中机械师，他在备考过程中积累的专业知识和能力，也会让他成为一名优秀的地面机械师。只要始终朝着心中的梦想不懈奋进，不管最终结果如何，向前迈出的每一步都有意义、都有收获，也必将把我们的人生引向更出彩的明天。

From the Desire to Become a Pilot to the Transfer to a Chief Aircraft Mechanic, He Worked Hard to Continue His Dream

Source: PLA Daily Author: Li Jianliang, Lv Guoxian, Shi Zhipeng Editor: Shang Xiaomin 2025-05-21

Ding Shicheng, a cadre of a certain army brigade, did not become a pilot as he wished. After hard work, he successfully transferred to a chief aircraft mechanic——

Change the “track” and return to the blue sky

■ Li Jianliang, Lv Guoxian, special correspondent of the PLA Daily, Shi Zhipeng

Ding Shicheng is preparing for flight training. Photo by Zhou Zelai

In the early morning, the sun covered the entire airport, and the helicopters on the runway were outlined with golden edges.

Next to a combat aircraft, Ding Shicheng, a chief aircraft mechanic of a certain army brigade, held tools in his hands and looked focused. He carefully checked from the nose to the tail of the aircraft, not missing any details.

“Board the aircraft!” The captain’s order came, Ding Shicheng took a deep breath, and quickly entered the cabin to take his place.

Then, the helicopter circled up, the cabin trembled slightly, Ding Shicheng’s heartbeat accelerated, and he was nervous and excited.

For Ding Shicheng, this day was extraordinary - this was his first flight after becoming an aerial mechanic, and it was also his return to the blue sky after 6 years.

In August 2016, a notice of recruitment was sent to Ding Shicheng’s home. At that time, Ding Shicheng secretly made up his mind: he must become an excellent helicopter pilot.

If you want to fly into the blue sky, you must overcome one difficulty after another. Ding Shicheng firmly believes that doing difficult things will gain something. In the first few years of studying at the aviation school, he tempered himself every minute. Finally, in April 2019, he ushered in his long-awaited first flight.

Add gas, pull the joystick, take off... In the roar of the engine, Ding Shicheng took off in a combat aircraft and successfully completed the first actual flight training.

At that time, Ding Shicheng was full of confidence in becoming a qualified pilot. However, after flying several sorties, he was considered unsuitable for flying fighter planes after professional appraisal.

Ding Shicheng, who never gives up, was pressed the “pause button” just after his flying career began. Holding the suspension notice, his eyes were red. That night, he couldn’t sleep and kept asking himself: “Am I going to say goodbye to the blue sky like this?”

In the next few days, Ding Shicheng was like an eggplant hit by frost, and he couldn’t get motivated to do anything. After his father learned about the situation, he called to comfort him: “Son, temporary setbacks are nothing. You are not only a student, but also a soldier. You must obey orders. Do whatever the organization needs you to do. Don’t lose heart, look forward!”

A flight instructor also noticed that Ding Shicheng was in a low mood: “If you can’t fly a combat aircraft in the blue sky, then ensure that the war eagle flies high and far.” He suggested that Ding Shicheng should first transfer to ground personnel to ensure flight after the suspension, and then work hard to “change to air” to return to the blue sky.

The so-called “change to air” means that ground support personnel are transferred to air support personnel after training and assessment, and follow combat aircraft to take off to perform combat readiness training tasks.

“You can return to the blue sky even if you change your ‘track’.” The flight instructor’s words, like a ray of light in the darkness, cheered Ding Shicheng up again. He took the initiative to apply for transfer to the mechanical maintenance major to continue studying. Two years later, Ding Shicheng graduated with excellent grades and became a ground mechanic in a certain army brigade.

Facing new positions and new challenges, Ding Shicheng worked harder to improve himself - in order to get to know the equipment as quickly as possible, he stayed in the field all day, chasing old backbones to ask questions; racing against time to learn structure, practice practical operations, and memorize professional data... More than 10 textbooks were turned upside down by him; he wrote 3 large notebooks for fault case analysis. After hard work and practice, Ding Shicheng’s professional ability has significantly improved, and he has become more and more adapted to the role of a ground mechanic.

“I am preparing for the future ‘air change’.” Ding Shicheng’s desire to return to the blue sky is still strong, especially every time he trains to enter the field for support, watching his comrades take off again and again, he is full of strength.

However, it is not easy to “change to air”. First of all, you have to participate in the air mechanic training organized by the military academy and obtain the necessary conditions. At the same time, you must meet the basic requirements such as working in the maintenance position for more than 3 years and having strong professional qualities. Only then can you participate in the “change to air” assessment organized by the unit.

So, Ding Shicheng worked hard to do a good job in ground support, accumulate experience, and improve his abilities, while waiting for the opportunity to realize his dream.

At the beginning of the year before last, the brigade notified the battalion company to report the list of “change to air” training personnel. At this time, Ding Shicheng, who had been working as a ground mechanic for two years, immediately submitted an application to the organization.

Ding Shicheng had already calculated the “time account”: the training was scheduled for the third quarter for two months, and he still had one year to meet the tenure requirements. After the training, he returned to the unit and had enough time to prepare for the “change to air” assessment.

The development of things was just as Ding Shicheng expected. With his excellent performance and strong strength, he won the training opportunity.

After returning to the company after the academy training, Ding Shicheng immediately entered the state of preparation for the exam. In those days, he was like a wound-up spring. In addition to completing daily work tasks, he seized all his spare time to learn his major and practice practical operations. The company specially arranged experienced mechanics to help him one-on-one.

The process of realizing dreams cannot be smooth sailing. In the process of preparing for the “air reform” assessment, Ding Shicheng had the idea of giving up because the assessment content was

difficult and the results were full of unknowns, but when he thought of the support of the organization, the care of the leaders, and the expectations of his family, he chose to stick to it.

In a troubleshooting assessment, Ding Shicheng's results were not ideal. After a brief loss, he thought of a way: for the next half a month, let his comrades randomly set complex faults every day, forcing himself to eliminate them within the specified time limit. This trick really worked. By the next assessment, he completed the detection and elimination of faults at the fastest speed, which was impressive.

Relying on such persistence and tenacity, at the end of last year, Ding Shicheng passed dozens of rigorous assessments such as theory, practical operation, and physical examination with excellent results, and got the "admission certificate" to become an air mechanic. At the moment when the appointment order was announced, he was both excited and relieved. He was excited that he could continue to pursue his dream of the blue sky, and he was relieved that he did not live up to the dream he had persisted for many years.

"Altitude is stable, speed is normal, pay attention to the crosswind." Not long ago, Ding Shicheng followed the aircraft to ensure field take-off and landing training. While keeping a close eye on the data changes, he promptly reported the situation, and successfully completed the training task in tacit cooperation with the pilot.

Although it has been less than half a year since he became an air mechanic, Ding Shicheng is already very mature and sophisticated. "There is no such thing as a wasted journey in life, and every step counts." He said, "The past flight experience has made me better understand fighters, more familiar with training requirements, and more aware of what pilots need."

Today, Ding Shicheng cherishes everything he has. Although he sits next to the pilot every time he takes off for training, it does not affect his integration into fighters and protecting the blue sky.

Editor's Note

Dreams do not fall, they can still fly

■Hu Pu

Everyone has a dream and is eager to realize it. How can a dream be realized? Some people say that it depends on persistence. Persistence is easier said than done. Especially when encountering setbacks and not seeing the possibility of realization, should we continue to persevere or give up? Ding Shicheng, an air mechanic of a certain army brigade, gave another answer with his own experience: dreams do not fall, and they can still fly.

Ding Shicheng once longed to become an excellent pilot and pursue his dream of the blue sky. However, just as his dream had just started, he was told that he could no longer continue his flying career. It can be imagined how lost and confused he was at that time. Fortunately, at this time, he learned that there was another way to continue his dream, that is, to become a ground mechanic

first, and then pass the “air change” assessment to become an air mechanic, and follow the aircraft to ensure flight.

When the “door of dreams” opened again, although the future results were still uncertain, Ding Shicheng did not hesitate to embark on this somewhat tortuous road of progress. In the end, after 6 years of hard work and patient persistence, he finally returned to the blue sky.

Put yourself in their shoes, if we encounter the same situation, what would we choose? We may bury our former dreams in the deepest part of our hearts and never touch them again, or we may be devastated by the blow. When communicating with some grassroots cadres before, the editor has heard similar situations. It is undeniable that “giving up easily” is happening to some young officers and men. Sometimes, a small setback or the temporary lack of hope of realization will make them give up their goals or dreams. The result of doing so often affects the individual’s work training status, hinders growth and progress, and may affect the morale and overall construction and development of the unit.

In the process of realizing our dreams, we will inevitably encounter difficulties and sometimes take some detours. These can be regarded as a test. Some people will be defeated by failure and give up; some people choose to persist and move forward courageously. The latter, as long as they can withstand the test of time and practice, will eventually realize their dreams.

Persistence in dreams is not blind. When it is clear that one way is not feasible, we must soberly and rationally look for other possible ways to achieve it. Although new choices may not be successful, there is no need to be afraid of failure. Just like Ding Shicheng, even if he failed to become an air mechanic, the professional knowledge and abilities he accumulated during the preparation process would make him an excellent ground mechanic. As long as we keep working towards our dreams, no matter what the final result is, every step forward will be meaningful and rewarding, and will surely lead our lives to a more brilliant tomorrow.

第 80 集团军某旅集中淬火锻造 “武教头”

来源：解放军报 作者：付君臣 王宏阳 责任编辑：孙智英 2025-05-22

第八十集团军某旅从严组织教练员集训——

集中淬火锻造”武教头”

■解放军报特约记者　付君臣　特约通讯员　王宏阳

“小幅摆动、仰头顶髋、积极拉臂……”近日，在第 80 集团军某旅组织的教练员集训中，二级上士刘振远详细讲解单杠卷身上的动作要领，随后一口气完成数十个标准动作。最终，因为教学严谨、动作规范，刘振远获得了集训教学组给出的高分成绩。

“火车跑得快，全靠车头带。促进官兵训练成绩提升，必须充分发挥教练员团队的’酵母’作用。”该旅领导介绍，此次全旅教练员集训，他们以新大纲为依据，设置教案编写、计划制订、现地授课等多项培训内容，旨在通过集中淬火，锻造一支训练强、教学精，综合素质过硬的”武教头”队伍。

为提高集训质量，该旅首先对参训”武教头”进行考核，根据考核结果分组施训。集训期间，教学组按照先法规理论后实际操作、先单兵课目后班组课目等方式授课，着力帮助基层”武教头”规范组训方法，提高发现问题、解决问题和灵活应变的能力。

“为顺利完成这项渡河工程保障任务，应采取哪些侦察手段……”训练场一角，舟桥分队排长宴荣华接受集训教学组随机抽点。面对一连串提问，宴荣华对答如流，赢得了考官的点赞。

“随机抽考贯穿全程是这次集训的一大特点。”集训教学组负责人赵树祥介绍，加速推进军事训练转型升级、全面提高练兵备战质效，离不开高素质的”武教头”队伍。此次集训，他们常态组织随机抽考，参训人员的抽考成绩将被记入个人集训档案，作为评优评先的重要依据，以此倒逼大家努力把本领练强，全面提高个人能力素质。

下士龙海飞擅长的是警卫勤务专业，随机抽考时却抽到了”对班组设卡课目进行示范教学”。经过前期的集训学习，龙海飞胸有成竹、应对自如，取得亮眼成绩。

集训结束后，参训人员就地展开复盘，从教学原理、动作要领、组训思路、训练方法等方面入手，认真总结经验、查找不足。任职时间不长的伪装分队排长刘新宇坦言：”这次集训让我学到了不少本领和招法，未来带领全排训练更有信心了。”

A Brigade of the 80th Group Army Concentrated on Quenching and Forging “Martial Arts Instructors”

Source: PLA Daily Author: Fu Junchen Wang Hongyang Editor: Sun Zhiying 2025-05-22

A brigade of the 80th Group Army strictly organized the training of instructors--

Concentrated quenching and forging “martial arts instructors”

■ PLA Daily Special Correspondent Fu Junchen Special Correspondent Wang Hongyang

“Small swing, head up and hip, active arm pull...” Recently, in the instructor training organized by a brigade of the 80th Group Army, Sergeant Liu Zhenyuan explained in detail the key points of the horizontal bar roll-up, and then completed dozens of standard movements in one breath. In the end, because of the rigorous teaching and standardized movements, Liu Zhenyuan received a high score from the training teaching group.

“The train runs fast, all thanks to the locomotive. To promote the improvement of officers and men’ training results, the ‘yeast’ role of the instructor team must be fully utilized.” The brigade leaders introduced that this time, the brigade’s instructor training, based on the new syllabus, set up a number of training contents such as lesson plan writing, plan formulation, and on-site teaching, aiming to forge a team of “military instructors” with strong training, excellent teaching, and excellent comprehensive quality through concentrated quenching.

In order to improve the quality of the training, the brigade first assessed the participating “military instructors” and divided them into groups for training according to the assessment results. During the training, the teaching group taught in the way of first legal theory and then practical operation, first individual subjects and then team subjects, etc., focusing on helping the grassroots “military instructors” standardize the training methods and improve the ability to find problems, solve problems and respond flexibly.

“In order to successfully complete this river crossing project support task, what reconnaissance means should be adopted...” In a corner of the training ground, Yan Ronghua, the platoon leader of the pontoon bridge team, was randomly selected by the training teaching group. Faced with a series of questions, Yan Ronghua answered fluently and won the praise of the examiner.

“Random tests throughout the whole process are a major feature of this training camp.” Zhao Shuxiang, head of the training teaching group, introduced that accelerating the transformation and upgrading of military training and comprehensively improving the quality and efficiency of training and preparation for war cannot be separated from a high-quality “military instructor” team. In this training camp, they routinely organize random tests, and the test scores of the trainees will be recorded in the personal training files as an important basis for evaluation and selection, so as to force everyone to work hard to improve their skills and comprehensively improve their personal abilities and qualities.

Corporal Long Haifei is good at guard duty, but he was randomly selected to “demonstrate teaching of the checkpoint setting course for the team.” After the previous training and learning, Long Haifei was confident and responded with ease, and achieved outstanding results.

After the training camp, the trainees conducted a review on the spot, starting from the teaching principles, action essentials, training ideas, training methods, etc., and carefully summed up the experience and found deficiencies. Liu Xinyu, the platoon leader of the camouflage squad who has not been in office for a long time, said frankly: “This training camp has taught me a lot of skills and tactics, and I am more confident to lead the whole platoon in training in the future.”

第 81 集团军某旅三营九连续写“钢刀利刃”精神荣光

来源：解放军报 作者：于莹 刘敏 狄伯文 责任编辑：孙智英 2025-05-22

第八十一集团军某旅三营九连续写”钢刀利刃”精神荣光——

“铁血锋芒，永不卷刃”

■于莹 解放军报记者 刘敏 特约记者 狄伯文

单位名片

第81集团军某旅三营九连的前身是鲁西北地区的抗日游击队，后改编加入八路军129师抗日先遣纵队，成为晋冀鲁豫根据地重要的抗日力量。该连历经抗日战争、解放战争、抗美援朝战争，参加百团大战、渡江战役、挺进大别山等战役战斗260余次，被授予“团结巩固大功连”等荣誉称号，荣立集体一等功6次、二等功25次、三等功56次。2017年改革转隶后，该连成长为一支特别能吃苦、特别能战斗、特别能奉献的新域新质作战力量。

塞北腹地，月色掩映中，一场实战化训练正在紧张进行。

第 81 集团军某旅三营九连小队长亓飞，带领小队在山岭间与”敌”斗智斗勇，圆满完成任务。

返回营区，亓飞来到连队荣誉室，凝视一张张照片、一件件文物。穿越炮火硝烟，回望英雄足迹，对照先辈精神复盘找差距，是他一直以来的习惯。

亓飞手扶一个展柜，视线锁定在一把布满砍痕的大刀上——刀柄缠着粗布，刃口残留斑驳锈迹。

“这把大刀，是一位前辈在抗战年代使用过的，时光留下锈迹，但’钢刀利刃’精神永不褪色、流传至今。”亓飞说，”今天，我们苦练杀敌本领，就是为了传承血性荣光。”

亓飞指着一组黑白的战斗照片介绍说，随着抗日战争形势的变化，中央军委指示 129 师深入开展游击战争，该连前身部队随之进入中原大地。

几幅陈旧沧桑的黑白照片，勾勒出那段艰难的岁月——

长时间的敌后战斗和补给缺乏，战士们的军装磨破，手中武器只剩”汉阳造”，战斗艰难时只得用大刀、斧头保卫抗日根据地。卫河支队先后参加几十次战斗，官兵付出巨大牺牲，最终以”钢刀利刃”般的顽强毅力完成拔掉伪军据点等任务。

从战火纷飞的战场到和平年代的练兵场，变的是装备和环境，不变的是代代相传的铁血军魂。

2017 年，随着军队调整改革，连队由炮兵连转型为特战连。人员转隶重组中，一批新鲜血液融入这支英雄连队。然而，连队官兵阅历不同、专业不同，如何将新队伍锻造成一块”整钢”？

时任指导员孙宝超带队，从连史中寻找答案——走访中国人民革命军事博物馆、重回连队战斗遗址，一幕幕壮烈的场景浮现在眼前。

返回单位，孙宝超走进荣誉室，从连史故事中寻根破题，将所闻所感凝炼成一场场别开生面的主题教育课，激发官兵扎根基层、干事创业的内在动力，在新征程上续写”钢刀利刃”精神荣光。

“铁血锋芒，永不卷刃。”孙宝超告诉记者，在先辈战斗精神的激励下，官兵们对连队的认同感、归属感不断增强，练兵备战热情高涨。彼时，部队迎来换装，大家研装备、强本领，探索战斗力提升新路径，在调整改革当年就形成了战斗力，成为全旅转型发展的”先锋”。

那年，在上级组织的比武场上，一支代号为”钢刀利刃”的侦察小队，以优异成绩赢得 2 个单项第一、1 个集体第一，交出了一张崭新的转型答卷。

翻开该连连史，记者发现，该连 2020 年至 2022 年连续 3 年被评为”四铁”先进连队，2022 年被战区陆军表彰为军事训练先进单位。如今，”钢刀利刃”精神已融入新一代官兵的血脉。

前辈回眸应笑慰，擎旗自有后来人。

近年来，该连在完成国际维和、跨区演习等大项任务的同时，持续向备战打仗发力用劲，多次执行险难任务，先后探索总结出一批新战法，聚力锻造全时待战、随时能战的新质铁拳。

The 3rd Battalion of the 81st Group Army Brigade 9th Company Continuously Writes the Spiritual Glory of “Steel Knife and Sharp Blade”

Source: PLA Daily Author: Yu Ying Liu Min Di Bowen Editor: Sun Zhiying 2025-05-22

The 3rd Battalion of the 81st Group Army Brigade 9th Company Continuously Writes the Spiritual Glory of “Steel Knife and Sharp Blade”——

“Iron Blood Sharpness, Never Rolling the Blade”

■ Yu Ying PLA Daily Reporter Liu Min Special Correspondent Di Bowen

In the hinterland of Saibei [north of the Great Wall], under the moonlight, a practical training is in full swing.

Qi Fei, the squad leader of the 9th Company of the 3rd Battalion of the 81st Group Army Brigade, led the squad to fight wits and courage with the "enemy" in the mountains and successfully completed the task.

Returning to the barracks, Qi Fei came to the company's honor room and stared at photos and cultural relics. It has always been his habit to cross the smoke of gunfire, look back at the heroic footprints, and compare the spirit of the predecessors to find gaps.

Qi Fei held a display case with his hand, his eyes fixed on a broadsword covered with cut marks - the handle was wrapped in coarse cloth, and the blade had mottled rust on it.

"This broadsword was used by a predecessor during the Anti-Japanese War. Time has left rust, but the spirit of 'steel knife and sharp blade' will never fade and has been passed down to this day." Qi Fei said, "Today, we practice hard to kill the enemy in order to pass on the bloody glory."

Qi Fei pointed to a group of black-and-white combat photos and introduced that with the changes in the situation of the Anti-Japanese War, the Central Military Commission instructed the 129th Division to carry out guerrilla warfare in depth, and the predecessor of the company entered the Central Plains.

Several old black-and-white photos outlined that difficult period -

The long-term battles behind enemy lines and the lack of supplies made the soldiers' uniforms worn out, and the only weapons in their hands were "Hanyang-made". When the battle was difficult, they had to use broadswords and axes to defend the anti-Japanese base. The Weihe Detachment participated in dozens of battles, and the officers and men made great sacrifices. In the end, they completed the tasks of removing the puppet army strongholds with the tenacious perseverance of "steel knives and sharp blades".

From the battlefields of war to the training grounds in peacetime, what has changed is the equipment and environment, but what remains unchanged is the iron-blooded military spirit passed down from generation to generation.

In 2017, with the adjustment and reform of the army, the company was transformed from an artillery company to a special operations company. During the personnel transfer and reorganization, a group of fresh blood was integrated into this heroic company. However, the officers and men of the company have different experiences and specialties. How to forge the new team into a "whole steel"?

The then instructor Sun Baochao led the team to find the answer from the company history-visiting the Chinese People's Revolutionary Military Museum and returning to the company's battle site, and scenes of heroic scenes emerged before their eyes.

After returning to the unit, Sun Baochao walked into the honor room, sought the roots and solved the problem from the company's history stories, and condensed what he heard and felt into a series

of unique thematic education courses, inspiring the officers and men to take root in the grassroots, do things and start businesses, and continue to write the glory of the "steel knife and sharp blade" spirit on the new journey.

"The iron-blooded edge will never be rolled." Sun Baochao told reporters that under the inspiration of the fighting spirit of the predecessors, the officers and men' sense of identity and belonging to the company has been continuously strengthened, and their enthusiasm for training and preparation for war is high. At that time, the troops ushered in the replacement of equipment. Everyone studied equipment, strengthened their skills, and explored new ways to improve combat effectiveness. In the year of adjustment and reform, combat effectiveness was formed, becoming the "pioneer" of the transformation and development of the entire brigade.

The predecessors should look back with a smile, and there will always be successors to carry the flag.

In recent years, while completing major tasks such as international peacekeeping and cross-regional exercises, the company has continued to work hard to prepare for war, performed dangerous and difficult tasks many times, and explored and summarized a number of new tactics, focusing on forging a new quality iron fist that is ready for war all the time and can fight at any time.

荣誉的力量有多强？来看 "胜战红榜" 点燃官兵拼搏奋进路

来源：解放军报 作者：陈奕 房骏腾 陈典宏 责任编辑：郭妍菲 2025-05-22

第七十四集团军某旅设置"胜战红榜"激励官兵精武强能——

帮想发光的战士"点亮自己"

■陈 奕 房骏腾 解放军报记者 陈典宏

初夏午后，第 74 集团军某旅机关楼大厅里，最新一期"胜战红榜"公布，路过的官兵纷纷驻足浏览。

榜单上，不同单位不同专业优秀官兵的信息不断滚动，某连上等兵黄一向的名字赫然在列，他是这次唯一一名上榜的义务兵。"感谢组织和战友对我的帮助，我要继续在战位上苦练本领，不断取得新突破！"黄一向欣喜不已。

就在一年前，黄一向还因为体能底子差，训练成绩排名靠后，成为连队重点帮扶对象。当时，班长骨干主动靠上去与他结对，可他嘴上说着"好好好"，转身却依然我行我素。

从当初的成绩"吊车尾"到登上"胜战红榜"，黄一向发生转变的很大动力，就来源于这份榜单。

那天，黄一向和几名战友到机关办事，被大屏幕上的”胜战红榜”吸引了眼球。屏幕上，登榜战士的名字、单位、事迹等信息滚动播放，让大家羡慕不已。

“快看，咱连的班长陈栋、副班长王威武都榜上有名”“那不是侯庆朋班长吗，你的新训班长真厉害”……听着大家对上榜战友的夸赞，黄一向目不转睛盯着屏幕，向往之情溢于言表。这一幕，被一旁驻足浏览的连队指导员看在眼里。

“人人都有一颗想’发光’的心，不仅要让榜样的光芒照进战士心里，更要想方设法帮想发光的战士’点亮自己’。”指导员发现，尽管黄一向体能和专业基础偏弱，但他脑瓜子灵活，心里渴望成长进步。

那段时间，恰逢该旅组织的”班长夜校”开课，首期主讲人是在上级组织的比武中勇夺狙击课目银牌的中士叶锋锋。指导员就专门安排黄一向参加”班长夜校”。

“4 个月集训，每一项训练都是极限考验：武装越野，一次就是 20 公里；据枪瞄准，一练就是几个小时……快顶不住的时候，我就告诉自己要咬牙坚持，决不放弃！”课堂上，叶班长分享了自己参加比武的备赛经历，锲而不舍的奋斗精神让黄一向很受触动。

“成为优秀军人没有捷径，唯有拼搏奋斗。”那一刻，奋斗的种子在他心中生根发芽。

此后，黄一向的精神面貌焕然一新，每天早起啃教材、跑电路、练操作，晚上一有时间就加班学习理论知识，成绩提升很快，逐渐在同年兵中脱颖而出。

今年初，得知旅队要组织无人机比武竞赛，黄一向主动报名。面对全新的专业领域，他一点一点从头学起，从理论学习到改装操作，遇到不懂的问题就找班长骨干请教，一有空就在训练场练习操作。

付出数倍努力后，黄一向终于在训练中崭露头角，被营队推荐参加旅无人机比武竞赛，并不负众望夺得第二名。

“登上’胜战红榜’那一刻，我觉得所有付出都值得。我要继续努力突破，激励和带动更多战友。”回想自己的上榜之路，黄一向颇为感慨。

“‘胜战红榜’不仅是一份名单，更是一面榜样的旗帜，有效激发官兵的荣誉感和上进心。”该旅领导介绍，为用活用好荣誉激励手段，他们充分发挥身边先进典型的榜样作用，区分不同领域、不同专业、不同战位，遴选出练兵备战实绩突出的官兵代表予以表彰奖励，定期在”胜战红榜”公布，立起争当练兵备战先锋的鲜明导向。结合设置”胜战红榜”，旅队还深入开展”荣誉上灯箱”“喜报送家门”等活动，不断营造干事创业良好氛围，鼓励战士”点亮自己”。

随着活动持续深入，越来越多的官兵光荣上榜：某营中士卫生员冉雪松专业素质过硬，立足本职岗位积极开展卫勤保障课目研究；一级上士陈栋在旅火力分队中高级军士炮手专业考核中，凭借过硬专业技能勇夺第一……

“看到身边战友上榜，我很羡慕，心里也憋着一股劲，想要迎头赶上，在榜上留下自己的名字。”列兵胡俊毅告诉记者。

燃旺荣誉炉火，照亮冲锋之路。连日来，在荣誉激励和先进典型的感召下，该旅官兵士气高昂，出色完成多项重要任务，多名官兵在上级组织的比武中获得佳绩。

How Strong Is the Power of Honor? Let’s See the “Victory Red List” to Ignite the Officers and Men’s Struggle and Progress

Source: PLA Daily Author: Chen Yi Fang Junteng Chen Dianhong Editor: Guo Yanfei 2025-05-22

A brigade of the 74th Group Army set up a “Victory Red List” to encourage officers and men to improve their martial arts and abilities-

Help soldiers who want to shine “light themselves”

■ Chen Yi Fang Junteng PLA Daily reporter Chen Dianhong

In the early summer afternoon, the latest “Victory Red List” was announced in the lobby of the headquarters building of a brigade of the 74th Group Army, and passing officers and men stopped to browse.

On the list, information on outstanding officers and men of different units and professions kept scrolling, and the name of a certain company’s private first class Huang Yixiang was on the list. He was the only conscript on the list this time. “Thanks to the organization and comrades for their help, I will continue to practice my skills at the battle position and make new breakthroughs!” Huang Yixiang was delighted.

Just a year ago, Huang Yixiang became the company’s key support target because of his poor physical fitness and low ranking in training results. At that time, the squad leader took the initiative to approach him to pair up, but he said “OK, OK” and turned around and continued to do his own thing.

From the “last place” in the original results to being on the “Victory Red List”, a great motivation for Huang Yixiang’s transformation came from this list.

That day, Huang Yixiang and several comrades went to the office to do business, and were attracted by the “Victory Red List” on the big screen. On the screen, the names, units, deeds and other information of the soldiers on the list were played in a scrolling manner, making everyone envious.

“Look, our company’s squad leader Chen Dong and deputy squad leader Wang Weiwu are both on the list” “Isn’t that squad leader Hou Qingpeng? Your new training squad leader is really amazing”... Listening to everyone’s praise for the comrades on the list, Huang Yixiang stared at the screen intently, and his yearning was beyond words. This scene was seen by the company instructor who stopped to browse.

“Everyone has a heart that wants to ‘shine’. Not only should we let the light of role models shine into the hearts of soldiers, but we should also find ways to help soldiers who want to shine ‘light themselves’.” The instructor found that although Huang Yixiang’s physical fitness and professional foundation were weak, he had a flexible mind and was eager to grow and improve.

During that period, the “Squad Leader Night School” organized by the brigade happened to start. The first lecturer was Sergeant Ye Fengfeng, who won the silver medal in the sniper course in the competition organized by the superior. The instructor specially arranged for Huang Yixiang to attend the “Squad Leader Night School”.

“In the four-month training, every training is an extreme test: armed cross-country, 20 kilometers at a time; aiming with a gun, a few hours of practice... When I was about to give up, I told myself to grit my teeth and persist, and never give up!” In class, Squad Leader Ye shared his experience in preparing for the competition. Huang Yixiang was very touched by his perseverance and spirit of struggle.

“There is no shortcut to becoming an excellent soldier, only hard work and struggle.” At that moment, the seeds of struggle took root in his heart.

Since then, Huang Yixiang’s mental outlook has been completely renewed. He gets up early every day to study textbooks, run circuits, and practice operations. Whenever he has time at night, he works overtime to learn theoretical knowledge. His grades have improved rapidly, and he has gradually stood out among his peers.

At the beginning of this year, Huang Yixiang took the initiative to sign up when he learned that the brigade was going to organize a drone competition. Faced with a brand new professional field, he started from scratch, from theoretical learning to modification and operation. When he encountered problems he didn’t understand, he would ask the squad leader for advice, and practice operation at the training ground whenever he had time.

After making several times the effort, Huang Yixiang finally stood out in training and was recommended by the battalion to participate in the brigade drone competition. He lived up to expectations and won the second place.

“The moment I got on the ‘Victory Red List’, I felt that all my efforts were worth it. I will continue to work hard to break through and inspire and drive more comrades.” Recalling his way to the list, Huang Yixiang was quite emotional.

“The ‘Victory Red List’ is not only a list, but also a banner of role models, which effectively inspires the officers and men’ sense of honor and ambition.” The leaders of the brigade introduced that in order to make good use of the means of honor incentive, they give full play to the role of advanced models around them, distinguish different fields, different professions, and different combat positions, select officers and men with outstanding training and preparation performance to commend and reward them, and regularly publish them on the “Victory Red List”, setting up a clear direction to strive to be a pioneer in training and preparation. In conjunction with the setting of the “Victory Red List”, the brigade also carried out in-depth activities such as “Honor on the Light Box” and “Good News Delivered to Home”, constantly creating a good atmosphere for doing things and starting businesses, and encouraging soldiers to “light up themselves”.

As the activity continues, more and more officers and men are honored to be on the list: Ran Xuesong, a sergeant medical worker in a certain battalion, has excellent professional qualities and actively conducts research on medical support courses based on his job; First Sergeant Chen Dong won the first place in the professional assessment of senior sergeant gunners in the brigade’s firepower unit with his excellent professional skills... “I am very envious of my comrades-in-arms who are on the list, and I am also holding back a lot of energy in my heart, wanting to catch up and leave my name on the list.” Private Hu Junyi told reporters.

Ignite the fire of honor and illuminate the road to charge. In recent days, inspired by honor and advanced models, the morale of the officers and men of the brigade is high, and they have completed many important tasks excellently. Many officers and men have achieved good results in the competitions organized by their superiors.

“数字化装备场”亮相营区，智能化平台为官兵减负又增效

来源：解放军报 作者：冯杨 陈游峰 向黎鸣 责任编辑：郭妍菲 2025-05-22

陆军某旅着力提升装备管理效能——

“数字化装备场”亮相营区

■冯 杨 陈游峰 解放军报记者 向黎鸣

“‘数字化装备场’上线后，车辆动用、维修保养、物资请领等审批流程可以线上完成，还能动态采集装备数据、实时监控风险隐患。”前不久，陆军某旅完成装备换季保养工作，营区车管站负责人谢满感慨地说，以往需要面对面处理的工作，如今线上就可快速完成，装备管理工作变得更加便捷高效。

“数字化装备场”是该旅为提升装备管理质效，建设推出的智能化信息管理平台。该旅装备管理科张科长告诉记者，以往，组织装备换季保养时，官兵不仅要跟踪装甲装备的维修情

况、更新近千项数据表格，还要开展报修审批、器材申领等日常工作，耗费大量时间精力。搬到新营区后，不少连队离车场较远，官兵办理业务很不方便。

了解情况后，他们深入一线展开调研，发现基层不同程度存在装备管理资源调配不科学、审批流程繁琐、业务办理低效等问题。”平时管好用好装备，战时才能发挥应有效能。”旅党委研究决定，结合练兵备战实际需求，构建一套动态调整、精准有效的信息化管理体系，提升工作效能的同时，也能减轻基层官兵负担。

随后，机关相关部门就引入智能化、数字化系统进行辅助管理，展开集智研讨，拿出一套解决方案——

针对官兵普遍反映的报表多、数据杂、统计难等问题，增设车场道闸、门禁识别、移动采集终端等设备，让装备信息采集、数据统计更新逐步实现自主化智能化；针对装备维修保养审批流程繁琐、调配困难等问题，细化分配维修任务，动态更新维修情况，完善各类应对方案，提高基层自主维修能力；针对动散条件下车辆动用管理难、风险大等问题，通过系统整合派遣车辆信息，对使用时间和行驶路线进行合并压减，如有临时用车需求，可直接由值班首长审批……

几个月后，一套符合保密要求，具备车辆派遣线上审批、装备态势实时呈现、维修计划辅助生成等功能的智能化信息管理平台——”数字化装备场”应运而生。该系统严格按照”集约配置、模块保障、精简节约、务求实用”的原则进行设计、测试和验收，能为旅、营、连三级值班室提供信息采集、数据管理等功能支持。

在旅机关办公室，机关保障席值班员杨韬正依托”数字化装备场”处理一项临时派车任务。记者看到，他仔细核对带车干部、出车事由、用车单位、目的地等关键信息，随后一键提交，系统很快提示”电子派车单已经完成审批”“人员车辆可准时出发”。

“这个系统的功能远不止这些。”杨韬轻点鼠标，调出对应装备的电子履历，装备的动用情况、维护保养、故障风险等信息一目了然，”系统通过数据整合，可以提供装备数据分析、技战术状况，让各级值班员实时掌握车辆任务进展和在位离位情况。”

一次训练结束，某连中士马龙晓拔下车上的 IC 卡，在车场的综合数据保障盒前轻轻一刷，车辆装备的油温、里程数、摩托化小时等数据就被自动识别读取，存储到车辆的电子履历中。”现在驾驶训练后，更新数据更加便捷。”马龙晓感言，”数据在线上多流转，大家平时就能少跑腿。”

“数字化装备场”的上线运行，提升了该旅装备管理效率。该旅领导说，他们将根据基层单位反馈的问题更新优化系统，不断提升新装备新系统服务备战打仗的贡献率。

“Digital Equipment Field” Debuts in the Barracks, Intelligent Platform Reduces Burden and Increases Efficiency for Officers and Men

Source: PLA Daily Author: Feng Yang Chen Youfeng Xiang Liming Editor: Guo Yanfei 2025-05-22

A certain army brigade strives to improve equipment management efficiency——

“Digital Equipment Field” debuts in the barracks

■ Feng Yang Chen Youfeng PLA Daily reporter Xiang Liming

“After the ‘digital equipment field’ goes online, the approval process such as vehicle mobilization, maintenance, and material request can be completed online, and equipment data can be dynamically collected and risks and hidden dangers can be monitored in real time.” Not long ago, a certain army brigade completed the seasonal maintenance of equipment. Xie Man, the person in charge of the vehicle management station in the barracks, said with emotion that the work that used to need to be handled face-to-face can now be completed quickly online, and equipment management has become more convenient and efficient.

“Digital Equipment Field” is an intelligent information management platform launched by the brigade to improve the quality and efficiency of equipment management. Zhang, the chief of the equipment management section of the brigade, told reporters that in the past, when organizing seasonal maintenance of equipment, officers and men not only had to track the maintenance of armored equipment and update nearly a thousand data tables, but also had to carry out daily work such as repair approval and equipment application, which consumed a lot of time and energy. After moving to the new barracks, many companies were far away from the parking lot, which made it inconvenient for officers and men to handle business.

After understanding the situation, they conducted in-depth investigations at the front line and found that there were problems such as unscientific allocation of equipment management resources, cumbersome approval procedures, and inefficient business handling at the grassroots level to varying degrees. “Only by managing and using equipment well in peacetime can it play its due role in wartime.” The brigade Party Committee studied and decided to build a set of dynamic adjustment, precise and effective information management system in combination with the actual needs of training and preparation for war, which can improve work efficiency while reducing the burden on grassroots officers and men.

Subsequently, the relevant departments of the agency introduced intelligent and digital systems for auxiliary management, carried out collective discussions, and came up with a set of solutions. In response to the problems commonly reported by officers and men, such as too many reports, complex data, and difficult statistics, additional equipment such as parking lot gates, access control identification, and mobile collection terminals were added to gradually realize autonomous and

intelligent equipment information collection and data statistics updates; in response to the problems of cumbersome equipment maintenance and approval procedures and difficult deployment, detailed maintenance tasks were assigned, maintenance conditions were dynamically updated, various response plans were improved, and the autonomous maintenance capabilities of grassroots units were improved; in response to the problems of difficult vehicle management and high risks under mobile conditions, the dispatched vehicle information was integrated through the system, and the use time and driving routes were merged and reduced. If there is a temporary need for a vehicle, it can be directly approved by the on-duty chief... A few months later, a set of intelligent information management platforms that meet confidentiality requirements and have functions such as online approval of vehicle dispatch, real-time presentation of equipment status, and auxiliary generation of maintenance plans came into being - “Digital Equipment Field”. The system is designed, tested and accepted in strict accordance with the principles of “intensive configuration, modular support, simplification and economy, and practicality”, and can provide information collection, data management and other functional support for the brigade, battalion and company duty rooms.

In the brigade office, Yang Tao, the duty officer of the security seat, is relying on the “digital equipment field” to handle a temporary vehicle dispatch task. The reporter saw that he carefully checked the key information such as the cadre with the vehicle, the reason for the vehicle dispatch, the vehicle unit, and the destination, and then submitted it with one click. The system soon prompted “The electronic vehicle dispatch order has been approved” and “The personnel and vehicles can depart on time.”

“The functions of this system are far more than that.” Yang Tao clicked the mouse to call up the electronic resume of the corresponding equipment, and the information such as the equipment’s mobilization, maintenance, and failure risk was clear at a glance. “The system can provide equipment data analysis and technical and tactical conditions through data integration, so that duty officers at all levels can grasp the progress of vehicle tasks and the status of being on and off duty in real time.”

After a training session, Ma Longxiao, a sergeant of a certain company, unplugged the IC card from the vehicle and swiped it lightly in front of the comprehensive data guarantee box in the parking lot. The oil temperature, mileage, motorization hours and other data of the vehicle equipment were automatically identified and read and stored in the electronic resume of the vehicle. “Now after driving training, it is more convenient to update data.” Ma Longxiao said, “With more data flowing online, everyone can run less errands in normal times.”

The online operation of the “digital equipment field” has improved the equipment management efficiency of the brigade. The leaders of the brigade said that they will update and optimize the system based on the problems reported by grassroots units, and continuously improve the contribution rate of new equipment and new systems to serve preparations for war.

一堂特殊的教育课，一座墓碑前的精神传承

来源：解放军报 作者：代鹏　杨沅　付君臣 责任编辑：郭妍菲 2025-05-23

第八十集团军某旅“登陆英雄连”用先辈事迹激励官兵建功军营——

老营长墓前一堂课

■代鹏　杨沅　解放军报特约记者　付君臣

“老营长，我们看您来了！”日前，第 80 集团军某旅”登陆英雄连”干部苗振晖，带领官兵来到老营长梁希武墓前，展开一场特殊的教育课。

墓碑前，苗振晖带领官兵向老营长献花致敬，与大家一起清理杂草、擦拭墓碑。随后，苗振晖讲述起老营长的战斗故事。

梁希武是辽宁本溪人，先后参加过解放战争、抗美援朝战争，并在战场上负伤，伤愈后落下病根。1956年，梁希武旧伤复发。临终前，他留下遗言：”将我葬在营区后山上。”官兵按老营长遗愿，将他葬在距离营区不到 3 公里的山坡上，墓碑朝着营区的方向。

铁打的营盘，流水的兵。60 多年来，连队官兵换了一茬又一茬，每逢新兵下连、老兵退伍等时机，”登陆英雄连”官兵都会自发祭奠老营长。这座象征忠诚与奉献的墓碑，成为连队官兵心中的精神高地。

“一次战斗中，老营长带队追击敌人，高强度急行军让队伍人困马乏，士气有些低落。见状，他二话不说，扛起 30 多公斤的装备，冲到队伍最前面……”听着苗振晖的讲述，二级上士张志祥思绪万千。

12年前，张志祥参军入伍，下连当天，他就和同年战友一起祭奠老营长。”入营第一课”上，梁希武的事迹在张志祥心中扎下了根。

当年青涩的新兵，如今已是经验丰富的班长，张志祥带领战友多次出色完成大项任务。”每当想起老营长拼搏奋斗的一生，我的内心就充满力量。”张志祥说。

“当兵就要像老营长那样，干啥都全力以赴。”一级上士王兴晓说，老营长当年提出把自己”葬在营区后山上”，既是对脚下这片土地无声的守护，也是对年轻战士殷切的期待。

十几年前那个寒冷的冬天，王兴晓乘火车、坐汽车，几经辗转来到连队。一下车，满目的荒凉让他的心凉了半截——光秃秃的山头一个连着一个，周边看不见一个村庄。”当时驻地条件很苦，夏天酷热冬天冷，风里夹沙还带土。”回忆自己的”兵之初”，王兴晓说，他一度难以适应。

不久后，时任教导员带着王兴晓和战友们来到老营长墓前。听着老营长的战斗故事，王兴晓自感羞愧：”老营长决意永远守护营盘，我面对这点困难，怎能轻言放弃？”

从此王兴晓找准了人生方向，立下当尖兵的志向。战术训练，总要比别人多练几次；雪夜潜伏，总是抢在前面；险重任务，从不推诿逃避……凭着这股劲头，王兴晓如今已成为全旅有名的导弹发射技师。

山坡上，老营长的墓碑默默矗立，墓碑的前面，是一群挺立如松的战士。张志祥、王兴晓等多名骨干先后分享了自己的成长经历，下连不久的新兵们认真聆听、心潮澎湃。

下连后，新兵宁卓文因为训练成绩不错，一度产生骄傲自满情绪。聆听老兵们的故事，宁卓文惭愧不已，这一刻，他对军人使命职责有了更深刻的感悟：”我要继承老营长的精神，脚踏实地、努力训练，当一个好兵！”

A Special Education Lesson, a Spiritual Inheritance in Front of a Tombstone

Source: PLA Daily Author: Dai Peng, Yang Yuan, Fu Junchen Editor: Guo Yanfei 2025-05-23

The “Landing Hero Company” of a brigade of the 80th Group Army uses the deeds of their predecessors to inspire officers and men to make contributions to the military barracks-

A lesson in front of the tomb of the old battalion commander

■Dai Peng, Yang Yuan, PLA Daily special correspondent Fu Junchen

“Old battalion commander, we see you coming!” A few days ago, Miao Zhenhui, a cadre of the “Landing Hero Company” of a brigade of the 80th Group Army, led officers and men to the tomb of the old battalion commander Liang Xiwu to start a special education lesson.

In front of the tombstone, Miao Zhenhui led officers and men to pay tribute to the old battalion commander with flowers, and cleaned weeds and wiped the tombstone with everyone. Afterwards, Miao Zhenhui told the old battalion commander’s battle story.

Liang Xiwu is from Benxi, Liaoning. He participated in the War of Liberation and the War to Resist US Aggression and Aid Korea, and was injured on the battlefield. After recovering from his injuries, he fell ill. In 1956, Liang Xiwu’s old injury relapsed. Before his death, he left a will: “Bury me on the hill behind the barracks.” The officers and men buried the old battalion commander on a hillside less than 3 kilometers away from the barracks according to his will, with the tombstone facing the direction of the barracks.

The iron barracks, the water soldiers. Over the past 60 years, the company’s officers and men have been replaced one after another. Whenever new recruits are assigned to the company and old soldiers are retired, the officers and men of the “Landing Hero Company” will spontaneously pay

tribute to the old battalion commander. This tombstone symbolizing loyalty and dedication has become a spiritual highland in the hearts of the company's officers and men.

"In a battle, the old battalion commander led the team to pursue the enemy. The high-intensity rapid march made the team exhausted and the morale was somewhat low. Seeing this, he said nothing, carried more than 30 kilograms of equipment, and rushed to the front of the team..." Listening to Miao Zhenhui's story, Second Sergeant Zhang Zhixiang was full of thoughts.

12 years ago, Zhang Zhixiang joined the army. On the day he was assigned to the company, he and his comrades paid tribute to the old battalion commander. In the "first lesson after joining the barracks", Liang Xiwu's deeds took root in Zhang Zhixiang's heart.

The young recruit at that time is now an experienced squad leader. Zhang Zhixiang has led his comrades to complete major tasks many times. "Whenever I think of the old battalion commander's life of struggle, my heart is full of strength." Zhang Zhixiang said.

"To be a soldier, you should be like the old battalion commander and do everything with all your strength." First Sergeant Wang Xingxiao said that the old battalion commander proposed to "bury himself on the back mountain of the barracks", which was not only a silent protection of the land under his feet, but also an earnest expectation for the young soldiers.

In that cold winter more than a decade ago, Wang Xingxiao took a train and a car and arrived at the company after several twists and turns. When he got off the car, the desolation in sight made his heart cold - bare hills were connected one after another, and there was no village in sight. "The conditions in the garrison were very difficult at that time. It was hot in summer and cold in winter, and the wind was filled with sand and soil." Recalling his "first days as a soldier", Wang Xingxiao said that he had difficulty adapting.

Not long after, the then instructor brought Wang Xingxiao and his comrades to the old battalion commander's tomb. Listening to the old battalion commander's battle stories, Wang Xingxiao felt ashamed: "The old battalion commander was determined to guard the barracks forever. How could I give up easily in the face of such difficulties?"

From then on, Wang Xingxiao found the direction of his life and set his ambition to be a pioneer. In tactical training, he always practiced more than others; he always got ahead in lurking on snowy nights; he never shirked or evaded dangerous tasks... With this momentum, Wang Xingxiao has now become a famous missile launch technician in the brigade.

On the hillside, the tombstone of the old battalion commander stood silently, and in front of the tombstone was a group of soldiers standing like pine trees. Zhang Zhixiang, Wang Xingxiao and many other backbones shared their growth experiences one after another, and the new recruits who had just joined the company listened carefully and were excited.

After joining the company, the new recruit Ning Zhuowen was proud and complacent for a while because of his good training results. After listening to the stories of the veterans, Ning Zhuowen

felt ashamed. At this moment, he had a deeper understanding of the mission and responsibilities of soldiers: “I want to inherit the spirit of the old battalion commander, be down-to-earth, work hard in training, and be a good soldier!”

多项革新成果应用于练兵实践，“圆梦工程”帮官兵圆了创新梦

来源：解放军报 作者：王培霖 任和 责任编辑：郭妍菲 2025-05-23

第 81 集团军某旅激发基层官兵革新活力

“圆梦工程”催生多项革新成果

解放军报讯　王培霖、任和报道：初夏，第 81 集团军某旅组织一场攻防训练。由该旅二级上士朱琰自主革新的毒剂检测车首次接受实战检验，辅助防化分队出色完成取样侦检等训练任务。

训练结束后，朱琰边整理毒剂检测车操作数据边对笔者说：”革新装备虽然辅助战友最终顺利完成任务，但也暴露出诸多不足，我将继续优化升级装备性能，让革新成果更好服务练兵备战。”笔者了解到，朱琰能够取得革新成果，得益于该旅推行”圆梦工程”，为基层官兵开展技术革新创造有利条件。

据介绍，一直以来，该旅注重鼓励官兵围绕战法训法创新、装备器材革新等展开探索研究。该旅领导在一次基层调研中了解到，基层官兵革新热情很高，提出了不少革新好点子，但苦于缺少经费支持，许多想法和创意只能停留在图纸上。为此，他们研究决定，在符合相关规定前提下，探索推行基层革新”圆梦工程”，在场地保障、设备采购等方面，对技术尖子和专业能手开展革新给予经费和政策支持。与此同时，该旅还邀请院校专家、厂家技术骨干等来队授课，帮助官兵打开革新视野、破解革新难点，进一步激发创新动力活力。

去年，为提高某型装备在复杂电磁环境下的抗干扰能力，某连二级上士董起越想通过编程技术和 3D 打印技术设计一套全新的操控系统。于是，他按照基层革新”圆梦工程”的申报流程，向上级提报了这一项目。没多久，该项目经审核论证得到批复，在充足经费支持下，该项目研发很快步入快车道。目前，这套操控系统已被运用到实战化训练中，因具备较强实用性，得到官兵认可。

据了解，该旅推行基层革新”圆梦工程”以来，已有多个连队成立技术革新工作室，一批想创新、会创新、敢创新的骨干人才崭露头角，多项革新成果应用于练兵实践。

Many Innovative Achievements Are Applied to Military Training Practice, and the “Dream Project” Helps Officers and Men Realize Their Innovative Dreams

Source: PLA Daily Author: Wang Peilin Ren He Editor: Guo Yanfei 2025-05-23

A brigade of the 81st Group Army stimulates the innovative vitality of grassroots officers and men

The “Dream Project” has spawned many innovative achievements

PLA Daily News Wang Peilin and Ren He reported: In early summer, a brigade of the 81st Group Army organized an attack and defense training. The poisonous gas detection vehicle independently innovated by the brigade’s second-class sergeant Zhu Yan was tested in actual combat for the first time, assisting the chemical defense team to complete the sampling and detection and other training tasks excellently.

After the training, Zhu Yan said to the author while sorting out the operation data of the poisonous gas detection vehicle: “Although the innovative equipment assisted the comrades to successfully complete the task, it also exposed many shortcomings. I will continue to optimize and upgrade the performance of the equipment, so that the innovative achievements can better serve the training and preparation.” The author learned that Zhu Yan was able to achieve innovative results thanks to the brigade’s implementation of the “Dream Project” to create favorable conditions for grassroots officers and men to carry out technological innovation.

According to reports, the brigade has always focused on encouraging officers and men to explore and research around the innovation of tactics and training methods, equipment and equipment innovation. During a grassroots survey, the brigade leaders learned that grassroots officers and men were very enthusiastic about innovation and put forward many good ideas for innovation, but due to the lack of financial support, many ideas and creativity could only remain on the drawing board. To this end, they decided to explore and implement the grassroots innovation “Dream Project” under the premise of complying with relevant regulations, and provide financial and policy support for technical elites and professional experts to carry out innovation in terms of site support and equipment procurement. At the same time, the brigade also invited experts from colleges and universities, technical backbones from manufacturers, etc. to give lectures to the team to help officers and men open up their innovation horizons, solve the difficulties of innovation, and further stimulate the vitality of innovation. Last year, in order to improve the anti-interference ability of a certain type of equipment in a complex electromagnetic environment, Dong Qiyue, a second-class sergeant of a certain company, wanted to design a new control system through programming technology and 3D printing technology. So, he submitted this project to his superiors in accordance with the application process of the grassroots innovation “Dream Project”. Not long after, the project was approved after review and demonstration. With sufficient financial support, the research and development of the project quickly entered the fast lane. At present, this control system has been used in actual combat training and has been recognized by officers and men for its strong practicality.

It is understood that since the brigade implemented the “Dream Project” of grassroots innovation, many companies have established technical innovation studios, and a group of backbone talents

who want to innovate, can innovate, and dare to innovate have emerged, and many innovative achievements have been applied to training practice.

从梨园到南京路，八连聚力抓实作风建设当好新传人

来源：解放军报 作者：陈大帅 童祖静 责任编辑：郭妍菲 2025-05-23

“南京路上好八连”引导官兵——

用好传家宝 当好新传人

■陈大帅 解放军报特约记者 童祖静

日前，陆军某旅”南京路上好八连”官兵代表来到连队组建地山东省莱西市望城街道小院村，开展”寻根”活动。一路风尘仆仆，官兵刚安顿下来，就在村头搭起服务点，为村民提供理发、补鞋等公益服务。看着官兵忙碌的身影，一位已过耄耋之年的村民说：”几十年过去了，八连的兵还和以前一样……”

“1947 年 8 月，连队前身刚组建时，就驻扎这片梨园附近，先辈们边训练边战斗，但再渴再累也没摘过老乡一颗梨，这就是连队’拒腐蚀，永不沾’光荣传统的源头。”为民服务活动结束后，带队的该连干部崔凯通过视频连线方式，与远在营区的连队官兵一起重温连队历史。

1949 年 6 月，八连从硝烟弥漫的战场来到繁华的上海市南京路执勤，始终发扬艰苦奋斗优良作风，木工箱、补鞋箱、理发箱等传家宝传承至今。1963 年 4 月，国防部授予该连”南京路上好八连”荣誉称号。1963 年 8 月，毛泽东同志写下《八连颂》：”好八连，天下传。为什么？意志坚。为人民，几十年。拒腐蚀，永不沾……”

“作为’好八连’传人，我们要像前辈那样，从身边点滴做起、从生活细节严起，以实际行动弘扬好传统、传承好作风。”重温连队光辉历史，下士芦谭啸说。

崔凯告诉记者，为加强作风建设，他们组织官兵认真学习中央八项规定精神、军委十项规定及其实施细则精神，结合连队光荣历史，开展”弘扬优良传统、当好红色传人”活动。他们通过”寻根”连队组建地等形式，引导官兵围绕”勤俭节约”“拒腐防变”等内容，深入学习光荣传统，对照检视自身不足，聚力抓实作风建设。此次”寻根”连队组建地之前，八连以连队命名 62 周年为契机，举行了一场”三箱”交接仪式。

“三箱”是八连传家宝，”三箱”交接仪式也是八连进行艰苦奋斗教育的重要方式之一。1959 年，八连战士吴岳生用废木头做成工具箱，将小锯和铁钉放在里面，用于日常维修。如今，工具箱已发展为木工箱、补鞋箱、理发箱，简称”三箱”。

仪式现场，作为连队第 49 代”三箱”传人之一，中士黄帅挺郑重接过木工箱。”木工箱、补鞋箱、理发箱是连队开展为民服务活动的主要工具，见证了一代代官兵全心全意为人民服务的实际行动。”仪式结束后，黄帅挺表示，他将接过先辈接力棒，与战友们共同传承好连队”艰苦奋斗”“拒腐蚀，永不沾”“全心全意为人民服务”三大光荣传统。

据了解，”弘扬优良传统、当好红色传人”活动中，八连还通过汇编《”好八连”清风故事集》、定期开展”拒腐蚀，永不沾”承诺践诺活动等形式，引导官兵自觉抵制腐朽生活方式和思想作风的侵蚀，确保始终保持”拒腐蚀，永不沾”本色，全身心投入练兵备战。

From Liyuan to Nanjing Road, the Eighth Company Focuses on Style Construction and Serves as a Good New Successor

Source: PLA Daily Author: Chen Dashuai Tong Zujing Editor: Guo Yanfei 2025-05-23

“Good Eighth Company on Nanjing Road” guides officers and men---

Use heirlooms well and serve as a good new successor

■ Chen Dashuai, PLA Daily special correspondent Tong Zujing

Recently, representatives of officers and men of the “Good Eighth Company on Nanjing Road” of a certain army brigade came to Xiaoyuan Village, Wangcheng Street, Laixi City, Shandong Province, where the company was established, to carry out a “roots-seeking” activity. After a long journey, the officers and men set up a service point at the entrance of the village as soon as they settled down, providing villagers with public welfare services such as haircuts and shoe repairs. Looking at the busy figures of officers and men, a villager who is over 80 years old said: “Decades have passed, and the soldiers of the Eighth Company are still the same as before...”

“In August 1947, when the predecessor of the company was just established, it was stationed near this pear orchard. The ancestors trained and fought at the same time, but no matter how thirsty or tired they were, they never picked a pear from the villagers. This is the source of the company’s glorious tradition of “resisting corruption and never getting involved.” After the service activity for the people, Cui Kai, the company cadre who led the team, reviewed the company’s history with the company officers and men far away in the barracks through video connection.

In June 1949, the Eighth Company came from the battlefield filled with gunpowder to the prosperous Nanjing Road in Shanghai for duty. It has always carried forward the fine style of hard struggle. Carpentry boxes, shoe repair boxes, barber boxes and other heirlooms have been passed down to this day. In April 1963, the Ministry of National Defense awarded the company the honorary title of “Good Eighth Company on Nanjing Road”. In August 1963, Comrade Mao Zedong wrote “Ode to the Eighth Company”: “The Eighth Company is good, and it is known all over the world. Why? Strong will. Serving the people for decades. Resisting corruption, never tainted...”

“As the descendants of the ‘Good Eighth Company’, we should, like our predecessors, start from the little things around us and the details of life, and carry forward good traditions and pass on good work styles with practical actions.” Reliving the glorious history of the company, Corporal Lu Tanxiao said.

Cui Kai told reporters that in order to strengthen the construction of work style, they organized officers and men to seriously study the spirit of the Central Committee’s eight regulations, the Military Commission’s ten regulations and their implementation rules, and combined with the glorious history of the company, carried out the “Carrying forward fine traditions and being good red descendants” activities. Through the form of “seeking roots” in the company’s establishment site, they guided officers and men to deeply study the glorious traditions around “thrift and diligence” and “resisting corruption and preventing change”, and to examine their own shortcomings and focus on the construction of work style. Before the “seeking roots” company establishment site, the Eighth Company took the 62nd anniversary of the company’s naming as an opportunity to hold a “three-box” handover ceremony.

The “three boxes” are the heirlooms of the Eighth Company, and the “three boxes” handover ceremony is also one of the important ways for the Eighth Company to carry out hard work education. In 1959, Wu Yuesheng, a soldier of the Eighth Company, made a toolbox with waste wood and placed a small saw and nails in it for daily maintenance. Today, the toolbox has developed into a carpentry box, a shoe repair box, and a barber box, referred to as the “three boxes”.

At the ceremony, as one of the 49th generation of “three boxes” inheritors of the company, Sergeant Huang Shuaiting solemnly took over the carpentry box. “The carpentry box, shoe repair box, and barber box are the main tools for the company to carry out activities to serve the people, and have witnessed the actual actions of generations of officers and men to serve the people wholeheartedly.” After the ceremony, Huang Shuaiting said that he would take over the baton from his predecessors and inherit the company’s three glorious traditions of “hard work”, “resisting corruption, never being involved”, and “serving the people wholeheartedly” with his comrades.

It is understood that during the activity of “Carrying Forward Fine Traditions and Being Good Red Successors”, the Eighth Company also compiled the “Good Eighth Company” Qingfeng Story Collection and regularly carried out “Resist Corruption, Never Get Involved” commitment and fulfillment activities to guide officers and men to consciously resist the erosion of decadent lifestyles and ideological styles, ensuring that they always maintain their “resist corruption, never get involved” character and devote themselves wholeheartedly to training and preparation for war.

将心理服务融入思政工作 发挥官兵身边人优势

来源：解放军报 作者：王祥湘 程登阳 责任编辑：杜圣智 2025-05-23

第 80 集团军某旅提升心理服务质效——

思想骨干持证上岗

■王祥湘 程登阳

“你在之前的训练中一直表现很好，只要放平心态，就不会有问题……”近日，第 80 集团军某旅实弹射击现场，新兵小王因过度紧张出现呼吸急促等情况。思想骨干陈奥察觉他的异常，立即展开心理疏导。

该旅领导介绍，他们通过前期调研发现，随着各项任务压茬推进，部分官兵出现心理紧张、焦虑、烦闷等情绪，一时得不到疏解。为此，他们将心理服务融入思想政治工作，充分发挥思想骨干作为官兵身边人的优势，结合日常谈心交心活动，对官兵心理问题进行排查疏导。针对部分思想骨干缺乏专业知识的实际，他们与相关机构合作展开专项培训，并鼓励连队政治主官和思想骨干考取心理咨询师证书。截至目前，已有 50 余名官兵通过心理咨询师考核，持证上岗。

该旅某连张排长任职时间较短，因为组织训练缺少经验，方法欠妥当，影响了自身威信。此后，他开展工作越来越束手束脚，不仅发现问题不敢管，日常生活中也越发不愿与大家交流。对此，该连孙指导员立即靠上去，一方面利用所学心理学知识，帮他卸下思想包袱，重新树立信心；另一方面，与排里的战士集体谈心，希望大家支持排长的工作，多提建设性意见。在此基础上，孙指导员又结合自身经验对张排长进行帮带，帮助他提升工作能力。近日，该连组织紧急出动训练，重获战友认可的张排长，带领全排出色完成任务。

“心理工作与思想工作相辅相成，健康的心理状态有助于官兵树立正确的思想观念。”该旅领导说。

Integrate Psychological Services into Ideological and Political Work and Give Full Play to the Advantages of People around Officers and Men

Source: PLA Daily Author: Wang Xiangxiang Cheng Dengyang Editor: Du Shengzhi 2025-05-23

A brigade of the 80th Group Army improves the quality and efficiency of psychological services-

Ideological backbones are certified to work

■Wang Xiangxiang Cheng Dengyang

“You have always performed well in previous training. As long as you keep a calm mind, there will be no problem...” Recently, at the live-fire shooting site of a brigade of the 80th Group Army, recruit Xiao Wang had shortness of breath due to excessive tension. Chen Ao, an ideological backbone, noticed his abnormality and immediately started psychological counseling.

The leaders of the brigade introduced that they found through preliminary research that as various tasks were pushed forward in succession, some officers and men had psychological tension, anxiety, boredom and other emotions, which could not be relieved for a while. To this end, they integrated psychological services into ideological and political work, gave full play to the advantages of ideological backbones as people around officers and men, and combined with daily heart-to-heart activities to investigate and counsel the psychological problems of officers and men. In view of the fact that some ideological backbones lack professional knowledge, they cooperated with relevant institutions to carry out special training, and encouraged the company's political chief and ideological backbones to obtain psychological counselor certificates. So far, more than 50 officers and men have passed the psychological counselor assessment and have been certified.

Platoon leader Zhang of a company in the brigade has been in office for a short time. Because of his lack of experience in organizing training and inappropriate methods, his prestige has been affected. Since then, he has become more and more restrained in his work. Not only did he not dare to manage problems, but he was also less willing to communicate with everyone in daily life. In response to this, the company's instructor Sun immediately approached him. On the one hand, he used the psychological knowledge he learned to help him unload his ideological burden and rebuild his confidence; on the other hand, he had a collective talk with the soldiers in the platoon, hoping that everyone would support the platoon leader's work and give more constructive suggestions. On this basis, Instructor Sun combined his own experience to help Platoon Leader Zhang improve his work ability. Recently, the company organized an emergency training. Platoon Leader Zhang, who regained the recognition of his comrades, led the entire platoon to complete the task brilliantly.

"Psychological work and ideological work complement each other. A healthy mental state helps officers and men establish correct ideological concepts." said the brigade leader.

指导员打开的房门 让这位新战士思想发生转变

来源：解放军报 作者：田皓羽 李佳豪 张石水 责任编辑：杜圣智 2025-05-23

第 77 集团军某旅一名带兵人帮战士融入部队大家庭——

指导员打开房门 新战士敞开心扉

■田皓羽 解放军报特约记者 李佳豪 张石水

"不管是家庭矛盾、生活烦恼还是成长困惑，自己解决不了都可以来找我，我的房门随时为你们敞开。"新兵入营的当天晚上，第 77 集团军某旅新兵连刘指导员，就利用点名时机向新战友们表示。

然而，这样的承诺，并没有换来新兵小何的信任：”不过是客套话罢了。”原来，入伍之前，小何当过服务员、送过外卖、做过生意……复杂的社会经历让他对外人有着天然的防备，习惯将自己的内心包裹，不轻易向别人吐露心声。

家庭的经济压力也让小何深感重负，他有时甚至觉得，为了实现”迷彩梦”而放弃工作并非理想的选择。由于整天心事重重，他无法专心训练，平时也不愿与战友交流，刘指导员看在眼里，急在心里。

他找到小何，关心地劝道：”部队战友亲如家人，有啥困难说出来，我们帮你一起解决。”但小何并不领情：”我是成年人了，自己的事情应该自己解决。”

话虽这样说，但刘指导员真诚的态度还是在小何的心中荡起了一丝波澜。接下来的工作训练中，他对指导员有了更多关注：战友小黄训练跟不上节奏，刘指导员带着骨干，手把手示范带教；得知大学生士兵小陈有考学提干的想法，刘指导员专门为他讲解政策，制订成长方案；战士小彭性格内向，刘指导员常常安排他上台进行新闻点评，并带头为他鼓掌点赞……

“指导员对每个人都很上心，始终热情饱满。”真正让小何发生思想转变的，是刘指导员的房门——闲暇时间，那扇门总是敞开着，战友找指导员谈心，经常是带着心事进去，满脸笑容出来。

这天夜里，辗转反侧无法入睡的小何终于走进了刘指导员的房间。没等他开口，刘指导员便说道：”是家里的事吧？我问过机关了，你的情况可以申请困难家庭救济金。申请表早就准备好了，你赶紧填一下。”家里的情况、过往的经历、心里的压力……谈心中，刘指导员认真倾听、不时安慰鼓励，小何慢慢敞开心扉，难以言说的压力得以释怀。

那天夜里，两人深谈了许久。离开前，小何张了张嘴欲言又止，刘指导员连忙说道：”你放心，救济金会打到你的个人账户，别人不会知道。别总是板着脸，年纪轻轻多笑一笑嘛，以后遇到困难随时来找我。”

从那以后，小何的心态悄然发生了改变。他不再沉默寡言、封闭自我，恢复了年轻人应有的开朗阳光，也逐渐融入部队大家庭。不仅如此，他还主动为刘指导员”代言”，凡是察觉有战友遇到困难，他总不忘说上一句：”有事找指导员。”

The Political Instructor Opened the Door and Changed the New Soldier’s Thinking

Source: PLA Daily Author: Tian Haoyu Li Jiahao Zhang Shishui Editor: Du Shengzhi 2025-05-23

A leader of a brigade of the 77th Group Army helped the soldiers integrate into the big family of the army-

The Political Instructor opened the door and the new soldiers opened their hearts

■Tian Haoyu PLA Daily Special Correspondent Li Jiahao Zhang Shishui

“Whether it is family conflicts, life troubles or growth confusion, you can come to me if you can’t solve it yourself. My door is always open for you.” On the night when the recruits entered the barracks, Liu, the Political Instructor of the recruit company of a brigade of the 77th Group Army, took the opportunity of roll call to express to the new comrades.

However, such a promise did not win the trust of the recruit Xiao He: “It’s just a polite remark.” It turned out that before joining the army, Xiao He worked as a waiter, delivered takeout, and did business... The complex social experience made him naturally defensive against outsiders, accustomed to wrapping up his inner heart and not easily revealing his feelings to others.

The financial pressure of the family also made Xiao He feel burdened. Sometimes he even felt that giving up his job to realize his “camouflage dream” was not an ideal choice. Because he was worried all day, he could not concentrate on training and was unwilling to communicate with his comrades. Instructor Liu saw it and was worried. He found Xiao He and advised him with concern: “Comrades in the army are like family. If you have any difficulties, please tell us and we will help you solve them together.” But Xiao He did not appreciate it: “I am an adult and I should solve my own problems.” Although he said so, Instructor Liu’s sincere attitude still caused a ripple in Xiao He’s heart. In the following work training, he paid more attention to the instructor: when his comrade Xiao Huang couldn’t keep up with the training, Instructor Liu took the backbone and demonstrated and taught him; when he learned that the college soldier Xiao Chen wanted to take the exam to be promoted, Instructor Liu explained the policy to him and made a growth plan; the soldier Xiao Peng was introverted, Instructor Liu often arranged for him to comment on the news on the stage and took the lead in applauding and praising him...

“The instructor is very concerned about everyone and is always enthusiastic.” What really changed Xiao He’s thinking was Instructor Liu’s door - in his spare time, the door was always open. When comrades came to talk to the instructor, they often went in with worries and came out with smiles on their faces.

That night, Xiao He, who was tossing and turning and unable to fall asleep, finally walked into Political Instructor Liu’s room. Before he could speak, Liu said, “Is it about your family? I have asked the government, and you can apply for relief funds for needy families. The application form has been prepared long ago, so fill it out quickly.” Family situation, past experiences, and inner pressure... Instructor Liu listened carefully, comforted and encouraged from time to time, and Xiao He slowly opened his heart, and the unspeakable pressure was relieved.

That night, the two had a long and deep talk. Before leaving, Xiao He opened his mouth and hesitated to speak, and Liu hurriedly said, “Don’t worry, the relief funds will be deposited into your personal account, and others will not know. Don’t always have a stern face, smile more at a young age, and come to me anytime you encounter difficulties in the future.”

Since then, Xiao He's mentality has quietly changed. He is no longer silent and closed himself, and has restored the cheerfulness and sunshine that young people should have, and has gradually integrated into the big family of the army. Not only that, but he also took the initiative to "speak for" Instructor Liu. Whenever he noticed that his comrades were in trouble, he always remembered to say, "If you have any problems, find the instructor."

如何续写战旗新荣光 这个团给出答案

来源：解放军报 作者：高群 责任编辑：杜圣智 2025-05-24

续写战旗新荣光

■高群

去年底，团里组织"赓续红色血脉、做好新时代红军传人"演讲比赛。聆听战友们的动情讲述，坐在台下的我思绪万千，不由得想起几段采写稿件的经历。

我们团前身是一支诞生在陕北的红军部队，1949 年兰州战役中，凭借战斗中攻得勇猛、守得顽强，被授予"勇猛顽强"和"真正顽强"两面奖旗。自此，"勇猛顽强、真正顽强"成为融入官兵血脉的团魂。

作为单位的新闻报道员，"红军传人"是我撰写稿件中的高频词，我也在一次次采写稿件的过程中，去感悟一代代来自五湖四海的年轻人，如何在红色精神的洗礼下争当红军传人，如何从红色养分中汲取奋进力量。

高原之上，热血奔流。面对艰险的国防光缆施工任务，官兵们个个喊响"看我的"。在戈壁滩上施工，地质坚硬又多碎石，一铁镐下去火星四溅，胳膊震得发麻，地上却常常只出现一个白点。官兵们"天当被、地作床"艰苦奋斗，圆满完成施工任务。

"一不怕苦、二不怕死，是这个红军团在战火硝烟中打出来的精神气质，是红军传人在腥风血雨里凝聚起的打赢基因……进入新时代，官兵直面血火生死考验的机会虽然少了，但他们始终将自己的使命担当高高举过头顶。"刊发在军报的《红色记忆的力量》一文中，我这样写道。

那一年，我们团在高原驻训，需要抽调人员组成一个小组，奔赴海拔 5000 多米的一个哨所执勤。那个哨所，含氧量不足平原地区的一半，年平均气温在零下 20 摄氏度左右，常年刮七八级大风。然而，不需要宣传动员，一封封请战书如雪花般飘向各个连队党支部。小组成员登车那一刻，全团官兵高喊着"勇猛顽强、真正顽强"的口号为他们送行。

任务期间，我前往哨所采访。通往哨所的盘山路，有一段犹如天梯，虽然垂直距离不足800 米，却盘绕着 18 公里山路、50 多道回头弯，地势非常险峻。即使我已经在海拔 4000 多米的高原地区生活近一年，但是到达哨所时，还是立刻接过了哨所战士递给我的氧气瓶。

在这个伸手仿佛就能触摸到天空的地方，哨所战士的脸晒得黝黑，可脸上的笑容在阳光照射下是那么灿烂。采访结束时，他们在呼啸的寒风中举起一面五星红旗，高声宣誓：”我站立的地方是中国，边关有我，请祖国放心！”

我用相机定格下这一刻，把他们戍守雪山之巅的故事，写进了《云端镌刻忠诚志》一文。

红色基因融入血脉，红色基因代代相传。2022 年，我了解到时任团副参谋长穆拉迪里家中三代四人从军的故事。采访时，我拨通了穆拉迪里的父亲穆赫塔尔的电话。

老人年事已高，但说话条理清晰。他首先讲起父亲克日莫夫的故事。1950 年，克日莫夫作为运送物资的驼工队一员，跟随”进藏先遣英雄连”挺进阿里。返回新疆后他被破格批准参军，后来因表现出色被提拔为军官。由于部队任务需要，他主动到西藏阿里地区任职，一干就是半辈子。

穆赫塔尔长大后，像父亲一样驻守在风雪边防线。他的两个儿子同样”子承父业”。大儿子穆拉迪里军校毕业时，有机会去往内地条件更好的地方，一时有些犹豫。穆赫塔尔将自己胸前长期佩戴的党员徽章摘下来，戴在穆拉迪里胸前，叮嘱他：”党需要我们在哪里，我们就在哪里。”第二天，穆拉迪里写下志愿戍边申请书……

结束将近 3 个小时的通话，品读不同时代的相同初心，我的内心久久不能平复。待我整理思绪，最终写下近两万字的初稿，又经数次修改，《把青春热血融入祖国边疆》的稿件得以见报。

见报稿件在微信朋友圈转发后，战友们都为这个 70 余年接力戍守边疆的军人家庭点赞。穆拉迪里的评论，也道出了团队官兵的心声：”作为红军传人，我们一定会握紧接力棒，续写战旗新荣光！”

How to Continue Writing the New Glory of the Battle Flag? This Regiment Gave the Answer

Source: PLA Daily Author: Gao Qun Editor: Du Shengzhi 2025-05-24

Continue writing the new glory of the battle flag

■Gao Qun

At the end of last year, the regiment organized a speech contest on “Continuing the red bloodline and being a good successor of the Red Army in the new era”. Listening to the emotional stories of

my comrades, I was thinking about a lot of things sitting in the audience, and I couldn't help but think of several experiences of writing articles.

Our regiment was formerly a Red Army unit born in northern Shaanxi. In the Lanzhou Campaign in 1949, it was awarded the two award flags of "brave and tenacious" and "truly tenacious" for its brave attack and tenacious defense in the battle. Since then, "brave and tenacious, truly tenacious" has become the soul of the regiment integrated into the blood of officers and men.

As a news reporter of the unit, "Red Army descendants" is a high-frequency word in my manuscripts. In the process of writing manuscripts again and again, I also feel how generations of young people from all over the world strive to become Red Army descendants under the baptism of the red spirit and how to draw strength from the red nutrients.

On the plateau, blood is flowing. Faced with the difficult task of national defense optical cable construction, the officers and men shouted "Look at me". Construction in the Gobi Desert, the geology is hard and there are many gravels. When an iron pick is used, sparks fly and the arms are numb, but there is often only a white spot on the ground. The officers and men "use the sky as a blanket and the ground as a bed" and work hard to successfully complete the construction task.

"Not afraid of hardship and not afraid of death are the spiritual temperament of this Red Army Corps in the smoke of war, and the winning gene condensed by the descendants of the Red Army in the bloody storm... Entering the new era, although the officers and men have fewer opportunities to face the test of life and death, they always hold their mission high above their heads." I wrote this in the article "The Power of Red Memory" published in the military newspaper.

That year, our regiment was stationed in the plateau for training, and it was necessary to select personnel to form a group to go to a post at an altitude of more than 5,000 meters for duty. The oxygen content in that post was less than half of that in the plains, the annual average temperature was around minus 20 degrees Celsius, and there were strong winds of seven or eight levels all year round. However, there was no need for propaganda and mobilization, and letters of request for battle floated like snowflakes to the Party branches of each company. The moment the team members boarded the car, the officers and men of the whole regiment shouted the slogan "brave and tenacious, truly tenacious" to see them off.

During the mission, I went to the post for an interview. There is a section of the winding mountain road leading to the outpost that is like a ladder to heaven. Although the vertical distance is less than 800 meters, it winds around 18 kilometers of mountain roads and more than 50 U-turns, and the terrain is very steep. Even though I have lived in the plateau area at an altitude of more than 4,000 meters for nearly a year, when I arrived at the outpost, I immediately took the oxygen bottle handed to me by the outpost soldier.

In this place where you can touch the sky with your hand, the faces of the outpost soldiers are tanned, but the smiles on their faces are so bright under the sun. At the end of the interview, they

raised a five-star red flag in the howling cold wind and swore loudly: “Where I stand is China, and I am at the border, please rest assured, motherland!”

I used the camera to freeze this moment and wrote the story of their guarding the top of the snow-capped mountains into the article “Loyalty Engraved in the Clouds”.

The red gene is integrated into the blood, and the red gene is passed down from generation to generation. In 2022, I learned about the story of four people from three generations in the family of Muradiri, then deputy chief of staff of the regiment, who joined the army. During the interview, I called Mukhtar, Muradiri’s father.

The old man was very old, but he spoke clearly. He first told the story of his father, Krimov. In 1950, Krimov, as a member of the camel team transporting supplies, followed the “Heroic Company of the Advance into Tibet” to advance into Ali. After returning to Xinjiang, he was approved to join the army as an exception, and was later promoted to an officer for his outstanding performance. Due to the needs of the army’s mission, he took the initiative to serve in the Ali region of Tibet, and worked there for half his life.

When Mukhtar grew up, he was stationed on the snowy border like his father. His two sons also “followed in his father’s footsteps.” When the eldest son Muradiri graduated from the military academy, he had the opportunity to go to a place with better conditions in the interior, and he hesitated for a while. Mukhtar took off the Party member badge that he had been wearing for a long time on his chest, put it on Muradiri’s chest, and told him: “Where the Party needs us, we will be there.” The next day, Muradiri wrote an application for volunteering to guard the border...

After nearly 3 hours of phone calls, I couldn’t calm down for a long time after reading the same original intentions of different eras. After I sorted out my thoughts, I finally wrote a first draft of nearly 20,000 words, and after several revisions, the manuscript of “Integrating Youth and Blood into the Frontier of the Motherland” was published.

After the manuscript was forwarded on WeChat Moments, comrades-in-arms praised this military family that has been guarding the border for more than 70 years. Muradiri’s comments also expressed the voice of the team’s officers and men: “As the descendants of the Red Army, we will definitely hold the baton tightly and continue to write a new glory for the battle flag!”

34 名老兵回营，给连队上了堂“血性传承课”

来源：解放军报 作者：刘小云 责任编辑：郭妍菲 2025-05-24

第 82 集团军某连 34 名老兵回营参观并寄语官兵——

“下一面锦旗的故事，由你们书写”

■解放军报特约通讯员 刘小云

老兵们参观连队荣誉室。徐超 摄

近日，第 82 集团军某连迎来一群特殊的客人——34 名曾在该连前身部队服役的老兵。他们受邀参加连队组织的”薪火相传忆初心、奋斗强军续荣光”主题活动，与官兵面对面交流。

在装备展示区，看到某型突击车和新式枪械，老兵们难掩兴奋。征得同意后，年过七旬的老兵朱大国端起一挺机枪。了解机枪的基本构造后，他卧倒在地，体会瞄准、击发的动作要领。

“连队武器装备越来越先进，我们打心眼里高兴。”朱大国曾任该连连长，他对官兵们说，”现在条件好了，大家更要立足岗位苦干实干，把技能练精，把本领练硬，把连队建强。”

走进连队荣誉室，在志愿军特等功臣赵先有烈士的铜像前，老兵们停下脚步。赵先有是电影《英雄儿女》中”王成”的原型之一。一场高地争夺战中，时任连队副指导员的赵先有带领战友顽强战斗，喊出”为了胜利，向我开炮”的口号。

“军人就是要有拼劲，为了胜利敢于豁出去”“血性胆气的培养不是一朝一夕的事，要靠每一天的努力、每一次任务的历练，去提升血性’浓度’”……老兵们深情的话语，激励着在场的每一位官兵。

在荣誉室展示的一张张老照片中，老兵们寻找着熟悉的面孔。一位老兵指着一张照片，对身边的年轻官兵说：”你们看，这个是我，这个是在抗美援朝战争中荣立一等功的战斗英雄关景春。这张照片，是他当年回老连队时，与我们的合影。”

荣誉室的一面墙上，几乎挂满了锦旗。看到一面集体二等功锦旗，该连老指导员贾过晓深情回忆往事：”42 年前，连队到戈壁滩执行任务，大家战风沙、斗酷暑，在实弹训练中打出’满堂彩’，赢回了这面锦旗……”

该连历史上曾荣立集体一等功 1 次、集体二等功 17 次。老兵田现华指着墙上最右侧的一块空白处，对连队指导员吕琳说：”这里的位置还空着，下一面锦旗的故事，由你们书写。”

参观结束，老兵们与连队官兵展开进一步交流。从战斗故事讲到战斗精神，从工作训练讲到日常生活，现场气氛非常活跃。连队官兵纷纷表示，要用实际行动为连队建设增光添彩。

老兵们告别前，连队特意组织了一场小比武。在老兵们的见证下，中士董平和下士黄天龙，在单杠卷身上比拼中，成绩均超过 200 个。

34 Veterans Returned to the Barracks and Gave the Company a “Bloody Inheritance Lesson”

Source: PLA Daily Author: Liu Xiaoyun Editor: Guo Yanfei 2025-05-24

34 veterans of a company of the 82nd Group Army returned to the barracks to visit and send a message to the officers and men-

“The story of the next silk banner is written by you”

■Liu Xiaoyun, special correspondent of the PLA Daily

The veterans visited the company’s honor room. Photo by Xu Chao

Recently, a company of the 82nd Group Army welcomed a group of special guests-34 veterans who had served in the company’s predecessor. They were invited to participate in the theme event of “Passing on the Torch to Remember the Original Heart, Striving to Strengthen the Army and Continue the Glory” organized by the company, and communicated face to face with officers and men.

In the equipment display area, the veterans could not hide their excitement when they saw a certain type of assault vehicle and new firearms. After obtaining consent, Zhu Daguo, a veteran in his seventies, picked up a machine gun. After understanding the basic structure of the machine gun, he lay on the ground and experienced the key points of aiming and firing.

“The company’s weapons and equipment are becoming more and more advanced, and we are happy from the bottom of our hearts.” Zhu Daguo, who was once the company commander of the company, said to the officers and men, “Now that the conditions are good, everyone should work hard at their posts, hone their skills, and strengthen the company.”

Entering the company’s honor room, the veterans stopped in front of the bronze statue of the special hero Zhao Xianyou of the Volunteer Army. Zhao Xianyou is one of the prototypes of “Wang Cheng” in the movie “Heroic Sons and Daughters”. In a battle for high ground, Zhao Xianyou, then the deputy instructor of the company, led his comrades to fight tenaciously and shouted the slogan “For victory, fire at me”.

“Soldiers must have fighting spirit and dare to risk everything for victory.” “The cultivation of blood and courage is not a matter of one day or one night. It depends on daily efforts and the experience of every mission to improve the blood’ concentration’“... The affectionate words of the veterans inspired every officer and soldier present.

In the old photos displayed in the honor room, the veterans looked for familiar faces. An old soldier pointed to a photo and said to the young soldiers around him: “Look, this is me. This is Guan

Jingchun, a combat hero who won the first-class merit in the War to Resist U.S. Aggression and Aid Korea. This photo is a photo of him and us when he returned to his old company."

One wall of the honor room is almost covered with silk banners. Seeing a collective second-class merit silk banner, the company's old instructor Jia Guoxiao recalled the past with deep affection: "42 years ago, the company went to the Gobi Desert to perform tasks. Everyone fought against the wind and sand and the scorching heat. In the live-fire training, we won a 'full house' and won this silk banner..."

The company has won the collective first-class merit once and the collective second-class merit 17 times in history. Veteran Tian Xianhua pointed to a blank space on the far right of the wall and said to the company instructor Lu Lin: "The position here is still empty. The story of the next silk banner will be written by you."

After the visit, the veterans had further exchanges with the company's officers and men. From battle stories to fighting spirit, from work training to daily life, the atmosphere on the scene was very lively. The officers and men of the company expressed that they would use practical actions to add luster to the company's construction.

Before the veterans bid farewell, the company specially organized a small competition. Under the witness of the veterans, Sergeant Dong Ping and Corporal Huang Tianlong both achieved more than 200 rolls in the horizontal bar roll-up competition.

异地同上“云端”党课，陆军某旅抓好党员骨干队伍教育

来源：解放军报 作者：郑烨 陈典宏 责任编辑：郭妍菲 2025-05-24

陆军某旅教育引导党员骨干加强党性修养严守纪律规矩——

异地同上”云端”党课

■郑 烨 解放军报记者 陈典宏

空中，多型战机呼啸而过；地面，地导雷达建群组网……5 月中旬的一天，陆军某旅驻训分队按计划完成训练。走下训练场，党员骨干随即参加一堂”云端”党课。

“党性是什么？党性是党员干部立身、立业、立言、立德的基石，坚持党性原则是共产党人的根本政治品格……”千里之外，该旅党委书记围绕明晰内涵悟党性、严明纪律看党性、付诸行动强党性 3 个方面，讲授”加强党性修养、严守纪律规矩”主题党课。

“越是练兵任务繁重，越要强化思想引领。”该旅领导告诉记者，当前，部队大项任务压茬推进，官兵一直处在野外动散条件下，为确保政治整训成效，他们坚持将持续深化政治整

训与开展深入贯彻中央八项规定精神学习教育一体推进，并融入野外驻训、联演联训等过程。

为抓好党员骨干队伍这个重点，该旅党委一班人一致认为，必须用好党课教育这个锤炼党性修养的重要途径。为此，他们明确授课要点、责任分工，区分坚定理想信念、加强党性修养、涵养官德人品 3 个专题组织”云端”党课，由旅党委常委逐个登台授课辅导，党员骨干通过视频系统异地同上一堂课，在接受思想洗礼中进一步锻造忠诚品格。

该旅领导介绍，开展加强党性修养专题学习教育以来，各级领导带头上党课，注重突出问题导向，引导党员干部在读原著、学原文、悟原理上下功夫，要求领导和机关干部把自己摆进去、把职责摆进去、把工作摆进去；以常委会、机关党小组会、基层分片编组等形式，深入开展检视剖析，建立问题台账，制订整改措施，坚持用事实说话、用数据印证、用成效检视。

助理工程师高杰权扎根岗位、苦练本领，带领团队奋力攻关，取得多项革新成果；一级军士长岳景洲数十年如一日，用忠诚与汗水铸就”防空利剑”……授课中，该旅党委书记结合身边典型先进事迹，教育引导党员骨干自觉用忠诚标尺衡量党性、用能力标尺丈量担当、用廉洁标尺考量德行。

授课结束，该旅党员骨干展开讨论交流，大家你一言我一语，干事创业的信心愈发坚定。一名干部坦言：”身处新时代，我们要坚持砥砺党性、担当尽责，努力跑好自己这一棒，把好风气转化为干事创业的强劲动力。”

Taking the “Cloud” Party Class in Different Places, a Certain Army Brigade Has Done a Good Job in Educating the Backbone Team of Party Members

Source: PLA Daily Author: Zheng Ye Chen Dianhong Editor: Guo Yanfei 2025-05-24

A certain army brigade educates and guides the backbone Party members to strengthen their Party spirit and strictly abide by discipline and rules-

Taking the “cloud” Party class in different places

■Zheng Ye PLA Daily reporter Chen Dianhong

In the air, various types of fighter planes roared past; on the ground, ground-to-ground radars built a group network... One day in mid-May, a training detachment [fendui] of a certain army brigade completed the training as planned. After leaving the training ground, the backbone Party members immediately attended a “cloud” Party class.

“What is Party spirit? Party spirit is the cornerstone of Party members and cadres to establish themselves, establish their careers, establish their words, and establish their morality. Adhering to

the principle of Party spirit is the fundamental political character of Communists...” 500 kilometers away, the secretary of the brigade’s Party Committee focused on the three aspects of clarifying the connotation of understanding Party spirit, strictly observing Party spirit, and taking action to strengthen Party spirit. He taught the theme Party class of “strengthening Party spirit cultivation and strictly abiding by discipline and rules”.

“The more arduous the training tasks are, the more we need to strengthen ideological guidance.” The brigade leader told reporters that at present, the troops are pushing forward major tasks in succession, and the officers and men have been in the field. To ensure the effectiveness of political training, they insist on deepening political training and carrying out in-depth learning and education on the spirit of the Central Committee’s eight regulations, and integrating them into field training, joint exercises and joint training.

In order to focus on the core team of Party members, the brigade Party Committee unanimously agreed that it is necessary to make good use of Party class education as an important way to temper Party spirit. To this end, they clarified the key points of teaching and the division of responsibilities, and organized “cloud” Party classes on three topics: firm ideals and beliefs, strengthening Party spirit, and cultivating official morality and character. The brigade Party Committee Standing Committee members took the stage one by one to give lectures and guidance. The backbone Party members took the same class in different places through the video system, and further forged their loyal character in the process of ideological baptism.

The leaders of the brigade introduced that since the launch of the special study and education on strengthening Party spirit cultivation, leaders at all levels have taken the lead in giving Party lessons, focusing on highlighting problem orientation, guiding Party members and cadres to work hard in reading original works, learning original texts, and understanding principles, and requiring leaders and cadres to put themselves, their responsibilities, and their work into it; in the form of Standing Committees, Party group meetings of organs, and grassroots divisions, in-depth inspections and analyses were carried out, problem records were established, and rectification measures were formulated, insisting on speaking with facts, verifying with data, and inspecting with results.

Assistant Engineer Gao Jiequan took root in his post, worked hard to improve his skills, led the team to work hard to tackle key problems, and achieved many innovative results; First Sergeant Yue Jingzhou has been forging the “air defense sword” with loyalty and sweat for decades... During the lecture, the brigade Party Committee secretary combined the typical advanced deeds around him to educate and guide the backbone Party members to consciously use the loyalty yardstick to measure Party spirit, the ability yardstick to measure responsibility, and the integrity yardstick to consider morality.

After the lecture, the Party members and cadres of the brigade held a discussion and exchanged ideas. Everyone spoke one after another, and their confidence in doing things and starting businesses became stronger. One cadre said frankly: “In the new era, we must persist in tempering

our Party spirit, fulfill our responsibilities, and work hard to run our own baton well, and transform good atmosphere into a strong driving force for doing things and starting businesses."

频繁换岗 这位班长在每个战位都立起党员的好样子

来源：解放军报 作者：刘小云 田鲁亚 责任编辑：杜圣智 2025-05-26

第 82 集团军某旅党员、一级上士张纪光——

频繁交流换岗 初心本色不改

■刘小云 田鲁亚

"野战给养器材单元展开与撤收""热食前送中遭遇'敌'炮火袭击"……初夏时节，燕山山麓，第 82 集团军某旅一场炊事专业技能比武激战正酣。某连炊事班班长、一级上士张纪光灵活处置特情，带领战友克服重重困难，夺得第一名。

走下赛场，顾不上休息，他立即召集大家展开复盘。

有着 15 年党龄的张纪光，先后在坦克驾驶、射手、修理和炊事员等岗位工作，荣立三等功 1 次。每一个战位，他都坚守党员的初心本色，用自身模范行动立起党员的好样子。

那一年，张纪光从坦克驾驶员转岗为坦克技师。面对性能更先进的新装备，个别战士出于安全顾虑不敢放手操作，建议等厂家技术人员现场指导。张纪光主动向连队党支部请缨并立下军令状：限期啃下"硬骨头"，为连队解决技术难题。

那段时间，张纪光白天钻进坦克底部，逐个零件拆装，逐个测试验证性能参数，经常是一身油污；晚上加班学习理论知识，对通电线路连接、发动机构造原理、排除故障方法等深钻细研。攻关 3 个月，他笔记记了 3 大本，为后来连队开展实装训练提供了有益参考。

"身为党员，任何时候都要敢打硬仗。"这是张纪光经常对战友说的话，也是在遭遇困难时激励自己前行的动力。有一次，他参加集团军组织的坦克发动机故障排除比武。张纪光平时善于从任务中汲取经验，通过苦练提高求突破，这次比武最终打破某课目比武纪录。载誉而归，他没有懈怠停步，而是继续锤炼本领，并在第二年再次刷新自己的纪录。

这几年转岗成为炊事员后，张纪光扎根平凡岗位发光发热，精练炊事技能之余，他想得最多的是培养骨干。战士王超分配到炊事班后，认为"三尺灶台"远离战场，一度不在状态。"战位不分大小，无论是台前还是幕后，干好本职工作都是为打赢作贡献。"几番交流后，王超转变了观念，一有时间就向张纪光请教学习。在张纪光帮带下，王超去年多次出色完成野战条件下保障任务，并在炊事比武中摘金夺银，光荣入党并立功受奖。

Frequently Changing Posts, This Squad Leader Sets a Good Example for Party Members in Every Position

Source: PLA Daily Author: Liu Xiaoyun Tian Luya Editor: Du Shengzhi 2025-05-26

Zhang Jiguang, a Party member of a brigade of the 82nd Group Army and a first-class sergeant——

Frequent exchanges and changes of posts, the original intention remains unchanged

■Liu Xiaoyun Tian Luya

“Deployment and withdrawal of field supply equipment units” “Hot food was delivered before encountering ‘enemy’ artillery attacks”... In early summer, at the foot of Yanshan Mountain, a cooking professional skills competition of a brigade of the 82nd Group Army was in full swing. Zhang Jiguang, the squad leader of a company’s cooking squad and a first-class sergeant, flexibly handled the special situation, led his comrades to overcome many difficulties and won the first place.

After leaving the arena, he did not take time to rest, and he immediately called everyone to review.

Zhang Jiguang, who has 15 years of Party membership, has worked in positions such as tank driving, shooter, repairman and cook, and has won the third-class merit once. In every battle position, he adhered to the original aspirations of a Party member and set a good example for Party members with his own exemplary actions.

That year, Zhang Jiguang changed his position from a tank driver to a tank technician. Faced with new equipment with more advanced performance, some soldiers did not dare to let go of the operation due to safety concerns, and suggested waiting for on-site guidance from the manufacturer’s technical personnel. Zhang Jiguang took the initiative to ask the company’s Party branch and signed a military order: to bite the “hard bones” within a time limit and solve technical problems for the company.

During that time, Zhang Jiguang got into the bottom of the tank during the day, disassembled and assembled parts one by one, and tested and verified performance parameters one by one, often covered in oil; at night, he worked overtime to study theoretical knowledge, and studied the connection of power lines, engine structure principles, and troubleshooting methods in depth. After three months of research, he took notes in three large notebooks, which provided useful references for the company’s actual equipment training later.

“As a Party member, you must dare to fight hard battles at any time.” This is what Zhang Jiguang often said to his comrades, and it is also the driving force that motivates him to move forward when encountering difficulties. Once, he participated in a tank engine troubleshooting competition organized by the group army. Zhang Jiguang is usually good at learning from tasks and seeking

breakthroughs through hard training. This time, he finally broke the record of a certain subject. After returning with honors, he did not slack off, but continued to hone his skills and broke his own record again in the second year.

After being transferred to become a cook in the past few years, Zhang Jiguang has been rooted in an ordinary position and shines. In addition to refining his cooking skills, what he thinks most is to cultivate backbones. After being assigned to the cooking squad, soldier Wang Chao thought that the “three-foot stove” was far away from the battlefield and was not in good shape for a while. “The battle position is not big or small, whether it is in front of the stage or behind the scenes, doing your job well is a contribution to winning.” After several exchanges, Wang Chao changed his concept and asked Zhang Jiguang for advice and learning whenever he had time. With the help of Zhang Jiguang, Wang Chao successfully completed the support tasks under field conditions many times last year, and won gold and silver in the cooking competition. He gloriously joined the Party and was awarded for his meritorious service.

这次考核夺魁不仅战胜了战友 我更跨过了心中的障碍

来源：解放军报 作者：李杨 责任编辑：杜圣智 2025-05-26

跨过心中的那道障碍

■第八十二集团军某旅某连一级上士 李杨

“我宣布，本次 400 米障碍考核，李杨夺得第一名！”

站在队列前，我思绪万千，从意外受伤，到失意迷茫，再到重夺冠军，这条路我走了整整一年。

一年前，在一次考核中，我的膝盖不慎摔伤，进行了手术。

很长一段时间里，我只能远远地看着战友在训练场飞奔。作为连队的 400 米障碍课目冠军，我无比渴望和他们一起踏上训练场，享受那种挑战极限的畅快淋漓之感。尤其是龙虎榜上，自己创造的课目纪录不断被刷新，更加深了我的焦虑。尽管战友们一再安慰，但想到自己康复遥遥无期，我心中的劲头不免更弱了几分。

一次 400 米障碍训练间隙，连长当着大家的面对我说：”李杨，你是这个课目的佼佼者，比较有发言权，来给大家讲讲过障技巧。”

我知道，连长是看到我不能和大家一起训练，特地叫我参与到教学中。但当时的我觉得自己根本配不上”佼佼者”这个称谓，失落感涌上心头，便站在原地一言不发。

当天晚上，连长找到我说：”李杨，我有办法让你重夺冠军，你信不？”

“不信，我现在连走路都困难，更何况战友们都在进步，我怎么可能赶上大家？”我不假思索地摇了摇头。

随后，连长拿出 400 米障碍分段成绩表说：”虽然此前你的总成绩很好，但我发现，你在高板跳台、云梯等环节的表现只是中等水平，这说明你的上肢力量有些不足。如果你能利用这段时间加强上肢训练，一定能超越之前的自己。”

连长的话，让我沉寂许久的内心泛起了涟漪。也许是感受到我的情绪变化，连长趁热打铁：”战场需要的不仅是钢铁躯体，还有不屈不挠的战斗意志。养伤的这段时间，你要补齐短板，磨炼心性，这样才能走得更远。”

连长说得在理。我暗下决心，严格落实他为我量身定制的训练计划，开启了新的”康复之旅”：利用健身器材，进行上肢力量训练，逐步展开低强度有氧训练；定期到医院复查，接受针灸、理疗……

一段时间后，我的身体状态逐渐恢复，并在单杠引体向上、仰卧卷腹等课目上取得新突破，这给我带来了很大的信心。我感觉，重夺冠军的目标似乎不再遥不可及。

一个周末，我路过 400 米障碍训练场忍不住技痒，却被连长看到。我红着脸，心虚地找了个借口：”刚打扫完卫生，随便练练……”

他一把撩起我的裤腿，盯着红肿的膝关节皱起了眉头：”你这是在加重伤情。我知道你非常渴望赶上大家，但必须循序渐进科学训练，这样才能保证你更快更好地恢复。”

感受着连长话语中的关切，我老老实实回到了宿舍。之后的日子里，我脚踏实地依照计划训练，终于度过了那段难熬时光。

战友们热烈的掌声将我的思绪拉回现实，我知道这次考核夺魁意味着：我不仅再次战胜了战友，也成功跨过了心中的那道障碍。

Winning the Assessment Not Only Defeated My Comrades, But also Overcame the Obstacles in My Heart

Source: PLA Daily Author: Li Yang Editor: Du Shengzhi 2025-05-26

Overcoming the obstacle in my heart

■ Li Yang, a first-class sergeant from a company of a brigade of the 82nd Army Group

“I declare that Li Yang won the first place in this 400-meter obstacle assessment!”

Standing in front of the queue, I was thinking about a lot of things. From accidental injuries to frustration and confusion, to regaining the championship, I have been on this road for a whole year.

A year ago, during an assessment, I accidentally broke my knee and underwent surgery.

For a long time, I could only watch my comrades running on the training ground from a distance. As the champion of the company's 400-meter obstacle course, I was extremely eager to step onto the training ground with them and enjoy the feeling of challenging the limit. Especially on the Dragon and Tiger List, the course records I created were constantly refreshed, which deepened my anxiety. Although my comrades repeatedly comforted me, I couldn't help but feel a little weaker when I thought that my recovery was far away.

During a break in the 400-meter obstacle course, the company commander said to me in front of everyone: "Li Yang, you are the best in this subject, and you have more say. Come and tell everyone about the obstacle skills."

I know that the company commander saw that I could not train with everyone, so he asked me to participate in the teaching. But at that time, I felt that I was not worthy of the title of "the best", and a sense of loss came over me, so I stood there without saying a word.

That night, the company commander found me and said: "Li Yang, I have a way to help you win the championship again, do you believe it?"

"No, I have difficulty walking now, not to mention that my comrades are making progress, how can I catch up with everyone?" I shook my head without thinking.

Then, the company commander took out the 400-meter obstacle course segment score sheet and said: "Although your total score was very good before, I found that your performance in the high board diving platform, ladder and other links was only at a medium level, which shows that your upper limb strength is somewhat insufficient. If you can use this time to strengthen your upper limb training, you will definitely be able to surpass your previous self."

The company commander's words made ripples in my heart, which had been silent for a long time. Perhaps sensing my emotional changes, the company commander struck while the iron was hot: "The battlefield requires not only a steel body, but also an indomitable fighting will. During this period of recuperation, you must make up for your shortcomings and temper your character, so that you can go further."

The company commander was right. I secretly made up my mind to strictly implement the training plan he tailored for me and started a new "rehabilitation journey": using fitness equipment to conduct upper limb strength training, and gradually carry out low-intensity aerobic training; regularly go to the hospital for follow-up, receive acupuncture and physical therapy...

After a period of time, my physical condition gradually recovered, and I made new breakthroughs in subjects such as pull-ups on the horizontal bar and supine crunches, which gave me great confidence. I felt that the goal of regaining the championship seemed no longer out of reach.

One weekend, I passed by the 400-meter obstacle course and couldn't help itching to show off my skills, but was seen by the company commander. I blushed and made an excuse with a guilty conscience: "I just finished cleaning, so I just did some practice..."

He lifted up my trouser legs and frowned at my swollen knee joints: "You are aggravating your injury. I know you are very eager to catch up with everyone, but you must train step by step and scientifically, so that you can recover faster and better."

Feeling the concern in the company commander's words, I returned to the dormitory honestly. In the days that followed, I trained down-to-earth according to the plan and finally got through that difficult time.

The warm applause of my comrades brought my thoughts back to reality. I knew that winning the assessment meant: I not only defeated my comrades again, but also successfully crossed the obstacle in my heart.

连里宣传展板"每日寄语"栏目出现了新变化……

来源：解放军报 作者：郑烨 李连杰 责任编辑：杜圣智 2025-05-26

第 74 集团军某旅某连宣传展板"每日寄语"栏目出现新变化——

"兵言兵语"有温度提士气

■郑烨 李连杰

"战友们，今天训练冲一冲，明天球赛等你秀！"5 月的一个中午，第 74 集团军某旅某连营房前的宣传展板上，"每日寄语"栏目更新了内容，吸引不少官兵驻足观看。

"'每日寄语'是我们在宣传展板上开设的一个特色栏目。"该连指导员袁凯介绍，刚开始时，为浓厚连队文化氛围，他和文化骨干梁日开每天在这个栏目更新励志短句："不负时光，不负自己""只有众志成城，才能无惧风浪"……

一天中午，梁日开找到袁凯，有些沮丧地说："指导员，咱们花了这么多心思在'每日寄语'上，天天更新、一日不落。但这样的'心灵鸡汤'，大家有点'喝'不下了……"

其实，袁凯也有同感：短句中蕴含的道理固然没错，但似乎少了些”地气”，很难在战友中间产生共鸣。

当晚点名时，袁凯宣布调整”每日寄语”的征集方式和语言风格，把主导权交给大家，只要有话想说，每个人都可以随时写上去。

次日，一班中士张更红率先在展板上下了”战书”：”今天下午 5 公里武装越野考核的冠军，一班拿定了！”

一时间，全连官兵创先争优的热情被迅速点燃。二班班长洪宝在下面回应：”别骄傲，上周一班暂时领先，这次谁夺魁还不一定。”袁凯注意到，虽然这些文字看起来不像”寄语”，却引发了互动，碰撞出了火花。更令他欣喜的是，当天下午连队的 5 公里武装越野考核成绩居然较以往有了提升。

思路一变天地宽。袁凯愈发感觉到，这样的”每日寄语”有温度、提士气、添活力，有时甚至比一次通知、一次教育来得更加直接、高效。

栏目方寸大小，大家参与的热情越来越高，设定训练目标、粘贴温馨提示、分享生活窍门、提出意见建议……

一天中午，担任厨房值班员的一级上士蒋习浩写道：”今晚加餐，敬请期待。”一句话吊足了战士们的胃口，大家的训练劲头更足了；到了月末，基层风气监督员郑胜利提醒：”马上发津贴，战友们要合理消费，管住’钱袋子’。”几个正盘算着网购的列兵看到后，挠了挠头，取消了购物计划；天气变热，卫生员冯培源带来温馨提示：”夏季升温别大意，温差变化需警惕。”战友们长跑结束后，立即穿上外套保暖……

“只有多讲战士爱听、听得懂的话，才能拨动战士心弦。”袁凯说，”每日寄语”已非当初模样，更像是一种工作交流。不过，他并不想改名。受此启发，袁凯在开展教育、总结讲评、日常谈心时，注重用”接地气”的兵言兵语讲述兵情兵事，把”大道理”讲成言之有物、入情入理的”实在话”，思想政治教育工作质效明显提升。

There Are New Changes in the “Daily Message” Column of the Company’s Propaganda Display Board

Source: PLA Daily Author: Zheng Ye Li Lianjie Editor: Du Shengzhi 2025-05-26

There are new changes in the “Daily Message” column of a company of a brigade of the 74th Group Army——

“Soldiers’ words and men’ words” are warm and boost morale

■ Zheng Ye Li Lianjie

“Comrades, let’s go for training today, and you will be waiting for the game tomorrow!” One afternoon in May, the “Daily Message” column on the propaganda display board in front of the barracks of a company of a brigade of the 74th Group Army was updated, attracting many officers and men to stop and watch.

“‘Daily Message’ is a special column we opened on the propaganda display board.” Yuan Kai, the company Political Instructor, introduced that at the beginning, in order to enrich the company’s cultural atmosphere, he and Liang Rikai, the cultural backbone, updated inspirational short sentences in this column every day: “Don’t let down the time, don’t let down yourself” “Only with unity can we be fearless of wind and waves”...

One noon, Liang Rikai found Yuan Kai and said a little frustrated: “Instructor, we have spent so much time on the ‘Daily Message’, updating it every day. But such ‘chicken soup for the soul’ is a bit too much for everyone to ‘drink’...”

In fact, Yuan Kai also felt the same way: the truth contained in the short sentence is correct, but it seems to lack some “ground”, and it is difficult to resonate among comrades.

When calling the roll that night, Yuan Kai announced the adjustment of the collection method and language style of the “Daily Message”, giving the initiative to everyone. As long as there is something to say, everyone can write it at any time.

The next day, Sergeant Zhang Genghong of the first squad took the lead in posting a “challenge” on the display board: “The champion of the 5-kilometer armed cross-country test this afternoon, the first squad has won!”

For a time, the enthusiasm of the officers and men of the whole company to be the first and strive for excellence was quickly ignited. The squad leader of the second squad, Hong Bao, responded below: “Don’t be proud. The first squad was temporarily in the lead last week, and it is not certain who will win this time.” Yuan Kai noticed that although these words did not look like “messages”, they triggered interactions and sparks. What made him even more happy was that the company’s 5-kilometer armed cross-country test results that afternoon actually improved compared with the past.

The world is wide when the thinking changes. Yuan Kai increasingly felt that such “daily messages” were warm, morale-boosting, and energetic, and sometimes even more direct and efficient than a notification or education.

The column is small, but everyone’s enthusiasm for participation is getting higher and higher. They set training goals, post warm reminders, share life tips, and put forward opinions and suggestions...

One noon, the first sergeant Jiang Xihao, who was on duty in the kitchen, wrote: “There will be extra meals tonight, please look forward to it.” This sentence whetted the appetite of the soldiers,

and everyone's training enthusiasm was stronger; at the end of the month, the grassroots atmosphere supervisor Zheng Shengli reminded: "The allowance will be issued immediately, and comrades should spend reasonably and control their "purses." After seeing this, several privates who were planning to shop online scratched their heads and canceled their shopping plans; the weather became hotter, and the medical worker Feng Peiyuan brought warm reminders: "Don't be careless about the temperature rise in summer, and be vigilant about the temperature difference." After the long run, the comrades immediately put on their coats to keep warm...

"Only by saying more words that the soldiers like to hear and understand can you move the soldiers' hearts." Yuan Kai said that the "Daily Message" is no longer what it used to be, and it is more like a work exchange. However, he does not want to change the name. Inspired by this, Yuan Kai paid attention to using "down-to-earth" soldier language to describe soldiers' situations and affairs when conducting education, summarizing and commenting, and having daily conversations. He turned "big truths" into "real words" that were meaningful and reasonable, and the quality and effectiveness of ideological and political education work was significantly improved.

严格按照新版大纲施训 让干部战士同台竞技

来源：解放军报 作者：闫帅印 康子湛 朱柏妍 责任编辑：杜圣智 2025-05-26

开栏的话

战场上的较量，是从训练场开始的。2025 年 2 月，我军新版《军事体育训练大纲》正式施行。新大纲聚焦备战打仗需求，旨在推动全军军事体育训练转型升级，实现由以基础体能为主向以战斗体能为主转变。近几个月，全军各部队按照新大纲要求，强化基础体能、战斗体能和实用技能等训练，座座军营不断掀起训练热潮。

从今日起，《解放军报》要闻版推出"深入推进实战化军事训练·《军事体育训练大纲》施训新看点"专栏，反映各部队按新大纲施训的新气象、新成果，同时邀请训练一线官兵畅谈贯彻落实新大纲过程中的感悟，期望能够发微探幽，启迪思考。

第 83 集团军某旅严格按照新版《军事体育训练大纲》施训——

400 米障碍，机关干部营连战士同台竞技

■闫帅印 解放军报记者 康子湛 朱柏妍

该旅通用 400 米障碍考核现场。季鹏摄

施训看点

●400 米障碍成为通用战斗体能必考课目

●机关基层、军官士兵共用一个考核标准

攀上壕沟、通过跨桩、冲刺最后 100 米……通用 400 米障碍训练场上，冲过终点线，听到考官报时后，第 83 集团军某旅机关的黄参谋因喜悦而放声欢呼。

“两个多月的努力没有白费！”黄参谋兴奋地说，在本季度通用 400 米障碍课目考核中，他的成绩达到良好水平。

在黄参谋身后，又一组旅机关的干部站上了起跑线。他们身穿作训服、脚蹬作战靴、腰扎武装带，同基层营连官兵在同一个训练场上，尽展矫健身姿。

通用 400 米障碍训练场不再是营连官兵”专场”，变化源自今年 2 月新版《军事体育训练大纲》的施行。

“通用 400 米障碍变成了我们的必考课目，且不按照人员类别和年龄区分考核标准，39 岁以下的男性机关干部和营连官兵都要参考……”两个多月前，该旅组织宣讲会，讲解新版《军事体育训练大纲》时，引发机关干部们议论。

“通用 400 米障碍不同于其他训练课目，对个人综合体能素质要求较高。”黄参谋告诉记者，”宁跑 5000 米、不跑 400 障”的顺口溜在部队流传已久，以往通用 400 米障碍是选考课目，障碍训练场上鲜见机关干部的身影。

从选考到必考，一些机关干部产生了畏难情绪。为此，该旅机关统一部署，建立考勤登记制度，强制落实机关干部工作日每天体能训练 1 小时制度。他们还从营连请来专项教员，为训练基础薄弱的机关干部开展专项补差训练。

两个多月时间里，训练器材成了黄参谋宿舍和办公室里的必备用品。临睡前、值班休息间隙，他都要练上几组。为了提升训练成绩，黄参谋还专程跑到基层连队，向军体教员请教技巧方法，为自己制订针对性训练方案。

在训练场上和战友们并肩飞奔，黄参谋仿佛找回在基层连队当兵的感觉。

考核场上，39 岁的机关干部庞健伟在参考人员中年龄最大。他上一次参加 400 米障碍考核，还是 10 多年前在基层连队担任主官的时候。

考核前的两个多月，庞健伟一有时间就往训练场跑，练得格外认真。有战友问：”按规定，你明年就不用参加通用 400 米障碍课目考核了，有必要这么逼自己吗？”

“当然有必要！训练场上不过关，就不是合格的战斗员。”由于前几年落下的功课太多，庞健伟一开始明显跟不上训练节奏。然而，强化训练开始以来，庞健伟咬紧牙关，自我加压加大训练强度。他还与基层连队的几名班长结成训练对子，在训练场上比学赶帮超。最终，在此次季度考核中，庞健伟成绩提升显著，顺利过关。

400 米障碍训练场上机关干部龙腾虎跃，激发了全旅官兵的训练热情。谈起训练场上的可喜变化，该旅领导颇有感触：此次季度考核中，机关干部优良率大幅提升。机关干部和营连战士平时练在一起，按照一个标准考核，官兵相互比拼、同台竞技，训练场上迸发出虎虎生气。

参训笔记

永葆战斗员本色

■第 83 集团军某旅机关干部 庞健伟

扎上武装带，蹬上作战靴，站在通用 400 米障碍训练场的起跑线前，我仿佛回到当连队主官的那段岁月。

想当年，为了能在连队立起威信，我时常和老班长们在 400 米障碍训练场上比着练。然而，随着工作岗位调整和大纲要求变化，到机关工作后这个课目我几乎没再练过，曾经的优势课目与我渐行渐远。

新版《军事体育训练大纲》中，把 400 米障碍调整为通用战斗体能必考课目。得知 39 岁及以下军官和士兵考核标准统一时，机关像我一样年龄较大的干部们，纷纷为自己捏了把汗。

“上了战场，没有机关基层之分，更不问年龄大小。”重新投入训练后，每当力不从心、想要放弃的时候，我都这样告诉自己。

为了能更科学地提升训练成绩，我为自己制订计划，逐步增强训练强度，还同基层官兵一起训、比着训。功夫不负有心人，一段时间的强化训练下来，我的成绩从勉强及格，提高到接近优秀。

新版《军事体育训练大纲》对训练课目的调整，不仅让机关干部们认识到了体能差距，更引发了大家的思想转变——无论身在机关还是基层，都要永葆战斗员本色，不断提升体能素质，为随时走上战场做好准备。

观训小议

体能是胜战”入场券”

■康子湛

军队是一个战斗集体，军人无论在什么岗位、从事什么工作，第一身份都是战斗员。机关是决策执行的中枢，机关参谋、干事、助理员们要想高效履职尽责，同样离不开强健的体魄、充沛的体能。

过去，一些机关干部认为自己”坐着能写、站着能说”就行，体能素质好不好无关紧要，有的以”工作在身”为由，不重视体能训练。新版《军事体育训练大纲》立起实战化考核风向标，创新战斗体能，提高训练课目含战量，旨在促进军队人员体能素质均衡发展，提高官兵技战术水平和战场环境适应能力。重新走上 400 米障碍训练场，对于久坐办公室的机关干部们来说，不仅增强了身体素质，更帮助他们对标大纲认清自身不足，逼着自己走出舒适区、走上训练场，进一步擦亮战斗员本色。

体能是胜战”入场券”。官兵过硬的体能素质，既是战斗力的根基，也是应对未来战争复杂挑战的基础。战场是血与火的较量，子弹不会区别对待机关干部与基层官兵。平时训练中，只有一级抓一级、一级带一级，练好基础体能、练强战斗体能、练精实用技能，才能不断提高部队完成多样化任务的能力，为能打仗、打胜仗提供有力支撑。

Strictly Follow the New Outline to Train and Let Cadres and men Compete on the Same Stage

Source: PLA Daily Author: Yan Shuaiyin Kang Zizhan Zhu Baiyan Editor: Du Shengzhi 2025-05-26

Opening words

The competition on the battlefield starts from the training ground. In February 2025, the new version of the “Military Physical Training Outline” of our army was officially implemented. The new outline focuses on the needs of preparing for war, aiming to promote the transformation and upgrading of military physical training throughout the army, and realize the transformation from focusing on basic physical fitness to focusing on combat physical fitness. In recent months, all units of the army have strengthened basic physical fitness, combat physical fitness and practical skills training in accordance with the requirements of the new outline, and military camps have continuously set off a training boom.

Starting today, the “PLA Daily” news edition will launch a column “Deepen the promotion of practical military training· New highlights of the “Military Physical Training Outline” training”, reflecting the new atmosphere and new achievements of various units in training according to the new outline, and at the same time invite front-line officers and men to talk about their feelings in the process of implementing the new outline, hoping to explore the mysteries and inspire thinking.

A brigade of the 83rd Group Army strictly conducts training in accordance with the new version of the “Military Physical Training Outline”-

400-meter obstacle course, cadres, battalion and company soldiers compete on the same stage

■ Yan Shuaiyin, PLA Daily reporter Kang Zizhan, Zhu Baiyan

The brigade’s general 400-meter obstacle course assessment site. Photo by Ji Peng

Training highlights

●400-meter obstacle course has become a must-test subject for general combat physical fitness

●The grassroots, officers and men of the agency share the same assessment standard

Climbing up the trench, passing the cross-pillar, sprinting the last 100 meters... On the general 400-meter obstacle course, after crossing the finish line and hearing the examiner’s time, Huang, a staff officer of a brigade of the 83rd Group Army, cheered out loud with joy.

“More than two months of hard work has not been in vain!” Staff Officer Huang said excitedly. In this quarter’s general 400-meter obstacle course assessment, his performance reached a good level.

Behind Staff Officer Huang, another group of cadres from the brigade agency stood at the starting line. They wore training uniforms, combat boots, and armed belts, and showed their agility on the same training ground as the officers and men of the grassroots battalion and company.

The general 400-meter obstacle training ground is no longer a “special field” for the officers and men of the battalion and company. The change stems from the implementation of the new version of the “Military Physical Training Outline” in February this year.

“The general 400-meter obstacle has become our compulsory test subject, and the assessment standards are not differentiated according to personnel categories and ages. Male cadres and officers and men of the battalion and company under the age of 39 must refer to it...” More than two months ago, the brigade organized a lecture to explain the new version of the “Military Physical Training Outline”, which aroused discussion among the cadres of the organs.

“The general 400-meter obstacle is different from other training subjects. It has high requirements for personal comprehensive physical fitness.” Staff Officer Huang told reporters that the jingle “I would rather run 5,000 meters than 400 obstacles” has been circulating in the army for a long time.

In the past, the general 400-meter obstacle was an optional subject, and the cadres of the organs were rarely seen on the obstacle training ground.

From optional to mandatory, some cadres of the organs have developed a fear of difficulty. To this end, the brigade headquarters made unified deployment, established an attendance registration system, and enforced the one-hour physical training system for the cadres on working days. They also invited special instructors from the battalion company to carry out special remedial training for cadres with weak training foundation.

For more than two months, training equipment became a must-have item in Huang's dormitory and office. He would practice several sets before going to bed and during breaks on duty. In order to improve his training results, Huang also went to the grassroots company to ask the military physical education instructor for skills and methods, and developed a targeted training plan for himself.

Running side by side with his comrades on the training ground, Huang seemed to have found the feeling of being a soldier in the grassroots company.

At the assessment site, Pang Jianwei, a 39-year-old cadre of the headquarters, was the oldest among the participants. The last time he participated in the 400-meter obstacle test was more than 10 years ago when he was the chief officer of the grassroots company.

More than two months before the assessment, Pang Jianwei ran to the training ground whenever he had time and practiced very seriously. A comrade asked: "According to the regulations, you don't have to take the general 400-meter obstacle course assessment next year. Is it necessary to push yourself so hard?"

"Of course it is necessary! If you don't pass the training ground, you are not a qualified fighter." Because of the too much homework he missed in the past few years, Pang Jianwei obviously couldn't keep up with the training rhythm at the beginning. However, since the start of intensive training, Pang Jianwei has gritted his teeth and put pressure on himself to increase the intensity of training. He also formed a training pair with several squad leaders of the grassroots company to learn from each other and help each other on the training ground. In the end, in this quarterly assessment, Pang Jianwei's performance improved significantly and he passed the test smoothly.

The cadres of the organs were soaring on the 400-meter obstacle training ground, which stimulated the training enthusiasm of officers and men of the whole brigade. Talking about the gratifying changes on the training ground, the leaders of the brigade were quite touched: in this quarterly assessment, the excellent rate of cadres of the organs increased significantly. The cadres of the organs and the soldiers of the battalion and company usually practice together, and are assessed according to the same standard. The officers and men compete with each other and compete on the same stage, and the training ground is full of vigor.

Training notes

Always keep the true qualities of a fighter

■ Pang Jianwei, a cadre of a brigade of the 83rd Group Army

Wearing a belt, combat boots, and standing at the starting line of the general 400-meter obstacle course, I seemed to have returned to the days when I was the company commander.

Back then, in order to establish prestige in the company, I often competed with the old squad leaders in the 400-meter obstacle course. However, with the adjustment of job positions and changes in the requirements of the syllabus, I almost never practiced this subject after working in the agency, and the once advantageous subject gradually drifted away from me.

In the new version of the "Military Physical Training Outline", the 400-meter obstacle course was adjusted to a general combat physical fitness test. When I learned that the assessment standards for officers and men aged 39 and below were unified, the older cadres like me in the agency were all worried for themselves.

"On the battlefield, there is no distinction between agencies and grassroots, and no matter how old you are." After re-entering training, whenever I was overwhelmed and wanted to give up, I told myself this.

In order to improve the training results more scientifically, I made a plan for myself, gradually increased the intensity of training, and trained and competed with grassroots officers and men. Hard work pays off. After a period of intensive training, my results have improved from barely passing to close to excellent.

The adjustment of the training courses in the new version of the "Military Physical Training Outline" not only made the cadres of the organs realize the physical fitness gap, but also triggered a change in everyone's thinking-whether they are in the organs or at the grassroots, they must always maintain the true nature of fighters, constantly improve their physical fitness, and be ready to go to the battlefield at any time.

A brief discussion on the training

Physical fitness is the "ticket" to victory

■ Kang Zizhan

The army is a fighting collective. No matter what position a soldier is in or what job he is doing, his first identity is a fighter. The organs are the center of decision-making and execution. If the staff, officers, and assistants of the organs want to perform their duties efficiently, they also need a strong physique and sufficient physical fitness.

In the past, some cadres thought that they only needed to be able to "write while sitting and speak while standing", and physical fitness was irrelevant. Some did not pay attention to physical training on the grounds that they were "working". The new version of the "Military Physical Training

Outline" sets a benchmark for actual combat assessment, innovates combat physical fitness, and increases the combat content of training courses, aiming to promote the balanced development of the physical fitness of military personnel and improve the technical and tactical level of officers and men and their ability to adapt to the battlefield environment. For cadres who have been sitting in the office for a long time, returning to the 400-meter obstacle course not only enhances their physical fitness, but also helps them recognize their own shortcomings in accordance with the outline, forcing themselves to step out of their comfort zone and onto the training ground, and further polish their combat qualities. Physical fitness is the "ticket" to victory. The excellent physical fitness of officers and men is not only the foundation of combat effectiveness, but also the basis for coping with the complex challenges of future wars. The battlefield is a contest of blood and fire, and bullets will not distinguish between cadres and grassroots officers and men. During routine training, only by focusing on one level at a time and leading one level at a time, practicing basic physical fitness, strengthening combat fitness, and refining practical skills, can we continuously improve the troops' ability to complete diversified tasks and provide strong support for fighting and winning battles.

军营观察丨爆破兵：在轰鸣中完成蜕变

来源：中国军网-解放军报 作者：刘凡 责任编辑：郭妍菲 发布：2025-05-26

走近战场"破壁者"

■解放军报特约通讯员 刘 凡

到中部战区陆军某旅某爆破连采访时，恰逢该连组织实爆训练。训练前，笔者跟随三级军士长穆恒贵对场地中的铁丝网进行巡检、加固。

在巡检过程中，穆恒贵时不时从工具袋里掏出一些草籽撒在抵近铁丝网的路上。这些草籽有些像苍耳，周身带刺，但略大一些。

"这些撒草籽的地方，都是需要匍匐前进的地方。"穆恒贵解释道。

笔者趴下身子，在撒有草籽的区域匍匐，隔着作训服接触到草籽的感觉就像走路时鞋里进了沙子，有些刺痛，不至于受伤，却能对执行前线破障任务的爆破兵造成一定的干扰。

"干扰越多，越能检验本领扎不扎实。"穆恒贵随即讲起自己的一段经历。

多年前的一次战术训练，穆恒贵所在的爆破小组执行爆破任务。在草丛中匍匐时，穆恒贵为了躲避这种草籽，双肘撑地往一侧挪了挪，不经意间将捧在手中的炸弹往怀里搂了一下。这一幕，恰好被跟在他身后的班长看了个真切。

“有敌情时，拉火管是提前装好的，你为了躲草籽把炸弹往怀里搂，身上这么多装具，挂到拉火管的引线怎么办？！”训练结束，班长严厉批评了穆恒贵。

该连的专业训练场，大都是平坦的黄土地，并不能对匍匐造成太多阻碍，有的地方，软塌塌的浮土甚至像一层软垫。虽然砂石不多，但这种长有带刺草籽的植物却有不少，官兵们便将草籽收集起来，训练时撒在匍匐的必经之路上，为自己制造些”阻碍”。

之所以如此加压，是因为爆破兵面对的任务非同寻常，他们总想着如何”刁难”自己，如何让对手捉摸不透。

二级上士郭江伟，为探索新领域遂行任务方法，主动请缨从零开始学习潜水；排长高迎仍，将对抗思路融入专业训练，常态化组织对抗，改进战术战法……

采访中，笔者发现，穆恒贵很喜欢用一个词——”披着”。

“披着夜色。”

“披着震天的声响。”

……

“这应该是独属于爆破兵的一个习惯，有的老兵说话时，常常冒出’披着’这个词。”穆恒贵解释道，”要说缘由，是因为在战场上，身处接敌一线的爆破兵往往要冲向敌人防守最坚固的位置，双方火力都非常猛，子弹像毯子一样，覆盖在头顶，就像’披’在身上一样。”

训练结束，笔者再次走上爆破兵的训练场，入目处，巨石破碎、硝烟弥漫、碉堡崩塌、炸坑遍地。那一刻，勇气忽然变得具象，笔者明白了什么是爆破兵——一群击穿敌人铜墙铁壁的”破壁者”，用轰鸣与震荡为战友开路的先锋，用炸药与方程式为胜利批注的勇士。

正如该连营房墙壁上，那红底金字的《爆破手之歌》中唱的那样：”我们是英雄的爆破手，战斗在最前线。冒着那枪林弹雨，把进攻的通路开辟，为战友胜利的前进，我愿把青春贡献……”

爆破兵：在轰鸣中完成蜕变

■解放军报特约通讯员 刘 凡

哪有天生的勇敢，只有锻炼出的无畏

前方，雷场、碉堡虎视眈眈；身后，战友、战车严阵以待。

身处接敌一线的爆破兵最需要什么，中部战区陆军某旅某爆破连下士林鹏年回答了一个词：勇敢。

在这里，下连 1 年左右，每一名爆破兵都会经历自己第一次模拟实战。那一年，林鹏年也走上演训场，第一次在”炮火”中向”敌”碉堡发起冲锋——

“能不能顺利到达任务点？能不能配合好战友？”跃进前，在土坎后隐蔽的林鹏年有些紧张，默念着携炸药战术运动的要领和行动预案中的炸药布设原则。

“大家跟我沿着地上的炸坑，蛇形前进，快速跃进！”在三级军士长穆恒贵的指令声中，林鹏年所在的小组冲出土坎、向”敌”碉堡奔去。

演训场顿时炸声四起，尘土飞扬。

“嘭！”出发不过 10 秒，一个炸点在距林鹏年 5 米左右的位置炸响，强烈的震感瞬间清空了他的大脑。

“不能停，绝对不能停！”压住心中的错愕与慌乱，林鹏年继续跃进，观察战友的位置，把控好和战友间的距离，最终与战友同步完成起爆，顺利完成任务。

战场爆破，并非只是布设炸弹这么简单，潜水、攀岩……他们恨不得能够上天入地，十八般武艺样样精通。因为战场环境复杂，对爆破兵而言，多一项本领，就可能多一条破敌之路。

1935 年，红 4 团受命夺取腊子口，面对天险和国民党军队的严密防守，苗族小战士”云贵川”带上战友们用绑腿布带连结起来的长绳，用一根带铁钩的竹竿，勾住峭壁的缝隙，一步步攀上绝壁。随后，他又让战友们顺着长绳一个个攀了上去。入夜后，我军如神兵天降，自上而下向没有顶盖的敌军碉堡扔下手榴弹……

对如今的爆破兵来说，攀岩是必训课目。然而，对于面对 400 米障碍中 2 米深坑都有些发怵的战士孙宇涵来说，这是一座大山。

两年前，孙宇涵应征入伍，成为二级上士郑海清班里的一名新兵。他工作认真，训练也十分刻苦，郑海清对他的表现很是满意。唯有一点让郑海清着实头疼——孙宇涵恐高。

训练时，面对攀岩训练的墙壁，孙宇涵说什么也不上去。看着班长着急又无奈的表情，孙宇涵更加紧张了。

一个周末，郑海清在心理行为训练场看见孙宇涵站在一个高台前，慢慢扶着梯子爬上去，紧握扶手站一会儿，又慢慢顺梯爬下来，一直反复。那一刻，郑海清下定决心：”一定要帮他克服恐惧。”

自那之后，郑海清丢掉了催促与急躁，开始陪着孙宇涵上高台、下深坑……借助辅助设施帮助他克服恐惧心理，直至他能独立站在岩壁面前。

现如今，孙宇涵已经能在攀岩墙上自如上下。

哪有天生的勇敢，只有锻炼出的无畏。成长路上，爆破兵在一声声轰鸣中完成蜕变，成为一名战胜恐惧的勇士。

往勇气中注入”智慧的火药”，会催生更强大的爆破当量

“真正的勇者须以智谋傍身。”穆恒贵悟出这个道理，要从一次破障行动说起。

2022 年，该连参加上级组织的演训，穆恒贵带领一个破障小组执行破障任务。

破障小组顺利突破”敌军”布设的反坦克壕和地雷场后，在由碉堡和壕沟构成的最后一道障碍前，遭遇了密集的炮火打击，他们不得不停下前进的步伐。

“班长，炮火太密集，我跑得快，让我上吧”“班长，我去吧，我有经验”……面对战士们争先恐后的请战，穆恒贵却很冷静：”不怕牺牲是勇敢，但无谓的牺牲没有什么意义！”

根据爆炸频次，穆恒贵现场推算出”敌”炮火打击规律，并利用短暂的炮火间隙，观察并记录了地面已引爆的模拟炸点位置。借助这些点位，穆恒贵规划出了一条通向第三道障碍的路径。

“一路纵队，跟我来！”迅速抵近的爆破小组让防守方措手不及。

“准备完毕，起爆——”穆恒贵一声令下，霎时间，障碍一线如大坝决堤般被炸得粉碎。

“一个小组打出了乘风破浪的气势！”演训结束后，指挥员赞叹道。

往勇气中注入”智慧的火药”，会催生更强大的爆破当量。

2023 年的一次训练，郑海清和二级上士廖志文受命破坏”敌军”的一处防御阵地。抵达任务地域，他们发现防御阵地在一处陡坡之上，居高临下，易守难攻，陡坡上植被稀疏，仅有几处土包可作为掩体。显然，这是一块”硬骨头”。

郑海清和廖志文权衡再三，决定各带一个小组从两翼对”敌”阵地发起攻击。可连续几番试探未果，还引起了”敌人”的警觉，一时间，破障行动陷入僵局。

郑海清和廖志文对整个任务地域地形展开侦察，寻找可以渗透的缝隙。

功夫不负有心人，他们在陡坡一侧发现了一处阵地观察死角。虽然受限于地形，不能在此实施爆破，但可以由此而上，抵近后佯攻吸引”敌军”注意，再由正面实施爆破。郑海清主动揽下佯攻任务，带领一个小组从观察死角抵近”敌军”。果然，”敌军”发现郑海清小组时瞬间乱了阵脚，误将该小组当作进攻主力，调转火力予以反击。廖志文抓住机会，带领破障小组冲到”敌”阵前，成功实施爆破。

从战术到谋略，这群”令敌破防”的爆破兵，也在苦苦追寻思维的”爆点”——

近年来，多型无人装备陆续列装，作为技师的穆恒贵带着几名无人装备操作骨干，探索通过有人无人协同改进战术战法。

传统爆破行动中，都是由人将爆炸装置运送到指定位置，再进行引爆破障。二级上士杨小鹏开始思考如何用无人装备替代人力进行爆炸装置的转移。

一次实爆训练中，杨小鹏提出，夹取型排爆机器人虽然是针对排爆设计的，但本质上就是一个夹持爆炸物进行位移的工具，可以反向运用夹取型排爆机器人，把爆炸装置运送至任务点位进行设爆。经过试验验证，在合理地形中，此法可行，利用无人装备设爆不仅大幅降低了人员伤亡风险，还提高了战场条件下运送炸药的速度与成功率。

爆破行动中，有时需要跨昼夜执行任务，夜间警戒非常消耗精力和体力，爆破行动的编组人数本就较少，经过一整晚的警戒，势必影响第二天的行动。

为了缓解夜间警戒压力，一级上士汤清洲利用少量简易材料，自制了一种可快速设置的低药量警示装置。虽然没有什么杀伤力，但可以发出巨大的声响并升腾起黑烟，布设在宿营地周边，可以起到非常好的警示效果。

一次对抗训练，一股蓝军本想趁着夜色对该连进行袭扰，却误触了汤清洲设置在宿营区外围的警示装置，巨大的声响震慑住了蓝军。

那一回，蓝军指挥所里流传起了一句话：”爆破兵的宿营地太危险了，到处都是炸药！”

有勇者不可挡，怀智者无难事。奋战路上，爆破兵用勇与谋交织出独属于他们的青春答卷。

角色的不断切换，让他们对攻与防有了更加深刻的理解

咕噜，咕噜……野外湖泊，一座废弃大桥下，二级上士郭江伟扶着桥墩下潜，感受着逐渐增大的水压和降低的水温，缓慢调整身体姿态，找寻布设模拟爆炸装置的最佳位置。

令他没想到的是，他预想的最佳安放区域已被预先布置了不少悬浮的障碍物，经过几番处理也没能清理出一个合适的点位，氧气耗尽，郭江伟铩羽而归。

“今天的障碍设置得真好，防得密不透风！”刚上岸，潜水服也没脱，郭江伟就把刚才训练过程中遇到的障碍布设方式记录下来。

在该连，大家伙会轮流分享自己近期的爆破经验。此次训练前，担任防御方的二级上士亢延鹏根据郭江伟分享过的水下目标爆破经验，反向钻研防御手段，利用废旧的铁丝网、泡沫等材料，将可能设置水下炸药的位置给遮了起来。水下处理障碍远不如地面方便，在没有称手工具的情况下，几根长条状铁丝网缠绕着杂物，便会给进攻造成很大阻碍。自此之后，爆破小组进行水下爆破时，都会带把大剪刀。

善于破障，也要善于制造障碍。该连经常根据官兵专业、能力、经验等条件，将大家分成对抗训练小组，常态化互设难题，提高爆破能力的同时，防爆破能力也不断迭代。最熟悉爆炸物的他们，并不是只知道如何"搞破坏"，到了战场上，他们既可以是撕裂敌方堡垒的勇士，也可以是巩固己方防御的卫士。

训练中，防御方通过改造现地环境、重设防御工事结构等方式阻止进攻方设置爆炸装置；进攻方则通过改进装置结构、创新手段布设、革新战术战法等想方设法克服阻碍，实施爆破。

汤清洲说，角色的不断切换，让他们对攻与防有了更加深刻的理解。近些年，大家逐渐喜欢上了这种训练中的彼此"刁难"。

一次对抗训练，担任防守方的二级上士郭辉在己方防御设施的墙面上喷了一层薄薄的食用油，使得对手的爆炸装置无法粘贴固定。针对新的防御措施，他们的解决方法也很直接——在随行装具里多装了一包湿巾。

然而，并不是所有的油都容易清洁干净。官兵们陆续尝试了机油、润滑油等不同油料，发现靠湿巾擦拭这种简单清洁效果并不好，又不可能每次任务都随身携带专业的清洁工具。一次训练中，郭辉偶然看见，塑料袋会粘在有油的表面。郭辉由此联想到了会随身携带的水袋："我们用的水袋表面就是塑料的，将水倒掉，就是个比较厚的塑料袋。"经过试验，将空水袋按在覆有油脂的防御工事表面，再沿着缝隙滴上几滴水，空水袋便牢牢吸附在了工事上，再将炸弹粘贴在空水袋上，便实现了固定。

知己知彼，百战不殆。真正的博弈早在上战场之前便已展开。

"敌人也在快速进步！"在他们心中有一种"本领恐慌"，因此总想着进步得再快些、发现的漏洞再多些。

在该连爆破专业研修室里，挂着一张爆破药量参考表，这是众多技术骨干根据历年训练经验总结的。执行任务时，根据先期侦察的情报，他们可以参考这张表确定携带量，在保证备有足够余量的情况下减少负重。

说起这张表的来历，一级上士李琨讲起一段经历：那年，他带队对特定目标实施精准爆破，没有经验可供参考，只能凭感觉确定装药量。第一次爆破用量过少，门没有炸开，第二次用量又太多，将整面墙炸塌了。

“在之前的爆破训练中，坦克壕的宽度、门窗的材料、墙壁的厚度等，都相对固定，导致这次遇到新材料摸不准炸药用量。”李琨说。

痛定思痛，从那次训练开始，该连将对不同材质、不同结构目标成功爆破的炸药用量记录下来，总结出参考值区间，形成了这张爆破药量参考表。目前，这张表仍在不断更新。与此同时，汤清洲还根据对抗训练中遭遇的实际困难，钻研不同类型建筑、障碍物的爆破规律，制作出对应的辅助装置和简易爆炸装置……

这便是爆破兵，他们有着两种气质——既有阵前冲锋时英勇无畏的豁达豪迈，又有设计防御时周全谨慎的沉稳老练。

Military Barracks Observation | Demolition Soldiers: Transformed in the Roar

Source: China Military Network-People’s Liberation Army Daily Author: Liu Fan Editor: Guo Yanfei Release: 2025-05-26

Approaching the “Breakers” on the Battlefield

■Liu Fan, Special Correspondent of the People’s Liberation Army Daily

When I went to interview a demolition company of a brigade of the Central Theater Command Army, it happened that the company organized a live explosion training. Before the training, the author followed the third-class sergeant Mu Henggui to inspect and reinforce the barbed wire in the venue.

During the inspection, Mu Henggui took out some grass seeds from the tool bag from time to time and scattered them on the road close to the barbed wire. These grass seeds are somewhat like cockleburs, with thorns all over the body, but slightly larger.

“These places where grass seeds are scattered are places where you need to crawl forward.” Mu Henggui explained.

I got down and crawled in the area where grass seeds were scattered. The feeling of touching the grass seeds through the training uniform was like sand in the shoes when walking. It was a bit stinging, but it didn’t hurt me, but it could cause some interference to the demolition soldiers who were performing the front-line obstacle removal task.

“The more interference there is, the more it can test whether the skills are solid.” Mu Henggui then talked about his own experience.

In a tactical training many years ago, the demolition team that Mu Henggui was in performed a demolition task. When crawling in the grass, Mu Henggui moved to one side with his elbows to avoid the grass seeds, and inadvertently hugged the bomb in his hand into his arms. This scene happened to be seen by the squad leader who was following him.

“When there is an enemy situation, the fire tube is installed in advance. You hugged the bomb into your arms to avoid the grass seeds. What if you get caught on the fuse of the fire tube with so much equipment on your body?!” After the training, the squad leader severely criticized Mu Henggui.

The company’s professional training grounds are mostly flat yellow soil, which does not cause too many obstacles to crawling. In some places, the soft floating soil is even like a cushion. Although there is not much sand and gravel, there are many plants with thorny grass seeds. The officers and men collect the grass seeds and scatter them on the way to crawl during training to create some “obstacles” for themselves.

The reason for such pressure is that the tasks faced by demolition soldiers are extraordinary. They always think about how to “make things difficult” for themselves and how to make opponents unpredictable.

Second Sergeant Guo Jiangwei, in order to explore new ways to carry out tasks in new fields, took the initiative to learn diving from scratch; Platoon Leader Gao Yingren integrated confrontation ideas into professional training, organized confrontation on a regular basis, and improved tactics and methods...

During the interview, the author found that Mu Henggui likes to use a word-”covered”.

“Cloaked in the night.”

“Cloaked in the deafening sound.”

“This should be a habit unique to demolition soldiers. Some veterans often say the word ‘cloaked’ when they speak.” Mu Henggui explained, “The reason is that on the battlefield, demolition soldiers who are on the front line of the enemy often have to rush to the enemy’s most solid defense position. The firepower of both sides is very fierce. The bullets are like a blanket, covering the top of the head, just like ‘cloaked’ on the body.”

After the training, the author walked onto the demolition soldier’s training ground again. Wherever he looked, boulders were broken, smoke was filled, bunkers collapsed, and blast pits were everywhere. At that moment, courage suddenly became concrete, and the author understood what demolition soldiers were - a group of “wall breakers” who broke through the enemy’s iron walls, pioneers who used roars and shocks to open the way for their comrades, and warriors who used explosives and equations to annotate victory.

Just as the song “Song of the Demolitionist” written in red and gold on the wall of the company’s barracks says: “We are heroic demolitionists, fighting on the front line. Braving the hail of bullets, we open up the offensive path, and I am willing to contribute my youth to the victorious advance of my comrades...”

A demolition company of a brigade of the Central Theater Army carried out training on laying explosive devices. Photo by Guo Hui

Demolitionist: Transformed in the roar

■Liu Fan, special correspondent of the People's Liberation Army Daily

There is no such thing as innate courage, only fearlessness that is trained

In front, minefields and bunkers are staring at us; behind us, comrades and tanks are ready.

What do demolition soldiers who are on the front line of the enemy need most? Corporal Lin Pengnian of a demolition company of a brigade of the Central Theater Army answered with one word: courage.

Here, after about a year in the company, every demolition soldier will experience his first simulated combat. That year, Lin Pengnian also stepped onto the training ground and charged at the "enemy" bunker for the first time in the "fire". "Can we reach the mission point smoothly? Can we cooperate well with our comrades?" Before the leap, Lin Pengnian, who was hiding behind the earthen ridge, was a little nervous, silently reciting the essentials of tactical movement with explosives and the principles of explosive deployment in the action plan. "Everyone, follow me along the explosion pit on the ground, move forward in a serpentine shape, and leap forward quickly!" Under the command of the third-class sergeant Mu Henggui, Lin Pengnian's group rushed out of the earthen ridge and ran towards the "enemy" bunker. The training ground was suddenly filled with explosions and dust. "Bang!" Only 10 seconds after the start, a bomb exploded about 5 meters away from Lin Pengnian, and the strong shock instantly emptied his brain. "Can't stop, absolutely can't stop!" Suppressing the surprise and panic in his heart, Lin Pengnian continued to leap forward, observing the position of his comrades, controlling the distance between him and his comrades, and finally completing the detonation synchronously with his comrades, successfully completing the mission. Demolition on the battlefield is not as simple as laying bombs. Diving, rock climbing... They wish they could go to the sky and into the earth, and master all kinds of martial arts. Because the battlefield environment is complex, for demolition soldiers, one more skill may be one more way to defeat the enemy.

In 1935, the Red 4th Regiment was ordered to capture Lazikou. Facing the natural dangers and the tight defense of the Kuomintang army, the Miao soldier "Yunguichuan" took the long rope connected by his comrades with leggings, and used a bamboo pole with an iron hook to hook the gap of the cliff and climb up the cliff step by step. Then, he asked his comrades to climb up one by one along the long rope. After nightfall, our army was like a god descending from the sky, throwing grenades from top to bottom at the enemy bunkers without roofs...

For today's demolition soldiers, rock climbing is a must-training subject. However, for Sun Yuhan, a soldier who was a little scared of the 2-meter deep pit in the 400-meter obstacle, this is a big mountain.

Two years ago, Sun Yuhan enlisted in the army and became a new recruit in the class of Second Sergeant Zheng Haiqing. He worked hard and trained very hard, and Zheng Haiqing was very

satisfied with his performance. The only thing that really bothered Zheng Haiqing was that Sun Yuhan was afraid of heights.

During the training, facing the wall of rock climbing training, Sun Yuhan said he would not go up. Seeing the anxious and helpless expression of the squad leader, Sun Yuhan became more nervous.

One weekend, Zheng Haiqing saw Sun Yuhan standing in front of a high platform in the psychological behavior training field, slowly climbing up with the ladder, holding the handrail tightly for a while, and then slowly climbing down the ladder, repeating it over and over again. At that moment, Zheng Haiqing made up his mind: “I must help him overcome his fear.”

Since then, Zheng Haiqing has thrown away the urging and impatience, and began to accompany Sun Yuhan to the high platform and down the deep pit... Using auxiliary facilities to help him overcome his fear until he can stand in front of the rock wall independently.

Today, Sun Yuhan can go up and down the rock climbing wall freely.

There is no such thing as innate courage, only fearlessness that is cultivated. On the road to growth, the demolition soldier completed his transformation in the roar and became a warrior who defeated fear.

Injecting “wisdom gunpowder” into courage will give birth to a more powerful blasting equivalent

“A true brave man must rely on wisdom.” Mu Henggui realized this truth from an obstacle removal operation.

In 2022, the company participated in the training organized by the superiors, and Mu Henggui led an obstacle removal team to perform the obstacle removal task.

After the obstacle removal team successfully broke through the anti-tank trenches and minefields laid by the “enemy”, they encountered intensive artillery fire in front of the last obstacle composed of bunkers and trenches, and they had to stop their pace.

“Squad leader, the artillery fire is too dense. I run fast. Let me go.” “Squad leader, I’ll go. I have experience.”... Facing the soldiers vying for battle, Mu Henggui was very calm: “Not fearing sacrifice is brave, but meaningless sacrifice is meaningless!”

Based on the frequency of explosions, Mu Henggui calculated the “enemy” artillery attack pattern on the spot, and used the short intervals between artillery fire to observe and record the locations of simulated explosion points that had been detonated on the ground. With the help of these points, Mu Henggui planned a path to the third obstacle.

“Follow me in a column!” The rapidly approaching blasting team caught the defenders off guard.

“Ready, detonate--” Mu Henggui gave an order, and in an instant, the obstacle line was blown to pieces like a dam bursting.

“A group played with the momentum of riding the wind and waves!” The commander exclaimed after the exercise.

Injecting “wisdom gunpowder” into courage will give birth to a more powerful blasting equivalent.

During a training in 2023, Zheng Haiqing and Second Sergeant Liao Zhiwen were ordered to destroy a defensive position of the “enemy”. When they arrived at the mission area, they found that the defensive position was on a steep slope, overlooking the enemy, easy to defend and difficult to attack. The vegetation on the steep slope was sparse, and only a few earthen mounds could be used as shelters. Obviously, this is a “hard bone”. Zheng Haiqing and Liao Zhiwen weighed the pros and cons and decided to lead a team each to attack the “enemy” position from both wings. However, several consecutive attempts failed and aroused the vigilance of the “enemy”. For a time, the obstacle-breaking operation was deadlocked. Zheng Haiqing and Liao Zhiwen conducted reconnaissance of the terrain of the entire mission area, looking for gaps that could be infiltrated. Hard work pays off. They found a position on the side of the steep slope with a blind spot for observation. Although it is limited by the terrain and cannot be blasted here, it can be used from here. After approaching, a feint attack attracts the attention of the “enemy” and then blasted from the front. Zheng Haiqing took the initiative to undertake the feint attack mission and led a team to approach the “enemy” from the blind spot. Sure enough, the “enemy” was instantly confused when they found Zheng Haiqing’s team, mistakenly regarded the team as the main force of the attack, and turned their firepower to counterattack. Liao Zhiwen seized the opportunity and led the obstacle removal team to rush to the “enemy” front and successfully carried out the blasting.

From tactics to strategies, this group of blasting soldiers who “break the enemy’s defense” are also struggling to pursue the “explosion point” of thinking

In recent years, many types of unmanned equipment have been successively equipped. As a technician, Mu Henggui led several unmanned equipment operation backbones to explore the improvement of tactics and methods through manned and unmanned collaboration.

In traditional blasting operations, people transport explosive devices to designated locations and then detonate them to remove obstacles. Second Sergeant Yang Xiaopeng began to think about how to use unmanned equipment to replace manpower to transfer explosive devices.

During a live explosion training, Yang Xiaopeng proposed that although the gripping bomb disposal robot is designed for bomb disposal, it is essentially a tool for clamping explosives for displacement. The gripping bomb disposal robot can be used in reverse to transport the explosive device to the mission point for setting the explosion. After experimental verification, this method is feasible in reasonable terrain. The use of unmanned equipment to set the explosion not only greatly reduces the risk of casualties, but also increases the speed and success rate of transporting explosives under battlefield conditions.

In blasting operations, sometimes it is necessary to perform tasks across the day and night. Nighttime vigilance consumes a lot of energy and physical strength. The number of people in the

blasting operation is relatively small. After a whole night of vigilance, it is bound to affect the next day's operations.

In order to relieve the pressure of nighttime vigilance, First Sergeant Tang Qingzhou used a small amount of simple materials to make a low-charge warning device that can be quickly set up. Although it has no lethality, it can make a loud noise and rise black smoke. It can be deployed around the barracks site and have a very good warning effect.

During a confrontation training, a group of blue soldiers wanted to harass the company at night, but they accidentally triggered the warning device set up by Tang Qingzhou outside the barracks area, and the huge sound shocked the blue soldiers.

That time, a saying spread in the blue army command post: "The barracks of the demolition soldiers is too dangerous, and there are explosives everywhere!"

The brave are unstoppable, and the wisdom is not difficult. On the road of fighting, the demolition soldiers used courage and strategy to weave their unique youth answers.

The constant switching of roles gave them a deeper understanding of attack and defense

Gulu, Gulu... In a wild lake, under an abandoned bridge, Second Sergeant Guo Jiangwei dived with the bridge pier, feeling the gradually increasing water pressure and decreasing water temperature, slowly adjusting his body posture, and looking for the best position to deploy the simulated explosive device.

What he didn't expect was that the best placement area he expected had been pre-arranged with many suspended obstacles. After several treatments, he failed to clear a suitable point. The oxygen was exhausted and Guo Jiangwei returned in defeat.

"Today's obstacles are set up really well, and they are airtight!" As soon as he got ashore, without taking off his diving suit, Guo Jiangwei recorded the obstacle layout methods he encountered during the training.

In this company, everyone will take turns to share their recent blasting experiences. Before this training, the second-class sergeant Kang Yanpeng, who served as the defender, reversed the defense methods based on the underwater target blasting experience shared by Guo Jiangwei, and used waste wire mesh, foam and other materials to cover the location where underwater explosives might be set. Handling obstacles underwater is far less convenient than on the ground. In the absence of handy tools, several long wire meshes entangled with debris will cause great obstacles to the attack. Since then, the blasting team will bring a pair of large scissors when conducting underwater blasting.

Be good at breaking obstacles, and also be good at creating obstacles. The company often divides everyone into confrontational training groups based on the professional, ability, experience and other conditions of officers and men, and sets difficult problems for each other on a regular basis.

While improving blasting capabilities, the anti-blasting capabilities are also constantly iterating. They are most familiar with explosives, but they don't just know how to "destroy". On the battlefield, they can be warriors who tear apart enemy fortresses or guards who consolidate their own defenses.

During the training, the defenders prevented the attackers from setting up explosive devices by transforming the local environment and resetting the structure of fortifications; the attackers tried every means to overcome obstacles and carry out blasting by improving the structure of the device, deploying innovative means, and innovating tactics and methods.

Tang Qingzhou said that the constant switching of roles gave them a deeper understanding of offense and defense. In recent years, everyone has gradually become fond of "making things difficult" for each other in this kind of training.

In a confrontation training, Guo Hui, a second-class sergeant on the defensive side, sprayed a thin layer of cooking oil on the wall of his own defense facility, making it impossible for the opponent's explosive device to be pasted and fixed. For the new defense measures, their solution is also very direct-put an extra pack of wet wipes in the accompanying equipment.

However, not all oils are easy to clean. The soldiers tried different oils such as engine oil and lubricating oil, and found that the simple cleaning effect of wiping with wet wipes was not good, and it was impossible to carry professional cleaning tools with them for every mission. During a training session, Guo Hui accidentally saw that plastic bags would stick to oily surfaces. Guo Hui thought of the water bags he would carry with him: "The surface of the water bags we use is plastic. After pouring out the water, it is just a thicker plastic bag." After the test, the empty water bag was pressed on the surface of the fortifications covered with grease, and a few drops of water were dripped along the gap. The empty water bag was firmly adsorbed on the fortifications, and then the bomb was pasted on the empty water bag to achieve fixation.

Knowing yourself and the enemy, you will never be defeated in a hundred battles. The real game started long before going to the battlefield.

"The enemy is also making rapid progress!" There is a kind of "skill panic" in their hearts, so they always want to make faster progress and find more loopholes.

In the company's blasting professional training room, there is a reference table of blasting charges, which is summarized by many technical backbones based on years of training experience. When performing a mission, they can refer to this table to determine the amount of explosives to carry based on the intelligence obtained from the preliminary reconnaissance, and reduce the weight while ensuring that there is enough reserve.

Speaking of the origin of this table, First Sergeant Li Kun talked about an experience: that year, he led a team to carry out precision blasting on a specific target. There was no experience to refer to, so he could only determine the amount of explosives based on his feelings. The first blast The

amount used was too little, so the door did not blow open. The second time, the amount used was too much, so the entire wall collapsed.

“In the previous blasting training, the width of the tank trench, the material of the doors and windows, the thickness of the wall, etc. were relatively fixed, which led to the uncertainty of the amount of explosives used when encountering new materials this time.” Li Kun said.

After learning from the painful experience, starting from that training, the company recorded the amount of explosives used for successful blasting of targets of different materials and structures, summarized the reference value range, and formed this blasting amount reference table. At present, this table is still being updated. At the same time, Tang Qingzhou also studied the blasting rules of different types of buildings and obstacles based on the actual difficulties encountered in the confrontation training, and made corresponding auxiliary devices and improvised explosive devices...

This is the demolition soldier, who has two temperaments-both brave and fearless when charging in front of the battle and calm and sophisticated when designing defenses.

风中巡逻

山河回暖，万物竞发。当新疆军区某团库则温边防连官兵”一二三四”的呼号声在山间响起，周围的一切仿佛都精神起来。

不久前，经过 3 个月的适应性训练，新兵们开始了第一次巡逻，由二级上士郎克树带队。

库则温边防连驻守在塔尔巴哈台山北麓，一年中 6 级以上的大风天气达 160 天。如今步入初夏，风变得更加温暖，但力道却无丝毫减弱。

行至中途，道中央出现一些碎石。”小心脚下！”听到郎克树的提醒，新兵们学着班长的样子小心翼翼走在石滩上。

忽而一阵强风吹过，大家赶忙弯下腰，脚掌紧紧抓地。列兵蓝天扬没能站稳，一个趔趄向右倒去。身后的战友立刻拽住了他的腰带，一把将他扶起。

路还有很长。经历了半天的徒步跋涉又险些摔倒的蓝天扬早不像出发时那样兴高采烈，变得有些沉默。

“别看这风，有一次帮助我们脱离了险境。”为了激起蓝天扬的兴致，郎克树讲起了自己的故事。

那是几年前的一个初春寒夜，风依旧很大。短暂休整后，郎克树所在的巡逻分队开始了夜晚的执勤任务。

远处的铁丝网在”呜呜”的狂风里颤着，像是琴弦被胡乱拨动。一行人顶着强风深一脚浅一脚朝着铁丝网行进。警觉的郎克树突然蹲下，手套抹开一片浮雪，几枚梅花状的爪印露了出来。

狼群刚刚从这里过去。郎克树食指在唇边比着不要出声的手势，战士们的心中突然一紧。郎克树举起望远镜仔细观察后轻声说：”三点钟方向。”

镜筒里，灰白色的一串身影缓缓移动，几匹成年狼正贴着铁丝网游走。风仍在呜咽，郎克树握紧了手中的枪。

突然间，头狼转向巡逻分队方向。那一刻，郎克树和战友们屏住呼吸，紧紧盯着狼群的动向，不敢有一丝分神。

就在此时，狂风瞬时调转了方向。裹挟着雪粒的北风掠过狼群脊背，卷起它们蓬松的尾毛。头狼开始转向，渐渐消失在原野中。

郎克树攥住枪械的手已经有些僵硬，他长舒了一口气，没想到朝夕相伴的大风竟在关键时刻给大家提供了”援助”。

听完班长的故事，蓝天扬竟觉得此刻山谷间的风格外灵动：”刚刚它和我开了一个小玩笑，可能是提醒我步子要稳。”

“挺直腰板加把劲，界碑就快到了。”听着班长的鼓励，蓝天扬步伐走得更加坚定。
