PLA Officer Says His Battalion Now Has Stronger Fighting Prowess

Source China Daily

Editor Li Jiayao

Lieutenant Colonel Zhang Dongxu, commander of a combined combat battalion of the People's Liberation Army Ground Force, also a deputy to the 14th National People's Congress, attends a

group interview ahead of the opening meeting of the third session of the 14th NPC at the Great Hall of the People in Beijing, on March 5, 2025. [Photo by Kuang Linhua/chinadaily.com.cn]

By ZHAO LEI

Lieutenant Colonel Zhang Dongxu, commander of a combined combat battalion of the People's Liberation Army Ground Force, said his unit now has stronger fighting prowess thanks to intensive training, new hardware and inter-service exercises.

Speaking in front of reporters on Wednesday at the Great Hall of the People in Beijing, the officer said: "Over the years, my battalion has transitioned from an infantry unit to a combined group while advancing combat-oriented training."

"Each year, we conduct cross-regional exercises spanning northern grasslands, southern forests, eastern coasts, and the western deserts. Through all-weather drills, sweating through summer heat and battling winter frost, our troops have relentlessly honed their skills and enhanced their morale," said Zhang, a deputy to the 14th National People's Congress, which opened its third session on Wednesday morning.

He was responding to a question about his feeling as a battalion commander and what he thinks about the transformation of his unit.

Zhang recalled that in his second year as battalion commander, his troops were sent to a helicopter-assisted assault drill with soldiers conducting low-altitude aerial penetration over hills and forests.

"The aircraft brought us over hills, grasslands and forests. The rapid movements not only changed our angle of view but also forced us to adapt to the new battle pattern," he said. "The application of information technology has transformed combined combat forces like us and enabled us to carry out not only single-unit tasks but also multi-domain joint operations."

In recent years, Zhang said his unit has tapped into new combat capabilities through advanced weaponry and "information-firepower integration" tactics. Meanwhile, cross-service training with naval and air units has further tightened joint operational systems.

"All of us feel that our armed forces have become good at inter-service operations and we continue to bolster our fighting capabilities. Our confidence in defending the nation and overcoming adversaries grows stronger than ever," he said.

A Chinese military doctor explains the use of medicine to a soldier.

By Ren Xin and Su Ting

BEIJING, Mar. 12 -- Recently, the medical team of the No. 940 Hospital of the Joint Logistic Support Force of the Chinese People's Liberation Army (PLA) and the medical team of the No. 948 Hospital of the PLA Army sent medical experts to such units as border defense companies and outposts on the plateau to provide medical services.

In addition to use of portable devices for diagnosis and treatment, the medical experts also provided personalized treatment and rehabilitation suggestions for various situations.

In addition, focusing on prevalent plateau diseases and common injuries arising from training, the medical experts also provided the troops with tips for disease and injury prevention, so as to help them master the methods of preventing and treating injuries during training.

Dire Conditions Don't Deter Resolute Soldiers

Source China Daily

Editor Li Weichao

2025-03-21

Soldiers scale a total of 1,377 stairs on a “sky ladder” to China’s No 3 boundary marker with Kyrgyzstan, which is perched on a mountain at an altitude of 4,200 meters above the sea level in Wushi, Xinjiang Uygur autonomous region. FENG YONGBIN/CHINA DAILY

Climbing 1,377 steep steps — the equivalent of ascending some 70 floors in a standard office building — can exert considerable physical strain on most people.

Add to this biting gusts, thin air at an altitude exceeding 4,000 meters and a steep incline of over 70 degrees, and one can begin to grasp a fraction of the rigorous conditions that the border defense regiment in Bedel, Xinjiang Uygur autonomous region, deals with on a daily basis.

Their routine patrol entails scaling 1,377 steps to reach China’s No 3 boundary marker with Kyrgyzstan in Xinjiang’s Wushi county. The stairway is known as tianti in Mandarin, meaning sky ladder.

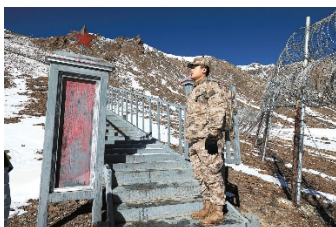

Simply reaching the base of the staircase is arduous for most of the year, as heavy snowfall renders sections of the rugged road from the troop’s camp — strewn with gravel and surrounded by steep cliffs and valleys — impassable by vehicles.

Soldiers have to trudge through the deep snow on foot.

Recalling his initial journey to the boundary marker in January 2022, soldier Fu Yong recounted how his ears suffered severe blistering in the freezing temperatures.

“Our vehicle became immobile roughly two kilometers from the stairs due to heavy snowfall, forcing us to wade forward in waist-deep snow while carrying our patrol gear to reach just the first step,” he said.

Lyu Mengfan, a soldier from Henan province, made his first visit to the boundary pillar in August of 2023.

Soldiers scale a total of 1,377 stairs on a “sky ladder” to China’s No 3 boundary marker with Kyrgyzstan, which is perched on a mountain at an altitude of 4,200 meters above the sea level in Wushi, Xinjiang Uygur autonomous region. FENG YONGBIN/CHINA DAILY

“I was filled with excitement and couldn’t resist sprinting ahead. By the time I neared the marker, my strength had waned, and a senior soldier had to assist me and pull me up for the final stretch,” he said.

Upon reaching the summit, Lyu was stunned by the landscape.

“The endless expanse of rolling mountains cloaked in pristine white snow, bathed in golden sunlight at the peak left me in awe,” he said.

“One side of the marker represents my homeland, while the other side is a neighboring nation. It dawned on me the tangible significance of our duty as border soldiers,” he added.

Through rigorous physical training and acclimatization to high altitudes, Lyu is now able to complete the 1,377 steps in about half an hour, a marked improvement from his initial attempt that took over an hour.

“Several veteran soldiers in our regiment have served here for more than a decade, akin to unyielding rocks safeguarding our country’s border. Their unwavering dedication serves as a profound source of inspiration for us,” he said.

The spirit of the border soldiers in Bedel is encapsulated in three principles: to endure like solid rock, to stand resilient like a pine tree, and to be as sharp as a sword. These principles are engraved on a stone wall at their military outpost.

Built in the 1990s to prevent mudslides, the 6-meter-tall, 36-meter-long wall bears the names of 143 soldiers who have exemplified the qualities of perseverance, resilience and sharpness through their dedicated contributions.

“Naturally, we all aspire to see our names etched on the wall before retiring from the unit. More importantly, we strive to be part of a collective force embodying these values, inspiring fellow soldiers to uphold our spirit in safeguarding our land,” Lyu said.

Military Hospital Opens Medicine Delivery Channel by Drone

Source China Military Online

Editor Lin Congyi

2025-03-24

BEIJING, Mar. 24 -- On the morning of March 19, Xinqiao Hospital of the Chinese PLA Army Medical University completed its first medicine delivery task by drone, signifying that it has opened up a normalized first-aid medicine delivery channel by drone.

It is learned that a drone can carry a maximum of nine kilograms of materials per flight, and complete a delivery with nearly half the time required by a conventional logistics delivery. This enables the uninterrupted fast supply of special medicine round the clock, thereby buying valuable time for saving lives.

PLA Army to Participate in Pakistan Army Team Spirit 2025 International Military Skills Competition in Pakistan

Source China Military Online

Editor Li Jiayao

2025-04-09

BEIJING, April 9 -- “At the invitation of the Pakistani military, the Chinese PLA Army will send a detachment to Pakistan to participate in the Pakistan Army Team Spirit (PATS) 2025 international military skills competition in early and mid-April,” said Senior Colonel Zhang Xiaogang, spokesperson for China’s Ministry of National Defense, at a press briefing on Wednesday.

According to the spokesperson, the PATS 2025 mainly includes nighttime reconnaissance and infiltration, ambush and counter-ambush operation, combat swimming and other contests. It aims to test and improve the combat capabilities of the participating troops, and strengthen exchanges and mutual trust among the militaries of participating countries.

Army Troops Conduct Rail Loading Training

Source China Military Online

Editor Huang Panyue

2025-04-19

BEIJING, Mar. 17 -- Recently, a brigade assigned to the 71st Group Army under the Chinese People's Liberation Army (PLA) conducted a rail loading training exercise to enhance the troops' long-distance force projection capability.

The positioning of equipment on the rail cars is a crucial step in rail loading operations. The width of some wheeled equipment is basically the same as that of the rail car, thus limiting the driver's vision to a large extent. Therefore, coordination between the guide and the driver is essential to ensure that various types of tracked or wheeled heavy equipment can be loaded onto the rail cars smoothly.

For different types and sizes of tracked and wheeled equipment, the light and medium-strength fastening equipment are accordingly used.

PLA Soldiers Conduct Disaster Relief Operations at Dulongjiang Township

Source China Military Online

Editor Lin Congyi

2025-06-04

The Chinese PLA soldiers carry life supplies for the disaster-affected people.

BEIJING, June 4 -- Recently, continuous heavy rain resulted in the rapid rise of water level in several rivers at Dulongjiang Township of Gongshan County in Lisu Autonomous Prefecture of Nujiang, southwest China's Yunnan Province. The following succession of mountain collapses, mudslides, and other disasters damaged the roads, communication, and power supply facilities. Some houses were severely damaged, posing a significant threat to the safety of the local people's lives and property.

On June 1, an army brigade under the Chinese PLA Southern Theater Command dispatched a contingent composed of over 30 service members for disaster relief mission. The contingent rushed to the most severely affected Kongdang Village with specialized equipment to conduct emergency rescue operations.

As of noon on June 2, the disaster relief contingent, in collaboration with the local government, had evacuated 134 affected households of 728 people with no casualties, recovered over 1,000 pieces of materials, identified five positions of potential risk, and transported about five tons of disaster relief supplies, thereby providing effective life support for the disaster-affected people.

Chinese Military Conducts Disaster Relief Operations in Flood-Stricken Guizhou

Source China Military Online

Editor Huang Panyue, Yang Xueqing

2025-06-25

GUIYANG, China, June 25 -- Continuous heavy rain has recently impacted Rongjiang County in Qiandongnan Miao and Dong Autonomous Prefecture, southwest China's Guizhou Province, posing a serious threat of flooding to some areas.

More than 500 troops of the Chinese People's Liberation Army (PLA) and the Chinese People's Armed Police (PAP), civilian personnel, and militias rushed to the frontline of flood control with life jackets, assault boats, kayaks, and other disaster relief equipment to search and evacuate the trapped people, install flood control baffles, and reinforce flood control embankments.

As of 14:00 on June 24, the disaster relief troops had relocated more than 150 affected people. At present, the rescue and transfer efforts are still underway in an intensive and orderly manner.

China, Vietnam to Hold First Joint Army Training

Source: China Daily

Editor: Li Weichao

2025-07-20

The ground forces of China and Vietnam will conduct a joint training exercise in Guangxi Zhuang autonomous region in mid-to-late July, the Chinese Ministry of National Defense announced on Sunday.

This marks the first joint army training between China and Vietnam, the ministry said in a brief statement, with a focus on joint border patrol.

The exercise aims to enhance mutual learning and exchange of border patrol experiences and further deepen practical cooperation between the two militaries, it said.

China-Vietnam Joint Army Training Kicks Off

Source China Military Online

Editor Li Jiayao

2025-07-23

BEIJING, July 23 -- The China-Vietnam joint army training kicked off at a training base in south China's Guangxi Zhuang Autonomous Region on July 22. Participating troops from both sides attended the opening ceremony.

After the opening ceremony, the Vietnamese participating troops visited the Chinese military's wheeled vehicles, light arms, recon equipment, drones, protective devices and various other weapons and equipment.

This event marks the first-ever joint training between the two armies. Focusing on the joint border patrol training, it will conduct mixed-group training around four aspects: joint reconnaissance, joint fire strike, joint rescue and joint logistic support.

The two sides will carry out the joint training in modules covering eight subjects, including camouflage reconnaissance, unmanned aerial vehicle reconnaissance, live-fire shooting and rescue of the wounded.

During the training, the two sides will also conduct exchanges, visits, and some cultural activities.

China, Nepal to hold “Sagarmatha Friendship 2025” joint army training in Nepal: Defense Spokesperson

Source China Military Online

Editor Li Jiayao

2025-08-28

BEIJING, Aug. 28 -- China and Nepal will hold the “Sagarmatha Friendship 2025” joint army training in Nepal in early to mid-September, said Senior Colonel Zhang Xiaogang, spokesperson for China’s Ministry of National Defense, at a regular press conference on Thursday.

Themed on joint counter-terrorism operations, this joint army training will be organized in the form of mixed teams with participating troops teaching and learning from each other, said the spokesperson. During the joint training, participating troops will carry out comprehensive drills on joint counter-terrorism operations and practice disaster relief and rescue, peacekeeping operations and so on.

The spokesperson pointed out that this event will mark the fifth iteration of such joint training between the Chinese and Nepali militaries, which aims to further enhance their capabilities in joint counter-terrorism operations and deepen the traditional friendship and pragmatic cooperation between the two militaries.

High-quality Medical Services Delivered to Military Members, Civilians

Source China Military Online

Editor Li Weichao

2025-09-02

BEIJING, Sept. 2 -- In recent days, several military hospitals have visited primary-level military units and old revolutionary base areas to provide free clinic services, delivering high-quality medical services to the frontline service members and the local people.

Xinqiao Hospital affiliated to the Chinese PLA Army Medical University recently dispatched a medical expert team to the coastal areas in south China's Guangdong Province. Taking a special medical train, the team departed from southwest China's Chongqing Municipality and delivered high-quality medical resources to the frontline of combat-readiness training. The special medical train, with a maximum formation of 19 carriages, can provide medical check and examination, intensive care, emergency surgical operations, and other medical services, and therefore has field medical aid and support capabilities.

These military hospitals dispatched medical teams to old revolutionary base areas including Meizhou City in south China's Guangdong Province, Zibo City in east China's Shandong Province, and Nan'an City in southeast China's Fujian Province to provide medical services and supplies to the local people, entitled groups, and stationed troops.

These military hospitals have also established technical collaboration relations with multiple local hospitals. They conducted heartwarming interactions through medical treatment and tours, health

promotion programs, and technical mentoring, thereby further strengthening the deep bond between the military and the people.

In Qinhuangdao City, north China's Hebei Province, the military and civilian hospitals organize expert teams to provide regular home visits for service members and their families and opened medical green channels for them, ensuring that all service members have no worries about their family and can devote themselves to the work.

2025-09-05

BEIJING, Sept. 5 -- The Chinese and Nepalese armies are about to conduct the “Sagarmatha Friendship 2025” joint army training at a comprehensive training base in Kathmandu, Nepal, in early September. The Chinese participating troops recently held a departure ceremony at a unit of the Chinese PLA Xizang Military Command.

Themed on joint counter-terrorism operations, this joint army training will be organized in the form of mixed teams with participating troops teaching and learning from each other. During the joint training, participating troops will conduct comprehensive drills on joint counter-terrorism operations and conduct disaster relief and rescue, peacekeeping operations and so on. Before departure, Chinese participating troops received targeted training. During the joint training, the two sides will also engage in sports competitions and cultural exchange activities.

China-Nepal “Sagarmatha Friendship 2025” Joint Army Training Kicks Off

Source China Military Online

Editor Li Weichao

2025-09-08

KATMANDU, Sept. 8 -- On September 7 local time, the China-Nepal “Sagarmatha Friendship 2025” joint army training commenced at a training base in Nepal.

The Chinese participating troops are selected from a unit under the Chinese PLA Xizang Military Command. Under the theme of joint counter-terrorism operations, the training is divided into two phases, namely mixed-group joint training and live-force comprehensive drills.

The commanding groups of the two sides will jointly establish a joint training command center to conduct coordinated planning and map out tactics and training methods. They will organize troops from both sides to carry out drills on over ten subjects, including live-fire shooting, indoor clean-up, and comprehensive joint counter-terrorism operations.

Troops from both sides will participate in each other’s training instruction to further enhance the quality and effectiveness of the joint training.

After the opening ceremony, participating troops from both sides inspected and operated Nepalese training equipment as well as Chinese disaster relief and rescue devices.

The joint training is expected to further deepen the friendship between China and Nepal, and strengthen the joint counter-terrorism capabilities of both sides.

China-Russia-Mongolia Border Defense Cooperation 2025 Joint Exercise Kicks Off

Source China Military Online

Editor Huang Panyue, Yang Xueqing

2025-09-09

BEIJING Sept.9 -- From September 8 to 9, China, Russia and Mongolia held the Border Defense Cooperation 2025 joint exercise in north China's Inner Mongolia Autonomous Region. It marks the first time that the three countries have deployed their border defense troops for a joint exercise. Focused on joint prevention and suppression of terrorist and destructive activities in border areas, the joint exercise aims to enhance the strategic coordination among the three parties and strengthen their ability to counter border security threats.

An opening ceremony was held on the morning of September 8, and then the participating troops began to conduct live-force drills. During the drills, the three parties established a joint command post within the Chinese territory. Through activities such as joint planning, joint reconnaissance, joint containment, joint strike, and joint handover, the drills demonstrated a new model of border defense cooperation.

The drills employed a variety of modern reconnaissance and surveillance methods, including battlefield reconnaissance cameras, battlefield surveillance radars, and unmanned aerial vehicles, to strengthen the three countries' border control and patrol capabilities and enhance their technology-driven border management.

The three sides also comprehensively employed a combination of fixed and mobile assets, day and night operations, aerial and ground forces, as well as human and intelligent means, to form a multidimensional encirclement of terrorists and carry out joint arrest.

After the live-force drills, the border troops of China, Russia, and Mongolia will organize the demonstration of military working dogs operations in the Russian territory and hold cultural performances and exchanges in Mongolia.

This joint exercise serves as a historic testament to the long-standing development of friendly and neighborly relations among the three countries and represents a strong action to jointly safeguard peace and stability in the border regions.

People's Liberation Army Battalion Commander Leads Brethren by Example

Source China Daily

Editor Li Jiayao

2025-09-09

Zhang Cancan (right) operates a military drone during an exercise with his fellow soldiers. CUI HUOYANG/FOR CHINA DAILY

By LI SHANGYI

China has had many heroes and exemplary individuals in its military who have served the country during times of war, such as Huang Jiguang and Dong Cunrui, who sacrificed themselves for victory, inspiring generations to come.

In times without conflict, however, China's armed forces are no less dedicated and diligent in their overriding mission of defending the motherland.

One such individual is Zhang Cancan, who in July was named one of the 12 “most beautiful revolutionary soldiers of the new era” by the Publicity Department of the Communist Party of China Central Committee and the Political Work Department of the Central Military Commission.

Since 2021, this designation has been awarded to outstanding members of the People's Liberation Army who are considered models of dedication, skills and service.

In his 23-year career, Zhang has risen from being an ordinary soldier to a battalion commander in the PLA Ground Force's 76th Group Army. He's played an exemplary role in guiding his fellow troops and cultivating great soldiers, winning the trust of those under his command.

Born in 1984, Zhang joined the army in 2002. He has taken part in a dozen major operations and missions, from earthquake rescue to large-scale military exercises.

His name, Cancan, means “to shine” in Chinese, and he has done his name proud.

Over the past 14 years as an officer, he has trained various skilled personnel, and fellow soldiers describe him as “sharp yet steady”, a reflection of both his professional skills and personal character.

One incident in 2020, in particular, left a deep impression on his unit. During a mission on a plateau more than 5,000 meters above sea level, a soldier fainted from acute altitude sickness. Vehicles were stuck in soft, melted snow, making it impossible to reach the stricken man by road, Zhang recalled.

Faced with the urgent situation, Zhang decided he needed to deliver the oxygen himself. He took a 14-kilogram oxygen tank and ran 2.5 kilometers through a river valley at an altitude of 5,300 meters to reach the stricken soldier within 20 minutes. Zhang's actions saved the soldier's life.

Wang Meng, 27, a soldier in Zhang's unit, said he treats his men like family. "He cares for his soldiers like an elder brother, shielding them from hardship like an umbrella," he said.

One of Zhang's defining traits is his hands-on approach. During a training demonstration last year, when a soldier sustained a deep chin wound, he sprinted to summon an ambulance himself rather than leaving the task to others.

Zhang said his understanding of soldiers' struggles comes from having walked the same path.

"Though we live like brothers, I take training very seriously," he said.

As a young recruit more than 20 years ago, he trained even during downtime, spurred on by a leader who saw his potential. At the time, the constant demands made little sense to him, but later he realized that overcoming hardship prepared him for success. He now shares those experiences with young soldiers when they feel exhausted.

The transition from soldier to commander has only deepened his sense of responsibility. "As more people stand behind me, I have to work harder and set an example," he said.

He Zhengcong, a 31-year-old soldier in Zhang's unit, said working under extreme exertion can take its toll. "His leadership style is absorbing pressure from superiors instead of passing it down, which has won respect among soldiers," said He. "When higher-ups criticize the whole unit, he shields us and offers constructive suggestions, even demonstrating the moves himself."

Zhang's humility and willingness to learn have also impressed seasoned soldiers. When he was assigned to an artillery company as a commander, Tan Linlin, a 37-year-old soldier who has served in the Ground Force for some 20 years, doubted his ability.

"He was completely new to our field when he became my leader," Tan said. "Confident in my own skills, I initially was not convinced by his abilities."

But Zhang approached the role as a beginner, asking for advice and practicing diligently. Within two months, he achieved three direct hits in a live-fire drill, earning Tan's respect. Afterward, the two trained side by side, learning from each other, with Zhang emerging as a role model for Tan.

"Combat readiness requires not only training but also the right mindset," Tan said. "With Zhang in charge, we feel reassured."

In both this year and last, Zhang ranked first in the brigade's annual training assessment among officers. Despite harsh plateau conditions, he uses every opportunity to build upon his experience, from physical drills to equipment testing, and has pushed forward efforts to modernize combat readiness.

“Our battalion carries the heritage of the Red Army,” Zhang said. The battalion has participated in major historic battles, including the Chinese People’s War of Resistance Against Japanese Aggression (1931-45) and the War to Resist US Aggression and Aid Korea (1950-53).

“I want every soldier to feel that pride and live up to the honorable title,” he said.

2025-09-15

A combined-arms brigade assigned to the Chinese PLA 74th Group Army recently organized its artillery troops to conduct a round-the-clock live-fire training exercise.

Soldiers of the artillery troops coordinated well with each other and fired a salvo of shells to saturate the enemy area in a rapid and effective way.

Featuring multiple artillery pieces, fast pace and high intensity, the live-fire training tested the artillery troops’ capabilities of quick response, precise strike and efficient destruction.

Armored Assault Vehicles Conduct Live-fire Shooting in Horqin Grassland

Source China Military Online

Editor Huang Panyue

2025-10-04

An army brigade assigned to the Chinese PLA 78th Group Army recently conducted live-fire shooting assessment of armored assault vehicles at a training field in Horqin Grassland in north China's Inner Mongolia Autonomous Region.

The assessment focused on subjects including rapid maneuver, tactical collaboration, and fire strike. Operating in near-zero visibility from dust clouds, the crew members of armed assault vehicles were required to complete attack and breakthrough operations, and the task of destroying enemy through close combat.

The assessment effectively examined the quick reaction capabilities and fire strike effectiveness of the participating troops.

PLA Army's Thunder Aerobatic Team Conducts Adaptive Training for 7th China Helicopter Expo

Source China Military Online

Editor Lin Congyi

2025-10-15

BEIJING, Oct. 15 -- The 7th China Helicopter Expo will open in Tianjin on October 16. As the expo approaches, the Chinese PLA Army's Fenglei Thunder Aerobatic Team conducted multi-subject adaptive training at an airport in Tianjin Airport Economic Area on October 14, 2025.

In addition to helicopters such as the Z-10 attack helicopter and Z-20 utility helicopter, the Z-20T assault helicopter will make its debut at the helicopter expo. The Z-20T is a new-type helicopter that combines both firepower strike and airborne transport capabilities. At this year's helicopter expo, it will present to the audience a flight show integrating practical combat tactics. [A 55-second video with the above text, showing up to 8 helicopters flying in formation together.]

The 7th China Helicopter Expo Kicks Off

Source: China Military Online

Editor: Cheng Sihao

2025-10-16

Z-19, Z-20, Z-10, Z-8L helicopters attached to the Chinese PLA Army's aviation troops are displayed in static during the 7th China Helicopter Exposition. The event is held from October 16 to 19 in Tianjin, north China. (eng.chinamil.com.cn)

TIANJIN, Oct. 16 -- The 7th China (Tianjin) Helicopter Exposition opened today in Tianjin Airport Economic Area. Multiple military and civilian helicopters, along with low-altitude aircraft, made their debuts at the event.

This helicopter expo will run for four days. A total of 52 aircraft are participating in the exhibition and demonstrations, including helicopters, unmanned aerial vehicles (UAVs), and electric vertical

take-off and landing aircraft. Of these, 38 are helicopters, including the Z-10, Z-19, Z-20, Z-20T, Z-8L helicopters attached to the Chinese PLA Army's aviation troops, some civilian helicopters such as KVD001 and KVD002 UAVs, AVIC's AC312E and AC311A, as well as some international models such as Leonardo AW139 and Airbus H135.

The Chinese PLA Army's participation primarily features static display, aerial performance, and indoor exhibition. The static display showcases active-duty combat equipment of the PLA Army's aviation and air assault troops, including helicopters, UAVs, and airborne weapons. The flight demonstration highlights the handling qualities and combat capabilities of China's domestically-produced helicopters. The indoor exhibition utilizes graphics, videos, and other media to showcase the achievements of the development of PLA Army's aviation troops.

The China (Tianjin) Helicopter Expo is recognized as China's only state-level international helicopter professional exhibition, and has been successfully held six times since its inception in 2011.

2025-10-19

A combined-arms brigade assigned to the Chinese PLA 74th Group Army recently organized its artillery troops to conduct a round-the-clock live-fire training exercise.

Soldiers of the artillery troops coordinated well with each other and fired a salvo of shells to saturate the enemy area in a rapid and effective way.

Featuring multiple artillery pieces, fast pace and high intensity, the live-fire training tested the artillery troops’ capabilities of quick response, precise strike and efficient destruction.

Chinese, Indian Troops Exchange Sweets Along Border on Diwali

Source Ecns.cn [The official English-language website of China News Service (CNS)]

Editor Huang Panyue

2025-10-23

Chinese and Indian soldiers shared sweets at several points along the Line of Actual Control (LAC) on October 21 to celebrate Diwali, India's festival of lights, Indian media reported.

Yu Jing, spokesperson for the Chinese Embassy in India, confirmed the exchange on social media platform X, calling it a "gesture of goodwill" between the troops. Indian military sources also confirmed the exchange.

The tradition of exchanging sweets between Chinese and Indian soldiers during major festivals was suspended after the Galwan Valley conflict in 2020 but resumed during Diwali last year.

In recent months, China and India have maintained communication through diplomatic and military channels to manage differences and promote stability along the border.

In July, the two countries co-chaired the 34th Meeting of Working Mechanism for Consultation and Coordination on Border Affairs during which both sides spoke positively of progress in managing the border situation and agreed to continue dialogue.

In August, the 24th round of talks between the special representatives of China and India on the boundary question was held in New Delhi. The two sides exchanged views on early harvests of boundary negotiations, reaffirming their willingness to give full play to the role of the Special Representatives meeting mechanism, and to explore fair, reasonable, and mutually acceptable solutions based on mutual respect and understanding in line with the political parameters and guiding principles agreed upon in 2005. They also agreed to strengthen regular boundary management and control, and to maintain peace and stability in the border areas jointly.

PLA Army Brigade Conducts Large Formation Night Flight Training

Source China Military Online

Editor Huang Panyue

2025-10-26

An army aviation brigade assigned to the Chinese PLA 78th Group Army recently organized multiple helicopters of different models to conduct night flight training exercise. The helicopters took off in succession, forming large formations and rapidly maneuvering to the predetermined areas.

The training requires the pilots to maintain proper distance between aircraft while ensuring close-range communication, and overcome multiple challenges including natural conditions and physical fatigue.

12th International Army Cadets Week to be Held: Defense Spokesperson

Source China Military Online

Editor Li Jiayao

2025-10-30

BEIJING, Oct. 30 -- The Chinese PLA Army Engineering University will host the 12th International Army Cadets Week (IACW) from November 2 to 9, 2025, said Senior Colonel Zhang Xiaogang, spokesperson for China's Ministry of National Defense, at a regular press conference on Thursday.

According to the spokesperson, over 30 cadets from military academies of 13 countries including Pakistan, Serbia and Brazil will join their counterparts from the Chinese PLA Army Engineering University and the Chinese PLA Army Infantry Academy to take part in the event.

Under the theme of the Impact of New-domain and New-quality Forces to Future Warfare, this year's IACW will have discussions on such topics as the impact of unmanned equipment development to future warfare and winning the modern warfare in contested environments, said the spokesperson, adding that the IACW is a platform for Chinese and foreign military academies to deepen practical cooperation with each other.

International Army Cadets Week Kicks Off in China

Source China Military Online

Editor Zhang Jinwen

2025-11-04

By Wei Yinchu and Xiao Liming

NANJING, Nov. 4 -- The 12th International Army Cadets Week (IACW), organized by the Army Engineering University of PLA, kicked off in Nanjing City, east China's Jiangsu Province, on November 3, 2025. Foreign cadets from military academies of 13 countries including Pakistan, Serbia, and Brazil, are organized into mixed groups with those from 8 Chinese PLA Army academies to participate in training and exchange activities for one week.

Under the theme of the "Impact of New-domain Forces with New Combat Capabilities on Future Warfare", this year's IACW will hold special discussions on such topics as the impact of unmanned equipment development on future warfare and winning modern warfare in confrontational environments, to further deepen practical cooperation between Chinese and foreign military academies.

During the event, Chinese and foreign cadets will participate in Model UN conferences, seminars, leadership contests, equipment tours, cultural experiences, and other activities. Besides, all cadets will have dialogues focusing on the ethical norms and application boundaries of artificial intelligence in military training and future warfare, and exchange views on the latest developments in military science and technology.

The IACW has been successfully held for 11 consecutive editions since its inception in 2005. As an important platform for army academies from various countries to exchange ideas and learn from

each other, the event has played a positive role in promoting international military education cooperation and enhancing friendly exchanges between Chinese and foreign militaries.

12th International Army Cadets Week Conducts Live-fire Shooting Competition

Source China Military Online

Editor Cheng Sihao

2025-11-07

BEIJING, Nov. 7 -- On Friday, the 12th International Army Cadets Week (IACW) conducted a live-fire shooting competition inside a firing range building. The cadets from 14 countries Chinese and foreign cadets learned from each other during the intense contest to enhance their operational capabilities. Some females participated.

In the automatic rifle live-fire shooting session, many foreign cadets were greatly excited by their initial use of Chinese firearms. The PLA used the PLA QBQZ95-1 automatic rifles.

During the subject of automatic rifle coordinated fire strike, the participating teams allocated firepower resources appropriately based on their independent assessment of the battlefield situation. The team composed of two cadets from Thailand achieved first place.

Live-fire Exercise on Plateau

Source: China Military Online

Editor: Chen Zhuo

2025-11-15

By Huang Haipeng

BEIJING, Nov. 15 -- Soldiers assigned to an artillery detachment under the Chinese PLA Army participated in a live-fire training exercise with 122 mm vehicle-mounted howitzers in the hinterland of plateau at an altitude of 4,500 meters.

The troops simulated real-combat scenarios under extreme environments, focusing on testing the mobility deployment, fire strike and coordinated combat capability in high-altitude and low-oxygen conditions.

Next, the detachment will carry out specialized training centering on nighttime shooting, extreme-range strike, and other subjects. [A 59-second video with the above text.]

Troops assigned to the Chinese People’s Liberation Army (PLA) Western Theater Command attend the opening ceremony for the China-Pakistan joint anti-terrorist exercise “Warrior-IX” held at the National Counter Terrorism Center (NCTC) in Pabbi, Pakistan on December 1, 2025.

BEIJING, Dec. 3 -- The opening ceremony for the China-Pakistan joint anti-terrorist exercise “Warrior-IX” was held at the National Counter Terrorism Center (NCTC) in Pabbi, Pakistan, on December 1, 2025.

The exercise features smarter equipment, realistic training subjects and closer joint operations. Participating troops of the two sides will conduct mixed-group training, actual-force drills and a series of exchange activities.

The commander of the Chinese participating troops stated that they will uphold the spirit of previous China-Pakistan joint anti-terrorist exercises, work with the Pakistani side to jointly

promote the pragmatic counter-terrorism cooperation and joint operation capabilities of both nations to a new level.

Chinese Troops Arrive in Singapore for Exercise Cooperation-2025 Joint Army Training

Source: China Military Online

Editor: Li Weichao

Time: 2025-12-08

SINGAPORE, Dec. 8 -- A Y-20 transport aircraft carrying the Chinese troops participating in the China-Singapore Exercise Cooperation-2025 joint army training arrived at the Changi Air Base, Singapore on December 8, 2025.

It marks the seventh event of the series of Exercise Cooperation joint army training held by the Chinese and Singaporean armies. With the theme of “Joint Counter Terrorism Operations in Urban Environment”, the joint training aims to enhance the collaborative capabilities of the two militaries in joint counter-terrorism operations.

The Chinese participating troops are selected from a brigade assigned to the Chinese PLA 74th Group Army. Over the next ten days, the two sides will conduct all-round exchanges in operational command, tactics application, and logistic support during urban counter-terrorism operations, by means of mixed-group training, joint command and coordinated actions. Together, they will explore new tactics and approaches for modern urban counter-terrorism operations and jointly enhance their capabilities to address non-traditional security threats.

By Wang Lianbin, Zeng Kai, Yan Xianpeng, Liu Haitao, Yang Mingyue, Tian Tongcan, Wei Jingliang, Wang Jihua and Wang Jianghao

BEIJING, Dec. 10 – The China-Pakistan “Warrior-IX” joint anti-terrorist exercise is being conducted at the National Counter Terrorism Center (NCTC) in Pabbi, Pakistan.

The participating troops of the two militaries carried out mixed-group training in multiple subjects as per the schedule.

The Chinese participating troops are selected from the Chinese PLA Western Theater Command. The joint exercise is divided into two phases: mixed-group training and live-fire drills.

This is the ninth joint military exercise of the “Warriors” series between China and Pakistan. This exercise has become an important platform for the two militaries to carry out counter-terrorism cooperation.

In the next phase, both sides' participating troops will conduct joint live-fire drills focusing on the subject of joint anti-terrorist elimination and suppression operations.

Tank Killer: HJ-12 Anti-Tank Missile

Source China Military Online

Editor Chen Zhuo

Time 2025-12-12

HJ-12 anti-tank missile, a new member of the Chinese PLA's Hongjian (HJ) Missile Family, is also known as the "Tank Killer".

It consists of an aiming unit and a tube-launched missile. It features fewer components and higher maneuverability.

The system has a compact, low-thrust ejection motor that can push the missile out of launch tube at very low initial velocity.

The HJ-12 can be fired from three postures, namely standing, kneeling, and prone.

As an intelligent precision-strike weapon for individual soldiers, the HJ-12 is capable of fire-and-forget operation.

To be specific, the missile locks onto the target before launch, and then autonomously tracks it until impact.

After launch, the shooter remaining concealed can quickly reload, or reposition, which significantly enhances battlefield survivability.

China-Pakistan “Warrior-IX” Joint Anti-Terrorist Exercise Wraps Up

Source: China Military Online

Editor: Huang Panyue

Time: 2025-12-15

By Wang Lianbin, Liu Haitao, Zeng Kai, Yan Xianpeng, Yang Mingyue, Tian Tongcan, Wei Jingliang and Wang Jianghao

BEIJING, Dec. 15 -- The Chinese troops participating in the China-Pakistan “Warrior-IX” joint anti-terrorist exercise completed their 10-plus-day mixed-group training and live-force drills in Pakistan, and returned to China on December 14, 2025.

Set in the scenario of jointly combating terrorism, the exercise focused on the subject of “joint anti-terrorist elimination and suppression operations”. Participating troops from China and Pakistan, by way of mixed-group training, jointly completed the equipment operations, live-fire shooting, individual counter-terrorism skills, group counter-terrorism tactics and other subjects, comprehensively tempering their coordinated operational capabilities.

Both sides’ troops conducted live-fire and live-force drills at the National Counter Terrorism Center (NCTC) in Pabbi, Pakistan. They also completed key subjects including drone reconnaissance and countermeasures, joint fire strikes, and airborne assaults, testing the real-combat effectiveness of joint counter-terrorism operations.

During the exercise, the two sides also held sports matches, cultural exchanges, and other activities, promoting mutual understanding through interactions and further consolidating traditional friendship between the two militaries. [This article has 17 different photos and website links, including two photos of PLAA helicopters in flight.]

SINGAPORE, Dec. 16 (Xinhua) -- Participants from both sides of the China-Singapore joint army training recently conducted field drills focused on urban counter-terrorism operations.

The exercise moved from Jurong Camp to SAFTI City, Singapore's first high-rise urban training facility, launched in March and equipped with smart instruments for real-time feedback.

Commanders from China and Singapore set up a joint command structure and carried out command post drills using physical models and digital imagery to plan and coordinate missions.

In the live exercises, mixed China-Singapore units conducted coordinated operations, fully leveraging the synergy between manned and unmanned forces. Reconnaissance robots and drones were used to support simulated encirclement, sniper control, rapid entry, firepower strikes and hostage rescue.

"Urban counter-terrorism is like dancing on the edge of a blade, as every movement has to be precise," said Liu Shoutao, a Chinese commander.

Operating in dense, high-rise settings, the exercises improved the ability of the mixed units to respond to rapidly changing situations, strengthen coordination and conduct precision strikes, helping build experience for future urban counter-terrorism missions, Liu said.

SINGAPORE, Dec. 17 (Xinhua) -- China and Singapore concluded a joint army training on Wednesday, the latest round of a bilateral exercise that has expanded over time from conventional security cooperation to highly complex urban counter-terrorism operations.

The exercise, known as Exercise Cooperation, was launched in 2009 and held its seventh edition this year, which began on Dec. 10 and focused on joint urban counter-terrorism drills.

A closing ceremony was held at Jurong Camp in Singapore, where troops from both sides sang their national anthems. Heads of the Chinese and Singaporean observer delegations jointly reviewed the participating units and presented certificates to outstanding personnel.

The head of the Singaporean observer delegation said the two sides had been encouraging each other and completing the urban counter-terrorism drills with strong commitment and professional standards.

The head of the Chinese observer delegation said that, amid a complex and changing international situation, the two militaries should strengthen cooperation and, with greater resolve and more practical actions, make new and greater contributions to maintaining regional peace and stability and to building a community with a shared future for humanity.

New Equipment Empowers China's Army Training Base

Source: China Military Online

Editor: Li Weichao

Time: 2025-12-21

The application and deployment of new high-tech equipment, including intelligent command system and unmanned weapons and vehicles, has in recent years enabled the Chinese PLA Army's Sanjie Training Base [in Anhui Province] to set up more realistic battlegrounds and help hone the army troops' combat capabilities in real confrontation scenarios.

The Sanjie Training Base serves as multi-domain joint training platform that integrates different services and arms and meets the training requirements of joint operations.

Gunship Training: An army brigade assigned to Chinese PLA Xinjiang Military Command recently organized a day-and-night flight training exercise involving multiple types of helicopters. The exercise covered such subjects as ultra-low-altitude penetration and multi-target precision strikes in electromagnetic environment, and tested the pilots' capabilities in responding to emergencies under complex conditions.

PLA Army Troops Explore Tactical Application of Unmanned Equipment

Source China Military Online

Editor Lin Congyi

Time 2025-12-28

During an assault operation training exercise conducted in east China's Jiangsu Province, a unit assigned to the Chinese PLA Army sent out the unmanned ground vehicles (UGVs) for reconnaissance and dispatched a team consisting of infantry soldiers and unnamed assault breaching vehicles to pass through the "minefield".

During the operation, the army soldiers provided cover for the unmanned breaching vehicles, which improved the troops' breakthrough efficiency and reduced casualties.
